"Professional development hour" or "PDH" means one hour of participation in an organized educational activity related to engineering, biological or chemical sciences, a closely related technical or scientific discipline, or operations management.

"Public water system" has the same meaning prescribed in A.R.S. § 49-352.

"Qualifying discipline" means engineering, biology, chemistry, or a closely related technical or scientific discipline.

"Qualifying experience" means experience, skill, or knowledge obtained through employment that is applicable to the technical or operational control of all or part of a facility.

"Remote operator" means an operator who is not an onsite operator.

"Validated examination" means an examination that is approved by the Department after being reviewed to ensure that the examination is based on the class and grade of a system or facility.

"Wastewater" means sewage, industrial waste, and all other waterborne waste that may pollute any lands or waters of the state.

"Wastewater treatment plant" means a process, device, or structure used to treat or stabilize wastewater or industrial waste and dispose of the effluent.

"Water treatment plant" means a process, device, or structure used to improve the physical, chemical, or biological quality of the water in a public water system.

Historical Note

Former Section R9-20-504 repealed, new Section R9-20-504 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-504 amended, renumbered as Section R9-20-501, then renumbered as Section R18-4-101 effective October 23, 1987 (Supp. 87-4). R18-5-101 recodified from R18-4-101 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 7 A.A.R. 5079, effective October 16, 2001 (Supp. 01-4). Amended by final rulemaking at 11 A.A.R. 998, effective April 2, 2005 (Supp. 05-1).

R18-5-102. Applicability

A. The rules in this Article apply to owners and operators of facilities in Arizona.

B. The following facilities are exempt from the requirements of this Article:

1. A public water system that meets the nonapplicability criteria in R18-4-102.
2. A septic tank or collection system that discharges to a septic tank.
3. A collection system that serves 2,500 or fewer persons and discharges into a facility that is operated by a certified operator.

4. A collection system that serves a nonresident population and discharges into a collection system operated by a certified operator.
5. An irrigation system, an industrial water facility, or a similar facility in which water is not used for domestic or drinking purposes.
6. An irrigation or industrial wastewater facility used to treat, recycle, or impound industrial or agricultural wastes within the boundaries of the industrial or agricultural property.
7. An industrial waste pretreatment facility in which treated wastewater is released to a collection system or wastewater treatment plant that is regulated by this Article.
8. A facility for treating industrial wastes that are not treatable by biological means.
9. A facility used to impound surface water before the water is conducted to a water treatment plant.
10. A wastewater treatment device that serves a home.

Historical Note
Adopted as Section R9-20-502 and renumbered as Section R18-4-102 effective October 23, 1987 (Supp. 87-4). R18-5-102 recodified from R18-4-102 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 7 A.A.R. 5079, effective October 16, 2001 (Supp. 01-4).

R18-5-103. Certification Committee

A. Upon the effective date of this rule, the Director shall establish a certification committee to make recommendations and to provide the Department with technical advice and assistance related to this Article when requested.

B. The certification committee shall consist of 11 members as follows:
1. One employee of the Department;
2. One currently employed wastewater treatment plant operator with Grade 4 certification;
3. One currently employed water treatment plant operator with Grade 4 certification;
4. One currently employed wastewater collection system operator with Grade 4 certification;
5. One currently employed water distribution system operator with Grade 4 certification;
6. One faculty member teaching sanitary sciences at an Arizona university or community college;
7. One professional engineer, registered and residing in Arizona, engaged in consulting in the field of sanitary engineering;
8. One elected or appointed municipal official;
9. One representative of an investor-owned water or wastewater facility;
10. One representative of a small public water system; and
11. One currently employed remote operator representative.

C. The Director shall appoint each certification committee member.

D. The certification committee shall meet at least twice a year. At the first meeting of each calendar year, the certification committee shall select, from its membership, a chairperson and other officers as necessary. The Department's certification committee member is the executive secretary, who is responsible for keeping records of all meetings.

E. The term of a certification committee member is three years.

F. A meeting quorum consists of the chairperson or the chairperson's designated representative, the executive secretary or the executive secretary's designated representative, and three other members of the committee.

G. In the event of a vacancy caused by death, resignation, or removal for cause, the Director shall appoint a successor for the unexpired term.

H. A certification committee member may be reappointed, but a member shall not serve more than three consecutive terms.

Historical Note
Former Section R9-20-505 repealed, new Section R9-20-505 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-505 amended, renumbered as Section R9-20-503, then renumbered as Section R18-4-103 effective October 23, 1987 (Supp. 87-4). R18-5-103 recodified from R18-4-103 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-104. General Requirements

A. A facility owner shall ensure that at all times:
1. A facility has an operator in direct responsible charge who is certified for the class of the facility and at or above the grade of the facility;
2. An operator makes all decisions about process control or system integrity regarding water quality or water quantity that affects public health; however, an administrator who is not a certified operator may make a planning decision regarding water quality or water quantity if the decision is not a direct operational process control or system integrity decision that affects public health;
3. An operator who is in direct responsible charge of more than one facility is certified for the class of each facility and at or above the grade of the facility with the highest grade;
4. An operator who replaces the operator in direct responsible charge does not begin operation of the facility before being certified for the applicable class and at or above the grade of the facility;
5. In the absence of the operator in direct responsible charge, the operator in charge of the facility is certified for the applicable class of facility and at a grade no lower than one grade below the grade of the facility; and
6. The names of all current operators are on file with the Department.

B. If the owner of a facility replaces an operator in direct responsible charge with another operator, the facility owner shall notify the Department in writing within 10 days of the replacement.

C. An operator shall notify the Department in writing within 10 days of the date the operator either ceases operation of a facility or commences operation of another facility.

D. An operator shall operate each facility in compliance with applicable state and federal law.

E. A facility owner shall ensure that a Grade 3 or Grade 4 facility has an onsite operator.

F. An operator holding certification in a particular class and grade may operate one or more Grade 1 or Grade 2 facilities as a remote operator if the facility owner ensures that the following requirements are met:
1. The remote operator is certified for the class of each facility and at or above the grade of each facility operated by the remote operator.
2. There is an onsite representative on the premises of each Grade 1 or Grade 2 facility, except for a Grade 1 water distribution system that serves fewer than 100 people, which is not required to have an onsite representative if the conditions of subsection (F)(8) are met. The onsite representative is not required to be an operator if the

facility has a remote operator who is certified at or above the grade of the facility.

3. The remote operator instructs, supervises, and provides written instructions to the onsite representative in the proper operation and maintenance of each facility and ensures that adequate records are kept.
4. The remote operator provides the onsite representative with a telephone number at which the remote operator can be reached at all times. If the remote operator is not available for any reason, the remote operator shall provide the onsite representative with the name and telephone number of a qualified substitute operator who will be available while the remote operator is not available.
5. The remote operator resides no more than 200 miles by ground travel from any facility that the remote operator serves.
6. The remote operator operates each facility in compliance with applicable state and federal laws.
7. The remote operator inspects a facility as often as necessary to ensure proper operation and maintenance, but in no case less than:
   a. Monthly for a Grade 1 or Grade 2 water treatment plant or distribution system that produces and distributes groundwater;
   b. Monthly for a Grade 1 wastewater treatment plant;
   c. Twice a month for a collection system that serves fewer than 2,500 people; and
   d. Weekly for a Grade 2 wastewater treatment plant or collection system that serves fewer than 1,000 people.
8. For a Grade 1 water distribution system that does not have an onsite representative and serves fewer than 100 people, the following conditions are met:
   a. The name and telephone number at which the remote operator can be reached is posted at the facility, enclosed with water bills, or otherwise made readily available to water users. If the remote operator is not available for any reason, the remote operator shall post at the facility the name and telephone number of a substitute operator of the applicable facility class and grade who will be available while the remote operator is not available;
   b. The remote operator or substitute operator resides no more than 200 miles by ground travel from the facility; and
   c. The remote operator inspects the facility weekly.

Historical Note

Former Section R9-20-506 repealed, new Section R9-20-506 adopted effective November 1, 1979 (Supp. 79-6). Amended effective March 19, 1980 (Supp. 80-2). Former Section R9-20-506 amended, renumbered as Section R9-20-504, then renumbered as Section R18-4-104 effective October 23, 1987 (Supp. 87-4). R18-5-104 recodified from R18-4-104 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 7 A.A.R. 5079, effective October 16, 2001 (Supp. 01-4). Amended by final rulemaking at 11 A.A.R. 998, effective April 2, 2005 (Supp. 05-1).

R18-5-105. Certification

A. The Department shall issue an operator certificate to an applicant if the applicant:
1. Meets the experience and education requirements in R18-5-112 for the applicable class and grade,
2. Passes a written examination for the applicable class and grade, and
3. Has not had an operator's certificate revoked in Arizona or permanently revoked in another jurisdiction.

B. To apply for operator certification, an applicant shall submit or arrange to have submitted to the Department the following information, as applicable, in a format acceptable to the Department:
1. The applicant's full name, Social Security number, and operator number;
2. The applicant's current mailing address, home and work telephone numbers, fax number, and e-mail address;
3. The applicant's place of employment, including the facility identification number;
4. The class and grade of the facility where the applicant is employed;
5. Proof of successful completion of the examination for the applicable class and grade; and
6. Documentation of the applicant's experience and education required under R18-5-112.

Historical Note

Former Section R9-20-507 repealed, new Section R9-20-507 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-507 amended, renumbered as Section R9-20-505, then renumbered as Section R18-4-105 effective October 23, 1987 (Supp. 87-4). R18-5-105 recodified from R18-4-105 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 14 A.A.R. 4527, effective January 31, 2009 (Supp. 08-4).

R18-5-106. Examinations

A. The Department shall provide for examinations for certification of operators. The Department may contract with third party examiners for administration of examinations, based on its assessment of the quality of the examination services. The Department shall ensure that a list of approved examiners is available upon request.

B. The Department shall validate all examinations before administration. Each examination shall include topics such as treatment technologies, system maintenance, regulatory protocols, safety, mathematics, and general system management.

C. The examiner shall grade the examination and make the results available to the applicant and the Department within seven days of the date of the examination.

D. An applicant shall not be admitted to an examination without a valid picture I.D.

E. An individual shall make a score of 70 percent on the examination in order to attain a passing grade.

Historical Note

Adopted effective March 19, 1980 (Supp. 80-2). Former Section R9-20-508 amended, renumbered as Section R9-20-506, then renumbered as Section R18-4-106 effective October 23, 1987 (Supp. 87-4). Amended subsection (F) effective November 30, 1988 (Supp. 88-4). R18-5-106 recodified from R18-4-106 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-107. Certificate Renewal

A. If the Department renews a certificate, the certificate is renewed for three years, unless the operator requests a shorter renewal period in writing.

B. To renew a certificate, an operator shall complete and submit to the Department an operator certificate renewal form

approved by the Department. An operator shall maintain documentation and provide the documentation to the Department upon request to verify completion of at least 30 PDHs accumulated during a certification period. The operator shall provide documentation of PDHs in a format acceptable to the Department. At least 10 of the PDHs shall directly relate to the specific job functions of the operator. If an operator holds multiple certificates, the operator may apply required PDHs to all certificates if the PDHs are acquired within the applicable certification period. The operator's supervisor or the entity that provides the education or training shall verify completion of each PDH in writing. An operator shall maintain documentation of completion of PDHs for a minimum of five years.

C. As an alternative to the requirements of subsection (B), an operator may renew a certificate by taking and passing an examination for the applicable class and grade.

Historical Note

Former Section R9-20-509 repealed, new Section R9-20-509 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-509 amended, renumbered as Section R9-20-507, then renumbered as Section R18-4-107 effective October 23, 1987 (Supp. 87-4). Amended subsection (B) effective November 30, 1988 (Supp. 88-4). R18-5-107 recodified from R18-4-107 (Supp. 95-1). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 11 A.A.R. 998, effective April 2, 2005 (Supp. 05-1).

R18-5-108. Certificate Expiration

A. A certificate expires on the expiration date printed on the certificate. An operator may reinstate an expired certificate for the same class and grade without examination if the operator files the documentation required in R18-5-107(B) with the Department within 90 days of the certificate expiration date.

B. If an expired certificate is not renewed within 90 days of the certificate expiration date, the Department shall not reinstate the certificate. To be recertified, the operator shall reapply and be reexamined as a new applicant.

Historical Note

Former Section R9-20-510 repealed, new Section R9-20-510 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-510 amended, renumbered as Section R9-20-508, then renumbered as Section R18-4-108 effective October 23, 1987 (Supp. 87-4). Amended subsection (D) effective November 30, 1988 (Supp. 88-4). R18-5-108 recodified from R18-4-108 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-109. Denial, Suspension, Probation, and Revocation

A. If the Department decides to deny, suspend, or revoke a certificate, or to place an operator on probation, the Department shall act in accordance with A.R.S. Title 41, Chapter 6, Article 10 and 18 A.A.C. 1, Article 2.

B. The Department may revoke or suspend a certificate, or place an operator on probation, if the Department finds that the operator:

1. Operates a facility in a manner that violates federal or state law;
2. Negligently operates a facility or negligently supervises the operation of a facility;
3. Fails to comply with a Department order or order of a court;
4. Obtains, or attempts to obtain, a certificate by fraud, deceit, or misrepresentation;
5. Engages in fraud, deceit, or misrepresentation in the operation or supervision of a facility;
6. Knowingly or negligently prepares a false or fraudulent report or record regarding the operation or supervision of a facility;
7. Endangers the public health, safety, or welfare;
8. Fails to comply with the terms or conditions of probation or suspension; or
9. Fails to cooperate with an investigation by the Department including failing or refusing to provide information required by this Article.

C. The Department shall deny certification to an applicant who does not meet the requirements of R18-5-105 or R18-5-110, or who is ineligible for certification pursuant to a Department order or order of a court.

D. The Department may place an operator on probation or suspend an operator's certificate to address deficiencies in operator performance. The terms of probation or suspension may include completion of additional PDHs, increased reporting of operator activity, limitations on activities the operator may perform, or other terms to address deficiencies in operator performance.

E. During the period of suspension, an individual whose certificate is suspended shall not operate a facility of the class of the suspended certificate.

F. An operator whose certificate is suspended or revoked, or who has been placed on probation, shall immediately notify the owner of a facility where the operator is employed of the suspension, revocation, or probation.

Historical Note

Former Section R9-20-511 repealed, new Section R9-20-511 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-511 amended, renumbered as Section R9-20-509, then renumbered as Section R18-4-109 effective October 23, 1987 (Supp. 87-4). R18-5-109 recodified from R18-4-109 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 11 A.A.R. 998, effective April 2, 2005 (Supp. 05-1). Amended by final rulemaking at 14 A.A.R. 4527, effective January 31, 2009 (Supp. 08-4).

R18-5-110. Reciprocity

The Department shall issue a certificate to an applicant who holds a valid certificate from another jurisdiction, if the applicant:

1. Passes a written, validated examination in Arizona or in another jurisdiction that administers an examination that is substantially equivalent to the examination in Arizona and validated by the Department, and
2. Submits written evidence of the experience and education required under R18-5-112.

Historical Note

Former Section R9-20-512 repealed, new Section R9-20-512 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-512 amended, renumbered as Section R9-20-510, then renumbered as Section R18-4-110 effective October 23, 1987 (Supp. 87-4). Amended subsection (B) effective November 30, 1988 (Supp. 88-4). R18-5-110 recodified from R18-4-110 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-111. Repealed

Historical Note
Adopted as Section R9-20-511 and renumbered as Section R18-4-111 effective October 23, 1987 (Supp. 87-4). R18-5-111 recodified from R18-4-111 (Supp. 95-2). Section repealed by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-112. Experience and Education

A. The Department shall consider the following criteria to determine whether an applicant has the experience and education required for certification in a specific class and grade:
1. Years of experience at a lower grade;
2. Qualifying experience in the same or a related field; and
3. Education in a qualifying discipline.

B. An applicant shall provide written evidence of education in a qualifying discipline. The applicant shall provide transcripts if the Department determines that the transcripts are necessary to verify completion of the education requirements.

C. An applicant shall provide written evidence of qualifying experience in the applicable facility class.

D. An applicant shall meet the following requirements for admission to a certification examination:
1. For Grade 1, high school graduation or the equivalent.
2. For Grade 2, at least:
   a. High school graduation or the equivalent and one year of qualifying experience as a Grade 1 operator or the equivalent of a Grade 1 operator in another jurisdiction;
   b. Two years of postsecondary education in a qualifying discipline and one year of qualifying experience, including six months as a Grade 1 operator or the equivalent of a Grade 1 operator in another jurisdiction; or
   c. A bachelor's degree in a qualifying discipline and six months of qualifying experience.
3. For Grade 3, at least:
   a. High school graduation or the equivalent and two years of qualifying experience, including one year as a Grade 2 operator or the equivalent of a Grade 2 operator in another jurisdiction;
   b. Two years of postsecondary education in a qualifying discipline, and 18 months of qualifying experience as a Grade 2 operator or the equivalent of a Grade 2 operator in another jurisdiction; or
   c. A bachelor's degree in a qualifying discipline and one year of qualifying experience.
4. For Grade 4, at least:
   a. High school graduation or the equivalent and three years of qualifying experience, including one year as a Grade 3 operator or the equivalent of a Grade 3 operator in another jurisdiction;
   b. Two years of postsecondary education in a qualifying discipline and 30 months of qualifying experience, including one year as a Grade 3 operator or the equivalent of a Grade 3 operator in another jurisdiction; or
   c. A bachelor's degree in a qualifying discipline, and two years of qualifying experience.

Historical Note
Former Section R9-20-517 repealed, new Section R9-20-517 adopted effective November 1, 1979 (Supp. 79-6). Amended effective March 19, 1980 (Supp. 80-2). Former Section R9-20-517 amended, renumbered as Section R9-20-512, then renumbered as Section R18-4-112 effective October 23, 1987 (Supp. 87-4). R18-5-112 recodified from R18-4-112 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 7 A.A.R. 5079, effective October 16, 2001 (Supp. 01-4).

R18-5-113. Classes of Facilities

A. The Department shall classify a facility in one of four classes:
1. Water treatment plant,
2. Water distribution system,
3. Wastewater treatment plant, or
4. Wastewater collection system.

B. The Department shall classify a facility as one of four grades, Grades 1–4. The grade corresponds with the level of system complexity, with Grade 1 being the most simple and Grade 4 being the most complex.

C. For a multi-facility system, the Department shall grade each facility according to complexity and the total population or population equivalent served.

Historical Note
Adopted as Section R9-20-513 and renumbered as Section R18-4-113 effective October 23, 1987 (Supp. 87-4). Amended subsections (A) and (C) effective November 30, 1988 (Supp. 88-4). R18-5-113 recodified from R18-4-113 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

R18-5-114. Grades of Wastewater Treatment Plants and Collection Systems

The Department shall grade a wastewater treatment plant or collection system according to population equivalent served, degree of hazard to public health, class of facility, and degree of treatment, as follows:
1. Grade 1 includes:
   a. A stabilization pond that serves 2,000 or fewer persons;
   b. A wastewater treatment plant not designated as Grade 2, 3, or 4; or
   c. A collection system that serves 2,500 or fewer persons.
2. Grade 2 includes:
   a. A stabilization pond that is designed to serve more than 2,000 persons;
   b. An aerated lagoon;
   c. A facility that employs biological treatment based upon the activated sludge principle or trickling filters and is designed to serve 5,000 or fewer persons, except as provided in subsection (3)(c); or
   d. A collection system that serves between 2,501 to 10,000 persons.
3. Grade 3 includes:
   a. A facility that employs biological treatment based upon the activated sludge principle and is designed to serve 5,001 to 20,000 persons;
   b. A facility that employs trickling filtration and is designed to serve 5,001 to 25,000 persons;
   c. A variation of biological treatment based on the activated sludge principle that requires specialized knowledge, including contact stabilization, and is designed to serve 20,000 or fewer persons; or
   d. A collection system that serves 10,001 to 25,000 persons.
4. Grade 4 includes:

a. A facility that employs biological treatment based upon the activated sludge principle and is designed to serve more than 20,000 persons;
b. A facility that employs trickling filtration and is designed to serve a population equivalent more than 25,000 persons; or
c. A collection system that serves more than 25,000 persons.

Historical Note

Former Section R9-20-519 repealed, new Section R9-20-519 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-519 amended, renumbered as Section R9-20-514, then renumbered as Section R18-4-114 effective October 23, 1987 (Supp. 87-4). R18-5-114 recodified from R18-4-114 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended to correct manifest typographical error in subsection (3)(d) (Supp. 01-3).

R18-5-115. Grades of Water Treatment Plants and Distribution Systems

A. Grading of water treatment plants. This subsection does not apply to a facility that distributes water but does not treat water or to a facility that distributes water and disinfects by chlorine gas or hypochlorite only to maintain disinfection levels in the distribution system. The Department shall grade a water treatment plant according to the sum of the points it the Department assigns for each plant characteristic.

1. The Department shall assign points for the purpose of grading a water treatment plant as follows:

Plant Characteristics	**Points**
Population	1 per 5,000
Maximum Design Capacity	1 per Millions of Gallons per Day up to 10
Groundwater Source	3
Surface or Groundwater Under the Direct Influence of Surface Water Source	5
Carbon Dioxide	2
pH Adjustment	3
Packed Tower Aeration	6
Air Stripping	6
Stability or Corrosion Control	3
Taste and Odor	8
Iron/Manganese Removal	8
Ion Exchange Softening	10
Chemical Precipitation Softening	15
Coagulant Addition	6
Flocculation	4
Sedimentation	4
Upflow Clarification	2
Fluoridation	5
Activated Alumina	6
Blending	5
Residual Waste Stream	5
Control Systems Technology	2
Biologically Active Filter	20
Granular Media Filter	15
Pressure Filter	15
Gravity Sand Filter	10
Membrane Filtration	15
Chlorine Gas	6
Hypochlorite Liquid	2
Hypochlorite Solid	2
Chloramine	9
Chlorine Dioxide	9
Ozone	12
Ultraviolet	3

2. The Department shall assign a grade by the total number of points assigned to the facility, as follows:

Grade	**Point Range**
Grade 1	1 to 25
Grade 2	26 to 50
Grade 3	51 to 70
Grade 4	More than 70

B. Grading of water distribution systems. The Department shall grade a distribution system according to the sum of the points the Department assigns for each system characteristic.

1. The Department shall assign points for the purpose of grading a distribution system as follows:

System Characteristics	**Points**
Population	1 per 5,000
Maximum Design Capacity	1 per Millions of Gallons per Day up to 10
Pressure Zones	5
Booster Stations	5
Storage Tanks	3
Blending	5
Fire Protection Systems/Testable Backflow Prevention Assemblies*	5
Cathodic Protection	3
Control System Technologies	2
Chlorine Gas	6
Hypochlorite Liquid	2
Hypochlorite Solid	2
Chloramine	9

Chlorine Dioxide	9

*The presence of one or both of these devices earns five points for the facility.

2. No points are added for Grade 1 small systems that:
   a. Only distribute groundwater;
   b. Serve fewer than 501 persons;
   c. Have no disinfection or disinfect by chlorine gas or hypochlorite only; and
   d. Do not store water or store water only in storage tanks.
3. The Department shall assign a grade by the total number of points assigned to the facility, as follows:

Grade	Point Range
Grade 1	0
Grade 2	1 to 20
Grade 3	21 to 35
Grade 4	More than 35

Historical Note
Former Section R9-20-520 repealed, new Section R9-20-520 adopted effective November 1, 1979 (Supp. 79-6). Former Section R9-20-520 amended, renumbered as Section R9-20-515, then renumbered as Section R18-4-115 effective October 23, 1987 (Supp. 87-4). R18-5-115 recodified from R18-4-115 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1). Amended by final rulemaking at 7 A.A.R. 5079, effective October 16, 2001 (Supp. 01-4). Amended by final rulemaking at 11 A.A.R. 998, effective April 2, 2005 (Supp. 05-1).

R18-5-116. Initial Grading and Regrading of Facilities

A. The Department shall act under A.R.S. Title 41, Chapter 6, Article 10 and 18 A.A.C. 1, Article 2 when initially grading or when regrading a facility.

B. If it is determining the initial grade of a facility or whether to regrade a facility, the Department shall consider the facility characteristics in R18-5-114 and R18-5-115, and whether:
1. The facility has special design features or characteristics that make it unusually difficult to operate;
2. The water or wastewater is unusually difficult to treat;
3. The facility uses effluent; or
4. The facility poses a potential risk to public health, safety or welfare.

C. The owner of a facility that is regraded under this Article shall ensure that the facility is operated by an operator, in compliance with this Article, no later than one year from the effective date of the facility regrading.

Historical Note
New Section adopted by final rulemaking at 7 A.A.R. 1171, effective February 16, 2001 (Supp. 01-1).

ARTICLE 2. PUBLIC AND SEMIPUBLIC SWIMMING POOLS AND SPAS

R18-5-201. Definitions

"Air induction system" means a system whereby a volume of air is induced into a hollow ducting in a spa floor, bench, or wall. An air induction system is activated by an air power blower and is separate from the water circulation system.

"Artificial lake" means a man-made lake, lagoon, or basin, lined or unlined, with a surface area equal to or greater than two acres (87,120 square feet), that is used or intended to be used for water contact recreation.

"Backwash" means the process of thoroughly cleaning a filter by the reverse flow of water through the filter.

"Barrier" means a fence, wall, building, or landscaping that obstructs access to a public or semipublic swimming pool or spa.

"Cartridge filter" means a depth, pleated, or surface-type filter component with fixed dimensions that is designed to remove suspended particles from water flowing through the filter.

"Construct" means to build or install a new public or semipublic swimming pool or spa or to enlarge, deepen, or make a major modification to an existing public or semipublic swimming pool or spa.

"Coping" means the cap on a swimming pool or spa wall that provides a finished edge around the swimming pool or spa.

"Cross-connection" means any physical connection or structural arrangement between a potable water system and the piping system for a public or semipublic swimming pool or spa through which it is possible to introduce used water, gas, or any other substance into the potable water system. A bypass arrangement, jumper connection, removable section, swivel or change-over device, or any other temporary or permanent device that may cause backflow is a cross-connection.

"Deck" means a hard surface area immediately adjacent or attached to a swimming pool or spa that is designed for sitting, standing, or walking.

"Deep area" means the portion of a public or semipublic swimming pool that is more than 5 feet in depth.

"Discharge piping" means the portion of the circulation system that carries water from the filter back to the swimming pool or spa.

"Diving area" means the area of a public or semipublic swimming pool that is designated for diving from a diving board, diving platform, or starting block.

"Fill-and-draw swimming pool or spa" means a swimming pool or spa where the principal means of cleaning is the complete removal of the used water and its replacement with potable water.

"Filtration rate" means the rate of water flowing through a filter during the filter cycle expressed in gallons per minute per square foot of effective filter area.

"Flow-through swimming pool or spa" means a swimming pool or spa where new water enters the swimming pool or spa to replace an equal quantity of water that constantly flows out.

"Freeboard" means the vertical wall section of a swimming pool or spa wall between the waterline and the deck.

"Hose bibb" means a faucet with a threaded nozzle to which a hose may be attached.

"Hydrotherapy jet" means a fitting that blends air and water and creates a high-velocity, turbulent stream of air-enriched water for injection into a spa.

"Make-up water" means fresh water used to fill or refill a swimming pool or spa.

"Maximum bathing load" means the design capacity or the maximum number of users that a public or semipublic swimming pool or spa is designed to hold.

"Natural bathing place" means a lake, pond, river, stream, swimming hole, or hot springs which has not been modified by man.

"Operate" means to run, maintain, or otherwise control or direct the functioning of a public or semipublic swimming pool or spa.

"Overflow collection system" means equipment designed to remove water from a swimming pool or spa, including gutters, overflows, surface skimmers, and other surface water collection systems of various designs and manufacture.

"Potable water" means drinking water.

"Private residential spa" means a spa at a private residence used only by the owner, members of the owner's family, and invited guests, or a spa that serves a housing group consisting of no more than three living units [for example, duplexes or triplexes].

"Private residential swimming pool" means a swimming pool at a private residence used only by the owner, members of the owner's family, and invited guests, or a swimming pool that serves a housing group consisting of no more than three living units [for example, duplexes or triplexes].

"Public spa" means a spa that is open to the public with or without a fee, including a spa that is operated by a county, municipality, political subdivision, school district, university, college, or a commercial establishment whose primary business is the operation of a spa.

"Public swimming pool" means a swimming pool that is open to the public with or without a fee, including a swimming pool that is operated by a county, municipality, political subdivision, school district, university, college, or a commercial establishment whose primary business is the operation of a swimming pool.

"Recessed treads" means a series of vertically spaced, preformed stepholes in a swimming pool wall.

"Return inlet" means an aperture or fitting through which filtered water returns to a swimming pool or spa.

"Rope and float line" means a continuous line not less than 3/4 inch in diameter that is supported by buoys and attached to opposite sides of a swimming pool to separate areas of the swimming pool.

"Semi-artificial bathing place" means a natural bathing place that has been modified by man.

"Semipublic spa" means a spa operated for the residents of lodgings such as hotels, motels, resorts, apartments, condominiums, townhouse complexes, trailer courts, mobile home parks, or similar establishments. A semipublic spa includes a spa that is operated by a neighborhood or community association for the residents of the community and their guests and any spa at a country club, health club, camp, or similar establishment where the primary business of the establishment is not the operation of a spa and where the use of the spa is included in the fee for the primary use of the establishment.

"Semipublic swimming pool" means a swimming pool operated for the residents of lodgings such as hotels, motels, resorts, apartments, condominiums, townhouse complexes, trailer courts, mobile home parks, or similar establishments. A semipublic swimming pool includes a swimming pool that is operated by a neighborhood or community association for the residents of the community and their guests and a swimming pool at a country club, health club, camp, or similar establishment where the primary business of the establishment is not the operation of a swimming pool and where the use of the swimming pool is included in the fee for the primary use of the establishment.

"Shallow area" means the portion of a public or semipublic swimming pool that is 5 feet or less in depth.

"Slip-resistant" means a surface that has a static coefficient of friction [wet or dry] of at least 0.50.

"Spa" means an artificial basin, chamber, or tank of irregular or geometric shell design that is intended only for bathing or soaking and that is not drained, cleaned, or refilled for each user. A spa may include features such as hydrotherapy jet circulation, hot water, cold water mineral baths, or an air induction system. Industry terminology for a spa includes "hydrotherapy pool," "whirlpool," "hot tub," and "therapy pool."

"Special use pool" means a swimming pool intended for competitive aquatic events, aquatic exercise, or lap swimming. A special use pool includes a wave action pool, exit pool for a water slide, swimming pool that is part of an attraction at a water recreation park, water volleyball pool, or a swimming pool with special features used for training and instruction.

"Suction outlet" means the aperture or fitting through which water is withdrawn from a swimming pool or spa.

"Suction piping" means the water circulation system piping that carries water from a swimming pool or spa to the filter.

"Swimming pool" means an artificial basin, chamber, or tank that is designed for swimming or diving.

"Turnover rate" means the number of hours required to circulate a volume of water equal to the capacity of the swimming pool or spa.

"User" means a person who uses a swimming pool, spa, or adjoining deck area.

"Wading pool" means a shallow swimming pool used for bathing and wading by small children.

"Water circulation system" means an arrangement of mechanical equipment connected to a swimming pool or spa by piping in a closed loop that directs water from the swimming pool or spa to the filtration and disinfection equipment and returns the water to the swimming pool or spa.

"Water circulation system components" means the mechanical components that are part of a water circulation system of a swimming pool or spa, including pumps, filters, valves, surface skimmers, ion generators, electrolytic chlorine generators, ozone process equipment, and chemical feeding equipment.

"Water level" means either:

a. On swimming pools and spas with skimmer systems, the midpoint of the operating range of the skimmers, or
b. On swimming pools and spas with overflow gutters, the height of the overflow rim of the gutter.

Historical Note

Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-202. Applicability

A. This Article applies to public and semipublic swimming pools and spas.

B. This Article does not apply to the following:
1. A private residential swimming pool or spa,
2. A swimming pool or spa used for medical treatment or physical therapy and supervised by licensed medical personnel,
3. A semi-artificial bathing place,
4. A natural bathing place, or
5. An artificial lake.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-203. Design Approval

A. A person shall obtain design approval from the Department before starting construction of:
1. A new public or semipublic swimming pool or spa;
2. A major modification to an existing public or semipublic swimming pool or spa. For purposes of this subsection, a major modification means a change to the shape, depth, water circulation system, or disinfection system of a public or semipublic swimming pool or spa or the installation of diving equipment at a public or semipublic swimming pool;
3. A change in use from a semipublic swimming pool to a public swimming pool; and
4. A change in use from a private residential swimming pool to a public or semipublic swimming pool.

B. An applicant for a design approval shall submit an ADEQ application form to the Department in quadruplicate with four complete sets of plans and specifications for the swimming pool or spa and the information in subsection (C).

C. The application for design approval shall include four copies of the following:
1. A general plot plan;
2. Plans and specifications showing the size, shape, cross-section, slope, and dimensions of each swimming pool or spa, deck areas, and barriers;
3. Plans and specifications showing the water circulation and disinfection systems, including all piping, fittings, drains, suction outlets, filters, pumps, surface skimmers, return inlets, chemical feeders, disinfection equipment, gauges, flow meters, and strainers;
4. Plans and specifications showing the source of water supply and the method of disposal of filter backwash water; used swimming pool or spa water, and wastewater from toilets, urinals, sinks, and showers;
5. Detailed plans of bathhouses, dressing rooms, equipment rooms, and other appurtenances; and
6. Additional data required by the Department for a complete understanding of the project.

D. A professional engineer, architect, or a swimming pool or spa contractor with a current A-9, A-19, KA-5, KA-6 license shall prepare or supervise the preparation of all plans and specifications submitted to the Department for review.

E. An applicant shall submit an application for design approval to the Department at least 60 days prior to the date that the applicant wishes to begin construction of a swimming pool or spa.

F. The Department shall determine whether the application for design approval is complete within 30 days of the date of receipt of the application by the Department.

G. The Department shall issue or deny the application for design approval within 30 days of the date that the Department determines that the application for design approval is complete.

H. Unless an extension of time is granted in writing by the Department, a design approval is void if construction is not started within one year after the date of its issuance or there is a halt in construction of more than one year.

I. The Department may issue a design approval with conditions. The Department shall not issue an Approval of Construction if the design approval is conditioned and the construction of the swimming pool or spa does not comply with the stated conditions.

J. The Department may issue design approvals in phases to allow a political subdivision to start construction of a public swimming pool or spa without issuing a design approval for the entire construction project. A design approval may be issued in phases provided all of the following conditions are met:
1. A phased design approval is needed to accommodate a design/build contract, phased construction contract, multiple construction contracts, turnkey contract, or special contract that requires construction to begin prior to the completion of design plans and specifications for the entire public swimming pool or spa construction project.
2. The applicant submits a detailed project description for the entire public swimming pool or spa construction project to the Department.
3. There is a written agreement between the applicant and the Department which includes the following:
   a. A construction project schedule,
   b. A schedule to submit applications and supporting documentation for the phased design approval including any anticipated variance requests,
   c. Negotiated time-frames for administrative completeness and substantive review of each application for phased design approval, and
   d. A schedule of construction inspections by the Department or third-party certifications by the applicant.
4. The applicant certifies in writing that the applicant understands that the public swimming pool or spa cannot be operated without an Approval of Construction for each phase of the construction project pursuant to R18-5-204.
5. If the applicant and the Department cannot reach agreement regarding a phased design approval or Approval of Construction, then the requirements of R18-5-203(A) through (I) and R18-5-204 apply.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-204. Approval of Construction

A. A public or semipublic swimming pool or spa shall not operate without receiving an Approval of Construction issued by the Department.

B. The construction of a public or semipublic swimming pool or spa shall conform to plans and specifications that have been approved by the Department. If the applicant wishes to make a change to the approved plans and specifications, the applicant shall submit revised plans and specifications with a written statement of the reasons for the change to the Department. The applicant shall obtain Department approval of the revised plans and specifications before starting any work affected by the change.

C. Prior to any construction that will cover the piping arrangement of the swimming pool or spa and at least 30 days prior to the expected date of completion of construction of a public swimming pool or spa, the applicant shall notify the Department to permit a construction inspection. The Department shall inspect the construction of a swimming pool or spa to determine if the swimming pool or spa has been constructed in

accordance with Department-approved plans, specifications, and conditions unless a professional engineer, architect, or registered sanitarian certifies that the swimming pool or spa has been constructed in accordance with Department-approved plans, specifications, and conditions.

D. If the swimming pool or spa has been constructed in accordance with Department-approved plans, specifications, and conditions, the Department shall issue the Approval of Construction within 30 days of the date of the construction inspection by the Department or the date the Department receives third-party certification.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-205. Prohibitions

A. A fill-and-draw swimming pool or spa shall not be used as a public or semipublic swimming pool or spa.

B. A private residential spa shall not be used as a public or semipublic spa.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-206. Water Source

Only water from a source that is approved by the Department shall be used in a public or semipublic swimming pool or spa. Reclaimed wastewater shall not be used as make-up water for a public or semipublic swimming pool or spa.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-207. Construction Materials

A. A public or semipublic swimming pool or spa shall be constructed of concrete or other structurally rigid material that is equivalent in strength or durability to concrete, except that a public or semipublic spa may be constructed of fiberglass or acrylic.

B. A public or semipublic swimming pool or spa shall be constructed of materials that are nontoxic.

C. A public or semipublic swimming pool or spa shall be constructed of waterproof materials that provide a watertight structure.

D. A public or semipublic swimming pool or spa shall have a smooth and easily cleaned surface, without cracks or joints, excluding structural joints, or to which a smooth, easily cleaned surface finish is applied or attached.

E. All corners in a public or semipublic swimming pool or spa shall be rounded, including the corners formed by the intersection of a wall and floor.

F. A surface within a public or semipublic swimming pool or spa intended to provide footing for users shall have a slip-resistant surface. The roughness or irregularity of the surface shall not cause injury or discomfort to users' feet during normal use.

G. The color, pattern, or finish of the interior of a public or semipublic swimming pool or spa shall not obscure objects, surfaces within the swimming pool or spa, debris, sediment, or algae. Surface finishes shall be white, pastel, or other light color. The interior finish shall completely line the swimming pool or spa to the coping, tile, or gutter system.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-208. Maximum Bathing Load

A. The maximum bathing load for a public or semipublic swimming pool or spa shall not be exceeded.

B. The maximum bathing load for a public or semipublic swimming pool shall be calculated as the sum of the following:

1. The shallow area of the swimming pool in square feet divided by 10 square feet, plus
2. The deep area of the swimming pool in square feet minus 300 square feet for each diving board divided by 24 square feet.

C. The maximum bathing load for a public swimming pool shall be limited by the number of users for the toilets, showers, or lavatories that are provided in the bathhouses or dressing rooms prescribed in R18-5-242.

D. The maximum bathing load for a public or semipublic spa shall not exceed the area of the spa in square feet divided by 9 square feet.

E. The maximum bathing load for a public or semipublic swimming pool or spa shall be posted.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-209. Shape

A. A public or semipublic swimming pool or spa may be any shape except that the designer shall shape a public or semipublic swimming pool or spa to minimize hazards to users and provide adequate circulation of swimming pool or spa water.

B. There shall be no protrusions, extensions, means of entanglement, or other obstructions in a public or semipublic swimming pool or spa that may cause entrapment of or injury to the user. This subsection does not prohibit water features such as water fountains, slides, water play equipment, or water volleyball and basketball nets.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-210. Walls

A. Where a racing lane terminates in a swimming pool, the wall shall be plumb to a minimum depth of 5 feet below the waterline. Below the 5-foot depth, the wall shall be radiused to join the floor.

B. There shall be no projections from a swimming pool or spa wall except for coping, cantilevered deck, ladders, and steps.

C. An underwater seat shall comply with the following:

1. The edges of an underwater seat shall be outlined with a sharply contrasting colored tile or other material that is clearly visible from the deck adjacent to the underwater seat;
2. An underwater seat shall have a slip-resistant surface;
3. An underwater seat shall be located outside of the deep area of a swimming pool that is equipped for diving. An underwater seat may be located in the deep area of a swimming pool that is not equipped for diving provided the underwater seat is either completely recessed into the swimming pool wall, shaped to be compatible with the shape of the swimming pool wall, or in a corner of the swimming pool;
4. The maximum depth of an underwater seat is 24 inches below the waterline. The minimum depth of an underwater seat is 12 inches below the waterline; and
5. The maximum width of an underwater seat is 20 inches.

D. If a spa is located immediately adjacent to a swimming pool, the separating wall between the spa and the swimming pool shall be no more than 8 inches wide. The top of the separating wall shall be no lower than the level of the coping of the swimming pool. If a separating wall is more than 8 inches wide, then the deck width shall comply with R18-5-217(D). A spa

shall not be located immediately adjacent to the deep area of a swimming pool.

E. Coping or cantilevered deck may project from a swimming pool or spa wall to provide a handhold for users. The coping or deck shall be rounded, have a slip-resistant surface finish, and shall not exceed 3 1/2 inches in thickness. The overhang of the coping or deck shall not exceed 2 inches or be less than 1 inch. All corners created by coping or cantilevered deck shall be rounded in both the vertical and horizontal dimensions to eliminate sharp corners.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-211. Freeboard

A. The freeboard in a public or semipublic swimming pool or spa shall not exceed 8 inches, except as provided in subsection (B).

B. The freeboard in a semipublic swimming pool may exceed 8 inches to provide for walls, terraces, or other design features. The Department shall review each request to allow an increase in freeboard on a case-by-case basis. In reviewing the request, the Department shall consider safety, exit distances, alternative exits, and location. The length and height of the section where the freeboard area may be increased is limited. All of the following requirements shall be met:

1. Guard rails or similar devices are provided to prevent any raised area from being used as a diving platform.
2. The vertical surfaces of the freeboard area are constructed of inorganic materials. All vertical surfaces shall be rigid, smooth, and easily cleanable.
3. The horizontal surface areas comply with the provisions of this Article for decks.
4. The vertical surface area is included as surface area of the swimming pool to determine the type, size, location, and numbers of equipment and piping.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-212. Floors

A. The slope of the floor of a public or semipublic swimming pool, from the end wall in the shallow area towards the deep area to the point of the first slope change shall be uniform and shall not exceed 1 foot of fall in 10 feet. The floor slope in a public or semipublic spa shall not exceed 1 foot of fall in 10 feet.

B. The floor slope of a public or semipublic swimming pool, from the point of the first slope change to the deepest part of the swimming pool, shall not exceed 1 foot of fall in 3 feet.

C. For a public or semipublic swimming pool that is equipped for diving, the depth of the swimming pool at the point of the first slope change shall be a minimum of 5 feet. For a public or semipublic swimming pool that is not equipped for diving, the depth of the swimming pool at the point of the first slope change shall be a minimum of 4 feet.

D. All portions of a swimming pool or spa floor shall slope towards a main drain.

E. The transitional radius where the floor of a public or semipublic swimming pool joins a wall shall comply with the following:

1. The center of the radius shall be no less than 3 feet below the waterline in the deep area or 2 feet below the waterline in the shallow area.
2. The radius shall be tangent at the point where the radius meets the wall or floor.
3. The radius shall be equal to or greater than the depth of the swimming pool minus the vertical wall depth measured from the waterline minus 3 inches.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-213. Entries and Exits

A. Each public or semipublic swimming pool shall have at least two means of entry or exit consisting of ladders, steps, or recessed treads.

B. There shall be at least one ladder, set of steps, or set of recessed treads for each 75 feet of perimeter of a public or semipublic swimming pool or spa.

C. At least one means of entry and exit shall be provided in the deep area and at least one means of entry and exit shall be provided in the shallow area of a public or semipublic swimming pool. Where the water depth is 2 feet at the swimming pool wall in the shallow area or where there is a zero depth entry pool [for example, an artificial beach], the area shall be considered a means of entry or exit.

D. A set of steps shall be provided in a public or semipublic spa.

E. The location of stairs, ladders, and recessed treads shall not interfere with racing lanes.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-214. Steps

A. Each set of steps shall be provided with at least one handrail to serve all treads and risers. Handrails shall be provided at one side or in the center of all steps. Handrails shall be installed in such a way that they can be removed only with tools.

B. Steps shall be permanently marked to be clearly visible from above and below the water level in a swimming pool or spa. The edges of steps shall be outlined with a sharply contrasting colored tile or other material that is clearly visible from the deck adjacent to the steps.

C. Steps may be constructed only in the shallow area of a public or semipublic swimming pool.

D. Steps shall not project into a public or semipublic swimming pool or spa in a manner that creates a hazard to users.

E. All tread surfaces on steps shall have slip-resistant surfaces.

F. Step treads shall have a minimum unobstructed horizontal depth of 10 inches. Risers shall have a maximum uniform height of 12 inches, with the bottom riser height allowed to vary ± 2 inches from the uniform riser height.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-215. Ladders

A. At least one ladder shall be provided in the deep area of a public or semipublic swimming pool. If the width of the deep area of a swimming pool is greater than 20 feet, then one ladders shall be located on opposite sides of the deep area.

B. A swimming pool or spa ladder shall be equipped with two handrails.

C. All treads on ladders shall have slip-resistant surfaces.

D. Ladder treads shall have a minimum horizontal depth of 1 1/2 inches. The distance between ladder treads shall range from a minimum of 7 inches to a maximum of 12 inches.

E. Below the waterline, there shall be a clearance of not more than 6 inches and not less than 3 inches between any ladder tread edge and the wall as measured from the side of the tread closest to the wall.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-216. Recessed Treads

A. Recessed treads with handrails may be substituted for ladders.
B. Recessed treads shall be pre-formed, readily cleanable, and designed to drain into the swimming pool or spa to prevent the accumulation of dirt in the recessed treads.
C. Each set of recessed treads shall be equipped with two handrails.
D. All recessed treads shall have slip-resistant surfaces.
E. The vertical distance between the swimming pool or spa coping edge or deck and the uppermost recessed tread shall be a maximum of 12 inches. Recessed treads at the centerline shall have a uniform vertical spacing of 12 inches maximum and 7 inches minimum.
F. Recessed treads shall be at least 5 inches deep and 12 inches wide.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-217. Decks and Deck Equipment

A. Decks, ramps, coping, and similar step surfaces shall be constructed of concrete or other inorganic material, have a slip-resistant finish, and be easily cleanable.
B. The minimum continuous unobstructed deck width, including the coping, shall be 10 feet for a public swimming pool and 4 feet for a semipublic swimming pool. The dimensional design of decks at public and semipublic swimming pools shall comply with the dimensions shown in Illustration B.
C. A minimum 5 feet of deck width shall be provided on the sides and rear of any diving equipment at a public swimming pool. A minimum 4 feet of deck width shall be provided on the sides and rear of any diving equipment at a semipublic swimming pool. If diving equipment is installed at a public swimming pool, there shall be a minimum 15 feet of deck width from the swimming pool wall to the edge of the deck behind the diving equipment [See Illustration B].
D. A continuous unobstructed deck width of at least 4 feet, which may include the coping, shall be provided on at least two contiguous sides and around at least 50% of the perimeter of a public or semipublic spa.
E. Decks shall be sloped to effectively drain either to perimeter areas or to deck drains. Drainage shall remove splash water, deck cleaning water, and rain water without leaving standing water. The minimum slope of the deck shall be 1/4 inch per 1 foot. The maximum slope of the deck shall be 1 inch per 1 foot, except for ramps.
F. Decks shall be edged to eliminate sharp corners.
G. Site drainage shall be provided to direct all perimeter deck drainage and general site and roof drainage away from a public or semipublic swimming pool or spa. Yard drains may be required to prevent the accumulation or puddling of water in the general area of the deck and related improvements.
H. Hose bibbs shall be provided along the perimeter of the deck so that all parts of the deck may be washed down. At a minimum, each hose bibb shall be protected against back siphonage with an atmospheric vacuum breaker. The Department may approve quick disconnect style hose bibbs.
I. Any valve that is installed in or under any deck shall provide a minimum 10-inch diameter access cover and a valve pit to facilitate the repair and maintenance of the valve.
J. Joints in decks shall be provided to minimize the potential for cracks due to changes in elevations or movement of the slab. The maximum voids between adjoining concrete slabs or between concrete slabs and expansion joint material shall be 3/16 inch of horizontal clearance with a maximum difference in vertical elevation of 1/4 inch. Areas where the deck joins concrete shall be protected by expansion joints to protect the swimming pool or spa from the pressures of relative movements. Construction joints where pool or spa coping meets the deck shall be watertight and shall not allow water to pass through to the underlying ground.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-218. Lighting

A. A public or semipublic swimming pool or spa and adjacent deck areas shall be lighted by natural or artificial means when they are in use.
B. A public or semipublic swimming pool or spa that is intended to be used at night shall be equipped with artificial lighting that is designed and spaced so that all parts of the swimming pool or spa, including the bottom, may be seen without glare.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-219. Water Depths

A. Except as provided in subsection (B), the minimum water depth in the shallowest area of a public or semipublic swimming pool shall be 2 feet. The maximum water depth in the shallowest area of a public or semipublic swimming pool shall be 3 feet. In public swimming pools, where racing lanes terminate, the minimum depth shall be 5 feet from the water level to the point where the vertical wall is radiused to join the floor.
B. The Department may approve a depth of less than 2 feet in a wading pool or to allow a zero depth entry swimming pool.
C. The maximum water depth in a public or semipublic spa shall be 42 inches, measured from the water level.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-220. Depth Markers

A. Water depths shall be conspicuously and permanently marked at or above the water level on the vertical wall and on the top of the coping or the edge of the deck next to a swimming pool.
  1. Depth markers on a vertical wall shall be positioned to be read from the water side.
  2. Depth markers on a deck shall be located within 18 inches of the side of the swimming pool and positioned to be read while standing on the deck facing the water. Depth markers that are located on a deck shall be made of slip-resistant materials.

B. Depth markers for a public or semipublic swimming pool shall be installed at points of maximum and minimum water depth and at all points of slope change. Depth markers are required in the shallow area at 1-foot depth intervals to a depth of 5 feet. Thereafter, depth markers shall be installed at 2-foot depth intervals. Depth markers shall not be spaced at distances greater than 25 feet.
C. Depth markers shall be located on both sides and at both ends of a public or semipublic swimming pool.
D. Depth markers shall be in Arabic numerals with a 4-inch minimum height. Arabic numerals shall be of contrasting color to the background.
E. In public swimming pools with racing lanes, approach warning markers shall be placed below the water level on the opposite walls at the ends of each racing lane. Warning markers shall be of contrasting color to the background. Warning markers shall be clearly visible in or out of the water from a minimum distance of 10 feet.

F. The shallow area of a public swimming pool shall be visually set apart from the deep area of the pool by a rope and float line.

G. Depth markers for a public or semipublic spa shall comply with all of the following:
1. A public or semipublic spa shall have permanent depth markers with numbers that are a minimum of 4 inches high. Depth markers shall be plainly and conspicuously visible from all points of entry.
2. The maximum depth of a public or semipublic spa shall be clearly indicated by depth markers.
3. There shall be a minimum of 2 depth markers at each public or semipublic spa.
4. Depth markers shall be spaced at no more than 25-foot intervals and shall be uniformly located around the perimeter of the spa.
5. Depth markers shall be positioned on the deck within 18 inches of the side of the spa. A depth marker shall be positioned so that it can be read by a person standing on the deck facing the water.
6. Depth markers that are on deck surfaces shall be made of slip-resistant material.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-221. Diving Areas and Equipment

A. The dimensions of a diving area in a public or semipublic swimming pool shall comply with minimum requirements for length, width, depth, area, and other dimensions specified in Illustration A. The diving well profile in Illustration A does not apply to a special use pool that is intended for competitive diving and has been approved by Department pursuant to R18-5-248(A).

B. Diving equipment shall be permanently anchored to the swimming pool deck. Equipment shall be rigidly constructed with sufficient bracing to ensure stability. Supports, platforms, steps, and ladders for diving equipment shall be designed to carry anticipated loads.

C. All diving stands higher than 21 inches, measured from the deck to the top of the board, shall be provided with stairs or a ladder.

D. Diving equipment shall have a durable finish. The surface finish shall be free of tears, splinters, or cracks that may be a hazard to users.

E. Steps and ladders leading to diving boards and diving platforms shall be of corrosion-resisting materials and shall have slip-resistant tread surfaces. Step treads shall be self-draining.

F. Diving boards, diving platforms, and starting blocks shall have slip-resistant tread surfaces.

G. Handrails shall be provided at all steps and ladders leading to diving boards that are 1 meter or more above the water.

H. Diving boards and diving platforms that are 1 meter or higher shall be protected with guard rails. Guard rails shall be at least 30 inches above the diving board or diving platform and shall extend to the edge of the swimming pool wall.

I. A label shall be permanently affixed to a diving board and shall include the following:
1. Manufacturer's name and address,
2. Board length, and
3. Fulcrum setting instructions.

J. The maximum diving board height over the water is 3 meters. The maximum height of a diving platform over the water is 10 meters.

K. Starting blocks shall be located in the deep end of a public swimming pool or where the depth of the water is at least 5 feet.

L. There shall be a completely unobstructed clear vertical distance of 13 feet above any diving board measured from the center of the front end of the board. This clear, unobstructed vertical space shall extend horizontally at least 8 feet behind, 8 feet to each side, and 16 feet ahead of the front end of the board.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-222. Prohibition Against Diving; Warning Signs

A. Diving equipment is prohibited in a public or semipublic swimming pool that does not meet the minimum diving well dimensions specified in Illustration A. If a public or semipublic swimming pool does not meet the dimensional requirements prescribed in Illustration A for diving, then the owner shall prominently display at least one sign that cautions users that the swimming pool is not suitable for diving. The warning sign shall state "NO DIVING" in letters that are 4 inches or larger or display the international symbol for no diving.

B. Diving from the deck of a public or semipublic swimming pool into water that is less than 5 feet deep shall be prohibited. Warning markers indicating in words or symbols that diving is prohibited shall be placed on the deck within 18 inches of the side of the shallow area of the swimming pool. A warning marker shall be positioned so that it can be read by a person standing on the deck facing the water.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-223. Water Circulation System

A. A public or semipublic swimming pool or spa shall have a water circulation system that provides complete circulation of water through all parts of the swimming pool or spa and can maintain water chemistry and water clarity requirements.

B. The water circulation system for a public or semipublic swimming pool shall have a turnover rate of at least once every 8 hours. The water circulation system of a public or semipublic spa shall have a turnover rate of at least once every 30 minutes. The water circulation system for a wading pool shall have a turnover rate of at least once every hour. The water circulation system shall be designed to give the proper turnover rate without exceeding the maximum filtration rate for the filter in R18-5-227(E).

C. Water circulation system components shall comply with American National Standard/NSF International Standard Number 50, "Circulation System Components and Related Materials for Swimming Pools, Spas/Hot Tubs," NSF International, 3475 Plymouth Road, P.O. Box 130140, Ann Arbor, Michigan [revised July, 1996, and no future editions] which is incorporated by reference and on file with the Office of the Secretary of State and the Department.

D. Water circulation system components shall be accessible for inspection, repair, or replacement.

E. Except as provided by this subsection, water withdrawn from a public or semipublic swimming pool or spa shall not be returned unless it has been filtered and adequately disinfected. Water may be withdrawn from a swimming pool for a water slide or a water fountain without being filtered or disinfected.

F. In a swimming pool complex with more than one swimming pool or where there is a combination of swimming pools and spas, each swimming pool and spa shall have a separate water circulation system.

G. Hydrotherapy jets or other devices which create roiling water or similar effects in a spa shall not be connected to the water

circulation system, but shall be operated through a separate system.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1). Manifest typographical error corrected in subsection (B) (Supp. 01-1).

R18-5-224. Piping and Fittings

A. The water velocity in discharge piping for public and semipublic swimming pools and spas shall not exceed 10 feet per second, except for copper discharge piping where the velocity shall not exceed 8 feet per second. The water velocity in suction piping shall not exceed 6 feet per second. Piping shall be sized to permit the rated flows for filtering and cleaning without exceeding the maximum head of the pump.

B. Water circulation system piping and fittings shall be constructed of materials that are able to withstand 150% of normal operating pressures. Suction piping shall be of sufficient strength so that it does not collapse when there is a complete shutoff of flow on the suction side of the pump. A licensed Arizona contractor shall conduct an induced static hydraulic pressure test of the water circulation system piping at 25 pounds per square inch for at least 30 minutes. The pressure test shall be performed before the deck is poured. Pressure in the water circulation system piping shall be maintained during the deck pour.

C. Water circulation piping and fittings shall be made of nontoxic, corrosion-resistant materials.

D. Water circulation piping and fittings shall be installed so that piping or fittings do not project into a public or semipublic swimming pool or spa in a manner that is hazardous to users.

E. Piping that is subject to damage by freezing shall have a uniform slope in one direction and shall be equipped with valves that will permit the complete drainage of the water in the swimming pool or spa.

F. Piping shall be designed to drain the swimming pool or spa water by removing drain plugs, manipulating valves, or other means.

G. Piping systems shall be identified by color or by stencils or labels located at conspicuous points.

H. Plastic water circulation piping shall comply with American National Standard/NSF International Standard Number 14, "Plastics Piping System Components and Related Materials," NSF International, 3475 Plymouth Road, P.O. Box 130140, Ann Arbor, Michigan [revised September, 1996, and no future editions] which is incorporated by reference and on file with the Office of the Secretary of State and the Department.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-225. Pumps and Motors

A. A pump and motor shall be provided for each water circulation system. The pump shall be sized to meet but not to exceed the flow rate required for filtering against the total head developed by the complete water circulation system. The pump shall be sized to comply with the turnover rate prescribed in R18-5-223(B).

B. Pumps and motors shall be readily and easily accessible for inspection, maintenance, and repair. When the pump is below the waterline, valves shall be installed on permanently connected suction and discharge lines. The valves shall be readily and easily accessible for maintenance and removal of the pump.

C. Each motor shall have an open, drip-proof enclosure. Each motor shall be constructed electrically and mechanically to perform satisfactorily and safely under the conditions of load in the environment normally encountered in swimming pool or spa installations. Each motor shall be capable of operating the pump under full load with a voltage variation of ± 10% from the nameplate rating. Each motor shall have thermal or current overload protection to provide locked rotor and running protection. Thermal or current overload protection may be built into the motor or in the line starter.

D. The pump shall be equipped with an emergency shut-off switch that is located within the swimming pool or spa enclosure to cut off power to the water circulation system if someone is entrapped on a main drain or suction outlet.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-226. Drains and Suction Outlets

A. A public and semipublic swimming pool shall be equipped with at least two main drains located in the deepest part of the swimming pool or a single gravity drain that discharges to a surge tank.

B. Each main drain shall be covered by a grate that is not be readily removable by users. The openings in the grate shall have a total area that is at least four times the area of the drain pipe.

C. The spacing of the main drains shall not be greater than 20 feet on centers and not more than 15 feet from each side wall.

D. A minimum of two suction outlets shall be provided for each pump in a suction outlet system for a public or semipublic spa. The suction outlets shall be separated by a minimum of 3 feet or located on two different planes [that is, one suction outlet on the bottom and one on a vertical wall or one suction outlet each on two separate vertical walls]. The suction outlets shall be plumbed to draw water through them simultaneously through a common line to the pump. Suction outlets shall be plumbed to eliminate the possibility of entrapping suction.

E. If the suction outlet system for a public or semipublic swimming pool or spa has multiple suction outlets that can be isolated by valves, then each suction outlet shall protect against user entrapment by either an antivortex cover, a grate, or other means approved by the Department.

F. A public or semipublic spa may be equipped with a single gravity drain which discharges to a surge tank instead of suction outlets. The total velocity of water through grate openings of the drain shall not exceed 2 feet per second.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-227. Filters

A. Filters shall be designed, located, and constructed to permit removal of filter manhole covers or heads for inspection, replacement, or repair of filter elements or filter media. No filtration system shall be installed beneath the surface of the ground or within an enclosure without providing adequate access for inspection and maintenance.

B. Pressure-type filters shall be equipped with a means to release internal pressure. Each pressure filter shall be equipped with an air relief piping system connected at an accessible point near the crown. Automatic air relief systems may be used instead of manual systems. The design of a filter with an automatic air relief system as its principal means of air release shall include lids that provide a slow and safe release of pressure. The design of a separation tank used in conjunction with any filter tank shall include a manual means of air release or a lid which provides a slow and safe release of pressure as it is opened.

C. Pressure filter systems shall be equipped with a sight glass installed on the waste discharge pipe.

D. Swimming pool and spa filters shall comply with American National Standard/NSF International Standard Number 50, "Circulation System Components and Related Materials for Swimming Pools, Spas/Hot Tubs," NSF International, 3475 Plymouth Road, P.O. Box 130140, Ann Arbor, Michigan [revised July, 1996, and no future editions] which is incorporated by reference and on file with the Office of the Secretary of State and the Department.

E. The maximum filtration rate shall not exceed the design flow rate prescribed by the National Sanitation Foundation Standard 50 for commercial filters. In no case shall the maximum filtration rate exceed the following:

1. The rate of filtration in a high-rate sand filter shall not exceed 25 gallons/minute/square foot.
2. The rate of filtration of a diatomaceous earth filter shall not exceed 2 gallons/minute/square foot.
3. The rate of filtration of a cartridge filter shall not exceed 0.375 gallons/minute/square foot.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-228. Return Inlets

A. Adjustable return inlets shall be provided for each public and semipublic swimming pool or spa. Return inlets shall be designed, sized, and installed to produce a uniform circulation of water throughout the swimming pool or spa. Where surface skimmers are used, return inlets on vertical walls shall be located to help bring floating particles within range of the surface skimmers.

B. A public or semipublic swimming pool shall have a minimum of two return inlets, regardless of the size of the swimming pool. The number of return inlets shall be based on two return inlets per 600 square feet of surface area, or fraction thereof.

C. Return inlets in a public or semipublic swimming pool shall be on a closed loop piping system. Public or semipublic spas with three or more return inlets shall be on a closed loop piping system.

D. Where the width of a public or semipublic swimming pool exceeds 30 feet, bottom returns shall be required. Bottom returns shall be flush with the pool bottom or designed to prevent injury to users.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-229. Gauges

A. Pressure gauges shall be installed on the water circulation system for each public and semipublic swimming pool and spa. Pressure gauges shall be installed in accessible locations where they can be read easily.

B. Pressure gauges shall be installed on the inlet and outlet manifold of the filter. Pressure gauges shall read at intervals of 1 pound per square inch [psi].

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-230. Flow meter

A public swimming pool shall be equipped with, a flow meter which indicates the rate of backwash through the filter. The flow meter shall be installed between the pump and the filter on a straight section of pipe in accordance with the manufacturer's specifications in a location where it can be read easily. The flow meter shall measure the rate of flow through the filter in gallons per minute and shall be accurate to within 5% under all conditions of flow. The flow meter shall have an indicator with a range of at least 150% of the normal flow rate.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-231. Strainers

The water circulation system shall include a removable strainer located upstream of the pump to prevent solids, debris, hair, or lint from reaching the pump and filters. The strainer shall be made of corrosion-resistant material. A strainer shall have openings that have a total area which is equal to at least four times the area of the suction piping.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-232. Overflow Collection Systems

A. An overflow collection system shall be installed in each public or semipublic swimming pool or spa.

B. The overflow collection system shall be designed and constructed so that the water level of the swimming pool is maintained at the mid-point of the operating range of the system's rim or weir device.

C. Rim type overflow collection systems shall be installed on at least two opposite sides and have a total length of at least 50% of the perimeter of a public or semipublic swimming pool. The overflow collection system shall be capable of carrying 50% of the design capacity of the water circulation system.

D. If overflow gutters are used, they shall be installed continuously around the swimming pool with the lip of the gutter level throughout its perimeter. Overflow gutters shall be provided with sufficient opening at the top and width at the bottom to permit easy cleaning. The overflow gutter bottom shall be pitched 1/4 inch per foot to drainage outlets located not more than 10 feet apart. Outlet piping shall be sized to circulate at least 50% of the capacity of the water circulation system and be properly covered by a drain grate. The surge tank for the overflow gutters shall be equipped with float controls which regulate the main drain, fill line, and overflow. The system surge capacity shall not be less than one gallon for each square foot of swimming pool surface area. Stainless steel gutters and other specialty gutter systems may be used if they are hydraulically equivalent to overflow gutters.

E. Surface skimmers shall be recessed into the swimming pool or spa wall and shall be installed to achieve effective skimming action throughout the swimming pool or spa.

1. A surface skimmer shall be provided for each 400 square feet of surface area, or fraction thereof, of a public or semipublic swimming pool. A minimum of two surface skimmers are required in a public or semipublic swimming pool. A surface skimmer shall be provided for each 200 square feet of surface area, or fraction thereof, of a public or semipublic spa.
2. The overflow slot shall be set level and shall not be less than 8 inches in width at the narrowest section.
3. The rate of flow through the skimmers shall be a minimum of 75% of the water circulation system capacity. Surface skimmers shall be designed to carry at least 30 gallons per minute per lineal foot of weir throat.
4. Where three or more surface skimmers are used, they must be on a closed loop piping system.
5. At least one surface skimmer shall be located on the side or near the corner of the swimming pool that is downwind of the area's prevailing winds.
6. Main drain piping shall be designed to carry at least 50% of the design flow.

F. Mixed inlet types [for example, surface skimmers and gutters] are prohibited in a public or semipublic swimming pool.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-233. Vacuum Cleaning Systems
A vacuum cleaning system shall be provided for each public and semipublic swimming pool. A vacuum cleaning system shall not create a hazard or interfere with the operation or use of the swimming pool. In integral systems, a sufficient number of vacuum cleaner fittings shall be located in accessible positions at least 10 inches below the water line. Alternatively, vacuum cleaner fittings may be installed as an attachment to the surface skimmers. A pressure cleaning system may be installed in addition to the required vacuum cleaning system.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-234. Disinfection
A. An adjustable automatic chemical feeder shall be provided to ensure the continuous disinfection of the water in a public or semipublic swimming pool or spa. Timers on disinfection equipment are prohibited. Disinfection shall be accomplished by chlorination or by another method that is approved by the Department. The method of disinfection shall effectively maintain an adequate disinfectant residual in the water which is subject to field testing by methods that are easy to use and accurate.
1. Chlorine disinfection equipment for a public or semipublic swimming pool shall be designed to maintain a free chlorine residual of 1.0 to 3.0 ppm. Chlorine disinfection equipment for a public or semipublic spa shall be designed to maintain a free chlorine residual of 3.0 to 5.0 ppm.
2. Bromine disinfection equipment for a public or semipublic swimming pool shall be designed to maintain a bromine residual of 2.0 to 4.0 ppm. Bromine disinfection equipment for a public or semipublic spa shall be designed to maintain a bromine residual of 3.0 to 5.0 ppm.

B. The use of chlorinated isocyanurates or cyanuric acid stabilizer for disinfection and stabilization is permitted. If used, chlorinated isocyanurates shall be fed so as to maintain required disinfectant residual levels. Cyanuric acid levels, whether from chlorinated isocyanurates or from the separate addition of cyanuric acid stabilizer, shall not exceed 150 ppm.

C. The use of chloramines as a primary disinfectant of swimming pool or spa water is prohibited.

D. The addition of gaseous disinfectant directly into a public or semipublic swimming pool is prohibited. The addition of dry or liquid disinfectant directly into a public or semipublic swimming pool or spa for routine disinfection is prohibited. This prohibition does not prohibit the use of liquid or dry disinfectants for shock treatment of a swimming pool or spa. A chlorine gas disinfection system shall not be used for the disinfection of water in a public or semipublic spa.

E. A common chlorine gas disinfection system may be utilized in separate swimming pools if separate metering and feeding devices are provided for each swimming pool.

F. If gaseous chlorine is used for disinfection, the following shall be provided:
1. The chlorinator, chlorine cylinders, and associated chlorination equipment shall be located in a separate well ventilated enclosure at or above ground level. The enclosure shall be reasonably gas-tight, noncombustible, and corrosion-resistant. The door of the enclosure shall open to the outside and shall not open directly toward the swimming pool.
2. If chlorination equipment is placed in a room, then an exhaust fan or gravity ventilation system shall be provided. Mechanical exhausters shall take suction 6 inches or less above the floor and discharge through corrosion-resistant louvers to a safe outside location. A gravity ventilation system shall be designed and constructed to discharge to the outside from floor level. Fresh air intakes shall be located no closer than 3 feet above the ventilation discharge. Chlorine room exhausts shall be directed away from the swimming pool to an area which is normally unoccupied. Chlorine room fans shall be capable of completely changing the air in the room at least once a minute.
3. Electrical switches to control lighting and ventilation in the chlorine room shall be located on the outside of the enclosure and adjacent to the door.
4. Chlorine cylinders shall be kept in an upright position and securely anchored to prevent them from falling. Chlorine cylinders may be stored indoors or out. If stored outside, chlorine cylinders shall not be stored in direct sunlight. Chlorine cylinders shall not be stored near an elevator, ventilation system, or heat source.
5. A warning sign shall be placed on the outside of the door to the chlorine room which cautions persons of the danger of chlorine gas within the enclosure. The warning shall be in letters 3 inches high or larger. The door to the chlorine room shall be provided with a shatter resistant inspection window.
6. Chlorinators shall be a solution-feed type, capable of delivering chlorine at its maximum rate without releasing chlorine gas to the atmosphere. Chlorinators shall be designed to prevent the backflow of water into the chlorine solution container.

G. Granular, tablet, stick, and other forms of dry disinfectant shall be fed by an adjustable automatic feeding device.

H. Disinfection equipment and chemical feeders shall comply with the requirements set forth in American National Standard/NSF International Standard 50, "Circulation System Components and Related Materials for Swimming Pools, Spas/Hot Tubs," NSF International, 3475 Plymouth Road, P.O. Box 130140, Ann Arbor, Michigan [revised July, 1996, and no future editions] which is incorporated by reference and on file with the Office of the Secretary of State and the Department.

I. If a chemical feeder is used, it shall be installed to inject solution downstream from the filter and the heater. An erosion-type feeder may be installed to feed solution to the suction side of the pump. A chemical feeder shall be wired so it cannot operate unless the filter pump is running.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-235. Cross-Connection Control
A. Cross-connections between the distribution system of a public water system and the water circulation system of a public or semipublic swimming pool or spa are prohibited.

B. Potable water for make-up water purposes may be introduced into a public or semipublic swimming pool or spa in any of the following ways:
1. Through an over-the-rim spout with an air-gap of at least twice the diameter of the pipe and not less than 6 inches above the overflow level. If an over-the-rim spout is used, it shall be located so that it does present a tripping hazard. The open end of an over-the-rim spout shall have no

sharp edges and shall not protrude more than 2 inches beyond the edge of the swimming pool or spa wall;

2. Through a float controlled make-up water feed tank with an air gap of at least 3 inches above the overflow level; or
3. Through a submerged inlet that is protected against back-siphonage by at least a pressure vacuum breaker that is installed so that the bottom of the backflow prevention assembly is a minimum of 12 inches above the level of the coping.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-236. Disposal of Filter Backwash, Wasted Swimming Pool or Spa Water, and Wastewater

All sewage from plumbing fixtures, including urinals, toilets, lavatories, showers, drinking fountains, floor drains, and other sanitary facilities shall be disposed of in a sanitary manner. Filter backwash and wasted swimming pool or spa water shall be discharged into a sanitary sewer through an approved air gap, an approved subsurface disposal system, or by other means that are approved by the Department. The method of disposal shall comply with applicable disposal requirements established by a county, municipal, or other local authority. There shall be no direct physical connection between the sewer system and the water circulation system of a public or semipublic swimming pool or spa.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-237. Lifeguard Chairs

Each public swimming pool shall have at least one elevated lifeguard chair for each 3,000 square feet of pool surface area or fraction thereof. At least one lifeguard chair shall be located close to the deep area of the swimming pool and shall provide a clear, unobstructed view of the swimming pool bottom. If a public swimming pool is provided with more than one lifeguard chair or the width of the public swimming pool is 45 feet or more, then lifeguard chairs shall be located on each side of the public swimming pool.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-238. Lifesaving and Safety Equipment

A. Public and semipublic swimming pools shall have lifesaving and safety equipment that is conspicuously and conveniently located and maintained ready for immediate use at all times.

B. Each public or semipublic swimming pool shall have one ring buoy or a similar flotation device. Each ring buoy or flotation device shall be attached to 50 feet of 1/4 inch rope.

C. Each semipublic and public swimming pool shall have at least one shepherd crook that is mounted on a rigid 16-foot pole.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-239. Rope and Float Lines

A rope and float line shall be installed across each public swimming pool on the shallow side of the break in grade between the shallow and deep portions of the pool [that is, within 1 to 2 feet of the point where the floor slope begins to exceed 1 foot in 10 feet]. The rope shall be a minimum of 3/4 inch in diameter and supported by floats spaced at intervals not greater than 7 feet. The rope and float line shall be securely fastened to wall anchors that are made of corrosion-resistant materials. The wall anchors shall be recessed or have no projection that constitutes a hazard when the float line is removed.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-240. Barriers

A. A public swimming pool or spa and deck shall be entirely enclosed by a fence, wall, or barrier that is at least 6 feet high. A semipublic swimming pool or spa and deck shall be entirely enclosed by a fence, wall, or barrier that is at least 5 feet high. The height of the fence, wall, or barrier shall be measured on the side of the barrier which faces away from the swimming pool or spa.

B. Fences or walls shall:

1. Be constructed to afford no external handholds or footholds;
2. Be of materials that are impenetrable to small children;
3. Have no openings or spacings of a size that a spherical object 4 inches in diameter can pass through; and
4. Be equipped with a gate that opens outward from the swimming pool or spa. The gate shall be equipped with a self-closing and self-latching closure mechanism or a locking closure located at or near the top of the gate, on the pool side of the gate, and at least 54 inches above the floor.

C. The distance between the horizontal components of a fence shall not be less than 45 inches apart. The horizontal members shall be located on the interior side of the fence. Spacing or openings between vertical members shall be of a size that a spherical object 4 inches in diameter cannot pass through.

D. The maximum mesh size for a wire mesh or chain link fence shall be a 1 3/4 inches square.

E. Masonry or stone walls shall not contain indentations or protrusions except for normal construction tolerances and tooled masonry joints.

F. If a wall of a building serves as part of the barrier around a public or semipublic swimming pool or spa, there shall be no direct access to the swimming pool or spa through the wall except as follows:

1. Windows leading to the swimming pool or spa area shall be equipped with a screwed-in place wire mesh screen or a keyed lock that prevents opening the window more than 4 inches.
2. A hinged door leading to the swimming pool or spa area shall be self-closing and shall have a self-latching device. The release mechanism of the self-latching device shall be located at least 54 inches above the floor.
3. If an additional set of doors is required by the fire code allowing access to the swimming pool or spa, they shall be self-closing and self-latching, equipped with panic bars no less than 54 inches from the floor to the bottom of the bar and designated "For Emergency Use Only."
4. Sliding doors leading to the swimming pool or spa area are prohibited except for sliding doors that are self-closing and self-latching.

G. If a barrier is composed of a combination concrete masonry unit and wrought-iron, the wrought iron portion shall be installed flush with the outside vertical surface of the concrete masonry unit. The space between the wrought iron and the concrete masonry unit shall be 1/2 inch or less. The vertical members of the wrought iron shall be spaced 4 inches on center.

H. Filtration, disinfection, and water circulation equipment shall be enclosed by a wall or fence.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-241. Public Swimming Pools; Bathhouses and Dressing Rooms

A. Separate dressing rooms shall be provided for each sex. Dressing rooms shall be equipped with baskets or other checking facilities.

B. All entrances to and exits from the dressing rooms shall be effectively screened to interrupt the line of sight of persons outside the dressing rooms.

C. Walls and partitions of dressing rooms, locker rooms, toilets, and showers shall be light colored, smooth, nonabsorbent, and easily cleanable. Concrete or pumice blocks used for interior wall construction in these locations shall be finished and sealed to provide a smooth and easily cleanable surface. Partitions shall be designed so that a waterway is provided between partitions and the floor to permit thorough cleaning of the walls and floor areas with hoses and brooms.

D. Floors shall be of nonslip construction, free of cracks or openings, and sloped to adequate drains so the surface will be free of standing water and puddles. Floors shall be sloped not less than 1/4 inch per foot toward the drains to ensure positive drainage. Carpeting is prohibited.

E. All furniture shall be of simple character and easily cleanable. Locker compartments, partitions, booths, furniture, and other appurtenances in dressing rooms shall be so installed or raised above the floor to permit washing down the dressing rooms and bathhouse interiors.

F. An adequate number of hose bibs shall be provided for washing down the dressing room or bathhouse interior.

G. Dressing rooms, toilets, and showers shall be provided with adequate lighting and ventilation.

H. Toilet facilities shall be provided for each sex. For male users, there shall be one toilet and one urinal for each 100 bathers or fraction thereof. For female users, there shall be one toilet for each 50 bathers, or fraction thereof. In no case shall less than two toilets be provided for female users. Sanitary napkin dispensers shall be installed in toilet or shower areas designated for female users.

I. Shower and handwashing facilities with hot and cold water and soap shall be provided for each dressing room. Hot and cold water shall be provided at all shower heads. The water heater and thermostatic mixing valve shall be inaccessible to users and shall be capable of providing two gallons per minute of 90°F water to each shower head. A minimum of two shower heads shall be provided in each dressing room. Each dressing room shall have one shower head for each 50 bathers or fraction thereof.

J. One lavatory with an unbreakable mirror shall be provided in each dressing room for the first 100 users. An additional lavatory and unbreakable mirror shall be provided for each additional 100 users or fraction thereof. Soap dispensers for providing either liquid or powdered soap shall be provided at each lavatory. Soap dispensers shall be made of metal or plastic with no glass permitted.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-242. Semipublic Swimming Pools; Toilets and Lavatories

A. A bathroom with a minimum of one toilet shall be provided for each sex.

B. Each bathroom shall have at least one lavatory. Soap dispensers for providing either liquid or powdered soap shall be provided at each lavatory. Soap dispensers shall be made of metal or plastic with no glass permitted.

C. An establishment that operates a semipublic swimming pool or spa and provides a private room with a toilet and lavatory for bathers shall be deemed to have complied with the requirements of this Section.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-243. Drinking Water Fountains

Drinking water from an approved source and dispensed through one or more drinking fountains shall be located on the deck of each public swimming pool or spa.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-244. Wading Pools

A. A wading pool is a type of public or semipublic swimming pool. The design criteria prescribed in this Article for public or semipublic swimming pools apply, except as provided in this Section.

B. A wading pool shall be physically set apart from public and semipublic swimming pools.
1. A wading pool shall be separated from a public swimming pool by a minimum 4-foot high fence or partition with a self-closing, self-latching gate.
2. A wading pool shall be separated from a semipublic swimming pool by at least 4 feet of deck.
3. A wading pool shall not be located adjacent to the deep area of a public or semipublic swimming pool.

C. A wading pool shall have a maximum depth of 24 inches. Water depths may be reduced from the stated maximums and brought to zero at the most shallow point of the wading pool.

D. The floor of a wading pool shall be uniform with a maximum slope of 1 foot of fall in 10 feet. The floor of a wading pool shall have a slip-resistant surface.

E. All wading pools shall have separate equipment for water circulation and disinfection. There shall be no cross-connection between the water circulation system of a wading pool and a public or semipublic swimming pool. The water in a wading pool shall have a maximum turnover cycle of 1 hour.

F. At least two main drains shall be provided at the deepest point in a wading pool. Each main drain shall be covered by a grate which cannot be removed by users. The openings in the grate shall have a total area that is at least four times the area of the drain pipe. In the alternative, a wading pool may be equipped with a single gravity drain which discharges to a surge tank.

G. Surface skimmers shall be provided on the basis of at least one skimmer for each 200 square feet of wading pool surface area. Surface skimmer flow rates shall be the same as required for public and semipublic swimming pools. Where only one skimmer is provided, the main drain may be connected through the skimmer.

H. Return inlets shall be provided and arranged to produce a uniform circulation of water and maintain a uniform disinfectant residual throughout the wading pool. Where three or more return inlets are required, they shall be on a closed loop piping system.

I. Suction outlets in a wading pool shall have plumbing provisions so as to relieve any possibility of entrapping suction.

J. Gaseous chlorine shall not be used for the disinfection of wading pool water.

K. A drinking fountain at a height convenient to small children or a drinking fountain with a raised step shall be provided in the area of the wading pool.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-245. Timers for Public and Semipublic Spas
The timer for a public or semipublic spa which controls the hydrotherapy jets shall be located at least 5 feet from the spa and shall have a maximum time limit of 15 minutes.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-246. Air blower and Air Induction Systems for Public and Semipublic Spas
An air blower system or air induction system for a public or semipublic spa shall comply with the following requirements:

1. The system shall prevent water backflow which could cause an electrical shock hazard.
2. Air intake sources shall not introduce water, dirt, or contaminants into the spa.
3. The system shall be properly sized for a commercial spa application.
4. If the air blower is installed within an enclosure or indoors, then adequate ventilation shall be provided.
5. Integral air passages shall be pressure tested and shall provide structural integrity to a value of 1 1/2 times the intended working pressure.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-247. Water Temperature in Public and Semipublic Spas
The temperature of heated water coming into a public or semipublic spa shall not exceed 104°.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-248. Special Use Pools

A. A person who intends to construct a special use pool shall notify the Department and provide plans, specifications, and a description of the intended use of the special use pool. The Department shall use best professional judgment in approving a special use pool, taking into consideration the intended use of the pool, the conditions under which it will operate, and the safety of users. The Department may consider the design requirements prescribed by an official sanctioning athletic body such as the National Collegiate Athletic Association [NCAA], National Federation of State High School Associations [NFSHSA], U.S. Swimming, U.S. Diving, or the Internationale de Natation Amateur [FINA] in using best professional judgement to approve a special use pool that is intended for competitive swimming and diving.

B. A special use pool that is designed with exercise or training bars in the pool shall be restricted to the special use when the bars are located in the pool. The bars shall:

1. Be constructed of durable and corrosion-resistant material;
2. Be sealed, welded shut, or capped at both ends to prevent retention of water within the bars;
3. Bars may be removable. Removable bars shall be wedge anchored in place and the anchors shall be covered. Water-tight anchor plugs [95% efficiency] shall be provided when the bars are removed; and
4. Extend not more than 4 inches from the side of the pool into the water. The minimum clear opening from the inside of the bar to the side of the swimming pool shall not be less than 2 inches.

D. A special use pool that is designed with a ramp shall comply with the following:

1. The ramp shall be constructed of slip-resistant material;
2. The slope of the ramp shall not exceed 1 foot in 12 feet;
3. The width of the ramp shall be at least 3 feet;
4. The ramp shall have a level platform at the top and the bottom of the ramp;
5. The ramp shall be equipped with at least a 3 1/2 foot high guardrail installed on the deck and extending the length of the ramp;
6. The ramp shall be constructed with return inlets located on the pool and ramp walls along the length of the ramp.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-249. Variances

A. The Department may grant a variance from a requirement prescribed in this Article upon a demonstration by the applicant that an alternative design, material, appurtenance, or technology is equivalent to a requirement prescribed in this Article. If a variance is granted, it shall be conditioned upon the applicant's use of the approved alternative.

B. The Department shall not grant a variance that results in an unreasonable risk to the health of swimming pool or spa users.

C. The applicant shall request a variance in writing. A variance request shall contain the following information:

1. Identification of the requirement prescribed in this Article for which a variance is requested;
2. Explanation of the reasons why the applicant cannot comply with the requirement;
3. A complete description of the alternative design, material, or technology to be installed and used in the swimming pool or spa, including design plans, specifications, and a description of the cost;
4. A demonstration that the alternative design, material, or technology to be installed and used in the swimming pool or spa is equivalent to the requirement in this Article and will not result in an unreasonable risk to users; and
5. A statement that the applicant will perform reasonable requirements prescribed by the Department that are conditions of a variance.

D. The applicant shall submit a request for a variance with an application for design approval. The Department shall determine whether the application for design approval and the variance request are complete. Within 30 days after the date of the submittal of the application for design approval and the variance request, the Department shall issue a written notice to the applicant that states that the request for a variance and the application for design approval are complete or which states that the request for a variance or the application for design approval is incomplete and identifies specific information deficiencies in the application for design approval or the variance request.

E. The Department may convene an advisory committee consisting of representatives of public and semipublic swimming pool and spa owners, public and semipublic swimming pool and spa building contractors, professional engineers, and county environmental and health departments to make a recommendation on a variance request.

F. If the Department grants the request for a variance, the Department shall identify the requirement for which the variance is granted, specify any conditions to the grant of a variance, and issue a design approval. If the Department denies the request for a variance, the Department shall issue a notice of intent to deny the request for a variance to the applicant. The notice shall state the reasons for the denial of the request for a variance and shall include a description of the applicant's right to request a hearing on the denial of the variance request pursuant to A.R.S. § 41-1092.03 and to request an informal settlement

conference pursuant to A.R.S. § 41-1092.06. If the Department denies a request for a variance, the Department may either deny the application for design approval or issue a design approval that requires compliance with the requirement for which the variance is requested.

G. In considering a request for a variance from a requirement prescribed in this Article, the Director shall consider the following factors:

1. The intended use of the public or semipublic swimming pool or spa;
2. The safety of the alternative design, material, or technology for which a variance is requested; and
3. The cost and other economic considerations associated with requiring compliance with the requirement prescribed in this Article as compared to the alternative for which a variance is requested.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

R18-5-250. Inspections

A. An inspector from the Department, upon presentation of credentials, may enter into any public or semipublic swimming pool or spa to determine compliance with this Article. The inspector may inspect records, equipment, and facilities; take photographs; and take other action reasonably necessary to determine compliance with this Article.

B. The owner or manager of a public or semipublic swimming pool or spa may accompany the inspector during an inspection.

C. An inspector from the Department may inspect a public or semipublic swimming pool or spa without giving prior notice of the inspection to the owner or operator of the swimming pool or spa.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

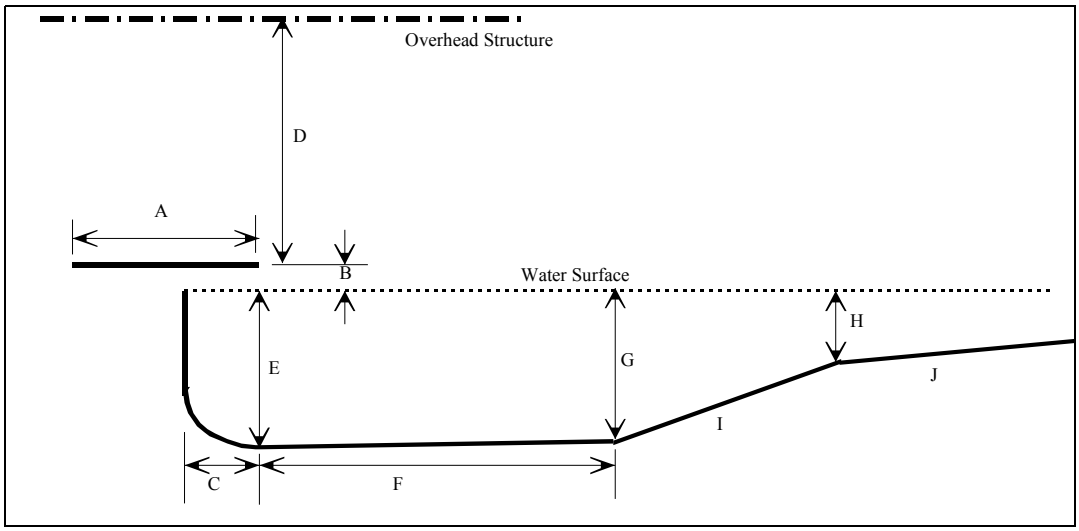
R18-5-251. Enforcement

A. If an inspector finds a violation of this Article, the Department may issue a notice of violation to the owner of a public or semipublic swimming pool or spa. A notice of violation shall state specifically the nature of the violation and shall allow a reasonable time for the owner to correct the violation.

B. If the Director has reasonable cause to believe that a person has constructed a public or semipublic swimming pool or spa in violation of this Article, the Director may order the closure of the swimming pool or spa by issuing a cease and desist order by following the procedures for abatement of environmental nuisances in A.R.S. § 49-142.

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

Illustration A. Diving Well Dimensions for Swimming Pools



Note: This profile does not apply to a special use pool that is designed for competitive diving.

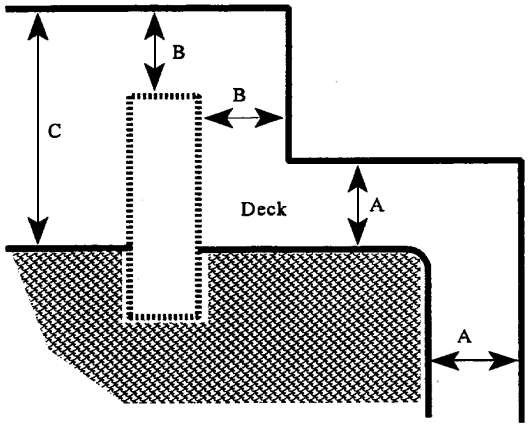
A. Maximum length of diving board	10 feet
B. Maximum height of board above the water	20 inches
C. Overhang of the board from wall	Minimum: 2 feet Maximum: 3 feet
D. Minimum distance to an overhead structure	15 feet
E. Minimum depth of water at the plummet	9 feet
F. Distance from plummet to start of upslope	18 feet
G. Minimum depth of water at start of the upslope	Depth of water at plummet minus 6 inches

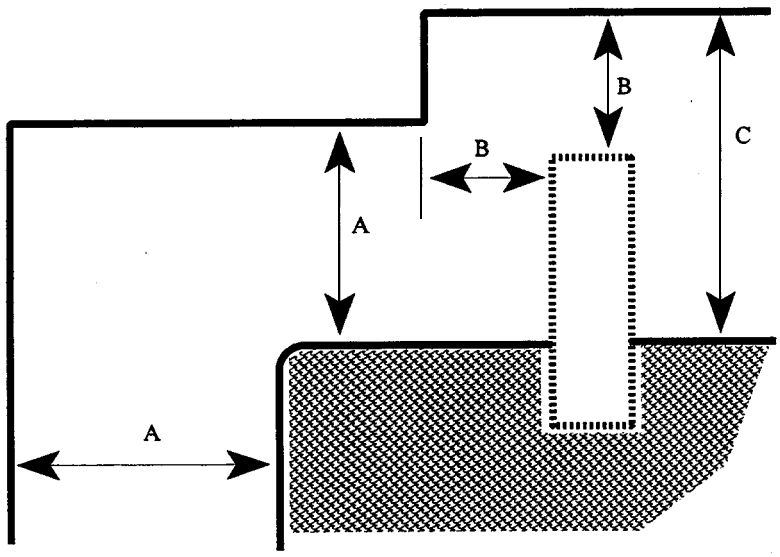
H. Depth of water at the breakpoint	Public swimming pool: 5 feet Semipublic swimming pool: 4 feet
I. Maximum slope: breakpoint towards deep end	1 foot of fall in 3 feet
J. Slope of bottom in shallow area	1 foot of fall in 10 feet
Minimum width of pool in diving area	20 feet
From plummet to pool wall at the side	10 feet

Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

Illustration B. Minimum Distance Requirements for Decks

Dimension	Public (in Feet)	Semipublic (in feet)
A	**10**	**4**
B	**5**	**4**
C	**15**	**11**





Historical Note
Adopted effective February 19, 1998 (Supp. 98-1).

ARTICLE 3. WATER QUALITY MANAGEMENT PLANNING

R18-5-301. Definitions
In addition to the definitions established in R18-9-101, the following terms apply to this Article:

1. "Certified Areawide Water Quality Management Plan" means a plan prepared by a designated Water Quality Management Planning Agency under Section 208 of the Federal Water Pollution Control Act (P.L. 92-500) as amended by the Water Quality Act of 1987 (P.L. 100-4), certified by the Governor or the Governor's designee, and approved by the United States Environmental Protection Agency.
2. "Designated management agency" means those entities designated in a Certified Areawide Water Quality Management Plan to manage sewage treatment facilities and sewage collection systems in their respective area.
3. "Designated water quality planning agency" means the single representative organization designated by the Governor under Section 208 of the Federal Water Pollution Control Act (P.L. 92-500) as amended by the Water Quality Act of 1987 (P.L. 100-4) as capable of developing effective areawide sewage treatment management plans for the respective area. The state acts as the planning agency for those non-tribal portions of the state for which there is no designated water quality planning agency.
4. "Facility Plan" means the plans, specifications, and estimates for a proposed sewage treatment facility, prepared under Section 201 and 203 of the Federal Water Pollution Control Act (P.L. 92-500) as amended by the Water Quality Act of 1987 (P.L. 100-4), and submitted to the Department by and for a designated management agency.
5. "General Plan" means a municipal statement of land-development policies that may include maps, charts, graphs, and text that list objectives, principles, and standards for local growth and development enacted under state law.
6. "Service area" means the geographic region specified for a designated management agency by the applicable Certified Areawide Water Quality Management Plan, Facility Plan, or General Plan.
7. "State water quality management plan" means the following elements:
   a. Certified Areawide Water Quality Management Plans and amendments;
   b. Water quality rules and laws;
   c. Final total maximum daily loads approved by the United States Environmental Protection Agency for impaired waters;
   d. Water quality priorities established by the Department;
   e. Intergovernmental agreements between the Department and a designated water quality planning agency or a designated management agency; and
   f. Active management area plans adopted by the Department of Water Resources.

Historical Note
New Section adopted by final rulemaking at 7 A.A.R. 559, effective January 2, 2001 (Supp. 01-1).

R18-5-302. Certified Areawide Water Quality Management Plan Approval
A designated water quality planning agency shall submit a proposed Certified Areawide Water Quality Management Plan or plan amendment to the Director for review and approval. Upon approval, the Governor or the Governor's designee shall:

1. Certify that the plan or plan amendment is incorporated into and is consistent with the state water quality management plan, and
2. Submit the plan or plan amendment to the United States Environmental Protection Agency for approval.

Historical Note
New Section adopted by final rulemaking at 7 A.A.R. 559, effective January 2, 2001 (Supp. 01-1).

R18-5-303. Determination of Conformance
All sewage treatment facilities, including an expansion of a facility, shall, before construction, conform with the Certified Areawide Water Quality Management Plan, Facility Plan, and General Plans as specified in subsections (1) and (2).

1. The Department shall make the determination of conformance if the sewage treatment facility or expansion of the facility conforms with the Certified Areawide Water Quality Management Plan and Facility Plan that prescribe a configuration for sewage treatment and sewage collection system management by a designated management agency within the service area.
2. If the condition specified in subsection (1) is not met, the Department shall make the determination of conformance as follows:
   a. If no Facility Plan is applicable and a Certified Areawide Water Quality Management Plan as described in subsection (1) is available, the Department shall rely on the Certified Areawide Water Quality Management Plan for the determination of conformance.
   b. If no Certified Areawide Water Quality Management Plan as described in subsection (1) is available, the Department shall make the determination of conformance based on conformance with applicable General Plans and after conferring with the designated water quality planning agency for the area and any responsible and affected governmental unit.

Historical Note
New Section adopted by final rulemaking at 7 A.A.R. 559, effective January 2, 2001 (Supp. 01-1).

ARTICLE 4. SUBDIVISIONS

R18-5-401. Definitions
In this Article unless the context otherwise requires:

1. "Approved" or "approval" means approved in writing by the Department.
2. "Condominium" means a subdivision established as a horizontal property regime pursuant to A.R.S. § 33-551 et seq.
3. "Department" means the Department of Environmental Quality or its designated representative.
4. "Garbage" means putrescible animal and vegetable wastes resulting from the handling, preparation, cooking and consumption of food.
5. "Refuse" means all putrescible and nonputrescible solid wastes (except body wastes), including garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and solid market and industrial wastes.
6. "Subdivision" has the meaning defined in A.R.S. § 32-2101.

Historical Note
Correction in subsection (E) citation to A.R.S. should have read § 32-2101. Amended effective June 21, 1978 (Supp. 78-3). Former Section R9-8-1011 renumbered without change as Section R18-5-401 (Supp. 89-2).

R18-5-402. Approval of plans required

A. No subdivision or portion thereof shall be sold, offered for sale, leased or rented by any corporation, company or person, or offered to the public in any manner, and no permanent building shall be erected thereon until plans and specifications for the water supply, sewage disposal and method of garbage disposal to be provided in or to serve such subdivision shall have been submitted to and approved by the Department.

B. The plans of any proposed water supply and sewage disposal system shall be submitted in quadruplicate on a plat of the subdivision as recorded, or as will be recorded, in the office of the county recorder.

Historical Note
Former Section R9-8-1012 renumbered without change as Section R18-5-402 (Supp. 89-2).

R18-5-403. Application for approval

A. An application for approval, prepared in duplicate on forms furnished by the Department, shall be filed at the time the plans are submitted for approval. The form shall be completely filled out unless indicated otherwise.

B. The distance to the nearest public water supply main and to a sewer main of a municipal or community system shall be given.

Historical Note
Former Section R9-8-1013 renumbered without change as Section R18-5-403 (Supp. 89-2).

R18-5-404. Size of lots

The minimum size lot approved by the Department will be governed largely by the area necessary for the safe accommodation of individual wells and/or sewage disposal systems. Where both the water supply and sewage disposal system must be developed on the same lot, the minimum size shall be at least one acre, excluding streets, alleys and other rights-of-way. Where water from a central system is provided for residential uses, the lot shall be sufficient to accommodate the sewage disposal system and provide for at least 100 percent expansion of the system based on a four-bedroom house within the bounds of the property allowing a minimum of five feet distance to the property lines. Where lots are zoned for commercial uses, the lot shall be sufficient to accommodate the sewage disposal system and provide for at least 100 percent expansion of the system within the bounds of the property allowing a minimum of five feet distance to the property lines.

Historical Note
Former Section R9-8-1014 renumbered without change as Section R18-5-404 (Supp. 89-2).

R18-5-405. Responsibility of subdivider

Where plans for a subdivision include a public water supply system, or public sewerage system, it shall be the responsibility of the subdivider to provide the facilities to each lot in the subdivision prior to human occupancy. The installation of such facilities shall be in accordance with plans, or any revisions thereof, approved by the Department.

Historical Note
Former Section R9-8-1015 renumbered without change as Section R18-5-405 (Supp. 89-2).

R18-5-406. Public water systems

A. Where water from an approved public water system is proposed for use in a subdivision, the inside diameter, length, and location of all proposed and existing water mains and valves necessary to serve each and every lot shall be shown on the subdivision plat. If the existing main to which a connection will be made is not immediately adjacent to the property, the direction and distance shall be indicated on the plat by an arrow or other suitable means.

B. A letter shall be obtained and submitted with the application for approval of the subdivision from responsible officials of the water system indicating that an agreement has been reached to supply water to each individual lot in the subdivision.

C. Where the owner of a subdivision, or other interested person, firm, company or corporation, proposes to develop a source or sources of supply and to construct a distribution system to furnish water to the subdivision, either free or for charge, complete details of the proposed water system including plans and specifications shall be furnished. Department approval of the supply and proposed system shall first be obtained before an approval for the sale of lots will be granted. The installation of such facilities shall be in accordance with the plans, and any revisions thereof, approved by the Department.

D. Proposed water supply and distribution systems shall comply with A.A.C. Title 18, Chapter 4, Article 2, except those distribution lines which are a common element of a condominium shall be exempt from A.A.C. R18-4-234.

E. Where water from an approved public water system is proposed for use in a subdivision, the Department shall issue a Certificate of Approval for Sanitary Facilities for a Subdivision only if the applicant has complied with subsections (A) and (B) of this Section and the public water system is either:
1. in compliance with the provisions of A.A.C. Title 18, Chapter 4, Article 2; or
2. making satisfactory progress toward compliance with the provisions of A.A.C. Title 18, Chapter 4, Article 2 under a schedule approved by the Department.

F. The Department shall revoke the Certificate of Approval for Sanitary Facilities for a Subdivision and notify the Department of Real Estate of such action if the public water system in use by the subdivision is creating an environmental nuisance pursuant to A.R.S. § 49-141 and is neither:
1. is compliance with the provisions of A.A.C. Title 18, Chapter 4, Article 2; nor
2. making satisfactory progress toward compliance with the provisions of A.A.C. Title 18, Chapter 4, Article 2 under a schedule approved by the Department.

Historical Note
Amended effective June 21, 1978 (Supp. 78-3). Former Section R9-8-1021 renumbered without change as Section R18-5-406 (Supp. 89-2). Amended effective July 25, 1990 (Supp. 90-3).

R18-5-407. Public sewerage systems

A. Where a public sewerage system is already in existence, or if sewers are proposed and have been approved by the Department, it shall be necessary to show lines indicating the approximate location and size of the sewers on the subdivision plat.

B. Where the proposed sewers will connect to an existing public sewerage system, a letter from officials of the system shall be required stating that acceptable plans have been submitted and that the subdivider has been granted permission to connect to and become a part of the public sewerage system.

C. Proposed sewage disposal facilities shall comply with A.A.C. Title 18, Chapter 9, Article 8, except those drain lines which

are a common element of a condominium shall be exempt from R18-5-811.

D. Where a public sewerage system is already in existence, or if sewers are proposed and have been approved by the Department, the Department shall issue a Certificate of Approval for Sanitary Facilities for a Subdivision only if the applicant has complied with subsections (A) and (B) of this Section and the public sewerage system is either:
1. in compliance with the provisions of A.A.C. Title 18, Chapter 9, Article 8; or
2. making satisfactory progress toward compliance with the provisions of A.A.C. Title 18, Chapter 9, Article 8 under a schedule approved by the Department.

E. The Department shall revoke the Certificate of Approval for Sanitary Facilities for a Subdivision and notify the Department of Real Estate of such action if the public sewerage system in use by the subdivision is creating an environmental nuisance pursuant to A.R.S. § 49-141 and is neither:
1. In compliance with the provisions of A.A.C. Title 18, Chapter 9, Article 8; nor
2. Making satisfactory progress toward compliance with the provisions of A.A.C. Title 18, Chapter 9, Article 8 under a schedule approved by the Department.

Historical Note
Amended effective June 21, 1978 (Supp. 78-3). Former Section R9-8-1026 renumbered without change as Section R18-5-407 (Supp. 89-2). Amended effective July 25, 1990 (Supp. 90-3).

R18-5-408. Individual sewage disposal systems

A. Recommendations are found in the engineering bulletins of the Department and such additional requirements as may be provided by local health departments to assist in approval regarding the design, installation and operation of individual sewage disposal systems. Copies of these bulletins may be obtained from the Department.

B. Where soil conditions and terrain features or other conditions are such that individual sewage disposal systems cannot be expected to function satisfactorily or where groundwater or soil conditions are such that individual sewage disposal systems may cause pollution of groundwater, they are prohibited.

C. Where such installations may create an unsanitary condition or public health nuisance, individual sewage disposal systems are prohibited.

D. The use of cesspools is prohibited.

E. Where an individual sewage disposal system is proposed, the following conditions shall be satisfied:
1. A geological report shall be made by an engineer, geologist or other qualified person. The geological report shall include results from percolation tests and boring logs obtained at locations designated by the county health departments. There shall be a minimum of one percolation test and boring log per acre, or one percolation test and boring log per lot where lots are larger than one acre, except when it can be shown by submission of other reliable data that soil conditions are such that individual disposal systems could reasonably be expected to function properly on each lot in the proposed subdivision. The Department may require additional tests when it deems necessary. The approval of a subdivision, based upon such reports, shall not extend to the plat if it is further subdivided or lot lines are substantially relocated.
2. Results of all tests shall be submitted to the Department and the local health department for review and approval of the subdivision for the use of individual sewage disposal systems.
3. Such approval must be obtained in writing from the local health department and a copy of the approval shall be submitted to the Department with the subdivision application for approval.

Historical Note
Former Section R9-8-1027 renumbered without change as Section R18-5-408 (Supp. 89-2).

R18-5-409. Refuse disposal

A. The storage, collection, transportation and disposal of refuse and other objectionable wastes shall be governed by A.A.C. Title 18, Chapter 8, Article 5.

B. Where an approved community or private refuse collection service is available, arrangements shall be made to have this service furnished to the subdivision. A letter, from the community or private collection company, stating that the collection service will be made available to the subdivision, is required.

C. Where refuse collection service is not available, it will be the responsibility of the subdivider to notify each purchaser or tenant that the hauling of all refuse is an individual responsibility and that all refuse must be properly stored pending removal and disposed of at disposal areas specified in the plan approved by the Department.

D. Where a collection service or an existing approved disposal area is not available to the subdivision, a plan approval will not be granted unless a separate disposal area is provided by the subdivider or arrangements are made to utilize a new, conveniently located disposal area. Such arrangements shall include, but not be limited to, the written permission of the person responsible for the operation of the new site.

Historical Note
Former Section R9-8-1031 renumbered without change as Section R18-5-409 (Supp. 89-2).

R18-5-410. Condominiums

A. New water distribution lines and new wastewater drain lines which are to be used as a common element of a condominium and are not under the ownership and control of a public utility shall be constructed in accordance with applicable provisions of the Uniform Plumbing Code adopted by reference in A.A.C. R9-1-412(D), including the minimum standards for construction contained therein.

B. Plans to be submitted shall include inside diameter, length and location of all proposed and existing common usage water distribution lines and inside diameter, length, slope and location of all proposed and existing common usage wastewater drain lines necessary to serve each and every unit. Plans and specifications should be submitted with sufficient detail to indicate compliance with subsection (A) above.

C. Appropriate sections of the covenants shall be submitted that indicate adequate provisions have been made for the maintenance of water distribution lines and wastewater drain lines in common usage.

D. Approval of existing housing to be converted to condominiums is conditioned upon the water distribution system and wastewater drainage system being:
1. Approved in writing at the time of original construction by the local building inspection authority, or
2. Currently operating under a permit issued by a local building inspection authority, or
3. Certified to be adequate by an Arizona registered professional engineer who has affixed his signature and seal to as-built plans submitted for approval.

Historical Note
Adopted effective June 21, 1978 (Supp. 78-3). Former Section R9-8-1032 renumbered without change as Section R18-5-410 (Supp. 89-2).

R18-5-411. Violations
Any person, firm, company or corporation who offers for sale, lease or rent any tract of land contrary to these regulations shall be prosecuted in accordance with A.R.S. § 49-142 or as otherwise may be provided by law.

Historical Note
Adopted effective June 21, 1978 (Supp. 78-3). Former Section R9-8-1036 renumbered without change as Section R18-5-411 (Supp. 89-2). Amended effective April 2, 1990 (Supp. 90-2).

ARTICLE 5. MINIMUM DESIGN CRITERIA

Article 5, consisting of R18-5-501 through R18-5-509, recodified from 18 A.A.C. 4, Article 5 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-501. Siting Requirements
To the extent practicable, a new public water system or an extension to an existing public water system shall be geographically located to avoid a site which is:

1. Subject to a significant risk from earthquakes, floods, fires, or other disasters which could cause a breakdown of the public water system or portion thereof; or
2. Within the flood plain of a 100-year flood, except for intake structures and properly protected wells.

Historical Note
Section recodified from R18-4-501 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-502. Minimum Design Criteria

A. A public water system shall be designed using good engineering practices. A public water system which is designed in a manner consistent with the criteria contained in Engineering Bulletin No. 10, "Guidelines for the Construction of Water Systems," issued by the Arizona Department of Health Services, May 1978 (and no future editions), which is incorporated herein by reference and on file with the Office of the Secretary of State, shall be considered to have been designed using good engineering practices. Other system designs shall be approved if the applicant can demonstrate that the system will function properly and may be operated reliably in compliance with this Chapter. Minimum design criteria which are not subject to modification are listed in this Section.

B. A potable water distribution system shall be designed to maintain and shall maintain a pressure of at least 20 pounds per square inch at ground level at all points in the distribution system under all conditions of flow.

C. Water and sewer mains shall be separated in order to protect public water systems from possible contamination. All distances are measured perpendicularly from the outside of the sewer main to the outside of the water main. Separation requirements are as follows:

1. A water main shall not be placed:
   a. Within 6 feet, horizontal distance, and below 2 feet, vertical distance, above the top of a sewer main unless extra protection is provided. Extra protection shall consist of constructing the sewer main with mechanical joint ductile iron pipe or with slip-joint ductile iron pipe if joint restraint is provided. Alternate extra protection shall consist of encasing both the water and sewer mains in at least 6 inches of concrete for at least 10 feet beyond the area covered by this subsection (C)(1)(a).
   b. Within 2 feet horizontally and 2 feet below the sewer main.
2. No water pipe shall pass through or come into contact with any part of a sewer manhole. The minimum horizontal separation between water mains and manholes shall be 6 feet, measured from the center of the manhole.
3. The minimum separation between force mains or pressure sewers and water mains shall be 2 feet vertically and 6 feet horizontally under all conditions. Where a sewer force main crosses above or less than 6 feet below a water line, the sewer main shall be encased in at least 6 inches of concrete or constructed using mechanical joint ductile iron pipe for 10 feet on either side of the water main.
4. The separation requirements do not apply to building, plumbing, or individual house service connections.
5. Sewer mains (gravity, pressure, and force) shall be kept a minimum of 50 feet from wells unless the following conditions are met:
   a. Water main pipe, pressure tested in place to 50 psi without excessive leakage, is used for gravity sewers at distances greater than 20 feet from water wells; or
   b. Water main pipe, pressure tested in place to 150 psi without excessive leakage, is used for pressure sewers and force mains at distances greater than 20 feet from water wells. "Excessive leakage" means any amount of leakage which is greater than that permitted under the AWWA Standard applicable to the particular pipe material or valve type.
6. Requests for authorization to use alternate construction techniques, materials, and joints shall be reviewed by the Department, and such requests may be approved on a case-by-case basis.

D. A public water system shall not construct or add to its system a well which is located:

1. Within 50 feet from existing sewers unless the sewer main has been constructed in accordance with subsection (C)(5)(a) or (b) of this Section;
2. Within 100 feet of any existing septic tank or subsurface disposal system;
3. Within 100 feet of a discharge or activity which is required to obtain an Individual Aquifer Protection Permit, pursuant to A.R.S. §§ 49-241(A) through 49-251;
4. Within 100 feet of an underground storage tank as defined in A.R.S. § 49-1001; or
5. Within 100 feet of hazardous waste facilities operated by large quantity generators and treatment, storage, and disposal facilities regulated under the Arizona Hazardous Waste Management Act, A.R.S. § 49-921 et seq.

Historical Note
Section recodified from R18-4-502 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-503. Storage Requirements

A. The minimum storage capacity for a CWS or a noncommunity water system that serves a residential population or a school shall be equal to the average daily demand during the peak month of the year. Storage capacity may be based on existing consumption and phased as the water system expands.

B. The minimum storage capacity for a multiple-well system for a CWS or a noncommunity water system that serves a residential population or a school may be reduced by the amount of the total daily production capacity minus the production from the largest producing well.

Historical Note
Section recodified from R18-4-503 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-504. Prohibition on the Use of Lead Pipe, Solder, and Flux
Construction materials used in a public water system, including residential and non-residential facilities connected to the public water system, shall be lead-free as defined at R18-4-101. This Section shall not apply to leaded joints necessary for the repair of cast iron pipes.

Historical Note
Section recodified from R18-4-504 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-505. Approval to Construct
A. The Department shall only approve an addition or a water main extension to a public water system that is in compliance with this Chapter or is making satisfactory progress towards compliance under a schedule approved by the Department. The Department shall approve a properly designed modification that can be expected to return a public water system to compliance.
B. A person shall not start to construct a new public water system, modify an existing facility, including an extension to an existing public water system, or make an alteration that will affect the treatment, capacity, water quality, flow, distribution, or operational performance of a public water system before receiving an Approval to Construct from the Department. Designing or consulting engineers may confer with the Department before proceeding with detailed designs of complex or innovative facilities. The following provisions shall apply:
1. An application for Approval to Construct, including the following documents and data, shall be submitted to the Department:
   a. Detailed construction plans of the site and work to be done, presented in legible form and of sufficient scale, to establish construction requirements to facilitate effective review;
   b. Complete specifications to supplement the plans;
   c. A design report that describes the proposed construction and basis of design, provides design data and other pertinent information that defines the work to be done, and establishes the adequacy of the design to meet the system demand;
   d. Analyses of a proposed new source of water that include:
      i. Microbiological; physical; radiochemical; inorganic, organic, and volatile organic chemicals; and
      ii. Microscopic particulates if the source meets the criteria of R18-4-301.01(A); and
   e. Other pertinent data required to evaluate the application for Approval to Construct.
2. All plans, specifications, and design reports submitted for a public water system shall be prepared by, or under the supervision of, a professional engineer registered in Arizona and have the seal and signature of the engineer affixed to them, except that an engineer not registered in Arizona may design a water treatment plant or additions, modifications, revisions, or extensions, which include extensions to potable water distribution systems, if the total cost of the construction does not exceed $12,500 for material, equipment, and labor, as verified by a cost estimate submitted with plan documents.
3. An existing public water system shall be exempt from the plan review requirements of this Article if the public water system is in compliance with this Chapter or is making satisfactory progress towards compliance under a schedule approved by the Department if the applicable structural revision, addition, extension, or modification:
   a. Has a project cost of $12,500 or less; or
   b. Is made to a water line that:
      i. Is not for a subdivision requiring plat approval by a city, town, or county;
      ii. Has a project cost of more than $12,500 but less than $50,000; and
      iii. Has a design that is sealed and signed by a professional engineer registered in Arizona and the construction of which is reviewed for conformance with the design by a professional engineer registered in Arizona.
4. Upon completion of a project exempt from the plan review requirements of this Article pursuant to subsection (B)(3), the public water system shall submit a notice of compliance which contains:
   a. A fair market value cost estimate for the project,
   b. The name of the design engineer and the review engineer, and
   c. The project completion date and the total construction time.

C. The Department shall act upon a complete Approval to Construct application submitted for approval within 30 days after its receipt.
D. The Department shall issue an Approval to Construct only when the following conditions have been met:
1. Plans and specifications submitted to the Department demonstrate that the proposed public water system reasonably can be expected to comply with this Chapter, including the MCLs in Article 2; and
2. The water system is in compliance with this Chapter or reasonably can be expected to return to compliance with this Chapter as a result of the proposed construction.

E. An Approval to Construct becomes void if an extension of time is not granted by the Department within 90 days after the passage of one of the following:
1. Construction does not begin within one year after the date the Approval to Construct is issued, or
2. There is a halt in construction of more than one year, or
3. Construction is not completed within three years after the date construction begins.

Historical Note
Section recodified from R18-4-505 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-506. Compliance with Approved Plans
All construction shall conform to approved plans and specifications. In order to make a change in an approved design that will affect water quality, capacity, flow, sanitary features, or performance, a public water system shall submit revised plans and specifications to the Department for review, together with a written statement regarding the reasons for the change. The public water system shall not proceed with the construction affected by the design change without written approval from the Department. Revisions not affecting water quality, capacity, flow, sanitary features, or performance may be permitted during construction without further approval if record drawings documenting these changes, prepared by a professional engineer registered in Arizona, are submitted to the Department under R18-5-508.

Historical Note
Section recodified from R18-4-506 at 10 A.A.R. 585,

effective January 30, 2004 (Supp. 04-1).

R18-5-507. Approval of Construction

A. A person shall not operate a newly constructed facility until an Approval of Construction is issued by the Department.

B. The Department shall not issue an Approval of Construction on a newly constructed public water system, an extension to an existing public water system, or any alteration of an existing public water system that affects its treatment, capacity, water quality, flow, distribution, or operational performance unless the following requirements have been met:

1. A professional engineer registered in Arizona or a person under the direct supervision of a professional engineer registered in Arizona, has completed a final inspection and submitted a Certificate of Completion on a form approved by the Department to which the seal and signature of the professional engineer registered in Arizona have been affixed;
2. The construction conforms to approved plans and specifications, as indicated in the Certificate of Completion, and all changes have been documented by the submission of record drawings under R18-5-508;
3. An operations and maintenance manual has been submitted and approved by the Department if construction includes a new water treatment facility; and
4. An operator, who is certified by the Department at a grade appropriate for each facility, is employed to operate each water treatment plant and the potable water distribution system.

C. The Department may conduct the final inspection required in subsection (B)(1), at a public water system's request, if both of the following notification requirements are met:

1. The public water system notifies the Department at least seven days before beginning construction on a public water system installation, change, or addition that is authorized by an Approval to Construct; and
2. The public water system notifies the Department of completion of construction at least 10 working days before the expected completion date.

Historical Note

Section recodified from R18-4-507 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-508. Record Drawings

A. A professional engineer registered in Arizona shall clearly and accurately record or mark, on a complete set of working project drawings, each deviation from the original plan and the dimensions of the deviation. The set of marked drawings becomes the record drawings, reflecting the project as actually built.

B. The professional engineer registered in Arizona shall sign, date, and place the engineer's seal on each sheet of the record drawings and submit them to the Department upon completion of the project. The record drawings shall be accompanied by an Engineer's Certificate of Completion, signed by the professional engineer registered in Arizona, and submitted on a form approved by the Department for any project inspected under R18-5-507(B).

C. Quality control testing results and calculations, including pressure and microbiological testing, and disinfectant residual records, shall be submitted with the Engineer's Certificate of Completion together with field notes and the name of the individual witnessing the tests.

Historical Note

Section recodified from R18-4-508 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

R18-5-509. Modification to Existing Treatment Process

Before a public water system may make a modification to its existing treatment process, the public water system shall submit and obtain the Department's approval for a detailed plan that explains the proposed modifications and the safeguards that the public water system will implement to ensure that the quality of the water served by the system will not be adversely affected by the modification. The public water system shall comply with the provisions in the approved plans.

Historical Note

Section recodified from R18-4-509 at 10 A.A.R. 585, effective January 30, 2004 (Supp. 04-1).

49-211. Direct potable reuse of treated wastewater; fees; rules

A. On or before December 31, 2024, the director shall establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program. Monies collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

B. On or before December 31, 2024, the director shall adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program, including rules establishing permitting standards and a permit application process.

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.

2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.

3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:

(a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.

(b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.

(c) Maintenance but not construction of drainage ditches.

(d) Construction and maintenance of irrigation ditches.

(e) Maintenance of structures such as dams, dikes and levees.

4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.

5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.

6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.

7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.

8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.

9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.

10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.

11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.

12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.

13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.

2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

D-5.

DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 14

Amend: R18-14-101, R18-14-102, R18-14-104, Table 1

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **DEPARTMENT OF ENVIRONMENTAL QUALITY**
Title 18, Chapter 14

New Section: R18-14-101, R18-14-102, R18-14-104, Table 1

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend four (4) rules and one (1) table in Title 18, Chapter 14, Article 1 regarding permit and compliance fees. This rulemaking is one part of the four part rulemaking submitted by the Department regarding Advance Water Purification (AWP). In 2022, the Department was required by the legislature to create the AWP program and to create rules to accompany the program. These amendments are needed to clarify that the AWP program, like other DEQ water programs, is a fee for service program. The fees that the Department proposes concern hourly review rates for permit applications and annual fees. A.R.S. § 49-211 permits the Department to establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program.

In R18-14-101, the Department is proposing to amend the definitions to include the definition for AWP and include AWP in the definition of water quality protection service.

In R18-14-102, the Department is proposing to add an hourly rate fee of $223. The Department stated this hourly figure is higher than the other Department programs because new staff will need to be hired, and this staff requires a very specific type of background and experience that is

less common to find because of the limited number of states that operate similar programs. The Department provided the notice of additional staff to the Joint Budget Legislative Committee, as required by A.R.S. § 41-1055(B)(3).

The Department is proposing to amend Table 1 to add that there is no maximum fee for permits related to the AWP program, this includes regular permits, demonstration permits, significant amendments and reviews, and demonstration permits significant amendment and reviews. The Department has indicated that they have a no max amount because the AWP program is completely new and it is difficult to predict review times, especially as the technology used to review evolves. The fee amount comes from the Department evaluating the administrative costs for the number of necessary technical staff, administrators, and management that are expected to participate in the review.

In R18-14-104, the Department is adding Annual Fees for AWP permits and AWP Demonstration Permits, with an annual fee of $101,250, pending adjustments made under the existing subsection (F) of this rule.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

The Department cites both general and specific statutory authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

Pursuant to A.R.S. § 41-1008(A)(1), "an agency shall not…[c]harge or receive a fee or make a rule establishing a fee unless the fee for the specific activity is expressly authorized by statute or tribal state gaming compact.

This rulemaking does establish a new fee to carry out the AWP program. Multiple DEQ water programs use a fee model where the Department assess permit applications and renewals using an hourly rate with there being a cap on the maximum fee charged to an applicant or permit holder. For most programs the standard rate is $174 per hour and for the UIC program the amount is $145. This amount can change based on the Consumer Price index, and that process is explained in R18-14-102(D).

The cap amounts vary depending on program and permit type. The UIC program Class VI does not have a maximum cap amount. As with the hourly rate, the maximum cap can change based on the Consumer Price index, and the process for that can be found in R18-14-104.

For the AWP program, DEQ is proposing an hourly fee of $223 and no maximum cap. The Department has indicated that they arrived at this amount based on the need for the Department to have to hire 1.5 full time high level employees to support the program. This is an area that requires specific knowledge and experience that is different from other programs and less common among potential applicants. Stakeholders have not expressed any concerns over the

hourly fee, lack of a maximum cap, or the annual fee and the Department reached these figures with their input.

The Department did consider other states permitting processes when considering fees. However, other states do not have programs that are strictly funded by fees. Colorado is exploring having a fee funded program but their DEQ counterpart is still in the stakeholder phase. Other states, like Texas are funded through a mix of state/federal funding and fees.

In addition, the Department is proposing an annual fee of $101,250. This amount can change based on the Consumer Price index, and that process is explained in R18-14-104(D).

These fees are permitted by A.R.S. § 49-2111 because the statute expressly authorizes the fees.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Department indicates it did not review any study relevant to this rulemaking. Other Department rulemakings did reference studies and those will be addressed in those rulemakings.

4. Summary of the agency's economic impact analysis:

The rulemaking is being conducted in order to adopt the Advanced Water Purification (AWP) regulatory program (formerly "Direct Potable Reuse" program) pursuant to statutory mandate at Arizona Revised Statutes (A.R.S.) § 49-211. The full scope of stakeholders who may incur direct impacts from this rulemaking include ADEQ, Arizona Water Provider Agencies (WPAs), Municipal governments, WPA customers, the general public, and the Arizona environment.

Impacts to the Department include the hiring of new staff commensurate with the expanded technical oversight necessary to administer the AWP program; however, the projected future costs to ADEQ will be offset through its fee-for-service model which places the burden for AWP program services on the applicants and permittees through application fees and annual fees. The WPAs that elect to apply for a permit under the AWP program are expected to have the largest expected impact: this impact is specific to capital costs, operations/maintenance cost, and permitting/compliance costs. Customers of WPAs that have adopted AWP are directly impacted by the new supply, beneficially through the delivery of the additional water supply to them, and financially through impacts in water rates. The general public is impacted by the option of a new water supply alternative for communities, providing an overall net increase in water availability for beneficial use such as drinking. Finally, the environment is impacted, beneficially through potential decreased reliance on groundwater and surface water supplies from WPAs using AWP water as a source, but also faces impacts from changes in water use as a result of expanded, potentially lucrative use options such as reduced groundwater discharge or reclaimed water delivery.

In general, while the AWP program is voluntary, there will be costs to each adopting entity for permitting and compliance requirements and infrastructure implementation. There may also be cascading cost impacts to other persons or groups (such as customers), but these costs will be borne throughout the water system and will be discussed in advance with stakeholders by water provider agencies.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department has determined that—because AWP participation is entirely voluntary and each WPA is the best and most appropriate analyst of, and decision-maker, for its own specific water system needs, resources and alternative supply options—potential AWP program participants will evaluate their own agency/project-specific circumstances to determine if there are, in fact, less intrusive or less costly alternative methods that would be preferable. The AWP rulemaking's programmatic nature generally precludes any specific project-level determinations of its relative cost or intrusiveness, since any such determination will depend on specific project circumstances as well as implementation approach and design. The cost-effectiveness determination and rationale for any advanced water treatment facility's development will be the sole responsibility of its WPA and will consequently override and/or negate the applicability of this EIS' alternative methods description requirements.

6. What are the economic impacts on stakeholders?

To determine the economic impact on the stakeholders identified in the economic impact summary, the Department adopted the following convention: minimal impact to mean $10,000 or less; moderate impact to mean $10,001-$1,000,000; substantial impact to mean $1,000,001 or more; and significant impact to mean that the cost/burden could not be calculated, but the Department expects it to be significant.

A high-level overview of the economic impact on stakeholders is given in the following table:

Description of Affected Group	Description of Effect	Increased Cost/Decreased Revenue	Decreased Cost/Increased Revenue
A. State and Local Government Agencies			
Arizona Department of Environmental Quality (ADEQ)	Increased agency responsibilities for administration, oversight, and management of AWP "fee-for-service" program, in which the State will be reimbursed for most AWP-related costs.	Minimal	
	Initial start-up, implementation, and subsequent program oversight activities may result in non-reimbursed costs to the State.	Moderate	
Water Provider Agencies (WPAs)	Increased compliance and monitoring	Moderate	
	Construction of AWTF and O&M responsibilities.	Substantial	

	Revenue changes from expanded customer base and/or deliveries.		Significant
Municipal Governments (non-WPAs)	Coordination with WPA and other agencies.	Moderate	
	Impact on tax revenue from resulting community expansion.		Significant
B. Customers			
WPA Customers	Impact to user water rates.	Minimal	
	Additional water supply that will allow existing and new business and residential growth.		Moderate
	Impacts upon public health related to water quality.	None identified	None identified
C. General Public			
Arizona Water System	Overall net increase in water availability. Additional water will allow community economic development and growth.		Minimal
	Existing surface water purchases can be diverted to other users or uses.		Moderate
	Groundwater resources can be made available for other users or uses.		Significant
	Diverted wastewater outflow may decrease return flows for downstream users.	Minimal	
Downstream Users	All existing supply commitments will be maintained or renegotiated, however diversion of wastewater outflows for AWP use may impact some downstream users. State environmental and permitting processes will consider and address project-specific cases and conditions. Negative impacts to downstream users are thus expected to be minimal (subject to mitigation if necessary).	Minimal	
D. Arizona Environment/ Ecosystem			
Environmental	Reduced groundwater use and depletion with decreased risks of land subsidence and infrastructure damage.		Significant
	Reduced water outflow from wastewater treatment facilities may result in reduced groundwater recharge.		Minimal
	Reduction in poor quality outflow from wastewater treatment facilities may improve water quality in receiving water body		Minimal

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates that there were no changes between the proposed rules and the final rules.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it received one comment as it relates to this rulemaking. The comment was concerned about the Department using taxpayer money on this program.

The Department responded that the program is voluntary to enter and is paid for directly by those who opt into the program. While consumers can be impacted by those

utilities/municipalities that opt into the program, the AWP program does require that those applicants develop a communication plan to alert impacted consumers and for applicants to provide consistent updates to impacted consumers. The Department believes that the fees imposed on those utilities/municipalities are in proportional to the expected costs of the program.

Council staff believes that the Department's response was sufficient.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

This specific rulemaking does not create a permit or a license, it only explains the fee process associated with a permit or a license. The specific permit requirements are found in the proposed rulemaking for Title 18, Chapter 9.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates, while the Safe Drinking Water Act (SDWA) (40 USC § 300f et seq.) does regulate the treatment and delivery of drinking water from public water systems across the United States, it does not explicitly regulate the treatment of "treated wastewater" (see R18-9-A801) as a source, which is the subject of this final rule. The Department states, SDWA only contemplates surface and ground water as sources for public water systems. The Department indicates some AWP facilities will be considered public water systems for the purposes of the SDWA and regulated in accordance with the SDWA in addition to the final AWP program.

11. Conclusion

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend four (4) rules and one (1) table in Title 18, Chapter 14, Article 1 regarding permit and compliance fees. The amendments are necessary to include hourly and annual fees that relate to the newly legislature mandated AWP program and to make clear that the AWP program is fully funded through fees and not general Department funds. The Department has indicated to Council staff that they have been in consistent discussions with potential applicants /stakeholders and that there have not been any concerns with the proposed fee amounts.

The Department is seeking an immediate effective date pursuant to A.R.S. § 41-1032(A)(2) to "avoid a violation of...state law, if the need for an immediate effective date is not created due to the agency's delay or inaction." The Department was required to complete a rulemaking by December 31, 2024 per A.R.S. § 49-211. The Department indicates that while that date has passed, the goal of the immediate effective date is to prevent the length of time without having this program in place to a minimum. The Department has indicated they have worked diligently in the time frame and have worked extensively with stakeholders to create this

program. The Department states that while they could not meet the statutory deadline it was a result of ensuring this new regulatory program was as least burdensome as possible while protecting the health of Arizonans. Council staff believes the Department has provided sufficient documentation of the extensive stakeholder process and that missing the timeframe was not caused by any Department inaction or delay. Thus Council staff believes the Department has provided sufficient justification for an immediate efficient date pursuant to A.R.S. § 41-1032(A)(2).

Council staff recommends approval of this rulemaking.

Arizona Department of Environmental Quality

Katie Hobbs
Governor

Karen Peters
Deputy Director

January 16, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Advanced Water Purification (AWP) Regular Rulemaking: Title 18, Environmental Quality, Chapters 1, 5, 9, and 14

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for March 4th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

(A)(1)(a) The public record closed for all rules on December 2nd, 2024 at 11:59 p.m.
(A)(1)(b) The rulemaking activity does not relate to a five-year review report.
(A)(1)(c) The rulemaking activity does establish a new fee; please see A.R.S. § 49-211(A) for authority.
(A)(1)(d) The rulemaking does not contain a fee increase as the AWP Program is being established for the first time and has no appropriately comparable precedent in state or Federal law.
(A)(1)(e) An immediate effective date is requested.
(A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule (*see* subheading III, below).
(A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement will notify the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S.

§ 41-1055(B)(3)(a) (*see* subheading III, below).

(A)(1)(h) A list of documents is enclosed (*see* subheading III, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

(A)(2) Four (4) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (*see* subheading III, below);

(A)(3) The preambles contain an economic, small business, and consumer impact statement that contains the information required by A.R.S. § 41-1055 (*see* subheading III, below);

(A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (*see* subheading III, below);

(A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;

(A)(6) Materials were incorporated by reference in this rulemaking (*see* subheading III, below);

(A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (*see* subheading III, below);

(A)(8) A list of statutes or other rules referred to in the definitions (*see* subheading III, below).

III. List of documents enclosed (38 documents total)**:**

- One (1) Cover Letter (R1-6-201(A)(1));
  - AWP_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));

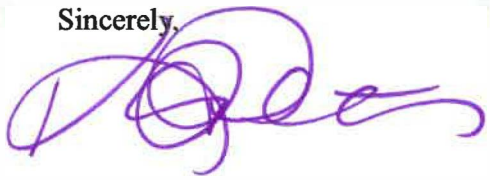
Thank you for your timely review and approval. Please contact Jon Rezabek or Natalie Kilker, Legal Specialists, Water Quality Division, 602-771-8219, 602-771-0358 or rezabek.jon@azdeq.gov, kilker.natalie@azdeq.gov if you have any questions.

Sincerely,



Karen Peters, Deputy Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 14. DEPARTMENT OF ENVIRONMENTAL QUALITY - PERMIT AND COMPLIANCE FEES

PREAMBLE

1. Permission to proceed with this final rulemaking was granted under A.R.S. § 41-1039 by the governor on:

March 5, 2024

2. Article, Part, or Section Affected (as applicable)	**Rulemaking Action**
R18-14-101	Amend
R18-14-102	Amend
R18-14-104	Amend
Table 1	Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-104(A)(1), (7); 49-203(A)(7), (9), (10)

Implementing statute: A.R.S. § 49-211

4. The effective date of the rule:

This rule shall become effective immediately after a certified original of the rule and preamble are filed with the Office of the Secretary of State pursuant to A.R.S. § 41-1032(A). The effective date is March 4, 2025.

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

The rule shall be effective on March 4, 2025. ADEQ selected this date pursuant to A.R.S. § 41-1032(A)(2) in order "to avoid a violation of … state law, if the need for an immediate effective date is not created due to the agency's delay or inaction".

A.R.S. § 49-211 requires ADEQ to, "[o]n or before December 31, 2024 … adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program [A.K.A. - AWP regulatory program], including rules establishing permitting standards and a permit application process."

While an immediate effective date will not avoid a violation of A.R.S. § 49-211, it serves to ameliorate the extent of the violation by establishing an effective date as close in time as possible to the statutory deadline "on or before December 31, 2024". The Legislature charged ADEQ with the adoption of an advanced water purification program in Fall 2022, setting a justifiably aggressive deadline of December 31, 2024. Since that time, ADEQ diligently undertook an extensive program design and rule-writing approach to appropriately design the revolutionary program. Additionally, ADEQ conducted a

special stakeholder approach commensurate with the intricacies of the program, itself, with myriad stakeholder efforts outlined in Section 7 of this Notice of Final Rulemaking. This process included engagement at all phases of the project, in the program framework and guiding principle development phase to the draft rule phase, and included multiple opportunities for ADEQ to work with and educate stakeholders, receive feedback on program components, and improve the program. Arizona is one of only a handful of states with a regulatory framework for advanced water purification, and the process was, therefore, carefully conducted to best preserve the interests of the Legislature and the health of Arizonans. While ADEQ worked just as aggressively to achieve the statutory deadline, best efforts nevertheless fell a few months short. For these reasons and pursuant to A.R.S. § 41-1032(A)(2), ADEQ did not delay or fail to act in such a way that led to the need for an immediate effective date.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not Applicable.

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3243, Issue Date: November 1, 2024, Issue Number: 44, File Number: R24-212.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2878, Issue Date: September 20, 2024, Issue Number: 38, File Number: R24, 176.

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

***Introduction*:**

The Arizona Department of Environmental Quality ("ADEQ") is mandated by the Arizona Legislature, pursuant to Arizona Revised Statutes (A.R.S.) § 49-211, to "establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program" and "adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program, including rules establishing permitting standards and a permit application process". The statute, adopted from House Bill 2861, as enacted in the Second Regular Session on June 28, 2022, became effective on September 24, 2022. For purposes of this Notice and the final rule, the term "direct potable reuse" is synonymous with "Advanced Water Purification" (or "AWP"), as the program is now called.

ADEQ, in consideration of Arizona's water supply needs and the Legislative mandate, interpreted A.R.S. § 49-211 as a call to establish an AWP program that is both protective of human health and the environment, as well as imposing minimum burden upon the stakeholder community in achieving that goal. The result of that effort is detailed in the final rules to be placed in the Arizona Administrative Code (A.A.C.), Title 18, Chapters 1, 5, 9 and 14, through this Notice of Final Rulemaking (NFRM) and through the simultaneously filed associated NFRMs.

***Background*:**

Arizona faces significant water supply challenges requiring proactive approaches to conservation and stewardship, in anticipation of decreased water availability in the future. Arizona is currently experiencing a severe and sustained drought, persisting since 1994. The state has experienced an average annual precipitation of approximately 12 inches, and climate data reveals a concerning trend: a consistent reduction of 0.9 inches of rainfall per year over the past three decades (Arizona State University, 2023, Climate of Arizona, https://azclimate.asu.edu/climate/). As a result of the continuing mega-drought, a Drought Emergency Declaration has existed since 1999. The impacts can be felt heavily in the rural areas of the state, where alternative water supplies are generally very limited and the economy is strongly affected by drought (e.g., grazing, irrigated agriculture, recreation, forestry). Most of rural Arizona relies exclusively on groundwater as its primary water source and lacks the groundwater regulations and conservation requirements which have been present in the state's active management areas (AMAs) and irrigation non-expansion areas (INAs). In addition to the reduced precipitation within Arizona, the Colorado River Basin is also facing decades-long drought conditions, which have led to historically low water levels in Colorado River system reservoirs. As a result, Arizona has implemented measures to reduce its consumption of Colorado River water. The Lower Colorado River Basin first experienced a Tier 1 Shortage as agreed in the 2007 Interim Guidelines and the Drought Contingency Plan in 2021. In 2022, Bureau of Reclamation Commissioner Camille Touton called on the Colorado River states to conserve between 2-4 million acre feet per year to address the critically low levels in Lake Powell and Lake Mead following a dire water year. Fortunately, voluntary reductions in the Lower Basin and a healthy water year 2022 averted a decline to critically low elevations. However, as the Basin States look ahead, climate projections and historical

trends indicate that the Basin is likely to face increasing average temperatures and reduced precipitation in the coming years. Arizonans will likely be called upon to live with further reduced Colorado River supplies for the foreseeable future as the next set of operational guidelines for the Colorado River are finalized.

Beyond the shrinking water supply, economic growth presents water providers with formidable challenges in meeting demand. As water-intensive industries relocate to Arizona, industrial water demands may increase. Furthermore, there may be challenges with maintaining the necessary housing growth due to the release of the new models of groundwater conditions in the Phoenix and Pinal AMAs. The results of the groundwater flow model projections show that over a period of 100 years, the Phoenix AMA will experience 4.86 million acre-feet (maf) of unmet demand for groundwater supplies and the Pinal AMA will experience 8.1 maf of unmet demand for groundwater supplies, given current conditions. In keeping with these findings of unmet demand, the State will not approve new determinations of Assured Water Supply within the Phoenix and Pinal AMAs based on groundwater supplies. This will lead to an increased competition for limited alternative water supplies. As growth continues, there will be an increasing need for sustainable and innovative water resource management strategies to accommodate the state's evolving needs.

***What is AWP*?**

Advanced Water Purification (AWP) is defined as the treatment and distribution of a municipal wastewater stream for use as potable water without the use or with limited use of an environmental buffer (US EPA, 2017, Potable Reuse Compendium). AWP has been shown to be a safe and effective source of potable water over decades of implementation in projects that have been installed worldwide at facilities in Big Spring, Texas (2013); Wichita Falls, Texas (2014); Namibia (1968 and 2002); Singapore (2019); and South Africa (2011) (Lahnsteiner, J., Van Rensburg, P., & Esterhuizen, J., 2018, Direct potable reuse–a feasible water management option. Journal of Water Reuse and Desalination, 8(1), 14-28).

AWP applications typically consist of a conventional water reclamation facility (WRF) or wastewater treatment plant (WWTP) that performs solids, carbon, nutrient, and pathogen removal and an advanced water treatment facility (AWTF) that provides additional pathogen and trace chemical removal. An AWTF is a utility or treatment plant where recycled wastewater is treated to produce purified water to meet specific AWP requirements. AWTFs use a multi-barrier approach where several redundant unit processes in series are installed to treat WRF effluent to potable water standards. Depending on the site-specific infrastructure configuration and treatment capabilities, the AWTF effluent may be introduced into several different locations of the potable water treatment and distribution system to be reused: (i) in the intake to the existing drinking water treatment facility (DWTF); (ii) after the DWTF and prior to the potable water distribution system; or (iii) Directly into the potable water distribution system.

***Evolution of AWP in Regulations*:**

A predecessor to the AWP program was adopted in the A.A.C. in 2018 at R18-9-E701, including a definition of "[a]dvanced reclaimed water treatment facility" at R18-9-A701(1). An associated NFRM filed simultaneously with this NFRM will repeal these rules in their entirety to make way for the AWP program. This prior, less detailed, single-ruled program was placed in Title 18, Chapter 9, Article 7 of the A.A.C. Article 7 is entitled "Use of Recycled Water". Part E of Article 7 was entitled "Purified Water

for Potable Use" and R18-9-E701 was entitled "Recycled Water Individual Permit for an Advanced Reclaimed Water Treatment Facility". R18-9-E701 detailed basic requirements for an advanced reclaimed water treatment facility and, during the rule's tenure, was used to permit one such facility. The facility was not authorized to, and did not, distribute purified water as drinking water through established conveyances or networks. As was stated above, in recent years, the Arizona Legislature determined a need for a more robust regulatory program for AWP. The Legislature passed House Bill 2861 into law in 2022, effectuating statute A.R.S. § 49-211, which led directly to the establishment of the final AWP program and the repeal of the previous program.

***Associated Rulemakings*:**

This final rulemaking includes four NFRMs, adding, repealing or amending rules in A.A.C. Title 18. Environmental Quality:

- Chapter 1 (Department of Environmental Quality - Administration),
- Chapter 5 (Department of Environmental Quality - Environmental Reviews and Certification),
- Chapter 9 (Department of Environmental Quality - Water Pollution Control), and
- Chapter 14 (Department of Environmental Quality - Permit and Compliance Fees).

The final changes to Chapter 1 are specific to updating the Licensing Time-Frame requirements in Article 5 to account for the new AWP program. The final changes to Chapter 5 are specific to amending the Minimum Design Criteria in Article 5 to correspond with the rules in the AWP program which outline the interconnection between AWP and the Safe Drinking Water Act, specifically between AWP permitting and design requirements and those in Article 5, applicable to public water systems. The final additions, amendments and repeals to Chapter 9 are all aimed at making way for and establishing the AWP regulatory program. The final changes to Chapter 14 are specific to updating the Water Quality fees in Article 1 to accommodate the AWP program commensurate with other water quality programs.

***Fees*:**

In accordance with the legislative mandate A.R.S. § 49-211(A), to "establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program", ADEQ, established specific permitting rates in rule that are sufficient for ADEQ to administer the AWP program. Like other similarly situated water programs, Arizona's AWP program follows a fee-for-service model, deriving funding from hourly review rates for permit applications and related components as well as from annual fees. ADEQ believes the costs charged through the program are commensurate with projected costs necessary to adequately support the program, and that the final fees are fairly assessed and impose the least burden possible to parties subject to the fees.

ADEQ is proposing to update the definitions in R18-14-101 to include the "AWP" acronym and scope AWP permit and demonstration permit-related activities into the "Water Quality Protection Service" billing structure, in parallel with other water quality programs. While the existing "Water Quality Protection Service" list captures a majority of the AWP billable activities, such as pre-application and application activities, ADEQ is proposing to add a new billing item for "reviewing and commenting" on AWP permit and demonstration permit materials. This is a unique process in the final program wherein applicants may be required to submit certain plan components to the department, such as their Initial Source Water Characterization Plan, Pilot Study

Plan, and Full-Scale Verification Plan, for review and comment throughout the pre-application period (*see generally* R18-9-C813). ADEQ's review and comment is not a licensing decision, but a method for ADEQ to collaborate with the applicant and provide feedback on foundational permit components at relevant times prior to the AWP permit application.

ADEQ is proposing to amend R18-14-102, by incorporating an AWP hourly fee into subsection (B). The hourly fee is calculated through an accounting of administrative costs such as AWP-specific program needs and salaries for technical staff, administrators, and management. ADEQ is proposing to update Table 1 under R18-14-102 by stating that there are no maximum fees for AWP. This is because the subject matter of the AWP program is vast and complicated, the state of the technology is rapidly changing, and average review times are, as of yet, unknown. ADEQ is proposing an annual fee for AWP permittees in R18-14-104 that aims to offset the direct and indirect administrative costs of the program, including items such as staff salaries and benefits, third-party professional services, staff training, operator certification administration, legal support, compliance, enforcement, database establishment and maintenance, equipment, travel, and other necessary operational expenses directly related to issuing permits and enforcing the requirements of the AWP program. ADEQ consistently utilizes this method to set and amend programmatic fees in water quality programs (*see e.g.* 17 A.A.R. 568 (2011) and 29 A.A.R. 1869 (2023)).

Notably, like other water quality program fees, as of August 4, 2023 (*see* 29 A.A.R. 1870 (2023)), AWP fees are subject to annual Consumer Price Index (CPI) adjustments. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year, available at:

https://data.bls.gov/pdq/SurveyOutputServlet?data_tool=dropmap&series_id=CUURS48ASA0,CUUSS48ASA0.

This CPI is a better representation of Arizona's rapidly expanding economy and population than the national CPI.

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not Applicable.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not Applicable.

10. A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of a number of new sections, as well as amendments to existing sections, in four (4) chapters in Title 18 of the Arizona Administrative Code (A.A.C.). Those chapters, and the respective articles affected therein, are; Chapter 1, Article 5; Chapter 5, Article 5; Chapter 9, Articles 2, 7

and 8; and Chapter 14, Article 1. The rulemaking is being conducted in order to adopt the Advanced Water Purification (AWP) regulatory program (formerly "Direct Potable Reuse" program) pursuant to statutory mandate at Arizona Revised Statutes (A.R.S.) § 49-211.

Arizona's ongoing issues with water scarcity, combined with real concerns over meeting demand for expanding communities, highlight the need to develop additional sources of water that can meet growing municipal water demands. In response to increasing state water scarcity, the Arizona legislature mandated through A.R.S. § 49-211 that "...the [ADEQ] director shall adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program, including rules establishing permitting standards and a permit application process." As a result, ADEQ has been charged with developing a program that allows for and regulates the advanced treatment of previously treated municipal wastewater to achieve a drinking-water-quality product, providing a new and convenient water source, known as the AWP program.

AWP is an innovative set of water treatment processes applied at an Advanced Water Treatment Facility (AWTF) that directly purify treated wastewater originating from a community's wastewater treatment plant. This AWTF-treated water can then be either delivered to existing Drinking Water Treatment Facilities (DWTFs) for further treatment or blending or distributed directly to a drinking water distribution system. In both cases, the safeguards of the federal Safe Drinking Water Act (SDWA) continue to apply. The AWP program thus offers the potential for a new and sustainable water source that can provide a consistent supply of water for existing users and support Arizona's future population growth and economic development.

B. A summary of the EIS:

General Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include ADEQ, Arizona Water Provider Agencies (WPAs), Municipal governments, WPA customers, the general public, and the Arizona environment, identified, generally, here, and in more detail throughout the rest of the Economic Impact Statement (EIS) below. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the implementation of the AWP regulatory program.

ADEQ is the sole state agency responsible for the implementation and administration of the AWP program. As detailed in this EIS, impacts to ADEQ include the hiring of new staff commensurate with the expanded technical oversight necessary to administer the AWP program. However, the projected future costs to ADEQ will be offset through its fee-for-service model which places the burden for AWP program services on the applicants and permittees through application fees and annual fees, and the overall impact is therefore expected to be moderate. This approach was mandated by the Arizona Legislature through A.R.S. § 49-211, subsection (A), which states, "...[ADEQ] shall establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program…" Therefore, the Legislature charged ADEQ with developing and administering the AWP program and required ADEQ to establish fees sufficient to maintain the program. ADEQ's proposed fees, detailed in the Chapter 14 NFRM, were calculated to match the projected costs of the nascent program.

Next, the WPAs that elect to apply for a permit under the AWP program are affected by the capital costs of the AWP investment,

increased compliance and monitoring, and ongoing operations and maintenance responsibility. While the expected costs to participating WPAs are expected to be significant, this impact is balanced against both the voluntary and emerging natures of the AWP program. AWP is not mandated for any WPA and financial barriers to entry may be lowered over time as the program becomes more established. Additionally, Municipal governments are not delegated any administration functions of the program but may be impacted given their relationship to the WPAs in their communities. Local governments may be the WPA, and as such, face significant impacts incumbent on any WPA engaged with the AWP program.

Furthermore, WPA customers are directly impacted by the new supply, beneficially through the delivery of the additional water supply to them, and financially through impacts in water rates. Notably, these impacts are only relevant to customers of WPAs that have adopted AWP in their service area. Customers may face higher water rates as a result of AWP, however, the exact costs are not known to ADEQ as the WPA is responsible for setting reasonable rates on a case-by-case basis in consideration of their service area. The general public is generally impacted by the option of a new water supply alternative for communities, providing an overall net increase in water availability for beneficial use such as drinking. Finally, the environment is impacted, beneficially through potential decreased reliance on groundwater and surface water supplies from WPAs using AWP water as a source, but also faces impacts from changes in water use as a result of expanded, potentially lucrative use options such as reduced groundwater discharge or reclaimed water delivery.

Specific Impacts

The entity with the largest expected impact as a result of the AWP regulatory program is the WPAs. This impact is specific to capital costs, operations/maintenance cost, and permitting/compliance costs. Fundamentally the AWP program is intended to be flexible, setting minimum requirements in rule necessary for the protection of human health and the environment and in enough detail to facilitate a performance standard that can be consistently achieved by permittees under the program. However, the program leaves many details and specifics up to the discretion of the Advanced Water Purification Responsible Agency (AWPRA) as they determine what technology, treatment train configuration, etc. is best to address their treated wastewater influent, their contributing non-domestic dischargers, their AWPRA partners, etc. Therefore, the EIS cannot determine, with exact specificity, the impacts to each WPA. However, the EIS provides cost evaluations for three representative AWP projects, in an effort to provide a range of potential options. These three projects represent different treatment trains: 1) Ozone-Biologically Activated Carbon (BAC), 2) Ozone-BAC with Side-Stream Reverse Osmosis (RO), and 3) Full-Stream RO.

Upon an evaluation of these representative projects, this EIS provides expected costs related to the implementation of AWP for WPAs, enabling them to make informed decisions about whether AWP is a good option for their communities. For project 1, Ozone-BAC, the estimated costs are as follows: capital costs - $208.0 million; annual operations and maintenance costs - $3.3 million. For project 2, Ozone-BAC with Side-Stream RO, the estimated costs are as follows: capital costs - $229.0 million; annual operations and maintenance costs - $8.5 million. For project 3, Full-Stream RO, the estimated costs are as follows: capital costs - $276.0 million; annual operations and maintenance costs - $10.9 million.

Stakeholder Process

All stakeholders identified as entities impacted under this EIS have been subject to the AWP stakeholder engagement process. This process commenced in 2023 with a survey of the general public, a survey of more specific stakeholders, and the establishment of a Technical Advisory Group (TAG) for development of the AWP rules. The TAG consisted of experts and representatives from academia, utilities, regulatory agencies, and engineers and scientists. In combination with the additional stakeholders and conversations with expected applicants (WPAs), this effort was a comprehensive discussion on all programmatic elements, including economic impacts.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Recycled water is costly, but for some communities it may be the most cost-effective alternative for new and reliable long-term water supplies. The AWP program will operate uniquely among existing water programs as it will be state-run and has no federal equivalent. This rulemaking establishes rules, including permitting standards and a permit application process, for participating in the AWP program, a voluntary program. The decision to apply for a permit under the AWP program rests entirely with the entity wishing to pursue AWP as an addition to their drinking water portfolio.

While the AWP program is voluntary, there will be costs to each adopting entity for permitting and compliance requirements and infrastructure implementation. There may also be cascading cost impacts to other persons or groups (such as customers), but these costs will be borne throughout the water system and will be discussed in advance with stakeholders by water provider agencies.

ADEQ has identified the following list of affected entities and persons who stand to incur direct impacts and/or costs, but also potentially significant benefits, from this rulemaking:

- Arizona Department of Environmental Quality (ADEQ);
- Arizona Water Provider Agencies (WPAs);
- Municipal governments;
- WPA water customers, both residential and nonresidential;
- General public; and
- Arizona environment.

D. Cost/Benefit Analysis:

Comprehensive assessment of the AWP program requires identification of the program's impacts across affected persons and entities. Future AWP implementation can be expected to result in a range of impacts, both beneficial and adverse, which could include:

- Improvements in water availability throughout the water system;
- Operational changes for WPAs;
- Increased capital and operating and maintenance (O&M) expenses for WPAs;
- Increased rates for water customers;

- Enhanced drought resilience of the water system;
- Potential shifts in water rights allocations; and
- Changes in agricultural water usage.

The nature and magnitude of AWP-related costs and benefits will depend on several key factors related to each entity's AWP technology choice and the approach necessary for its implementation, as well as the context within which future development occurs. As noted previously, the voluntary nature of the AWP program allows entities to choose freely whether to engage with the program and thus evaluate potential cost impacts well in advance of adoption.

This EIS is a program-level assessment that evaluates the general impacts from future AWP implementation through the AWP program. As such, it does not estimate specific impacts for any individual project, as those would inherently require consideration of that project's specific circumstances (e.g. water demand, location, and hydrology) and resource conditions. This EIS acknowledges that each AWP project will have cost increase impacts on both a participating WPA and its customers, while advising that project-level assessments and precise quantifications of any specific impacts (e.g., water rate increases to customers, additional permitting fees to ADEQ, potential changes in water usage patterns, changes in infrastructure maintenance costs, possible need for additional staff or training, and potential changes in local ecosystems due to altered water flows) were not evaluated as part of this EIS. Nonetheless, this EIS provides a general assessment of the expected cost effects on WPAs and ADEQ from the AWP program. This section outlines ADEQ's analyses of the expected costs and benefits of this rulemaking, made through consultation with ADEQ staff and AWP subject matter experts (SMEs). Part 1 provides a summary table of the affected stakeholder groups with a description of identified potential AWP program effects, and their corresponding revenue and cost effect findings. Part 2 provides a more detailed discussion of stakeholder impacts, analyses, and findings.

1. Part I - Cost/Benefit Stakeholder Matrix:

Minimal	Moderate	Substantial	Significant
$10,000 or less	$10,001 to $1,000,000	$1,000,001 or more	Cost/Burden cannot be calculated, but the Department expects it to be significant.

Description of Affected Groups	Description of Effect	Increased Cost/Decreased Revenue	Decreased Cost/Increased Revenue
A. State and Local Government Agencies			
Arizona Department of Environmental Quality (ADEQ)	Increased agency responsibilities for administration, oversight, and management of AWP "fee-for-service" program, in which the State will be reimbursed for most AWP-related costs.	Minimal	
	Initial start-up, implementation, and subsequent program oversight activities may result in non-reimbursed costs to the State.	Moderate	
Water Provider Agencies (WPAs)	Increased compliance and monitoring	Moderate	
	Construction of AWTF and O&M responsibilities.	Substantial	

	Revenue changes from expanded customer base and/or deliveries.		Significant
Municipal Governments (non-WPAs)	Coordination with WPA and other agencies.	Moderate	
	Impact on tax revenue from resulting community expansion.		Significant
B. Customers			
WPA Customers	Impact to user water rates.	Minimal	
	Additional water supply that will allow existing and new business and residential growth.		Moderate
	Impacts upon public health related to water quality.	None identified	None identified
C. General Public			
Arizona Water System	Overall net increase in water availability. Additional water will allow community economic development and growth.		Minimal
	Existing surface water purchases can be diverted to other users or uses.		Moderate
	Groundwater resources can be made available for other users or uses.		Significant
	Diverted wastewater outflow may decrease return flows for downstream users.	Minimal	
Downstream Users	All existing supply commitments will be maintained or renegotiated, however diversion of wastewater outflows for AWP use may impact some downstream users. State environmental and permitting processes will consider and address project-specific cases and conditions. Negative impacts to downstream users are thus expected to be minimal (subject to mitigation if necessary).	Minimal	
D. Arizona Environment/ Ecosystem			
Environmental	Reduced groundwater use and depletion with decreased risks of land subsidence and infrastructure damage.		Significant
	Reduced water outflow from wastewater treatment facilities may result in reduced groundwater recharge.		Minimal
	Reduction in poor quality outflow from wastewater treatment facilities may improve water quality in receiving water body		Minimal

2. Part II - Individual Stakeholder Summaries / Calculations

The following section provides an explanatory discussion of expected AWP costs and benefits to the program's various stakeholders. The section outlines the key factors and analysis used to determine the impact findings reported in Part 1 of Section D, above.

State and Local Government Agencies - ADEQ

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself required significant staff time for technical review, rule composition, facilitation and evaluation of public input and other necessary tasks. Additionally, ADEQ will incur costs for AWP-related staff expansion and performance of new AWP-associated administrative responsibilities needed to implement and operate the AWP program. ADEQ currently anticipates that it will need to hire new staff with the necessary technical expertise for a variety of program implementation and oversight roles. These positions will likely include engineers (for design review and compliance of AWP facilities) and non-engineer staff for

administrative tasks (e.g., project management, permit writing, operator certification coordination, other program support needs, etc.).

The AWP program's duties and tasks will vary based on the number, type, and phase of WPA participants and it is expected that adequately qualified agency staff may be able to perform several roles. It is expected that the AWP program will grow over time as more utilities seek and implement AWP permits, with permitting and administrative support growing equivalently. Nevertheless, in order to support the administration of the AWP program in the near term, ADEQ plans on hiring 2.5 new full-time employees (FTE). These 2.5 FTEs will be split primarily between permit specialist positions, inspectors, and administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees and annual fees.

There will also be costs associated with meeting requirements during the AWP approval and permitting process, which will adhere to all applicable state laws and aim to serve the regulated community while being protective of public health and the environment. ADEQ envisions that this permitting process will function similarly to other ADEQ permitting processes (such as for obtaining Aquifer Protection Permits). The AWP permitting process was developed and will be adopted into the A.A.C. in accordance with rulemaking requirements in the Arizona Administrative Procedure Act.

ADEQ's management and administration of the AWP approval and permitting process will be performed on a "fee-for-service" basis, under which the State will be reimbursed for most AWP-related costs, and thus future ADEQ responsibilities for the AWP program should be achieved with little fiscal cost to the State of Arizona. Instead, as described below, administrative and oversight costs for AWP deployment will be borne initially by WPAs and then ultimately passed on to customers for cost recovery through rate-setting.

Water Provider Agencies (WPAs)

The decision to participate in the AWP program rests entirely with any WPA wishing to pursue AWP as an addition to their drinking water portfolio. For those WPAs choosing to implement AWP, there will be increases in costs, primarily associated with permitting/compliance/regulation, capital investment, and operations. Participating WPAs will incur program-specific regulatory and compliance costs, capital costs for AWTF construction and system integration with their water systems, and additional operations and maintenance (O&M) costs over the long-term. Other additional program-specific regulatory and compliance costs could include permitting, compliance costs to meet new environmental standards, and expenses for regular inspections and audits. As noted previously, WPA-incurred costs will be largely recouped from customers through adjustments in water rates (subject to Arizona Corporation Commission approvals).

Data collected for this EIS aims to provide a representation of the economic impacts expected from implementing AWP technologies in Arizona and includes information from stakeholders working on various aspects of AWP rulemaking. Analysis for this EIS involved the review of key SME opinions solicited by ADEQ to support its development of high-level estimates for projected permitting, compliance, capital, and O&M costs to participating WPAs.

AWP-related costs have been assessed, estimated, and reported "in toto" in many cases, as appropriate. This approach best meets

this EIS's purposes of representing and evaluating the overall net economic effects of the final rulemaking by determining the overall total combined costs for the various component cost items. This approach is particularly appropriate for evaluation of O&M and compliance costs, which may be performed by an individual staff person; are likely project-specific; and/or are inter-related or inter-dependent, preventing them from being reliably estimated individually and simply aggregated. Furthermore, a higher-level summary assessment may provide a more appropriate and reasonable valuation given inherent imprecision estimating costs that are project-specific, numerous, relatively small, and difficult to quantify individually.

While there will be cost increases, the potential exists for AWP technology to cost less than other available alternatives. As a result, participating WPAs may realize a benefit (cost savings) from AWP implementation.

Water Provider Agencies (WPAs) - Implementation Costs

Implementation costs for an AWTF could include: land acquisition, site preparation, purchase, and installation of advanced treatment technologies, system integration with existing water systems, and engineering and permitting. System integration could involve infrastructure upgrades, installation of new pipelines, and development of blending facilities. The AWP program includes considerable flexibility for each participating WPA to select the AWP technology and approach most suitable and cost-effective for its specific circumstances.

In general, the technical requirements of AWP deployment will result in facility designs that will require capital costs related to the development and building of all new required AWP infrastructure. The potential costs of implementing technological enhancements related to AWP processes within existing wastewater infrastructure are discussed below. Key WPA technical requirements for AWP development are also summarized, with additional discussion on this EIS's evaluation approach to, and findings on, expected impacts to participating WPAs. While the detailed technical and design requirements incumbent upon the WPA applicant are detailed in the final rule, the following technical and design capital costs for AWP development and installation will predominantly impact the WPAs.

WPA Implementation Costs - Permitting

The permitting process complies with all relevant state laws, with the dual aim of serving the needs of the regulated community and safeguarding public health and the environment. The fees established in this rulemaking are in direct response to a legislative mandate to ensure that the rule establishes "permit fees sufficient to administer a direct potable reuse of treated wastewater program" with all fees deposited in the water quality fee fund (A.R.S. § 49-211(A)). This structure mimics the fee approach for other Water Quality Division programs, which are self-funded, fee-based programs. Therefore, the objective in setting AWP fees for permittees - the Water Provider Agencies (WPAs) (or Advanced Water Purification Responsible Agencies, i.e. "AWPRAs") - is to fund the program from the regulated entities, who voluntarily undertake participation in the AWP program. While ADEQ is guided by its statutory mandate, ADEQ did analyze other direct potable reuse (DPR) programs within other states. However, upon analysis, ADEQ determined that a comparison of these states provides minimal value to comparing the reasonableness or adequacy of AWP's fees.

Other states with DPR regulatory programs in development that ADEQ analyzed include Texas and Colorado. According to reports between ADEQ and the Colorado Department of Public Health and the Environment (CDPHE), Colorado's DPR regulations are established, but neither the staff, nor the fees to support the program have been fully determined or installed. Despite the installation of the regulations, CDPHE is not yet administering the program because there are no current permittees. Currently, CDPHE is actively working with stakeholders to determine the best way to derive funding for the program. According to reports between ADEQ and Texas (through the Texas Commission on Environmental Quality (TCEQ)), Texas' DPR regulatory program is funded through a combination of federal and state funds and fees. Therefore, TCEQ is not required to recover its full DPR program cost through DPR program fees alone. In fact, according to reports between ADEQ and TCEQ, Texas' DPR program does not currently have DPR-specific fees.

Considering the comparative analysis above and ADEQ's legislatively required financial structure in A.R.S. § 49-211(A), ADEQ believes the fees contained in the final rule (*see* A.A.C. Title 18, Chapter 14, Article 1) are in line with the Legislative mandate and carefully designed to support the administration of the program (*see* Heading No. 7, subheading "Fees" above).

WPA Implementation Costs - Enhanced Source Control

Traditional source control programs are designed to protect wastewater treatment plant infrastructure, collection systems, and receiving water bodies under an existing regulatory framework through the National Pretreatment Program (NPP) of the federal Clean Water Act. Because AWP projects create potable water, directly, without an environmental buffer, the program requires Enhanced Source Control (ESC).

ESC includes the control, elimination, or minimization of "constituents of concern" discharged from non-domestic dischargers into a wastewater collection system. Such constituents of concern include federally-regulated chemicals, AWP-regulated chemicals, and performance-based indicator compounds, which are necessary to eliminate or minimize discharges of constituents of concern into the wastewater collection system that is providing the source water for the Advanced Water Treatment Facility (AWTF) in the AWP project.

ESC measures may result in capital and/or increased O&M costs for wastewater customers in which constituents of concern have been found. The magnitude of the cost increases will vary, but in many cases it is anticipated that simple technology discharge management measures (such as temporary retention tanks and scheduled releases, sand filtration, coagulation/flocculation, or use of activated charcoal) could be effective and relatively low cost.

Additionally, a Pollutant Reduction and Elimination Plan specific to each ESC implementation will need to be developed to build relationships with non-domestic dischargers, increase participation in pollution prevention methods to control release of constituents of concern in the collection system, and educate the public about protecting source water. Additional information regarding the specifics of individual ESC programs can be found in R18-9-E824.

WPA Implementation Costs - Nitrogen Removal

The AWP program recognizes the critical importance of nitrogen removal during the treatment process. Nitrogen, primarily in the

forms of nitrate and ammonia, can have significant environmental and health impacts if not adequately managed. The AWP program implements flexible strategies for nitrogen removal, allowing facilities to utilize either wastewater treatment processes at water treatment facilities or advanced treatment technologies at AWTFs. These include: biological nitrogen removal (BNR), which uses bacteria to convert nitrogen from one form to another; membrane bioreactors (MBRs) that combine conventional treatment with membrane filtration; an anaerobic ammonia oxidation process that converts ammonium and nitrite directly into nitrogen gas; ion exchange, which removes nitrogen compounds by exchanging them with other ions; and/or adsorption, where nitrogen-containing compounds adhere to the surface of a solid phase.

The choice of strategy depends on various factors, such as the concentration and form of nitrogen in the wastewater, discharge requirements, available infrastructure and resources, and overall treatment objectives. This dual-pathway approach ensures that the specific needs and capacities of different facilities can be met while still achieving the stringent standards required under AWP.

WPA Implementation Costs - Advanced Oxidation Process

The Advanced Oxidation Process (AOP) is a cornerstone of the AWP program's treatment strategy under the minimum design criteria of the rule, R18-9-F832. AOPs are designed to generate highly reactive hydroxyl radicals, which effectively oxidize and break down a wide range of organic contaminants. This AWP program mandates the inclusion of an AOP treatment process in all AWTF treatment trains, with specific performance benchmarks, achieved through a selection of one of two available methods. This requirement underscores the program's commitment to addressing contaminants of emerging concern and ensuring the safety and quality of the treated water, and the dual-pathway approach ensures that the specific needs and capacities of different facilities can be met while still achieving the stringent standards required under AWP.

WPA Implementation Costs - Other Technical and Design Requirements

In addition to nitrogen removal and advanced oxidation, the AWP program outlines a comprehensive set of technical and design requirements. These include the establishment of multiple barrier treatments, management of total organic carbon (TOC), and the implementation of robust monitoring and reporting systems. The program also emphasizes the need for full-scale verification testing, corrosion control measures, and cross-connection prevention to maintain the integrity of the water supply.

WPA - Operational, Monitoring, and Compliance (OMC) Costs

Once an AWTF has been built, there will be subsequent operating processes and protocols that will increase annual O&M expenditures for a WPA. Additional O&M costs over the long-term could encompass routine system maintenance, replacement of aging equipment, energy costs, personnel costs for system operation, and monitoring, and expenses for ongoing water quality testing and reporting. It is not anticipated that AWP adoption will have any impact upon non-participating WPAs.

Operating an AWTF involves a variety of costs. These include the cost of energy required to run the facility, the cost of chemicals used in water treatment processes, and the cost of labor for personnel who operate and maintain the facility. Additionally, there are costs associated with the regular maintenance of equipment and infrastructure, as well as the eventual replacement of aging equipment. These costs can vary depending on the size and complexity of the facility, the quality of the source water, and the

specific treatment processes used.

WPA - OMC - Annual Labor, Power, Chemicals, Replacement and Maintenance

The annual costs of operating an AWTF include labor, which refers to salaries and benefits for employees who operate and maintain the facility. Labor may include costs for training and professional development. Annual costs also include power, the cost of the electricity needed to run the facility's pumps, treatment processes, and other equipment. In addition, many water treatment processes require the use of chemicals to remove contaminants from the water. The cost of these chemicals can vary depending on the quality of the source water and the specific treatment processes used. Finally, over time, equipment and infrastructure will need to be repaired or replaced. These costs can be significant, especially for larger facilities or those using more advanced treatment processes. Regular maintenance can help to extend the life of equipment and reduce the need for costly replacements. These costs are ongoing and must be budgeted for each year to ensure the smooth operation of an AWTF.

WPA - OMC - Operator Certification

An additional certification will be required for operators of certain AWPRA facilities, including all AWTFs and some water reclamation facilities. Such additional certification will naturally come with training and implementation costs, but will also provide the benefit of improved understanding of AWP technology and operations at the WPA level. Operator certification standards for AWP systems will be required to encompass the specific knowledge, skills and experience to maintain the reliability, resilience, and continual performance of AWP systems and respond adeptly to any system failure. The new certification process will encompass a range of critical elements, including comprehensive coverage of AWP technologies, a deep exploration of source water risks and risk management strategies, proficiency in critical control point methodologies, in-depth knowledge of specific AWP regulatory requirements, and the capability to manage operational responses effectively.

The certification program for AWP operators is similar to that of the existing water and wastewater certifications from the American Water Works Association (AWWA) - California - Nevada Section. This Advanced Water Purification Operator Certification would also focus on specific advanced treatment technologies required for AWP and include general requirements to define AWP in the broader picture of public health protection, pathogen and pollutant targets, and other issues. WPAs will need to ensure that its operations staff have the necessary knowledge and experience to successfully complete certification.

WPA - OMC - Enhanced Source Control

As described above, ESC involves strategies to prevent or reduce pollutants in the water supply at the source. The costs associated with ESC processes can include monitoring costs for regular testing of water quality, infrastructure costs for construction or upgrade of facilities to prevent contamination, and regulatory compliance costs for adhering to environmental regulations. Additionally, there are costs for education and outreach to inform the public or specific industries about best practices for preventing water pollution, and maintenance costs for upkeep of infrastructure or equipment used for source control.

While these costs can be significant, the benefits of ESC, such as improved water quality, reduced treatment costs, and better public health outcomes, often outweigh the expenses. Costs can vary depending on local conditions, the specific water source, and the

nature of potential pollutants. Therefore, a detailed cost/benefit analysis by an AWPRA is often necessary when considering ESC measures.

WPA - OMC - Chemical Monitoring

ADEQ has established a three-tiered monitoring approach to managing regulated chemicals in the treated wastewater at the water treatment facility under the AWP program. Tier 1 includes monitoring of chemicals currently covered under the Safe Drinking Water Act (SDWA); Tier 2 includes AWP-specific contaminants that are not federally regulated but may pose a health concern; and Tier 3 requires performance-based indicators to establish treatment performance. At each tier, robust monitoring is required, resulting in increased O&M costs, which ensures high standards of water quality are maintained for WPA customers and any downstream users/uses.

WPA - OMC - Monitoring and Reporting

Participating in the AWP program will come with increased monitoring and reporting requirements, and associated costs. Beyond costs, however, there will also be considerable benefits from increased monitoring and reporting. First, increased collection of data and technical information will make WPA staff better informed about, and better able to track and measure, the operations and performance of their facilities. Additional collection of water recycling metrics, for instance, can improve operator and manager understandings of their current performance and assist them with adapting and improving, so that they can achieve higher standards and/or greater efficiencies.

Second, improved tracking of performance data and metrics will facilitate comparisons between different AWP systems, enhancing ADEQ's and each WPA's ability to learn and improve future operations. Data reporting to ADEQ by individual WPAs, for instance, will inform and support ADEQ's monitoring and oversight capabilities.

WPA - OMC - Federal and State Compliance

The AWP rulemaking requires participating WPAs to conform with existing EPA guidelines. There are specific EPA compliance requirements in addition to the required chemical monitoring presented above. These include:

- 1. Laboratory Analysis. Laboratories performing analyses must comply with the Health and Safety Code, known as the Environmental Laboratory Accreditation Act. Chemical analysis methods should be approved by the EPA for use in compliance with the SDWA.
- 2. Reporting. AWTFs are required to report analytical results for ongoing compliance monitoring of pathogens and chemicals. Reports must include detail regarding the ESC program, cross-connection incidents, and any other relevant information as per AWP program requirements.

These requirements are part of final program standards that will ensure the protection of public health through the control of both pathogens and chemicals in the AWP process.

WPA - OMC - Additional Agency Compliance

The final regulations for the AWP program require WPAs to adhere to established numerical criteria (such as regulated pollutant

concentrations that must not be exceeded to protect water quality and public health, and action level thresholds that necessitate immediate corrective measures). These standards and thresholds, which may include limits on contaminants like nutrients or heavy metals, are set by associated agencies or organizations and are integral to WPA operation.

WPA - OMC - Public Communications

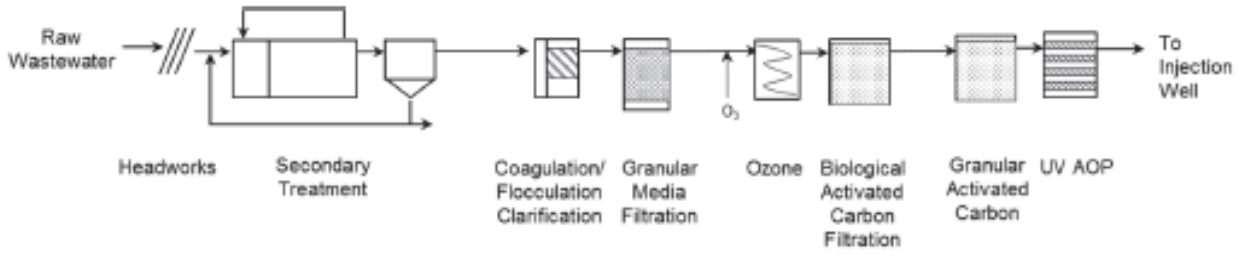
As part of AWP implementation, each WPA and associated partners must develop and implement a "Public Communication Plan" within their service area to notify the public of the possibility of their transition to AWP, address public concerns, build public confidence, and garner public acceptance for AWP (*see* R18-9-B811). Most WPAs already have community relations staff resources allocated for their current water programs, so the level of additional effort required for adequate and successful communication to the public about AWPs will vary between agencies according to their circumstances.

WPA - Cost Evaluation

ADEQ has identified three representative AWP projects for analysis within this EIS, each using a different AWTF treatment train: 1) Ozone-Biologically Activated Carbon (BAC), 2) Ozone-BAC with Side-Stream Reverse Osmosis (RO), and 3) Full-Stream RO. These projects have been selected as they represent a range of treatment options, reflecting the different processes available to meet the diverse needs and capacities of different facilities. This EIS evaluated these representative projects to assess expected costs and benefits of implementing AWP technologies using each of them in Arizona, thereby supporting informed decision-making and strategic planning for water resource management in the state.

WPA - Cost Evaluation - Project 1 Ozone-BAC:

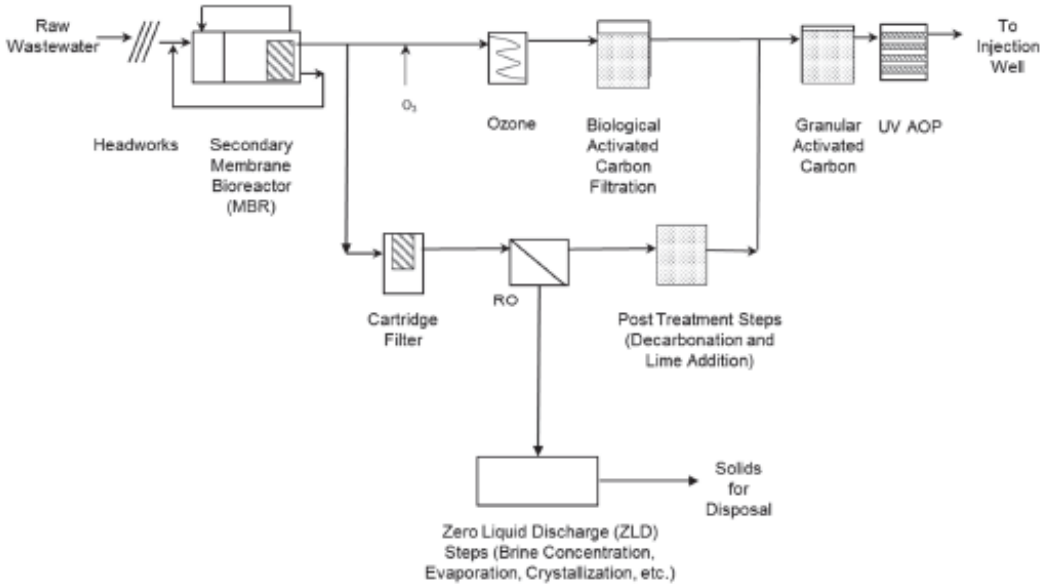
This train is adapted from injection well potable reuse (PR) projects. The Ozone-BAC process involves the use of ozone for oxidation and biofiltration for organic and microbial contaminant removal but does not significantly reduce the concentration of Total Dissolved Solids (TDS). This train is ideal for applications where the primary concern is the removal of targeted bulk and trace organic contaminants, but not for cases where the TDS of the source water is high and/or TDS reduction is needed to meet purified water quality targets.



WPA - Cost Evaluation - Project 2 Ozone-BAC with Side-Stream RO:

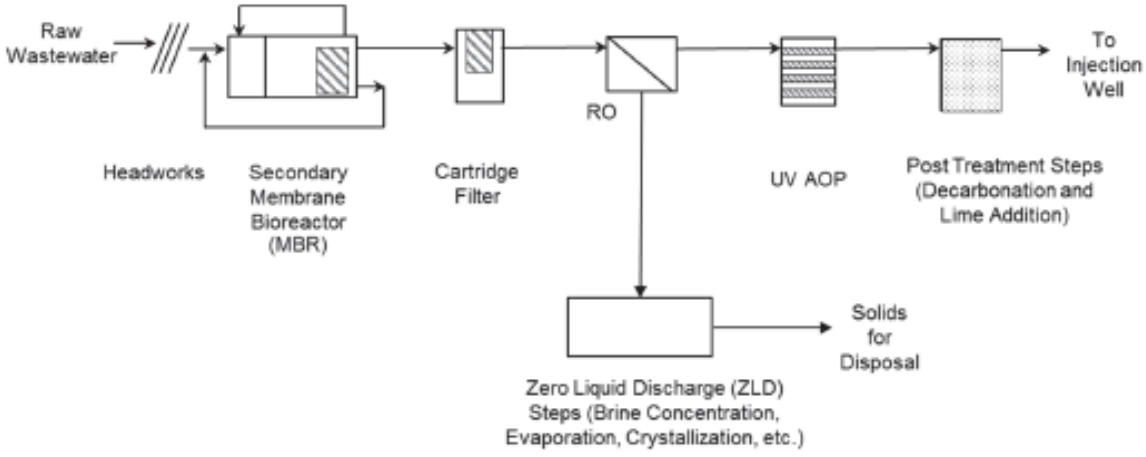
This train includes a side-stream RO treatment for a portion of the water being treated for enhanced salinity reduction. It is suitable for injection-well PR projects where some salinity must be controlled. The side-stream RO allows for the removal of dissolved

solids from a portion of the water, and thus helps to manage overall salinity levels and to reduce project costs by implementing a more targeted approach to RO treatment.



WPA - Cost Evaluation - Project 3 Full-Stream RO:

This train is suitable for injection well PR projects where full-stream reverse osmosis (RO) treatment is required. Full-stream RO treats the entire flow of water, providing comprehensive removal of salts and other dissolved solids. This train is ideal for applications where salinity control is necessary.



WPA - Cost Evaluation - Capital Cost

Capital and O&M costs have been estimated for each of the three representative AWP projects. These high-level "typical" cost estimates are used to derive approximate unit cost estimates to provide "ball-park" representation of the likely costs for participating

WPA and its customers. Unit-supplied water values are derived from these estimates to provide an indication of the AWP's potential customer costs and enable cost comparisons with other water supply alternatives, such as desalination.

The cost data developed for the three representative AWP projects include expenditures for AWTF design and construction, required water recovery facility enhancements, an ESC program, and O&M. Together these demonstrate representative costs that a WPA can be expected to incur to develop and operate a typical 6 million gallon per day (MGD) AWTF with an assumed 30-year useful life. Unit costs are presented in constant 2024 dollars and thus do not include any inflation effects. It is also assumed that an AWTF will be funded with low-interest loans (such as federal Water Infrastructure Finance and Innovation Act programs), which, when applied to current 2024-dollar terms, will approximate to a zero (0) percent real interest rate.

The estimated capital costs for the representative projects are shown in the table below.

Representative Project	Project Type	Capital Costs, $M	Annualized Capital Costs, $/AFY
Project 1	Carbon Based Advanced Treatment (CBAT)	$208.0	$1,000
Project 2	Carbon Based Advanced Treatment (CBAT) with Sidestream Reverse Osmosis (RO) (a)	$229.0	$1,100
Project 3	Full Reverse Osmosis (RO) with Brine Management	$276.0	$1,400

Note: (a) Assumes sidestream RO of 55% of CBAT flow. AFY is acre feet per year.

WPA - Cost Evaluation - O&M and Compliance Costs

The estimated annual O&M costs for each of the representative projects are provided in the table below. These costs include labor, materials, equipment repair/replacement and power. Staff costs are based on an estimated average labor cost of $80,000 and $0.20 kWh power cost for operations.

Representative Projects	Project Type	Annual O&M Costs, $M/yr	Annualized Capital + O&M Costs, $/AFY
Project 1	Carbon Based Advanced Treatment (CBAT)	$3.3	$1,520
Project 2	Carbon Based Advanced Treatment (CBAT) w/ Sidestream Reverse Osmosis (RO) (a)	$8.5	$2,390
Project 3	Full Reverse Osmosis (RO) w/ Brine Management	$10.9	$2,990

Note: (a) Assumes sidestream RO of 55% of CBAT flow. AFY is acre feet per year.

In addition, as discussed above, participating WPAs will incur additional monitoring and compliance costs. These activities are recognized as distinct and additional to the duties required of the AWP's operations staff. However, the net cost to the WPA is expected to be relatively minor, as these responsibilities are standard and often periodic. It is estimated that 1 FTE should be able to perform the necessary monitoring and compliance activities.

Regarding ESC, a high-level summary of the estimated costs for implementing a full ESC Program range from 1.25 to 1.5 FTEs. In some cases, WPAs have reported an additional analytical cost of 2 to 3 FTEs necessary for monitoring events. At a full-burdened typical wage cost of approximately $139,000 per year, the estimated implementation cost for a full ESC program would be expected to be in the range of $175,000 to $210,000 per year.

As discussed previously, ADEQ's oversight and administration of the AWP program will be provided on a fee-for-service basis charged to the participating WPA.

Municipal Governments

The future planning of communities in Arizona will likely be dictated by the availability of water resources, from planning for and permitting additional residential and nonresidential growth; to planning for public facilities, such as schools, offices, and correctional facilities. Therefore, municipal governments are an integral component in the process of selecting AWP or another water source alternative. As a result, municipal governments will likely be working with / directing the WPAs when determining the amount of water needed to support the current needs of and projected growth within their communities. Municipal governments will also be indirectly impacted by the AWP program as it plans for and permits residential and nonresidential development.

It is likely that municipal governments will be directly impacted by the AWP program as they support the WPA in evaluating alternatives for new sources of water. One of the major components specific to any ESC requirements for AWTF operations will be the establishment of legal authority, regulatory agreements between agencies, and specific enhanced wastewater management requirements and compliance. Municipal governments will also likely be responsible for implementing the outreach efforts that will explain the AWP selection process to their communities. In addition, municipal governments as water customers will be impacted by any rate increases that occur from AWP implementation. While there will be impacts to municipal governments from AWP, the impacts are not anticipated to be significantly different from the impacts associated with implementing other water source alternatives. If AWP is more cost-effective than other alternatives, there may even end up being greater demand for residential and nonresidential development in AWP-adopting municipalities because of their more affordable water.

Notably, municipal governments may, in fact, be the WPA in their community. In this scenario, the impacts to the municipal government are best revealed through the WPA impact analysis, above, rather than the impact analysis under this section. If a municipal government is the WPA, their expected impacts are significant.

WPA Customers

AWP is not anticipated to have an impact on water customers served by non-participating WPAs. Only AWP water customers will incur increased costs, as they can expect to face higher water rates once WPAs pass on the costs of AWTF development and operations to them. Customers of participating WPAs will, however, also benefit from the greater availability and reliability of the potable quality water supplied through their community's AWP, as described below, especially if their "willingness to pay and use" value exceeds the price charged to them by the WPA to receive the water. Regardless, all user rate increases are the responsibility of each WPA and as such will vary based on specific circumstances. It is, of course, expected that each participating WPA will do

a comprehensive analysis before AWP adoption to ensure that there is adequate customer demand, support, and ability to pay for any new AWTF within their service area.

As discussed, participating in the AWP program is voluntary and it is anticipated that WPAs will select the water supply alternative that is the most cost-effective and best meets the needs of its customers. Therefore, if AWP is selected, the rate impacts will likely be less than the impacts of alternative water supplies, thus customers may experience less of a rate impact than if AWP was not available.

WPA Customers - Water Supply Availability

WPA customers will benefit from greater water supply reliability and availability from the additional potable water supplied through AWPs and will enjoy confidence in their WPA's ability to fully meet its service community's current water needs and future demands. Full representation of an AWP's total impact on local water availability should recognize the following water supply improvements:

- Net increase in supplied water: Unlike water purchases and transfers, wastewater recycling will result in "net new" quantities of potable water, as formerly non-potable water discharges are instead treated for municipal and industrial (M&I) consumptive use.
- Increased Supply Reliability: AWP will provide a more sustainable supply option, since its production will not be directly impacted by metrological and/or hydrological conditions.
- Local Control and Supply Flexibility: AWP-served communities will reduce their dependency on imported water and/or existing (often dwindling) groundwater resources. The new water supplies obtained from AWP development should allow many communities to maintain or improve their groundwater levels and availability.

As noted previously, only the above qualitative considerations of impacts for customers of AWP-participant WPAs have been provided, as rate impact estimations will be highly project-specific and were not evaluated as part of this EIS.

WPA Customers - Water Quality

As one of ADEQ's three (3) environmental divisions, the Water Quality Division (WQD) is responsible for administering the Department's water protection and improvement programs. The WQD protects and enhances public health and the environment by ensuring that healthy drinking water is provided by public water systems, and by controlling current and future sources of surface and groundwater pollution. The Division's programs include, among others, the Safe Drinking Water program, the Groundwater Protection program, and the Recycled Water program.

All recycled water delivered by AWP systems is anticipated to be of equal water quality to existing drinking water supplies due to advancements in AWP technology and the high water quality standards of the SDWA. As a result, future AWP customers are not expected to face any increased public health risks or concerns from AWP, and indeed can expect to enjoy clean water of high

quality.

General Public

In addition to the direct impacts to WPAs and their customers, AWP deployment can be expected to have broader impacts on the general public. Direct cost impacts from AWP technology adoption are expected to be predominantly experienced by the agencies, businesses, and individuals connected with AWP operations. However, due to the interconnectedness of Arizona's regional and local water systems, and the scarcity and importance of water within the state, future AWP deployment can be expected to have impacts on the broader populations of residents and businesses within the state and state-wide water resources. Key components and constituencies that would potentially be impacted include the Arizona water system, community economies, the environment, and downstream water users, as described below.

General Public - Arizona Water System

The Colorado River system, which supplies 36 percent of Arizona's total water use, has experienced extensive drought conditions for the past 19 years. Furthermore, it can be expected that climate change may result in even greater long-term reductions in Colorado River supplies. Arizona maintains six Active Management Areas (AMAs), designed to sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning. Established in 1980, these AMAs cover those areas of the state where significant groundwater depletion has historically occurred. As Arizona heads into a drier future, it is unlikely that its groundwater safe-yield requirements will be reliably met and thereafter maintained in any of the state's AMAs. Groundwater currently provides 41 percent of the state's water, but recent groundwater modeling has projected that over the next 100 years, unmet groundwater demand within the Phoenix AMA will reach nearly 4.9 million acre-feet (MAF), and unmet demand within the Pinal AMA will exceed 8 MAF. Furthermore, in 2022, the Federal Government called upon Arizona and its neighboring Colorado River states to conserve between 2 to 4 MAF per year to address the critically low levels in Lake Powell and Lake Mead.

AWP may thus represent an important supplemental water supply source that can enhance the AMA regions and their local sub-areas' abilities to operate more sustainably. The Arizona water system at large could see significant benefits from this rulemaking by providing WPAs with another option for providing potable water. All Arizona water customers, whether they be serviced by an AWP system or other municipal water system, could benefit from improved water availability and reliability within the state's water system if AWP implementation adds substantial net new water supplies to the state's water system.

General Public - Community Economic Development and Growth

The Arizona Department of Water Resources (ADWR) created the Assured Water Supply Program and the Adequate Water Supply Program to address the concern of limited groundwater supplies in Arizona. The Assured Water Supply Program operates within Arizona's six AMAs and is designed to sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning. Conversely, the Adequate Water Supply Program operates outside of the AMAs to ensure that water supply adequacy or inadequacy is disclosed in the public report provided to potential home or land purchasers, and that any

water supply limitations are described in promotional or advertising material for new developments. Each program has independently verified that current water supply cannot match pace with current projections of population growth and water supply demand.

According to recent data, Arizona witnessed a substantial 12% population increase between 2010 and 2020. Furthermore, more than another one million new people are predicted to take up residence in Arizona over the next decade. At the state's current average water use rate of 146 gallons per day, this projected one million population growth will result in 164 thousand acre-feet of increased residential water demand. New water supplies to meet demand are therefore critically required, and AWP represents an option with considerable potential for supporting the water demands of such anticipated growth and the requirements of the programs. Indeed, in some areas, growth may not be possible without AWP; while in others, AWP may provide the least-costly option for meeting the increased water demand of Arizona's planned development.

Additionally, AWP sourced water also supports future economic development since it can be readily used for a wide variety of purposes and/or locations. In-state surface water supplies, on the other hand, are typically highly location dependent and also subject to water right requirements that may restrict who may use the water where and for what purposes. AWP source water can thus be used to meet Assured Water Supply requirements in sub-basins and areas with insufficient native groundwater to support the future water needs of all proposed development, whether it be residential or commercial. Finally, AWP sourced water may also reduce the demand for future water transfers that reallocate water supplies from agricultural use for urban customers, which will result in land fallowing and lost agricultural activity.

General Public - Downstream Users

WPA applicants to the AWP program will be required to maintain all previous commitments to downstream water users. WPAs will have to demonstrate that they have the necessary water use rights to divert wastewater supplies for their AWP operations. Use terms and conditions for wastewater outflows will vary between locations and specific utilities. In some cases, dependent ecosystems may formally or informally be recognized as committed water users for wastewater outflows; as such, the impacts to adjacent ecosystems may warrant mitigation. This would be evaluated on a project-specific basis during each AWTF's permit approval process.

Except in cases of contracted use commitments (e.g. non-potable deliveries to the Palo Verde nuclear plant), within most of the state's hydrological systems, wastewater discharge return flow effects and downstream uses are typically limited and not well defined. As a result, potential AWP impacts to downstream users will be project-specific. They are also difficult to estimate and likely outside the WPA's jurisdiction and management authority. As a result, such AWP-related effects were not evaluated as part of this EIS.

Arizona Environment

Current state environmental regulations will evaluate project-specific impacts that may be expected from any proposed AWP development and will recommend appropriate mitigation and/or design changes as necessary to minimize any significant adverse

environmental effects. However, in general, the incidental effects from WPAs' discretionary (i.e. uncommitted) current wastewater discharges may be considered to represent indirect and secondary outcomes with lesser relevance/importance than the AWP's direct positive impacts on regional water availability and reliability. AWP recycling of wastewater outflows will not directly affect the state's groundwater resources, since AWP will not result in direct groundwater extraction. AWP may result in some potential indirect groundwater reductions from its diversion of current wastewater outflows. Groundwater conditions within the state could be indirectly impacted, to the extent that current wastewater discharges would normally recharge groundwater aquifers though natural percolation will be diverted by AWP reuse of those water quantities.

AWP may also have a net-positive impact on state groundwater resources by reducing the use of groundwater to meet the state's future water supply needs. It is anticipated that AWP-related groundwater depletion will be less than that which would result from groundwater extraction water supply options designed for either potable use or as new water supply alternatives (e.g. desalination of brackish groundwater). Improved groundwater sustainability can also be expected to result in environmental benefits from reduced land subsidence risks and/or adverse intrusion effects on other aquifers. The economic costs of any such adverse impacts will vary depending on the specific circumstances but will typically represent substantial economic losses to affected properties, and land uses that will be costly to mitigate.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ expects that net direct effect on long-term public or private employment from this rulemaking will result in a minimal or negligible increase. While construction of each new AWTF will result in short-term employment increases for the regional economy, AWP implementation is not anticipated to have direct, long-term impact on local employment. As discussed in Section D, each new AWTF will require a limited increase in operational staff for participating WPAs. Similarly, ADEQ staff necessary for future program oversight and administration will require a relatively small increase in agency staffing. Furthermore, the AWP-related job impacts for both WPAs and ADEQ will likely be similar compared to those that would otherwise be expected from other water supply expansion alternatives (e.g. new brackish desalination).

The extent that any AWP-related increase in employment (both from its construction and subsequent operations) will represent net gains for the region's economy will depend on whether the WPA might otherwise be expected to pursue alternate development of their water system (e.g. new desalination facilities) or would forego system expansion entirely. In either case, the direct net effect on private and public employment within the region's economy would be very small and represent a near negligible change for the region's business sectors and economy.

The potential indirect employment impacts from the AWP, however, could be more substantial if WPAs would otherwise be unwilling or unable to improve their water supplies. Under those circumstances, AWP implementation would be expected to allow future economic growth and development that would otherwise not occur under Arizona's Assured and Adequate Water Supply Programs' requirements. In this case, new employment generated by the increased economic growth and development

might be recognized as an “increase to employment” benefit that could, at least in part, be attributed to the AWP.

F. A statement on the probable impact of the rules on small business:

In this EIS, ADEQ uses the term “small business” consistent with A.R.S. § 41-1001(21), which defines a “small business” as "a concern, including its affiliates, which is independently owned and operated; which is not dominant in its field; and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year." ADEQ has determined that, for the most part, this rulemaking will not generate a significant and/or disproportionate impact on small businesses. As noted previously, the AWP is a voluntary program that will provide each participating WPA with new opportunities for increasing and improving local water supplies. As such, each WPA can determine whether an AWP program’s benefits to its operations and customers will justify investment costs into the program and potential increases in subsequent annual O&M expenses. AWP costs will most directly affect WPAs, with secondary effects on customers (because of improved water availability and pass-through rate cost impacts). AWP rules are thus anticipated to have only an indirect impact on Arizona small businesses. Furthermore, in the absence of any differentiation in either the distribution of AWP-related water supply changes or rate charges, small business water customers would not be expected to be disproportionately impacted as compared to a WPA’s other customers.

1. An identification of the small business subject to the rules:

As discussed above, no small businesses would be directly subject to AWP rulemaking, as it is a voluntary program for WPAs.

2. The administrative and other costs required for compliance with the rules:

All administrative and other compliance costs related to the AWP will be directly applicable to ADEQ and the participating WPAs. Any such costs incurred by participating WPAs will have only an indirect cost effect on its customers (residential, business, municipal, and other nonresidential) as approved by the Utilities Division of Arizona’s Corporation Commission. Furthermore, in the absence of any differentiation in either the distribution of AWP-related water supply changes or rate charges, small business water customers are not expected to be disproportionately impacted compared to a water utility’s other customers.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

In the absence of any direct or disproportionate indirect impacts to small businesses from the AWP, no mitigation measures are necessary to reduce any AWP-related future impacts to small businesses.

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

See Section D for discussion on ratepayer impacts to AWP customers. Note that probable cost effects from future AWP development and implementation will be limited solely to the WPA customers. Accordingly, no cost impacts from future AWP development and implementation to non-participating WPAs would be expected.

G. A statement of the probable effect on state revenues:

AWP implementation will result in increased oversight and administration by ADEQ, as previously discussed. However, the

AWP program will operate under the State's fee-for-service model, so that ADEQ-incurred administrative expenses will be recovered from AWP applicant application and permit fees. As a result, no decrease in state revenues should result directly from the AWP program. The AWP program can be expected to result in future increases in state revenues to the extent that its supplemental increases in water delivery and supply improvements should foster economic growth and development that would otherwise not occur. The tax and other economic benefits from the AWP supported growth would represent future indirect and predominantly positive effects on state revenues and economic conditions.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

A.R.S. § 41-1055 requires identification and description of any less intrusive or less costly alternative methods of achieving the AWP regulation's purpose. For any such AWP alternatives, the required description needs to provide: (1) the monetizing of its costs and benefits and (2) the rationale for not using non-selected alternatives. As discussed previously, AWP participation is entirely voluntary and in no way precludes any WPA from instead implementing another approach or water supply resource to meet its water supply needs. This approach thus recognizes that each WPA is the best and most appropriate analyst of, and decision-maker, for its own specific water system needs, resources and alternative supply options.

As such, potential AWP program participants will evaluate their own agency/project-specific circumstances to determine if there are, in fact, less intrusive or less costly alternative methods that would be preferable. Furthermore, the AWP rulemaking's programmatic nature generally precludes any specific project-level determinations of its relative cost or intrusiveness, since any such determination will depend on specific project circumstances as well as implementation approach and design. The cost-effectiveness determination and rationale for any AWTF's development will be the sole responsibility of its WPA and will consequently override and/or negate the applicability of this EIS' alternative methods description requirements.

Generally, brackish groundwater reverse osmosis (BWRO) is considered the primary alternative for obtaining net new water supplies that would match AWP in terms of supply reliability and local control. However, BWRO is likely to be a more expensive alternative, and still comes with its own set of limitations and project-specific circumstances. There is an extensive body of research and analysis on the technical and economic viability of both recycled water and BWRO development. Review of these studies indicates that there is a wide range in the costs of supplied water for these systems, determined by a variety of factors. Several key factors will determine the technical and economic viability of BRWO deployment: (1) groundwater resource conditions, including both supply quantities and salinity levels; (2) pumping depths for extraction; (3) locational proximity to community water systems and conveyance/integration infrastructure requirements; (4) energy consumption; (5) brine by-product waste disposal (either ground injection or treatment for landfill); (6) capital and operational costs; and (7) environmental concerns and impacts from long-term groundwater depletion, subsidence potential and/or effects on neighboring aquifers.

It is also important to note that all else being equal, AWP systems facing salinity issues that require reverse osmosis treatment are likely to have higher supplied water costs, and these may be comparable to those that would be expected for BWRO supplied

water.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

The purpose of this section of the EIS is to identify the data and analysis previously used to develop the AWP program. As explained throughout this EIS, the AWP program will offer Arizona WPAs new opportunities to develop potable water sources through treatment and recycling of its wastewater outflows. Due to the need for additional water supply options, the Arizona legislature mandated pursuit of the AWP program through A.R.S. § 49-211. As discussed in Section D, the AWP program is entirely voluntary, and its regulations will apply solely to participating WPAs. As a result, non-participating WPAs will not be affected by any AWP requirements. ADEQ has chosen to offer AWP as a voluntary and optional program to place decision-making responsibility for needs determination, cost evaluation and participation on the WPAs who will be responsible for implementing the technology and who best understand how it stands to impact their specific circumstances, and customers' needs. ADEQ has undergone an extensive and detailed process to develop its AWP regulations. The AWP regulation development has to-date included significant planning and analysis for its formulation. In addition to technical analyses, ADEQ has consulted with WPAs that are considering participating in the AWP program.

Please see Section 7 of this NFRM for a comprehensive overview of AWP regulations, as well as the rationales and data used for the AWP program's design and implementation approach. The various AWP regulatory requirements have generally been developed and adopted to ensure that AWP program implementation fulfills the agency's overall mission to protect and enhance public health and the environment of Arizona. Towards this goal, the AWP program has been developed and designed to conform with ADEQ's guiding principles: i. protective of public health and the environment; ii. community-supported; iii. scientifically-based; iv. reasonably affordable; v. transparent, informative, and communicative; vi. specific, practical, flexible, and implementable; and vii. accounts for future conditions and growth.

The protection of public health and the environment, and the development of a program grounded in hydrological science, are the preeminent guiding principles that are most relevant to AWP program requirements and standards. As such, ADEQ has focused extensively and deliberately on AWP regulations that will ensure the water supply system's proposed technical, design, operational, and compliance regulations address public health concerns, and that public safety is maintained. Without ADEQ's rigorous regulatory guidelines and future oversight, there would be an increased risk of potential public health/safety issues and/or incidents. Due to the complexity of the technical issues and the wide variety of WPA circumstances, extensive regulatory guidance, requirements, safeguards and agency oversight are essential to ensuring that AWP can be a safe, sustainable, and effective new source of potable water for Arizona's water users.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

No changes.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: General Public

How many billions of taxpayer money are you going to waste on this project?

ADEQ Response 1:

ADEQ appreciates the comment. AWP is a voluntary program in which water provider agencies may choose to participate in after outreach and collaboration with their customers. Applicants must develop a Public Communications Plan which, among other requirements, ensures the applicant notifies all drinking water consumers of its intention to apply for an AWP permit and maintains communication with consumers throughout all major program phases (*see* R18-9-B811). ADEQ expects water provider agencies to determine whether AWP fits the needs of water customers in their respective service areas and to ensure that there is adequate customer demand, support, and ability to pay for any new Advanced Water Treatment Facility (AWTF).

The AWP program follows a fee-for-service model, deriving funding from applicants and permittees via hourly review rates for permit applications and related components as well as from annual fees. The costs charged through the program are commensurate with projected costs necessary to adequately support the program. The AWP fees are designed and calculated to be fairly assessed, imposing the least burden possible to parties subject to the fees.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

Yes, this rulemaking establishes the Advanced Water Purification regulatory program, which includes issuing individual permits, pursuant to A.R.S. § 49-211. While the product (advanced treated water or finished water) of an Advanced Water Purification regulatory program facility is substantially the same, the facilities, activities and practices regulated by the program will be substantially different in nature due to the treated wastewater source, a multitude of viable technological process configurations, a swift pace of technological progress in the field and the custom nature of the regulated parties and their circumstances. Moreover, general permits are not "technically feasible" for the Advanced Water Purification regulatory program under A.R.S. § 41-1037(A)(3), and not used in the program.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

While the Safe Drinking Water Act (SDWA) (40 USC § 300f *et seq.*) does regulate the treatment and delivery of drinking water from public water systems across the United States, it does not explicitly regulate the treatment of "treated

wastewater" (*see* R18-9-A801) as a source, which is the subject of this final rule. In fact, SDWA only contemplates surface and ground water as sources for public water systems. Some Advanced Water Purification facilities will be considered public water systems for the purposes of the SDWA and regulated in accordance with the SDWA in addition to the final AWP program.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

Not Applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not Applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not Applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 14. DEPARTMENT OF ENVIRONMENTAL QUALITY - PERMIT AND COMPLIANCE FEES
ARTICLE 1. WATER QUALITY PROTECTION FEES

Section

ARTICLE 1. WATER QUALITY PROTECTION FEES

R18-14-101. Definitions

1. "APP" No Change

2. "AWP" means Advanced Water Purification.

~~2~~3. "Complex modification" means:

   a. A revision of an individual Aquifer Protection Permit for a facility within a mining sector as defined in A.R.S. § 49-241.02(F)(1); and

   b. A revision of an individual Aquifer Protection Permit for a facility within a non-mining sector due to any of the following:

      i. An expansion of an existing pollutant management area requiring a new or relocated point of compliance;

      ii. A new subsurface disposal including injection or recharge, or new wetlands construction;

      iii. Submission of data indicating contamination, or identification of a discharging facility or pollutants not included in previous applications that requires reevaluation of BADCT; or

      iv. Closure of a facility that cannot meet the clean closure requirements of A.R.S. § 49-252 and requires post-closure care, monitoring, or remediation.

~~3~~4. "Courtesy review" means a design review service that the Department performs within 30 days from the date of receiving the submittals, of the 60 percent completion specifications, design report, and construction drawings for a sewage collection system.

~~4~~5. "Priority review" means a design review service for an APP Type 4 permit application that the Department completes using not more than 50 percent of the total review time-frame for the applicable Type 4 permit application as specified in 18 A.A.C. 1, Table 10.

~~5~~6. "Request" means a written application, notice, letter, or memorandum submitted by an applicant to the Department for water quality protection services. The Department considers a request made on the date it is received by the Department.

~~6~~7. "Review hours" means the hours or portions of hours that the Department's staff spends on a request for a water quality protection service. Review hours include the time spent by the project manager and technical review team members, and if requested by the applicant, the supervisor or unit manager.

~~7~~8. "Review-related costs" means any of the following costs applicable to a specific request for water quality protection service:

a. Presiding officer services for public hearings on a permitting decision,

b. Court reporter services for public hearings on a permitting decision,

c. Facility rentals for public hearings on a permitting decision,

d. Charges for laboratory analyses performed during the review, and

e. Other reasonable and necessary review-related expenses documented in writing.

~~8~~9. "Standard modification" means an amendment to an individual Aquifer Protection Permit that is not a complex modification.

~~9~~10. "UIC" means Arizona's Underground Injection Control Program.

~~10~~11. "Water quality protection service" means:

a. Reviewing a request for an APP determination of applicability;

b. Pre-application consultation, issuing, renewing, amending, modifying, transferring, or denying an aquifer protection permit, an AWP permit, an AWP demonstration permit, an AZPDES permit, a UIC permit, a UIC application for an aquifer exemption or an injection depth waiver or a reclaimed water permit;

c. Reviewing supplemental information required by a permit condition, including annual reports and closure for an APP;

d. Performing an APP clean closure plan review;

e. Issuing or denying a Certificate of Approval for Sanitary Facilities for a Subdivision;

f. Registering or transferring registration of a dry well;

g. Conducting a site visit;

h. Reviewing proprietary and other reviewed products under A.A.C. R18-9-A309(E);

i. Reviewing, processing, and managing documentation related to an AZPDES general permit, including a notice of intent, notice of termination, certificate of no exposure, and waiver;

j. Registering and reporting land application of biosolids; or

k. Pretreatment program review, inspection, or audit.

l. Reviewing and commenting on AWP permit and demonstration permit materials, including but not limited to, materials submitted to the Department pursuant to A.A.C. R18-9-C814, A.A.C. R18-9-C815, and A.A.C. R18-9-F835.

R18-14-102. Hourly Rate and Maximum Fees for Water Quality Protection Services

A. The Department shall assess and collect an hourly rate fee for a water quality protection service, except for APP minor permit amendments specified under A.A.C. R18-9-A211(C)(1), (2) and (3) and A.A.C. R18-9-B906(B), unless a flat fee is otherwise designated in this Article, and UIC minor modifications specified under A.A.C. R18-9-C633(A).

B. Hourly rate fees. The Department shall calculate the fee using an hourly rate of $174, adjusted annually under subsection (D), except for the UIC program, where the Department shall calculate the fee using an hourly rate of $145, and the AWP program, where the Department shall calculate the fee using an hourly rate of $223, both adjusted annually under subsection (D). These rates shall then be multiplied by the number of review hours to provide a water quality protection service, plus any applicable review-related costs, up to the maximum fee specified in subsection (C), adjusted annually under subsection (D).

C. Maximum fees for a water quality protection service assessed at an hourly rate in Table 1, adjusted annually under subsection (D).

D. The Director shall adjust the hourly rate and maximum fees listed in subsections (B) and (C) every August 1 to the nearest $10, beginning August 4, 2023, by multiplying the hourly rate or maximum fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Table 1. Maximum Fees

Program Area	**Permit Type**	**Maximum Fee**
APP	Individual or area-wide	$285,400
APP	Complex modification to individual or area-wide	$214,050
APP	Clean closure of facility	$71,350
APP	Standard modification to individual or area-wide (per modification up to the maximum fee, and modification can be reassigned under A.A.C. R18-1-516):	
	● Maximum fee (cumulative per submittal)	$214,050
	● Modification under A.A.C. R18-9-A211(C)(1) through (3)	No fee
	● Modification under A.A.C. R18-9-A211(C)(4) through (6)	$7,135
	● Modification under A.A.C. R18-9-A211(C)(7), (D)(2)(b) through (i), and (k) through (l)	$21,405
	● Modification under A.A.C. R18-9-A211(D)(2)(a) and (j)	$35,675
	● Modification under A.A.C. R18-9-A211(B) that is not classified as complex modification under R18-14-101(2)	$35,675

APP	For an APP issued before July 1, 2011, the fee for a submittal required by a compliance schedule is assessed per submittal and cumulative up to the maximum fee. The applicable maximum fee for all compliance schedule submissions shall be according to one of the three maximum fee categories listed below. The maximum fee is for the lifetime of the APP unless a new compliance schedule is established in the APP due to a modification that is classified as both a significant amendment under A.A.C. R18-9-A211(B) and a complex modification under R18-14-101(2).	
	● For a permit with a compliance schedule where one or more submissions require a permit modification that requires a determination or reevaluation of BADCT, the fee is assessed as described above for each standard modification, with a maximum fee for the permit's entire compliance schedule of:	$214,050
	● For a permit with a compliance schedule where one or more submissions require a permit modification, but no determination or reevaluation of BADCT is required, the fee is assessed as described above for each standard modification, with a maximum fee for the permit's entire compliance schedule of:	$142,700
	● For a permit with a compliance schedule requiring one or more submissions that require ADEQ review but do not require a permit modification, the maximum fee for the permit's entire compliance schedule is:	$142,700
APP	For an APP issued on or after July 1, 2011, the fee for a submittal required by a compliance schedule is assessed per submittal and cumulative up to the maximum fee for the lifetime of the APP	$142,700
APP	Determination of applicability	$21,405
APP	Reviewing proprietary and other reviewed products under A.A.C. R18-9-A309(E)	$21,405
AZPDES	Individual permit for municipal separate storm sewer system	$57,080
AZPDES	Individual permit for wastewater treatment plant (based on gallons of discharge per day)	
	● 3,000 to 99,999	$21,405
	● 100,000 to 999,999	$28,540
	● 1,000,000 to 9,999,999	$42,810
	● 10,000,000 or more	$71,350
AZPDES	Individual permit for a facility or activity that is not a wastewater treatment plant or a municipal separate storm sewer	$42,810
AZPDES	Amendment to an individual permit	$17,838

AZPDES	Approval of a new or revised pretreatment program under AZPDES	$14,270
AZPDES	Consolidated individual permit for multiple AZPDES individual permits, as allowed under A.A.C. R18-9-B901(C)	Aggregate of the applicable maximum fees
Reclaimed	Reclaimed water individual permit	$45,664
UIC	Area Area Modification / Renewal	$200,000 $150,000
UIC	Classes I, II, III, V Individual Classes I, II, III, V Modification / Renewal	$200,000 $150,000
UIC	Classes VI Individual Classes VI Modification	No Max No Max
AWP	Permit	No Max.
AWP	Demonstration Permit	No Max.
AWP	Significant Amendment / Renewal	No Max.
AWP	Demonstration Permit Significant Amendment / Renewal	No Max.

R18-14-104. Annual Fees for Water Quality Protection Services Subject to Hourly Rate Fee

A. Annual Registration Fees. The annual registration fee required under A.R.S. § 49-242 is in Table 2, adjusted annually under subsection ~~(E)~~(F).

B. The Department shall assess an annual fee for an AZPDES related water quality protection service subject to an hourly rate fee as listed in Table 3, adjusted annually under subsection ~~(E)~~(F).

C. The Department shall assess an annual fee of $714, adjusted annually under subsection ~~(E)~~(F) for an individual reclaimed water permit.

D. The Department shall assess an annual fee and an annual waste disposal fee as applicable to UIC regulated facilities, subject to an hourly rate fee, as listed in Tables 3.1 and 3.2, adjusted annually under subsection ~~(E)~~(F).

E. The Department shall assess an annual fee of $101,250, adjusted annually under subsection (F), for AWP permits and for AWP Demonstration permits.

~~E~~F. The Director shall adjust the annual fees listed in subsections (A), (B), (C), (D), and (E) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the annual fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers,

Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 14

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this Economic, Small Business, and Consumer Impact Statement (EIS) consists of a number of new sections, as well as amendments to existing sections, in four (4) chapters in Title 18 of the Arizona Administrative Code (A.A.C.). Those chapters, and the respective articles affected therein, are; Chapter 1, Article 5; Chapter 5, Article 5; Chapter 9, Articles 2, 7 and 8; and Chapter 14, Article 1. The rulemaking is being conducted in order to adopt the Advanced Water Purification (AWP) regulatory program (formerly "Direct Potable Reuse" program) pursuant to statutory mandate at Arizona Revised Statutes (A.R.S.) § 49-211.

Arizona's ongoing issues with water scarcity, combined with real concerns over meeting demand for expanding communities, highlight the need to develop additional sources of water that can meet growing municipal water demands. In response to increasing state water scarcity, the Arizona legislature mandated through A.R.S. § 49-211 that "...the [ADEQ] director shall adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program, including rules establishing permitting standards and a permit application process." As a result, ADEQ has been charged with developing a program that allows for and regulates the advanced treatment of previously treated municipal wastewater to achieve a drinking-water-quality product, providing a new and convenient water source, known as the AWP program.

AWP is an innovative set of water treatment processes applied at an Advanced Water Treatment Facility (AWTF) that directly purify treated wastewater originating from a community's wastewater treatment plant. This AWTF-treated water can then be either delivered to existing Drinking Water Treatment Facilities (DWTFs) for further treatment or blending or distributed directly to a drinking water distribution system. In both cases, the safeguards of the federal Safe Drinking Water Act (SDWA) continue to apply. The AWP program thus offers the potential for a new and sustainable water source that can provide a consistent supply of water for existing users and support Arizona's future population growth and economic development.

B. A summary of the EIS:

General Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include ADEQ, Arizona Water Provider Agencies (WPAs), Municipal governments, WPA customers, the general public, and the Arizona environment, identified, generally, here, and in more detail throughout the rest of the Economic Impact Statement (EIS) below. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the implementation of the AWP regulatory program.

ADEQ is the sole state agency responsible for the implementation and administration of the AWP program. As detailed in this EIS, impacts to ADEQ include the hiring of new staff commensurate with the expanded technical oversight necessary to administer the AWP program. However, the projected future costs to ADEQ will be offset through its fee-for-service model which places the burden for AWP program services on the applicants and permittees through application fees and annual fees, and the overall impact is therefore expected to be moderate. This approach was mandated by the Arizona Legislature through A.R.S. § 49-211, subsection (A), which states, "...[ADEQ] shall establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program…" Therefore, the Legislature charged ADEQ with developing and administering the AWP program and required ADEQ to establish fees sufficient to maintain the program. ADEQ's proposed fees, detailed in the Chapter 14 NFRM, were calculated to match the projected costs of the nascent program.

Next, the WPAs that elect to apply for a permit under the AWP program are affected by the capital costs of the AWP investment, increased compliance and monitoring, and ongoing operations and maintenance responsibility. While the expected costs to participating WPAs are expected to be significant, this impact is balanced against both the voluntary and emerging natures of the AWP program. AWP is not mandated for any WPA and financial barriers to entry may be lowered over time as the program becomes more established. Additionally, Municipal governments are not delegated any administration functions of the program but may be impacted given their relationship to the WPAs in their communities. Local governments may be the WPA, and as such, face significant impacts incumbent on any WPA engaged with the AWP program.

Furthermore, WPA customers are directly impacted by the new supply, beneficially through the delivery of the additional water supply to them, and financially through impacts in water rates. Notably, these impacts are only relevant to customers of WPAs that have adopted AWP in their service area. Customers may face higher water rates as a result of AWP, however, the exact costs are not known to ADEQ as the WPA is responsible for setting reasonable rates on a case-by-case basis in consideration of their service area. The general public is generally impacted by the option of a new water supply alternative for communities, providing an overall net increase in water availability for beneficial use such as drinking. Finally, the environment is impacted, beneficially through potential decreased reliance on groundwater and surface water supplies from WPAs using AWP water as a source, but also faces impacts from changes in water use as a result of expanded, potentially lucrative use options such as reduced groundwater discharge or reclaimed water delivery.

Specific Impacts

The entity with the largest expected impact as a result of the AWP regulatory program is the WPAs. This impact is specific to capital costs, operations/maintenance cost, and permitting/compliance costs. Fundamentally the AWP program is intended to be flexible, setting minimum requirements in rule necessary for the protection of human health and the environment and in enough detail to facilitate a performance standard that can be consistently achieved by permittees under the program. However, the program leaves many details and specifics up to the discretion of the Advanced Water Purification Responsible Agency (AWPRA) as they determine what technology, treatment train configuration, etc. is best to address their treated wastewater influent, their contributing non-domestic dischargers, their AWPRA partners, etc. Therefore, the EIS cannot determine, with exact specificity, the impacts to each WPA. However, the EIS provides cost evaluations for three representative AWP projects, in an effort to provide a range of potential options. These three projects represent different treatment trains: 1) Ozone-Biologically Activated Carbon (BAC), 2) Ozone-BAC with Side-Stream Reverse Osmosis (RO), and 3) Full-Stream RO.

Upon an evaluation of these representative projects, this EIS provides expected costs related to the implementation of AWP for WPAs, enabling them to make informed decisions about whether AWP is a good option for their communities. For project 1, Ozone-BAC, the estimated costs are as follows: capital costs - $208.0 million; annual operations and maintenance costs - $3.3 million. For project 2, Ozone-BAC with Side-Stream RO, the estimated costs are as follows: capital costs - $229.0 million; annual operations and maintenance costs - $8.5 million. For project 3, Full-Stream RO, the estimated costs are as follows: capital costs - $276.0 million; annual operations and maintenance costs - $10.9 million.

Stakeholder Process

All stakeholders identified as entities impacted under this EIS have been subject to the AWP stakeholder engagement process. This process commenced in 2023 with a survey of the general public, a survey of more specific stakeholders, and the establishment of a Technical Advisory Group (TAG) for development of the AWP rules. The TAG consisted of experts and representatives from academia, utilities, regulatory agencies, and engineers and scientists. In combination with the additional stakeholders and conversations with expected applicants (WPAs), this effort was a comprehensive discussion on all programmatic elements, including economic impacts.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Recycled water is costly, but for some communities it may be the most cost-effective alternative for new and reliable long-term water supplies. The AWP program will operate uniquely among existing water programs as it will be state-run and has no federal equivalent. This rulemaking establishes rules, including permitting standards and a permit application process, for participating in the AWP program, a voluntary program. The decision to apply for a permit under the AWP program rests entirely with the entity wishing to pursue AWP as an addition to their drinking water portfolio.

While the AWP program is voluntary, there will be costs to each adopting entity for permitting and compliance requirements and infrastructure implementation. There may also be cascading cost impacts to other persons or groups (such as customers), but these costs will be borne throughout the water system and will be discussed in advance with stakeholders by water provider agencies.

ADEQ has identified the following list of affected entities and persons who stand to incur direct impacts and/or costs, but also potentially significant benefits, from this rulemaking:

- Arizona Department of Environmental Quality (ADEQ);
- Arizona Water Provider Agencies (WPAs);
- Municipal governments;
- WPA water customers, both residential and nonresidential;
- General public; and
- Arizona environment.

D. Cost/Benefit Analysis:

Comprehensive assessment of the AWP program requires identification of the program's impacts across affected persons and entities. Future AWP implementation can be expected to result in a range of impacts, both beneficial and adverse, which could include:

- Improvements in water availability throughout the water system;
- Operational changes for WPAs;
- Increased capital and operating and maintenance (O&M) expenses for WPAs;
- Increased rates for water customers;
- Enhanced drought resilience of the water system;
- Potential shifts in water rights allocations; and
- Changes in agricultural water usage.

The nature and magnitude of AWP-related costs and benefits will depend on several key factors related to each entity's AWP technology choice and the approach necessary for its implementation, as well as the context within which future development occurs. As noted previously, the voluntary nature of the AWP program allows entities to choose freely whether to engage with the program and thus evaluate potential cost impacts well in advance of adoption.

This EIS is a program-level assessment that evaluates the general impacts from future AWP implementation through the AWP program. As such, it does not estimate specific impacts for any individual project, as those would inherently require consideration of that project's specific circumstances (e.g. water demand, location, and hydrology) and resource conditions. This EIS acknowledges that each AWP project will have cost increase impacts on both a participating WPA

and its customers, while advising that project-level assessments and precise quantifications of any specific impacts (e.g., water rate increases to customers, additional permitting fees to ADEQ, potential changes in water usage patterns, changes in infrastructure maintenance costs, possible need for additional staff or training, and potential changes in local ecosystems due to altered water flows) were not evaluated as part of this EIS. Nonetheless, this EIS provides a general assessment of the expected cost effects on WPAs and ADEQ from the AWP program.

This section outlines ADEQ's analyses of the expected costs and benefits of this rulemaking, made through consultation with ADEQ staff and AWP subject matter experts (SMEs). Part 1 provides a summary table of the affected stakeholder groups with a description of identified potential AWP program effects, and their corresponding revenue and cost effect findings. Part 2 provides a more detailed discussion of stakeholder impacts, analyses, and findings.

1. Part I - Cost/Benefit Stakeholder Matrix:

Minimal	Moderate	Substantial	Significant
$10,000 or less	$10,001 to $1,000,000	$1,000,001 or more	Cost/Burden cannot be calculated, but the Department expects it to be significant.

Description of Affected Groups	Description of Effect	Increased Cost/Decreased Revenue	Decreased Cost/Increased Revenue
A. State and Local Government Agencies			
Arizona Department of Environmental Quality (ADEQ)	Increased agency responsibilities for administration, oversight, and management of AWP "fee-for-service" program, in which the State will be reimbursed for most AWP-related costs.	Minimal	
	Initial start-up, implementation, and subsequent program oversight activities may result in non-reimbursed costs to the State.	Moderate	
Water Provider Agencies (WPAs)	Increased compliance and monitoring	Moderate	
	Construction of AWTF and O&M responsibilities.	Substantial	
	Revenue changes from expanded customer base and/or deliveries.		Significant
Municipal Governments (non-WPAs)	Coordination with WPA and other agencies.	Moderate	
	Impact on tax revenue from resulting community expansion.		Significant
B. Customers			
WPA Customers	Impact to user water rates.	Minimal	
	Additional water supply that will allow existing and new business and residential growth.		Moderate
	Impacts upon public health related to water quality.	None identified	None identified
C. General Public			
Arizona Water System	Overall net increase in water availability. Additional water will allow community economic development and growth.		Minimal
	Existing surface water purchases can be diverted to other users or uses.		Moderate
	Groundwater resources can be made available for other users or uses.		Significant
	Diverted wastewater outflow may decrease return flows for downstream users.	Minimal	
Downstream Users	All existing supply commitments will be maintained or renegotiated, however diversion of wastewater outflows for AWP use may impact some downstream users. State environmental and permitting processes will consider and address project-specific cases and conditions. Negative	Minimal	

	impacts to downstream users are thus expected to be minimal (subject to mitigation if necessary).		
D. Arizona Environment/ Ecosystem			
Environmental	Reduced groundwater use and depletion with decreased risks of land subsidence and infrastructure damage.		Significant
	Reduced water outflow from wastewater treatment facilities may result in reduced groundwater recharge.		Minimal
	Reduction in poor quality outflow from wastewater treatment facilities may improve water quality in receiving water body		Minimal

2. Part II - Individual Stakeholder Summaries / Calculations

The following section provides an explanatory discussion of expected AWP costs and benefits to the program's various stakeholders. The section outlines the key factors and analysis used to determine the impact findings reported in Part 1 of Section D, above.

State and Local Government Agencies - ADEQ

ADEQ will incur moderate costs as a result of implementing this rulemaking and administering the program. The rulemaking process itself required significant staff time for technical review, rule composition, facilitation and evaluation of public input and other necessary tasks. Additionally, ADEQ will incur costs for AWP-related staff expansion and performance of new AWP-associated administrative responsibilities needed to implement and operate the AWP program. ADEQ currently anticipates that it will need to hire new staff with the necessary technical expertise for a variety of program implementation and oversight roles. These positions will likely include engineers (for design review and compliance of AWP facilities) and non-engineer staff for administrative tasks (e.g., project management, permit writing, operator certification coordination, other program support needs, etc.).

The AWP program's duties and tasks will vary based on the number, type, and phase of WPA participants and it is expected that adequately qualified agency staff may be able to perform several roles. It is expected that the AWP program will grow over time as more utilities seek and implement AWP permits, with permitting and administrative support growing equivalently. Nevertheless, in order to support the administration of the AWP program in the near term, ADEQ plans on hiring 2.5 new full-time employees (FTE). These 2.5 FTEs will be split primarily between permit specialist positions, inspectors, and administrative duties. Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees and annual fees.

There will also be costs associated with meeting requirements during the AWP approval and permitting process, which will adhere to all applicable state laws and aim to serve the regulated community while being protective of public health and the environment. ADEQ envisions that this permitting process will function similarly to other ADEQ permitting processes (such as for obtaining Aquifer Protection Permits). The AWP permitting process was developed and will be adopted into the A.A.C. in accordance with rulemaking requirements in the Arizona Administrative Procedure Act.

ADEQ's management and administration of the AWP approval and permitting process will be performed on a "fee-for-service" basis, under which the State will be reimbursed for most AWP-related costs, and thus future ADEQ responsibilities for the AWP program should be achieved with little fiscal cost to the State of Arizona. Instead, as described below, administrative and oversight costs for AWP deployment will be borne initially by WPAs and then ultimately passed on to customers for cost recovery through rate-setting.

Water Provider Agencies (WPAs)

The decision to participate in the AWP program rests entirely with any WPA wishing to pursue AWP as an addition to their drinking water portfolio. For those WPAs choosing to implement AWP, there will be increases in costs, primarily associated with permitting/compliance/regulation, capital investment, and operations. Participating WPAs will incur program-specific regulatory and compliance costs, capital costs for AWTF construction and system integration with their water systems, and additional operations and maintenance (O&M) costs over the long-term. Other additional program-specific regulatory and compliance costs could include permitting, compliance costs to meet new environmental standards, and expenses for regular inspections and audits. As noted previously, WPA-incurred costs will be largely recouped from customers through adjustments in water rates (subject to Arizona Corporation Commission approvals).

Data collected for this EIS aims to provide a representation of the economic impacts expected from implementing AWP technologies in Arizona and includes information from stakeholders working on various aspects of AWP rulemaking. Analysis for this EIS involved the review of key SME opinions solicited by ADEQ to support its development of high-level estimates for projected permitting, compliance, capital, and O&M costs to participating WPAs.

AWP-related costs have been assessed, estimated, and reported "in toto" in many cases, as appropriate. This approach best meets this EIS's purposes of representing and evaluating the overall net economic effects of the final rulemaking by determining the overall total combined costs for the various component cost items. This approach is particularly appropriate for evaluation of O&M and compliance costs, which may be performed by an individual staff person; are likely project-specific; and/or are inter-related or inter-dependent, preventing them from being reliably estimated individually and simply aggregated. Furthermore, a higher-level summary assessment may provide a more appropriate

and reasonable valuation given inherent imprecision estimating costs that are project-specific, numerous, relatively small, and difficult to quantify individually.

While there will be cost increases, the potential exists for AWP technology to cost less than other available alternatives. As a result, participating WPAs may realize a benefit (cost savings) from AWP implementation.

Water Provider Agencies (WPAs) - Implementation Costs

Implementation costs for an AWTF could include: land acquisition, site preparation, purchase, and installation of advanced treatment technologies, system integration with existing water systems, and engineering and permitting. System integration could involve infrastructure upgrades, installation of new pipelines, and development of blending facilities. The AWP program includes considerable flexibility for each participating WPA to select the AWP technology and approach most suitable and cost-effective for its specific circumstances.

In general, the technical requirements of AWP deployment will result in facility designs that will require capital costs related to the development and building of all new required AWP infrastructure. The potential costs of implementing technological enhancements related to AWP processes within existing wastewater infrastructure are discussed below. Key WPA technical requirements for AWP development are also summarized, with additional discussion on this EIS's evaluation approach to, and findings on, expected impacts to participating WPAs. While the detailed technical and design requirements incumbent upon the WPA applicant are detailed in the final rule, the following technical and design capital costs for AWP development and installation will predominantly impact the WPAs.

WPA Implementation Costs - Permitting

The permitting process complies with all relevant state laws, with the dual aim of serving the needs of the regulated community and safeguarding public health and the environment. The fees established in this rulemaking are in direct response to a legislative mandate to ensure that the rule establishes "permit fees sufficient to administer a direct potable reuse of treated wastewater program" with all fees deposited in the water quality fee fund (A.R.S. § 49-211(A)). This structure mimics the fee approach for other Water Quality Division programs, which are self-funded, fee-based programs. Therefore, the objective in setting AWP fees for permittees - the Water Provider Agencies (WPAs) (or Advanced Water Purification Responsible Agencies, i.e. "AWPRAs") - is to fund the program from the regulated entities, who voluntarily undertake participation in the AWP program. While ADEQ is guided by its statutory mandate, ADEQ did analyze other direct potable reuse (DPR) programs within other states. However, upon analysis, ADEQ determined that a comparison of these states provides minimal value to comparing the reasonableness or adequacy of AWP's fees.

Other states with DPR regulatory programs in development that ADEQ analyzed include Texas and Colorado. According to reports between ADEQ and the Colorado Department of Public Health and the Environment (CDPHE), Colorado's DPR regulations are established, but neither the staff, nor the fees to support the program have been fully determined or installed. Despite the installation of the regulations, CDPHE is not yet administering the program because there are no current permittees. Currently, CDPHE is actively working with stakeholders to determine the best way to derive funding for the program. According to reports between ADEQ and Texas (through the Texas Commission on Environmental Quality (TCEQ)), Texas' DRP regulatory program is funded through a combination of federal and state funds and fees. Therefore, TCEQ is not required to recover its full DPR program cost through DPR program fees alone. In fact, according to reports between ADEQ and TCEQ, Texas' DPR program does not currently have DPR-specific fees.

Considering the comparative analysis above and ADEQ's legislatively required financial structure in A.R.S. § 49-211(A), ADEQ believes the fees contained in the final rule (*see* A.A.C. Title 18, Chapter 14, Article 1) are in line with the Legislative mandate and carefully designed to support the administration of the program (*see* Heading No. 7, subheading "Fees" above).

WPA Implementation Costs - Enhanced Source Control

Traditional source control programs are designed to protect wastewater treatment plant infrastructure, collection systems, and receiving water bodies under an existing regulatory framework through the National Pretreatment Program (NPP) of the federal Clean Water Act. Because AWP projects create potable water, directly, without an environmental buffer, the program requires Enhanced Source Control (ESC).

ESC includes the control, elimination, or minimization of "constituents of concern" discharged from non-domestic dischargers into a wastewater collection system. Such constituents of concern include federally-regulated chemicals, AWP-regulated chemicals, and performance-based indicator compounds, which are necessary to eliminate or minimize discharges of constituents of concern into the wastewater collection system that is providing the source water for the Advanced Water Treatment Facility (AWTF) in the AWP project.

ESC measures may result in capital and/or increased O&M costs for wastewater customers in which constituents of concern have been found. The magnitude of the cost increases will vary, but in many cases it is anticipated that simple technology discharge management measures (such as temporary retention tanks and scheduled releases, sand filtration, coagulation/flocculation, or use of activated charcoal) could be effective and relatively low cost.

Additionally, a Pollutant Reduction and Elimination Plan specific to each ESC implementation will need to be developed to build relationships with non-domestic dischargers, increase participation in pollution prevention methods to control release of constituents of concern in the collection system, and educate the public about protecting source water. Additional information regarding the specifics of individual ESC programs can be found in R18-9-E824.

WPA Implementation Costs - Nitrogen Removal

The AWP program recognizes the critical importance of nitrogen removal during the treatment process. Nitrogen, primarily in the forms of nitrate and ammonia, can have significant environmental and health impacts if not adequately managed. The AWP program implements flexible strategies for nitrogen removal, allowing facilities to utilize either wastewater treatment processes at water treatment facilities or advanced treatment technologies at AWTFs. These include: biological nitrogen removal (BNR), which uses bacteria to convert nitrogen from one form to another; membrane bioreactors (MBRs) that combine conventional treatment with membrane filtration; an anaerobic ammonia oxidation process that converts ammonium and nitrite directly into nitrogen gas; ion exchange, which removes nitrogen compounds by exchanging them with other ions; and/or adsorption, where nitrogen-containing compounds adhere to the surface of a solid phase.

The choice of strategy depends on various factors, such as the concentration and form of nitrogen in the wastewater, discharge requirements, available infrastructure and resources, and overall treatment objectives. This dual-pathway approach ensures that the specific needs and capacities of different facilities can be met while still achieving the stringent standards required under AWP.

WPA Implementation Costs - Advanced Oxidation Process

The Advanced Oxidation Process (AOP) is a cornerstone of the AWP program's treatment strategy under the minimum design criteria of the rule, R18-9-F832. AOPs are designed to generate highly reactive hydroxyl radicals, which effectively oxidize and break down a wide range of organic contaminants. This AWP program mandates the inclusion of an AOP treatment process in all AWTF treatment trains, with specific performance benchmarks, achieved through a selection of one of two available methods. This requirement underscores the program's commitment to addressing contaminants of emerging concern and ensuring the safety and quality of the treated water, and the dual-pathway approach ensures that the specific needs and capacities of different facilities can be met while still achieving the stringent standards required under AWP.

WPA Implementation Costs - Other Technical and Design Requirements

In addition to nitrogen removal and advanced oxidation, the AWP program outlines a comprehensive set of technical and design requirements. These include the establishment of multiple barrier treatments, management of total organic carbon (TOC), and the implementation of robust monitoring and reporting systems. The program also emphasizes the need for full-scale verification testing, corrosion control measures, and cross-connection prevention to maintain the integrity of the water supply.

WPA - Operational, Monitoring, and Compliance (OMC) Costs

Once an AWTF has been built, there will be subsequent operating processes and protocols that will increase annual O&M expenditures for a WPA. Additional O&M costs over the long-term could encompass routine system maintenance, replacement of aging equipment, energy costs, personnel costs for system operation, and monitoring, and expenses for ongoing water quality testing and reporting. It is not anticipated that AWP adoption will have any impact upon non-participating WPAs.

Operating an AWTF involves a variety of costs. These include the cost of energy required to run the facility, the cost of chemicals used in water treatment processes, and the cost of labor for personnel who operate and maintain the facility. Additionally, there are costs associated with the regular maintenance of equipment and infrastructure, as well as the eventual replacement of aging equipment. These costs can vary depending on the size and complexity of the facility, the quality of the source water, and the specific treatment processes used.

WPA - OMC - Annual Labor, Power, Chemicals, Replacement and Maintenance

The annual costs of operating an AWTF include labor, which refers to salaries and benefits for employees who operate and maintain the facility. Labor may include costs for training and professional development. Annual costs also include power, the cost of the electricity needed to run the facility's pumps, treatment processes, and other equipment. In addition, many water treatment processes require the use of chemicals to remove contaminants from the water. The cost of these chemicals can vary depending on the quality of the source water and the specific treatment processes used. Finally, over time, equipment and infrastructure will need to be repaired or replaced. These costs can be significant, especially for larger facilities or those using more advanced treatment processes. Regular maintenance can help to extend the life of equipment and reduce the need for costly replacements. These costs are ongoing and must be budgeted for each year to ensure the smooth operation of an AWTF.

WPA - OMC - Operator Certification

An additional certification will be required for operators of certain AWPRA facilities, including all AWTFs and some water reclamation facilities. Such additional certification will naturally come with training and implementation costs, but will also provide the benefit of improved understanding of AWP technology and operations at the WPA level. Operator certification standards for AWP systems will be required to encompass the specific knowledge, skills and experience to maintain the reliability, resilience, and continual performance of AWP systems and respond adeptly to any system failure. The new certification process will encompass a range of critical elements, including comprehensive coverage of AWP technologies, a deep exploration of source water risks and risk management strategies, proficiency in critical control point methodologies, in-depth knowledge of specific AWP regulatory requirements, and the capability to manage operational responses effectively.

The certification program for AWP operators is similar to that of the existing water and wastewater certifications from the American Water Works Association (AWWA) - California - Nevada Section. This Advanced Water Purification Operator Certification would also focus on specific advanced treatment technologies required for AWP and include general

requirements to define AWP in the broader picture of public health protection, pathogen and pollutant targets, and other issues. WPAs will need to ensure that its operations staff have the necessary knowledge and experience to successfully complete certification.

WPA - OMC - Enhanced Source Control

As described above, ESC involves strategies to prevent or reduce pollutants in the water supply at the source. The costs associated with ESC processes can include monitoring costs for regular testing of water quality, infrastructure costs for construction or upgrade of facilities to prevent contamination, and regulatory compliance costs for adhering to environmental regulations. Additionally, there are costs for education and outreach to inform the public or specific industries about best practices for preventing water pollution, and maintenance costs for upkeep of infrastructure or equipment used for source control.

While these costs can be significant, the benefits of ESC, such as improved water quality, reduced treatment costs, and better public health outcomes, often outweigh the expenses. Costs can vary depending on local conditions, the specific water source, and the nature of potential pollutants. Therefore, a detailed cost/benefit analysis by an AWPRA is often necessary when considering ESC measures.

WPA - OMC - Chemical Monitoring

ADEQ has established a three-tiered monitoring approach to managing regulated chemicals in the treated wastewater at the water treatment facility under the AWP program. Tier 1 includes monitoring of chemicals currently covered under the Safe Drinking Water Act (SDWA); Tier 2 includes AWP-specific contaminants that are not federally regulated but may pose a health concern; and Tier 3 requires performance-based indicators to establish treatment performance. At each tier, robust monitoring is required, resulting in increased O&M costs, which ensures high standards of water quality are maintained for WPA customers and any downstream users/uses.

WPA - OMC - Monitoring and Reporting

Participating in the AWP program will come with increased monitoring and reporting requirements, and associated costs. Beyond costs, however, there will also be considerable benefits from increased monitoring and reporting. First, increased collection of data and technical information will make WPA staff better informed about, and better able to track and measure, the operations and performance of their facilities. Additional collection of water recycling metrics, for instance, can improve operator and manager understandings of their current performance and assist them with adapting and improving, so that they can achieve higher standards and/or greater efficiencies.

Second, improved tracking of performance data and metrics will facilitate comparisons between different AWP systems, enhancing ADEQ's and each WPA's ability to learn and improve future operations. Data reporting to ADEQ by individual WPAs, for instance, will inform and support ADEQ's monitoring and oversight capabilities.

WPA - OMC - Federal and State Compliance

The AWP rulemaking requires participating WPAs to conform with existing EPA guidelines. There are specific EPA compliance requirements in addition to the required chemical monitoring presented above. These include:

- 1. Laboratory Analysis. Laboratories performing analyses must comply with the Health and Safety Code, known as the Environmental Laboratory Accreditation Act. Chemical analysis methods should be approved by the EPA for use in compliance with the SDWA.
- 2. Reporting. AWTFs are required to report analytical results for ongoing compliance monitoring of pathogens and chemicals. Reports must include detail regarding the ESC program, cross-connection incidents, and any other relevant information as per AWP program requirements.

These requirements are part of final program standards that will ensure the protection of public health through the control of both pathogens and chemicals in the AWP process.

WPA - OMC - Additional Agency Compliance

The final regulations for the AWP program require WPAs to adhere to established numerical criteria (such as regulated pollutant concentrations that must not be exceeded to protect water quality and public health, and action level thresholds that necessitate immediate corrective measures). These standards and thresholds, which may include limits on contaminants like nutrients or heavy metals, are set by associated agencies or organizations and are integral to WPA operation.

WPA - OMC - Public Communications

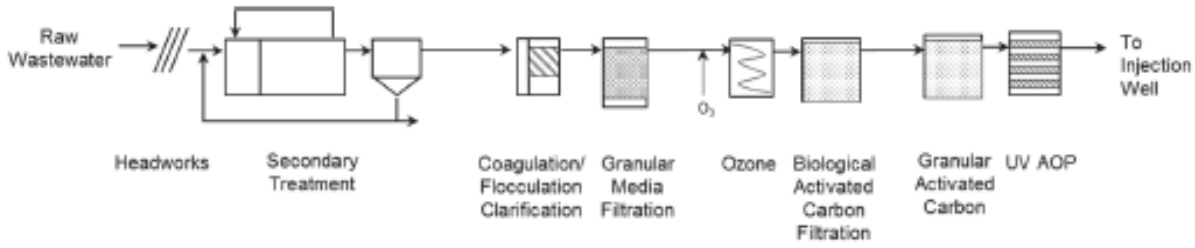
As part of AWP implementation, each WPA and associated partners must develop and implement a "Public Communication Plan" within their service area to notify the public of the possibility of their transition to AWP, address public concerns, build public confidence, and garner public acceptance for AWP (*see* R18-9-B811). Most WPAs already have community relations staff resources allocated for their current water programs, so the level of additional effort required for adequate and successful communication to the public about AWPs will vary between agencies according to their circumstances.

WPA - Cost Evaluation

ADEQ has identified three representative AWP projects for analysis within this EIS, each using a different AWTF treatment train: 1) Ozone-Biologically Activated Carbon (BAC), 2) Ozone-BAC with Side-Stream Reverse Osmosis (RO), and 3) Full-Stream RO. These projects have been selected as they represent a range of treatment options, reflecting the different processes available to meet the diverse needs and capacities of different facilities. This EIS evaluated these representative projects to assess expected costs and benefits of implementing AWP technologies using each of them in Arizona, thereby supporting informed decision-making and strategic planning for water resource management in the state.

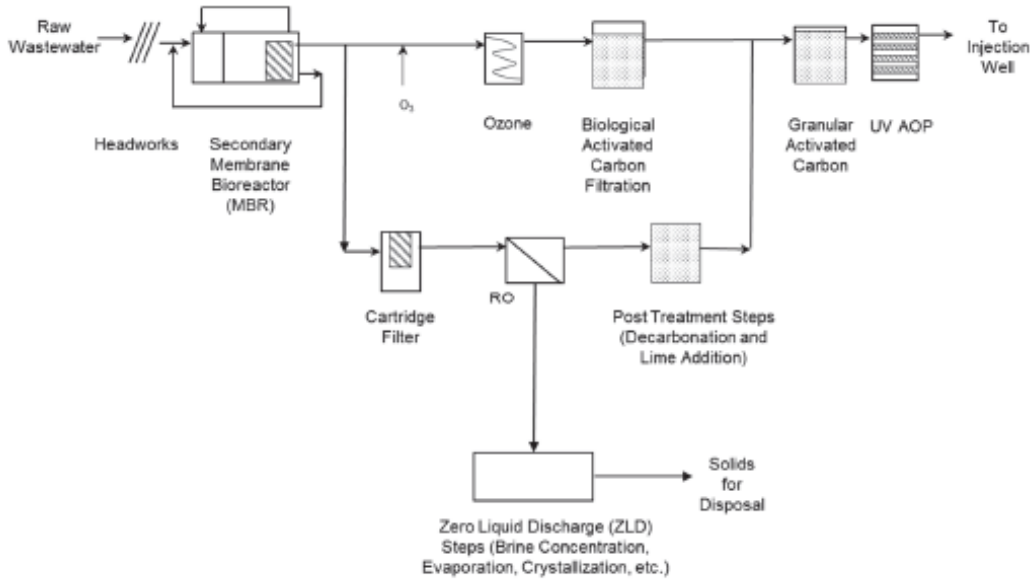
WPA - Cost Evaluation - Project 1 Ozone-BAC:

This train is adapted from injection well potable reuse (PR) projects. The Ozone-BAC process involves the use of ozone for oxidation and biofiltration for organic and microbial contaminant removal but does not significantly reduce the concentration of Total Dissolved Solids (TDS). This train is ideal for applications where the primary concern is the removal of targeted bulk and trace organic contaminants, but not for cases where the TDS of the source water is high and/or TDS reduction is needed to meet purified water quality targets.



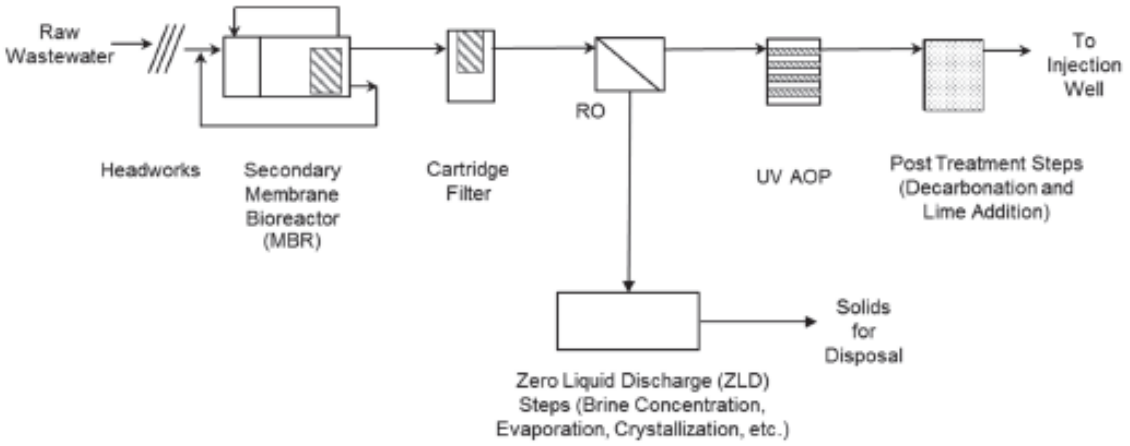
WPA - Cost Evaluation - Project 2 Ozone-BAC with Side-Stream RO:

This train includes a side-stream RO treatment for a portion of the water being treated for enhanced salinity reduction. It is suitable for injection-well PR projects where some salinity must be controlled. The side-stream RO allows for the removal of dissolved solids from a portion of the water, and thus helps to manage overall salinity levels and to reduce project costs by implementing a more targeted approach to RO treatment.



WPA - Cost Evaluation - Project 3 Full-Stream RO:

This train is suitable for injection well PR projects where full-stream reverse osmosis (RO) treatment is required. Full-stream RO treats the entire flow of water, providing comprehensive removal of salts and other dissolved solids. This train is ideal for applications where salinity control is necessary.



WPA - Cost Evaluation - Capital Cost

Capital and O&M costs have been estimated for each of the three representative AWP projects. These high-level "typical" cost estimates are used to derive approximate unit cost estimates to provide "ball-park" representation of the likely costs for participating WPA and its customers. Unit-supplied water values are derived from these estimates to provide an indication of the AWP's potential customer costs and enable cost comparisons with other water supply alternatives, such as desalination.

The cost data developed for the three representative AWP projects include expenditures for AWTF design and construction, required water recovery facility enhancements, an ESC program, and O&M. Together these demonstrate representative costs that a WPA can be expected to incur to develop and operate a typical 6 million gallon per day (MGD) AWTF with an assumed 30-year useful life. Unit costs are presented in constant 2024 dollars and thus do not include any inflation effects. It is also assumed that an AWTF will be funded with low-interest loans (such as federal Water Infrastructure Finance and Innovation Act programs), which, when applied to current 2024-dollar terms, will approximate to a zero (0) percent real interest rate.

The estimated capital costs for the representative projects are shown in the table below.

Representative Project	Project Type	Capital Costs, $M	Annualized Capital Costs, $/AFY
Project 1	Carbon Based Advanced Treatment (CBAT)	$208.0	$1,000
Project 2	Carbon Based Advanced Treatment (CBAT) with Sidestream Reverse Osmosis (RO) (a)	$229.0	$1,100
Project 3	Full Reverse Osmosis (RO) with Brine Management	$276.0	$1,400

Note: (a) Assumes sidestream RO of 55% of CBAT flow. AFY is acre feet per year.

WPA - Cost Evaluation - O&M and Compliance Costs

The estimated annual O&M costs for each of the representative projects are provided in the table below. These costs include labor, materials, equipment repair/replacement and power. Staff costs are based on an estimated average labor cost of $80,000 and $0.20 kWh power cost for operations.

Representative Projects	Project Type	Annual O&M Costs, $M/yr	Annualized Capital + O&M Costs, $/AFY
Project 1	Carbon Based Advanced Treatment (CBAT)	$3.3	$1,520
Project 2	Carbon Based Advanced Treatment (CBAT) w/ Sidestream Reverse Osmosis (RO) (a)	$8.5	$2,390

Project 3	Full Reverse Osmosis (RO) w/ Brine Management	$10.9	$2,990

Note: (a) Assumes sidestream RO of 55% of CBAT flow. AFY is acre feet per year.

In addition, as discussed above, participating WPAs will incur additional monitoring and compliance costs. These activities are recognized as distinct and additional to the duties required of the AWP's operations staff. However, the net cost to the WPA is expected to be relatively minor, as these responsibilities are standard and often periodic. It is estimated that 1 FTE should be able to perform the necessary monitoring and compliance activities.

Regarding ESC, a high-level summary of the estimated costs for implementing a full ESC Program range from 1.25 to 1.5 FTEs. In some cases, WPAs have reported an additional analytical cost of 2 to 3 FTEs necessary for monitoring events. At a full-burdened typical wage cost of approximately $139,000 per year, the estimated implementation cost for a full ESC program would be expected to be in the range of $175,000 to $210,000 per year.

As discussed previously, ADEQ's oversight and administration of the AWP program will be provided on a fee-for-service basis charged to the participating WPA.

Municipal Governments

The future planning of communities in Arizona will likely be dictated by the availability of water resources, from planning for and permitting additional residential and nonresidential growth; to planning for public facilities, such as schools, offices, and correctional facilities. Therefore, municipal governments are an integral component in the process of selecting AWP or another water source alternative. As a result, municipal governments will likely be working with / directing the WPAs when determining the amount of water needed to support the current needs of and projected growth within their communities. Municipal governments will also be indirectly impacted by the AWP program as it plans for and permits residential and nonresidential development.

It is likely that municipal governments will be directly impacted by the AWP program as they support the WPA in evaluating alternatives for new sources of water. One of the major components specific to any ESC requirements for AWTF operations will be the establishment of legal authority, regulatory agreements between agencies, and specific enhanced wastewater management requirements and compliance. Municipal governments will also likely be responsible for implementing the outreach efforts that will explain the AWP selection process to their communities. In addition, municipal governments as water customers will be impacted by any rate increases that occur from AWP implementation. While there will be impacts to municipal governments from AWP, the impacts are not anticipated to be significantly different from the impacts associated with implementing other water source alternatives. If AWP is more cost-effective than other alternatives, there may even end up being greater demand for residential and nonresidential development in AWP-adopting municipalities because of their more affordable water.

Notably, municipal governments may, in fact, be the WPA in their community. In this scenario, the impacts to the municipal government are best revealed through the WPA impact analysis, above, rather than the impact analysis under this section. If a municipal government is the WPA, their expected impacts are significant.

WPA Customers

AWP is not anticipated to have an impact on water customers served by non-participating WPAs. Only AWP water customers will incur increased costs, as they can expect to face higher water rates once WPAs pass on the costs of AWTF development and operations to them. Customers of participating WPAs will, however, also benefit from the greater availability and reliability of the potable quality water supplied through their community's AWP, as described below, especially if their "willingness to pay and use" value exceeds the price charged to them by the WPA to receive the water. Regardless, all user rate increases are the responsibility of each WPA and as such will vary based on specific circumstances. It is, of course, expected that each participating WPA will do a comprehensive analysis before AWP adoption to ensure that there is adequate customer demand, support, and ability to pay for any new AWTF within their service area.

As discussed, participating in the AWP program is voluntary and it is anticipated that WPAs will select the water supply alternative that is the most cost-effective and best meets the needs of its customers. Therefore, if AWP is selected, the rate impacts will likely be less than the impacts of alternative water supplies, thus customers may experience less of a rate impact than if AWP was not available.

WPA Customers - Water Supply Availability

WPA customers will benefit from greater water supply reliability and availability from the additional potable water supplied through AWPs and will enjoy confidence in their WPA's ability to fully meet its service community's current water needs and future demands. Full representation of an AWP's total impact on local water availability should recognize the following water supply improvements:

- Net increase in supplied water: Unlike water purchases and transfers, wastewater recycling will result in "net new" quantities of potable water, as formerly non-potable water discharges are instead treated for municipal and industrial (M&I) consumptive use.
- Increased Supply Reliability: AWP will provide a more sustainable supply option, since its production will not be directly impacted by metrological and/or hydrological conditions.
- Local Control and Supply Flexibility: AWP-served communities will reduce their dependency on imported water and/or existing (often dwindling) groundwater resources. The new water supplies obtained from AWP

development should allow many communities to maintain or improve their groundwater levels and availability.

As noted previously, only the above qualitative considerations of impacts for customers of AWP-participant WPAs have been provided, as rate impact estimations will be highly project-specific and were not evaluated as part of this EIS.

WPA Customers - Water Quality

As one of ADEQ's three (3) environmental divisions, the Water Quality Division (WQD) is responsible for administering the Department's water protection and improvement programs. The WQD protects and enhances public health and the environment by ensuring that healthy drinking water is provided by public water systems, and by controlling current and future sources of surface and groundwater pollution. The Division's programs include, among others, the Safe Drinking Water program, the Groundwater Protection program, and the Recycled Water program.

All recycled water delivered by AWP systems is anticipated to be of equal water quality to existing drinking water supplies due to advancements in AWP technology and the high water quality standards of the SDWA. As a result, future AWP customers are not expected to face any increased public health risks or concerns from AWP, and indeed can expect to enjoy clean water of high quality.

General Public

In addition to the direct impacts to WPAs and their customers, AWP deployment can be expected to have broader impacts on the general public. Direct cost impacts from AWP technology adoption are expected to be predominantly experienced by the agencies, businesses, and individuals connected with AWP operations. However, due to the interconnectedness of Arizona's regional and local water systems, and the scarcity and importance of water within the state, future AWP deployment can be expected to have impacts on the broader populations of residents and businesses within the state and state-wide water resources. Key components and constituencies that would potentially be impacted include the Arizona water system, community economies, the environment, and downstream water users, as described below.

General Public - Arizona Water System

The Colorado River system, which supplies 36 percent of Arizona's total water use, has experienced extensive drought conditions for the past 19 years. Furthermore, it can be expected that climate change may result in even greater long-term reductions in Colorado River supplies. Arizona maintains six Active Management Areas (AMAs), designed to sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning. Established in 1980, these AMAs cover those areas of the state where significant groundwater depletion has historically occurred. As Arizona heads into a drier future, it is unlikely that its groundwater safe-yield requirements will be reliably met and thereafter maintained in any of the state's AMAs. Groundwater currently provides 41 percent of the state's water, but recent groundwater modeling has projected that over the next 100 years, unmet groundwater demand within the Phoenix AMA will reach nearly 4.9 million acre-feet (MAF), and unmet demand within the Pinal AMA will exceed 8 MAF. Furthermore, in 2022, the Federal Government called upon Arizona and its neighboring Colorado River states to conserve between 2 to 4 MAF per year to address the critically low levels in Lake Powell and Lake Mead.

AWP may thus represent an important supplemental water supply source that can enhance the AMA regions and their local sub-areas' abilities to operate more sustainably. The Arizona water system at large could see significant benefits from this rulemaking by providing WPAs with another option for providing potable water. All Arizona water customers, whether they be serviced by an AWP system or other municipal water system, could benefit from improved water availability and reliability within the state's water system if AWP implementation adds substantial net new water supplies to the state's water system.

General Public - Community Economic Development and Growth

The Arizona Department of Water Resources (ADWR) created the Assured Water Supply Program and the Adequate Water Supply Program to address the concern of limited groundwater supplies in Arizona. The Assured Water Supply Program operates within Arizona's six AMAs and is designed to sustain the state's economic health by preserving groundwater resources and promoting long-term water supply planning. Conversely, the Adequate Water Supply Program operates outside of the AMAs to ensure that water supply adequacy or inadequacy is disclosed in the public report provided to potential home or land purchasers, and that any water supply limitations are described in promotional or advertising material for new developments. Each program has independently verified that current water supply cannot match pace with current projections of population growth and water supply demand.

According to recent data, Arizona witnessed a substantial 12% population increase between 2010 and 2020. Furthermore, more than another one million new people are predicted to take up residence in Arizona over the next decade. At the state's current average water use rate of 146 gallons per day, this projected one million population growth will result in 164 thousand acre-feet of increased residential water demand. New water supplies to meet demand are therefore critically required, and AWP represents an option with considerable potential for supporting the water demands of such anticipated growth and the requirements of the programs. Indeed, in some areas, growth may not be possible without AWP; while in others, AWP may provide the least-costly option for meeting the increased water demand of Arizona's planned development.

Additionally, AWP sourced water also supports future economic development since it can be readily used for a wide variety of purposes and/or locations. In-state surface water supplies, on the other hand, are typically highly location dependent and also subject to water right requirements that may restrict who may use the water where and for what purposes. AWP source water can thus be used to meet Assured Water Supply requirements in sub-basins and areas with insufficient native groundwater to support the future water needs of all proposed development, whether it be residential or commercial. Finally, AWP sourced water may also reduce the demand for future water transfers that reallocate water

supplies from agricultural use for urban customers, which will result in land fallowing and lost agricultural activity.

General Public - Downstream Users

WPA applicants to the AWP program will be required to maintain all previous commitments to downstream water users. WPAs will have to demonstrate that they have the necessary water use rights to divert wastewater supplies for their AWP operations. Use terms and conditions for wastewater outflows will vary between locations and specific utilities. In some cases, dependent ecosystems may formally or informally be recognized as committed water users for wastewater outflows; as such, the impacts to adjacent ecosystems may warrant mitigation. This would be evaluated on a project-specific basis during each AWTF's permit approval process.

Except in cases of contracted use commitments (e.g. non-potable deliveries to the Palo Verde nuclear plant), within most of the state's hydrological systems, wastewater discharge return flow effects and downstream uses are typically limited and not well defined. As a result, potential AWP impacts to downstream users will be project-specific. They are also difficult to estimate and likely outside the WPA's jurisdiction and management authority. As a result, such AWP-related effects were not evaluated as part of this EIS.

Arizona Environment

Current state environmental regulations will evaluate project-specific impacts that may be expected from any proposed AWP development and will recommend appropriate mitigation and/or design changes as necessary to minimize any significant adverse environmental effects. However, in general, the incidental effects from WPAs' discretionary (i.e. uncommitted) current wastewater discharges may be considered to represent indirect and secondary outcomes with lesser relevance/importance than the AWP's direct positive impacts on regional water availability and reliability. AWP recycling of wastewater outflows will not directly affect the state's groundwater resources, since AWP will not result in direct groundwater extraction. AWP may result in some potential indirect groundwater reductions from its diversion of current wastewater outflows. Groundwater conditions within the state could be indirectly impacted, to the extent that current wastewater discharges would normally recharge groundwater aquifers though natural percolation will be diverted by AWP reuse of those water quantities.

AWP may also have a net-positive impact on state groundwater resources by reducing the use of groundwater to meet the state's future water supply needs. It is anticipated that AWP-related groundwater depletion will be less than that which would result from groundwater extraction water supply options designed for either potable use or as new water supply alternatives (e.g. desalination of brackish groundwater). Improved groundwater sustainability can also be expected to result in environmental benefits from reduced land subsidence risks and/or adverse intrusion effects on other aquifers. The economic costs of any such adverse impacts will vary depending on the specific circumstances but will typically represent substantial economic losses to affected properties, and land uses that will be costly to mitigate.

E. A general description of the probable impact on private and public employment in business agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ expects that net direct effect on long-term public or private employment from this rulemaking will result in a minimal or negligible increase. While construction of each new AWTF will result in short-term employment increases for the regional economy, AWP implementation is not anticipated to have direct, long-term impact on local employment. As discussed in Section D, each new AWTF will require a limited increase in operational staff for participating WPAs. Similarly, ADEQ staff necessary for future program oversight and administration will require a relatively small increase in agency staffing. Furthermore, the AWP-related job impacts for both WPAs and ADEQ will likely be similar compared to those that would otherwise be expected from other water supply expansion alternatives (e.g. new brackish desalination).

The extent that any AWP-related increase in employment (both from its construction and subsequent operations) will represent net gains for the region's economy will depend on whether the WPA might otherwise be expected to pursue alternate development of their water system (e.g. new desalination facilities) or would forego system expansion entirely. In either case, the direct net effect on private and public employment within the region's economy would be very small and represent a near negligible change for the region's business sectors and economy.

The potential indirect employment impacts from the AWP, however, could be more substantial if WPAs would otherwise be unwilling or unable to improve their water supplies. Under those circumstances, AWP implementation would be expected to allow future economic growth and development that would otherwise not occur under Arizona's Assured and Adequate Water Supply Programs' requirements. In this case, new employment generated by the increased economic growth and development might be recognized as an "increase to employment" benefit that could, at least in part, be attributed to the AWP.

F. A statement on the probable impact of the rules on small business:

In this EIS, ADEQ uses the term "small business" consistent with A.R.S. § 41-1001(21), which defines a "small business" as "a concern, including its affiliates, which is independently owned and operated; which is not dominant in its field; and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year." ADEQ has determined that, for the most part, this rulemaking will not generate a significant and/or disproportionate impact on small businesses. As noted previously, the AWP is a voluntary program that will provide each participating WPA with new opportunities for increasing and improving local water supplies. As such, each WPA can determine whether an AWP program's benefits to its operations and customers will justify investment costs into the program and potential increases in subsequent annual O&M expenses. AWP costs will most directly affect WPAs, with secondary effects on customers (because of improved water availability and

pass-through rate cost impacts). AWP rules are thus anticipated to have only an indirect impact on Arizona small businesses. Furthermore, in the absence of any differentiation in either the distribution of AWP-related water supply changes or rate charges, small business water customers would not be expected to be disproportionately impacted as compared to a WPA's other customers.

1. An identification of the small business subject to the rules:

As discussed above, no small businesses would be directly subject to AWP rulemaking, as it is a voluntary program for WPAs.

2. The administrative and other costs required for compliance with the rules:

All administrative and other compliance costs related to the AWP will be directly applicable to ADEQ and the participating WPAs. Any such costs incurred by participating WPAs will have only an indirect cost effect on its customers (residential, business, municipal, and other nonresidential) as approved by the Utilities Division of Arizona's Corporation Commission. Furthermore, in the absence of any differentiation in either the distribution of AWP-related water supply changes or rate charges, small business water customers are not expected to be disproportionately impacted compared to a water utility's other customers.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

In the absence of any direct or disproportionate indirect impacts to small businesses from the AWP, no mitigation measures are necessary to reduce any AWP-related future impacts to small businesses.

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

See Section D for discussion on ratepayer impacts to AWP customers. Note that probable cost effects from future AWP development and implementation will be limited solely to the WPA customers. Accordingly, no cost impacts from future AWP development and implementation to non-participating WPAs would be expected.

G. A statement of the probable effect on state revenues:

AWP implementation will result in increased oversight and administration by ADEQ, as previously discussed. However, the AWP program will operate under the State's fee-for-service model, so that ADEQ-incurred administrative expenses will be recovered from AWP applicant application and permit fees. As a result, no decrease in state revenues should result directly from the AWP program. The AWP program can be expected to result in future increases in state revenues to the extent that its supplemental increases in water delivery and supply improvements should foster economic growth and development that would otherwise not occur. The tax and other economic benefits from the AWP supported growth would represent future indirect and predominantly positive effects on state revenues and economic conditions.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

A.R.S. § 41-1055 requires identification and description of any less intrusive or less costly alternative methods of achieving the AWP regulation's purpose. For any such AWP alternatives, the required description needs to provide: (1) the monetizing of its costs and benefits and (2) the rationale for not using non-selected alternatives. As discussed previously, AWP participation is entirely voluntary and in no way precludes any WPA from instead implementing another approach or water supply resource to meet its water supply needs. This approach thus recognizes that each WPA is the best and most appropriate analyst of, and decision-maker, for its own specific water system needs, resources and alternative supply options.

As such, potential AWP program participants will evaluate their own agency/project-specific circumstances to determine if there are, in fact, less intrusive or less costly alternative methods that would be preferable. Furthermore, the AWP rulemaking's programmatic nature generally precludes any specific project-level determinations of its relative cost or intrusiveness, since any such determination will depend on specific project circumstances as well as implementation approach and design. The cost-effectiveness determination and rationale for any AWTF's development will be the sole responsibility of its WPA and will consequently override and/or negate the applicability of this EIS' alternative methods description requirements.

Generally, brackish groundwater reverse osmosis (BWRO) is considered the primary alternative for obtaining net new water supplies that would match AWP in terms of supply reliability and local control. However, BWRO is likely to be a more expensive alternative, and still comes with its own set of limitations and project-specific circumstances. There is an extensive body of research and analysis on the technical and economic viability of both recycled water and BWRO development. Review of these studies indicates that there is a wide range in the costs of supplied water for these systems, determined by a variety of factors. Several key factors will determine the technical and economic viability of BRWO deployment: (1) groundwater resource conditions, including both supply quantities and salinity levels; (2) pumping depths for extraction; (3) locational proximity to community water systems and conveyance/integration infrastructure requirements; (4) energy consumption; (5) brine by-product waste disposal (either ground injection or treatment for landfill); (6) capital and operational costs; and (7) environmental concerns and impacts from long-term groundwater depletion, subsidence potential and/or effects on neighboring aquifers.

It is also important to note that all else being equal, AWP systems facing salinity issues that require reverse osmosis treatment are likely to have higher supplied water costs, and these may be comparable to those that would be expected for BWRO supplied water.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

The purpose of this section of the EIS is to identify the data and analysis previously used to develop the AWP program.

As explained throughout this EIS, the AWP program will offer Arizona WPAs new opportunities to develop potable water sources through treatment and recycling of its wastewater outflows. Due to the need for additional water supply options, the Arizona legislature mandated pursuit of the AWP program through A.R.S. § 49-211. As discussed in Section D, the AWP program is entirely voluntary, and its regulations will apply solely to participating WPAs. As a result, non-participating WPAs will not be affected by any AWP requirements. ADEQ has chosen to offer AWP as a voluntary and optional program to place decision-making responsibility for needs determination, cost evaluation and participation on the WPAs who will be responsible for implementing the technology and who best understand how it stands to impact their specific circumstances, and customers' needs.

ADEQ has undergone an extensive and detailed process to develop its AWP regulations. The AWP regulation development has to-date included significant planning and analysis for its formulation. In addition to technical analyses, ADEQ has consulted with WPAs that are considering participating in the AWP program.

Please see Section 7 of this NFRM for a comprehensive overview of AWP regulations, as well as the rationales and data used for the AWP program's design and implementation approach. The various AWP regulatory requirements have generally been developed and adopted to ensure that AWP program implementation fulfills the agency's overall mission to protect and enhance public health and the environment of Arizona. Towards this goal, the AWP program has been developed and designed to conform with ADEQ's guiding principles: i. protective of public health and the environment; ii. community-supported; iii. scientifically-based; iv. reasonably affordable; v. transparent, informative, and communicative; vi. specific, practical, flexible, and implementable; and vii. accounts for future conditions and growth.

The protection of public health and the environment, and the development of a program grounded in hydrological science, are the preeminent guiding principles that are most relevant to AWP program requirements and standards. As such, ADEQ has focused extensively and deliberately on AWP regulations that will ensure the water supply system's proposed technical, design, operational, and compliance regulations address public health concerns, and that public safety is maintained. Without ADEQ's rigorous regulatory guidelines and future oversight, there would be an increased risk of potential public health/safety issues and/or incidents. Due to the complexity of the technical issues and the wide variety of WPA circumstances, extensive regulatory guidance, requirements, safeguards and agency oversight are essential to ensuring that AWP can be a safe, sustainable, and effective new source of potable water for Arizona's water users.

AWP NFRM Public Comments - 18 AAC 14

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 14. DEPARTMENT OF ENVIRONMENTAL QUALITY - PERMIT AND COMPLIANCE FEES

The table of contents on page one contains links to the referenced page numbers in this Chapter.
Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of
July 1, 2023 through September 30, 2023

Questions about these rules? Contact:

Department: Arizona Department of Environmental Quality
Address: 1110 W. Washington St.
Phoenix, AZ 85007
Website: www.azdeq.gov
Name: David Lelsz, Ph.D.
Telephone: (602) 771-4651
Email: lelsz.david@azdeq.gov

The release of this Chapter in Supp. 23-3 replaces Supp. 22-3, 1-11 pages.
Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. *"'Rule' means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency."*

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The "R" stands for "rule" with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document's content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature's website, www.azleg.gov. An agency's authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State's website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency's exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor's notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

Washington Street, Fl. 7 Phoenix, AZ 85007

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 14. DEPARTMENT OF ENVIRONMENTAL QUALITY - PERMIT AND COMPLIANCE FEES

Authority: A.R.S. §§ 49-203(A)(6), 49-203(A)(9), 49-104(C)(1)

Supp. 23-3

CHAPTER TABLE OF CONTENTS

ARTICLE 1. WATER QUALITY PROTECTION FEES

Article 1, consisting of Sections R18-14-101 through R18-14-108, adopted effective November 15, 1996 (Supp. 96-4).

ARTICLE 2. PUBLIC WATER SYSTEM - DESIGN REVIEW FEES

Article 2, consisting of Sections R18-14-201 through R18-14-202 and Table 1, made by final rulemaking at 14 A.A.R. 4102, effective December 6, 2008 (Supp. 08-4).

ARTICLE 3. CERTIFIED OPERATOR FEES

Article 3, consisting of Sections R18-14-301 through R18-14-303, made by final rulemaking at 21 A.A.R. 2597, effective July 1, 2016 (Supp. 15-4).

ARTICLE 1. WATER QUALITY PROTECTION FEES

R18-14-101. Definitions

In addition to the definitions in A.R.S. §§ 49-201, 49-241.02, 49-255, 49-331, and A.A.C. R18-9-101, A.A.C. R18-9-701, and A.A.C. R18-9-A901, the following terms apply to this Article:

1. "APP" means an Aquifer Protection Permit.
2. "Complex modification" means:
   a. A revision of an individual Aquifer Protection Permit for a facility within a mining sector as defined in A.R.S. § 49-241.02(F)(1); and
   b. A revision of an individual Aquifer Protection Permit for a facility within a non-mining sector due to any of the following:
      i. An expansion of an existing pollutant management area requiring a new or relocated point of compliance;
      ii. A new subsurface disposal including injection or recharge, or new wetlands construction;
      iii. Submission of data indicating contamination, or identification of a discharging facility or pollutants not included in previous applications that requires reevaluation of BADCT; or
      iv. Closure of a facility that cannot meet the clean closure requirements of A.R.S. § 49-252 and requires post-closure care, monitoring, or remediation.
3. "Courtesy review" means a design review service that the Department performs within 30 days from the date of receiving the submittals, of the 60 percent completion specifications, design report, and construction drawings for a sewage collection system.
4. "Priority review" means a design review service for an APP Type 4 permit application that the Department completes using not more than 50 percent of the total review time-frame for the applicable Type 4 permit application as specified in 18 A.A.C. 1, Table 10.
5. "Request" means a written application, notice, letter, or memorandum submitted by an applicant to the Department for water quality protection services. The Department considers a request made on the date it is received by the Department.
6. "Review hours" means the hours or portions of hours that the Department's staff spends on a request for a water quality protection service. Review hours include the time spent by the project manager and technical review team members, and if requested by the applicant, the supervisor or unit manager.
7. "Review-related costs" means any of the following costs applicable to a specific request for water quality protection service:
   a. Presiding officer services for public hearings on a permitting decision,
   b. Court reporter services for public hearings on a permitting decision,
   c. Facility rentals for public hearings on a permitting decision,
   d. Charges for laboratory analyses performed during the review, and
   e. Other reasonable and necessary review-related expenses documented in writing by the Department and agreed to by an applicant.
8. "Standard modification" means an amendment to an individual Aquifer Protection Permit that is not a complex modification.
9. "UIC" means Arizona's Underground Injection Control Program.
10. "Water quality protection service" means:
    a. Reviewing a request for an APP determination of applicability;
    b. Pre-application consultation, issuing, renewing, amending, modifying, transferring, or denying an aquifer protection permit, an AZPDES permit, a UIC permit, a UIC application for an aquifer exemption or an injection depth waiver or a reclaimed water permit;
    c. Reviewing supplemental information required by a permit condition, including annual reports and closure for an APP;
    d. Performing an APP clean closure plan review;
    e. Issuing or denying a Certificate of Approval for Sanitary Facilities for a Subdivision;
    f. Registering or transferring registration of a dry well;
    g. Conducting a site visit;
    h. Reviewing proprietary and other reviewed products under A.A.C. R18-9-A309(E);
    i. Reviewing, processing, and managing documentation related to an AZPDES general permit, including a notice of intent, notice of termination, certificate of no exposure, and waiver;
    j. Registering and reporting land application of biosolids; or
    k. Pretreatment program review, inspection, or audit.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-102. Hourly Rate and Maximum Fees for Water Quality Protection Services

A. The Department shall assess and collect an hourly rate fee for a water quality protection service, except for APP minor permit amendments specified under A.A.C. R18-9-A211(C)(1), (2) and (3) and A.A.C. R18-9-B906(B), unless a flat fee is otherwise designated in this Article, and UIC minor modifications specified under A.A.C. R18-9-C633(A).

B. Hourly rate fees. The Department shall calculate the fee using an hourly rate of $174, adjusted annually under subsection (D), except for the UIC program, where the Department shall calculate the fee using an hourly rate of $145, adjusted annually under subsection (D). These rates shall then be multiplied by the number of review hours to provide a water quality protection service, plus any applicable review-related costs, up to the maximum fee specified in subsection (C), adjusted annually under subsection (D).

C. Maximum fees for a water quality protection service assessed at an hourly rate in Table 1, adjusted annually under subsection (D).

D. The Director shall adjust the hourly rate and maximum fees listed in subsections (B) and (C) every August 1 to the nearest $10, beginning August 4, 2023, by multiplying the hourly rate or maximum fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year

2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 1. Maximum Fees

Program Area	Permit Type	Maximum Fee
APP	Individual or area-wide	$285,400
APP	Complex modification to individual or area-wide	$214,050
APP	Clean closure of facility	$71,350
APP	Standard modification to individual or area-wide (per modification up to the maximum fee, and modification can be reassigned under A.A.C. R18-1-516):	
	▪ Maximum fee (cumulative per submittal)	$214,050
	▪ Modification under A.A.C. R18-9-A211(C)(1) through (3)	No fee
	▪ Modification under A.A.C. R18-9-A211(C)(4) through (6)	$7,135
	▪ Modification under A.A.C. R18-9-A211(C)(7), (D)(2)(b) through (i), and (k) through (l)	$21,405
	▪ Modification under A.A.C. R18-9-A211(D)(2)(a) and (j)	$35,675
	▪ Modification under A.A.C. R18-9-A211(B) that is not classified as complex modification under R18-14-101(2)	$35,675
APP	For an APP issued before July 1, 2011, the fee for a submittal required by a compliance schedule is assessed per submittal and cumulative up to the maximum fee. The applicable maximum fee for all compliance schedule submissions shall be according to one of the three maximum fee categories listed below. The maximum fee is for the lifetime of the APP unless a new compliance schedule is established in the APP due to a modification that is classified as both a significant amendment under A.A.C. R18-9-A211(B) and a complex modification under R18-14-101(2).	
	▪ For a permit with a compliance schedule where one or more submissions require a permit modification that requires a determination or reevaluation of BADCT, the fee is assessed as described above for each standard modification, with a maximum fee for the permit's entire compliance schedule of:	$214,050
	▪ For a permit with a compliance schedule where one or more submissions require a permit modification, but no determination or reevaluation of BADCT is required, the fee is assessed as described above for each standard modification, with a maximum fee for the permit's entire compliance schedule of:	$142,700
	▪ For a permit with a compliance schedule requiring one or more submissions that require ADEQ review but do not require a permit modification, the maximum fee for the permit's entire compliance schedule is:	$142,700
APP	For an APP issued on or after July 1, 2011, the fee for a submittal required by a compliance schedule is assessed per submittal and cumulative up to the maximum fee for the lifetime of the APP	$142,700
APP	Determination of applicability	$21,405
APP	Reviewing proprietary and other reviewed products under A.A.C. R18- 9-A309(E)	$21,405
AZPDES	Individual permit for municipal separate storm sewer system	$57,080
AZPDES	Individual permit for wastewater treatment plant (based on gallons of discharge per day)	
	▪ 3,000 to 99,999	$21,405
	▪ 100,000 to 999,999	$28,540
	▪ 1,000,000 to 9,999,999	$42,810
	▪ 10,000,000 or more	$71,350
AZPDES	Individual permit for a facility or activity that is not a wastewater treatment plant or a municipal separate storm sewer	$42,810
AZPDES	Amendment to an individual permit	$17,838
AZPDES	Approval of a new or revised pretreatment program under AZPDES	$14,270
AZPDES	Consolidated individual permit for multiple AZPDES individual permits, as allowed under A.A.C. R18-9-B901(C)	Aggregate of the applicable maximum fees
Reclaimed	Reclaimed water individual permit	$45,664
UIC	Area Area Modification / Renewal	$200,000 $150,000
UIC	Classes I, II, III, V Individual Classes I, II, III, V Modification / Renewal	$200,000 $150,000

UIC	Classes VI Individual Classes VI Modification	No Max No Max

Historical Note
Table 1 adopted by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Table 1 repealed; new Table 1 adopted by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-103. Initial Fees
A person shall submit the applicable fee at the time a request for a water quality protection service is submitted to the Department.

Historical Note
Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-104. Annual Fees for Water Quality Protection Services Subject to Hourly Rate Fee

A. Annual Registration Fees. The annual registration fee required under A.R.S. § 49-242 is in Table 2, adjusted annually under subsection (E).

B. The Department shall assess an annual fee for an AZPDES-related water quality protection service subject to an hourly rate fee as listed in Table 3, adjusted annually under subsection (E).

C. The Department shall assess an annual fee of $714, adjusted annually under subsection (E), for an individual reclaimed water permit.

D. The Department shall assess an annual fee and an annual waste disposal fee as applicable to UIC regulated facilities, subject to an hourly rate fee, as listed in Tables 3.1 and 3.2, adjusted annually under subsection (E).

E. The Director shall adjust the annual fees listed in subsections (A), (B), (C), and (D) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the annual fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note
Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Tables 2 and 3 removed from this Section to conform with the A.A.C. codification scheme; amended by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 2. APP Annual Registration Fees

Discharge or Influent per Day under the Individual APP or Notice of Disposal (in Gallons)	Annual Registration Fee	Annual Registration Fee if New Facility Under New APP Not Yet Constructed
3,000 to 9,999	$714	$357
10,000 to 99,999	$1,427	$357
100,000 to 999,999	$3,568	$714
1,000,000 to 9,999,999	$8,562	$892
10,000,000 or more	$12,130	$1,070

Historical Note
Table 2 made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 3. AZPDES Annual Fees

Permit Type	Annual Fee	Annual Fee if New Facility Under New AZPDES Not Yet Constructed
Municipal separate storm sewer system	$14,270	N/A
Wastewater treatment plant (based on gallons of discharge per day):		
▪ Less than 99,999	$357	$357
▪ 100,000 to 999,999	$714	$714
▪ 1,000,000 to 9,999,999	$3,568	$892
▪ 10,000,000 or more	$5,708	$1,070
Facility or activity that is not a wastewater treatment plant or municipal separate storm sewer and designated in the permit as either:		
Major	$3,568	$892
Minor	$714	$714
Pretreatment program	$4,281	N/A
Consolidated individual permit for multiple AZPDES individual permits, as allowed under A.A.C. R18-9-B901(C)	Aggregate of the applicable annual fees of each individual permit	Aggregate of the applicable annual fees of each individual permit

Historical Note

Table 3 made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 3.1. UIC Annual Fees

Permit Type	Annual Registration Fee	Annual Waste Disposal Fee
Area	$10,000 (and not subject to any other annual registration fee in Tables 3.1 and 3.2)	N/A
Class I	No Annual Registration Fee	$0.002/gallon. Minimum Fee: $10,000/year Maximum Fee: $25,000/year
Class II	See Table 3.2	N/A
Class III	See Table 3.2	N/A
Class V "Individual"	See Table 3.2	N/A
Class VI	No Annual Registration Fee	$0.08/ton Minimum Fee: $10,000/year

Historical Note

Table 3.1 made by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3).

Table 3.2. UIC Annual Registration Fees

Design Injection Flow Rate in Gallons per day[1, 2]	Annual Registration Fee
3,000 to 9,999	$600
10,000 to 99,999	$1,200
100,000 to 999,999	$3,000
1,000,000 to 9,999,999	$7,000
10,000,000 or more	$10,000

[1] A Class II, III or V Individual UIC permittee with multiple wells or multiple permits may consolidate their same-class wells for the purpose of "design injection flow rate in gallons per day" under Table 3.2.
[2] An Area permit is not subject to Table 3.2.

Historical Note

Table 3.2 made by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3).

Schedule A. Repealed

Historical Note

Schedule A adopted effective November 15, 1996 (Supp. 96-4). Schedule repealed by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

Schedule B. Repealed

Historical Note

Schedule B adopted effective November 15, 1996 (Supp. 96-4). Schedule repealed by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

Schedule C. Repealed

Historical Note

Schedule C adopted effective November 15, 1996 (Supp. 96-4). Schedule repealed by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

Schedule D. Repealed

Historical Note

Schedule D adopted effective November 15, 1996 (Supp. 96-4). Schedule repealed by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

R18-14-105. Fee Assessment and Collection

A. Billing. The Department shall bill an applicant for water quality protection services subject to an hourly rate no more than monthly, but at least quarterly. The following information shall be included in each bill:

1. The dates of the billing period;
2. The date and number of review hours itemized by employee name, position type and specifically describing:
   a. Each water quality protection service performed,
   b. Each facility involved and program component, and
   c. The hourly rate for each water quality protection service performed;
3. A description and amount of each review-related cost incurred for the project;
4. The total fees due for the billing period, and the date when the fees are due, which shall be at least 35 days after the date on the bill. The total fees paid to date and the maximum fee for the project shall be provided upon request.

B. Final bill. After the Department makes a final determination whether to grant or deny a request for water quality protection services subject to an hourly rate fee, or when an applicant withdraws or closes the request, the Department shall prepare a final itemized bill of its review.

1. Fees for water quality protection services shall be paid in U.S. dollars by cash, check, cashier's check, money order, or any other method acceptable to the Department.
2. The Department shall not release the final permit or approval until the final itemized bill is paid in full.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R.

1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-106. Reconsideration of a Bill; Appeal Process

A. A person may seek review of a bill by filing a written request for reconsideration with the Director.
1. The request shall specify, in detail, why the bill is in dispute and shall include any supporting documentation.
2. The written request for reconsideration shall be delivered to the Director in person, by mail, or by facsimile on or before the payment due date or within 35 days of the invoice print date, whichever is greater.

B. The Director shall make a final decision on the request for reconsideration of the bill and mail a final written decision to the person within 20 working days after the date the Director receives the written request.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

R18-14-107. Effect on County Fees

Nothing in this Chapter affects the authority of county or other local governments to charge fees for implementing delegated Department water quality protection programs in accordance with statutory authority.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1).

R18-14-108. APP Water Quality Protection Services Flat Fees

A. The Department shall assess a flat fee for an APP water quality protection service listed in this Section.

B. Type 1 General Permits. No fee is required, except as stated in A.A.C. R18-9-A304(A)(2).

C. Fees for Type 2 and Type 3 General Permits and related water quality protection services are listed in Table 4, adjusted annually under subsection (E). For purposes of this Section, "complex" is defined in A.A.C. R18-1-501(9). "Standard" means any permit that does not meet the definition of complex.

D. Fees for Type 4 General Permits and related water quality protection services are listed in Table 5, adjusted annually under subsection (E).

E. The Director shall adjust the APP water quality protection services flat fees listed in subsections (C) and (D) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the APP water quality protection services flat fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note

Adopted effective November 15, 1996 (Supp. 96-4). Section repealed by final rulemaking at 7 A.A.R. 564, effective January 2, 2001 (Supp. 01-1). New Section made by exempt rulemaking at 16 A.A.R. 851, effective July 1, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1505, effective July 1, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Tables 4 and 5 removed from this Section to conform with the A.A.C. codification scheme; amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 4. Type 2 and 3 General Permit Fees

Permit Description	Permit Fee	Renewal Fee
Standard Type 2: 2.01, 2.03, 2.04, 2.05, and 2.06	$2,141	$714
Complex Type 2: 2.02	$4,281	$1,427
Standard Type 3: 3.02, 3.03, 3.05, 3.06, and 3.07	$6,422	$2,141
Complex Type 3: 3.01 and 3.04	$10,703	$3,568
Amendment to Notice of Intent	Same as applicable renewal fee	N/A
Transfer of permit authorization	$71	N/A
If a site contains more than one facility covered by the same Type 2 or Type 3 General Permit and each facility is substantially similar in design, construction, and operation, the first facility is paid at the full applicable fee, and each additional facility is:	Half the applicable fee	Half the applicable fee

Historical Note

Table 4 made when R18-14-108 was amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 in Supp. 11-2. Table 4 was removed from R18-14-108 in Supp. 23-3 to conform with the A.A.C. codification scheme; Table 4 amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 5. Type 4 General Permit Fees

Water Quality Protection Service	Description	Permit Fee

4.01 General Permit: Sewage Collection Systems	Under each Notice of Intent to Discharge, the fee is assessed on a per-component basis for the components listed below and is assessed cumulatively up to the maximum fee:	
	▪ Maximum fee	$35,675
	▪ Force mains with design flow less than or equal to 10,000 gpd	$1,427
	▪ Each additional increment of 50,000 gpd or less of force mains	$1,427
	▪ Gravity sewer with design flow less than or equal to 10,000 gpd	$1,427
	▪ Each additional increment of 50,000 gpd or less of gravity sewer	$1,427
	▪ Each sewer lift station	$1,427
	▪ Each depressed sewer	$1,427
	▪ Realignment of existing sewer for a contiguous project that is less than 300 linear feet with no change in design flow or pipe size	$714
4.01 General Permit courtesy review	If an applicant requests courtesy review, the Department shall approve or deny the request. When determining whether to approve a courtesy review request, the Department shall consider the complexity of the project and the Department's current work load	One-third applicable fee upon submittal, then balance of fee if Notice of Intent to Discharge is submitted with final documentation within 180 days of first submittal
4.23 General Permit: 3,000 to less than 24,000 Gallons per day Design Flow	▪ Onsite wastewater treatment facility with up to: • Three treatment technologies and disposal methods consisting of technologies or designs that are covered under other Type 4 general permits; and • Two onsite wastewater treatment facilities	$5,137
	▪ Maximum fee (cumulative)	$10,703
	▪ Each additional onsite wastewater treatment facility on same Notice of Intent to Discharge up to maximum fee	$1,712
	▪ Each additional treatment technology or disposal method consisting of technologies or designs that are covered under other Type 4 general permits on same Notice of Intent to Discharge up to maximum fee	$714
4.23 General Permit annual report	Annual report required under A.A.C. R18-9-E323(G)	$285
Type 4 General Permits (4.02 through 4.22)	▪ Maximum fee	$5,280
	▪ First Type 4 general permit	$1,712
	▪ Each additional Type 4 general permit on same Notice of Intent to Discharge	$714
Alternative Design under A.A.C. R18-9-A312(G)	A request for an alternative design, installation, or operational feature, per alternative design:	
	▪ Type 4.01 general permit	$1,070
	▪ All other Type 4 general permits	$357
Interceptor under A.A.C. R18-9-A315	A design requiring an interceptor (per interceptor)	$143
Transfer	Transfer of discharge authorization	$71
Priority Review	If an applicant requests priority review, the Department shall approve or deny the request. When determining whether to approve a priority review request, the Department shall consider the complexity of the project and the Department's current work load.	Double the Applicable Fee (including any applicable maximum fee)

Historical Note

Table 5 made when R18-14-108 was amended by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 in Supp. 11-2. Table 5 was removed from R18-14-108 in Supp. 23-3 to conform with the A.A.C. codification scheme; Table 5 amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-109. AZPDES Water Quality Protection Services Flat Fees

A. The Department shall assess a flat fee for an AZPDES water quality protection service, as described in Table 6, adjusted annually under subsection (D).

B. In addition to the requirements in A.A.C. R18-9-A907(B), a draft permit will state the category and fee assigned to the permit and the factors for establishing the fee, according to Table 6. Any person may comment on the fee category assignment as part of the public comment period described in A.A.C. R18-9-A908.

C. Annual Fee. The Department shall bill an annual fee, as described in Table 6, adjusted annually under subsection (D), to permittees who have not filed a notice of termination for an applicable general permit.

D. The Director shall adjust the AZPDES water quality protection services flat fees listed in subsections (C) and (D) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the AZPDES water quality protection services flat fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note
New Section made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Table 6 removed from this Section to conform with the A.A.C. codification scheme; amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 6. AZPDES Water Quality Protection Services Flat Fees

Category	Factors for Establishing Fees		Initial Fee	Annual Fee
Municipal Separate Storm Sewer System General Permit	The fee is based on the population of the permitted area:			
	▪ Less than or equal to 10,000		$3,568	$3,568
	▪ Greater than 10,000 but less than or equal to 100,000		$7,135	$7,135
	▪ Greater than 100,000		$10,703	$10,703
	The fee for a non-traditional municipal separate storm sewer system, such as a hospital, college or military facility		$7,135	$7,135
Construction General Permit	The fee is based on the amount of acreage identified in the Notice of Intent:			
	▪ Less than or equal to 1 acre		$357	$357
	▪ Greater than 1 acre but less than or equal to 50 acres		$499	$499
	▪ Greater than 50 acres		$714	$714
	Pollution prevention plan review		$1,427	N/A
	▪ Each additional submittal due to deficiency		$714	N/A
	Waiver		$1,070	N/A
	If more than one person must apply for general permit coverage of the same facility or discharge activity, each person pays:		Fee applicable to the amount of acreage each person controls	Fee applicable to the amount of acreage each person controls
Multi-Sector General Permit	The fee is based on the amount of acreage identified in the Notice of Intent:			
	▪ Less than or equal to 1 acre		$499	$499
	▪ Greater than 1 acre but less than or equal to 40 acres		$714	$714
	▪ Greater than 40 acres		$1,427	$1,427
	Pollution prevention plan review		$1,427	N/A
	▪ Each additional submittal due to deficiency		$714	N/A
	Certificate of No Exposure		$1,784	N/A
	If more than one person must apply for general permit coverage of the same facility or discharge activity, each person pays:		Fee applicable to the amount of acreage each person controls	Fee applicable to the amount of acreage each person controls
General Permits for Non-Stormwater Discharges	The fee is based on the Department's total anticipated staff hours (including permit development, customer service, review of the notice of intent, and annual data review and inspections) divided by the total number of potential permittees over a five-year period:			
	▪ Level 1A		$357	$357
	• Staff hours:	1,500		
	• Number of potential permittees:	750		
	▪ Level 1B		$714	$714
	• Staff hours:	1,500		
	• Number of potential permittees:	375		
	▪ Level 2		$1,784	$1,784
	• Staff hours:	1,000		
	• Number of potential permittees:	100		
	▪ Level 3		$2,141	$2,141
	• Staff hours:	1,300		
	• Number of potential permittees:	100		
	▪ Level 4A		$2,854	$2,854
	• Staff hours:	1,600		
	• Number of potential permittees:	100		
	▪ Level 4B		$3,568	$3,568
	• Staff hours:	1,900		
	• Number of potential permittees:	100		
	Pollution prevention plan review		$1,427	N/A
	▪ Each additional submittal due to deficiency		$714	N/A
Emergency Discharge General Permit	Authorization for emergency discharge		$14,270	N/A
Transfer	Authorization for permit transfer as allowed under A.A.C. R18-9-B905		$71	N/A

Biosolids Land Applicators	Initial registration	$714	N/A
	Registration amendment	$357	N/A
	Annual report based on amount of dry metric tons applied		
	▪ Less than or equal to 7,500 dry metric tons	N/A	$3,568
	▪ Greater than 7,500 dry metric tons but less than or equal to 15,000 dry metric tons	N/A	$4,281
	▪ Greater than 15,000 dry metric tons	N/A	$6,422

Historical Note

Table 6 made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Table 6 was removed from R18-14-109 in Supp. 23-3 to conform with the A.A.C. codification scheme; Table 6 amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-110. Reclaimed Water Flat Fees

A. The Department shall assess a flat fee for a reclaimed water quality protection service as listed in Table 7, adjusted annually under subsection (B). For purposes of this Section, "complex" is defined in A.A.C. R18-1-501(9). "Standard" means any permit that does not meet the definition of complex.

B. The Director shall adjust the reclaimed water quality protection services flat fees listed in subsections (A) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the reclaimed water quality protection services flat fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 7. Reclaimed Water General Permit Fees

Permit Description	Permit Fee	Renewal Fee
Standard Type 2: Class A, A+, B, and B+	$856	$642
Complex Type 2: Class C	$1,070	$821
Standard Type 3: Reclaimed Water Agent, Reclaimed Water Blending Facility	$2,141	$1,784
Complex Type 3: Gray Water	$2,854	$2,141
Amendment to Notice of Intent	Same as applicable renewal fee	N/A
Transfer of permit authorization	$71	N/A

Historical Note

New Table 7 made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-111. UIC Flat Fees

A. The Department shall assess a flat fee for the following UIC regulated facility services, adjusted annually under subsection (B):

1. Well installation in an Area Permit, $200 per well installation.
2. Class V authorization by rule, $200 per well inventory.
3. Class V authorization by rule, $100 per well transfer.

B. The Director shall adjust the UIC regulated facility services flat fees listed in subsections (A) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the UIC regulated facility services flat fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Section R18-14-111 renumbered to R18-14-112; new R18-14-111 made by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-112. Other Flat Fees

Flat fees. The Department shall assess a flat fee for the following water quality protection services:

1. Certificate of Approval for Sanitary Facilities for Subdivisions.
   a. Subdivision with public sewerage system: $1,142, adjusted annually under subsection (2), for every increment of 150 lots or less;
   b. Subdivision with individual sewerage system:
      i. $714, adjusted annually under subsection (2), for less than 10 lots;
      ii. $1,427, adjusted annually under subsection (2), for greater than 10 lots but less than 50 lots;
      iii. $1,427, adjusted annually under subsection (2), for each additional increment of 50 lots or less.
   c. If water from a central system is not provided to the lot, the fee is one and one-half the applicable fee stated in subsection (3)(a) or (b).
   d. Condominium subdivision: $1,427, adjusted annually under subsection (2), for every increment of 150 units or less.
2. The Director shall adjust the water quality protection services flat fees listed in subsections (1) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the water quality protection services flat fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Section R18-14-112 renumbered to R18-14-113; new R18-14-112 renumbered from R18-14-111 and amended by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-113. Implementation

The fees in this Article apply on July 1, 2011. For fees related to the AZPDES program:

1. A person shall submit the applicable fee when requesting a water quality protection service as specified in an AZPDES General Permit or in 18 A.A.C. 9, Article 9; and
2. A person is responsible for paying the annual fee for an AZPDES general permit, even if the person filed for coverage before the effective date of these rules.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 568, effective July 1, 2011 (Supp. 11-2). Section R18-14-113 renumbered to R18-14-114; new R18-14-113 renumbered from R18-14-112 by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3).

R18-14-114. Annual Report

By December 1 of each year, the Department shall publish an accounting of Water Quality Fee Fund revenue and expenditure activity for the prior fiscal year.

Historical Note

New Section R18-14-114 renumbered from R18-14-113 by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3).

R18-14-115. UIC Fees Review

The Department shall review the revenues derived from the implementation of the UIC program from the date of primacy through June 30, 2025. By September 30, 2025, the Department shall determine the adequacy of the fees in comparison to the relevant data from the time period. The Department shall repeat the review every three years based on the initial review date of June 30, 2025.

Historical Note

New Section R18-14-115 made by final rulemaking at 28 A.A.R. 1811 (July 29, 2022), effective September 6, 2022 (Supp. 22-3).

ARTICLE 2. PUBLIC WATER SYSTEM - DESIGN REVIEW FEES

R18-14-201. Definitions

In addition to the definitions in A.A.C. R18-1-501, and 18 A.A.C. 4, the following terms apply to this Article:

"Design review" means the process for reviewing an application for an Approval to Construct as prescribed in A.A.C. R18-5-505(B).

"Design review service" means all activities related to processing an application for an Approval to Construct, including reviewing, approving, or denying an application, conducting a pre-application meeting or site visit, or other activity required to review an Approval to Construct application.

"Distribution system" has the same meaning prescribed in A.A.C. R18-5-101.

"Priority Review" means a design review service where a license application is reviewed using not more than 50% of the total review time-frame for an Approval to Construct license application.

"Public water system" has the same meaning prescribed in A.R.S. § 49-352(B).

"Licensing time-frame" means a period of time described and defined in A.R.S. Title 41, Chapter 6, Article 7.1, and 18 A.A.C. 1, Article 5.

"Water treatment plant" has the same meaning prescribed in A.A.C. R18-5-101.

Historical Note

Section made by final rulemaking at 14 A.A.R. 4102, effective December 6, 2008 (Supp. 08-4).

R18-14-202. Flat Rate Fees

A. The Department shall assess and collect a flat rate fee for design review services for public water systems.

B. Design criteria for public water systems are specified in 18 A.A.C. 4 and 18 A.A.C. 5.

C. An applicant shall submit public water system design review fees with an application for an Approval to Construct, as specified in 18 A.A.C. 5, Article 5.

D. The flat rate fees for a design review service:
1. Are established in Table 1, adjusted annually under subsection (I), are assessed on a per-unit basis where applicable, and are cumulative unless otherwise specified in this Article;
2. Shall be paid by cash, check, cashier's check, money order, or any other method acceptable to the Department; and
3. Shall be paid in full before the Department issues approval of an application.

E. The Department shall refund 50 percent of the application fee paid by an applicant if, during the administrative completeness review time-frame period, the applicant:
1. Fails to respond in a reasonably timely manner, as set forth in A.A.C. R18-1-507, to a notice of administrative deficiencies requesting additional information under A.A.C. R18-1-503, and the Department denies the application; or
2. Withdraws the application.

F. If an application is denied under A.A.C. R18-1-507 after the end of the administrative completeness review time-frame, the Department shall retain the flat fee paid by the applicant.

G. If an applicant requests priority review, the Department shall approve or deny the request. When determining whether to approve a priority review request, the Department shall consider the complexity of the project and the Department's current work load. If priority review is approved by the Department, the applicant shall pay the priority review fee specified in Table 1, adjusted annually under subsection (I).

H. State agencies are exempt from all fees imposed under this Article pursuant to A.R.S. § 49-353(A)(2)(b).

I. The Director shall adjust the design review services fees listed in Table 1 every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the design review services fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note
Section made by final rulemaking at 14 A.A.R. 4102, effective December 6, 2008 (Supp. 08-4). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

Table 1. Design Review Service Fees

Public Water System Design Review Application Types	Fees[1, 2]
Approval to Construct Public Water Supply Distribution System:	
• 150 or fewer service connections	$1,284
• 151 to 300 service connections	$1,998
• 301 to 450 service connections	$2,711
• 451 to 600 service connections	$3,425
• 601 to 750 service connections	$4,138
• Each additional 150 service connections	Add $714
Water Treatment Plants and Blending Plans (including new source approval if applicable):	
• < 0.1 mgd	$2,141
• ≥ 0.1 mgd and < 1 mgd	$2,854
• ≥ 1 mgd and < 5 mgd	$4,281
• ≥ 5 mgd	$7,135
Well (including new source approval if applicable)	$1,784
Storage Tank	$1,142
Booster Pump	$1,142
Main Line Extension	$357
Chlorinators/Disinfection Devices	$357
Extension of Time to Construct[3]	50% of the application fee, not to exceed $714
Priority Review Fee[4]	Double the Standard Fee

[1]Fees are calculated on a per-unit basis; i.e., a separate fee is assessed for each separate storage tank, booster pump, disinfection device, or main line extension.
[2]Fees for each application type are cumulative; an applicant must pay the total of all pertinent fees.
[3]Extensions of time to construct are issued pursuant to A.A.C. R18-5-505(E); the Section states that an Approval to Construct becomes void if construction is not commenced or completed within a specified time period, unless the Department grants an extension of time.
[4]Priority Review Projects require Department authorization prior to filing.

Historical Note
Table 1, Design Review Service Fees, made by final rulemaking at 14 A.A.R. 4102, effective December 6, 2008 (Supp. 08-4). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

ARTICLE 3. CERTIFIED OPERATOR FEES

R18-14-301. Certified Operator Fees

A. Definition terms from A.A.C. R18-5-101 apply to this Article.

B. The Department shall assess and collect a flat rate fee for a certification or renewal under the operator certification program.

C. A person shall submit the applicable fee when requesting a certification or renewal under 18 A.A.C. 5, Article 1, as described below:

1. An applicant that seeks new certification shall submit a $87 fee, adjusted annually under subsection (D), per certification.
2. An operator that has not held a lower grade level for the required amount of time requests the Department's determination on experience and education in order to be admitted to a higher grade certification examination shall submit a fee of $201, adjusted annually under subsection (D), per application.
3. An applicant that requests a certificate based on reciprocity with another jurisdiction shall submit a fee of $334, adjusted annually under subsection (D), per application.
4. An operator submitting a certificate renewal shall submit a $201, adjusted annually under subsection (D), fee for each certificate. If the operator has multiple certificates, the first certificate is $201, adjusted annually under subsection (D), and each additional certificate with the same expiration date is $67, adjusted annually under subsection (D).

D. The Director shall adjust the certification or renewal fees listed in subsection (C) every August 1, to the nearest $10, beginning August 4, 2023, by multiplying the certification or renewal fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2023. The CPI for any year is the average of the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items published by the United States Department of Labor, as of the close of the 12-month period ending on June 30 of that year.

Historical Note
New Section made by final rulemaking at 21 A.A.R. 2597, effective July 1, 2016 (Supp. 15-4). Amended by final rulemaking at 29 A.A.R. 1869 (August 25, 2023), with an immediate effective date of August 4, 2023 (Supp. 23-3).

R18-14-302. Fee Assessment and Collection

A. Fees for certification or renewal shall be paid in U.S. dollars by cash, check, cashier's check, money order, or any other method acceptable to the Department.

B. The Department shall not accept a request for a certification or renewal without the appropriate fee.

C. If the Department does not accept an operator certificate renewal form, required according to A.A.C. R18-5-107(B), the certificate expires for failure to renew according to A.A.C. R18-5-108.

Historical Note

New Section made by final rulemaking at 21 A.A.R. 2597, effective July 1, 2016 (Supp. 15-4).

R18-14-303. Implementation

The fees in this Article apply to any application for a certification or renewal that is submitted on or after July 1, 2016.

Historical Note

New Section made by final rulemaking at 21 A.A.R. 2597, effective July 1, 2016 (Supp. 15-4).

49-211. Direct potable reuse of treated wastewater; fees; rules

A. On or before December 31, 2024, the director shall establish by rule permit fees sufficient to administer a direct potable reuse of treated wastewater program. Monies collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

B. On or before December 31, 2024, the director shall adopt all rules necessary to establish and implement a direct potable reuse of treated wastewater program, including rules establishing permitting standards and a permit application process.

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.

2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.

3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.

4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.

5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.

6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.

7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.

8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.

9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.

10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.

11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.

12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.

13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.

14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.

2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.

3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:

(a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.

(b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.

(c) Maintenance but not construction of drainage ditches.

(d) Construction and maintenance of irrigation ditches.

(e) Maintenance of structures such as dams, dikes and levees.

4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.

5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.

6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.

7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.

8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.

9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.

10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.

11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.

12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.

13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.

2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

E-1.

ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM
Title 9, Chapter 28, Article 11

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 10, 2025

SUBJECT: **ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM**
Title 9, Chapter 28, Article 11

Summary

This Five-Year Review Report (5YRR) from the Arizona Health Care Cost Containment System (AHCCCS) relates to six (6) rules in Title 9, Chapter 28, Article 11 regarding Behavioral Health Services or the Arizona Long-Term Care System (ALTCS).

In the prior 5YRR for these rules, which was approved by the Council in January 2020, AHCCCS did not propose to take any action.

Proposed Action

In the current report, AHCCCS proposes to amend rule R9-28-1106(A) to to make it more consistent with other rules and statutes by removing references to "ADHS/DBHS" as Division of Behavioral Health Services (DBHS) is no longer at Arizona Department of Health Services (DHS). AHCCCS indicates it has requested an exemption from the rulemaking moratorium from the Governor's Office to begin a rulemaking immediately following the Council's approval of this report in order to make this change. AHCCCS anticipated submitting this rulemaking to Council in December 2024.

1. Has the agency analyzed whether the rules are authorized by statute?

AHCCCS cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

AHCCCS indicates the economic, small business, and consumer impact of the Chapter is as it was anticipated in the last 5YRR. There were no proposed changes in the last Five-Year Review. The changes suggested in this 5YRR are merely clarifying, therefore, AHCCCS does not anticipate any economic, small business or consumer financial impact anticipated beyond the existing cost of the agency operations.

Stakeholders include AHCCCS, its members, entities that provide behavioral health services, the ALTCS Contractor, and Tribal Contractor.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

AHCCCS indicates the rules impose the least burden and cost to achieve the benefits the rules provide to regulated persons.

4. Has the agency received any written criticisms of the rules over the last five years?

AHCCCS indicates it has not received any written criticism of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

AHCCCS indicates the rules are clear, concise, and understandable.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

AHCCCS indicates the rules are generally consistent with other rules and statutes except for the following:

- **R9-28-1106(A):** Reference to "ADHS/DBHS" should be removed as Division of Behavioral Health Services (DBHS) is no longer at Arizona Department of Health Services (DHS).

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

AHCCCS indicates the rules are effective in achieving their objectives.

8. Has the agency analyzed the current enforcement status of the rules?

AHCCCS indicate the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

AHCCCS indicates that the rules are not more stringent than 31 U.S.C. 3729-3733.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Not applicable. AHCCCS indicates the rules do not require the issuance of a license, permit, or agency authorization.

11. Conclusion

This 5YRR from AHCCCS relates to six (6) rules in Title 9, Chapter 28, Article 11 regarding Behavioral Health Services or the Arizona Long-Term Care System (ALTCS). AHCCCS indicates the rules are clear, concise, understandable, effective, and enforced as written. AHCCCS proposes to amend rule R9-28-1106(A) to to make it more consistent with other rules and statutes by removing references to "ADHS/DBHS" as Division of Behavioral Health Services (DBHS) is no longer at Arizona Department of Health Services (DHS). AHCCCS indicates it has requested an exemption from the rulemaking moratorium from the Governor's Office to begin a rulemaking immediately following the Council's approval of this report in order to make this change. AHCCCS anticipated submitting this rulemaking to Council in December 2024.

Council staff recommends approval of this report.

Jessica Klein, Chair
Governor's Regulatory Review Council
100 North 15th Avenue, Suite 302
Phoenix, Arizona 85007

RE: AHCCCS Title 9, Chapter 28, Article 11;

Dear Ms. Klein

Please find enclosed AHCCCS's Five-Year Review Report for Title 9, Chapter 22, Article 11 due on September 30, 2024.

AHCCCS hereby certifies compliance with A.R.S. 41-1091.

For questions about this report, please contact Sladjana Kuzmanovic at 602-417-4232 or sladjana.kuzmanovic@azahcccs.gov.

Sincerely,

Nicole Fries
Chief Deputy General Counsel

Arizona Health Care Cost Containment System (AHCCCS)

5 YEAR REVIEW REPORT

A.A.C. Title 9, Chapter 28, Article 11

September 2024

1. **Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. §§ 36-2903.01, 36-2932

Specific Statutory Authority: A.R.S. §§ 36-2903.01, 36-2907

2. **The objective of each rule:**

Rule	Objective
R9-28-1101	This rule provides general requirements for behavioral health services.
R9-28-1102	This rule outlines the Arizona Long Term Care Services (ALTCS) Contractor and Tribal Contractor responsibilities.
R9-28-1103	This rule provides the eligibility for covered services by Arizona Health Care Cost Containment System (AHCCCS).
R9-28-1104	This rule explains the general service requirements of behavioral health services.
R9-28-1105	This rule outlines the scope of behavioral health services offered by Arizona Health Care Cost Containment System (AHCCCS).
R9-28-1106	This rule provides the standards for service providers.

3. **Are the rules effective in achieving their objectives?** **Yes __X_** **No _ _**

4. **Are the rules consistent with other rules and statutes?** **Yes ___** **No _X_**

R9-28-1106(A)	Reference to "ADHS/DBHS" should be removed as Division of Behavioral Health Services (DBHS) is no longer at Arizona Department of Health Services (ADHS).

5. **Are the rules enforced as written?** **Yes _X__** **No ___**

6. **Are the rules clear, concise, and understandable?** **Yes _X_** **No ___**

7. **Has the agency received written criticisms of the rules within the last five years?** **Yes ___** **No _X_**

8. **Economic, small business, and consumer impact comparison:**

The economic, small business, and consumer impact of this chapter is as it was anticipated in the last Five-Year Review Report. There were no proposed changes in the last Five-Year Review. The changes suggested in this Five-Year Review Report are merely clarifying, therefore, the Administration does not anticipate any economic, small business or consumer financial impact anticipated beyond the existing cost of the agency operations.

9. **Has the agency received any business competitiveness analyses of the rules?** **Yes __** **No X_**

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

The prior Five-Year Review Report did not find any need to revise the rules, therefore there was no proposed course of action.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

The changes that are proposed in this Five-Year Review Report are meant for clarifying purposes and do not impose any additional burdens or costs to regulated persons. Furthermore, they impost the least burden and cost to achieve the same benefits as the Article currently provides to regulated persons.

12. Are the rules more stringent than corresponding federal laws? Yes ___ No _X_

The rules are not more stringent than 31 U.S.C. 3729-3733.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

These rules do not require an issuance of a regulatory permit, license, or agency authorization, therefore, compliance with the general permit requirements of A.R.S. 41-1037 or explanation why the agency believes an exception applies is not applicable.

14. Proposed course of action

The Administration has requested an exemption from the rulemaking moratorium from the Governor's Office to begin a rulemaking immediately following GRRC's approval of this report in order to make the changes outlined above and update the rules in Article 11. The Administration anticipates submitting this rulemaking to Council in December 2024.

life style according to applicable Tribal law or custom; and

5. Income left as a remainder in an estate derived from any property listed in subsection (E)(1) through (4), that was either collected by a NA, or by a Tribe or Tribal organization and distributed to a NA.

Historical Note
New Section made by final rulemaking at 10 A.A.R. 1308, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Amended by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-912. Partial Recovery
AHCCCS shall use the following factors in determining whether to seek a partial recovery of funds when an heir or devisee does not meet the requirements of R9-28-911 and requests a partial recovery:

1. Financial and medical hardship to the heir or devisee;
2. Income of the heir or devisee and whether the heir or devisee's household gross annual income is less than 100 percent of the FPL;
3. Resources of the heir or devisee;
4. Value and type of assets;
5. Amount of AHCCCS' claim against the estate; and
6. Whether other creditors have filed claims against the estate or have foreclosed on the property.

Historical Note
New Section made by final rulemaking at 10 A.A.R. 1308, effective May 1, 2004 (Supp. 04-1).

R9-28-913. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-914. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-915. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-916. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-917. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-918. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

R9-28-919. Repealed

Historical Note
New Section made by final rulemaking at 10 A.A.R. 3013, effective September 11, 2004 (Supp. 04-3). Repealed by final rulemaking at 14 A.A.R. 3791, effective November 8, 2008 (Supp. 08-3).

ARTICLE 10. CIVIL MONETARY PENALTIES AND ASSESSMENTS

R9-28-1001. Basis for Civil Monetary Penalties and Assessments for Fraudulent Claims
AHCCCS shall use the provisions in 9 A.A.C. 22, Article 11 for the determination and collection of penalties and assessments.

Historical Note
Adopted effective October 1, 1988, filed September 1, 1988 (Supp. 88-3). Amended effective June 6, 1989 (Supp. 89-2). Amended effective June 9, 1998 (Supp. 98-2). Amended by final rulemaking at 10 A.A.R. 3065, effective September 11, 2004 (Supp. 04-3). Amended by final expedited rulemaking at 30 A.A.R. 928 (May 10, 2024), with an immediate effective date of April 25, 2024 (Supp. 24-2).

R9-28-1002. Repealed

Historical Note
Adopted effective October 1, 1988, filed September 1, 1988 (Supp. 88-3). Amended effective November 5, 1993 (Supp. 93-4). Repealed effective June 9, 1998 (Supp. 98-2).

R9-28-1003. Repealed

Historical Note
Adopted effective October 1, 1988, filed September 1, 1988 (Supp. 88-3). Amended effective November 5, 1993 (Supp. 93-4). Repealed effective June 9, 1998 (Supp. 98-2).

R9-28-1004. Repealed

Historical Note
Adopted effective October 1, 1988, filed September 1, 1988 (Supp. 88-3). Repealed effective June 9, 1998 (Supp. 98-2).

ARTICLE 11. BEHAVIORAL HEALTH SERVICES

R9-28-1101. General Requirements
General requirements. The following general requirements apply to behavioral health services provided under this Article, and Chapter 22 subject to all exclusions and limitations.

1. Definitions. The definitions in A.A.C. R9-22-1201 and R9-22-101 apply to this Article, in addition to the following definitions:
   "Case manager" means an individual responsible for coordinating the physical health services or behav-

ioral health services provided to a patient at the health care institution.

"Contractor" means an ALTCS contractor or as previously known as program contractor.

"Cost avoid" means the same as in A.A.C. R9-22-1201.

"Intergovernmental agreement" or "IGA" means an agreement for services or joint or cooperative action between the Administration and a tribal contractor.

"Qualified behavioral health service provider" means a behavioral health service provider that meets the requirements of R9-28-1106.

"Tribal contractor" means a tribal organization (The Tribe) or urban Indian organization defined in 25 U.S.C. 1603 and recognized by CMS as meeting the requirements of 42 U.S.C. 1396d(b), that provides or is accountable for providing the services or delivering the items described in the intergovernmental agreement.

2. Case management. A tribal contractor shall provide case management services to FFS American Indian members living on or off-reservation as delineated in the IGA.
3. Reimbursement. For FFS American Indians, the Administration is exclusively responsible for providing reimbursement for covered behavioral health services that are authorized by a tribal contractor or the Administration under the intergovernmental agreement as specified in this Article. A contractor is exclusively responsible for providing reimbursement for covered behavioral health services that are authorized by a contractor as specified in this Article.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4691, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1102. ALTCS Contractor or Tribal Contractor Responsibilities

A. ALTCS contractor. A contractor shall arrange for behavioral health services to all enrolled members, including American Indian members who are not enrolled with a tribal contractor.

B. Tribal contractor. A tribal contractor shall provide behavioral health services to an American Indian member who is enrolled with a tribal contractor as prescribed in R9-28-1101. When a tribal contractor determines that an EPD American Indian member residing on a reservation needs behavioral health services under R9-28-415, the member shall receive services as authorized by the Administration or a tribal contractor under A.A.C. R9-22-1205 from any AHCCCS-registered provider.

C. A program or tribal contractor shall cooperate when a transition of care occurs and ensure that medical records are transferred in accordance with A.R.S. §§ 36-2932, 36-509, and R9-28-514 when a member transitions from:

1. A behavioral health provider to another behavioral health provider,
2. A RBHA or TRBHA to a contractor,
3. A contractor or tribal contractor to a RBHA or TRBHA, or
4. A contractor to a tribal contractor or vice versa.

D. The Administration, a tribal contractor, or a contractor, as appropriate, shall authorize medical necessary behavioral health services for American Indian members.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective July 1, 1993 (Supp. 93-3). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1995, Ch. 204, § 11, effective October 1, 1995; filed with the Office of the Secretary of State September 29, 1995 (Supp. 95-4). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1103. Eligibility for Covered Services

A. Eligibility for covered services. A member determined eligible under A.R.S. § 36-2934 shall receive medically necessary covered services specified under Chapter 22, Article 2 and 12.

B. Behavioral health services are covered as specified in Chapter 22, Article 2 and 12.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective July 1, 1993 (Supp. 93-3). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1995, Ch. 204, § 11, effective October 1, 1995; filed with the Office of the Secretary of State September 29, 1995 (Supp. 95-4). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4691, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1104. General Service Requirements

A. Services. Behavioral health services include both mental health and substance abuse services and are subject to the provisions under Chapter 22, Article 2 and 12.

B. Enrollment of American Indian member. The Administration shall enroll an EPD American Indian member with a tribal contractor on a FFS basis if:

1. The member lives on-reservation of an American Indian tribal organization that is an ALTCS tribal contractor, or
2. The member lived on-reservation of an American Indian tribal organization that is an ALTCS tribal contractor

immediately before placement in an off-reservation Nursing Facility or an alternative HCBS setting.

C. Services. A tribal contractor or the Administration may authorize behavioral health services for FFS American Indian members enrolled with a tribal contractor as delineated in the intergovernmental agreement.

D. Enrollment of American Indian members off-reservation. Except as provided in R9-28-1104(B)(2), an EPD American Indian who resides off-reservation shall be enrolled with an ALTCS contractor to receive behavioral health services, including case management, under R9-28-415.

E. Enrollment of developmentally disabled American Indian member. A developmentally disabled American Indian member who resides on or off-reservation shall be enrolled with the Department of Economic Security's Division of Developmental Disabilities under R9-28-414 and shall receive behavioral health services from the Department of Economic Security's Division of Developmental Disabilities.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective July 1, 1993; amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective September 30, 1993 (Supp. 93-3). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1995, Ch. 204, § 11, effective October 1, 1995; filed with the Secretary of State September 29, 1995 (Supp. 95-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1995, Ch. 204, § 11, effective January 1, 1996; filed with the Office of the Secretary of State December 22, 1995 (Supp. 95-4). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4691, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1105. Scope of Behavioral Health Services

Scope of Services. The provisions of A.A.C. R9-22-1205 are the scope of behavioral health services for a member under this Article.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective July 1, 1993 (Supp. 93-3). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1995, Ch. 204, § 11, effective October 1, 1995; filed with the Office of the Secretary of State September 29, 1995 (Supp. 95-4). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4691, effective October 1, 2001 (Supp. 01-3). Amended by exempt rulemaking at 8 A.A.R. 933, effective February 12, 2002 (Supp. 02-1). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1106. Standards for Service Providers

A. Applicability. The provisions of A.A.C. R9-22-1206 are the general provisions and standards for service providers. References in A.A.C. R9-22-1206 to ADHS/DBHS or to a RBHA apply to a contractor.

B. The Administration or a contractor shall cost avoid any behavioral health service claims if the Administration or the contractor establishes the probable existence of first-party liability or third-party liability.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective November 1, 1992; received in the Office of the Secretary of State November 25, 1992 (Supp. 92-4). Amended under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1992, Ch. 301, § 61, effective July 1, 1993 (Supp. 93-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4691, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1107. Repealed

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1). Repealed by final rulemaking at 20 A.A.R. 3122, effective January 4, 2015 (Supp. 14-4).

R9-28-1108. Repealed

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 200, effective December 13, 1999 (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 3365, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 13 A.A.R. 1090, effective May 5, 2007 (Supp. 07-1).

ARTICLE 12. REPEALED

Article 12, consisting of Section R9-28-1201, repealed by final rulemaking at 10 A.A.R. 820, effective April 3, 2004. The subject matter of Article 12 is now in 9 A.A.C. 34 (Supp. 04-1).

R9-28-1201. Repealed

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 6 A.A.R. 3365, effective August 7, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 820, effective April 3, 2004 (Supp. 04-1).

ARTICLE 13. FREEDOM TO WORK

Article 13, consisting of Sections R9-28-1301 through R9-28-1324, made by exempt rulemaking at 9 A.A.R. 99, effective January 1, 2003 (Supp. 02-4).

R9-28-1301. General Freedom to Work Requirements

36-2903.01. Additional powers and duties; report; definition

A. The director of the Arizona health care cost containment system administration may adopt rules that provide that the system may withhold or forfeit payments to be made to a noncontracting provider by the system if the noncontracting provider fails to comply with this article, the provider agreement or rules that are adopted pursuant to this article and that relate to the specific services rendered for which a claim for payment is made.

B. The director shall:

1. Prescribe uniform forms to be used by all contractors. The rules shall require a written and signed application by the applicant or an applicant's authorized representative, or, if the person is incompetent or incapacitated, a family member or a person acting responsibly for the applicant may obtain a signature or a reasonable facsimile and file the application as prescribed by the administration.

2. Enter into an interagency agreement with the department to establish a streamlined eligibility process to determine the eligibility of all persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). At the administration's option, the interagency agreement may allow the administration to determine the eligibility of certain persons, including those defined pursuant to section 36-2901, paragraph 6, subdivision (a).

3. Enter into an intergovernmental agreement with the department to:

(a) Establish an expedited eligibility and enrollment process for all persons who are hospitalized at the time of application.

(b) Establish performance measures and incentives for the department.

(c) Establish the process for management evaluation reviews that the administration shall perform to evaluate the eligibility determination functions performed by the department.

(d) Establish eligibility quality control reviews by the administration.

(e) Require the department to adopt rules, consistent with the rules adopted by the administration for a hearing process, that applicants or members may use for appeals of eligibility determinations or redeterminations.

(f) Establish the department's responsibility to place sufficient eligibility workers at federally qualified health centers to screen for eligibility and at hospital sites and level one trauma centers to ensure that persons seeking hospital services are screened on a timely basis for eligibility for the system, including a process to ensure that applications for the system can be accepted on a twenty-four hour basis, seven days a week.

(g) Withhold payments based on the allowable sanctions for errors in eligibility determinations or redeterminations or failure to meet performance measures required by the intergovernmental agreement.

(h) Recoup from the department all federal fiscal sanctions that result from the department's inaccurate eligibility determinations. The director may offset all or part of a sanction if the department submits a corrective action plan and a strategy to remedy the error.

4. By rule establish a procedure and time frames for the intake of grievances and requests for hearings, for the continuation of benefits and services during the appeal process and for a grievance process at the contractor level. Notwithstanding sections 41-1092.02, 41-1092.03 and 41-1092.05, the administration shall develop rules to establish the procedure and time frame for the informal resolution of grievances and appeals. A grievance that is not related to a claim for payment of system covered services shall be filed in writing with and received by the administration or the prepaid capitated provider or program contractor not later than sixty days after the date of the adverse action, decision or policy implementation being grieved. A grievance that is related to a claim for payment of system covered services must be filed in writing and received by the administration or the prepaid capitated provider or program contractor within twelve months after the date of service, within twelve months

after the date that eligibility is posted or within sixty days after the date of the denial of a timely claim submission, whichever is later. A grievance for the denial of a claim for reimbursement of services may contest the validity of any adverse action, decision, policy implementation or rule that related to or resulted in the full or partial denial of the claim. A policy implementation may be subject to a grievance procedure, but it may not be appealed for a hearing. The administration is not required to participate in a mandatory settlement conference if it is not a real party in interest. In any proceeding before the administration, including a grievance or hearing, persons may represent themselves or be represented by a duly authorized agent who is not charging a fee. A legal entity may be represented by an officer, partner or employee who is specifically authorized by the legal entity to represent it in the particular proceeding.

5. Apply for and accept federal funds available under title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)) in support of the system. The application made by the director pursuant to this paragraph shall be designed to qualify for federal funding primarily on a prepaid capitated basis. Such funds may be used only for the support of persons defined as eligible pursuant to title XIX of the social security act or the approved section 1115 waiver.

6. At least thirty days before the implementation of a policy or a change to an existing policy relating to reimbursement, provide notice to interested parties. Parties interested in receiving notification of policy changes shall submit a written request for notification to the administration.

7. In addition to the cost sharing requirements specified in subsection D, paragraph 4 of this section:

(a) Charge monthly premiums up to the maximum amount allowed by federal law to all populations of eligible persons who may be charged.

(b) Implement this paragraph to the extent permitted under the federal deficit reduction act of 2005 and other federal laws, subject to the approval of federal waiver authority and to the extent that any changes in the cost sharing requirements under this paragraph would permit this state to receive any enhanced federal matching rate.

C. The director is authorized to apply for any federal funds available for the support of programs to investigate and prosecute violations arising from the administration and operation of the system. Available state funds appropriated for the administration and operation of the system may be used as matching funds to secure federal funds pursuant to this subsection.

D. The director may adopt rules or procedures to do the following:

1. Authorize advance payments based on estimated liability to a contractor or a noncontracting provider after the contractor or noncontracting provider has submitted a claim for services and before the claim is ultimately resolved. The rules shall specify that any advance payment shall be conditioned on the execution before payment of a contract with the contractor or noncontracting provider that requires the administration to retain a specified percentage, which shall be at least twenty percent, of the claimed amount as security and that requires repayment to the administration if the administration makes any overpayment.

2. Defer liability, in whole or in part, of contractors for care provided to members who are hospitalized on the date of enrollment or under other circumstances. Payment shall be on a capped fee-for-service basis for services other than hospital services and at the rate established pursuant to subsection G of this section for hospital services or at the rate paid by the health plan, whichever is less.

3. Deputize, in writing, any qualified officer or employee in the administration to perform any act that the director by law is empowered to do or charged with the responsibility of doing, including the authority to issue final administrative decisions pursuant to section 41-1092.08.

4. Notwithstanding any other law, require persons eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 to be financially responsible for any cost sharing requirements established in a state plan or a section 1115 waiver and approved by the centers for medicare and

medicaid services. Cost sharing requirements may include copayments, coinsurance, deductibles, enrollment fees and monthly premiums for enrolled members, including households with children enrolled in the Arizona long-term care system.

E. The director shall adopt rules that further specify the medical care and hospital services that are covered by the system pursuant to section 36-2907.

F. In addition to the rules otherwise specified in this article, the director may adopt necessary rules pursuant to title 41, chapter 6 to carry out this article. Rules adopted by the director pursuant to this subsection shall consider the differences between rural and urban conditions on the delivery of hospitalization and medical care.

G. For inpatient hospital admissions and outpatient hospital services on and after March 1, 1993, the administration shall adopt rules for the reimbursement of hospitals according to the following procedures:

1. For inpatient hospital stays from March 1, 1993 through September 30, 2014, the administration shall use a prospective tiered per diem methodology, using hospital peer groups if analysis shows that cost differences can be attributed to independently definable features that hospitals within a peer group share. In peer grouping the administration may consider such factors as length of stay differences and labor market variations. If there are no cost differences, the administration shall implement a stop loss-stop gain or similar mechanism. Any stop loss-stop gain or similar mechanism shall ensure that the tiered per diem rates assigned to a hospital do not represent less than ninety percent of its 1990 base year costs or more than one hundred ten percent of its 1990 base year costs, adjusted by an audit factor, during the period of March 1, 1993 through September 30, 1994. The tiered per diem rates set for hospitals shall represent no less than eighty-seven and one-half percent or more than one hundred twelve and one-half percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1994 through September 30, 1995 and no less than eighty-five percent or more than one hundred fifteen percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1995 through September 30, 1996. For the periods after September 30, 1996 no stop loss-stop gain or similar mechanisms shall be in effect. An adjustment in the stop loss-stop gain percentage may be made to ensure that total payments do not increase as a result of this provision. If peer groups are used, the administration shall establish initial peer group designations for each hospital before implementation of the per diem system. The administration may also use a negotiated rate methodology. The tiered per diem methodology may include separate consideration for specialty hospitals that limit their provision of services to specific patient populations, such as rehabilitative patients or children. The initial per diem rates shall be based on hospital claims and encounter data for dates of service November 1, 1990 through October 31, 1991 and processed through May of 1992. The administration may also establish a separate reimbursement methodology for claims with extraordinarily high costs per day that exceed thresholds established by the administration.

2. For rates effective on October 1, 1994, and annually through September 30, 2011, the administration shall adjust tiered per diem payments for inpatient hospital care by the data resources incorporated market basket index for prospective payment system hospitals. For rates effective beginning on October 1, 1999, the administration shall adjust payments to reflect changes in length of stay for the maternity and nursery tiers.

3. Through June 30, 2004, for outpatient hospital services, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to the covered charges. Beginning on July 1, 2004 through June 30, 2005, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to covered charges. If the hospital increases its charges for outpatient services filed with the Arizona department of health services pursuant to chapter 4, article 3 of this title, by more than 4.7 percent for dates of service effective on or after July 1, 2004, the hospital specific cost-to-charge ratio will be reduced by the amount that it exceeds 4.7 percent. If charges exceed 4.7 percent, the effective date of the increased charges will be the effective date of the adjusted Arizona health care cost containment system cost-to-charge ratio. The administration shall develop the methodology for a capped fee-for-service schedule and a statewide cost-to-charge ratio. Any covered outpatient service not included in the capped fee-for-service schedule shall be reimbursed by applying the statewide cost-to-charge ratio that is based on the services not included in the capped fee-for-service schedule. Beginning on July 1, 2005, the administration shall reimburse clean claims with dates of service on or after July 1, 2005, based on the capped fee-for-service schedule or the statewide cost-to-charge

ratio established pursuant to this paragraph. The administration may make additional adjustments to the outpatient hospital rates established pursuant to this section based on other factors, including the number of beds in the hospital, specialty services available to patients and the geographic location of the hospital.

4. Except if submitted under an electronic claims submission system, a hospital bill is considered received for purposes of this paragraph on initial receipt of the legible, error-free claim form by the administration if the claim includes the following error-free documentation in legible form:

(a) An admission face sheet.

(b) An itemized statement.

(c) An admission history and physical.

(d) A discharge summary or an interim summary if the claim is split.

(e) An emergency record, if admission was through the emergency room.

(f) Operative reports, if applicable.

(g) A labor and delivery room report, if applicable.

Payment received by a hospital from the administration pursuant to this subsection or from a contractor either by contract or pursuant to section 36-2904, subsection I is considered payment by the administration or the contractor of the administration's or contractor's liability for the hospital bill. A hospital may collect any unpaid portion of its bill from other third-party payors or in situations covered by title 33, chapter 7, article 3.

5. For services rendered on and after October 1, 1997, the administration shall pay a hospital's rate established according to this section subject to the following:

(a) If the hospital's bill is paid within thirty days of the date the bill was received, the administration shall pay ninety-nine percent of the rate.

(b) If the hospital's bill is paid after thirty days but within sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate.

(c) If the hospital's bill is paid any time after sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate plus a fee of one percent per month for each month or portion of a month following the sixtieth day of receipt of the bill until the date of payment.

6. In developing the reimbursement methodology, if a review of the reports filed by a hospital pursuant to section 36-125.04 indicates that further investigation is considered necessary to verify the accuracy of the information in the reports, the administration may examine the hospital's records and accounts related to the reporting requirements of section 36-125.04. The administration shall bear the cost incurred in connection with this examination unless the administration finds that the records examined are significantly deficient or incorrect, in which case the administration may charge the cost of the investigation to the hospital examined.

7. Except for privileged medical information, the administration shall make available for public inspection the cost and charge data and the calculations used by the administration to determine payments under the tiered per diem system, provided that individual hospitals are not identified by name. The administration shall make the data and calculations available for public inspection during regular business hours and shall provide copies of the data and calculations to individuals requesting such copies within thirty days of receipt of a written request. The administration may charge a reasonable fee for the provision of the data or information.

8. The prospective tiered per diem payment methodology for inpatient hospital services shall include a mechanism for the prospective payment of inpatient hospital capital related costs. The capital payment shall

include hospital specific and statewide average amounts. For tiered per diem rates beginning on October 1, 1999, the capital related cost component is frozen at the blended rate of forty percent of the hospital specific capital cost and sixty percent of the statewide average capital cost in effect as of January 1, 1999 and as further adjusted by the calculation of tier rates for maternity and nursery as prescribed by law. Through September 30, 2011, the administration shall adjust the capital related cost component by the data resources incorporated market basket index for prospective payment system hospitals.

9. For graduate medical education programs:

(a) Beginning September 30, 1997, the administration shall establish a separate graduate medical education program to reimburse hospitals that had graduate medical education programs that were approved by the administration as of October 1, 1999. The administration shall separately account for monies for the graduate medical education program based on the total reimbursement for graduate medical education reimbursed to hospitals by the system in federal fiscal year 1995-1996 pursuant to the tiered per diem methodology specified in this section. The graduate medical education program reimbursement shall be adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Subject to legislative appropriation, on an annual basis, each qualified hospital shall receive a single payment from the graduate medical education program that is equal to the same percentage of graduate medical education reimbursement that was paid by the system in federal fiscal year 1995-1996. Any reimbursement for graduate medical education made by the administration shall not be subject to future settlements or appeals by the hospitals to the administration. The monies available under this subdivision shall not exceed the fiscal year 2005-2006 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement, except for monies distributed for expansions pursuant to subdivision (b) of this paragraph.

(b) The monies available for graduate medical education programs pursuant to this subdivision shall not exceed the fiscal year 2006-2007 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Graduate medical education programs eligible for such reimbursement are not precluded from receiving reimbursement for funding under subdivision (c) of this paragraph. Beginning July 1, 2006, the administration shall distribute any monies appropriated for graduate medical education above the amount prescribed in subdivision (a) of this paragraph in the following order or priority:

(i) For the direct costs to support the expansion of graduate medical education programs established before July 1, 2006 at hospitals that do not receive payments pursuant to subdivision (a) of this paragraph. These programs must be approved by the administration.

(ii) For the direct costs to support the expansion of graduate medical education programs established on or before October 1, 1999. These programs must be approved by the administration.

(c) The administration shall distribute to hospitals any monies appropriated for graduate medical education above the amount prescribed in subdivisions (a) and (b) of this paragraph for the following purposes:

(i) For the direct costs of graduate medical education programs established or expanded on or after July 1, 2006. These programs must be approved by the administration.

(ii) For a portion of additional indirect graduate medical education costs for programs that are located in a county with a population of less than five hundred thousand persons at the time the residency position was created or for a residency position that includes a rotation in a county with a population of less than five hundred thousand persons at the time the residency position was established. These programs must be approved by the administration.

(d) The administration shall develop, by rule, the formula by which the monies are distributed.

(e) Each graduate medical education program that receives funding pursuant to subdivision (b) or (c) of this paragraph shall identify and report to the administration the number of new residency positions created by the funding provided in this paragraph, including positions in rural areas. The program shall also report information related to the number of funded residency positions that resulted in physicians locating their practices in this state. The administration shall report to the joint legislative budget committee by February 1 of each year on the number of new residency positions as reported by the graduate medical education programs.

(f) Local, county and tribal governments and any university under the jurisdiction of the Arizona board of regents may provide monies in addition to any state general fund monies appropriated for graduate medical education in order to qualify for additional matching federal monies for providers, programs or positions in a specific locality and costs incurred pursuant to a specific contract between the administration and providers or other entities to provide graduate medical education services as an administrative activity. Payments by the administration pursuant to this subdivision may be limited to those providers designated by the funding entity and may be based on any methodology deemed appropriate by the administration, including replacing any payments that might otherwise have been paid pursuant to subdivision (a), (b) or (c) of this paragraph had sufficient state general fund monies or other monies been appropriated to fully fund those payments. These programs, positions, payment methodologies and administrative graduate medical education services must be approved by the administration and the centers for medicare and medicaid services. The administration shall report to the president of the senate, the speaker of the house of representatives and the director of the joint legislative budget committee on or before July 1 of each year on the amount of money contributed and number of residency positions funded by local, county and tribal governments, including the amount of federal matching monies used.

(g) Any funds appropriated but not allocated by the administration for subdivision (b) or (c) of this paragraph may be reallocated if funding for either subdivision is insufficient to cover appropriate graduate medical education costs.

10. Notwithstanding section 41-1005, subsection A, paragraph 9, the administration shall adopt rules pursuant to title 41, chapter 6 establishing the methodology for determining the prospective tiered per diem payments that are in effect through September 30, 2014.

11. For inpatient hospital services rendered on or after October 1, 2011, the prospective tiered per diem payment rates are permanently reset to the amounts payable for those services as of October 1, 2011 pursuant to this subsection.

12. The administration shall adopt a diagnosis-related group based hospital reimbursement methodology consistent with title XIX of the social security act for inpatient dates of service on and after October 1, 2014. The administration may make additional adjustments to the inpatient hospital rates established pursuant to this section for hospitals that are publicly operated or based on other factors, including the number of beds in the hospital, the specialty services available to patients, the geographic location and diagnosis-related group codes that are made publicly available by the hospital pursuant to section 36-437. The administration may also provide additional reimbursement for extraordinarily high cost cases that exceed a threshold above the standard payment. The administration may also establish a separate payment methodology for specific services or hospitals serving unique populations.

H. The director may adopt rules that specify enrollment procedures, including notice to contractors of enrollment. The rules may provide for varying time limits for enrollment in different situations. The administration shall specify in contract when a person who has been determined eligible will be enrolled with that contractor and the date on which the contractor will be financially responsible for health and medical services to the person.

I. The administration may make direct payments to hospitals for hospitalization and medical care provided to a member in accordance with this article and rules. The director may adopt rules to establish the procedures by which the administration shall pay hospitals pursuant to this subsection if a contractor fails to make timely payment to a hospital. Such payment shall be at a level determined pursuant to section 36-2904, subsection H

or I. The director may withhold payment due to a contractor in the amount of any payment made directly to a hospital by the administration on behalf of a contractor pursuant to this subsection.

J. The director shall establish a special unit within the administration for the purpose of monitoring the third-party payment collections required by contractors and noncontracting providers pursuant to section 36-2903, subsection B, paragraph 10 and subsection F and section 36-2915, subsection E. The director shall determine by rule:

1. The type of third-party payments to be monitored pursuant to this subsection.

2. The percentage of third-party payments that is collected by a contractor or noncontracting provider and that the contractor or noncontracting provider may keep and the percentage of such payments that the contractor or noncontracting provider may be required to pay to the administration. Contractors and noncontracting providers must pay to the administration one hundred percent of all third-party payments that are collected and that duplicate administration fee-for-service payments. A contractor that contracts with the administration pursuant to section 36-2904, subsection A may be entitled to retain a percentage of third-party payments if the payments collected and retained by a contractor are reflected in reduced capitation rates. A contractor may be required to pay the administration a percentage of third-party payments that are collected by a contractor and that are not reflected in reduced capitation rates.

K. The administration shall establish procedures to apply to the following if a provider that has a contract with a contractor or noncontracting provider seeks to collect from an individual or financially responsible relative or representative a claim that exceeds the amount that is reimbursed or should be reimbursed by the system:

1. On written notice from the administration or oral or written notice from a member that a claim for covered services may be in violation of this section, the provider that has a contract with a contractor or noncontracting provider shall investigate the inquiry and verify whether the person was eligible for services at the time that covered services were provided. If the claim was paid or should have been paid by the system, the provider that has a contract with a contractor or noncontracting provider shall not continue billing the member.

2. If the claim was paid or should have been paid by the system and the disputed claim has been referred for collection to a collection agency or referred to a credit reporting bureau, the provider that has a contract with a contractor or noncontracting provider shall:

(a) Notify the collection agency and request that all attempts to collect this specific charge be terminated immediately.

(b) Advise all credit reporting bureaus that the reported delinquency was in error and request that the affected credit report be corrected to remove any notation about this specific delinquency.

(c) Notify the administration and the member that the request for payment was in error and that the collection agency and credit reporting bureaus have been notified.

3. If the administration determines that a provider that has a contract with a contractor or noncontracting provider has billed a member for charges that were paid or should have been paid by the administration, the administration shall send written notification by certified mail or other service with proof of delivery to the provider that has a contract with a contractor or noncontracting provider stating that this billing is in violation of federal and state law. If, twenty-one days or more after receiving the notification, a provider that has a contract with a contractor or noncontracting provider knowingly continues billing a member for charges that were paid or should have been paid by the system, the administration may assess a civil penalty in an amount equal to three times the amount of the billing and reduce payment to the provider that has a contract with a contractor or noncontracting provider accordingly. Receipt of delivery signed by the addressee or the addressee's employee is prima facie evidence of knowledge. Civil penalties collected pursuant to this subsection shall be deposited in the state general fund. Section 36-2918, subsections C, D and F, relating to the imposition, collection and enforcement of civil penalties, apply to civil penalties imposed pursuant to this paragraph.

L. The administration may conduct postpayment review of all claims paid by the administration and may recoup any monies erroneously paid. The director may adopt rules that specify procedures for conducting postpayment review. A contractor may conduct a postpayment review of all claims paid by the contractor and may recoup monies that are erroneously paid.

M. Subject to title 41, chapter 4, article 4, the director or the director's designee may employ and supervise personnel necessary to assist the director in performing the functions of the administration.

N. The administration may contract with contractors for obstetrical care who are eligible to provide services under title XIX of the social security act.

O. Notwithstanding any other law, on federal approval the administration may make disproportionate share payments to private hospitals, county operated hospitals, including hospitals owned or leased by a special health care district, and state operated institutions for mental disease beginning October 1, 1991 in accordance with federal law and subject to legislative appropriation. If at any time the administration receives written notification from federal authorities of any change or difference in the actual or estimated amount of federal funds available for disproportionate share payments from the amount reflected in the legislative appropriation for such purposes, the administration shall provide written notification of such change or difference to the president and the minority leader of the senate, the speaker and the minority leader of the house of representatives, the director of the joint legislative budget committee, the legislative committee of reference and any hospital trade association within this state, within three working days not including weekends after receipt of the notice of the change or difference. In calculating disproportionate share payments as prescribed in this section, the administration may use either a methodology based on claims and encounter data that is submitted to the administration from contractors or a methodology based on data that is reported to the administration by private hospitals and state operated institutions for mental disease. The selected methodology applies to all private hospitals and state operated institutions for mental disease qualifying for disproportionate share payments.

P. Disproportionate share payments made pursuant to subsection O of this section include amounts for disproportionate share hospitals designated by political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents. Subject to the approval of the centers for medicare and medicaid services, any amount of federal funding allotted to this state pursuant to section 1923(f) of the social security act and not otherwise spent under subsection O of this section shall be made available for distribution pursuant to this subsection. Political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents may designate hospitals eligible to receive disproportionate share payments in an amount up to the limit prescribed in section 1923(g) of the social security act if those political subdivisions, tribal governments or universities provide sufficient monies to qualify for the matching federal monies for the disproportionate share payments.

Q. Notwithstanding any law to the contrary, the administration may receive confidential adoption information to determine whether an adopted child should be terminated from the system.

R. The adoption agency or the adoption attorney shall notify the administration within thirty days after an eligible person receiving services has placed that person's child for adoption.

S. If the administration implements an electronic claims submission system, it may adopt procedures pursuant to subsection G of this section requiring documentation different than prescribed under subsection G, paragraph 4 of this section.

T. In addition to any requirements adopted pursuant to subsection D, paragraph 4 of this section, notwithstanding any other law, subject to approval by the centers for medicare and medicaid services, beginning July 1, 2011, members eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 shall pay the following:

1. A monthly premium of fifteen dollars, except that the total monthly premium for an entire household shall not exceed sixty dollars.

2. A copayment of five dollars for each physician office visit.

3. A copayment of ten dollars for each urgent care visit.

4. A copayment of thirty dollars for each emergency department visit.

U. Subject to the approval of the centers for medicare and medicaid services, political subdivisions of this state, tribal governments and any university under the jurisdiction of the Arizona board of regents may provide to the Arizona health care cost containment system administration monies in addition to any state general fund monies appropriated for critical access hospitals in order to qualify for additional federal monies. Any amount of federal monies received by this state pursuant to this subsection shall be distributed as supplemental payments to critical access hospitals.

V. For the purposes of this section, "disproportionate share payment" means a payment to a hospital that serves a disproportionate share of low-income patients as described by 42 United States Code section 1396r-4.

36-2907. Covered health and medical services; modifications; related delivery of service requirements; rules; definition

A. Subject to the limits and exclusions specified in this section, contractors shall provide the following medically necessary health and medical services:

1. Inpatient hospital services that are ordinarily furnished by a hospital to care and treat inpatients and that are provided under the direction of a physician or a primary care practitioner. For the purposes of this section, inpatient hospital services exclude services in an institution for tuberculosis or mental diseases unless authorized under an approved section 1115 waiver.

2. Outpatient health services that are ordinarily provided in hospitals, clinics, offices and other health care facilities by licensed health care providers. Outpatient health services include services provided by or under the direction of a physician or a primary care practitioner, including occupational therapy.

3. Other laboratory and X-ray services ordered by a physician or a primary care practitioner.

4. Medications that are ordered on prescription by a physician or a dentist who is licensed pursuant to title 32, chapter 11. Persons who are dually eligible for title XVIII and title XIX services must obtain available medications through a medicare licensed or certified medicare advantage prescription drug plan, a medicare prescription drug plan or any other entity authorized by medicare to provide a medicare part D prescription drug benefit.

5. Medical supplies, durable medical equipment, insulin pumps and prosthetic devices ordered by a physician or a primary care practitioner. Suppliers of durable medical equipment shall provide the administration with complete information about the identity of each person who has an ownership or controlling interest in their business and shall comply with federal bonding requirements in a manner prescribed by the administration.

6. For persons who are at least twenty-one years of age, treatment of medical conditions of the eye, excluding eye examinations for prescriptive lenses and the provision of prescriptive lenses.

7. Early and periodic health screening and diagnostic services as required by section 1905(r) of title XIX of the social security act for members who are under twenty-one years of age.

8. Family planning services that do not include abortion or abortion counseling. If a contractor elects not to provide family planning services, this election does not disqualify the contractor from delivering all other covered health and medical services under this chapter. In that event, the administration may contract directly with another contractor, including an outpatient surgical center or a noncontracting provider, to deliver family planning services to a member who is enrolled with the contractor that elects not to provide family planning services.

9. Podiatry services that are performed by a podiatrist who is licensed pursuant to title 32, chapter 7 and ordered by a primary care physician or primary care practitioner.

10. Nonexperimental transplants approved for title XIX reimbursement.

11. Dental services as follows:

(a) Except as provided in subdivision (b) of this paragraph, for persons who are at least twenty-one years of age, emergency dental care and extractions in an annual amount of not more than $1,000 per member.

(b) Subject to approval by the centers for medicare and medicaid services, for persons treated at an Indian health service or tribal facility, adult dental services that are eligible for a federal medical assistance percentage of one hundred percent and that exceed the limit prescribed in subdivision (a) of this paragraph.

12. Ambulance and nonambulance transportation, except as provided in subsection G of this section.

13. Hospice care.

14. Orthotics, if all of the following apply:

(a) The use of the orthotic is medically necessary as the preferred treatment option consistent with medicare guidelines.

(b) The orthotic is less expensive than all other treatment options or surgical procedures to treat the same diagnosed condition.

(c) The orthotic is ordered by a physician or primary care practitioner.

15. Subject to approval by the centers for medicare and medicaid services, medically necessary chiropractic services that are performed by a chiropractor who is licensed pursuant to title 32, chapter 8 and that are ordered by a primary care physician or primary care practitioner pursuant to rules adopted by the administration. The primary care physician or primary care practitioner may initially order up to twenty visits annually that include treatment and may request authorization for additional chiropractic services in that same year if additional chiropractic services are medically necessary.

16. For up to ten program hours annually, diabetes outpatient self-management training services, as defined in 42 United States Code section 1395x, if prescribed by a primary care practitioner in either of the following circumstances:

(a) The member is initially diagnosed with diabetes.

(b) For a member who has previously been diagnosed with diabetes, either:

(i) A change occurs in the member's diagnosis, medical condition or treatment regimen.

(ii) The member is not meeting appropriate clinical outcomes.

B. The limits and exclusions for health and medical services provided under this section are as follows:

1. Circumcision of newborn males is not a covered health and medical service.

2. For eligible persons who are at least twenty-one years of age:

(a) Outpatient health services do not include speech therapy.

(b) Prosthetic devices do not include hearing aids, dentures, bone-anchored hearing aids or cochlear implants. Prosthetic devices, except prosthetic implants, may be limited to $12,500 per contract year.

(c) Percussive vests are not covered health and medical services.

(d) Durable medical equipment is limited to items covered by medicare.

(e) Nonexperimental transplants do not include pancreas-only transplants.

(f) Bariatric surgery procedures, including laparoscopic and open gastric bypass and restrictive procedures, are not covered health and medical services.

C. The system shall pay noncontracting providers only for health and medical services as prescribed in subsection A of this section and as prescribed by rule.

D. The director shall adopt rules necessary to limit, to the extent possible, the scope, duration and amount of services, including maximum limits for inpatient services that are consistent with federal regulations under title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)). To the extent possible and practicable, these rules shall provide for the prior approval of medically necessary services provided pursuant to this chapter.

E. The director shall make available home health services in lieu of hospitalization pursuant to contracts awarded under this article. For the purposes of this subsection, "home health services" means the provision of nursing services, home health aide services or medical supplies, equipment and appliances that are provided on a part-time or intermittent basis by a licensed home health agency within a member's residence based on the orders of a physician or a primary care practitioner. Home health agencies shall comply with the federal bonding requirements in a manner prescribed by the administration.

F. The director shall adopt rules for the coverage of behavioral health services for persons who are eligible under section 36-2901, paragraph 6, subdivision (a). The administration acting through the regional behavioral health authorities shall establish a diagnostic and evaluation program to which other state agencies shall refer children who are not already enrolled pursuant to this chapter and who may be in need of behavioral health services. In addition to an evaluation, the administration acting through regional behavioral health authorities shall also identify children who may be eligible under section 36-2901, paragraph 6, subdivision (a) or section 36-2931, paragraph 5 and shall refer the children to the appropriate agency responsible for making the final eligibility determination.

G. The director shall adopt rules providing for transportation services and rules providing for copayment by members for transportation for other than emergency purposes. Subject to approval by the centers for medicare and medicaid services, nonemergency medical transportation shall not be provided except for stretcher vans and ambulance transportation. Prior authorization is required for transportation by stretcher van and for medically necessary ambulance transportation initiated pursuant to a physician's direction. Prior authorization is not required for medically necessary ambulance transportation services rendered to members or eligible persons initiated by dialing telephone number 911 or other designated emergency response systems.

H. The director may adopt rules to allow the administration, at the director's discretion, to use a second opinion procedure under which surgery may not be eligible for coverage pursuant to this chapter without documentation as to need by at least two physicians or primary care practitioners.

I. If the director does not receive bids within the amounts budgeted or if at any time the amount remaining in the Arizona health care cost containment system fund is insufficient to pay for full contract services for the remainder of the contract term, the administration, on notification to system contractors at least thirty days in advance, may modify the list of services required under subsection A of this section for persons defined as eligible other than those persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). The director may also suspend services or may limit categories of expense for services defined as optional pursuant to title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)) for persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). Such reductions or suspensions do not apply to the continuity of care for persons already receiving these services.

J. All health and medical services provided under this article shall be provided in the geographic service area of the member, except:

1. Emergency services and specialty services provided pursuant to section 36-2908.

2. That the director may allow the delivery of health and medical services in other than the geographic service area in this state or in an adjoining state if the director determines that medical practice patterns justify the delivery of services or a net reduction in transportation costs can reasonably be expected. Notwithstanding the definition of physician as prescribed in section 36-2901, if services are procured from a physician or primary care practitioner in an adjoining state, the physician or primary care practitioner shall be licensed to practice in

that state pursuant to licensing statutes in that state that are similar to title 32, chapter 13, 15, 17 or 25 and shall complete a provider agreement for this state.

K. Covered outpatient services shall be subcontracted by a primary care physician or primary care practitioner to other licensed health care providers to the extent practicable for purposes including, but not limited to, making health care services available to underserved areas, reducing costs of providing medical care and reducing transportation costs.

L. The director shall adopt rules that prescribe the coordination of medical care for persons who are eligible for system services. The rules shall include provisions for transferring patients and medical records and initiating medical care.

M. Notwithstanding section 36-2901.08, monies from the hospital assessment fund established by section 36-2901.09 may not be used to provide chiropractic services as prescribed in subsection A, paragraph 15 of this section.

N. Notwithstanding section 36-2901.08, monies from the hospital assessment fund established by section 36-2901.09 may not be used to provide diabetes outpatient self-management training services as prescribed in subsection A, paragraph 16 of this section.

O. For the purposes of this section, "ambulance" has the same meaning prescribed in section 36-2201.

36-2932. Arizona long-term care system; powers and duties of the director; expenditure limitation

A. The Arizona long-term care system is established. The system includes the management and delivery of hospitalization, medical care, institutional services and home and community based services to members through the administration, the program contractors and providers pursuant to this article together with federal participation under title XIX of the social security act. The director in the performance of all duties shall consider the use of existing programs, rules and procedures in the counties and department where appropriate in meeting federal requirements.

B. The administration has full operational responsibility for the system, which shall include the following:

1. Contracting with and certification of program contractors in compliance with all applicable federal laws.

2. Approving the program contractors' comprehensive service delivery plans pursuant to section 36-2940.

3. Providing by rule for the ability of the director to review and approve or disapprove program contractors' requests for proposals for providers and provider subcontracts.

4. Providing technical assistance to the program contractors.

5. Developing a uniform accounting system to be implemented by program contractors and providers of institutional services and home and community based services.

6. Conducting quality control on eligibility determinations and preadmission screenings.

7. Establishing and managing a comprehensive system for assuring the quality of care delivered by the system as required by federal law.

8. Establishing an enrollment system.

9. Establishing a member case management tracking system.

10. Establishing and managing a method to prevent fraud by applicants, members, eligible persons, program contractors, providers and noncontracting providers as required by federal law.

11. Coordinating benefits as provided in section 36-2946.

12. Establishing standards for the coordination of services.

13. Establishing financial and performance audit requirements for program contractors, providers and noncontracting providers.

14. Prescribing remedies as required pursuant to 42 United States Code section 1396r. These remedies may include the appointment of temporary management by the director, acting in collaboration with the director of the department of health services, in order to continue operation of a nursing care institution providing services pursuant to this article.

15. Establishing a system to implement medical child support requirements, as required by federal law. The administration may enter into an intergovernmental agreement with the department of economic security to implement this paragraph.

16. Establishing requirements and guidelines for the review of trusts for the purposes of establishing eligibility for the system pursuant to section 36-2934.01 and posteligibility treatment of income pursuant to subsection L of this section.

17. Accepting the delegation of authority from the department of health services to enforce rules that prescribe minimum certification standards for adult foster care providers pursuant to section 36-410, subsection B. The administration may contract with another entity to perform the certification functions.

18. Assessing civil penalties for improper billing as prescribed in section 36-2903.01, subsection K.

C. For nursing care institutions and hospices that provide services pursuant to this article, the director shall contract periodically as deemed necessary and as required by federal law for a financial audit of the institutions and hospices that is certified by a certified public accountant in accordance with generally accepted auditing standards or conduct or contract for a financial audit or review of the institutions and hospices. The director shall notify the nursing care institution and hospice at least sixty days before beginning a periodic audit. The administration shall reimburse a nursing care institution or hospice for any additional expenses incurred for professional accounting services obtained in response to a specific request by the administration. On request, the director of the administration shall provide a copy of an audit performed pursuant to this subsection to the director of the department of health services or that person's designee.

D. Notwithstanding any other provision of this article, the administration may contract by an intergovernmental agreement with an Indian tribe, a tribal council or a tribal organization for the provision of long-term care services pursuant to section 36-2939, subsection A, paragraphs 1, 2, 3 and 4 and the home and community based services pursuant to section 36-2939, subsection B, paragraph 2 and subsection C, subject to the restrictions in section 36-2939, subsections D and E for eligible members.

E. The director shall require as a condition of a contract that all records relating to contract compliance are available for inspection by the administration subject to subsection F of this section and that these records are maintained for five years. The director shall also require that these records are available on request of the secretary of the United States department of health and human services or its successor agency.

F. Subject to applicable law relating to privilege and protection, the director shall adopt rules prescribing the types of information that are confidential and circumstances under which that information may be used or released, including requirements for physician-patient confidentiality. Notwithstanding any other law, these rules shall provide for the exchange of necessary information among the program contractors, the administration and the department for the purposes of eligibility determination under this article.

G. The director shall adopt rules to specify methods for the transition of members into, within and out of the system. The rules shall include provisions for the transfer of members, the transfer of medical records and the initiation and termination of services.

H. The director shall adopt rules that provide for withholding or forfeiting payments made to a program contractor if it fails to comply with a provision of its contract or with the director's rules.

I. The director shall:

1. Establish by rule the time frames and procedures for all grievances and requests for hearings consistent with section 36-2903.01, subsection B, paragraph 4.

2. Apply for and accept federal monies available under title XIX of the social security act in support of the system. In addition, the director may apply for and accept grants, contracts and private donations in support of the system.

3. Not less than thirty days before the administration implements a policy or a change to an existing policy relating to reimbursement, provide notice to interested parties. Parties interested in receiving notification of policy changes shall submit a written request for notification to the administration.

J. The director may apply for federal monies available for the support of programs to investigate and prosecute violations arising from the administration and operation of the system. Available state monies appropriated for

the administration of the system may be used as matching monies to secure federal monies pursuant to this subsection.

K. The director shall adopt rules that establish requirements of state residency and qualified alien status as prescribed in section 36-2903.03. The administration shall enforce these requirements as part of the eligibility determination process. The rules shall also provide for the determination of the applicant's county of residence for the purpose of assignment of the appropriate program contractor.

L. The director shall adopt rules in accordance with the state plan regarding posteligibility treatment of income and resources that determine the portion of a member's income that shall be available for payment for services under this article. The rules shall provide that a portion of income may be retained for:

1. A personal needs allowance for members receiving institutional services of at least fifteen per cent of the maximum monthly supplemental security income payment for an individual or a personal needs allowance for members receiving home and community based services based on a reasonable assessment of need.

2. The maintenance needs of a spouse or family at home in accordance with federal law. The minimum resource allowance for the spouse or family at home is twelve thousand dollars adjusted annually by the same percentage as the percentage change in the consumer price index for all urban consumers (all items; United States city average) between September 1988 and the September before the calendar year involved.

3. Expenses incurred for noncovered medical or remedial care that are not subject to payment by a third party payor.

M. In addition to the rules otherwise specified in this article, the director may adopt necessary rules pursuant to title 41, chapter 6 to carry out this article. Rules adopted by the director pursuant to this subsection may consider the differences between rural and urban conditions on the delivery of services.

N. The director shall not adopt any rule or enter into or approve any contract or subcontract that does not conform to federal requirements or that may cause the system to lose any federal monies to which it is otherwise entitled.

O. The administration, program contractors and providers may establish and maintain review committees dealing with the delivery of care. Review committees and their staff are subject to the same requirements, protections, privileges and immunities prescribed pursuant to section 36-2917.

P. If the director determines that the financial viability of a nursing care institution or hospice is in question, the director may require a nursing care institution and a hospice providing services pursuant to this article to submit quarterly financial statements within thirty days after the end of its financial quarter unless the director grants an extension in writing before that date. Quarterly financial statements submitted to the department shall include the following:

1. A balance sheet detailing the institution's assets, liabilities and net worth.

2. A statement of income and expenses, including current personnel costs and full-time equivalent statistics.

Q. The director may require monthly financial statements if the director determines that the financial viability of a nursing care institution or hospice is in question. The director shall prescribe the requirements of these statements.

R. The total amount of state monies that may be spent in any fiscal year by the administration for long-term care shall not exceed the amount appropriated or authorized by section 35-173 for that purpose. This article shall not be construed to impose a duty on an officer, agent or employee of this state to discharge a responsibility or to create any right in a person or group if the discharge or right would require an expenditure of state monies in excess of the expenditure authorized by legislative appropriation for that specific purpose.

ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM
Title 9, Chapter 31, Article 12

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 10, 2025

SUBJECT: **ARIZONA HEALTH CARE COST CONTAINMENT SYSTEM**
Title 9, Chapter 31, Article 12

Summary

This Five-Year Review Report (5YRR) from the Arizona Health Care Cost Containment System (AHCCCS) relates to one (1) rule in Title 9, Chapter 31, Article 12 regarding Behavioral Health Services for the Children's Health Insurance Program.

In the prior 5YRR for these rules, which was approved by the Council in January 2020, AHCCCS did not propose to take any action regarding this rule.

Proposed Action

In the current report, AHCCCS proposes to take no action regarding this rule.

1. Has the agency analyzed whether the rules are authorized by statute?

AHCCCS cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

AHCCCS indicates the economic, small business, and consumer impact of this chapter is as it was anticipated in the last 5YRR. There were no proposed changes in the last Five-Year Review and there are no proposed changes in this Five-Year Review.

Stakeholders include AHCCCS, its members, and entities that provide behavioral health services.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

AHCCCS reports that no changes were proposed. As such, there is no analysis of the probable benefits and costs to those who are regulated to report.

4. Has the agency received any written criticisms of the rules over the last five years?

AHCCCS indicates it has not received any written criticism of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

AHCCCS indicates the rules are clear, concise, and understandable.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

AHCCCS indicates the rules are consistent with other rules and statutes.

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

AHCCCS indicates the rules are effective in achieving their objectives.

8. Has the agency analyzed the current enforcement status of the rules?

AHCCCS indicate the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The rules are not more stringent than the corresponding federal law, 42 C.F.R. 438.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Not applicable. AHCCCS indicates the rules do not require the issuance of a license, permit, or agency authorization.

11. Conclusion

This from AHCCCS relates to one (1) rule in Title 9, Chapter 31, Article 12 regarding Behavioral Health Services for the Children's Health Insurance Program. AHCCCS indicates the rule is clear, concise, understandable, consistent, effective, and enforced as written. As such, AHCCCS does not propose to take any action regarding this rule.

Council staff recommends approval of this report.

Jessica Klein, Chair
Governor's Regulatory Review Council
100 North 15th Avenue, Suite 302
Phoenix, Arizona 85007

RE: AHCCCS Title 9, Chapter 31, Article 12;

Dear Ms. Klein

Please find enclosed AHCCCS's Five-Year Review Report for Title 9, Chapter 31, Article 12 due on September 30, 2024.

AHCCCS hereby certifies compliance with A.R.S. 41-1091.

For questions about this report, please contact Sladjana Kuzmanovic at 602-417-4232 or sladjana.kuzmanovic@azahcccs.gov.

Sincerely,

Nicole Fries
Chief Deputy General Counsel

Arizona Health Care Cost Containment System

(AHCCCS)

5 YEAR REVIEW REPORT

A.A.C. Title 9, Chapter 31, Article 12

September 2024

1. **Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. § 36-2903.01

Specific Statutory Authority: A.R.S. §§ 36-2903.01, 36-2907

2. **The objective of each rule:**

Rule	Objective
R9-31-1201	Provides a cross-reference to R9-22-Article 2 and Article 12.

3. **Are the rules effective in achieving their objectives?** **Yes _X__** **No __**

4. **Are the rules consistent with other rules and statutes?** **Yes _X__** **No __**

5. **Are the rules enforced as written?** **Yes _X__** **No __**

6. **Are the rules clear, concise, and understandable?** **Yes _X_** **No __**

7. **Has the agency received written criticisms of the rules within the last five years?** **Yes __** **No _X_**

8. **Economic, small business, and consumer impact comparison:**

The economic, small business, and consumer impact of this chapter is as it was anticipated in the last Five-Year Review Report. There were no proposed changes in the last Five-Year Review and there are no proposed changes in this Five-Year Review.

9. **Has the agency received any business competitiveness analyses of the rules?** **Yes __** **No X**

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

The prior Five-Year Review Report did not find any need to revise the rules, therefore there was no proposed course of action.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

There are no proposed changes in this Five-Year Review Report.

12. **Are the rules more stringent than corresponding federal laws?** **Yes ___** **No _X__**

The rules are not more stringent than 41 C.F.R. 438.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

These rules do not require an issuance of a regulatory permit, license, or agency authorization, therefore, compliance with the general permit requirements of A.R.S. 41-1037 or explanation why the agency believes an exception applies is not applicable.

14. Proposed course of action

There are no proposed changes in this Five-Year Review Report.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

R9-31-1005. Collections

The provisions in A.A.C. R9-22-1005 apply to this Section except:

1. Replace the reference to "Article 2," with 9 A.A.C. 31, Article 2;
2. This Section applies to Title XXI fee-for-service and reinsurance payments.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

R9-31-1006. AHCCCS Monitoring Responsibilities

With the exception of long-term care insurance, the provisions in A.A.C. R9-22-1006 apply to this Section.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

R9-31-1007. Notification for Perfection, Recording, and Assignment of Title XXI liens

The provisions in A.A.C. R9-22-1007 apply to this Section.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

R9-31-1008. Notification Information for Liens

The provisions in A.A.C. R9-22-1008 apply to this Section.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

R9-31-1009. Notification of Health Insurance Information

The provisions in A.A.C. R9-22-1009 apply to this Section.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1152, effective May 1, 2004 (Supp. 04-1).

ARTICLE 11. CIVIL MONETARY PENALTIES AND ASSESSMENTS

R9-31-1101. Basis for Civil Monetary Penalties and Assessments for Fraudulent Claims

AHCCCS shall use the provisions in 9 A.A.C. 22, Article 11 for the determination and collection of penalties and assessments.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by final rulemaking at 10 A.A.R. 3067, effective September 11, 2004 (Supp. 04-3). Amended by final expedited rulemaking 30 A.A.R. 929 (May 10, 2024), with an immediate effective date of April 25, 2024 (Supp. 24-2).

R9-31-1102. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed by final rulemaking at 10 A.A.R. 3067, effective September 11, 2004 (Supp. 04-3).

R9-31-1103. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed by final rulemaking at 10 A.A.R. 3067, effective September 11, 2004 (Supp. 04-3).

R9-31-1104. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed by final rulemaking at 10 A.A.R. 3067, effective September 11, 2004 (Supp. 04-3).

ARTICLE 12. BEHAVIORAL HEALTH SERVICES

R9-31-1201. Requirements

The requirements, services and definitions under Chapter 22, Article 2 and Article 12 apply to behavioral health services provided under this Article.

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1202. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1203. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1204. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1205. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 7 A.A.R. 5846, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1206. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 7 A.A.R. 4740, effective October 1, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1207. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Section repealed; new Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by final rulemaking at 7 A.A.R. 5846, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1). Section repealed by final rulemaking at 20 A.A.R. 3128, effective January 4, 2015 (Supp. 14-4).

R9-31-1208. Repealed

Historical Note

New Section adopted by exempt rulemaking at 6 A.A.R. 282, effective December 16, 1999 (Supp. 99-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 13 A.A.R. 1103, effective May 5, 2007 (Supp. 07-1).

ARTICLE 13. REPEALED

Article 13, consisting of Sections R9-31-1301 through R9-31-1309, repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004. The subject matter of Article 13 is now in 9 A.A.C. 34 (Supp. 04-1).

R9-31-1301. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

R9-31-1302. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

R9-31-1303. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

R9-31-1304. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

R9-31-1305. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

R9-31-1306. Repealed

Historical Note

Adopted under an exemption from A.R.S. Title 41, Chapter 6, pursuant to Laws 1998, Ch. 4, § 11, 4th Special Session, effective October 23, 1998 (Supp. 98-4). Amended by exempt rulemaking at 6 A.A.R. 3205, effective August 4, 2000 (Supp. 00-3). Section repealed by final rulemaking at 10 A.A.R. 822, effective April 3, 2004 (Supp. 04-1).

36-2903.01. Additional powers and duties; report; definition

A. The director of the Arizona health care cost containment system administration may adopt rules that provide that the system may withhold or forfeit payments to be made to a noncontracting provider by the system if the noncontracting provider fails to comply with this article, the provider agreement or rules that are adopted pursuant to this article and that relate to the specific services rendered for which a claim for payment is made.

B. The director shall:

1. Prescribe uniform forms to be used by all contractors. The rules shall require a written and signed application by the applicant or an applicant's authorized representative, or, if the person is incompetent or incapacitated, a family member or a person acting responsibly for the applicant may obtain a signature or a reasonable facsimile and file the application as prescribed by the administration.

2. Enter into an interagency agreement with the department to establish a streamlined eligibility process to determine the eligibility of all persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). At the administration's option, the interagency agreement may allow the administration to determine the eligibility of certain persons, including those defined pursuant to section 36-2901, paragraph 6, subdivision (a).

3. Enter into an intergovernmental agreement with the department to:

(a) Establish an expedited eligibility and enrollment process for all persons who are hospitalized at the time of application.

(b) Establish performance measures and incentives for the department.

(c) Establish the process for management evaluation reviews that the administration shall perform to evaluate the eligibility determination functions performed by the department.

(d) Establish eligibility quality control reviews by the administration.

(e) Require the department to adopt rules, consistent with the rules adopted by the administration for a hearing process, that applicants or members may use for appeals of eligibility determinations or redeterminations.

(f) Establish the department's responsibility to place sufficient eligibility workers at federally qualified health centers to screen for eligibility and at hospital sites and level one trauma centers to ensure that persons seeking hospital services are screened on a timely basis for eligibility for the system, including a process to ensure that applications for the system can be accepted on a twenty-four hour basis, seven days a week.

(g) Withhold payments based on the allowable sanctions for errors in eligibility determinations or redeterminations or failure to meet performance measures required by the intergovernmental agreement.

(h) Recoup from the department all federal fiscal sanctions that result from the department's inaccurate eligibility determinations. The director may offset all or part of a sanction if the department submits a corrective action plan and a strategy to remedy the error.

4. By rule establish a procedure and time frames for the intake of grievances and requests for hearings, for the continuation of benefits and services during the appeal process and for a grievance process at the contractor level. Notwithstanding sections 41-1092.02, 41-1092.03 and 41-1092.05, the administration shall develop rules to establish the procedure and time frame for the informal resolution of grievances and appeals. A grievance that is not related to a claim for payment of system covered services shall be filed in writing with and received by the administration or the prepaid capitated provider or program contractor not later than sixty days after the date of the adverse action, decision or policy implementation being grieved. A grievance that is related to a claim for payment of system covered services must be filed in writing and received by the administration or the prepaid capitated provider or program contractor within twelve months after the date of service, within twelve months

after the date that eligibility is posted or within sixty days after the date of the denial of a timely claim submission, whichever is later. A grievance for the denial of a claim for reimbursement of services may contest the validity of any adverse action, decision, policy implementation or rule that related to or resulted in the full or partial denial of the claim. A policy implementation may be subject to a grievance procedure, but it may not be appealed for a hearing. The administration is not required to participate in a mandatory settlement conference if it is not a real party in interest. In any proceeding before the administration, including a grievance or hearing, persons may represent themselves or be represented by a duly authorized agent who is not charging a fee. A legal entity may be represented by an officer, partner or employee who is specifically authorized by the legal entity to represent it in the particular proceeding.

5. Apply for and accept federal funds available under title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)) in support of the system. The application made by the director pursuant to this paragraph shall be designed to qualify for federal funding primarily on a prepaid capitated basis. Such funds may be used only for the support of persons defined as eligible pursuant to title XIX of the social security act or the approved section 1115 waiver.

6. At least thirty days before the implementation of a policy or a change to an existing policy relating to reimbursement, provide notice to interested parties. Parties interested in receiving notification of policy changes shall submit a written request for notification to the administration.

7. In addition to the cost sharing requirements specified in subsection D, paragraph 4 of this section:

(a) Charge monthly premiums up to the maximum amount allowed by federal law to all populations of eligible persons who may be charged.

(b) Implement this paragraph to the extent permitted under the federal deficit reduction act of 2005 and other federal laws, subject to the approval of federal waiver authority and to the extent that any changes in the cost sharing requirements under this paragraph would permit this state to receive any enhanced federal matching rate.

C. The director is authorized to apply for any federal funds available for the support of programs to investigate and prosecute violations arising from the administration and operation of the system. Available state funds appropriated for the administration and operation of the system may be used as matching funds to secure federal funds pursuant to this subsection.

D. The director may adopt rules or procedures to do the following:

1. Authorize advance payments based on estimated liability to a contractor or a noncontracting provider after the contractor or noncontracting provider has submitted a claim for services and before the claim is ultimately resolved. The rules shall specify that any advance payment shall be conditioned on the execution before payment of a contract with the contractor or noncontracting provider that requires the administration to retain a specified percentage, which shall be at least twenty percent, of the claimed amount as security and that requires repayment to the administration if the administration makes any overpayment.

2. Defer liability, in whole or in part, of contractors for care provided to members who are hospitalized on the date of enrollment or under other circumstances. Payment shall be on a capped fee-for-service basis for services other than hospital services and at the rate established pursuant to subsection G of this section for hospital services or at the rate paid by the health plan, whichever is less.

3. Deputize, in writing, any qualified officer or employee in the administration to perform any act that the director by law is empowered to do or charged with the responsibility of doing, including the authority to issue final administrative decisions pursuant to section 41-1092.08.

4. Notwithstanding any other law, require persons eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 to be financially responsible for any cost sharing requirements established in a state plan or a section 1115 waiver and approved by the centers for medicare and

medicaid services. Cost sharing requirements may include copayments, coinsurance, deductibles, enrollment fees and monthly premiums for enrolled members, including households with children enrolled in the Arizona long-term care system.

E. The director shall adopt rules that further specify the medical care and hospital services that are covered by the system pursuant to section 36-2907.

F. In addition to the rules otherwise specified in this article, the director may adopt necessary rules pursuant to title 41, chapter 6 to carry out this article. Rules adopted by the director pursuant to this subsection shall consider the differences between rural and urban conditions on the delivery of hospitalization and medical care.

G. For inpatient hospital admissions and outpatient hospital services on and after March 1, 1993, the administration shall adopt rules for the reimbursement of hospitals according to the following procedures:

1. For inpatient hospital stays from March 1, 1993 through September 30, 2014, the administration shall use a prospective tiered per diem methodology, using hospital peer groups if analysis shows that cost differences can be attributed to independently definable features that hospitals within a peer group share. In peer grouping the administration may consider such factors as length of stay differences and labor market variations. If there are no cost differences, the administration shall implement a stop loss-stop gain or similar mechanism. Any stop loss-stop gain or similar mechanism shall ensure that the tiered per diem rates assigned to a hospital do not represent less than ninety percent of its 1990 base year costs or more than one hundred ten percent of its 1990 base year costs, adjusted by an audit factor, during the period of March 1, 1993 through September 30, 1994. The tiered per diem rates set for hospitals shall represent no less than eighty-seven and one-half percent or more than one hundred twelve and one-half percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1994 through September 30, 1995 and no less than eighty-five percent or more than one hundred fifteen percent of its 1990 base year costs, adjusted by an audit factor, from October 1, 1995 through September 30, 1996. For the periods after September 30, 1996 no stop loss-stop gain or similar mechanisms shall be in effect. An adjustment in the stop loss-stop gain percentage may be made to ensure that total payments do not increase as a result of this provision. If peer groups are used, the administration shall establish initial peer group designations for each hospital before implementation of the per diem system. The administration may also use a negotiated rate methodology. The tiered per diem methodology may include separate consideration for specialty hospitals that limit their provision of services to specific patient populations, such as rehabilitative patients or children. The initial per diem rates shall be based on hospital claims and encounter data for dates of service November 1, 1990 through October 31, 1991 and processed through May of 1992. The administration may also establish a separate reimbursement methodology for claims with extraordinarily high costs per day that exceed thresholds established by the administration.

2. For rates effective on October 1, 1994, and annually through September 30, 2011, the administration shall adjust tiered per diem payments for inpatient hospital care by the data resources incorporated market basket index for prospective payment system hospitals. For rates effective beginning on October 1, 1999, the administration shall adjust payments to reflect changes in length of stay for the maternity and nursery tiers.

3. Through June 30, 2004, for outpatient hospital services, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to the covered charges. Beginning on July 1, 2004 through June 30, 2005, the administration shall reimburse a hospital by applying a hospital specific outpatient cost-to-charge ratio to covered charges. If the hospital increases its charges for outpatient services filed with the Arizona department of health services pursuant to chapter 4, article 3 of this title, by more than 4.7 percent for dates of service effective on or after July 1, 2004, the hospital specific cost-to-charge ratio will be reduced by the amount that it exceeds 4.7 percent. If charges exceed 4.7 percent, the effective date of the increased charges will be the effective date of the adjusted Arizona health care cost containment system cost-to-charge ratio. The administration shall develop the methodology for a capped fee-for-service schedule and a statewide cost-to-charge ratio. Any covered outpatient service not included in the capped fee-for-service schedule shall be reimbursed by applying the statewide cost-to-charge ratio that is based on the services not included in the capped fee-for-service schedule. Beginning on July 1, 2005, the administration shall reimburse clean claims with dates of service on or after July 1, 2005, based on the capped fee-for-service schedule or the statewide cost-to-charge

ratio established pursuant to this paragraph. The administration may make additional adjustments to the outpatient hospital rates established pursuant to this section based on other factors, including the number of beds in the hospital, specialty services available to patients and the geographic location of the hospital.

4. Except if submitted under an electronic claims submission system, a hospital bill is considered received for purposes of this paragraph on initial receipt of the legible, error-free claim form by the administration if the claim includes the following error-free documentation in legible form:

(a) An admission face sheet.

(b) An itemized statement.

(c) An admission history and physical.

(d) A discharge summary or an interim summary if the claim is split.

(e) An emergency record, if admission was through the emergency room.

(f) Operative reports, if applicable.

(g) A labor and delivery room report, if applicable.

Payment received by a hospital from the administration pursuant to this subsection or from a contractor either by contract or pursuant to section 36-2904, subsection I is considered payment by the administration or the contractor of the administration's or contractor's liability for the hospital bill. A hospital may collect any unpaid portion of its bill from other third-party payors or in situations covered by title 33, chapter 7, article 3.

5. For services rendered on and after October 1, 1997, the administration shall pay a hospital's rate established according to this section subject to the following:

(a) If the hospital's bill is paid within thirty days of the date the bill was received, the administration shall pay ninety-nine percent of the rate.

(b) If the hospital's bill is paid after thirty days but within sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate.

(c) If the hospital's bill is paid any time after sixty days of the date the bill was received, the administration shall pay one hundred percent of the rate plus a fee of one percent per month for each month or portion of a month following the sixtieth day of receipt of the bill until the date of payment.

6. In developing the reimbursement methodology, if a review of the reports filed by a hospital pursuant to section 36-125.04 indicates that further investigation is considered necessary to verify the accuracy of the information in the reports, the administration may examine the hospital's records and accounts related to the reporting requirements of section 36-125.04. The administration shall bear the cost incurred in connection with this examination unless the administration finds that the records examined are significantly deficient or incorrect, in which case the administration may charge the cost of the investigation to the hospital examined.

7. Except for privileged medical information, the administration shall make available for public inspection the cost and charge data and the calculations used by the administration to determine payments under the tiered per diem system, provided that individual hospitals are not identified by name. The administration shall make the data and calculations available for public inspection during regular business hours and shall provide copies of the data and calculations to individuals requesting such copies within thirty days of receipt of a written request. The administration may charge a reasonable fee for the provision of the data or information.

8. The prospective tiered per diem payment methodology for inpatient hospital services shall include a mechanism for the prospective payment of inpatient hospital capital related costs. The capital payment shall

include hospital specific and statewide average amounts. For tiered per diem rates beginning on October 1, 1999, the capital related cost component is frozen at the blended rate of forty percent of the hospital specific capital cost and sixty percent of the statewide average capital cost in effect as of January 1, 1999 and as further adjusted by the calculation of tier rates for maternity and nursery as prescribed by law. Through September 30, 2011, the administration shall adjust the capital related cost component by the data resources incorporated market basket index for prospective payment system hospitals.

9. For graduate medical education programs:

(a) Beginning September 30, 1997, the administration shall establish a separate graduate medical education program to reimburse hospitals that had graduate medical education programs that were approved by the administration as of October 1, 1999. The administration shall separately account for monies for the graduate medical education program based on the total reimbursement for graduate medical education reimbursed to hospitals by the system in federal fiscal year 1995-1996 pursuant to the tiered per diem methodology specified in this section. The graduate medical education program reimbursement shall be adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Subject to legislative appropriation, on an annual basis, each qualified hospital shall receive a single payment from the graduate medical education program that is equal to the same percentage of graduate medical education reimbursement that was paid by the system in federal fiscal year 1995-1996. Any reimbursement for graduate medical education made by the administration shall not be subject to future settlements or appeals by the hospitals to the administration. The monies available under this subdivision shall not exceed the fiscal year 2005-2006 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement, except for monies distributed for expansions pursuant to subdivision (b) of this paragraph.

(b) The monies available for graduate medical education programs pursuant to this subdivision shall not exceed the fiscal year 2006-2007 appropriation adjusted annually by the increase or decrease in the index published by the global insight hospital market basket index for prospective hospital reimbursement. Graduate medical education programs eligible for such reimbursement are not precluded from receiving reimbursement for funding under subdivision (c) of this paragraph. Beginning July 1, 2006, the administration shall distribute any monies appropriated for graduate medical education above the amount prescribed in subdivision (a) of this paragraph in the following order or priority:

(i) For the direct costs to support the expansion of graduate medical education programs established before July 1, 2006 at hospitals that do not receive payments pursuant to subdivision (a) of this paragraph. These programs must be approved by the administration.

(ii) For the direct costs to support the expansion of graduate medical education programs established on or before October 1, 1999. These programs must be approved by the administration.

(c) The administration shall distribute to hospitals any monies appropriated for graduate medical education above the amount prescribed in subdivisions (a) and (b) of this paragraph for the following purposes:

(i) For the direct costs of graduate medical education programs established or expanded on or after July 1, 2006. These programs must be approved by the administration.

(ii) For a portion of additional indirect graduate medical education costs for programs that are located in a county with a population of less than five hundred thousand persons at the time the residency position was created or for a residency position that includes a rotation in a county with a population of less than five hundred thousand persons at the time the residency position was established. These programs must be approved by the administration.

(d) The administration shall develop, by rule, the formula by which the monies are distributed.

(e) Each graduate medical education program that receives funding pursuant to subdivision (b) or (c) of this paragraph shall identify and report to the administration the number of new residency positions created by the funding provided in this paragraph, including positions in rural areas. The program shall also report information related to the number of funded residency positions that resulted in physicians locating their practices in this state. The administration shall report to the joint legislative budget committee by February 1 of each year on the number of new residency positions as reported by the graduate medical education programs.

(f) Local, county and tribal governments and any university under the jurisdiction of the Arizona board of regents may provide monies in addition to any state general fund monies appropriated for graduate medical education in order to qualify for additional matching federal monies for providers, programs or positions in a specific locality and costs incurred pursuant to a specific contract between the administration and providers or other entities to provide graduate medical education services as an administrative activity. Payments by the administration pursuant to this subdivision may be limited to those providers designated by the funding entity and may be based on any methodology deemed appropriate by the administration, including replacing any payments that might otherwise have been paid pursuant to subdivision (a), (b) or (c) of this paragraph had sufficient state general fund monies or other monies been appropriated to fully fund those payments. These programs, positions, payment methodologies and administrative graduate medical education services must be approved by the administration and the centers for medicare and medicaid services. The administration shall report to the president of the senate, the speaker of the house of representatives and the director of the joint legislative budget committee on or before July 1 of each year on the amount of money contributed and number of residency positions funded by local, county and tribal governments, including the amount of federal matching monies used.

(g) Any funds appropriated but not allocated by the administration for subdivision (b) or (c) of this paragraph may be reallocated if funding for either subdivision is insufficient to cover appropriate graduate medical education costs.

10. Notwithstanding section 41-1005, subsection A, paragraph 9, the administration shall adopt rules pursuant to title 41, chapter 6 establishing the methodology for determining the prospective tiered per diem payments that are in effect through September 30, 2014.

11. For inpatient hospital services rendered on or after October 1, 2011, the prospective tiered per diem payment rates are permanently reset to the amounts payable for those services as of October 1, 2011 pursuant to this subsection.

12. The administration shall adopt a diagnosis-related group based hospital reimbursement methodology consistent with title XIX of the social security act for inpatient dates of service on and after October 1, 2014. The administration may make additional adjustments to the inpatient hospital rates established pursuant to this section for hospitals that are publicly operated or based on other factors, including the number of beds in the hospital, the specialty services available to patients, the geographic location and diagnosis-related group codes that are made publicly available by the hospital pursuant to section 36-437. The administration may also provide additional reimbursement for extraordinarily high cost cases that exceed a threshold above the standard payment. The administration may also establish a separate payment methodology for specific services or hospitals serving unique populations.

H. The director may adopt rules that specify enrollment procedures, including notice to contractors of enrollment. The rules may provide for varying time limits for enrollment in different situations. The administration shall specify in contract when a person who has been determined eligible will be enrolled with that contractor and the date on which the contractor will be financially responsible for health and medical services to the person.

I. The administration may make direct payments to hospitals for hospitalization and medical care provided to a member in accordance with this article and rules. The director may adopt rules to establish the procedures by which the administration shall pay hospitals pursuant to this subsection if a contractor fails to make timely payment to a hospital. Such payment shall be at a level determined pursuant to section 36-2904, subsection H

or I. The director may withhold payment due to a contractor in the amount of any payment made directly to a hospital by the administration on behalf of a contractor pursuant to this subsection.

J. The director shall establish a special unit within the administration for the purpose of monitoring the third-party payment collections required by contractors and noncontracting providers pursuant to section 36-2903, subsection B, paragraph 10 and subsection F and section 36-2915, subsection E. The director shall determine by rule:

1. The type of third-party payments to be monitored pursuant to this subsection.

2. The percentage of third-party payments that is collected by a contractor or noncontracting provider and that the contractor or noncontracting provider may keep and the percentage of such payments that the contractor or noncontracting provider may be required to pay to the administration. Contractors and noncontracting providers must pay to the administration one hundred percent of all third-party payments that are collected and that duplicate administration fee-for-service payments. A contractor that contracts with the administration pursuant to section 36-2904, subsection A may be entitled to retain a percentage of third-party payments if the payments collected and retained by a contractor are reflected in reduced capitation rates. A contractor may be required to pay the administration a percentage of third-party payments that are collected by a contractor and that are not reflected in reduced capitation rates.

K. The administration shall establish procedures to apply to the following if a provider that has a contract with a contractor or noncontracting provider seeks to collect from an individual or financially responsible relative or representative a claim that exceeds the amount that is reimbursed or should be reimbursed by the system:

1. On written notice from the administration or oral or written notice from a member that a claim for covered services may be in violation of this section, the provider that has a contract with a contractor or noncontracting provider shall investigate the inquiry and verify whether the person was eligible for services at the time that covered services were provided. If the claim was paid or should have been paid by the system, the provider that has a contract with a contractor or noncontracting provider shall not continue billing the member.

2. If the claim was paid or should have been paid by the system and the disputed claim has been referred for collection to a collection agency or referred to a credit reporting bureau, the provider that has a contract with a contractor or noncontracting provider shall:

(a) Notify the collection agency and request that all attempts to collect this specific charge be terminated immediately.

(b) Advise all credit reporting bureaus that the reported delinquency was in error and request that the affected credit report be corrected to remove any notation about this specific delinquency.

(c) Notify the administration and the member that the request for payment was in error and that the collection agency and credit reporting bureaus have been notified.

3. If the administration determines that a provider that has a contract with a contractor or noncontracting provider has billed a member for charges that were paid or should have been paid by the administration, the administration shall send written notification by certified mail or other service with proof of delivery to the provider that has a contract with a contractor or noncontracting provider stating that this billing is in violation of federal and state law. If, twenty-one days or more after receiving the notification, a provider that has a contract with a contractor or noncontracting provider knowingly continues billing a member for charges that were paid or should have been paid by the system, the administration may assess a civil penalty in an amount equal to three times the amount of the billing and reduce payment to the provider that has a contract with a contractor or noncontracting provider accordingly. Receipt of delivery signed by the addressee or the addressee's employee is prima facie evidence of knowledge. Civil penalties collected pursuant to this subsection shall be deposited in the state general fund. Section 36-2918, subsections C, D and F, relating to the imposition, collection and enforcement of civil penalties, apply to civil penalties imposed pursuant to this paragraph.

L. The administration may conduct postpayment review of all claims paid by the administration and may recoup any monies erroneously paid. The director may adopt rules that specify procedures for conducting postpayment review. A contractor may conduct a postpayment review of all claims paid by the contractor and may recoup monies that are erroneously paid.

M. Subject to title 41, chapter 4, article 4, the director or the director's designee may employ and supervise personnel necessary to assist the director in performing the functions of the administration.

N. The administration may contract with contractors for obstetrical care who are eligible to provide services under title XIX of the social security act.

O. Notwithstanding any other law, on federal approval the administration may make disproportionate share payments to private hospitals, county operated hospitals, including hospitals owned or leased by a special health care district, and state operated institutions for mental disease beginning October 1, 1991 in accordance with federal law and subject to legislative appropriation. If at any time the administration receives written notification from federal authorities of any change or difference in the actual or estimated amount of federal funds available for disproportionate share payments from the amount reflected in the legislative appropriation for such purposes, the administration shall provide written notification of such change or difference to the president and the minority leader of the senate, the speaker and the minority leader of the house of representatives, the director of the joint legislative budget committee, the legislative committee of reference and any hospital trade association within this state, within three working days not including weekends after receipt of the notice of the change or difference. In calculating disproportionate share payments as prescribed in this section, the administration may use either a methodology based on claims and encounter data that is submitted to the administration from contractors or a methodology based on data that is reported to the administration by private hospitals and state operated institutions for mental disease. The selected methodology applies to all private hospitals and state operated institutions for mental disease qualifying for disproportionate share payments.

P. Disproportionate share payments made pursuant to subsection O of this section include amounts for disproportionate share hospitals designated by political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents. Subject to the approval of the centers for medicare and medicaid services, any amount of federal funding allotted to this state pursuant to section 1923(f) of the social security act and not otherwise spent under subsection O of this section shall be made available for distribution pursuant to this subsection. Political subdivisions of this state, tribal governments and universities under the jurisdiction of the Arizona board of regents may designate hospitals eligible to receive disproportionate share payments in an amount up to the limit prescribed in section 1923(g) of the social security act if those political subdivisions, tribal governments or universities provide sufficient monies to qualify for the matching federal monies for the disproportionate share payments.

Q. Notwithstanding any law to the contrary, the administration may receive confidential adoption information to determine whether an adopted child should be terminated from the system.

R. The adoption agency or the adoption attorney shall notify the administration within thirty days after an eligible person receiving services has placed that person's child for adoption.

S. If the administration implements an electronic claims submission system, it may adopt procedures pursuant to subsection G of this section requiring documentation different than prescribed under subsection G, paragraph 4 of this section.

T. In addition to any requirements adopted pursuant to subsection D, paragraph 4 of this section, notwithstanding any other law, subject to approval by the centers for medicare and medicaid services, beginning July 1, 2011, members eligible pursuant to section 36-2901, paragraph 6, subdivision (a), section 36-2931 and section 36-2981, paragraph 6 shall pay the following:

1. A monthly premium of fifteen dollars, except that the total monthly premium for an entire household shall not exceed sixty dollars.

2. A copayment of five dollars for each physician office visit.

3. A copayment of ten dollars for each urgent care visit.

4. A copayment of thirty dollars for each emergency department visit.

U. Subject to the approval of the centers for medicare and medicaid services, political subdivisions of this state, tribal governments and any university under the jurisdiction of the Arizona board of regents may provide to the Arizona health care cost containment system administration monies in addition to any state general fund monies appropriated for critical access hospitals in order to qualify for additional federal monies. Any amount of federal monies received by this state pursuant to this subsection shall be distributed as supplemental payments to critical access hospitals.

V. For the purposes of this section, "disproportionate share payment" means a payment to a hospital that serves a disproportionate share of low-income patients as described by 42 United States Code section 1396r-4.

36-2907. Covered health and medical services; modifications; related delivery of service requirements; rules; definition

A. Subject to the limits and exclusions specified in this section, contractors shall provide the following medically necessary health and medical services:

1. Inpatient hospital services that are ordinarily furnished by a hospital to care and treat inpatients and that are provided under the direction of a physician or a primary care practitioner. For the purposes of this section, inpatient hospital services exclude services in an institution for tuberculosis or mental diseases unless authorized under an approved section 1115 waiver.

2. Outpatient health services that are ordinarily provided in hospitals, clinics, offices and other health care facilities by licensed health care providers. Outpatient health services include services provided by or under the direction of a physician or a primary care practitioner, including occupational therapy.

3. Other laboratory and X-ray services ordered by a physician or a primary care practitioner.

4. Medications that are ordered on prescription by a physician or a dentist who is licensed pursuant to title 32, chapter 11. Persons who are dually eligible for title XVIII and title XIX services must obtain available medications through a medicare licensed or certified medicare advantage prescription drug plan, a medicare prescription drug plan or any other entity authorized by medicare to provide a medicare part D prescription drug benefit.

5. Medical supplies, durable medical equipment, insulin pumps and prosthetic devices ordered by a physician or a primary care practitioner. Suppliers of durable medical equipment shall provide the administration with complete information about the identity of each person who has an ownership or controlling interest in their business and shall comply with federal bonding requirements in a manner prescribed by the administration.

6. For persons who are at least twenty-one years of age, treatment of medical conditions of the eye, excluding eye examinations for prescriptive lenses and the provision of prescriptive lenses.

7. Early and periodic health screening and diagnostic services as required by section 1905(r) of title XIX of the social security act for members who are under twenty-one years of age.

8. Family planning services that do not include abortion or abortion counseling. If a contractor elects not to provide family planning services, this election does not disqualify the contractor from delivering all other covered health and medical services under this chapter. In that event, the administration may contract directly with another contractor, including an outpatient surgical center or a noncontracting provider, to deliver family planning services to a member who is enrolled with the contractor that elects not to provide family planning services.

9. Podiatry services that are performed by a podiatrist who is licensed pursuant to title 32, chapter 7 and ordered by a primary care physician or primary care practitioner.

10. Nonexperimental transplants approved for title XIX reimbursement.

11. Dental services as follows:

(a) Except as provided in subdivision (b) of this paragraph, for persons who are at least twenty-one years of age, emergency dental care and extractions in an annual amount of not more than $1,000 per member.

(b) Subject to approval by the centers for medicare and medicaid services, for persons treated at an Indian health service or tribal facility, adult dental services that are eligible for a federal medical assistance percentage of one hundred percent and that exceed the limit prescribed in subdivision (a) of this paragraph.

12. Ambulance and nonambulance transportation, except as provided in subsection G of this section.

13. Hospice care.

14. Orthotics, if all of the following apply:

(a) The use of the orthotic is medically necessary as the preferred treatment option consistent with medicare guidelines.

(b) The orthotic is less expensive than all other treatment options or surgical procedures to treat the same diagnosed condition.

(c) The orthotic is ordered by a physician or primary care practitioner.

15. Subject to approval by the centers for medicare and medicaid services, medically necessary chiropractic services that are performed by a chiropractor who is licensed pursuant to title 32, chapter 8 and that are ordered by a primary care physician or primary care practitioner pursuant to rules adopted by the administration. The primary care physician or primary care practitioner may initially order up to twenty visits annually that include treatment and may request authorization for additional chiropractic services in that same year if additional chiropractic services are medically necessary.

16. For up to ten program hours annually, diabetes outpatient self-management training services, as defined in 42 United States Code section 1395x, if prescribed by a primary care practitioner in either of the following circumstances:

(a) The member is initially diagnosed with diabetes.

(b) For a member who has previously been diagnosed with diabetes, either:

(i) A change occurs in the member's diagnosis, medical condition or treatment regimen.

(ii) The member is not meeting appropriate clinical outcomes.

B. The limits and exclusions for health and medical services provided under this section are as follows:

1. Circumcision of newborn males is not a covered health and medical service.

2. For eligible persons who are at least twenty-one years of age:

(a) Outpatient health services do not include speech therapy.

(b) Prosthetic devices do not include hearing aids, dentures, bone-anchored hearing aids or cochlear implants. Prosthetic devices, except prosthetic implants, may be limited to $12,500 per contract year.

(c) Percussive vests are not covered health and medical services.

(d) Durable medical equipment is limited to items covered by medicare.

(e) Nonexperimental transplants do not include pancreas-only transplants.

(f) Bariatric surgery procedures, including laparoscopic and open gastric bypass and restrictive procedures, are not covered health and medical services.

C. The system shall pay noncontracting providers only for health and medical services as prescribed in subsection A of this section and as prescribed by rule.

D. The director shall adopt rules necessary to limit, to the extent possible, the scope, duration and amount of services, including maximum limits for inpatient services that are consistent with federal regulations under title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)). To the extent possible and practicable, these rules shall provide for the prior approval of medically necessary services provided pursuant to this chapter.

E. The director shall make available home health services in lieu of hospitalization pursuant to contracts awarded under this article. For the purposes of this subsection, "home health services" means the provision of nursing services, home health aide services or medical supplies, equipment and appliances that are provided on a part-time or intermittent basis by a licensed home health agency within a member's residence based on the orders of a physician or a primary care practitioner. Home health agencies shall comply with the federal bonding requirements in a manner prescribed by the administration.

F. The director shall adopt rules for the coverage of behavioral health services for persons who are eligible under section 36-2901, paragraph 6, subdivision (a). The administration acting through the regional behavioral health authorities shall establish a diagnostic and evaluation program to which other state agencies shall refer children who are not already enrolled pursuant to this chapter and who may be in need of behavioral health services. In addition to an evaluation, the administration acting through regional behavioral health authorities shall also identify children who may be eligible under section 36-2901, paragraph 6, subdivision (a) or section 36-2931, paragraph 5 and shall refer the children to the appropriate agency responsible for making the final eligibility determination.

G. The director shall adopt rules providing for transportation services and rules providing for copayment by members for transportation for other than emergency purposes. Subject to approval by the centers for medicare and medicaid services, nonemergency medical transportation shall not be provided except for stretcher vans and ambulance transportation. Prior authorization is required for transportation by stretcher van and for medically necessary ambulance transportation initiated pursuant to a physician's direction. Prior authorization is not required for medically necessary ambulance transportation services rendered to members or eligible persons initiated by dialing telephone number 911 or other designated emergency response systems.

H. The director may adopt rules to allow the administration, at the director's discretion, to use a second opinion procedure under which surgery may not be eligible for coverage pursuant to this chapter without documentation as to need by at least two physicians or primary care practitioners.

I. If the director does not receive bids within the amounts budgeted or if at any time the amount remaining in the Arizona health care cost containment system fund is insufficient to pay for full contract services for the remainder of the contract term, the administration, on notification to system contractors at least thirty days in advance, may modify the list of services required under subsection A of this section for persons defined as eligible other than those persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). The director may also suspend services or may limit categories of expense for services defined as optional pursuant to title XIX of the social security act (P.L. 89-97; 79 Stat. 344; 42 United States Code section 1396 (1980)) for persons defined pursuant to section 36-2901, paragraph 6, subdivision (a). Such reductions or suspensions do not apply to the continuity of care for persons already receiving these services.

J. All health and medical services provided under this article shall be provided in the geographic service area of the member, except:

1. Emergency services and specialty services provided pursuant to section 36-2908.

2. That the director may allow the delivery of health and medical services in other than the geographic service area in this state or in an adjoining state if the director determines that medical practice patterns justify the delivery of services or a net reduction in transportation costs can reasonably be expected. Notwithstanding the definition of physician as prescribed in section 36-2901, if services are procured from a physician or primary care practitioner in an adjoining state, the physician or primary care practitioner shall be licensed to practice in

that state pursuant to licensing statutes in that state that are similar to title 32, chapter 13, 15, 17 or 25 and shall complete a provider agreement for this state.

K. Covered outpatient services shall be subcontracted by a primary care physician or primary care practitioner to other licensed health care providers to the extent practicable for purposes including, but not limited to, making health care services available to underserved areas, reducing costs of providing medical care and reducing transportation costs.

L. The director shall adopt rules that prescribe the coordination of medical care for persons who are eligible for system services. The rules shall include provisions for transferring patients and medical records and initiating medical care.

M. Notwithstanding section 36-2901.08, monies from the hospital assessment fund established by section 36-2901.09 may not be used to provide chiropractic services as prescribed in subsection A, paragraph 15 of this section.

N. Notwithstanding section 36-2901.08, monies from the hospital assessment fund established by section 36-2901.09 may not be used to provide diabetes outpatient self-management training services as prescribed in subsection A, paragraph 16 of this section.

O. For the purposes of this section, "ambulance" has the same meaning prescribed in section 36-2201.

E-3.

DEPARTMENT OF ECONOMIC SECURITY
Title 6, Chapter 2

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2205

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 10, 2025

SUBJECT: **DEPARTMENT OF ECONOMIC SECURITY**
Title 6, Chapter 2

Summary

This Five-Year Review Report (5YRR) from the Department of Economic Security (Department) relates to six (6) rules in Title 6, Chapter 2, Articles 1 and 2 related to Employment and Training. Specifically, Article 1 relates to General Provisions and Article 2 relates to Employment Services provided by the Department.

The Division of Employment and Rehabilitation Services (DERS) is the division within the Department that is responsible for overseeing the Employment Service program in Arizona. Employment Service is a core program partner of the Workforce Innovation and Opportunity Act (WIOA) and provides placement services for job seekers and labor force recruitment services for employers. The Employment Service program focuses on providing a variety of employment-related labor exchange services including job search assistance, job referral and placement assistance for job seekers, reemployment services to Unemployment Insurance claimants, and recruitment services for employers with job openings.

In the Department's 5YRR approved by the Council in August 2014, the Department indicated it would submit a rulemaking package to amend rules R6-2-101, R6-2-102, R6-2-103, and R6-2-201 to make them clear, concise, understandable, effective, and consistent with state and federal law. However, in the Department's next 5YRR for these rules, approved by the

Council in August 2019, the Department indicated, while it received an exception to the rulemaking moratorium in August 2014 and anticipated filing a Notice of Final Rulemaking within six months, it did not complete this rulemaking due to Department-wide reprioritization that identified higher-priority rulemakings.

In the prior 5YRR approved by the Council in August 2019, the Department reiterated its intention to amend rules R6-2-101, R6-2-103, and R6-2-201 as they contain outdated terms and statutory references. Specifically, the Department indicated the rules reference the Department's Authority Library, Employment Standards Administration (ESA), the Job Training Partnership Act (JTPA), United States Employment Service ("USES"), and America's Job Bank, which no longer exist. The Department also indicated the rules incorporate by reference 29 CFR 29.5, which is outdated. For the same reason, the Department indicated these rules are also inconsistent with current law and are not effective in meeting their objective. However, the Department did not plan to amend rule R6-2-102 at that time, due to a Notice of Proposed Rulemaking issued by the U.S. Department of Labor that would amend 20 CFR 658.410 and 658.411. The Department indicated these amendments to these regulations would require additional revisions to rule R6-2-102. The Department stated it would seek an additional moratorium exception for rule R6-2-102 when the federal regulations were final. The Department anticipated filing a Notice of Proposed Rulemaking by July 2020.

The Department indicates it did not complete the prior proposed course of action in the 5YRR approved by the Council in August 2019. The Department states the previous Governor's Administration did not approve the moratorium exception request until October 29, 2020. Upon approval, the Department indicates its resources were heavily diverted to provide COVID-19 Pandemic response services. The Department was responsible for providing essential services to families, which caused a significant delay in the progress of rulemaking. The Department also overhauled its internal drafting and review process, resulting in secondary reviews, by both the general public and internal and external stakeholders in order to mitigate the number of comments received during the formal comment period, which have the potential to cause additional delays in submitting the Notice of Final Rulemaking to the Council. Additionally, the Department determined that additional rules regarding the statewide apprenticeship program that is overseen by the Department's Arizona Office of Apprenticeship, needed to be added to formally identify the Department as the designated registration agency for the federally prescribed Apprenticeship Program in Arizona in accordance with 29 CFR § 29.13(a)(1). As a result of adding these additional rules, the Department recently completed the informal stakeholder input to ensure these proposed revisions were properly vetted.

Proposed Action

In the current report, the Department proposes to update the rules in Title 6, Chapter 2 to align the rules with the Department's current practices and to bring the Department's rules into compliance with the Wagner-Peyser Act, the Workforce Innovation and Opportunity Act, corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing the Notice of Final Rulemaking with the Council by March 2025.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Department previously completed an economic, small business, and consumer impact statement on these rules during a 1999 rulemaking. In that report, the Department estimated that the proposed rules would have an "intangible economic, small business, and consumer impact," which has proven to be an accurate assessment of the impact of the 1999 rulemaking. While some of the rules in Chapter 2 are outdated and inconsistent with controlling statutes and regulations, there are no negative economic impacts on consumers or small businesses and the rules continue to be necessary and useful to the public.

The impact statement from 1999 provided information on job seekers and employers served. While the Department continues to report information on job seekers and employers to the U.S. Department of Labor, the definitions and data elements have changed, and thus the numbers cannot be compared. In SFY 2023, the Department provided services to 43,177 job seekers. Employers placed over 16,000 job orders with the Department. The Department also served more than 5,900 apprentices in SFY 2023.

In SFY 2023, operation costs, including administrative costs and services, were approximately $13.6 million. The average program staffing level in SFY 2023 was a full-time employee equivalent of 95 staff.

Stakeholders include the Department, job seekers, employers, and employees.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

These rules govern all aspects of the Employment Service Program. The benefits of these rules outweigh any costs associated with the rules and impose the least burden on individuals regulated by these rules. The Department does not anticipate any negative impacts on small businesses or individuals regulated by these rules.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it has not received any written criticism of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the following rules are not clear, concise, and understandable:

- **R6-2-101:**
    - The terms defined in this rule are outdated or no longer used and do not align with the Workforce Innovation and Opportunity Act (WIOA), which amended the Wagner-Peyser Act.
- **R6-2-102:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's complaint process.
- **R6-2-103:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's appeals and hearings processes.
- **R6-2-104:**
    - The priority of service schedule outlined in this rule does not align with the Wagner-Peyser Act.
- **R6-2-201:**
    - The rule lists aptitude testing as a service that is no longer available through the Employment and Training Program, which is in alignment with the Department of Labor's current practice. Aptitude testing is not required under federal regulations or statutes for Employment and Training.
- **R6-2-202:**
    - The rule does not align with the WIOA, which amended the Wagner-Peyser Act by requiring state agencies to develop a labor exchange system to assist job seekers in finding employment.

6. <u>Has the agency analyzed the rules' consistency with other rules and statutes?</u>

The Department indicates the following rules are not consistent with other rules and statutes:

- **R6-2-101:**
    - The terms defined in this rule are outdated or no longer used and do not align with the Workforce Innovation and Opportunity Act (WIOA), which amended the Wagner-Peyser Act.
- **R6-2-102:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's complaint process.
- **R6-2-103:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's appeals and hearings processes.
- **R6-2-104:**

    - The priority of service schedule outlined in this rule does not align with the Wagner-Peyser Act.
- **R6-2-201:**
    - The rule lists aptitude testing as a service that is no longer available through the Employment and Training Program, which is in alignment with the Department of Labor's current practice. Aptitude testing is not required under federal regulations or statutes for Employment and Training.
- **R6-2-202:**
    - The rule does not align with the WIOA, which amended the Wagner-Peyser Act by requiring state agencies to develop a labor exchange system to assist job seekers in finding employment.

7. <u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>

The Department indicates the following rules are not effective in achieving their objectives:

- **R6-2-101:**
    - The terms defined in this rule are outdated or no longer used and do not align with the Workforce Innovation and Opportunity Act (WIOA), which amended the Wagner-Peyser Act.
- **R6-2-102:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's complaint process.
- **R6-2-103:**
    - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's appeals and hearings processes.
- **R6-2-104:**
    - The priority of service schedule outlined in this rule does not align with the Wagner-Peyser Act.
- **R6-2-201:**
    - The rule lists aptitude testing as a service that is no longer available through the Employment and Training Program, which is in alignment with the Department of Labor's current practice. Aptitude testing is not required under federal regulations or statutes for Employment and Training.
- **R6-2-202:**
    - The rule does not align with the WIOA, which amended the Wagner-Peyser Act by requiring state agencies to develop a labor exchange system to assist job seekers in finding employment.

8. <u>Has the agency analyzed the current enforcement status of the rules?</u>

The Department indicates the following rules are not enforced as written:

- **R6-2-101:**
  - The terms defined in this rule are outdated or no longer used and do not align with the Workforce Innovation and Opportunity Act (WIOA), which amended the Wagner-Peyser Act.
- **R6-2-102:**
  - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's complaint process.
- **R6-2-103:**
  - The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's appeals and hearings processes.
- **R6-2-104:**
  - The priority of service schedule outlined in this rule does not align with the Wagner-Peyser Act.
- **R6-2-201:**
  - The rule lists aptitude testing as a service that is no longer available through the Employment and Training Program, which is in alignment with the Department of Labor's current practice. Aptitude testing is not required under federal regulations or statutes for Employment and Training.
- **R6-2-202:**
  - The rule does not align with the WIOA, which amended the Wagner-Peyser Act by requiring state agencies to develop a labor exchange system to assist job seekers in finding employment.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates the rules are not more stringent than corresponding federal law, which includes the Wagner-Peyser Act, as amended by the WIOA of 2014, 20 CFR 651 through 654, and 20 CFR 658.400 through 658.424.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Department indicates that A.R.S. § 41-1037 does not apply because none of the rules were adopted after July 29, 2010 nor do they require the issuance of a permit, license, or agency authorization.

11. Conclusion

This 5YRR from the Department relates to six (6) rules in Title 6, Chapter 2, Articles 1 and 2 related to Employment and Training. The Department indicates these rules are not clear, concise, understandable, consistent, effective, or enforced as written. The Department proposes

to update the rules in Title 6, Chapter 2 to align the rules with the Department's current practices and to bring the Department's rules into compliance with the Wagner-Peyser Act, the Workforce Innovation and Opportunity Act, corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing the Notice of Final Rulemaking with the Council by March 2025.

Council staff recommends approval of this report.

DEPARTMENT OF ECONOMIC SECURITY
Your Partner For A Stronger Arizona

Katie Hobbs
Governor

Angie Rodgers
Director

October 24, 2024

Ms. Jessica Klein
Council Chair
Governor's Regulatory Review Council
Department of Administration
100 North 15th Avenue, Suite 305
Phoenix, Arizona 85007

Dear Ms. Klein:

Attached is the Arizona Department of Economic Security (Department) Five-Year Review Report for Arizona Administrative Code (A.A.C.) Title 6, Chapter 2, Employment and Training.

Pursuant to A.R.S. § 41-1056(A) and A.A.C. R1-6-301(C)(4), the Department certifies that it is in compliance with A.R.S. § 41-1091.

Thank you for your attention to this report. The Department will be present at the Council meetings to respond to any questions the Council members may have about the report.

If you have any questions, please contact Hiroko Flores, Deputy Rules Administrator, Governance and Innovation Administration, at (480) 487-7694.

Sincerely,

Nicole Davis

Nicole Davis
Office of General Counsel

Department of Economic Security
Title 6, Chapter 2
Employment and Training
Five-Year Review Report

1. Authorization of the rule by existing statutes:

General Statutory Authority: A.R.S. §§ 41-1003 and 41-1954(A)(3)

Specific Statutory Authority: A.R.S. §§ 23-645 and 23-648

2. Analysis of rules:

Rule	Analysis	
R6-2-101	Title:	Definitions
	Objective:	The objective of this rule is to define the terms in this Chapter and promote a uniform understanding of terms used by the Employment and Training Program.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The terms defined in this rule are outdated or no longer used and do not align with the Workforce Innovation and Opportunity Act (WIOA), which amended the Wagner-Peyser Act.*

Rule	Analysis	
R6-2-102	Title:	Complaints
	Objective:	The objective of this rule is to describe the Employment and Training Program's complaint process under 20 CFR 658.400 through 658.416 and is incorporated by reference.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's complaint process.*

Rule	**Analysis**	
R6-2-103	Title:	Hearings and Appeals
	Objective:	The objective of this rule is to describe the Employment and Training Program's appeals and hearing processes to which an employer, applicant, or worker may be entitled under applicable state or federal employment services laws.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The federal regulations that were incorporated by reference when this rule was codified have since been amended and no longer adequately describe the Employment and Training Program's appeals and hearings processes.*

Rule	**Analysis**	
R6-2-104	Title:	Policy of Nondiscrimination; Schedule of Services
	Objective:	The objective of this rule is to describe the Department's nondiscrimination policy in the administration of the state employment offices and describes the priority of service to qualified applicants for work.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The priority of service schedule outlined in this rule does not align with the Wagner-Peyser Act.*

Rule	**Analysis**	
R6-2-201	Title:	Worker Services
	Objective:	The objective of this rule is to describe services available to a worker, the application process, and procedures for when the Department conducts employment testing.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule lists aptitude testing as a service that is no longer available through the Employment and Training Program, which is in alignment with the Department of Labor's current practice. Aptitude testing is not required under federal regulations or statutes for Employment and Training.*

Rule	**Analysis**	
R6-2-202	Title:	Employer Services
	Objective:	The objective of this rule is to describe the Department's requirements for employers placing a job order, including bona fide occupational qualifications, and how the Department refers workers to a job order.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not align with the WIOA, which amended the Wagner-Peyser Act by requiring state agencies to develop a labor exchange system to assist job seekers in finding employment.*

3. Has the Department received written criticisms of the rules within the last five years?

☐ **Yes** ☑ **No**

4. Economic, small business, and consumer impact comparison:

The Department previously completed an economic, small business, and consumer impact statement on these rules during a 1999 rulemaking. In that report, the Department estimated that the proposed rules would have an “intangible economic, small business, and consumer impact," which has proven to be an accurate assessment of the impact of the 1999 rulemaking. While some of the rules in Chapter 2 are outdated and inconsistent with controlling statutes and regulations, there are no negative economic impacts on consumers or small businesses and the rules continue to be necessary and useful to the public.

The impact statement from 1999 provided information on job seekers and employers served. While the Department continues to report information on job seekers and employers to the U.S. Department of Labor, the definitions and data elements have changed, and thus the numbers cannot be compared. In SFY 2023, the Department provided services to 43,177 job seekers. Employers placed over 16,000 job orders with the Department. The Department also served more than 5,900 apprentices in SFY 2023.

In SFY 2023, operation costs, including administrative costs and services, were approximately $13.6 million. The average program staffing level in SFY 2023 was a full-time employee equivalent of 95 staff.

5. Has the agency received any business competitiveness analyses of the rules?

☐ **Yes** ☑ **No**

6. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

☐ **Yes** ☑ **No**

In the previous Five-Year Review Report, approved by the Council on August 6, 2019, the Department anticipated filing a Notice of Proposed Rulemaking by July 2020. However, the previous Governor's Administration did not approve the moratorium exception request originally submitted on September 9, 2019 until October 29, 2020. Upon approval, the Department's resources were heavily diverted to provide COVID-19 Pandemic response services. The Department was responsible for providing essential services to families, which caused a significant delay in the progress of rulemaking. The Department also overhauled its internal drafting and review process, resulting in secondary reviews, by both the general public and internal and external stakeholders in order to mitigate the number of comments received during the formal comment period, which have the potential to cause additional delays in submitting the Notice of Final Rulemaking to the Council. Additionally, the Department determined that additional rules regarding the statewide apprenticeship program that is overseen by the Department's Arizona Office of Apprenticeship, needed to be added to formally identify the Department as the designated registration agency for the federally prescribed Apprenticeship Program in Arizona in accordance with 29 CFR § 29.13(a)(1). As a result of adding these additional rules, the Department recently completed the informal stakeholder input to ensure these proposed revisions were properly vetted.

7. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

These rules govern all aspects of the Employment Service Program. The benefits of these rules outweigh any costs associated with the rules and impose the least burden on individuals regulated by these rules. The Department does not anticipate any negative impacts on small businesses or individuals regulated by these rules.

8. **Are the rules more stringent than corresponding federal laws?**

☐ **Yes** ☑ **No**

9. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

The Department has determined that A.R.S. § 41-1037 does not apply to these rules because none of the rules were adopted after July 29, 2010, and does not require the issuance of a permit, license, or agency authorization.

10. Proposed course of action:

The Department proposes to update the rules in 6 A.A.C. 2 to align the rules with the Department's current practices and to address the issues in section 2 of this report. These amendments will bring the Department into compliance with the Wagner-Peyser Act, the Workforce Innovation and Opportunity Act, corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing the Notice of Final Rulemaking with the Council by March 2025.

TITLE 6. ECONOMIC SECURITY

CHAPTER 2. DEPARTMENT OF ECONOMIC SECURITY EMPLOYMENT AND TRAINING

(Authority: A.R.S. § 41-1954 et seq.)

ARTICLE 1. GENERAL PROVISIONS

Article 1, consisting of Sections R6-2-101 through R6-2-103, adopted effective December 20, 1994 (Supp. 94-4).

Article 1, consisting of Sections R6-2-101 through R6-2-112, repealed effective December 20, 1994 (Supp. 94-4).

Section
R6-2-101. Definitions
R6-2-102. Complaints
R6-2-103. Hearings and Appeals
R6-2-104. Policy of Nondiscrimination; Schedule of Services

ARTICLE 5. RESERVED

ARTICLE 6. REPEALED

Article 6, consisting of Sections R6-2-601 through R6-2-620, repealed effective July 30, 1993 (Supp. 93-3).

ARTICLE 1. GENERAL PROVISIONS

R6-2-101. Definitions

The following definitions apply to this Chapter:

1. "America's Job Bank" means a nationwide computer database linking more than 1800 local Employment Service offices. The services of America's Job Bank are available to job seekers and employers via the Internet.
2. "Applicant" means a person who has applied to the Department for worker services and who is a United States citizen or a non-citizen who is legally authorized to work in the United States.
3. "Apprentice" means a worker who is at least age 16 if a higher minimum age standard is otherwise fixed by law, who is employed to learn a skilled trade under standards of apprenticeship that meet the requirements of 29 CFR 29.5 (Office of the Federal Register, National Archives and Records Administration, July 1, 1998), which is incorporated by reference in this rule. This incorporation by reference does not include any later amendments or editions. Copies of the incorporated material are available for inspection at the Department's Authority Library, 1789 West Jefferson, Phoenix, Arizona, and in the Office of the Secretary of State, Public Service Department, 1700 West Washington, Phoenix, Arizona.
4. "Apprenticeship agreement" means a written agreement between an apprentice and an employer or a committee acting on behalf of the employer, containing the terms and conditions for employment of the apprentice.
5. "Apprenticeship program" means a plan containing all terms and conditions for the qualification, recruitment, selection, employment, and training of apprentices.
6. "Apprenticeship program registration" means the acceptance and centralized recording of an apprenticeship program by the ESA that meets the basic standards and requirements established for apprenticeship programs under federal law.
7. "Apprenticeship program sponsor" means a person, association, committee, or organization operating an apprenticeship program and in whose name the program is registered and approved.
8. "BFOQ" or "bona fide occupational qualification" means a finding by an employer that age, sex, national origin, or religion is a characteristic necessary to an individual's ability to perform the job.
9. "Department" means the Arizona Department of Economic Security.
10. "DOT" or "Dictionary of Occupational Titles" means the reference work published by the United States Employ-

ment Service, which contains brief, non-technical definitions of job titles, distinguishing numeric codes, and worker trait data.

11. "Disabled veteran" means:
    a. A veteran who is entitled to compensation under laws administered by the United States Secretary of Veterans Affairs, or
    b. A person who is discharged or released from active military duty because of a service-connected disability.
12. "Employer job referral services" means Department activities that help an employer obtain workers with the occupational qualifications needed by the employer.
13. "Employment counseling" means formulation of a vocational plan that is consistent with a person's vocational skills and interests, and advice on appropriate measures for implementation of that plan.
14. "Employment test" means a standardized method or device for measuring a person's possession of, interest in, or ability to acquire job skills and knowledge.
15. "ESA" or "Employment Security Administration" means the administrative unit within the Department's Division of Employment and Rehabilitation Services with responsibility for all worker and employer services.
16. "Essential functions of a job" means the fundamental job duties of a particular employment position.
17. "Geographic labor clearance" means Department efforts to facilitate labor mobility by encouraging and guiding migration of workers between geographical areas.
18. "Industrial analysis services" means Department activities to assist employers and labor organizations in determining the cause of worker resource problems in a particular business, and provision of information developed by the USES for resolving such problems.
19. "Job bank" means a computerized list of all currently available jobs and employment opportunities listed with the Department.
20. "Job development" means the process by which the Department obtains a job or interview with an employer for a specific applicant for whom the local ESA office has no suitable job opening on file.
21. "Job order" means a request by an employer for the referral of job seekers made available to job seekers via the Department's Job Bank.
22. "JTPA" means the federal Job Training Partnership Act found at 29 U.S.C. 1501 et seq.
23. "Labor market area" means a geographic area consisting of a central city, or group of cities, and the surrounding territory within a reasonable commuting distance.
24. "Major life activities" means functions such as caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.
25. "Occupational labor clearance" means Department efforts to facilitate labor mobility by encouraging and guiding migration of workers between occupations and industry types.
26. "Older worker" means a person age 40 or older who is working or who is unemployed and wishes to work.
27. "Person with a disability" or "disabled worker" means a person who:
    a. Has a physical or mental impairment that substantially limits 1 or more of that person's major life activities;
    b. Has a record of such an impairment; or
    c. Is regarded as having such an impairment.
28. "Physical or mental impairment" means:
    a. Any physiological disorder, or condition, cosmetic disfigurement, or anatomical loss affecting 1 or more of the following body systems: neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genito-urinary, hemic and lymphatic, skin, and endocrine; or
    b. Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.
29. "Placement" means that a public or private employer has hired an applicant that the Department referred to the employer for a job or interview.
30. "Qualified worker" means a worker who possesses the skills, knowledge, and abilities to perform the essential functions of a job.
31. "Reasonable accommodation" means a modification of, or an adjustment to a process, position, or term of employment, that will permit a disabled worker to enjoy the same benefits and privileges of employment as those enjoyed by persons without disabilities.
32. "Substandard work order" means a work order:
    a. Containing employment terms that violate employment-related laws, or
    b. Offering work at wages or conditions that are substantially inferior to those generally prevailing in the labor market area for the same or similar work.
33. "Substantially limits" when used in reference to a disability, means:
    a. Unable to perform a major life activity that the average person in the general population can perform; or
    b. Significantly restricted as to the condition, manner, or duration under which an individual can perform a particular major life activity as compared to the condition, manner, or duration under which the average person in the general population can perform that same major life activity.
34. "Targeted jobs tax credit" means an income tax credit available to businesses that hire persons whom ESA has certified as meeting certain criteria described in 26 U.S.C. 51 (Office of the Federal Register, National Archives and Records Administration, August 10, 1993), which is incorporated by reference in this rule. This incorporation by reference does not include any later amendments or editions. Copies of the incorporated material are available for inspection at the Department's Authority Library, 1789 West Jefferson, Phoenix, Arizona, and in the Office of the Secretary of State, Public Service Department, 1700 West Washington, Phoenix, Arizona.
35. "USES" means the United States Employment Service, which is the unit in the United States Department of Labor's Employment and Training Administration designed to promote a national system of public job service offices.
36. "Veteran" means a person who served in the active military service, and who was discharged or released from service under conditions other than dishonorable.
37. "Vocational plan" means a plan developed jointly by an ESA counselor or counselor-trainee and an applicant that describes:
    a. The applicant's short-range and long-range occupational goals, and
    b. The actions to be taken to implement the plan.

38. "Worker" means a U.S. citizen or a non-citizen who is legally authorized to work in the United States and who is employed or who is unemployed and wishes to work.
39. "Worker services" means the functions the Department performs for the benefit of applicants and workers, including employment counseling, employment testing, preparation of a vocational plan, and referral for employment opportunity.
40. "Worker job referral services" means Department activities to help a worker promptly obtain a job for which the worker is occupationally qualified.
41. "Youth worker" means a worker younger than age 22.

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed, new Section adopted effective December 20, 1994 (Supp. 94-4). Amended by final rulemaking at 5 A.A.R. 2155, effective June 18, 1999 (Supp. 99-2).

R6-2-102. Complaints
The Department shall process all complaints related to the provision of employment services under 20 CFR 658.400 through 658.416 (Office of the Federal Register, National Archives and Records Administration, April 1, 1998), which are incorporated by reference in this rule. This incorporation by reference does not include any later amendments or editions. Copies of the incorporated material are available for inspection at the Department's Authority Library, 1789 West Jefferson, Phoenix, Arizona, and in the Office of the Secretary of State, Public Service Department, 1700 West Washington, Phoenix, Arizona.

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed, new Section adopted effective December 20, 1994 (Supp. 94-4). Amended by final rulemaking at 5 A.A.R. 2155, effective June 18, 1999 (Supp. 99-2).

R6-2-103. Hearings and Appeals
The Department shall conduct any hearing or appeal to which an employer, applicant, or worker may be entitled under applicable state or federal employment services laws, and 20 CFR 658.417 and 658.418 (Office of the Federal Register, National Archives and Records Administration, April 1, 1998), which are incorporated by reference in this rule. This incorporation by reference does not include any later amendments or editions. Copies of the incorporated material are available for inspection at the Department's Authority Library, 1789 West Jefferson, Phoenix, Arizona, and in the Office of the Secretary of State, Public Service Department, 1700 West Washington, Phoenix, Arizona.

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed, new Section adopted effective December 20, 1994 (Supp. 94-4). Amended by final rulemaking at 5 A.A.R. 2155, effective June 18, 1999 (Supp. 99-2).

R6-2-104. Policy of Nondiscrimination; Schedule of Services
In the administration of the state employment office, the Department shall:

A. Not discriminate against any applicant or employer because of age, race, sex, color, religious creed, national origin, disability or political affiliation or belief unless a BFOQ exists;

B. Actively promote employment opportunities for disadvantaged workers and encourage employers to hire workers on the basis of objective qualifications; and

C. Use the following priority schedule to select and refer qualified applicants for work:
1. Disabled veteran applicants;
2. Other veteran applicants;
3. Other applicants.

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4). New Section adopted by final rulemaking at 5 A.A.R. 2155, effective June 18, 1999 (Supp. 99-2).

R6-2-105. Repealed

Historical Note
Adopted effective September 24, 1974 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-106. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-107. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-108. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-109. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-110. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-111. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

R6-2-112. Repealed

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed effective December 20, 1994 (Supp. 94-4).

ARTICLE 2. EMPLOYMENT SERVICES PROVIDED BY THE DEPARTMENT

R6-2-201. Worker Services

A. As permitted by available resources, the Department shall provide services to a worker who is a United States citizen or a

non-citizen authorized to work in the United States. The services include but are not limited to the following:
1. Employment counseling;
2. Aptitude testing;
3. Apprenticeship training; and
4. Job referral services.

B. A worker applying for services shall file an application with the Department. The application shall include the worker's:
1. Name, address, telephone number, social security number, and date of birth;
2. Prior work experience, including information on salary, job duties, and any past military service;
3. Educational background, including technical or other vocational training the worker has completed;
4. Career goals, hobbies, and volunteer work;
5. Availability for work, including a willingness to travel or relocate, desire for full or part-time employment, and desired working hours; and
6. Special skills or proficiencies, including a language other than English or the use of equipment.

C. The Department shall obtain information about a worker's disability as is necessary to provide the worker with appropriate services. This information may include asking the worker whether the worker can perform the essential functions of a particular job, with or without reasonable accommodation.

D. When the Department conducts employment testing, the Department shall:
1. Use only standardized tests and techniques approved by the United States Employment Service; and
2. Not release the results of the tests without the written consent of the tested worker.

Historical Note
Adopted effective September 24, 1975 (Supp. 75-1). Section repealed, new Section adopted effective December 20, 1994 (Supp. 94-4). Section repealed, new Section adopted by final rulemaking at 5 A.A.R. 2155, effective June 18, 1999 (Supp. 99-2).

R6-2-202. Employer Services

A. The Department shall require the following information from an employer who places a job order:
1. A description of the essential functions of the job in sufficient detail to permit the Department to ascertain the qualifications a worker needs to satisfactorily perform the work, with or without reasonable accommodation;
2. An employer's hiring requirements, including the type of license or certification needed, or the type of equipment or tools the worker must supply;
3. The terms and conditions of work, including hours, salary, benefits, promotional opportunities, and travel requirements;
4. The job location and instructions for arranging a job interview.

B. The Department shall refer workers to the employer who most closely match the requirements in the job order. If qualified workers are not available from the Department's files and, if resources are available, the Department shall recruit qualified workers to fill the employer's order.

C. The Department shall not accept a job order from an employer for processing if:
1. The employer's requirements are discriminatory based on age, sex, national origin, or religion, unless the discriminatory characteristic is a bona fide occupational qualification necessary to perform the job. An example of a bona fide occupational qualification that is not discriminatory is the requirement for a female worker in a female intimate apparel retail outlet.
2. The terms and conditions of work are substandard under A.R.S. § 23-776(C)(2).
3. The position is vacant due directly to a strike, lockout, or other labor dispute or conflict between employers and workers, including wage disputes and collective bargaining efforts.
4. A worker is required to pay a fee for the job.

D. If an employer refuses to modify a job order deemed unacceptable by subsection (C), the Department shall notify the employer in writing of discontinuance of services. The notification shall include the employer's right of appeal.

41-1003. Required rule making

Each agency shall make rules of practice setting forth the nature and requirements of all formal procedures available to the public.

41-1954. Powers and duties

A. In addition to the powers and duties of the agencies listed in section 41-1953, subsection E, the department shall:

1. Administer the following services:

(a) Employment services, including manpower programs and work training, field operations, technical services, unemployment compensation, community work and training and other related functions in furtherance of programs under the social security act, as amended, the Wagner-Peyser act, as amended, the federal unemployment tax act, as amended, 33 United States Code, the family support act of 1988 (P.L. 100-485) and other related federal acts and titles.

(b) Individual and family services, which shall include a section on aging, services to children, youth and adults and other related functions in furtherance of social service programs under the social security act, as amended, title IV, except parts B and E, grants to states for aid and services to needy families with children and for child welfare services, title XX, grants to states for services, the older Americans act, as amended, the family support act of 1988 (P.L. 100-485) and other related federal acts and titles.

(c) Income maintenance services, including categorical assistance programs, special services unit, child support collection services, establishment of paternity services, maintenance and operation of a state case registry of child support orders, a state directory of new hires, a support payment clearinghouse and other related functions in furtherance of programs under the social security act, title IV, grants to states for aid and services to needy families with children and for child welfare services, title XX, grants to states for services, as amended, and other related federal acts and titles.

(d) Rehabilitation services, including vocational rehabilitation services and sections for the blind and visually impaired, communication disorders, correctional rehabilitation and other related functions in furtherance of programs under the vocational rehabilitation act, as amended, the Randolph-Sheppard act, as amended, and other related federal acts and titles.

(e) Administrative services, including the coordination of program evaluation and research, interagency program coordination and in-service training, planning, grants, development and management, information, legislative liaison, budget, licensing and other related functions.

(f) Manpower planning, including a state manpower planning council for the purposes of the federal-state-local cooperative manpower planning system and other related functions in furtherance of programs under the comprehensive employment and training act of 1973, as amended, and other related federal acts and titles.

(g) Economic opportunity services, including the furtherance of programs prescribed under the economic opportunity act of 1967, as amended, and other related federal acts and titles.

(h) Intellectual disability and other developmental disability programs, with emphasis on referral and purchase of services. The program shall include educational, rehabilitation, treatment and training services and other related functions in furtherance of programs under the developmental disabilities services and facilities construction act (P.L. 91-517) and other related federal acts and titles.

(i) Nonmedical home and community based services and functions, including department-designated case management, housekeeping services, chore services, home health aid, personal care, visiting nurse services, adult day care or adult day health, respite sitter care, attendant care, home delivered meals and other related services and functions.

2. Provide a coordinated system of initial intake, screening, evaluation and referral of persons served by the department.

3. Adopt rules it deems necessary or desirable to further the objectives and programs of the department.

4. Formulate policies, plans and programs to effectuate the missions and purposes of the department.

5. Employ and determine the conditions of employment and prescribe the duties and powers of administrative, professional, technical, secretarial, clerical and other persons subject to chapter 4, article 4 and, as applicable, article 5 of this title as may be necessary in the performance of its duties, contract for the services of outside advisors, consultants and aides as may be reasonably necessary and reimburse department volunteers, designated by the director, for expenses in transporting clients of the department on official business.

6. Make contracts and incur obligations within the general scope of its activities and operations subject to the availability of funds.

7. Contract with or assist other departments, agencies and institutions of the state, local and federal governments in the furtherance of its purposes, objectives and programs.

8. Be designated as the single state agency for the purposes of administering and in furtherance of each federally supported state plan.

9. Accept and disburse grants, matching funds and direct payments from public or private agencies for the conduct of programs that are consistent with the overall purposes and objectives of the department.

10. Provide information and advice on request by local, state and federal agencies and by private citizens, business enterprises and community organizations on matters within the scope of its duties subject to the departmental rules on the confidentiality of information.

11. Establish and maintain separate financial accounts as required by federal law or regulations.

12. Advise and make recommendations to the governor and the legislature on all matters concerning its objectives.

13. Have an official seal that is judicially noticed.

14. Annually estimate the current year's population of each county, city and town in this state, using the periodic census conducted by the United States department of commerce, or its successor agency, as the basis for such estimates and deliver such estimates to the economic estimates commission before December 15.

15. Estimate the population of any newly annexed areas of a political subdivision as of July 1 of the fiscal year in which the annexation occurs and deliver such estimates as promptly as is feasible after the annexation occurs to the economic estimates commission.

16. Establish and maintain a statewide program of services for persons who are both hearing impaired and visually impaired and coordinate appropriate services with other agencies and organizations to avoid duplication of these services and to increase efficiency. The department of economic security shall enter into agreements for the utilization of the personnel and facilities of the department of economic security, the department of health services and other appropriate agencies and organizations in providing these services.

17. Establish and charge fees for deposit in the department of economic security prelayoff assistance services fund to employers who voluntarily participate in the services of the department that provide job service and retraining for persons who have been or are about to be laid off from employment. The department shall charge only those fees necessary to cover the costs of administering the job service and retraining services.

18. Establish a focal point for addressing the issue of hunger in this state and provide coordination and assistance to public and private nonprofit organizations that aid hungry persons and families throughout this state. Specifically such activities shall include:

(a) Collecting and disseminating information regarding the location and availability of surplus food for distribution to needy persons, the availability of surplus food for donation to charity food bank organizations, and the needs of charity food bank organizations for surplus food.

(b) Coordinating the activities of federal, state, local and private nonprofit organizations that provide food assistance to the hungry.

(c) Accepting and disbursing federal monies, and any state monies appropriated by the legislature, to private nonprofit organizations in support of the collection, receipt, handling, storage and distribution of donated or surplus food items.

(d) Providing technical assistance to private nonprofit organizations that provide or intend to provide services to the hungry.

(e) Developing a state plan on hunger that, at a minimum, identifies the magnitude of the hunger problem in this state, the characteristics of the population in need, the availability and location of charity food banks and the potential sources of surplus food, assesses the effectiveness of the donated food collection and distribution network and other efforts to alleviate the hunger problem, and recommends goals and strategies to improve the status of the hungry. The state plan on hunger shall be incorporated into the department's state comprehensive plan prepared pursuant to section 41-1956.

(f) Establishing a special purpose advisory council on hunger pursuant to section 41-1981.

19. Establish an office to address the issue of homelessness and to provide coordination and assistance to public and private nonprofit organizations that prevent homelessness or aid homeless individuals and families throughout this state. These activities shall include:

(a) Promoting and participating in planning for the prevention of homelessness and the development of services to homeless persons.

(b) Identifying and developing strategies for resolving barriers in state agency service delivery systems that inhibit the provision and coordination of appropriate services to homeless persons and persons in danger of being homeless.

(c) Assisting in the coordination of the activities of federal, state and local governments and the private sector that prevent homelessness or provide assistance to homeless people.

(d) Assisting in obtaining and increasing funding from all appropriate sources to prevent homelessness or assist in alleviating homelessness.

(e) Serving as a clearinghouse on information regarding funding and services available to assist homeless persons and persons in danger of being homeless.

(f) Developing an annual state comprehensive homeless assistance plan to prevent and alleviate homelessness.

(g) Submitting an annual report to the governor, the president of the senate and the speaker of the house of representatives on the status of homelessness and efforts to prevent and alleviate homelessness. The department shall provide a copy of this report to the secretary of state.

20. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

21. Exchange information, including case specific information, and cooperate with the department of child safety for the administration of the department of child safety's programs.

B. If the department of economic security has responsibility for the care, custody or control of a child or is paying the cost of care for a child, it may serve as representative payee to receive and administer social security and United States department of veterans affairs benefits and other benefits payable to such child. Notwithstanding any law to the contrary, the department of economic security:

1. Shall deposit, pursuant to sections 35-146 and 35-147, such monies as it receives to be retained separate and apart from the state general fund on the books of the department of administration.

2. May use such monies to defray the cost of care and services expended by the department of economic security for the benefit, welfare and best interests of the child and invest any of the monies that the director determines are not necessary for immediate use.

3. Shall maintain separate records to account for the receipt, investment and disposition of funds received for each child.

4. On termination of the department of economic security's responsibility for the child, shall release any funds remaining to the child's credit in accordance with the requirements of the funding source or in the absence of such requirements shall release the remaining funds to:

(a) The child, if the child is at least eighteen years of age or is emancipated.

(b) The person responsible for the child if the child is a minor and not emancipated.

C. Subsection B of this section does not pertain to benefits payable to or for the benefit of a child receiving services under title 36.

D. Volunteers reimbursed for expenses pursuant to subsection A, paragraph 5 of this section are not eligible for workers' compensation under title 23, chapter 6.

E. In implementing the temporary assistance for needy families program pursuant to Public Law 104-193, the department shall provide for cash assistance to two-parent families if both parents are able to work only on documented participation by both parents in work activities described in title 46, chapter 2, article 5, except that payments may be made to families who do not meet the participation requirements if:

1. It is determined on an individual case basis that they have emergency needs.

2. The family is determined to be eligible for diversion from long-term cash assistance pursuant to title 46, chapter 2, article 5.

F. The department shall provide for cash assistance under temporary assistance for needy families pursuant to Public Law 104-193 to two-parent families for no longer than six months if both parents are able to work, except that additional assistance may be provided on an individual case basis to families with extraordinary circumstances. The department shall establish by rule the criteria to be used to determine eligibility for additional cash assistance.

G. The department shall adopt the following discount medical payment system for persons who the department determines are eligible and who are receiving rehabilitation services pursuant to subsection A, paragraph 1, subdivision (d) of this section:

1. For inpatient hospital admissions and outpatient hospital services the department shall reimburse a hospital according to the rates established by the Arizona health care cost containment system administration pursuant to section 36-2903.01, subsection G.

2. The department's liability for a hospital claim under this subsection is subject to availability of funds.

3. A hospital bill is considered received for purposes of paragraph 5 of this subsection on initial receipt of the legible, error-free claim form by the department if the claim includes the following error-free documentation in legible form:

(a) An admission face sheet.

(b) An itemized statement.

(c) An admission history and physical.

(d) A discharge summary or an interim summary if the claim is split.

(e) An emergency record, if admission was through the emergency room.

(f) Operative reports, if applicable.

(g) A labor and delivery room report, if applicable.

4. The department shall require that the hospital pursue other third-party payors before submitting a claim to the department. Payment received by a hospital from the department pursuant to this subsection is considered payment by the department of the department's liability for the hospital bill. A hospital may collect any unpaid portion of its bill from other third-party payors or in situations covered by title 33, chapter 7, article 3.

5. For inpatient hospital admissions and outpatient hospital services rendered on and after October 1, 1997, if the department receives the claim directly from the hospital, the department shall pay a hospital's rate established according to this section subject to the following:

(a) If the hospital's bill is paid within thirty days of the date the bill was received, the department shall pay ninety-nine percent of the rate.

(b) If the hospital's bill is paid after thirty days but within sixty days of the date the bill was received, the department shall pay one hundred percent of the rate.

(c) If the hospital's bill is paid any time after sixty days of the date the bill was received, the department shall pay one hundred percent of the rate plus a fee of one percent per month for each month or portion of a month following the sixtieth day of receipt of the bill until the date of payment.

6. For medical services other than those for which a rate has been established pursuant to section 36-2903.01, subsection G, the department shall pay according to the Arizona health care cost containment system capped fee-for-service schedule adopted pursuant to section 36-2904, subsection K or any other established fee schedule the department determines reasonable.

H. The department shall not pay claims for services pursuant to this section that are submitted more than nine months after the date of service for which the payment is claimed.

I. To assist in the location of persons or assets for the purpose of establishing paternity, establishing, modifying or enforcing child support obligations and other related functions, the department has access, including automated access if the records are maintained in an automated database, to records of state and local government agencies, including:

1. Vital statistics, including records of marriage, birth and divorce.

2. State and local tax and revenue records, including information on residence address, employer, income and assets.

3. Records concerning real and titled personal property.

4. Records of occupational and professional licenses.

5. Records concerning the ownership and control of corporations, partnerships and other business entities.

6. Employment security records.

7. Records of agencies administering public assistance programs.

8. Records of the motor vehicle division of the department of transportation.

9. Records of the state department of corrections.

10. Any system used by a state agency to locate a person for motor vehicle or law enforcement purposes, including access to information contained in the Arizona criminal justice information system.

J. Notwithstanding subsection I of this section, the department or its agents shall not seek or obtain information on the assets of an individual unless paternity is presumed pursuant to section 25-814 or established.

K. Access to records of the department of revenue pursuant to subsection I of this section shall be provided in accordance with section 42-2003.

L. The department also has access to certain records held by private entities with respect to child support obligors or obligees, or individuals against whom such an obligation is sought. The information shall be obtained as follows:

1. In response to a child support subpoena issued by the department pursuant to section 25-520, the names and addresses of these persons and the names and addresses of the employers of these persons, as appearing in customer records of public utilities, cable operators and video service providers.

2. Information on these persons held by financial institutions.

M. Pursuant to department rules, the department may compromise or settle any support debt owed to the department if the director or an authorized agent determines that it is in the best interest of this state and after considering each of the following factors:

1. The obligor's financial resources.

2. The cost of further enforcement action.

3. The likelihood of recovering the full amount of the debt.

N. Notwithstanding any law to the contrary, a state or local governmental agency or private entity is not subject to civil liability for the disclosure of information made in good faith to the department pursuant to this section.

23-645. State-federal cooperation

In the administration of this chapter, the department shall:

1. Cooperate with the United States department of labor to the fullest extent consistent with the provisions of this chapter;

2. Take such action as may be necessary to secure to this state and its citizens all advantages available under the provisions of the social security act that relate to unemployment compensation, the federal unemployment tax act, the Wagner-Peyser act and the federal-state extended unemployment compensation act of 1970;

3. Comply with the regulations prescribed by the United States department of labor relating to the receipt or expenditure by this state of money granted under any of such acts; and

4. Make such reports, in such form and containing such information as the secretary of labor may from time to time require and comply with such provisions as the secretary of labor may find from time to time necessary to assure the correctness and verification of such reports.

23-648. Manpower services

A. There shall be established and maintained by the department free public employment offices in such number and in such places as may be necessary for the proper administration of this chapter and for the purpose of performing such duties as are within the purview of the act of Congress entitled "an act to provide for the establishment of a national employment system and for cooperation with the states in the promotion of such system, and for other purposes" approved June 6, 1933.

B. The provisions of the act of Congress, as amended, referred to in subsection A, are accepted by this state in conformity with section 4 of such act, and this state will observe and comply with the requirements thereof.

C. The department is designated and constituted the agency of this state for the purpose of the act of Congress, as amended, referred to in subsection A. The department shall cooperate with any official or agency of the United States having powers or duties under the provisions of the act of Congress, as amended, and shall do and perform all things necessary to secure to this state the benefits of that act, as amended, in the promotion and maintenance of a system of public employment offices.

D. The department shall not engage in any activity under this section not prescribed by federal or state law or federal regulation.

E. The department shall not participate or engage in radio, television or newspaper advertising of specific job openings unless prescribed pursuant to federal law.

E-4.

DEPARTMENT OF ECONOMIC SECURITY
Title 6, Chapter 5, Article 52

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 10, 2025

SUBJECT: **DEPARTMENT OF ECONOMIC SECURITY**
Title 6, Chapter 5, Article 52

Summary

This Five Year Review Report (5YRR) from the Department of Economic Security (Department) relates to twenty-eight (28) rules in Title 6, Chapter 5, Article 52 regarding the Certification and Supervision of Family Child Care Home Providers.

In the prior 5YRR for these rules, which was approved by the Council in August 2019, the Department did not propose any changes to the rules.

Proposed Action

In the current report, the Department proposes to update the rules in Title 6, Chapter 5, Article 52 to bring the Department in compliance with the Child Care and Development Block Grant Act of 2014 and corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing a Notice of Final Rulemaking with the Council by June 2025.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Department previously completed an Economic, Small Business, and Consumer Impact Statement on these rules during a final rulemaking approved by GRRC on October 4, 2016. The rulemaking removed unnecessary restrictions that required infant/child cardiopulmonary resuscitation (CPR) and first aid (FA) training to be "approved by" the American Red Cross (ARC) or the American Heart Association (AHA), rather than "conform with" ARC or the AHA guidelines. This impacted which organizations could provide acceptable training in infant/child CPR and FA to DES-certified childcare providers, making it more difficult for providers to comply with the requirements. The restrictions also limited the number of vendors qualified to deliver CPR/FA training to applicants and DES-certified child care providers. The Department states that the amendments to this rule had a positive economic impact on both DES-certified childcare providers and organizations that deliver a classroom or blended-learning CPR/FA combined course that conforms to the guidelines of the ARC or the AHA. The Department believes that by promoting fair competition among providers of equivalent CPR/FA training, especially in rural areas, the rules resulted in greater flexibility and cost-savings to DES-child care providers without adversely affecting public health and safety.

Stakeholders include the Department; vendors offering CPR/FA training; certified childcare providers and applicants, children under their care, and the children's parents; and the general public.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states that these rules govern the requirements for becoming a DES-Certified Family Child Care Home Provider. The Department indicates that the benefits of the rules impose the least burden on individuals regulated by these rules. The Department does not anticipate any negative impacts on small businesses or individuals regulated by these rules.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it has not received any written criticism of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the following rules are not clear, concise, and understandable:

- **R6-5-5201:**
    - Some terms defined in this rule are outdated or no longer used or do not align with federal or state statutes and regulations.
- **R6-5-5202:**

    - The rule does not include the full set of criminal background checks required under 45 CFR 98 nor all the required immunizations under state law.
- **R6-5-5203:**
    - The health and safety requirements for a provider's home in this rule are not in alignment with 45 CFR 98.
- **R6-5-5204:**
    - This rule does not reflect the shift in statutory and regulatory authority of the required CHILDS central registry background checks to the Department of Child Safety under A.R.S. § 8-451. The central registry background checks are now performed by the Department of Child Safety.
- **R6-5-5207:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to criminal background checks, training, and emergency response planning.
- **R6-5-5208:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to the responsibilities of the provider and the Department for recertification.
- **R6-5-5210:**
    - The rule does not reflect the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451 and it does not align with the health and safety requirements under 45 CFR 98.
- **R6-5-5212:**
    - The rule does not align with positive discipline techniques and expulsion prevention requirements under 45 CFR 98.
- **R6-5-5213:**
    - The rule is not in alignment with the requirement of the provider to use a full-sized baby crib and the dimensions of a full-sized baby crib under 16 CFR 1219 Safety Standards for Full-size Baby Cribs.
- **R6-5-5214:**
    - This rule does not align with the requirements and standards for the prevention of sudden infant death syndrome and safe sleeping practices required under 45 CFR 98.
- **R6-5-5216:**
    - The rule does not align with A.R.S. 28-914 which prohibits the use of a cellular phone while driving.
- **R6-5-5217:**
    - This rule does not align with health and safety requirements related to foods and beverages served by a provider under 45 CFR 98.
- **R6-5-5218:**
    - The rule does not align with health and safety requirements for the disposal of bio-contaminants under 45 CFR 98.
- **R6-5-5219:**
    - The rule does not provide for the record retention of emergency evacuation drills as required under 45 CFR 98.
- **R6-5-5221:**

    - The rule does not address the reporting requirements for incidents related to a child in care's welfare as required under 45 CFR 98.
- **R6-5-5222:**
    - This rule does not describe the exception to this requirement, such as not requiring a backup provider in rural areas where none are available.
- **R6-5-5224:**
    - The rule does not align with program integrity and enforcement requirements under 45 CFR 98.
- **R6-5-5226:**
    - The rule does not recognize the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451.

6. <u>Has the agency analyzed the rules' consistency with other rules and statutes?</u>

The Department indicates the following rules are not consistent with other rules and statutes:

- **R6-5-5201:**
    - Some terms defined in this rule are outdated or no longer used or do not align with federal or state statutes and regulations.
- **R6-5-5202:**
    - The rule does not include the full set of criminal background checks required under 45 CFR 98 nor all the required immunizations under state law.
- **R6-5-5203:**
    - The health and safety requirements for a provider's home in this rule are not in alignment with 45 CFR 98.
- **R6-5-5204:**
    - This rule does not reflect the shift in statutory and regulatory authority of the required CHILDS central registry background checks to the Department of Child Safety under A.R.S. § 8-451. The central registry background checks are now performed by the Department of Child Safety.
- **R6-5-5207:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to criminal background checks, training, and emergency response planning.
- **R6-5-5208:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to the responsibilities of the provider and the Department for recertification.
- **R6-5-5210:**
    - The rule does not reflect the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451 and it does not align with the health and safety requirements under 45 CFR 98.
- **R6-5-5212:**
    - The rule does not align with positive discipline techniques and expulsion prevention requirements under 45 CFR 98.
- **R6-5-5213:**

    - The rule is not in alignment with the requirement of the provider to use a full-sized baby crib and the dimensions of a full-sized baby crib under 16 CFR 1219 Safety Standards for Full-size Baby Cribs.
- **R6-5-5214:**
    - This rule does not align with the requirements and standards for the prevention of sudden infant death syndrome and safe sleeping practices required under 45 CFR 98.
- **R6-5-5216:**
    - The rule does not align with A.R.S. 28-914 which prohibits the use of a cellular phone while driving.
- **R6-5-5217:**
    - This rule does not align with health and safety requirements related to foods and beverages served by a provider under 45 CFR 98.
- **R6-5-5218:**
    - The rule does not align with health and safety requirements for the disposal of bio-contaminants under 45 CFR 98.
- **R6-5-5219:**
    - The rule does not provide for the record retention of emergency evacuation drills as required under 45 CFR 98.
- **R6-5-5221:**
    - The rule does not address the reporting requirements for incidents related to a child in care's welfare as required under 45 CFR 98.
- **R6-5-5224:**
    - The rule does not align with program integrity and enforcement requirements under 45 CFR 98.
- **R6-5-5226:**
    - The rule does not recognize the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451.

7. <u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>

The Department indicates the following rules are not effective in achieving their objectives:

- **R6-5-5201:**
    - Some terms defined in this rule are outdated or no longer used or do not align with federal or state statutes and regulations.
- **R6-5-5202:**
    - The rule does not include the full set of criminal background checks required under 45 CFR 98 nor all the required immunizations under state law.
- **R6-5-5203:**
    - The health and safety requirements for a provider's home in this rule are not in alignment with 45 CFR 98.
- **R6-5-5204:**

    - This rule does not reflect the shift in statutory and regulatory authority of the required CHILDS central registry background checks to the Department of Child Safety under A.R.S. § 8-451. The central registry background checks are now performed by the Department of Child Safety.
- **R6-5-5207:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to criminal background checks, training, and emergency response planning.
- **R6-5-5208:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to the responsibilities of the provider and the Department for recertification.
- **R6-5-5210:**
    - The rule does not reflect the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451 and it does not align with the health and safety requirements under 45 CFR 98.
- **R6-5-5212:**
    - The rule does not align with positive discipline techniques and expulsion prevention requirements under 45 CFR 98.
- **R6-5-5213:**
    - The rule is not in alignment with the requirement of the provider to use a full-sized baby crib and the dimensions of a full-sized baby crib under 16 CFR 1219 Safety Standards for Full-size Baby Cribs.
- **R6-5-5214:**
    - This rule does not align with the requirements and standards for the prevention of sudden infant death syndrome and safe sleeping practices required under 45 CFR 98.
- **R6-5-5216:**
    - The rule does not align with A.R.S. 28-914 which prohibits the use of a cellular phone while driving.
- **R6-5-5217:**
    - This rule does not align with health and safety requirements related to foods and beverages served by a provider under 45 CFR 98.
- **R6-5-5218:**
    - The rule does not align with health and safety requirements for the disposal of bio-contaminants under 45 CFR 98.
- **R6-5-5219:**
    - The rule does not provide for the record retention of emergency evacuation drills as required under 45 CFR 98.
- **R6-5-5221:**
    - The rule does not address the reporting requirements for incidents related to a child in care's welfare as required under 45 CFR 98.
- **R6-5-5222:**
    - This rule does not describe the exception to this requirement, such as not requiring a backup provider in rural areas where none are available.
- **R6-5-5224:**

    - The rule does not align with program integrity and enforcement requirements under 45 CFR 98.
- **R6-5-5226:**
    - The rule does not recognize the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451.

8. <u>Has the agency analyzed the current enforcement status of the rules?</u>

The Department indicates the following rules are not enforced as written:

- **R6-5-5201:**
    - Some terms defined in this rule are outdated or no longer used or do not align with federal or state statutes and regulations.
- **R6-5-5202:**
    - The rule does not include the full set of criminal background checks required under 45 CFR 98 nor all the required immunizations under state law.
- **R6-5-5203:**
    - The health and safety requirements for a provider's home in this rule are not in alignment with 45 CFR 98.
- **R6-5-5204:**
    - This rule does not reflect the shift in statutory and regulatory authority of the required CHILDS central registry background checks to the Department of Child Safety under A.R.S. § 8-451. The central registry background checks are now performed by the Department of Child Safety.
- **R6-5-5207:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to criminal background checks, training, and emergency response planning.
- **R6-5-5208:**
    - The rule is not in alignment with the requirements of 45 CFR 98 related to the responsibilities of the provider and the Department for recertification.
- **R6-5-5210:**
    - The rule does not reflect the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451 and it does not align with the health and safety requirements under 45 CFR 98.
- **R6-5-5212:**
    - The rule does not align with positive discipline techniques and expulsion prevention requirements under 45 CFR 98.
- **R6-5-5213:**
    - The rule is not in alignment with the requirement of the provider to use a full-sized baby crib and the dimensions of a full-sized baby crib under 16 CFR 1219 Safety Standards for Full-size Baby Cribs.
- **R6-5-5214:**
    - This rule does not align with the requirements and standards for the prevention of sudden infant death syndrome and safe sleeping practices required under 45 CFR 98.

- **R6-5-5216:**
    - The rule does not align with A.R.S. 28-914 which prohibits the use of a cellular phone while driving.
- **R6-5-5217:**
    - This rule does not align with health and safety requirements related to foods and beverages served by a provider under 45 CFR 98.
- **R6-5-5218:**
    - The rule does not align with health and safety requirements for the disposal of bio-contaminants under 45 CFR 98.
- **R6-5-5219:**
    - The rule does not provide for the record retention of emergency evacuation drills as required under 45 CFR 98.
- **R6-5-5221:**
    - The rule does not address the reporting requirements for incidents related to a child in care's welfare as required under 45 CFR 98.
- **R6-5-5222:**
    - This rule does not describe the exception to this requirement, such as not requiring a backup provider in rural areas where none are available.
- **R6-5-5224:**
    - The rule does not align with program integrity and enforcement requirements under 45 CFR 98.
- **R6-5-5226:**
    - The rule does not recognize the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates the rules are not more stringent than corresponding federal law, which includes the Child Care and Development Block Grant (CCDBG) of 2014 and Child Care and Development Funds (CCDF) regulations at 45 CFR 98 and 99

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the

general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates, as defined at A.R.S. § 41-1001(12), a certification of DES-child care providers meets the criteria of a general permit and meets the requirements of A.R.S. § 41-1037. As such, Council staff believes the Department is in compliance with A.R.S. § 41-1037.

11. Conclusion

This 5YRR from the Department relates to twenty-eight (28) rules in Title 6, Chapter 5, Article 52 regarding the Certification and Supervision of Family Child Care Home Providers. The Department indicates these rules are not clear, concise, understandable, consistent, effective, or enforced as written. The Department proposes to update the rules in Title 6, Chapter 5, Article 52 to bring the Department in compliance with the Child Care and Development Block Grant Act of 2014 and corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing a Notice of Final Rulemaking with the Council by June 2025.

Council staff recommends approval of this report.

Ms. Jessica Klein
Council Chair
Governor's Regulatory Review Council
Department of Administration
100 North 15th Avenue, Suite 305
Phoenix, Arizona 85007

Dear Ms. Klein:

Attached is the Arizona Department of Economic Security (Department) Five-Year Review Report for Arizona Administrative Code (A.A.C.) Title 6, Chapter 5, Social Services, Article 52.

Pursuant to A.R.S. § 41-1056(A) and A.A.C. R1-6-301(C)(4), the Department certifies that it is in compliance with A.R.S. § 41-1091.

Thank you for your attention to this report. The Department will be present at the Council meetings to respond to any questions the Council members may have about the report.

If you have any questions, please contact Hiroko Flores, Deputy Administrator, Governance and Innovation Administration, at (480) 487-7694.

Sincerely,

Nicole Davis

Title 6, Chapter 5, Article 52
Certification and Supervision of Family Child Care Home Providers
Five-Year Review Report

1. Authorization of the rule by existing statutes:

General Statutory Authority: A.R.S. §§ 41-1003, 41-1954(A)(3), and 46-134(10)

Specific Statutory Authority: A.R.S. §§ 41-1072 through 41-1077, 46-802, 46-807, and 46-809

2. Analysis of rules:

Rule	Analysis	
R6-5-5201	Title:	Definitions
	Objective:	The objective of this rule is to define the terms in this Article and promote a uniform understanding of the terms used by the Department.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *Some terms defined in this rule are outdated or no longer used or do not align with federal or state statutes and regulations.*

Rule	Analysis	
R6-5-5202	Title:	Initial Application for Certification
	Objective:	The objective of this rule is to explain the application requirements to become a DES-certified child care provider.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not include the full set of criminal background checks required under 45 CFR 98 nor all the required immunizations under state law.*

Rule	**Analysis**	
R6-5-5203	Title:	Initial Certification: The Home Facility
	Objective:	The objective of this rule is to explain the health and safety requirements and conditions a DES-certified child care provider's home must comply with during the initial certification process to become a DES-certified child care provider.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The health and safety requirements for a provider's home in this rule are not in alignment with 45 CFR 98.*

Rule	**Analysis**	
R6-5-5204	Title:	Initial Certification: Department Responsibilities
	Objective:	The objective of this rule is to explain the Department's responsibilities and the guidelines the Department follows to determine the suitability of a DES-certified child care provider during the initial certification process.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *This rule does not reflect the shift in statutory and regulatory authority of the required CHILDS central registry background checks to the Department of Child Safety under A.R.S. § 8-451. The central registry background checks are now performed by the Department of Child Safety.*

Rule **Analysis**

R6-5-5205 Title: Certification Time-frames

Objective: The objectives of this rule are to provide the public with the time frames involved in the application process prescribed by A.R.S. § 41-1073 and includes separate time frames for determining administrative completeness and completing substantive review of applications.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5206 Title: Certificates: Issuance; Non-transferability

Objective: The objectives of this rule are to describe the requirements regarding the DES certificates issued to certify Child Care Providers. This includes the valid time period of the DES certificate, the non-transferability of a DES certificate, the location in which a DES certificate should be posted in a home facility, the time frame to surrender a DES certificate upon revocation or voluntary closure to

the Department, and that the DES certificate shall designate the number of children allowed in child care at any one time.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5207 Title: Maintenance of Certification: General Requirements; Training

Objective: The objectives of this rule are to establish general requirements for a DES-certified child care provider to maintain a DES certificate, including ongoing training in child care related topics, pediatric cardiopulmonary resuscitation, and first aid. This rule also describes the requirement to maintain a valid fingerprint clearance card for child care personnel, as well as the Department's requirement to conduct announced and unannounced onsite monitoring visits to a DES-certified child care provider.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule is not in alignment with the requirements of 45 CFR 98 related to criminal background checks, training, and emergency response planning.*

Rule **Analysis**

R6-5-5208 Title: Recertification Requirements

Objective: The objective of this rule is to establish the conditions under which the Department may renew a DES certificate issued to a DES-certified child care provider every three years.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule is not in alignment with the requirements of 45 CFR 98 related to the responsibilities of the provider and the Department for recertification.*

Rule **Analysis**

R6-5-5209 Title: Program and Equipment

Objective: The objectives of this rule are to establish a DES-certified child care provider's responsibility to offer a developmentally appropriate program that meets the needs of each child in care and identifies different activities and equipment that can be used in the provider's program.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5210 Title: Safety; Supervision

Objective: The objectives of this rule are to explain the general safety and supervisory requirements for a DES-certified child care provider, the circumstances under which a DES-certified child care provider may use a backup provider, the requirements for notifying the parents and guardians when a backup provider is used, the supervision requirements of children in care, and the mandatory reporting requirements for suspected child abuse and neglect. The rule also

explains the individuals who are authorized to pick up children from a provider's home.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not reflect the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451 and it does not align with the health and safety requirements under 45 CFR 98.*

Rule **Analysis**

R6-5-5211 Title: Sanitation

Objective: The objectives of this rule are to establish adequate sanitation requirements that a DES-certified child care provider shall meet to ensure the health and safety of children in care and to prevent the spread of communicable disease in a DES-certified home.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5212 Title: Discipline

Objective: The objectives of this rule are to describe guidelines and limitations regarding the methods a DES-certified child care provider may use when providing guidance or discipline to children in care, including the requirement to set clear time limits and providing positive guidance, redirection, and time-out.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not align with positive discipline techniques and expulsion prevention requirements under 45 CFR 98.*

Rule	**Analysis**	
R6-5-5213	Title:	Evening and Nighttime Care
	Objective:	The objectives of this rule are to explain the DES-certified child care provider's responsibilities when providing nighttime care and the safe sleep requirements for the children under care.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule is not in alignment with the requirement of the provider to use a full-sized baby crib and the dimensions of a full-sized baby crib under 16 CFR 1219 Safety Standards for Full-size Baby Cribs.*

Rule	**Analysis**	
R6-5-5214	Title:	Children Younger than Age 2
	Objective:	The objective of this rule is to explain the requirements a DES-certified child care provider shall follow when caring for a child younger than two years old, including requirements for feeding, safe sleep, physical contact, and prevention of abusive head trauma.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *This rule does not align with the requirements and standards for the prevention of sudden infant death syndrome and safe sleeping practices required under 45 CFR 98.*

Rule **Analysis**

R6-5-5215 Title: Children with Special Needs

Objective: The objectives of this rule are to explain the responsibilities of a DES-certified child care provider who cares for children with special needs, including the responsibility to consult with parents to establish a mutually agreed upon care plan; ensure reasonable accommodations and inclusion practice; and provide accommodations for private diaper changing area for children older than three years of age.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5216 Title: Transportation

Objective: The objective of this rule is to establish safety guidelines and requirements for a DES-certified child care provider who uses a motorized vehicle to transport a child in care.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not align with A.R.S. 28-914 which prohibits the use of a cellular phone while driving.*

Rule **Analysis**

R6-5-5217 Title: Meals and Nutrition

Objective: The objective of this rule is to explain the DES-certified child care provider's responsibility to supply healthy meals and snacks for children in care and the responsibility to meet special dietary needs for children in care.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *This rule does not align with health and safety requirements related to foods and beverages served by a provider under 45 CFR 98.*

Rule **Analysis**

R6-5-5218 Title: Health Care; Medications

Objective: The objectives of this rule are to establish guidelines for a DES-certified child care provider to control infectious disease, store and administer medications, and keep a written log of medication administered to children in care. This rule also provides procedures to take when a child becomes ill and describes the DES-certified child care provider's responsibility to obtain only emergency medical treatment for a child in care, when needed.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not align with health and safety requirements for the disposal of bio-contaminants under 45 CFR 98.*

Rule **Analysis**

R6-5-5219 Title: Recordkeeping; Unusual Incidents; Immunizations

Objective: The objectives of this rule are to establish the system a DES-certified child care provider shall use to maintain and retain a child's medical records to ensure compliance with the immunization requirements set by the Department of Health Services, including immunization records and exemption affidavits. This system would also include unusual incidents. This rule also requires a DES-certified child care provider to collect and keep certain documents according to the requirements of this Article and the child care registration agreement.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not provide for the record retention of emergency evacuation drills as required under 45 CFR 98.*

Rule **Analysis**

R6-5-5220 Title: Provider/Child Ratios

Objective: The objective of this rule is to establish the ratio of adults to children allowed for DES-certified child care providers and how the

Department may limit the ratio under certain circumstances.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5221 Title: Change Reporting Requirements

Objective: The objective of this rule is to describe a DES-certified child care provider's responsibility to notify the Department of significant changes that may affect the safety and stability of child care services and the timeframe in which changes shall be reported.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not address the reporting requirements for incidents related to a child in care's welfare as required under 45 CFR 98.*

Rule **Analysis**

R6-5-5222 Title: Use of a Backup Provider

Objective: The objectives of this rule are to explain the DES-certified child care provider's responsibility to maintain a DES-approved backup provider to ensure care is provided even when the DES-certified child care provider is unable to care for the children. This rule also addresses the proper use of the DES-approved backup provider and clarifies the procedures for mandatory reporting to the Department and to the parents when backup care is used.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *This rule does not describe the exception to this requirement, such as not requiring a backup provider in rural areas where none are available.*

Rule **Analysis**

R6-5-5223 Title: Claims For Payment

Objective: The objective of this rule is to describe the basis for payment to a DES-certified child care provider for the provision of child care, as well as the responsibility of a DES-certified child care provider to make financial arrangements with a DES-approved backup provider when a backup provider is used to provide child care.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule **Analysis**

R6-5-5224 Title: Complaints; Investigations

Objective: The objective of this rule is to describe the procedures the Department uses to document and investigate a complaint received against a DES-certified child care provider.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not align with program integrity and enforcement requirements under 45 CFR 98.*

Rule	**Analysis**	
R6-5-5225	Title:	Probation
	Objective:	The objective of this rule is to describe the procedures the Department uses when placing a DES-certified child care provider on probation, including timeframes and progressive adverse action that may result from continued noncompliance.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule	**Analysis**	
R6-5-5226	Title:	Certification, Denial, Suspension, and Revocation
	Objective:	The objective of this rule is to establish the criteria the Department uses to deny, suspend, revoke, or refuse to renew a child care certification.

- Is this rule effective in meeting the objective? ☐ **Yes** ☑ **No**
- Is this rule consistent with other rules and statutes? ☐ **Yes** ☑ **No**
- Is this rule enforced as written? ☐ **Yes** ☑ **No**
- Is this rule clear, concise, and understandable? ☐ **Yes** ☑ **No**

Explanation: *The rule does not recognize the shift in statutory and regulatory authority of Child Protective Services to the Department of Child Safety under A.R.S. § 8-451.*

Rule	**Analysis**	
R6-5-5227	Title:	Adverse Action; Notice Effective Date
	Objective:	The objective of this rule is to describe the actions the Department takes to notify a DES-certified child care provider when an adverse action is taken against the DES-certified child care provider.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

Rule	**Analysis**	
R6-5-5228	Title:	Appeals
	Objective:	The objectives of this rule are to establish a DES-certified provider's right to appeal an adverse action taken by the Department; clarify appealable and non-appealable actions; and explain the appeals process.

- Is this rule effective in meeting the objective? ☑ **Yes** ☐ **No**
- Is this rule consistent with other rules and statutes? ☑ **Yes** ☐ **No**
- Is this rule enforced as written? ☑ **Yes** ☐ **No**
- Is this rule clear, concise, and understandable? ☑ **Yes** ☐ **No**

---

3. Has the Department received written criticisms of the rules within the last five years?

☐ **Yes** ☑ **No**

4. Economic, small business, and consumer impact comparison:

The Department previously completed an Economic, Small Business, and Consumer Impact Statement on these rules during a final rulemaking approved by GRRC on October 4, 2016. This rulemaking removed unnecessary restrictions that required infant/child cardiopulmonary resuscitation (CPR) and first aid (FA) training to be "approved by" the American Red Cross (ARC) or the American Heart Association (AHA), rather than “conform with” ARC or the AHA guidelines. This impacted which organizations could provide acceptable training in infant/child CPR and FA to DES-certified child care providers, making it more difficult for providers to comply with the requirement. The restrictions also limited the number of vendors qualified to deliver CPR/FA training to applicants and DES-certified child care providers. In 2016, the cost of a CPR/FA/Automated External Defibrillator(AED) course provided by the ARC was $140.00 per person. The cost of the same course from AHA was $40.00 to $65.00 per person, depending on the trainer. Currently, the cost of a CPR/FA combined training through the ARC ranges from $80.00 - $95.00 per person and equivalent training through the AHA ranges from $80.00 - $100.00 per person, depending on the trainer or location of training. The amendments to this rule had a positive economic impact on both DES-certified child care providers and organizations that deliver a classroom or blended-learning CPR/FA combined course that conforms to the guidelines of the ARC or the AHA. The American Safety and Health Institute and MEDIC First Aid Training Centers in Arizona offer a CPR/FA combined course that is currently $75.00 per person. By promoting fair competition among providers of equivalent CPR/FA training, especially in rural areas, the rules resulted in greater flexibility and cost-savings to DES-child care providers without adversely affecting public health and safety.

The current rules under Article 52 provide the least burdensome economic impact to small businesses and members of the public.

5. Has the agency received any business competitiveness analyses of the rules?

☐ **Yes** ☑ **No**

6. **Has the agency completed the course of action indicated in the agency's previous five-year review report?**

Yes ☐ No ☐ N/A ☑

In the previous Five-Year Review Report approved by the Council on August 6, 2019, the Department did not propose to make any amendments to these rules.

7. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

These rules govern the requirements for becoming a DES-Certified Family Child Care Home Provider. The benefits of these rules outweigh any costs associated with the rules and impose the least burden on individuals regulated by these rules. The Department does not anticipate any negative impacts on small businesses or individuals regulated by these rules.

8. **Are the rules more stringent than corresponding federal laws?**

☐ Yes ☑ No

9. **For rules adopted after July 29, 2010, that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

An analysis of the definition for a general permit, as defined at A.R.S. § 41-1001(12), indicates that a certification of DES-child care providers meets the criteria of a general permit and meets the requirements of A.R.S. § 41-1037.

10. **Proposed course of action:**

The Department proposes to update the rules in 6 A.A.C. 5 Article 52 to address the issues identified in section 2 of this report. These amendments will bring the Department in compliance with the Child Care and Development Block Grant Act of 2014 and corresponding federal regulations, and remove language that is not clear, concise, or understandable. The Department anticipates filing a Notice of Final Rulemaking with the Council by June 2025.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Former Section R6-5-5106 repealed, new Section R6-5-5106 adopted effective September 30, 1977 (Supp. 77-5). Former Section R6-5-5106 repealed, new Section R6-5-5106 adopted effective June 17, 1985 (Supp. 85-3). Section expired under A.R.S. § 41-1056(E) at 7 A.A.R. 5257, effective October 31, 2001 (Supp. 01-4).

R6-5-5107. Expired

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Former Section R6-5-5107 repealed, new Section R6-5-5107 adopted effective September 30, 1977 (Supp. 77-5). Amended effective March 17, 1981 (Supp. 81-2). Former Section R6-5-5107 repealed, new Section R6-5-5107 adopted effective June 17, 1985 (Supp. 85-3). Section expired under A.R.S. § 41-1056(E) at 7 A.A.R. 5257, effective October 31, 2001 (Supp. 01-4).

ARTICLE 52. CERTIFICATION AND SUPERVISION OF FAMILY CHILD CARE HOME PROVIDERS

R6-5-5201. Definitions
The following definitions apply in this Article:

1. "Abandonment" has the meaning ascribed to "abandoned" in A.R.S. § 8-201 (1).
2. "Abuse" has the meaning ascribed in A.R.S. § 8-201 (2).
3. "Age" means years of a person's lifetime when used in reference to a number, unless the term "months" is used.
4. "Adult" means a person age 18 or older.
5. "Applicant" means a person who submits a written application to the Department to become certified as a child care provider.
6. "Backup provider" means an adult who, or an entity that, provides child care when a provider is not available.
7. "CACFP" means the Child and Adult Care Food Program.
8. "Certificate" means a document the Department issues to a provider as evidence that the provider has met the child care standards of this Article.
9. "Child" means a person younger than age 18.
10. "Child care" means the compensated care, supervision, recreation, socialization, guidance, and protection of a child who is unaccompanied by a parent.
11. "Child care personnel" means all adults residing in a home facility, an in-home provider, and any backup provider.
12. "Child care registration agreement" means a written contract between a provider and the Department; that establishes the rights and duties of the provider and the Department for provision of child care.
13. "Child care specialist" means a Department child care eligibility and/or certification staff person.
14. "CHILDS" means the Children's Information Library and Data Source, which is a comprehensive, automated system to support child welfare policies and procedures, and includes information on investigations, ongoing case management, and payments.
15. "CHILDS Central Registry" means the Child Protective Services Central Registry, a confidential, computerized database within CHILDS, which the Department maintains according to A.R.S. § 8-804.
16. "Child with special needs" means a child who needs increased supervision, modified equipment, modified activities, or a modified facility, due to any physical, mental, sensory, or emotional delay, or medical condition, and includes a child who has a physical or mental impairment that substantially limits one or more major life activities; has a record of having a physical or mental impairment that substantially limits one or more of the child's major life activities; or who is regarded as having an impairment, regardless of whether the child has the impairment.
17. "Client" means a person who applies for and meets the eligibility criteria for a child care service program administered by the Department.
18. "Compensation" means something given or received, such as money, goods, or services, as payment for child care services.
19. "Corporal punishment" means any act that is administered as a form of discipline and that either is intended to cause bodily pain, or may result in physical damage or injury.
20. "CPS" means Child Protective Services, a Department administration that operates a program to investigate allegations of child maltreatment and provide protective services.
21. "Department" means the Arizona Department of Economic Security.
22. "Developmentally appropriate" means an action that takes into account:
    a. A child's age and family background;
    b. The predictable changes that occur in a child's physical, emotional, social, cultural, and cognitive development; and
    c. The individual child's pattern and timing of growth, personality, and learning style.
23. "DHS" means the Arizona Department of Health Services.
24. "Direct supervision" means within sight and sound.
25. "Exploitation" means an act of taking advantage of, or making use of a child selfishly, unethically, or unjustly for one's own advantage or profit, in a manner contrary to the best interests of the child, such as having a child panhandle, steal, or perform other illegal activities.
26. "Evening care" means child care provided at any time between 6:30 p.m. and midnight.
27. "Heating device" means an instrument designed to produce heat for a room or inside area and includes a nonelectric stove, fireplace, freestanding stove, or space heater.
28. "Home facility" means a provider's residence that the Department has certified as a location where child care services may be provided.
29. "Household member" means a person who does not provide child care services and who resides in the home facility of a provider for 21 consecutive days or longer or who resides periodically throughout the year for a total of at least 21 days.
30. "Infant" means:
    a. A child who is younger than 12 months old; and
    b. A child who is younger than 18 months old and not walking.
31. "In-home provider" means a provider who cares for a child in the child's home.
32. "Maltreatment" means abuse, neglect, exploitation, or abandonment of a child.
33. "Medication" means any prescribed or over-the-counter drug or medicine.
34. "Mechanical restraint" means a device to restrict a child's movement.

35. "Neglect" has the same meaning ascribed in A.R.S. § 8-201.
36. "Night-time care" means child care provided at any time between midnight and 6:00 a.m.
37. "Non-parent relative" means a caretaker relative who exercises responsibility for the day-to day physical care, guidance, and support of a child who physically resides with the relative and who is by affinity, consanguinity, or court decree, a grandparent, great grandparent, sibling of the whole or half-blood, stepbrother, stepsister, aunt, uncle, great aunt, great uncle, or first cousin of the child.
38. "Parent" means the biological or adoptive parent of a child, a court-appointed guardian, or a non-parent relative.
39. "Provider" means an adult who is not the parent or guardian of a child needing care, and to whom the Department has issued a certificate, and includes a backup provider who performs the provider's duties when the provider is unavailable.
40. "Physical restraint" means the use of bodily force to restrict a child's freedom of movement.
41. "Safeguard" means to use reasonable efforts and developmentally appropriate measures to eliminate the risk of harm to a child in care and ensure that a child in care will not be harmed by a particular object, substance, or activity. Safeguarding may include:
    a. Locking up a particular substance or item;
    b. Putting a substance or item beyond the reach of a child who is not mobile;
    c. Erecting a barrier that prevents a child from reaching a particular place, item, or substance;
    d. Mandating the use of a protective safety device; or
    e. Providing direct supervision.
42. "Sanitize" means treatment by a heating or chemical process that reduces the bacterial count, including pathogens, to a safe level.
43. "Time out" means removing a child from a situation by directing the child to remain in a specific chair or place identified as the time out place, for no more than one minute for each year of a child's age, but no more than 10 minutes.
44. "Undue hardship" means significant difficulty or substantial expense concerning the operation of a provider's program. In this subsection, "significant" and "substantial" are measured relative to the level of net income the provider earns from child care services.
45. "Unusual incident" means any accident, injury, behavior problem, or other extraordinary situation involving a provider or a child in care, including suspected child maltreatment.

Historical Note

Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5202. Initial Application for Certification

A. To become a certified child care provider, an applicant shall comply with all requirements of this Article and other applicable requirements of federal, state, or local law.

B. An applicant shall be at least age 18.

C. An applicant shall submit a complete, signed application form to the Department.

D. An applicant shall designate one or more backup providers from the following list:
1. An individual who is age 18 or older and who satisfies the requirements for backup providers outlined in this Article;
2. A DHS-licensed child care center;
3. A DHS-certified child care group home; or
4. A DES-certified family child care home.

E. An applicant shall participate in any orientation and training and shall cooperate in conducting any pre-certification interviews and inspections the Department may require.

F. An applicant shall give the Department the names of three references who:
1. Have known the applicant at least one year,
2. Are unrelated by blood or marriage to the applicant, and
3. Can furnish information regarding the applicant's character and ability to care for a child.

G. An applicant and any designated individual backup provider shall furnish a self-statement of physical and mental health on a form provided by the Department.

H. An applicant and each designated individual backup provider shall have the physical, mental, and emotional health necessary to perform the duties and meet the responsibilities established by this Article. If the Department has questions about the applicant's health that the applicant cannot satisfactorily answer or explain, the applicant, upon request by the Department, shall submit to a physical or psychological examination by a licensed physician, psychologist, or psychiatrist, and shall provide the Department with a professional opinion addressing the Department's questions. The applicant shall bear the cost of any professional examinations that the Department needs to determine whether the individual is qualified.

I. The Department may require an applicant to furnish at least the following information about the applicant, the applicant's spouse, members of the applicant's household, children residing outside of the applicant's home, and the individual backup provider:
1. Name;
2. Current address;
3. Telephone number;
4. Date of birth;
5. Social security number;
6. Maiden name, aliases, and nicknames;
7. Relationship to the applicant or backup provider;
8. Marital status and marital history;
9. Educational background;
10. Ethnicity;
11. Gender;
12. Birthplace;
13. Physical characteristics; and
14. Citizenship status.

J. Child care personnel shall submit the notarized criminal history certification form required by A.R.S. § 41-1964, and disclose whether they have committed any acts of child maltreatment or have been the subject of a Child Protective Service investigation.

K. On a Department form, an applicant, all adult household members, and all individual backup providers shall provide employment histories for the five-year period immediately preceding the application date, beginning with the individual's present or most recent job.

L. An applicant shall furnish proof that the applicant, the individual backup provider, and members of the applicant's household who are age 13 or younger are immune from measles, rubella, diphtheria, tetanus, pertussis, polio, and any other dis-

eases for which routine immunizations are readily and safely available.

1. The Department may waive the requirements of this subsection for a household member if the applicant will be certified as an in-home provider only and submits an affidavit attesting that household members will not be present when child care services are provided.
2. The Department shall waive the requirements of this subsection if the applicant:
   a. Submits an affidavit stating that household members are being raised in a religion whose teachings oppose immunization; and
   b. Affirms, in writing, that families will be notified of the religious exemption before child care services are provided.

M. An applicant shall submit evidence of current freedom from pulmonary tuberculosis for the applicant, all household members, and all individual backup providers. If the application is approved, this evidence shall be submitted each succeeding calendar year.

1. Evidence required under this subsection is limited to:
   a. A report of a negative Mantoux skin test performed within three months of the date or anniversary date of initial certification.
   b. A physician's written statement based on an examination performed within three months of the date or anniversary date of initial certification.
2. The Department shall waive the requirements of this subsection for household members if the applicant will be certified as an in-home provider only and submits an affidavit that household members will not be present when child care services are provided.

N. An applicant shall provide a statement of services on a Department form. The statement shall describe:

1. The home at which services will be provided, location, and hours of operation;
2. The applicant's daily rates and fees;
3. The ages of children the applicant will accept;
4. The equipment, materials, daily activities, and play areas available to children in care;
5. Any special child care skills, knowledge, or training the applicant has; and
6. The behavior, guidance, and discipline methods the applicant uses.

O. During an interview with the child care specialist, an applicant shall complete a Department questionnaire describing:

1. The applicant's child rearing philosophy;
2. The home environment, including intra-family relationships and attitudes toward child care;
3. The parenting and discipline methods employed by the applicant and the applicant's parents; and
4. The applicant's child care training and experience.

P. Upon Department request, an applicant, all members of the applicant's household, and all individual backup providers shall comply with any additional requirements and requests for interviews, inspections, or information necessary to determine the applicant's fitness to serve as a certified child care provider.

Q. A complete application package consists of an applicant's completed application form and evidence that the applicant, all members of the applicant's household, and all individual backup providers have met all requirements and submitted all information and documentation listed in this Section.

R. The Department shall send an applicant a notice of administrative completeness or deficiency, as described in A.R.S. § 41-1074, indicating the additional information, if any, that the applicant must provide for a complete application package. The Department shall send the notice after receiving the application and before expiration of the administrative completeness review time-frame described in R6-5-5205. If the applicant does not supply the missing information listed in the notice, the Department may close the file.

S. An applicant whose file is closed may reapply for certification.

T. After an applicant submits a complete application for initial certification, the Department shall inspect the applicant's home to determine whether the home meets the regulations of this Article.

Historical Note

Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5203. Initial Certification: The Home Facility

A provider's home facility shall meet the requirements of this Section.

1. A provider shall maintain the indoor and outdoor premises of the home facility in a safe and sanitary condition, free from hazards and vermin, and in good repair. A mobile home shall have skirting to ensure that a child in care cannot go beneath the mobile home.
2. Any area to be occupied by a child in care shall have heat, light, ventilation, and screening. The provider shall maintain the home facility between 68° and 85° F.
3. A provider shall vent and safeguard all heating devices to protect each child from burns and harmful fumes.
4. A provider shall safeguard all potentially dangerous objects from children, including:
   a. Household and automotive tools;
   b. Sharp objects, such as knives, glass objects, and pieces of metal;
   c. Fireplace tools, butane lighters and igniters, and matches;
   d. Machinery;
   e. Electrical boxes;
   f. Electrical outlets;
   g. Electrical wires; and
   h. Chemicals, cleaners, and toxic substances.
5. A provider shall store firearms and ammunition separately from one another, under lock and key or combination lock.
6. A home facility shall have adequate space and equipment to accommodate each child in care, and other household members who are in the home facility at the same time as children in care. In this subsection, "adequate" means sufficient space and equipment to:
   a. Permit all persons in the dwelling to have safe freedom of movement;
   b. Permit children in care to be seated together for meals and snacks; and
   c. Permit all children in care to be engaged in developmentally appropriate activities at the same time and in a room where the provider can keep all children within sight.
7. A provider shall keep outside play areas clean and safe and shall fence the play area if there are conditions that may pose a danger to any child playing outside. The fence shall be at least 4 feet high and free of hazards, including splinters and protruding nails or wires. The

fence shall have only self-closing, self-latching, lockable gates.

8. A home facility shall have the following equipment:
   a. A charged, readily accessible, operable, multi-purpose (ABC class) fire extinguisher that the applicant knows how to operate;
   b. At least one UL-approved, working smoke detector, properly mounted on each level of the dwelling;
   c. At least two usable outdoor exits;
   d. A posted written plan or diagram for emergency evacuation;
   e. A working telephone or other two-way communication device acceptable to the Department; and
   f. An easily accessible life-saving device if the home facility has a pool or other body of water more than 12 inches deep. A "life-saving device" means a ring buoy with at least 25 feet of 1/2-inch rope attached or a shepherd's crook.
9. If a home facility has a swimming pool or other body of water more than 12 inches deep, the pool or body of water shall be enclosed by a permanent fence that separates it from all other outdoor areas and from doors and windows into the home facility. The fence shall be at least 5 feet high and shall have only self-closing, self-latching, lockable gates. Open spaces between upright or parallel posts and poles on fences and gates shall be no more than 4 inches apart. When the pool or body of water is not in use, the provider shall lock the gates.
10. A provider shall enclose spas and hot tubs with fencing as described in subsection (9), or with a hard, locked cover that prevents access and can support at least 100 pounds.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Amended effective March 5, 1979 (Supp. 79-2). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5204. Initial Certification: Department Responsibilities

A. Before issuing a certificate, the Department shall:
1. Conduct at least one face-to-face interview with an applicant;
2. Contact any other person necessary to determine an applicant's fitness to be a certified provider;
3. Ensure that an applicant and all individual backup providers have complied with and satisfy the requirements of R6-5-5202;
4. Inspect the home where an applicant will provide child care, unless it is the child's own home, and ensure that it meets the requirements of R6-5-5203;
5. Conduct a CHILDS Central Registry check for:
   a. An applicant;
   b. The applicant's household members;
   c. The applicant's emancipated children who live outside the applicant's home, if any; and
   d. Any individual backup provider.
6. Find that an applicant has the intent and ability to provide child care that is safe, developmentally appropriate, and in compliance with the requirements of this Article.

B. The Department shall objectively determine whether to certify an applicant based on the applicant's entire application package, and the information the Department has acquired during the course of the application process.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5205. Certification Time-frames

For the purpose of A.R.S. § 41-1073, the Department established the following certification time-frames:
1. Administrative completeness review time-frame: 60 days,
2. Substantive review time-frame: 30 days, and
3. Overall time-frame: 90 days.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5205 renumbered to R6-5-5206 and new Section adopted by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5206. Certificates: Issuance; Non-transferability

A. A certificate is valid for three years from the date of issuance. The Department may revoke a certificate before expiration as provided in this Article and by law.

B. A certificate is not transferable and is valid only for the provider and location identified on the certificate.

C. A provider shall post the certificate in a conspicuous location in the home facility.

D. A certificate is the property of the state of Arizona. Upon revocation or voluntary closure, a provider shall surrender the certificate issued to the provider to the Department within seven days.

E. The Department shall designate on the certificate issued to the provider the total number of children to be allowed in child care at any one time. The total shall not exceed the limits set in R6-5-5220.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Amended effective February 24, 1977 (Supp. 77-1). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5206 renumbered to R6-5-5207; new Section R6-5-5206 renumbered from R6-5-5205 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5207. Maintenance of Certification: General Requirements; Training

A. Child care personnel and all individual backup providers shall be fingerprinted and pay all required fingerprint fees within the time prescribed in A.R.S. § 41-1964.

B. A provider and all individual backup providers shall maintain the physical, mental, and emotional health necessary to fulfill all legal requirements for child care providers.

C. No later than 60 days after the date of provider certification, a provider and individual backup providers shall furnish the Department with proof of acceptable first aid training and certification in infant/child cardiopulmonary resuscitation ("CPR"). As used in this Section, "acceptable training" means a classroom or blended-learning course that conforms to the current guidelines of the American Red Cross or the American Heart Association, as confirmed in writing by the training provider. The Department may extend the time for completing this requirement and children may remain in care during an extension, if:
1. The class was not available within the 60-day time period; or
2. The provider, individual backup provider, or a dependent was ill, and the provider or backup provider was unable to attend a scheduled class due to the illness.

D. A provider and individual backup providers shall maintain current training and certification in first aid and infant/child CPR through acceptable training courses.

E. A certified provider shall attend at least six hours of training each calendar year in any of the following subjects:
1. The Department's child care program, policies, and procedures;
2. Child health and safety, including recognition, control, and prevention of illness and disease;
3. Child growth and development;
4. Child abuse prevention, detection, and reporting;
5. Positive guidance and discipline;
6. Child nutrition;
7. Communication with families; family involvement;
8. Developmentally appropriate practices; and
9. Other similar subjects designed to improve the provider's ability to provide child care.

F. A provider shall maintain a record of all training, and annually furnish the Department with proof of attendance.

G. A provider shall maintain a safe and clean home facility, including furnishings, equipment, supplies, materials, utensils, toys, and grounds, that meets the standards in this Article.

H. At all times, a provider shall allow the Department access to all parts of the home facility. The Department shall make at least two onsite visits each year to each home facility and in-home provider. At least one visit shall be unannounced.

I. A provider shall allow a parent or a designated representative access to the home facility at all times when the parent's child is present, and shall give parents and designated representatives written notice explaining this right.

J. A provider shall directly supervise a visitor to the home facility while the visitor is in an area with a child in care.

K. A provider shall not expose a child in care to tobacco products or smoke.

L. A provider shall not care for a child while under the influence of alcoholic beverages, medication, or any other substance, that may or does impair the provider's ability to care for a child.

M. A provider shall not consume alcoholic beverages while caring for a child.

N. A provider shall not refuse to provide care to any child on the basis of color, sex, religion, disability, or national origin.

O. If a provider is notified that a child or household member has a communicable disease, the provider shall ensure that a child who lacks written evidence of immunity to the communicable disease is not permitted to be present in the home facility until:
1. A parent provides written evidence of the child's immunity to the disease; or
2. A local health department notifies the provider that the child may return to the home facility

Historical Note

Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5207 renumbered to R6-5-5208; new Section R6-5-5207 renumbered from R6-5-5206 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5208. Recertification Requirements

A. Before recertifying a provider, the Department shall interview the provider at the location where child care will be provided. The Department Representative may interview an in-home provider at the in-home provider's residence. The interview shall include a discussion and review of the provider's experiences in the provision of child care services during the current certification period.

B. A provider shall demonstrate the continued physical, mental, and emotional health necessary to perform the duties and fulfill the responsibilities in this Article.

C. Before recertification, a provider and designated individual backup provider shall furnish a self statement of physical and mental health and freedom from communicable diseases on a form furnished by the Department.

D. The Department shall renew a certificate only after a provider demonstrates the intent and ability to provide child care that is safe, developmentally appropriate, and in compliance with the requirements of this Article.

E. Unless the Department, in its sole discretion,. accepts a provider's written assurance of future compliance with the requirements of this subsection, the Department shall deny recertification or take other enforcement action when the provider does not accept Department-referred children on three separate occasions unless the refusal is for:
1. Illness, accident, or incapacity of the provider;
2. Illness, accident, or incapacity of any household member, if the existing condition will pose a risk to children in care, or limit the provider's ability to provide child care in accordance with the law;
3. The provider is not equipped or trained to provide care to the referred child, and the provider cannot acquire the equipment or training without undue hardship;
4. The provider has no available slots;
5. The situations listed in R6-5-5222 and a backup provider is unavailable;
6. A child has not been immunized, and the parent or guardian is unwilling to obtain appropriate immunization, in accordance with R6-5-5219(F); or
7. The home facility is in temporary disrepair or under construction.

F. The Department may obtain any supplemental information needed to determine continuing fitness to serve as a certified child care provider.

G. A provider, all household members, and an individual backup provider shall cooperate with the Department in providing all information required for recertification.

H. The Department shall determine whether to recertify a provider based on the provider's original application package, all previous monitoring reports, and all additional information the Department receives during the recertification process.

Historical Note

Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5208 renumbered to R6-5-5209; new Section R6-5-5208 renumbered from R6-5-5207 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5209. Program and Equipment

A. A provider shall offer a program that is developmentally appropriate for, and meets the needs of each child in care. The daily program and activity schedule shall include a balance of the following:
1. Indoor and outdoor activities;
2. Activities that encourage movement and quiet time;
3. Activities that encourage a child's creativity;
4. Individual and group activities;
5. Small and large muscle development activities; and
6. Activities that include social interaction, problem solving, and negotiating skills.

B. A provider shall incorporate into the program each child's daily routine activities, such as diapering, toileting, eating, dressing, resting, and sleeping, in accordance with the developmental needs of each child.

C. A provider shall develop a flexible, developmentally appropriate program that the provider can adjust to accommodate unanticipated events such as the illness of a child or changes in the weather.

D. A provider shall have play equipment and materials sufficient to meet the program requirements described in subsections (A) through (C), and to ensure that all children in care can be occupied in developmentally appropriate play at the same time.

E. A provider who cares for a child who is younger than age 2 shall have a variety of developmentally appropriate play equipment and supplies available for the child, such as:
1. Touch boards;
2. Soft puppets;
3. Soft or plastic blocks;
4. Simple musical instruments;
5. Push-pull toys for beginning walkers;
6. Picture and texture books;
7. Developmentally appropriate art materials, including crayons, paints, finger paints, watercolors, and paper;
8. Simple, 2-3 piece puzzles and peg boards; and
9. Large beads to string or snap.

F. A provider who cares for a child age 2 or older shall have a variety of developmentally appropriate play equipment and supplies available for the child, such as:
1. Art supplies;
2. Blocks and block accessories;
3. Books and posters;
4. Dramatic play areas with toys and dress-up clothes;
5. Large muscle equipment;
6. Manipulative toys;
7. Science materials; and
8. Musical instruments.

G. A provider shall have a bed, cot, mat, crib, or playpen for each child in care who requires a daily nap or rest period. Each infant in care shall have a safe crib, port-a crib, bassinet, or playpen.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5209 renumbered to R6-5-5210; new Section R6-5-5209 renumbered from R6-5-5208 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5210. Safety; Supervision

A. When a provider is unavailable to care for a child for a reason described in R6-5-5222(B), the provider may use only the backup provider designated under R6-5-5202 or R6-5-5222(E).

B. A provider shall give parents and guardians written notice of the provider's backup care plan.

C. A provider shall not engage in activities that interfere with the ability to supervise and care for children, including other employment, and volunteer or recreational activities. An in-home provider shall not perform housekeeping duties unrelated to the care of the child.

D. A provider shall directly supervise each child who is awake.

E. A provider shall have unobstructed access to and shall be able to hear each child who is sleeping.

F. A provider shall not permit a child in care to use a spa or hot tub.

G. A provider shall have written permission from a parent or guardian before allowing a child to engage in water play. In this subsection, "water play" means any activity in which water is likely to get into a child's ears.

H. A provider shall directly supervise any child who is in a pool area.

I. A provider shall accompany a child who is using a public or semi-public swimming place.

J. A provider shall have written permission from a child's parent or designated representative to bathe or shower the child, or to allow the child to bathe or shower independently.

K. A provider shall not permit a child younger than age 6 to bathe or shower unsupervised.

L. A provider shall report suspected child abuse or neglect to CPS or the local law enforcement department as required by A.R.S. § 13-3620.

M. A provider shall use developmentally appropriate precautions to separate a child in care from hazardous areas, including locked doors and safe portable folding gates.

N. A provider shall release a child only to the child's parent or to an adult who has been designated in writing by the parent.

O. A provider shall not allow a person addicted to or under the influence of illegal drugs or alcohol in the home facility while children in care are present.

P. A provider shall not permit a person who is abusive to children, or who uses unacceptable disciplinary methods as described in R6-5-5212, into the home facility when children in care are present.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Amended effective March 5, 1979 (Supp. 79-2). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5210 renumbered to R6-5-5211; new Section R6-5-5210 renumbered from R6-5-5209 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5211. Sanitation

A. A provider and each child in care shall wash their hands with soap and running water after playing with animals or using the toilet, and before and after handling, serving, or eating food. If a child cannot reach a sink with running water, due to the child's age or some limiting condition, the provider shall clean that child's hands with an individual, clean, washcloth.

B. A provider shall wash, in hot soapy water, and sanitize, all utensils used for eating, drinking, and food preparation.

C. A provider shall have a garbage can with a close-fitting lid.

D. A provider shall dispose of garbage in the home facility at least once a day.

E. A provider shall empty and sanitize wading pools measuring 12 inches deep or less, after each use.

F. A provider shall maintain, in a sanitary condition, a swimming pool or other area or container, which is more than 12 inches deep and used for water play.

G. A provider shall frequently check the diaper of each child in care and shall immediately change a soiled diaper.

H. A provider shall have sanitary arrangements for diaper changing and disposal of soiled diapers, including the following:
1. The diaper changing area shall not be in an area where food is prepared or consumed;
2. The diapering surface shall be cleaned, sanitized, and dried after each diaper change;
3. Following bulk stool disposal into a toilet, soiled cloth diapers shall not be rinsed, but shall be bagged in plastic, individually labeled with child's name, stored in a cov-

ered container out of reach of children, and returned to the child's parent each day; and

4. Soiled disposable diapers shall be discarded in a tightly covered, lined container out of reach of children.

I. Before and after each diaper change, a provider shall wash hands with soap and running water in a sink not used for food preparation.

J. A provider shall sanitize a bathtub before bathing each child in care.

Historical Note
Adopted effective July 6, 1976 (Supp. 76-4). Section repealed, new Section adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5211 renumbered to R6-5-5212; new Section R6-5-5211 renumbered from R6-5-5210 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5212. Discipline

A. A certified provider and all individual backup providers shall sign a written agreement to abide by the Department's policy on developmentally appropriate discipline.

B. Only a provider may discipline a child in care;

C. A provider may physically restrain a child whose behavior is uncontrolled, only when the physical restraint:

1. Is necessary to prevent harm to the child or others;
2. Occurs simultaneously with the uncontrolled behavior;
3. Does not impair the child's breathing; and
4. Cannot harm the child.

A provider shall use the minimum amount of restraint necessary to bring the child's behavior under control.

D. A provider shall not use the following disciplinary measures:

1. Corporal punishment, including shaking, biting, hitting, or putting anything in a child's mouth;
2. Placing a child in isolation or in a closet, laundry room, garage, shed, basement, or attic;
3. Locking a child out of the home facility;
4. Placing a child in any area where the provider cannot directly supervise the child;
5. Methods detrimental to the health or emotional needs of a child;
6. Administering medications;
7. Mechanical restraints of any kind;
8. Techniques intended to humiliate or frighten a child;
9. Discipline associated with eating, sleeping, or toileting; or
10. Abusive or profane language.

E. As a disciplinary measure, a provider may place a child in time out. During the time out period, the provider shall keep the child in full view. Time out shall not be used for children less than age 3.

F. A provider shall maintain consistent, reasonable rules that define acceptable behavior for a child in care.

G. A provider shall use discipline only to teach acceptable behavior and to promote self-discipline, not for punishment or retribution.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5212 renumbered to R6-5-5213; new Section R6-5-5212 renumbered from R6-5-5211 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5213. Evening And Nighttime Care

A. A provider who offers evening or nighttime care shall remain awake until each child in care is asleep.

B. A provider who offers nighttime care shall have a safe and sturdy crib for each infant, and a safe and sturdy bed or cot with mattress for each child. Crib bars or slats shall be no more than 2 3/8 inches apart, and the crib mattress shall fit snugly into the crib frame so that no space remains between the mattress and frame.

C. A provider may allow siblings to share a bed only if the provider has received written parental permission.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5213 renumbered to R6-5-5214; new Section R6-5-5213 renumbered from R6-5-5212 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5214. Children Younger than Age 2

A provider who cares for a child younger than age 2 shall comply with the following requirements:

1. A provider shall frequently hold a child and give each infant and toddler physical contact and attention throughout the day.
2. A provider shall respond promptly to a child's distress signals and need for comfort.
3. A provider shall get written permission from a parent or guardian to give a child a bedtime or nap-time bottle. If the provider receives permission, the provider shall use only water in the bottles, unless otherwise directed by the child's physician.
4. A provider shall not confine a child in a crib, high chair, swing, or playpen, for more than one consecutive waking hour.
5. A provider shall not feed cereal by bottle, except with the written instruction of a physician.
6. A provider shall hold an infant younger than age 1 for any bottle feeding, and shall not prop bottles with a child in care.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5214 renumbered to R6-5-5215; new Section R6-5-5214 renumbered from R6-5-5213 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5215. Children with Special Needs

A. When enrolling a child with special needs, a provider shall comply with the requirements of this Section:

1. A provider shall consult with parents to establish a mutually agreed upon plan regarding services for a child with special needs;
2. A provider shall have the physical ability and appropriate training to provide the care required by a child with special needs;
3. A provider shall use best efforts to integrate a child with special needs into the daily activities of the home facility in a manner that is the least restrictive, and that meets the child's individual needs;
4. If a provider regularly cares for a child with special needs older than age 3 who requires diapering, the home facility shall have a diaper changing area that permits the child to have privacy. Proper sanitation shall be maintained as described in R6-5-5211.

B. A provider shall make reasonable accommodations in the home facility, equipment, and materials for a child with special needs.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Former

Section R6-5-5215 renumbered to R6-5-5216; new Section R6-5-5215 renumbered from R6-5-5214 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5216. Transportation

A. A provider shall obtain prior written permission from a child's parent before transporting a child in a privately owned vehicle or on public transportation.

B. A provider shall ensure that a child in care is transported in a private vehicle by a person who has:
1. A valid Arizona driver's license;
2. Automobile insurance that meets the financial responsibility requirement of Arizona law; and
3. No convictions for driving while intoxicated within three years before the date of transportation.

C. A provider shall transport a child only in a mechanically safe vehicle. "Mechanically safe" means a vehicle with:
1. Functioning brakes, signal lights, and headlights;
2. Tires with tread; and
3. Structural integrity.

D. A provider shall not transport a child on a motorcycle or in a vehicle that is not constructed for the purpose of transporting people, such as a truck bed, camper, or any trailered attachment to a motor vehicle.

E. A provider shall transport a child in a separate car seat, seat belt, or child-restraint device in compliance with A.R.S. § 28-907.

F. A provider shall never leave a child unattended in a vehicle.

G. A provider shall maintain first-aid supplies in a privately owned vehicle used to transport children in care.

H. A provider shall carry a child's emergency-information card when transporting a child in care.

I. A provider shall sign a form that states that the provider will abide by R6-5-5216.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5216 renumbered to R6-5-5217; new Section R6-5-5216 renumbered from R6-5-5215 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5217. Meals and Nutrition

A. A provider shall serve a child in care wholesome and nutritious foods and beverages. In this Section, "wholesome and nutritious" means foods and beverages consistent with the requirements of 7 CFR 226.20 (January 1, 1998), which is incorporated by reference and available for inspection at the Department's Authority Library, 1789 West Jefferson, Phoenix, Arizona 85007 and in the office of the Secretary of State at 1700 West Washington, Phoenix, Arizona. The incorporated material contains no later amendments or editions.

B. A provider shall supplement meals and snacks supplied by a parent when the supplied food does not provide a child with a wholesome and nutritious diet.

C. A provider shall make available to a child in care meals and snacks that satisfy the child's appetite and dietary needs.

D. A provider shall consult with a parent to identify, in writing, any special dietary needs or instructions for a child in care.

E. A provider shall give a child any necessary assistance in feeding and shall teach self-feeding skills, but shall not force a child to eat.

F. A provider shall monitor all perishable foods, including infant formulas and sack lunches. The provider shall ensure that food is individually labeled with a child's name, dated, covered, and properly stored to prevent spoilage at temperatures of 45ºF or less.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5217 renumbered to R6-5-5218; new Section R6-5-5217 renumbered from R6-5-5216 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5218. Health Care; Medications

A. When a provider enrolls a child for care, the provider shall make written arrangements with the child's parent for emergency medical care of the child.

B. If a child becomes ill while in care, a provider shall:
1. Make the child comfortable and keep the child in full view; and
2. Notify the parent or other designated person that the child is ill and must be immediately removed from care.

C. A provider shall notify the parent of other children in care when a child in care contracts an infectious illness.

D. A provider shall not provide care while knowingly infected with or presenting symptoms of an infectious disease.

E. If a child exhibits symptoms of an infectious disease, the child may return to care when fever free and symptom free, or with written permission from the child's medical practitioner that returning will not endanger the health of the child or other children in care.

F. A provider shall not admit a child in need of professional medical attention to the home facility and shall direct the parent to obtain medical attention for the child.

G. Only a provider shall administer medication with signed written instructions for administering the medication from the child's parent.

H. A provider shall not administer:
1. Medication that is date expired or in something other than its original container; or
2. Prescription medication that does not bear the date of issue, the child's name, the amount and frequency of dosage, and the doctor's name.

I. A provider shall maintain a written log of all medications administered. The log shall include:
1. The name of the child receiving the medication;
2. The name of the medication;
3. The date and time of administration; and
4. The dosage administered.

J. A provider shall use a sanitary medication measure for accurate dosage.

K. A provider shall keep all medication in a locked storage container, and refrigerate if necessary.

L. A provider shall have first-aid supplies available at the home facility, which shall be administered only by the provider.

M. A provider is responsible for obtaining only emergency medical treatment for a child in care.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5218 renumbered to R6-5-5219; new Section R6-5-5218 renumbered from R6-5-5217 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5219. Recordkeeping; Unusual Incidents; Immunizations

A. A provider shall maintain a daily attendance log on a Department-approved form and shall require that each child be

signed in and out on the log by the parent or other individual designated in writing by the parent.

B. On a form approved by the Department, a provider shall promptly log all accidents, injuries, behavior problems, or other unusual incidents at the home facility, including any suspected child abuse or neglect.

C. A provider shall immediately report all unusual incidents to a parent or guardian of the child involved and shall report the incidents to the Department within 24 hours of the time of occurrence.

D. A provider shall maintain records in accordance with the requirements of the provider's child care registration agreement. The provider shall make the following records readily available for inspection by the Department and shall keep them separate from household and other personal records:
1. Information listed in subsection (E);
2. Immunization records identified in subsection (F) and R6-5-5202 (L);
3. Documentary evidence of freedom from communicable tuberculosis as required by R6-5-5202 (M);
4. The provider's certification, re-certification, and monitoring records;
5. Health records of child care personnel;
6. The provider's training records;
7. Unusual incident reports; and
8. Daily logs of attendance, accidents, injuries, medications administered, behavior problems, or other unusual incidents.

E. A provider shall maintain at least the following information for each child in care:
1. The child's name, home address, telephone number, gender, and date of birth;
2. The name, home and business addresses, and telephone numbers of the child's parent;
3. The name, address and telephone number of the child's physician or health care provider and hospital;
4. Authorization and instructions for emergency medical care when the parent cannot be located; and
5. Written authorization to release a child to any individual other than the parent and the name, home and work addresses, and telephone numbers of that individual.

F. A provider shall maintain an immunization record or exemption affidavit for each child in care.
1. Documentation required under this subsection is limited to:
   a. An immunization record prepared by the child's health care provider stating that child has received current, age-appropriate immunizations specified in R9-6-702, including immunizations for Diphtheria, Haemophilus influenzae type b, Hepatitis B, Measles, Mumps, Pertussis, Poliomyelitis, Rubella, and Tetanus;
   b. An affidavit signed by the child's health care provider stating that the child has a medical condition that causes the required immunizations to endanger the child's health; or
   c. An affidavit signed by the child's parent stating that the child is being raised in a religion whose teachings oppose immunization.
2. If a child has received all current immunizations but requires further inoculations to be fully immunized, the provider shall require the parent to verify that the parent will have the child complete all immunizations in accordance with the DHS recommended schedule identified in R9-6-702. The provider shall:
   a. Require the parent to produce documented records from the child's health care provider of the immunizations as they are completed; and
   b. Maintain the records as required by subsection (F)(1).
3. The provider shall not permit a child in care to remain enrolled for more than 15 days if the parent does not provide proof of current, age-appropriate immunizations, a statement of timely completion of further inoculations, or exemption from immunization.

G. Children exempted from immunizations for religious or medical reasons shall be excluded from the home facility if there is an outbreak of an immunizable disease at the home facility.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5219 renumbered to R6-5-52020; new Section R6-5-5219 renumbered from R6-5-5218 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2). Amended by final rulemaking at 22 A.A.R. 3185, effective October 28, 2016 (Supp. 16-4).

R6-5-5220. Provider/Child Ratios

A. The Department may certify a provider in a home facility to care for a maximum of four children at a time, from birth through age 12, for compensation. A provider in a home facility may care for a maximum of six children at a time, from birth through age 12, or a child age 13 or older who is a child with special needs, when all of the following conditions are met:
1. No more than four children in care are for compensation; and
2. No more than two of the children in care are younger than age 1, unless a sibling group.

B. The Department may certify an in-home provider to provide the following care:
1. An in-home provider may care for a sibling group of no more than six children.
2. An in-home provider shall care only for the children who live in that home.
3. An in-home provider may bring the in-home provider's own children to the in-home location with the written permission of the client, and so long as the total number of children at the in-home location does not exceed six children.

C. The Department may further limit the ratios allowed in subsections (A) and (B) to protect the well-being of children in care. The Department may impose additional restrictions when:
1. There are more than two children residing in the home facility who are counted in the ratio;
2. The Department determines that the home facility and the furnishings are inadequate to accommodate four children at a time for compensation, as provided in Section R6-5-5203(6);
3. The Department has determined that a provider is physically unable to care for four children at a time; for compensation or
4. A provider requests certification for fewer than four children at a time for compensation.

D. For the sole purpose of establishing and monitoring ratios, the Department shall not count any child who is age 13 or older, except as provided in subsection (A) for a child with special needs.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5220 renumbered to R6-5-5221; new Sec-

tion R6-5-5220 renumbered from R6-5-5219 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5221. Change Reporting Requirements

At least 15 days before the effective date of any scheduled change, or within 24 hours after an unscheduled change, which significantly affects the provision of child care services, a provider shall furnish the Department with written notice of the change. Significant changes include, but are not limited to:

1. Home remodeling;
2. Home repair;
3. Pool installation;
4. Relocating to a new residence;
5. Change in household composition;
6. Telephone number change;
7. Change of backup provider;
8. Voluntarily relinquishing the certificate; and
9. Any other change in the home facility or the provider's personal circumstances that affect the provider's ability to provide stable child care services.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5221 renumbered to R6-5-5222; new Section R6-5-5221 renumbered from R6-5-5220 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5222. Use of A Backup Provider

A. A provider shall maintain a backup provider, and shall keep clients and the Department apprised of the backup provider's identity and location.

B. A provider may use a backup provider only in the following circumstances:

1. When the provider is ill;
2. When the provider is attending to an emergency related to the provision of child care;
3. When the provider has an emergency involving the provider or the provider's dependent family members;
4. When the provider needs to attend a non-emergency appointment for the provider or the provider's dependent family members, and the provider cannot schedule the appointment outside of normal child care hours;
5. When the provider is attending classes to meet training requirements listed in this Article; or
6. When the provider is taking a vacation.

C. At the time of enrollment of a child in care, a provider shall advise the parent of the possible use of a backup provider.

D. A provider shall notify the Department within 24 hours of the onset of the use of a backup provider.

E. When a provider designates a new backup provider, the provider shall ensure that the backup provider meets the requirements for backup providers in R6-5-5202.

F. A provider shall execute a backup provider agreement form furnished by the Department, which identifies the backup provider and contains assurances that the backup provider will be used in accordance with the requirement of this Section.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5222 renumbered to R6-5-5223; new Section R6-5-5222 renumbered from R6-5-5221 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5223. Claims For Payment

A. A provider shall submit claims for payment in the manner prescribed in the child care registration agreement with the Department.

B. A provider shall make all financial arrangements with a backup provider. The Department shall not make direct payments to the backup provider.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5223 renumbered to R6-5-5224; new Section R6-5-5223 renumbered from R6-5-5222 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5224. Complaints; Investigations

A. Any person may register, with the Department, a written or verbal complaint about a provider or the operation of a home facility. Upon receipt of a complaint, or in response to the observations of Department staff, the Department shall investigate the allegations made and any matters related to certification and compliance with the child care registration agreement.

B. A provider who is the subject of a complaint shall cooperate with the Department in conducting an investigation. The provider shall allow a Department representative to inspect the home facility and all records, and to interview any child care personnel, or household member.

C. The Department shall maintain a file on all complaints against a provider and shall make information on valid complaints available to parents and to the general public upon request and as permitted by law.

D. Following an investigation, the Department shall take appropriate administrative action as described in this Article.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5224 renumbered to R6-5-5225; new Section R6-5-5224 renumbered from R6-5-5223 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5225. Probation

A. The Department may place a provider on probation when a Department representative observes a problem or the Department receives and validates a complaint in an area of noncompliance that does not endanger a child in care.

B. The Department shall set a term of probation that does not exceed 30 days.

C. The Department may suspend a provider's child care certificate if the same infraction that resulted in probation is repeated during a provider's current certification period and the Department determines that the provider has not demonstrated either the intent or ability to comply with the requirements of this Article.

D. The Department shall not authorize any new child for payment to a provider who is on probation. Children already in that provider's care may remain authorized.

E. Probationary status is not appealable.

Historical Note

Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5225 renumbered to R6-5-5226; new Section R6-5-5225 renumbered from R6-5-5224 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5226. Certification, Denial, Suspension, and Revocation

A. The Department may deny, suspend, or revoke certification when:
1. An applicant or provider violates or fails to comply with any statute or rule applicable to the provision of Child Care Services.
2. An applicant or provider has a certificate or license to operate a child care home or facility denied, revoked, or suspended in any state or jurisdiction.
3. An applicant or provider fails to disclose requested information or provides false or misleading information to the Department.
4. A provider's contract with the Department to furnish child care services expires or is terminated.
5. Child care personnel fail or refuse to comply with or meet the requirements of A.R.S. § 41-1964.
6. A provider fails or refuses to correct or repeats a violation that resulted in probation or suspension.
7. The Department, through its CPS hotline, receives a report of alleged child maltreatment by an applicant, provider, or household member who is under investigation by CPS or a law enforcement agency or is being reviewed in a civil, criminal, or administrative hearing.
8. An applicant or provider fails or refuses to cooperate with the Department in providing information required by these rules or any information necessary to determine compliance with these rules.
9. An applicant, provider, or household member engages in any activity or circumstance that may threaten or adversely affect the health, safety, or welfare of children, including inadequate supervision or failure to protect from actual or potential harm.
10. An applicant or provider is unable or unwilling to meet the physical, emotional, social, educational, or psychological needs of children.
11. The Department, through its CPS hotline, receives a report of alleged child maltreatment in a home facility that is under investigation by CPS or a law enforcement agency or is being reviewed in a civil, criminal, or administrative proceeding.
12. An applicant, provider, or household member is the subject of a substantiated or undetermined report of child maltreatment in any state or jurisdiction. Substantiated child maltreatment includes, but is not limited to, a probable cause finding by CPS or a law enforcement agency.
13. CPS or a law enforcement agency substantiates a report of child maltreatment in a home facility.

B. In determining whether to take disciplinary action against a provider, or to grant or renew a certificate, the Department may evaluate the provider's history from other certification periods, both in Arizona and in other jurisdictions, and shall consider multiple violations of statutes or rules applicable to the provision of child care services as evidence that the applicant or provider is unable or unwilling to meet the needs of children.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Former Section R6-5-5226 repealed; new Section renumbered from R6-5-5225 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5227. Adverse Action; Notice Effective Date

A. When the Department denies, suspends, or revokes certification, it shall mail a written, dated notice of the adverse action to the applicant or the provider at the applicant's or provider's last known address.

B. A notice of adverse action shall specify:
1. The adverse action taken and date the action will be effective;
2. The reasons supporting the adverse action; and
3. The procedures by which the applicant or provider may contest the action taken and the time period in which to do so.

C. Except as provided in subsection (D), a revocation, suspension, or denial of recertification is effective 20 calendar days from the date on the notice or letter advising the provider of the adverse action.

D. A suspension, revocation, or denial of recertification is effective on the date of the notice or letter advising the person of the adverse action if:
1. The adverse action is based on the failure of child care personnel to comply with or meet the requirements of A.R.S. § 41-1964; or
2. The Department bases the adverse action on a determination that the health, safety, or welfare of a child in care is in jeopardy.

E. The Department shall stop payment authorization for all subsidized children in care on the effective date of a suspension, revocation, or denial of recertification.

F. The Department shall not authorize the referral of additional children to a provider after mailing a notice of adverse action to the provider's last known address.

Historical Note
Adopted effective May 11, 1994 (Supp. 94-2). Amended effective June 4, 1998 (Supp. 98-2). Former Section R6-5-5227 renumbered to R6-5-5228 and new Section adopted by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

R6-5-5228. Appeals

A. An applicant or provider may appeal the following Department decisions:
1. Denial of certification or re-certification;
2. Suspension of a certificate; and
3. Revocation of a certificate.

B. A person who wishes to appeal an adverse action shall file a written request for a hearing with the Department within 15 calendar days of the date on the notice or letter advising the provider of the adverse action.

C. The Department shall conduct a hearing as prescribed in 6 A.A.C. 5, Article 75. Decisions based on failure to clear a fingerprint check or criminal history check are not appealable under this Article.

D. Matters relating to contractual agreements with the Department, including payment rates and amounts, are not appealable under this Article.

E. When an adverse action based on R6-5-5226(A)(7) is appealed under this Article, allegations of child maltreatment are not at issue and shall not be adjudicated in an administrative proceeding conducted under subsection (C).

Historical Note
New Section R6-5-5228 renumbered from R6-5-5227 and amended by final rulemaking at 5 A.A.R. 1983, effective May 20, 1999 (Supp. 99-2).

ARTICLE 53. REPEALED

Former Article 53 consisting of Sections R6-5-5301 through R6-5-5305 repealed effective April 9, 1981.

ARTICLE 54. REPEALED

Former Article 54 consisting of Sections R6-5-5401 through R6-5-5411 repealed effective November 8, 1982.

41-1003. Required rule making

Each agency shall make rules of practice setting forth the nature and requirements of all formal procedures available to the public.

41-1954. Powers and duties

A. In addition to the powers and duties of the agencies listed in section 41-1953, subsection E, the department shall:

1. Administer the following services:

(a) Employment services, including manpower programs and work training, field operations, technical services, unemployment compensation, community work and training and other related functions in furtherance of programs under the social security act, as amended, the Wagner-Peyser act, as amended, the federal unemployment tax act, as amended, 33 United States Code, the family support act of 1988 (P.L. 100-485) and other related federal acts and titles.

(b) Individual and family services, which shall include a section on aging, services to children, youth and adults and other related functions in furtherance of social service programs under the social security act, as amended, title IV, except parts B and E, grants to states for aid and services to needy families with children and for child welfare services, title XX, grants to states for services, the older Americans act, as amended, the family support act of 1988 (P.L. 100-485) and other related federal acts and titles.

(c) Income maintenance services, including categorical assistance programs, special services unit, child support collection services, establishment of paternity services, maintenance and operation of a state case registry of child support orders, a state directory of new hires, a support payment clearinghouse and other related functions in furtherance of programs under the social security act, title IV, grants to states for aid and services to needy families with children and for child welfare services, title XX, grants to states for services, as amended, and other related federal acts and titles.

(d) Rehabilitation services, including vocational rehabilitation services and sections for the blind and visually impaired, communication disorders, correctional rehabilitation and other related functions in furtherance of programs under the vocational rehabilitation act, as amended, the Randolph-Sheppard act, as amended, and other related federal acts and titles.

(e) Administrative services, including the coordination of program evaluation and research, interagency program coordination and in-service training, planning, grants, development and management, information, legislative liaison, budget, licensing and other related functions.

(f) Manpower planning, including a state manpower planning council for the purposes of the federal-state-local cooperative manpower planning system and other related functions in furtherance of programs under the comprehensive employment and training act of 1973, as amended, and other related federal acts and titles.

(g) Economic opportunity services, including the furtherance of programs prescribed under the economic opportunity act of 1967, as amended, and other related federal acts and titles.

(h) Intellectual disability and other developmental disability programs, with emphasis on referral and purchase of services. The program shall include educational, rehabilitation, treatment and training services and other related functions in furtherance of programs under the developmental disabilities services and facilities construction act (P.L. 91-517) and other related federal acts and titles.

(i) Nonmedical home and community based services and functions, including department-designated case management, housekeeping services, chore services, home health aid, personal care, visiting nurse services, adult day care or adult day health, respite sitter care, attendant care, home delivered meals and other related services and functions.

2. Provide a coordinated system of initial intake, screening, evaluation and referral of persons served by the department.

3. Adopt rules it deems necessary or desirable to further the objectives and programs of the department.

4. Formulate policies, plans and programs to effectuate the missions and purposes of the department.

5. Employ and determine the conditions of employment and prescribe the duties and powers of administrative, professional, technical, secretarial, clerical and other persons subject to chapter 4, article 4 and, as applicable, article 5 of this title as may be necessary in the performance of its duties, contract for the services of outside advisors, consultants and aides as may be reasonably necessary and reimburse department volunteers, designated by the director, for expenses in transporting clients of the department on official business.

6. Make contracts and incur obligations within the general scope of its activities and operations subject to the availability of funds.

7. Contract with or assist other departments, agencies and institutions of the state, local and federal governments in the furtherance of its purposes, objectives and programs.

8. Be designated as the single state agency for the purposes of administering and in furtherance of each federally supported state plan.

9. Accept and disburse grants, matching funds and direct payments from public or private agencies for the conduct of programs that are consistent with the overall purposes and objectives of the department.

10. Provide information and advice on request by local, state and federal agencies and by private citizens, business enterprises and community organizations on matters within the scope of its duties subject to the departmental rules on the confidentiality of information.

11. Establish and maintain separate financial accounts as required by federal law or regulations.

12. Advise and make recommendations to the governor and the legislature on all matters concerning its objectives.

13. Have an official seal that is judicially noticed.

14. Annually estimate the current year's population of each county, city and town in this state, using the periodic census conducted by the United States department of commerce, or its successor agency, as the basis for such estimates and deliver such estimates to the economic estimates commission before December 15.

15. Estimate the population of any newly annexed areas of a political subdivision as of July 1 of the fiscal year in which the annexation occurs and deliver such estimates as promptly as is feasible after the annexation occurs to the economic estimates commission.

16. Establish and maintain a statewide program of services for persons who are both hearing impaired and visually impaired and coordinate appropriate services with other agencies and organizations to avoid duplication of these services and to increase efficiency. The department of economic security shall enter into agreements for the utilization of the personnel and facilities of the department of economic security, the department of health services and other appropriate agencies and organizations in providing these services.

17. Establish and charge fees for deposit in the department of economic security prelayoff assistance services fund to employers who voluntarily participate in the services of the department that provide job service and retraining for persons who have been or are about to be laid off from employment. The department shall charge only those fees necessary to cover the costs of administering the job service and retraining services.

18. Establish a focal point for addressing the issue of hunger in this state and provide coordination and assistance to public and private nonprofit organizations that aid hungry persons and families throughout this state. Specifically such activities shall include:

(a) Collecting and disseminating information regarding the location and availability of surplus food for distribution to needy persons, the availability of surplus food for donation to charity food bank organizations, and the needs of charity food bank organizations for surplus food.

(b) Coordinating the activities of federal, state, local and private nonprofit organizations that provide food assistance to the hungry.

(c) Accepting and disbursing federal monies, and any state monies appropriated by the legislature, to private nonprofit organizations in support of the collection, receipt, handling, storage and distribution of donated or surplus food items.

(d) Providing technical assistance to private nonprofit organizations that provide or intend to provide services to the hungry.

(e) Developing a state plan on hunger that, at a minimum, identifies the magnitude of the hunger problem in this state, the characteristics of the population in need, the availability and location of charity food banks and the potential sources of surplus food, assesses the effectiveness of the donated food collection and distribution network and other efforts to alleviate the hunger problem, and recommends goals and strategies to improve the status of the hungry. The state plan on hunger shall be incorporated into the department's state comprehensive plan prepared pursuant to section 41-1956.

(f) Establishing a special purpose advisory council on hunger pursuant to section 41-1981.

19. Establish an office to address the issue of homelessness and to provide coordination and assistance to public and private nonprofit organizations that prevent homelessness or aid homeless individuals and families throughout this state. These activities shall include:

(a) Promoting and participating in planning for the prevention of homelessness and the development of services to homeless persons.

(b) Identifying and developing strategies for resolving barriers in state agency service delivery systems that inhibit the provision and coordination of appropriate services to homeless persons and persons in danger of being homeless.

(c) Assisting in the coordination of the activities of federal, state and local governments and the private sector that prevent homelessness or provide assistance to homeless people.

(d) Assisting in obtaining and increasing funding from all appropriate sources to prevent homelessness or assist in alleviating homelessness.

(e) Serving as a clearinghouse on information regarding funding and services available to assist homeless persons and persons in danger of being homeless.

(f) Developing an annual state comprehensive homeless assistance plan to prevent and alleviate homelessness.

(g) Submitting an annual report to the governor, the president of the senate and the speaker of the house of representatives on the status of homelessness and efforts to prevent and alleviate homelessness. The department shall provide a copy of this report to the secretary of state.

20. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

21. Exchange information, including case specific information, and cooperate with the department of child safety for the administration of the department of child safety's programs.

B. If the department of economic security has responsibility for the care, custody or control of a child or is paying the cost of care for a child, it may serve as representative payee to receive and administer social security and United States department of veterans affairs benefits and other benefits payable to such child. Notwithstanding any law to the contrary, the department of economic security:

1. Shall deposit, pursuant to sections 35-146 and 35-147, such monies as it receives to be retained separate and apart from the state general fund on the books of the department of administration.

2. May use such monies to defray the cost of care and services expended by the department of economic security for the benefit, welfare and best interests of the child and invest any of the monies that the director determines are not necessary for immediate use.

3. Shall maintain separate records to account for the receipt, investment and disposition of funds received for each child.

4. On termination of the department of economic security's responsibility for the child, shall release any funds remaining to the child's credit in accordance with the requirements of the funding source or in the absence of such requirements shall release the remaining funds to:

(a) The child, if the child is at least eighteen years of age or is emancipated.

(b) The person responsible for the child if the child is a minor and not emancipated.

C. Subsection B of this section does not pertain to benefits payable to or for the benefit of a child receiving services under title 36.

D. Volunteers reimbursed for expenses pursuant to subsection A, paragraph 5 of this section are not eligible for workers' compensation under title 23, chapter 6.

E. In implementing the temporary assistance for needy families program pursuant to Public Law 104-193, the department shall provide for cash assistance to two-parent families if both parents are able to work only on documented participation by both parents in work activities described in title 46, chapter 2, article 5, except that payments may be made to families who do not meet the participation requirements if:

1. It is determined on an individual case basis that they have emergency needs.

2. The family is determined to be eligible for diversion from long-term cash assistance pursuant to title 46, chapter 2, article 5.

F. The department shall provide for cash assistance under temporary assistance for needy families pursuant to Public Law 104-193 to two-parent families for no longer than six months if both parents are able to work, except that additional assistance may be provided on an individual case basis to families with extraordinary circumstances. The department shall establish by rule the criteria to be used to determine eligibility for additional cash assistance.

G. The department shall adopt the following discount medical payment system for persons who the department determines are eligible and who are receiving rehabilitation services pursuant to subsection A, paragraph 1, subdivision (d) of this section:

1. For inpatient hospital admissions and outpatient hospital services the department shall reimburse a hospital according to the rates established by the Arizona health care cost containment system administration pursuant to section 36-2903.01, subsection G.

2. The department's liability for a hospital claim under this subsection is subject to availability of funds.

3. A hospital bill is considered received for purposes of paragraph 5 of this subsection on initial receipt of the legible, error-free claim form by the department if the claim includes the following error-free documentation in legible form:

(a) An admission face sheet.

(b) An itemized statement.

(c) An admission history and physical.

(d) A discharge summary or an interim summary if the claim is split.

(e) An emergency record, if admission was through the emergency room.

(f) Operative reports, if applicable.

(g) A labor and delivery room report, if applicable.

4. The department shall require that the hospital pursue other third-party payors before submitting a claim to the department. Payment received by a hospital from the department pursuant to this subsection is considered payment by the department of the department's liability for the hospital bill. A hospital may collect any unpaid portion of its bill from other third-party payors or in situations covered by title 33, chapter 7, article 3.

5. For inpatient hospital admissions and outpatient hospital services rendered on and after October 1, 1997, if the department receives the claim directly from the hospital, the department shall pay a hospital's rate established according to this section subject to the following:

(a) If the hospital's bill is paid within thirty days of the date the bill was received, the department shall pay ninety-nine percent of the rate.

(b) If the hospital's bill is paid after thirty days but within sixty days of the date the bill was received, the department shall pay one hundred percent of the rate.

(c) If the hospital's bill is paid any time after sixty days of the date the bill was received, the department shall pay one hundred percent of the rate plus a fee of one percent per month for each month or portion of a month following the sixtieth day of receipt of the bill until the date of payment.

6. For medical services other than those for which a rate has been established pursuant to section 36-2903.01, subsection G, the department shall pay according to the Arizona health care cost containment system capped fee-for-service schedule adopted pursuant to section 36-2904, subsection K or any other established fee schedule the department determines reasonable.

H. The department shall not pay claims for services pursuant to this section that are submitted more than nine months after the date of service for which the payment is claimed.

I. To assist in the location of persons or assets for the purpose of establishing paternity, establishing, modifying or enforcing child support obligations and other related functions, the department has access, including automated access if the records are maintained in an automated database, to records of state and local government agencies, including:

1. Vital statistics, including records of marriage, birth and divorce.

2. State and local tax and revenue records, including information on residence address, employer, income and assets.

3. Records concerning real and titled personal property.

4. Records of occupational and professional licenses.

5. Records concerning the ownership and control of corporations, partnerships and other business entities.

6. Employment security records.

7. Records of agencies administering public assistance programs.

8. Records of the motor vehicle division of the department of transportation.

9. Records of the state department of corrections.

10. Any system used by a state agency to locate a person for motor vehicle or law enforcement purposes, including access to information contained in the Arizona criminal justice information system.

J. Notwithstanding subsection I of this section, the department or its agents shall not seek or obtain information on the assets of an individual unless paternity is presumed pursuant to section 25-814 or established.

K. Access to records of the department of revenue pursuant to subsection I of this section shall be provided in accordance with section 42-2003.

L. The department also has access to certain records held by private entities with respect to child support obligors or obligees, or individuals against whom such an obligation is sought. The information shall be obtained as follows:

1. In response to a child support subpoena issued by the department pursuant to section 25-520, the names and addresses of these persons and the names and addresses of the employers of these persons, as appearing in customer records of public utilities, cable operators and video service providers.

2. Information on these persons held by financial institutions.

M. Pursuant to department rules, the department may compromise or settle any support debt owed to the department if the director or an authorized agent determines that it is in the best interest of this state and after considering each of the following factors:

1. The obligor's financial resources.

2. The cost of further enforcement action.

3. The likelihood of recovering the full amount of the debt.

N. Notwithstanding any law to the contrary, a state or local governmental agency or private entity is not subject to civil liability for the disclosure of information made in good faith to the department pursuant to this section.

46-134. Powers and duties; expenditure; limitation

The state department shall:

1. Administer all forms of public relief and assistance except those that by law are administered by other departments, agencies or boards.

2. Develop a section of rehabilitation for the visually impaired that shall include a sight conservation section, a vocational rehabilitation section in accordance with the federal vocational rehabilitation act, a vending stand section in accordance with the federal Randolph-Sheppard act and an adjustment service section that shall include rehabilitation teaching and other social services deemed necessary, and shall cooperate with similar agencies already established. The administrative officer and staff of the section for the blind and visually impaired shall be employed only in the work of that section.

3. Assist other departments, agencies and institutions of the state and federal governments, when requested, by performing services in conformity with the purposes of this title.

4. Act as agent of the federal government in furtherance of any functions of the state department.

5. Carry on research and compile statistics relating to the entire public welfare program throughout this state, including all phases of dependency and defectiveness.

6. Cooperate with the superior court in cases of delinquency and related problems.

7. Develop plans in cooperation with other public and private agencies for the prevention and treatment of conditions giving rise to public welfare and social security problems.

8. Make necessary expenditures in connection with the duties specified in paragraphs 5, 6, 7, 13 and 14 of this subsection.

9. Have the power to apply for, accept, receive and expend public and private gifts or grants of money or property on the terms and conditions as may be imposed by the donor and for any purpose provided for by this chapter.

10. Make rules, and take action necessary or desirable to carry out the provisions of this title, that are not inconsistent with this title.

11. Administer any additional welfare functions required by law.

12. If a tribal government elects to operate a cash assistance program in compliance with the requirements of the United States department of health and human services, with the review of the joint legislative budget committee, provide matching monies at a rate that is consistent with the applicable fiscal year budget and that is not more than the state matching rate for the aid to families with dependent children program as it existed on July 1, 1994.

13. Furnish a federal, state or local law enforcement officer, at the request of the officer, with the current address of any recipient if the officer furnishes the agency with the name of the recipient and notifies the agency that the recipient is a fugitive felon or a probation, parole or community supervision violator or has information that is necessary for the officer to conduct the official duties of the officer and the location or apprehension of the recipient is within these official duties.

14. In conjunction with Indian tribal governments, request a federal waiver from the United States department of agriculture that will allow tribal governments that perform eligibility determinations for temporary assistance for needy families programs to perform the food stamp eligibility determinations for persons who apply for services pursuant to section 36-2901, paragraph 6, subdivision (a). If the waiver is approved, the state shall provide the

state matching monies for the administrative costs associated with the food stamp eligibility based on federal guidelines. As part of the waiver, the department shall recoup from a tribal government all federal fiscal sanctions that result from inaccurate eligibility determinations.

41-1072. Definitions

In this article, unless the context otherwise requires:

1. "Administrative completeness review time frame" means the number of days from agency receipt of an application for a license until an agency determines that the application contains all components required by statute or rule, including all information required to be submitted by other government agencies. The administrative completeness review time frame does not include the period of time during which an agency provides public notice of the license application or performs a substantive review of the application.

2. "Overall time frame" means the number of days after receipt of an application for a license during which an agency determines whether to grant or deny a license. The overall time frame consists of both the administrative completeness review time frame and the substantive review time frame.

3. "Substantive review time frame" means the number of days after the completion of the administrative completeness review time frame during which an agency determines whether an application or applicant for a license meets all substantive criteria required by statute or rule. Any public notice and hearings required by law shall fall within the substantive review time frame.

41-1073. Time frames; exception

A. No later than December 31, 1998, an agency that issues licenses shall have in place final rules establishing an overall time frame during which the agency will either grant or deny each type of license that it issues. Agencies shall submit their overall time frame rules to the governor's regulatory review council pursuant to the schedule developed by the council. The council shall schedule each agency's rules so that final overall time frame rules are in place no later than December 31, 1998. The rule regarding the overall time frame for each type of license shall state separately the administrative completeness review time frame and the substantive review time frame.

B. If a statutory licensing time frame already exists for an agency but the statutory time frame does not specify separate time frames for the administrative completeness review and the substantive review, by rule the agency shall establish separate time frames for the administrative completeness review and the substantive review, which together shall not exceed the statutory overall time frame. An agency may establish different time frames for initial licenses, renewal licenses and revisions to existing licenses.

C. The submission by the department of environmental quality of a revised permit to the United States environmental protection agency in response to an objection by that agency shall be given the same effect as a notice granting or denying a permit application for licensing time frame purposes. For the purposes of this subsection, "permit" means a permit required by title 49, chapter 2, article 3.1 or section 49-426.

D. In establishing time frames, agencies shall consider all of the following:

1. The complexity of the licensing subject matter.

2. The resources of the agency granting or denying the license.

3. The economic impact of delay on the regulated community.

4. The impact of the licensing decision on public health and safety.

5. The possible use of volunteers with expertise in the subject matter area.

6. The possible increased use of general licenses for similar types of licensed businesses or facilities.

7. The possible increased cooperation between the agency and the regulated community.

8. Increased agency flexibility in structuring the licensing process and personnel.

E. This article does not apply to licenses issued either:

1. Pursuant to tribal state gaming compacts.

2. Within seven days after receipt of initial application.

3. By a lottery method.

41-1074. Compliance with administrative completeness review time frame

A. An agency shall issue a written notice of administrative completeness or deficiencies to an applicant for a license within the administrative completeness review time frame.

B. If an agency determines that an application for a license is not administratively complete, the agency shall include a comprehensive list of the specific deficiencies in the written notice provided pursuant to subsection A of this section. If the agency issues a written notice of deficiencies within the administrative completeness time frame, the administrative completeness review time frame and the overall time frame are suspended from the date the notice is issued until the date that the agency receives the missing information from the applicant.

C. If an agency does not issue a written notice of administrative completeness or deficiencies within the administrative completeness review time frame, the application is deemed administratively complete. If an agency issues a timely written notice of deficiencies, an application is not complete until the agency receives all requested information.

D. Except for an application submitted to the department of water resources pursuant to title 45, a determination by an agency that an application is not administratively complete is an appealable agency action, which if timely initiated, entitles the applicant to an adjudication on the merits of the administrative completeness of the application.

41-1075. Compliance with substantive review time frame

A. During the substantive review time frame, an agency may make one comprehensive written request for additional information. The agency and applicant may mutually agree in writing to allow the agency to submit supplemental requests for additional information. If an agency issues a comprehensive written request or a supplemental request by mutual written agreement for additional information, the substantive review time frame and the overall time frame are suspended from the date the request is issued until the date that the agency receives the additional information from the applicant.

B. By mutual written agreement, an agency and an applicant for a license may extend the substantive review time frame and the overall time frame. An extension of the substantive review time frame and the overall time frame may not exceed twenty-five per cent of the overall time frame.

41-1076. Compliance with overall time frame

Unless an agency and an applicant for a license mutually agree to extend the substantive review time frame and the overall time frame pursuant to section 41-1075, an agency shall issue a written notice granting or denying a license within the overall time frame to an applicant. If an agency denies an application for a license, the agency shall include in the written notice at least the following information:

1. Justification for the denial with references to the statutes or rules on which the denial is based.

2. An explanation of the applicant's right to appeal the denial. The explanation shall include the number of days in which the applicant must file a protest challenging the denial and the name and telephone number of an agency contact person who can answer questions regarding the appeals process.

41-1077. Consequence for agency failure to comply with overall time frame; refund; penalty

A. If an agency does not issue to an applicant the written notice granting or denying a license within the overall time frame or within the time frame extension pursuant to section 41-1075, the agency shall refund to the applicant all fees charged for reviewing and acting on the application for the license and shall excuse payment of any such fees that have not yet been paid. The agency shall not require an applicant to submit an application for a refund pursuant to this subsection. The refund shall be made within thirty days after the expiration of the overall time frame or the time frame extension. The agency shall continue to process the application subject to subsection B of this section. Notwithstanding any other statute, the agency shall make the refund from the fund in which the application fees were originally deposited. This section applies only to license applications that were subject to substantive review.

B. Except for license applications that were not subject to substantive review, the agency shall pay a penalty to the state general fund for each month after the expiration of the overall time frame or the time frame extension until the agency issues written notice to the applicant granting or denying the license. The agency shall pay the penalty from the agency fund in which the application fees were originally deposited. The penalty shall be two and one-half per cent of the total fees received by the agency for reviewing and acting on the application for each license that the agency has not granted or denied on the last day of each month after the expiration of the overall time frame or time frame extension for that license.

46-802. Child care services

The department shall establish and administer child care services. Child care services include:

1. Child care assistance to eligible families.

2. Certification of child care home and in-home providers who are not required to be licensed pursuant to title 36, chapter 7.1 for the purposes of caring for children eligible for child care assistance.

3. Establishment of rights and duties of providers and the department for the provision of child care assistance and services.

4. Consumer education to families and the public, including activities that help families make informed decisions about child care options.

5. Activities that improve the quality and availability of child care.

6. Consultation, technical assistance, training and resources to improve the provision and expand the access to child care services.

46-807. Certification of family child care home and in-home providers; hearing

A. The department shall establish health, safety and training standards for the certification of child care home providers and in-home providers.

B. All child care personnel shall be fingerprinted according to section 41-1964.

C. The department may deny the application or suspend or revoke the certification of a child care home or in-home provider for violation of any provisions of law or failure to maintain the standards of care. Written notice of the grounds of suspension or the proposed denial or revocation shall be given to the applicant or provider. The applicant or provider has a right to request a hearing on the suspension, denial or revocation of a certification, and a hearing shall be held pursuant to title 41, chapter 14, article 3 and according to rules of the department.

46-809. Rules

The department shall adopt rules it deems reasonable or necessary to implement child care services and to further the objectives of this article. Rules adopted by the department shall include:

1. Criteria for making child care assistance eligibility determinations.

2. Criteria for certifying child care home and in-home providers.

3. Criteria for operating child care resource and referral services and for suspending and terminating referrals to participating child care providers pursuant to section 41-1967.

E-5.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 7, Article 17

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 10, 2025

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 7, Article 17

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) relates to twenty-eight (28) rules in Title 9, Chapter 7, Article 17 regarding Radiation Control, specifically, Wireline Service Operations and Subsurface Tracer Studies.

In the prior 5YRR for these rules, which was approved by the Council in January 2020, the Department stated that it planned to review the rules in the entire Chapter after completing the 5YRRs on all Articles in the Chapter, the last of which was due to the Council in December 2021 and was approved in March 2022. During this review, the Department indicates it determined that extensive changes were required throughout the entire Chapter and planned a rulemaking to be completed in stages. The Council approved a plan for the rulemaking of the Chapter, with a Notice of Final Rulemaking to be submitted to the Council no earlier than December 2025. Pursuant to A.R.S. § 41-1039(A), the Department indicates it was granted approval to conduct rulemaking in the Chapter in May 2023, and is, thus, complying with the rulemaking plan approved by the Council in March 2022.

Proposed Action

In the current report, the Department indicates some rules are not clear, concise, and understandable as outlined in more detail below. The Department states it is planning to comply with the rulemaking plan for the Chapter that was approved by the Council in March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Department indicates the anticipated economic impacts of the rules at the time of their adoption appear to have aligned closely with the actual economic impacts observed over time. In most cases, the Department expected minimal to no economic burden on stakeholders, especially as many rule changes were clarifications, updates to align with federal requirements, or codifications of existing licensing conditions. The predicted economic benefits, such as improved clarity and regulatory compliance, were realized as expected.

Stakeholders include the Department, entities licensed by the Department, the U.S. Nuclear Regulatory Commission, workers handling radioactive materials, and the general public.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes that the probable benefits of the rules, in protecting employees, the public, and the environment, outweigh the probable costs of the rules. The Department also believes that the substantive content of the rules are the minimum necessary to meet requirements of the Agreement and protect health and safety. Other issues identified in this report may impose a minor regulatory burden, but they are minor in comparison to the costs of having the NRC assume responsibility for compliance with federal requirements.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it has not received any written criticism of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the following rules are not clear, concise, and understandable:

- **Multiple:**

    - The rules would be clearer if minor grammatical or formatting changes were made. However, Arizona is required by the Agreement negotiated between Arizona and the U.S. Atomic Energy Commission (now the U.S. Nuclear Regulatory Commission (NRC)) in 1967 to be consistent with requirements of the NRC. To comply with the Agreement some requirements in this Article must be identical to federal requirements, regardless of whether the language is clear or not.
- **R9-7-1701:**
    - The rule would be clearer if the term "tritium neutron generator tube" were defined or described.
- **R9-7-1702:**
    - The rule would be clearer if the exception in subsection (D) were included as a lead-in in subsection (A). Subsection (A)(4) would be clearer if it cited to R9-7-1724. Subsection (A)(5) would be more understandable if it cited to A.A.C. R12-7-126 and R12-7-127, referenced a description of how the Department classifies a source as irretrievable, and specified the event initiating the "within 30 days." Subsection (A)(5)(c)(ii) would be clearer and more concise if this exception for the radiation symbol, in addition to sources of radiation subjected to high-temperature, were included in R9-7-428(B), and if the rule were cited to in the subsection. Subsection (A)(5)(d) would be clearer if it cited the applicable requirements in A.A.C. Title 12, Chapter 7, Article 1 and Title 12, Chapter 15, Article 8. Subsection (B) would be clearer if it contained the cross-reference to subsection (A). Subsection (C) would be clear if it specified how a licensee may apply for approval of an alternate manner to abandon an irretrievable well logging source.
- **R9-7-1703, R9-7-1712, and R9-7-1713:**
    - The rules would be improved if the titles of R9-7-1703 and R9-7-1712 or their content were revised to address an apparent inconsistency. Transport and storage requirements in the three rules might also be better grouped together. However, R9-7-1703 is compatibility category B, meaning it must be word-for-word with federal requirements.
- **R9-7-1716:**
    - The rule would be clearer if the content of the inventory record were in a list, rather than included in a long sentence.
- **R9-7-1718:**
    - The rule would be improved if subsection (A) were changed to clarify that the elements of subsection (A)(1) through (3) are requirements for any sealed source used for well logging applications. The rule would also be improved if the requirements in subsections (C) and (D) were combined. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
- **R9-7-1719:**
    - Subsection (B) would be clearer if it cited to requirements in R9-7-428(A).
- **R9-7-1720:**

    - The rule would be clearer if subsections (A) and (B) were reformatted so they were not as long with multiple sentences. The rule may also be improved if requirements in subsections (C) and (E) were combined.
- **R9-7-1721:**
    - The rule would be clearer if subsections (A)(4) and (B)(3) specified what is "successful" completion of a written/oral test and if the person giving the written test were specified. Subsection (B)(4) could also be improved if it required a logging assistant to demonstrate competence as well as receive instruction. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
- **R9-7-1722:**
    - Subsection (5) could be improved if it cited to R9-7-1723. Subsection (9) would be improved if uranium sinker bars were listed in the rule, consistent with R9-7-1720(B). The rule would also be improved if it contained a requirement for the operating and emergency procedures to be maintained for at least three years past termination, as in other Sections of the Chapter.
- **R9-7-1722, R9-7-1726, R9-7-1727, R9-7-1728, and R9-7-1734:**
    - The rule would be clearer if the term "surface casing" were defined.
- **R9-7-1723:**
    - Subsection (A) would be clearer if it stated "unless that individual wears ..." rather than "unless that person wears ...". Subsection (B) would be improved if it were clearer whether the requirement is for the licensee to ensure that each individual wears the assigned equipment or whether it is a requirement on the individual to wear the assigned equipment. The rule would also be improved by citing limits of exposure.
- **R9-7-1726:**
    - Subsection (C) could be improved if it required all "applicable" requirements to be followed.
- **R9-7-1727:**
    - Subsection (C) could be improved if it required all "applicable" requirements to be followed.
- **R9-7-1728 and R9-7-1734:**
    - The rule would be improved if requirements in R9-7-1728 and R9-7-1734 were combined in one Section.
- **R9-7-1733:**
    - Subsection (A) would be improved by removing passive language and specifying who must take precautions.
- **R9-7-1734:**
    - Subsection (A) would be improved if the "correct procedure" were clarified. The requirements for particle accelerators, specified in subsection (C), should it be in its own Section.
- **R9-7-1741:**
    - Subsection (A) would be improved if the rule specified that a radiation survey should be performed where radioactive material is used, as well as where it is stored, and that the instruments used must meet the requirements in R9-7-1714.

Subsection (B) would be improved if the term "occupied positions" were described. Subsection (E) would be clearer if the content of the record of survey were in a list, rather than included in a long sentence.

- **R9-7-1742:**
  - The rule would be improved if the agreement required in R9-7-1702 were included in the list.
- **R9-7-1743:**
  - Subsection (4) would be clearer if it included a citation to applicable documentation requirements for shipping radioactive materials.
- **R9-7-1751:**
  - The rule would be improved if it did not imply that only the licensee is making the effort to recover the sealed source or implementing abandonment procedures, since, according to the agreement required according to R9-7-1702, the well owner may be the responsible party. Subsection (A)(2) would be clearer if it stated "under R9-7-1702(A) or (C)" since R9-7-1702(C) refers to an abandonment procedure not authorized in R9-7-1702(A)(5), so the two would be mutually exclusive. Subsection (A)(3) would be clearer if the time-frame for making the request were specified. Subsection (C) would be clearer if the three situations requiring notification were listed, with the appropriate cross-reference. Subsection (D) would be clearer if reformatted to better delineate the content and persons receiving the report in the same sentence.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Department indicates the rules are consistent with other rules and statutes.

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

The Department indicates the rules are effective in achieving their objectives.

8. Has the agency analyzed the current enforcement status of the rules?

The Department indicates the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates that federal regulation 10 CFR 39 is applicable to these rules. The Department states that these rules are not more stringent than corresponding federal law.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Department indicates these rules provide standards and limits for wireline service operations and subsurface tracer studies but do not include the issuance of a license or permit.

11. Conclusion

This 5YRR from the Department relates to twenty-eight (28) rules in Title 9, Chapter 7, Article 17 regarding Radiation Control, specifically, Wireline Service Operations and Subsurface Tracer Studies. The Department indicates the rules are consistent with other rules and statutes, effective, and enforced as written. However, the Department indicates the rules could be more clear, concise, and understandable. The Department states it is planning to comply with the rulemaking plan for the Chapter that was approved by the Council in March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025.

Council staff recommends approval of this report.

ARIZONA DEPARTMENT
OF HEALTH SERVICES

October 28, 2024

VIA EMAIL: grrc@azdoa.gov
Jessica Klein, Esq., Chair
Governor's Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 7, Article 17, Five-Year-Review Report

Dear Ms. Klein:

Please find enclosed the Five-Year-Review Report from the Arizona Department of Health Services (Department) for 9 A.A.C. 7, Article 17, which is due on or before October 31, 2024.

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this Report, please contact Ruthann Smejkal at Ruthann.Smejkal@azdhs.gov.

Sincerely,

Stacie Gravito
Director's Designee

ARIZONA DEPARTMENT OF HEALTH SERVICES

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 7. Department of Health Services

Radiation Control

Article 17. Wireline Service Operations and Subsurface Tracer Studies

October 2024

1. **Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. §§ 30-654(B)(5) and 36-136(G)

Specific Statutory Authority: A.R.S. §§ 30-654, 30-657, 30-672, and 30-673

2. **The objective of each rule:**

Rule	Objective
R9-7-1701	To define terms used in the Article so that a reader can consistently interpret requirements.
R9-7-1702	To specify the requirements for identifying the party responsible for recovery, monitoring, decontamination, and abandonment procedures related to lost or disconnected well logging sources of radioactivity.
R9-7-1703	To establish the transport, use, and storage requirements of source material in well logging.
R9-7-1712	To specify the requirements for storing or transporting a source of radiation used in well logging.
R9-7-1713	To require that transport containers are physically secured in a transporting vehicle.
R9-7-1714	To require the presence of calibrated and operable radiation survey instruments at every field station and temporary job site, including the sensitivity and calibration parameters.
R9-7-1715	To establish requirements for performing leak testing on sealed sources used by a licensee, including the method and frequency of testing, the removal of leaking sources from services, and the maintenance of records. To specify what sealed sources are exempt from testing requirements.
R9-7-1716	To specify requirements for conducting a physical inventory of all licensed material, including the frequency of inventory, content of records, and maintenance of records.
R9-7-1717	To specify requirements for records of use, including the content of the records and length of retention.
R9-7-1718	To specify the design and performance criteria for a sealed source used in well logging operations.
R9-7-1719	To specify labeling requirements for sources, source holders, logging tools, and transport containers to indicate the presence or possible presence of radioactivity.
R9-7-1720	To establish requirements for inspection of equipment used for well logging before use and according to a program for semiannual inspection and routing maintenance.

	To require that equipment found to have a defect is removed from service until repaired and that a record is made and maintained. To specify restrictions on opening, repair, modification, or tampering with a sealed source.
R9-7-1721	To establish the qualifications and training requirements of a logging supervisor and logging assistant to ensure safe well logging operations. To require annual safety training reviews and maintenance of training records.
R9-7-1722	To require the development of operating and emergency procedures and specify the subject matter to be covered to protect health and safety.
R9-7-1723	To establish requirements for the monitoring of radiation exposure by personnel and for related actions to protect health and safety.
R9-7-1724	To specify requirements for radioactive contamination control to protect health and safety.
R9-7-1725	To establish requirements for use of a uranium sinker bar in well logging to ensure health and safety.
R9-7-1726	To establish requirements for use of an energy compensation source in well logging to ensure health and safety.
R9-7-1727	To establish requirements for use of a neutron generator source in well logging to ensure health and safety.
R9-7-1728	To establish requirements for use of a sealed source in a well without surface casing to ensure health and safety.
R9-7-1731	To specify requirements to ensure the security of areas in which licensed material is being used to protect health and safety.
R9-7-1732	To describe requirements for the use of tools for remote handling of sealed sources.
R9-7-1733	To establish requirements for subsurface tracer studies to ensure health and safety.
R9-7-1734	To establish requirements for use of a sealed source in a well without surface casing to protect a freshwater aquifer to ensure health and safety. To establish requirements for use of a particle accelerator to ensure health and safety.
R9-7-1741	To establish requirements for performing radiation surveys, including the method of testing and the content and maintenance of records.
R9-7-1742	To specify the document required to be maintained at a field station.
R9-7-1743	To specify the document required to be maintained at a temporary job site.
R9-7-1751	To specify the notification requirements for incidents, lost sources, or abandoned sources.

3. **Are the rules effective in achieving their objectives?** **Yes _X_** **No __**

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

Rule	Explanation

4. **Are the rules consistent with other rules and statutes?** **Yes _X_** **No __**

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

Rule	Explanation

5. **Are the rules enforced as written?** **Yes _X_ No __**

If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency's proposal for resolving the issue.

Rule	Explanation

6. **Are the rules clear, concise, and understandable?** **Yes ___ No _X_**

If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.

Rule	Explanation
Multiple	The rules would be clearer if minor grammatical or formatting changes were made. However, Arizona is required by the Agreement negotiated between Arizona and the U.S. Atomic Energy Commission (now the U.S. Nuclear Regulatory Commission (NRC)) in 1967 to be consistent with requirements of the NRC. To comply with the Agreement some requirements in this Article must be identical to federal requirements, regardless of whether the language is clear or not.
R9-7-1701	The rule would be clearer if the term "tritium neutron generator tube" were defined or described.
R9-7-1702	The rule would be clearer if the exception in subsection (D) were included as a lead-in in subsection (A). Subsection (A)(4) would be clearer if it cited to R9-7-1724. Subsection (A)(5) would be more understandable if it cited to A.A.C. R12-7-126 and R12-7-127, referenced a description of how the Department classifies a source as irretrievable, and specified the event initiating the "within 30 days." Subsection (A)(5)(c)(ii) would be clearer and more concise if this exception for the radiation symbol, in addition to sources of radiation subjected to high-temperature, were included in R9-7-428(B), and if the rule were cited to in the subsection. Subsection (A)(5)(d) would be clearer if it cited to the applicable requirements in A.A.C. Title 12, Chapter 7, Article 1 and Title 12, Chapter 15, Article 8. Subsection (B) would be clearer if it contained the cross-reference to subsection (A). Subsection (C) would be clear if it specified how a licensee may apply for approval of an alternate manner to abandon an irretrievable well logging source.
R9-7-1703, R9-7-1712, and R9-7-1713	The rules would be improved if the titles of R9-7-1703 and R9-7-1712 or their content were revised to address an apparent inconsistency. Transport and storage requirements in the three rules might also be better grouped together. However, R9-7-1703 is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1716	The rule would be clearer if the content of the inventory record were in a list, rather than included in a long sentence.
R9-7-1718	The rule would be improved if subsection (A) were changed to clarify that the elements of subsection (A)(1) through (3) are requirements for any sealed source used for well logging applications. The rule would also be improved if the requirements in subsections (C) and (D) were combined. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1719	Subsection (B) would be clearer if it cited to requirements in R9-7-428(A).

R9-7-1720	The rule would be clearer if subsections (A) and (B) were reformatted so they were not as long with multiple sentences. The rule may also be improved if requirements in subsections (C) and (E) were combined.
R9-7-1721	The rule would be clearer if subsections (A)(4) and (B)(3) specified what is "successful" completion of a written/oral test and if the person giving the written test were specified. Subsection (B)(4) could also be improved if it required a logging assistant to demonstrate competence as well as receive instruction. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1722	Subsection (5) could be improved if it cited to R9-7-1723. Subsection (9) would be improved if uranium sinker bars were listed in the rule, consistent with R9-7-1720(B). The rule would also be improved if it contained a requirement for the operating and emergency procedures to be maintained for at least three years past termination, as in other Sections of the Chapter.
R9-7-1722, R9-7-1726, R9-7-1727, R9-7-1728, and R9-7-1734	The rule would be clearer if the term "surface casing" were defined.
R9-7-1723	Subsection (A) would be clearer if it stated "unless that individual wears …" rather than "unless that person wears …". Subsection (B) would be improved if it were clearer whether the requirement is for the licensee to ensure that each individual wears the assigned equipment or whether it is a requirement on the individual to wear the assigned equipment. The rule would also be improved by citing to limits of exposure.
R9-7-1726	Subsection (C) could be improved if it required all "applicable" requirements to be followed.
R9-7-1727	Subsection (C) could be improved if it required all "applicable" requirements to be followed.
R9-7-1728 and R9-7-1734	The rule would be improved if requirements in R9-7-1728 and R9-7-1734 were combined in one Section.
R9-7-1733	Subsection (A) would be improved by removing passive language and specifying who must take precautions.
R9-7-1734	Subsection (A) would be improved if the "correct procedure" were clarified. The requirements for particle accelerators, specified in subsection (C), should it be in its own Section.
R9-7-1741	Subsection (A) would be improved if the rule specified that a radiation survey should be performed where radioactive material is used, as well as where it is stored, and that the instruments used must meet the requirements in R9-7-1714. Subsection (B) would be improved if the term "occupied positions" were described. Subsection (E) would be clearer if the content of the record of survey were in a list, rather than included in a long sentence.
R9-7-1742	The rule would be improved if the agreement required in R9-7-1702 were included in the list.
R9-7-1743	Subsection (4) would be clearer if it included a citation to applicable documentation requirements for shipping radioactive materials.
R9-7-1751	The rule would be improved if it did not imply that only the licensee is making the effort to recover the sealed source or implementing abandonment procedures, since, according to the agreement required according to R9-7-1702, the well owner may be the responsible party. Subsection (A)(2) would be clearer if it stated "under R9-7-1702(A) or (C)" since R9-7-1702(C) refers to an abandonment procedure not authorized in R9-7-1702(A)(5), so the two would be mutually exclusive. Subsection (A)(3) would be clearer if the time-frame for making the request were specified. Subsection (C) would be

	clearer if the three situations requiring notification were listed, with the appropriate cross-reference. Subsection (D) would be clearer if reformatted to better delineate the content and persons receiving the report in the same sentence.

7. **Has the agency received written criticisms of the rules within the last five years?** **Yes ___ No _X_**

If yes, please fill out the table below:

Rule	Explanation

8. **Economic, small business, and consumer impact comparison:**

Arizona is an Agreement State by the agreement negotiated between the United States Atomic Energy Commission (now U.S. Nuclear Regulatory Commission (NRC)) and the Governor of Arizona in March of 1967 under A.R.S. § 30-656 (Agreement). In order to remain in compliance with the Agreement, Arizona must adopt regulations related to the control of radioactive material in a manner that is consistent with federal regulations, as required in A.R.S. § 30-654(B)(6). When the Department succeeded to the authority, powers, duties, and responsibilities of the Arizona Radiation Regulatory Agency in 2018, the rules in Article 17 were recodified from 12 A.A.C. 1 to 9 A.A.C. 7, and the current codification is used when describing the economic impact of the rules.

The rules in Article 17 were first adopted in 1990, with revisions made and Sections added in five other rulemakings over the ensuing years. No economic impact statements (EISs) are available to the Department for the original rulemaking or three of the subsequent rulemakings, so the economic impact of the Sections made/revised in the four rulemakings was assessed from information in the Notice of Final Rulemaking for the rulemaking, including review of the changes made. If a rule included in a rulemaking was further revised in a subsequent rulemaking, the impact of the rule is considered in the description of the subsequent rulemaking.

Currently, the Department specifically licenses only four entities that use the rules in Article 17. An additional three to five entities operate according to these rules under reciprocity. These entities provide services to companies in the oil and gas industries, which use wireline logging to obtain a continuous record of the properties of a rock formation.

The one Section that was made in 1990 and has not been revised in a subsequent rulemaking is R9-7-1732. This rule requires tools to be used when handling higher energy radioactive materials. The cost to the regulated community from this rule would be the purchase and maintenance of these tools. This cost was estimated to be less than the economic impact arising from the damage to the health of an individual handling such a sealed source without tools. The Department believes the economic impact is as estimated.

In a rulemaking effective in 2003, R9-7-1703, R9-7-1712, R9-7-1714, R9-7-1717, R9-7-1719, R9-7-1722, R9-7-1731, R9-7-1733, R9-7-1734, and R9-7-1741 were last revised. No EIS is available for this rulemaking. In all but one of these rules, the changes made as part of the rulemaking were identified in a five-year-review report of the rules and clarify and improve the rules. Thus, they were believed to impose no costs and provide a benefit to stakeholders. In R9-7-1734, requirements for use of a sealed source in a well without a surface casing were

included, which had previously been required as conditions of use in a license, so the economic impact of this change was estimated to be minimal. The Department believes the economic impact is as estimated.

In the first of two rulemakings effective in 2004, nine other rules were newly made and one extensively revised to be consistent with federal requirements to comply with the Agreement. These include defining new technologies; adding radioactive contamination safeguards; including requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing; and adding standards for lost and abandoned sources. An EIS is available for this rulemaking. For most of these changes, little, if any, economic impact was predicted. The EIS stated that no licensees in Arizona were performing well logging activities affected by the new requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing. Therefore, the addition of these requirements was thought to have no current economic impact. However, the EIS stated that an economic effect could possibly occur in the future because these requirements, if conditions/procedures changed. In addition, the costs associated with decontamination and clean-up that may result from not complying with the requirements were stated as being much greater than costs of compliance. Since these rules were adopted, there have been no changes in conditions/procedures related to requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing that have an economic effect, so the Department believes the economic impact is as estimated.

The second rulemaking in 2004 included R9-7-1716, R9-7-1720, R9-7-1721, R9-7-1742, and R9-7-1743. No EIS is available for this rulemaking. These rules were revised to include NRC standards required in 10 CFR 39 and were believed to not result in any increased cost to any affected party. The Department believes the economic impact is as estimated.

In a 2009 rulemaking, only one rule in Article 17, R9-7-1713, was revised, and an EIS is available for this rulemaking. This rule was revised to remove passive language without changing the substance of the rule. Therefore, the rulemaking may have had a very minimal benefit from increased clarity, but no other economic impact was identified. The Department believes the economic impact is as estimated.

The last time any of the rules in Article 17 were amended was in 2017, when requirements in R9-7-1723 were changed through expedited rulemaking to conform to revised requirements of the NRC. The rulemaking made changes in R9-7-1723 to clarify requirements and account for dosimeters that did not require "processing." The Department believes the economic impact is as estimated.

9. Has the agency received any business competitiveness analyses of the rules? Yes ___ No _X_

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

Please state what the previous course of action was and if the agency did not complete the action, please explain why not.

In the 2019 five-year-review report, the Department stated that the Department planned to review the rules in the entire Chapter after completing the five-year-review reports on all Articles in the Chapter, the last of which was

due to the Council in December 2021 and was approved in March 2022. During this review, the Department determined that extensive changes were required throughout the entire Chapter and planned a rulemaking to be completed in stages. The Council approved a plan for the rulemaking of the Chapter, with a Notice of Final Rulemaking to be submitted to the Council no earlier than December 2025. Pursuant to A.R.S. § 41-1039(A), the Department was granted approval to conduct rulemaking in the Chapter in May 2023, and is, thus, complying with the rulemaking plan approved by the Council in March 2022.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

The Department believes that probable benefits of the rule, in protecting employees, the public, and the environment, outweigh the probable costs of the rule. The Department also believes that the substantive content of the rules are the minimum necessary to meet requirements of the Agreement and protect health and safety. Other issues identified in this report may impose a minor regulatory burden, but they are minor in comparison to the costs of having the NRC assume responsibility for compliance with federal requirements.

12. Are the rules more stringent than corresponding federal laws? Yes ___ No _X_

Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?

10 CFR 39

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The rules in Article 17 provide standards and limits for wireline service operations and subsurface tracer studies but do not include the issuance of a license or permit.

14. Proposed course of action

If possible, please identify a month and year by which the agency plans to complete the course of action.

The Department is planning to comply with the rulemaking plan for the Chapter that was approved by the Council in March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025.

2003-4
rulemaking effective July 3 2004

ECONOMIC, SMALL BUSINESS AND CONSUMER IMPACT STATEMENT

Arizona Radiation Regulatory Agency

Docket No. RMP-0056

Title 12, Chapter 1

Articles 1, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, and 17

A. Economic, small business and consumer impact summary:

1. In this package many new rules will be added to Title 12 as part of the Agency's continuing effort to stay abreast of Nuclear Regulatory Commission (NRC) standards according to the Agreement, signed with the federal government in which Arizona agreed to manage users of radioactive material (RAM). In addition, some of the proposed changes in Articles 7, 8, 10, and 13 are offered as a result of a five-year review that was approved by the GRRC on March 5, 2002. The following is a summary of all of the changes in RMP-0056:

Article 1: R12-1-107 details the ramifications of deliberate misconduct involving radiation sources. A person will not have to be a licensee or registrant to be affected by this rule.

Article 3: R12-1-311, the requirements for a specific license to manufacture, assemble, repair, or distribute commodities, products, or devices which contain RAM is updated to include current NRC standards. License termination procedures are added to R12-1-319.

Article 4: R12-1-407 is being amended to include a new ALARA standard for radioactive

gas emissions. R12-1-413 is being amended to require licensees to notify the Agency of planned special exposures. R12-1-416 is amended to exclude any radiation exposure from out-patient therapy patients when determining whether the exposure to the general public has been exceeded. R12-1-419 is updated to include NRC exposure standards for minors and declared pregnant women. R12-1-439 is amended to include the latest standards regarding transfer for disposal, and manifests involving RAM. R12-1-450 is updated to allow a device that contains RAM to be inventoried, rather than taking the device apart to see the source, if the licensee is absolutely certain the radiation source has not been tampered with. R12-1-451 and R12-1-452 are added to Article 4 to address safety concerns associated with termination of licensed operations involving RAM. These rules regulate license termination in conjunction with R12-1-319.

Article 5: This Article is revised to contain some of the standards found in NRC 10CFR 34. The individual changes are too numerous to list. These changes complement changes that were previously presented in RMP-0054 and future changes planned for RMP-0058. A regulation that has been dropped is the required field audit, however, the licensee is required to perform an annual review of the entire program in meeting R12-1-407. A noteworthy change that the Agency is adding is the requirement for all RAM radiography programs to notify the Agency of daily field operations to aid the Agency in finding field operations for inspection purposes.

Article 6: R12-1-612 is amended to require a technique chart for both adult and pediatric

patients at the CT radiography console, when applicable.

Article 7: R12-1-703 and R12-1-704 are amended to clarify whom is qualified to supervise and use RAM. R12-1-706, R12-1-712, and R12-1-713 are amended to give some regulatory relief without diminishing the level of safety offered to patients and handlers of the RAM. The first amendment will allow small hospitals to use radioactive material without a radiation safety committee to oversee operations. The second rule allows licensees to inventory sealed sources on a six month basis rather than quarterly. The third rule will allow licensees, who use RAM in unit doses to operate without a dose calibrator to check dosages prior to injection. R12-1-716 is amended to more clearly define the qualifications of the person performing the duties of the qualified expert, who maintains a teletherapy unit.

Article 8: This Article has undergone an extensive review against current Suggested State Regulations. The review has brought to light a number of deficiencies addressed in the rule package. New rules include standards for surveys, postings, and training.

Article 10: The title needs a single change to correctly reflect its association with ionizing radiation users. Because the title's language is to broad, a person can easily be mislead to believe that nonionizing registrants, as well as aforementioned users, are regulated under this Article.

Article 11. This Article is new. The rules affecting users of industrial radiographic x-ray systems are not new, however. They are moved from Article 5 for clarity and understandability purposes. The comments made concerning Article 5 apply to

the rules in this Article as well. Therefore, no other comments are made in this report about Article 11. It is simply a recodification.

Article 12: R12-1-1215 is undergoing a few minor changes to clarify the rule for persons entering the state under reciprocal recognition.

Article 17: This Article is undergoing a number of NRC updates. Federal regulations are being added that will affect new technologies, that are defined in R12-1-1701. Other rules in this article are revised to take on the language and format used by the NRC. New rules included in this update are R12-1-1724, radioactive contamination safeguards; R12-1-1725, regulation of uranium sinker bar use; R12-1-1726, regulation of energy compensated sources; R12-1-1727, regulation of tritium neutron generator target sources; R12-1-1728, regulation of sealed sources used in a well without a surface casing; and R12-1-1751, which sets standards for lost and abandoned sources. All of the rules under revision are being revised to meet the standards in 10CFR 39.

2. Name and address of Agency personnel available to provide additional information concerning this statement:

Name: Aubrey V. Godwin, Director

Address: Arizona Radiation Regulatory Agency
4814 South 40th Street
Phoenix, Arizona 85040

Telephone Number: (602) 255-4845 Ext. 222

Fax Number: (602) 437-0705

B. Economic, small business and consumer impact statement:

1. Proposed rulemaking.

The rule changes resulting in the increased or additional costs are described in the above summary.

2. An .identification of those persons directly affected by the rules.

As required in A.R.S. §41-1055(B)(2) through (5)(b) the following is offered: in describing the expected impact on those affected by the amended rules.

Article 1

- The Agency should not be affected by the changes being made to the definitions in Article 1. Because little misconduct is expected, based on historical activities, little impact on the Agency is expected from the addition of R12-1-107. No increased costs will result from the proposed changes. The Agency is unsure as to the number of persons that will be affected by this rule. Two incidents that may have been affected by this rule in the past 20 years, come to mind. It is unlikely that many violations will be issued against this rule.
- Other agencies should not be affected by the addition of and changes to the definitions in Article 1. Again, because there is little misconduct, other Agencies will be affected minimally by the addition of R12-1-107. .
- Political subdivisions will be affected minimally, as noted above.
- Costs to all businesses small or otherwise, will not be affected by the changes to the definitions. Also, the effect of R12-1-107 should be as

previously noted, however, if misconduct becomes an issue, a licensee, a registrant, or a member of the public could be greatly impacted if they are caught misusing a radiation source. The misconduct could result in a civil penalty, and later greatly affect the person's ability to benefit from the use radiation in the normal course of business.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)© and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally. The probable cost to private persons and consumers should be nonexistent to minimal, provided deliberate misconduct does not become a regulatory issue. The severity of the violation will dictate the economic impact.
- The proposed changes will have little, if any, effect on state revenues.
- A less intrusive or less costly method has not been investigated. It is believed this is unnecessary based on the nature of this new rule.

Article 3

New standards are added to R12-1-311 to regulate persons transferring devices containing radioactive material to "generally licensed" persons. At this time there are two licensees that distribute radioactive material to generally licensed persons. Only one of these companies actually distributes devices affected by the rule change. R12-1-319 is amended to reference new standards for license termination being added to Article 4.

- The Agency should not be affected by these changes. No increased costs will result from the addition of the manufacturing standards to R12-1-311 and termination standards to R12-1-319. There are no licensees affected by the licensing standards proposed for R12-1-311. Also, the Agency should not realize any affects from the new termination standards in R12-1-319.
- Other agencies and other political subdivisions should not be affected because they are not in the business of manufacturing the affected devices, nor are they simply radioactive material licensees that possess radioactive material that could result in a major license termination expense..
- Costs to all businesses from the changes to R12-1-311 and R12-1-319 have the potential for being burdensome, however, the potentially affected businesses are already regulated and are therefore familiar with similar manufacturing and license termination standards. Although there are 10-20 licenses terminated annually, there are no businesses in Arizona that manufacture the devices affected by the proposed rulemaking in R12-1-311. It is important to note that adequate termination practices are being practiced by the Agency through the use of license commitments and conditions.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)©) and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because of the previously existing minimal impact noted in this

report.

- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated. It is believed this is unnecessary because of the minimal affect the new rules will probably have on the regulated community. Familiarity with new requirements already exists. This is very evident by the lack of interest in the rule changes in the comments provided to the Agency.

Article 4

- Definitions are added to R12-1-403 that will have little effect on the economic status of the affected radiation users, but will aid in understanding the requirements contained in this Article. The amendment to R12-1-407 could potentially result in an increased costs associated with a radiation safety program, but this additional cost is unknown because the Agency does not know how each radioactive gas user will modify their procedures to meet the new ALARA level for airborne radioactive material. The number of industrial users affected by the rule change is two. It is estimated that about 50 medical licensees will be affected by this change. Additionally, the two major universities in the state could be effected, if research involving radioactive gases is conducted.

The reporting requirement for planned special exposures in R12-1-413 will present a minimal administrative cost to the affected licensees. The

licensees are already required to make these records available to the Agency, as required by the NRC. It is important to note that a planned special exposure has never been performed in Arizona. The amendment to R12-1-416 will result in a small administrative cost because of the calculation associated with the release of patients under R12-1-719. The cost of this calculation will be minimal to nonexistent, depending on whether the affected licensee has in-house physics staff.. Amendments to R12-1-418, R12-1-419, R12-1-430, R12-1-439, R12-1-444, and R12-1-445 should have little economic impact with the minor changes being proposed. The standards affected are established by the NRC, and as previously stated, Arizona is modifying the existing language or standards, depending on the affected rule, as required by the NRC Agreement. The number of incidents reported to the Agency under R12-1-445 averages 12-15 reports annually. Over the past 20 years there has been a high of 30 reports and a low of 7 reports. It is important to remember that these reports involve a potential for exceeding a limit, but seldom do.

R12-1-450 is amended for clarification purposes. There should be no additional economic burden resulting from the proposed amendment. R12-1-451 and R12-1-452 are added to include NRC developed standards for terminating radioactive material licenses. The cost associated with termination of a radioactive material use program will change very little

because the Agency is already regulating termination activities, and because there are few licensees in Arizona that will be affected by the new NRC standards. The actual costs are unknown and will vary depending on the amount, form, and radionuclides used by the licensee. Only large users of unsealed sources including universities, manufacturers, large medical centers, and research centers, should be affected under the decommissioning requirements in R12-1-323 and new termination requirements in Article 4. It is assumed fewer than ten licensees in Arizona will be impacted by the termination rules. In past rulemaking, the Agency has made every effort to protect the state and its citizens from the costs and radiation hazards associated with the termination of licensed programs. An applicant is required to submit a decommissioning plan to the Agency with the application for a license, as required in R12-1-323. With the decommissioning plan the Agency is requiring licensees comply with a termination standard that is addressed in the license application.

- The Agency should not be affected by the changes in Article 4.
- Other agencies and other political subdivisions should not be affected unless they are licensees actively using radioactive material in their course of business. (See discussion affecting universities below)
- Increased costs to all businesses from the changes is expected to be minimal because few licensees are affected and the few affected businesses are already regulated and are familiar with the requirements in

the proposed rulemaking. In the past the radiation safety issues were addressed in license conditions. As stated earlier in this section, costs associated with termination are addressed at the time of application. The affected applicant is required to demonstrate their ability to pay for a facility cleanup, often using a surety bond. To summarize, a university's cost associated with termination will be paid by the State. Other affected licensees will be required to demonstrate a financial ability to pay for a potential cleanup of their site upon termination or closure. In most cases, the cost is several hundreds of thousands of dollars to millions of dollars. A license will not be issued if the applicant does not have money available or a surety bond to pay for these costs, because the Agency will not allow the costs to default to the citizens of Arizona.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)©) and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because of the previously described minimal impact and NRC compatibility issues.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated for reasons already cited.

Article 5

- With the exception of R12-1-525, Article 5 is undergoing a major revision

to keep Arizona compatible with NRC standards in 10 CFR 34. It is doubtful, even with the extensive changes, that any significant costs will result from these amendments because all seven of our licensees contract for work throughout the United States and hire employees that are familiar with national standards. In fact, the mandatory certification exam that radiographers have been taking to function in Arizona is based on the federal standards that make up the proposed rules. There is one exception to this discussion on costs. It deals with the employment of a qualified radiography Radiation Safety Officer (RSO). The Agency will be grand-fathering in the existing active RSO's. It is believed the new standards may result in higher salaries for the newly qualified RSO's. The new requirements for an RSO is in R12-1-512. Finally, these federal radiography standards have undergone extensive national review and have already been adopted by most Agreement States. R12-1-525 is added by the Agency to assist in performing meaningful safety inspections of radiography field operations. The cost to the licensee should only be the time and expense of faxing a current radiography daily work schedule to the Agency. The cost associated with this activity should be minimal for licensees and nonexistent for x-ray radiographers.

- The Agency should see no additional administrative costs associated with the proposed changes. The cost of implementing the new rules is expected to be quite small when compared to cost of enforcing Arizona's

current radiation safety rules. As yet, the actual cost to the Agency has not been determined. Little change is expected with all of the new rules, with the exception of R12-1-525. R12-1-525 is expected to make the inspection staff more efficient by ensuring that each trip to the field will result in a meaningful inspection of the radiographers and additional time to conduct other overdue inspections. Less time will be wasted looking for field operations which results in more time for safety inspections.

- Other agencies should be affected minimally. The Article 5 amendments may have some effect on agency operation if the agency is a radiography licensee, however, there are no agency licensees of this type at this time.
- Political subdivisions should be affected similar to "other agencies" above. there are no political subdivision radiography licensees at this time.
- Costs to all businesses, small or otherwise, are as noted in the above summary. In most cases, Arizona radiographers have already instituted most, if not all, of the radiation safety procedures that are addressed in the proposed rules. The new rules will aid in standardizing the requirements so that licensees functioning anywhere in the US will have to meet a common level of safety.
- The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)©) and (d), (6) and (7):
- The Agency has not developed methods to reduce the affect of the NRC changes on small businesses because the addition of these rules is part of

the previously described NRC Agreement. In terms of radiography, the NRC standards are normally very stringent. It is believed the new level of safety gained by the public far out-weighs the minimum cost to the licensee for implementing the new rules.

- As previously implied, the proposed changes will have minimal effect on state revenues.
- A less intrusive or less costly method has not been investigated because the NRC does not offer any choices when imposing a rule change, and because the proposed changes have minimal to no effect on the cost of doing business by the affected radiographers.

Article 6

- The change to R12-1-612 will require the posting of both an adult and a pediatric technique chart near the operating console of a Computerized Tomographic (CT) radiography unit. The technique information should be readily available in most CT facilities. The cost should be minimal for this minor administrative function, if performed by a technologist using the protocols established by the qualified expert. The procedure normally require about 45 minutes to complete and a technologist earns about $20-30 per hour. If performed by a consulting physicist the cost could be substantially higher at about $400 per visit.
- Other agencies should not be affected. Agencies do not normally use a CT, and for that matter are not involved in the practice of medicine.

- Political subdivisions should not be affected. They do not typically perform medical procedures.
- As noted above, the cost to all medical businesses, small or otherwise, should be nonexistent to minimal.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)© and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because there should be no cost associated with the addition of this record keeping requirement.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated. It is believed this is the least expensive and most efficient method for insuring that the correct imaging technique is used.

Article 7

- R12-1-703 is being amended to clarify language associated with physicians using radioactive material regulated under Article 7, and to add qualifications for technologists handling radioactive material under the supervision of a physician. These changes will not result in any additional costs. The cost of employing technologists, meeting specific qualifications established by the Medical Radiologic Technology Board of Examiners (MRTBE), will be addressed when the rules of the MRTBE are amended to reflect the latest change to the MRTBE statutes. The MRTBE has had

technologist standards in rule since January 2004.

R12-1-704, R12-1-706, R12-1-712, R12-1-714, R12-1-716, and R12-1-717 are amended to clarify existing requirements and update procedures to meet current federal standards. There should not be any increase in costs associated with the proposed changes. If anything, costs will decrease. For example, with the changes to R12-1-713 the licensee's costs associated with having to maintain a dose calibrator will no longer exist if the licensee meets the rule criteria.

- The Agency should not be affected. No increased costs will result from the changes.
- Other agencies should not be affected unless they use radioactive material in the practice of medicine. There are no affected agencies at this time.
- Political subdivisions should not be affected unless they are users of radiation sources, as described above. There are no affected political subdivisions at this time.
- Costs to all businesses, small or otherwise, should be nonexistent, as noted above. In many cases cost will go down. Review of these changes by the NRC has determined that the noted deregulation will not be harmful to public safety..

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)©) and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because there is minimal impact.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated, because of the less-regulatory nature of the proposed changes and because most of the changes are NRC required.

Article 8

- A five-year review recently conducted on Article 8 produced a number of changes that will not result in any significant economic impact. The majority of changes were made for clarification purposes and to bring Arizona's analytical x-ray rules up to Conference of Radiation Control Program Directors (CRCPD) standards. Also, R12-1-807, R12-1-808, and R12-1-809, are being added as new rules, and should not result in any significant economic impact. Adequate surveys and postings are already required by Article 4, while training is required in Article 10. These new rules simply clarify and specify the details of each of these activities.
- The Agency should not be affected. No increased costs will result from the needed changes.
- Other agencies should not be affected unless they use analytical x-ray equipment.
- Political subdivisions should not be affected unless they use analytical x-ray equipment.

- Costs to all businesses, small or otherwise, should be nonexistent to minimal with the proposed changes. Most users are already attuned to Article 8 rules, and are aware of the new requirements involving surveys, postings, and training..

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)© and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally. The probable cost to private persons and consumers should be nonexistent to minimal.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated, because the proposed changes will have little effect on radiation user activities. The rule changes are the least expensive and most effective method for insuring radiation safety when using analytical x-ray equipment.

Article 10, 12, and 13

- Changes to Article 10, 12, and 13 are made for clarification purposes as a result of a five-year review. The changes should not result in any economic impact
- The changes will have little economic impact on the Agency. No increased costs will result from the needed changes discovered during the five-year review, and associated comparison to the most current CRCPD

Suggested State Regulations and NRC regulations.

- Other agencies should not be affected unless they are radiation users.
- Political subdivisions should not be affected unless they are radiation users.
- Costs to all businesses, small or otherwise, should be nonexistent to minimal.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)© and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally. The probable cost to private persons and consumers should be nonexistent to minimal.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated, because of the nature of the proposed changes and the little effect the changes will have on regulated activities.

Article 17

- Article 17 has a number of changes that may impact persons that operate well logging/wireline businesses or use the services of well logging/wireline businesses. The changes to this article arise from a five-year review that included a review against NRC and CRCPD standards. The changes are grouped together according to their potential impact. The

definitions in R12-1-1701 are new and will help the reader understand the new rules. They have no economic impact. The amendments to R12-1-1715, R12-1-1718, R12-1-1723, and R12-1-1751 are made to bring the rules up to current standards and should have little additional economic impact on the affected parties. The new regulations in R12-1-1725, R12-1-1726, and R12-1-1727 may result in an economic impact for licensees in the future, because no licensees are performing these well logging activities in Arizona. Because there are only three active well logging companies in Arizona, the future impact may be small. Additionally, there may be two companies that come into Arizona under reciprocity to conduct activities of this type. The potential associated costs of doing the logging are expected to be small when shallow water holes are logged, which is the most common regulated activity in Arizona. There are no deep petroleum wells in Arizona that could be affected by the higher costs associated with a failed safety system. Finally, R12-1-1724, R12-1-1726, R12-1-1727, and R12-1-1728, which are new, offer the greatest potential for economic impact. The actual amount of the impact is not easily determined. Costs are dependent on the amount of radioactive material in the radiation source, hole size, hole depth, and location of the hole. Also, getting a hole ready for logging by casing is costly. The cost of casing a hole is as follows:

A typical hole is 28 inches in diameter with an 18-20 inch casing.

The hole, typical 1000 to 2000 feet deep, is drilled to access a potable aquifer. Cost varies from $260,000 for a 1000 foot hole to $410,000 for 2000 foot hole. Today only about 5% of all holes drilled are not cased. This rate of casing has been in effect for about eight years. Water holes that are not typically cased are of low volume or poor quality.

The main reason holes are drilled in Arizona is to access potable water. Other holes may be drilled to access mineral ores or to store gas or water for later use. These holes are not generally cased unless a potable aquifer is involved in the drilling area.

The radiation source is used to evaluate the geology in the vicinity of the hole. It is important to remember that the potential for contamination is greatest if safety procedures are not followed when the source is down hole, or if proper procedure is not followed in retrieving a source that is stuck down-hole. This is why it is so important for Agency inspectors to evaluate well logging activities to insure that the licensee is following the commitments in the license application and Arizona rules. It is also the Agency's responsibility to ensure that the licensee is able to decontaminate a well site if a sealed source capsule is breached.

In a past incident outside of Arizona, the cost associated with the cleanup of a leaking well logging source was in excess of a million dollars. To

protect aquifers, well holes must be cased. Failure to properly case a hole can result in contaminated drinking water, in addition to the contaminated well site. Therefore, it is believed the cost associated with casing a hole may add additional cost , but the cost is actually quite small compared to the cost of a cleanup resulting from a breached source and a contaminated aquifer.

- The Agency should be affected minimally under normal conditions. No increased costs will result from the changes. However, in response to a breached source emergency, the Agency would have to realize a substantial amount of staff overtime at $20-30 per hour. The extent of the impact would depend on the extent of contamination and associated hazard to the public.
- Other agencies should not be affected unless they perform well logging. Currently, there are no Agencies using well logging sources.
- Political subdivisions should not be affected unless they perform well logging. Currently, the are no political subdivisions using well logging sources.
- Costs to all businesses, small or otherwise, will be affected as noted above. However, it is important to note that holes are already being cased as needed. Therefore, the impact of the new casing rules is minimal. It is also important to note that there are no licensees in Arizona using energy compensated sources (ECS) and neutron generator sources, which require

cased holes or approval of the Agency to use them in open holes.

The following is offered in summary to the requirements in A.R.S. §41-1055(B)(5)© and (d), (6) and (7):

- The Agency has not developed methods to reduce the impact on small businesses because the changes impact small business operations minimally. The probable cost to private persons and consumers has already been realized over the previous casing history. This amount has not been determined. The cost is typically spread over a large number of municipal water users.
- The proposed changes will have no effect on state revenues.
- A less intrusive or less costly method has not been investigated, because the Agency believes casing is the only alternative. Therefore, it is believed the new rules are the least expensive and most effective method for insuring radiation safety.

C. Availability of reasonable data supporting the economic impact statement for adoption of the proposed rules:

In regard to all of the proposed changes, the data supporting the findings are located in Part A and B of this report. " Minimal" is used extensively throughout this report. It and other value judgements are a best guess estimate based on staff experience at the Agency and as previous experience as members of the regulated community. It should be noted that the cost and current duration of casing logging holes were obtained from a Phoenix

engineering firm. All of the well boring information in this report was obtained from this company.

The Agency feels this rule package will not substantially affect the ability of a licensee to conduct normal business, or impact business interests of the affected licensee. A matrix describing the affects of the changes follows:

Note: Article 11 is a new Article that contains rules moved from Article 5. Simply put, a recodification of the rules listed in Article 5 of the proposed rule package.

Possible// - Can effect licensee, registrant, or member of the public, whom ever is responsible for the misconduct.

None^ - Possible administrative cost, however it should be minimal.

Possible* - Will only effect a licensee if program is terminated.

Possible - Potential cost depend on activity of the affected person; some cost will only result from misconduct and corrective action..

2009

ECONOMIC, SMALL BUSINESS AND CONSUMER IMPACT STATEMENT

Arizona Radiation Regulatory Agency

Docket No. RMP-0069

Title 12, Chapter 1

Articles 1, 2, 3, 4, 6, 9, 11, 12, 14, 15, and 17

A. Economic, small business and consumer impact summary:

Proposed rule making and summary.

For the rulemaking identified in item 6, there should be minimal increase in costs associated with the administrative changes presented in the affected rules. In all cases the regulated community is already familiar with the regulation of medical x-ray and radioactive material transportation. The regulated community is also very familiar with the need for a source tracking system, instituted as a result of the NRC Agreement. This new requirement is administrative in nature and should result in a minimal cost to the affected licensees.

"Minimal" is used extensively throughout this report, and reflects a possible cost increase of $1000.00 or less.

"Moderate" means a possible cost of $1000.01 to $10,000.00

"Substantial" means a possible cost greater than $10,000.00

B. Economic, small business and consumer impact statement:

Article 1

-The Agency should not be affected by the changes being made to the definitions or updates to the incorporated material in Article 1. No increased costs will result from the proposed changes. Other agencies and political subdivisions possessing radiation sources should not experience an increase in their cost of operation as result of implementing the rule amendments as only definitions and updates to incorporated material were changed for clarity reasons.

-Currently there are approximately 6.600 registrants or licensees in the State of Arizona that use the definitions and incorporated material in Article 1.

-Costs to all businesses, small or otherwise, will not be affected by the addition of the definitions or updated incorporated material as they are for clarity purposes only.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally and the State must remain in compliance with Federal regulations in order to remain an Agreement State.

-There is little or no probable cost or benefit to private persons or consumers as the rules of this Agency are for the public health and safety and regulation of radiation in general and not in regulation of private persons or consumers.

-The proposed changes will have little, if any, effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is unnecessary based on the fact that only definitions and updates to incorporated material are added.

Article 2

-Typing errors, unit designations, and a clarification of services that are non-exempt are corrected in R12-1-201. A clarifying definition of "install" and application information is added in R12-1-203. Clarification on registration and certificate expiration and renewal is added in R12-1-205. Clarification of reporting requirements of component assembly and an incorporated reference is updated in R12-1-206. A grammar error is corrected in R12-1-207. Article 11 is added to the Table in Appendix A. There are no new requirements associated with the changes to Article 2. Current costs are not affected.

-Currently there are approximately 6,600 registrants or licensees in the State of Arizona that use the rules and incorporated material in Article 2.

-Costs to all businesses, small or otherwise, will not be affected by the correction of typos, clarification of existing rules, or updates to incorporated material as they are for clarity purposes only.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because of the previously existing minimal impact noted in this report.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is unnecessary because of the minimal affect the amendments will likely have on the regulated community as compliance with the rules remains in essence the same. Familiarity with requirements by registrants and licensees currently exists.

Article 3

-An additional requirement is added and an omission of the word "and" from the last rule revision is added in R12-1-302. Additional requirements are added concerning exemptions for radioactive material other than source material in R12-1-303. Correction of radiation units; clarification of isotopes not authorized to be manufactured, imported, or exported; the addition of "selenium-75" to be considered when determining the maximum activity for storage or use; and incorporated references are updated in R12-1-306. Clarification of rule applicability and correction of grammatical errors are in R12-1-310. Clarification of rule applicability, deletion of three ineffective subsections only regulated at the federal level, correction of grammatical errors, incorporated reference updates, and the new Nuclear Regulatory Commission requirements for manufacturers of

nationally tracked sources to be serialized are added or corrected in R12-1-311. Clarification of applicability is added in R12-1-313. Typing errors, clarification of records that must be kept, and incorporated references are updated in R12-1-323. Corrections of references to other sections of Title 12, Chapter 1 are made in R12-1-324. The cost associated with the manufacturer's requirement to serialize sources should not change significantly because the regulated community is very familiar with the need for a source tracking system, instituted as a result of the NRC Agreement.

-Currently there are approximately 400 licensees in the State of Arizona that use the rules and incorporated material in Article 3.

-The Agency should not be adversely affected by the rule changes in Article 3. The requirement to involve the public is a simple administrative procedure that is easily met.

-Other agencies and other political subdivisions should not be affected unless they are licensees actively using radioactive material in their business activities.

-Increased costs to all businesses from the changes are expected to be minimal because few licensees are affected and the few affected businesses are already regulated and are familiar with the requirements in the proposed rulemaking. As stated earlier in this section, costs associated with termination are addressed at the time of application.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally and the State must remain in compliance with Federal regulations in order to remain an Agreement State.

-There is little or no probable cost or benefit to private persons or consumers as the rules of this Agency are for the public health and safety and regulation of radiation in general and not in regulation of private persons or consumers.

-The proposed changes will have little, if any, effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is unnecessary based on the fact that clarification language and updates to incorporated material should have minimal or no impact on costs and the Federal reporting criteria that were added should have minimal costs associated.

Article 4

-"Nationally Tracked Source" is added to the definitions in R12-1-403. Corrected editing errors, added a safety issue clarification with location requirements for the use and placement of monitoring devices in R12-1-419. A few clerical and editorial corrections are made in R12-1-422. A clarification of labeling requirements is made in R12-1-431. An incorporated reference is updated and grammatical errors corrected in R12-1-432. An editorial change is made in R12-1-434. A clarification of the disposal requirements is made in R12-1-435. Duplication of referenced sections is eliminated in R12-1-440. A clarification of

who is to be provided with information is made in R12-1-443. A clarification and editorial correction are made in R12-1-446. An editorial correction is made in R12-1-447. A clarification and editorial correction are made in R12-1-448. Corrections of references to other sections of Title 12, Chapter 1 and editorial changes are made for clarification purposes in R12-1-449. Section added to address the new Nuclear Regulatory Commission regulations for Nationally Tracked Sources is in R12-1-454 to meet federal mandates. There should be no additional economic burden resulting from the proposed amendments.

-Currently there are approximately 5,750 registrants or licensees in the State of Arizona that use the rules and incorporated material in Article 4.

-The Agency should not be affected by the changes in Article 4.

-Other agencies and other political subdivisions should not be affected unless they are registrants or licensees actively using individual monitoring devices, or using or transferring large quantities of sources in their business activities.

-Increased costs to all businesses from the changes are expected to be minimal because there is no economically significant change offered to the existing rules.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because of the previously described minimal impact and NRC compatibility issues.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is unnecessary based on the fact that clarification language and updates to incorporated material should have minimal or no impact on costs and the Federal reporting criteria that were added should have minimal costs associated.

Article 6

-"Healing arts radiography" definition is clarified and an addition of "radiologic physicist are made to the definitions in R12-1-602. An incorporated reference is updated and the film processing and darkroom requirements are rewritten for clarity in R12-1-603. Editorial corrections and additional instruction are added for clarification in R12-1-604 for safety and accreditation compliance reasons. Clerical errors and new criteria are added for operation of x-ray machines in R12-1-605. Grammatical changes are made for clarification in R12-1-606. Criteria needed for documentation and retention rewritten in R12-1-607. Wording added for clarification purposes in R12-1-608. Criteria for the dental x-ray control panel rewritten for clarity and general safety reasons in R12-1-610. Typographical errors are corrected in R12-1-611. An exemption was added for CT units designated for simulator use, veterinary use, and non-diagnostic conjunctive use in a PET unit in R12-1-612. Grammatical changes are made to correct terminology and incorporated references are updated in R12-1-614 to bring the rule into compliance with federal requirements for safety reasons for the mammography program. The changes to the affected rules in Article 6 were

brought to the Agency's attention during previous rulemaking. The changes could not be made at that time. The suggested changes will improve radiation safety for patients receiving radiation during diagnostic x-ray procedures.

-Currently there are approximately 4,900 registrants in the State of Arizona that use the rules and incorporated material in Article 6.

-Other agencies should not be affected. They do not typically perform medical procedures.

-Political subdivisions should not be affected. They do not typically perform medical procedures.

-The cost to all medical businesses, small or otherwise, may be from disposal of expired film which should be nonexistent to minimal.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because there should be little if any cost associated with the amendments.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is the least expensive and most efficient method for insuring the highest level of radiation safety relative to the use of x-ray radiation in the practice of medicine.

Article 9

-The term "Authorized medical physicist" was added to the definitions in R12-1-

902. A reference to another subsection is removed and the specific requirements are added for clarification, editorial changes and an incorporated reference are updated in R12-1-904. Registrants are already maintaining records for two years, an addition of a third year brings this rule into alignment with other record retention requirements in Title 12 in R12-1-905. In addition, editorial changes and record keeping time frames are made in R12-1-905. New shielding and safety criteria are being added in R12-1-907. Editorial corrections are made in R12-1-910. Editorial and references to subsections are corrected in R12-1-911. A reference to another subsection is removed and the specific criteria are added for clarification in R12-1-913. The term "Authorized medical physicist" is added for clarification in Appendix A.

-Currently there are approximately 70 registrants in the State of Arizona that use the rules and incorporated material in Article 9.

-The Agency should not be affected. No increased costs will result from the changes.

-Other agencies should not be affected. There are no agencies affected at this time unless they have a registered particle accelerator.

-Political subdivisions should not be affected. There are no political subdivisions with registered particle accelerators at this time.

-Costs to all businesses, small or otherwise, should be minimal, as noted above. Records are required for all radiation users.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c)

and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because there is minimal impact.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated. It is believed this is unnecessary based on the fact that clarification language and updates to incorporated material should have minimal or no impact on costs unless a registrant does not have any medical caregivers on their staff that can act as a member of nursing services for the safety committee requirements when using a medical particle accelerator.

Article 11

-More defined criteria are added for the purpose of safety while the systems are in operational mode in R12-1-1142.

-Currently there are approximately 250 registrants in the State of Arizona that use the rules and incorporated material in Article 11.

-The Agency should not be affected. No increased costs will result from the changes.

-Other agencies should not be affected. The safe operation requirement is already in practice at other agencies that may have baggage and package screening units.

-Political subdivisions should not be affected. The safe operation requirement is

already in practice with political subdivisions that may have baggage and package screening units.

-Costs to all businesses, small or otherwise, should be minimal, unless a registrant is operating a baggage and package unit unsafely by bypassing safety equipment on the unit to allow it to run without an operator.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because there is minimal impact.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated, because of the minimal effect if any that the amendment will have on the affected registrants that practice safe oversight of x-ray baggage and package units according to federal standards.

Article 12

-The term "depleted uranium" is removed and the remaining terms are alphabetized in R12-1-1215.

-Currently there are approximately 6,600 registrants and licensees in the State of Arizona that use the rules and incorporated material in Article 11.

-The Agency should not be affected. No increased costs will result from the changes.

-Other agencies should not be affected. There are no division III registered or licensed agencies with depleted uranium at this time.

-Political subdivisions should not be affected. There are no division III registered or licensed political subdivisions with depleted uranium at this time.

-A less intrusive or less costly method has not been investigated, because of the minimal effect the deleted category will have on the affected registrants.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because there is minimal impact.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated, because of the minimal effect the amendment will have on the affected registrants.

Article 14

-A clarification to the registration time frame requirement is made in R12-1-1401.

-Currently there are approximately 850 registrants in the State of Arizona that use the rules and incorporated material in Article 14.

-The Agency should not be affected. No increased costs will result from the changes.

-Other agencies should not be affected. Any agencies that wish to register nonionizing radiation devices should benefit from this clarification.

-Political subdivisions should not be affected. Any political subdivisions that wish to register nonionizing radiation devices should benefit from this clarification.

-Costs to all businesses, small or otherwise, should be nonexistent, as the time frame is clarified, not changed from existing rules.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because there is minimal impact.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated, because of the minimal effect the clarified timeframe will have on the affected registrants.

Article 15

-The affected transportation rules and incorporated materials are being updated to meet NRC standards. Because users of radioactive material (RAM) are very familiar with the costs associated with its transportation, and paperwork required should generate minimal costs for licensees transporting RAM.

-Currently there are approximately 15 licensees in the State of Arizona that use the rules and incorporated material in Article 15.

-The Agency should not be affected. No increased costs will result from the required changes.

-Other agencies should not be affected. No increased costs will result from the

needed changes.

-Political subdivisions should not be affected. No increased costs will result from the needed changes.

-Costs to all businesses, small or otherwise, should be nonexistent to minimal with the proposed changes. Most users are already aware of costs associated with transportation.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because the changes will not impact the cost of transporting RAM. The additional cost to private persons and consumers should be nonexistent to minimal.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated, because the proposed changes will have little effect on radiation user activities and those transporting hazardous material are already aware of federally mandated requirements.

Article 17

-Editorial changes are made in R12-1-1713. The changes are to existing requirements and should not result in any economic impact.

-Currently there are approximately 12 registrants in the State of Arizona that use the rules and incorporated material in Article 17.

-The changes will have little economic impact on the Agency.

-Other agencies should not be affected unless they are using well logging sources.

-Political subdivisions should not be affected unless they are radiation users. Currently, there are no political subdivisions using well logging sources.

-Costs to all businesses, small or otherwise, should be nonexistent to minimal.

The following is offered in response to the requirements of A.R.S. §41-1055(B)(5)(c) and (d), (6) and (7):

-The Agency has not developed methods to reduce the impact on small businesses because the changes impact their operations minimally. The probable cost to private persons and consumers should be nonexistent to minimal.

-The proposed changes will have no effect on state revenues.

-A less intrusive or less costly method has not been investigated, because of the nature of the proposed changes and the little effect the changes will have on regulated activities.

C. Availability of adequate data supporting the economic impact statement for adoption of the proposed rules:

In regard to all of the proposed changes, the data supporting the findings is located in Parts A and B of this statement. It and other value judgments are a best guess estimate based on staff experience at the Agency and on previous

experience as members of the regulated community.

The Agency feels this rule package will not substantially affect the ability of licensees and registrants to conduct normal business, or impact business interests of an affected licensee. A narrative describing the affects of the changes follows:

Article 1 contains general provisions and materials incorporated by reference. The changes are made to keep Arizona's rules compatible with NRC regulations. The Agency is required to maintain compatible rules as part of the agreement Arizona has with the NRC.

Article 2 contains rules governing registration, installation, and service of ionizing radiation-producing machines; and certification of mammography facilities. The changes are predominately clarifications and corrections of typographical errors. In addition, some changes were made at the request of the Agency compliance inspectors.

Article 3 contains radioactive material licensing standards. A number of changes are made to Article 3 as a result of a five-year review that was approved by GRRC on April 1, 2008. Also, changes are made to keep Arizona's rules compatible with NRC regulations. The Agency is required to maintain compatible rules as part of the agreement Arizona has with the NRC.

Article 4 establishes radiation safety standards that must be met by users of ionizing radiation. Numerous clarifications are made in Article 4 to maintain standards that are compatible with NRC regulations.

Article 6 regulates the use of x-rays in the healing arts. The rulemaking activities in Article 6 are made for clarification of the current regulations and to create compatible rules to the Federal Food and Drug Administrations oversight of x-ray and the mammographic radiation programs.

Article 9 regulates the use of particle accelerators. One new definition is added to Article 9 that will aid in understanding the regulatory standards. Specific instruction for registration and record keeping are in Article 9 for clarification of the current regulations and to create compatible rules to the Federal Food and Drug Administrations oversight of medical accelerator radiation programs. The Appendix A change is to specify the party responsible for verification of the accelerator radiation output.

Article 11 regulates the industrial uses of x-rays. Specific requirements are made to improve the security and safety of baggage and package x-ray units.

Article 12 contains the administrative provisions of a radioactive materials license or registration. One license and registration division is removed; because

currently, there are no depleted uranium users licensed and the category is removed by the NRC.

Article 14 contains the standards for use of nonionizing radiation. This change clarifies the time frame allowed for the registration of a nonionizing radiation source.

Article 15 contains the regulations for transporting radioactive material. Numerous clarifications are made in Article 15 to maintain standards that are compatible with NRC and Department of Transportation regulations.

Article 17 contains the regulations for wireline service operations and subsurface tracer studies. One change is made to clarify that each licensee is responsible for ensuring that transport containers are secured in the transport vehicle.

ARTICLE 17. WIRELINE SERVICE OPERATIONS AND SUBSURFACE TRACER STUDIES

R9-7-1701. Definitions

"Energy compensation source (ECS)" means a small sealed source, with activity that does not exceed 3.7 Mbq (100 microcuries), contained within a logging tool or other tool component.
"Tritium neutron generator target source" means a tritium source contained within a tritium neutron generator tube that produces neutrons for use in well logging applications.

R9-7-1702. Agreement with Well Owner or Operator

A. A licensee that performs wireline service (well logging) with a sealed source shall enter into a written agreement with the employing well owner or operator that identifies the party responsible for complying with each of the following requirements. The responsible party shall:

1. Make a reasonable effort to recover any sealed source that may be lodged in the well;
2. Not attempt to recover a sealed source in a manner which, in the licensee's opinion, is likely to result in its rupture;
3. Perform the radiation monitoring required in R9-7-1723(A);
4. Decontaminate anyone or anything contaminated with licensed material before releasing personnel or equipment from the site or releasing the site for unrestricted use; and
5. If a source is classified by the Department as irretrievable after reasonable efforts at recovery, implement the following requirements within 30 days:
    a. Immobilize the irretrievable well logging source and seal it in place with a cement plug;
    b. Provide a means to prevent inadvertent intrusion that could damage the source, unless the site is rendered inaccessible to subsequent drilling operations; and
    c. Mount a permanent identification plaque, constructed of long-lasting material, such as stainless steel, brass, bronze, or Monel, in a conspicuous location adjacent to the well. The responsible party shall ensure that the plaque size is at least 17 cm (7 inches) square and 3 mm (1/8 inch) thick and the following information is written on the plaque:
        i. The word "CAUTION,"
        ii. The radiation symbol (the color requirement in R9-7-428(A) does not apply),
        iii. The date the source was abandoned,
        iv. The name of the well owner or operator that employed the licensee;
        v. The well name and identification number or other designation,
        vi. An identification of each source by radionuclide and quantity of radionuclide,
        vii. The depth of the source and depth to the top of the plug, and
        viii. The following warning, "DO NOT RE-ENTER THIS WELL," and
    d. Notify the Oil and Gas Conservation Commission, Department of Water Resources,

or Department of Environmental Quality of the abandoned source, as required by law.

B. A licensee shall maintain a copy of the agreement at the field station during logging operations. The licensee shall retain a copy of the written agreement for three years after completion of the well logging operation.

C. A licensee may apply in accordance with A.R.S. § 30-654(B)(13) for Department approval, on a case-by-case basis, of proposed procedures to abandon an irretrievable well logging source in a manner not otherwise authorized in subsection (A)(5).

D. A written agreement between the licensee and the well owner or operator is not required if the licensee and the well owner or operator are employed by the same corporation or other business entity. If so, the licensee shall comply with the requirements in subsections (A)(1) through (A)(5).

R9-7-1703. Limits on Levels of Radiation

A person in possession of any source of radiation shall transport the source according to 9 A.A.C. 7, Article 15, and use or store the source in a manner that is consistent with the dose limits in 9 A.A.C. 7, Article 4.

R9-7-1712. Storage Precautions

A. A person storing or transporting a source of radiation shall place the source in an approved storage container, transport container, or both. The container or combination of containers shall have a lock, or tamper-proof seal for calibration sources, to prevent unauthorized removal of the source and exposure to radiation.

B. A person storing or transporting a source of radiation shall store the source in a manner that will minimize danger from explosion or fire.

R9-7-1713. Transportation Precautions

Each licensee shall ensure that transport containers are physically secured in the transporting vehicle to prevent accidental movement, loss, tampering, or unauthorized removal.

R9-7-1714. Radiation Survey Instruments

A. A licensee shall maintain at each field station and temporary job site a calibrated and operable radiation survey instrument capable of detecting beta and gamma radiation. The licensee shall ensure that the radiation survey instrument is capable of measuring 1.0 microsievert (0.1 millirem) per hour through 500 microsievert (50 millirem) per hour.

B. A licensee shall ensure that additional calibrated and operable radiation detection instruments are available as needed and that the instruments are sensitive enough to detect the low radiation and contamination levels that could be encountered if a sealed source is ruptured.

C. A licensee shall ensure that the radiation survey instrument required in subsection (A) is calibrated

1. At intervals not to exceed six months and after each instrument servicing;

2. At energies comparable to the energies of the radiation sources used;
3. For linear scale instruments, at two points located approximately 1/3 and 2/3 of full-scale on each scale or for logarithmic scale instruments, at mid-range of each decade, and at two points of at least one decade; and
4. So that accuracy within plus or minus 20 percent of the true radiation level can be demonstrated on each scale.

D. A licensee shall retain calibration records for a period of three years from the date of calibration.

R9-7-1715. Leak Testing of Sealed Sources

A. A licensee that uses a sealed source shall ensure that the source is tested for leakage according to subsection (C). The licensee shall maintain a record of leak test results in units of Becquerels (Bq) or microcuries, for inspection by the Department for three years after the leak test is performed.

B. A person authorized under R9-7-417(C) shall wipe a sealed source using a leak test kit or a similar method approved by the Department, the NRC, or another Agreement State. The authorized person shall take the wipe sample from the nearest accessible point to the sealed source where contamination might accumulate, and ensure the wipe sample is analyzed for radioactive contamination. The authorized person shall use a method of analysis capable of detecting the presence of 185 Bq (0.005 microcuries) of radioactive material on the test sample.

C. Test frequency.
1. A licensee shall ensure that each sealed source (except an energy compensation source (ECS)) is tested in accordance with R9-7-417. In the absence of a certificate from a transferor that a test has been performed within six months before transfer, a licensee shall not use the sealed source until it is tested.
2. A licensee shall ensure that each ECS that is not exempt from testing under subsection (E) is tested at intervals that do not exceed three years. In the absence of a certificate from a transferor that a test has been performed within three years before transfer, a licensee shall not use the ECS until it is tested.

D. Removal of leaking source from service.
1. If a test conducted according to this Section reveals the presence of 185 Bq (0.005 microcuries) or more of removable radioactive material, a licensee shall remove the sealed source from service immediately and have it decontaminated, repaired, or disposed of by a Department, a NRC, or an Agreement State licensee that is authorized to perform these functions. The licensee shall check the equipment associated with the leaking source for radioactive contamination and, if the equipment is contaminated, have it decontaminated or disposed of by a Department, a NRC, or an Agreement State licensee that is authorized to perform the chosen function.
2. A licensee shall submit a report to the Department, within five days of receiving positive test results. The report shall describe the equipment involved in the leak, the test results, any contamination that resulted from the leaking source, and each corrective action taken up

to the date on the report.

E. The following sealed sources are exempt from the periodic leak test requirements in subsections (A) through (D):

1. Hydrogen-3 (tritium) sources;
2. Sources that contain licensed material with a half-life of 30 days or less;
3. Sealed sources that contain licensed material in gaseous form;
4. Sources of beta- or gamma-emitting radioactive material with an activity of 3.7 MBq [100 microcuries] or less; and
5. Sources of alpha- or neutron-emitting radioactive material with an activity of 0.37 MBq [10 microcuries] or less.

R9-7-1716. Inventory

A licensee shall conduct a physical inventory every six months to account for all licensed material received and possessed under the license. The licensee shall maintain records of the inventory for three years from the date of the inventory for inspection by the Department. The inventory shall indicate the quantity and kind of licensed material, the location of the licensed material, the date of the inventory, and the name of each individual who conducted the inventory. Physical inventory records may be combined with leak test records.

R9-7-1717. Utilization Records

Each licensee shall maintain records of use for three years from the date of the recorded event, that contain the following information for each source of radiation:

1. Make, model number, and serial number or a description of each source of radiation used;
2. The identity of the well-logging supervisor or the field unit to which the source is assigned;
3. Locations and dates of use; and
4. In the case of tracer materials and radioactive markers, the radionuclide and activity undertaken in a particular well.

R9-7-1718. Design and Performance Criteria for Sealed Sources

A. A licensee shall use a sealed source for well logging applications if the sealed source:

1. Is doubly encapsulated;
2. Contains licensed material in a chemical and physical form that is insoluble and nondispersible; and
3. Meets the requirements of subsection (B), (C), or (D).

B. For a sealed source manufactured on or before July 14, 1989, a licensee may use a sealed source in well logging applications that meets the requirements of USASI N5.4-1968, Classification of Sealed Radioactive Sources, available from the American National Standards Institute at 25 West 43rd Street, 4th floor, New York, NY 10036, which is incorporated by reference and on file with the Department, or the requirements in subsection (C) or (D). This incorporation by reference

contains no future editions or amendments.

C. For a sealed source manufactured after July 14, 1989, a licensee may use a sealed source in well logging applications that meets the oil-well logging requirements of ANSI/HPS N43.6-1997, Sealed Radioactive Sources--Classification, available from the American National Standards Institute at 25 West 43rd Street, 4th floor, New York, NY 10036, which is incorporated by reference and on file with the Department. This incorporation by reference contains no future editions or amendments.

D. For a sealed source manufactured after July 14, 1989, a licensee may use a sealed source in well logging applications if the sealed source's prototype has been tested and found to maintain its integrity after each of the following required tests:

1. Temperature. The test source is held at -40° C for 20 minutes and 600° C for one hour, and then subjected to a thermal shock with a temperature drop from 600° C to 20° C within 15 seconds.
2. Impact. A 5 kg steel hammer, 2.5 cm in diameter, is dropped from a height of 1 m onto the test source.
3. Vibration. The test source is subjected to vibration in the 25 Hz to 500 Hz range at 5 g amplitude for 30 minutes.
4. Puncture. A 1 gram hammer with a pin, 0.3 cm in diameter, is dropped from a height of 1 m onto the test source.
5. Pressure. The test source is subjected to an external pressure of 1.695 x 107 pascals (24,600 pounds per square inch absolute).

E. The requirements in subsections (A), (B), (C), and (D) do not apply to a sealed source that contains licensed material in gaseous form.

F. The requirements in subsections (A), (B), (C), and (D) do not apply to an energy compensation source (ECS).

R9-7-1719. Labeling

A. A licensee shall mark each source, source holder, or logging tool that contains radioactive material with a durable, legible, and clearly visible marking or label, consisting at minimum of the standard radiation caution symbol, without the conventional color requirement, and the following wording:

DANGER (or: CAUTION)

RADIOACTIVE

This labeling is required for each component transported as a separate piece of equipment regardless of size.

B. A licensee shall permanently attach to each transport container a durable, legible, and a clearly visible label consisting at minimum, of the standard radiation caution symbol and the following wording:

DANGER (or: CAUTION)

RADIOACTIVE

NOTIFY CIVIL AUTHORITIES (or name of company)

R9-7-1720. Inspection, Maintenance, and Opening of a Source or Source Holder

A. Each licensee shall visually check source holders, logging tools, and source handling tools for defects before each use to ensure that the equipment is in good working condition and that required labeling is present. If defects are found, the licensee shall remove equipment from service until it is repaired, and make a record listing: date of check, name of inspector, equipment involved, each defect found, and repairs made. The licensee shall maintain each record for three years after a defect is found.

B. Each licensee shall have a program for semiannual visual inspection and routine maintenance of source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars to ensure that the required labeling is legible and that no physical damage is visible. If any defect is found, the licensee shall remove the equipment from service until it is repaired, and make a record listing; date of inspection, equipment involved, inspection and maintenance operations performed, each defect found, and each action taken to correct a defect. The licensee shall maintain each record for three years after a defect is found.

C. A licensee shall not remove a sealed source from a source holder or logging tool, or perform maintenance on a sealed source or source holder that contains a sealed source without written permission from the Department.

D. If a sealed source is stuck in the source holder, a licensee shall not perform any operation, such as drilling, cutting, or chiseling, on the source holder unless the licensee is specifically authorized to perform the operation by the Department.

E. The opening, repair, or modification of any sealed source is prohibited, unless authorized by the Department, the NRC, or an Agreement State.

R9-7-1721. Training

A. A licensee shall not permit an individual to act as a logging supervisor until that person has:

1. Completed training in the subjects outlined in subsection (E);
2. Received copies of, and instruction in:
    a. The applicable rules contained in 9 A.A.C. 7;
    b. The Department license under which the logging supervisor will perform well logging; and
    c. The licensee's operating and emergency procedures, required by R9-7-1722;
3. Completed on-the-job training and demonstrated competence during a field evaluation in the use of licensed materials, remote handling tools, and radiation survey instruments; and
4. Demonstrated understanding of the requirements in subsections (A)(1) and (A)(2) by successfully completing a written test.

B. The licensee shall not permit an individual to act as a logging assistant until that person has:

1. Received instruction in applicable rules of 9 A.A.C. 7;

2. Received copies of, and instruction in, the licensee's operating and emergency procedures required by R9-7-1722;
3. Demonstrated understanding of the materials listed in subsections (B)(1) and (B)(2) by successfully completing a written or oral test; and
4. Received instruction in the use of licensed materials, remote handling tools, and radiation survey instruments that is related to the logging assistant's intended job responsibilities.

C. A licensee shall provide a safety training review for logging supervisors and logging assistants at least once during each calendar year. Each logging supervisor and logging assistant shall attend a safety training review at least once during the current calendar year.

D. A licensee shall maintain a record of each logging supervisor's and logging assistant's initial training and annual safety training review. The training records shall include copies of written tests and dates of oral tests given after the effective date of this Section. The licensee shall maintain the initial training records for three years following termination of employment, and maintain records of each annual safety training review, including a list of subjects covered during the review, for three years.

E. A licensee shall provide instruction in the following subjects in the training required by subsection (A)(1):

1. Fundamentals of radiation safety, including:
    a. Characteristics of radiation;
    b. Units of radiation dose and quantity of radioactivity;
    c. Hazards of exposure to radiation;
    d. Levels of radiation from licensed material;
    e. Methods of controlling radiation dose (time, distance, and shielding); and
    f. Radiation safety practices, including prevention of contamination and methods of decontamination;
2. Radiation detection instruments, including:
    a. Use, operation, calibration, and limitations of radiation survey instruments;
    b. Survey techniques; and
    c. Use of personnel monitoring equipment;
3. Equipment, including:
    a. Operation of equipment, including source handling equipment and remote handling tools;
    b. Storage, control, and disposal of licensed material; and
    c. Maintenance of equipment;
4. The requirements of pertinent federal and state law, and
5. Case histories of accidents in well logging.

R9-7-1722. Operating and Emergency Procedures

Each licensee shall develop operating and emergency procedures on the following subjects:

1. Procedures designed to prevent individuals from being exposed to radiation in excess of the limits in Article 4 of this Chapter. This subject includes:
    a. Use of a sealed source in a well without a surface casing for the purposes of protecting a fresh water aquifer, as appropriate;
    b. Methods employed to minimize exposure from inhalation or ingestion of licensed tracer materials; and
    c. Methods for minimizing exposure of individuals in the event of an accident;
2. Use of remote handling tools for manipulating a radioactive sealed source or tracer;
3. Methods and occasions for conducting a radiation survey;
4. Methods and occasions for locking and securing a source of radiation;
5. Personnel monitoring and the use of personnel monitoring equipment;
6. Transportation of a source to a temporary job site or field station, including packaging and placing the source of radiation in a vehicle, placarding the vehicle, and securing the source of radiation during transportation;
7. Procedure for notifying the Department if there is an accident;
8. Maintenance of records;
9. Inspection and maintenance of source holders, logging tools, source handling tools, storage containers, transport containers, and injection tools;
10. Procedure required if a sealed source is:
    a. Lost or lodged downhole; or
    b. Ruptured, including safeguards to prevent job site and personnel contamination, inhalation; and ingestion;
11. Procedures required for picking up, receiving, and opening packages that contain radioactive material; and
12. Procedures required for site and equipment surveys and decontamination following tracer studies.

R9-7-1723. Personnel Monitoring

A. A licensee shall not permit an individual to act as a logging supervisor or logging assistant unless that person wears a personnel dosimeter at all times during the handling of licensed radioactive materials.

B. A licensee shall assign a personnel dosimeter to each individual, who shall wear the assigned equipment.

C. A licensee shall replace film badges at least monthly and replace all other personnel dosimeters that require replacement at least quarterly. After replacement, a licensee shall evaluate all personnel dosimeters at least quarterly or promptly after replacement, whichever is more frequent.

D. A licensee shall provide bioassay services to each individual who uses licensed materials in subsurface tracer studies if required by the license.

E. A licensee shall record exposures noted from personnel dosimeters required by subsection (A) and bioassay results and maintain these records for three years after the Department terminates the radioactive material license.

R9-7-1724. Radioactive Contamination Control

A. If a licensee detects evidence that a sealed source has ruptured or licensed materials have caused contamination, the licensee shall immediately initiate the emergency procedures required by R9-7-1722.

B. If contamination results from the use of licensed material in well logging, the licensee shall decontaminate all affected areas, equipment, and personnel.

C. During efforts to recover a source lodged in a well, the licensee shall continuously monitor, with a radiation detection instrument that complies with R9-7-1714 or a logging tool with a radiation detector, the well and any circulating fluids from the well to check for contamination resulting from damage to the source.

R9-7-1725. Uranium Sinker Bars

A licensee may use a uranium sinker bar for a well logging application only if it is legibly impressed with the words "Caution Radioactive-Depleted Uranium" and "Notify Civil Authorities (or company name) if Found."

R9-7-1726. Energy Compensation Source

A. A licensee may use an energy compensation source (ECS) in a logging tool, or other tool component, if the ECS contains a quantity of radioactive material that does not exceed 3.7 MBq (100 microcuries).

B. If used in a well with a surface casing, an ECS is subject to all Sections of this Article except R9-7-1702, R9-7-1728, and R9-7-1751.

C. If used in a well logging hole without a surface casing, an ECS is subject to all Sections of this Article.

R9-7-1727. Neutron Generator Source

A. A licensee may use a tritium neutron generator source to produce neutrons for well logging applications.

B. If the activity of a tritium neutron generator source does not exceed 1.11 TBq (30 Curies) and the source is used in a well with a surface casing, the source is subject to all Sections of this Article except R9-7-1702 and R9-7-1751.

C. If the activity of a neutron generator source is equal to or exceeds 1.11 TBq (30 Curies) or the source is used in a well without a surface casing, the source is subject to all Sections of this Article.

R9-7-1728. Use of a Sealed Source in a Well Without a Surface Casing

A licensee may use a sealed source in a well without a surface casing if the licensee follows a procedure for reducing the probability that the source will be lodged in the well. The procedure shall be separately approved by the Department or in a license issued by the Department, the NRC, or another Agreement State.

R9-7-1731. Security

A. A logging supervisor shall be physically present at a temporary job site whenever licensed material is being handled or is not stored and locked in a vehicle or storage place. The logging supervisor may leave the job site to obtain assistance if a source becomes lodged in a well.

B. During well logging, except when a radiation source is below ground or in a shipping or storage container, the logging supervisor or other individual designated by the logging supervisor shall maintain direct surveillance of the operation to prevent unauthorized entry into a restricted area, as defined in R9-7-102.

R9-7-1732. Handling Tools

The licensee shall provide and require the use of tools that will assure remote handling of sealed sources other than low-activity calibration sources.

R9-7-1733. Subsurface Tracer Studies

A. Any person who handles radioactive tracer material shall wear protective gloves and other appropriate protective clothing and equipment. Precautions shall be taken to avoid ingestion or inhalation of radioactive material.

B. A licensee shall not inject radioactive material into potable aquifers without authority granted in a radioactive material license issued by the Department.

C. A licensee shall dispose of tracer study waste contaminated with radioactive material in accordance with R9-7-434.

R9-7-1734. Use of a Sealed Source in a Well Without a Surface Casing and Particle Accelerators

A. A licensee or registrant may use a sealed source in a well without a surface casing to protect a fresh water aquifer if the licensee follows the correct procedure for reducing the probability that the source will become lodged in the well.

B. A licensee or registrant shall not begin well logging operations in a well without a surface casing unless the Department has approved the licensee's procedure for logging in an uncased hole.

C. A licensee or registrant shall not permit above-ground testing of a particle accelerator, designed for use in well-logging, which results in the production of radiation, unless the area or facility affected is controlled or shielded in a manner consistent with applicable requirements in Article 4 of this Chapter.

R9-7-1741. Radiation Surveys

A. A licensee shall perform and make a record of a radiation survey using instruments or calculations of radiation levels in each area where radioactive material is stored.

B. A licensee shall make and record a radiation survey using instruments or calculations of radiation levels in occupied positions and on the exterior of each vehicle used to transport radioactive material. The survey or calculation shall include each source of radiation or combination of sources to be transported in the vehicle.

C. After removal of the sealed source from the logging tool and before departing the job site, a licensee shall ensure that the logging tool detector is energized, or a survey meter is used to test the logging tool for contamination. The licensee shall record the test for contamination.

D. The licensee shall make and record each survey using an appropriate survey instrument for the radionuclide being used, at the job site or wellhead for each tracer operation, except those using Hydrogen-3, Carbon-14 and Sulfur-35. Each survey shall include measurements of radiation levels before and after each tracer operation.

E. Records of surveys conducted according to subsections (A) through (D) shall include the date of each survey, the identification of each individual making the survey, identification of each survey instrument used, each radiation measurement in millirem or microsievert per hour, and an exact description of the location of the survey. A licensee shall retain records of a survey for three years after completion of the survey.

R9-7-1742. Documents and Records Required at Field Stations

Each licensee shall maintain the following documents and records at the field station:

1. A copy of 9 A.A.C. 7;
2. The license, authorizing use of licensed material;
3. Operating and emergency procedures required by R9-7-1722;
4. The record of radiation survey instrument calibrations required by R9-7-1714;
5. The record of leak test results required by R9-7-1715;
6. Physical inventory records required by R9-7-1716;
7. Utilization records required by R9-7-1717;
8. Records of inspection and maintenance required by R9-7-1720;
9. Training records required by R9-7-1721; and
10. Survey records required by R9-7-1741.

R9-7-1743. Documents and Records Required at Temporary Job Sites

Each licensee that conducts operations at a temporary job site shall maintain the following documents and records at the temporary job site until the well logging operation is completed:

1. Operating and emergency procedures required by R9-7-1722;
2. The most current calibration records for the radiation survey instruments in use at the site required by R9-7-1714;
3. The most current survey records required by R9-7-1741.

4. The shipping papers for transportation of radioactive materials required by license condition; and
5. If operating under reciprocity in accordance with R9-7-320, a copy of the Department authorization for use of radioactive material in Arizona.

R9-7-1751. Notification of Incidents and Lost Sources; Abandonment Procedures for Irretrievable Sources

A. If, after making a reasonable effort to recover a sealed source or device that contains radioactive material using methods that are not likely to result in damage or rupture and contamination, a licensee determines that the source or device is lodged in a well, the licensee shall:
1. Immediately notify the Department by telephone of the circumstances that resulted in the inability to retrieve the source and, if there is no evidence of contamination, obtain the following from the Department:
   a. A determination that the source is irretrievable and abandonment is necessary because further efforts to recover the source are likely to result in an immediate threat to public health and safety, and
   b. An approval to implement abandonment procedures;
2. Advise the well owner or operator, as applicable, of the abandonment procedures implemented under R9-7-1702(A) and (C); and
3. Either ensure that abandonment procedures are implemented within 30 days after the Department classifies the source as irretrievable or request an extension of time if unable to complete abandonment procedures.

B. A licensee shall immediately notify the Department by telephone and subsequently, within 30 days, by confirmatory letter if the licensee knows or has reason to believe that a sealed source has been ruptured or the well has otherwise been contaminated. The letter shall describe the well location, the magnitude and extent of radioactive contamination, the consequences of the rupture, and the efforts planned or initiated to mitigate the consequences.

C. A licensee shall notify the Department of the theft or loss of any radioactive material, radiation overexposure, excessive levels and concentrations of radiation, and incidents as required by R9-7-443, R9-7-444, and R9-7-445.

D. A licensee shall, within 30 days after a sealed source has been classified as irretrievable, report in writing to the Department. The licensee shall send a copy of the report to each state or federal agency that issued permits or otherwise approved of the drilling operation. The report shall contain the following information:
1. Date of occurrence;
2. A description of the irretrievable well logging source involved, including the name of the radionuclide and its quantity, and the chemical and physical form of the radionuclide;
3. Surface location and identification of the well;
4. Results of efforts to immobilize and seal the source in place;

5. A brief description of the attempted recovery effort;
6. Depth of the source;
7. Depth of the top of the cement plug;
8. Depth of the well;
9. The reasons why further efforts to recover the source are likely to result in an immediate threat to public health and safety, necessitating abandonment;
10. Information contained on the permanent identification plaque; and
11. State and federal agencies receiving a copy of the report.

Statutory Authority for Rules in 9 A.A.C. 7, Article 17

30-654. Powers and duties of the department

A. The department may:

1. Accept grants or other contributions from the federal government or other sources, public or private, to be used by the department to carry out any of the purposes of this chapter.

2. Do all things necessary, within the limitations of this chapter, to carry out the powers and duties of the department.

3. Conduct an information program, including:

(a) Providing information on the control and regulation of sources of radiation and related health and safety matters, on request, to members of the legislature, the executive offices, state departments and agencies and county and municipal governments.

(b) Providing such published information, audiovisual presentations, exhibits and speakers on the control and regulation of sources of radiation and related health and safety matters to the state's educational system at all educational levels as may be arranged.

(c) Furnishing to citizen groups, on request, speakers and such audiovisual presentations or published materials on the control and regulation of sources of radiation and related health and safety matters as may be available.

(d) Conducting, sponsoring or cosponsoring and actively participating in the professional meetings, symposia, workshops, forums and other group informational activities concerned with the control and regulation of sources of radiation and related health and safety matters when representation from this state at such meetings is determined to be important by the department.

B. The department shall:

1. Regulate the use, storage and disposal of sources of radiation.

2. Establish procedures for purposes of selecting any proposed permanent disposal site located within this state for low-level radioactive waste.

3. Coordinate with the department of transportation and the corporation commission in regulating the transportation of sources of radiation.

4. Assume primary responsibility for and provide necessary technical assistance to handle any incidents, accidents and emergencies involving radiation or sources of radiation occurring within this state.

5. Adopt rules deemed necessary to administer this chapter in accordance with title 41, chapter 6.

6. Adopt uniform radiation protection and radiation dose standards to be as nearly as possible in conformity with, and in no case inconsistent with, the standards contained in the regulations of the United States nuclear regulatory commission and the standards of the United States public health service. In the adoption of the standards, the department shall consider the total occupational radiation exposure of individuals, including that from sources that are not regulated by the department.

7. Adopt rules for personnel monitoring under the close supervision of technically competent people in order to determine compliance with safety rules adopted under this chapter.

8. Adopt a uniform system of labels, signs and symbols and the posting of the labels, signs and symbols to be affixed to radioactive products, especially those transferred from person to person.

9. By rule, require adequate training and experience of persons using sources of radiation with respect to the hazards of excessive exposure to radiation in order to protect health and safety.

10. Adopt standards for the storage of radioactive material and for security against unauthorized removal.

11. Adopt standards for the disposal of radioactive materials into the air, water and sewers and burial in the soil in accordance with 10 Code of Federal Regulations part 20.

12. Adopt rules that are applicable to the shipment of radioactive materials in conformity with and compatible with those established by the United States nuclear regulatory commission, the department of transportation, the United States department of the treasury and the United States postal service.

13. In individual cases, impose additional requirements to protect health and safety or grant necessary exemptions that will not jeopardize health or safety, or both.

14. Make recommendations to the governor and furnish such technical advice as required on matters relating to the utilization and regulation of sources of radiation.

15. Conduct or cause to be conducted off-site radiological environmental monitoring of the air, water and soil surrounding any fixed nuclear facility, any uranium milling and tailing site and any uranium leaching operation, and maintain and report the data or results obtained by the monitoring as deemed appropriate by the department.

16. Develop and utilize information resources concerning radiation and radioactive sources.

17. Prescribe by rule a schedule of fees to be charged to categories of licensees and registrants of radiation sources, including academic, medical, industrial, waste, distribution and imaging categories. The fees shall cover a significant portion of the reasonable costs associated with processing the application for license or registration, renewal or amendment of the license or registration and the costs of inspecting the licensee or registrant activities and facilities, including the cost to the department of employing clerical help, consultants and persons possessing technical expertise and using analytical instrumentation and information processing systems.

18. Adopt rules establishing radiological standards, personnel standards and quality assurance programs to ensure the accuracy and safety of screening and diagnostic mammography.

C. The department shall deposit, pursuant to sections 35-146 and 35-147, ninety percent of the monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the health services licensing fund established by section 36-414 and ten percent of the monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the state general fund.**30-**

657. <u>Records</u>

A. Each person that possesses or uses a source of radiation shall maintain records relating to its receipt, storage, transfer or disposal and such other records as the department requires by rule.

B. The department shall require each person that possesses or uses a source of radiation to maintain appropriate records showing the radiation exposure of all individuals for whom personnel monitoring is required by rules adopted by the department. Copies of records required by this section shall be submitted to the department on request by the department.

C. Any person that possesses or uses a source of radiation shall furnish to each employee for whom personnel monitoring is required a copy of the employee's personal exposure record at such times as prescribed by rules adopted by the department.

D. Any person that possesses or uses a source of radiation, when requested, shall submit to the department copies of records or reports submitted to the United States nuclear regulatory commission regardless of whether the person is subject to regulation by the department. The department, by rule, shall specify the records or reports required to be submitted to the department under this subsection.

30-672. Licensing and registration of sources of radiation; exemptions

A. The department by rule shall provide for general or specific licensing of by-product, source, special nuclear materials or devices or equipment using those materials. The department shall require from the applicant satisfactory evidence that the applicant is using methods and techniques that are demonstrated to be safe and that the applicant is familiar with the rules adopted by the department under section 30-654, subsection B, paragraph 5 relative to uniform radiation standards, total occupational radiation exposure norms, labels, signs and symbols, storage, waste disposal and shipment of radioactive materials. The department may require that, before it issues a license, the employees or other personnel of an applicant who may deal with sources of radiation receive a course of instruction approved by the department concerning department rules. The department shall require that the applicant's proposed equipment and facilities be adequate to protect health and safety and that the applicant's proposed administrative controls over the use of the sources of radiation requested be adequate to protect health and safety.

B. The department may require registration or licensing of other sources of radiation if deemed necessary to protect public health or safety.

C. The department may exempt certain sources of radiation or kinds of uses or users from the licensing or registration requirements set forth in this section if it finds that exempting such sources of radiation or kinds of uses or users will not constitute a significant risk to the health and safety of the public.

D. The director may suspend or revoke, in whole or in part, any license issued under subsection A of this section if the licensee or an officer, agent or employee of the licensee:

1. Violates this chapter or rules of the department adopted pursuant to this chapter.

2. Has been, is or may continue to be in substantial violation of the requirements for licensure of the radiation source and as a result the health or safety of the general public is in immediate danger.

E. If the licensee, or an officer, agent or employee of the licensee, refuses to allow the department or its employees or agents to inspect the licensee's premises, such an action shall be deemed reasonable cause to believe that a substantial violation under subsection D, paragraph 2 of this section exists.

F. A license may not be suspended or revoked under this chapter without affording the licensee notice and an opportunity for a hearing as provided in title 41, chapter 6, article 10.

G. The department shall not require persons who are licensed in this state to practice as a dentist, physician assistant, chiropodist or veterinarian or licensed in this state to practice medicine, surgery, osteopathic medicine, chiropractic or naturopathic medicine to obtain any other license to use a diagnostic x-ray machine, but these persons are governed by their own licensing acts.

H. Persons who are licensed by the federal communications commission with respect to the activities for which they are licensed by that commission are exempt from this chapter.

I. Rules adopted pursuant to this chapter may provide for recognition of other state or federal licenses as the department deems desirable, subject to such registration requirements as the department prescribes.

J. Any licenses issued by the department shall state the nature, use and extent of use of the source of radiation. If at any time after a license is issued the licensee desires any change in the nature, use or extent, the licensee shall seek an amendment or a new license under this section.

K. The department shall prescribe by rule requirements for financial security as a condition for licensure under this article. The department shall deposit all amounts posted, paid or forfeited as financial security in the radiation regulatory and perpetual care fund established by section 30-694.

L. Persons applying for licensure shall provide notice to the city or town where the applicant proposes to operate as part of the application process.

M. Any facility that provides diagnostic or screening mammography examinations by or under the direction of a person who is exempt from further licensure under subsection G of this section shall obtain certification by the

department. The department shall prescribe by rule the requirements of certification in order to ensure the accuracy and safety of diagnostic and screening mammography.

30-673. Unlawful acts

It is unlawful for any person to receive, use, possess, transfer, install or service any source of radiation unless the person is registered, licensed or exempted by the department in accordance with this chapter and rules adopted under this chapter.

36-136. Powers and duties of director; compensation of personnel; rules; definition

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health agency, environmental agency or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any funds that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meat packing plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for occasional sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is not potentially hazardous or a time or temperature control for safety food and that is prepared in a kitchen of a private home for commercial purposes, including fruit jams and jellies, dry mixes made with ingredients from approved sources, honey, dry pasta and roasted nuts. Cottage food products must be packaged at home with an attached label that clearly states the name and registration number of the food preparer, lists all the ingredients in the product and the product's production date and includes the following statement: "This product was produced in a home kitchen that may process common food allergens and is not subject to public health inspection." If the product was made in a facility for individuals with developmental disabilities, the label must also disclose that fact. The person preparing the food or supervising the food preparation must complete a food handler training course from an accredited program and maintain active certification. The food preparer must register with an online registry established by the department pursuant to paragraph 13 of this subsection. The food preparer must display the preparer's certificate of registration when operating as a temporary food establishment. For the purposes of this subdivision, "not potentially hazardous" means cottage food products that meet the requirements of the food code published by the United States food and drug administration, as modified and incorporated by reference by the department by rule.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identity, storage, handling and sale of all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum

standards for bacteriological, physical and chemical quality for bottled water and for the submission of samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. In no event shall confidential information be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout the state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by

law within its jurisdiction, provided that the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product":

(a) Means a food that is not potentially hazardous or a time or temperature control for safety food as defined by the department in rule and that is prepared in a home kitchen by an individual who is registered with the department.

(b) Does not include foods that require refrigeration, perishable baked goods, salsas, sauces, fermented and pickled foods, meat, fish and shellfish products, beverages, acidified food products, nut butters or other reduced-oxygen packaged products.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

ARIZONA DEPARTMENT OF HEALTH SERVICES

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 7. Department of Health Services

Radiation Control

Article 17. Wireline Service Operations and Subsurface Tracer Studies

October 2024

1. **Authorization of the rule by existing statutes**

General Statutory Authority: A.R.S. §§ 30-654(B)(5) and 36-136(G)

Specific Statutory Authority: A.R.S. §§ 30-654, 30-657, 30-672, and 30-673

2. **The objective of each rule:**

Rule	Objective
R9-7-1701	To define terms used in the Article so that a reader can consistently interpret requirements.
R9-7-1702	To specify the requirements for identifying the party responsible for recovery, monitoring, decontamination, and abandonment procedures related to lost or disconnected well logging sources of radioactivity.
R9-7-1703	To establish the transport, use, and storage requirements of source material in well logging.
R9-7-1712	To specify the requirements for storing or transporting a source of radiation used in well logging.
R9-7-1713	To require that transport containers are physically secured in a transporting vehicle.
R9-7-1714	To require the presence of calibrated and operable radiation survey instruments at every field station and temporary job site, including the sensitivity and calibration parameters.
R9-7-1715	To establish requirements for performing leak testing on sealed sources used by a licensee, including the method and frequency of testing, the removal of leaking sources from services, and the maintenance of records. To specify what sealed sources are exempt from testing requirements.
R9-7-1716	To specify requirements for conducting a physical inventory of all licensed material, including the frequency of inventory, content of records, and maintenance of records.
R9-7-1717	To specify requirements for records of use, including the content of the records and length of retention.
R9-7-1718	To specify the design and performance criteria for a sealed source used in well logging operations.
R9-7-1719	To specify labeling requirements for sources, source holders, logging tools, and transport containers to indicate the presence or possible presence of radioactivity.
R9-7-1720	To establish requirements for inspection of equipment used for well logging before use and according to a program for semiannual inspection and routing maintenance.

	To require that equipment found to have a defect is removed from service until repaired and that a record is made and maintained. To specify restrictions on opening, repair, modification, or tampering with a sealed source.
R9-7-1721	To establish the qualifications and training requirements of a logging supervisor and logging assistant to ensure safe well logging operations. To require annual safety training reviews and maintenance of training records.
R9-7-1722	To require the development of operating and emergency procedures and specify the subject matter to be covered to protect health and safety.
R9-7-1723	To establish requirements for the monitoring of radiation exposure by personnel and for related actions to protect health and safety.
R9-7-1724	To specify requirements for radioactive contamination control to protect health and safety.
R9-7-1725	To establish requirements for use of a uranium sinker bar in well logging to ensure health and safety.
R9-7-1726	To establish requirements for use of an energy compensation source in well logging to ensure health and safety.
R9-7-1727	To establish requirements for use of a neutron generator source in well logging to ensure health and safety.
R9-7-1728	To establish requirements for use of a sealed source in a well without surface casing to ensure health and safety.
R9-7-1731	To specify requirements to ensure the security of areas in which licensed material is being used to protect health and safety.
R9-7-1732	To describe requirements for the use of tools for remote handling of sealed sources.
R9-7-1733	To establish requirements for subsurface tracer studies to ensure health and safety.
R9-7-1734	To establish requirements for use of a sealed source in a well without surface casing to protect a freshwater aquifer to ensure health and safety. To establish requirements for use of a particle accelerator to ensure health and safety.
R9-7-1741	To establish requirements for performing radiation surveys, including the method of testing and the content and maintenance of records.
R9-7-1742	To specify the document required to be maintained at a field station.
R9-7-1743	To specify the document required to be maintained at a temporary job site.
R9-7-1751	To specify the notification requirements for incidents, lost sources, or abandoned sources.

3. **Are the rules effective in achieving their objectives?** **Yes _X_** **No __**

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

Rule	Explanation

4. **Are the rules consistent with other rules and statutes?** **Yes _X_** **No __**

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

Rule	Explanation

5. **Are the rules enforced as written?** **Yes _X_ No __**

If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency's proposal for resolving the issue.

Rule	Explanation

6. **Are the rules clear, concise, and understandable?** **Yes ___ No _X_**

If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.

Rule	Explanation
Multiple	The rules would be clearer if minor grammatical or formatting changes were made. However, Arizona is required by the Agreement negotiated between Arizona and the U.S. Atomic Energy Commission (now the U.S. Nuclear Regulatory Commission (NRC)) in 1967 to be consistent with requirements of the NRC. To comply with the Agreement some requirements in this Article must be identical to federal requirements, regardless of whether the language is clear or not.
R9-7-1701	The rule would be clearer if the term "tritium neutron generator tube" were defined or described.
R9-7-1702	The rule would be clearer if the exception in subsection (D) were included as a lead-in in subsection (A). Subsection (A)(4) would be clearer if it cited to R9-7-1724. Subsection (A)(5) would be more understandable if it cited to A.A.C. R12-7-126 and R12-7-127, referenced a description of how the Department classifies a source as irretrievable, and specified the event initiating the "within 30 days." Subsection (A)(5)(c)(ii) would be clearer and more concise if this exception for the radiation symbol, in addition to sources of radiation subjected to high-temperature, were included in R9-7-428(B), and if the rule were cited to in the subsection. Subsection (A)(5)(d) would be clearer if it cited to the applicable requirements in A.A.C. Title 12, Chapter 7, Article 1 and Title 12, Chapter 15, Article 8. Subsection (B) would be clearer if it contained the cross-reference to subsection (A). Subsection (C) would be clear if it specified how a licensee may apply for approval of an alternate manner to abandon an irretrievable well logging source.
R9-7-1703, R9-7-1712, and R9-7-1713	The rules would be improved if the titles of R9-7-1703 and R9-7-1712 or their content were revised to address an apparent inconsistency. Transport and storage requirements in the three rules might also be better grouped together. However, R9-7-1703 is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1716	The rule would be clearer if the content of the inventory record were in a list, rather than included in a long sentence.
R9-7-1718	The rule would be improved if subsection (A) were changed to clarify that the elements of subsection (A)(1) through (3) are requirements for any sealed source used for well logging applications. The rule would also be improved if the requirements in subsections (C) and (D) were combined. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1719	Subsection (B) would be clearer if it cited to requirements in R9-7-428(A).

R9-7-1720	The rule would be clearer if subsections (A) and (B) were reformatted so they were not as long with multiple sentences. The rule may also be improved if requirements in subsections (C) and (E) were combined.
R9-7-1721	The rule would be clearer if subsections (A)(4) and (B)(3) specified what is "successful" completion of a written/oral test and if the person giving the written test were specified. Subsection (B)(4) could also be improved if it required a logging assistant to demonstrate competence as well as receive instruction. However, the rule is compatibility category B, meaning it must be word-for-word with federal requirements.
R9-7-1722	Subsection (5) could be improved if it cited to R9-7-1723. Subsection (9) would be improved if uranium sinker bars were listed in the rule, consistent with R9-7-1720(B). The rule would also be improved if it contained a requirement for the operating and emergency procedures to be maintained for at least three years past termination, as in other Sections of the Chapter.
R9-7-1722, R9-7-1726, R9-7-1727, R9-7-1728, and R9-7-1734	The rule would be clearer if the term "surface casing" were defined.
R9-7-1723	Subsection (A) would be clearer if it stated "unless that individual wears …" rather than "unless that person wears …". Subsection (B) would be improved if it were clearer whether the requirement is for the licensee to ensure that each individual wears the assigned equipment or whether it is a requirement on the individual to wear the assigned equipment. The rule would also be improved by citing to limits of exposure.
R9-7-1726	Subsection (C) could be improved if it required all "applicable" requirements to be followed.
R9-7-1727	Subsection (C) could be improved if it required all "applicable" requirements to be followed.
R9-7-1728 and R9-7-1734	The rule would be improved if requirements in R9-7-1728 and R9-7-1734 were combined in one Section.
R9-7-1733	Subsection (A) would be improved by removing passive language and specifying who must take precautions.
R9-7-1734	Subsection (A) would be improved if the "correct procedure" were clarified. The requirements for particle accelerators, specified in subsection (C), should it be in its own Section.
R9-7-1741	Subsection (A) would be improved if the rule specified that a radiation survey should be performed where radioactive material is used, as well as where it is stored, and that the instruments used must meet the requirements in R9-7-1714. Subsection (B) would be improved if the term "occupied positions" were described. Subsection (E) would be clearer if the content of the record of survey were in a list, rather than included in a long sentence.
R9-7-1742	The rule would be improved if the agreement required in R9-7-1702 were included in the list.
R9-7-1743	Subsection (4) would be clearer if it included a citation to applicable documentation requirements for shipping radioactive materials.
R9-7-1751	The rule would be improved if it did not imply that only the licensee is making the effort to recover the sealed source or implementing abandonment procedures, since, according to the agreement required according to R9-7-1702, the well owner may be the responsible party. Subsection (A)(2) would be clearer if it stated "under R9-7-1702(A) or (C)" since R9-7-1702(C) refers to an abandonment procedure not authorized in R9-7-1702(A)(5), so the two would be mutually exclusive. Subsection (A)(3) would be clearer if the time-frame for making the request were specified. Subsection (C) would be

	clearer if the three situations requiring notification were listed, with the appropriate cross-reference. Subsection (D) would be clearer if reformatted to better delineate the content and persons receiving the report in the same sentence.

7. **Has the agency received written criticisms of the rules within the last five years?** **Yes ___ No _X_**

If yes, please fill out the table below:

Rule	Explanation

8. **Economic, small business, and consumer impact comparison:**

Arizona is an Agreement State by the agreement negotiated between the United States Atomic Energy Commission (now U.S. Nuclear Regulatory Commission (NRC)) and the Governor of Arizona in March of 1967 under A.R.S. § 30-656 (Agreement). In order to remain in compliance with the Agreement, Arizona must adopt regulations related to the control of radioactive material in a manner that is consistent with federal regulations, as required in A.R.S. § 30-654(B)(6). When the Department succeeded to the authority, powers, duties, and responsibilities of the Arizona Radiation Regulatory Agency in 2018, the rules in Article 17 were recodified from 12 A.A.C. 1 to 9 A.A.C. 7, and the current codification is used when describing the economic impact of the rules.

The rules in Article 17 were first adopted in 1990, with revisions made and Sections added in five other rulemakings over the ensuing years. No economic impact statements (EISs) are available to the Department for the original rulemaking or three of the subsequent rulemakings, so the economic impact of the Sections made/revised in the four rulemakings was assessed from information in the Notice of Final Rulemaking for the rulemaking, including review of the changes made. If a rule included in a rulemaking was further revised in a subsequent rulemaking, the impact of the rule is considered in the description of the subsequent rulemaking.

Currently, the Department specifically licenses only four entities that use the rules in Article 17. An additional three to five entities operate according to these rules under reciprocity. These entities provide services to companies in the oil and gas industries, which use wireline logging to obtain a continuous record of the properties of a rock formation.

The one Section that was made in 1990 and has not been revised in a subsequent rulemaking is R9-7-1732. This rule requires tools to be used when handling higher energy radioactive materials. The cost to the regulated community from this rule would be the purchase and maintenance of these tools. This cost was estimated to be less than the economic impact arising from the damage to the health of an individual handling such a sealed source without tools. The Department believes the economic impact is as estimated.

In a rulemaking effective in 2003, R9-7-1703, R9-7-1712, R9-7-1714, R9-7-1717, R9-7-1719, R9-7-1722, R9-7-1731, R9-7-1733, R9-7-1734, and R9-7-1741 were last revised. No EIS is available for this rulemaking. In all but one of these rules, the changes made as part of the rulemaking were identified in a five-year-review report of the rules and clarify and improve the rules. Thus, they were believed to impose no costs and provide a benefit to stakeholders. In R9-7-1734, requirements for use of a sealed source in a well without a surface casing were

included, which had previously been required as conditions of use in a license, so the economic impact of this change was estimated to be minimal. The Department believes the economic impact is as estimated.

In the first of two rulemakings effective in 2004, nine other rules were newly made and one extensively revised to be consistent with federal requirements to comply with the Agreement. These include defining new technologies; adding radioactive contamination safeguards; including requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing; and adding standards for lost and abandoned sources. An EIS is available for this rulemaking. For most of these changes, little, if any, economic impact was predicted. The EIS stated that no licensees in Arizona were performing well logging activities affected by the new requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing. Therefore, the addition of these requirements was thought to have no current economic impact. However, the EIS stated that an economic effect could possibly occur in the future because these requirements, if conditions/procedures changed. In addition, the costs associated with decontamination and clean-up that may result from not complying with the requirements were stated as being much greater than costs of compliance. Since these rules were adopted, there have been no changes in conditions/procedures related to requirements for uranium sinker bars, energy compensation sources, neutron generator sources, and use of sealed sources in a well without surface casing that have an economic effect, so the Department believes the economic impact is as estimated.

The second rulemaking in 2004 included R9-7-1716, R9-7-1720, R9-7-1721, R9-7-1742, and R9-7-1743. No EIS is available for this rulemaking. These rules were revised to include NRC standards required in 10 CFR 39 and were believed to not result in any increased cost to any affected party. The Department believes the economic impact is as estimated.

In a 2009 rulemaking, only one rule in Article 17, R9-7-1713, was revised, and an EIS is available for this rulemaking. This rule was revised to remove passive language without changing the substance of the rule. Therefore, the rulemaking may have had a very minimal benefit from increased clarity, but no other economic impact was identified. The Department believes the economic impact is as estimated.

The last time any of the rules in Article 17 were amended was in 2022, when requirements in R9-7-1723 were changed through expedited rulemaking to conform to revised requirements of the NRC. The rulemaking made changes in R9-7-1723 to clarify requirements and account for dosimeters that did not require "processing." The Department believes the economic impact is as estimated.

9. Has the agency received any business competitiveness analyses of the rules? Yes ___ No _X_

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

Please state what the previous course of action was and if the agency did not complete the action, please explain why not.

In the 2019 five-year-review report, the Department stated that the Department planned to review the rules in the entire Chapter after completing the five-year-review reports on all Articles in the Chapter, the last of which was

due to the Council in December 2021 and was approved in March 2022. During this review, the Department determined that extensive changes were required throughout the entire Chapter and planned a rulemaking to be completed in stages. The Council approved a plan for the rulemaking of the Chapter, with a Notice of Final Rulemaking to be submitted to the Council no earlier than December 2025. Pursuant to A.R.S. § 41-1039(A), the Department was granted approval to conduct rulemaking in the Chapter. Since 2022, the Department has completed seven rulemakings in the Chapter. Thus, the Department has been complying with the rulemaking plan approved by the Council in March 2022.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:

The Department believes that probable benefits of the rule, in protecting employees, the public, and the environment, outweigh the probable costs of the rule. The Department also believes that the substantive content of the rules are the minimum necessary to meet requirements of the Agreement and protect health and safety. Other issues identified in this report may impose a minor regulatory burden, but they are minor in comparison to the costs of having the NRC assume responsibility for compliance with federal requirements.

12. Are the rules more stringent than corresponding federal laws? Yes ___ No _X_

Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?

10 CFR 39

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The rules in Article 17 provide standards and limits for wireline service operations and subsurface tracer studies but do not include the issuance of a license or permit.

14. Proposed course of action

If possible, please identify a month and year by which the agency plans to complete the course of action.

The Department is complying with the rulemaking plan for the Chapter that was approved by the Council in March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025. The Department is implementing the plan in an iterative fashion. Rules related to Nonionizing Radiation are expected to be completed by December 2025, while rules related to X-ray Radiation are expected to be completed by July 2026. The Department has been told that the NRC is planning to require rules for decommissioning financial assurance for sealed and unsealed radioactive materials, advanced reactor export licensing considerations, low-level radioactive waste disposal, items containing

byproduct material incidental to production, release criteria of veterinary animals, reporting nuclear medicine injection extravasations as medical events, revisions to the exempt quantity thresholds for licensing, rubidium-82 generators and emerging medical technologies, and the regulatory framework for fusion machines, which will need to be added to our rules for Radiation Control. Because it would be inefficient and confusing to stakeholders/regulated entities for the Department to make changes to the current rules, then add the new requirements from the NRC, the Department wants to make all changes/additions as part of a single iteration of rulemaking for these rules. The Department plans to complete rulemaking for rules that must be consistent with requirements of the NRC by December 2027. Since the rules in Article 17 must be consistent with requirements of the NRC, the Department plans to revise the rules in this Article by December 2027.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 24, Articles 2 & 3

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **DEPARTMENT OF HEALTH SERVICES**
Title 9, Chapter 24, Article 2 & 3

Summary

This Five Year Review Report (5YRR) from the Department of Health Services (Department) covers six (6) rules and one (1) table in Title 9, Chapter 24, Article 2 and Article 3 related to Arizona medically under-served areas (AZMUAs). There are 83 designated AzMUAs. Article 2 states the requirements for when a primary care area can be designated as a AzMUA and Article 3 is the function of coordinating medical providers to an AzMUA.

The Department completed its last proposed course of action identified in the 2019 5YRR by completing an expedited rulemaking with an effective date of September 4, 2020.

Proposed Action

The Department does not propose any course of action at this time.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Arizona Department of Health Services (Department) oversees the designation and regulation of Arizona Medically Underserved Areas (AzMUAs). The rules in 9 A.A.C. 24, Articles 2 and 3 guide the designation process and coordination of medical providers in AzMUAs. The rules were last amended in 2020, focusing on clarity, updated definitions, and consistency with current standards.

The Department has assessed that the Article 2 rules did not impact the Department as expected; and rather than incur minimal costs, the Department incurred no costs. However, the Department did experience the expected impact of the Article 3 rules, and they continue to have no impact on the Department. Stakeholders include political subdivisions of the state, private physicians or dental practices, facilities that provide medical or dental services, consumers and the general public, and the Department.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes that the rules provide a significant benefit to political subdivisions for having rules that determine primary care area (PCA) boundaries and establish criterion, criterion values, and scoring measures that are used to determine whether a PCA is located in an AzMUA. If a political subdivision is located within an AzMUA, the Department, medical or dental practices, facilities that provide medical or dental services, and consumers and the public may receive a significant benefit. The Department benefits by providing AzMUAs designations that attract health service providers participating in the loan repayment program to physician or dental practices and facilities providing medical or dental services. Having these additional health service providers may increase medical and dental services for consumers living in those areas. The Department and the public benefit significantly from providing or receiving, respectively, health services that increase the health of Arizonians.

Political subdivisions benefit from having AzMUAs that create employment opportunities to health service providers relocating for employment at medical or dental practices and facilities. The presence of more health professionals in these communities not only generates employment opportunities but also enhances access to care for residents. Consumers benefit from having expanded choices for medical and dental services, potentially experiencing improved quality of care due to the increased availability of providers. Local medical and dental practices, as well as health facilities, will also see financial gains through increased revenue from delivering more services locally. This economic boost is further supported by reducing the need for consumers to travel outside the area for care, keeping healthcare spending within the community. The Department believes the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs. The Department has determined that the benefits of the rules outweigh the

costs of the rules.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it received no written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department states the rules are clear, concise, and understandable.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Department states the rules are consistent with other rules and statutes.

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

The Department states the rules are effective in achieving their objectives.

8. Has the agency analyzed the current enforcement status of the rules?

The Department indicates the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates there are no corresponding federal laws.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Not applicable. The rules do not require a permit or license.

11. Conclusion

This Five Year Review Report from the Department of Health Services covers six rules and one table in Title 9, Chapter 24, Article 2 and 3 related to Arizona medically underserved areas. The rules are clear, concise, and understandable; effective in meeting their objectives; and consistent with other rules and statutes. The Department has indicated that there is no need for amendments to the rules.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Council staff recommends approval.

ARIZONA DEPARTMENT OF HEALTH SERVICES

October 22, 2024

Jessica Klein, Esq., Chair
Governor's Regulatory Review Council
Arizona Department of Administration
100 N. 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 24, Articles 2 and 3, Five-Year-Review Report

Dear Ms. Klein:

Please find enclosed the Five-Year-Review Report from the Arizona Department of Health Services (Department) for 9 A.A.C. 24, Articles 2 and 3, which is due on or before October 31, 2024.

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this Report, please contact Angie Trevino at angelica.trevino@azdhs.gov or (480) 589-0298.

Sincerely,

Stacie Gravito
Director's Designee

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 24. Department of Health Services – Arizona Medically Underserved Area Health Services

Article 2. Arizona Medically Underserved Areas

Article 3. Coordinating Medical Providers

Due: October 31, 2024

Submitted: October 22, 2024

1. Authorization of the rule by existing statutes

Authorizing statutes: A.R.S. § 36-136(G)

Implementing statutes: A.R.S. §§ 36-2352, 36-2353, and 36-2354

2. The objective of each rule:

Rule	Objective
R9-24-201. Definitions	The objective of the rule is to define terms used in Article 2 for consistent interpretation.
R9-24-202. Arizona Medically Underserved Area Designation	The objective of the rule is to provide a statement of how the Department will designate Arizona medically underserved areas.
R9-24-203. Primary Care Index	The objective of the rule is to establish the criterion and criterion values and scoring measures used to determine whether a primary care area determined under R9-24-204 qualifies as an Arizona medically underserved area.
Table 2.1	The objective of the table is to present a matrix showing each criterion used by the Department in designating primary care areas as Arizona medically underserved areas, the value ranges within each criterion, and the points attached to each value within a criterion.
R9-24-204. Primary Care Area Boundaries Determination	The objective of the rule is to establish the Department's requirements for determining the boundaries of primary care areas in the state.

R9-24-301. Definitions	The objective of the rule is to define terms used in Article 3 for consistent interpretation.
R9-24-302. CMP Functions	The objective of the rule is to establish the functions of a coordinating medical provider.

3. Are the rules effective in achieving their objectives? **Yes _X_ No __**

4. Are the rules consistent with other rules and statutes? **Yes _X__ No ___**

5. Are the rules enforced as written? **Yes _X_ No ___**

6. Are the rules clear, concise, and understandable? **Yes _X_ No ___**

7. Has the agency received written criticisms of the rules within the last five years? **Yes ___ No __X_**

8. Economic, small business, and consumer impact comparison:

A.R.S. § 36-2352 requires the Department of Health Services (Department) to designate Arizona medically underserved areas (AzMUAs). A.R.S. § 36-2354 authorizes the Department to establish the functions of coordinating medical providers who supervise the medical care offered at a medical clinic in an AzMUA. The rules in 9 A.A.C. 24, Article 2 establish requirements for determining whether a primary care area may be designated as an Arizona medically underserved area and the rules in 9 A.A.C. 24, Article 3 specifies functions for a coordinating medical provider. The rules for Arizona Medically Underserved Areas Health Services were last amended through a Notice of Final Expedited Rulemaking at 26 A.A.R. 1991, effective September 4, 2020. The Department believes that the amendments made in 2020 did not have any additional economic impact on the Department and did not impose any direct costs on any other individual or entity. Additionally, the Department does not know of any medical clinic located in an Az MUA to have used the rules in 9 A.A.C. 24, Article 3 since the last review.

The rule amendments from the 2020 rulemaking included amending the rules to make them clearer and more understandable; updated language; updated practice; and updated definitions and references. The Table was also updated to be more consistent with current formatting standards and content was updated. The amended rules clarified requirements related to the primary care index and the primary care boundaries determination and update obsolete criterion used for designating primary care areas, the value ranges within each criterion, and the points attached to each value within a criterion.

The affected persons previously identified and detailed in the 2019 five-year-review report remain the same. Those are political subdivisions of the state, private physicians or dental practices, facilities that provide medical or dental

services, consumers and the general public, and the Department. Annual costs or revenues also remain the same as previously considered: "minimal" if less than $1,000; "moderate" if between $1,000 and $10,000; and "substantial" if more the $10,000. The 2019 five-year-review report also indicated that the Department added the "significant" designation when meaningful or important, but not readily subject to quantification. This also remains the same.

The Department in its 2024 Arizona Medically Underserved Areas (AzMUAs) Report designated 83 AzMUAs. In the 2018 AzMUAs Report, the Department had designated 88 AzMUAs. The Department believes that the change in the number of AzMUAs is a result of the decrease in federal Primary Care Areas qualifying for federal Primary Care Health Professional Shortage Area (HPSA) designations. Despite the small decrease in the number of AzMUAs, Arizona continues to have a shortage of primary care providers, ranking 40th in the country at 213.5 primary care providers per 100,000 population (compared to 232.0 per 100,000 nationally). To address these workforce shortages, the Department administers state and federal workforce recruitment and retention programs. One such program, the Arizona State Loan Repayment Program (SLRP), utilizes AzMUAs as eligibility criteria. There are currently 117 providers serving in SLRP at 324 practice sites in underserved areas of Arizona.

The Department's assessment of the actual economic, small business, and consumer impact of the rules remains as mostly consistent with the 2006 EIS. The EIS reported that the Department would be directly affected by the new rules in Article 2 and would incur minimal costs associated with the boundary change request time-frames. The Article 3 rules were not expected to have any impact since the Department had not been asked nor assisted a county, city, town, or health service district to recruit a coordinating medical provider. The Department has assessed that the Article 2 rules did not impact the Department as expected; and rather than incur minimal costs, the Department incurred no costs since the Department has not received a boundary change request. However, the Department did experience the expected impact of the Article 3 rules. The Department has not assisted a county, city or town, or health service district recruit a coordinating medical provider since the last review. Article 3 rules continue to have no impact on the Department.

Political subdivisions, private medical or dental practices, facilities that provide medical or dental services, and consumers and the public were expected to have a minimal indirect benefit from the Article 2 rules for attracting primary care providers seeking loan repayment program funding in a rural area (AzMUAs).

9. Has the agency received any business competitiveness analyses of the rules? Yes ___ No _X_

10. Has the agency completed the course of action indicated in the agency's previous five-year-review report?

The Department of Health Services completed the course of action indicated in the Department's previous five-year-review report.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork

and other compliance costs, necessary to achieve the underlying regulatory objective:

The Department, based on its assessment of the rules provided in paragraph 8, believes that the rules provide a significant benefit to political subdivisions for having rules that determine primary care area (PCA) boundaries and establish criterion, criterion values, and scoring measure that are used to determine whether a PCA is located in an AzMUA. If a political subdivision is located within an AzMUA, the Department, medical or dental practices, facilities that provide medical or dental services, and consumers and the public may receive a significant benefit. The Department benefits by providing AzMUAs designations that attract health service providers, participating in the loan repayment program, to physician or dental practices and facilities providing medical or dental services. Having these additional health service providers may increase medical and dental services for consumers living in those areas. The Department and the public benefit significantly from providing or receiving, respectively, health services that increase the health of Arizonians.

Political subdivisions benefit from having AzMUAs that create employment opportunities to health service providers relocating for employment at medical or dental practices and facilities. The presence of more health professionals in these communities not only generates employment opportunities but also enhances access to care for residents. Consumers benefit from having expanded choices for medical and dental services, potentially experiencing improved quality of care due to the increased availability of providers. Local medical and dental practices, as well as health facilities, will also see financial gains through increased revenue from delivering more services locally. This economic boost is further supported by reducing the need for consumers to travel outside the area for care, keeping healthcare spending within the community. The Department believes the rules impose the least burden and costs to persons regulated by the rules, including paperwork and other compliance costs. The Department has determined that the benefits of the rules outweigh the costs of the rules.

12. Are the rules more stringent than corresponding federal laws? Yes ___ No _X_

The rules in Article 2 and Article 3 govern the designation of Arizona medically underserved areas and coordinating medical providers and are not related to federal laws.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The Department of Health Services has determined that A.R.S. § 41-1037 does not apply to these rules. The rules in 9 A.A.C. 24, Articles 2 and 3 do not require the issuance of a regulatory permit, license, or agency authorization.

14. Proposed course of action

The Department of Health Services proposes no action on these rules at this time.

ARTICLE 2. ARIZONA MEDICALLY UNDERSERVED AREAS

R9-24-201. Definitions

In addition to the definitions in A.R.S. § 36-2351, the following definitions apply in this Article, unless otherwise specified:

1. "Agency" has the same meaning as in A.R.S. § 41-1001.
2. "Arizona Medical Board" means the agency established by A.R.S. § 32-1402 to regulate physicians licensed under A.R.S. Title 32, Chapter 13.
3. "Arizona medically underserved area" means:
   a. A primary care area with the designation described in R9-24-202(1), or
   b. A primary care area with the designation described in R9-24-202(2).
4. "Board of Osteopathic Examiners in Medicine and Surgery" means the agency established by A.R.S. § 32-1801 to regulate physicians licensed under A.R.S. Title 32, Chapter 17.
5. "Census tract" means a small, relatively permanent statistical subdivision of a county established by the U.S. Bureau of Census.
6. "Communities of color" means individuals who self identify their race/ethnicity as anything other than Non-Hispanic White.
7. "Disability" means physical, mental, or sensory impairment as reported to the American Community Survey that may include hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, and independent living difficulty.
8. "Federal poverty level" means a set of money income thresholds that vary by family size and composition used by the U.S. Census Bureau to determine who is in poverty.
9. "First health care contact" means the initial telephone call or visit to a health care provider as defined in 45 CFR 160.103 for an individual's health issue.
10. "Full-time" means providing primary care services for at least 40 hours between a Sunday at 12:00 midnight and the next Sunday at 12:00 midnight.
11. "Health organization" means:
    a. A person or entity that provides medical services;
    b. A third party payor defined in A.R.S. § 36-125.07(C); or
    c. A trade or professional association described in 501(c)(3), (4), (5), or (6) of the Internal Revenue Code, 26 U.S.C. 501(c), that is exempt from federal income taxes.
12. "Indian reservation" has the same meaning as in A.R.S. § 11-801.
13. "Local planning personnel" means an individual who develops programs related to the delivery of and access to medical services for places or areas:
    a. Under the jurisdiction of an Arizona city or county, or
    b. In an Arizona Indian reservation or less than 50 miles outside the boundaries of an Indian reservation.
14. "Low birthweight" means any neonate weighing less than 2,500 grams at birth or less than 5 pounds 8 ounces.
15. "Medical services" has the same meaning as in A.R.S. § 36-401.
16. "Nonresidential" means not primarily used for living and sleeping.
17. "Person" has the same meaning as in A.R.S. § 41-1001.
18. "Political subdivision" means a county, city, town, district, association, or authority created by state law.
19. "Population" means the number of residents of a place or an area, according to the most recent American Community Survey prepared by the U.S. Census Bureau.
20. "Primary care area" means a geographic region determined by the Department under R9-24-204.
21. "Primary care HPSA" means primary care health professional shortage area designated by the U.S. Department of Health and Human Services under 42 U.S.C. 254e, 42 CFR 5.1 through 5.4, and 42 CFR Part 5, Appendix A.
22. "Primary care index" means the document in which the Department designates primary care areas as medically underserved according to R9-24-203 and Table 2.1.
23. "Primary care physician" means an Arizona licensed practitioner who:
    a. Except for emergencies, is an individual's first health care contact; and
    b. Provides primary care services in general or family practice, general internal medicine, pediatrics, or obstetrics and gynecology.
24. "Primary care services" means health care provided by a primary care physician, including:

a. Illness and injury prevention,
b. Health promotion and education,
c. Identification of individuals at special risk for illness,
d. Early detection of illness,
e. Treatment of illness and injury, and
f. Referral to specialists.

25. "Primary care services utilization pattern" means a distribution of the use of primary care services resulting from the factors listed in R9-24-204(A)(3)(a).
26. "Resident" means an individual who lives and sleeps in a place or an area more than one-half of the time.
27. "Residential" means primarily used for living and sleeping.
28. "Specialist" means an individual who:
    a. Is regulated under:
        i. A.R.S. Title 32, Chapters 7, 8, 11, 13, 14, 15, 15.1, 16, 17, 18, 19, 19.1, 25, 28, 29, 33, 34, 35, 39, or 41;
        ii. A.R.S. Title 36, Chapter 6, Article 7; or
        iii. A.R.S. Title 36, Chapter 17; and
    b. Meets the education, knowledge, and skill requirements generally recognized in the profession related to a specific service or procedure, patient category, body part or system, or type of disease.
29. "Topography" means the surface configuration of a place or region, including elevations and positions of the physical features.
30. "Travel pattern" means a prevalent flow of vehicles resulting from:
    a. The configuration of streets, and
    b. The location of residential and nonresidential areas.
31. "Value" means a number within a value range.
32. "Value range" means, for a criterion listed in R9-24-203(B) and Table 2.1, a measurement:
    a. Consisting of a scale between upper and lower limits, except for the supplementary criteria score under R9-24-203(B)(8); and
    b. To which Table 2.1 assigns points or 0 points.

Historical Note

Adopted effective July 27, 1978 (Supp. 78-4). R9-24-201 recodified from R9-24-121 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

R9-24-202. Arizona Medically Underserved Area Designation

The Department shall designate as Arizona medically underserved areas:

1. The primary care areas designated as primary care HPSAs by the U.S. Department of Health and Human Services, and
2. The primary care areas designated as medically underserved by the Department under R9-24-203 and Table 2.1.

Historical Note

Adopted effective July 27, 1978 (Supp. 78-4). R9-24-202 recodified from R9-24-122 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

R9-24-203. Primary Care Index

A. Every 24 months, the Department shall prepare, according to this Section, a primary care index for designating primary care areas determined under R9-24-204 as Arizona medically underserved areas.
1. For each primary care area determined under R9-24-204, the Department shall calculate the value for each criterion in subsection (B).
    a. After calculating the value for each criterion in subsection (B), the Department shall assign points to each value according to Table 2.1.
    b. A primary care area's score is the sum of the points received by the primary care area for each criterion in subsection (B).
2. The Department shall designate as Arizona medically underserved:
    a. The primary care areas that, according to subsection (B) and Table 2.1 score within the top 25 percent on the primary care index or that obtain more than 30 points, whichever results in the designation of more Arizona medically underserved areas; and
    b. The primary care areas with the designation described in R9-24-202(1).

B. For each primary care area determined by the Department under R9-24-204, the primary care index shall include a score for each of the following:
1. Population-to-primary-care-physician ratio, determined by dividing the population of the primary care area by the number of primary care physicians in the primary care area:
    a. Using primary care physician data from the Arizona Medical Board and the Board of Osteopathic Examiners in Medicine and Surgery,
    b. The Department shall determine an equivalency for a full-time physician where 40 hours equals 1 and 20 hours equal 0.5.
2. Travel distance to the nearest primary care physician, determined by:
    a. Estimating the distance in miles:
        i. From the center of the most densely populated area in the primary care area determined from the most recent American Community Survey prepared by the U.S. Census Bureau; and
        ii. To the nearest primary care physician determined from the data described in subsection (B)(1)(a); and
    b. Using the most direct street route;
3. Percentage of population with calendar year income less than 200% of the Federal poverty level, determined from data in the most recent American Community Survey prepared by the U.S. Census Bureau;
4. Percentage of population who do not have health insurance as determined by the most recent American Community Survey prepared by the U.S. Census Bureau;
5. Low birthweight rate percent of births;
6. Late or no prenatal care percent of births;
7. Infant mortality rate per 1,000 live births;
8. Supplementary criteria score, based on a rate greater than the state wide average for:
    a. Percentage of population age 65 and older;
    b. Percentage of population age 14 and younger;
    c. Percentage of population with a disability;
    d. Percentage of communities of color; and

e. Percentage of population who speaks a language other than English.

C. Every 24 months, according to subsections (A) and (B) and Table 2.1, the Department shall:
1. Withdraw an Arizona medically underserved area designation,
2. Continue an Arizona medically underserved area designation, or
3. Designate a new Arizona medically underserved area.

D. A list of current Arizona medically underserved areas is available in the Department's biennial Arizona Medically Underserved Areas Report at http://www.azdhs.gov/hsd/.

Historical Note
Adopted effective July 27, 1978 (Supp. 78-4). R9-24-203 recodified from R9-24-123 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

Table 1. Renumbered

Historical Note
New Table adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Table 1 renumbered to Table 2.1 by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

Table 2.1. Primary Care Index Scoring

CRITERIA	VALUE RANGE	POINTS
Population-to-primary care physician ratio	≤ 3000:1	0
	3001:1 to 3500:1	2
	3501:1 to 4000:1	4
	4001:1 to 5000:1	6
	5001:1 to 10,000:1	8
	>10,000:1 or no physician	10
Travel distance to nearest primary care physician	≤ 10.0 miles	0
	10.1-20.0 miles	2
	20.1-30.0 miles	4
	30.1-40.0 miles	6
	40.1-50.0 miles	8
	> 50.0 miles	10
Percentage of population with annual income less than 200% of Federal poverty level	≤ 20.0%	0
	20.1-32.0%	2
	32.1-39.0%	4
	39.1-51.0%	6
	>51.0%	8
Percentage of population who do not have health insurance	≤ 6.2%	0
	6.3-9.6%	2
	9.7-12.2%	4
	12.3-17.2%	6
	>17.2%	8
Low Birthweight Rate (percent of births)	≤ 6.2%	0
	6.3-6.9%	2
	7.0-7.5%	4
	7.6-8.2%	6
	>8.2%	8
Late or No Prenatal Care Rate (percent of births)	≤ 4.6%	0
	4.7-6.2%	2
	6.3-8.2%	4
	8.3-12.4%	6
	>12.4%	8
Infant Mortality Rate (per 1,000 live births)	≤ 3.5	0
	3.6-5.4	2
	5.5-7.0	4
	7.1-10.0	6
	>10.0	8

In addition to the criteria specified in R9-24-203(B) and listed above, if a primary care area satisfies one or more of the following supplementary criteria, add one additional point to the primary care area score for each supplementary criteria satisfied. Supplementary criteria score, based on a rate greater than the state wide average for:
1. Percentage of population age 65 and older;
2. Percentage of population age 14 and younger;
3. Percentage of population with a disability;
4. Percentage of population who are communities of color; and
5. Percentage of population who speaks a language other than English.

Key to Symbols: ≤ represents "less than or equal to" and > represents "more than"

Historical Note
Table 2.1 renumbered from Table 1 and amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

R9-24-204. Primary Care Area Boundaries Determination

A. The Department shall determine the boundaries of primary care areas for the entire state. A primary care area's boundaries shall meet the following requirements:
1. The geographic area within the boundaries corresponds to or is larger than a census tract identified for the geographic area in the most recent American Community Survey prepared by the U.S. Census Bureau;
2. The boundaries are consistent with the population's primary care services utilization patterns; and
3. The primary care utilization patterns are determined by considering:
   a. The geographic area's:
      i. Topography,
      ii. Social and cultural relationships of the people living within the geographic area,
      iii. Political subdivision boundaries, and
      iv. Travel patterns; and
   b. Data about the type, amount, and location of primary care services used by the geographic area's population, obtained from local planning personnel, government officials, health organizations, primary care physicians, and residents of the geographic area.

B. In addition to the requirements for primary care area boundaries in subsection (A), the Department shall consider:
1. Indian reservation boundaries, and
2. Primary care HPSA boundaries.

Historical Note
Adopted effective July 27, 1978 (Supp. 78-4). R9-24-204 recodified from R9-24-124 (Supp. 95-2). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

R9-24-205. Repealed

Historical Note
Adopted effective July 27, 1978 (Supp. 78-4). R9-24-205 recodified from R9-24-125 (Supp. 95-2). Section repealed by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). New Section made by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Repealed by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

ARTICLE 3. COORDINATING MEDICAL PROVIDERS

R9-24-301. Definitions
In addition to the definitions in A.R.S. § 36-2351 and 9 A.A.C. 24, Article 2, the following definitions apply in this Article, unless otherwise specified:

1. "CMP" means coordinating medical provider.
2. "Continuing education" means instruction that meets the requirements in:
   a. A.A.C. R4-17-205 for a physician assistant licensed under A.R.S. Title 32, Chapter 25; or
   b. A.A.C. R4-19-511 for authorization from the Arizona State Board of Nursing for a registered nurse practitioner to prescribe and dispense drugs and devices.
3. "Drug prescription services" means providing medication that requires an order by medical personnel authorized by law to order the medication.
4. "Governing authority" has the same meaning as in A.R.S. § 36-401.
5. "Independent decision" means a registered nurse practitioner's action without a physician's order according to A.A.C. R4-19-508 and A.A.C. R4-19-511.
6. "Medical direction" means guidance, advice, or consultation provided by a CMP to a registered nurse practitioner.
7. "Medical personnel" means a medical clinic's physicians, physician assistants, registered nurse practitioners, and nurses.
8. "Physician assistant" has the same meaning as in A.R.S. § 32-2501.
9. "Order" means a written directive.
10. "Practice requirements" means the standards for physicians established in:
    a. A.R.S. Title 32, Chapter 13 and 4 A.A.C. 16; or
    b. A.R.S. Title 32, Chapter 17 and 4 A.A.C. 22.
11. "Referral source" means a person who sends an individual to a third person for medical services.
12. "Registered nurse practitioner" means an individual licensed under A.R.S. Title 32, Chapter 15.
13. "Social services" means assistance, other than medical services, provided to maintain or improve an individual's physical, mental, and social participation capabilities.
14. "Supervision" has the same meaning as in A.R.S. § 32-2501.
15. "Support services" means drug prescription services, social services, and provision of durable medical equipment.
16. "Work schedule coverage" means a medical clinic's system for ensuring that a sufficient number of medical personnel are present at the medical clinic.
17. "Written protocol" means an agreement that identifies and is signed by a CMP and a registered nurse practitioner or a physician assistant.

Historical Note
Adopted effective July 27, 1978 (Supp. 78-4). R9-24-301 recodified from R9-24-131 (Supp. 95-2). Former Section R9-24-301 renumbered to R9-24-302; new Section R9-24-301 adopted by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

R9-24-302. CMP Functions

A. A CMP shall:

1. Participate in planning for the delivery of medical services and support services within the Arizona medically underserved area that includes ways to increase access to medical services and support services for the Arizona medically underserved area's residents;
2. Develop written protocols that:
   a. Describe the manner and frequency that a registered nurse practitioner or a physician assistant at a medical clinic will communicate with the CMP, in addition to the face-to-face meeting required in subsection (A)(5);
   b. Specify the criteria used by a registered nurse practitioner at the medical clinic in making an independent decision to refer an individual to a physician; and
   c. Specify procedures to be followed by a physician assistant at the medical clinic when the CMP's supervision of the physician assistant is by a means other than physical presence;
3. Approve or disapprove the selection of registered nurse practitioners and physician assistants who will work at the medical clinic;
4. Provide:
   a. Medical direction to the registered nurse practitioners at the medical clinic, and analysis
   b. Supervision to the physician assistants at the medical clinic;
5. At least weekly, conduct a face-to-face meeting with each registered nurse practitioner and each physician assistant at the medical clinic to evaluate the medical services provided by the registered nurse practitioner or physician assistant;
6. For continuing education of a medical clinic's medical personnel:
   a. Recommend specific areas of instruction, including instruction in referral sources; and
   b. Develop a written plan for work schedule coverage to accommodate continuing education; and
7. At least annually, meet with the medical clinic's governing authority to evaluate the medical clinic's program and the medical care provided by the medical clinic's medical personnel.

B. The requirements in subsection (A) do not replace the practice requirements applicable to a CMP.

Historical Note
New Section renumbered from R9-24-301 and amended by final rulemaking at 7 A.A.R. 715, effective January 17, 2001 (Supp. 01-1). Amended by final rulemaking at 12 A.A.R. 3048, effective September 30, 2006 (Supp. 06-3). Amended by final expedited rulemaking at 26 A.A.R. 1991, with an immediate effective date of September 4, 2020 (Supp. 20-3).

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.

2. Perform all duties necessary to carry out the functions and responsibilities of the department.

3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.

4. Administer and enforce the laws relating to health and sanitation and the rules of the department.

5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.

6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or

disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health department, environmental department or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work

may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any monies that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases that are reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases that are transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures

to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meatpacking plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is prepared in a kitchen of a private home for commercial purposes consistent with chapter 8, article 2 of this title.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112)

as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

(k) Spirituous liquor produced by a producer that is licensed by the department of liquor licenses and control or spirituous liquor imported and sold by wholesalers that is licensed by the department of liquor licenses and control. This exemption includes all commercially prepackaged spirituous liquor and all spirituous liquor poured at a licensed special event, festival or fair in this state.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identifying, storing, handling and selling all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall

provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for submitting samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide

for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. Confidential information may not be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection and chapter 8, article 2 of this title. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout this state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction if the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in

any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product" has the same meaning prescribed in section 36-931.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-2352. Designation of medically-underserved areas

A. The department shall designate areas of medical need in this state as medically-underserved if either:

1. The area is designated as a health professional shortage area as defined in 42 Code of Federal Regulations part 5.

2. The area is designated as medically underserved by the department of health services by using an index that measures the following indicators:

(a) The availability of services based on a population to primary care provider ratio.

(b) The area's geographic accessibility to health care services.

(c) The percentage of the area's population that is at or below a designated federal poverty level.

(d) The health needs of the area as determined by factors which may include the incidence of infant mortality, low weight births and inadequate prenatal care.

(e) Other factors indicative of medically underserved areas which may include unemployment and the presence of farm workers, minorities and the elderly.

B. The department of health services shall submit a report to the president of the senate and the speaker of the house of representatives beginning October 1, 1996 and every two years thereafter that reevaluates the criteria, effectiveness and recommendations for changes, if necessary, to the index. The report shall also include a summary of the communities designated as medically underserved and a listing of the programs they were able to utilize based on the medically underserved designation.

36-2353. Medically-underserved areas; selection of coordinating medical providers

A. For each area designated as medically-underserved, the department may assist counties, incorporated cities and towns or health service districts to recruit a

coordinating medical provider. Selection of a coordinating medical provider shall be based upon such provider's proximity to the medically-underserved area and the ability and willingness of such provider to fulfill the requirements established pursuant to section 36-2354.

B. If no coordinating medical provider is located in or near the medically-underserved area, the university of Arizona may agree to serve as the coordinating medical provider for the area.

36-2354. Coordinating medical provider; duties

A coordinating medical provider for a medically-underserved area shall perform certain functions as determined by the department in order to ensure the provision of adequate medical care by the medical clinic. These functions may include:

1. Diagnostic services through a communications system between the clinic and the coordinating medical provider.

2. Overall direction of medical care offered at the clinic or facility, including a periodic evaluation of the quality of such care.

3. Drug prescription services.

4. Communication services to facilitate patient treatment during emergency transit to the clinic or a hospital.

BOARD OF BEHAVIORAL HEALTH EXAMINERS
Title 4, Chapter 6

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **ARIZONA BOARD OF BEHAVIORAL HEALTH EXAMINERS**
Title 4, Chapter 6

Summary

This Five-Year Review Report (5YRR) from the Arizona Board of Behavioral Health Examiners (Board) covers fifty-six (56) rules and one (1) table in Title 4, Chapter 6, related to the Board of Behavioral Health Examiners. Specifically, these rules cover the following articles:

- **Article 1: Definitions;**
- **Article 2: General Provisions;**
- **Article 3: Licensure**
- **Article 4: Social Work;**
- **Article 5: Counseling;**
- **Article 6: Marriage and Family Therapy;**
- **Article 7: Substance Abuse Counseling;**
- **Article 8: License Renewal and Continuing Education;**
- **Article 9: Appeal of Licensure or License Renewal Ineligibility;**
- **Article 10: Disciplinary Process; and**
- **Article 11: Standards of Practice.**

In the Board's previous 5 YRR, the Board indicated that four (4) rules needed to be amended. The Board has indicated that these four rules were amended by final rulemaking with an effective date of January 3, 2021. This rulemaking amended a total of 21 rules and one table.

Proposed Action

The Board has indicated that the legislature has amended the Board's statutes multiple times since the last 5 YRR and rulemaking. The Board previously tried to address some of these statutory changes in 2023 but as a result of public comment, the Board tabled the rulemaking to further consider the comments. The Board intends on restarting the 2023 rulemaking and completing the additional items in this report with the goal of submitting a Notice of Final Rulemaking to the Council by June 2025.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Board completed one rulemaking since the Council approved the Board's last 5YRR. In the rulemaking, the Board amended 21 rules with the intent to clarify rules and reduce regulatory burdens, the amendments included eliminating the $100 fee for issuing a license and providing options to non-independent level licensees for clinical supervision. Stakeholders include the Board, applicants for licensure, and licensees. There are currently 18,417 licensed behavioral health professionals in Arizona.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Board determined the benefits of the rules, protecting public health and safety, outweigh the costs and regulatory burdens imposed on those subject to the rules. Many costs and regulatory burdens result from statute rather than the rule.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it received no written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the rules are clear, concise, and understandable.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Department indicates the rules are generally consistent with other rules and statutes except for the following:

- R4-6-215
    - The Board states that a fee is needed for registration for out of state providers of telehealth and needs to be added to the rule. This fee would be permitted by A.R.S. § 36-3606(A)(3) and is a result of 2021 legislation.
- R4-6-101(23)
    - The Board has indicated that the definition of "direct client contact" does not include telehealth as found in A.R.S. § 32-3251(3).
- R4-6-403(A)(4)), R4-6-503(A)(4), R4-6-603(A)(3)), and R4-6-705(A)(3));
    - The Board has stated that these four rules contain references to evidence of indirect client hours for licensing requirements, these references need to be removed. This requirement was removed as a result of 2021 legislation, Laws 2021, Chapter 62.
- R4-6-215, R4-6-304, and Table 1
    - The Board has indicated that the privilege to practice under the Counseling Compact needs to be added for professional counselors. This is a result of 2024 legislation which resulted in the passage of A.R.S. § 32-3306. The Board has also indicated that these 2 rules and one table need to be amended to allow multistate licensing under the Social Work Compact needs to be added. The Social Work Compact is the result of 2024 legislation, which added A.R.S. § 32-3295.
- Article 7
    - The Department has indicated that "substance abuse counseling" changed to "addiction counseling" as a result of 2024 legislation that amended multiple statutes as part of Laws 2024, Chapter 169.
- R4-6-215, R4-6-304, R4-6-306, and Table 1
    - These rules need to be amended to reflect universal licensing recognition under A.R.S. § 32-4302.
- R4-6-211 and R-4-2617
    - The Department has indicated that these rules need to be amended to align with requirements of the Commission on Accreditation for Marriage and Family Therapy Education.

7. <u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>

The Department indicates the rules are effective in achieving their objectives.

8. <u>Has the agency analyzed the current enforcement status of the rules?</u>

The Department indicates the rules are generally enforced as written with the exception of R4-6-101(23), R4-6-211, R4-6-215, Table 1, R4-6-403(A)(4)), R4-6-503(A)(4), R4-6-603(A)(3)), R4-6-705(A)(3)), and Article 7. These rules are not enforced because they are

not consistent with statute, as identified in item 6 of this memo. The Department indicates that they are following the statutes where there are conflicts between statute and rule.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

Not applicable. There is no corresponding federal law.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Yes. The Board states that it issues licenses pursuant to its statutes to individuals qualifying for licensure. The type of license that the Board issues falls under an exception to the general permit requirement in A.R.S. § 41-1037 because the licensing requirements come from specific statutes.

11. Conclusion

This Five-Year Review Report (5YRR) from the Arizona Board of Behavioral Health Examiners (Board) covers fifty-six (56) rules and one (1) table in Title 4, Chapter 6, related to the Board of Behavioral Health Examiners. The Board has indicated that recent statutory changes have resulted in the rules being inconsistent with statute and not being enforced as written. The Board is proposing to amend the rules to correct these issues and anticipate submitting a Notice of Final Rulemaking to the Council by June 2025.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Staff recommends approval of this report.

Five-year-review Report
A.A.C. Title 4. Professions and Occupations
Chapter 6. Board of Behavioral Health Examiners
Submitted for December 3, 2024

INTRODUCTION

The Arizona Board of Behavioral Health Examiners (Board), which was established in 1988, protects public health and safety by regulating the practice of behavioral health professionals. This includes licensing counselors, marriage and family therapists, social workers, and addiction counselors, investigating allegations of unprofessional conduct, and ordering appropriate discipline. The Board is assisted in its work by four credentialing committees, one for each of the behavioral health disciplines.

Since the Board's last 5YRR was approved by the Council on March 3, 2020, the legislature has amended the Board's rules multiple times:

- Under Laws 2021, Chapter 320, the legislature amended A.R.S. § 32-3251 to provided that direct client contact includes providing therapeutic or clinical care by telehealth. The legislation also added A.R.S. § 36-3606 regarding registration of out-of-state providers of telehealth services.
- Under Laws 2021, Chapter 62, the legislature amended A.R.S. §§ 32-3293 (social work), 32-3301 (counseling), 32-3311 (marriage and family therapy), and 32-3321 (addiction counseling) to remove the requirement that an applicant provide evidence of indirect client hours obtained during training. The applicant must provide evidence of direct client hours and clinical supervision.
- Under Laws 2024, Chapter 77, the legislature enacted A.R.S. § 32-3306, which establishes a compact to facilitate interstate practice of licensed professional counselors.
- Under Laws 2024, Chapter 169, the legislature changed the term "substance abuse counseling" to "addiction counseling" and expanded the scope to include compulsive dependence on a behavior and activities known as process addictions.

- Under Laws 2024, Chapter 37, the legislature amended A.R.S. § 32-2372 to require the Board to waive a renewal fee for an associate level license if the licensee has an application for independent licensure pending when a renewal application is submitted.
- Under Laws 2024, Chapter 227, the legislature enacted the Social Work Licensure Compact.

Statute that generally authorizes the agency to make rules: A.R.S. § 32-3253

1. Specific statute authorizing the rule:

R4-6-101. A.R.S. § 32-3253

R4-6-201. A.R.S. § 32-3253

R4-6-203. A.R.S. § 32-3262

R4-6-205. A.R.S. § 32-3276

R4-6-206. A.R.S. § 32-3253

R4-6-207. A.R.S. §§ 32-3253 and 32-3282

R4-6-208. A.R.S. §§ 32-3251(16) and 32-3275

R4-6-209. A.R.S. §§ 32-3253, 32-3277, and 41-1073

R4-6-210. A.R.S. §§ 32-3253, 32-3279, 32-3291, 32- 3292, 32-3303, 32-3313 and 32-3321

R4-6-211. A.R.S. §§ 32-3253, 32-3279, 32-3291, 32- 3292, 32-3303, 32-3313 and 32-3321

R4-6-212. A.R.S. §§ 32-3253, 32-3293, 32-3301, 32-3311 and 32-3321

R4-6-212.01. A.R.S. §§ 32-3253, 32-3293, 32-3301, 32-3311 and 32-3321

R4-6-213. A.R.S. § 32-3253

R4-6-214. A.R.S. § 32-3253

R4-6-215. A.R.S. §§ 32-3253 and 32-3272

R4-6-216. A.R.S. §§ 32-3253, 32-3291, 32-3292, 32- 3293, 32-3301, 32-3311 and 32-3321

R4-6-301. A.R.S. §§ 32-3253, 32-3275, 32-3280, 41- 1080(A), 25-320(P), and 25-502(K)

R4-6-302. A.R.S. §§ 41-1073 and 32-3253(A)(3)

Table 1. A.R.S. §§ 41-1073 and 32-3253(A)(3)

R4-6-304. A.R.S. §§ 32-3274 and 32-4302

R4-6-305. A.R.S. § 32-3278

R4-6-306. A.R.S. § 32-3279

R4-6-307. A.R.S. § 32-3253

R4-6-401. A.R.S. §§ 32-3291, 32-3292, and 32-3293

R4-6-402. A.R.S. §§ 32-3291, 32-3292, and 32-3293

R4-6-403. A.R.S. § 32-3293

R4-6-404. A.R.S. § 32-3293

R4-6-501. A.R.S. §§ 32-3301 and 32-3303

R4-6-1106. A.R.S. § 32-3253

2. Objective of the rules:

R4-6-101. Definitions: The objective of this rule is to enhance understandability of the rules by defining terms used in a manner not explained adequately by a dictionary definition.

R4-6-201. Board Meetings; Elections: The objective of this rule is to establish minimum requirements for Board operation.

R4-6-203. Academic Review Committee Meetings: Elections: The objective of this rule is to establish minimum requirements for operation of the Academic Review Committees.

R4-6-205. Change of Contact Information: The objective of this rule is to facilitate communication between the Board and a licensee or applicant by requiring the licensee or applicant provide the Board with current contact information.

R4-6-206. Change of Name: The objective of this rule is to assist the Board in maintaining accurate records by requiring a licensee or applicant inform the Board when the licensee's or applicant's name changes.

R4-6-207. Confidential Records: The objective of this rule is to specify which Board records are confidential and not available for public review.

R4-6-208. Conviction of a Felony or Prior Disciplinary Action: The objective of this rule is to inform a licensee or applicant of the factors the Board considers when determining whether a felony conviction or prior disciplinary action will result in disciplinary sanctions.

R4-6-209. Deadline Extensions: The objective of this rule is to inform a licensee or applicant which deadlines may be extended, which may not be extended, and how to obtain an extension.

R4-6-210. Practice Limitations: The objective of this rule is to indicate which licensees are required to work under direct supervision only.

R4-6-211. Direct Supervision; Supervised Work Experience: General: The objective of this rule is to provide standards for the direct supervision required of a supervised work experience.

R4-6-212. Clinical Supervision Requirements: The objective of this rule is to establish minimum standards for clinical supervision acceptable for licensure.

R4-6-212.01. Exemptions to the Clinical Supervision Requirements: The objective of this rule is to specify exemptions to the minimum standards for clinical supervision.

R4-6-213. Registry of Clinical Supervisors: The objective of this rule is to specify the requirements with which a licensee must comply to be included on the Board's registry of clinical supervisors.

R4-6-214. Clinical Supervisor Educational Requirements: The objective of this rule is to maintain clinical supervision standards by ensuring licensees included on the Board's registry of clinical supervisors remain qualified.

R4-6-215. Fees and Charges: The objective of this rule is to provide notice of the fees and charges collected by the Board for its licensing and service responsibilities. The rule also specifies acceptable methods of payment.

R4-6-216. Foreign Equivalency Determination: The objective of this rule is to specify the manner in which the Board determines whether a degree obtained in a foreign country is substantially equivalent to one obtained in this country.

R4-6-301. Application for a License by Examination: The objective of this rule is to specify the information and documents required from an applicant for licensure by examination.

R4-6-302. Licensing Time Frames: The objective of this rule is to inform an applicant or licensee of the time and manner in which the Board acts on an application.

Table 1. Time Frames (in Days): The objective of this table is to inform an applicant or licensee of the time in which the Board acts on an application.

R4-6-304. Application for a License by Endorsement: The objective of this rule is to specify the information and documents required from an applicant for licensure by endorsement.

R4-6-305. Inactive Status: The objective of this rule is to specify the procedure for placing a license on inactive status, the consequences of a license being inactive, and the procedure for reactivating a license.

R4-6-306. Application for a Temporary License: The objective of this rule is to specify who is eligible for a temporary license, the procedure for application, and the consequences of having a temporary license.

R4-6-307. Approval of an Educational Program: The objective of this rule is to inform representatives of regionally accredited colleges and universities of the procedure for obtaining the Board's approval of an educational program in behavioral health.

R4-6-401. Curriculum: The objective of this rule is to specify the standard for the curriculum of a degree in social work, which is required for licensure.

R4-6-402. Examination: The objective of this rule is to specify the examination required of an applicant for social work licensure and time restrictions for passing the required examination.

R4-6-403. Supervised Work Experience for Clinical Social Worker Licensure: The objective of this rule is to specify the supervised work experience requirements for an applicant seeking licensure as a clinical social worker.

R4-6-404. Clinical Supervision for Clinical Social Worker Licensure: The objective of this rule is to specify that some of the supervision of an applicant seeking licensure as a clinical social worker must be clinical supervision and specify requirements for the clinical supervision hours.

R4-6-501. Curriculum: The objective of this rule is to specify the standard for the curriculum, including a supervised practicum, of a master's or higher degree in counseling, which is required for licensure.

R4-6-502. Examination: The objective of this rule is to specify the examination required of an applicant for counseling licensure and time restrictions for passing the required examination.

R4-6-503. Supervised Work Experience for Professional Counselor Licensure: The objective of this rule is to specify the supervised work experience requirements for an applicant seeking licensure as a professional counselor.

R4-6-504. Clinical Supervision for Professional Counselor Licensure: The objective of this rule is to specify that some of the supervision of an applicant seeking licensure as a professional counselor must be clinical supervision and specify requirements for the clinical supervision hours.

R4-6-505. Post-degree Programs: The objective of this rule is to specify the amount of course work an applicant for associate or professional counselor licensure may take to correct curriculum deficiencies.

R4-6-601. Curriculum: The objective of this rule is to specify the standard for the curriculum, including a supervised practicum, of a master's or higher degree in marriage and family therapy, which is required for licensure.

R4-6-602. Examination: The objective of this rule is to specify the examination required of an applicant for marriage and family therapy licensure and time restrictions for passing the required examination.

R4-6-603. Supervised Work Experience for Marriage and Family Therapy Licensure: The objective of this rule is to specify the supervised work experience requirements for an applicant seeking licensure as a marriage and family therapist.

R4-6-604. Clinical Supervision for Marriage and Family Therapy Licensure: The objective of this rule is to specify that some of the supervision of an applicant seeking licensure as a marriage and family therapist must be clinical supervision and specify requirements for the clinical supervision hours.

R4-6-605. Post-degree Programs: The objective of this rule is to specify the amount of course work an applicant for licensure as a marriage and family therapist may take to correct curriculum deficiencies.

R4-6-701. Licensed Substance Abuse Technician Curriculum: The objective of this rule is to specify the curriculum requirements for licensure as a substance abuse technician.

R4-6-702. Licensed Associate Substance Abuse Counselor Curriculum: The objective of this rule is to establish the curriculum requirements for licensure as an associate substance abuse counselor.

R4-6-703. Licensed Independent Substance Abuse Counselor Curriculum: The objective of this rule is to establish the curriculum requirements for licensure as an independent substance abuse counselor.

R4-6-704. Examination: The objective of this rule is to establish the examination requirements for substance abuse licensure and specify the examinations acceptable to the Board.

R4-6-705. Supervised Work Experience for Substance Abuse Counselor Licensure: The objective of this rule is to specify the supervised work experience requirements for licensure as a substance abuse counselor.

R4-6-706. Clinical Supervision for Substance Abuse Counselor Licensure: The objective of this rule is to specify the number of hours of supervised work experience that must involve clinical supervision by a qualified supervisor.

R4-6-707. Post-degree Programs: The objective of this rule is to specify the standards for course work an applicant for licensure as a substance abuse counselor may take to correct curriculum deficiencies.

R4-6-801. Renewal of Licensure: The objective of this rule is to specify the requirements for biennial license renewal.

R4-6-802. Continuing Education: The objective of this rule is to specify limitations regarding acceptable hours of continuing education.

R4-6-803. Continuing Education Documentation: The objective of this rule is to specify acceptable documentation of continuing education and the time the documentation needs to be maintained.

R4-6-901. Appeal Process for Licensure Ineligibility: The objective of this rule is to specify the appeal procedure an applicant may use when an ARC finds the applicant is ineligible for licensure.

R4-6-902. Appeal Process for Licensure Renewal Ineligibility: The objective of this rule is to specify the appeal procedure an applicant may use when an ARC finds the applicant is ineligible for license renewal.

R4-6-1001. Disciplinary Process: The objective of this rule is to specify the manner in which the Board handles complaints against a licensee including determining whether disciplinary action is appropriate.

R4-6-1002. Review or Rehearing of a Board Decision: The objective of this rule is to specify the procedures and standards for requesting a rehearing or review of a Board decision.

R4-6-1101. Consent for Treatment: The objective of this rule is to specify that informed consent is required before any treatment is provided, the elements of informed consent, and the manner in which informed consent is documented.

R4-6-1102. Treatment Plan: The objective of this rule is to specify the requirements for a treatment plan, including review and revision of the treatment plan.

R4-6-1103. Client Record: The objective of this rule is to specify the standards for maintaining client records and the manner in which client records are to be used and confidentiality ensured.

R4-6-1104. Financial and Billing Records: The objective of this rule is to ensure a client is aware of a licensee's billing practices before a therapeutic relationship is entered and to require billing records be maintained separate from client records.

R4-6-1105. Confidentiality: The objective of this rule is to protect client confidentiality by establishing procedures for release of client information.

R4-6-1106. Telepractice: The objective of this rule is to establish standards for providing behavioral health services by telepractice.

3. Are the rules effective in achieving their objectives? Yes

The Board determined the rules are effective in achieving their objectives because the Board is able to use the rules to fulfill its statutory responsibility to protect public health and safety by licensing and regulating behavioral health professionals.

4. Are the rules consistent with other rules and statutes? Mostly yes

The Board's rules are inconsistent with the multiple changes the legislature made to the Board's statutes in the last three years. The rules are inconsistent as follows:

- A fee is needed for registration of an out-of-state provider of telehealth (See R4-6-215—the Board intends to add the fee as subsection (B)). Additionally, this registration needs to be addressed in the time frame table (See Table 1—the application for registration will be added);
- The definition of "direct client contact" needs to be updated to include telehealth (See R4-6-101(23)—the definition will be updated consistent with A.R.S. § 32-3251);
- For all four professions, evidence of indirect client hours needs to be removed from the licensing requirements (See R4-6-403(A)(4)), R4-6-503(A)(4), R4-6-603(A)(3)), and R4-6-705(A)(3));
- The privilege to practice under the Counseling Compact needs to be added for professional counselors (See R4-6-215, R4-6-304, and Table 1—the privilege to practice will be added to these Sections)
- The multistate license under the Social Work Compact needs to be added for social workers (See R4-6-215, Table 1, and R4-6-304—the multistate license will be added to these Sections); and
- The term "substance abuse counselor" needs to be changed to "addiction counselor." This statutory change ricochets throughout the rules but mostly affects the rules in Article 7.

Additionally, the Board needs to address licensure by universal recognition as specified under A.R.S. § 32-4302 (See R4-6-215, R4-6-304, R4-6-306, and Table 1—licensure by

universal recognition will be added to each of these Sections) and to align provisions regarding supervised private practice with requirements of the Commission on Accreditation for Marriage and Family Therapy Education (See R4-6-211 and R4-6-217—supervised private practice will be removed from R4-6-211 and added in a new Section).

5. Are the rules enforced as written? Mostly yes

The Board enforces the rules in a manner consistent with statute. The rules that are inconsistent with statute are identified in item 4 (R4-6-101(23), R4-6-211, R4-6-215, Table 1, R4-6-403(A)(4)), R4-6-503(A)(4), R4-6-603(A)(3)), R4-6-705(A)(3)), and Article 7. In each case, the rules are enforced in a manner consistent with statute.

6. Are the rules clear, concise, and understandable? Yes

7. Has the agency received written criticisms of the rules within the last five years? No

The Board submitted a rule package for the Council's approval at its July 5, 2023, meeting. However, in response to public comments at the meeting, the Council tabled the rule package rather than approve it. In response, the Board terminated the rule package (See 29 A.A.R. 1895, August 25, 2023).

8. Economic, small business, and consumer impact comparison:

The Board completed one rulemaking since the Council approved the Board's previous 5YRR. In the rulemaking, the Board made clarifying amendments to 21 rules and reduced regulatory burdens, including eliminating the $100 fee for issuing a license and providing options to non-independent level licensees for clinical supervision.

2020 rulemaking: 26 A.A.R. 2881, November 13, 2020

The economic, small business, and consumer impact statement prepared with this rulemaking was available for review. In the EIS, the Board estimated the fee elimination would impact approximately 2,000 applicants each year and that approximately 2,500 non-independent level licensees would benefit from expanded access to a qualified clinical supervisor.

There are currently 18,417 licensed behavioral health professionals in Arizona. During the last fiscal year, the Board issued 3,434 first-time licenses. This means the Board did not collect the $343,400 it would have collected if the license issuance fee had remained in place and under A.R.S. § 32-3254, did not deposit $34,340 into the state's general fund. During the last fiscal year, 6,637 non-independent level licensees benefited from expanded access to a qualified clinical supervisor. The Board benefited from having rules that do not impose unnecessary regulatory burdens.

9. Has the agency received any business competitiveness analyses of the rules? No

10. Has the agency completed the course of action indicated in the agency's previous 5YRR: Yes
In the 5YRR approved by the Council on March 3, 2020, the Board indicated it intended to complete the rulemaking referenced in item 8.

11. A determination after analysis that the probable benefits of the rule outweigh within this state the probable costs of the rule and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective:
The Board determined the benefits of the rules, protecting public health and safety, outweigh the costs and regulatory burdens imposed on those subject to the rules. Many of the costs and regulatory burdens result from statute rather than rule. Indeed, the word "rule" appears 236 times in the Board's statutes, specifying the many topics on which the legislature requires the Board to make rules. Among the costs and regulatory burdens are:
    - All applicants must submit an application for licensure and pay the applicable fee;
    - Applicants must obtain specified education, including supervised work experience, pass a licensing examination, and pass a criminal background check;
    - Licensees must renew the license biennially and pay a renewal fee;
    - Licensees must obtain continuing education;
    - Licensees must work within the scope of the licensed practice level; and
    - Licensees must adhere to community standards of practice including maintaining client records and financial records and protecting confidentiality.

A Performance Audit and Sunset Review conducted in September 2024 by Walker and Armstrong, on behalf of the Arizona Auditor General, concluded The Board had made the rules required by statute. The report indicated it might be possible for the Board to reduce some of its fees. The Board does not receive an appropriation from the general fund. Rather, it is required to establish fees that cover its costs. In 2022 and 2023, the Board's fees generated an increasing fund balance. However, in 2024, the legislature transferred $4,200,000 to the general fund so the Board's fund balance decreased significantly.

As with fees, any rule requirement that involves discretion on the part of the Board, could be made less burdensome. For example:

- Fewer hours of continuing education could be required;
- Fewer years of work history could be required;
- The standard for what constitutes a change to an approved educational program could be made more flexible;
- The standard for documenting informed consent could be more flexible; and
- The point by which a treatment plan must be developed could be more flexible.

However, the Board believes these standards are the minimum necessary to enable the Board to fulfill its statutory responsibility to protect public health and safety. Any regulatory requirement is burdensome but the Board is confident no rule requirement is unduly burdensome.

12. Are the rules more stringent than corresponding federal laws? No

No federal law is applicable to the subject matter of the rules.

13. For a rule made after July 29, 2010, that require issuance of a regulatory permit, license, or agency authorization, whether the rule complies with A.R.S. § 41-1037:

All of the Board's rules were made after July 29, 2010. However, A.R.S. § 41-1037 is not applicable because the Board does not issue general permits. The Board is required by statute to assess the qualifications of applicants and issue licenses only to those who meet the statutory standards (See A.R.S. §§ 32-3275, 32-3291, 32-3292, 32-3293, 32-3301, 32-3303, 32-3311, and 32-3321).

14. Proposed course of action:

The Board received the approval required under A.R.S. § 41-1039(A) to do a rulemaking that will complete the rulemaking terminated in 2023 and address the items identified in this report. The Board expects to submit the rulemaking to the Council by June 2025.

TITLE 4. PROFESSIONS AND OCCUPATIONS

CHAPTER 6. BOARD OF BEHAVIORAL HEALTH EXAMINERS

Supp. 20-4

This Chapter contains rule Sections that were filed to be codified in the *Arizona Administrative Code* between the dates of October 1, 2020 through December 31, 2020 (Supp. 20-4).

TITLE 4. PROFESSIONS AND OCCUPATIONS

CHAPTER 6. BOARD OF BEHAVIORAL HEALTH EXAMINERS

Editor's Note: Former 4 A.A.C. 6 repealed; new 4 A.A.C. 6 made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004. Under Laws 2003, Ch. 65, the rules for the Board of Behavioral Health Examiners were repealed and replaced with new rules, and the Board was exempt from the Administrative Procedure Act for one year. The former rules and all Historical Notes are on file in the Office of the Secretary of State (Supp. 04-2).

ARTICLE 1. DEFINITIONS

R4-6-101. Definitions

A. The definitions at A.R.S. § 32-3251 apply to this Chapter. Additionally, the following definitions apply to this Chapter, unless otherwise specified:

1. "Applicant" means:
   a. An individual requesting a license by examination, temporary license, or a license by endorsement by submitting a completed application packet to the Board; or
   b. A regionally accredited college or university seeking Board approval of an educational program under R4-6-307.
2. "Application packet" means the required documents, forms, fees, and additional information required by the Board of an applicant.
3. "ARC" means an academic review committee established by the Board under A.R.S. § 32-3261(A).
4. "Assessment" means the collection and analysis of information to determine an individual's behavioral health treatment needs.
5. "ASWB" means the Association of Social Work Boards.
6. "Behavioral health entity" means any organization, agency, business, or professional practice, including a for-profit private practice, which provides assessment, diagnosis, and treatment to individuals, groups, or families for behavioral health related issues.
7. "Behavioral health service" means the assessment, diagnosis, or treatment of an individual's behavioral health issue.
8. "CACREP" means the Council for Accreditation of Counseling and Related Educational Programs.
9. "Client record" means collected documentation of the behavioral health services provided to and information gathered regarding a client.
10. "Clinical social work" means social work involving clinical assessment, diagnosis, and treatment of individuals, couples, families, and groups.
11. "Clinical supervision" means direction or oversight provided either face to face or by videoconference or telephone by an individual qualified to evaluate, guide, and direct all behavioral health services provided by a licensee to assist the licensee to develop and improve the necessary knowledge, skills, techniques, and abilities to allow the licensee to engage in the practice of behavioral health ethically, safely, and competently.
12. "Clinical supervisor" means an individual who provides clinical supervision.
13. "COAMFTE" means the Commission on Accreditation for Marriage and Family Therapy Education.
14. "Clock hour" means 60 minutes of instruction, not including breaks or meals.
15. "Contemporaneous" means documentation is made within 10 business days.
16. "Continuing education" means training that provides an understanding of current developments, skills, procedures, or treatments related to the practice of behavioral health, as determined by the Board.
17. "Co-occurring disorder" means a combination of substance use disorder or addiction and a mental or personality disorder.
18. "CORE" means the Council on Rehabilitation Education.
19. "Counseling related coursework" means education that prepares an individual to provide behavioral health services, as determined by the ARC.
20. "CSWE" means Council on Social Work Education.
21. "Date of service" means the postmark date applied by the U.S. Postal Service to materials addressed to an

applicant or licensee at the address the applicant or licensee last placed on file in writing with the Board.

22. "Day" means calendar day.
23. *"Direct client contact" means the performance of therapeutic or clinical functions related to the applicant's professional practice level of psychotherapy that includes diagnosis, assessment and treatment and that may include psychoeducation for mental, emotional and behavioral disorders based primarily on verbal or nonverbal communications and intervention with, and in the presence of, one or more clients.* A.R.S. § 32-3251.
24. "Direct supervision" means responsibility and oversight for all services provided by a supervisee as prescribed in R4-6-211.
25. "Disciplinary action" means any action taken by the Board against a licensee, based on a finding that the licensee engaged in unprofessional conduct, including refusing to renew a license and suspending or revoking a license.
26. "Documentation" means written or electronic supportive evidence.
27. "Educational program" means a degree program in counseling, marriage and family therapy, social work, or substance use or addiction counseling that is:
    a. Offered by a regionally accredited college or university, and
    b. Not accredited by an organization or entity recognized by the Board.
28. "Electronic signature" means an electronic sound, symbol, or process that is attached to or logically associated with a record and that is executed or adopted by an individual with the intent to sign the record.
29. "Family member" means a parent, sibling, half-sibling, child, cousin, aunt, uncle, niece, nephew, grandparent, grandchild, and present and former spouse, in-law, stepchild, stepparent, foster parent, or significant other.
30. "Gross negligence" means careless or reckless disregard of established standards of practice or repeated failure to exercise the care that a reasonable practitioner would exercise within the scope of professional practice.
31. "Inactive status" means the Board has granted a licensee the right to suspend behavioral health practice temporarily by postponing license renewal for a maximum of 48 months.
32. "Independent practice" means engaging in the practice of marriage and family therapy, professional counseling, social work, or substance abuse counseling without direct supervision.
33. *"Indirect client service" means training for, and the performance of, functions of an applicant's professional practice level in preparation for or on behalf of a client for whom direct client contact functions are also performed, including case consultation and receipt of clinical supervision. Indirect client service does not include the provision of psychoeducation.* A.R.S. § 32-3251.
34. "Individual clinical supervision" means clinical supervision provided by a clinical supervisor to one supervisee.
35. "Informed consent for treatment" means a written document authorizing treatment of a client that:
    a. Contains the requirements of R4-6-1101;
    b. Is dated and signed by the client or the client's legal representative, and
    c. Beginning on July 1, 2006, is dated and signed by an authorized representative of the behavioral health entity.
36. "Legal representative" means an individual authorized by law to act on a client's behalf.
37. "License" means written authorization issued by the Board that allows an individual to engage in the practice of behavioral health in Arizona.
38. "License period" means the two years between the dates on which the Board issues a license and the license expires.
39. "NASAC" means the National Addiction Studies Accreditation Commission.
40. *"Practice of behavioral health" means the practice of marriage and family therapy, professional counseling, social work and substance abuse counseling pursuant to this Chapter.* A.R.S. § 32-3251.
41. *"Practice of marriage and family therapy" means the professional application of family systems theories, principles and techniques to treat interpersonal relationship issues and nervous, mental and emotional disorders that are cognitive, affective or behavioral. The practice of marriage and family therapy includes:*
    a. Assessment, appraisal and diagnosis.
    b. The use of psychotherapy for the purpose of evaluation, diagnosis and treatment of individuals, couples, families and groups. A.R.S. § 32-3251.
42. *"Practice of professional counseling" means the professional application of mental health, psychological and human development theories, principles and techniques to:*
    a. Facilitate human development and adjustment throughout the human life span.
    b. Assess and facilitate career development.
    c. Treat interpersonal relationship issues and nervous, mental and emotional disorders that are cognitive,

affective or behavioral.

d. Manage symptoms of mental illness.

e. Assess, appraise, evaluate, diagnose and treat individuals, couples, families and groups through the use of psychotherapy. A.R.S. § 32-3251.

43. *"Practice of social work" means the professional application of social work theories, principles, methods and techniques to:*
    a. Treat mental, behavioral and emotional disorders.
    b. Assist individuals, families groups and communities to enhance or restore the ability to function physically, socially, emotionally, mentally and economically.
    c. Assess, appraise, diagnose, evaluate and treat individuals, couples, families and groups through the use of psychotherapy. A.R.S. § 32-3251.
44. *"Practice of substance abuse counseling" means the professional application of general counseling theories, principles and techniques as specifically adapted, based on research and clinical experience, to the specialized needs and characteristics of persons who are experiencing substance abuse, chemical dependency and related problems and to the families of those persons. The practice of substance abuse counseling includes the following as they relate to substance abuse and chemical dependency issues:*
    a. Assessment, appraisal, and diagnosis.
    b. The use of psychotherapy for the purpose of evaluation, diagnosis and treatment of individuals, couples, families and groups. A.R.S. § 32-3251.
45. "Progress note" means contemporaneous documentation of a behavioral health service provided to an individual that is dated and signed or electronically acknowledged by the licensee.
46. *"Psychoeducation" means the education of a client as part of a treatment process that provides the client with information regarding mental health, emotional disorders or behavioral health."* A.R.S. § 32-3251.
47. "Quorum" means a majority of the members of the Board or an ARC. Vacant positions do not reduce the quorum requirement.
48. "Regionally accredited college or university" means the institution has been approved by an entity recognized by the Council for Higher Education Accreditation as a regional accrediting organization.
49. "Significant other" means an individual whose participation a client considers to be essential to the effective provision of behavioral health services to the client.
50. "Supervised work experience" means practicing clinical social work, marriage and family therapy, professional counseling, or substance abuse counseling for remuneration or on a voluntary basis under direct supervision and while receiving clinical supervision as prescribed in R4-6-212 and Articles 4 through 7.
51. *"Telepractice" means providing behavioral health services through interactive audio, video or electronic communication that occurs between a behavioral health professional and the client, including any electronic communication for evaluation, diagnosis and treatment, including distance counseling, in a secure platform, and that meets the requirements of telemedicine pursuant to A.R.S. § 36-3602.* A.R.S. § 32-3251.
52. "Treatment" means the application by a licensee of one or more therapeutic practice methods to improve, eliminate, or manage a client's behavioral health issue.
53. "Treatment goal" means the desired result or outcome of treatment.
54. "Treatment method" means the specific approach a licensee used to achieve a treatment goal.
55. "Treatment plan" means a description of the specific behavioral health services that a licensee will provide to a client that is documented in the client record, and meets the requirements found in R4-6-1102.

B. For the purposes of this Chapter, notifications or communications required to be "written" or "in writing" may be transmitted or received by mail, electronic transmission, facsimile transmission or hand delivery and may not be transmitted or received orally. Documents requiring a signature may include a written signature or electronic signature as defined in subsection (A)(28).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 14 A.A.R. 3895, effective September 16, 2008 (Supp. 08-3). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Formatting error with "theories" not in italics in subsection 44 corrected at the request of the Board (Supp. 17-2). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

ARTICLE 2. GENERAL PROVISIONS

R4-6-201. Board Meetings; Elections

A. The Board:
1. Shall meet at least annually in June and elect the officers specified in A.R.S. § 32-3252(E);
2. Shall fill a vacancy that occurs in an officer position at the next Board meeting; and
3. May hold additional meetings:
   a. As necessary to conduct the Board's business; and
   b. If requested by the Chair, a majority of the Board members, or upon written request from two Board members.

B. The Board shall conduct official business only when a quorum is present.

C. The vote of a majority of the Board members present is required for Board action.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-202. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-203. Academic Review Committee Meetings; Elections

A. Each ARC:
1. Shall meet at least annually in June and elect a Chair and Secretary;
2. Shall fill a vacancy that occurs in an officer position at the next ARC meeting; and
3. May hold additional meetings:
   a. As necessary to conduct the ARC's business; and
   b. If requested by the Chair of the ARC, a majority of the ARC, or upon written request from two members of the ARC.

B. An ARC shall conduct official business only when a quorum is present.

C. The vote of a majority of the ARC members present is required for ARC action.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-204. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-205. Change of Contact Information

A. The Board shall communicate with a licensee or applicant using the contact information provided to the Board including:
1. Home address and telephone number,
2. Address and telephone number for all places of employment,
3. Mobile telephone number, and
4. E-mail address.

B. To ensure timely communication with the Board, a licensee or applicant shall notify the Board in writing within 30 days after any change of the licensee's or applicant's contact information listed in subsection (A). The licensee or applicant shall ensure that the written notice provided to the Board includes the new contact information.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22

A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-206. Change of Name

A licensee or an applicant shall notify the Board in writing within 30 days after the applicant's or licensee's name is changed. The applicant or licensee shall attach to the written notice:

1. A copy of a legal document that establishes the name change; or
2. A copy of two forms of identification, one of which includes a picture of the applicant or licensee, reflecting the changed name.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-207. Confidential Records

A. Except as provided in A.R.S. § 32-3282, the following records are confidential and not open to public inspection:

1. Minutes of executive session;
2. Records classified as confidential by other laws, rules, or regulations;
3. College or university transcripts, licensure examination scores, medical or mental health information, and professional references of applicants except that the individual who is the subject of the information may view or copy the records or authorize release of these records to a third party;
4. Records for which the Board determines that public disclosure would have a significant adverse effect on the Board's ability to perform its duties or would otherwise be detrimental to the best interests of the state. When the Board determines that the reason justifying the confidentiality of the records no longer exists, the record shall be made available for public inspection and copying; and
5. All investigative materials regarding any pending or resolved complaint.

B. As provided under A.R.S. § 39-121, a person wanting to inspect Board records that are available for public inspection may do so at the Board office by appointment.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-208. Conviction of a Felony or Prior Disciplinary Action

The Board shall consider the following factors to determine whether a felony conviction or prior disciplinary action will result in imposing disciplinary sanctions including refusing to renew the license of a licensee or to issue a license to an applicant:

1. The age of the licensee or applicant at the time of the felony conviction or when the prior disciplinary action occurred;
2. The seriousness of the felony conviction or prior disciplinary action;
3. The factors underlying the conduct that led to the felony conviction or imposition of disciplinary action;
4. The length of time since the felony conviction or prior disciplinary action;
5. The relationship between the practice of the profession and the conduct giving rise to the felony conviction or prior disciplinary action;
6. The licensee's or applicant's efforts toward rehabilitation;
7. The assessments and recommendations of qualified professionals regarding the licensee's or applicant's rehabilitative efforts;
8. The licensee's or applicant's cooperation or non-cooperation with the Board's background investigation regarding the felony conviction or prior disciplinary action; and
9. Other factors the Board deems relevant.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Formatting error to subsection 7; corrected indent at the request of the Board (Supp. 17-2).

R4-6-209. Deadline Extensions

A. Deadlines established by date of service may be extended a maximum of two times by the chair of the Board or the chair of the ARC if a written request is postmarked or delivered to the Board no later than the required

deadline.

B. The Board shall not grant an extension for deadlines regarding renewal submission or late renewal submission.

C. If a deadline falls on a Saturday, Sunday, or official state holiday, the Board considers the next business day the deadline.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-210. Practice Limitations

The following licensees shall not engage in the independent practice of behavioral health but rather, shall practice behavioral health only under direct supervision as prescribed in R4-6-211:

1. Licensed baccalaureate social worker,
2. Licensed master social worker,
3. Licensed associate counselor,
4. Licensed associate marriage and family therapist,
5. Licensed substance abuse technician,
6. Licensed associate substance abuse counselor, or
7. Temporary licensee.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Section repealed; new Section made by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-211. Direct Supervision: Supervised Work Experience: General

A. A licensee subject to practice limitations pursuant to R4-6-210 shall practice in an entity with responsibility and clinical oversight of the behavioral health services provided by the licensee.

B. A masters level licensee working under direct supervision who operates or manages their own entity with immediate responsibility for the behavioral health services provided by the licensee shall provide the following to the board for approval prior to providing behavioral health services:

1. The name of their clinical supervisor who meets the following:
   a. Is independently licensed by the board in the same discipline as the supervisee, and who has practiced as an independently licensed behavioral health professional for a minimum of two years beyond the supervisor's licensure date;
   b. Is in compliance with the clinical supervisor educational requirements specified in R4-6-214;
   c. Is not prohibited from providing clinical supervision by a board consent agreement; and
2. A copy of the agreement between the clinical supervisor and supervisee demonstrating:
   a. The supervisee and supervisor will meet individually for one hour for every 20 hours of direct client contact provided, to include an onsite meeting every 60 days;
   b. Supervisee's clients will be notified of clinical supervisor's involvement in their treatment and the means to contact the supervisor;
   c. Supervision reports will be submitted to the board every six months;
   d. A 30 day notice is required prior to either party terminating the agreement;
   e. The supervisor and supervisee will notify the board within 10 days of the agreement termination date; and
   f. The supervisee will cease practicing within 60 days of the agreement termination date until such time as a subsequent agreement is provided to the board and approved.

C. A licensee complying with subsection (B) shall not provide clinical oversight and responsibility for the behavioral health services of another licensee subject to the practice limitations pursuant to R4-6-210.

D. To meet the supervised work experience requirements for licensure, direct supervision shall:

1. Meet the specific supervised work experience requirements contained in Articles 4, 5, 6, and 7;
2. Be acquired after completing the degree required for licensure and receiving certification or licensure from a state regulatory entity;
3. Be acquired before January 1, 2006, if acquired as an unlicensed professional practicing under an exemption provided in A.R.S. § 32-3271;
4. Involve the practice of behavioral health; and
5. Be for a term of no fewer than 24 months.

E. An applicant who acquired supervised work experience outside of Arizona may submit that experience for approval as it relates to the qualifications of the supervisor and the entity in which the supervision was acquired. The board may accept the supervised work experience as it relates to the supervisor and the entity if it met the requirements of the state in which the supervised work experience occurred. Nothing in this provision shall apply to the supervision requirements set forth in R4-6-403, R4-6-503, R4-6-603 and R4-6-705.

F. If the Board determines that an applicant engaged in unprofessional conduct related to services rendered while acquiring hours under supervised work experience, including clinical supervision, the Board shall not accept the hours to satisfy the requirements of R4-6-403, R4-6-503, R4-6-603, or R4-6-706. Hours accrued before and after the time during which the conduct that was the subject of the finding of unprofessional conduct occurred, as determined by the Board, may be used to satisfy the requirements of R4-6-403, R4-6-503, R4-6-603, or R4-6-706 so long as the hours are not the subject of an additional finding of unprofessional conduct.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-212. Clinical Supervision Requirements

A. The Board shall accept hours of clinical supervision submitted by an applicant if the clinical supervision meets the requirements specified in R4-6-404, R4-6-504, R4-6-604, or R4-6-706, as applicable to the license for which application is made, and was provided by one of the following:

1. A clinical social worker, professional counselor, independent marriage and family therapist, or independent substance abuse counselor who:
   a. Holds an active and unrestricted license issued by the Board, and
   b. Has complied with the educational requirements specified in R4-6-214;
2. A mental health professional who holds an active and unrestricted license issued under A.R.S. Title 32, Chapter 19.1 as a psychologist and has complied with the educational requirements specified in R4-6-214; or
3. An individual who:
   a. Holds an active and unrestricted license to practice behavioral health,
   b. Is providing behavioral health services in Arizona:
      i. Under a contract or grant with the federal government under the authority of 25 U.S.C. § 5301 or § 1601-1683, or
      ii. By appointment under 38 U.S.C. § 7402 (8-11), and
   c. Has complied with the educational requirements specified in R4-6-214.

B. Unless an exemption was obtained under R4-6-212.01, the Board shall accept hours of clinical supervision submitted by an applicant if the clinical supervision was provided by an individual who:

1. Was qualified under subsection (A), and
2. Was employed by the behavioral health entity at which the applicant obtained hours of clinical supervision.

C. The Board shall accept hours of clinical supervision submitted by an applicant if the clinical supervision includes all of the following:

1. Reviewing ethical and legal requirements applicable to the supervisee's practice, including unprofessional conduct as defined in A.R.S. § 32-3251;
2. Monitoring the supervisee's activities to verify the supervisee is providing services safely and competently;
3. Verifying in writing that the supervisee provides clients with appropriate written notice of clinical supervision, including the means to obtain the name and telephone number of the supervisee's clinical supervisor;
4. Contemporaneously written documentation by the clinical supervisor of at least the following for each clinical supervision session at each entity:
   a. Date and duration of the clinical supervision session;
   b. A detailed description of topics discussed to include themes and demonstrated skills;
   c. Beginning on July 1, 2006, name and signature of the individual receiving clinical supervision;
   d. Name and signature of the clinical supervisor and the date signed; and
   e. Whether the clinical supervision occurred on a group or individual basis;
5. Maintaining the documentation of clinical supervision required under subsection (C)(4) for at least seven years;
6. Verifying that clinical supervision was not acquired from a family member as prescribed in R4-6-101(A)

(29).

7. Conducting on-going compliance review of the supervisee's clinical documentation to ensure the supervisee maintains adequate written documentation;
8. Providing instruction regarding:
   a. Assessment,
   b. Diagnosis,
   c. Treatment plan development, and
   d. Treatment;
9. Rating the supervisee's overall performance as at least satisfactory, using a form approved by the Board; and
10. Complying with the discipline-specific requirements in Articles 4 through 7 regarding clinical supervision.

D. The Board shall accept hours of clinical supervision submitted by an applicant for licensure if:

1. At least two hours of the clinical supervision were provided in a face-to-face setting during each six-month period;
2. No more than 90 hours of the clinical supervision were provided by videoconference and telephone;
3. No more than 15 of the 90 hours of clinical supervision provided by videoconference and telephone were provided by telephone; and
4. Each clinical supervision session was at least 30 minutes long.

E. Effective July 1, 2006, the Board shall accept hours of clinical supervision submitted by an applicant if at least 10 of the hours involve the clinical supervisor observing the supervisee providing treatment and evaluation services to a client. The clinical supervisor may conduct the observation:

1. In a face-to-face setting,
2. By videoconference,
3. By teleconference, or
4. By review of audio or video recordings.

F. The Board shall accept hours of clinical supervision submitted by an applicant from a maximum of six clinical supervisors.

G. The Board shall accept hours of clinical supervision obtained by an applicant in both individual and group sessions, subject to the following restrictions:

1. At least 25 of the clinical supervision hours involve individual supervision, and
2. Of the minimum 100 hours of clinical supervision required for licensure, the Board may accept:
   a. Up to 75 of the clinical supervision hours involving a group of two supervisees, and
   b. Up to 50 of the clinical supervision hours involving a group of three to six supervisees.

H. If an applicant provides evidence that a catastrophic event prohibits the applicant from obtaining documentation of clinical supervision that meets the standard specified in subsection (C), the Board may consider alternate documentation.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-212.01. Exemptions to the Clinical Supervision Requirements

The Board shall accept hours of clinical supervision submitted by an applicant if the clinical supervision meets the requirements specified in R4-6-212 and R4-6-404, R4-6-504, R4-6-604, or R4-6-706, as applicable to the license for which application is made, unless an exemption is granted as follows:

1. An individual using supervised work experience acquired in Arizona may apply to the Board for an exemption from the following requirements:
   a. Qualifications of the clinical supervisor. The Board may grant an exemption to the supervisor qualification requirements in R4-6-212(A) and R4-6-404, R4-6-504, R4-6-604, or R4-6-706, as applicable to the license for which application is made, if the Board determines the behavioral health professional who provided or will provide the clinical supervision has:
      i. Education, training and experience necessary to provide clinical supervision;
      ii. Complied with the educational requirements specified in R4-6-214; and
      iii. An active and unrestricted license issued under A.R.S. Title 32 as a physician under Chapter 13 or 17 with certification in psychiatry or addiction medicine or as a nurse practitioner under Chapter 15 with certification in mental health;

b. Employment of clinical supervisor. The Board may grant an exemption to the requirement in R4-6-212(B) regarding employment of the supervisor by the behavioral health entity at which the supervisee obtains hours of clinical supervision if the supervisee provides verification that:
   i. The supervisor and behavioral health entity have a written contract providing the supervisor the same access to the supervisee's clinical records provided to employees of the behavioral health entity, that is signed and dated by both parties, and
   ii. Supervisee's clients authorized the release of their clinical records to the supervisor; and
c. Discipline-specific changes. The Board may grant an exemption to a requirement in R4-6-404, R4-6-504, R4-6-604, or R4-6-706, as applicable to the license for which application is made, that changed on November 1, 2015, and had the effect of making the clinical supervision previously completed or completed no later than October 31, 2017, non-compliant with the clinical supervision requirements. If the Board grants an exemption under this subsection, the Board shall evaluate the applicant's clinical supervision using the requirements in existence before November 1, 2015.

2. An individual using supervised work experience acquired outside of Arizona may apply to the Board for an exemption from the clinical supervision requirements in R4-6-404, R4-6-504, R4-6-604, or R4-6-706, as applicable to the license for which application is made. The Board may grant an exemption for clinical supervision acquired outside of Arizona if the Board determines that the behavioral health professional providing the supervision met one of the following:
   a. Complied with the educational requirements specified in R4-6-214,
   b. Complied with the clinical supervisor requirements of the state in which the supervision occurred, or
   c. Was approved to provide supervision to the applicant by the state in which the supervision occurred.

Historical Note

New Section made by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-213. Registry of Clinical Supervisors

A. The Board shall maintain a registry of individuals who have met the educational requirements to provide supervision that are specified in R4-6-214.

B. To be included on the registry of clinical supervisors, an individual shall submit the following to the Board:
   1. A registration form approved by the Board;
   2. Evidence of being qualified under R4-6-212(A); and
   3. Documentation of having completed the education required under R4-6-214.

C. The Board shall include an individual who complies with subsection (B) on the registry of clinical supervisors. To remain on the registry of clinical supervisors, an individual shall submit the following to the Board:
   1. A registration form approved by the Board;
   2. Evidence of being qualified under R4-6-212(A); and
   3. Documentation of having completed the continuing education required under R4-6-214.

D. If the Board notified an individual before November 1, 2015, that the Board determined the individual was qualified to provide clinical supervision, the Board shall include the individual on the registry maintained under subsection (A). To remain on the registry of clinical supervisors, the individual shall comply with subsection (C).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 14 A.A.R. 3895, effective September 16, 2008 (Supp. 08-3). Section R4-6-213 renumbered to Section R4-6-215; new Section made final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-214. Clinical Supervisor Educational Requirements

A. The Board shall consider hours of clinical supervision submitted by an applicant only if the individual who provides the clinical supervision is qualified under R4-6-212(A) and complies with the following:
   1. Completes one of the following:
      a. At least 12 hours of training that meets the standard specified in R4-6-802(D), addresses clinical supervision, and includes the following:
         i. Role and responsibilities of a clinical supervisor;
         ii. Skills in providing effective oversight of and guidance to supervisees who diagnose, create treatment plans, and treat clients;

iii. Supervisory methods and techniques; and
iv. Fair and accurate evaluation of a supervisee's ability to plan and implement clinical assessment and treatment;

b. An approved clinical supervisor certification from the National Board for Certified Counselors/Center for Credentialing and Education;
c. A clinical supervisor certification from the International Certification and Reciprocity Consortium; or
d. A clinical member with an approved supervisor designation from the American Association of Marriage and Family Therapy; and

2. Completes the three clock hour Clinical Supervision Tutorial on Arizona Statutes/Regulations.

B. To continue providing clinical supervision, an individual qualified under subsection (A)(1)(a) shall, at least every three years, complete a minimum of nine hours of continuing training that:
1. Meets the standard specified in R4-6-802(D);
2. Concerns clinical supervision;
3. Addresses the topics listed in subsection (A)(1)(a); and
4. Includes the three clock hour Clinical Supervision Tutorial on Arizona Statutes/Regulations.

C. To continue providing clinical supervision, an individual qualified under subsections (A)(1)(b) through (d) shall:
1. Provide documentation that the national certification or designation was renewed before it expired, and
2. Complete the Clinical Supervision Tutorial on Arizona Statutes/Regulations.

D. An applicant submitting hours of clinical supervision by an individual qualified by meeting the clinical supervision education requirements in effect before the effective date of this Section shall provide documentation that the clinical supervisor was compliant with the education requirements during the period of supervision.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section R4-6-214 renumbered to Section R4-6-216; new Section made final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-215. Fees and Charges

A. Under the authority provided by A.R.S. § 32-3272, the Board establishes and shall collect the following fees:
1. Application for license by examination: $250;
2. Application for license by endorsement: $250;
3. Application for a temporary license: $50;
4. Application for approval of educational program: $500;
5. Application for approval of an educational program change: $250;
6. Biennial renewal of first area of licensure: $325;
7. Biennial renewal of each additional area of licensure if all licenses are renewed at the same time: $163;
8. Late renewal penalty: $100 in addition to the biennial renewal fee;
9. Inactive status request: $100; and
10. Late inactive status request: $100 in addition to the inactive status request fee.

B. The Board shall charge the following amounts for the services it provides:
1. Issuing a duplicate license: $25;
2. Criminal history background check: $40;
3. Paper copy of records: $.50 per page after the first four pages;
4. Electronic copy of records: $25;
5. Copy of a Board meeting audio recording: $20;
6. Verification of licensure: $20 per discipline or free if downloaded from the Board's web site;
7. Board's rules and statutes book: $10 or free if downloaded from the Board's web site;
8. Mailing list of licensees: $150, and
9. Returned check due to insufficient funds: $50.

C. The application fees in subsections (A)(1) and (2) are non-refundable. Other fees established in subsection (A) are not refundable unless the provisions of A.R.S. § 41-1077 apply.

D. The Board shall accept payment of fees and charges as follows:
1. For an amount of $40 or less, a personal or business check;
2. For amounts greater than $40, a certified check, cashier's check, or money order; and
3. By proof of online payment by credit card for the following:
   a. All fees in subsection (A);
   b. The charge in subsection (B)(2) for a criminal history background check; and
   c. The charge in subsection (B)(8) for a mailing list of licensees.

Historical Note

New Section R4-6-215 renumbered from R4-6-213 and amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Section repealed; new Section made by final rulemaking at 23 A.A.R. 3347, with an immediate effective date of November 28, 2017 (Supp. 17-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-216. Foreign Equivalency Determination

The Board shall accept as qualification for licensure a degree from an institution of higher education in a foreign country if the degree is substantially equivalent to the educational standards required in this Chapter for professional counseling, marriage and family therapy, and substance abuse counseling licensure. To enable the Board to determine whether a foreign degree is substantially equivalent to the educational standards required in this Chapter, the applicant shall, at the applicant's expense, have the foreign degree evaluated by an evaluation service that is a member of the National Association of Credential Evaluation Services, Inc.

1. Any document that is in a language other than English shall be accompanied by a translation with notarized verification of the translation's accuracy and completeness;
2. The translation shall be completed by an individual, other than the applicant, and demonstrates no conflict of interest; and
3. The individual providing the translation may be college or university language faculty, a translation service, or an American consul.

Historical Note

New Section R4-6-216 renumbered from R4-6-214 and amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

ARTICLE 3. LICENSURE

R4-6-301. Application for a License by Examination

An applicant for a license by examination shall submit a completed application packet that contains the following:

1. A statement by the applicant certifying that all information submitted in support of the application is true and correct;
2. Identification of the license for which application is made;
3. The license application fee required under R4-6-215;
4. The applicant's name, date of birth, social security number, and contact information;
5. Each name or alias previously or currently used by the applicant;
6. The name of each college or university the applicant attended and an official transcript for all education used to meet requirements;
7. Verification of current or previous licensure or certification from the licensing or certifying entity as follows:
   a. Any license or certification ever held in the practice of behavioral health; and
   b. Any professional license or certification not identified in subsection (7)(a) held in the last 10 years;
8. Background information to enable the Board to determine whether, as required under A.R.S. § 32-3275(A)(3), the applicant is of good moral character;
9. A list of every entity for which the applicant has worked during the last 7 years;
10. If the relevant licensing examination was previously taken, an official copy of the score the applicant obtained on the examination;
11. A report of the results of a self-query of the National Practitioner Data Bank;
12. Documentation required under A.R.S. § 41-1080(A) showing that the applicant's presence in the U.S. is authorized under federal law;
13. A completed and legible fingerprint card for a state and federal criminal history background check and payment as prescribed under R4-6-215 if the applicant has not previously submitted a full set of fingerprints to the Board, or verification that the applicant holds a current fingerprint card issued by the Arizona Department of Public Safety;

and

14. Other documents or information requested by the Board to determine the applicant's eligibility.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015

(Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4).

R4-6-302. Licensing Time Frames

A. The overall time frames described in A.R.S. § 41-1072 for each type of license granted by the Board are listed in Table 1. The person applying for a license and the ARC may agree in writing to extend the substantive review and overall time frames up to 25 percent of the overall time frame.

B. The administrative completeness review time frame described in A.R.S. § 41-1072 begins when the Board receives an application packet.
1. If the application packet is not complete, the Board shall send the applicant a written notice specifying the missing document or incomplete information. The administrative completeness review and overall time frames are suspended from the date the notice is served until the date the Board receives the deficient information from the applicant.
2. An applicant may assume an application packet is complete when the Board sends the applicant a written notice of administrative completeness or when the administrative completeness time frame specified in Table 1 expires.

C. An applicant shall submit all of the deficient information specified in the notice provided under subsection (B)(1) within 60 days after the deficiency notice is served.
1. If an applicant cannot submit all deficient information within 60 days after the deficiency notice is served, the applicant may obtain a 60-day extension by submitting a written notice to the Board postmarked or delivered before expiration of the 60 days. The written notice of extension shall document the reasons the applicant is unable to meet the 60-day deadline.
2. An applicant who requires an additional extension shall submit to the Board a written request that is delivered or postmarked before expiration of the initial extension and documents the reasons the applicant requires an additional extension. The Board shall notify the applicant in writing of its decision to grant or deny the request for an extension.
3. If an applicant fails to submit all of the deficient information within the required time, the Board shall administratively close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is administratively closed shall submit a new application and fee.

D. The substantive review time frame described in A.R.S. § 41-1072 begins on the date the administrative completeness time frame is complete as described under subsection (B)(2).
1. If an application is referred to the ARC for substantive review and the ARC finds that additional information is needed, the ARC shall provide a comprehensive written request for additional information to the applicant. The substantive review and overall time frames are suspended from the date the comprehensive written request for additional information is served until the applicant provides all information to the Board.
2. As provided under A.R.S. § 41-1075(A), the ARC and the applicant may agree in writing to allow the ARC to make additional supplemental requests for information. If the ARC issues an additional supplemental request for information, the substantive review and overall time frames are suspended from the date of the additional supplemental request for information until the applicant provides the information to the Board.
3. An applicant shall submit all of the information requested under subsection (D)(1) within 60 days after the comprehensive request for additional information is served. If the ARC issues an additional comprehensive request for information under subsection (D)(2), the applicant shall submit the additional information within 60 days after the additional comprehensive request for information is served. If the applicant cannot submit all requested information within the time provided, the applicant may obtain an extension under the terms specified in subsection (C)(2).
4. If an applicant fails to submit all of the requested information within the time provided under subsection (D)(3), the Board shall administratively close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is administratively closed shall submit a new application and fee.

E. An applicant may withdraw an application for licensure under the terms specified in A.R.S. § 32-3275(D).

F. After the substantive review of an application is complete:
1. If the applicant is found ineligible for licensure, a recommendation shall be made to the Board that the applicant be denied licensure;
2. If the applicant is found eligible for licensure, a recommendation shall be made to the Board that the applicant be granted licensure;

G. After reviewing the recommendation made under subsection (F), the Board shall send a written notice to an applicant that either:
1. Grants a license to an applicant who meets the qualifications and requirements in A.R.S. Title 32, Chapter 33

and this Chapter; or

2. Denies a license to an applicant who fails to meet the qualifications and requirements in A.R.S. Title 32, Chapter 33 and this Chapter. The Board shall ensure that the written notice of denial includes the information required under A.R.S. § 41-1092.03.

H. If a time frame's last day falls on a Saturday, Sunday, or an official state holiday, the Board considers the next business day the time frame's last day.

Table 1. Time Frames (in Days)

Type of License	Statutory Authority	Overall Time Frame	Administrative Completeness Time Frame	Substantive Review Time Frame
License by Examination	A.R.S. § 32-3253 A.R.S. § 32-3275	270	90	180
Temporary License	A.R.S. § 32-3253 A.R.S. § 32-3279	90	30	60
License by Endorsement	A.R.S. § 32-3253 A.R.S. § 32-3274	270	90	180
License Renewal	A.R.S. § 32-3253 A.R.S. § 32-3273	270	90	180

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 14 A.A.R. 2714, effective June 6, 2008 (Supp. 08-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-303. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-304. Application for a License by Endorsement

An applicant who meets the requirements specified under A.R.S. § 32-3274 for a license by endorsement shall submit a completed application packet, as prescribed in R4-6-301, and the following:

1. The name of one or more other jurisdictions where the applicant is certified or licensed as a behavioral health professional by a state or federal regulatory entity, and has been for at least three years;
2. A verification of each certificate or license identified in subsection (1) by the state regulatory entity issuing the certificate or license that includes the following:
   a. The certificate or license number issued to the applicant by the state regulatory entity;
   b. The issue and expiration date of the certificate or license;
   c. Whether the applicant has been the subject of disciplinary proceedings by a state regulatory entity; and
   d. Whether the certificate or license is active and in good standing;
3. If applying at a practice level listed in A.R.S. § 32-3274(B), include:
   a. An official transcript as prescribed in R4-6-301(6); and
   b. If applicable, a foreign degree evaluation prescribed in R4-6-216 or R4-6-401; and
4. Documentation of completion of the Arizona Statutes/Regulations Tutorial.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by exempt rulemaking at 14 A.A.R. 2714, effective June 6, 2008 (Supp. 08-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-305. Inactive Status

A. A licensee seeking inactive status shall submit:
1. A written request to the Board before expiration of the current license, and
2. The fee specified in R4-6-215 for inactive status request.

B. To be placed on inactive status after license expiration, a licensee shall, within three months after the date of license expiration, comply with subsection (A) and submit the fee specified in R4-6-215 for late request for inactive status.

C. The Board shall grant a request for inactive status to a licensee upon receiving a written request for inactive status. The Board shall grant inactive status for a maximum of 24 months.

D. The Board shall not grant a request for inactive status that is received more than three months after license expiration.

E. Inactive status does not change:
1. The date on which the license of the inactive licensee expires, and
2. The Board's ability to start or continue an investigation against the inactive licensee.

F. To return to active status, a licensee on inactive status shall:
1. Comply with all renewal requirements prescribed under R4-6-801; and
2. Establish to the Board's satisfaction that the licensee is competent to practice safely and competently. To assist with determining the licensee's competence, the Board may order a mental or physical evaluation of the licensee at the licensee's expense.

G. Upon a showing of good cause, the Board shall grant a written request for modification or reduction of the continuing education requirement received from a licensee on inactive status. The Board shall consider the following to show good cause:
1. Illness or disability,
2. Active military service, or
3. Any other circumstance beyond the control of the licensee.

H. The Board may, upon a written request filed before the expiration of the original 24 months of inactive status and for good cause, as described in subsection (G), permit an inactive licensee to remain on inactive status for one additional period not to exceed 24 months. To return to active status after being placed on a 24-month extension of inactive status, a licensee shall, comply with the requirements in subsection (F) and complete an additional 30 hours of continuing education during the 24-month extension.

I. A licensee on inactive status shall not engage in the practice of behavioral health.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final rulemaking at 14 A.A.R. 4516, effective December 2, 2008 (Supp. 08-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-306. Application for a Temporary License

A. To be eligible for a temporary license, an applicant shall:
1. Have applied under R4-6-301 for a license by examination or R4-6-304 for a license by endorsement,
2. Have submitted an application for a temporary license using a form approved by the Board and paid the fee required under R4-6-215, and
3. Be one of the following:
   a. Applying for a license by endorsement;
   b. Applying for a license by examination, not currently licensed or certified by a state behavioral health regulatory entity, and:
      i. Within 12 months after obtaining a degree from the education program on which the applicant is relying to meet licensing requirements,
      ii. Has completed all licensure requirements except passing the required examination, and
      iii. Has not previously taken the required examination; or
   c. Applying for a license by examination and currently licensed or certified by another state behavioral health regulatory entity.

B. An individual is not eligible for a temporary license if the individual:
1. Is the subject of a complaint pending before any state behavioral health regulatory entity,
2. Has had a license or certificate to practice a health care profession suspended or revoked by any state regulatory entity,
3. Has a criminal history or history of disciplinary action by a state behavioral health regulatory entity unless the Board determines the history is not of sufficient seriousness to merit disciplinary action, or

4. Has been previously denied a license by the Board.

C. A temporary license issued to an applicant expires one year after issuance by the Board.

D. A temporary license issued to an applicant who has not previously passed the required examination for licensure expires immediately if the temporary licensee:
1. Fails to take the required examination by the expiration date of the temporary license; or
2. Takes but fails the required examination.

E. A temporary licensee shall provide written notice and return the temporary license to the Board if the temporary licensee fails the required examination.

F. An applicant who is issued a temporary license shall practice as a behavioral health professional only under direct supervision. The temporary license may contain restrictions as to time, place, and supervision that the Board deems appropriate.

G. The Board shall issue a temporary license only in the same discipline for which application is made under subsection (A).

H. The Board shall not extend the time of a temporary license or grant an additional temporary license based on the application submitted under subsection (A).

I. A temporary licensee is subject to disciplinary action by the Board under A.R.S. § 32-3281. A temporary license may be summarily revoked without a hearing under A.R.S. § 32-3279(C)(4).

J. If the Board denies a license by examination or endorsement to a temporary licensee, the temporary licensee shall return the temporary license to the Board within five days of receiving the Board's notice of the denial.

K. If a temporary licensee withdraws the license application submitted under R4-6-301 for a license by examination or R4-6-304 for a license by endorsement, the temporary license expires.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4).

R4-6-307. Approval of an Educational Program

A. To obtain the Board's approval of an educational program, an authorized representative of the regionally accredited college or university shall submit:
1. An application, using a form approved by the Board;
2. The fee prescribed under R4-6-215; and
3. Documentary evidence that the educational program is consistent with the curriculum standards specified in A.R.S. Title 32, Chapter 33, and this Chapter.

B. The Board shall review the application materials for administrative completeness and determine whether additional information is necessary.
1. If the application packet is incomplete, the Board shall send a written deficiency notice to the applicant specifying the missing or incomplete information. The applicant shall provide the additional information within 60 days after the deficiency notice is served.
2. The applicant may obtain a 60-day extension of time to provide the deficient information by submitting a written request to the Board before expiration of the time specified in subsection (B)(1).
3. If an applicant fails to provide the deficient information within the time specified in the written notice or as extended under subsection (B)(2), the Board shall administratively close the applicant's file with no recourse to appeal. To receive further consideration for approval of an educational program, an applicant whose file is administratively closed shall comply with subsection (A).

C. When an application for approval of an educational program is administratively complete, the ARC shall substantively review the application packet.
1. If the ARC finds that additional information is needed, the ARC shall provide a written comprehensive request for additional information to the applicant.
2. The applicant shall provide the additional information within 60 days after the comprehensive request of additional information is served.
3. If an applicant fails to provide the additional information within the time specified under subsection (C)(2), the Board shall administratively close the applicant's file with no recourse to appeal. To receive further consideration for approval of an educational program, an applicant whose file is administratively closed shall comply with subsection (A).

D. After the ARC determines the substantive review is complete:
1. If the ARC finds the applicant's educational program is eligible for approval, the ARC shall recommend to

the Board that the educational program be approved.

2. If the ARC finds the applicant's educational program is ineligible for approval, the ARC shall send written notice to the applicant of the finding of ineligibility with an explanation of the basis for the finding. An applicant may appeal a finding of ineligibility for educational program approval using the following procedure:
   a. Submit to the ARC a written request for an informal review meeting within 30 days after the notice of ineligibility is served. If the applicant does not request an informal review meeting within the time provided, the ARC shall recommend to the Board that the educational program be denied approval and the applicant's file be closed with no recourse to appeal.
   b. If the ARC receives a written request for an informal review meeting within the 30 days provided, the ARC shall schedule the informal review meeting and provide at least 30 days' notice of the informal review meeting to the applicant.
   c. At the informal review meeting, the ARC shall provide the applicant an opportunity to present additional information regarding the curriculum of the educational program.
   d. When the informal review is complete, the ARC shall make a second finding whether the educational program is eligible for approval and send written notice of the second finding to the applicant.
   e. An applicant that receives a second notice of ineligibility under subsection (D)(2)(d), may appeal the finding by submitting to the Board, within 30 days after the second notice is served, a written request for a formal administrative hearing under A.R.S. Title 41, Chapter 6, Article 10.
   f. The Board shall either refer a request for a formal administrative hearing to the Office of Administrative Hearings or schedule the hearing before the Board. If no request for a formal administrative hearing is made under subsection (D)(2)(e), the ARC shall recommend to the Board that the educational program be denied approval and the applicant's file be closed with no recourse to appeal.
   g. If a formal administrative hearing is held before the Office of Administrative Hearings, the Board shall review the findings of fact, conclusions of law, and recommendation of the Administrative Law Judge and issue an order either granting or denying approval of the educational program.
   h. If a formal administrative hearing is held before the Board, the Board shall issue findings of fact and conclusions of law and issue an order either granting or denying approval of the educational program.
   i. The Board shall send the applicant a copy of the findings of fact, conclusions of law, and order.

E. The Board shall add an approved educational program to the list of approved educational programs that the Board maintains.

F. The Board's approval of an educational program is valid for five years unless the accredited college or university makes a change to the educational program that is inconsistent with the curriculum standards specified in A.R.S. Title 32, Chapter 33, and this Chapter.

G. An authorized representative of a regionally accredited college or university with a Board-approved educational program shall certify annually, using a form available from the Board, that there have been no changes to the approved educational program.

H. If a regionally accredited college or university makes one of the following changes to an approved educational program, the regionally accredited college or university shall notify the Board within 60 days after making the change and request approval of the educational program change under subsection (I):
   1. Change to more than 25 percent of course competencies;
   2. Change to more than 25 percent of course learning objectives;
   3. Addition of a course in one of the core content areas specified in R4-6-501, R4-6-601, or R4-6-701; or
   4. Deletion of a course in one of the core content areas specified in R4-6-501, R4-6-601, or R4-6-701.

I. To apply for approval of an educational program change, an authorized representative of the regionally accredited college or university shall submit:
   1. An approved educational program change form available from the Board;
   2. The fee prescribed under R4-6-215; and
   3. Documentary evidence that the change to the approved educational program is consistent with the curriculum standards specified in A.R.S. Title 32, Chapter 33, and this Chapter.

J. To maintain approved status of an educational program after five years, an authorized representative of the regionally accredited college or university shall make application under subsection (A).

K. The Board shall process the materials submitted under subsections (I) and (J) using the procedure specified in subsections (B) through (D).

L. Unless an educational program is currently approved by the Board under this Section, the regionally accredited college or university shall not represent that the educational program is Board approved in any program or marketing materials.

Historical Note

New Section made by exempt rulemaking at 14 A.A.R. 2714, effective June 6, 2008 (Supp. 08-2). Section

repealed; new Section by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 4. SOCIAL WORK

R4-6-401. Curriculum

A. An applicant for licensure as a baccalaureate social worker shall have a baccalaureate degree in social work from a regionally accredited college or university in a program accredited by the CSWE or an equivalent foreign degree as determined by the Foreign Equivalency Determination Service of the CSWE.

B. An applicant for licensure as a master or clinical social worker shall have a master or higher degree in social work from a regionally accredited college or university in a program accredited by the CSWE or an equivalent foreign degree as determined by the Foreign Equivalency Determination Service of the CSWE.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-402. Examination

A. To be licensed as a baccalaureate social worker, an applicant shall receive a passing score on the bachelors, masters, advanced generalist, or clinical examination offered by ASWB.

B. To be licensed as a master social worker, an applicant shall receive a passing score on the masters, advanced generalist, or clinical examination offered by ASWB.

C. To be licensed as a clinical social worker, an applicant shall receive a passing score on the clinical examination offered by ASWB.

D. An applicant for baccalaureate, master, or clinical social worker licensure shall receive a passing score on an approved examination for the level of licensure requested within 12 months after receiving written examination authorization from the Board. An applicant shall not take an approved licensure examination more than three times during the 12-month testing period.

E. If an applicant does not receive a passing score on an approved licensure examination within the 12 months referenced in subsection (D), the Board shall close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is closed shall submit a new application and fee.

F. The Board may grant a one-time 90-day examination extension request to an applicant who demonstrates good cause as specified under R4-6-305(G).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-403. Supervised Work Experience for Clinical Social Worker Licensure

A. An applicant for clinical social worker licensure shall demonstrate completion of at least 3200 hours of supervised work experience in the practice of clinical social work in no less than 24 months. Supervised work experience in the practice of clinical social work shall include:

1. At least 1600 hours of direct client contact involving the use of psychotherapy;
2. No more than 400 of the 1600 hours of direct client contact are in psychoeducation;
3. At least 100 hours of clinical supervision as prescribed under R4-6-212 and R4-6-404; and
4. For the purpose of licensure, no more than 1600 hours of indirect client contact related to psychotherapy services.

B. For any month in which an applicant provides direct client contact, the applicant shall obtain at least one hour of clinical supervision.

C. An applicant may submit more than the required 3200 hours of supervised work experience for consideration by the Board.

D. During the period of required supervised work experience specified in subsection (A), an applicant for clinical social worker licensure shall practice behavioral health under the limitations specified in R4-6-210.

E. There is no supervised work experience requirement for licensure as a baccalaureate or master social worker.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-404. Clinical Supervision for Clinical Social Worker Licensure

A. An applicant for clinical social worker licensure shall demonstrate that the applicant received at least 100 hours of clinical supervision that meet the requirements specified in subsection (B) and R4-6-212 during the supervised work experience required under R4-6-403.

B. The Board shall accept hours of clinical supervision for clinical social worker licensure if the hours required under subsection (A) meet the following:
1. At least 50 hours are supervised by a clinical social worker licensed by the Board, and
2. The remaining hours are supervised by an individual qualified under R4-6-212(A), or
3. The hours are supervised by an individual for whom an exemption was obtained under R4-6-212.01.

C. The Board shall not accept hours of clinical supervision for clinical social worker licensure provided by a substance abuse counselor.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-405. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 5. COUNSELING

R4-6-501. Curriculum

A. An applicant for licensure as an associate or professional counselor shall have a master's or higher degree with a major emphasis in counseling from:
1. A program accredited by CACREP or CORE that consists of at least 60 semester or 90 quarter credit hours, including a supervised counseling practicum as prescribed under subsection (E);
2. An educational program previously approved by the Board under A.R.S. § 32-3253(A)(14) that consists of at least 60 semester or 90 quarter credit hours, including a supervised counseling practicum as prescribed under subsection (E); or
3. A program from a regionally accredited college or university that consists of at least 60 semester or 90 quarter credit hours, meets the requirements specified in subsections (C) and (D), and includes a supervised counseling practicum as prescribed under subsection (E).

B. To assist the Board to evaluate a program under subsection (A)(3), an applicant who obtained a degree from a program under subsection (A)(3) shall attach the following to the application required under R4-6-301:
1. Published college or university course descriptions for the year and semester enrolled for each course submitted to meet curriculum requirements,
2. Verification, using a form approved by the Board, of completing the supervised counseling practicum required under subsection (E); and
3. Other documentation requested by the Board.

C. The Board shall accept for licensure the curriculum from a program not accredited by CACREP or CORE if the curriculum includes at least 60 semester or 90 quarter credit hours in counseling-related coursework, of which at least three semester or 4 quarter credit hours are in each of the following eight core content areas:
1. Professional orientation and ethical practice: Studies that provide a broad understanding of professional counseling ethics and legal standards, including but not limited to:
   a. Professional roles, functions, and relationships;
   b. Professional credentialing;
   c. Ethical standards of professional organizations; and
   d. Application of ethical and legal considerations in counseling;
2. Social and cultural diversity: Studies that provide a broad understanding of the cultural context of

relationships, issues, and trends in a multicultural society, including but not limited to:
   a. Theories of multicultural counseling, and
   b. Multicultural competencies and strategies;
3. Human growth and development: Studies that provide a broad understanding of the nature and needs of individuals at all developmental stages, including but not limited to:
   a. Theories of individual and family development across the life-span, and
   b. Theories of personality development;
4. Career development: Studies that provide a broad understanding of career development and related life factors, including but not limited to:
   a. Career development theories, and
   b. Career decision processes;
5. Helping relationship: Studies that provide a broad understanding of counseling processes, including but not limited to:
   a. Counseling theories and models,
   b. Essential interviewing and counseling skills, and
   c. Therapeutic processes;
6. Group work: Studies that provide a broad understanding of group development, dynamics, counseling theories, counseling methods and skills, and other group work approaches, including but not limited to:
   a. Principles of group dynamics,
   b. Group leadership styles and approaches, and
   c. Theories and methods of group counseling;
7. Assessment: Studies that provide a broad understanding of individual and group approaches to assessment and evaluation, including but not limited to:
   a. Diagnostic process including differential diagnosis and use of diagnostic classification systems such as the Diagnostic and Statistical Manual of Mental Disorders and the International Classification of Diseases,
   b. Use of assessment for diagnostic and intervention planning purposes, and
   c. Basic concepts of standardized and non-standardized testing; and
8. Research and program evaluation: Studies that provide a broad understanding of recognized research methods and design and basic statistical analysis, including but not limited to:
   a. Qualitative and quantitative research methods, and
   b. Statistical methods used in conducting research and program evaluation.

D. In evaluating the curriculum required under subsection (C), the Board shall assess whether a core content area is embedded or contained in more than one course. The applicant shall provide information the Board requires to determine whether a core content area is embedded in multiple courses. The Board shall not accept a core content area embedded in more than two courses unless the courses are succession courses. The Board shall allow subject matter in a course to qualify in only one core content area.

E. The Board shall accept a supervised counseling practicum that is part of a master's or higher degree program if the supervised counseling practicum meets the following standards:
1. Consists of at least 700 clock hours in a professional counseling setting,
2. Includes at least 240 hours of direct client contact,
3. Provides an opportunity for the supervisee to perform all activities associated with employment as a professional counselor,
4. Oversight of the counseling practicum is provided by a faculty member, and
5. Onsite supervision is provided by an individual approved by the college or university.

F. The Board shall require that an applicant for professional counselor licensure who received a master's or higher degree before July 1, 1989, from a program that did not include a supervised counseling practicum complete three years of post-master's or higher degree work experience in counseling under direct supervision. One year of a doctoral-clinical internship may be substituted for one year of supervised work experience.

G. The Board shall accept for licensure only courses that the applicant completed with a passing grade.

H. The Board shall deem an applicant to meet the curriculum requirements for professional counselor licensure if the applicant:
1. Holds an active and in good standing associate counselor license issued by the Board; and
2. Met the curriculum requirements with a master's degree in a behavioral health field from a regionally accredited university when the associate counselor license was issued.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015

(Supp. 15-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-502. Examination

A. The Board approves the following examinations for applicants for counselor licensure:
1. National Counselor Examination for Licensure and Certification offered by the National Board for Certified Counselors,
2. National Clinical Mental Health Counseling Examination offered by the National Board for Certified Counselors, and
3. Certified Rehabilitation Counselor Examination offered by the Commission on Rehabilitation Counselor Certification.

B. Except as specified in subsection (E), an applicant shall pass an approved examination within 12 months after receiving written examination authorization from the Board. An applicant shall not take an examination more than three times during the 12-month testing period.

C. If an applicant does not receive a passing score within the 12 months referenced in subsection (B), the Board shall close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is closed shall submit a new application and fee.

D. The Board may grant a one-time 90-day examination extension request to an applicant who demonstrates good cause as specified under R4-6-305(G).

E. The Board shall deem an applicant for professional counselor licensure to meet the exam requirement if the applicant holds an active and in good standing associate counselor license issued by the Board according to A.R.S. § 32-3274 or A.R.S. § 32-4302.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-503. Supervised Work Experience for Professional Counselor Licensure

A. An applicant for professional counselor licensure shall demonstrate completion of at least 3200 hours of supervised work experience in the practice of professional counseling in no less than 24 months. The applicant shall ensure that the supervised work experience includes:
1. At least 1600 hours of direct client contact involving the use of psychotherapy;
2. No more than 400 of the 1600 hours of direct client contact are in psychoeducation;
3. At least 100 hours of clinical supervision as prescribed under R4-6-212 and R4-6-504; and
4. For the purpose of licensure, no more than 1600 hours of indirect client contact related to psychotherapy services.

B. For any month in which an applicant provides direct client contact, the applicant shall obtain at least one hour of clinical supervision.

C. An applicant may submit more than the required 3200 hours of supervised work experience for consideration by the Board.

D. During the period of supervised work experience specified in subsection (A), an applicant for professional counselor licensure shall practice behavioral health under the limitations specified in R4-6-210.

E. There is no supervised work experience requirement for licensure as an associate counselor.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-504. Clinical Supervision for Professional Counselor Licensure

A. An applicant for professional counselor licensure shall demonstrate that the applicant received at least 100 hours of clinical supervision that meet the requirements specified in subsection (B) and R4-6-212 during the supervised work experience required under R4-6-503.

B. The Board shall accept hours of clinical supervision for professional counselor licensure from the following behavioral health professionals who meet the educational requirements under R4-6-214:
1. A licensed professional counselor;

2. A licensed clinical social worker;
3. A licensed marriage and family therapist;
4. A licensed psychologist; or
5. An individual for whom an exemption was obtained under R4-6-212.01.

C. The Board shall not accept hours of clinical supervision provided by a substance abuse counselor for professional counselor licensure.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-505. Post-degree Programs

An applicant who has a master's or higher degree with a major emphasis in counseling but does not meet all curriculum requirements specified in R4-6-501 may take post-graduate courses from a regionally accredited college or university to remove the curriculum deficiencies as follows:

1. An applicant whose degree did not consist of 60 semester or 90 quarter credit hours may take graduate or higher level counseling-related courses to meet the curriculum requirement;
2. An applicant whose degree did not include the eight core content areas specified in R4-6-501(C) may take graduate or higher level courses to meet the core content requirement; and
3. An applicant whose practicum did not meet the requirements specified in R4-6-501(E) may obtain additional graduate level supervised practicum hours.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section repealed; new Section by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 6. MARRIAGE AND FAMILY THERAPY

R4-6-601. Curriculum

A. An applicant for licensure as an associate marriage and family therapist or a marriage and family therapist shall have a master's or higher degree from a regionally accredited college or university in a behavioral health science program that:
1. Is accredited by COAMFTE;
2. Was previously approved by the Board under A.R.S. § 32-3253(A)(14); or
3. Includes at least three semester or four quarter credit hours in each of the number of courses specified in the six core content areas listed in subsection (B).

B. A program under subsection (A)(3) shall include:
1. Marriage and family studies: Three courses from a family systems theory orientation that collectively contain at minimum the following elements:
   a. Introductory family systems theory;
   b. Family development;
   c. Family systems, including marital, sibling, and individual subsystems; and
   d. Gender and cultural issues;
2. Marriage and family therapy: Three courses that collectively contain at minimum the following elements:
   a. Advanced family systems theory and interventions;
   b. Major systemic marriage and family therapy treatment approaches;
   c. Communications;
   and
   d. Sex therapy;
3. Human development: Three courses that may integrate family systems theory that collectively contain at minimum the following elements:
   a. Normal and abnormal human development;
   b. Human sexuality; and
   c. Psychopathology and abnormal behavior;
4. Professional studies: One course including at minimum:
   a. Professional ethics as a therapist, including legal and ethical responsibilities and liabilities; and
   b. Family law;

5. Research: One course in research design, methodology, and statistics in behavioral health science; and
6. Supervised practicum: Two courses that supplement the practical experience gained under subsection (D).

C. In evaluating the curriculum required under subsection (B), the Board shall assess whether a core content area is embedded or contained in more than one course. The applicant shall provide information the Board requires to determine whether a core content area is embedded in multiple courses. The Board shall not accept a core content area embedded in more than two courses unless the courses are succession courses. The Board shall allow subject matter in a course to qualify in only one core content area.

D. A program's supervised practicum shall meet the following standards:
1. Provides an opportunity for the enrolled student to provide marriage and family therapy services to individuals, couples, and families in an educational or professional setting under the direction of a faculty member or supervisor designated by the college or university;
2. Includes at least 300 client-contact hours provided under direct supervision;
3. Has supervision provided by a designated licensed marriage and family therapist.

E. An applicant may submit a written request to the ARC for an exemption from the requirement specified in subsection (D)(3). The request shall include the name of the behavioral health professional proposed by the applicant to act as supervisor of the practicum, a copy of the proposed supervisor's transcript and curriculum vitae, and any additional documentation requested by the ARC. The ARC shall grant the exemption if the ARC determines the proposed supervisor is qualified by education, experience, and training to provide supervision.

F. The Board shall deem an applicant to meet the curriculum requirements for marriage and family therapist licensure if the applicant:
1. Holds an active and in good standing associate marriage and family therapist license issued by the Board; and
2. Met the curriculum requirements with a master's degree in a behavioral health field from a regionally accredited university when the associate marriage and family therapist license was issued.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-602. Examination

A. The Board approves the marriage and family therapy licensure examination offered by the Association of Marital and Family Therapy Regulatory Boards.

B. Except as specified in subsection (E), an applicant shall pass the approved examination within 12 months after receiving written examination authorization from the Board. An applicant shall not take the examination more than three times during the 12-month testing period.

C. If an applicant does not receive a passing score within the 12 months referenced in subsection (B), the Board shall close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is closed shall submit a new application and fee.

D. The Board may grant a one-time 90-day examination extension request to an applicant who demonstrates good cause as specified under R4-6-305(G).

E. The Board shall deem an applicant for marriage and family therapist licensure to meet the examination requirement if the applicant holds an active and in good standing associate marriage and family therapist license issued by the Board according to A.R.S. § 32-3274 or A.R.S. § 32-4302.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt emergency rulemaking at 21 A.A.R. 521, with Attorney General approval effective March 18, 2015 (Supp. 15-1). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-603. Supervised Work Experience for Marriage and Family Therapy Licensure

A. An applicant for licensure as a marriage and family therapist shall demonstrate completion of at least 3200 hours of supervised work experience in the practice of marriage and family therapy in no less than 24 months. The

applicant shall ensure that the supervised work experience includes:

1. At least 1600 hours of direct client contact involving the use of psychotherapy:
   a. At least 1000 of the 1600 hours of direct client contact are with couples or families; and
   b. No more than 400 of the 1600 hours of direct client contact are in psychoeducation and at least 60 percent of psychoeducation hours are with couples or families;
2. At least 100 hours of clinical supervision as prescribed under R4-6-212 and R4-6-604; and
3. For the purpose of licensure, no more than 1600 hours of indirect client contact related to psychotherapy services.

B. For any month in which an applicant provides direct client contact, the applicant shall obtain at least one hour of clinical supervision.

C. An applicant may submit more than the required 3200 hours of supervised work experience for consideration by the Board.

D. During the period of supervised work experience specified in subsection (A), an applicant for marriage and family therapist licensure shall practice behavioral health under the limitations specified in R4-6-210.

E. There is no supervised work experience requirement for licensure as an associate marriage and family therapist.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-604. Clinical Supervision for Marriage and Family Therapy Licensure

A. An applicant for marriage and family therapy licensure shall demonstrate that the applicant received at least 100 hours of clinical supervision that meets the requirements specified in subsection (B) and R4-6-212 during the supervised work experience required under R4-6-603.

B. The Board shall accept hours of clinical supervision for marriage and family therapist licensure if:

1. The hours are supervised by an individual who meets the educational requirements under R4-6-214;
2. At least 50 of the hours are supervised by:
   a. A marriage and family therapist licensed by the Board, or
   b. An independently licensed behavioral health professional who holds an Approved Supervisor designation from the American Association for Marriage and Family Therapy; and
3. The remaining hours are supervised by one or more of the following:
   a. A professional counselor licensed by the Board;
   b. A clinical social worker licensed by the Board;
   c. A marriage and family therapist licensed by the Board; or
   d. A psychologist licensed under A.R.S. Title 32, Chapter 19.1; or
4. The hours are supervised by an individual for whom an exemption is obtained under R4-6-212.01.

C. The Board shall not accept hours of clinical supervision provided by a substance abuse counselor for marriage and family therapy licensure.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final rulemaking at 12 A.A.R. 1386, effective June 4, 2006 (Supp. 06-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-605. Post-degree Programs

An applicant who has a master's or higher degree in a behavioral health science but does not meet all curriculum requirements specified in R4-6-601 may take post-graduate courses from a regionally accredited college or university to remove the curriculum deficiencies if:

1. The deficiencies constitute no more than 12 semester or 16 quarter credit hours; and
2. Courses taken to remove the deficiencies are at a graduate or higher level.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-606. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 7. SUBSTANCE ABUSE COUNSELING

R4-6-701. Licensed Substance Abuse Technician Curriculum

A. An applicant for licensure as a substance abuse technician shall have:
1. An associate's or bachelor's degree from a regionally accredited college or university in a program accredited by NASAC;
2. An associate's or bachelor's degree from a regionally accredited college or university in an educational program previously approved by the Board under A.R.S. § 32-3253(A)(14); or
3. An associate's or bachelor's degree from a regionally accredited college or university in a behavioral health science program that includes coursework from the seven core content areas listed in subsection (B).

B. An associate's or bachelor's degree under subsection (A)(3), shall include at least three semester or four quarter credit hours in each of the following core content areas:
1. Psychopharmacology, including but not limited to effects on mood, behavior, cognition and physiology;
2. Models of treatment and relapse prevention, including but not limited to philosophies and practices of generally accepted and evidence-supported models;
3. Group work: Group dynamics and processes as they relate to addictions and substance use disorders;
4. Working with diverse populations: Issues and trends in a multicultural and diverse society as they relate to substance use disorder and addiction;
5. Co-occurring disorders, including but not limited to philosophies and practices of generally accepted and evidence-supported models;
6. Ethics, including but not limited to:
   a. Legal and ethical responsibilities and liabilities;
   b. Standards of professional behavior and scope of practice;
   c. Client rights, responsibilities, and informed consent; and
   d. Confidentiality and other legal considerations in the practice of behavioral health; and
7. Assessment, diagnosis, and treatment. Use of assessment and diagnosis to develop appropriate treatment interventions for substance use disorders or addictions.

C. The Board shall waive the education requirement in subsection (A) for an applicant requesting licensure as a substance abuse technician if the applicant demonstrates all of the following:
1. The applicant provides services under a contract or grant with the federal government under the authority of 25 U.S.C. § 5301 or § 1601 – 1683;
2. The applicant has obtained at least the equivalent of a high school diploma;
3. Because of cultural considerations, obtaining the degree required under subsection (A) would be an extreme hardship for the applicant; and
4. The applicant has completed at least 6400 hours of supervised work experience in substance abuse counseling, as prescribed in R4-6-705(C), in no less than 48 months within the seven years immediately preceding the date of application.

D. In evaluating the curriculum required under subsection (B), the Board shall assess whether a core content area is embedded or contained in more than one course. The applicant shall provide information the Board requires to determine whether a core content area is embedded in multiple courses. The Board shall not accept a core content area embedded in more than two courses unless the courses are succession courses. The Board shall allow subject matter in a course to qualify in only one core content area.

E. An applicant for licensure as a substance abuse technician who completed the applicant's educational training before the effective date of this Section or no later than October 31, 2017, may request that the Board evaluate the applicant's educational training using the standards in effect before the effective date of this Section.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by exempt rulemaking at 14 A.A.R. 4532, effective January 1, 2009 (Supp. 08-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Clerical error correction made to subsection (B)(4); the Office inadvertently did not remove repealed text as filed at 22 A.A.R. 3238; correction made at the request of the Board (Supp. 17-2). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp.

20-4).

R4-6-702. Licensed Associate Substance Abuse Counselor Curriculum

A. An applicant for licensure as an associate substance abuse counselor shall have one of the following:
1. A bachelor's degree from a regionally accredited college or university in a program accredited by NASAC and supervised work experience that meets the standards specified in R4-6-705(A);
2. A master's or higher degree from a regionally accredited college or university in a program accredited by NASAC;
3. A bachelor's degree from a regionally accredited college or university in a behavioral health science program that meets the core content standards specified in R4-6-701(B) and supervised work experience that meets the standards specified in R4-6-705(A);
4. A master's or higher degree from a regionally accredited college or university in a behavioral health science program that meets the core content standards specified in R4-6-701(B) and includes at least 300 hours of supervised practicum as prescribed under subsection (C); or
5. A bachelor's degree from a regionally accredited college or university in an educational program previously approved by the Board under A.R.S. § 32-3253(A)(14) and supervised work experience that meets the standards specified in R4-6-705(A); or
6. A master's or higher degree from a regionally accredited college or university in an educational program previously approved by the Board under A.R.S. § 32-3253(A)(14) and includes at least 300 hours of supervised practicum as prescribed under subsection (C).

B. In evaluating the curriculum required under subsection (A)(3) or (4), the Board shall assess whether a core content area is embedded or contained in more than one course. The applicant shall provide information the Board requires to determine whether a core content area is embedded in multiple courses. The Board shall not accept a core content area embedded in more than two courses unless the courses are succession courses. The Board shall allow subject matter in a course to qualify in only one core content area.

C. Supervised practicum. A supervised practicum shall integrate didactic learning related to substance use disorders with face-to-face, direct counseling experience. The counseling experience shall include intake and assessment, treatment planning, discharge planning, documentation, and case management activities.

D. The Board shall deem an applicant to meet the curriculum requirements for associate substance abuse counselor licensure if the applicant:
1. Holds an active and in good standing substance abuse technician license issued by the Board; and
2. Met the curriculum requirements with a bachelor's degree when the substance abuse technician license was issued.

E. An applicant for licensure as an associate substance abuse counselor who completed the applicant's educational training before the effective date of this Section or no later than October 31, 2017, may request that the Board evaluate the applicant's educational training using the standards in effect before the effective date of this Section.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-703. Licensed Independent Substance Abuse Counselor Curriculum

A. An applicant for licensure as an independent substance abuse counselor shall have a master's or higher degree from a regionally accredited college or university in one of the following:
1. A program accredited by NASAC;
2. A behavioral health science program that meets the core content standards specified in R4-6-701(B) and includes at least 300 hours of supervised practicum as prescribed under subsection (D); or
3. An educational program previously approved by the Board under A.R.S. § 32-3253(A)(14) that includes at least 300 hours of supervised practicum as prescribed under subsection (D).

B. In addition to the degree requirement under subsection (A), an applicant for licensure as an independent substance abuse counselor shall complete the supervised work experience requirements prescribed under R4-6-705(B).

C. In evaluating the curriculum required under subsection (A)(2), the Board shall assess whether a core content area is embedded or contained in more than one course. The applicant shall provide information the Board requires to determine whether a core content area is embedded in multiple courses. The Board shall not accept a core content area embedded in more than two courses unless the courses are succession courses. The Board shall allow subject matter in a course to qualify in only one core content area.

D. Supervised practicum. A supervised practicum shall integrate didactic learning related to substance use disorders

with face-to-face, direct counseling experience. The counseling experience shall include intake and assessment, treatment planning, discharge planning, documentation, and case management activities.

E. The Board shall deem an applicant to meet the curriculum requirements for independent substance abuse counselor licensure if the applicant:
1. Holds an active and in good standing associate substance abuse counselor license issued by the Board; and
2. Met the curriculum requirements with a master's degree when the associate substance abuse counselor license was issued.

F. An applicant for licensure as an independent substance abuse counselor who completed the applicant's educational training before the effective date of this Section or no later than October 31, 2017, may request that the Board evaluate the applicant's educational training using the standards in effect before the effective date of this Section.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-704. Examination

A. The Board approves the following licensure examinations for an applicant for substance abuse technician licensure:
1. Alcohol and Drug Counselor and Advanced Alcohol and Drug Counselor Examinations offered by the International Certification and Reciprocity Consortium, and
2. Level I or higher examinations offered by the NAADAC, the Association of Addiction Professionals.

B. The Board approves the following licensure examinations for an applicant for associate or independent substance abuse counselor licensure:
1. Advanced Alcohol and Drug Counselor Examination offered by the International Certification and Reciprocity Consortium,
2. Level II or higher examinations offered by the NAADAC, the Association of Addiction Professionals, and
3. Examination for Master Addictions Counselors offered by the National Board for Certified Counselors.

C. The Board shall deem an applicant for independent substance abuse counselor licensure as meeting the examination requirements if all of the following apply:
1. The applicant has an active associate substance abuse counselor license;
2. The applicant passed a written examination listed in subsection (A) before November 1, 2015; and
3. The applicant submitted an application to the Board on or after November 1, 2015.

D. An applicant shall pass an approved examination within 12 months after receiving written examination authorization from the Board. An applicant shall not take an approved examination more than three times during the 12-month testing period.

E. If an applicant does not receive a passing score on an approved licensure examination within the 12 months referenced in subsection (D), the Board shall close the applicant's file with no recourse to appeal. To receive further consideration for licensure, an applicant whose file is closed shall submit a new application and fee.

F. The Board may grant a one-time 90-day examination extension request to an applicant who demonstrates good cause as specified under R4-6-305(G).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-705. Supervised Work Experience for Substance Abuse Counselor Licensure

A. An applicant for associate substance abuse counselor licensure who has a bachelor's degree and is required under R4-6-702(A) to participate in a supervised work experience shall complete at least 3200 hours of supervised work experience in substance abuse counseling in no less than 24 months. The applicant shall ensure that the supervised work experience relates to substance use disorder and addiction and meets the following standards:
1. At least 1600 hours of direct client contact involving the use of psychotherapy related to substance use disorder and addiction issues,

2. No more than 400 of the 1600 hours of direct client contact are in psychoeducation,
3. For the purpose of licensure, no more than 1600 hours of indirect client contact related to psychotherapy services,
4. At least 100 hours of clinical supervision as prescribed under R4-6-212 and R4-6-706, and
5. At least one hour of clinical supervision in any month in which the applicant provides direct client contact.

B. An applicant for independent substance abuse counselor licensure shall demonstrate completion of at least 3200 hours of supervised work experience in substance abuse counseling in no less than 24 months. The applicant shall ensure that the supervised work experience meets the standards specified in subsection (A).

C. An applicant for substance abuse technician qualifying under R4-6-701(C) shall complete at least 6400 hours of supervised work experience in no less than 48 months. The applicant shall ensure that the supervised work experience includes:
1. At least 3200 hours of direct client contact;
2. Using psychotherapy to assess, diagnose, and treat individuals, couples, families, and groups for issues relating to substance use disorder and addiction; and
3. At least 200 hours of clinical supervision as prescribed under R4-6-212 and R4-6-706.

D. An applicant may submit more than the required number of hours of supervised work experience for consideration by the Board.

E. During the period of required supervised work experience, an applicant for substance abuse licensure shall practice behavioral health under the limitations specified in R4-6-210.

F. There is no supervised work experience requirement for an applicant for licensure as:
1. A substance abuse technician qualifying under R4-6-701(A), or
2. An associate substance abuse counselor qualifying under R4-6-702(A) with a master's or higher degree.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4).

R4-6-706. Clinical Supervision for Substance Abuse Counselor Licensure

A. During the supervised work experience required under R4-6-705, an applicant for substance abuse counselor licensure shall demonstrate that the applicant received, for the level of licensure sought, at least the number of hours of clinical supervision specified in R4-6-705 that meets the requirements in subsection (B) and R4-6-212.

B. The Board shall accept hours of clinical supervision for substance abuse licensure if the focus of the supervised hours relates to substance use disorder and addiction and:
1. At least 50 hours are supervised by:
   a. An independent substance abuse counselor licensed by the Board; or
   b. An independently licensed behavioral health professional who:
      i. Provides evidence of knowledge and experience in substance use disorder treatment; and
      ii. Is approved by the ARC or designee, and
2. The remaining hours are supervised by an individual qualified under R4-6-212(A), or
3. The hours are supervised by an individual for whom an exemption was obtained under R4-6-212.01.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-707. Post-degree Programs

An applicant who has a behavioral health science degree from a regionally accredited college or university but does not meet all curriculum requirements specified in R4-6-701, R4-6-702, or R4-6-703 may take post-graduate courses from a regionally accredited college or university to remove the curriculum deficiencies. The Board shall accept a post-graduate course from a regionally accredited college or university to remove a curriculum deficiency if the course meets the following requirement, as applicable:
1. For an applicant who has an associate's or bachelor's degree, an undergraduate or higher level course; or
2. For an applicant who has a master's degree, a graduate or higher level course.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Section

repealed; new Section made by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 8. LICENSE RENEWAL AND CONTINUING EDUCATION

R4-6-801. Renewal of Licensure

A. Under A.R.S. § 32-3273, a license issued by the Board under A.R.S. Title 32, Chapter 33 and this Chapter is renewable every two years. A licensee who has more than one license may request in writing that the Board synchronize the expiration dates of the licenses. The licensee shall pay any prorated fees required to accomplish the synchronization.

B. A licensee holding an active license to practice behavioral health in this state shall complete 30 clock hours of continuing education as prescribed under R4-6-802 between the date the Board received the licensee's last renewal application and the next license expiration date. A licensee may not carry excess continuing education hours from one license period to the next.

C. To renew licensure, a licensee shall submit the following to the Board on or before the date of license expiration or as specified in A.R.S. § 32-4301:

1. A renewal application form, approved by the Board. The licensee shall ensure that the renewal form:
   a. Includes a list of 30 clock hours of continuing education that the licensee completed during the license period;
   b. If the documentation previously submitted under R4-6-301(12) was a limited form of work authorization issued by the federal government, includes evidence that the work authorization has not expired; and
   c. Is signed by the licensee attesting that all information submitted is true and correct;
2. Payment of the renewal fee as prescribed in R4-6-215; and
3. Other documents requested by the Board to determine that the licensee continues to meet the requirements under A.R.S. Title 32, Chapter 33 and this Chapter.

D. The Board may audit a licensee to verify compliance with the continuing education requirements under subsection (B). A licensee shall maintain documentation verifying compliance with the continuing education requirements as prescribed under R4-6-803.

E. A licensee whose license expires may have the license reinstated by complying with subsection (C) and paying a late renewal penalty within 90 days of the license expiration date. A license reinstated under this subsection is effective with no lapse in licensure.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final rulemaking at 14 A.A.R. 4516, effective December 2, 2008 (Supp. 08-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-802. Continuing Education

A. A licensee who maintains more than one license may apply the same continuing education hours for renewal of each license if the content of the continuing education relates to the scope of practice of each license.

B. For each license period, a licensee may report a maximum of:

1. Ten clock hours of continuing education for first-time presentations by the licensee that deal with current developments, skills, procedures, or treatments related to the practice of behavioral health. The licensee may claim one clock hour for each hour spent preparing, writing, and presenting information;
2. Six clock hours of continuing education for attendance at a Board meeting where the licensee is not:
   a. A member of the Board,
   b. The subject of any matter on the agenda, or
   c. The complainant in any matter that is on the agenda; and
3. Ten clock hours of continuing education for service as a Board or ARC member.

C. For each license period, a licensee shall report:

1. A minimum of three clock hours of continuing education sponsored, approved, or offered by an entity listed in subsection (D) in:
   a. Behavioral health ethics or mental health law, and
   b. Cultural competency and diversity; and
2. Completion of the three clock hour Arizona Statutes/Regulations Tutorial.

D. A licensee shall participate in continuing education that relates to the scope of practice of the license held and to maintaining or improving the skill and competency of the licensee. The Board has determined that in addition to the continuing education listed in subsections (B) and (C), the following continuing education meets this standard:

1. Activities sponsored or approved by national, regional, or state professional associations or organizations in the specialties of marriage and family therapy, professional counseling, social work, substance abuse counseling, or in the allied professions of psychiatry, psychiatric nursing, psychology, or pastoral counseling;
2. Programs in behavioral health sponsored or approved by a regionally accredited college or university;
3. In-service training, courses, or workshops in behavioral health sponsored by federal, state, or local social service agencies, public school systems, or licensed health facilities or hospitals;
4. Graduate or undergraduate courses in behavioral health offered by a regionally accredited college or university. One semester-credit hour or the hour equivalent of one semester hour equals 15 clock hours of continuing education;
5. Publishing a paper, report, or book that deals with current developments, skills, procedures, or treatments related to the practice of behavioral health. For the license period in which publication occurs, the licensee may claim one clock hour for each hour spent preparing and writing materials; and
6. Programs in behavioral health sponsored by a state superior court, adult probation department, or juvenile probation department.

E. The Board has determined that a substance abuse technician, associate substance abuse counselor, or an independent substance abuse counselor shall ensure that at least 20 of the 30 clock hours of continuing education required under R4-6-801(B) are in the following categories:
1. Pharmacology and psychopharmacology,
2. Addiction processes,
3. Models of substance use disorder and addiction treatment,
4. Relapse prevention,
5. Interdisciplinary approaches and teams in substance use disorder and addiction treatment,
6. Substance use disorder and addiction assessment and diagnostic criteria,
7. Appropriate use of substance use disorder and addiction treatment modalities,
8. Substance use disorder and addiction as it related to diverse populations,
9. Substance use disorder and addiction treatment and prevention,
10. Clinical application of current substance use disorder and addiction research, or
11. Co-occurring disorders.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 22 A.A.R. 3238, effective November 1, 2016 (Supp. 16-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-803. Continuing Education Documentation

A. A licensee shall maintain documentation of continuing education for 24 months following the date of the license renewal.

B. The licensee shall retain the following documentation as evidence of participation in continuing education:
1. For conferences, seminars, workshops, and in-service training presentations, a signed certificate of attendance or a statement from the provider verifying the licensee's participation in the activity, including the title of the program, name, address, and telephone number of the sponsoring organization, names of presenters, date of the program, and clock hours involved;
2. For first-time presentations by a licensee, the title of the program, name, address, and telephone number of the sponsoring organization, date of the program, syllabus, and clock hours required to prepare and make the presentation;
3. For a graduate or undergraduate course, an official transcript;
4. For an audited graduate or undergraduate course, an official transcript; and
5. For attendance at a Board meeting, a signed certificate of attendance prepared by the Board.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-804. Repealed

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by

exempt rulemaking at 11 A.A.R. 2713, effective June 27, 2005 (Supp. 05-2). Repealed by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 9. APPEAL OF LICENSURE OR LICENSURE RENEWAL INELIGIBILITY

R4-6-901. Appeal Process for Licensure Ineligibility

A. An applicant for licensure may be found ineligible because of unprofessional conduct or failure to meet licensure requirements.

B. If the ARC finds an applicant is ineligible because of failure to meet licensure requirements:

1. The ARC shall send a written notice of the finding of ineligibility to the applicant with an explanation of the basis for the finding.
2. An applicant who wishes to appeal the finding of ineligibility shall submit a written request for an informal review meeting to the ARC within 30 days after the notice of ineligibility is served. If an informal review meeting is not requested within the time provided, the ARC shall recommend to the Board that licensure be denied and the licensee's file be closed with no recourse to appeal.
3. If a request for an informal review meeting is received within the 30 days provided under subsection (B)(2), the ARC shall schedule the informal review meeting and provide at least 30-days' notice to the applicant. At the informal review meeting, the ARC shall allow the applicant to present additional information regarding the applicant's qualifications for licensure.
4. When the review is complete, the ARC shall make a second finding whether the applicant is eligible for licensure. The ARC shall send written notice of this second finding to the applicant with an explanation of the basis for the finding.
5. If the ARC again finds the applicant is ineligible for licensure, an applicant who wishes to appeal the second finding of ineligibility shall submit a written request to the Board for a formal administrative hearing under the Administrative Procedure Act. A.R.S. Title 41, Chapter 6, Article 10, within 30 days after the second notice of ineligibility is served. The Board shall either refer the request for a formal administrative hearing to the Office of Administrative Hearings or schedule the formal administrative hearing before the Board. If a formal administrative hearing is not requested within 30 days, the ARC shall recommend to the Board that licensure be denied and the applicant's file be closed with no recourse to appeal.
6. If the formal administrative hearing is held before the Office of Administrative Hearings, the Board shall review the findings of fact, conclusions of law, and recommendation and issue an order either to grant or deny licensure.
7. If the formal administrative hearing is held before the Board, the Board shall issue the findings of fact and conclusions of law and shall issue an order either to grant or deny licensure.
8. The Board shall send the applicant a copy of the final findings of fact, conclusions of law, and order. An applicant who is denied licensure following a formal administrative hearing is required to exhaust the applicant's administrative remedies as described in R4-6-1002 before seeking judicial review of the Board's final administrative decision.

C. If the Board receives a complaint against an applicant while the applicant is under review for licensure, the Board shall review the complaint in accordance with the procedures in R4-6-1001. The Board shall not take final action on an application while a complaint is pending against the applicant.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-902. Appeal Process for Licensure Renewal Ineligibility

A. A licensee who applies for licensure renewal may be found ineligible because of failure to meet licensure renewal requirements.

B. If the Board finds an applicant for licensure renewal is ineligible because of failure to meet licensure renewal requirements:

1. The Board shall send a written notice of the finding of ineligibility to the licensee with an explanation of the basis for the finding.
2. A licensee who wishes to appeal the finding of ineligibility for licensure renewal shall submit a written request for an informal review meeting to the Board within 30 days after the notice of ineligibility is served. If an informal review meeting is not requested within the time provided, the Board shall deny licensure renewal and close the licensee's file with no recourse to appeal.
3. If a request for an informal review meeting is received within the 30 days provided under subsection (B)(2),

the Board shall schedule the informal review meeting and provide at least 30-days' notice to the licensee. At the informal review meeting, the Board shall allow the licensee to present additional information regarding the licensee's qualifications for renewal.

4. When the informal review meeting is complete, the Board shall make a second finding whether the licensee meets renewal requirements. The Board shall send written notice of this second finding to the licensee with an explanation of the basis for the finding.
5. If the Board again finds the licensee is ineligible for licensure renewal, a licensee who wishes to appeal the second finding of ineligibility shall submit a written request to the Board for a formal administrative hearing under the Administrative Procedure Act, A.R.S. Title 41, Chapter 6, Article 10, within 30 days after the second notice of ineligibility is served. The Board shall either refer the request for a formal administrative hearing to the Office of Administrative Hearings or schedule the formal administrative hearing before the Board. If a formal administrative hearing is not requested within 30 days, the Board shall deny licensure renewal and close the licensee's file with no recourse to appeal.
6. If the formal administrative hearing is held before the Office of Administrative Hearings, the Board shall review the findings of fact, conclusions of law, and recommendation and issue an order either to grant or deny licensure renewal.
7. If the formal administrative hearing is held before the Board, the Board shall issue the findings of fact and conclusions of law and issue an order either to grant or deny licensure renewal.
8. The Board shall send the licensee a copy of the final findings of fact, conclusions of law, and order. A licensee who is denied licensure renewal following a formal administrative hearing is required to exhaust the licensee's administrative remedies as described in R4-6-1002 before seeking judicial review of the Board's final administrative decision.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 10. DISCIPLINARY PROCESS

R4-6-1001. Disciplinary Process

A. If the Board receives a written complaint alleging a licensee is or may be incompetent, guilty of unprofessional practice, or mentally or physically unable to engage in the practice of behavioral health safely, the Board shall send written notice of the complaint to the licensee and require the licensee to submit a written response within 30 days from the date of service of the written notice of the complaint.

B. The Board shall conduct all disciplinary proceedings according to A.R.S. §§ 32-3281 and 3282 and Title 41, Chapter 6, Article 10.

C. As provided under A.R.S. § 32-3282(B), a licensee who is the subject of a complaint, or the licensee's designated representative, may review the complaint investigative file at the Board office at least five business days before the meeting at which the Board is scheduled to consider the complaint. The Board may redact confidential information before making the investigative file available to the licensee.

D. If the Board determines that disciplinary action is appropriate, the Board shall consider factors including, but not limited to, the following when determining the appropriate discipline:

1. Prior disciplinary offenses;
2. Dishonest or self-serving motive;
3. Pattern of misconduct; multiple offenses;
4. Bad faith obstruction of the disciplinary proceeding by intentionally failing to comply with rules or orders of the Board;
5. Submission of false evidence, false statements, or other deceptive practices during the investigative or disciplinary process;
6. Refusal to acknowledge wrongful nature of conduct; and
7. Vulnerability of the victim.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-1002. Review or Rehearing of a Board Decision

A. The Board shall provide for a rehearing or review of its decisions under A.R.S. Title 41, Chapter 6, Article 10 and

the rules established by the Office of Administrative Hearings.

B. Except as provided in subsection (I), a party is required to file a motion for rehearing or review of a Board decision to exhaust the party's administrative remedies. A party that has exhausted the party's administrative remedies may apply for judicial review of the final order issued by the Board in accordance with A.R.S. § 12-901 et seq.

C. When a motion for rehearing or review is based on affidavits, the affidavits shall be served with the motion. An opposing party may, within 15 days after service, serve opposing affidavits.

D. A party may amend a motion for rehearing or review at any time before the Board rules on the motion.

E. An aggrieved party may seek a review or rehearing of a Board decision by submitting a written request for a review or rehearing to the Board within 30 days after service of the decision. The request shall specify the grounds for a review or rehearing. The Board shall grant a request for a review or rehearing for any of the following reasons materially affecting the rights of an aggrieved party:

1. Irregularity in the administrative proceedings or any abuse of discretion that deprived the aggrieved party of a fair hearing;
2. Misconduct of the Board, its staff, an administrative law judge, or any party;
3. Accident or surprise that could not have been prevented by ordinary prudence;
4. Newly discovered material evidence that could not with reasonable diligence have been discovered and produced at the hearing;
5. Excessive penalties;
6. Decision, findings of fact, or conclusions not justified by the evidence or contrary to law; or
7. Errors regarding the admission or rejection of evidence or errors of law that occurred at the hearing or during the progress of the proceedings.

F. The Board may affirm or modify the decision or grant a rehearing to any party on all or part of the issues for any of the reasons listed in subsection (E). An order modifying a decision or granting a rehearing shall specify with particularity the grounds for the order. The rehearing, if granted, shall be limited to the matters specified by the Board.

G. No later than 30 days after a decision is rendered, the Board may order a rehearing or review on its own initiative, for any reason it might have granted relief on motion of a party.

H. If the Board grants a request for rehearing, the Board shall hold the rehearing within 60 days after the date on the order granting the rehearing.

I. If the Board makes a specific finding that a particular decision needs to be effective immediately to preserve the public health, safety, or welfare, and that a rehearing or review of the decision is impracticable, unnecessary, or contrary to the public interest, the Board may issue the decision as a final order without an opportunity for a rehearing or review.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

ARTICLE 11. STANDARDS OF PRACTICE

R4-6-1101. Consent for Treatment

A licensee shall:

1. Provide treatment to a client only in the context of a professional relationship based on informed consent for treatment;
2. Document in writing for each client the following elements of informed consent for treatment:
   a. Purpose of treatment;
   b. General procedures to be used in treatment, including benefits, limitations, and potential risks;
   c. The client's right to have the client's records and all information regarding the client kept confidential and an explanation of the limitations on confidentiality;
   d. Notification of the licensee's supervision or involvement with a treatment team of professionals;
   e. Methods for the client to obtain information about the client's records;
   f. The client's right to participate in treatment decisions and in the development and periodic review and revision of the client's treatment plan;
   g. The client's right to refuse any recommended treatment or to withdraw consent to treatment and to be advised of the consequences of refusal or withdrawal; and
   h. The client's right to be informed of all fees that the client is required to pay and the licensee's refund and collection policies and procedures; and
3. Obtain a dated and signed informed consent for treatment from a client or the client's legal representative

before providing treatment to the client and when a change occurs in an element listed in subsection (2) that might affect the client's consent for treatment;
4. Obtain a dated and signed informed consent for treatment from a client or the client's legal representative before audio or video taping the client or permitting a third party to observe treatment provided to the client; and
5. Include a dated signature from an authorized representative of the behavioral health entity.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final rulemaking at 24 A.A.R. 3369, effective January 12, 2019 (Supp. 18-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

R4-6-1102. Treatment Plan

A licensee shall:

1. Work jointly with each client or the client's legal representative to prepare an integrated, individualized, written treatment plan, based on the licensee's provisional or principal diagnosis and assessment of behavior and the treatment needs, abilities, resources, and circumstances of the client that includes:
   a. One or more treatment goals;
   b. One or more treatment methods;
   c. The date when the client's treatment plan will be reviewed;
   d. If a discharge date has been determined, the aftercare needed;
   e. The dated signature of the client or the client's legal representative; and
   f. The dated signature of the licensee;
2. Review and reassess the treatment plan:
   a. According to the review date specified in the treatment plan as required under subsection (1)(c); and
   b. At least annually with the client or the client's legal representative to ensure the continued viability and effectiveness of the treatment plan and, where appropriate, add a description of the services the client may need after terminating treatment with the licensee;
3. Ensure that all treatment plan revisions include the dated signature of the client or the client's legal representative and the licensee;
4. Upon written request, provide a client or the client's legal representative an explanation of all aspects of the client's condition and treatment; and
5. Ensure that a client's treatment is in accordance with the client's treatment plan.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-1103. Client Record

A. A licensee shall ensure that a client record is maintained for each client and:
1. Is protected at all times from loss, damage, or alteration;
2. Is confidential;
3. Is legible and recorded in ink or electronically recorded;
4. Contains entries that are dated and include the printed name and signature or electronic signature of the individual making the entry;
5. Is current and accurate;
6. Contains original documents and original signature, initials, or authentication; and
7. Is disposed of in a manner that protects client confidentiality.

B. A licensee shall ensure that a client record contains the following, if applicable:
1. The client's name, address, and telephone number;
2. Information or records provided by or obtained from another person regarding the client;
3. Written authorization to release the client's record or information;
4. Progress notes;
5. Informed consent to treatment;
6. Contemporaneous documentation of:
   a. Treatment plan and all revisions to the treatment plan;
   b. Requests for client records and resolution of the requests;
   c. Release of any information in the client record;

d. Contact with the client or another individual that relates to the clients health, safety, welfare, or treatment; and
e. Behavioral health services provided to the client;
7. Other information or documentation required by state or federal law.
8. Financial records, including:
a. Records of financial arrangements for the cost of providing behavioral health services;
b. Measures that will be taken for nonpayment of the cost of behavioral health services provided by the licensee.

C. A licensee shall make client records in the licensee's possession promptly available to another health professional and the client or the client's legal representative in accordance with A.R.S. § 12-2293.

D. A licensee shall make client records of a minor client in the licensee's possession promptly available to the minor client's parent in accordance with A.R.S. § 25-403.06.

E. A licensee shall retain records in accordance with A.R.S. § 12-2297.

F. A licensee shall ensure the safety and confidentiality of any client records the licensee creates, maintains, transfers, or destroys whether the records are written, taped, computerized, or stored in any other medium.

G. A licensee shall ensure that a client's privacy and the confidentiality of information provided by the client is maintained by subordinates, including employees, supervisees, clerical assistants, and volunteers.

H. A licensee shall ensure that each progress note includes the following:
1. The date a behavioral health service was provided;
2. The time spent providing the behavioral health service;
3. If counseling services were provided, whether the counseling was individual, couples, family, or group; and
4. The dated signature of the licensee who provided the behavioral health service.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-1104. Financial and Billing Records

A licensee shall:
1. Make financial arrangements with a client or the client's legal representative, third-party payer, or supervisee that are reasonably understandable and conform to accepted billing practices;
2. Before entering a therapeutic relationship, clearly explain to a client or the client's legal representative, all financial arrangements related to professional services, including the use of collection agencies or legal measures for nonpayment;
3. Truthfully represent financial and billing facts to a client or the client's legal representative, third-party payer, or supervisee regarding services rendered; and
4. Maintain billing records, separate from clinical documentation, which correspond with the client record.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-1105. Confidentiality

A. A licensee shall release or disclose client records or any information regarding a client only:
1. In accordance with applicable federal or state law that authorizes release or disclosure; or
2. With written authorization from the client or the client's legal representative.

B. A licensee shall ensure that written authorization for release of client records or any information regarding a client is obtained before a client record or any information regarding a client is released or disclosed unless otherwise allowed by state or federal law.

C. Written authorization includes:
1. The name of the person disclosing the client record or information;
2. The purpose of the disclosure;
3. The individual, agency, or entity requesting or receiving the record or information;
4. A description of the client record or information to be released or disclosed;
5. A statement indicating authorization and understanding that authorization may be revoked at any time;
6. The date or circumstance when the authorization expires, not to exceed 12 months;
7. The date the authorization was signed; and
8. The dated signature of the client or the client's legal representative.

D. A licensee shall ensure that any written authorization to release a client record or any information regarding a client is maintained in the client record.

E. If a licensee provides behavioral health services to multiple members of a family, each legally competent, participating family member shall independently provide written authorization to release client records regarding the family member. Without authorization from a family member, the licensee shall not disclose the family member's client record or any information obtained from the family member.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 2700, effective July 1, 2004 (Supp. 04-2). Amended by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4).

R4-6-1106. Telepractice

A. Except as otherwise provided by statute, an individual who provides counseling, social work, marriage and family therapy, or substance abuse counseling via telepractice to a client located in Arizona shall be licensed by the Board.

B. Except as otherwise provided by statute, a licensee who provides counseling, social work, marriage and family therapy, or substance abuse counseling via telepractice to a client located outside Arizona shall comply with not only A.R.S. Title 32, Chapter 33, and this Chapter but also the laws and rules of the jurisdiction in which the client is located.

C. An individual who provides counseling, social work, marriage and family therapy, or substance abuse counseling via telepractice shall:

1. In addition to complying with the requirements in R4-6-1101, document the limitations and risks associated with telepractice, including but not limited to the following;
    a. Inherent confidentiality risks of electronic communication,
    b. Potential for technology failure,
    c. Emergency procedures when the licensee is unavailable, and
    d. Manner of identifying the client when using electronic communication that does not involve video;
2. In addition to complying with the requirements in R4-6-1103, include the following in the progress note required under R4-6-1103(H):
    a. Mode of session, whether interactive audio, video, or electronic communication; and
    b. Verification of the client's:
        i. Physical location during the session; and
        ii. Local emergency contacts.

Historical Note

New Section made by final exempt rulemaking pursuant to Laws 2015, Chapter 154, § 10, at 21 A.A.R. 2630, effective November 1, 2015 (Supp. 15-4). Amended by final rulemaking at 26 A.A.R. 2881, effective January 3, 2021 (Supp. 20-4).

Title 32, Chapter 33, as of October 9, 2024

32-3251. Definitions

In this chapter, unless the context otherwise requires:

1. "Board" means the board of behavioral health examiners.

2. "Client" means a patient who receives behavioral health services from a person licensed pursuant to this chapter.

3. "Direct client contact" means the performance of therapeutic or clinical functions related to the applicant's professional practice level of psychotherapy that includes diagnosis, assessment and treatment and that may include psychoeducation for mental, emotional and behavioral disorders based primarily on verbal or nonverbal communications and intervention with, and in the presence of, one or more clients, including through the use of telehealth pursuant to title 36, chapter 36, article 1.

4. "Equivalent" means comparable in content and quality but not identical.

5. "Indirect client service":

(a) Means training for, and the performance of, functions of an applicant's professional practice level in preparation for or on behalf of a client for whom direct client contact functions are also performed, including case consultation and receipt of clinical supervision.

(b) Does not include the provision of psychoeducation.

6. "Letter of concern" means a nondisciplinary written document sent by the board to notify a licensee that, while there is insufficient evidence to support disciplinary action, the board believes that continuation of the activities that led to the investigation may result in further board action against the licensee.

7. "Licensee" means a person who is licensed pursuant to this chapter.

8. "Practice of addiction counseling":

(a) Means the professional application of general counseling theories, principles and techniques as specifically adapted, based on research and clinical experience, to the specialized needs and characteristics of persons who are experiencing an addiction that is a persistent, compulsive dependence on a behavior or substance, including mood-altering behaviors or activities known as process addictions, and related problems and to the families of those persons.

(b) Includes the following:

(i) Assessment, appraisal and diagnosis.

(ii) The use of psychotherapy for the purpose of evaluation, diagnosis and treatment of individuals, couples, families and groups.

9. "Practice of behavioral health" means the practice of marriage and family therapy, practice of professional counseling, practice of social work and practice of addiction counseling pursuant to this chapter.

10. "Practice of marriage and family therapy" means the professional application of family systems theories, principles and techniques to treat interpersonal relationship issues and nervous, mental and emotional disorders that are cognitive, affective or behavioral. The practice of marriage and family therapy includes:

(a) Assessment, appraisal and diagnosis.

(b) The use of psychotherapy for the purpose of evaluation, diagnosis and treatment of individuals, couples, families and groups.

11. "Practice of professional counseling" means the professional application of mental health, psychological and human development theories, principles and techniques to:

(a) Facilitate human development and adjustment throughout the human life span.

(b) Assess and facilitate career development.

(c) Treat interpersonal relationship issues and nervous, mental and emotional disorders that are cognitive, affective or behavioral.

(d) Manage symptoms of mental illness.

(e) Assess, appraise, evaluate, diagnose and treat individuals, couples, families and groups through the use of psychotherapy.

12. "Practice of social work" means the professional application of social work theories, principles, methods and techniques to:

(a) Treat mental, behavioral and emotional disorders.

(b) Assist individuals, families, groups and communities to enhance or restore the ability to function physically, socially, emotionally, mentally and economically.

(c) Assess, appraise, diagnose, evaluate and treat individuals, couples, families and groups through the use of psychotherapy.

13. "Psychoeducation" means the education of a client as part of a treatment process that provides the client with information regarding mental health, emotional disorders or behavioral health.

14. "Psychotherapy" means a variety of treatment methods developing out of generally accepted theories about human behavior and development.

15. "Telehealth" has the same meaning prescribed in section 36-3601.

16. "Unprofessional conduct" includes the following, whether occurring in this state or elsewhere:

(a) Being convicted of a felony. Conviction by a court of competent jurisdiction or a plea of no contest is conclusive evidence of the conviction.

(b) Using fraud or deceit in connection with rendering services as a licensee or in establishing qualifications pursuant to this chapter.

(c) Making any oral or written misrepresentation of a fact:

(i) To secure or attempt to secure the issuance or renewal of a license.

(ii) In any statements provided during an investigation or disciplinary proceeding by the board.

(iii) Regarding the licensee's skills or the value of any treatment provided or to be provided.

(d) Making any false, fraudulent or deceptive statement connected with the practice of behavioral health, including false or misleading advertising by the licensee or the licensee's staff or a representative compensated by the licensee.

(e) Securing or attempting to secure the issuance or renewal of a license by knowingly taking advantage of the mistake of another person or the board.

(f) Engaging in active habitual intemperance in the use of alcohol or active habitual substance abuse.

(g) Using a controlled substance that is not prescribed for use during a prescribed course of treatment.

(h) Obtaining a fee by fraud, deceit or misrepresentation.

(i) Aiding or abetting a person who is not licensed pursuant to this chapter to purport to be a licensed behavioral health professional in this state.

(j) Engaging in conduct that the board determines is gross negligence or repeated negligence in the licensee's profession.

(k) Engaging in any conduct or practice that is contrary to recognized standards of ethics in the behavioral health profession or that constitutes a danger to the health, welfare or safety of a client.

(l) Engaging in any conduct, practice or condition that impairs the ability of the licensee to safely and competently practice the licensee's profession.

(m) Engaging or offering to engage as a licensee in activities that are not congruent with the licensee's professional education, training or experience.

(n) Failing to comply with or violating, attempting to violate or assisting in or abetting the violation of any provision of this chapter, any rule adopted pursuant to this chapter, any lawful order of the board, or any formal order, consent agreement, term of probation or stipulated agreement issued under this chapter.

(o) Failing to furnish information within a specified time to the board or its investigators or representatives if legally requested by the board.

(p) Failing to conform to minimum practice standards as developed by the board.

(q) Failing or refusing to maintain adequate records of behavioral health services provided to a client.

(r) Providing behavioral health services that are clinically unjustified or unsafe or otherwise engaging in activities as a licensee that are unprofessional by current standards of practice.

(s) Terminating behavioral health services to a client without making an appropriate referral for continuation of care for the client if continuing behavioral health services are indicated.

(t) Disclosing a professional confidence or privileged communication except as may otherwise be required by law or allowed by a legally valid written release.

(u) Failing to allow the board or its investigators on demand to examine and have access to documents, reports and records in any format maintained by the licensee that relate to the licensee's practice of behavioral health.

(v) Engaging in any sexual conduct between a licensee and a client or former client.

(w) Providing behavioral health services to any person with whom the licensee has had sexual contact.

(x) Exploiting a client, former client or supervisee. For the purposes of this subdivision, "exploiting" means taking advantage of a professional relationship with a client, former client or supervisee for the benefit or profit of the licensee.

(y) Engaging in a dual relationship with a client that could impair the licensee's objectivity or professional judgment or create a risk of harm to the client. For the purposes of this subdivision, "dual relationship" means a licensee simultaneously engages in both a professional and nonprofessional relationship with a client that is avoidable and not incidental.

(z) Engaging in physical contact between a licensee and a client if there is a reasonable possibility of physical or psychological harm to the client as a result of that contact.

(aa) Sexually harassing a client, former client, research subject, supervisee or coworker. For the purposes of this subdivision, "sexually harassing" includes sexual advances, sexual solicitation, requests for sexual favors, unwelcome comments or gestures or any other verbal or physical conduct of a sexual nature.

(bb) Harassing, exploiting or retaliating against a client, former client, research subject, supervisee, coworker or witness or a complainant in a disciplinary investigation or proceeding involving a licensee.

(cc) Failing to take reasonable steps to inform potential victims and appropriate authorities if the licensee becomes aware during the course of providing or supervising behavioral health services that a client's condition indicates a clear and imminent danger to the client or others.

(dd) Failing to comply with the laws of the appropriate licensing or credentialing authority to provide behavioral health services by electronic means in all governmental jurisdictions where the client receiving these services resides.

(ee) Giving or receiving a payment, kickback, rebate, bonus or other remuneration for a referral.

(ff) Failing to report in writing to the board information that would cause a reasonable licensee to believe that another licensee is guilty of unprofessional conduct or is physically or mentally unable to provide behavioral health services competently or safely. This duty does not extend to information provided by a licensee that is protected by the behavioral health professional-client privilege unless the information indicates a clear and imminent danger to the client or others or is otherwise subject to mandatory reporting requirements pursuant to state or federal law.

(gg) Failing to follow federal and state laws regarding the storage, use and release of confidential information regarding a client's personal identifiable information or care.

(hh) Failing to retain records pursuant to section 12-2297.

(ii) Violating any federal or state law, rule or regulation applicable to the practice of behavioral health.

(jj) Failing to make client records in the licensee's possession available in a timely manner to another health professional or licensee on receipt of proper authorization to do so from the client, a minor client's parent, the client's legal guardian or the client's authorized representative.

(kk) Failing to make client records in the licensee's possession promptly available to the client, a minor client's parent, the client's legal guardian or the client's authorized representative on receipt of proper authorization to do so from the client, the minor client's parent, the client's legal guardian or the client's authorized representative.

(ll) Being the subject of the revocation, suspension, surrender or any other disciplinary sanction of a professional license, certificate or registration or other adverse action related to a professional license, certificate or registration in another jurisdiction or country, including the failure to report the adverse action to the board. The action taken may include refusing, denying, revoking or suspending a license or certificate, the surrendering of a license or certificate, otherwise limiting, restricting or monitoring a licensee or certificate holder or placing a licensee or certificate holder on probation.

(mm) Engaging in any conduct that results in a sanction imposed by an agency of the federal government that involves restricting, suspending, limiting or removing the licensee's ability to obtain financial remuneration for behavioral health services.

(nn) Violating the security of any licensure examination materials.

(oo) Using fraud or deceit in connection with taking or assisting another person in taking a licensure examination.

32-3252. Board of behavioral health examiners; appointment; qualifications; terms; compensation; immunity; training program

A. The board of behavioral health examiners is established consisting of the following members appointed by the governor:

1. The following professional members:

(a) Two members who are licensed in social work pursuant to this chapter, at least one of whom is a licensed clinical social worker.

(b) Two members who are licensed in counseling pursuant to this chapter, at least one of whom is a licensed professional counselor.

(c) Two members who are licensed in marriage and family therapy pursuant to this chapter, at least one of whom is a licensed marriage and family therapist.

(d) Two members who are licensed in addiction counseling pursuant to this chapter, at least one of whom is a licensed independent addiction counselor.

2. Four public members.

B. Before appointment by the governor, a prospective member of the board shall submit a full set of fingerprints to the governor for the purpose of obtaining a state and federal criminal records check pursuant to section 41-1750 and Public Law 92-544. The department of public safety may exchange this fingerprint data with the federal bureau of investigation.

C. Each professional board member shall:

1. Be a resident of this state for at least one year before appointment.

2. Be an active licensee in good standing.

3. Have at least five years of experience in an area of behavioral health licensed pursuant to this chapter.

D. Each public board member shall:

1. Be a resident of this state for at least one year before appointment.

2. Be at least twenty-one years of age.

3. Not be licensed or eligible for licensure pursuant to this chapter unless the public member has been retired from active practice for at least five years.

4. Not currently have a substantial financial interest in an entity that directly provides behavioral health services.

5. Not have a household member who is licensed or eligible for licensure pursuant to this chapter unless the household member has been retired from active practice for at least five years.

E. The term of office of board members is three years to begin and end on the third Monday in January. A member shall not serve more than two full consecutive terms.

F. The board shall annually elect a chairman and secretary-treasurer from its membership.

G. Board members are eligible to receive compensation of not more than $85 for each day actually and necessarily spent in the performance of their duties.

H. Board members and personnel are personally immune from suit with respect to all acts done and actions taken in good faith and in furtherance of the purposes of this chapter.

I. Each board member must complete a twelve-hour training program that emphasizes responsibilities for administrative management, licensure, judicial processes and temperament within one year after appointment to the board.

32-3253. Powers and duties

A. The board shall:

1. Adopt rules consistent with and necessary or proper to carry out the purposes of this chapter.

2. Administer and enforce this chapter, rules adopted pursuant to this chapter and orders of the board.

3. Issue a license by examination, endorsement or temporary recognition to, and renew the license of, each person who is qualified to be licensed pursuant to this chapter. The board must issue or deny a license within one hundred eighty days after the applicant submits a completed application.

4. Establish fees by rule, except that the board is exempt from the rulemaking requirements of title 41, chapter 6 for the purposes of reducing or eliminating fees.

5. Collect fees and spend monies.

6. Keep a record of all persons who are licensed pursuant to this chapter, actions taken on all applications for licensure, actions involving renewal, suspension, revocation or denial of a license or probation of licensees and the receipt and disbursal of monies.

7. Adopt an official seal for attestation of licensure and other official papers and documents.

8. Conduct investigations and determine on its own motion whether a licensee or an applicant has engaged in unprofessional conduct, is incompetent or is mentally or physically unable to engage in the practice of behavioral health.

9. Conduct disciplinary actions pursuant to this chapter and board rules.

10. Establish and enforce standards or criteria of programs or other mechanisms to ensure the continuing competence of licensees.

11. Establish and enforce compliance with professional standards and rules of conduct for licensees.

12. Engage in a full exchange of information with the licensing and disciplinary boards and professional associations for behavioral health professionals in this state and other jurisdictions.

13. Subject to section 35-149, accept, expend and account for gifts, grants, devises and other contributions, money or property from any public or private source, including the federal government. Monies received under this paragraph shall be deposited, pursuant to sections 35-146 and 35-147, in special funds for the purpose specified, which are exempt from the provisions of section 35-190 relating to lapsing of appropriations.

14. Adopt rules regarding the application for and approval of educational curricula of regionally accredited colleges or universities with a program not otherwise accredited by an organization or entity recognized by the board that are consistent with the requirements of this chapter and maintain a list of those programs. Approvals are valid for a period of five years if no changes of curricula are made that are inconsistent with the requirements of this chapter or board rule.

15. Maintain a registry of licensees who have met the educational requirements to provide supervision as required pursuant to this chapter to applicants in the same profession.

16. Adopt rules to allow approval of persons who wish to provide supervision pursuant to this chapter and who are not licensed by the board and who are licensed in a profession other than the profession in which the applicant is seeking licensure.

17. Recognize not more than four hundred hours of psychoeducation for work experience required pursuant to sections 32-3293, 32-3301, 32-3311 and 32-3321.

18. Adopt rules regarding the use of telepractice.

19. If an applicant is required to pass an examination for licensure, allow the applicant to take the examination three times during a twelve-month period.

B. The board may join professional organizations and associations organized exclusively to promote the improvement of the standards of the practice of behavioral health, protect the health and welfare of the public or assist and facilitate the work of the board.

C. The board may enter into stipulated agreements with a licensee for the confidential treatment, rehabilitation and monitoring of chemical dependency or psychiatric, psychological or behavioral health disorders in a program provided pursuant to subsection D of this section. A licensee who materially fails to comply with a program shall be terminated from the confidential program. Any records of the licensee who is terminated from a confidential program are no longer confidential or exempt from the public records law, notwithstanding any law to the contrary. Stipulated agreements are not public records if the following conditions are met:

1. The licensee voluntarily agrees to participate in the confidential program.

2. The licensee complies with all treatment requirements or recommendations, including participation in approved programs.

3. The licensee refrains from professional practice until the return to practice has been approved by the treatment program and the board.

4. The licensee complies with all monitoring requirements of the stipulated agreement, including random bodily fluid testing.

5. The licensee's professional employer is notified of the licensee's chemical dependency or medical, psychiatric, psychological or behavioral health disorders and participation in the confidential program and is provided a copy of the stipulated agreement.

D. The board shall establish a confidential program for the monitoring of licensees who are chemically dependent or who have psychiatric, psychological or behavioral health disorders that may impact their ability to safely practice and who enroll in a rehabilitation program that meets the criteria prescribed by the board. The licensee is responsible for the costs associated with rehabilitative services and monitoring. The board may take further action if a licensee refuses to enter into a stipulated agreement or fails to comply with the terms of a stipulated agreement. In order to protect the public health and safety, the confidentiality requirements of this subsection do not apply if a licensee does not comply with the stipulated agreement.

E. The board shall audio record all meetings and maintain all audio and video recordings or stenographic records of interviews and meetings for a period of three years from when the record was created.

32-3254. Board of behavioral health examiners fund

(L24, Ch. 222, sec. 41. Eff. until 7/1/28)

A. The board of behavioral health examiners fund is established. Pursuant to sections 35-146 and 35-147, the board shall deposit fifteen percent of all monies received by the board in the state general fund and deposit the remaining eighty-five percent in the board of behavioral health examiners fund.

B. All monies deposited in the board of behavioral health examiners fund are subject to section 35-143.01.

32-3255. Executive director; compensation; duties

A. On or after January 31, 2014 and subject to title 41, chapter 4, article 4, the board shall appoint an executive director who shall serve at the pleasure of the board. The executive director is eligible to receive compensation set by the board within the range determined under section 38-611.

B. The executive director shall:

1. Perform the administrative duties of the board.

2. Subject to title 41, chapter 4, article 4, employ personnel as the executive director deems necessary, including professional consultants and agents necessary to conduct investigations. An investigator must complete a nationally recognized investigator training program within one year after the date of hire. Until the investigator completes this training program, the investigator must work under the supervision of an investigator who has completed a training program.

32-3256. Executive director; complaints; dismissal; review

A. If delegated by the board, the executive director may dismiss a complaint if the investigative staff's review indicates that the complaint is without merit and that dismissal is appropriate.

B. At each regularly scheduled board meeting, the executive director shall provide to the board a list of each complaint the executive director dismissed pursuant to subsection A of this section since the last board meeting.

C. A person who is aggrieved by an action taken by the executive director pursuant to subsection A of this section may file a written request that the board review that action. The request must be filed within thirty-five days after that person is provided written notification of the executive director's action. At the next regular board meeting, the board shall review the executive director's action and, on review, shall approve, modify or reject the executive director's action.

32-3257. Written notifications and communications; methods of transmission

For the purposes of this chapter, notifications or communications required to be written or in writing may be transmitted or received by mail, electronic transmission, facsimile transmission or hand delivery and shall not be transmitted or received orally.

32-3261. Academic review committees; members; appointment; qualifications; terms; compensation; immunity; training

A. The board shall establish an academic review committee for each professional area licensed pursuant to this chapter to do the following:

1. Review applications referred to the committee by the board or the executive director to determine whether an applicant, whose curriculum has not been approved pursuant to section 32-3253, subsection A, paragraph 14 or whose program is not accredited by an organization or entity approved by the board, has met the educational requirements of this chapter or board rules.

2. On referral by the executive director, make recommendations to the board regarding whether an applicant has met the requirements of supervised work experience required for licensure pursuant to this chapter or board rules.

3. Make specific findings concerning an application's deficiencies.

4. Review applications and make recommendations to the board for curriculum approval applications made pursuant to section 32-3253, subsection A, paragraph 14.

5. At the request of the board, make recommendations regarding examinations required pursuant to this chapter.

6. Review applications for and make determinations regarding exemptions related to clinical supervision requirements.

B. If an application is referred to an academic review committee for review and the academic review committee finds that additional information is needed from the applicant, the academic review committee shall provide a comprehensive written request for additional information to the applicant.

C. An academic review committee shall be composed of three members who have been residents of this state for at least one year before appointment, at least one of whom is licensed in the professional area

pursuant to this chapter and have five years of experience in the applicable profession. At least one member must have served within the previous ten years as core or full-time faculty at a regionally accredited college or university in a program related to the applicable profession and have experience in the design and development of the curriculum of a related program. If qualified, a faculty member may serve on more than one academic review committee. A board member may not be appointed to serve on an academic review committee.

D. Committee members shall initially be appointed by the board. From and after January 1, 2016, the governor shall appoint the committee members. A committee member who is initially appointed by the board may be reappointed by the governor. A committee member who is initially appointed by the board shall continue to serve until appointed or replaced by the governor.

E. Committee members serve at the pleasure of the governor for terms of three years. A member shall not serve more than two full consecutive terms.

F. Committee members are eligible to receive compensation of not more than eighty-five dollars for each day actually and necessarily spent in the performance of their duties.

G. An academic review committee shall annually elect a chairman and secretary from its membership.

H. Committee members are personally immune from suit with respect to all acts done and actions taken in good faith and in furtherance of the purposes of this chapter.

I. Committee members shall receive at least five hours of training as prescribed by the board within one year after the member is initially appointed and that includes instruction in ethics and open meeting requirements.

32-3271. Exceptions to licensure; jurisdiction

A. This chapter does not apply to:

1. A person who is currently licensed, certified or regulated pursuant to another chapter of this title and who provides services within the person's scope of practice if the person does not claim to be licensed pursuant to this chapter.

2. A person who is not a resident of this state if the person:

(a) Performs behavioral health services in this state for not more than ninety days in any one calendar year as prescribed by board rule.

(b) Is authorized to perform these services pursuant to the laws of the state or country in which the person resides or pursuant to the laws of a federally recognized Indian tribe.

(c) Informs the client of the limited nature of these services and that the person is not licensed in this state.

3. A rabbi, priest, minister or member of the clergy of any religious denomination or sect if the activities and services that person performs are within the scope of the performance of the regular or specialized ministerial duties of an established and legally recognizable church, denomination or sect and the person performing the services remains accountable to the established authority of the church, denomination or sect.

4. A member-run self-help or self-growth group if no member of the group receives direct or indirect financial compensation.

5. A behavioral health technician or behavioral health paraprofessional who is employed by an agency licensed by the department of health services.

6. A person contracting with the supreme court or a person employed by or contracting with an agency under contract with the supreme court who is otherwise ineligible to be licensed or who is in the process

of applying to be licensed under this chapter as long as that person is in compliance with the supreme court contract conditions regarding professional counseling services and practices only under supervision.

7. A person who is employed by the department of economic security or the department of child safety and who practices social work, marriage and family therapy, addiction counseling, counseling and case management within the scope of the person's job duties and under direct supervision by the employer department.

8. A student, intern or trainee who is pursuing a course of study in social work, counseling, marriage and family therapy, addiction counseling or case management in a regionally accredited institution of higher education or training institution if the person's activities are performed under qualified supervision and are part of the person's supervised course of study.

9. A person who is practicing social work, counseling and case management and who is employed by an agency licensed by the department of economic security or the department of child safety.

10. A paraprofessional who is employed by the department of economic security or by an agency licensed by the department of economic security.

11. A Christian Science practitioner if all of the following are true:

(a) The person is not providing psychotherapy.

(b) The activities and services the person performs are within the scope of the performance of the regular or specialized duties of a Christian Science practitioner.

(c) The person remains accountable to the established authority of the practitioner's church.

12. A person who is not providing psychotherapy.

B. A person who provides services pursuant to subsection A, paragraph 2 of this section is deemed to have agreed to the jurisdiction of the board and to be bound by the laws of this state.

32-3272. Fees

A. For issuance of a license pursuant to this chapter, including application fees, the board shall establish and charge reasonable fees not to exceed $500.

B. For renewal of a license pursuant to this chapter, the board shall establish and charge reasonable fees not to exceed $500. The board shall not increase fees pursuant to this subsection more than $25 each year.

C. The board by rule may adopt a fee for applications for approval of educational curricula pursuant to section 32-3253, subsection A, paragraph 14.

D. The board shall establish fees to produce monies that approximate the cost of maintaining the board.

E. The board shall waive the application fee for an independent level license if an applicant has paid the fee for an initial or renewal associate level license in this state and within ninety days after payment of the fee the applicant applies for an independent level license.

F. The board shall waive the renewal fee for an associate level license if the licensee has submitted the renewal application and the licensee's application for independent licensure is pending at the time of renewal.

32-3273. License renewal; continuing education

A. Except as provided in section 32-4301, a license issued pursuant to this chapter is renewable every two years by paying the renewal fee prescribed by the board and submitting documentation prescribed by the board by rule of completion of relevant continuing education experience as determined by the board during the previous twenty-four-month period.

B. The board shall send notice in writing of required relevant continuing education experience to each licensee at least ninety days before the renewal date.

C. A licensee must satisfy the continuing education requirements that are prescribed by the board by rule and that are designed to provide the necessary understanding of ethics, cultural competency, current developments, skills, procedures and treatments related to behavioral health and to ensure the continuing competence of licensees. The board shall adopt rules to prescribe the manner of documenting compliance with this subsection.

D. At the request of a licensee who has been issued two or more licenses, the board shall establish the same renewal dates for those licenses. The board may prorate any fees due as necessary to synchronize the dates.

32-3274. Licensure by endorsement

A. The board may issue a license by endorsement to a person in that person's behavioral health discipline if the person is licensed or certified by the regulatory agency of one or more other states or federal jurisdictions at a substantially equivalent or higher practice level as determined by the board, pays the fee prescribed by the board and meets all of the following requirements:

1. Is currently licensed or certified in behavioral health by the regulatory agency of one or more other states or federal jurisdictions and each license or certification is current and in good standing.

2. Has been licensed or certified for at least one year in one or more other states or federal jurisdictions in the discipline and practice level for which an application is submitted. The practice level of the jurisdictions must be substantially equivalent, as determined by the board, to the practice level for which the application is submitted.

3. Meets the basic requirements for licensure prescribed by section 32-3275.

4. Submits to the board all of the following:

(a) A listing of every jurisdiction in the United States in which the person has been licensed or certified in the practice of behavioral health and any disciplinary action taken by any regulatory agency or any instance in which a license has been surrendered in lieu of discipline.

(b) Verification of licensure or certification from every jurisdiction in which the person is licensed or certified for the discipline and practice level for which the person applies.

(c) Any other procedural application requirements adopted by the board in rule.

B. In addition to the requirements of subsection A of this section, a person seeking license by endorsement for the following practice levels must have earned a master's or higher degree in the applicable field of practice granted by a regionally accredited college or university:

1. Licensed clinical social worker.

2. Licensed professional counselor.

3. Licensed marriage and family therapist.

4. Licensed independent addiction counselor.

C. Except for licenses by endorsement issued in the practice levels prescribed in subsection B of this section, a person who is issued a license pursuant to this section shall practice behavioral health only under the direct supervision of a licensee.

D. The board by rule may prescribe a procedure to issue licenses pursuant to this section.

32-3275. Requirements for licensure; withdrawal of application

A. An applicant for licensure must meet all of the following requirements:

1. Submit an application as prescribed by the board.

2. Be at least twenty-one years of age.

3. Pay all applicable fees prescribed by the board.

4. Have the physical and mental capability to safely and competently engage in the practice of behavioral health.

5. Not have committed any act or engaged in any conduct that would constitute grounds for disciplinary action against a licensee pursuant to this chapter.

6. Not have had a professional license or certificate refused, revoked, suspended or restricted by this state or any other regulatory jurisdiction in the United States or any other country for reasons that relate to unprofessional conduct.

7. Not have voluntarily surrendered a professional license or certificate in this state or another regulatory jurisdiction in the United States or any other country while under investigation for conduct that relates to unprofessional conduct.

8. Not have a complaint, allegation or investigation pending before the board or another regulatory jurisdiction in the United States or another country that relates to unprofessional conduct. If an applicant has any such complaint, allegation or investigation pending, the board shall suspend the application process and may not issue or deny a license to the applicant until the complaint, allegation or investigation is resolved.

B. Before the board considers denial of a license based on a deficiency pursuant to subsection A, paragraph 4, 5, 6 or 7 of this section, the applicant shall be given thirty-five days' notice of the time and place of a meeting at which the applicant may provide in person, by counsel or in written form information and evidence related to any deficiency relating to subsection A, paragraph 4, 5, 6 or 7 of this section, including any evidence that the deficiency has been corrected or monitored or that a mitigating circumstance exists. In any notice of denial, the board shall provide notice of the applicant's right to a hearing pursuant to title 41, chapter 6, article 10.

C. If the board finds that an applicant is subject to subsection A, paragraphs 4, 5, 6 or 7 of this section, the board may determine to its satisfaction that the conduct or condition has been corrected, monitored and resolved and may issue a license. If the conduct or condition has not been resolved, the board may determine to its satisfaction that mitigating circumstances exist that prevent its resolution and may issue a license.

D. An applicant for licensure may withdraw the application unless the board has sent to the applicant notification that the board has initiated an investigation concerning professional misconduct. Following that notification, the applicant may request that the board review the applicant's request to withdraw the application. In considering the request the board shall determine whether it is probable that the investigation would result in an adverse action against the applicant.

E. After a final board order of denial has been issued, the board shall report the denial if required by the health care quality improvement act of 1986 (42 United States Code chapter 117). For the purposes of this subsection and except as required by federal law, "final board order" means:

1. For an applicant who seeks a hearing pursuant to title 41, chapter 6, article 10, when a final administrative decision has been made.

2. For an applicant who does not timely file a notice of appeal, after the time for the filing expires pursuant to section 41-1092.03.

32-3276. Notice of address and telephone number changes; penalties

A. A licensee must provide the board with the licensee's current home address and telephone number and office address and telephone number and promptly and in writing inform the board of any change in this information.

B. The board may assess the costs it incurs in locating a licensee and impose a penalty of not to exceed one hundred dollars against a licensee who does not notify the board pursuant to subsection A of this section within thirty days after the change of address or telephone number.

32-3277. Expired licenses; reinstatement

A. A person who does not renew a license is ineligible to practice pursuant to this chapter.

B. The board may reinstate an expired license if the person submits an application for reinstatement within ninety days after the expiration of the license. The application must document to the board's satisfaction that the applicant has met the renewal requirements prescribed by this chapter and include a late renewal penalty prescribed by the board by rule.

32-3278. Inactive license

A. The board by rule may establish procedures for a licensee to delay renewal of the license for good cause and to place the licensee on inactive status. A person on inactive status shall not practice behavioral health or claim to be a licensee.

B. A licensee on inactive status may request reinstatement of the license to active status by submitting a license renewal application.

32-3279. Probationary and temporary licenses

A. If an applicant does not meet the basic requirements for licensure prescribed in section 32-3275, the board may issue a probationary license that is subject to any of the following:

1. A requirement that the licensee's practice be supervised.

2. A restriction on the licensee's practice.

3. A requirement that the licensee begin or continue medical or psychiatric treatment.

4. A requirement that the licensee participate in a specified rehabilitation program.

5. A requirement that the licensee abstain from alcohol and other drugs.

B. If the board offers a probationary license, the board shall notify the applicant in writing of the:

1. Applicant's specific deficiencies.

2. Probationary period.

3. Applicant's right to reject the terms of probation.

4. Applicant's right to a hearing on the board's denial of the application.

C. The board by rule may prescribe a procedure to issue temporary licenses. At a minimum, these rules must include the following provisions:

1. A person issued a temporary license may practice behavioral health only under the direct supervision of a licensee.

2. A temporary license expires on the date specified by the board and not more than one year after the date of issuance.

3. A temporary license may contain restrictions as to time, place and supervision that the board deems appropriate.

4. The board may summarily revoke a temporary license without a hearing.

5. The board's denial of a licensure application terminates a temporary license.

32-3280. Fingerprinting

A. An applicant for licensure under this article other than for a temporary license must submit a full set of fingerprints to the board, at the applicant's own expense, for the purpose of obtaining a state and federal criminal records check pursuant to section 41-1750 and Public Law 92-544. The department of public safety may exchange this fingerprint data with the federal bureau of investigation.

B. The board shall waive the records check required in subsection A of this section for an applicant who provides evidence acceptable to the board that the applicant holds a valid fingerprint clearance card issued by the department of public safety.

32-3281. Disciplinary action; investigations; hearings; civil penalty; timely complaints; burden of proof

A. The board, on its own motion or on a complaint, may investigate any evidence that appears to show that a licensee is or may be incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable to safely engage in the practice of behavioral health. A motion by the board to initiate an investigation shall be made at an open and properly noticed board meeting and shall include the basis on which the investigation is being initiated and the name of the board member making the motion. The board's vote on the motion to initiate an investigation shall be recorded. As part of its investigation, the board may hold an investigational meeting pursuant to this chapter. Any person may, and a licensee and any entity licensed by the department of health services shall, report to the board any information that would cause a reasonable licensee to believe that another licensee is guilty of unprofessional conduct or is physically or mentally unable to provide behavioral health services competently or safely. Any person or entity that reports or provides information to the board in good faith is not subject to an action for civil damages. It is an act of unprofessional conduct for any licensee to fail to report as required by this section. The board shall report to the department of health services any entity licensed by the department of health services that fails to report as required by this section. For complaints related to conduct that is inconsistent with professional standards or ethics, scope of practice or standard of care, the board may consult with one or more licensed or retired behavioral health professionals of the same profession as the licensee to review complaints and make recommendations to the board.

B. On determination of reasonable cause, the board shall require, at the licensee's own expense, any combination of mental, physical or psychological examinations, assessments or skills evaluations necessary to determine the licensee's competence or ability to safely engage in the practice of behavioral health and conduct necessary investigations, including investigational interviews between representatives of the board and the licensee, to fully inform the board with respect to any information filed with the board under subsection A of this section. These examinations may include biological fluid testing. The board may require the licensee, at the licensee's expense, to undergo assessment by a rehabilitative, retraining or assessment program approved by the board.

C. If the board finds, based on the information received pursuant to subsection A or B of this section, that the public health, safety or welfare imperatively requires emergency action, and incorporates a finding to that effect in its order, the board may restrict, limit or order a summary suspension of a license pending proceedings for revocation or other action. If the board takes action pursuant to this subsection, it must also serve the licensee with a written notice that states the charges and that the licensee is entitled to a formal hearing before the board or an administrative law judge within sixty days.

D. If after completing an investigation the board finds that the information provided is not of sufficient seriousness to merit disciplinary action against the licensee, the board shall either:

1. Dismiss the complaint if, in the opinion of the board, the complaint is without merit.

2. File a letter of concern and dismiss the complaint. The licensee may file a written response with the board within thirty days after the licensee receives the letter of concern.

3. Issue a nondisciplinary order requiring the licensee to complete a prescribed number of hours of continuing education in an area or areas prescribed by the board to provide the licensee with the necessary understanding of current developments, skills, procedures or treatment.

E. A complaint dismissed by the board pursuant to subsection D, paragraph 1 of this section is not a complaint of unprofessional conduct and shall not be disclosed by the board as a complaint on the licensee's complaint history.

F. If after completing its investigation the board believes that the information is or may be true, the board may enter into a consent agreement with the licensee to limit or restrict the licensee's practice or to rehabilitate the licensee, protect the public and ensure the licensee's ability to safely engage in the practice of behavioral health. A consent agreement may also require the licensee to successfully complete a board approved rehabilitative, retraining or assessment program.

G. If the board finds that the information provided pursuant to subsection A of this section is or may be true, the board may request a formal interview with the licensee. If the licensee refuses the invitation for a formal interview or accepts and the results indicate that grounds may exist for revocation or suspension of the licensee's license for more than twelve months, the board shall issue a formal complaint and order that a hearing be held pursuant to title 41, chapter 6, article 10. If after completing a formal interview the board finds that the protection of the public requires emergency action, the board may order a summary suspension of the licensee's license pending formal revocation proceedings or other action authorized by this section.

H. If after completing the formal interview the board finds the information provided is not of sufficient seriousness to merit suspension for more than twelve months or revocation of the license, the board may take the following actions:

1. Dismiss if, in the opinion of the board, the information is without merit.

2. File a letter of concern and dismiss the complaint. The licensee may file a written response with the board within thirty days after the licensee receives the letter of concern.

3. Issue a decree of censure. A decree of censure is an official action against the licensee's license and may include a requirement for restitution of fees to a client resulting from violations of this chapter or rules adopted pursuant to this chapter.

4. Fix a period and terms of probation best adapted to protect the public health and safety and rehabilitate or educate the licensee concerned. Probation may include temporary suspension not to exceed twelve months, restriction of the licensee's license to practice behavioral health, a requirement for restitution of fees to a client or education or rehabilitation at the licensee's own expense. If a licensee fails to comply with the terms of probation, the board shall serve the licensee with a written notice that states that the licensee is subject to a formal hearing based on the information considered by the board at the formal interview and any other acts or conduct alleged to be in violation of this chapter or rules adopted by the board pursuant to this chapter, including noncompliance with the terms of probation or a consent agreement.

5. Issue a nondisciplinary order requiring the licensee to complete a prescribed number of hours of continuing education in an area or areas prescribed by the board to provide the licensee with the necessary understanding of current developments, skills, procedures or treatment.

I. If the board finds that the information provided in subsection A or G of this section warrants suspension or revocation of a license issued under this chapter, the board shall initiate formal proceedings pursuant to title 41, chapter 6, article 10.

J. In a formal interview pursuant to subsection G of this section or in a hearing pursuant to subsection I of this section, the board in addition to any other action may impose a civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.

K. A letter of concern is a public document.

L. A licensee who after a formal hearing is found by the board to be guilty of unprofessional conduct, to be mentally or physically unable to safely engage in the practice of behavioral health or to be professionally incompetent is subject to censure, probation as provided in this section, suspension of license or revocation of license or any combination of these, including a stay of action, and for a period of time or permanently and under conditions as the board deems appropriate for the protection of the public health and safety and just in the circumstance. The board may charge all costs incurred in the course of the investigation and formal hearing to the licensee it finds is in violation of this chapter. The board shall deposit, pursuant to sections 35-146 and 35-147, monies collected pursuant to this subsection in the board of behavioral health examiners fund established by section 32-3254.

M. If the board during the course of any investigation determines that a criminal violation may have occurred involving the delivery of behavioral health services, the board shall make the evidence of violations available to the appropriate criminal justice agency for its consideration.

N. The board shall deposit, pursuant to sections 35-146 and 35-147, all monies collected from civil penalties paid pursuant to this chapter in the state general fund.

O. Notice of a complaint and hearing is effective by a true copy of the notice being sent by certified mail to the licensee's last known address of record in the board's files. Notice of the complaint and hearing is complete on the date of its deposit in the mail.

P. In determining the appropriate disciplinary action under this section, the board shall consider all previous nondisciplinary and disciplinary actions against a licensee.

Q. The board may defer action with regard to an impaired licensee who voluntarily signs an agreement, in a form satisfactory to the board, agreeing to practice restrictions and treatment and monitoring programs deemed necessary by the board to protect the public health and safety. A licensee who is impaired and who does not agree to enter into an agreement with the board is subject to other action as provided pursuant to this chapter.

R. Subject to an order duly entered by the board, a person whose license to practice behavioral health has been suspended or restricted pursuant to this chapter, whether voluntarily or by action of the board, may at reasonable intervals apply to the board for reinstatement of the license. The person shall submit the application in writing and in the form prescribed by the board. After conducting an investigation and hearing, the board may grant or deny the application or modify the original finding to reflect any circumstances that have changed sufficiently to warrant modification. The board may require the applicant to pass an examination or complete board imposed continuing education requirements or may impose any other sanctions the board deems appropriate for reentry into the practice of behavioral health.

S. A person whose license is revoked, suspended or not renewed must return the license to the offices of the board within ten days after notice of that action.

T. The board may enforce a civil penalty imposed pursuant to this section in the superior court in Maricopa county.

U. For complaints being brought before the full board, the information released to the public regarding an ongoing investigation must clearly indicate that the investigation is a pending complaint and must include the following statement:

Pending complaints represent unproven allegations. On investigation, many complaints are found to be without merit or not of sufficient seriousness to merit disciplinary action against the licensee and are dismissed.

V. The board shall not act on its own motion or on any complaint received by the board in which an allegation of unprofessional conduct or any other violation of this chapter against a professional who holds an Arizona license occurred more than four years before the complaint is received by the board. The time limitation does not apply to:

1. Malpractice settlements or judgments, allegations of sexual misconduct or an incident or occurrence that involved a felony, diversion of a controlled substance or impairment while practicing by the licensee.

2. The board's consideration of the specific unprofessional conduct related to the licensee's failure to disclose conduct or a violation as required by law.

W. The board shall not open an investigation if identifying information regarding the complainant is not provided.

X. Except for disciplinary matters prescribed by section 32-3251, paragraph 16, subdivision (v), the board has the burden of proof by clear and convincing evidence for disciplinary matters brought pursuant to this chapter.

32-3282. Right to examine and copy evidence; summoning witnesses and documents; taking testimony; right to counsel; confidentiality

A. In connection with information received pursuant to section 32-3281, subsection A, the board or the board's authorized agents or employees at all reasonable times have access to, for the purpose of examination, and the right to copy any psychotherapy notes, documents, reports, records or other physical evidence of any person being investigated, or the reports, records and any other documents maintained by and in possession of any hospital, clinic, physician's office, laboratory, pharmacy or health care institution as defined in section 36-401 or any other public or private agency, if the psychotherapy notes, documents, reports, records or evidence relate to the specific complaint.

B. For the purpose of all investigations and proceedings conducted by the board:

1. The board on its own initiative may issue subpoenas compelling the attendance and testimony of witnesses or demanding the production for examination or copying of documents or any other physical evidence if the evidence relates to the unauthorized practice of behavioral health or to the competence, unprofessional conduct or mental or physical ability of a licensee to safely practice. Within five days after the service of a subpoena on any person requiring the production of any evidence in that person's possession or under that person's control, the person may petition the board to revoke, limit or modify the subpoena. The board shall revoke, limit or modify a subpoena if in its opinion the evidence required does not relate to unlawful practices covered by this chapter or is not relevant to the charge that is the subject matter of the hearing or investigation or the subpoena does not describe with sufficient particularity the physical evidence required to be produced. Any member of the board and any agent designated by the board may administer oaths, examine witnesses and receive evidence.

2. Any person appearing before the board may be represented by counsel.

3. The board shall make available to the licensee who is the subject of the investigation, or the licensee's designated representative, for inspection at the board's office the investigative file at least five business days before a board meeting at which the board considers the complaint. The board may redact any confidential information before releasing the file to the licensee.

4. The superior court, on application by the board or by the person subpoenaed, has jurisdiction to issue an order either:

(a) Requiring the person to appear before the board or the board's authorized agent to produce evidence relating to the matter under investigation.

(b) Revoking, limiting or modifying the subpoena if in the court's opinion the evidence demanded does not relate to unlawful practices covered by this chapter or is not relevant to grounds for disciplinary action that are the subject matter of the hearing or investigation or the subpoena does not describe with sufficient particularity the physical evidence required to be produced. Any failure to obey an order of the court may be punished by the court as contempt.

C. Records, including clinical records, reports, files or other reports or oral statements relating to examinations, findings or treatments of clients, any information from which a client or the client's family might be identified or information received and records kept by the board as a result of the investigation procedure prescribed by this chapter are not available to the public.

D. This section and any other law that makes communications between a licensee and the licensee's client a privileged communication do not apply to investigations or proceedings conducted pursuant to this chapter. The board and and the board's employees, agents and representatives shall keep in confidence the names of any clients whose records are reviewed during the course of investigations and proceedings pursuant to this chapter.

32-3283. Confidential relationship; privileged communications; clients with legal guardians; treatment decisions

A. The confidential relationship between a client and a licensee, including a temporary licensee, is the same as between an attorney and a client. Unless a client waives this privilege in writing or in court testimony, a licensee shall not voluntarily or involuntarily divulge information that is received by reason of the confidential nature of the behavioral health professional-client relationship.

B. A licensee shall divulge to the board information the board requires in connection with any investigation, public hearing or other proceeding.

C. The behavioral health professional-client privilege does not extend to cases in which the behavioral health professional has a duty to:

1. Inform victims and appropriate authorities that a client's condition indicates a clear and imminent danger to the client or others pursuant to this chapter.

2. Report information as required by law.

D. A client's legal guardian may make treatment decisions on behalf of the client, except that the client receiving services is the decision maker for issues:

1. That directly affect the client's physical or emotional safety, such as sexual or other exploitative relationships.

2. That the guardian agrees to specifically reserve to the client.

3. Where the right to seek behavioral health services without parental or guardian consent is established by state or federal law.

32-3284. Cease and desist orders; injunctions

A. The board may issue a cease and desist order or request that an injunction be issued by the superior court to stop a person from engaging in the unauthorized practice of behavioral health or from violating or threatening to violate a statute, rule or order that the board has issued or is empowered to enforce. If the board seeks an injunction to stop the unauthorized practice of behavioral health, it is sufficient to charge that the respondent on a day certain in a named county engaged in the practice of behavioral health without a license and without being exempt from the licensure requirements of this chapter. It is not necessary to show specific damages or injury. The cease and desist order must state the reason for its issuance and give notice of the person's right to request a hearing under applicable procedures prescribed in title 41, chapter 6, article 10.

B. Violation of an injunction shall be punished as for contempt of court.

32-3285. Judicial review

Except as provided in section 41-1092.08, subsection H, final decisions of the board are subject to judicial review pursuant to title 12, chapter 7, article 6.

32-3286. Unlawful practice; unlawful use of title; violations; classification; civil penalty; exception

A. Except as prescribed in section 32-3271, a person who is not licensed pursuant to this chapter shall not engage in the practice of behavioral health.

B. A person who is not licensed pursuant to this chapter shall not use any of the following designations or any other designation that indicates licensure status, including abbreviations, or claim to be licensed pursuant to this chapter:

1. Licensed professional counselor.

2. Licensed associate counselor.

3. Licensed marriage and family therapist.

4. Licensed associate marriage and family therapist.

5. Licensed clinical social worker.

6. Licensed master social worker.

7. Licensed baccalaureate social worker.

8. Licensed independent addiction counselor.

9. Licensed associate addiction counselor.

10. Licensed addiction technician.

C. A person who is not licensed pursuant to this chapter and who practices or attempts to practice or who holds himself out as being trained and authorized to practice behavioral health, including diagnosing or treating any mental ailment, disease or disorder or other mental condition of any person, without being authorized by law to perform the act is engaging in the unauthorized practice of behavioral health, is in violation of this chapter, is guilty of a class 6 felony and is subject to a civil penalty of not more than $500 for each offense.

D. A person who conspires with or aids and abets another to commit any act described in subsection C of this section is guilty of a class 6 felony and is subject to a civil penalty of not more than $500 for each offense.

E. The board shall notify the department of health services if a licensed health care institution employs or contracts with a person who is investigated pursuant to this section.

F. Each day that a violation is committed constitutes a separate offense.

G. All fees received for services described in this section shall be refunded by the person found guilty pursuant to this section.

H. Notwithstanding subsection A of this section and based on circumstances presented to the board, the board may sanction a person's failure to timely renew a license while continuing to engage in the practice of behavioral health as an administrative violation rather than as a violation of this section or grounds for unprofessional conduct and may impose a civil penalty of not more than $500. The board shall deposit, pursuant to sections 35-146 and 35-147, monies collected pursuant to this subsection in the state general fund.

32-3291. Licensed baccalaureate social worker; licensure; qualifications; supervision

A. A person who wishes to be licensed by the board to engage in the practice of social work as a licensed baccalaureate social worker shall:

1. Furnish documentation as prescribed by the board by rule that the person has earned a baccalaureate degree in social work from a regionally accredited college or university in a program accredited by the council on social work education or a degree from a foreign school based on a program of study that the board determines is substantially equivalent.

2. Pass an examination approved by the board.

B. A licensed baccalaureate social worker shall only engage in clinical practice under direct supervision as prescribed by the board.

32-3292. Licensed master social worker; licensure; qualifications; supervision

A. A person who wishes to be licensed by the board to engage in the practice of social work as a licensed master social worker shall:

1. Furnish documentation satisfactory to the board that the person has earned a master's or higher degree in social work from a regionally accredited college or university in a program accredited by the council on social work education or a degree from a foreign school based on a program of study that the board determines is substantially equivalent.

2. Pass an examination approved by the board.

B. A licensed master social worker shall only engage in clinical practice under direct supervision as prescribed by the board.

32-3293. Licensed clinical social worker; licensure; qualifications

A person who wishes to be licensed by the board to engage in the practice of social work as a licensed clinical social worker shall:

1. Furnish documentation as prescribed by the board by rule that the person has:

(a) Earned a master's or higher degree in social work from a regionally accredited college or university in a program accredited by the council on social work education or a degree from a foreign school based on a program of study that the board determines is substantially equivalent.

(b) Received at least twenty-four months of post-master's degree experience in the practice of clinical social work under supervision that includes at least one thousand six hundred hours of direct client contact that meets the requirements prescribed by the board by rule. For clinical supervision, at least one hundred hours of experience must be as prescribed by the board by rule. For direct client contact hours, not more than four hundred hours may be in psychoeducation.

2. Provide documentation on a board-approved form completed by the person's supervisor attesting that the person both:

(a) Was observed during supervised hours to have demonstrated satisfactory competency in clinical documentation, consultation, collaboration and coordination of care related to clients to whom the person provided direct care.

(b) Has a rating of at least satisfactory in overall performance.

3. Pass an examination approved by the board.

32-3295. Social work licensure compact

SECTION 1. PURPOSE

A. The purpose of this compact is to facilitate interstate practice of regulated social workers by improving public access to competent social work services. The compact preserves the regulatory authority of states to protect public health and safety through the current system of state licensure.

B. This compact is designed to achieve the following objectives:

1. Increase public access to social work services.

2. Reduce overly burdensome and duplicative requirements associated with holding multiple licenses.

3. Enhance the member states' ability to protect the public's health and safety.

4. Encourage the cooperation of member states in regulating multistate practice.

5. Promote mobility and address workforce shortages by eliminating the necessity for licenses in multiple states by providing for the mutual recognition of other member state licenses.

6. Support military families.

7. Facilitate the exchange of licensure and disciplinary information among member states.

8. Authorize all member states to hold a regulated social worker accountable for abiding by a member state's laws, regulations and applicable professional standards in the member state in which the client is located at the time care is rendered.

9. Allow for the use of telehealth to facilitate increased access to regulated social work services.

SECTION 2. DEFINITIONS

In this compact, unless the context otherwise requires:

1. "Active military member" means any individual with full-time duty status in the active armed forces of the United States, including members of the national guard and reserve.

2. "Adverse action" means any administrative, civil, equitable or criminal action allowed by a state's laws that is imposed by a licensing authority or other authority against a regulated social worker, including actions against an individual's license or multistate authorization to practice, such as revocation, suspension, probation, monitoring of the licensee, limitation on the licensee's practice or any other encumbrance on licensure affecting a regulated social worker's authorization to practice, including issuance of a cease and desist action.

3. "Alternative program" means a nondisciplinary monitoring or practice remediation process approved by a licensing authority to address practitioners with an impairment.

4. "Charter member states" means member states that have enacted legislation to adopt this compact if the legislation predates the effective date of this compact as described in section 14 of this compact.

5. "Compact commission" or "commission" means the government agency whose membership consists of all states that have enacted this compact, that is known as the social work licensure compact commission as described in section 10 of this compact and that operates as an instrumentality of the member states.

6. "Current significant investigative information" means either:

(a) Investigative information that a licensing authority, after a preliminary inquiry that includes notification and an opportunity for the regulated social worker to respond, has reason to believe is not groundless and, if proved true, would indicate more than a minor infraction as may be defined by the commission.

(b) Investigative information that indicates that the regulated social worker represents an immediate threat to public health and safety, as defined by the commission, regardless of whether the regulated social worker has been notified and has had an opportunity to respond.

7. "Data system" means a repository of information about licensees, including continuing education, examination, licensure, current significant investigative information, disqualifying events, multistate licenses and adverse action information or other information as required by the commission.

8. "Disqualifying event" means any adverse action or incident that results in an encumbrance that disqualifies or makes the licensee ineligible to either obtain, retain or renew a multistate license.

9. "Domicile" means the jurisdiction in which the licensee resides and intends to remain indefinitely.

10. "Encumbrance" means a revocation or suspension of, or any limitation on, the full and unrestricted practice of social work licensed and regulated by a licensing authority.

11. "Executive committee" means a group of delegates elected or appointed to act on behalf of, and within the powers granted to them by, the compact and commission.

12. "Home state" means the member state that is the licensee's primary domicile.

13. "Impairment":

(a) Means a conditions or conditions that may impair a practitioner's ability to engage in full and unrestricted practice as a regulated social worker without some type of intervention.

(b) May include alcohol and drug dependence, mental health impairment and neurological or physical impairments.

14. "Licensees" means an individual who currently holds a license from a state to practice as a regulated social worker.

15. "Licensing authority" means the board or agency of a member state, or equivalent, that is responsible for licensing and regulating regulated social workers.

16. "Member state" means a state, commonwealth, district or territory of the United States of America that has enacted this compact.

17. "Multistate authorization to practice" means a legally authorized privilege to practice that is equivalent to a license and that is associated with a multistate license permitting the practice of social work in a remote state.

18. "Multistate license" means a license to practice as a regulated social worker issued by a home state licensing authority that authorizes the regulated social worker to practice in all member states under multistate authorization to practice.

19. "Qualifying national exam" means a national licensing examination approved by the commission.

20. "Regulated social worker" means any clinical, master's or bachelor's social worker who is licensed by a member state regardless of the title used by that member state.

21. "Remote state" means a member state other than the licensee's home state.

22. "Rule" or "rule of the commission" means a regulation duly promulgated by the commission, as authorized by the compact, that has the force of law.

23. "Single state license":

(a) Means a social work license issued by any state that authorizes practice only within the issuing state.

(b) Does not include multistate authorization to practice in any member state.

24. "Social work" or "social work services" means the application of social work theory, knowledge, methods, ethics and the professional use of self to restore or enhance social, psychosocial or biopsychosocial functioning of individuals, couples, families, groups, organizations and communities through the care and services provided by a regulated social worker as set forth in the member state's statutes and regulations in the state where the services are being provided.

25. "State" means any state, commonwealth, district or territory of the United States of America that regulates the practice of social work.

26. "Unencumbered license" means a license that authorizes a regulated social worker to engage in the full and unrestricted practice of social work.

SECTION 3. STATE PARTICIPATION IN THE COMPACT

A. To be eligible to participate in the compact, a potential member state must currently meet all of the following criteria:

1. License and regulate the practice of social work at either the clinical, master's or bachelor's category.

2. Require applicants for licensure to graduate from a program that:

(a) Is operated by a college or university recognized by the licensing authority.

(b) Is accredited, or in candidacy by an institution that subsequently becomes accredited, by an accrediting agency recognized by either:

(i) The council for higher education accreditation, or its successor.

(ii) The United States department of education; and

(c) Corresponds to the licensure sought as outlined in section 4 of this compact.

3. Require applicants for clinical licensure to complete a period of supervised practice.

4. Have a mechanism in place for receiving, investigating and adjudicating complaints about licensees.

B. To maintain membership in the compact, a member state shall do all of the following:

1. Require that applicants for a multistate license pass a qualifying national exam for the corresponding category of multistate license sought as outlined in section 4 of this compact.

2. Participate fully in the commission's data system, including using the commission's unique identifier as defined in rules.

3. Notify the commission, in compliance with the terms of the compact and rules, of any adverse action or the availability of current significant investigative information regarding a licensee.

4. Implement procedures for considering the criminal history records of applicants for a multistate license. Such procedures shall include the submission of fingerprints or other biometric-based information by applicants for the purpose of obtaining an applicant's criminal history record information from the federal bureau of investigation and the agency responsible for retaining that state's criminal records.

5. Comply with the rules of the commission.

6. Require an applicant to obtain or retain a license in the home state and meet the home state's qualifications for licensure or renewal of licensure, as well as all other applicable home state laws.

7. Authorize a licensee holding a multistate license in any member state to practice in accordance with the terms of the compact and rules of the commission.

8. Designate a delegate to participate in the commission meetings.

C. A member state that meets the requirements of subsections A and B of this section shall designate the categories of social work licensure that are eligible for issuance of a multistate license for applicants in such member state. To the extent that any member state does not meet the requirements for participation in the compact at any particular category of social work licensure, such member state may choose, but is not obligated, to issue a multistate license to applicants who otherwise meet the requirements of section 4 of this compact for issuance of a multistate license in such category or categories of licensure.

D. The home state may charge a fee for granting the multistate license.

SECTION 4. SOCIAL WORKER PARTICIPATION IN THE COMPACT

A. To be eligible for a multistate license under the terms and provisions of this compact, an applicant, regardless of category must:

1. Hold or be eligible for an active, unencumbered license in the home state.

2. Pay any applicable fees, including any state fee, for the multistate license.

3. Submit, in connection with an application for a multistate license, fingerprints or other biometric data for the purpose of obtaining criminal history record information from the federal bureau of investigation and the agency responsible for retaining that state's criminal records.

4. Notify the home state of any adverse action, encumbrance or restriction on any professional license taken by any member state or nonmember state within thirty days after the date the action is taken.

5. Meet any continuing competence requirements established by the home state.

6. Abide by the laws, regulations and applicable standards in the member state where the client is located at the time care is rendered.

B. An applicant for a clinical-category multistate license must meet all of the following requirements:

1. Fulfill a competency requirement, which shall be satisfied by either:

(a) Passage of a clinical-category qualifying national exam.

(b) Licensure of the applicant in the applicant's home state at the clinical category, beginning prior to such time as a qualifying national exam was required by the home state and accompanied by a period of continuous social work licensure thereafter, all of which may be further governed by the rules of the commission.

(c) The substantial equivalency of the foregoing competency requirements, which the commission may determine by rule.

2. Attain at least a master's degree in social work from a program that is both:

(a) Operated by a college or university recognized by the licensing authority.

(b) Accredited, or in candidacy that subsequently becomes accredited, by an accrediting agency recognized by either:

(i) The council for higher education accreditation, or its successor.

(ii) The United States department of education.

3. Fulfill a practice requirement, which shall be satisfied by demonstrating completion of either:

(a) A period of postgraduate supervised clinical practice equal to a minimum of three thousand hours.

(b) A minimum of two years of full-time postgraduate supervised clinical practice.

(c) The substantial equivalency of the foregoing practice requirements, which the commission may determine by rule.

C. An applicant for a master's-category multistate license must meet all of the following requirements:

1. Fulfill a competency requirement, which shall be satisfied by either:

(a) Passage of a masters-category qualifying national exam.

(b) Licensure of the applicant in the applicant's home state at the master's category, beginning prior to such time as a qualifying national exam was required by the home state at the master's category and accompanied by a continuous period of social work licensure thereafter, all of which may be further governed by the rules of the commission.

(c) The substantial equivalency of the foregoing competency requirements, which the commission may determine by rule.

2. Attain at least a master's degree in social work from a program that is both:

(a) Operated by a college or university recognized by the licensing authority.

(b) Accredited, or in candidacy that subsequently becomes accredited, by an accrediting agency recognized by either:

(i) The council for higher education accreditation, or its successor.

(ii) The United States department of education.

D. An applicant for a bachelor's-category multistate license must meet all of the following requirements:

1. Fulfill a competency requirement, which shall be satisfied by either:

(a) Passage of a bachelor's-category qualifying national exam.

(b) Licensure of the applicant in the applicant's home state at the bachelor's category, beginning prior to such time as a qualifying national exam was required by the home state and accompanied by a period of continuous social work licensure thereafter, all of which may be further governed by the rules of the commission.

(c) The substantial equivalency of the foregoing competency requirements, which the commission may determine by rule.

2. Attain at least a bachelor's degree in social work from a program that is both:

(a) Operated by a college or university recognized by the licensing authority.

(b) Accredited, or in candidacy that subsequently becomes accredited, by an accrediting agency recognized by either:

(i) The council for higher education accreditation, or its successor.

(ii) The United States department of education.

E. The multistate license for a regulated social worker is subject to the renewal requirements of the home state. The regulated social worker must maintain compliance with the requirements of subsection A of this section to be eligible to renew a multistate license.

F. The regulated social worker's services in a remote state are subject to that member state's regulatory authority. A remote state may, in accordance with due process and that member state's laws, remove a regulated social worker's multistate authorization to practice in the remote state for a specific period of time, impose fines and take any other necessary actions to protect the health and safety of its citizens.

G. If a multistate license is encumbered, the regulated social worker's multistate authorization to practice shall be deactivated in all remote states until the multistate license is no longer encumbered.

H. If a multistate authorization to practice is encumbered in a remote state, the regulated social worker's multistate authorization to practice may be deactivated in that state until the multistate authorization to practice is no longer encumbered.

SECTION 5. ISSUANCE OF A MULTISTATE LICENSE

A. On receipt of an application for multistate license, the home state licensing authority shall determine the applicant's eligibility for a multistate license in accordance with section 4 of this compact.

B. If such applicant is eligible pursuant to section 4 of this compact, the home state licensing authority shall issue a multistate license that authorizes the applicant or regulated social worker to practice in all member states under a multistate authorization to practice.

C. On issuance of a multistate license, the home state licensing authority shall designate whether the regulated social worker holds a multistate license in the bachelor's, master's or clinical category of social work.

D. A multistate license issued by a home state to a resident in that state shall be recognized by all compact member states as authorizing social work practice under a multistate authorization to practice corresponding to each category of licensure regulated in each member state.

SECTION 6. AUTHORITY OF INTERSTATE COMPACT COMMISSION AND MEMBER STATE LICENSING AUTHORITIES

A. This compact and any rule of the commission does not limit, restrict or in any way reduce the ability of a member state to enact and enforce laws, regulations or other rules related to the practice of social work in that state if those laws, regulations or other rules are not inconsistent with the provisions of this compact.

B. This compact does not affect the requirements established by a member state for the issuance of a single state license.

C. This compact and any rule of the commission does not limit, restrict or in any way reduce the ability of a member state to take adverse action against a licensee's single state license to practice social work in that state.

D. This compact and any rule of the commission does not limit, restrict or in any way reduce the ability of a remote state to take adverse action against a licensee's multistate authorization to practice in that state.

E. This compact and any rule of the commission does not limit, restrict or in any way reduce the ability of a licensee's home state to take adverse action against a licensee's multistate license based on information provided by a remote state.

SECTION 7. REISSUANCE OF A MULTISTATE LICENSE BY A NEW HOME STATE

A. A licensee can hold a multistate license issued by the licensee's home state in only one member state at any given time.

B. If a licensee changes the licensee's home state by moving between two member states:

1. The licensee shall immediately apply for the reissuance of the licensee's multistate license in the new home state. The licensee shall pay all applicable fees and notify the prior home state in accordance with the rules of the commission.

2. On receipt of an application to reissue a multistate license, the new home state shall verify that the multistate license is active, unencumbered and eligible for reissuance under the terms of the compact and the rules of the commission. The multistate license issued by the prior home state will be deactivated and all member states notified in accordance with the applicable rules adopted by the commission.

3. Prior to the reissuance of the multistate license, the new home state shall conduct procedures for considering the criminal history records of the licensee. Such procedures shall include the submission of fingerprints or other biometric-based information by applicants for the purpose of obtaining an applicant's criminal history record information from the federal bureau of investigation and the agency responsible for retaining that state's criminal records.

4. If required for initial licensure, the new home state may require completion of jurisprudence requirements in the new home state.

5. Notwithstanding any other provision of this compact, if a licensee does not meet the requirements set forth in this compact for the reissuance of a multistate license by the new home state, the licensee shall be subject to the new home state requirements for the issuance of a single state license in that state.

C. If a licensee changes the licensee's primary state of residence by moving from a member state to a nonmember state, or from a nonmember state to a member state, the licensee shall be subject to the state requirements for the issuance of a single state license in the new home state.

D. This compact does not interfere with a licensee's ability to hold a single state license in multiple states; however, for the purposes of this compact, a licensee shall have only one home state and only one multistate license.

E. This compact does not interfere with the requirements established by a member state for the issuance of a single state license.

SECTION 8. MILITARY FAMILIES

An active military member or the active military member's spouse shall designate a home state where the individual has a multistate license. The individual may retain the individual's home state designation during the period the active military member is on active duty.

SECTION 9. ADVERSE ACTIONS

A. In addition to the other powers conferred by state law, a remote state shall have the authority, in accordance with existing state due process law, to take adverse action against a regulated social worker's multistate authorization to practice only within that member state and issue subpoenas for both hearings and investigations that require the attendance and testimony of witnesses as well as the production of evidence. Subpoenas issued by a licensing authority in a member state for the attendance and testimony of witnesses or the production of evidence from another member state shall be enforced in the latter state by any court of competent jurisdiction, according to the practice and procedure of that court applicable to subpoenas issued in proceedings pending before it. The issuing licensing authority shall pay any witness fees, travel expenses, mileage and other fees required by the service statutes of the state in which the witnesses or evidence is located.

B. Only the home state shall have the power to take adverse action against a regulated social worker's multistate license.

C. For the purposes of taking adverse action, the home state shall give the same priority and effect to reported conduct received from a member state as it would if the conduct had occurred within the home state. In so doing, the home state shall apply its own state laws to determine appropriate action.

D. The home state shall complete any pending investigations of a regulated social worker who changes the regulated social worker's home state during the course of the investigations. The home state shall also have the authority to take appropriate action and shall promptly report the conclusions of the investigations to the administrator of the data system. The administrator of the data system shall promptly notify the new home state of any adverse action.

E. A member state, if otherwise allowed by state law, may recover from the affected regulated social worker the costs of investigations and dispositions of cases resulting from any adverse action taken against that regulated social worker.

F. A member state may take adverse action based on the factual findings of another member state if the member state follows its own procedures for taking the adverse action.

G. The following apply to joint investigations:

1. In addition to the authority granted to a member state by its respective social work practice act or other applicable state law, any member state may participate with other member states in joint investigations of licensees.

2. Member states shall share any investigative, litigation or compliance materials in furtherance of any joint or individual investigation initiated under the compact.

H. If adverse action is taken by the home state against the multistate license of a regulated social worker, the regulated social worker's multistate authorization to practice in all other member states shall be deactivated until all encumbrances have been removed from the multistate license. All home state disciplinary orders that impose adverse action against the license of a regulated social worker shall include a statement that the regulated social worker's multistate authorization to practice is deactivated in all member states until all conditions of the decision, order or agreement are satisfied.

I. If a member state takes adverse action, it shall promptly notify the administrator of the data system. The administrator of the data system shall promptly notify the home state and all other member states of any adverse actions by remote states.

J. This compact does not override a member state's decision that participation in an alternative program may be used in lieu of adverse action.

K. This compact does not authorize a member state to demand the issuance of subpoenas for attendance and testimony of witnesses or the production of evidence from another member state for lawful actions within that member state.

L. This compact does not authorize a member state to impose discipline against a regulated social worker who holds a multistate authorization to practice for lawful actions within another member state.

SECTION 10. ESTABLISHMENT OF SOCIAL WORK LICENSURE

COMPACT COMMISSION

A. The compact member states hereby create and establish a joint government agency whose membership consists of all member states that have enacted the compact known as the social work licensure compact commission. The commission is an instrumentality of the compact states acting jointly and not an instrumentality of any one state. The commission shall come into existence on or after the effective date of the compact as set forth in section 14 of this compact.

B. The membership, voting and meetings of the commission are as follows:

1. Each member state shall have and be limited to one delegate selected by that member state's licensing authority.

2. The delegate shall be either:

(a) A current member of the licensing authority at the time of appointment who is a regulated social worker or public member of the state licensing authority.

(b) An administrator of the licensing authority or the administrator's designee.

3. The commission shall by rule or bylaw establish a term of office for delegates and may by rule or bylaw establish term limits.

4. The commission may recommend the removal or suspension of any delegate from office.

5. A member state's licensing authority shall fill any vacancy of its delegate occurring on the commission within sixty days after the vacancy.

6. Each delegate shall be entitled to one vote on all matters before the commission requiring a vote by commission delegates.

7. A delegate shall vote in person or by such other means as provided in the bylaws. The bylaws may provide for delegates to meet by telecommunication, videoconference or other means of communication.

8. The commission shall meet at least once during each calendar year. Additional meetings may be held as set forth in the bylaws. The commission may meet by telecommunication, video conference or other similar electronic means.

C. The commission shall have the following powers:

1. Establish the fiscal year of the commission.

2. Establish code of conduct and conflict of interest policies.

3. Establish and amend rules and bylaws.

4. Maintain its financial records in accordance with the bylaws.

5. Meet and take such actions as are consistent with this compact, the commission's rules and the bylaws.

6. Initiate and conclude legal proceedings or actions in the name of the commission if the standing of any licensing authority to sue or be sued under applicable law is not affected.

7. Maintain and certify records and information provided to a member state as the authenticated business records of the commission, and designate an agent to do so on the commission's behalf.

8. Purchase and maintain insurance and bonds.

9. Borrow, accept or contract for services of personnel, including employees of a member state.

10. Conduct an annual financial review.

11. Hire employees, elect or appoint officers, fix compensation, define duties, grant such individuals appropriate authority to carry out the purposes of the compact and establish the commission's personnel policies and programs relating to conflicts of interest, qualifications of personnel and other related personnel matters.

12. Assess and collect fees.

13. Accept any appropriate gifts, donations, grants of monies, other sources of revenue, equipment, supplies, materials and services and receive, use and dispose of the same. At all times the commission shall avoid any appearance of impropriety or conflict of interest.

14. Lease, purchase, retain, own, hold, improve or use any property, real, personal, or mixed, or any undivided interest in the property.

15. Sell, convey, mortgage, pledge, lease, exchange, abandon or otherwise dispose of any property, real, personal, or mixed.

16. Establish a budget and make expenditures.

17. Borrow monies.

18. Appoint committees, including standing committees, composed of members, state regulators, state legislators or their representatives, consumer representatives and such other interested persons as may be designated in this compact and the bylaws.

19. Provide and receive information from, and cooperate with, law enforcement agencies.

20. Establish and elect an executive committee, including a chairperson and a vice chairperson.

21. Determine whether a state's adopted language is materially different from the model compact language such that the state would not qualify for participation in the compact.

22. Perform such other functions as may be necessary or appropriate to achieve the purposes of this compact.

D. The executive committee shall have the power to act on behalf of the commission according to the terms of this compact. The powers, duties and responsibilities of the executive committee include:

1. Overseeing the day-to-day activities of the administration of the compact, including enforcement and compliance with the compact, its rules and bylaws, and other such duties as deemed necessary.

2. Recommending to the commission changes to the rules or bylaws, changes to this compact legislation, fees charged to member states, fees charged to licensees and other fees.

3. Ensuring the compact administration services are appropriately provided, including by contract.

4. Preparing and recommending the budget.

5. Maintaining financial records on behalf of the commission.

6. Monitoring compact compliance of member states and providing compliance reports to the commission.

7. Establishing additional committees as necessary.

8. Exercising the powers and duties of the commission during the interim between commission meetings, except for adopting or amending rules, adopting or amending bylaws, and exercising any other powers and duties expressly reserved to the commission by rule or bylaw.

9. Performing other duties as provided in the rules or bylaws of the commission.

E. The executive committee shall be composed of up to eleven members as follows:

1. The chairperson and vice chairperson of the commission shall be voting members of the executive committee.

2. The commission shall elect five voting members from the current membership of the commission.

3. Up to four ex officio, nonvoting members from four recognized national social work organizations shall be selected by their respective organizations.

F. The commission may remove any member of the executive committee as provided in the commission's bylaws.

G. The executive committee shall meet at least annually. Executive committee meetings shall be open to the public, except that the executive committee may meet in a closed, nonpublic meeting as provided in subsection I, paragraph 2 of this section. The executive committee shall give seven days' notice of its meetings, posted on its website and as determined to provide notice to persons with an interest in the business of the commission. The executive committee may hold a special meeting in accordance with subsection I, paragraph 1 of this section.

H. The commission shall adopt and provide to the member states an annual report.

I. Meetings of the commission are as follows:

1. All meetings shall be open to the public, except that the commission may meet in a closed, nonpublic meeting as provided in paragraph 2 of this subsection. Public notice for all meetings of the full commission shall be given in the same manner as required under the rulemaking provisions in section 12 of this compact, except that the commission may hold a special meeting when it must meet to conduct emergency business by giving forty-eight hours' notice to all commissioners, on the commission's website, and by other means as provided in the commission's rules. The commission's legal counsel shall certify that the commission's need to meet qualifies as an emergency.

2. The commission or the executive committee or other committees of the commission may convene in a closed, nonpublic meeting for the commission or executive committee or other committees of the commission to receive legal advice or to discuss:

(a) Noncompliance of a member state with its obligations under the compact.

(b) The employment, compensation or discipline or other matters, practices or procedures related to specific employees.

(c) Current or threatened discipline of a licensee by the commission or by a member state's licensing authority.

(d) Current, threatened or reasonably anticipated litigation.

(e) Negotiation of contracts for the purchase, lease or sale of goods, services or real estate.

(f) Accusing any person of a crime or formally censuring any person.

(g) Trade secrets or commercial or financial information that is privileged or confidential.

(h) Information of a personal nature if disclosure would constitute a clearly unwarranted invasion of personal privacy.

(i) Investigative records compiled for law enforcement purposes.

(j) Information related to any investigative reports prepared by or on behalf of or for use of the commission or other committee charged with responsibility of investigation or determination of compliance issues pursuant to the compact.

(k) Matters specifically exempted from disclosure by federal or member state law.

(l) Other matters as promulgated by the commission by rule.

3. If a meeting, or portion of a meeting, is closed, the presiding officer shall state that the meeting will be closed and reference each relevant exempting provision, and such reference shall be recorded in the minutes.

4. The commission shall keep minutes that fully and clearly describe all matters discussed in a meeting and shall provide a full and accurate summary of actions taken, and the reasons therefore, including a description of the views expressed. All documents considered in connection with an action shall be identified in such minutes. All minutes and documents of a closed meeting shall remain under seal, subject to release only by a majority vote of the commission or order of a court of competent jurisdiction.

J. Financing of the commission is as follows:

1. The commission shall pay, or provide for the payment of, the reasonable expenses of the commission's establishment, organization, and ongoing activities.

2. The commission may accept any appropriate revenue sources as provided in subsection C, paragraph 13 of this section.

3. The commission may levy on and collect an annual assessment from each member state and impose fees on licensees of member states to whom the commission grants a multistate license to cover the cost of the operations and activities of the commission and its staff, which must be in a total amount sufficient to cover its annual budget as approved each year for which revenue is not provided by other sources. The aggregate annual assessment amount for member states shall be allocated based on a formula that the commission promulgates by rule.

4. The commission shall not incur obligations of any kind prior to securing the funds adequate to meet the same, and the commission shall not pledge the credit of any of the member states, except by and with the authority of the member state.

5. The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission are subject to the financial review and accounting procedures established under the commission's bylaws. However, all receipts and disbursements of funds handled by the commission are subject to an annual financial review by a certified or licensed public accountant, and the report of the financial review shall be included in and become part of the annual report of the commission.

K. Qualified immunity, defense and indemnification are as follows:

1. The members, officers, executive director, employees and representatives of the commission shall be immune from suit and liability, both personally and in their official capacity, for any claim for damage to or loss of property or personal injury or other civil liability caused by or arising out of any actual or alleged act, error or omission that occurred, or that the person against whom the claim is made had a reasonable basis for believing occurred within the scope of commission employment, duties or responsibilities. This paragraph does not protect any such person from suit or liability for any damage, loss, injury or liability caused by the intentional or wilful or wanton misconduct of that person. The procurement of insurance of any type by the commission shall not in any way compromise or limit the immunity granted hereunder.

2. The commission shall defend any member, officer, executive director, employee and representative of the commission in any civil action seeking to impose liability arising out of any actual or alleged act, error or omission that occurred within the scope of commission employment, duties or responsibilities, or as

determined by the commission that the person against whom the claim is made had a reasonable basis for believing occurred within the scope of commission employment, duties or responsibilities. This paragraph does not prohibit that person from retaining the person's own counsel at the person's own expense, and if the actual or alleged act, error, or omission did not result from that person's intentional or wilful or wanton misconduct.

3. The commission shall indemnify and hold harmless any member, officer, executive director, employee and representative of the commission for the amount of any settlement or judgment obtained against that person arising out of any actual or alleged act, error or omission that occurred within the scope of commission employment, duties or responsibilities, or that such person had a reasonable basis for believing occurred within the scope of commission employment, duties or responsibilities, if the actual or alleged act, error or omission did not result from the intentional or wilful or wanton misconduct of that person.

4. This compact does not limit the liability of any licensee for professional malpractice or misconduct, which shall be governed solely by any other applicable state laws.

5. This compact does not waive or otherwise abrogate a member state's state action immunity or state action affirmative defense with respect to antitrust claims under the Sherman Act, the Clayton Act or any other state or federal antitrust or anticompetitive law or regulation.

6. This compact is not a waiver of sovereign immunity by the member states or by the commission.

SECTION 11. DATA SYSTEM

A. The commission shall provide for the development, maintenance, operation and utilization of a coordinated data system.

B. The commission shall assign each applicant for a multistate license a unique identifier as determined by the rules of the commission.

C. Notwithstanding any other provision of state law to the contrary, a member state shall submit a uniform data set to the data system on all individuals to whom this compact applies as required by the rules of the commission, including:

1. Identifying information.

2. Licensure data.

3. Adverse actions against a license and information related to the adverse action.

4. Nonconfidential information related to alternative program participation, the beginning and ending dates of such participation, and other information related to such participation that is not made confidential under member state law.

5. Any denial of application for licensure, and the reason or reasons for such denial.

6. The presence of current significant investigative information.

7. Other information that may facilitate the administration of this compact or the protection of the public as determined by the rules of the commission.

D. The records and information provided to a member state pursuant to this compact or through the data system, when certified by the commission or an agent of the commission, shall constitute the authenticated business records of the commission and shall be entitled to any associated hearsay exception in any relevant judicial, quasi-judicial or administrative proceedings in a member state.

E. Current significant investigative information pertaining to a licensee in any member state will only be available to other member states.

F. It is the responsibility of the member states to report any adverse action against a licensee and to monitor the database to determine whether adverse action has been taken against a licensee. Adverse action information pertaining to a licensee in any member state will be available to any other member state.

G. Member states contributing information to the data system may designate information that may not be shared with the public without the express permission of the contributing state.

H. Any information submitted to the data system that is subsequently expunged pursuant to federal law or the laws of the member state contributing the information shall be removed from the data system.

SECTION 12. RULEMAKING

A. The commission shall promulgate reasonable rules in order to effectively and efficiently implement and administer the purposes and provisions of the compact. A rule is invalid and has no force or effect only if a court of competent jurisdiction holds that the rule is invalid because the commission exercised its rulemaking authority in a manner that is beyond the scope and purposes of the compact, or the powers granted hereunder, or based on another applicable standard of review.

B. The rules of the commission shall have the force of law in each member state, provided that if the rules of the commission conflict with the laws of the member state that establish the member state's laws, regulations and applicable standards that govern the practice of social work as held by a court of competent jurisdiction, the rules of the commission shall be ineffective in that state to the extent of the conflict.

C. The commission shall exercise its rulemaking powers pursuant to the criteria set forth in this section and the rules adopted thereunder. Rules shall become binding on the day following adoption or the date specified in the rule or amendment, whichever is later.

D. If a majority of the legislatures of the member states rejects a rule or portion of a rule by enactment of a statute or resolution in the same manner used to adopt the compact within four years after the date of adoption of the rule, such rule shall has no further force and effect in any member state.

E. Rules shall be adopted at a regular or special meeting of the commission.

F. Prior to adoption of a proposed rule, the commission shall hold a public hearing and allow persons to provide oral and written comments, data, facts, opinions and arguments.

G. Prior to adoption of a proposed rule by the commission, and at least thirty days before the meeting at which the commission will hold a public hearing on the proposed rule, the commission shall provide a notice of proposed rulemaking:

1. On the website of the commission or other publicly accessible platform.

2. To persons who have requested notice of the commission's notices of proposed rulemaking.

3. In such other way as the commission may by rule specify.

H. The notice of proposed rulemaking shall include:

1. The time, date and location of the public hearing at which the commission will hear public comments on the proposed rule and, if different, the time, date and location of the meeting where the commission will consider and vote on the proposed rule.

2. If the hearing is held via telecommunication, video conference or other electronic means, the commission shall include the mechanism for access to the hearing in the notice of proposed rulemaking.

3. The text of the proposed rule and the reason for the proposed rule.

4. A request for comments on the proposed rule from any interested person.

5. The manner in which interested persons may submit written comments.

I. All hearings shall be recorded. A copy of the recording and all written comments and documents received by the commission in response to the proposed rule shall be available to the public.

J. This section does not require a separate hearing on each rule. Rules may be grouped for the convenience of the commission at hearings required by this section.

K. The commission, by majority vote of all members, shall take final action on the proposed rule based on the rulemaking record and the full text of the rule. The commission may adopt changes to the proposed rule if the changes do not enlarge the original purpose of the proposed rule. The commission shall provide an explanation of the reasons for substantive changes made to the proposed rule as well as reasons for substantive changes not made that were recommended by commenters. The commission shall determine a reasonable effective date for the rule. Except for an emergency as provided in subsection L of this section, the effective date of the rule shall be not sooner than thirty days after issuing the notice that it adopted or amended the rule.

L. On a determination that an emergency exists, the commission may consider and adopt an emergency rule with forty-eight hours' notice, with opportunity to comment, provided that the usual rulemaking procedures provided in the compact and in this section shall be retroactively applied to the rule as soon as reasonably possible but not later than ninety days after the effective date of the rule. For the purposes of this subsection, an emergency rule is one that must be adopted immediately in order to:

1. Meet an imminent threat to public health, safety or welfare.

2. Prevent a loss of commission or member state monies.

3. Meet a deadline for the promulgation of a rule that is established by federal law or rule.

4. Protect the public health and safety.

M. The commission or an authorized committee of the commission may direct revisions to a previously adopted rule for purposes of correcting typographical errors, errors in format, errors in consistency or grammatical errors. Public notice of any revisions shall be posted on the website of the commission. The revision shall be subject to challenge by any person for a period of thirty days after posting. The revision may be challenged only on grounds that the revision results in a material change to a rule. A challenge shall be made in writing and delivered to the commission prior to the end of the notice period. If no challenge is made, the revision will take effect without further action. If the revision is challenged, the revision may not take effect without the approval of the commission.

N. A member state's rulemaking requirements shall not apply under this compact.

SECTION 13. OVERSIGHT, DISPUTE RESOLUTION AND ENFORCEMENT

A. Oversight is as follows:

1. The executive and judicial branches of state government in each member state shall enforce this compact and take all actions necessary and appropriate to implement the compact.

2. Except as otherwise provided in this compact, venue is proper and judicial proceedings by or against the commission shall be brought solely and exclusively in a court of competent jurisdiction where the principal office of the commission is located. The commission may waive venue and jurisdictional defenses to the extent it adopts or consents to participate in alternative dispute resolution proceedings. This section does not affect or limit the selection or propriety of venue in any action against a licensee for professional malpractice, misconduct or any such similar matter.

3. The commission shall be entitled to receive service of process in any proceeding regarding the enforcement or interpretation of the compact and shall have standing to intervene in such a proceeding for all purposes. Failure to provide the commission service of process shall render a judgment or order void as to the commission, this compact or promulgated rules.

B. Default, technical assistance and termination are as follows:

1. If the commission determines that a member state has defaulted in the performance of its obligations or responsibilities under this compact or the promulgated rules, the commission shall provide written notice to the defaulting state. The notice of default shall describe the default, the proposed means of curing the default and any other action that the commission may take and shall offer training and specific technical assistance regarding the default.

2. The commission shall provide a copy of the notice of default to the other member states.

C. If a state in default fails to cure the default, the defaulting state may be terminated from the compact on an affirmative vote of a majority of the delegates of the member states, and all rights, privileges and benefits conferred on that state by this compact may be terminated on the effective date of termination. A cure of the default does not relieve the offending state of obligations or liabilities incurred during the period of default.

D. Termination of membership in the compact shall be imposed only after all other means of securing compliance have been exhausted. Notice of intent to suspend or terminate shall be given by the commission to the governor, the majority and minority leaders of the defaulting state's legislature, the defaulting state's state licensing authority and each of the member states' licensing authority.

E. A state that has been terminated is responsible for all assessments, obligations, and liabilities incurred through the effective date of termination, including obligations that extend beyond the effective date of termination.

F. On the termination of a state's membership from this compact, that state shall immediately provide notice to all licensees within that state of such termination. The terminated state shall continue to recognize all licenses granted pursuant to this compact for at least six months after the date of the notice of termination.

G. The commission shall not bear any costs related to a state that is found to be in default or that has been terminated from the compact, unless agreed on in writing between the commission and the defaulting state.

H. The defaulting state may appeal the action of the commission by petitioning the United States district court for the District of Columbia or the federal district where the commission has its principal offices. The prevailing party shall be awarded all costs of such litigation, including reasonable attorney fees.

I. Dispute resolution is as follows:

1. On request by a member state, the commission shall attempt to resolve disputes related to the compact that arise among member states and between member and nonmember states.

2. The commission shall promulgate a rule providing for both mediation and binding dispute resolution for disputes as appropriate.

J. Enforcement is as follows:

1. By majority vote as provided by rule, the commission may initiate legal action against a member state in default in the United States district court for the District of Columbia or the federal district where the commission has its principal offices to enforce compliance with the compact and its promulgated rules. The relief sought may include both injunctive relief and damages. If judicial enforcement is necessary, the prevailing party shall be awarded all costs of such litigation, including reasonable attorney fees. The remedies prescribed in this subsection shall not be the exclusive remedies of the commission. The commission may pursue any other remedies available under federal or the defaulting member state's law.

2. A member state may initiate legal action against the commission in the United States district court for the District of Columbia or the federal district where the commission has its principal offices to enforce compliance with the compact and its promulgated rules. The relief sought may include both injunctive relief and damages. If judicial enforcement is necessary, the prevailing party shall be awarded all costs of such litigation, including reasonable attorney fees.

3. No person other than a member state shall enforce this compact against the commission.

SECTION 14. EFFECTIVE DATE, WITHDRAWAL AND AMENDMENT

A. This compact shall come into effect on the date on which the compact statute is enacted into law in the seventh member state. On or after the effective date of the compact, the commission shall convene and review the enactment of each of the first seven member states, known as the charter member states, to determine if the statute enacted by each such charter member state is materially different than the model compact statute. A charter member state whose enactment is found to be materially different from the model compact statute shall be entitled to the default process set forth in section 13 of this compact. If any member state is later found to be in default, or is terminated or withdraws from the compact, the commission shall remain in existence and the compact shall remain in effect even if the number of member states should be less than seven. Member states enacting the compact after the seven initial charter member states shall be subject to the process set forth in section 10, subsection C, paragraph 21 of this compact to determine if their enactments are materially different from the model compact statute and whether they qualify for participation in the compact.

B. All actions taken for the benefit of the commission or in furtherance of the purposes of the administration of the compact prior to the effective date of the compact or the commission coming into existence shall be considered to be actions of the commission unless specifically repudiated by the commission.

C. Any state that joins the compact after the commission's initial adoption of the rules and bylaws shall be subject to the rules and bylaws as they exist on the date on which the compact becomes law in that state. Any rule that has been previously adopted by the commission has the full force and effect of law on the day the compact becomes law in that state.

D. Any member state may withdraw from this compact by enacting a statute repealing the same. A member state's withdrawal shall not take effect until one hundred eighty days after enactment of the repealing statute. Withdrawal shall not affect the continuing requirement of the withdrawing state's licensing authority to comply with the investigative and adverse action reporting requirements of this compact prior to the effective date of withdrawal. On the enactment of a statute withdrawing from this compact, a state shall immediately provide notice of such withdrawal to all licensees within that state. Notwithstanding any subsequent statutory enactment to the contrary, such withdrawing state shall continue to recognize all licenses granted pursuant to this compact for at least one hundred eighty days after the date of such notice of withdrawal.

E. This compact does not invalidate or prevent any licensure agreement or other cooperative arrangement between a member state and a nonmember state that does not conflict with this compact.

F. This compact may be amended by the member states. An amendment to this compact does not become effective and binding on any member state until it is enacted into the laws of all member states.

SECTION 15. CONSTRUCTION AND SEVERABILITY

A. This compact and the commission's rulemaking authority shall be liberally construed so as to effectuate the purposes, implementation and administration of the compact. Provisions of the compact expressly authorizing or requiring the promulgation of rules shall not be construed to limit the commission's rulemaking authority solely for those purposes.

B. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is held by a court of competent jurisdiction to be contrary to the constitution of any member state, of a state seeking participation in the compact or of the United States, or the applicability thereof to any government, agency, person or circumstance is held to be unconstitutional by a court of competent jurisdiction, the validity of the remainder of this compact and the applicability thereof to any other government, agency, person or circumstance shall not be affected thereby.

C. Notwithstanding subsection B of this section, the commission may deny a state's participation in the compact or, in accordance with the requirements of section 13, subsection B of this compact, terminate a

member state's participation in the compact, if the commission determines that a constitutional requirement of a member state is a material departure from the compact. Otherwise, if this compact is held to be contrary to the constitution of any member state, the compact shall remain in full force and effect as to the remaining member states and in full force and effect as to the member state affected as to all severable matters.

SECTION 16. CONSISTENT EFFECT AND CONFLICT WITH OTHER STATE LAWS

A. A licensee who provides services in a remote state under a multistate authorization to practice shall adhere to the laws and regulations, including laws, regulations and applicable standards, of the remote state where the client is located at the time care is rendered.

B. This section does not prevent or inhibit the enforcement of any other law of a member state that is not inconsistent with the compact.

C. Any laws, statutes, regulations or other legal requirements in a member state that are in conflict with the compact are superseded to the extent of the conflict.

D. All permissible agreements between the commission and the member states are binding in accordance with their terms.

32-3301. Licensed professional counselor; licensure; requirements

A. A person who wishes to be licensed by the board to engage in the practice of professional counseling as a licensed professional counselor shall:

1. Meet the education requirements of subsection B of this section and the work experience requirements of subsection F of this section.

2. Pass an examination approved by the board.

B. An applicant for licensure shall furnish documentation as prescribed by the board by rule that the person has received a master's or higher degree with a major emphasis in counseling from a regionally accredited college or university in a program of study that includes at least sixty semester credit hours or ninety quarter credit hours at one of the following:

1. A program accredited by the council for the accreditation of counseling and related educational programs or the national council on rehabilitation education.

2. A program with a curriculum that has been approved by the board pursuant to section 32-3253.

3. A program with a curriculum meeting requirements as prescribed by the board by rule.

C. A program that is not accredited by the council for the accreditation of counseling and related educations programs or the national council on rehabilitation education must require seven hundred hours of supervised clinical hours and twenty-four semester hours or thirty-two quarter hours in courses in the following eight core content areas as prescribed by the board by rule:

1. Professional orientation and ethical practice.

2. Social and cultural diversity.

3. Human growth and development.

4. Career development.

5. Helping relationships.

6. Group work.

7. Assessment.

8. Research and program evaluation.

D. Credit hours offered above those prescribed pursuant to subsection C of this section must be in studies that provide a broad understanding in counseling related subjects as prescribed by the board by rule.

E. The board may accept equivalent coursework in which core content area subject matter is embedded or contained within another course, including another subject matter.

F. An applicant for licensure shall furnish documentation as prescribed by the board by rule that the applicant has received at least twenty-four months in post-master's degree work experience in the practice of professional counseling under supervision that includes at least one thousand six hundred hours of direct client contact and that meets the requirements prescribed by the board by rule. An applicant may use a doctoral-clinical internship to satisfy the requirement for one year of work experience under supervision.

G. In addition to the requirements of subsection F of this section, the applicant must have at least one hundred hours of clinical supervision as prescribed by the board by rule. For the direct client contact hours, not more than four hundred hours may be in psychoeducation.

H. The applicant's supervisor shall attest on a board-approved form that the applicant both:

1. Was observed during supervised hours to have demonstrated satisfactory competency in clinical documentation, consultation, collaboration and coordination of care related to clients to whom the applicant provided direct care.

2. Has a rating of at least satisfactory in overall performance.

I. An applicant who is deficient in hours required pursuant to subsection B of this section may satisfy those requirements by successfully completing post-master's degree coursework.

J. An applicant who completed a degree before July 1, 1989 and whose course of study did not include a practicum may substitute a one-year doctoral-clinical internship or an additional year of documented post-master's degree work experience in order to satisfy the requirements of subsection B of this section.

32-3303. Licensed associate counselor; licensure; requirements; supervision

A. A person who wishes to be licensed by the board to engage in the practice of professional counseling as a licensed associate counselor shall satisfy the requirements of section 32-3301, subsections B, H and I and pass an examination approved by the board.

B. A licensed associate counselor shall only practice under direct supervision as prescribed by the board.

32-3306. Licensed professional counselors; licensure compact

The counseling compact is enacted into law as follows:

SECTION 1. PURPOSE

A. The purpose of this compact is to facilitate interstate practice of licensed professional counselors with the goal of improving public access to professional counseling services. The practice of professional counseling occurs in the state where the client is located at the time of the counseling services. The compact preserves the regulatory authority of states to protect public health and safety through the current system of state licensure.

B. This compact is designed to achieve the following objectives:

1. Increase public access to professional counseling services by providing for the mutual recognition of other member state licenses.

2. Enhance the states' ability to protect the public's health and safety.

3. Encourage the cooperation of member states in regulating multistate practice for licensed professional counselors.

4. Support spouses of relocating active duty military personnel.

5. Enhance the exchange of licensure, investigative and disciplinary information among member states.

6. Allow for the use of telehealth technology to facilitate increased access to professional counseling services.

7. Support the uniformity of professional counseling licensure requirements throughout the states to promote public safety and public health benefits.

8. Invest all member states with the authority to hold a licensed professional counselor accountable for meeting all state practice laws in the state in which the client is located at the time care is rendered through the mutual recognition of member state licenses.

9. Eliminate the necessity for licenses in multiple states.

10. Provide opportunities for interstate practice by licensed professional counselors who meet uniform licensure requirements.

SECTION 2. DEFINITIONS

As used in this compact, and except as otherwise provided, the following definitions shall apply:

1. "Active duty military" means full-time duty status in the active uniformed service of the United States, including members of the national guard and reserve on active duty orders pursuant to 10 United States Code chapters 1209 and 1211.

2. "Adverse action" means any administrative, civil, equitable or criminal action allowed by a state's laws that is imposed by a licensing board or other authority against a licensed professional counselor, including actions against an individual's license or privilege to practice such as revocation, suspension, probation, monitoring of the licensee, limit on the licensee's practice or any other encumbrance on licensure affecting a licensed professional counselor's authorization to practice, including issuance of a cease and desist action.

3. "Alternative program" means a nondisciplinary monitoring or practice remediation process approved by a professional counseling licensing board to address impaired practitioners.

4. "Continuing competence/education" means a requirement, as a condition of license renewal, to provide evidence of participation in, and completion of, educational and professional activities relevant to a practice or area of work.

5. "Counseling compact commission" or "commission" means the national administrative body whose membership consists of all states that have enacted the compact.

6. "Current significant investigative information" means investigative information that either:

(a) A licensing board, after a preliminary inquiry that includes notification and an opportunity for the licensed professional counselor to respond, if required by state law, has reason to believe is not groundless and, if proved true, would indicate more than a minor infraction.

(b) Indicates that the licensed professional counselor represents an immediate threat to public health and safety regardless of whether the licensed professional counselor has been notified and had an opportunity to respond.

7. "Data system" means a repository of information about licensees, including continuing education, examination, licensure, investigative, privilege to practice and adverse action information.

8. "Encumbered license" means a license in which an adverse action restricts the practice of licensed professional counseling by the licensee and the adverse action has been reported to the national practitioners data bank.

9. "Encumbrance" means a revocation or suspension of, or any limit on, the full and unrestricted practice of licensed professional counseling by a licensing board.

10. "Executive committee" means a group of directors elected or appointed to act on behalf of and within the powers granted to them by the commission.

11. "Home state" means the member state that is the licensee's primary state of residence.

12. "Impaired practitioner" means an individual who has a condition that may impair the individual's ability to practice as a licensed professional counselor without some type of intervention and that may include alcohol or drug dependence, a mental health impairment and a neurological or physical impairment.

13. "Investigative information" means information, records and documents received or generated by a professional counseling licensing board pursuant to an investigation.

14. "Jurisprudence requirement" means, if required by a member state, the assessment of an individual's knowledge of the laws and rules governing the practice of professional counseling in a state.

15. "Licensed professional counselor" means a counselor who is licensed by a member state, regardless of the title used by that state, to independently assess, diagnose and treat behavioral health conditions.

16. "Licensee" means an individual who currently holds an authorization from a state to practice as a licensed professional counselor.

17. "Licensing board" means the agency of a state, or the equivalent, that is responsible for licensing and regulating licensed professional counselors.

18. "Member state" means a state that has enacted the compact.

19. "Privilege to practice" means a legal authorization that is equivalent to a license and that authorizes the practice of professional counseling in a remote state.

20. "Professional counseling" means the assessment, diagnosis and treatment of behavioral health conditions by a licensed professional counselor.

21. "Remote state" means a member state other than the home state where a licensee is exercising or seeking to exercise the privilege to practice.

22. "Rule" means a regulation promulgated by the commission that has the force of law.

23. "Single-state license" means a licensed professional counselor license issued by a member state that authorizes practice only within the issuing state and does not include a privilege to practice in any other member state.

24. "State" means any state, commonwealth, district or territory of the United States that regulates the practice of professional counseling.

25. "Telehealth" means the application of telecommunication technology to deliver professional counseling services remotely to assess, diagnose and treat behavioral health conditions.

26. "Unencumbered license" means a license that authorizes a licensed professional counselor to engage in the full and unrestricted practice of professional counseling.

SECTION 3. STATE PARTICIPATION IN THE COMPACT

A. To participate in the compact, a state must currently do all of the following:

1. License and regulate licensed professional counselors.

2. Require licensees to pass a nationally recognized exam approved by the commission.

3. Require licensees to have a sixty-semester-hour or ninety-quarter-hour master's degree in counseling or sixty semester hours or ninety quarter hours of graduate coursework, including in the following topic areas:

(a) Professional counseling orientation and ethical practice.

(b) Social and cultural diversity.

(c) Human growth and development.

(d) Career development.

(e) Counseling and helping relationships.

(f) Group counseling and group work.

(g) Diagnosis and treatment.

(h) Assessment and testing.

(i) Research and program evaluation.

(j) Other areas as determined by the commission.

4. Require licensees to complete a supervised postgraduate professional experience as defined by the commission.

5. Have a mechanism in place for receiving and investigating complaints about licensees.

B. A member state shall do all of the following:

1. Participate fully in the commission's data system, including using the commission's unique identifier as defined in rules.

2. Notify the commission, in compliance with the terms of the compact and rules, of any adverse action or the availability of investigative information regarding a licensee.

3. Implement or use procedures for considering the criminal history records of applicants for an initial privilege to practice. These procedures shall include the submission of fingerprints or other biometric-based information by applicants for the purpose of obtaining an applicant's criminal history record information from the federal bureau of investigation and the agency responsible for retaining that state's criminal records and shall include the following:

(a) A member state must fully implement a criminal background check requirement within a time frame established by rule by receiving the results of the federal bureau of investigation record search and using the results in making licensure decisions.

(b) Communication between a member state and the commission and among member states regarding the verification of eligibility for licensure through the compact shall not include any information received from the federal bureau of investigation relating to a federal criminal records check performed by a member state under Public Law 92-544.

4. Comply with the rules of the commission.

5. Require an applicant to obtain or retain a license in the home state and meet the home state's qualifications for licensure or licensure renewal, as well as all other applicable state laws.

6. Grant the privilege to practice to a licensee holding a valid unencumbered license in another member state in accordance with the terms of the compact and rules.

7. Provide for the attendance of the state's commissioner to the counseling compact commission meetings.

C. Member states may charge a fee for granting the privilege to practice.

D. Individuals not residing in a member state shall continue to be able to apply for a member state's single-state license as provided under the laws of each member state. The single-state license granted to these individuals shall not be recognized as granting a privilege to practice professional counseling in any other member state.

E. This compact does not affect the requirements established by a member state for issuing a single-state license.

F. A license issued to a licensed professional counselor by a home state to a resident in that state shall be recognized by each member state as authorizing the licensed professional counselor to practice professional counseling under a privilege to practice in each member state.

SECTION 4. PRIVILEGE TO PRACTICE

A. To exercise the privilege to practice under the terms and provisions of the compact, the licensee shall meet all of the following:

1. Hold a license in the home state.

2. Have a valid United States social security number or national practitioner identifier.

3. Be eligible for a privilege to practice in any member state in accordance with subsections D, G and H of this section.

4. Not have had any encumbrance or restriction against any license or privilege to practice within the previous two years.

5. Notify the commission that the licensee is seeking the privilege to practice within a remote state or states.

6. Pay any applicable fees, including any state fee, for the privilege to practice.

7. Meet any continuing competence/education requirements established by the home state.

8. Meet any jurisprudence requirements established by the remote state or states in which the licensee is seeking a privilege to practice.

9. Report to the commission any adverse action, encumbrance or restriction taken on the license by any nonmember state within thirty days after the date the action is taken.

B. The privilege to practice is valid until the expiration date of the home state license. The licensee must comply with the requirements of subsection A of this section to maintain the privilege to practice in the remote state.

C. A licensee providing professional counseling in a remote state under the privilege to practice shall adhere to the laws and regulations of the remote state.

D. A licensee providing professional counseling services in a remote state is subject to that state's regulatory authority. A remote state may, in accordance with due process and that state's laws, remove a licensee's privilege to practice in the remote state for a specific period of time, impose fines and civil penalties or take any other necessary actions to protect the health and safety of its citizens, or any combination of these actions. The licensee may be ineligible for a privilege to practice in any member state until the specific time for removal has passed and all fines and civil penalties are paid.

E. If a home state license is encumbered, the licensee shall lose the privilege to practice in any remote state until both of the following occur:

1. The home state license is no longer encumbered.

2. The licensee has not had any encumbrance or restriction against any license or privilege to practice within the previous two years.

F. Once an encumbered license in the home state is restored to good standing, the licensee must meet the requirements of subsection A of this section to obtain a privilege to practice in any remote state.

G. If a licensee's privilege to practice in any remote state is removed, the individual may lose the privilege to practice in all other remote states until all of the following occur:

1. The specific period of time for which the privilege to practice was removed has ended.

2. All fines and civil penalties have been paid.

3. The licensee has not had any encumbrance or restriction against any license or privilege to practice within the previous two years.

H. Once the requirements of subsection G of this section have been met, the licensee must meet the requirements in subsection A of this section to obtain a privilege to practice in a remote state.

SECTION 5. OBTAINING A NEW HOME STATE LICENSE BASED

ON A PRIVILEGE TO PRACTICE

A. A licensed professional counselor may hold a home state license, which allows for a privilege to practice in other member states, in only one member state at a time.

B. If a licensed professional counselor changes the primary state of residence by moving between two member states, all of the following must occur:

1. The licensed professional counselor shall file an application for obtaining a new home state license based on a privilege to practice, pay all applicable fees and notify the current and new home state in accordance with applicable rules adopted by the commission.

2. On receipt of an application for obtaining a new home state license by virtue of a privilege to practice, the new home state shall verify that the licensed professional counselor meets the pertinent criteria outlined in section 4 of this compact via the data system, without need for primary source verification except for all of the following:

(a) A federal bureau of investigation fingerprint-based criminal background check if not previously performed or updated pursuant to applicable rules adopted by the commission in accordance with Public Law 92-544.

(b) Any other criminal background check as required by the new home state.

(c) Completion of any requisite jurisprudence requirements of the new home state.

3. The former home state shall convert the former home state license into a privilege to practice once the new home state has activated the new home state license in accordance with applicable rules adopted by the commission.

4. Notwithstanding any other provision of this compact, if the licensed professional counselor cannot meet the criteria in section 4 of this compact, the new home state may apply its requirements for issuing a new single-state license.

5. The licensed professional counselor shall pay all applicable fees to the new home state in order to be issued a new home state license.

C. If a licensed professional counselor changes the primary state of residence by moving from a member state to a nonmember state, or from a nonmember state to a member state, the state criteria apply for issuance of a single-state license in the new state.

D. This compact does not interfere with a licensee's ability to hold a single-state license in multiple states. For the purposes of this compact, a licensee shall have only one home state license.

E. This compact does not affect the requirements established by a member state for the issuance of a single-state license.

SECTION 6. ACTIVE DUTY MILITARY PERSONNEL AND THEIR SPOUSES

Active duty military personnel and their spouses shall designate a home state where the individual has a current license in good standing. The individual may retain the home state designation during the period the service member is on active duty. After designating a home state, the individual shall change the individual's home state only by applying for licensure in the new state or through the process outlined in section 5 of this compact.

SECTION 7. COMPACT PRIVILEGE TO PRACTICE TELEHEALTH

A. Member states shall recognize the right of a licensed professional counselor who is licensed by a home state in accordance with section 3 of this compact and under rules promulgated by the commission to practice professional counseling in any member state via telehealth under a privilege to practice as provided in the compact and rules promulgated by the commission.

B. A licensee providing professional counseling services in a remote state under the privilege to practice shall adhere to the laws and regulations of the remote state.

SECTION 8. ADVERSE ACTIONS

A. In addition to the other powers conferred by state law, a remote state shall have the authority, in accordance with existing state due process law, to:

1. Take adverse action against a licensed professional counselor's privilege to practice within that member state.

2. Issue subpoenas for both hearings and investigations that require the attendance and testimony of witnesses as well as the production of evidence. Subpoenas issued by a licensing board in a member state for the attendance and testimony of witnesses or the production of evidence from another member state shall be enforced in the latter state by any court of competent jurisdiction, according to the practice and procedures of that court applicable to subpoenas issued in proceedings pending before it. The issuing authority shall pay any witness fees, travel expenses, mileage and other fees required by the service statutes of the state in which the witnesses or evidence is located.

3. Only the home state shall have the power to take adverse action against a licensed professional counselor's license issued by the home state.

B. For purposes of taking adverse action, the home state shall give the same priority and effect to reported conduct received from a member state as it would if the conduct had occurred within the home state and shall apply its own state laws to determine appropriate action.

C. The home state shall complete any pending investigations of a licensed professional counselor who changes the primary state of residence during the course of the investigations. The home state shall also have the authority to take appropriate action and shall promptly report the conclusions of the investigations to the administrator of the data system. The administrator of the coordinated licensure information system shall promptly notify the new home state of any adverse actions.

D. A member state, if otherwise allowed by state law, may recover from the affected licensed professional counselor the costs of investigations and dispositions of cases resulting from any adverse action taken against that licensed professional counselor.

E. A member state may take adverse action based on the factual findings of the remote state, provided that the member state follows its own procedures for taking the adverse action.

F. With respect to joint investigations:

1. In addition to the authority granted to a member state by its respective professional counseling practice act or other applicable state law, any member state may participate with other member states in joint investigations of licensees.

2. Member states shall share any investigative, litigation or compliance materials in furtherance of any joint or individual investigation initiated under this compact.

G. If adverse action is taken by the home state against the license of a licensed professional counselor, the licensed professional counselor's privilege to practice in all other member states shall be deactivated until all encumbrances have been removed from the home state license. All home state disciplinary orders that impose adverse action against the license of a licensed professional counselor shall include a statement that the licensed professional counselor's privilege to practice is deactivated in all member states during the pendency of the order.

H. If a member state takes adverse action, it shall promptly notify the administrator of the data system. The administrator of the data system shall promptly notify the home state of any adverse actions by remote states.

I. This compact does not override a member state's decision that participation in an alternative program may be used instead of adverse action.

SECTION 9. ESTABLISHMENT OF COUNSELING COMPACT COMMISSION

A. The compact member states hereby create and establish a joint public agency known as the counseling compact commission, to which all of the following apply:

1. The commission is an instrumentality of the compact states.

2. Venue is proper and judicial proceedings by or against the commission shall be brought solely and exclusively in a court of competent jurisdiction where the principal office of the commission is located. The commission may waive venue and jurisdictional defenses to the extent it adopts or consents to participate in alternative dispute resolution proceedings.

3. This compact shall not be construed to waive sovereign immunity.

B. Membership, voting and meetings of the commission are as follows:

1. Each member state shall have and be limited to one delegate selected by that member state's licensing board.

2. The delegate shall be either:

(a) A current member of the licensing board at the time of appointment who is a licensed professional counselor or public member.

(b) An administrator of the licensing board.

3. Any delegate may be removed or suspended from office as provided by the law of the state from which the delegate is appointed.

4. The member state licensing board shall fill any vacancy occurring on the commission within sixty days.

5. Each delegate shall be entitled to one vote with regard to the promulgation of rules and creation of bylaws and shall otherwise have an opportunity to participate in the business and affairs of the commission.

6. A delegate shall vote in person or by such other means as provided in the bylaws. The bylaws may provide for delegates' participation in meetings by telephone or other means of communication.

7. The commission shall meet at least once during each calendar year. Additional meetings shall be held as set forth in the bylaws.

8. The commission shall by rule establish a term of office for delegates and may by rule establish term limits.

C. The commission shall have the following powers and duties:

1. Establish the fiscal year of the commission.

2. Establish bylaws.

3. Maintain its financial records in accordance with the bylaws.

4. Meet and take such actions as are consistent with the provisions of this compact and the bylaws.

5. Promulgate rules that shall be binding to the extent and in the manner provided for in this compact.

6. Bring and prosecute legal proceedings or actions in the name of the commission, provided that the standing of any state licensing board to sue or be sued under applicable law is not affected.

7. Purchase and maintain insurance and bonds.

8. Borrow, accept or contract for services of personnel, including employees of a member state.

9. Hire employees, elect or appoint officers, fix compensation, define duties, grant such individuals appropriate authority to carry out the purposes of this compact and establish the commission's personnel policies and programs relating to conflicts of interest, qualifications of personnel and other related personnel matters.

10. Accept any and all appropriate donations and grants of money, equipment, supplies, materials and services and receive, use and dispose of the same. The commission shall avoid at all times any appearance of impropriety or conflict of interest.

11. Lease, purchase, accept appropriate gifts or donations of, or otherwise own, hold, improve or use, any property, real, personal or mixed. The commission shall avoid at all times any appearance of impropriety.

12. Sell, convey, mortgage, pledge, lease, exchange, abandon or otherwise dispose of any property real, personal or mixed.

13. Establish a budget and make expenditures.

14. Borrow monies.

15. Appoint committees, including standing committees, composed of members, state regulators, state legislators or their representatives and consumer representatives, and such other interested persons as may be designated in this compact and the bylaws.

16. Provide and receive information from and cooperate with law enforcement agencies.

17. Establish and elect an executive committee.

18. Perform such other functions as may be necessary or appropriate to achieve the purposes of this compact consistent with the state regulation of professional counseling licensure and practice.

D. The following apply to the executive committee of the commission:

1. The executive committee shall have the power to act on behalf of the commission according to the terms of this compact.

2. The executive committee shall be composed of up to eleven members, including seven voting members who are elected by the commission from the current membership of the commission and up to four ex officio, nonvoting members from four recognized national professional counselor organizations who are selected by their respective organizations.

3. The commission may remove any member of the executive committee as provided in the bylaws.

4. The executive committee shall meet at least annually.

5. The executive committee shall have all of the following duties and responsibilities:

(a) Recommend to the entire commission changes to the rules or bylaws, changes to this compact legislation, fees paid by compact member states, such as annual dues, and any commission compact fee charged to licensees for the privilege to practice.

(b) Ensure that compact administration services are appropriately provided, contractual or otherwise.

(c) Prepare and recommend the budget.

(d) Maintain financial records on behalf of the commission.

(e) Monitor compact compliance of member states and provide compliance reports to the commission.

(f) Establish additional committees as necessary.

(g) Other duties as provided in rules or bylaws.

E. The following apply to meetings of the commission:

1. All meetings shall be open to the public, and public notice of meetings shall be given in the same manner as required under the rulemaking provisions in section 11 of this compact.

2. The commission, the executive committee and other committees of the commission may convene in a closed, nonpublic meeting if the commission, executive committee or other committee of the commission must discuss any of the following:

(a) Noncompliance of a member state with its obligations under this compact.

(b) The employment, compensation, discipline or other matters, practices or procedures related to specific employees or other matters related to the commission's internal personnel practices and procedures.

(c) Current, threatened or reasonably anticipated litigation.

(d) Negotiation of contracts for the purchase, lease or sale of goods, services or real estate.

(e) Accusing any person of a crime or formally censuring any person.

(f) Disclosure of trade secrets or commercial or financial information that is privileged or confidential.

(g) Disclosure of information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy.

(h) Disclosure of investigative records compiled for law enforcement purposes.

(i) Disclosure of information related to any investigative reports prepared by or on behalf of or for use of the commission or other committee charged with responsibility of investigation or determination of compliance issues pursuant to the compact.

(j) Matters specifically exempted from disclosure by federal or member state statute.

3. If a meeting or portion of a meeting is closed pursuant to this subsection, the commission's legal counsel or designee shall certify that the meeting may be closed and shall reference each relevant exempting provision.

4. The commission shall keep minutes that fully and clearly describe all matters discussed in a meeting and shall provide a full and accurate summary of actions taken, and the reasons therefore, including a description of the views expressed. All documents considered in connection with an action shall be identified in the minutes. All minutes and documents of a closed meeting shall remain under seal, subject to release by a majority vote of the commission or an order of a court of competent jurisdiction.

F. With respect to financing, the commission:

1. Shall pay, or provide for the payment of, the reasonable expenses of its establishment, organization and ongoing activities.

2. May accept any and all appropriate revenue sources, donations and grants of monies, equipment, supplies, materials and services.

3. May levy on and collect an annual assessment from each member state or impose fees on other parties to cover the cost of the operations and activities of the commission and its staff, which must be in a total amount sufficient to cover its annual budget as approved each year for which revenue is not provided by other sources. The aggregate annual assessment amount shall be allocated based on a formula to be determined by the commission. The commission shall promulgate a rule that is binding on all member states.

4. Shall not incur obligations of any kind before securing the monies adequate to meet those obligations or pledge the credit of any of the member states, except by and with the authority of the member state.

5. Shall keep accurate accounts of all receipts and disbursements of monies. The receipts and disbursements of the commission are subject to the audit and accounting procedures established under its bylaws. All receipts and disbursements of monies handled by the commission shall be audited yearly by a certified or licensed public accountant, and the report of the audit shall be included in and become part of the annual report of the commission.

G. With respect to qualified immunity, defense and indemnification:

1. The members, officers, executive director, employees and representatives of the commission shall be immune from suit and liability, either personally or in their official capacity, for any claim for damage to or loss of property or personal injury or other civil liability caused by or arising out of any actual or alleged act, error or omission that occurred, or that the person against whom the claim is made had a reasonable basis for believing occurred, within the scope of commission employment, duties or responsibilities. This paragraph does not protect any such person from suit or liability for any damage, loss, injury or liability caused by that person's intentional or wilful or wanton misconduct.

2. The commission shall defend any member, officer, executive director, employee or representative of the commission in any civil action seeking to impose liability arising out of any actual or alleged act, error or omission that occurred within the scope of commission employment, duties or responsibilities, or that the person against whom the claim is made had a reasonable basis for believing occurred, within the scope of commission employment, duties or responsibilities. This paragraph does not prohibit that person from retaining his or her own counsel if the actual or alleged act, error or omission did not result from that person's intentional or wilful or wanton misconduct.

3. The commission shall indemnify and hold harmless any member, officer, executive director, employee or representative of the commission for the amount of any settlement or judgment obtained against that person arising out of any actual or alleged act, error or omission that occurred within the scope of commission employment, duties or responsibilities, or that the person against whom the claim is made had a reasonable basis for believing occurred, within the scope of commission employment, duties or responsibilities if the actual or alleged act, error or omission did not result from that person's intentional or wilful or wanton misconduct.

SECTION 10. DATA SYSTEM

A. The commission shall provide for the development, maintenance, operation and use of a coordinated database and reporting system containing licensure, adverse action and investigative information on all licensed individuals in member states.

B. Notwithstanding any other provision of state law to the contrary, a member state shall submit a uniform data set to the data system on all individuals to whom this compact applies as required by the rules of the commission, including all of the following:

1. Identifying information.

2. Licensure data.

3. Adverse actions against a license or privilege to practice.

4. Nonconfidential information related to alternative program participation.

5. Any denial of application for licensure and the reasons for such denial.

6. Current significant investigative information.

7. Other information that may facilitate the administration of this compact, as determined by the rules of the commission.

C. Investigative information pertaining to a licensee in any member state shall be available only to other member states.

D. The commission shall promptly notify all member states of any adverse action taken against a licensee or an individual applying for a license. Adverse action information pertaining to a licensee in any member state shall be available to any other member state.

E. Member states contributing information to the data system may designate information that may not be shared with the public without the express permission of the contributing state.

F. Any information submitted to the data system that is subsequently required to be expunged by the laws of the member state contributing the information shall be removed from the data system.

SECTION 11. RULEMAKING

A. The commission shall promulgate reasonable rules in order to effectively and efficiently achieve the purpose of the compact. If the commission exercises its rulemaking authority in a manner that is beyond the scope of the purposes of this compact or the powers granted under the compact, the action taken by the commission is invalid and has no force or effect.

B. The commission shall exercise its rulemaking powers pursuant to the criteria set forth in this section and the rules adopted pursuant to this section. Rules and amendments to the rules shall become binding as of the date specified in each rule or amendment.

C. If a majority of the legislatures of the member states rejects a rule by enacting a statute or resolution in the same manner used to adopt the compact within four years after the date of adoption of the rule, the rule has no further force and effect in any member state.

D. Rules or amendments to the rules shall be adopted at a regular or special meeting of the commission.

E. Before promulgating and adopting a final rule, the commission shall file a notice of a proposed rulemaking at least thirty days before the meeting at which the rule will be considered and voted on. Notice must be given on both:

1. The commission's website or other publicly accessible platform.

2. The website of each member state's licensing board or other publicly accessible platform or the publication in which each state would otherwise publish proposed rules.

F. The notice of proposed rulemaking shall include all of the following:

1. The proposed time, date and location of the meeting in which the rule will be considered and voted on.

2. The text of the proposed rule or amendment and the reason for the proposed rule.

3. A request for comments on the proposed rule from any interested person.

4. The manner in which interested persons may submit notice to the commission of their intention to attend the public hearing and any written comments.

G. Before adopting a proposed rule, the commission shall allow persons to submit written data, facts, opinions and arguments, which shall be made available to the public.

H. The commission shall grant an opportunity for a public hearing before it adopts a rule or amendments to a rule if a hearing is requested by one of the following:

1. At least twenty-five persons.

2. A state or federal governmental subdivision or agency.

3. An association having at least twenty-five members.

I. If a hearing is held on the proposed rule or amendment to a rule, the commission shall publish the place, time and date of the scheduled public hearing. If the hearing is held via electronic means, the commission shall publish the mechanism for access to the electronic hearing. The following apply with respect to hearings:

1. All persons wishing to be heard at the hearing shall notify the executive director of the commission or other designated member in writing of their desire to appear and testify at the hearing at least five business days before the scheduled date of the hearing.

2. Hearings shall be conducted in a manner providing each person who wishes to comment with a fair and reasonable opportunity to comment orally or in writing.

3. All hearings shall be recorded and a copy of the recording made available on request.

4. This section does not require a separate hearing on each rule. Rules may be grouped for the convenience of the commission at hearings required by this section.

J. Following the scheduled hearing date, or by the close of business on the scheduled hearing date if the hearing was not held, the commission shall consider all written and oral comments received.

K. If a written notice of intent to attend the public hearing by interested parties is not received, the commission may proceed with promulgation of the proposed rule without a public hearing.

L. The commission shall, by majority vote of all members, take final action on the proposed rule and shall determine the effective date of the rule, if any, based on the rulemaking record and the full text of the rule.

M. On determining that an emergency exists, the commission may consider and adopt an emergency rule without prior notice, an opportunity for comment or a hearing, except that the usual rulemaking procedures provided in this compact and in this section shall be retroactively applied to the rule as soon as reasonably possible but not later than ninety days after the effective date of the rule. For the purposes of this subsection, an emergency rule is one that must be adopted immediately in order to do one of the following:

1. Meet an imminent threat to public health, safety or welfare.

2. Prevent a loss of commission or member state monies.

3. Meet a deadline for the promulgation of an administrative rule that is established by federal law or rule.

4. Protect public health and safety.

N. The commission or an authorized committee of the commission may direct revisions to a previously adopted rule or amendment for the purposes of correcting typographical errors, errors in format, errors in consistency or grammatical errors. Public notice of any revisions shall be posted on the commission's website. The revision is subject to challenge by any person for a period of thirty days after posting. The revision may be challenged only on grounds that the revision results in a material change to a rule. A challenge shall be made in writing and delivered to the chairperson of the commission before the end of

the notice period. If no challenge is made, the revision will take effect without further action. If the revision is challenged, the revision may not take effect without the approval of the commission.

SECTION 12. OVERSIGHT, DISPUTE RESOLUTION AND ENFORCEMENT

A. Oversight is as follows:

1. The executive, legislative and judicial branches of state government in each member state shall enforce this compact and take all actions necessary and appropriate to effectuate the compact's purposes and intent. The provisions of this compact and the rules promulgated under this compact shall have standing as statutory law.

2. All courts shall take judicial notice of the compact and the rules in any judicial or administrative proceeding in a member state pertaining to the subject matter of this compact that may affect the powers, responsibilities or actions of the commission.

3. The commission is entitled to receive service of process in any such proceeding and shall have standing to intervene in such a proceeding for all purposes. Failure to provide service of process to the commission shall render a judgment or order void as to the commission, this compact or promulgated rules.

B. If the commission determines that a member state has defaulted in the performance of its obligations or responsibilities under this compact or the promulgated rules, the commission shall do both of the following:

1. Provide written notice to the defaulting state and other member states of the nature of the default, the proposed means of curing the default and any other action to be taken by the commission.

2. Provide remedial training and specific technical assistance regarding the default.

C. If a state in default fails to cure the default, the defaulting state may be terminated from the compact on an affirmative vote of a majority of the member states, and all rights, privileges and benefits conferred by this compact may be terminated on the effective date of termination. A cure of the default does not relieve the offending state of obligations or liabilities incurred during the period of default.

D. Termination of membership in the compact shall be imposed only after all other means of securing compliance have been exhausted. Notice of intent to suspend or terminate shall be given by the commission to the governor, the majority and minority leaders of the defaulting state's legislature and each of the member states.

E. A state that has been terminated is responsible for all assessments, obligations and liabilities incurred through the effective date of termination, including obligations that extend beyond the effective date of termination.

F. The commission shall not bear any costs related to a state that is found to be in default or that has been terminated from the compact, unless agreed on in writing between the commission and the defaulting state.

G. The defaulting state may appeal the action of the commission by petitioning the United States district court for the District of Columbia or the federal district where the commission has its principal offices. The prevailing party shall be awarded all costs of such litigation, including reasonable attorney fees.

H. On request by a member state, the commission shall attempt to resolve disputes related to the compact that arise among member states and between member and nonmember states. The commission shall promulgate a rule providing for both mediation and binding dispute resolution for disputes as appropriate.

I. Enforcement provisions of this compact are as follows:

1. The commission, in the reasonable exercise of its discretion, shall enforce the provisions and rules of this compact.

2. By majority vote, the commission may initiate legal action in the United States district court for the District of Columbia or the federal district where the commission has its principal offices against a member state in default to enforce compliance with the provisions of the compact and its promulgated rules and bylaws. The relief sought may include both injunctive relief and damages. If judicial enforcement is necessary, the prevailing party shall be awarded all costs of such litigation, including reasonable attorney fees.

3. The remedies under this section are not the exclusive remedies of the commission. The commission may pursue any other remedies available under federal or state law.

SECTION 13. DATE OF IMPLEMENTATION OF THE COUNSELING

COMPACT COMMISSION AND ASSOCIATED RULES, WITHDRAWAL

AND AMENDMENT

A. The compact is effective on the date the compact statute is enacted into law in the tenth member state. The provisions of the compact become effective at that time and are limited to the powers granted to the commission relating to assembly and the promulgation of rules. Thereafter, the commission shall meet and exercise rulemaking powers necessary to implement and administer the compact.

B. Any state that joins the compact after the commission's initial adoption of the rules is subject to the rules as they exist on the date on which the compact becomes law in that state. Any rule that has been previously adopted by the commission shall have the full force and effect of law on the day the compact becomes law in that state.

C. Any member state may withdraw from this compact by enacting a statute repealing the compact. The withdrawal of a member state:

1. Does not take effect until six months after enactment of the repealing statute.

2. Does not affect the continuing requirement of the withdrawing state's professional counseling licensing board to comply with the investigative and adverse action reporting requirements of this compact before the effective date of the withdrawal.

D. This compact does not invalidate or prevent any professional counseling licensure agreement or other cooperative arrangement between a member state and a nonmember state that does not conflict with the provisions of this compact.

E. This compact may be amended by the member states. An amendment to this compact does not become effective and binding on any member state until it is enacted into the laws of all member states.

SECTION 14. CONSTRUCTION AND SEVERABILITY

This compact shall be liberally construed so as to effectuate the purposes of the compact. The provisions of this compact are severable, and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any member state or of the United States or if the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact is held contrary to the constitution of any member state, the compact shall remain in full force and effect as to the remaining member states and in full force and effect as to the member state affected as to all severable matters.

SECTION 15. BINDING EFFECT OF COMPACT AND OTHER LAWS

A. A licensee providing professional counseling services in a remote state under the privilege to practice shall adhere to the laws and regulations, including scope of practice, of the remote state.

B. This compact does not prevent the enforcement of any other law of a member state that is not inconsistent with the compact.

C. Any laws in a member state that conflict with the compact are superseded to the extent of the conflict.

D. Any lawful actions of the commission, including all rules and bylaws properly promulgated by the commission, are binding on the member states.

E. All permissible agreements between the commission and the member states are binding in accordance with their terms.

F. If any provision of the compact exceeds the constitutional limits imposed on the legislature of any member state, the provision shall be ineffective to the extent of the conflict with the constitutional provision in question in that member state.

32-3311. Licensed marriage and family therapist; licensure; qualifications

A. A person who wishes to be licensed by the board to engage in the practice of marriage and family therapy as a licensed marriage and family therapist shall furnish documentation as prescribed by the board by rule that the person has:

1. Earned a master's or doctoral degree in behavioral science, including, but not limited to, marriage and family therapy, psychology, sociology, counseling and social work, granted by a regionally accredited college or university in a program accredited by the commission on accreditation for marriage and family therapy education or a degree based on a program of study that the board determines is substantially equivalent.

2. Completed one thousand six hundred hours of post-master's degree experience in at least twenty-four months in the practice of marriage and family therapy under supervision that meets the requirements prescribed by the board by rule. For the direct client contact hours, not more than four hundred hours may be in psychoeducation. The one thousand six hundred hours must consist of direct client contact and include at least one thousand hours of clinical experience with couples and families and at least one hundred hours of clinical supervision as prescribed by the board by rule.

3. Passed an examination approved by the board.

4. Provided an attestation from the person's supervisor on a board-approved form that the person both:

(a) Was observed during supervised hours to have demonstrated satisfactory competency in clinical documentation, consultation, collaboration and coordination of care related to clients to whom the person provided direct care.

(b) Has a rating of at least satisfactory in overall performance.

B. The curriculum for the master's or doctoral degree in behavioral science accepted by the board pursuant to subsection A, paragraph 1 of this section shall include a specified number of graduate courses as prescribed by the board by rule and shall be consistent with national standards of marriage and family therapy. Part of this course of study may be taken in a post-master's degree program as approved by the board.

C. The one thousand hours of clinical experience required by subsection A, paragraph 2 of this section may include one year in an approved marriage and family doctoral internship program.

32-3313. Licensed associate marriage and family therapist; licensure; requirements; supervision

A. A person who wishes to be licensed by the board to engage in the practice of marriage and family therapy as a licensed associate marriage and family therapist shall satisfy the requirements of section 32-3311, subsection A, paragraphs 1 and 3 and subsection B.

B. A licensed associate marriage and family therapist shall only practice under direct supervision as prescribed by the board.

32-3321. Licensed addiction technician; licensed associate addiction counselor; licensed independent addiction counselor; qualifications; supervision

A. A person who wishes to be licensed by the board to engage in the practice of addiction counseling as a licensed addiction technician shall present documentation as prescribed by the board by rule that the person has:

1. Received one of the following:

(a) An associate degree in addiction with an emphasis on counseling that meets the requirements as prescribed by the board by rule from a regionally accredited college or university.

(b) A bachelor's degree in a behavioral science with an emphasis on counseling that meets the requirements as prescribed by the board by rule from a regionally accredited college or university.

2. Passed an examination approved by the board.

B. A licensed addiction technician shall practice only under direct supervision as prescribed by the board.

C. The board may waive the education requirement for an applicant requesting licensure as an addiction technician if the applicant provides services pursuant to contracts or grants with the federal government under the authority of Public Law 93-638 (25 United States Code sections 5301 through 5332) or Public Law 94-437 (25 United States Code sections 1601 through 1683). A person who becomes licensed as an addiction technician pursuant to this subsection shall provide addiction services only to those persons who are eligible for services pursuant to Public Law 93-638 (25 United States Code sections 5301 through 5332) or Public Law 94-437 (25 United States Code sections 1601 through 1683).

D. A person who wishes to be licensed by the board to engage in the practice of addiction counseling as a licensed associate addiction counselor shall present evidence as prescribed by the board by rule that the person has:

1. Received one of the following:

(a) A bachelor's degree in a behavioral science with an emphasis on counseling that meets the requirements as prescribed by the board by rule from a regionally accredited college or university and present documentation as prescribed by the board by rule that the applicant has received at least one thousand six hundred hours of direct client contact work experience in at least twenty-four months in addiction counseling under supervision that meets the requirements prescribed by the board by rule. For the direct client contact hours, not more than four hundred hours may be in psychoeducation.

(b) A master's or higher degree in a behavioral science with an emphasis on counseling as prescribed by the board by rule from a regionally accredited college or university.

2. Passed an examination approved by the board.

3. Provided an attestation from the person's supervisor on a board-approved form that the person both:

(a) Was observed during supervised hours to have demonstrated satisfactory competency in clinical documentation, consultation, collaboration and coordination of care related to clients to whom the person provided direct care.

(b) Has a rating of at least satisfactory in overall performance.

E. A licensed associate addiction counselor shall practice only under direct supervision as prescribed by the board.

F. A person who wishes to be licensed by the board to engage in the practice of addiction counseling as a licensed independent addiction counselor shall:

1. Have received a master's or higher degree in a behavioral science with an emphasis on counseling, in a program that is approved by the board pursuant to section 32-3253 or that meets the requirements as prescribed by the board by rule, from a regionally accredited college or university.

2. Present documentation as prescribed by the board by rule that the applicant has received at least one thousand six hundred hours of work experience in at least twenty-four months in addiction counseling with direct client contact under supervision that meets the requirements as prescribed by the board by rule. For the direct client contact hours, not more than four hundred hours may be in psychoeducation.

3. Pass an examination approved by the board.

4. Provide an attestation from the person's supervisor on a board-approved form that the person both:

(a) Was observed during supervised hours to have demonstrated satisfactory competency in clinical documentation, consultation, collaboration and coordination of care related to clients to whom the person provided direct care.

(b) Has a rating of at least satisfactory in overall performance.

E-8.

VETERINARY MEDICAL EXAMINING BOARD
Title 3, Chapter 11, Articles 1-10

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **ARIZONA VETERINARY MEDICAL EXAMINING BOARD**
Title 3, Chapter 11

Summary

This Five-Year Review Report (5YRR) from the Arizona Veterinary Medical Examining Board (Board) covers fifty-three (53) rules and one (1) table in Title 3, Chapter 11. Specifically, these rules cover the following articles:

- Article 1. General Provisions
- Article 2. Application and Examination for Licensure
- Article 3. Temporary Permittees
- Article 4. Continuing Education Requirements
- Article 5. Standards of Practice
- Article 6. Veterinary Technicians
- Article 7. Veterinary Medical Premises and Equipment
- Article 8. Drug Dispensing
- Article 9. Investigations and Hearings
- Article 10. Animal Crematory Minimum Standards

In the Board's previous 5 YRR, the Board indicated that they would complete a rulemaking to address statutory changes and to improve the rules to be clearer, more concise, and more understandable. The Board has indicated that they did not complete their previous proposed

course of action. The Board has indicated that there were a couple reasons on why those actions were not completed. At the time of the last 5 YRR, the legislature had amended several statutes in 2019, the Board has indicated that the previous 5 YRR was based on the expectation that there would need to be changes. However, after further review the Board has indicated that the changes were not necessary because the statutes were detailed enough that new rules were not needed or that the rules were already in compliance with statute. With the exception of clarifying temporary licenses, the Board did not propose any amendments to the rules that were identified in the previous 5 YRR as needed as a result of statutory changes.

Other changes proposed by the Board in the last 5YRR included amendments that were expected to be made based on technological advances. The new technology was not implemented in the time between the previous report and this report making the changes unnecessary. The Board has indicated that they have a new electronic licensing system that should be launching in the coming months making some of those changes necessary once again. This system was supposed to launch earlier but there have been delays.

Proposed Action

The Board has indicated that the legislature has further amended the Board's statutes and that many of the rules now are no longer consistent with other rules and statutes, and cannot be enforced as written. The Board indicates that they intend on getting a final rulemaking to the Council by September 2025. The Board has indicated that this would be the earliest possible date because of some short term staffing deficiencies and working on the Board's sunset audit and new e-licensing system, which is a complete overhaul of their current system. The Board indicated to council staff that they have begun researching other states' rules to see if they can ease licensing burdens on professionals.

1. Has the agency analyzed whether the rules are authorized by statute?

The Board cites both general and specific statutory authority for these rules

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Board has completed no rulemaking since the Council approved the Board's last 5YRR on December 3, 2019, so there is no new economic, small business, and consumer impact estimate to assess. In the 5YRR approved on December 3, 2019, the Board indicated the economic impact of the rules was consistent with that projected when the rules were made. The Board states that it has received no information causing it to change that conclusion. The Board currently licenses 3,665 veterinarians, 1022 veterinary medical premises, and 17 animal crematories. Also, 1,489 veterinary technicians (CVT) hold certificates.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Board states that many of the costs of these rules, including paperwork and other compliance costs, to persons regulated by the rules result from statutory directives provided by the legislature. The Board indicates that some rule provisions impose a cost on persons regulated by the rules. The Board states that in each of these cases, the Board established the provision because the Board determined that doing so was necessary to protect health and safety, The Board believes each provision is the minimum necessary to achieve the underlying objective.

4. Has the agency received any written criticisms of the rules over the last five years?

The Board indicates it received no written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Board indicates the rules are clear, concise, and understandable except for the following:

- R3-11-401(C)
    - The Board indicates the rule is not clear in how college coursework counts towards continuing education requirements.
- R3-11-101
    - The Board states that the definition of Mobile Unit is not clear because the rule does not explicitly state that mobile unit is strictly a mobile veterinary practice like a housecall.
- R3-11-401(5)
    - The Board has indicated that the term interactive needs to be defined as it relates to continuing education, because it is not clear what an interactive program would consist of.
- R3-11-101(A)
    - The Board states that this rule contains an incorrect reference to statute, and needs to be changed from A.R.S. § 32-2281(E) to A.R.S. § 32-2281(F).

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Board indicates the rules are generally consistent with other rules and statutes except for the following:

- R3-11-204(C)
    - The Board states that the rule is not consistent with statute because the rule states that a renewal of a license must occur "no later than February 1" and A.R.S. § 32-2218(B0 states renewal must occur "before February 1".
- General
    - The rules currently do not specify the process for renewals for premises licenses.
- R3-11-203(B)

    - The Board has indicated that this rule requires veterinary applicants who are not students to submit a transcript or proof of completion of the program. This requirement is not in the rules for those who apply under the Foreign Veterinary Graduates or the Program for the Assessment of Veterinary Education Equivalence. These alternative pathways are authorized by A.R.S. § 32-2215(A)(1)
- R3-11-203(C)-(D)
    - The Board indicates that due to 2022 legislature changes to A.R.S. §§32-2215(A)(1), 32-2242(B), and 32-2248(1) the current rule requirement of finding an applicant good character or reputation, has integrity or is honest, moral, trustworthy or truthful to be eligible for a license, permit, certification, is now out of date.
- Article 3
    - The rules do not currently address the ability of the board to issue temporary licenses with that authority being given to the Board as a result of 2019 legislation that amended A.R.S. §§ 32-3121 through 32-3124.

7. <u>Has the agency analyzed the rules' effectiveness in achieving its objectives?</u>

The Board indicates the rules are effective in achieving their objectives.

8. <u>Has the agency analyzed the current enforcement status of the rules?</u>

The Board indicates the rules are generally enforced as written with the exception of the following:

- R3-11-203(B)
    - The Board has indicated that the rules do not allow an applicant to submit transcripts by methods other than mail, however the Board does in practice allow alternative methods as long as the transcripts are primary source documents.
- R3-11-203(C) and (D)
    - The rules still mention references to the requirements of letters of character reference, and these rules are not enforced because of conflicts with statute.
- R-3-11-203(A)
    - The Board indicates that the 45 day requirement for soon to be graduates is not enforced because of changes to the testing protocols for applicants. Testing now occurs more often so the requirement is no longer necessary.
- R3-11-403(6)
    - The Board indicates that the rule requires documents to be uploaded for online renewal. The online e-licensing system is not yet in place so this rule is not enforced. The Board has indicated that the new system should launch in 2025, and expect the rule to be enforced once it launches.
- General

- The rules contain references to outdated technologies and need to be amended. Additionally, once the new e-licensing system is launched most of the rules will need to be updated to reflect alternative means for submitting and receiving documents.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

Not applicable. There is no corresponding federal law.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Board's statutes require individualized licenses be issued, so a general permit is not applicable. Given that an alternative type of license is specifically authorized by state statute, the Board is in compliance with A.R.S. § 41-1037.

11. Conclusion

This Five-Year Review Report (5YRR) from the Arizona Veterinary Medical Examining Board (Board) covers fifty-three (53) rules and one (1) table in Title 3, Chapter 11. The Board has indicated that both statutory changes and improvements in Board technology necessitate that the rules be amended. The Board has indicated that the earliest possible date for submitting a Notice of Final Rulemaking to the Council would be September 2025. The Board has indicated to Council staff that this date is a result of a new licensing system and currently being engaged in a sunset audit.

The report meets the requirements of A.R.S. § 41-1056 and R1-6-301. Staff recommends approval of this report.

RE: Arizona Veterinary Medical Examining Board
A.A.C. Title 3. Agriculture, Chapter 11
Articles 1 through 10
Five Year Review Report

Dear Chairman Klein:

Please find enclosed the Five Year Review Report of the Arizona Veterinary Medical Examining Board ("Board") for A.A.C. Title 3, Chapter 11, which is due on October 28, 2024.

The Board hereby certifies compliance with A.R.S. § 41-1091.

For questions about this report, please contact the Board's Executive Director at 602-542-8150 or Victoria.whitmore@vetboard.az.gov.

Regards,

V. Whitmore

Victoria Whitmore
Executive Director

Enclosure

Five-Year-Review Report
A.A.C. Title 3. Agriculture
Chapter 11. Veterinary Medical Examining Board
Articles 1 through 10
October 2024

INTRODUCTION

The primary responsibility of the Board is to protect the public from unlawful, incompetent, unqualified, impaired, or unprofessional practitioners of veterinary medicine through licensure and regulation of the profession.

The Board has 53 rules and one table. The Board has completed no rulemakings since its last five-year-review report was approved by Council on December 3, 2019. The Board currently licenses 3665 veterinarians, 1022 veterinary medical premises, and 17 animal crematories. Also, 1,489 veterinary technicians (CVT) hold certificates. The Board's current appropriation is $787,900, which supports 6.0 FTEs.

Statute that generally authorizes the agency to make rules: A.R.S. § 32-2207(8)

1. Specific statute authorizing the rule:

R3-11-101.	Definitions: A.R.S. § 32-2207(8)
R3-11-102.	Board Meetings: A.R.S. § 32-2204
R3-11-103.	Evaluating Board Services: A.R.S. § 32-2207(8)(c)
R3-11-104.	Premise License: A.R.S. §§ 32-2271 and 32-2272
R3-11-105.	Fees: A.R.S. §§ 32-2207(9), 32-2215, 32-2217, 32-2218, 32-2219, 32-2242, 32-2247, 32-2248, 32-2250, 32-2272, and 32-2273
R3-11-107.	Residence and Veterinary Practice Addresses: A.R.S. §§ 32-2207(8) and 32-2233(B)(2)
R3-11-108.	Time-frames for Licensure, Certification, Permit, and Continuing Education Approvals: A.R.S. §§ 32-2207(3) and 41-1072 through 41-1079
Table 1.	Time-frames (in days): A.R.S. §§ 32-2207(3) and 41-1072 through 41-1079

R3-11-109. Arizona Ombudsman-Citizens' Aide: A.R.S. § 32-2207(10)

R3-11-201. Application for a Veterinary Medical License: A.R.S. §§ 32-2213, 32-2214, and 32-2215

R3-11-203. Documents Required with a License Application: A.R.S. §§ 32-2213, 32-2214, 32-2215, and 41-1080

R3-11-204. Renewal of Veterinary License: A.R.S. § 32-2218

R3-11-301. Application for a Temporary Permit: A.R.S. § 32-2216

R3-11-304. Extension of Temporary Permits: A.R.S. § 32-2216(B)

R3-11-305. "Good and Sufficient Reason" for Failure to Take a State Examination: A.R.S. § 32-2216(B)

R3-11-401. Continuing Education: A.R.S. § 32-2207(8)

R3-11-402. Approval of Continuing Education: A.R.S. § 32-2207(8)

R3-11-403. Documentation of Attendance: A.R.S. §32-2207(8)

R3-11-405. Waiver: A.R.S. § 32-2207(8)

R3-11-501. Ethical Standards: A.R.S. § 32-2232(12)

R3-11-502. Standards of Practice: A.R.S. §§ 32-2207(8)(a) and 32-2275

R3-11-603. Examination Committee: A.R.S. § 32-2243

R3-11-604. Examinations: A.R.S. § 32-2243

R3-11-605. Certified Veterinary Technician Services: A.R.S. §§ 32-2241 and 32-2245

R3-11-606. Application for Veterinary Technician Certification: A.R.S. § 32-2207(3) and 32-2242

R3-11-607. Renewal of Veterinary Technician Certificate: A.R.S. §§ 32-2207(3) and 32-2246

R3-11-701. General Veterinary Medical Premises Standards: A.R.S. §§ 32-2271 and 32-2275

R3-11-702. Equipment and Supplies: A.R.S. § 32-2275

R3-11-703. Maintenance Standards for a Veterinary Medical Premises: A.R.S. § 32-2275

R3-11-704. Surgical Equipment: A.R.S. § 32-2275

R3-11-705. Mobile Clinics: A.R.S. §§ 32-2271 and 32-2275

R3-11-706. Mobile Units: A.R.S. §§ 32-2271 and 32-2275

R3-11-707. Application for a Veterinary Medical Premises License: A.R.S. §§ 32-2272 and 32-2273

R3-11-801. Notification that Prescription-only Drugs or Controlled Substances May be Available at a Pharmacy: A.R.S. § 32-2281(B)

R3-11-802. Labeling Requirements: A.R.S. § 32-2281(D)

R3-11-803. Packaging Requirements: A.R.S. § 32-2281(D)

R3-11-805. Storage: A.R.S. § 32-2281(D)

R3-11-807. Dispensing a Controlled Substance or Prescription-only Drug: A.R.S. § 32-2281

R3-11-901. Investigations of Alleged Violations: A.R.S. §§ 32-2207(6) and 32-2237

R3-11-902. Informal Interview: A.R.S. §§ 32-2207(2) and 32-2234

R3-11-903. Formal Hearings: A.R.S. §§ 32-2207(2) and 32-2234

R3-11-904. Rehearing or Review of Decisions: A.R.S. § 41-1092.09

R3-11-905. Depositions, Issuance of Subpoenas, Service: A.R.S. § 32-2237(F)

R3-11-1001. Definitions: A.R.S. §§ 32-2291 through 32-2295

R3-11-1002. Obtaining an Animal Crematory License: A.R.S. §§ 32-2291 and 32-2292

R3-11-1003. Renewing an Animal Crematory License: A.R.S. § 32-2292(E)

R3-11-1004. Fees: A.R.S. § 32-2293

R3-11-1005. Minimum Standards for an Animal Crematory: A.R.S. § 32-2295

R3-11-1006. Minimum Operating Standards for an Animal Crematory: A.R.S. §§ 32-2297(A)(2) and 32-2295

R3-11-1007. Written Procedures Required: A.R.S. § 32-2295

R3-11-1008. Recordkeeping Requirements: A.R.S. §§ 32-2294(A)(3) and 32-2295

R3-11-1009. Change in Responsible Owner: A.R.S. § 32-2294(A)(1)

R3-11-1010. Change in Operator: A.R.S. § 32-2294(A)(1)

2. Objective of each rule:

RULE	OBJECTIVE
R3-11-101	Definitions: The objective of the rule is to define terms used in the rules that are not adequately explained by dictionary definitions.
R3-11-102	Board Meetings: The objective of this rule is to specify the month in which the Board will hold its annual meeting, the amount of notice it will provide regarding the date, time, and location of the annual meeting, and the location of notice of a special meeting.
R3-11-103	Evaluating Board Services: The objective of this rule is to inform individuals of the opportunity to evaluate the quality of services received from the Board.
R3-11-104	Premise License: The objective of this rule is to require that a medical premise license be maintained at the licensed premise.
R3-11-105	Fees: The objective of the rule is to specify the fees that the Board charges for its licensing activities.
R3-11-107	Residence and Veterinary Practice Addresses: The objective of this rule is to require a licensee or certificate holder to keep the Board informed of the licensee's or certificate holder's residential and practice addresses.
R3-11-108	Time-frames for Licensure, Certification, Permit, and Continuing Education Approvals: The objective of this rule is to specify the time frames within which the Board will act on a license, certificate, or permit application or application for

	approval of a continuing education course or conference.
Table 1	Time-frames (in days): The objective of this rule is to specify in table form the time frames within which the Board will act on a license, certificate, or permit application or application for approval of a continuing education course or conference.
R3-11-109	Arizona Ombudsman-Citizens' Aide: The objective of this rule is to specify the manner in which the Board will inform the public of the existence of the Arizona Ombudsman-Citizens' Aide.
R3-11-201	Application for a Veterinary Medical License: The objective of this rule is to specify the content of an application for a veterinary medical license and the time at which an application must be submitted.
R3-11-203	Documents Required with a License Application: The objective of this rule is to specify the documents that must accompany an application for licensure.
R3-11-204	Renewal of Veterinary License: The objective of this rule is to specify the requirements for renewal of a veterinary license, the manner in which renewal application is made, and consequences of failing to renew.
R3-11-301	Application for a Temporary Permit: The objective of this rule is to specify the requirements for applying for a temporary permit, which is available to an individual who has graduated from an accredited veterinary college but has not taken the state examination.
R3-11-304	Extension of Temporary Permits: The objective of this rule is to specify the circumstances under which the holder of a temporary permit may have the permit extended and to provide notice to holders of temporary permits that only one extension is permitted by law.
R3-11-305	"Good and Sufficient Reason" for Failure to Take a State Examination: The objective of this rule is to specify the circumstances the Board believes amount to "good and sufficient reason" for not taking the state examination.
R3-11-401	Continuing Education: The objective of this rule is to specify the number of hours of continuing education required for license and certificate renewal and to place limits on the number of hours by subject matter and instructional medium.
R3-11-402	Approval of Continuing Education: The objective of this rule is to identify continuing education the Board approves without application, the manner in which a continuing education provider may apply for Board approval, and the standards the Board uses to decide whether to approve continuing education.
R3-11-403	Documentation of Attendance: The objective of this rule is to specify the documentation of continuing education that a licensee or certificate holder must submit with a renewal application.
R3-11-405	Waiver: The objective of this rule is to specify the manner in which a licensee or certificate holder may request a waiver of the continuing education requirement and the criteria the Board uses to determine whether to grant a waiver.
R3-11-501	Ethical Standards: The objective of this rule is to protect the public by establishing ethical standards with which a veterinarian practicing under a license or permit must comply and specifying the consequences of failing to comply.
R3-11-502	Standards of Practice: The objective of this rule is to establish minimum standards for a veterinary practice.
R3-11-603	Examination Committee: The objective of this rule is to provide notice the Board may seek input from a committee of licensees and certificate holders regarding examination of applicants for certification.
R3-11-604	Examinations: The objective of this rule is to provide information to certification applicants regarding the examinations that must be passed to obtain certification.

R3-11-605	Certified Veterinary Technician Services: The objective of this rule is to specify that a certified veterinary technician may perform delegated tasks while under the direction, supervision, and control of a licensed veterinarian. The rule also specifies the tasks that may not be delegated to and performed by a certified veterinary technician.
R3-11-606	Application for Veterinary Technician Certification: The objective of this rule is to specify the application requirements for certification as a veterinary technician.
R3-11-607	Renewal of Veterinary Technician Certificate: The objective of this rule is to specify the requirements to renew a certificate as a veterinary technician and the consequences of failing to timely renew.
R3-11-701	General Veterinary Medical Premises Standards: The objective of this rule is to specify applicable minimum standards for operation of a veterinary medical premise.
R3-11-702	Equipment and Supplies: The objective of this rule is to require a responsible veterinarian to have at the veterinary medical premise the equipment and supplies necessary to provide the offered medical services.
R3-11-703	Maintenance Standards for a Veterinary Medical Premises: The objective of this rule is to establish minimum maintenance standards for a veterinary medical premise and require the responsible veterinarian to ensure compliance.
R3-11-704	Surgical Equipment: The objective of this rule is to specify the minimum surgical equipment required on a veterinary medical premise at which surgery is performed.
R3-11-705	Mobile Clinics: The objective of this rule is to specify the minimum standards applicable for operation of a mobile veterinary medical clinic and clarify that a mobile clinic is required to be licensed as a veterinary medical premise.
R3-11-706	Mobile Units: The objective of this rule is to specify minimum standards for storage and handling of drugs and surgical supplies and equipment for a mobile veterinary medical unit.
R3-11-707	Application for a Veterinary Medical Premises License: The objective of this rule is to specify the application requirements for a veterinary medical premise license and to provide notice that the Board will conduct an inspection of the veterinary medical premise.
R3-11-801	Notification that Prescription-only Drugs or Controlled Substances May be Available at a Pharmacy: The objective of this rule is to require a dispensing veterinarian to inform the owner or person responsible for an animal that a prescription-only drug may be available at a pharmacy rather than from the dispensing veterinarian, specifying the manner in which the information may be provided, and authorizing the dispensing veterinarian to provide a written prescription upon request.
R3-11-802	Labeling Requirements: The objective of this rule is to establish minimum labeling requirements for prescription-only drugs and controlled substances dispensed by a veterinarian.
R3-11-803	Packaging Requirements: The objective of this rule is to establish minimum packaging requirements for prescription-only drugs and controlled substances dispensed by a veterinarian.
R3-11-805	Storage: The objective of this rule is to establish minimum storage requirements for prescription-only drugs and controlled substances dispensed by a veterinarian.
R3-11-807	Dispensing a Controlled Substance or Prescription-only Drug: The objective of this rule is to clarify the dispensing activities that may be performed by a licensed veterinarian or an unlicensed individual.
R3-11-901	Investigations of Alleged Violations: The objective of this rule is to set forth the

	grounds on which an individual or the Board may complain of an alleged violation of statute or rule and to clarify the manner in which the Board initially responds to receipt of a complaint. The objective of the rule is to specify the Board's procedure for handling a complaint against a licensee and taking disciplinary action.
R3-11-902	Informal Interview: The objective of this rule is to specify the manner in which the Board conducts an informal interview.
R3-11-903	Formal Hearings: The objective of the rule is to specify the circumstances under which a complaint against a licensee leads to a formal hearing and the Board's procedure for conducting a formal hearing.
R3-11-904	Rehearing or Review of Decisions: The objective of this rule is to specify the procedures and standards for requesting a rehearing or review of a Board decision.
R3-11-905	Depositions, Issuance of Subpoenas, Service: The objective of this rule is to specify the process for requesting to take the deposition of an unavailable witness, issuing a subpoena, or making service of documents.
R3-11-1001	Definitions: The objective of the rule is to define terms used in the rules in a manner that is not explained adequately by a dictionary definition.
R3-11-1002	Obtaining an Animal Crematory License: The objective of this rule is to specify the application requirements for obtaining an animal crematory license.
R3-11-1003	Renewing an Animal Crematory License: The objective of this rule is to specify the requirements for renewing an animal crematory license and the consequences of failing to renew timely.
R3-11-1004	Fees: The objective of the rule is to specify the fees the Board charges for its animal crematory licensing activities.
R3-11-1005	Minimum Standards for an Animal Crematory: The objective of this rule is to establish minimum facility standards for an animal crematory.
R3-11-1006	Minimum Operating Standards for an Animal Crematory: The objective of this rule is to establish minimum operating standards for an animal crematory.
R3-11-1007	Written Procedures Required: The objective of this rule is to require the responsible owner of an animal crematory establish and maintain written procedures regarding operation of the crematory.
R3-11-1008	Recordkeeping Requirements: The objective of this rule is to establish minimum recordkeeping requirements for the responsible owner of an animal crematory.
R3-11-1009	Change in Responsible Owner: The objective of this rule is to provide notice that a change in responsible owner of an animal crematory automatically cancels the license and a new license must be obtained by the new responsible owner of the animal crematory.
R3-11-1010	Change in Operator: The objective of this rule is to ensure the Board has current information regarding the operator of an animal crematory.

3. Are the rules effective in achieving their objectives? Yes

The Board believes the rules are effective in achieving the Board's statutory purpose to protect the public and its animals through licensure and regulation of the veterinary medical profession with exceptions as outlined in the following sections.

4. Are the rules consistent with other rules and statutes? Mostly, yes

It was determined that the majority of the rules reviewed are consistent with both statutes and other Board rules; however, there were some inconsistencies noted:

- A.R.S. § 32-2218(B) related to veterinary license renewal states: "Failure to pay the license fee before February 1 following expiration of the license shall be a forfeiture of the license…," which conflicts with R3-11-204(C). The rule states that "no later than February 1 of every odd-numbered year, a licensee shall submit to the Board in writing or through the Board's online renewal process:…" (requirements for renewal application). The statute states that the renewal must occur "before" February 1 (i.e., January 31st); however, the rule states "no later than February 1st," which would mean one could renew on February 1 or it would lapse on February 2nd.

- The rules contain detail for the license renewal of veterinarians (R3-11-204) and animal crematories (R3-11-1003) and certification of veterinary technicians (R3-11-607). However, there are no rules that require specific information or action for premises licenses (Article 7 discusses Veterinary Medical Premises. A.R.S. § 32-2272(E) covers premises license renewal requirements). The current rules do not consistently address various types of license renewals.

- R3-11-203(B) requires a veterinary applicant who is not a veterinary student at the time of application to cause a veterinary college transcript to be sent to the Board. However, a similar requirement is not included for those who qualify for licensure via the Educational Commission for Foreign Veterinary Graduates (ECFVG) or the Program for the Assessment of Veterinary Education Equivalence (PAVE), which are alternative education pathways to licensure per ARS § 32-2215(A)(1). There is currently no rule requirement for ECVFG or PAVE graduates to submit proof of completion of their programs.

Because of statutory changes since the Board's rules were last amended, there are issues that need to be addressed in rule:

- In 2022, the legislature amended A.R.S. §§ 32-2215(A)(1), 32-2242(B), and 32-2248(1) along with the laws of other similar Boards to eliminate the requirement for there to be a

finding on whether an applicant is of good character or reputation, has integrity or is honest, moral, trustworthy or truthful to be eligible for a license, permit, certification.

- R3-11-203(C) and R3-11-203(D) need modifications.

- In 2019, the legislature amended A.R.S. §§ 32-3121 through 32-3124 allowing health profession regulatory boards to issue temporary licenses. Boards were authorized to adopt rules to establish an application and fee. As well, the legislation provided the Board with the discretion to grant authority to the Board's Executive Director to issue and approve licenses, certifications, registrations, reinstatements, or waivers to an eligible applicant or licensee. The Board's statutes and rules already provided for a similar Temporary Permit; therefore, no immediate action was taken. However, during the period where processes were changed to respond to COVID-related challenges, the Board granted approval authority to the Executive Director and began to issue Temporary Licenses via these laws, as they were less burdensome for the applicant than Temporary Permits. The current rules do not address Temporary Licenses.

5. Are the rules enforced as written? Mostly yes

Exceptions:

- R3-11-203(B): This requires a veterinary license applicant to cause a transcript from their veterinary college to be mailed to the Board office. Because many colleges now use vendors who only email transcripts or provide an online portal to retrieve them, the provision to have the documents mailed is not always possible. A transcript is still required; however, the Board allows them to be obtained via various methods as long as they are primary source documents. The rule needs to be modified to allow for alternate modalities for the submission of transcripts to the Board.

- R3-11-203(C) and R3-11-203(D): related to the license application requirement to include letters of character reference. As previously noted, legislative changes removed the authority to request moral character references. R3-11-203(C) needs to be removed and R3-11-203(D) needs modification.

- R3-11-203(A): This rule is related to documents required with a license application for those currently enrolled in veterinary college. It specifies that if the applicant is expected to graduate "within 45 days following the next administration of the examination," that a letter from the Dean's Office stating their expected graduation date is required. The 45-day time period is no longer enforced due to the Board's change in State Exam testing protocols. The State Exam was previously offered once per month in person; it is now emailed to the applicant shortly after the license application is deemed complete, which provides for a faster and more streamlined process.

- R3-11-403(6): Regarding the license renewal process, this subsection requires a licensee who obtains CE on the internet to submit a copy of a document issued by the provider that states the number of hours of CE obtained. Because it is not possible to upload documents in the Board's current online renewal system, this provision is unenforceable. However, the agency is in the process of developing an E-licensing system that is expected to allow this action; the new system is expected to launch in 2025.

- Please note that while some rules reflect outdated technology, such as "postmark" dates and lack of use of credit cards for online payments except license renewals, those rules are currently enforced. However, when the Board transitions to E-licensing expected in 2025, mailed letters pertaining to applications will be replaced by email and online portal notices and credit cards will be acceptable forms of payment for all items. These changes are expected to occur during the Board's development of its next rule package.

6. Are the rules clear, concise, and understandable? Mostly yes

- R3-11-401(C) related to the use of veterinary college coursework as credit towards Continuing Education (CE) requirements, is not clear. As written, the rule does not allow newly licensed veterinarians to use veterinary college coursework toward their CE requirements if they applied for licensure prior to graduation, which was not the Board's intention. The Board encourages application prior to graduation to allow students to begin work immediately after graduation. As written, this rule does not give the same opportunity to those who were proactive in the licensing process as those that waited until after graduation.

- R3-11-101, the definition of a "Mobile Unit," is not clear, as it relates to the unit being a "vehicle" from which out-patient services are provided to temporary sites. The manner in which the veterinarian transports themselves to the patient is not relevant. The Board's interpretation of "mobile unit" relates to the veterinary practice being mobile (e.g., housecall practice).

- R3-11-401(5) which explains that continuing education may be obtained at an interactive program, including an interactive program on the internet is not clear because the term "interactive" is not defined.

- R3-11-101(A) includes an incorrect citation of A.R.S. § 32-2281(E). The correct citation is A.R.S. § 32-2281(F).

7. Has the agency received written criticisms of the rules within the last five years? No

8. Economic, small business, and consumer impact comparison:
   The Board has completed no rulemaking since the Council approved the Board's last 5YRR on December 3, 2019, so there is no new economic, small business, and consumer impact estimate to assess. In the 5YRR approved on December 3, 2019, the Board indicated the economic impact of the rules was consistent with that projected when the rules were made. The Board has received no information causing it to change that conclusion.

9. Has the agency received any business competitiveness analyses of the rules? No

10. Has the agency completed the course of action indicated in the agency's previous 5YRR? No

    In the 2019 5YRR, the Board indicated several rules were in need of modification; however, over time, most were determined to be appropriately described in statute, with further detail in rule not needed for enforcement. The Board's intention was to limit the need for additional rules being created to lessen the burden on licensees.

    These were rules discussed in the 2019 5YRR:

    - Under Laws 2018, Chapter 1, the legislature added A.R.S. § 32-3248.2 requiring health professionals, including veterinarians, authorized to prescribe or dispense schedule II controlled substances to complete three hours of opioid-related, substance use disorder-

related, or addiction-related continuing medical education during each license renewal cycle. The statute was determined to be detailed enough for enforcement without additional rules added.

- Under Laws 2019, Chapter 55, the legislature amended A.R.S. § 32-4302 regarding licensure of out-of-state applicants who establish residence in this state and military spouses who accompany the military member to this state. The statute was determined to be detailed enough for enforcement without additional rules added.

- Under Laws 2019, Chapter 195, the legislature added A.R.S. § 32-3124 regarding a temporary license for health professionals. As previously explained, the Board did not immediately find the need to utilize Temporary Licenses since the Board had the authority to issue a similar document, the Temporary Permit. However, due to changes caused by COVID-related challenges and changes in Board procedures, Temporary Licenses were determined to be less burdensome for both the applicant and the agency. The agency has been able to utilize Temporary Licenses without detailed rules based on the statute.

- Laws 2019, Chapter 195, also added A.R.S. § 32-3123 authorizing a health profession regulatory board to delegate certain licensing functions to the Board's Executive Director. At the time it was believed that the Board would need to establish rules establishing the parameters of the executive director's responsibility; however, the Board clarified the scope when voting to make that delegation to only include the approval of applications, licenses, reinstatements, renewals, and certificates. The Board does not find the need for additional rules on this topic.

- Under Laws 2019, Chapter 166, the legislature amended A.R.S. § 13-904 regarding suspension of civil rights and occupational disabilities. The amendment prohibits an agency from denying, except in certain circumstances, a license to an individual who has a criminal conviction that occurred more than seven years ago, excluding any time of incarceration. Upon further review, it was determined that the statute clearly defines the actions the Board may take and no rule additions were needed.

- The Board had previously determined that R3-11-807, relating to dispensing prescription-only drugs, may not be consistent with the USDA Pasteurized Milk Ordinance and Arizona

Board of Pharmacy rules. Upon further review, it was determined that current rules are appropriate and that no rule changes were needed.

- The Board had previously reviewed rules related to notarization requirements for documents (R3-11-201(A)(1), R3-11-606(A)(1), and R3-11-707(1)(a)). While the Board intends to integrate options to notarization, it does not yet have the technical capabilities built into its current online system to take advantage of those options; therefore, a rule change would have been premature. The Board intends to incorporate use of verified electronic documents from primary sources throughout the rules once the new E-licensing system is launched.

11. A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective:

Many of the costs of these rules, including paperwork and other compliance costs, to persons regulated by the rules result from statutory directives provided by the legislature. For example, it is statute that requires an individual to submit an application for licensure or certification (A.R.S. §§ 32-2213, 32-2242, 32-2271, and 32-2292); requires an applicant to take and pass an examination (A.R.S. §§ 32-2214 and 32-2242); requires license and certificate renewal every two years (A.R.S. §§ 32-2218, 32-2246, 32-2272, and 32-2292); requires that fees be paid (A.R.S. §§ 32-2219, 32-2250, 32-2273); and establish numerous grounds for disciplinary action (A.R.S. §§ 32-2233, 32-2249, 32-2274, and 32-2294).

The rules primarily provide guidance to an applicant or licensee regarding the procedure for complying with the statutory requirements for being qualified and making application for licensure and maintaining licensure. The rules also inform an applicant or licensee of the procedure used in the event disciplinary action is necessary. Because the rules simply implement statutory requirements, it is presumed the legislature determined the benefits of the requirements outweighed the costs and the requirements were the minimum necessary to protect the public, which is the underlying regulatory objective.

There are some rule provisions that impose a cost on persons regulated by the rules. For example, R3-11-201 requires that an application be notarized, fees are required to be paid by certified check or money order, documents must be assembled and submitted with an application, continuing education

is required and must be documented, standards of practice are specified, and certain minimal standards and procedures are required of owners of animal crematories. In each of these cases, the Board established the provision because the Board determined that doing so was necessary to protect public health and safety. The Board believes each provision is the minimum necessary to achieve the underlying regulatory objective.

12. Are the rules more stringent than federal law? No

    No federal law is uniquely applicable to these rules.

13. For a rule made after July 29, 2010, that require issuance of a regulatory permit, license, or agency authorization, whether the rule complies with A.R.S. § 41-1037:

    The Board's statutes (See A.R.S. §§ 32-2213, 32-2215, 32-2272, and 32-2292), require individualized licenses be issued so a general permit is not applicable.

14. Proposed course of action:

    To address needed rule modifications, the Board intends to submit rulemaking to the Council by September 2025.

TITLE 3. AGRICULTURE

CHAPTER 11. VETERINARY MEDICAL EXAMINING BOARD

(Authority: A.R.S. § 32-2201 et seq.)

Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (Supp. 08-3).

Editor's Note: This Chapter contains rules which were adopted under an exemption from the rulemaking provisions of the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6, Articles 2, 3, 4, and 5) as specified in Laws 1989, Ch. 223, § 13. Exemption from A.R.S. Title 41, Chapter 6 means that the Veterinary Medical Examining Board did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Veterinary Medical Examining Board did not submit these rules to the Governor's Regulatory Review Council; the Veterinary Medical Examining Board was not required to hold public hearings on these rules; and the Attorney General did not certify these rules. Because this Chapter contains rules which are exempt from the regular rulemaking process, the Chapter is printed on blue paper. The rules affected by this exemption appear throughout this Chapter.

ARTICLE 1. GENERAL PROVISIONS

ARTICLE 2. APPLICATION AND EXAMINATION FOR LICENSURE

ARTICLE 3. TEMPORARY PERMITTEES

ARTICLE 4. CONTINUING EDUCATION REQUIREMENTS

ARTICLE 5. STANDARDS OF PRACTICE

ARTICLE 6. VETERINARY TECHNICIANS

ARTICLE 7. VETERINARY MEDICAL PREMISES AND EQUIPMENT

ARTICLE 8. DRUG DISPENSING

ARTICLE 9. INVESTIGATIONS AND HEARINGS

Article 9, consisting of Sections R3-11-901 through R3-11-905, adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

ARTICLE 10. ANIMAL CREMATORY MINIMUM STANDARDS

Article 10, consisting of Sections R3-11-1001 through R3-11-1010, made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1).

ARTICLE 1. GENERAL PROVISIONS

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-101. Definitions

A. The definitions in A.R.S. §§32-2201, 32-2216(B), 32-2231(D), 32-2232(23), and 32-2281(E) apply to this Chapter.

B. Additionally, in this Chapter unless otherwise specified:

1. "Administrative completeness review" means the Board's process for determining that an individual has provided all of the information and documents required by A.R.S. §§ 32-2201 through 32-2296 and this Chapter for an application.
2. "Animal owner" means an individual who has all or part of the lawful right to an animal or an individual designated by the animal owner to act on the animal owner's behalf.
3. "Applicant" means an individual requesting a certificate, permit, license, or continuing education approval from the Board.
4. "Application packet" means the fees, forms, documents, and additional information the Board requires to be submitted by an applicant or on the applicant's behalf.
5. "Compartment" means an enclosure provided to contain an animal.
6. "Continuing education" means completing or presenting a workshop, seminar, lecture, conference, class, or instruction related to the:
   a. Practice of veterinary medicine if a veterinarian, or
   b. Work of a veterinary technician if a veterinary technician.
7. "Credit hour" means one clock hour of participation in continuing education.
8. "Current" means up to date and extending to the present time.
9. "Days" means calendar days.
10. "Direction, supervision, and control" means:
    a. Pertaining to veterinary technicians, the written or oral instructions of a veterinarian responsible for an animal; or
    b. Pertaining to temporary permittees, the same as direct and personal instruction, control, or supervision as stated in A.R.S. § 32-2216(B).
11. "Disciplinary action" means a proceeding brought by the Board under A.R.S. Title 32, Chapter 21 or this Chapter.
12. "ECFVG" means Educational Commission for Foreign Veterinary Graduates.
13. "Hours of operation" means the specific time during which a licensed veterinary medical premises is open to the public for business.
14. "Housed" means an animal is maintained in a compartment.
15. "Livestock" livestock and ratites as defined in A.R.S. §§ 3-1201 (5) and (10).
16. "Medication" means an over-the-counter drug defined in A.R.S. § 32-1901, prescription-only drug, prescription-only device defined in A.R.S. § 32-1901, or controlled substance.
17. "Mobile clinic" means a self-contained trailer, van, or mobile home not attached to the ground designed to function as a self-contained clinic.
18. "Mobile unit" means a vehicle from which out-patient veterinary medical services are delivered to temporary sites and that is not designed to function as a self-contained clinic.
19. "Over-the-counter drug" means the same as prescribed in A.R.S. § 32-1901.
20. "Party" means the same as prescribed in A.R.S. § 41-1001.
21. "PAVE" means Program for Assessment of Veterinary Education Equivalence.
22. "Personnel" means any individual, licensed by the Board or unlicensed, who works on a veterinary medical premises.
23. "Physical plant" means a building or an area within a building housing a licensed veterinary medical premise, including the architectural, structural, mechanical, electrical, plumbing, and fire protection elements of the building.
24. "Prescription-only drug" means the same as prescribed in A.R.S. § 32-1901.
25. "RACE" means Registry of Approved Continuing Education and is a subdivision of the American Association of Veterinary State Boards.
26. "Sanitize" means to disinfect and reduce pathogen counts, including bacteria, viruses, mold, and fungi.
27. "Scientific meeting" means a live presentation of continuing education that is not provided at a veterinary college.
28. "Sharps container" means a puncture resistant, leak-proof container that can be closed and is used for handling, storing, transporting, and disposing of objects that may cut or penetrate skin or mucosa, such as needles, scalpel blades, or razor blades.
29. "Veterinary medical premise" means a physical plant licensed by the Board on which veterinary medical services will be performed.
30. "Veterinary medical services" means the acts listed in A.R.S. § 32-2201(27).

Historical Note

Former Rule 2; Former Section R3-11-02 repealed, new Section R3-11-02 adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-02 renumbered as Section R3-11-102 and amended by adding subsections (C) and (D) effective February 24, 1988 (Supp. 88-1). Former Section R3-11-101 renumbered to R3-11-102, new Section R3-11-101 renumbered from R3-11-102 and amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the

Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-102. Board Meetings

The Board shall:

1. Hold its annual meeting in June of each year;
2. Make the date, time, and place of its annual meeting available to the public at least 20 days before the date of the annual meeting; and
3. Post notice of a special meeting on its web site and bulletin board at least 24 hours before the special meeting.

Historical Note

Former Rule 1; Former Section R3-11-01 repealed, new Section R3-11-01 adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-01 renumbered without change as Section R3-11-101 effective February 24, 1988 (Supp. 88-1). Former Section R3-11-102 renumbered to R3-11-101, new Section R3-11-102 renumbered from R3-11-101 and amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-103. Evaluating Board Services

Under A.R.S. § 32-2207(8)(c), a member of the public may evaluate the services provided by the Board by:

1. Submitting an evaluation form provided by the Board at the time services are provided.
2. Submitting comments through the Board's web site,
3. Submitting a letter to the Board, and
4. Attending and speaking at a Board meeting.

Historical Note

Former Rule 3; Former Section R3-11-03 repealed, new Section R3-11-03 adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-03 repealed, new Section R3-11-03 adopted effective November 18, 1982 (Supp. 82-6). Former Section R3-11-03 renumbered without change as Section R3-11-103 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). R3-11-103 renumbered to R3-11-204; new Section R3-11-103 made by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-104. Premise License

The veterinary medical premise license shall be maintained in the premise for which it is issued.

Historical Note

Adopted effective April 26, 1984 (Supp. 84-2). Former Section R3-11-04 amended and renumbered as Section R3-11-104 effective February 24, 1988 (Supp. 88-1).

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules. These rules were subsequently amended under the regular rulemaking process.

R3-11-105. Fees

A. Veterinarian fees are as follows:
1. Regular license application and state examination - $400.00
2. Specialty or endorsement application and state examination - $750.00
3. License issued in odd-numbered year - $200.00
4. License issued in even-numbered year - $100.00
5. License renewal - $400.00
6. Reinstatement penalty - $50.00
7. Duplicate license - $25.00
8. Temporary permit - $75.00
9. Verification licensure fee - $15.00

B. Veterinary technician fees are as follows:
1. Application and examination - $150.00
2. Certificate issued in odd-numbered year - $50.00
3. Certificate issued in even-numbered year - $25.00
4. Certificate renewal - $100.00
5. Delinquency fee authorized by A.R.S. § 32-2247 - $25.00
6. Duplicate certificate - $20.00

C. Veterinary medical premises fees are as follows:
1. License issued in odd-numbered year - $100.00
2. License issued in even-numbered year - $50.00
3. License renewal - $200.00
4. Duplicate license - $20.00
5. Penalty fee authorized by A.R.S. § 32-2272(E) - $100.00

D. Fees for the duplication or copying of public records under A.R.S. § 39-121.03 are nonrefundable and are as follows:
1. Noncommercial and commercial copy - $.25 per page
2. Copying requiring more than 15 minutes - $5.00 for each 15-minute interval exceeding 15 minutes
3. Directories for noncommercial use - $.05 per name and address
4. Directories for noncommercial use printed on labels - $.10 per name and address
5. Directories for commercial use - $.25 per name and address
6. Directories for commercial use printed on labels - $.30 per name and address
7. A directory in (3), (4), (5), or (6) issued on an electronic medium - $5.00 and the applicable name and address fee

E. During the pendency of a complaint, the Board shall not charge the veterinarian who is the subject of the complaint or the individual who has filed the complaint, for duplication of public records regarding the complaint.

F. The Board shall charge $5.00 per copy of the veterinary statutes and rules. A licensee may obtain one free copy of the veterinary statutes and rules each renewal period.

G. The Board shall charge $10.00 for each audio recording.

H. The Board shall waive the charges in subsection (D) for charitable organizations and government entities.

Historical Note

Former Rule 4; Former Section R3-11-04 repealed, new Section R3-11-04 adopted effective March 23, 1979 (Supp. 79-2). Amended effective February 12, 1980 (Supp. 80-1). Former Section R3-11-04 repealed, new Section R3-11-04 adopted effective Amended effective February 24, 1988 (Supp. 88-1). November 18, 1982 (Supp. 82-6). Renumbered as Section R3-11-05 effective April 26, 1984 (Supp. 84-2). Amended effective November 27, 1984 (Supp. 84-6). Former Section R3-11-05

amended and renumbered as Section R3-11-105 effective February 24, 1988 (Supp. 88-1). Amended subsection (B)(1) effective May 15, 1989 (Supp. 89-2). Amended effective August 31, 1995 (Supp. 95-3). Amended effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 1384, effective June 4, 2006 (Supp. 06-2). Section amended by emergency rulemaking at 14 A.A.R. 3806, effective September 8, 2008, for 180 days (Supp. 08-3). Amended by final rulemaking at 14 A.A.R. 4398, effective January 3, 2009 (Supp. 08-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-106. Reserved

R3-11-107. Residence and Veterinary Practice Addresses

A. Within 20 days after the issuance of a license or certificate, a licensee or certificate holder shall provide written notice to the Board of all residence and veterinary practice addresses.

B. A licensee or certificate holder shall provide written notice to the Board within 20 days after a change of residence or veterinary practice address.

Historical Note

Section R3-11-07 adopted and renumbered as Section R3-11-107 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-108. Time-frames for Licensure, Certification, Permit, and Continuing Education Approvals

A. The overall time-frame described in A.R.S. § 41-1072(2) for each type of approval granted by the Board is set forth in Table 1. The applicant and the Executive Director of the Board may agree in writing to extend the overall time-frame. The overall time-frame and the substantive time-frame may not be extended by more than 25% of the overall time-frame.

B. The administrative completeness review time-frame described in A.R.S. § 41-1072(1) for each type of approval granted by the Board is set forth in Table 1.

1. The administrative completeness review time-frame begins:
   a. For approval or denial of a temporary permit, when the Board receives the written request for a temporary permit required under R3-11-301(A)(4);
   b. For approval or denial of a veterinary medical license, when the Board receives the application packet required under R3-11-201(A);
   c. For approval or denial of a veterinary technician certificate, when the Board receives the application packet required under R3-11-606(A);
   d. For approval or denial of a veterinary medical premises license, when the Board receives the application packet required under R3-11-707;
   e. For approval or denial of continuing education, when the Board receives the written request required under R3-11-402(B);
   f. For approval or denial of a waiver of the continuing education requirement, when the Board receives the written request required under R3-11-405(A);
   g. For approval or denial of an animal crematory license, when the Board receives the application packet required under R3-11-1002(B); and
   h. For approval or denial of a license or certificate renewal, when the Board receives a renewal application.
2. If an application packet or request submitted under subsection (B)(1) is incomplete, the Board shall send the applicant a written notice specifying the missing document or incomplete information. The administrative completeness review time-frame and the overall time-frame are suspended from the postmark date of the notice until the date the Board receives a complete application packet or request from the applicant.
3. If an application packet or request is complete, the Board shall send a written notice of administrative completeness to the applicant.
4. If the Board grants a license or approval during the time provided to assess administrative completeness, the Board shall not issue a separate written notice of administrative completeness.

C. The substantive review time-frame described in A.R.S. § 41-1072(3) is set forth in Table 1 and begins on the postmark date of the notice of administrative completeness.

1. During the substantive review time-frame, the Board may make one comprehensive written request for additional information or documentation. The time-frame for the Board to complete the substantive review is suspended from the postmark date of the comprehensive written request for additional information or documentation until the Board receives the additional information or documentation.
2. The Board shall send a written notice granting a license or other approval to an applicant who meets the qualifications and requirements in A.R.S. § 32-2201 through § 32-2296 and this Chapter.
3. The Board shall send a written notice of denial to an applicant who fails to meet the qualifications in A.R.S. § 32-2201 through § 32-2296 or this Chapter.

D. The Board shall consider an application withdrawn if, within 360 days from the date on which the materials required under subsection (B)(1) are submitted, the applicant fails to supply the missing information under subsection (B)(2) or (C)(1).

E. An applicant who does not wish an application withdrawn under subsection (D) may request a denial in writing within 360 days from the application submission date.

F. If a time-frame's last day falls on a Saturday, Sunday, or an official state holiday, the next business day will be considered the time-frame's last day.

Historical Note

Adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

Table 1. Time-frames (in days)

Type of Applicant	Type of Approval	Statutory Authority	Overall Time-frame	Administrative Completeness Time-frame	Substantive Review Time-frame
Temporary Permittee (R3-11-301)	Temporary Permit	A.R.S. § 32-2216	30	15	15
Veterinary License by Examination, Endorsement, for a Specialty License, or Temporary Permittee (R3-11-103, R3-11-201 & R3-11-301)	Veterinary License or Renewal	A.R.S. §§ 32-2212 and 32-2213	60	15	45
Veterinary Technician (R3-11-606 & R3-11-607)	Veterinary Technician Certificate or Renewal	A.R.S. §§ 32-2242 and 32-2244	60	30	30
Veterinary Medical Premises (R3-11-707)	Veterinary Medical Premises License or Renewal	A.R.S. §§ 32-2271 and 32-2272	90	30	60
Animal Crematory (R3-11-1002 & R3-11-1003)	Animal Crematory License or Renewal	A.R.S. § 32-2292	90	30	60
Licensee or certificate holder (R3-11-405)	Approval of a Continuing Education Waiver	A.R.S. § 32-2207(8)	60	30	30
Licensee Requesting Continuing Education Pre-approval (R3-11-402)	Pre-approval of Continuing Education	A.R.S. § 32-2207(8)	60	30	30

Historical Note
Adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-109. Arizona Ombudsman-Citizens' Aide
The Board shall notify the public about the existence of the Arizona Ombudsman-Citizens' Aide by providing the ombudsman-citizens' aide's name, address, and telephone number on the Board's web site.

Historical Note
New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

ARTICLE 2. APPLICATION AND EXAMINATION FOR LICENSURE

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules. These rules were subsequently repealed and new Section adopted under the regular rulemaking process.

R3-11-201. Application for a Veterinary Medical License

A. An applicant for a veterinary medical license shall submit an application packet to the Board that contains:
1. A notarized application form signed by the applicant that contains the information set forth in A.R.S. § 32-2213;
2. The documents required under R3-11-203; and
3. The applicable fees, payable by certified check or money order:
   a. If applying for a regular license, the applicant shall submit the application fee required in R3-11-105.
   b. If applying for a license by endorsement under A.R.S. § 32-2215(C) or a specialty license under A.R.S. § 32-2215(D), the applicant shall submit the application and license issuance fees required under R3-11-105.

B. If an applicant has passed the North American Veterinary Licensing Examination and is required to take only the state examination, the applicant shall submit the application packet required under subsection (A) no later than 30 days before the date the applicant intends to take the state examination.

C. If an applicant is required to take the North American Veterinary Licensing Examination, the applicant shall apply directly to the National Board of Veterinary Medical Examiners.

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-20 renumbered without change as Section R3-11-201 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-202. Repealed

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-21 amended and renumbered as Section R3-11-202 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Section repealed by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

R3-11-203. Documents Required with a License Application

A. An applicant who is a veterinary student at the time of application shall submit with the application packet required under R3-11-201(A) a letter from the office of the dean of the veterinary college stating that the applicant is expected to graduate within 45 days following the next administration of the examination required under A.R.S. § 32-2214(C).

B. An applicant who is not a veterinary student at the time of application shall cause a transcript verifying receipt of the degree of doctor of veterinary medicine to be mailed from the college directly to the Board.

C. At the time of application, an applicant shall cause letters of character reference to be sent directly to the Board by three persons who are not related to the applicant and who have known the applicant for at least three years.

D. At the time of application, an applicant who has experience in the field of veterinary medicine as a practicing veterinarian or as an employee of a licensed veterinarian shall cause a letter from a veterinarian indicating the professional qualifications and character of the applicant to be sent directly to the Board.

E. An applicant who has been or is at the time of application a licensed veterinarian in another state shall cause each state board that has licensed the applicant to send directly to the Board a letter indicating the applicant's standing, including whether the applicant is currently under investigation or ever has been disciplined for violation of a veterinary medical practice act.

F. Unless waived under A.R.S. § 32-2215(C) or (D), an applicant who has successfully passed the North American Veterinary Licensing Examination within five years before making application shall request that a transcript of the scores be forwarded to the Board directly by the organization responsible for score reporting or the professional examination service.

G. At the time of application, an applicant shall submit to the Board a passport-type photograph of the applicant no larger than 1 1/2 x 2 inches that was taken during the preceding six months.

H. At the time of application, an applicant shall submit to the Board a typewritten letter or current resume summarizing the applicant's experience and qualifications.

I. As required under A.R.S. § 41-1080(A), at the time of application, an applicant shall submit to the Board the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law.

Historical Note
Adopted effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-204. Renewal of Veterinary License

A. According to A.R.S. § 32-2218, a license issued under A.R.S. Title 32, Chapter 21 expires on December 31 of every even-numbered year unless renewed.

B. A licensee shall meet the continuing education requirements of Article 4 of this Chapter as a condition of renewal of a license.

C. No later than February 1 of every odd-numbered year, a licensee shall submit to the Board in writing or through the Board's online renewal process:

1. A renewal application, provided by the Board, that is signed and dated by the licensee and contains:
   a. The licensee's name, residence, mailing and veterinary practice addresses, name of veterinary practice, and telephone numbers for residence and veterinary practice;
   b. A statement of whether the licensee is licensed to practice veterinary medicine in any other state of the United States, and if so, the name of the state, license number, license issuance date, and status of the license;
   c. A statement of whether a complaint has been filed during the two-year period preceding the renewal date against the licensee with a veterinary regulatory authority in another state, and if so, the name of the state, and the date, description, and resolution of the complaint;
   d. A statement of whether the licensee is currently under investigation by a veterinary regulatory authority in another state, and if so, the name of the state, license number, and the nature and status of the investigation;
   e. A statement of whether, within the two-year period preceding the renewal date, any disciplinary action has been taken against the licensee's veterinary license in another state including:
      i. The name of the state;
      ii. The license number;
      iii. The reason for the disciplinary action;
      iv. Whether the disciplinary action is currently pending; and
      v. Whether the license has been suspended, revoked, or placed on probation;
   f. A statement of whether, within the two-year period preceding the renewal date, the licensee has been charged with a felony or any misdemeanor involving conduct that may affect patient health and safety including:
      i. The charged felony or misdemeanor;
      ii. The city, county, and state where the felony or misdemeanor took place;
      iii. The court having jurisdiction over the felony or misdemeanor;
      iv. Whether the charges were dismissed;
      v. If applicable, the date of the conviction;
      vi. Whether the conviction was set aside;
      vii. Notice of expungement, if applicable;
      viii. Notice of restoration of civil rights, if applicable; and
      ix. Probation officer's name, address, and telephone number, if applicable;
   g. A statement that the licensee has met the continuing education requirements in Article 4 of this Chapter; and
   h. A statement by the licensee that the information contained on the renewal application is true and correct;
2. The renewal fee required by the Board;
3. If the documentation previously submitted under R3-11-203(I) was a limited form of work authorization issued by the federal government, evidence that the work authorization has not expired; and

4. A list of continuing education completed by the licensee that meets the requirements in Article 4 of this Chapter.

D. If a licensee fails to submit the materials required under subsection (C) by February 1 of every odd-numbered year, the licensee shall immediately stop engaging in the practice of veterinary medicine until the licensee complies with the requirements in A.R.S. § 32-2218 and this Chapter.

E. Continued veterinary practice by an individual who fails to comply with subsection (C) constitutes "probable cause" of criminal violation of A.R.S. § 32-2238(A)(4) for purposes of referral to the County Attorney's Office or the Office of the Attorney General for criminal prosecution, injunctive relief, or any other action provided by law.

Historical Note

New Section R3-11-204 renumbered from R3-11-103 and amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3)

ARTICLE 3. TEMPORARY PERMITTEES

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules. These rules were subsequently repealed and new Section adopted under the regular rulemaking process.

R3-11-301. Application for a Temporary Permit

A. An applicant for a temporary permit shall:

1. Submit to the Board the application form required under R3-11-201(A)(1) and the documents required under R3-11-203;
2. Submit to the Board both the application and examination fee and temporary permit fee, payable by certified check or money order, required under R3-11-105;
3. Schedule with the Board a date to take the state examination;
4. After complying with subsections (A)(1) through (3), submit all of the following to the Board:
   a. A written request for a temporary permit, signed by the applicant, that states:
      i. The name and business address of the licensed veterinarian who will employ the applicant; and
      ii. The name of each licensed veterinarian who will provide direct and personal instruction, control, or supervision of the applicant;
   b. Written documentation of graduation from a veterinary college; and
   c. A sworn affidavit, signed by the applicant, stating the applicant:
      i. Has graduated from a veterinary college;
      ii. Has read and understands A.R.S. § 32-2216 and this Section;
      iii. Agrees to work under the direct and personal instruction, control, or supervision of the licensed veterinarian employing the applicant; and
      iv. Agrees to notify the Board in writing within 10 days from the date of termination of employment.

B. A licensed veterinarian employing an applicant for a temporary permit shall submit to the Board:

1. A letter detailing:
   a. The type of work to be conducted by the applicant;
   b. The name of each licensed veterinarian who will assume direct and personal instruction, control, or supervision when the employing veterinarian is absent; and
   c. The procedures, including frequency, for reviewing medical treatment and records of medical treatment of animals;
2. A sworn affidavit, signed by the veterinarian, stating the veterinarian:
   a. Is currently practicing veterinary medicine in Arizona;
   b. Has read and understands A.R.S. § 32-2216 and this Section;
   c. Accepts full responsibility for providing direct and personal instruction, control, or supervision to the applicant; and
   d. Agrees to notify the Board in writing within 10 days from the date of termination of applicant's employment.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-30 renumbered without change as Section R3-11-301 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-302. Repealed

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-31 renumbered without change as Section R3-11-302 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3).Adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Repealed by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-303. Repealed

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-32 renumbered without change as Section R3-11-303 effective February 24, 1988 (Supp. 88-1).Adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Repealed by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3).

R3-11-304. Extension of Temporary Permits

A. The Board shall extend a temporary permit as allowed by A.R.S. § 32-2216(B), only if the temporary permittee submits to the Board evidence of good and sufficient reason for failing to take the scheduled state examination and evidence that the temporary permittee is scheduled to take the next state examination following issuance of the extension.

B. As provided under A.R.S. § 32-2216(B), the Board shall not extend a temporary permit a second time.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-33 renumbered without change as Section R3-11-304 effective February 24, 1988 (Supp. 88-1). Amended by final rulemaking at 6 A.A.R. 3918, effective

September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-305. "Good and Sufficient Reason" for Failure to Take a State Examination

For purposes of A.R.S. § 32-2216(B), the Board shall consider the following in determining whether "good and sufficient reason" exists for failure to take a state examination:

1. Illness or disability,
2. Military service, or
3. Any other circumstance demonstrated by the temporary permittee to be beyond the temporary permittee's control.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-34 renumbered without change as Section R3-11-305 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

ARTICLE 4. CONTINUING EDUCATION REQUIREMENTS

R3-11-401. Continuing Education

A. Except as provided in subsection (B), during the two-year period preceding license expiration, a licensee shall complete 20 credit hours of Board-approved continuing education, subject to the following:
1. A maximum of two credit hours in practice management;
2. One credit hour for each hour of attendance at a veterinary college seminar;
3. One credit hour for each hour of attendance at a scientific meeting related to veterinary medicine;
4. One credit hour, to a maximum of five, for:
   a. Each hour spent developing or making a presentation related to veterinary medicine,
   b. Each hour of study using tapes or CDs, and
   c. Each hour spent reading articles in veterinary journals or periodicals pertaining to veterinary medicine or controlled substances; and
5. One credit hour for each hour of continuing education obtained at an interactive program, including an interactive program on the internet.

B. A licensee receiving an initial license in an even-numbered year shall complete 10 credit hours of continuing education before the licensee's initial renewal date.

C. If a licensee graduated from a veterinary college within 11 months before the license application date, the licensee may apply 10 credit hours of veterinary college course work to fulfill the continuing education requirement at the time of first renewal.

D. Except as provided in subsection (E), during the two-year period preceding certificate expiration, a certificate holder shall complete 10 credit hours of Board-approved continuing education, subject to the following:
1. One credit hour for each hour of attendance at a veterinary college seminar;
2. One credit hour for each hour of attendance at a class at a veterinary technology school;
3. One credit hour for each hour of attendance at a scientific meeting related to the work of a veterinary technician;
4. One credit hour, to a maximum of two and one-half, for:
   a. Each hour spent developing or making a presentation related to the work of a veterinary technician;
   b. Each hour of study using tapes or CDs; and
   c. Each hour spent reading articles in veterinary journals or periodicals pertaining to veterinary medicine or controlled substances; and
5. One credit hour for each hour of continuing education obtained at an interactive program, including an interactive program on the internet.

E. A certificate holder receiving an initial certificate in an even-numbered year shall complete five credit hours of continuing education before the certificate holder's first renewal date.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-40 repealed, new Section R3-11-40 adopted effective November 18, 1982 (Supp. 82-6). Former Section R3-11-40 renumbered as Section R3-11-401 and subsection (A) amended effective February 24, 1988 (Supp. 88-1). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-402. Approval of Continuing Education

A. The following continuing education is approved by the Board:
1. For a veterinarian:
   a. Continuing education taught in or under the authority of a veterinary college;
   b. Continuing education sponsored by the Arizona Veterinary Medical Association, American Association of Veterinary State Boards, a state or national veterinary association or academy approved by the Board, or continuing education approved according to subsections (B) and (C); or
   c. Continuing education approved by RACE;
2. For a veterinary technician:
   a. Continuing education taught in or under the authority of a veterinary technician school or school of veterinary medicine;
   b. Continuing education sponsored by the Arizona Veterinary Medical Association or American Association of Veterinary States Boards or approved by RACE;
   c. Continuing education approved by the Board that is sponsored by a state or national veterinary technician association or academy;
   d. Continuing education approved by RACE of the American Association of Veterinary State Boards; or
   e. Continuing education approved according to subsections (B) and (C).

B. In addition to the continuing education approved according to subsection (A), a person who provides continuing education may request pre-approval of continuing education by submitting to the Board at least 60 calendar days before the continuing education takes place, a written request that includes:
1. A description of the continuing education;
2. The date, time, and place where the continuing education will take place;
3. The number of credit hours of the continuing education;
4. The name of each individual providing the continuing education, if available; and
5. The name of the organization providing the continuing education, if applicable.

C. In determining whether to approve a request for pre-approval submitted according to subsection (B), the Board shall consider whether the continuing education:

1. Is designed to provide instruction or knowledge in current developments, skills, and procedures related to veterinary medicine or work of a certificate holder;
2. Is developed and provided by an individual with knowledge and experience in the subject area; and
3. Contributes directly to the professional competence of the licensee or certificate holder.

D. The Board shall approve or deny a request for pre-approval according to the time-frames set forth in Table 1.

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-41 renumbered without change as Section R3-11-402 effective February 24, 1988 (Supp. 88-1). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-403. Documentation of Attendance
A licensee or certificate holder shall submit a written document of continuing education with a renewal application that includes:

1. The name of the licensee or certificate holder;
2. The title of each continuing education;
3. The date of completion of each continuing education;
4. The number of credit hours of each continuing education;
5. A statement, signed and dated by the licensee or certificate holder, verifying the information in the document; and
6. If the continuing education was obtained on the internet, a copy of a document issued by the provider of the continuing education that states the number of hours obtained.

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-42 repealed, new Section R3-11-42 adopted effective November 18, 1982 (Supp. 82-6). Former Section R3-11-42 renumbered without change as Section R3-11-403 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-404. Repealed

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-43 renumbered without change as Section R3-11-404 effective February 24, 1988 (Supp. 88-1). Section repealed by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

R3-11-405. Waiver

A. A licensee or certificate holder seeking a waiver from the continuing education requirements in this Article shall submit a written request to the Board by December 10th before the license or certificate expires that contains the licensee's or certificate holder's name and an explanation of the reason for the request.

B. The Board shall consider the following in determining whether to grant a waiver from the continuing education requirements in this Article:

1. Illness or disability,
2. Military service or absence from the United States, or
3. Any other circumstance demonstrated by the licensee or certificate holder to be beyond the licensee's or certificate holder's control.

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Amended effective November 18, 1982 (Supp. 82-6). Former Section R3-11-44 renumbered without change as Section R3-11-405 effective February 24, 1988 (Supp. 88-1). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

ARTICLE 5. STANDARDS OF PRACTICE

R3-11-501. Ethical Standards
Under A.R.S. § 32-2232(12), a veterinarian practicing under a license or permit shall practice according to the following standards of professional ethics, which are based on the Principles of Veterinary Medical Ethics of the American Veterinary Medical Association.. The breach of any of the following standards constitutes grounds for disciplinary action against a veterinary license or permit under A.R.S. §§ 32-2233 and 32-2234.

1. A veterinarian shall show respect for the veterinarian's colleagues, the owner of an animal to whom veterinary medical services are being provided, and the public through courteous verbal or written interchange, considerate treatment, professional appearance, professionally acceptable procedures, and use of current professional and scientific knowledge.
2. A veterinarian shall not slander or injure the professional standing or reputation of another member of the profession or condemn the character of that individual's professional acts in a false or misleading manner.
3. A veterinarian shall offer or seek a consultation or a referral whenever it appears that the quality of veterinary medical service provided by the veterinarian will be enhanced.
4. When a veterinarian agrees to provide veterinary medical services to an animal, the veterinarian shall comply with the standards of practice in R3-11-502 regardless of the fees charged.
5. A Responsible Veterinarian employed by a partnership, corporation, or individual that is not licensed by the Board shall ensure that the veterinary judgment and responsibility of each veterinarian employed by the partnership, corporation, or individual is neither influenced nor controlled by the partnership, corporation, or individual to the detriment of an animal.
6. A veterinarian shall ensure that emergency services are consistent with A.R.S. § 32-2201 through § 32-2296, this Chapter, and the needs and standards of the locality where the emergency medical services are provided.

7. A veterinarian is free to choose whom the veterinarian will serve within the limits of the law. A veterinarian who agrees to provide veterinary medical services to an animal is responsible for the welfare of the animal until the animal is released, referred, or discharged by the veterinarian or the veterinarian is dismissed by the animal owner.
8. A veterinarian shall provide records or copies of records of veterinary medical services, including copies of radiographs, to an animal owner or another licensed veterinarian currently providing veterinary medical services within 10 days from the date of the animal owner's or other licensed veterinarian's request, or in less than 10 days if the animal's medical condition requires.
9. A veterinarian shall not make a false statement on or alter any document, record, or report concerning treatment of an animal.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Amended effective November 18, 1982 (Supp. 82-6). Former Section R3-11-50 renumbered without change as Section R3-11-501 effective February 24, 1988 (Supp. 88-1). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-502. Standards of Practice

A. Before providing a veterinary medical service or housing an animal, a Responsible Veterinarian shall ensure that the animal owner is provided a written notice that states whether personnel will be present on the veterinary medical premises for 24-hour observation of the animal.

B. A Responsible Veterinarian shall ensure that a notice of where veterinary medical services may be obtained when the veterinary medical premises is not open for business:
1. Is placed on the voice mail of the veterinary medical premises; and
2. Contains the name, telephone number, and address of a veterinarian or veterinary medical premises that is available to provide veterinary medical services. Livestock veterinarians are exempt from providing an address.

C. Before providing a veterinary medical service, a veterinarian shall ensure that the animal owner or the animal owner's agent is provided an estimate of the cost for the veterinary medical service, except in the case of livestock.

D. When providing a veterinary medical service, a veterinarian shall ensure that no expired supplies are used.

E. Before a surgical patient or hospitalized animal is discharged, a veterinarian shall ensure that the animal owner is provided with instructions detailing care of the animal after discharge and documents in the medical record that verbal or written care instructions were provided.

F. Before euthanizing an animal for which the animal owner is known, a veterinarian shall obtain signed authorization from the animal owner or verbal authorization from the animal owner that is witnessed by one other individual and documented in the medical record.

G. For animals with a suspected or diagnosed contagious disease or illness, a veterinarian shall provide a separate isolation area that is not in close proximity to other animals and shall ensure that the ill animal does not come into contact with another animal or the other animal's compartment.

H. If general anesthesia is administered or surgery is performed on an animal by a veterinarian, the veterinarian shall ensure:
1. A prior signed authorization is obtained from the animal owner if the animal owner is known or verbal authorization that is witnessed by one other individual and documented in the medical record is obtained from the known animal owner. This provision does not apply to livestock;
2. Within six hours before anesthesia is administered or surgery is performed, the animal is examined and the animal's temperature, heart rate, respiratory rate, diagnosis, and general condition are recorded in the animal's medical record except for species or in situations that make the examination impractical or potentially detrimental to the animal or examiner;
3. The animal's heart rate and respiratory rate are recorded in the animal's medical record immediately after giving the animal a general anesthetic and monitored and recorded a minimum of every 15 minutes while anesthesia is being administered except for species or in situations that make the examination impractical or potentially detrimental to the animal or examiner;
4. After the animal is given a general anesthetic, the animal is continuously observed by personnel until the animal is extubated and able to swallow; and
5. The following information is recorded in a written anesthesia log, which is separate from both the controlled drug log maintained under subsection (K) and medical record of each animal maintained under subsection (L) and is maintained on the veterinary medical premises for three years from the date the anesthesia is administered:
   a. The animal's name and species,
   b. The name of the animal owner,
   c. The date of administration of the anesthesia,
   d. The recovery status of the animal, and
   e. The name of the veterinarian.

I. A veterinarian shall follow manufacturer's label requirements for the storage and handling of biologics, veterinary supplies, and veterinary medications.

J. A veterinarian who dispenses a prescription-only drug shall:
1. Comply with all federal and state laws, including A.A.C. Title 3, Chapter 11, Article 8, regarding the dispensing of a prescription-only drug; and
2. Ensure that a prescription-only drug or prescription-only device is destroyed or returned to the manufacturer or distributor no later than 30 days after its expiration date.

K. A veterinarian who dispenses or administers a controlled substance shall:
1. Comply with all federal and state laws including A.A.C. Title 3, Chapter 11, Article 8;
2. Maintain an inventory record on the veterinary medical premises for two years from the date of entry of each controlled substance purchased by the veterinarian that contains the:
   a. Name of the controlled substance,
   b. Strength of the controlled substance,
   c. Date the controlled substance was received by the veterinarian,
   d. Amount of the controlled substance received by the veterinarian,
   e. Name of the distributor of the controlled substance, and
   f. Invoice number; and
3. Maintain a dispensing or administration log on the veterinary medical premises, separate from the inventory

record required under subsection (K)(2), for two years from the date of entry that contains for each controlled substance dispensed or administered the:
a. Name of the controlled substance,
b. Strength of the controlled substance,
c. Amount of the controlled substance,
d. Name of the animal to which dispensed or administered,
e. Name of the animal owner,
f. Date dispensed or administered,
g. Name of the veterinarian who dispensed or administered the controlled substance, and
h. Decremented amounts of the controlled substance quantifying the amount remaining.

L. Except as provided in subsection (N), a veterinarian shall maintain on the veterinary medical premises for three years after the last date an animal receives veterinary medical services a written medical record containing the:
1. Name, address, and telephone number of the animal owner;
2. Description of the animal's color and markings or a color photograph of the animal, and the sex, breed, weight, and age of the animal;
3. Date of veterinary medical services and date a written entry is made to the medical record, if the entry is made on a date other than when the veterinary medical services were provided;
4. Results of examination, including temperature, heart rate, respiratory rate, and general condition of the animal, except for livestock and species or in situations that make the examination impractical or potentially detrimental to the animal or examiner;
5. The animal's tentative or definitive diagnosis;
6. Treatment provided to the animal;
7. Name of each medication administered including:
   a. Concentration, except when the medication is only offered in one size and strength;
   b. Amount;
   c. Frequency; and
   d. Route of administration;
8. Name of each medication prescribed including concentration, amount, and frequency;
9. Name and result of each diagnostic and laboratory test conducted;
10. Signature or initials of each individual placing an entry in the medical record; and
11. Signature or initials of the veterinarian performing the veterinary medical services.

M. A veterinarian shall ensure that a radiograph of an animal is permanently labeled with the following information and maintained on the veterinary medical premises for three years from the last date an animal receives veterinary medical services:
1. The name of the animal owner,
2. The name of the animal,
3. The date the radiograph was taken,
4. The name of the veterinarian or veterinary medical premises, and
5. The anatomical orientation.

N. A veterinarian who administers a rabies vaccine to an animal on behalf of an animal control agency or animal shelter and provides no other veterinary medical service to the animal:
1. Is exempt from the requirements of subsection (L);
2. Shall generate a rabies vaccination record for each animal vaccinated that includes:
   a. The name and address of the animal owner;
   b. A description or color photograph of the animal that includes species, breed, sex, age, and color;
   c. The date of vaccination;
   d. The vaccine manufacturer's name;
   e. The serial number of the vaccine used;
   f. The date re-vaccination is due; and
   g. The veterinarian's signature; and
3. Shall provide a copy of each rabies vaccination record to the veterinary medical premises, animal control agency, or animal shelter at which the rabies vaccination was provided. If a copy of the rabies vaccination record is provided to the veterinary medical premises, the veterinary medical premises shall maintain the record for at least three years from the date of vaccination.

O. In this Section, unless otherwise specified:
1. "Animal control agency" means a board, commission, department, office, or other administrative unit of federal or state government or of a political subdivision of the state that is responsible for controlling rabies in animals in a specific geographic area.
2. *"Animal shelter" means a duly incorporated humane society, animal welfare society, society for the prevention of cruelty to animals or other nonprofit corporate organization devoted to the welfare, protection and humane treatment of animals.* A.R.S. § 11-1022(H).

Historical Note
Adopted effective February 24, 1988 (Supp. 88-1). Section R3-11-51 adopted and renumbered as Section R3-11-502 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Section amended by final rulemaking at 11 A.A.R. 448, effective March 5, 2005 (05-1). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-503. Repealed

Historical Note
Adopted effective April 26, 1984 (Supp. 84-2). Former Section R3-11-52 renumbered as Section R3-11-503 and subsections (B) and (D) amended effective February 24, 1988 (Supp. 88-1). Section repealed by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

ARTICLE 6. VETERINARY TECHNICIANS

R3-11-601. Repealed

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-60 renumbered without change as Section R3-11-601 effective February 24, 1988 (Supp. 88-1). Section repealed; new Section adopted effective December 11, 1998 (Supp. 98-4). Section repealed by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-602. Repealed

Historical Note
Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-61 renumbered without change as Section

R3-11-602 effective February 24, 1988 (Supp. 88-1). Repealed effective August 31, 1995 (Supp. 95-3).

R3-11-603. Examination Committee

The Board may appoint a committee of Arizona licensed veterinarians and certified veterinary technicians to assist the Board to prepare and administer examinations of applicants for veterinary technician certificates. An examination recommended by the examination committee is subject to the approval of the Board.

Historical Note

Adopted effective February 12, 1980 (Supp. 80-1). Former Section R3-11-62 renumbered without change as Section R3-11-603 effective February 24, 1988 (Supp. 88-1). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-604. Examinations

A. The Board shall hold a veterinary technician examination at least once a year. A minimum of 20 days before the examination, the Board shall send an applicant a written notice of the date, time, and place of the examination.

B. An applicant shall pass a national veterinary technician examination and an Arizona veterinary technician examination with a score of at least 70 percent on each examination before being certified by the Board.

C. An applicant with a passing score on either the national veterinary technician examination or the Arizona veterinary technician examination shall retake the examination if the applicant does not obtain certification within five years after the date of the examination.

D. An applicant who meets all the requirements in A.R.S. § 32-2242(D) is not required to retake the national veterinary technician examination. However, an applicant who meets all the requirements in A.R.S. § 32-2242(D) shall pass the Arizona veterinary technician examination within five years before obtaining certification.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Amended effective November 18, 1982 (Supp. 82-6). Former Section R3-11-63 renumbered without change as Section R3-11-604 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-605. Certified Veterinary Technician Services

A. Except as provided in subsection (B), a certified veterinary technician may perform the tasks delegated by a licensed veterinarian while under the direction, supervision, and control of the licensed veterinarian.

B. A certified veterinary technician shall not:
1. Perform surgery,
2. Diagnose,
3. Prescribe a medication, or
4. Provide a prognosis.

Historical Note

Adopted effective March 23, 1979 (Supp. 79-2). Former Section R3-11-64 renumbered without change as Section R3-11-605 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

R3-11-606. Application for a Veterinary Technician Certificate

A. Except as provided in subsection (B), an applicant for a veterinary technician certificate shall submit, at least 65 days before an examination date, an application packet to the Board that contains:
1. A notarized application form, signed by the applicant, containing:
   a. The applicant's name, mailing address, residence and business telephone numbers, and Social Security number;
   b. The name of the veterinarian currently employing applicant, if employed by a veterinarian;
   c. The name and address of the veterinary premises where applicant is employed, if employed; and
   d. A statement of whether application is being made on the basis of education or transfer from another state:
      i. If application is based on education, the applicant shall submit written documentation of graduation from a school that meets the requirements in A.R.S. § 32-2242(B) with a curriculum in veterinary technology; or
      ii. If application is based on transfer from another state, the applicant shall submit the information required in (A)(1)(d)(i) and proof required under A.R.S. § 32-2242(D);
2. If an applicant has passed a national veterinary technician examination, the applicant shall provide the date on which the applicant took the examination and arrange to have an official transcript of the applicant's scores from the national veterinary technician examination sent directly to the Board by the American Association of Veterinary State Boards;
3. An applicant who has been or is at the time of application certified or registered in another state as a veterinary technician shall cause each state board that has certified or registered the applicant to send directly to the Board a letter indicating the applicant's standing, including whether the applicant is currently under investigation or has ever been disciplined for violation of a veterinary technician or medical practice act;
4. As required under A.R.S. § 41-1080(A), an applicant shall submit to the Board the specified documentation of citizenship or alien status indicating the applicant's presence in the U.S. is authorized under federal law; and
5. A certified check or money order for the application and examination fee required in R3-11-105.

B. A veterinary technician student who expects to graduate at least 30 days before an examination date shall submit to the Board, no later than 65 days before the examination date, the application required under subsection (A) and rather than the documentation required under subsection (A)(1)(d)(i), a letter from the dean of the school that indicates the applicant is in good standing and states the expected date of graduation.

C. A veterinary technician student who submits an application under subsection (B) shall submit to the Board the documentation required under subsection (A)(1)(d)(i) no later than 15 days following the date of graduation.

Historical Note
Adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

Editor's Note: The following Section was amended under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules. These rules were subsequently repealed and new Section adopted under the regular rulemaking process.

R3-11-607. Renewal of Veterinary Technician Certificate

A. No later than February 1 of every odd-numbered year, a certificate holder shall submit:
1. A signed and dated renewal application form, which is provided to the certificate holder by the Board, containing the following information:
   a. The certificate holder's name, residence address, work address, and work telephone number;
   b. A statement of whether, within the two-year period preceding the renewal date, the certificate holder has been charged with a felony or any misdemeanor involving conduct that may affect patient health and safety including:
      i. The charged felony or misdemeanor;
      ii. The city, county, and state where the felony or misdemeanor took place;
      iii. The court having jurisdiction over the felony or misdemeanor;
      iv. Whether the charges were dismissed;
      v. The date of the conviction;
      vi. Whether the conviction was set aside;
      vii. Notice of expungement, if applicable;
      viii. Notice of restoration of civil rights, if applicable; and
      ix. Probation officer's name, address, and telephone number, if applicable; and
   c. A statement by the certificate holder that the information contained on the renewal form is true and correct.
2. The written documentation of continuing education required under R3-11-403;
3. If the documentation previously submitted under R3-11-606(A)(4) was a limited form of work authorization issued by the federal government, evidence that the work authorization has not expired; and
4. The fee required by the Board under R3-11-105.

B. A certificate holder who fails to submit the certificate renewal fee and information required under subsection (A) before February 1 of every odd-numbered year:
1. Forfeits all privileges and rights extended by the certificate, and
2. Shall immediately cease performing veterinary technician services until the certificate holder:
   a. Complies with the requirements of subsection (A), and
   b. Pays the delinquency fee required under R3-11-105 in addition to the certificate renewal fee.

Historical Note
Adopted effective November 18, 1982 (Supp. 82-6). Amended subsection (C) effective November 27, 1984 (Supp. 84-6). Former Section R3-11-66 renumbered without change as Section R3-11-607 effective February 24, 1988 (Supp. 88-1). Amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

ARTICLE 7. VETERINARY MEDICAL PREMISES AND EQUIPMENT

R3-11-701. General Veterinary Medical Premises Standards

A Responsible Veterinarian shall ensure that:
1. The physical plant of a veterinary medical premises conforms to state and local building and fire codes and local zoning requirements;
2. A veterinary medical premise's identification is visible to the public from the outside of its physical plant. The identification includes the hours of operation and shall be placed so that it is unobstructed from public view. If the hours of operation include hours after dusk, a means of illuminating the sign shall be provided and used during the hours of operation after dusk;
3. Floors, tables, countertops, sinks, and fixtures within the veterinary medical premises are made of nonporous materials that can be sanitized.
4. Water and a means of achieving water temperatures from 32°F to 212°F is provided on the veterinary medical premises;
5. Refrigerated storage space, large enough to contain all deceased animals except livestock, is provided on the veterinary medical premises, pending necropsy and disposal pick-up or, in the case of a mobile unit, if requested by the client, arrangements are made for disposal of the body, except livestock;
6. Storage space is provided on the veterinary medical premises for biohazardous medical waste pending disposal pick-up;
7. If animals, other than livestock, will be housed on a veterinary medical premises, an individual compartment, equipped with a latch, for each animal housed on the veterinary medical premises is provided;
8. A sharps container is provided on the veterinary medical premises; and
9. A working scale is provided at the veterinary medical premises for use with animals other than livestock.

Historical Note
Adopted effective April 26, 1984 (Supp. 84-2). Former Section R3-11-70 renumbered without change as Section R3-11-701 effective February 24, 1988 (Supp. 88-1). Section repealed, new Section R3-11-701 renumbered from R3-11-702 and amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 14 A.A.R. 3596, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-702. Equipment and Supplies

A Responsible Veterinarian shall ensure that equipment and supplies are available on the veterinary medical premises of an adequate number and type to provide the veterinary medical services that are offered at the veterinary medical premises.

Historical Note

Section R3-11-71 adopted and renumbered as Section R3-11-702 effective February 24, 1988 (Supp. 88-1). Former Section R3-11-702 renumbered to R3-11-701, new Section R3-11-702 adopted effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-703. Maintenance Standards for a Veterinary Medical Premises

A Responsible Veterinarian shall ensure that:

1. All exits, corridors, and passageways inside and outside the veterinary medical premises are unobstructed at all times;
2. Combustible material such as paper, boxes, and rags are not allowed to accumulate inside or outside the veterinary medical premises;
3. Temperatures are maintained between 65°F and 90°F in each room where an animal, other than livestock, is treated or housed;
4. Floors, countertops, tables, sinks, and any other equipment or fixtures used in a veterinary medical premises are maintained in a clean condition and sanitized after contact with an animal or animal tissue; and
5. Animal compartments are cleaned and sanitized at least once every 24 hours when an animal, other than livestock, is being housed and after each animal, other than livestock, vacates the compartment.

Historical Note

Renumbered from R3-11-704 and amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-704. Surgical Equipment

In addition to complying with the requirements in this Article, if surgery is performed on a veterinary medical premises, a responsible veterinarian shall ensure that the following is provided on the veterinary medical premises:

1. Caps, masks, and sterile gloves and gowns;
2. Sterile surgical packs, including:
   i. Drapes;
   ii. Sponges; and
   iii. Surgical instruments necessary to perform a surgical procedure;
3. An oxygen tank that contains oxygen sufficient for each animal to whom general anesthesia is administered;
4. A means of administering anesthesia for each animal that will receive general anesthesia;
5. A fixed or portable surgical light to illuminate the surgical site; and
6. A light for use if the surgical light will not operate.

Historical Note

Adopted effective April 26, 1984 (Supp. 84-2). Former Section R3-11-73 amended and renumbered as Section R3-11-704 effective February 24, 1988 (Supp. 88-1). Former Section R3-11-704 renumbered to R3-11-703, new Section R3-11-704 renumbered from R3-11-705 and amended effective August 31, 1995 (Supp. 95-3). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

R3-11-705. Mobile Clinics

A. Except for R3-11-701(1), R3-11-701(2), R3-11-701(5), and R3-11-701(6) the application process and standards contained in this Article apply to mobile clinics.

B. A Responsible Veterinarian shall ensure that a mobile clinic has:

1. An electrical power source;
2. Storage space for biohazardous waste pending disposal pick-up; and
3. Storage space, separate from storage space in subsection (B)(2), for the transportation of a deceased animal.

Historical Note

Section R3-11-74 adopted and renumbered as Section R3-11-705 effective February 24, 1988 (Supp. 88-1). Former Section R3-11-705 renumbered to R3-11-704, new Section R3-11-705 renumbered from R3-11-706 effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-706. Mobile Units

A Responsible Veterinarian shall:

1. Ensure that controlled substances and prescription-only drugs are maintained accessible only to authorized personnel,
2. Meet manufacturer's label requirements for the storage and handling of biologics and veterinary supplies and medications requiring temperature control, and
3. Maintain sterile surgical supplies and equipment.

Historical Note

Section R3-11-75 adopted and renumbered as Section R3-11-706 effective February 24, 1988 (Supp. 88-1). Former Section R3-11-706 renumbered to R3-11-705, new Section R3-11-706 renumbered from R3-11-707 and amended effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-707. Application for a Veterinary Medical Premises License

An applicant for a veterinary medical premises license shall:

1. Submit the following to the Board:
   a. A notarized application form, signed by the Responsible Veterinarian, that contains the information set forth in A.R.S. § 32-2272; and
   b. The fee required in R3-11-105, payable by certified check or money order; and
2. Pass an inspection conducted by the Board.

Historical Note

Adopted effective April 26, 1984 (Supp. 84-2). Former Section R3-11-76 renumbered without change as Section R3-11-707 effective February 24, 1988 (Supp. 88-1). Renumbered to R3-11-706 effective August 31, 1995 (Supp. 95-3). New Section adopted effective December 11, 1998 (Supp. 98-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

ARTICLE 8. DRUG DISPENSING

Editor's Note: The following Section was adopted under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-801. Notification that Prescription-only Drugs or Controlled Substances May Be Available at a Pharmacy

A. A dispensing veterinarian shall notify an animal owner that some prescription-only drugs and controlled substances may be available at a pharmacy by:
1. Stating the availability at or before the time of dispensing;
2. Posting a written statement that is visible to the animal owner; or
3. Providing the animal owner with written notification.

B. A dispensing veterinarian may provide a written, electronic, or telephonic prescription if requested by an animal owner and the dispensing veterinarian:
1. Has a valid doctor-patient relationship with the animal, and
2. Determines that providing the prescription is in the best interest of the animal.

Historical Note
Adopted effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

Editor's Note: The following Section was adopted under an exemption from A.R.S. Title 41, Chapter 6 which means that the Department did not submit notice of this rulemaking to the Secretary of State's Office for publication in the Arizona Administrative Register; the Department did not submit these rules to the Governor's Regulatory Review Council for review; the Department was not required to hold public hearings on these rules; and the Attorney General has not certified these rules.

R3-11-802. Labeling Requirements

A veterinarian shall dispense a prescription-only drug or a controlled substance in a container bearing a legible label that sets forth all of the information required under A.R.S. § 32-2281(A)(1).

Historical Note
Adopted effective August 31, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-803. Packaging Requirements

A. A veterinarian shall dispense four ounces or less of a prescription-only drug in a childproof container unless the animal owner waives this requirement.

B. A veterinarian shall dispense a controlled substance in a childproof container.

C. A veterinarian may dispense more than four ounces of a bulk prescription-only drug in a non-childproof container.

D. A veterinarian may dispense a prescription-only drug in the manufacturer's original dispensing package without repackaging the prescription-only drug in a child-proof container.

Historical Note
New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4).

R3-11-804. Reserved

R3-11-805. Storage

A. A dispensing veterinarian shall store controlled substances under lock and key except for controlled substances that are authorized by a responsible veterinarian to be administered by personnel.

B. A dispensing veterinarian shall store prescription-only drugs in an area to which members of the public are not allowed access unless accompanied by a veterinarian or a member of the veterinarian's staff.

C. A dispensing veterinarian shall store prescription-only drugs and prescription-only devices in compliance with state and federal laws and in compliance with the manufacturer's requirements.

Historical Note
New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4).

R3-11-806. Reserved

R3-11-807. Dispensing a Controlled Substance or Prescription-only Drug

A. When dispensing a controlled substance:
1. A dispensing veterinarian or personnel who are not veterinarians but who are authorized by a veterinarian may:
   a. Select the controlled substance,
   b. Count the quantity of the controlled substance, and
   c. Place the controlled substance in a prescription container.
2. Licensed or unlicensed personnel may:
   a. Prepare labels,
   b. Prepare drug containers for controlled substances, or
   c. Record information required by state and federal laws.
3. A dispensing veterinarian shall review the label of a repackaged controlled substance and the patient's medical record and ensure that the label complies with R3-11-502 and state and federal laws before the controlled substance is dispensed.

B. When dispensing a prescription-only drug:
1. A dispensing veterinarian or personnel who are not veterinarians but who are authorized by a veterinarian may:
   a. Repackage prescription-only drugs,
   b. Prepare labels,
   c. Prepare containers for prescription-only drugs, or
   d. Record information required by state or federal laws.
2. The dispensing veterinarian authorizing the dispensing shall ensure that records are maintained according to R3-11-502(K) and R3-11-502(L) and all state and federal laws are followed.

Historical Note
New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4).

ARTICLE 9. INVESTIGATIONS AND HEARINGS

R3-11-901. Investigations of Alleged Violations

A. A person may notify the Board of an alleged violation of A.R.S. §§ 32-2201 through 32-2296 and this Chapter. The Board also may initiate a complaint on its own motion.

B. The Board shall send a written notice to the licensee or certificate holder who is the subject of a complaint. The licensee or certificate holder shall provide a written response and all relevant records or documents concerning the complaint if requested by the Board, no later than 15 days from the date of the notice. If a medical record is relevant to the complaint, the licensee or certificate holder shall ensure that the version of the medical record provided to the Board is typewritten.

C. The Board may request the licensee or certificate holder to reply to any statements or documents the Board receives concerning a complaint. If the Board requests the licensee or certificate holder to provide the Board with additional information concerning a complaint, the licensee or certificate holder shall respond in writing within 15 days from the date of the request.

D. The Board may request the complainant and other witnesses or the licensee or certificate holder to appear before the Board to assist in the Board's investigation.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 12 A.A.R. 4070, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-902. Informal Interview

A. The Board shall conduct an informal interview under A.R.S. § 32-2234, 32-2249, 32-2274, or 32-2294 as follows:

1. The Board shall send a written notice of the informal interview to the licensee or certificate holder by personal service or certified mail, return receipt requested, at least 20 days before the informal interview. The Board shall ensure that the notice contains:
   a. The time, place, and date of the informal interview;
   b. An explanation of the informal nature of the interview;
   c. A statement of the subject matter or issues involved;
   d. The licensee's or certificate holder's right to appear with or without the assistance of an attorney;
   e. A notice that if a licensee or certificate holder fails to appear at the informal interview, the informal interview may be held in the licensee's or certificate holder's absence; and
   f. The licensee's or certificate holder's right to a formal hearing held according to A.R.S. § 32-2234, 32-2249, 32-2274, or 32-2294.
2. During the informal interview:
   a. The Board may:
      i. Swear in the licensee or certificate holder and all witnesses;
      ii. Question the licensee or certificate holder and all witnesses; and
      iii. Deliberate.
   b. The licensee or certificate holder may question witnesses.
3. At the conclusion of the informal interview the Board may:
   a. Order additional investigation;
   b. Order another informal interview;
   c. Dismiss the complaint;
   d. Impose disciplinary sanctions authorized by A.R.S. § 32-2234, 32-2249, 32-2274, or 32-2294 if a violation is found; or
   e. Order a formal hearing on the complaint.

B. The Board shall issue written findings of fact, conclusions of law, and order of the Board no later than 60 days from the date of the conclusion of the informal interview.

C. A licensee, certificate holder, or the Board may seek a rehearing or review of a Board decision as stated in A.A.C. R3-11-904 or A.R.S. § 41-1092.02.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-903. Formal Hearing

A. If a formal hearing under A.R.S. § 32-2234, 32-2249, 32-2274, or 32-2294 is to be held before an administrative law judge, the requirements in A.R.S. § 41-1092 through 41-1092.11 apply.

B. If a formal hearing under A.R.S. § 32-2234, 32-2249, 32-2274, or 32-2294 is to be held directly before the Board, the requirements in A.R.S. § 41-1092 through 41-1092.11 and the following apply:

1. The Board shall provide a written complaint and notice of formal hearing to a licensee or certificate holder at the licensee's or certificate holder's last known address of record, by personal service or certified mail, return receipt requested at least 30 days before the date set for the formal hearing;
2. A licensee or certificate holder served with a complaint and notice of hearing shall file an answer by the date specified in the notice of hearing admitting or denying the allegations in the complaint;
3. A complaint and notice of hearing may be amended at any time. The Board shall send written notice of any changes in the complaint and notice of hearing to the licensee or certificate holder at least 20 days before a formal hearing;
4. The licensee or certificate holder may appear at the formal hearing with or without the assistance of an attorney. If the licensee or certificate holder fails to appear, the Board may hold the formal hearing in the licensee's or certificate holder's absence;
5. The Board may conduct a formal hearing without adherence to the rules of procedure or rules of evidence used in civil proceedings. At the formal hearing, the Board shall rule on the procedure to be followed and admissibility of evidence; and
6. The Board shall send a written decision that includes written findings of fact, conclusions of law, and order to the licensee or certificate holder within 60 days after the formal hearing is concluded. The licensee, certificate holder, or Board may seek rehearing or review of the order according to A.A.C. R3-11-904 or A.R.S. § 41-1092.02.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 513, effective April 7, 2007

(Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-904. Rehearing or Review of Decisions

A. Except as provided in subsection (F), a party who is aggrieved by a decision issued by the Board may file with the Board, not later than 30 days after service of the decision, a written motion for rehearing or review of the decision specifying the grounds for rehearing or review. For purposes of this Section, a decision is considered to have been served when personally delivered to the party's last known address or mailed by certified mail to the party or the party's attorney.

B. A party filing a motion for rehearing or review under this rule may amend the motion at any time before it is ruled upon by the Board. Other parties may file a response within 15 days after the date the motion for rehearing or review is filed. The Board may require that the parties file supplemental memoranda explaining the issues raised in the motion and may permit oral argument.

C. The Board may grant a rehearing or review of the decision for any of the following causes materially affecting the party's rights:

1. Irregularity in the proceedings of the Board or an abuse of discretion, which deprived the party of a fair hearing;
2. Misconduct of the Board or its hearing officer or the prevailing party;
3. Accident or surprise that could not have been prevented by ordinary prudence;
4. Newly-discovered material evidence that could not with reasonable diligence have been discovered and produced at the original hearing;
5. Excessive or insufficient penalties;
6. Error in the admission or rejection of evidence or other errors of law occurring at the administrative hearing; or
7. That the findings of fact or decision is not supported by the evidence or is contrary to law.

D. The Board may affirm or modify its decision or grant a rehearing to any party on all or part of the issues for any of the reasons in subsection (C). An order granting a rehearing or review shall specify the grounds for the rehearing or review.

E. Not later than 30 days after a decision is issued by the Board, the Board may, on its own initiative, grant a rehearing or review of its decision for any of the reasons in subsection (C). An order granting a rehearing shall specify the grounds for the rehearing or review.

F. If the Board makes specific findings that the immediate effectiveness of a decision is necessary for the immediate preservation of public health and safety and determines that a rehearing or review of the decision is impracticable, unnecessary or contrary to the public interest, the decision may be issued as a final decision without an opportunity for a rehearing or review. If a decision is issued as a final decision without an opportunity for rehearing or review, the aggrieved party shall make an application for judicial review of the decision within the time limits permitted for an application for judicial review of the Board's final decision at A.R.S. § 41-1092.02.

G. The Board shall rule on the motion for rehearing or review within 15 days after the response has been filed, or at the Board's next meeting after the motion is received, whichever is later. If a motion for rehearing or review is granted, the Board shall hold the rehearing or review within 90 days from the date the Board issues the order for rehearing or review.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3). Amended by final rulemaking at 11 A.A.R. 5455, effective February 4, 2005 (Supp. 05-4).

R3-11-905. Depositions, Issuance of Subpoenas, Service

A. A party desiring to take the deposition of a witness who is unable to attend a hearing before the Board shall submit a request to take a deposition of an unavailable witness to the Board.

1. If the Board grants the request to take a deposition of an unavailable witness, the party may proceed to take the deposition of the witness by complying with the Arizona Rules of Civil Procedure.
2. The Board may, in its discretion, designate the time and place before whom the deposition may be taken.
3. The party requesting the deposition shall bear the expense of the deposition.

B. A subpoena may be issued as follows:

1. If a hearing is to be conducted by the Board, the Board may issue a subpoena for the attendance of a witness or the production of books, records, documents and other evidence according to A.R.S. § 32-2237(F).
   a. The Board shall serve a subpoena on each party at least 10 days before the hearing date.
   b. A party shall submit a written request for a subpoena with the Board. The party shall submit the request in the time necessary to allow compliance with subsection (B)(1)(a).
   c. The party requesting service of a subpoena shall bear the expense of the service of the subpoena.
2. If a hearing is to be conducted by an administrative law judge, a subpoena is issued by the Office of Administrative Hearings according to A.R.S. § 41-1092.02.

C. Service of any decision, order, notice, subpoena, or other process may be made personally in the same manner as provided for service of process in a civil action, or may be mailed by certified mail, postage prepaid, to the last address of record with the Board.

1. Personal service is effective on the date received. Service by certified mail is effective when deposited in the United States mail.
2. Service upon an attorney for a party constitutes service upon the party.
3. Proof of service may be made by the affidavit or oral testimony of the process server.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 3918, effective September 20, 2000 (Supp. 00-3).

ARTICLE 10. ANIMAL CREMATORY MINIMUM STANDARDS

R3-11-1001. Definitions

In this Article:

"Animal remains" means the body or part of the body of a dead animal in any stage of decomposition.

"Authorizing agent" means an individual legally entitled to authorize the cremation of animal remains.

"Communal cremation" means remains from multiple animals are in the cremation chamber without any form of separation or identification during the cremation process.

"Cremated remains or ashes" means the residual of animal remains recovered after completion of the cremation process.

"Cremation chamber" means the enclosed space within which the cremation process takes place.

"Individual cremation" means the remains of each animal are separated and placed in a mapped location in the cremation chamber during the cremation procedure.

"Major changes in the scope of animal crematory services," as used in A.R.S. § 32-2292(C), means an increase or decrease in the number of retorts or the addition of services offered or provided by an animal crematory licensed under this Article.

"Operator" means the individual who is responsible for the day-to-day operation of an animal crematory licensed under this Article.

"Owner" means the person named under A.R.S. § 32-2292(B)(2).

"Private cremation" means the remains of only one animal are placed in the cremation chamber.

"Process" means to reduce identifiable bone fragments remaining after cremation to unidentifiable cremated remains.

"Renewal period" means the two years between January 1 of an odd-number year and December 31 of an even-numbered year.

"Responsible Owner" means the person designated by the crematory owner to be responsible to the Board for the operation of the animal crematory.

"Retort" means the machine used to cremate animal remains.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1002. Obtaining an Animal Crematory License

A. A person shall not provide or represent to provide animal cremation services before submitting to the Board an application and the fee required under subsection (B).

B. To obtain an animal crematory license, the Responsible Owner of an animal crematory shall:

1. Submit an application, using a form obtained from the Board, which provides, but is not limited to, the following information:
   a. Name of the animal crematory;
   b. Address of the fixed location of the animal crematory;
   c. Name of the person owning the animal crematory:
      i. If the owner is an individual, that individual's name;
      ii. If the owner is a partnership, the names of all partners; and
      iii. If the owner is corporation or another business form, the names of all individuals owning at least 10 percent of the business;
   d. For each individual identified under subsection (B)(1)(c):
      i. Residential address; and
      ii Documentation of citizenship or alien status, specified under A.R.S. § 41-1080(A), indicating the individual's presence in the U.S. is authorized under federal law.
   e. Names of all operators;
   f. A description of all services that will be provided or offered by the animal crematory;
   g. A description of the animal crematory premises;
   h. A description of any cremation equipment; and
   k. Name and signature of the Responsible Owner;
2. Submit the fee required under R3-11-1004(1);
3. Submit evidence that all operators have received training in the safe and proper operation of the crematory from the manufacturer of the retort or other provider;
4. Submit a copy of every application for or license or permit issued for the animal crematory to operate in this state; and
5. Schedule an inspection of the animal crematory by a Board designee.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1003. Renewing an Animal Crematory License

A. An animal crematory license expires on December 31 of every even-numbered year.

B. A Responsible Owner that fails to submit a renewal application and the fee required under R3-11-1004(2) to the Board on or before December 31 of an even-numbered year shall cease providing animal cremation services until a renewal application is submitted.

C. To renew an animal crematory license, the Responsible Owner shall submit to the Board, between October 1 and December 31 of an even-numbered year:

1. A renewal application that provides the following information:
   a. Name of the animal crematory;
   b. Address of the fixed location of the animal crematory;
   c. Name of the owner of the animal crematory:
      i. If the owner is an individual, that individual's name;
      ii. If the owner is a partnership, the names of all partners; and
      iii. If the owner is corporation or another business form, the names of all individuals owning at least 10 percent of the business;
   d. For individuals named under subsection (C)(1)(c), if the documentation previously submitted under R3-11-1002(B)(1)(d)(ii) was a limited form of work authorization issued by the federal government, evidence that the work authorization has not expired;
   e. Names of all operators; and
   f. Signature of the Responsible Owner; and
2. The fee required under R3-11-1004(2)

D. If a renewal application is not submitted as required under subsection (C) but is submitted before February 1 following expiration on the previous December 31, the Responsible Owner shall include with the renewal application an affirmation that animal cremation services were not provided at the animal crematory after the animal crematory license expired on the previous December 31.

E. If a renewal application is not submitted under either subsection (C) or (D), the Responsible Owner may have the animal crematory re-licensed within one year following expiration only by:

1. Submitting the renewal application and fee required under subsection (C);
2. Submitting the affirmation required under subsection (D); and
3. Submitting the penalty required under R3-11-1004(3).

F. If a renewal application is not submitted under subsection (C), (D), or (E), the Responsible Owner may have the animal crematory re-licensed only by complying with R3-11-1002.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1004. Fees
Under the authority provided by A.R.S. § 32-2207(9), the Board establishes and shall collect the following fees:
1. Animal crematory license: $400;
2. Renewal of an animal crematory license: $400;
3. Penalty for license renewal after January 31 following expiration: $100; and
4. Duplicate license: $10.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1).

R3-11-1005. Minimum Standards for an Animal Crematory
The owner shall ensure that:
1. The animal crematory complies with all federal, state, and local laws;
2. The animal crematory is at a fixed location;
3. The retort is constructed to withstand temperatures high enough to reduce animal remains to bone fragments yet protect persons and property from damage from excessive heat or harmful emissions;
4. The retort is shielded from public view;
5. The retort is competently installed. If the retort is installed in Arizona after the effective date of this Article, the retort shall be installed according to the manufacturer's recommendations and in accordance with all state, federal, and local laws and ordinances;
6. If the retort is inside a building:
   a. It is vented to the outside of the building; and
   b. There is adequate exhaust to prevent heat buildup;
7. The cremation chamber receives fresh air to aid in combustion;
8. The animal crematory has a storage facility that:
   a. Chills animal remains to at least 40 °F;
   b. Is secure from access by unauthorized individuals; and
   c. Preserves the dignity of the animal remains;
9. The animal crematory has the equipment and supplies necessary to conduct cremations in a manner that protects the health and safety of crematory employees and the public; and
10. All city, county, and other building codes, restrictions, and guidelines applicable to the animal crematory are followed.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1006. Minimum Operating Standards for an Animal Crematory
The owner shall ensure that:
1. The animal crematory accepts delivery of animal remains only from:
   a. The owner of the animal remains;
   b. An animal shelter or humane society;
   c. A veterinarian licensed under this Chapter;
   d. An individual or entity with whom the animal crematory has a written contract regarding collection, pick-up, or delivery services;
   e. An authorized agent of a person described under subsections (1)(a) through (1)(d); or
   f. A state, county, city, or other corporation authorized to remove dead animals.
2. Animal remains that cannot be cremated immediately upon receipt are placed in the storage facility described in R3-11-1005(8) but for no more than 30 days;
3. If animal remains are submitted for individual cremation:
   a. The animal remains are cremated separate from other animal remains;
   b. The cremated remains are not commingled with other cremated remains;
   c. The cremated remains are removed from the cremation chamber to the extent feasible and placed in an appropriately sized and securely closed container;
   d. A label containing the following information is permanently affixed to the container in which the cremated remains are placed:
      i. Name of the crematory,
      ii. Name of the animal cremated, and
      iii. Date of cremation; and
   e. The cremated remains are disposed according to instructions from the authorizing person or agent;
4. All animal remains submitted for cremation are cremated;
5. Animal remains that are communally cremated are disposed of in a legal manner;
6. The cremation chamber is:
   a. Operated in a safe and sanitary manner and maintained so the cremation chamber functions in an effective and efficient manner; or
   b. Operated and maintained according to the manufacturer's recommendations if the retort is installed in Arizona after the effective date of this Article;
7. Employees of the animal crematory who handle animal remains use universal precautions and exercise reasonable care to minimize the risk of injury or transmitting communicable disease; and
8. Instructions for operation of the cremation chamber, including emergency shut-down procedures, are located at the animal crematory and easily accessible.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1007. Written Procedures Required
A. The Responsible Owner shall ensure that the animal crematory has written procedures regarding the manner in which:
1. Animal remains are identified from the time the animal crematory accepts delivery of the animal remains until the cremated remains are released according to instructions from the authorizing person or agent;
2. Authorization to cremate is obtained and documented;
3. The cremation chamber is loaded and unloaded;
4. Cremated remains are processed;
5. Cremated remains, including unclaimed cremated remains, are returned to the authorized agency or disposed of; and
6. Records are to be completed and maintained for three years from the date of service.

B. The Responsible Owner shall ensure that all employees involved in providing animal cremation services are familiar with and follow the required procedures.

C. The Responsible Owner shall make these written procedures available for inspection by the Board upon request.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1008. Recordkeeping Requirements

A. The Responsible Owner shall ensure that records containing the following information are maintained for three years:
1. For the cremation of individual animal remains:
   a. Last name of the owner of the animal;
   b. Name of the animal;
   c. Description of the animal, including its weight;
   d. Name of the individual, facility, or organization from which the animal was received;
   e. Authorization to cremate;
   f. Date of cremation and in which retort the cremation occurred; and
   g. Date and manner of disposition of cremated remains;
2. For a communal cremation of animal remains:
   a. Name of the individual, facility, or organization from which the animal remains were received;
   b. Number of animals and estimated total weight;
   c. Last name of animals' owners, if known;
   d. Names of animals, if known;
   e. Authorization to cremate;
   f. Date of cremation and in which retort the cremation occurred; and
   g. Date and manner of disposition of cremated remains.

B. If an animal crematory uses a service to collect, pick up, or deliver animal remains for cremation, the Responsible Owner shall enter into a written contract with the service that requires the service to inform the authorizing person or agent, in writing, of the name of the animal crematory that will do the cremation. The Responsible Owner shall maintain a copy of any contract for two years after expiration of the contract term.

C. The Responsible Owner shall maintain for three years records of all maintenance performed on the retort.

D. The Responsible Owner shall make the records required under this Section available for inspection by the Board upon request.

E. Under A.R.S. § 32-2294(A)(3), the Responsible Owner shall make records required under subsection (A) available on request to the authorizing person or agent.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1009. Change in a Responsible Owner

Under A.R.S. § 32-2292(D), a change of Responsible Owner, cancels a license and the Responsible Owner shall:
1. Submit the cancelled license to the Board within 20 days after the change in Responsible Owner; and
2. Ensure that animal cremation services are not provided until an application and fee are submitted under R3-11-1002.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

R3-11-1010. Change in Operator

Within 30 days after a change in operator, the Responsible Owner shall provide a written notice to the Board that includes:
1. Name of the licensed animal crematory;
2. Animal crematory license number;
3. Name of the former operator;
4. Name of the new operator;
5. Date on which the new operator assumed responsibility for the animal crematory; and
6. An affirmation, signed by the Responsible Owner, that the new operator received training in the safe and proper operation of the cremation chamber and the written procedures required under R3-11-1007.

Historical Note
New Section made by final rulemaking at 13 A.A.R. 513, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 1886, effective October 7, 2013 (Supp. 13-3).

32-2202. Board; appointment; term; qualifications; officers; compensation

A. There shall be an Arizona state veterinary medical examining board consisting of nine members appointed by the governor pursuant to section 38-211.

B. Each member shall serve for a term of four years. A member shall not serve more than two full terms. After notice and a hearing before the governor, a member of the board may be removed on a finding by the governor of continued neglect of duty, incompetence or unprofessional or dishonorable conduct. The term of any member automatically ends on written resignation submitted to the board or to the governor.

C. Five members shall be licensed veterinarians who have an established practice location in this state or are employed by a university or a political subdivision of the state and who have resided and practiced in the state for at least five years immediately preceding appointment, no more than three of whom shall be from the same veterinary college. Three members shall not be veterinarians, two representing the general public and one representing the livestock industry. One member shall be a certified veterinary technician who has held the designation for at least five years, is currently employed in the veterinary field in this state and has practiced and resided in this state for at least five years immediately preceding appointment. Except as provided in subsection F of this section, a person who has been convicted of a violation of any provision of this chapter is ineligible for appointment.

D. The board shall elect a chairman and such other officers as it deems necessary. The term of each officer shall be one year ending June 30, or until the officer's successor is elected and qualifies.

E. Each member of the board shall receive compensation at a rate not exceeding one hundred dollars for each day engaged in the service of the board.

F. The governor may appoint a person to the board who has previously been sanctioned pursuant to section 32-2233, subsection B.

32-2204. Meetings; quorum

A. The board shall hold one annual meeting and other meetings as necessary. Special meetings may be called by the chairman of the board. The time and place of the annual meeting and the method of giving notice of special meetings shall be fixed by the rules adopted by the board.

B. At each board meeting the board shall make a call to the public informing attendees that any member of the public may address the board regarding any matter that appears on the board's agenda.

C. The board shall tape record all discussions of complaints that are not conducted in executive session. The board shall retain the tapes for at least two years.

D. A majority of the board members shall constitute a quorum.

32-2207. Veterinary board; powers and duties

The primary duty of the board is to protect the public from unlawful, incompetent, unqualified, impaired or unprofessional practitioners of veterinary medicine through licensure and regulation of the profession in this state. The powers and duties of the board include:

1. Administering and enforcing this chapter and board rules.

2. Regulating disciplinary actions, the granting, denial, revocation, renewal and suspension of licenses and certificates and the rehabilitation of licensees and certificate holders pursuant to this chapter and board rules.

3. Prescribing the forms, content and manner of application for licensure and certification and renewal of licensure and certification and setting deadlines for the receipt of materials required by the board.

4. Keeping a record of all licensees and certificate holders, board actions taken concerning all applicants, licensees and certificate holders and the receipt and disbursal of monies.

5. Adopting an official seal for attestation of licenses, certificates and other official papers and documents.

6. Investigating charges of violations of this chapter and board rules and orders.

7. Subject to title 41, chapter 4, article 4, employing an executive director who serves at the pleasure of the board.

8. Adopting rules pursuant to title 41, chapter 6 that relate to the qualifications and regulation of doctors of veterinary medicine, certified veterinary technicians, veterinary premises, mobile veterinary clinics and crematories and other rules that the board deems necessary for the administration of this chapter. The rules may include continuing education requirements for licensees and certificate holders and shall include:

(a) Minimum standards of veterinary practice.

(b) Provisions to ensure that the public has reasonable access to nonconfidential information about the licensing or certification status of persons regulated under this chapter and about resolved complaints against licensees and certificate holders.

(c) Provisions to ensure that members of the public have an opportunity to evaluate the services that the board provides to the public.

(d) A provision that licensed veterinary faculty members are not subject to continuing education requirements.

9. Establishing by rule fees and penalties as provided in this chapter, including fees for the following:

(a) Reproduction of documents.

(b) Verification of information about a licensed veterinarian at the request of a veterinary licensing board in another jurisdiction.

(c) Return of checks due to insufficient funds, an order to stop payment or a closed account.

(d) Provision of a list of the names of veterinarians, certified veterinary technicians or veterinary premises licensed or certified by the board.

10. Adopting rules that require the board to inform members of the public about the existence of the office of the ombudsdman-citizens aide established by section 41-1375.

32-2213. Application for license; retention of examination materials

A. A person desiring to practice veterinary medicine or surgery, including as a faculty member at a veterinary college, shall apply in writing to the board for a license to practice. The application shall be on a form provided by the board and shall require the following information:

1. The name, age and address of the applicant.

2. The names of schools of veterinary medicine that the applicant attended, the dates of attendance and the date of transfer.

3. The degrees held from schools of veterinary medicine.

4. The location and length of time in active practice in other states or territories of the United States, if any, and whether or not the applicant is in good standing in each location of practice.

5. An affidavit that the facts recited in the application are accurate, true, and complete.

6. An affidavit that no complaint has been filed and is pending, no investigation is pending and no disciplinary action has been taken or is pending on any veterinary license the applicant holds from another state.

7. For a veterinary faculty member license application, documentation from an authorized official of a veterinary college in this state that shows that the applicant has been appointed to the faculty of that veterinary college.

8. Any other information that is required by rules adopted by the board.

B. All examination papers, tapes, questions and answers shall be maintained in accordance with a retention schedule approved by the Arizona state library, archives and public records.

32-2214. Examination of applicants; confidentiality

A. All applicants for a veterinary license, not including a veterinary faculty member license, shall take an examination that consists of the following:

1. A state examination approved by the board.

2. The North American veterinary licensing examination.

B. The state examination shall be both:

1. Held in January and June of each year unless otherwise provided by the board.

2. Conducted so that the members of the board do not know the name of the applicant until the judging or grading is officially completed.

C. A grade of at least seventy-five percent is required to successfully pass the North American veterinary licensing examination. A grade of at least seventy-five percent is required to successfully pass the state examination. The scores of the North American veterinary licensing examination and the state examination shall not be averaged. National board scores that are received from either the national examination committee or the North American veterinary licensing examination committee from another state may be accepted for part of an applicant's passing score.

D. An applicant's score that was received within the preceding five years and that is on record at the national examination service or the North American veterinary licensing examination committee shall be verified through either the national examination service or the North American veterinary licensing examination committee, unless the applicant is applying for a license by endorsement or a specialty license under section 32-2215, subsection C or D, in which case the applicant's score shall be transcribed and received by the board.

E. All examination materials, records of examination grading and performance and transcripts of educational institutions concerning applicants or licensees are confidential and not public records.

32-2215. Qualifications for license to practice veterinary medicine

A. An applicant for a license issued under this chapter shall:

1. Be a graduate of a veterinary college that is accredited by the American veterinary medical association or hold a certificate issued by the educational commission for foreign veterinary graduates, the program for the assessment of veterinary education equivalence or a foreign graduate testing program approved by the board. This paragraph does not apply to an applicant for a veterinary faculty member license who has graduated from a veterinary college.

2. Satisfactorily pass both a state examination approved by the board as provided in this chapter and the North American veterinary licensing examination. This paragraph does not apply to an applicant for a veterinary faculty member license.

B. An applicant may be denied licensure either before or after an examination if the applicant has committed any act that if committed by a licensee would be grounds for suspension or revocation of a license to practice veterinary medicine under this chapter.

C. The board may waive the examination requirement pursuant to section 32-2214, subsection A, paragraph 2 and, except as provided in subsection E of this section, may issue a license by endorsement to an applicant to practice veterinary medicine if the applicant provides all required documentation pursuant to section 32-2213 and meets the following requirements:

1. Holds an active license in one or more other states or in Canada and submits verification that the applicant has previously taken and passed the examination required by section 32-2214, with a score at least equal to the score required to pass in this state. An applicant who received original licensure before the examination required by section 32-2214 was required in the state in which the applicant was originally licensed may be eligible for licensure without having taken that examination as required pursuant to this chapter if all other requirements are met.

2. Lawfully and actively engages in the practice of veterinary medicine for at least three of the preceding five years or six of the preceding ten years in one or more states in this country or in Canada before filing an application for licensure in this state.

3. Has graduated from a veterinary college recognized by the board.

4. Successfully passes a state examination approved by the board with a grade of at least seventy-five percent.

5. Pays a fee for the license of $750.

D. The board may waive the examination requirement pursuant to section 32-2214, subsection A, paragraph 2 and, except as provided in subsection E of this section, may issue a specialty license to an applicant to practice veterinary medicine if the applicant provides all required documentation pursuant to section 32-2213 and meets the following requirements:

1. Holds a current certification as a specialist of a national specialty board or college recognized by the American veterinary medical association.

2. Limits the applicant's practice to the scope of the applicant's board certification.

3. Successfully passes a state examination approved by the board with a score of at least seventy-five percent.

4. Pays a fee for the specialty license of $750.

E. The board shall determine whether previous disciplinary action prevents licensure by endorsement or specialty licensure of an applicant to practice veterinary medicine, and the board may discipline the licensee at the time of licensure as a result of the previous disciplinary action.

F. Any veterinary faculty member who is employed by a veterinary college that is accredited by the American veterinary medical association, if applicable, is subject to the requirements under the veterinary faculty member license.

32-2216. Issuance of temporary permits; emergency temporary permits; definition

A. The board may issue temporary permits to veterinary license applicants and to veterinarians who are licensed in other states and who enter this state to provide voluntary services during a state of emergency as declared by the governor or the board of supervisors of the county in which the board of supervisors has declared a local emergency pursuant to section 26-311. Except for applicants who are veterinary faculty members who have graduated from a veterinary college, applicants for all temporary permits must be graduates of an American veterinary medical association accredited veterinary college or holders of a certificate from the educational commission for foreign veterinary graduates or from a program for the assessment of veterinary education at the time of application.

B. The temporary permit issued under this section entitles a veterinary license applicant to engage in the active practice of veterinary medicine in this state as an employee of a licensed veterinarian, this state or any county or municipality in this state. The applicant is eligible for the next examination, if the applicant has not violated any provision of this chapter. An applicant working under the direct and personal instruction, control or supervision of a licensed veterinarian and whose compensation is paid by the veterinarian may perform those acts of animal health care assigned by the veterinarian having responsibility for the care of the animal. The temporary permit described in this subsection expires twenty days after the examination. If the applicant fails for good and sufficient reason to take the examination, the board, by majority consent, may extend the permit until the next succeeding examination. Except as otherwise provided in this section, the holder of a temporary permit must be examined and satisfactorily pass the license examination next following the issuance of the permit and duly receive a license in order to continue active professional practice. The temporary permit may be extended only one time. For the purposes of this subsection, "direct and personal instruction, control or supervision" means that a veterinarian who is licensed by the board is physically present and personally supervising a temporary permittee when the permittee is practicing acts of veterinary medicine except if the permittee is at a temporary site for the purpose of delivering services to large animals or if the permittee is administering emergency services not during regular office hours. In these cases, phone contact constitutes direct and personal instruction, control or supervision.

C. If an employer, for any reason, terminates the employment of the applicant, the employing veterinarian shall notify the board and the temporary permit described in subsection B of this section is immediately void.

D. An emergency temporary permit that is issued to an individual who is a veterinarian licensed in good standing in another state entitles the individual to provide voluntary veterinary care during a state of emergency or local emergency for the sole purpose of assisting in care related to that emergency. The emergency temporary permit expires ninety days after the date of issuance or at the end of the state of emergency or local emergency, whichever occurs first. An applicant for an emergency temporary permit shall submit a complete application, including information regarding veterinary licensure in any other state and verification that the statutes and rules pertaining to the board have been reviewed. The board shall verify whether the veterinarian is licensed in the state or states indicated and confirm the applicant's good standing. The applicant is not required to pass the state veterinary examination. A veterinarian who is issued an emergency temporary permit under this section shall practice in accordance with all laws and rules related to the practice of veterinary medicine in this state. The board may investigate any alleged violation by a holder of an emergency temporary permit and take disciplinary action as prescribed in this chapter. A veterinarian granted an emergency temporary permit under this section is a licensed, certified or authorized emergency responder pursuant to section 49-133 and an emergency worker as defined in section 26-301.

E. For the purposes of this section, "emergency temporary permit" means a temporary permit that is issued to a veterinarian who is licensed in another state and who enters this state to provide voluntary services during a state of emergency as declared by the governor or a local emergency declared by a county board of supervisors pursuant to section 26-311.

32-2217. Employees of the state or political subdivisions; licensure

The board shall issue a license to any person who is not licensed by examination to practice veterinary medicine in this state and who is employed as a veterinarian by this state or any political subdivision. An applicant for a license under the terms of this section shall apply in writing to the board as required by section 32-2213 and shall meet the qualifications prescribed by section 32-2215 with the exception of section 32-2215, subsection A, paragraph 2. The holder of a license issued under the terms of this section shall engage only in such actions of the practice of veterinary medicine as authorized by the board, and acts of practice may not be performed for any person or firm other than this state or the political subdivision employing the licensee. The licensee is subject to the rules of the board and this chapter relating to unprofessional or dishonorable conduct. A license expires on December 31 of every even-numbered year unless suspended or revoked. A license is renewable for two years on payment of the renewal fee. The fee for issuance of the license shall be $5 in even-numbered years and $10 in odd-numbered years, and the biennial renewal fee shall be $10. The license shall be revoked on termination of employment of the licensee.

32-2218. License renewal and reinstatement

A. Except as provided in subsection D of this section or section 32-4301, a license issued under this chapter remains in effect until December 31 of every even-numbered year unless it is suspended or revoked. Except as provided in section 32-4301, on submittal of an application for renewal and payment of a renewal fee, a license is renewed for two years.

B. Failure to pay the license fee before February 1 following expiration of the license shall be a forfeiture of the license, and the license shall not be restored except upon written application to the board and payment of a penalty fee of fifty dollars in addition to all regular license fees and past due fees owed to the board. A person applying for reinstatement of a license within thirty-six months of expiration shall not be required to submit to an examination because of failure to pay the license fee, but it is unlawful for a person to practice veterinary medicine or any branch of veterinary medicine during the period in which the person's license has been forfeited by reason of nonpayment of the license fee. If an applicant for reinstatement of a license has not completed the continuing education requirements, a license may be reinstated if the continuing education requirements are completed within six months of reinstatement. A person who does not apply for reinstatement within thirty-six months after expiration of the license must meet the requirements set forth in sections 32-2213, 32-2214 and 32-2215.

C. An application for renewal shall include a signed statement that no complaint has been filed and is pending, no investigation is pending and no disciplinary action has been taken or is pending on any veterinary license the veterinarian holds from another state.

D. A veterinary faculty member license issued under this chapter remains in effect until December 31 of every even-numbered year unless it is suspended or revoked or unless the licensee is no longer employed by the veterinary college. If the licensee is no longer employed by the veterinary college, the license expires on the date of the separation of employment.

32-2219. Fees; veterinary licenses; veterinary faculty member licenses

A. Every original application for a veterinary license or a veterinary faculty member license shall be accompanied by an examination fee of not more than four hundred dollars.

B. For every issuance of a veterinary license or a veterinary faculty member license there shall be collected a fee of not more than one hundred dollars in even-numbered years and two hundred dollars in odd-numbered years.

C. For every renewal of a veterinary license or a veterinary faculty member license there shall be collected a fee of not more than four hundred dollars.

D. Every request for a temporary permit shall be accompanied by a fee of seventy-five dollars.

E. For every issuance of a duplicate license, there shall be collected a fee of not more than twenty-five dollars.

F. No fee shall be returned to an applicant.

32-2232. Unprofessional or dishonorable conduct

As used in this chapter, unprofessional or dishonorable conduct includes:

1. The fraudulent use of any certificate or other official form used in practice that would increase the hazard of dissemination of disease, the transportation of diseased animals or the sale of inedible food products of animal origin for human consumption.

2. Inadequate methods in violation of meat inspection procedures prescribed by the federal government and Arizona meat inspection laws or wilful neglect or misrepresentation in the inspection of meat.

3. Misrepresentation of services rendered.

4. Failure to report, or the negligent handling of, the serious epidemic diseases of animals, such as anthrax, rabies, glanders, brucellosis, tuberculosis, foot and mouth disease, hog cholera, and other communicable diseases known to medical science as being a menace to human or animal health.

5. The dispensing or giving to anyone of live culture or attenuated live virus vaccines to be administered by a layman without providing instruction as to their administration and use.

6. Having professional connection with, or lending one's name to, any illegal practitioner of veterinary medicine and the various branches thereof.

7. Chronic inebriety or unlawful use of narcotics, dangerous drugs or controlled substances.

8. Fraud or dishonesty in applying or reporting on any test or vaccination for disease in animals.

9. False, deceptive or misleading advertising, having for its purpose or intent deception or fraud.

10. Conviction of a crime involving moral turpitude, or conviction of a felony.

11. Malpractice, gross incompetence or gross negligence in the practice of veterinary medicine.

12. Violation of the ethics of the profession as defined by rules adopted by the board.

13. Fraud or misrepresentation in procuring a license.

14. Knowingly signing a false affidavit.

15. Distribution of narcotics, dangerous drugs, prescription-only drugs or controlled substances for other than legitimate purposes.

16. Violation of or failure to comply with any state or federal laws or regulations relating to the storing, labeling, prescribing or dispensing of controlled substances or prescription-only drugs as defined in section 32-1901.

17. Offering, delivering, receiving or accepting any rebate, refund, commission, preference, patronage, dividend, discount or other consideration, whether in the form of money or otherwise, as compensation or inducement for referring animals or services to any person.

18. Violating or attempting to violate, directly or indirectly, or assisting or abetting the violation or conspiracy to violate any of the provisions of this chapter, a rule adopted by the board or a written order of the board.

19. Failing to dispense drugs and devices in compliance with article 7 of this chapter.

20. Performing veterinary services without adequate equipment and sanitation considering the type of veterinary services provided.

21. Failure to maintain adequate records of veterinary services provided.

22. Medical incompetence in the practice of veterinary medicine.

23. Cruelty to or neglect of animals. For the purposes of this paragraph, "cruelty to or neglect of animals" means knowingly or negligently torturing, beating or mutilating an animal, killing an animal in an inhumane manner or depriving an animal of necessary food, water or shelter.

24. Representing that the veterinarian is a specialist if the veterinarian lacks the credentials to be a specialist.

25. Performing veterinary services without having a valid veterinarian client patient relationship.

26. Releasing, prescribing or dispensing any prescription drugs in the absence of a valid veterinarian client patient relationship.

32-2233. Revocation or suspension of license or permit; civil penalty; report of perjury

A. The board, by majority consent, may revoke or suspend a permit or license granted to any person under this chapter or may impose a civil penalty of not to exceed one thousand dollars against any veterinarian or the responsible veterinarian, or both, for:

1. Unprofessional or dishonorable conduct.

2. Publicly professing to cure or treat diseases of a highly contagious, infectious and incurable nature.

3. Curing or treating an injury or deformity in such a way as to deceive the public.

4. Testing any animal for any communicable disease and knowingly stating verbally or in writing that the animals are diseased or in a disease-free condition if the statement is contrary to the indication of the test made.

B. The board may sanction any of the following conduct as an administrative violation, rather than unprofessional conduct, and may impose a civil penalty of not more than one thousand dollars for any of the following:

1. Failure to timely renew the veterinary license or the premises license while continuing to practice veterinary medicine or conducting business from that premises.

2. Failure to notify the board in writing within twenty days of any change in residence, practice, ownership, management or responsible veterinarian.

3. Minor records violations that are routine entries into a medical record and that do not affect the diagnosis or care of the animal.

C. The civil penalties collected pursuant to this chapter shall be deposited in the state general fund.

D. The board may report to the proper legal authorities for perjury anyone it suspects of giving deliberate, fraudulent testimony whether the testimony is given personally, telephonically or in writing.

32-2234. Informal and formal hearings; censure or probation; notice; consent agreements; rehearing; judicial review

A. If the board receives information indicating that a veterinarian may have engaged in unprofessional or dishonorable conduct, and if it appears after investigation that the information may be true, the board may issue a notice of formal hearing or the board may request an informal interview with the veterinarian. If the veterinarian refuses the interview, and other evidence indicates suspension or revocation of the veterinarian's license may be in order, or if the veterinarian accepts and the results of the interview indicate suspension or revocation of the veterinarian's license may be in order, the board shall issue a notice of formal hearing and proceed pursuant to title 41, chapter 6, article 10. If the veterinarian refuses the interview, and other evidence relating to the veterinarian's professional competence indicates that disciplinary action should be taken other than suspension or revocation of the veterinarian's license, or if the veterinarian accepts the informal interview and the informal interview and other evidence relating to the veterinarian's professional competence indicate that disciplinary action should be taken other than suspension or revocation of the veterinarian's license, the board may take any or all of the following actions:

1. Issue a decree of censure.

2. Fix a period and terms of probation as are best adapted to protect the public and rehabilitate or educate the veterinarian. The terms of probation may include temporary suspension, for not to exceed thirty days, or restriction of the veterinarian's license to practice. The failure to comply with any term of the probation is cause to consider the entire case plus any other alleged violations of this chapter at a formal hearing pursuant to title 41, chapter 6, article 10.

3. Impose a civil penalty of not to exceed one thousand dollars per violation.

B. Notwithstanding subsection A of this section, the board may require a veterinarian or certified veterinary technician under investigation to be interviewed by the board or its representatives. The board may require a licensee or certificate holder who is under investigation pursuant to subsection A of this section to undergo at the licensee's or certificate holder's expense any combination of medical, physical or mental examinations that the board finds necessary to determine the veterinarian's or the certified veterinary technician's condition.

C. On receipt of an allegation of drug or alcohol abuse, the board or the executive director acting with the approval of both a veterinarian member and a public member of the board may require a licensee or certificate holder who is under investigation pursuant to subsection A of this section to undergo, at the licensee's or certificate holder's expense, testing or examination to detect the presence of alcohol or other drugs.

D. If, as a result of information ascertained during an investigation, informal interview or formal hearing of a veterinarian, the board has concern for the veterinarian's conduct but has not found the veterinarian's conduct in violation of section 32-2232, the board in its discretion may issue a letter of concern to the veterinarian regarding the veterinarian's conduct or issue a nondisciplinary order requiring the licensee to complete a prescribed number of hours of continuing education in an area or areas prescribed by the board to provide the licensee with the necessary understanding of current developments, skills, procedures or treatment.

E. Notwithstanding subsection A of this section, the board may enter into a consent agreement with a veterinarian either before or after conducting an informal interview. Pursuant to a consent agreement, the board may take any of the disciplinary actions listed in subsection A, paragraphs 1, 2 and 3 of this section or may act to otherwise limit or restrict the veterinarian's practice or to rehabilitate the veterinarian.

F. If the board finds, based on information it receives pursuant to this section, that public or animal health, safety or welfare requires emergency action, and incorporates a finding that emergency action is necessary in its order, the board may order summary suspension of a license pending proceedings for revocation or other action. If the board orders a summary suspension, the board shall serve the licensee with a written notice that states the charges and that the licensee is entitled to a formal hearing before the board or an administrative law judge within sixty days pursuant to title 41, chapter 6, article 10.

G. Before a permit or license may be revoked or suspended for any cause provided by section 32-2233, other than by terms of probation, the board must serve notice and conduct a hearing in the manner prescribed by title 41, chapter 6, article 10.

H. After service of notice of the decision of the board suspending or revoking a license, censuring a licensee, placing a licensee on probation or dismissing the complaint, the licensee may apply for a rehearing or review by filing a motion pursuant to title 41, chapter 6, article 10. The filing of a motion for rehearing shall be a condition precedent to the right of appeal provided by this section. The filing of a motion for rehearing shall suspend the operation of the board's action in suspending or revoking a license or censuring or placing a licensee on probation and shall allow the licensee to continue to practice as a veterinarian pending denial or granting of the motion and pending the decision of the board on rehearing if the motion is granted. The board may also grant a rehearing on its own motion, if it finds newly discovered evidence or any other reason justifying a reconsideration of the matter.

I. Except as provided in section 41-1092.08, subsection H, any party aggrieved by a final order or decision of the board may appeal to the superior court pursuant to title 12, chapter 7, article 6.

J. If the state veterinary medical examining board acts to modify any veterinarian's prescription writing privileges, it shall immediately notify the Arizona state board of pharmacy of the modification.

K. All notices that the board is required to provide to any person under this chapter are fully effective by personal service or by mailing a true copy of the notice by certified, return receipt mail addressed to the person's last known address of record in the board's files. Notice by mail is complete at the time of its deposit in the mail. Service on any person represented in a matter by an attorney is complete when the notice is sent to the attorney at the last known address of record in the board's files.

L. The board shall retain all complaint files for at least ten years and shall retain all complaint files in which disciplinary action was taken for at least twenty-five years.

32-2237. Committee to investigate violations; referral to county attorney or attorney general; inspection of records; subpoenas; civil penalty; injunctions; cease and desist orders; confidentiality

A. The board shall appoint one or more investigative committees, each consisting of three licensed veterinarians who are not board members and two members of the general public who are not board members. The board shall appoint and dismiss members of investigative committees. Each member shall serve for a term of two years. A committee member may not serve more than four consecutive terms. A member of the investigative committee must resign when the member files an application to serve on the board. A quorum for an investigative committee shall include at least three members, at least two of whom must be veterinarians.

B. The investigative committee may interview witnesses, gather evidence and otherwise investigate any allegations accusing any person of violating any of the provisions of this chapter. An assistant attorney general shall advise the investigative committee on all questions of law arising out of its investigations. The expenses of the committee shall be paid out of the veterinary medical examining board fund.

C. The investigative committee shall prepare a written report relating to any allegations it investigates. The committee shall present its report to the board in an open meeting. The report shall include:

1. A summary of the investigation.

2. Findings of fact.

3. Either a recommendation to dismiss the allegation made in the complaint or a finding that a violation of this chapter or a rule adopted pursuant to this chapter occurred.

D. If the board rejects any recommendation contained in a report of the investigative committee, it shall document the reasons for its decision in writing.

E. Upon the complaint of any citizen of this state, or upon its own initiative, the board may investigate any alleged violation of this chapter. If after investigation the board has probable cause to believe that an unlicensed person is performing acts that are required to be performed by a person licensed pursuant to this chapter, the board may take one or more of the following enforcement actions:

1. Issue a cease and desist order.

2. Request the county attorney or attorney general to file criminal charges against the person.

3. File an action in the superior court to enjoin the person from engaging in the unlicensed practice of veterinary medicine.

4. After notice and an opportunity for a hearing, impose a civil penalty of not more than one thousand dollars for each violation.

F. The board or its agents or employees may at all reasonable times have access to and the right to copy any documents, reports, records or other physical evidence of any veterinarian, including documents, reports, records or physical evidence maintained by and in the possession of any veterinary medical hospital, clinic, office or other veterinary medical premises being investigated, if such documents, records, reports or other physical evidence relates to a specific investigation or proceeding conducted by the board.

G. The board on its own initiative or upon application of any person involved in an investigation or proceeding conducted by the board may issue subpoenas compelling the attendance and testimony of witnesses or demanding the production for examination or copying of documents, reports, records or any other physical evidence if such evidence relates to the specific investigation or proceeding conducted by the board.

H. Except as provided in this subsection, all materials, documents and evidence associated with a pending or resolved complaint or investigation are confidential and are not public records. The following materials, documents and evidence are not confidential and are public records if they relate to resolved complaints:

1. The complaint.

2. The response and any rebuttal statements submitted by the licensee or certificate holder.

3. Board discussions of complaints that are recorded pursuant to section 32-2204, subsection C.

4. Written reports of an investigative committee that are prepared pursuant to subsection C of this section.

5. Written statements of the board that are prepared pursuant to subsection D of this section.

32-2241. Certified veterinary technician; services performed

A certified veterinary technician may perform those services authorized by the board pursuant to section 32-2245 in the employ of and under the direction, supervision and control of a licensed veterinarian who shall be responsible for the performance of the certified veterinary technician. Compensation for such authorized services shall be derived solely from the employing veterinarian.

32-2242. Application for certification as veterinary technician; qualifications

A. A person desiring to be certified as a veterinary technician shall apply in writing to the board on a form furnished by the board.

B. The applicant shall be at least eighteen years of age and shall furnish satisfactory evidence of graduation from a two-year curriculum in veterinary technology, or the equivalent of such graduation as determined by the board, in a college or other institution approved by the board.

C. The application shall be accompanied by the application and examination fee established by the board.

D. An applicant from another state is not required to retake the veterinary technician national examination if the applicant can provide all of the following:

1. Proof that the applicant's original score meets the minimum score required by the board.

2. Proof that the applicant holds an active license in good standing in another state or in Canada.

3. Proof of employment as a veterinary technician in two of the preceding four years or four of the preceding seven years.

32-2243. Examination

The board shall adopt rules and regulations governing the written examinations and practical demonstrations by which all applicants shall be tested and shall provide for giving reasonable notice of the time and place for examinations.

32-2245. Certified veterinary technician; services; rules and regulations

A. The board shall adopt rules and regulations pertaining to and limiting the services performed by a certified veterinary technician.

B. Services performed by a certified veterinary technician shall not include surgery, diagnosis or prognosis of animal diseases or prescribing of drugs and medicine.

32-2246. Duration of certificate

A certificate issued pursuant to this article shall expire on December 31 of every even-numbered year unless suspended or revoked. On payment of the renewal fee, a certificate is renewed for a period of two years.

32-2247. Renewal of expired certificates

Except as otherwise provided in this article, an expired certificate may be renewed at any time within three years after its expiration on filing of application for renewal on a form prescribed by the board and payment of the renewal fee in effect on the last preceding regular renewal date. Except as provided in section 32-4301, if the certificate is renewed more than thirty days after its expiration, the applicant as a condition precedent to renewal shall also pay the delinquency fee established by the board. Renewal under this section shall be effective on the date on which the application is filed, on the date the renewal fee is paid or on the date on which the delinquency fee, if any, is paid, whichever occurs last.

32-2248. Renewal of certification; certificates expired three years or more

Except as provided in section 32-4301, a person who fails to renew a certificate within three years after its expiration may not renew it, and it shall not be restored, reissued or reinstated thereafter, but the person may apply for and obtain a new certificate if:

1. No fact, circumstance or condition exists that, if the certificate were issued, would justify its revocation or suspension.

2. The applicant takes and passes the examination, if any, which would be required on application for certification for the first time.

3. All fees are paid that would be required on application for certification for the first time.

32-2250. Veterinary technician certificate fees

The board shall establish the fees provided for in this article in amounts not to exceed the following:

1. Application and examination fee, one hundred fifty dollars.

2. Issuance of a certificate fee, twenty-five dollars in even-numbered years and fifty dollars in odd-numbered years.

3. Renewal fee, one hundred dollars.

4. Delinquency fee, twenty-five dollars.

5. Duplicate certificate fee, twenty dollars.

32-2271. License required; premises; inspections; exemption

A. A person shall not provide veterinary services, including diagnosis, treatment, dentistry, surgery or dispensing prescription-only veterinary drugs, to the public without a license issued by the board.

B. A premises license shall be for a fixed location where a veterinarian retains the records of a veterinary practice, stores veterinary equipment or offers veterinary services to the public. A responsible veterinarian who holds a premises license may provide veterinary services to the public at the licensed fixed location and any temporary site in this state at which adequate equipment and sanitation are available considering the type of veterinary medical services provided. A veterinarian shall obtain a separate premises license for each fixed location at which veterinary services are regularly offered to the public. The responsible veterinarian may authorize other licensed veterinarians to provide services to the public pursuant to the responsible veterinarian's veterinary premises license. Both the responsible veterinarian and the veterinarian who provides the veterinary services shall maintain records of the veterinary services provided and ensure that adequate equipment and sanitation are available.

C. The board shall inspect all fixed locations before issuing a premises license. Adequate equipment and sanitation shall be available for use at any location which is necessary to provide the range of veterinary services which the veterinarian proposes to offer.

D. The board may inspect any site at which a veterinarian offers veterinary services to the public.

E. This section does not apply to county-sponsored rabies vaccination clinics, persons who are exempt under section 32-2211 and veterinarians licensed under section 32-2217.

32-2272. Veterinary premises license; application; nontransferability; expiration; renewal; civil penalty

A. Any person who desires to establish premises at or from which veterinary services are offered to the public shall file with the board an application for a veterinary premises license accompanied by the license fee.

B. The application shall be on a form prescribed and furnished by the board and shall contain:

1. The name and location of the premises.

2. The name of the person owning the premises and the name and signature of the veterinarian responsible to the board for the operation of the premises. The responsible veterinarian shall be a veterinarian who is licensed in this state and who resides in this state or who holds a special permit under section 32-2217.01, except that a veterinarian who only provides services at a temporary site in the state does not have to reside in this state.

3. A description of the services provided at or from the premises.

C. A license is valid only for the responsible veterinarian to whom it is issued. A license is not subject to sale, assignment or transfer, voluntary or involuntary. A license is not valid for any premises other than those for which issued. If there have been major changes in the scope of veterinary services offered, the premises are subject to reinspection.

D. A change of responsible veterinarian or owner shall cancel a premises license. The responsible veterinarian or owner shall surrender the premises license to the board within twenty days of the change in responsible veterinarian or owner. The failure of the responsible veterinarian or owner to notify the board in writing within twenty days of a change in responsible veterinarian or owner is grounds for disciplinary action.

E. Except as provided in section 32-4301, a license expires on December 31 of every even-numbered year unless suspended or revoked. A license is renewable for two years upon payment of the renewal fee. If the renewal fee is not paid before February 1 following the expiration of the license, a penalty fee of one hundred dollars shall be paid in addition to the renewal fee before the premises may be relicensed.

F. Within ninety days of receipt of an initial application and fee, the board shall issue a license if the application demonstrates compliance with this article or shall notify the applicant at his last address of record if the application is not in conformance with this article. Veterinary medical services may be performed at any premises for which an application fee is submitted pending issuance of the license or notification of a deficiency in the application.

G. If a veterinary premises ceases to operate and the premises owner is subject to this chapter, the premises owner must continue to comply with the requirements of this chapter and rules adopted by the board. The premises owner is subject to a civil penalty of not more than one thousand dollars for each violation of the requirements of this chapter or rules adopted by the board. The total penalty shall not exceed five thousand dollars.

H. If the responsible veterinarian is only an employee, the premises owner is subject to a civil penalty of not more than one thousand dollars for each violation of this article. The total penalty shall not exceed five thousand dollars.

32-2273. Premises license fees

The board may establish and collect in advance fees, not to exceed the following:

1. For issuance of a license:

(a) In an odd-numbered year, one hundred dollars.

(b) In an even-numbered year, fifty dollars.

2. For renewal of a license, two hundred dollars.

3. For a duplicate license, twenty dollars.

32-2275. Rules; adoption; considerations

The board may adopt rules setting forth minimum standards for veterinary medical premises and for the practice of veterinary medicine. The board shall, in the development of these rules, take into consideration the needs, problems and practices relating to the differences encountered by large animal veterinarians and other veterinarians and shall also consider the different needs, problems and practices encountered in the provision of veterinary services in rural or remote locations in comparison with the provision of veterinary services at the veterinarian's principal place of business.

32-2281. Dispensing of drugs and devices; conditions; definition

A. A veterinarian may dispense drugs and devices kept by the veterinarian if:

1. All prescription-only drugs are dispensed in packages labeled with the following information:

(a) The dispensing veterinarian's name, address and telephone number.

(b) The date the drug is dispensed.

(c) The animal owner's name and the animal's or herd's identification.

(d) The name, strength and quantity of the drug, directions for its use and any cautionary statements.

2. The dispensing veterinarian enters into the medical record the name, strength and quantity of the drug dispensed, the date the drug is dispensed and the therapeutic reason.

B. A veterinarian dispensing a schedule II controlled substance or a benzodiazepine shall comply with the following:

1. Limit the initial amount of a schedule II controlled substance dispensed by the veterinarian to a five-day supply at a dosage clinically appropriate for the animal being treated. A prescription that is filled at a pharmacy is not subject to this limit.

2. Limit the initial amount of a benzodiazepine dispensed by the veterinarian to a fourteen-day supply at a dosage clinically appropriate for the animal being treated. A prescription that is filled at a pharmacy is not subject to this limit.

3. For treatment of an animal with a chronic condition that requires long-term use of a schedule II controlled substance or benzodiazepine, after the initial five-day or fourteen-day period pursuant to paragraph 1 or 2 of this subsection, dispense not more than a thirty-day supply at one time at a dosage clinically appropriate for the animal being treated. A prescription for a chronic condition that is filled at a pharmacy is not subject to this limit. For the purposes of this paragraph, "chronic condition" means a condition that requires ongoing treatment beyond the five-day or fourteen-day period prescribed in paragraph 1 or 2 of this subsection, including cancer, postsurgical treatment, posttraumatic injury, neuropathic pain, chronic severe cough, collapsing trachea and congestive heart failure.

C. The board shall adopt rules providing that the animal's owner or the person responsible for the animal shall be notified that some prescription-only drugs may be available at a pharmacy and a written prescription may be provided to the animal's owner or the person responsible for the animal if requested.

D. A veterinarian shall dispense only to the animal's owner or person responsible for the animal the veterinarian is treating and only for conditions being treated by that veterinarian. The veterinarian shall supervise the dispensing process. For the purposes of this subsection, "supervision" means that a veterinarian makes the determination as to the legitimacy or the advisability of the drugs or devices to be dispensed.

E. This section shall be enforced by the board, which shall establish rules regarding access to and labeling, recordkeeping, storage and packaging of drugs that are consistent with the requirements of chapter 18 of this title. The board may conduct periodic inspections of dispensing practices to ensure compliance with this section and applicable rules.

F. For the purposes of this section, "dispense" means the delivery by a veterinarian of a prescription-only drug or device to an animal, an animal's owner or the person responsible for an animal and includes the prescribing, administering, packaging, labeling, compounding and security necessary to prepare and safeguard the drug or device for delivery.

32-2291. License requirements; inspections

A. An animal crematory license shall be for a fixed location where animal cremation occurs. A person who holds an animal crematory license may provide animal cremation services to the public at the licensed fixed location. There shall be a separate animal crematory license for each fixed location at which animal cremation services are regularly offered to the public.

B. The board shall inspect all fixed locations before issuing an animal crematory license. Adequate equipment and sanitation shall be available for use at any location that is necessary to provide the animal cremation services offered.

C. The board may inspect any animal crematory licensed pursuant to this article.

32-2292. Animal crematory license; application; nontransferability; expiration; renewal

A. Any person who desires to establish premises at or from which animal cremation services are offered to the public shall file with the board an application for an animal crematory license accompanied by the license fee.

B. The application shall be on a form prescribed and furnished by the board and shall contain:

1. The name and location of the animal crematory.

2. The name of the person owning the animal crematory and the name and signature of the person responsible to the board for the operation of the animal crematory.

3. A description of the services provided at or from the animal crematory.

C. A license is not subject to sale, assignment or transfer, voluntary or involuntary. A license is not valid for any animal crematory other than that for which it is issued. If there are major changes in the scope of animal crematory services offered, the animal crematory is subject to reinspection.

D. A change of responsible owner cancels an animal crematory license. The responsible owner shall surrender the animal crematory license to the board within twenty days after the change in responsible owner. The failure of the responsible owner to notify the board in writing within twenty days after a change in responsible owner is grounds for disciplinary action.

E. Except as provided in section 32-4301, a license expires on December 31 of every even numbered year unless suspended or revoked. A license is renewable for two years on payment of the renewal fee. If the renewal fee is not paid before February 1 following the expiration of the license, a penalty fee of one hundred dollars shall be paid in addition to the renewal fee before the animal crematory may be relicensed.

F. Within ninety days after receipt of an initial application and fee, the board shall issue a license if the application demonstrates compliance with this article or shall notify the applicant at the last address of record if the application is not in conformance with this article. Animal cremation services may be performed at any animal crematory for which an application fee is submitted pending issuance of the license or notification of a deficiency in the application.

32-2293. Animal crematory license fees

The board may establish and collect in advance fees for issuance of a license, renewal of a license and a duplicate license. The fees shall be determined by the board and accounted for in accordance with the provisions of section 32-2205.

32-2294. Grounds for refusal to issue or renew license or for disciplinary action; procedure; civil penalty

A. The board may take disciplinary action against the animal crematory, including revoking, suspending, refusing to issue or refusing to renew an animal crematory license for any of the following grounds:

1. Failure to notify the board in writing within twenty days after a change of the person who owns the animal crematory or the person responsible for the operation of the animal crematory.

2. Failure to maintain clean and sanitary facilities for the performance of services in accordance with the rules adopted by the board.

3. Failure to keep written records of all animals receiving crematory services, failure to provide a summary of the records on request to the client or failure to produce the records at the request of the board.

4. Failure to maintain a current animal crematory license to provide crematory services to the public at a fixed location.

B. If the board receives information indicating that disciplinary action should be taken against an animal crematory license and if it appears after investigation that the information may be true, the board may issue a notice of formal hearing or the board may hold an informal interview. If the results of the informal interview indicate suspension or revocation of the animal crematory license or other action may be in order, the board shall issue a notice of formal hearing and proceed pursuant to title 41, chapter 6, article 10. If the informal interview and other evidence indicate that disciplinary action should be taken other than suspension or revocation, the board may take any one or a combination of the following actions:

1. Issue a decree of censure.

2. Fix such period and terms of probation as are best adapted to protect the public and rehabilitate or educate the animal crematory licensee. The terms of probation may include temporary suspension not to exceed thirty days. The failure to comply with any term of the probation is cause to consider the entire case and any other alleged violations of this chapter at a formal hearing pursuant to title 41, chapter 6, article 10.

3. Impose a civil penalty of not more than one thousand dollars for each violation. The total penalty shall not exceed five thousand dollars.

C. Before a license may be revoked or suspended for any cause provided by subsection A, the board shall serve notice and conduct a hearing in the manner prescribed by title 41, chapter 6, article 10.

32-2295. Rules

The board may adopt rules setting forth minimum standards for animal crematories.

41-1072. Definitions

In this article, unless the context otherwise requires:

1. "Administrative completeness review time frame" means the number of days from agency receipt of an application for a license until an agency determines that the application contains all components required by statute or rule, including all information required to be submitted by other government agencies. The administrative completeness review time frame does not include the period of time during which an agency provides public notice of the license application or performs a substantive review of the application.

2. "Overall time frame" means the number of days after receipt of an application for a license during which an agency determines whether to grant or deny a license. The overall time frame consists of both the administrative completeness review time frame and the substantive review time frame.

3. "Substantive review time frame" means the number of days after the completion of the administrative completeness review time frame during which an agency determines whether an application or applicant for a license meets all substantive criteria required by statute or rule. Any public notice and hearings required by law shall fall within the substantive review time frame.

41-1092.09. Rehearing or review

A. Except as provided in subsection B of this section:

1. A party may file a motion for rehearing or review within thirty days after service of the final administrative decision.

2. The opposing party may file a response to the motion for rehearing within fifteen days after the date the motion for rehearing is filed.

3. After a hearing has been held and a final administrative decision has been entered pursuant to section 41-1092.08, a party is not required to file a motion for rehearing or review of the decision in order to exhaust the party's administrative remedies.

B. A party to an appealable agency action of or contested case with a self-supporting regulatory board shall exhaust the party's administrative remedies by filing a motion for rehearing or review within thirty days after the service of the administrative decision that is subject to rehearing or review in order to be eligible for judicial review pursuant to title 12, chapter 7, article 6. The board shall notify the parties in the administrative decision that is subject to rehearing or review that a failure to file a motion for rehearing or review within thirty days after service of the decision has the effect of prohibiting the parties from seeking judicial review of the board's decision.

C. Service is complete on personal service or five days after the date that the final administrative decision is mailed to the party's last known address.

D. Except as provided in this subsection, the agency head, executive director, board or commission shall rule on the motion within fifteen days after the response to the motion is filed or, if a response is not filed, within five days of the expiration of the response period. A self-supporting regulatory board shall rule on the motion within fifteen days after the response to the motion is filed or at the board's next meeting after the motion is received, whichever is later.

APPLICABLE LAW/RULE RELATED TO NOTIFICATION TO PET OWNERS RE: FILLING PRESCRIPTIONS

Within the Arizona Veterinary Medical Practice Act:

A.R.S. 32-2281(C): "The Board shall adopt rules providing that the animal's owner or the person responsible for the animal shall be notified that some prescription-only drugs may be available at a pharmacy and a written prescription may be provided to the animal's owner or the person responsible for the animal if requested."

A.A.C. R3-11-801(A): "A dispensing veterinarian shall notify an animal owner that some prescription-only drugs and controlled substances may be available at a pharmacy by:

A.

1. Stating the availability at or before the time of dispensing;
2. Posting a written statement that is visible to the animal owner; or
3. Providing the animal owner with written notification.

B. A dispensing veterinarian may provide a written, electronic, or telephonic prescription if requested by an animal owner and the dispensing veterinarian:

1. Has a valid doctor-patient relationship with the animal, and
2. Determines that providing the prescription is in the best interest of the animal.

Federal Information:

Since 2011, a Fairness to Pet Owners Act has been introduced in Congress several times, but has not passed. It appears that bills were reintroduced in 2015, 2017-2018 and 2019. The most recent bill required veterinarians to provide pet owners with a copy of animal drug prescriptions prior to filling or dispensing such prescription. Further, veterinarians prescribing animal drugs may not require a pet owner to (1) purchase the prescription as a condition of providing such a copy, (2) pay an additional fee to receive such a copy, or (3) waive the veterinarian's liability as a condition of providing such a copy. Veterinarians would not be required to provide a copy of prescriptions administered in the context of acute care. A veterinarian also may require payment of examination fees prior to prescribing an animal drug if such fees are required regardless of whether the diagnosis reveals an animal drug prescription is necessary.

Other:

The American Veterinary Medical Association's *Principles of Veterinary Medical Ethics* require that veterinarians provide prescriptions to clients upon request in lieu of dispensing a drug when a veterinary-client-patient-relationship exists and the veterinarian has determined that the drug is medically necessary.

ARIZONA STATE PARKS BOARD
Title 12, Chapter 8

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **STATE PARKS BOARD**
Title 12, Chapter 8, Articles 1-3

Summary

This Five-Year Review Report (5YRR) from the Arizona State Parks Board (Board) relates to the thirty-three (33) rules in Title 12, Chapter 8, Articles 1-3, related to general provisions, board operations, and State Historic Preservation Office (SHPO) programs.

In the Board's previous 5 YRR, the Board indicated that they would amend the rules to improve clearness, conciseness, and understandability. The Board indicated that one rule would be amended to remove an out of date statutory reference. The Board indicated that they intend to submit a NFRM to the Council by July 2020. The Board did not complete their previous course of action as a result of changes to leadership and staff, along with changes to agency processes.

Proposed Action

The Board has indicated that they intend on reviewing the rules during a Board meeting. The Board has also indicated that program staff has been in communication with the Governor's Office about amending the rules along with updating fees. The Board indicated to Council staff that they still intend on completing the previous course of action identified in their last report. The Board indicates that they expect to have a NFR before the Council by 2027.

1. Has the agency analyzed whether the rules are authorized by statute?

The Board cites both general and specific statutory authority for these rules

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Board states that there are no economic, small business, or consumer impacts to the rules as written. The last economic impact comparison from 2019 indicated there were no significant impacts. The Board indicates that there have been no changes to the rules and there are no changes that would have an economic impact on the rulemaking.

The Board reported in the previous report that the voluntary program for historic property designation and certification places no economic impact on the property owners, public or small business, and that is the same currently. The State Historic Preservation Office Programs (SHPO) rules outline the administrative processes for federal and state law related to historic property designation and certification of properties for historic tax purposes.

Stakeholders include the Board, owners of certified historic properties, and visitors of Arizona state parks.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Board states that these rules do not have an economic impact, and staff have worked to ensure they are meeting statutory directives. The Board believes these rules benefit the public by ensuring the safety and protection of resources and providing recreational, educational and cultural areas for the enjoyment and education of Arizona residents. The Board states that if the rules were not in place, there is an increased risk of costly occurrences that would impact the future enjoyment of the visitors and the pocketbooks of all Arizonans.

4. Has the agency received any written criticisms of the rules over the last five years?

The board indicates it received no written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Board indicates the rules are clear, concise, and understandable. However the Board also indicates that they intend to update terminology and definitions so the rules can be more clear and more concise. The Board has communicated with Council staff that these amendments will be to fix what was identified in the Board's previous report. The rules that need to be improved from the prior report are the following:

- **R12-8-101 (Definitions):** Since the last update of this rule, the Board has developed cabins and does not call sites cabana in operations. The Board proposes to (1) eliminate "Cabana Site" as antiquated terminology, and camping unit definition can encompass a camping unit with a shelter and electricity available; and (2) modify definition of "camping unit" from "a defined space within an area designed for overnight use in a state park" to "a defined space or structure within an area designed for overnight use in a state park" to clearly encompass the cabins.
- **Exhibit A: Fee Schedule:** The Board indicates the fee schedule may need to be made more accessible for the public. The Board indicates the current schedule does not define the basis for the tiers of cabins and campsites, and does not clearly provide the public guidance regarding the costs that may be assessed for overnight and oversized parking. The Board indicates staff will continue to review the organization and display of the fee schedule to ensure if any changes are necessary within the formal rules to update the guest or potential guests of expectations.
- **R12-8-301 (Definitions); R12-8-302 (Criteria for Evaluation); R12-8-303 (Processes of Registration:** The Board indicates these rules do not clearly delineate the National Register evaluation process. The Board is reviewing to see if clarifying the definitions will improve an applicant to the federal register's understanding of the process.
- **R12-8-304 (Factors for Determining Register Eligibility):** In addition to discussing eligibility, this rule addresses decertification of historic properties. The Board indicates it is evaluating if factors for "Determining Certification Eligibility" should be changed to "Certification of Historic Property Tax Classification" to address the breadth of activities. Since tax verification is by individual property, the Board is examining if (A)(1) should be deleted for clarity.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Board indicates the rules are consistent with other rules and statutes. However, in the 2019 report the Board mentioned that there was an out of date statutory reference in R12-8-119. After communication with Council staff, the Board stated that this reference is still out of date and the Board intends on removing this reference. This statutory reference is to A.R.S. § 13-3102(F) and is out of date because of amendments to the statute.

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

The Board indicates the rules are effective in achieving their objectives.

8. Has the agency analyzed the current enforcement status of the rules?

The Board indicates the rules are enforced as written

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Board indicates that the rules are not more stringent than corresponding federal law. Council staff has reviewed the corresponding federal law in previous reports and agrees that the rules are not more stringent than corresponding federal laws.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Not Applicable.

11. Conclusion

This Five-Year Review Report (5YRR) from the Arizona State Parks Board (Board) relates to the thirty-three (33) rules in Title 12, Chapter 8, Articles 1-3, related to general provisions, board operations, and State Historic Preservation Office (SHPO) programs. The Board was unable to complete their prior proposed course of action because of changes to leadership and staff as a result of changes in agency processes. The Board did communicate to Council staff that they still intend on completing these revisions and have not identified any other needs for amendments outside of those identified in the 2019 report. The Board has stated they intend on having a NFR before the Council by 2027.

Council staff recommends that the Council clarify with the Board the timeframe proposed.

RE: Arizona State Parks Board, Title 12, Chapter 8, Articles 1-3, Five Year Review Report

Dear Chairwoman Klein,

Please find enclosed the Five-Year Review Report of the Arizona State Parks Board for Title 12, Chapter 8, Articles 1-3, which is due on Monday, October 28, 2024.

The Arizona State Parks Board hereby certifies compliance with A.R.S. 41-1091.

For questions about this report, please contact our Chief Legislative Liaison, Brittany Hudson at bhudson@azstateparks.gov or 602-448-3187.

Respectfully,

Bob Broscheid
Executive Director
Arizona State Parks and Trails

Arizona State Parks Board (ASPB)

5 YEAR REVIEW REPORT

Title 12, Chapter 8

October 28, 2024

1. Authorization of the rule by existing statutes:

General Statutory Authority: A.R.S. § 41-511

Specific Statutory Authority:: A.R.S. § 41-511.02-
A.R.S. § 41-51105

2. The objective of each rule:

Article 1	**General Provisions**
R12-8-101	**Definitions.** Defines terms and phrases used throughout 12 A.A.C. 8.
R12-8-102	**Permission to Enter or Remain in a State Park.** Establishes entry and use of a state park and provides authority for removing and delaying the return of a person in violation of park rules.
R12-8-103	**Vandalism.** Describes that a person shall not vandalize any state park property.
R12-8-104	**Hours of Use; Closure.** Sets the hours of use for various areas in the parks and gives the Director the authority to modify hours.

R12-8-106	**Limited Services on Christmas.** Describes Christmas hours at the state parks.

R12-8-107	**Litter & Waste.** Sets the standards for the disposal of trash, garbage, human or animal waste within a state park.
R12-8-108	**Payment of Fees:** Sets the rules for the collection of fees and charges for the state park system.
R12-8-109	**Fees & Permits.** Sets the fee structure for the use of agency resources and facilities.
R12-8-110	**Fee Waivers.** Allows the Director to waive state park fees.
R12-8-111	**Camping**. Sets the requirements for camping at a state park.
R12-8-112	**Campfires.** Sets the requirements for lighting a campfire in a state park.
R12-8-113	**Vehicles, Speed Limits, and Parking.** Sets the requirements for operating a motor vehicle within a state park.
R12-8-114	**Watercraft, Launching, and Mooring.** Sets the requirements for operating a watercraft at a state park.
R12-8-115	**Pets.** Sets the standards for pets coming into a state park by a patron.
R12-8-116	**Glass Containers.** Prohibits glass or ceramic containers in areas of a state park where they are restricted.
R12-8-119	**Weapons.** Establishes the standards for carrying, transporting, and storage of weapons in a state park.
R12-8-120	**Fireworks & Explosives.** Prohibits the use of fireworks and explosives only if a special permit is authorized by the Director.
R12-8-122	**Commercial Use of a State Park.** Establishes limits surrounding commercial activities within a state park.
R12-8-124	**Disorderly Conduct.** Establishes standards for disorderly conduct within a state park.

R12-8-125	**Special Use Permits.** Sets the requirements for authorizing special use permits within a state park.

R12-8-126	**Violation; Classification.** States that an individual who violates rules commits a misdemeanor.
Exhibit A	**Fees.** Sets the fee ranges for the state park system.

Article 2	**Board Operations**
R12-8- 201	**Meetings.** Sets the requirements for State Park Board meetings.
R12-8- 202	**Organization of the Board.** Sets requirements for the selection of officers for the State Parks Board.
R12-8- 203	**Committees.** Establishes special committees within the State Parks Board.
R12-8- 204	**Procedures at Meetings.** Establishes voting procedures for the State Park Board meetings.

Article 3	**State Historic Preservation Office Programs (SHPO)**
R12-8-301	**Definitions.** Defines terms used in the SHPO.
R12-8-302	**Criteria for Evaluation**. Establishes criteria for evaluating a project as a listed property on the Arizona Register of Historic Places.
R12-8-303	**Process of Registration.** Establishes the processes by which a property is registered as a Historic Property on the Arizona and/or National Register.
R12-8-304	**Factors for Determining Certification Eligibility.** Establishes the factors for determining eligibility for the National Register of Historic Places and certification of historic properties for tax purposes.
R12-8-305	**Verification of Eligibility for Property Tax Reclassification.** Establishes the process for reclassifying properties as Commercial or Non-Commercial Historic Properties.

R12-8-306	**Minimum Maintenance Restoration/Standards.** Establishes standards for properties to maintain eligibility as mandated in statute.

R12-8-307	**Documentation Requirements, Reports, and Inspection.** Establishes the process for an owner of a certified Historic Property to inform SHPO of the requested year's activities.

3. Are the rules effective in achieving their objectives?

Yes, the rules are effective in achieving their objectives.

4. Are the rules consistent with other rules and statutes?

Yes, the rules are consistent with other rules and statutes.

5. Are the rules enforced as written?

Yes, the rules are enforced as written.

6. **Are the rules clear, concise, and understandable?**

Yes, the rules are clear, concise, and understandable.

7. **Has the agency received written criticisms of the rules within the last five years? Yes _ No x**

There have been no written criticisms of the rules within the last five years.

8. **Economic, small business, and consumer impact comparison:**

There are no economic, small business, or consumer impacts to the rules as written. The last economic impact comparison from 2019 indicated there were no significant impacts. There have been no changes to the rules and there are no changes that would have an economic impact on our rulemaking.

The State Parks Board reported in the previous report that the voluntary program for historic property designation and certification places no economic impact on the property owners, public or small business and that is the same currently. SHPO rules outline the administrative processes for federal and state law related to historic property designation and certification of properties for historic tax purposes. These rules do not have an economic impact, and staff has worked to ensure that they are meeting statutory directives.

9. **Has the agency received any business competitiveness analyses of the rules?**

No, ASPB has not received any business competitive analysis of the rules.

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

ASPB proposed to review the rules with the Board to see if any rules needed to be amended on the previous report, however, since the previous report was submitted, ASPB has had a significant change in leadership and staff and an overhaul in agency processes. The agency has not updated rules, but is currently in discussions with the Governor's office to consider adjusting park fees and a possible cleanup of the rule package. The State Historic Preservation Office (SHPO) has also started discussing a clean-up of their rule package as well.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

Article 1 General Provisions	These rules benefit the public by ensuring the safety and protection of the resources and providing recreational, educational, and cultural areas for the enjoyment and education of Arizona residents. If the rules were not in place, there is an increased risk of costly occurrences that would impact the future enjoyment of the visitors and the pocketbooks of all Arizonans.
Article 2 Board Operations	The Agency concurs with previous submissions that the cost of the appointed Board is minimal. This cost is outweighed by the benefits of a public body appointed by the Governor to evaluate public input and provide guidance on agency decisions as to the best means of fulfilling the Agency's mission.
Article 3 SHPO Programs	This article benefits the public by providing a transparent process for administrative processes required of the SHPO by state and federal law for the Arizona Register of Historic Places, the National Register of Historic Places, and the State Historic Property Tax Program. These programs make a contribution to the benefits of historic rehabilitation.

12. Are the rules more stringent than corresponding federal laws?

No, the rules are not more stringent than corresponding federal laws.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The agency does not have rules adopted after July 29, 2010 subject to A.R.S. § 41-1037.

14. Proposed course of action

The authorization for rulemaking rests with the Arizona State Parks Board and there is a process for the Legislature to approve, disapprove, or modify the rules. ASPB staff is in the process of consulting with the Governor's office on possible fee updates and rule changes. Relating to the SHPO Programs rules, SHPO is identifying terminology that needs to be cleaned up and also cleaning up various terms in 12-8-301, 12-8-302, 12-8-303, and 12-8-304 that may improve clarity for potential state or federal historic register applicants. A rule package can be sent to the Board by 2027 considering Parks Board meetings, Parks Board approvals, and the rulemaking process.

CHAPTER 8. ARIZONA STATE PARKS BOARD

The table of contents on the first page contains quick links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

Sections, Parts, Exhibits, Tables or Appendices codified in this supplement. The list provided contains quick links to the updated rules.

The reference to the A.A.R. issue and page number for the exempt rulemaking notice codified in Supp. 18-1, Exhibit A, Regular Fee Schedule corrected in Supp. 21-2.

Questions about these rules? Contact:

Name: Timothy Franquist
Address: 23751 N. 23rd Ave., #190
Phoenix, AZ 85085
Telephone: (602) 542-2251
Fax: (602) 542-4180
E-mail: tfranquist@azstateparks.gov
Website: www.AZStateParks.com

The release of this Chapter in Supp. 21-2 replaces Supp. 20-3, 1-13 pages

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. "'Rule' means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency."

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The "R" stands for "rule" with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.
First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31
For example, the first supplement for the first quarter of 2019 is cited as Supp. 19-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document's content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature's website, www.azleg.gov. An agency's authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State's website, under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency's exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor's notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, managing rules editor, assisted with the editing of this chapter.

TITLE 12. NATURAL RESOURCES

CHAPTER 8. ARIZONA STATE PARKS BOARD

Authority: A.R.S. § 41-511 et seq.

Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (Supp. 01-4).

Editor's Note: Sections in this Chapter were adopted and amended under an exemption from the provisions of the Arizona Administrative Procedure Act, pursuant to A.R.S. § 41-1005(A)(21). Exemption from this Act means that this Section was not reviewed or approved by the Governor's Regulatory Review Council; notice of this rule was not submitted to the Office of the Secretary of State for publication in the Arizona Administrative Register; and no public comment period or public hearings were required to be held on this rule. Because this Chapter contains rules which were adopted under a rulemaking exemption, the Chapter is printed on blue paper.

ARTICLE 1. GENERAL PROVISIONS

ARTICLE 2. OPERATION OF THE BOARD

ARTICLE 3. STATE HISTORIC PRESERVATION OFFICE PROGRAMS

CHAPTER 8. ARIZONA STATE PARKS BOARD

ARTICLE 1. GENERAL PROVISIONS

R12-8-101. Definitions

In this Chapter:

"Board" means the Arizona State Parks Board.

"Cabana site" means a camping unit with a shelter and electricity available.

"Camp or camping" means overnight use of a camping unit.

"Camping unit" means a defined space within an area designated for overnight use in a state park.

"Commercial activity" means soliciting funds, offering to sell a good or service, advertising, receiving money or another thing of value in exchange for a good, service, or activity, or conducting a business or a portion of a business, whether for profit or on behalf of a non-profit entity, on property managed by the Board. Commercial activity does not include distributing written material that describes how to make a donation at a location that is not on property managed by the Board.

"Concession" means a contract issued by the Board for the use of land managed by the Board to provide goods, services, or facilities to the public.

"Day-use area" means a space within a state park that is closed to camping but open to the public during established hours.

"Director" means the Executive Director of the Board or a representative of the Executive Director.

"Disorderly conduct" has the same meaning as prescribed in A.R.S. § 13-2904.

"Fee area" means a space in a state park for which a fee is charged to use, occupy, or enter.

"Hook-up site" means a camping unit with a connection for water, sewer, or electricity.

"Interpretive program" means a scheduled program conducted by an employee or volunteer of the Board at a state park, to inform, educate, or interpret resources for the public.

"Park Officer" means an employee of the Board who is appointed under A.R.S. § 41-511.09 as a park ranger law enforcement officer with the authority and power of a peace officer.

"Park Ranger" means an employee of the Board responsible for protecting and preserving the property at a state park and providing information services to park visitors.

"Person" means an individual, corporation, firm, partnership, club, or association.

"Service animal" has the same meaning as prescribed in A.R.S. § 11-1024.

"Special use" means the following categories of use of property managed by the Board:

Private special event: A non-public use that requires exclusion of the general public;

Public special event: A commercial activity that is not conducted under a concession or commercial rental or retail permit;

Festival special event: An exhibition, performance, or competition, whether for profit or non-profit, that is open to the public and for which a special entrance fee is charged; and

Commercial photography use: Taking photographs for any medium or making a motion picture or video.

"State-park annual pass" means a document authorizing the holder to enter, remain in, and use state parks multiple times during one year, subject to some restrictions.

"State Park System" or "state park" means the lands, waters, monuments, historical sites, state recreation areas, and any other areas managed by the Board.

"Wildlife" has the same meaning as prescribed in A.R.S. § 17-101.

Historical Note

Former Rule 1; Former Section R12-8-01 repealed, new Section R12-8-01 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-02 renumbered and amended as Section R12-8-101 effective November 1, 1981 (Supp. 81-5). Amended effective March 7, 1991 (Supp. 91-1). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-102. Permission to Enter or Remain in a State Park

A. A person who enters, remains in, or uses a state park shall comply with state law, including this Chapter.

B. A person who violates state law, including this Chapter, while in a state park shall leave the state park upon order of a Park Ranger or Park Officer.

C. A person who leaves a state park under subsection (B) shall not reenter the state park for at least 72 hours.

Historical Note

Former Rule 2; Former Section R12-8-02 repealed, new Section R12-8-02 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-01 renumbered and amended as Section R12-8-102 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-103. Vandalism

Within a state park, a person shall not deface, injure, destroy, remove, or use, without authority, any:

1. Public facility or property;
2. Wildlife, plant, or animal; or
3. Archaeological, geological, or historical object.

Historical Note

Former Rule 3; Former Section R12-8-03 repealed, new Section R12-8-03 adopted effective January 28, 1976 (Supp. 76-1). Former Sections R12-8-03 and R12-8-06 renumbered and amended as Section R12-8-103 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-104. Hours of Use; Closure

A. Camping areas are open to public use at all hours.

B. Day-use areas are open to the public during the hours posted.

C. The Director may temporarily restrict the hours of public use or close all or a portion of a state park in the interest of public safety or to protect the property.

D. The Director may modify the hours of use on a temporary basis to accommodate unusual or seasonal circumstances. The Director shall post any exception to usual hours of public use at the entrance to the state park.

Historical Note

Former Rule 4; Former Section R12-8-04 repealed, new Section R12-8-04 adopted effective January 28, 1976 (Supp. 76-1). Former Sections R12-8-04 and R12-8-05 renumbered and amended as Section R12-8-104 effective November 1, 1981 (Supp. 81-5). Amended subsections (A) and (C) effective July 12, 1984 (Supp. 84-4). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1). R12-8-104(A) corrected as filed at the request of the Board on May 29, 2014; published at 13 A.A.R. 1119 (Supp. 14-4).

R12-8-105. Repealed

Historical Note

Former Rule 5; Former Section R12-8-05 repealed, new Section R12-8-05 adopted effective January 28, 1976 (Supp. 76-1). Amended effective June 29, 1979 (Supp. 79-3). Former Section R12-8-05 renumbered and amended as Section R12-8-105 effective November 1, 1981 (Supp. 81-5). Amended effective March 23, 1990 (Supp. 90-1). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Section repealed by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-106. Limited Services on Christmas

State park facilities are not staffed on Christmas except in an emergency. On Christmas, caves, museums, contact stations, and visitor centers are closed. Other state park areas are open for public use as posted.

Historical Note

Former Rule 6; Former Section R12-8-06 repealed, new Section R12-8-06 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-05 renumbered and amended as Section R12-8-106 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-107. Litter and Waste

A. Within a state park, a person shall not leave or discard trash, garbage, or human or animal waste unless the person:
1. Confines the trash, garbage, or human or animal waste in a sanitary manner; and
2. Deposits the trash, garbage, or human or animal waste in a facility specifically designated to receive it.

B. Within a state park, a person shall not deposit trash, garbage, or human or animal waste collected from a private residence, business, or other place outside the state park.

Historical Note

Former Rule 7; Former Section R12-8-07 repealed, new Section R12-8-07 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-14 renumbered and amended as Section R12-8-107 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-108. Payment of Fees

A. Before entering, remaining in, or using a fee area, a person shall:
1. Pay the required fee,
2. Purchase a current state-park annual pass, or
3. Obtain permission from the Director.

B. A fee paid under subsection (A)(1) to enter, remain in, or use one state park does not authorize entering, remaining in, or using another state park.

Historical Note

Former Rule 8; Former Section R12-8-08 repealed, new Section R12-8-08 adopted effective February 1, 1976 (Supp. 76-1). Amended effective June 30, 1978 (Supp. 78-3). Former Section R12-8-07 renumbered and amended as Section R12-8-108 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

Editor's Note: The Arizona State Parks Board amended this Section effective March 2, 1998, under an exemption from the Arizona Administrative Procedure Act. Exemption from this Act means this Section was not submitted to the Office of the Secretary of State for publication as a proposed rule in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the rule was not reviewed or approved by the Governor's Regulatory Review Council (Supp. 98-1).

Editor's Note: The Arizona State Parks Board amended this Section effective January 1, 1998, under an exemption from the Arizona Administrative Procedure Act. Exemption from this Act means this Section was not submitted to the Office of the Secretary of State for publication as a proposed rule in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the rule was not reviewed or approved by the Governor's Regulatory Review Council (Supp. 97-4).

Editor's Note: The Arizona State Parks Board repealed the old Section text as specified in the following Editor's Note, effective January 12, 1996, under an exemption from the Arizona Administrative Procedure Act. Exemption from this Act means that this Section was not submitted to the Office of the Secretary of State for publication as a proposed rule in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the rule was not reviewed or approved by the Governor's Regulatory Review Council (Supp. 96-1).

Editor's Note: The Arizona State Parks Board adopted a new R12-8-109 under an exemption from the provisions of the Arizona Administrative Procedure Act but did not repeal the old rule. Therefore the text of both the old Section and the new Section appear here, with the old Section appearing first and the new Section appearing second. The agency will repeal the old text in January 1996.

Editor's Note: The following Section was amended under an exemption from the provisions of the Arizona Administrative Procedure Act. Exemption from this Act means that this Section was not reviewed by the Governor's Regulatory Review Council or the Attorney General; notice of this rule was not submitted to the Office of the Secretary of State for publication in the Arizona Administrative Register; and no public comment period or public hearings were required to be held on this rule.

Editor's Note: The following Section was adopted under an exemption from the provisions of the Arizona Administrative Procedure Act.

R12-8-109. Fees and Permits

A. Annual fee review. The Board shall annually review and set fees for entrance, camping, and overnight parking at a state

park. The Board shall base the fees upon an analysis of the following criteria:
1. Fee and permit charges of state park agencies in the 11 western states,
2. Fee and permit charges of entities with similar facilities within Arizona,
3. Operational and developmental costs of the Board,
4. Public demand for services, and
5. Public-use impacts upon park resources.

B. The Board shall ensure that fees for entrance, camping, and overnight parking are posted at each state park and printed in state-park literature intended for public information.

C. Fee schedule. Entrance, camping, and overnight parking fees for each state park are listed in Exhibit A.

D. Special use fees. The Director shall negotiate a fee for a special use if the Director determines that a fee greater than the fee listed in Exhibit A is justified based upon analysis of the following criteria:
1. Board expenses resulting from the special use,
2. Loss of revenue resulting from the special use,
3. Impacts upon park resources and visitors as a result of the special use, and
4. The goodwill produced for sponsors of the special use.

E. Interpretive program fees. The Director may establish a special fee for or waive the usual state park entrance fee during an interpretive program. The Director shall determine whether to assess a special fee or waive the usual state park entrance fee for an interpretive program using the criteria specified in subsection (D). If the Director establishes a special fee for an interpretive program, the Director shall ensure that the special fee is posted and printed in state-park literature in advance of the interpretive program.

F. Commercial permit. A person that intends to enter a state park to conduct any portion of a business that is not covered by a concession or special use permit shall obtain either a commercial retail or commercial rental permit from the Board before entering the state park. A commercial permit authorizes one commercial vehicle carrying no more than four individuals to enter the state park for which the commercial permit is issued.

Historical Note

Former Rule 9; Former Section R12-8-09 repealed, new Section R12-8-09 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-08 renumbered and amended as Section R12-8-109, subsections (A), (B) and (D), effective November 1, 1981, subsection (C) effective January 1, 1982 (Supp. 81-5). Amended by adding subsection (E) effective July 12, 1984 (Supp. 84-4). Amended subsections (B) and (D) and added subsection (F) effective January 1, 1985 (Supp. 84-6). Amended effective April 22, 1988 (Supp. 88-2). Repealed due to legislative exemption which was amended into the Arizona Administrative Procedure Act. New Section adopted effective January 1, 1994, under an exemption from the provisions of the Arizona Administrative Procedure Act; filed in the Office of the Secretary of State December 28, 1993 (Supp. 93-4). Amended effective January 1, 1995, under an exemption from A.R.S. Title 41, Chapter 6, pursuant to A.R.S. § 41-1005(A)(21); filed in the Office of the Secretary of State December 23, 1994 (Supp. 95-3). New Section adopted effective January 1, 1996, under an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-1005(A)(21); filed in the Office of the Secretary of State December 22, 1995 (Supp. 95-4). Text of Section in effect before January 1, 1996, repealed effective January 11, 1996, pursuant to an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-1005(A)(21) (Supp. 96-1). Amended effective January 1, 1997, under an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-511.05(8); filed in the Office of the Secretary of State December 9, 1996 (Supp. 96-4). Amended effective January 1, 1998, under an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-511.05(8); filed in the Office of the Secretary of State December 11, 1997 (Supp. 97-4). Amended effective March 2, 1998, under an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-511.05(8); filed in the Office of the Secretary of State February 13, 1998 (Supp. 98-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

Editor's Note: The Arizona State Parks Board amended this Section effective January 1, 1998, under an exemption from the Arizona Administrative Procedure Act. Exemption from this Act means this Section was not submitted to the Office of the Secretary of State for publication as a proposed rule in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the rule was not reviewed or approved by the Governor's Regulatory Review Council (Supp. 97-4).

Editor's Note: The Arizona State Parks Board repealed the old Section text as specified in the following Editor's Note, effective January 12, 1996, under an exemption from the Arizona Administrative Procedure Act. Exemption from this Act means that this Section was not submitted to the Office of the Secretary of State for publication as a proposed rule in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the rule was not reviewed or approved by the Governor's Regulatory Review Council. (Supp. 96-1).

Editor's Note: The Arizona State Parks Board adopted a new R12-8-109 under an exemption from the provisions of the Arizona Administrative Procedure Act but did not repeal the old rule. Therefore the text of both the old Section and the new Section appear here, with the old Section appearing first and the new Section appearing second. The agency will be repealing the old text soon.

Editor's Note: The following Section was adopted under an exemption from the provisions of the Arizona Administrative Procedure Act. Exemption from this Act means that this Section was not reviewed by the Governor's Regulatory Review Council; notice of this rule was not submitted to the Office of the Secretary of State for publication in the Arizona Administrative Register; no public comment period or public hearings were required to be held on this rule; and the Attorney General has not certified this rule.

R12-8-110. Fee Waivers

A. The Director may waive the entrance fee listed in Exhibit A for the following groups. If the Director does not waive the entrance fee, members of the group shall pay the entrance fee listed in Exhibit A:
1. A preschool or K-12 school group and accompanying chaperons;
2. A group of professional individuals participating in a parks and recreation, historic, or interpretive seminar or conference tour; and
3. A group of disabled individuals affiliated with an organization or agency established to care for, rehabilitate, train, or serve the disabled individuals. For the purpose of this subsection, disabled means blind or visually impaired,

deaf or hard of hearing, mobility impaired, or developmentally impaired.

B. An individual who serves as a volunteer and has a signed volunteer agreement with the Board is exempt from entrance fees listed in Exhibit A.

C. The Director may modify any fee prescribed under R12-8-109 to grant a discount or promotional rate.

Historical Note

Adopted effective July 12, 1984 (Supp. 84-4). Repealed due to legislative exemption which was amended into the Arizona Administrative Procedure Act. New Section adopted effective January 1, 1994, under an exemption from the provisions of the Arizona Administrative Procedure Act; filed in the Office of the Secretary of State December 28, 1993 (Supp. 93-4).Adopted effective January 1, 1996, under an exemption from the provisions of the Arizona Administrative Procedure Act; filed in the Office of the Secretary of State December 22, 1995 (Supp. 95-4). Text of Section in effect before January 1, 1996, repealed effective January 11, 1996, pursuant to an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-1005(A)(21) (Supp. 96-1). Amended effective January 1, 1998, under an exemption from A.R.S. Title 41, Chapter 6, specified in A.R.S. § 41-511.05(8); filed in the Office of the Secretary of State December 11, 1997 (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-111. Camping

A. Camping is permitted only in a designated camping unit.

B. Except when camping at a Board-approved concession area within a state park, a person using a camping unit shall not:

1. Camp in a state park for more than 15 days within a 30-day period unless authorized by the Director;
2. Camp in a state park for more than 29 days within a 45-day period that is posted as a long-term stay period unless authorized by the Director;
3. Leave an occupied camping unit unattended overnight without written permission from the Director; or
4. Allow the number of persons occupying a camping unit or the number of vehicles in the camping unit to exceed the limits posted at the entrance to the state park or camping unit.

C. A camping unit is considered occupied after the use fee is paid and the camper establishes a conspicuous presence. A person shall not occupy a camping unit in violation of instructions from the Director or if there is reason to believe that the camping unit is occupied by another camper.

D. A Park Ranger shall allow the occupants of a single vehicle to register for more than one camping unit only if the number of occupants exceeds the posted occupancy limit for the camping unit.

E. A person shall pay the fee for a permit to use a camping unit on a per-day basis. Payment authorizes use of the camping unit until 2:00 p.m. on the day the permit expires.

F. A person shall remove all personal property from a camping unit by 2:00 p.m. on the day that a permit expires or purchase an additional permit if eligible under subsection (B).

Historical Note

Former Rule 11; Former Section R12-8-11 repealed, new Section R12-8-11 adopted effective January 28, 1976 (Supp. 76-1). Former Sections R12-8-09 and R12-8-10 renumbered and amended as Section R12-8-111 effective November 1, 1981 (Supp. 81-5). Amended subsection (A), Paragraph (1) effective November 27, 1987 (Supp. 87-4). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-112. Campfires

A. A person shall ignite an outdoor fire only in a camping unit or day-use area specifically designated for an outdoor fire.

B. A person who ignites an outdoor fire shall ensure that the fire is confined to a grill, fire ring, or other facility provided by the state park.

C. A person shall not ignite or maintain a fire when a high wind is blowing or when open burning is prohibited by order of the Director.

D. A person who ignites an outdoor fire shall ensure that the fire is attended and controlled at all times.

Historical Note

Former Rule 12; Former Section R12-8-12 repealed, new Section R12-8-12 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-11 renumbered and amended as Section R12-8-112 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-113. Vehicles, Speed Limits, and Parking

A. The operator of a motor vehicle within a state park shall drive the motor vehicle only on a maintained roadway, parking area, or other area designated by signs for motor vehicle use.

B. The operator of a motor vehicle within a state park shall comply with all state law regarding operation of a motor vehicle and shall not drive the motor vehicle at a speed greater than is reasonable and prudent under the circumstances and conditions or in excess of a posted limit.

C. The operator of a motor vehicle within a state park shall not park or leave the motor vehicle unattended except in a designated parking area or parking zone. The Director may remove an unattended motor vehicle that is illegally parked or left standing upon a roadway or in a park area in a manner that may obstruct traffic or impair normal activities of the state park.

Historical Note

Former Rule 29; Former Section R12-8-13 repealed, new Section R12-8-13 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-12 renumbered and amended as Section R12-8-113 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-114. Watercraft; Launching and Mooring

A person shall not moor or launch a watercraft from a shore within a state park if the Director has determined that it is in the best interest of the state park to prohibit mooring or launching of watercraft and has posted notice of the prohibition at the shore.

Historical Note

Former Rule 14; Former Section R12-8-14 repealed, new Section R12-8-14 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-13 renumbered and amended as Section R12-8-114 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-115. Pets

A. Except as provided in subsection (B), a person shall keep a dog, cat, or other pet on a leash that does not exceed six feet or otherwise restrain the animal while in a state park.

B. The restraint requirement in subsection (A) does not apply to a dog in an area open to hunting or field trials if the dog is participating in these activities.

C. A person shall not take a pet into a state park building, cabana site, developed beach, or other area that the Director has determined is environmentally or ecologically sensitive. This restriction does not apply to a service animal.

Historical Note

Former Rule 15; Former Section R12-8-15 repealed, new Section R12-8-15 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-15 renumbered and amended as Section R12-8-115 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-116. Glass Containers

A person shall not possess a glass or ceramic container in a state park area that is designated as a public beach or swimming area, or posted "No Glass Containers."

Historical Note

Adopted effective January 3, 1989 (Supp. 89-1). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-117. Reserved

R12-8-118. Reserved

R12-8-119. Weapons

A. The following definitions apply to this Section:

1. "Improved recreation area" means a camping unit, roadway, amphitheater, boat launching ramp, developed picnic area, developed swimming beach, and any other area within a state park that is designated by the Director and reserved for an assembly or other temporary gathering of persons.
2. "Prohibited weapon" means a firearm as defined by A.R.S. § 13-3101, including a BB or pellet gun, bow, or slingshot.

B. A peace officer or private security guard employed by the holder of a park concession is authorized to carry a firearm in a state park if:

1. The peace officer is certified under state law, or
2. The holder of the park concession complies with A.R.S. § 32-2606(3) regarding private security guards.

C. Unless authorized under subsection (B), a person shall not enter or remain in an improved recreation area while carrying a prohibited weapon after a reasonable request from a park ranger to remove it. A request to remove a prohibited weapon is reasonable if a park ranger believes that the person carrying the prohibited weapon poses a danger or threat to others lawfully present. If, after a reasonable request is made, a person carrying a prohibited weapon within an improved recreation area chooses to remain in the improved recreation area, the person shall place the weapon in the custody of a park ranger until the person leaves the improved recreation area.

D. A firearm may be transported or stored in a vehicle on any state park area as allowed by A.R.S. § 13-3102(F).

E. A hunter who holds a current license issued by the Arizona Game and Fish Department may carry a lawful hunting weapon in any state park area designated for hunting and may carry the hunting weapon through the state park to reach the state park area designated for hunting.

Historical Note

Adopted effective July 12, 1984 (Supp. 84-4). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-120. Fireworks and Explosives

A person shall not discharge fireworks or any other explosive device within a state park without first obtaining from the Director a special use permit that authorizes the discharge of fireworks or any other explosive device.

Historical Note

Former Rule 20. Former Section R12-8-20 repealed, new Section R12-8-20 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-20 renumbered and amended as Section R12-8-120 adopted effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-121. Reserved

R12-8-122. Commercial Use of a State Park

A. A person shall not engage in a commercial activity within a state park unless the commercial activity is authorized by:

1. A special use permit issued under R12-8-125,
2. A concession, or
3. A commercial rental or retail permit.

B. Subsection (A) does not apply to an individual who enters a state park in a commercially marked vehicle if the individual intends to, provide service to the holder of a special use permit, concession, or commercial rental or retail permit, or respond to an emergency.

Historical Note

Former Rule 22. Former Section R12-8-22 repealed, new Section R12-8-22 adopted effective January 28, 1976 (Supp. 76-1). Former Sections R12-8-22 and R12-8-23 renumbered and amended as Section R12-8-122 effective November 1, 1981 (Supp. 81-5). Amended subsection (A) effective July 12, 1984 (Supp. 84-4). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-123. Reserved

R12-8-124. Disorderly Conduct

A. A person shall not engage in disorderly conduct within a state park.

B. Within a state park, a person shall not knowingly disturb the peace of an area or another person, make unreasonable noise, engage in violent behavior, use provocative language or gestures, or recklessly handle, display, or discharge a deadly weapon or dangerous instrument.

C. A person shall not use a loudspeaker in a state park without first obtaining from the Director a special use permit that authorizes the use of a loudspeaker.

Historical Note

Former Rule 24. Former Section R12-8-24 repealed, new Section R12-8-24 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-24 renumbered and amended as Section R12-8-124 effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-125. Special Use Permits

A. Special use permit required. Within a state park, a person shall obtain a special use permit from the Board before:
1. Engaging in an activity that is prohibited by this Chapter without a permit;
2. Excluding the general public from an area or facility within the state park;
3. Engaging in a commercial activity not covered by a concession or commercial rental or retail permit;
4. Engaging in a spectator event designed to attract a large crowd;
5. Engaging in an activity that requires a permit from another entity such as the Coast Guard, Arizona Game and Fish Department, or a city, county, or municipality;
6. Engaging in an activity that requires a reservation outside an area designated for use by reservation; or
7. Using a state park area for a purpose different from that for which the area is designated.

B. General terms and conditions. The Board shall issue a special use permit only subject to the following general terms and conditions:
1. An application for the special use permit is submitted less than one year before the planned special use;
2. The special use permit may be revoked if the Board determines that the permit holder fails to comply with state park statutes, this Chapter, and all Board policies that are terms of the special use permit;
3. The special use permit does not conflict with a concession without written approval from the concession holder;
4. The special use permit is issued to the first person that applies for a special use permit for a particular day at a particular location;
5. The special use permit is issued only after the applicant complies with any indemnity and insurance requirements that the Board determines are necessary to protect the state;
6. The special use permit is issued only after the applicant pays required fees or obtains a fee waiver under R12-8-110;
7. The special use does not conflict with the Board's management goals for the state park; and
8. The special use does not create a safety hazard to participants, spectators, or the general public.

C. Private special event. The Board shall issue a special use permit for a private special event only subject to the following specific terms and conditions:
1. The person requesting a special use permit for a private special event requests the special use permit for no more than seven consecutive days of use and no more than 14 days of use in a calendar year;
2. The private special event does not significantly interfere with the public's use of the state park; and
3. The person holding a special use permit for a private special event does not engage in commercial activity within a state park.

D. Public special event. The Board shall issue a special use permit for a public special event only subject to the following specific terms and conditions:
1. The person requesting a special use permit for a public special event requests the special use permit for no more than four consecutive days of use in a calendar quarter and no more than 16 days of use in a calendar year at a particular state park; and
2. No more than two special use permits for a public special event are issued per day per state park.

E. Festival special event. The Board shall issue a special use permit for a festival special event only subject to the following specific terms and conditions:
1. The person requesting a special use permit for a festival special event requests the special use permit at least 120 days before the festival special event if no more than 1,500 people are expected to attend each day of the festival special event or at least 180 days before the festival special event if more than 1,500 people are expected to attend each day;
2. The person requesting a special use permit for a festival special event requests no more than seven consecutive days of use and no more than 14 days of use in a calendar year at a particular state park;
3. No more than one special use permit for a festival special event is issued per day per state park;
4. The person requesting a special use permit for a festival special event provides to the Board a detailed plan regarding security, sanitary facilities, medical services, parking, food and drink facilities, booths, and sponsorships at least 90 days before the festival special event; and
5. The person requesting a special use permit for a festival special event obtains all permits required by other entities such as a city, county, municipality, or agency and submits a copy of all permits to the Board at least 30 days before the festival special event.

F. Commercial photography special use. The Board shall issue a special use permit for commercial photography only subject to the following specific terms and conditions:
1. The person requesting a special use permit for commercial photography requests the special use permit at least 30 days before the commercial photography event;
2. The person requesting a special use permit for commercial photography requests no more than seven consecutive days of use and no more than 14 days of use in a calendar year at a particular state park; and
3. The person holding a commercial photography special use permit does not engage in commercial activity within a state park.

Historical Note
Former Rule 25; Former Section R12-8-25 repealed, new Section R12-8-25 adopted effective January 28, 1976 (Supp. 76-1). Former Section R12-8-25 renumbered and amended as Section R12-8-125 effective November 1, 1981 (Supp. 81-5). Amended subsections (A) and (C) effective November 27, 1987 (Supp. 87-4). Amended effective January 1, 1997, under an exemption from A.R.S. Title 41, Chapter 6; filed in the Office of the Secretary of State December 9, 1996 (Supp. 96-4). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-126. Violation; Classification
Under A.R.S. § 41-511.13, an individual who violates a provision of this Chapter commits a class 2 misdemeanor.

Historical Note
Adopted effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

Exhibit A. May 1, 2018, Regular Fee Schedule

ARIZONA STATE PARKS FEE SCHEDULE

EFFECTIVE MAY 1, 2018

1: Adult is defined as an individual 14 years of age and older.
2: Camping fees reflect a "Range" dependent upon specific site location and seasonality. Call individual Park facility for current information.
4: Over-sized Parking is an additional fee for those vehicles or vehicle/trailer units that exceed 55' in total length.
5: Additional Program Fees may apply, see "OTHER FEES."
6: For Lodge, Cabins & Yurts an additional overnight fee of $5.00 per pet per night will be assessed.
7: Camping by Reservation only. Contact the Park Facility directly for availability and details.

These fees are charged on a "per vehicle" basis that includes up to 4 Adults per vehicle. Additional fees for vehicles containing more than 4 Adults will be assessed.

50% discount off regular entrance fee for Active Duty, National Guard or Reserve members of the United States Military, Arizona residents who are United States Military Retired or Service Disabled Veterans and their families.

100% discount off regular entrance fee for Arizona residents who are 100% Service Disabled Veterans and their families. Does not apply to Kartchner Caverns State Park tour tickets, special use fees, special event fees, special event admission fees, reservation fees, camping or overnight parking.

The reference to the A.A.R. issue and page number for the exempt rulemaking notice codified in Supp. 18-1, Exhibit A corrected in Supp. 21-2.

ARTICLE 2. OPERATION OF THE BOARD

R12-8-201. Meetings

A. There shall be a minimum of one meeting of the Arizona State Parks Board during each calendar year quarter.

B. The time and place of a meeting shall be designated seven days before the meeting date by either:
1. The Chairman verbally informing the Director or,
2. Any four members informing the Director in writing, except that in the case of an emergency, the Director may be verbally informed.

C. The Director, upon being informed of the time and place of a meeting shall:
1. Inform each member of the time and place of the meeting at least five days before the meeting date.
2. Prepare a written agenda consisting of the time and place of the meeting and an outline of the business to be considered. The agenda shall be verbally accepted by the Chairman or the members who set the meeting before it is distributed.
3. Transmit the agenda to each Board Member and post the agenda in the administrative headquarters of the Board and at the headquarters area of each operational State Park at least two days before the meeting date.
4. Prepare explanatory material concerning the business contained on the agenda and transmit the material to each Board Member.

D. In the case of an emergency, the time requirements of subsections (B) and (C) above may be adjusted to the circumstances.

Historical Note
Adopted effective August 8, 1977 (Supp. 77-4). Former Section R12-8-50 renumbered as Section R12-8-201 without change effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-202. Organization of the Board

A. Selection of Officers
1. At the first meeting following January 1 of each year, the members present shall select by majority vote a Chairman and a Vice Chairman to serve through the first meeting following January 1 of the year following.
2. If a vacancy in either the Chairman or Vice Chairman office of the Board occurs, the members present at the first meeting following the occurrence of the vacancy shall select a member by majority vote to fill the unexpired term of the officer.
3. If the Chairman and Vice Chairman are absent from a meeting of the Board held in accordance with these rules, a Presiding Officer shall be selected by majority vote of the members present.

B. Duties of the officers are as follows:
1. The Chairman shall preside over all meetings and functions of the Board.
2. The Vice Chairman shall take over the duties of the Chairman if the Chairman is absent.
3. The Presiding Officer shall take over the duties as Chairman if the Chairman and Vice Chairman are absent.

Historical Note
Adopted effective August 8, 1977 (Supp. 77-4). Former Section R12-8-51 renumbered as Section R12-8-202 without change effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-203. Committees

A. There shall be no standing committees.

B. Special committees may be appointed by the Chairman to make reports to the Board concerning matters of interest to the Board.

Historical Note
Adopted effective August 8, 1977 (Supp. 77-4). Former Section R12-8-52 renumbered as Section R12-8-203 without change effective November 1, 1981 (Supp. 81-5).

R12-8-204. Procedures at Meetings

A. All actions of the Board shall be by majority vote of the membership present.

B. Board meetings shall be conducted under Roberts Rules of Order.

Historical Note
Adopted effective August 8, 1977 (Supp. 77-4). Former Section R12-8-53 renumbered as Section R12-8-204 without change effective November 1, 1981 (Supp. 81-5). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-205. Repealed

Historical Note
Adopted effective June 29, 1979 (Supp. 79-3). Former Section R12-8-54 renumbered as Section R12-8-205 without change effective November 1, 1981 (Supp. 81-5). Section repealed by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-206. Repealed

Historical Note
Adopted effective August 26, 1983 (Supp. 83-4).

R12-8-207. Board Concession Approval Policy

A. The Board may enter into agreement with a private or public entity for the operation and development of a concession in an area under the jurisdiction of the Board subject to the following conditions:
1. The proposed concession activity shall be consistent with a Board-approved master plan for development and operation of the park in which the concession is to be located. The plan shall include any amendments or other Board activity.
2. The proposed concession activity shall be consistent with the purposes of the Board as defined by statute.

3. The Board determines that there is a need for the proposed type of concession operation and that the proposed concession activity is in the best interest of the state.
4. The Board issues a formal request for proposals from persons interested in operating a concession.
5. The Board determines that the concession operator selected is most advantageous to the state according to the criteria identified in the request for proposals.

B. The Board shall publish notice of a request for proposals for a concession in accordance with A.R.S. § 41-2533(C). In addition, the Board shall provide notice of a request for proposals at the last known address of each person who has, within the last year, expressed in writing to the Board an interest in operating a concession of the particular nature being noticed.

C. A copy of this rule shall be provided by the Board to each person who submits a concession proposal without prior issuance by the Board of a formal request for proposals for a concession.

D. The Board may exempt an existing concession renewal, consignment agreement, vending agreement, or agreement with a nonprofit organization or a local historical society from the procedures contained in this rule.

Historical Note
Adopted effective July 12, 1984 (Supp. 84-4). Amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

ARTICLE 3. STATE HISTORIC PRESERVATION OFFICE PROGRAMS

R12-8-301. Definitions

In this Article, unless the context otherwise requires:

1. "State Historic Preservation Officer" or "Officer" means an employee of the Board who has professional competence and expertise in the field of historic preservation and administers the State Historic Preservation Program.
2. "Arizona Register of Historic Places," "Arizona Register," or "Register" means the state's list of Arizona's historic properties worthy of preservation that serves as an official record of Arizona's historic districts, sites, buildings, structures, and objects of national, state, or local significance in the fields of history, architecture, archaeology, engineering, or culture. Properties listed on or eligible for the Arizona Register of Historic Places may also be eligible for listing on the National Register of Historic Places.
3. "National Register of Historic Places" means the official national list of historic districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology, engineering, or culture.
4. "Historic Sites Review Committee" or "HSRC" means a standing committee of the Arizona Historical Advisory Commission, which is appointed by the State Historic Preservation Officer under A.R.S. § 41-1352 to review nominations of properties for listing on the National or Arizona Register of Historic Places.
5. "Historic property" means a building, site, district, object, or structure evaluated by the HSRC as historically significant.
6. "State Historic Preservation Office" or "SHPO" means the program staff that work under the supervision of the Officer.

Historical Note
Adopted effective June 30, 1978 (Supp. 78-3). Former Section R12-8-60 renumbered as Section R12-8-301 without change effective November 1, 1981 (Supp. 81-5). Amended effective August 26, 1983 (Supp. 83-4). Former Section R12-8-301 renumbered to R12-8-304; new Section R12-8-301 adopted by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-302. Criteria for Evaluation

A. Before listing a property in the Register, the State Historic Preservation Office (SHPO), with the advice of the HSRC, will apply the following criteria for evaluating the property:

1. The property conveys significance in one or more of the following contexts: national, state or local history, architecture, archaeology, engineering, or culture;
2. The property is classified as one of the following types: district, site, building, structure, or object;
3. The property possesses integrity of location, design, setting, materials, workmanship, feeling, or association; and
4. The property:
   a. Is associated with an event that made a significant contribution to the broad pattern of history;
   b. Is associated with the life of a historically significant person;
   c. Embodies a distinctive characteristic of a type, period, or method of construction, represents the work of a master, possesses high artistic value, or represents a significant and distinguishable entity whose components may lack individual distinction; or
   d. Has yielded or is likely to yield important pre-historical or historical information.

B. The SHPO shall not consider eligible for the Register any property that has achieved significance within the past 50 years unless the property is an integral contributing element of a district that meets the criteria in subsection (A) or the property demonstrates exceptional individual importance.

Historical Note
Adopted effective June 30, 1978 (Supp. 78-3). Former Section R12-8-61 renumbered as Section R12-8-302 without change effective November 1, 1981 (Supp. 81-5). Amended effective August 26, 1983 (Supp. 83-4). Former Section R12-8-302 renumbered to R12-8-305; new Section R12-8-302 adopted by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-303. Processes of Registration

A. The State Historic Preservation Officer shall serve as the keeper of the Register.

B. Before listing a property in the Register, the SHPO requires the following:

1. The Historic Property Inventory (HPI) form must be completed by the proponent or owner to determine whether the property is eligible for listing;
2. The Recommendation of Eligibility form must be completed by the SHPO Officer after receiving the HPI;
3. If a property is recommended as eligible, the National Register of Historic Places Registration Form or the National Register of Historic Places Multiple Property Documentation Form must be completed by the owner;
4. The SHPO Officer shall give the owner at least 30 calendar days prior notification of the nomination's review by the HSRC;
5. The SHPO Officer shall forward the National Register Registration Form to the HSRC; and
6. The HSRC shall:

a. Review the Registration Form, documentation, and any comments concerning the property's significance and integrity,
b. Recommend to the SHPO whether the property should be listed in the Arizona Register and forwarded to the keeper of the National Register; and
c. Review a refusal of nomination upon request.

C. The Officer shall determine whether to place the nominated property on the Register in accordance with information provided in subsection (B).

D. If the SHPO refuses to forward a nomination to the HSRC, the property owner may petition the HSRC Chairman in writing to have the nomination reviewed. The petition shall be filed with the Chairman at least 60 calendar days before the next scheduled meeting.

Historical Note

Adopted effective June 30, 1978 (Supp. 78-3). Former Section R12-8-62 renumbered as Section R12-8-303 without change effective November 1, 1981 (Supp. 81-5). Former Section R12-8-303 repealed, former Section R12-8-304 renumbered and amended as Section R12-8-303 effective August 26, 1983 (Supp. 83-4). Former Section R12-8-303 renumbered to R12-8-306; new Section R12-8-303 adopted by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-304. Factors for Determining Certification Eligibility

A. Before the SHPO Officer (Officer) certifies a Historic Property as eligible for a change in property tax classification, the property shall be listed in the National Register of Historic Places:
1. Individually; or
2. As part of a historic district. If within a historic district, the Officer shall determine whether or not the property contributes to the character of the historic district.

B. After the SHPO Officer determines a property is eligible for reclassification, the SHPO shall certify a historic property as Non-Commercial or Commercial, as defined in A.R.S. § 42-12101.

C. The following are exclusions from eligibility:
1. The Officer shall not certify a historic property that includes within its legal description a building, structure, improvement, or land area that does not contribute to the historical character and that can be excluded by modifying the legal description. If the legal description in an application includes an element or area of this nature, the applicant shall modify the legal description upon notification by the Officer in order to be eligible for certification.
2. A Historic Property that does not meet the minimum maintenance standards described in R12-8-306 shall not be certified by the Officer. In addition to other reasons established by law, the Officer may disqualify a property certified as a historic property for property tax purposes if the property owner does not comply with these rules and regulations of the Board designated in this Article.

E. Certification continues through any change of ownership, if the new owner submits required reports and affirms compliance with the program requirements in writing.

F. Historic Property shall not be decertified by the SHPO without proof, by certified mail, return receipt requested, that the current owner on record with the appropriate County Assessor's Office, has received notice in writing.

Historical Note

Adopted effective June 30, 1978 (Supp. 78-3). Former Section R12-8-63 renumbered as Section R12-8-304 without change effective November 1, 1981 (Supp. 81-5). Former Section R12-8-304 renumbered and amended as Section R12-8-303, former Section R12-8-305 renumbered and amended as Section R12-8-304 effective August 26, 1983 (Supp. 83-4). Former Section R12-8-304 renumbered to R12-8-307; new Section R12-8-304 renumbered from R12-8-301 and amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-305. Verification of Eligibility for Property Tax Reclassification

A. A person that seeks to have a property reclassified for property tax purposes as either a Commercial or Non-commercial Historic Property shall submit a verification of eligibility form. The person seeking reclassification may obtain the verification of eligibility form from the SHPO or the Assessor's Office in the county where the property is located and shall submit the completed form to the Assessor's Office in the county where the property is located.

B. A person that seeks to have a property reclassified for property tax purposes as either a Commercial or Non-commercial Historic Property, shall ensure that the verification of eligibility form provides the following information:
1. Address of the property,
2. Legal description of the property,
3. Property classification,
4. Name of owner,
5. Historic property name as listed on the National Register of Historic Places,
6. Date of original construction,
7. Description of any exterior changes to the property since the property was listed on the National Register of Historic Places,
8. Photographs of the property that meet the specifications of the Board, and
9. The owner's written consent for the Officer or the Officer's representative to view the property.

C. In addition to complying with subsection (B), a person that seeks to have a property reclassified as a Commercial Historic Property shall submit with the verification of eligibility form rehabilitation construction documents including plans and specifications.

D. Following the assessor's review of the verification of eligibility form and any documents required under subsection (C), the assessor shall submit the verification of eligibility form and documents to the Officer for verification of eligibility for reclassification.

Historical Note

Adopted effective June 30, 1978 (Supp. 78-3). Former Section R12-8-64 renumbered as Section R12-8-305 without change effective November 1, 1981 (Supp. 81-5). Former Section R12-8-305 renumbered and amended as Section R12-8-304 effective August 26, 1983 (Supp. 83-4). New Section R12-8-305 renumbered from R12-8-302 and amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1). Amended by final rulemaking at 13 A.A.R. 1115, effective May 5, 2007 (Supp. 07-1).

R12-8-306. Minimum Maintenance/Restoration Standards

A. The owner of a certified Commercial or Non-Commercial historic property shall maintain the property to preserve the historical integrity of the features, materials, appearance, workmanship, and environment, according to the following standards:
1. Protect the Historic Property against accelerated deterioration due to:
a. Vandalism;

b. Structural failure;
c. Climatic weathering including the affects of water infiltration;
d. Biological affects due to insects, animals, or plants;
e. Fire; or
f. Flooding.

2. Maintain the historic property by:
a. Keeping it secure;
b. Maintaining the windows and doors, or covering them in a manner that does not injure the property's integrity;
c. Maintaining security fencing, if applicable;
d. Maintaining roofs and drainage systems;
e. Minimizing damage from insects, birds, or animals; and
f. Maintaining landscaping to reduce fire potential.

B. The Officer shall decertify any certified Historic Property that is condemned by a local authority.

C. Before implementation of any rehabilitation project, the owner shall submit both a written and graphic proposal (Construction Documents) for the proposed rehabilitation project to the Officer. The Officer has 30 calendar days from receipt of the proposal in which to comment on the appropriateness of the project in relationship to The Secretary of the Interior's Standards for Rehabilitation.

D. The Officer shall review all rehabilitation projects done to ensure that the planned project for rehabilitation of the Historic Property is in accordance with the guidelines established by the U.S. Government, Cyclical Maintenance for Historic Buildings, J. Henry Chambers, AIA, 1976, available from the U.S. Government Printing Office and the U.S. Department of the Interior, the National Park Service publication titled, The Secretary of the Interior's Standards for Historic Preservation Projects, Section III, Guidelines, 1983 and The Secretary of the Interior's Standards for Rehabilitation, National Park Service, 1995 available from the National Park Service Technical Preservation Services Division, the State Historic Preservation Office, or the U.S. Government Printing Office. These three documents are incorporated by reference and on file with the Board and the Office of the Secretary of State. The materials incorporated by reference contain no future editions or amendments.

E. The owner shall submit pictures of rehabilitation projects no later than 30 calendar days after completion of the rehabilitation project that illustrate compliance with the standards established in subsection (D).

F. If a conflict occurs between the requirements of the Officer or the Officer's representative and local building officials or any applicable laws, a meeting of the appropriate representatives shall be called by the owner to discuss the question and reach an equitable solution.

Historical Note
New Section R12-8-306 renumbered from R12-8-303 and amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

R12-8-307. Documentation Requirements, Reports, and Inspection

A. The owner of a certified Historic Property shall submit the following information for the requested year's activity to the Officer:
1. Confirmation of current Historic Property ownership,
2. A statement signed by the owner indicating that the Historic Property is operated and maintained in accordance with the laws and rules applicable to the classification of the Historic Property for property tax purposes, and
3. Additional reports and inspections necessary for documentation requirements.

B. The owner of a classified Historic Property shall permit the Officer or representative to inspect the property for compliance with these rules. The Officer shall notify the owner by certified mail at least ten days before the inspection.

Historical Note
New Section R12-8-307 renumbered from R12-8-304 and amended by final rulemaking at 7 A.A.R. 1010, effective February 8, 2001 (Supp. 01-1).

41-511. Arizona state parks board; membership; appointment; terms

A. There shall be an Arizona state parks board, which shall consist of seven members. The state land commissioner shall be a member and the remaining members, each of whom shall be a bona fide resident of the state, shall be appointed by the governor pursuant to section 38-211. The appointive members shall be selected because of their knowledge of and interest in outdoor activities, multiple use of lands, archaeology, natural resources and the value of the historical aspects of Arizona, and because of their interest in the conservation of natural resources. Not less than one of the appointive members shall be representative of the livestock industry, one appointive member shall be professionally engaged in general recreation work and one appointive member shall be professionally engaged in the tourism industry.

B. All appointments shall be for a term of six years and shall expire on the third Monday in January of the appropriate year.

41-511.03. Purposes; objectives

The purposes and objectives of the board shall be to select, acquire, preserve, establish and maintain areas of natural features, scenic beauty, historical and scientific interest, and zoos and botanical gardens, for the education, pleasure, recreation, and health of the people, and for such other purposes as may be prescribed by law.

41-511.04. Duties; board; partnership fund; state historic preservation officer; definition

A. The board shall:

1. Select areas of scenic beauty, natural features and historical properties now owned by the state, except properties in the care and custody of other agencies by virtue of agreement with the state or as established by law, for management, operation and further development as state parks and historical monuments.

2. Manage, develop and operate state parks, monuments or trails established or acquired pursuant to law, or previously granted to the state for park or recreation purposes, except those falling under the jurisdiction of other state agencies as established by law.

3. Investigate lands owned by the state to determine in cooperation with the agency that manages the land which tracts should be set aside and dedicated for use as state parks, monuments or trails.

4. Investigate federally owned lands to determine their desirability for use as state parks, monuments or trails and negotiate with the federal agency having jurisdiction over such lands for the transfer of title to the Arizona state parks board.

5. Investigate privately owned lands to determine their desirability as state parks, monuments or trails and negotiate with private owners for the transfer of title to the Arizona state parks board.

6. Enter into agreements with the United States, other states or local governmental units, private societies or persons for the development and protection of state parks, monuments and trails.

7. Plan, coordinate and administer a state historic preservation program, including the program established pursuant to the national historic preservation act of 1966, as amended.

8. Advise, assist and cooperate with federal and state agencies, political subdivisions of this state and other persons in identifying and preserving properties of historic or prehistoric significance.

9. Keep and administer an Arizona register of historic places composed of districts, sites, buildings, structures and objects significant in this state's history, architecture, archaeology, engineering and culture that meet criteria that the board establishes or that are listed on the national register of historic places. Entry on the register requires nomination by the state historic preservation officer and owner notification in accordance with rules that the board adopts.

10. Accept, on behalf of the state historic preservation officer, applications for classification as historic property received from the county assessor.

11. Adopt rules with regard to classification of historic property including:

(a) Minimum maintenance standards for the property.

(b) Requirements for documentation.

12. Monitor the performance of state agencies in the management of historic properties as provided in chapter 4.2 of this title.

13. Advise the governor on historic preservation matters.

14. Plan and administer a statewide parks and recreation program, including the programs established pursuant to the land and water conservation fund act of 1965 (P.L. 88-578; 78 Stat. 897).

15. Prepare, maintain and update a comprehensive plan for the development of the outdoor recreation resources of this state.

16. Initiate and carry out studies to determine the recreational needs of this state and the counties, cities and towns.

17. Coordinate recreational plans and developments of federal, state, county, city, town and private agencies.

18. Receive applications for projects to be funded through the land and water conservation fund and the state lake improvement fund on behalf of the Arizona outdoor recreation coordinating commission.

19. Provide staff support to the Arizona outdoor recreation coordinating commission.

20. Maintain a statewide off-highway vehicle recreational plan. The plan shall be updated at least once every five years and shall be used by all participating agencies to guide distribution and expenditure of monies under section 28-1176. The plan shall be open to public input and shall include the priority recommendations for allocating available monies in the off-highway vehicle recreation fund established by section 28-1176.

21. Collaborate with the state forester in presentations to legislative committees on issues associated with forest management and wildfire prevention and suppression as provided by section 37-1302, subsection B.

B. Notwithstanding section 41-511.21, the board may annually collect and expend monies to plan and administer the land and water conservation fund program, in conjunction with other administrative tasks and recreation plans, as a surcharge to subgrantees in a proportionate amount, not to exceed ten percent, of the cost of each project. The surcharge monies shall be set aside to fund staff support for the land and water conservation fund program.

C. A partnership fund is established consisting of monies received pursuant to subsection B of this section, monies received from intergovernmental agreements pursuant to title 11, chapter 7, article 3 and monies received pursuant to section 35-148. The board shall administer the fund monies as a continuing appropriation for the purposes provided in these sections.

D. The state historic preservation officer shall:

1. In cooperation with federal and state agencies, political subdivisions of this state and other persons, direct and conduct a comprehensive statewide survey of historic properties and historic private burial sites and historic private cemeteries and maintain inventories of historic properties and historic private burial sites and historic private cemeteries.

2. Identify and nominate eligible properties to the national register of historic places and the Arizona register of historic places and otherwise administer applications for listing historic properties on the national and state registers.

3. Administer grants-in-aid for historic preservation projects within this state.

4. Advise, assist and monitor, as appropriate, federal and state agencies and political subdivisions of this state in carrying out their historic preservation responsibilities and cooperate with federal and state agencies, political subdivisions of this state and other persons to ensure that historic properties and historic private burial sites and historic private cemeteries are taken into consideration at all levels of planning and development.

5. Develop and make available information concerning professional methods and techniques for the preservation of historic properties and historic private burial sites and historic private cemeteries.

6. Make recommendations on the certification, classification and eligibility of historic properties and historic private burial sites and historic private cemeteries for property tax and investment tax incentives.

E. The state historic preservation officer may:

1. Collect and receive information for historic private burial sites and historic private cemeteries from public and private sources and maintain a record of the existence and location of such burial sites and cemeteries located on private or public lands in this state.

2. Assist and advise the owners of the properties on which the historic private burial sites and historic private cemeteries are located regarding the availability of tax exemptions applicable for such property.

3. Make the records available to assist in locating the families of persons buried in the historic private burial sites and historic private cemeteries.

F. For the purposes of this section, "historic private burial sites and historic private cemeteries" means places where burials or interments of human remains first occurred more than fifty years ago, that are not available for burials or interments by the public and that are not regulated under title 32, chapter 20, article 6.

41-511.05. Powers; compensation

The board, subject to legislative budgetary control within the limitations of this article, may:

1. Subject to chapter 4, article 4 and, as applicable, article 5 of this title, employ, determine conditions of employment and specify the duties of such administrative, secretarial and clerical workers and technical employees such as naturalists, archaeologists, landscape architects, rangers, park supervisors, caretakers, guides, skilled tradesmen, laborers, historians and engineers, and contract to have the services of such advisors or consultants as are reasonably necessary or desirable to enable it to perform adequately its duties. The compensation of the director and of all workers and employees shall be as determined pursuant to section 38-611.

2. Make such contracts, leases and agreements and incur such obligations as are reasonably necessary or desirable within the general scope of its activities and operations to enable it to perform adequately its duties.

3. Acquire through purchase, lease, agreement, donation, grant, bequest or otherwise real and personal property and acquire real property through eminent domain for state park or monument purposes. Property may not be acquired in the manner provided in this paragraph that will require an expenditure in excess of funds budgeted or received for such purposes. A state park or monument, or additions to a state park or monument, may not be created containing in excess of one hundred sixty acres of land unless created by an act of the legislature. This acreage limitation does not apply in the case of lands given or donated for state park or monument purposes or to state owned lands that are selected by the board and that are not subject to outstanding leases, permits or other rights for the use of the lands including preferential rights to renew such leases and permits.

4. Sell, lease, exchange or otherwise dispose of real and personal property. Any disposition of real property shall be submitted for approval of the joint committee on capital review. The disposition of office equipment, furnishings, vehicles and other materials is subject to chapter 23, article 8 of this title. The disposition of artifacts and other property of scientific, archaeological, historical or sociological interest is exempt from chapter 23, article 8 of this title, but the board shall consult with the Arizona historical society in disposing of property of historical interest.

5. Construct at state parks and monuments necessary sanitary and other facilities including picnic tables, fireplaces, campsites, service buildings and maintenance shops, and contract with private persons for the construction and operation of cabins, hotels and restaurants, and like establishments.

6. Erect suitable signs and markers at parks and monuments and write, prepare and publish written materials describing the historical significance of monuments and other places of historical or other significance.

7. Solicit and work in cooperation with the department of transportation and the highway departments of various counties and the United States federal highway administration for necessary roads and trails within the state parks and monuments and access roads to state parks and monuments. For the purposes of this paragraph, the board may designate roads, spurs and other traffic related appurtenances within state park boundaries as public highways. Designation of roads, spurs or other traffic related appurtenances as public highways does not prohibit the board from closing such public highways when the park is closed, charging for admission to the park to persons using the public highway within the park or otherwise managing such public highways in the same manner as other lands within the park.

8. Levy and collect reasonable fees or other charges for the use of such privileges and conveniences as may be provided under the jurisdiction of the board. The board may enter into agreements for the purpose of accepting payment for fees or other charges imposed pursuant to this article by alternative payment methods, including credit cards, charge cards, debit cards and electronic funds transfers. The collecting officer shall deduct any fee charged or withheld by a company providing the alternative payment method under an agreement with the board before the revenues are transferred to the board.

9. Make reasonable rules for the protection of, and maintain and keep the peace in, state parks and monuments. Such rules adopted by the parks board are subject to review and approval by the legislature. After a board rule has been finally adopted pursuant to chapter 6 of this title, the board shall immediately forward a certified copy of the rule to the legislature. The legislature may review and, by concurrent resolution, approve, disapprove or modify such rule. However, such rule shall be given full force and effect pending legislative review. If a concurrent resolution is not passed by the legislature with respect to the rule within one year following receipt of a certified copy of the rule, the rule is deemed to have been approved by the legislature. If the legislature disapproves a rule or a section of a rule, the board shall immediately discontinue the use of any procedure, action or proceeding authorized or required by the rule or section of the rule. If the legislature modifies a rule or section of a rule, the board shall immediately suspend the use of any procedure, action or proceeding authorized or required by the rule or section of the rule until the modified rule has been adopted in accordance with chapter 6 of this title, after which all proceedings pursuant to the rule shall be conducted in accordance with the modified version of the rule.

10. Furnish advisory services to city and county park or recreation boards and organizations.

11. Delegate to the director, the deputy director or the director's designee any of its powers and duties, whether ministerial or discretionary, that are prescribed by law, except that the board may not delegate its power or duty to make rules.

12. Reimburse board volunteers for travel and lodging expenses and per diem subsistence allowances incurred while on public business for the board. Reimbursement amounts shall not exceed those allowed under title 38, chapter 4, article 2.

13. In consultation with the conservation acquisition board, develop a grant program and adopt guidelines for allocating and obligating monies in the land conservation fund pursuant to section 41-511.23. The guidelines shall include consideration of both qualification issues relating to applicants for grants and issues relating to the proposed use of the grant money in a manner consistent with existing municipal, county and regional land use plans.

14. Require volunteers who collect fees or interact with children or vulnerable adults as defined in section 13-3623 within a state park to submit a full set of fingerprints to the board for the purpose of obtaining a state and federal criminal records check pursuant to section 41-1750 and Public Law 92-544. The department of public safety may exchange this fingerprint data with the federal bureau of investigation.

42-12101. Definitions

In this article, unless the context otherwise requires:

1. "Commercial historic property" means real property that:

(a) Meets the criteria for classification as class one, paragraph 12 pursuant to section 42-12001 or class four pursuant to section 42-12004, subsection A, paragraphs 2 through 9.

(b) Is listed in the national register of historic places established and maintained under the national historic preservation act (P.L. 89-665; 80 Stat. 915; 16 United States Code section 470 et seq.), as amended.

(c) Meets the minimum standards of maintenance established by rule by the Arizona state parks board.

2. "Noncommercial historic property" means real property:

(a) That is listed in the national register of historic places established and maintained under the national historic preservation act (P.L. 89-665; 80 Stat. 915; 16 United States Code section 470 et seq.), as amended.

(b) That meets the minimum standards of maintenance established by rule by the Arizona state parks board.

(c) On which no business or enterprise is conducted with the intent of earning a profit.

42-12105. Disqualification

A. Property shall remain classified and assessed as noncommercial historic property until it becomes disqualified through either:

1. Notice by the taxpayer to the assessor to remove the assessment as noncommercial historic property.

2. Sale or transfer to an ownership that makes it exempt from property taxation.

3. Notification by the state historic preservation officer to the assessor that the property no longer qualifies as noncommercial historic property.

B. Property shall remain classified and assessed as commercial historic property until it becomes disqualified through either:

1. Notice by the taxpayer to the assessor to remove the assessment as commercial historic property.

2. Sale or transfer to an ownership that makes it exempt from property taxation.

3. Notification by the state historic preservation officer to the assessor that the property no longer qualifies as commercial historic property.

4. The failure to maintain the property in a manner consistent with the minimum standards of maintenance established by rule by the Arizona state parks board.

Arizona State Parks Board (ASPB)

5 YEAR REVIEW REPORT

Title 12, Chapter 8

October 28, 2024

1. Authorization of the rule by existing statutes:

General Statutory Authority: A.R.S. § 41-511

Specific Statutory Authority:: A.R.S. § 41-511.02-
A.R.S. § 41-51105

2. The objective of each rule:

Article 1	**General Provisions**
R12-8-101	**Definitions.** Defines terms and phrases used throughout 12 A.A.C. 8.
R12-8-102	**Permission to Enter or Remain in a State Park.** Establishes entry and use of a state park and provides authority for removing and delaying the return of a person in violation of park rules.
R12-8-103	**Vandalism.** Describes that a person shall not vandalize any state park property.
R12-8-104	**Hours of Use; Closure.** Sets the hours of use for various areas in the parks and gives the Director the authority to modify hours.

R12-8-106	**Limited Services on Christmas.** Describes Christmas hours at the state parks.

R12-8-107	**Litter & Waste.** Sets the standards for the disposal of trash, garbage, human or animal waste within a state park.
R12-8-108	**Payment of Fees:** Sets the rules for the collection of fees and charges for the state park system.
R12-8-109	**Fees & Permits.** Sets the fee structure for the use of agency resources and facilities.
R12-8-110	**Fee Waivers.** Allows the Director to waive state park fees.
R12-8-111	**Camping**. Sets the requirements for camping at a state park.
R12-8-112	**Campfires.** Sets the requirements for lighting a campfire in a state park.
R12-8-113	**Vehicles, Speed Limits, and Parking.** Sets the requirements for operating a motor vehicle within a state park.
R12-8-114	**Watercraft, Launching, and Mooring.** Sets the requirements for operating a watercraft at a state park.
R12-8-115	**Pets.** Sets the standards for pets coming into a state park by a patron.
R12-8-116	**Glass Containers.** Prohibits glass or ceramic containers in areas of a state park where they are restricted.
R12-8-119	**Weapons.** Establishes the standards for carrying, transporting, and storage of weapons in a state park.
R12-8-120	**Fireworks & Explosives.** Prohibits the use of fireworks and explosives only if a special permit is authorized by the Director.
R12-8-122	**Commercial Use of a State Park.** Establishes limits surrounding commercial activities within a state park.
R12-8-124	**Disorderly Conduct.** Establishes standards for disorderly conduct within a state park.

R12-8-125	**Special Use Permits.** Sets the requirements for authorizing special use permits within a state park.

R12-8-126	**Violation; Classification.** States that an individual who violates rules commits a misdemeanor.
Exhibit A	**Fees.** Sets the fee ranges for the state park system.

Article 2	**Board Operations**
R12-8- 201	**Meetings.** Sets the requirements for State Park Board meetings.
R12-8- 202	**Organization of the Board.** Sets requirements for the selection of officers for the State Parks Board.
R12-8- 203	**Committees.** Establishes special committees within the State Parks Board.
R12-8- 204	**Procedures at Meetings.** Establishes voting procedures for the State Park Board meetings.

Article 3	**State Historic Preservation Office Programs (SHPO)**
R12-8-301	**Definitions.** Defines terms used in the SHPO.
R12-8-302	**Criteria for Evaluation**. Establishes criteria for evaluating a project as a listed property on the Arizona Register of Historic Places.
R12-8-303	**Process of Registration.** Establishes the processes by which a property is registered as a Historic Property on the Arizona and/or National Register.
R12-8-304	**Factors for Determining Certification Eligibility.** Establishes the factors for determining eligibility for the National Register of Historic Places and certification of historic properties for tax purposes.
R12-8-305	**Verification of Eligibility for Property Tax Reclassification.** Establishes the process for reclassifying properties as Commercial or Non-Commercial Historic Properties.

R12-8-306	**Minimum Maintenance Restoration/Standards.** Establishes standards for properties to maintain eligibility as mandated in statute.

R12-8-307	**Documentation Requirements, Reports, and Inspection.** Establishes the process for an owner of a certified Historic Property to inform SHPO of the requested year's activities.

3. Are the rules effective in achieving their objectives?

Yes, the rules are effective in achieving their objectives.

4. Are the rules consistent with other rules and statutes?

Yes, the rules are consistent with other rules and statutes.

5. Are the rules enforced as written?

Yes, the rules are enforced as written.

6. **Are the rules clear, concise, and understandable?**

Yes, the rules are clear, concise, and understandable.

7. **Has the agency received written criticisms of the rules within the last five years? Yes _ No x**

There have been no written criticisms of the rules within the last five years.

8. **Economic, small business, and consumer impact comparison:**

There are no economic, small business, or consumer impacts to the rules as written. The last economic impact comparison from 2019 indicated there were no significant impacts. There have been no changes to the rules and there are no changes that would have an economic impact on our rulemaking.

The State Parks Board reported in the previous report that the voluntary program for historic property designation and certification places no economic impact on the property owners, public or small business and that is the same currently. SHPO rules outline the administrative processes for federal and state law related to historic property designation and certification of properties for historic tax purposes. These rules do not have an economic impact, and staff has worked to ensure that they are meeting statutory directives.

9. **Has the agency received any business competitiveness analyses of the rules?**

No, ASPB has not received any business competitive analysis of the rules.

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

ASPB proposed to review the rules with the Board to see if any rules needed to be amended on the previous report, however, since the previous report was submitted, ASPB has had a significant change in leadership and staff and an overhaul in agency processes. The agency has not updated rules, but is currently in discussions with the Governor's office to consider adjusting park fees and a possible cleanup of the rule package. The State Historic Preservation Office (SHPO) has also started discussing a clean-up of their rule package as well.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

Article 1 General Provisions	These rules benefit the public by ensuring the safety and protection of the resources and providing recreational, educational, and cultural areas for the enjoyment and education of Arizona residents. If the rules were not in place, there is an increased risk of costly occurrences that would impact the future enjoyment of the visitors and the pocketbooks of all Arizonans.
Article 2 Board Operations	The Agency concurs with previous submissions that the cost of the appointed Board is minimal. This cost is outweighed by the benefits of a public body appointed by the Governor to evaluate public input and provide guidance on agency decisions as to the best means of fulfilling the Agency's mission.
Article 3 SHPO Programs	This article benefits the public by providing a transparent process for administrative processes required of the SHPO by state and federal law for the Arizona Register of Historic Places, the National Register of Historic Places, and the State Historic Property Tax Program. These programs make a contribution to the benefits of historic rehabilitation.

12. Are the rules more stringent than corresponding federal laws?

No, the rules are not more stringent than corresponding federal laws.

13. For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:

The agency does not have rules adopted after July 29, 2010 subject to A.R.S. § 41-1037.

14. Proposed course of action

The authorization for rulemaking rests with the Arizona State Parks Board and there is a process for the Legislature to approve, disapprove, or modify the rules. ASPB staff is in the process of consulting with the Governor's office on possible fee updates and rule changes. Relating to the SHPO Programs rules, SHPO is identifying terminology that needs to be cleaned up and also cleaning up various terms in 12-8-301, 12-8-302, 12-8-303, and 12-8-304 that may improve clarity for potential state or federal historic register applicants. A final rule package can be sent to the GRRC Board by April 2026 taking into account Parks Board approvals and also working with the Attorney General for the Board on the rule package. This would also still give the Parks Board time to send a certified copy of the rule package to the Legislature for their approval while they are still in session pursuant to ARS § 41-511.05.

F.

CONSIDERATION, DISCUSSION, AND POSSIBLE ACTION ON A.R.S. § 41-1033(G) PETITION RELATED TO DEPARTMENT OF HEALTH SERVICES PRACTICES REGARDING ADULT BEHAVIORAL HEALTH THERAPEUTIC HOMES INSPECTIONS

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - PETITION

MEETING DATE: February 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 13, 2024

SUBJECT: **A.R.S. 41-1033(G) Petition - Department of Health Services**

Background

On October 30, 2024, Council staff received a petition from Spencer Scharff of Scharff, P.C. and Mayan Tahan of The Nelson Law Group on behalf of Devereux Advanced Behavioral Health Arizona (Petitioner) regarding the Department of Health Services (Department) practice of (1) requiring all inspections of Adult Behavioral Health Therapeutic Homes (ABHTH) to be unannounced; and the practice of (2) defining being away from home at the time of an unannounced inspection as a refusal to permit the inspection. *See* Petition at 1.

The Petitioner states it serves as the Collaborating Health Care Institution to ABHTH, pursuant to Department rule R9-10-1803. The Petitioner alleges the following:

> Since February of 2023, the Department has repeatedly conducted unannounced inspections of Devereux-affiliated homes. Thirteen of these inspections occurred when there was no one home to answer the door. In a number of instances, the homes were not assigned any residents and their administrators were not even in the country at the time of the inspection. In other instances, the administrator was not home because they were, consistent with their licensure, transporting their residents to an appointment. In each instance, the Department issued a Statement of Deficiency ("SOD") alleging that by not being home the ABHTH "refuses to permit" the inspection thereby running afoul of A.R.S. § 36-427(B) and creating reasonable cause to believe that the health or safety of one or more patients or the general public is in immediate danger and a license revocation is warranted.

See Petition at 2.

The Petitioner alleges these practices "are not specifically authorized by statute, exceed the Department's statutory authority, and are unduly burdensome" pursuant to A.R.S. § 41-1033(G).

The Petitioner argues, of the applicable statutes authorizing Department inspections, none explicitly authorize unannounced inspections. *Id.* at 3. Furthermore, the Petitioner argues that an explicit reference to unannounced inspections was, in fact, removed from a prior version of A.R.S. § 36-424 by the Legislature in 1989. *Id.* Moreover, the Petitioner argues the Legislature has authorized the Department to conduct unannounced annual inspections and other inspections in connection with certain other regulated facilities, but not ABHTH. *Id.* As such, the Petitioner argues the practice of requiring inspections of ABHTH to be unannounced, are not specifically authorized by statute, exceed the Department's statutory authority, and are unduly burdensome.

The Petitioner also alleges that the Department's practice of equating not being present with refusal to permit inspection under A.R.S. § 36-427(B) also exceeds the Department statutory authority. *Id.* at 5. Specifically, A.R.S. § 36-427(B) states, "[i]f the licensee…refuses to permit the department...the right to inspect the institution's premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists." The Petitioner argues that inspectors were not "refused" the right to inspect as that term is defined. The Petitioner alleges, "[b]y expanding the reach of A.R.S. § 36-427(B) to include absences from the premises and utilizing that unauthorized statutory expansion to warrant licensure revocations under A.R.S. § 36-427(A)(3), the Department has exceeded its statutory authority. *Id.*

Relevant Statutes

A.R.S. § 41-1033(G) allows a person to "petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern." On receipt of a properly submitted petition pursuant to this section, the council shall review the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement as prescribed by this section."

If the Council receives information pursuant to A.R.S. § 41-1033(G), and at least three Council members request of the Chairperson that the matter be heard in a public meeting:

1. Within ninety days after receipt of the third council member's request, the council shall determine whether the agency practice or substantive policy statement constitutes a rule.

2. Within ten days after receipt of the third council member's request, the council shall notify the agency that the matter has been or will be placed on an agenda.

3. Not later than thirty days after receiving notice from the council, the agency shall submit a statement not more than five double-spaced pages to the council that addresses whether the existing agency practice, substantive policy statement constitutes a rule.

See A.R.S. § 41-1033(H).

Analysis

It appears the Department's practice of unannounced inspections of ABHTH may not be specifically authorized by statute and may exceed the Department's statutory authority, especially given the legislative history provided by the Petitioner regarding A.R.S. § 36-424, which removed unannounced inspections from the section. Furthermore, A.R.S. § 36-427(B) applies only when a "licensee, the chief administrative officer or any other person in charge of the institution *refuses to permit* the department or its employees or agents the right to inspect the institution's premises as provided in section 36-424…." As indicated by the Petitioner, the statute does not define what constitutes refusal. Black's Law Dictionary defines "refusal" as "[t]he denial or rejection of something offered or demanded." The Department appears to interpret "refusal" to include absence from the facility. While inspectors may be unable to inspect the institution's premises if the licensee, chief administrative officer, or any other person in charge of the institution is away from the premises at the time of an unannounced inspection, it does not necessarily mean inspectors have been refused the right to inspect the premises, especially if there is a reasonable explanation for the absence.

Conclusion

In Council staff's view, the petition raises legitimate concerns about whether the Department's practices related to unannounced inspections of ABHTH are not specifically authorized by statute, exceed the agency's statutory authority, and are unduly burdensome. Therefore, Council staff recommends that this matter receive a hearing at a future Council meeting.

Re: *A.R.S. § 41-1033(G) Petition – Adult Behavioral Health Therapeutic Homes*

Governor's Regulatory Review Council:

Pursuant to A.R.S. § 41-1033(G), we write on behalf of Devereux Advanced Behavioral Health Arizona ("Devereux") to request a review of the following the Arizona Department of Health Services ("Department") practices and regulatory license requirements that are not specifically authorized by statute, exceed the Department's statutory authority, and are unduly burdensome: (1) the practice of requiring all inspections of Adult Behavioral Health Therapeutic Homes to be unannounced; and (2) the practice of defining being away from home at the time of an unannounced inspection as a refusal to permit the inspection.

Devereux is one of the nation's largest nonprofit organizations providing services, insight, and leadership in the field of behavioral health. Devereux has provided care in Arizona for 57 years and they serve more than 4,000 people with emotional, behavioral, and cogitative differences in our state each year. Devereux holds both Joint Commission Accreditation and Praesidium Accreditation and they pride themselves on maintaining compliance with the regulations that govern the operation of its programs. Devereux's services follow evidence-based practice treatment model, which integrates the latest scientific and medical advancements with time-tested philosophies and compassionate family engagement to provide practical, effective, and efficient care, making a meaningful difference in the lives of those they serve, and the world around them.

WWW.NELSONLAWSOLUTIONS.COM

Devereux serves as the Collaborating Health Care Institution, pursuant to A.C.C. R9-10-1803, to Adult Behavioral Health Therapeutic Homes ("ABHTH"). By definition, a ABHTH is a residential home in which the provider lives with up to three residents. Unlike nearly all other health care institutions, ABHTHs are not paid for the services they provide to their residents. Rather, they are *reimbursed* on a per diem basis for the costs incurred in connection with their residents—such as food, clothing, transportation, housing, utilities, entertainment. In fact, Devereux requires the homes it works with to be financially self-sufficient. In other words, ABHTHs need a source income outside of the ABHTH reimbursements.

The Department has a practice of requiring all inspections to be unannounced. *See* **Exhibit A** (4-7-23 Email from the Department to Devereux ("We do not schedule compliance inspections.")). Since February of 2023, the Department has repeatedly conducted unannounced inspections of Devereux-affiliated homes. Thirteen of these inspections occurred when there was no one home to answer the door. In a number of instances, the homes were not assigned any residents and their administrators were not even in the country at the time of the inspection. In other instances, the administrator was not home because they were, consistent with their licensure, transporting their residents to an appointment. In each instance, the Department issued a Statement of Deficiency ("SOD") alleging that by not being home the ABHTH "refuses to permit" the inspection thereby running afoul of A.R.S. § 36-427(B) and creating reasonable cause to believe that the health or safety of one or more patients or the general public is in immediate danger and a license revocation is warranted.

As detailed below, the Council should declare the agency practices unlawful and void.

1. The applicable statutes do not authorize unannounced inspections of ABHTHs and imposing this requirement is unduly burdensome.

The statutes that authorize inspections of ABHTHs are A.R.S. § 36-424(A) (a substantial compliance inspection), A.R.S. § 36-424(C) (a complaint inspection), A.R.S. § 36-425(A) (an initial inspection), and A.R.S. § 36-425(D) (an annual inspection). None of these statutes authorize *unannounced* inspections. Despite the lack of statutory authority, the Department has determined that while initial inspections under A.R.S. § 36-425(A) are announced, the other three types of inspections, which they refer to as compliance inspections, are unannounced. *See* **Exhibit A** (4-7-23 Email from the Department to Devereux ("We do not schedule compliance inspections.")).

A prior version of A.R.S. § 36-424 authorized certain unannounced inspections, but the Legislature repealed the authorizing provision in 1989. *See* Arizona Senate Bill 1355, 39th Leg., 1st Reg. Sess. (1989) (SB 1355).[1] The Legislature has authorized the Department to conduct unannounced annual inspections and other inspections in connection with certain other regulated facilities. *See, e.g.*, A.R.S. § 36-885(B) ("The department shall make at least one unannounced visit annually" to a child care facility); A.R.S. § 36-2806(H) ("The department shall make at least one unannounced visit annually to each nonprofit medical marijuana dispensary"); A.R.S. § 36-897.05(B) ("At least one unannounced visit shall be made annually" to a child care group home); A.R.S. § 36-463.02(A) ("Inspections may be unannounced and shall take place during regular working hours" of a clinical laboratory). Therefore, the Legislature knows how to authorize unannounced inspections but has chosen not to authorize such inspections under A.R.S. § 36-424 and A.R.S. § 36-425. *See CPEN v. Riffel*, 213 Ariz. 247, 249–50 (App. 2006) (holding that "when the legislature uses different language within a statutory scheme, it does so with the intent of

[1] Specifically, SB 1355 deleted Section E, which provided certain "unannounced inspections of nursing care institutions and residential care institutions . . . ."

ascribing different meanings and consequences to that language."). By requiring some of these inspections to be unannounced, the Department has exceeded its statutory authority.

ABHTHs provide a home environment for their residents. This includes taking residents to appointments, activities, and errands. During these times, meeting their obligations to residents necessitates the providers being away from home. In other circumstances, residents are in their licensed day programs and the providers are at work. Occasionally, there are no residents assigned to a home and the providers are away on vacation. The Department's policy of requiring unannounced inspections prevents ABHTHs from meeting the needs of their residents and themselves, and is simply not workable for this provider type. Therefore, by refusing to announce their inspections of these homes in contravention of the applicable statutes, the Department is creating an insurmountable burden on ABHTHs resulting in a loss of their licenses and therefore a loss of their residents' homes.

2. The Department's reliance upon A.R.S. § 36-427(B) to issue SODs is unlawful.

The "violations" alleged in the SODs are based entirely on A.R.S. § 36-427(B), which states that "[i]f the licensee… refuses to permit the department … the right to inspect the institution's premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists." Importantly, A.R.S. § 36-427 does not define a refusal to include being away from the premises nor does the statute authorize the Department to implement a rule or policy expanding the applicability of the statute to include such a circumstance. A.R.S. § 36-427(B) is clear and concise—it applies only to situations when a licensee makes an affirmative refusal to permit an inspection. *See Refusal*, BLACK'S LAW DICTIONARY (12th ed. 2024) ("The denial or rejection of something offered or demanded.").

By expanding the reach of A.R.S. § 36-427(B) to include absences from the premises and utilizing that unauthorized statutory expansion to warrant licensure revocations under A.R.S. § 36-427(A)(3), the Department has exceeded its statutory authority.

Cc: Yvette Jackson <YJACKSON@devereux.org>; Paul Davis <PDAVIS@devereux.org>
Subject: Re: Request to Meet

Good Afternoon,

Thank you for your email. The Department of Health Services does not license Adult Therapeutic Foster Care. We license and regulate Adult Behavioral Health Therapeutic Homes which is a health care institution outlined in Arizona Administrative Code, Title 9, Chapter 10, Article 1, (A.A.C. R9-10-102.A.23).

Arizona Revised Statutes 36-424, indicates that a health care institution must provide permission for and complete acquiescence in any entry or inspection of the premises, during the term of the license (A.R.S. 36-424.C)

Further, Arizona Revised Statutes 36-427 indicates that if the health care institution refuses to permit the Department or its employees the right to inspect, such action shall be deemed reasonable cause to believe that a substantial violation exists and allows the Department to revoke the license (A.R.S. 36-427.B)

It is the expectation that all licensed health care institutions permit the Department to inspect. If a provider is not available, the back-up provider must be available for the inspection. We do not schedule compliance inspections.

Please be advised that refusing to sign an enforcement agreement could result in a legal order being issued, up to and including a notice of intent to revoke. At that time, you would have appeal rights and the ability to request a hearing.

If you still want to meet on this matter, I have the following availability:

Monday, April 17, 2023 at 3 pm
Friday, April 21, 2023 at 11 am

36-424. Inspections; suspension or revocation of license; report to board of examiners of nursing care institution administrators and assisted living facility managers

A. Except as provided in subsection B of this section, the director shall inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant and the health care institution are in substantial compliance with the requirements of this chapter and the rules established pursuant to this chapter. The director may prescribe rules regarding department background investigations into an applicant's character and qualifications.

B. The director may accept proof that a health care institution is an accredited hospital or is an accredited health care institution in lieu of all compliance inspections required by this chapter if the director receives a copy of the health care institution's accreditation report for the licensure period and the health care institution is accredited by an independent, nonprofit accrediting organization approved by the secretary of the United States department of health and human services. If the health care institution's accreditation report is not valid for the entire licensure period, the department may conduct a compliance inspection of the health care institution during the time period the department does not have a valid accreditation report for the health care institution. For the purposes of this subsection, each licensed premises of a health care institution must have its own accreditation report. The director may not accept an accreditation report in lieu of a compliance inspection of:

1. An intermediate care facility for individuals with intellectual disabilities.

2. A nursing-supported group home.

3. A health care institution if the health care institution has been subject to an enforcement action pursuant to section 36-427 or 36-431.01 within the year preceding the annual licensing fee anniversary date.

C. On a determination by the director that there is reasonable cause to believe a health care institution is not adhering to the licensing requirements of this chapter, the director and any duly designated employee or agent of the director, including county health representatives and county or municipal fire inspectors, consistent with standard medical practices, may enter on and into the premises of any health care institution that is licensed or required to be licensed pursuant to this chapter at any reasonable time for the purpose of determining the state of compliance with this chapter, the rules adopted pursuant to this chapter and local fire ordinances or rules. Any application for licensure under this chapter constitutes permission for and complete acquiescence in any entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. If an inspection reveals that the health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director may take action authorized by this chapter. Any health care institution, including an accredited hospital, whose license has been suspended or revoked in accordance with this section is subject to inspection on application for relicensure or reinstatement of license.

D. The director shall immediately report to the board of examiners of nursing care institution administrators and assisted living facility managers information identifying that a nursing care institution administrator's conduct may be grounds for disciplinary action pursuant to section 36-446.07.

Text

Be it enacted by the Legislature of the State of Arizona:

Section 1. *Section 36-401, Arizona Revised Statutes*, is amended to read:

36-401. Definitions

[D> A. **<D]** In this chapter, unless the context otherwise requires:

1. "Accredited hospital" means a hospital currently accredited by a nationally recognized commission on hospital accreditation.

2. "Adaptive services" means medical services provided on an outpatient basis.

3. "Adult day health care facility" means a facility providing adult day health services during a portion of a continuous twenty-four hour period for compensation on a regular basis for five or more adults not related to the proprietor.

4. "Adult day health services" means a program that provides planned care supervision and activities, personal care, personal living skills training, meals and health monitoring in a group setting during a portion of a continuous twenty-four hour period. Adult day health services may also include preventive, therapeutic and restorative health related services that do not include behavioral health services.

5. "Adult foster care" means a residential setting which provides room and board, personal care, transportation, respite, habilitation and supervision for one to four adults in a family environment who are eligible for participation in the Arizona long-term care system pursuant to chapter 29, article 2 of this title.

6. "Ambulatory person" means any individual, including one who uses a cane or other ambulatory support device, who is physically and mentally capable under emergency conditions of finding a way to safety without assistance.

[D> 7. "Authorized local agency" means either: **<D]**

[D> (a) A local health planning agency which is a public regional planning body with a governing board composed of a majority of elected officials of units of general local government who represents consumers of health care, which appoints a governing care body recognized by the department of health services. **<D]**

[D> (b) A nonprofit private corporation or single unit of general local government if such agency has been established in a geographic region determined to reflect unusual or highly unusual circumstances as provided in section 1511 of the federal public health service act. **<D]**

[D> 8. **<D]** 7. "Capital expenditure" means the acquisition by lease or purchase of a capital asset in the nature of buildings, fixtures or durable equipment.

[D> 9. **<D]** 8. "Construction" means the building, erection, fabrication, or installation of a health care institution or facilities therefor.

[D> 10. **<D]** 9. "Continuous" means available at all times without cessation, break or interruption.

[D> 11. **<D]** 10. "Department" means the department of health services.

[D> 12. **<D]** 11. "Direction" means authoritative policy or procedural guidance for the accomplishment of a function or activity.

[D> 13. **<D]** 12. "Director" means the director of the department of health services.

[D> 14. "Emergency need" means a condition which presents an immediate threat to the public health, safety or welfare of the patients who would be served and makes it impracticable, unnecessary or contrary to the public interest to conduct the regular certificate of need application review process. **<D]**

[D> 15. **<D]** 13. "Facilities" means buildings or capital equipment used by a health care institution for providing any of the types of services as defined in this chapter.

[D> 16. **<D]** 14. "Governing authority" means the individual, agency, group or corporation, appointed, elected or otherwise designated, in which the ultimate responsibility and authority for the conduct of the health care institution is vested.

[D> 17. **<D]** 15. "Habilitation" means the provision of physical therapy, occupational therapy, speech or audiology services or training in independent living, special developmental skills, sensory-motor development, behavior intervention, orientation and mobility.

[D> 18. **<D]** 16. "Health care institution" means every place, institution, building or agency, whether organized for profit or not, which provides facilities with medical services, nursing services, health screening services, other health-related services or supervisory care services and includes home health agencies as defined in *section 36-151* and hospice service agencies.

[D> 19. **<D]** 17. "Health-related services" means services, other than medical, pertaining to general supervision, protective, preventive and personal care services or supervisory care services.

[D> 20. **<D]** 18. "Health screening services" means the acquisition, analysis and delivery of health-related data of individuals to aid in the determination of the need for medical services.

[D> 21. **<D]** 19. "Hospice" means a hospice service agency or the provision of hospice services in an inpatient facility.

[D> 22. **<D]** 20. "Hospice service" means a program of palliative and supportive care for terminally ill persons and their families or caregivers.

[D> 23. **<D]** 21. "Hospice service agency" means an agency or organization, or a subdivision of that agency or organization, which is engaged in providing hospice services at the place of residence of its clients.

[D> 24. **<D]** 22. "Inpatient beds" or "resident beds" means accommodations with supporting services, such as food, laundry and housekeeping, for patients or residents who generally stay in excess of twenty-four hours.

[D> 25. **<D]** 23. "Medical services" means the services pertaining to medical care that are performed at the direction of a physician on behalf of patients by physicians, dentists, nurses and other professional and technical personnel.

[D> 26. **<D]** 24. "Modification" means the substantial improvement, enlargement, reduction, moving or alteration of, addition to, or other change in a health care institution or its facilities or in the services provided by such an institution.

[D> 27. **<D]** 25. "Nonproprietary institution" means any health care institution organized and operated exclusively for charitable purposes, no part of the net earnings of which inures to the benefit of any private shareholder or individual, or operated by the state or any political subdivision of the state.

[D> 28. **<D]** 26. "Nursing care institution" means a health care institution providing inpatient beds or resident beds and nursing services to persons who need nursing services on a continuing basis but who do not require hospital care or direct daily care from a physician.

[D> 29. **<D]** 27. "Nursing services" means those services pertaining to the curative, restorative and preventive aspects of nursing care that are performed at the direction of a physician by or under the supervision of a registered nurse licensed in this state.

[D> 30. **<D]** 28. "Organized medical staff" means a formal organization of physicians, and dentists where appropriate, with the delegated authority and responsibility to maintain proper standards of medical care and to plan for continued betterment of that care.

[D> 31. **<D]** 29. "Outpatient surgical center" means a type of health care institution with facilities and limited hospital services for the diagnosis or treatment of patients by surgery whose recovery, in the concurring opinions of the surgeon and the anesthesiologist, does not require inpatient care.

[D> 32. **<D]** 30. "Personal care services" means assistance with eating, bathing and dressing for individuals who are in need of a protective environment.

[D> 33. **<D]** 31. "Physician" means any person licensed under the provisions of title 32, chapter 13 or 17.

[D> 34. **<D]** 32. "Residential care institution" means a health care institution other than a hospital or a nursing care institution which provides resident beds and health-related services for persons who do not need inpatient nursing care.

[D> 35. **<D]** 33. "Respite care services" means services provided by a licensed health care institution to persons otherwise cared for in foster homes and in private homes to provide an interval of rest or relief of not more than thirty days to operators of foster homes or to family members.

[D> 36. "State plan" means the plan for construction and modernization of health care institutions formulated by the department as a part of the state comprehensive health plan. **<D]**

[D> 37. **<D]** 34. "Supervision" means direct overseeing and inspection of the act of accomplishing a function or activity.

[D> 38. **<D]** 35. "Supervisory care home" means a residential care institution which **[D>** provides only supervisory care services to more than **<D] [A>** HAS **<A]** five **[A>** OR MORE **<A]** ambulatory persons **[A>** WHO REQUIRE SUPERVISORY CARE SERVICES AND WHO ARE **<A]** unrelated to the administrator or owner of such home.

[D> 39. **<D]** 36. "Supervisory care services" means accommodation, board and general supervision, including assistance to persons in the self-administration of prescribed medications.

[D> B. Where there is no authorized local agency as defined in subsection A the state health planning advisory council shall serve as the authorized local agency. **<D]**

Sec. 2. *Section 36-405, Arizona Revised Statutes*, is amended to read:

36-405. Powers and duties of the director

A. The director shall adopt**[D>** , repeal and amend reasonable **<D]** rules **[D>** and regulations **<D]** which shall establish minimum standards and requirements for the construction, modification and licensure of health care institutions necessary to assure the public health, safety and welfare. The standards and requirements shall relate to the construction, equipment, sanitation, staffing for medical, nursing and personal care services, and record keeping pertaining to the administration of medical, nursing and personal care services, in accordance with generally accepted practices of health care. The director shall use the current standards adopted by the joint commission on accreditation of hospitals and the commission on accreditation of the American osteopathic association, as guidelines in prescribing minimum standards and requirements under this section.

[D> B. The director shall, by regulation, establish a health care institution classification for nursing care institutions, with subclassifications including, but not limited to, skilled nursing facilities, intermediate care facilities and personal care facilities. Such regulations shall provide for the number, type and scope of nursing services, other supportive services and standards of patient care required for each subclass of institution. **<D]**

[D> C. **<D]** B. The director may, by **[D>** regulation **<D] [A>** RULE, **<A]** classify and subclassify **[D>** other **<D]** health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care and standard of patient care required for the purposes of licensure. Classes of health care institutions may include but not be limited to hospitals, infirmaries, outpatient treatment centers, health screening services centers and residential care facilities. Whenever the director reasonably deems distinctions in **[D>** regulations **<D] [A>** RULES **<A]** and standards to be appropriate among different classes or subclasses of health care institutions the director may make such distinctions.

C. **[A>** THE DIRECTOR SHALL ESTABLISH AND COLLECT THE FOLLOWING FEES FOR HEALTH CARE INSTITUTIONS: **<A]**

1. **[A>** NONREFUNDABLE FEES NOT TO EXCEED THE FOLLOWING AMOUNTS: **<A]**

(a) **[A>** FOR A PERMIT, TWENTY-FIVE DOLLARS. **<A]**

(b) **[A>** FOR AN APPLICATION, FIFTY DOLLARS. **<A]**

2. **[A>** ARCHITECTURAL DRAWING REVIEW FEES NOT TO EXCEED THE FOLLOWING AMOUNTS: **<A]**

(a) **[A>** FOR A PROJECT WITH A COST UNDER ONE HUNDRED THOUSAND DOLLARS, FIFTY DOLLARS. **<A]**

(b) **[A>** FOR A PROJECT WITH A COST OF MORE THAN ONE HUNDRED THOUSAND DOLLARS AND LESS THAN FIVE HUNDRED THOUSAND DOLLARS, ONE HUNDRED DOLLARS. **<A]**

(c) **[A>** FOR A PROJECT WITH A COST OF FIVE HUNDRED THOUSAND DOLLARS OR MORE, ONE HUNDRED FIFTY DOLLARS. **<A]**

3. **[A>** LICENSE FEES, WHICH MUST BE PAID ANNUALLY, NOT TO EXCEED THE FOLLOWING AMOUNTS: **<A]**

(a) **[A>** FOR A FACILITY WITH NO BEDS, ONE HUNDRED DOLLARS. **<A]**

(b) **[A>** FOR A FACILITY WITH ONE TO FIFTY-NINE BEDS, ONE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**

(c) **[A>** FOR A FACILITY WITH SIXTY TO NINETY-NINE BEDS, TWO HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**

(d) **[A>** FOR A FACILITY WITH ONE HUNDRED TO ONE HUNDRED FORTY-NINE BEDS, THREE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**

(e) **[A>** FOR A FACILITY WITH ONE HUNDRED FIFTY BEDS OR MORE, FIVE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**

Sec. 3. Repeal

Sections 36-421.01 and 36-447.18, Arizona Revised Statutes, are repealed.

Sec. 4. Section 36-421.02, Arizona Revised Statutes, is amended to read:

36-421.02. Outpatient behavioral health service agencies; licensure; exception

A. If an outpatient behavioral health service agency is licensed pursuant to this chapter, the department shall not license such agency's outpatient behavioral health service facilities as defined by *section 36-401***[D>** , subsection A **<D]**.

B. This section does not apply to residential or day treatment facilities provided for in *section 36-550.05*.

Sec. 5. *Section 36-422, Arizona Revised Statutes*, is amended to read:

36-422. Application for license

A. Any person who desires to obtain a license under this chapter for operation of a health care institution shall file with the department an application on a form prescribed, prepared and furnished by the department. The application shall contain the following:

1. The name and location of the health care institution.

2. Whether it is to be operated as a proprietary or nonproprietary institution.

3. The name of the governing authority, and, if other than an individual, the names of the persons having its control. The applicant shall be the governing authority having the operative ownership of, or the governmental agency charged with the administration of, the health care institution sought to be licensed.

4. The class or subclass of health care institution to be established or operated.

5. The types and extent of the health care services to be provided, including emergency services, community health services and services to indigent patients.

6. The name and qualifications of the chief administrative officer implementing direction in that specific health care institution.

7. **[D>** Such **<D]** Other pertinent information as may be required by the department for the proper administration of this chapter and department **[D>** regulations **<D] [A>** RULES. **<A]**

8. For any health care institution newly constructed, or modified since it was last licensed, a copy of the appropriate permit issued pursuant to *section 36-421*.

B. The application shall be signed, in the case of an individual by the owner of the health care institution, or in the case of a partnership or a corporation, by two of the officers thereof, or in the case of a governmental unit, by the head of the governmental department having jurisdiction thereof.

C. Application for licensure or relicensure shall be filed at least **[D>** thirty **<D] [A>** SIXTY **<A]** but not more than **[D>** sixty **<D] [A>** ONE HUNDRED TWENTY **<A]** days prior to anticipated operation or the expiration date of the then current license. Where the operation of any licensed health care institution is intended to be terminated, or where a change of ownership will occur, either during or at the expiration of the term of its license, the department shall be notified at least thirty days in advance.

D. **[A>** IN ADDITION TO THE REQUIREMENTS OF THIS CHAPTER, THE DEPARTMENT MAY PRESCRIBE BY RULE OTHER LICENSURE REQUIREMENTS AND MAY PRESCRIBE PROCEDURES FOR CONDUCTING INVESTIGATIONS INTO AN APPLICANT'S CHARACTER AND QUALIFICATIONS. **<A]**

Sec. 6. *Section 36-424, Arizona Revised Statutes*, is amended to read:

36-424. Inspections; suspension or revocation of license; report to board of examiners of nursing care institution administrators

A. Every applicant for licensure as a health care institution shall submit to the director a properly completed application for a license accompanied by the necessary fee.

B. Subject to the limitation prescribed by subsection C of this section, the department shall inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant is in compliance with the requirements of this chapter and the rules established pursuant to this chapter. **[A>** THE DEPARTMENT MAY PRESCRIBE RULES REGARDING DEPARTMENT BACKGROUND INVESTIGATIONS INTO AN APPLICANT'S CHARACTER AND QUALIFICATIONS. **<A]**

C. The director shall accept proof that a health care institution is an accredited hospital in lieu of all licensing inspections required by this chapter if the department receives a copy of the institution's accreditation report.

D. Upon a determination by the director that there is reasonable cause to believe a health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director and any duly designated employee or agent thereof, including county health representatives and county or municipal fire inspectors, shall, consistent with standard medical practices, have the right to enter upon and into the premises of any health care

institution which is licensed, or required to be licensed, pursuant to this chapter at any reasonable time for the purpose of determining the state of compliance with the provisions of this chapter, the rules of the department adopted pursuant thereto, and local fire ordinances or rules. Any application for licensure under this chapter shall constitute permission for and complete acquiescence in any such entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. If an inspection reveals that the health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director may in accordance with *section 36-427* suspend or revoke the license of the institution or condition licensure upon corrective action by the health care institution to meet the licensing requirements. Any health care institution, including an accredited hospital, whose license has been suspended or revoked in accordance with this section, is subject to inspection upon application for relicensure or reinstatement of license.

[D> E. The department shall contract with authorized local agencies applying for such contracts to permit the authorized local agencies or their advisory committees to conduct unannounced inspections of nursing care institutions and residential care institutions which are located in the planning areas of the authorized local agencies. The inspections shall be conducted, in addition to the inspections performed by the department pursuant to this chapter, to evaluate the quality of care provided at nursing care institutions and residential care institutions. An authorized local agency may use its own employees or may use volunteers to conduct the inspections. Upon completion of an inspection the authorized local agency shall notify the department of its findings and may report its findings at a public hearing conducted by the agency in accordance with title 41, chapter 6. **<D]**

[D> F. **<D]** E. The directors shall immediately report to the board of examiners of nursing care institution administrators information identifying that a nursing care institution administrator's conduct may be grounds for disciplinary action as defined pursuant to *section 36-446.07*.

Sec. 7. *Section 36-425, Arizona Revised Statutes*, is amended to read:

36-425. Issuance of license; provisional license; denial of license

A. Upon receipt of a properly completed application and upon finding that the applicant and the health care institution for which the license is sought meet all the requirements of this chapter and the regulations of the department for licensure within one of the classes or subclasses of health care institutions, the director shall issue to the applicant a license. Otherwise he shall deny it.

B. The license shall show the name of the chief administrative officer of that specific health care institution and, except for home health agencies as defined by *section 36-151* and nursing care institutions, is valid for one year from the date of issuance. The license shall be conspicuously posted in the reception area of the licensed health care institution.

C. When an inspection or investigation of an applicant or a health care institution reveals a deficiency or deficiencies of a minor nature or of a hazardous but readily correctable nature, and the director has cause to believe that the immediate interests of the patients and of the general public would be served best by affording the institution the opportunity to correct such deficiency or deficiencies, the department shall issue a provisional license for a period of time not to exceed one year, if the applicant agrees to carry out a plan acceptable to the department to eliminate the deficiency or deficiencies within the term of the provisional license. A health care institution shall be relicensed after the expiration of its provisional license only if the licensee has fully corrected all conditions constituting failure to comply with requirements for licensure.

D. A health care institution shall have its license amended immediately at any time there is written notification of a change of the chief administrative officer specified in *section 36-422*, subsection A, paragraph 6.

E. When the department issues an original regular license or an original provisional license to a health care institution it shall notify the owners and lessees of any agricultural land within one-fourth mile of the health care institution.

F. **[A>** THE DIRECTOR MAY PRESCRIBE BY RULE GROUNDS ON WHICH THE DEPARTMENT MAY DENY A LICENSE. THESE GROUNDS MAY INCLUDE A FINDING THAT THE APPLICANT AND ANYONE IN A BUSINESS RELATIONSHIP WITH THE APPLICANT, INCLUDING STOCKHOLDERS, HAS HAD A LICENSE TO OPERATE A HEALTH CARE INSTITUTION REVOKED OR SUSPENDED OR HAS A LICENSING HISTORY INDICATING RECENT SERIOUS VIOLATIONS WHICH WERE A THREAT TO THE HEALTH AND SAFETY OF THE PERSONS UTILIZING THE HEALTH CARE INSTITUTION. **<A]**

Sec. 8. *Section 36-427, Arizona Revised Statutes*, is amended to read:

36-427. Suspension or revocation

A. The director may, pursuant to title 41, chapter 6, suspend or revoke the license of any health care institution if its owners, officers, agents or employees:

1. Violate any provision of this chapter or the rules of the department adopted pursuant to this chapter.

2. Knowingly aid, permit or abet the commission of any crime involving medical and health related services.

3. Have been, are or may continue to be in substantial violation of the requirements for licensure of the institution, as a result of which the health or safety of one or more patients or the general public is in immediate danger. If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department, its employees or agents the right to inspect its premises as provided in *section 36-424*, such action shall be deemed reasonable cause to believe that a substantial violation exists.

B. The director may, if he reasonably believes that a violation of subsection A, paragraph 3 of this section has occurred and that life or safety of patients will be immediately affected, upon written notice to the licensee, order the immediate restriction of admissions, **[A>** SELECTED TRANSFER OF PATIENTS OUT OF THE FACILITY, REDUCTION OF CAPACITY **<A]** and termination of specific services, procedures, practices or facilities.

Sec. 9. *Section 36-428, Arizona Revised Statutes*, is amended to read:

36-428. Hearings by the director

A. No license shall be suspended or revoked without affording the licensee notice and opportunity for a hearing as provided for in title 41, chapter 6.

B. Any person whose application for a permit or license has been denied by the director or who has been ordered by the director to restrict admissions, **[A>** TRANSFER SELECTED PATIENTS OUT OF THE FACILITY, REDUCE CAPACITY **<A]** and terminate specific services, procedures, practices or facilities may, at any time within thirty days after notice of **[D>** such **<D] [A>** THE **<A]** denial or order, request in writing a hearing before the director, to be held within thirty days following **[D>** such **<D] [A>** THE **<A]** written request**[D>** , **<D]** for the purpose of reviewing the action of the director.

C. All hearings shall be in accordance with title 41, chapter 6.

Sec. 10. *Section 36-431, Arizona Revised Statutes*, is amended to read:

36-431. Violation; classification

A. A person is guilty of a **[D>** petty offense **<D] [A>** CLASS 3 MISDEMEANOR **<A]** who:

1. Establishes, operates or maintains any class or subclass of health care institution, as defined in this chapter, unless the person holds a current and valid license for such class or subclass from the department.

2. Knowingly violates any provision of this chapter unless another classification is specifically prescribed in this chapter.

B. Each day that a violation continues shall constitute a separate violation.

Sec. 11. *Section 36-435, Arizona Revised Statutes*, is amended to read:

36-435. Staff privileges for podiatrists

A. The governing board of each health care institution classified by the director as a hospital pursuant to *section 36-405*, subsection **[D>** C **<D]** B shall provide for the use of the health care institution by, and staff privileges for, duly licensed podiatrists subject to nondiscriminatory rules and regulations governing the use or privileges established by the governing board and medical staff for persons licensed under title 32, **[D>** chapters **<D] [A>** CHAPTER 7, 13 **<A] [D>** and **<D] [A>** OR 17. **<A]**

B. This article does not prohibit any health care institution which is a teaching facility owned or operated by a university operating a school of medicine from requiring that any podiatrist have a faculty teaching appointment as a condition for eligibility for staff privileges at the health care institution.

Sec. 12. *Section 36-436, Arizona Revised Statutes*, is amended to read:

36-436. Filing and review of rates, rules and regulations as prerequisite to operation; findings

A. A new hospital or nursing care institution shall not engage in business within this state until its schedule on rates and charges and rules **[D>** and regulations **<D]** pertaining thereto are filed with and reviewed by the director. The schedules of rates and charges shall be in the form and contain such information as prescribed by the director.

B. The director shall adopt or establish reasonable guidelines for review of rates and charges for hospital or nursing care institutions. Those health care institutions which are classified by the director as hospitals pursuant to *section 36-405*, subsection **[D>** C **<D]** B shall use the current edition of the statement on the financial requirements of health care institutions and services, as adopted by the American hospital association, or amended editions thereof if applicable, as a guide for establishing hospital rates and charges. The director shall use, but not be limited to, the statement on the financial requirements of health care institutions and services, as adopted by the American hospital association, as a guide for review of hospital rates and charges.

C. Promptly after the filing of such schedule, the director shall review such schedule and make public his findings. Such findings shall include information on:

1. How the rates and charges relate to the operating income and expenses of the institution.

2. The source and application of funds available to the institution.

Sec. 13. Section 36-447.05, Arizona Revised Statutes, is amended to read:

36-447.05. Delivery of basic medical services at nursing care institutions; restrictions

A. Basic health services shall be provided at a nursing care institution only under the general direction of an attending physician. The administrator shall establish procedures which shall be posted in a place readily accessible to all charge nurses for obtaining medical care when the attending physician is not available and shall arrange for such emergency medical services.

B. The administrator shall require a complete medical history prior to admission and shall also require, within thirty days before or after admission and annually thereafter, a physical examination of each person admitted to a nursing care institution.

C. A person who demonstrates clinical evidence or X-ray evidence of current pulmonary tuberculosis disease shall not be admitted to a nursing care institution.

D. All medications, medical treatment and telephone orders by the physician for laboratory tests and X-rays prescribed by a physician for a patient admitted to a nursing care institution shall be administered by licensed staff only on orders of a physician. Telephone orders from a physician for the administration of medication by licensed medical staff shall be countersigned by the physician and mailed within ten days of the telephone order. **[A>** TELEPHONE ORDERS FOR MEDICATIONS USED AS CHEMICAL RESTRAINTS, INCLUDING ALL CONTROLLED MEDICATIONS USED AS CHEMICAL RESTRAINTS, SHALL BE COUNTERSIGNED BY THE PHYSICIAN WITHIN SEVENTY-TWO HOURS OF THE TELEPHONE ORDER. THE NURSING CARE INSTITUTION SHALL NOT BE CHARGED WITH DEFICIENCIES BY THE DIRECTOR PURSUANT TO *SECTION 36-425*, SUBSECTION C, IF TELEPHONE ORDERS FOR MEDICATION OR THE ADMINISTRATION OF MEDICATION ARE MAILED TO THE PHYSICIAN FOR COUNTERSIGNATURE BY THE NURSING CARE INSTITUTION WITHIN SEVENTY-TWO HOURS OF THE TELEPHONE ORDER. THE NURSING CARE INSTITUTION SHALL MAINTAIN A RECORD OF THE TELEPHONE ORDERS MAILED TO PHYSICIANS FOR COUNTERSIGNATURE. THE RECORD SHALL BE AVAILABLE TO THE DIRECTOR FOR INSPECTION. **<A]**

E. Each nursing care institution shall report changes in the medical condition of a patient to the patient's attending physician.

F. Each nursing care institution:

1. Is subject to periodic inspection by department personnel.

2. Shall make available all information and records required to be maintained by the nursing care institution and shall provide necessary assistance and cooperation to department personnel in the inspection of the nursing care institution as required by this chapter.

History

Approved by the Governor June 21, 1989

Filed in the Office of the Secretary of State June 21, 1989

ARIZONA ADVANCE LEGISLATIVE SERVICE

36-427. Suspension or revocation; intermediate sanctions

A. The director, pursuant to title 41, chapter 6, article 10, may suspend or revoke, in whole or in part, the license of any health care institution if its owners, officers, agents or employees:

1. Violate this chapter or the rules of the department adopted pursuant to this chapter.

2. Knowingly aid, permit or abet the commission of any crime involving medical and health-related services.

3. Have been, are or may continue to be in substantial violation of the requirements for licensure of the institution, as a result of which the health or safety of one or more patients or the general public is in immediate danger.

4. Fail to comply with section 36-2901.08.

5. Violate section 36-2302.

B. If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department or its employees or agents the right to inspect the institution's premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists.

C. If the director reasonably believes that a violation of subsection A, paragraph 3 of this section has occurred and that life or safety of patients will be immediately affected, the director, on written notice to the licensee, may order the immediate restriction of admissions or readmissions, selected transfer of patients out of the facility, reduction of capacity and termination of specific services, procedures, practices or facilities.

D. The director may rescind, in whole or in part, sanctions imposed pursuant to this section on correction of the violation or violations for which the sanctions were imposed.

41-1033. Petition for a rule or review of an agency practice, substantive policy statement, final rule or unduly burdensome licensing requirement; notice

A. Any person may petition an agency to do either of the following:

1. Make, amend or repeal a final rule.

2. Review an existing agency practice or substantive policy statement that the petitioner alleges to constitute a rule.

B. An agency shall prescribe the form of the petition and the procedures for the petition's submission, consideration and disposition. The person shall state on the petition the rulemaking to review or the agency practice or substantive policy statement to consider revising, repealing or making into a rule.

C. Not later than sixty days after submission of the petition, the agency shall either:

1. Reject the petition and state its reasons in writing for rejection to the petitioner.

2. Initiate rulemaking proceedings in accordance with this chapter.

3. If otherwise lawful, make a rule.

D. The agency's response to the petition is open to public inspection.

E. If an agency rejects a petition pursuant to subsection C of this section, the petitioner has thirty days to appeal to the council to review whether the existing agency practice or substantive policy statement constitutes a rule. The petitioner's appeal may not be more than five double-spaced pages.

F. A person may petition the council to request a review of a final rule based on the person's belief that the final rule does not meet the requirements prescribed in section 41-1030. A petition submitted under this subsection may not be more than five double-spaced pages.

G. A person may petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern. On receipt of a properly submitted petition pursuant to this section, the council shall review the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement as prescribed by this section. A petition submitted under this subsection may not be more than five double-spaced pages. This subsection does not apply to an individual or institution that is subject to title 36, chapter 4, article 10 or chapter 20.

H. If the council receives information that alleges an existing agency practice or substantive policy statement may constitute a rule, that a final rule does not meet the requirements prescribed in section 41-1030 or that an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or does not meet the guidelines prescribed in subsection G of this section, or if the council receives an appeal under subsection E of this section, and at least three council members request of the chairperson that the matter be heard in a public meeting:

1. Within ninety days after receiving the third council member's request, the council shall determine whether any of the following applies:

(a) The agency practice or substantive policy statement constitutes a rule.

(b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

2. Within ten days after receiving the third council member's request, the council shall notify the agency that the matter has been or will be placed on the council's agenda for consideration on the merits.

3. Not later than thirty days after receiving notice from the council, the agency shall submit a statement of not more than five double-spaced pages to the council that addresses whether any of the following applies:

(a) The existing agency practice or substantive policy statement constitutes a rule.

(b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

I. At the hearing, the council shall allocate the petitioner and the agency an equal amount of time for oral comments not including any time spent answering questions raised by council members. The council may also allocate time for members of the public who have an interest in the issue to provide oral comments.

J. For the purposes of subsection H of this section, the council meeting shall not be scheduled until the expiration of the agency response period prescribed in subsection H, paragraph 3 of this section.

K. An agency practice, substantive policy statement, final rule or regulatory licensing requirement considered by the council pursuant to this section shall remain in effect while under consideration of the council. If the council determines that the agency practice, substantive policy statement or regulatory licensing requirement exceeds the agency's statutory authority, is not authorized by statute or constitutes a rule or that the final rule does not meet the requirements prescribed in section 41-1030, the practice, policy statement, rule or regulatory licensing requirement shall be void. If the council determines that the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern, the council shall modify, revise or declare void any such existing agency practice, substantive policy statement, final rule or regulatory licensing requirement. If an agency decides to further pursue a practice, substantive policy statement or regulatory licensing requirement that has been declared void or has been modified or revised by the council, the agency may do so only pursuant to a new rulemaking.

L. A council decision pursuant to this section shall be made by a majority of the council members who are present and voting on the issue. Notwithstanding any other law, the council may not base any decision concerning an agency's compliance with the requirements of section 41-1030 in issuing a final rule or substantive policy statement on whether any party or person commented on the rulemaking or substantive policy statement.

M. A decision by the council pursuant to this section is not subject to judicial review, except that, in addition to the procedure prescribed in this section or in lieu of the procedure prescribed in this section, a person may seek declaratory relief pursuant to section 41-1034.

N. Each agency and the secretary of state shall post prominently on their websites notice of an individual's right to petition the council for review pursuant to this section.

G.

CONSIDERATION, DISCUSSION, AND POSSIBLE ACTION ON APPEAL/PETITION OF CORPORATION COMMISSION SUBSTANTIVE POLICY STATEMENT 3 OF DECISION 79140 PURSUANT TO A.R.S. § 41-1033(E) & (G)

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM

MEETING DATE: March 4, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: February 18, 2025

SUBJECT: **A.R.S. 41-1033(G) Petition Related to Arizona Corporation Commision Agency Practice and Substantive Policy Statement**

Summary

On November 8, 2024, Council staff received a petition ("Petition") from Underground Arizona Director Daniel Dempsey ("Petitioner") challenging the Arizona Corporation Commission ("Commission") substantive policy statement 3 of Decision 79140. The Petitioner is asking the Council to consider their petition under both A.R.S. § 41-1033(E) and A.R.S. § 41-1033(G).

For A.R.S. § 41-1033(E) the petitioner is alleging that a Commission Policy Statement concerning underground transmission lines is actually a rule.

For A.R.S. § 41-1033(G), the petitioner is alleging that the same Commission Policy Statement exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern. The related actions may constitute an agency practice that is not authorized by statute.

While the Council does not have authority to review Commission rulemaking per A.R.S. § 41-1057, which states that the corporation commission is exempt from Title 41, Chapter 6, Article 5. Article 5 only deals with rulemakings and agency reports, not with the Council's authority to hear a petition under A.R.S. §41-1033. This is further supported by the Commission advising the Petitioner of the ability to appeal to the Council.

Background

On February 20, 2023 Tucson Electric Power and other utilities requested that the Commision issue a police statement concerning transmission lines because the Commision has previously stated that the costs of undergrounding transmission lines should not be passed on to the ratepayer.

On September 18, 2023, one of the commissioners filed the following amendment to the Commission's Proposed Order from September 1, 2023.

> 3. The Commission does not have jurisdiction over the undergrounding of electric transmission lines. A.R.S. § 40-360(10). Installing electric transmission lines underground is much more expensive than building them above ground. Underground transmission lines also can be more costly and challenging to maintain and repair. As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates. Third parties, including cities, customers and neighborhood groups, seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. § 48-620 et. seq."

On October 4, 2023 the Proposed Order with the above mentioned amendment was adopted by the Commision in a 4 to 1 vote. This amendment is the Policy Statement that has prompted the Petitioner to request Council review.

In May 2024, Tucson Electric filed a Certificate of Environmental Compatibility with the Line Sitting Committee. In this Certificate, Tucson Electric cited to the policy statement stating " Consistent with the Commission's Policy Statement…. requiring undergrounding would render the Project unreasonably restrictive and not feasible."

The Commision approved Tucson Electric's application for the Certificate in September 2024, and included the following finding of fact "However, given the Commission's Policy Statement found in Decision No. 79140 (October 4, 2023), the Committee finds pursuant to A.R.S. 40-360.06(D) that any local ordinance or plan that requires TEP to incur an incremental cost to construct the Project below ground 'is unreasonably restrictive and compliance therewith is not feasible in view of technology available."

A.R.S. § 40-360.06(D) says in part "Any certificate granted by the committee shall be conditioned on compliance by the applicant with all applicable ordinances, master plans and regulations of the state, a county or an incorporated city or town, except that the committee may grant a certificate notwithstanding any such ordinance, master plan or regulation, exclusive of franchises, if the committee finds as a fact that compliance with such ordinance, master plan or

regulation is unreasonably restrictive and compliance therewith is not feasible in view of technology available…."

On September 3, 2024 Petitioner filed a petition for Commission review under A.R.S. § 41-1033(A). The Petitioner stated that the Policy Statement identified above should be treated as a rule, along with not being specifically authorized by statute, exceeding statutory authority, and is unduly burdensome.

On October 31, 2024 the Commission provided a written rejection to the Petitioner with the Commission alerting the Petitioner of their ability to appeal to the council pursuant to A.R.S. § 41-1033(E).

Petitioner's Arguments

As indicated above, the Petitioner alleges that the policy statements adopted by the Commision on October 4, 2024 exceeded their authority because the policy statement was being treated as a rule in practice. The Petitioner argues that the Commission provided the policy statement to the Line Siting Committee to guide the Line Siting Committee on ratepayer recovery and undergrounding of powerlines, both of which exceed the jurisdiction of the Line Siting Committee according to the Petitioner. The Petitioner specifically states that the Line Siting Committee is strictly focused on identifying routes for transmission lines and the sole authority for how a utility recovers cost from ratepayers is with the Commission itself. The Line Siting Committee cannot "preemptively determine the cost recovery outcomes of the ratemaking process."

The Petitioner states that the Commision knew this policy statement exceeded their authority because in June 2023 the Commission's legal counsel warned of jurisdictional issues and recommended formal rulemaking. This statement can be found in Docket No.ALS-00000A-22-0320. The Petitioner also states that a Commissioner acknowledged these jurisdiction hearings during a September 2023 hearing as well.

The Petitioner further contends that when Tucson Electric Company "TEP" applied for a "Certificate of Environment Compatibility "CEC", the Line Siting Committee relied on the policy statement to "preemptively determine that any incremental undergrounding cost would be unrecoverable from ratepayers and therefore was not feasible." The Petitioner also states that the Commission's argument that the policy statement only repeated what the Arizona Supreme Court held was misguided because a utility can be held responsible for costs related to undergrounding without that costs being passed on to the ratepayer. The Petitioner offered the following as support of his position that the Policy Statement was not merely a recognition of state law; "The fact that property owners may petition for the creation of an underground conversion district and be bound to pay for the undergrounding instead of the utility, does not prevent the Town from mandating the undergrounding at utility expense." *Arizona Pub. Serv. Co. v. Town of Paradise Valley*, 125 Ariz. 447, 451 (1980).

Summary of Commission Review

As a result of the Petitioner initially filing a request of review of the substantive policy from the Commission in accordance with A.R.S. § 41-1033, the commission was required to either provide a detailed rejection of the petition, or if the substantive policy was actually a rule to engage in rulemaking. The Commision rejected the request by written response to the Petitioner on October 31, 2025. The Commission's full response can be found in the attached materials, a brief overview will be provided below.

The Commision does not consider the Policy Statement to be a rule because the policy statement was based on existing statutes and rules. The Commission specifically cited A.A.C R14-2-206(b)(2)(c) and A.R.S. §§40-341, et. and A.R.S. § 48-620.

For the argument that the Policy Statement constitutes a rule, the commision states that the Policy Statement is not a rule because the Policy Statement is merely restating state law. The Commision cites A.R.S. § A.R.S. § 40-364(F) and R14-2-206(b)(2)(c) as to where this authority lies.

For A.R.S. § 40-364(F), the Commission emphasizes that the statute "grants the Commission the authority to issue an order "establishing the underground conversion service" and the Commission "'shall set forth the underground conversion costs to be charged to each lot or parcel.'"" Commision 10/31/24 Response pg 12. The Commision states that the cost for undergrounding can only be passed on to those who directly benefit from the undergrounding and not to a generalized population.

The Commission believes that the existing rule and statutes specify that no unnecessary cost should be passed on to ratepayers, any costs should be absorbed by those who benefit. (*Id.* at. 3).

For the *Paradise Valley* case cited by the Petitioner, the Commision states the following "These decisions do not support Mr. Dempsey's position. Commission advisory does not preclude or limit a municipality's right to require undergrounding. The Commission advisory merely parrots state law and policy on the allocation of the costs of Undergrounding." (*Id.* at 13).

Relevant Statutes and Regulations

A.R.S. § 41-1033(E) allows a person to "to appeal to the council to review whether the existing agency practice or substantive policy statement constitutes a rule." The agency must have rejected the petitioner's request for the Council to hear. If rejected, the Petitioner has 30 days to submit a five page double spaced appeal to the Council.

A.R.S. § 41-1033(G) allows "A person may petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern."

If the Council receives information pursuant to A.R.S. § 41-1033(G), and at least three Council members request of the Chairperson that the matter be heard in a public meeting:

1. Within ninety days after receipt of the third council member's request, the council shall determine whether the agency practice or substantive policy statement constitutes a rule, whether the final rule meets the requirements prescribed in section 41-1030 or whether an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

2. Within ten days after receipt of the third council member's request, the council shall notify the agency that the matter has been or will be placed on an agenda.

3. Not later than thirty days after receiving notice from the council, the agency shall submit a statement not more than five double-spaced pages to the council that addresses whether the existing agency practice, substantive policy statement constitutes a rule or whether the final rule meets the requirements prescribed in section 41-1030 or whether an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

   See A.R.S. § 41-1033(H).

A.R.S. §41-1001(17) states: "'Rule' means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency."

A.R.S. § 41-1001(24) states ""Substantive policy statement" means a written expression which informs the general public of an agency's current approach to, or opinion of, the requirements of the federal or state constitution, federal or state statute, administrative rule or regulation, or final judgment of a court of competent jurisdiction, including, where appropriate, the agency's current practice, procedure or method of action based upon that approach or opinion. A substantive policy statement is advisory only. A substantive policy statement does not include internal procedural documents which only affect the internal procedures of the agency and does not impose additional requirements or penalties on regulated parties, confidential information or rules made in accordance with this chapter."

A.R.S. § 40-360.06(A) states that "The committee may approve or deny an application and may impose reasonable conditions on the issuance of a certificate of environmental compatibility and in so doing shall consider the following factors as a basis for its action with respect to the suitability of either plant or transmission line siting plans:...

(A)(8) . “The estimated cost of the facilities and site as proposed by the applicant and the estimated cost of the facilities and site as recommended by the committee, recognizing that any significant increase in costs represents a potential increase in the cost of electric energy to the customers or the applicant.”

(A)(9). Any additional factors that require consideration under applicable federal and state laws pertaining to any such site.

R14-2-206(b)(2)(c) states “"[a] customer requesting an underground service line in an area served by overhead facilities shall pay for the difference between an overhead service connection and the actual cost of the underground connection as a nonrefundable contribution."

Analysis and Conclusion

A.R.S. § 41-1033 does not provide requirements or standards to guide the Council in determining whether this petition should be given a hearing. Therefore, Council members should make their own assessments as to what information is relevant in determining whether this petition may be heard.

The following is Council staff’s opinion as to whether the policy statement constitutes a rule or if it exceeds the Commission’s statutory authority.

The Policy Statement can be broken into two parts. Part 1 states, “As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates.” Council Staff believes that the Commission is correct when the Commission states that this is just a restatement of the existing law and authority. Absent any other law and requirements, the Commission has an obligation to ratepayers to ensure the lowest possible costs.

Absent any other law or authority on undergrounding, a stakeholder who benefits would be responsible for paying for these benefits, and not the ratepayers as a whole. This is supported by R14-2-206(b)(2)(c), A.R.S. §§ 40-347 and 48-620.

Part 2 of the Policy Statement states, “Third parties, including cities, customers and neighborhood groups, seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. § 48-620 et. seq.”

The language in Part 2 is ultimately where the dispute arises. The plain text of the Policy Statement states that those who wish to fund an underground transmission line may do so, ***among other ways,*** by forming an improvement district. The plain text does not prohibit a utility

to be responsible for undergrounding or for a municipality to require underground through zoning or an ordinance. The Policy Statement only states that one way to do this is through an improvement district as provided in A.R.S. § 48-620 *et. seq.* The Policy Statement is not saying that this is the only way, it is just among the ways. Council staff agrees with the Commission that the Policy Statement as written only restates what exists in law and does not add any additional requirements.

However, based on the Petitioner's allegations, a question emerges regarding whether the Commission is using this Policy Statement as an Agency Practice to exceed their statutory authority when it comes to interfering with a municipalities authority to require undergrounding and whether the beneficiary must always pay for the undergrounding. The Petitioner does seem to touch on this subject in their jurisdictional argument. Council staff recommends that the Council inquire further regarding this issue based on the analysis in the *Paradise Valley* case provided by the Petitioner and outlined in more detail below. A copy of the full case text has also been provided in the materials for the Council's consideration.

In *Paradise Valley,* the question was raised whether cities and towns had the authority to direct the undergrounding of public utility poles. *Arizona Pub. Serv. Co. v. Town of Paradise Valley*, 125 Ariz. 447, 448 (1980). In this case, the court said that while property owners may petition for the creation of an underground conversion district, ***this does not prevent the town from mandating at utility expense.*** *Id.* at 451. The court further determined that, because A.R.S. § 40-360.06(D) mentions ordinance, master plan or regulation, this language supports the notion that cities and towns have the power to require undergrounding. *Id.* The court ultimately held "We believe that, in the absence of a clear statewide preemptive policy not shown here, local governments can prescribe undergrounding within their boundaries." *Id.*

The Commission does not dispute that local governments have the ability to mandate undergrounding. *Commission 10/31/24 Response* Pg. 12. The Commission believes that mandating undergrounding is separate from allocation of costs of undergrounding. *Id.* It appears that the Commission believes that costs for undergrounding can only be passed on to property owners who benefit because the sole authority to allocate costs on undergrounding lies with the Commission. *Id.* at 12-13. The Commission states that *Paradise Valley* does not support the Petitioner's position "these decisions do not support Mr. Dempsey's position. The Commission advisory does not preclude or limit a municipality's right to require undergrounding." *Id.* In relation to *Paradise Valley,* the Commission also states " Thus, if a Municipality requests or mandates undergrounding, it must pay for it, not the ratepayers. This is consistent with the holding in A*rizona Pub. Serv. Co. v. Town of Paradise Valley*, 125 Ariz. 447 (Ariz. 1980), wherein the right of a municipality to require undergrounding was affirmed. However,that does not address who should pay."

However the Petitioner is quoting *Paradise Valley* because it states that a town can mandate undergrounding at the utilities expense. *Petition*, Pg. 4. The Commission does not address the possibility of a local government requiring a utility to cover these expenses. The *Paradise Valley* court rejected the notion that the legislature created underground conversion districts for the purpose of only property holders being responsible for the costs of undergrounding. *Paradise Valley,* at 451.

These improvement districts and service areas were in place at the time of the *Paradise Valley* decision and were cited by the court directly as being unpersuasive that the legislature intended to prevent local governments from mandating undergrounding at a utilities expense. In the CEC approval as referenced in Decision 79550 pg 15, the Committee relied on the Policy Statement and said that funding must come from someone other than TEP's utility rates or from TEP, absent an agreement between the parties.

In Docket No.ALS-00000A-22-0320 pg3, the Commission states "The facts of each case are unique. and there may be instances where a utility demonstrates that ratepayer recovery of undergrounding transmission lines is warranted." This sentiment does not appear in the Commission's response to Petitioner. This Docket is also where the Commission mentions that the line siting committee does not have jurisdiction over ratepayer recovery. *Id.*

Based upon the Commission's TEP undergrounding decision and what has been provided by Petitioner, staff believes that the Petitioner may have brought an agency practice that is not expressly authorized under the Commission's statutory authority.

If it is indeed the Commission's position that undergrounding costs can only be shared among those who are beneficiaries or those that have opted into a district, then staff believes that this raises the question; whether absent an improvement district, conversion service area, or commitment that the requesting customer would pay, then would the Commission always rule that an ordinance, master plan, or regulation to be considered as "unreasonably restrictive and compliance therewith is not feasible." It also raises the question if this is considered determining ratepayer responsibility and whether that is within the jurisdiction of the line siting committee, as found in A.R.S. § 40-360.06.

Essentially, while a town may pass a zoning ordinance requiring that all transmission lines be undergrounded, this ordinance would not be followed unless there is an improvement district, conversion service area, or commitment that the requesting customer pays for the cost. This would remove the possibility that the utility will pay for these costs, which according to *Paradise Valley* is a possibility. Council staff does not believe there is clear statutory authority for the Commission to declare that a utility should not be held financially responsible for undergrounding based upon the *Paradise Valley* decision.

In conclusion, the Commission stated in Decision 79550, that the Policy Statement provided guidance to find that TEP did not need to pay for the undergrounding. The Policy Statement is silent on whether a utility can be financially responsible for undergrounding. This silence does not mean the Policy Statement advises that a utility cannot be financially responsible for undergrounding because in *Paradise Valley*, the court mentioned that while a town can pay for these costs either through agreement or an improvement district, they are under no obligation to do so. However, in practice the Commision appears to be treating the absence of language as justification for not allowing the utility to pay.

As stated above there are requirements or standards to guide the Council in determining whether this petition should be given a hearing. If the Council believes that the only issue at hand is whether the Policy Statement is a rule or not and whether the Policy Statement is within the Commission's statutory authority. In this scenario, Council staff believes that the Policy Statement is not a rule because it merely restates the law (the policy statement does not have to mention every payment possibility), which is that costs associated with undergrounding cannot be passed on to the ratepayers.

Should the Council believe that the Petitioner may have brought an agency practice that exceeds the Commission's authority then Council Staff does recommend the Council ask the following of the Commission and Petitioner:

- Does the Commission allow for a utility to be financially responsible for the costs associated with undergrounding?
- For the Petitioner's line siting Committee jurisdictional argument over ratemaker recovery, can the Commission clarify as it relates to the TEP matter, if the Commission was consistent with pg. 3 of Docket No. ALS-00000A-22-0320?
- For the Commission, what is the extent, if any, for the Committee to ask about potential impacts on ratepayers, either under A.R.S. § 40-360.06, or other Committee statute.
- For the Petitioner, Council staff recommends the Council ask the Petitioner of the applicability of A.R.S. § 40.360.06(A)(8)? This relates to the jurisdictional question, under this statute why did the Committee overstep its jurisdiction in considering the potential costs that could be passed to customers?
    - This statute allows the committee to approve or deny an application and the Committee may consider the cost of the facilities and sites, and recognize that these costs may increase the costs to customers or the applicant.

Governor's Regulatory Review Council
100 N Fifteenth Ave • Suite 302
Phoenix, AZ 85007
grrc@azdoa.gov

RE: Arizona Corporation Commission Decision 79140, Policy Statement 3

Dear Members of the Governor's Regulatory Review Council,

Underground Arizona hereby appeals to the Governor's Regulatory Review Council (the "Council"), pursuant to A.R.S. § 41-1033(E), for a determination that the Arizona Corporation Commission's (the "Commission") October 4, 2023 Policy Statement, as outlined herein, is a rule or is otherwise "not specifically authorized by statute, exceeds the agency's statutory authority, [and] is unduly burdensome."[1]

Underground Arizona submitted an A.R.S. § 41-1033 petition to the Commission on September 3, 2024.[2] The petition was rejected by written letter on October 31, 2024.[3] In the rejection letter, the Commission wrote: "The Petitioner is advised that he has 30 days to file an appeal if he so chooses.[3]" Footnote 3 cited A.R.S. § 41-1033(E), which is the Council's review process.

BACKGROUND

1. **On February 20, 2023**, Tucson Electric Power ("TEP") requested that the Commission issue a policy statement on undergrounding transmission lines (pg. 4):[4]

   "The Commission has often acknowledged that ratepayers should not pay the extra cost of undergrounding a transmission line. Including language to that effect in a policy would be

[1] See e.g. A.R.S. 41-1033(G).

[4] Docket ALS-00000A-22-0320: https://docket.images.azcc.gov/E000024350.pdf

helpful to applicants who need to explain the issue to stakeholders in a CEC proceeding."

2. **On June 30, 2023**, the Commission's Legal Division issued a memo stating the following regarding TEP's request (pg. 3):[5]

> *"If the Commission decides to move forward with this proposal, a rulemaking would be required because the Commission would be prescribing law or policy. It would not be appropriate to adopt a rule regarding ratepayer recovery as part of the line siting rules, however. The Line Siting Committee has no jurisdiction over rates and a line siting rule regarding ratepayer recovery would therefore be outside the scope of authority granted under the line siting statute. Additionally, the Line Siting Committee does not have jurisdiction over underground transmission lines."*

3. **On September 1, 2023**, the Commission's Legal Division filed a Proposed Order that did not include a policy statement on rate recovery or undergrounding.[6]
4. **On September 18, 2023**, Commissioner Myers filed Proposed Amendment No. 1, which proposed inserting the following policy statement on undergrounding into the Legal Division's Proposed Order:[7]

> "*3. The Commission does not have jurisdiction over the undergrounding of electric transmission lines. A.R.S. § 40-360(10). Installing electric transmission lines underground is much more expensive than building them above ground. Underground transmission lines also can be more costly and challenging to maintain and repair. As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates. Third parties, including cities, customers and neighborhood groups, seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. § 48-620 et. seq."*

5. **On September 21, 2023**, at the Commission's Open Meeting, in regard to Commissioner Myers' Proposed Amendment No. 1, the following statement was made:[8]

> ***Commissioner Myers:*** *"I think it is beneficial to clarify the Commission's stance on [rates and undergrounding] but at the same time make sure that it's clear that we don't have jurisdiction over [rates and undergrounding] when it comes to line siting stuff."*

[8] Item 33. https://azcc.granicus.com/player/clip/5766?view_id=3&redirect=true

6. **On October 4, 2023**, The Commission formally issued Decision No. 79140 by a vote of 4 to 1, with Commissioner Tovar dissenting, which adopted three policy statements, including Commissioner Myers Proposed Amendment No. 1 on undergrounding (the policy statement).[9] In Finding of Fact 1, the Commission wrote that the purpose of policy statements was to "guide" the Line Siting Committee (pg. 1).
7. **On May 24, 2024**, TEP filed a Certificate of Environmental Compatibility ("CEC") application with the Line Siting Committee ("the Committee"). In it, and based on the policy statement, TEP made the following request (pg. 30):[10]

   > *"Consistent with the Commission's Policy Statement, given the excessive cost of undergrounding, and the resulting impact on rates, requiring undergrounding would render the Project unreasonably restrictive and not feasible."*

8. **On September 13, 2024**, In Decision No. 79550, the Committee and Commission approved TEP's application for a CEC, which included the following findings of fact (pg. 15):

   > *"10. However, **given the Commission's Policy Statement found in Decision No. 79140 (October 4, 2023),** the Committee finds pursuant to A.R.S. 40-360.06(D) that any local ordinance or plan that requires TEP to incur an incremental cost to construct the Project below ground 'is unreasonably restrictive and compliance therewith is not feasible in view of technology available.'"* [Emphasis Added]

ANALYSIS

The *ex-ante* line siting process is administered by the Line Siting Committee and focused on identifying routes for transmission lines.[11] It is governed by A.R.S. § 40-360 et seq. The *ex-post* ratemaking process is administered by the Commission and is focused on how a utility recovers costs from ratepayers. It is governed by A.R.S. § 40-361 et seq. Each process has independent jurisdiction and operates according to its own rules and procedures. To put it another way, the line siting process is not an early stage of ratemaking; while costs may be considered in route selection, the process cannot preemptively determine the cost recovery outcomes of the ratemaking process—or vice versa.[12]

On February 20, 2023, Tucson Electric Power ("TEP") requested that the Commission issue a policy statement to guide the Line Siting Committee on ratepayer recovery and undergrounding (Background 1). On June 30, 2023, the Commission's legal counsel warned that such a policy statement would be outside the scope of the line siting statute and a formal rulemaking would be required

[9] Docket L-00000C-24-0118-00232: https://docket.images.azcc.gov/0000209995.pdf
[10] https://docs.tep.com/doc/projects/mrp/MRP-CEC-Application.pdf
[11] In this context, ex-ante means before a project is built and ex-post mean after a project is built.
[12] As evidence, SRP's rates are not regulated by the Commission but its transmission lines require approval by the Line Siting Committee.

(Background 2). On September 21, 2023, at a Commission hearing, Commissioner Myers further acknowledged these jurisdictional problems (Background 5). Despite this, on October 4, 2023, in Decision 79140, the Commission issued a line siting policy statement on ratepayer recovery and undergrounding without undergoing a formal rulemaking (Background 6).

On May 24, 2024, TEP applied for a Certificate of Environmental Compatibility ("CEC") from the Commission (Background 7). On September 13, 2024, in Decision 79550, the Commission granted the CEC. In the CEC, the Line Siting Committee relied on the Policy Statement to preemptively determine that any incremental undergrounding cost would be unrecoverable from ratepayers and therefore was not feasible (Background 8). Thus, the Policy Statement has been treated as a binding rule in practice.

By providing guidance to the Line Siting Committee through a Policy Statement on subjects for which the Line Siting Committee explicitly lacks jurisdiction, the Commission has deliberately confused process and acted in a manner that is "not specifically authorized by statute, exceeds the agency's statutory authority, [and] is unduly burdensome."[13,14] The bottom line is: why does the Line Siting Committee need to be guided by the Commission on items for which the Line Siting Committee lacks jurisdiction? If the point is not to exert extra jurisdictional authority, then what is it? Why doesn't the Commission simply make a non-line siting policy statement on undergrounding costs?

In its response to Underground Arizona's petition, the Commission said (pg. 5), "The jurisdiction of the Line Siting Committee is not at issue here." We disagree. It is the *only* thing at issue here. The Commission's arguments about its ratemaking or other jurisdiction are strawmen and not in dispute.

The Commission went on to say (pg. 5): "The Committee was appropriately recognizing state law limitations on cost recovery for undergrounding." Here, the Commission also errs. According to the Arizona Supreme Court, in APS v. Town of Paradise Valley (1980), state law does not limit cost recovery to non-utility parties (p 451):

> *"The fact that property owners may petition for the creation of an underground conversion district and be bound to pay for the undergrounding instead of the utility* [under state law]*, does not prevent the Town from mandating the undergrounding* ***at utility expense****."* [Emphasis added]

Therefore, the Commission's contention that the Policy Statement is simply a restatement of state law is fatally flawed.[15,16]

---

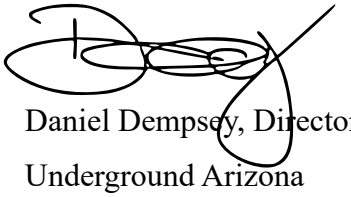
[13] See e.g. A.R.S. 41-1033(G).
[14] See e.g. A.R.S. 41-1091.
[15] Additionally, Underground Arizona has compiled dozens of examples on its website of the utility companies recovering the incremental cost of undergrounding from ratepayers without resistance from the Commission. Thus, its contention that it is disallowed by state law makes little sense.
[16] In TEP v. Board of Adjustment (2024), the Arizona Superior Court said: "*The State has also preempted the City's ability to determine where, but not how, transmission lines are constructed. The State clearly intended the Arizona Corporation Commission (ACC) to have exclusive authority over line siting for high-capacity transmission lines. A.R.S. § 40-360, et seq.*

Frankly, it seems that the Policy Statement's only purpose is for the Commission to improperly exert extra jurisdictional authority over the Line Siting Committee, which it succeeded at doing in practice.

CONCLUSION

For the foregoing reasons, pursuant to A.R.S. § 41-1033 et seq., and at the direction of the Commission, Underground Arizona respectfully requests that the Council hold a public meeting regarding the Commission's Policy Statement, which has been treated as a rule in practice, and determine it void as contrary to law.

Sincerely,



Daniel Dempsey, Director
Underground Arizona

See also 1971 Session Laws Ch 67, § 1. The purpose of this is to simplify the process of expanding Arizona's electrical grid, which is necessarily a matter of statewide importance. However, the Court has been unable to locate any law which restricts the City's authority to regulate how transmission lines are constructed. TEP is correct that there is no law which explicitly grants the City the authority to require undergrounding, but neither is there a specific law which purports to exempt utilities from all zoning regulations. Therefore, the Court finds that, as a matter of law, the City has the authority to require undergrounding of transmission lines." It is only reasonable to assume that an applicant pays the cost of complying with zoning regulations. The burden of proof that a municipality pays for the zoning compliance of any party is on TEP.

Mr. Daniel Dempsey
daniel@undergroundarizona.org

Re: *Petition to Invalidate Policy Statement 3 of Decision No. 79140*
Docket No. AIS-00000A-22-0320

Dear Mr. Dempsey:

This letter is the Arizona Corporation Commission's ("Commission") formal response to the September 10, 2024, Petition you filed in accord with A.R.S. § 41-1033(A).[1] A person may petition an agency to make, amend, or repeal a rule, or to review an existing agency practice or substantive policy statement that the petitioner alleges constitutes a rule. The petition must follow specific procedural requirements, including stating the reasons for the petition and providing supporting information. The Petition here meets the statutory requirements and thus the Commission is compelled to file this response.

For the reasons set forth below, the Commission denies your Petition as redundant, since your request to either invalidate an informal policy as an impermissible rule, or to have the policy enacted as a rule, is unnecessary. There exists already a formally adopted rule addressing the costs of undergrounding transmission wires, and two separate statutory regimes addressing undergrounding, thus the policy mentioned in Decision No. 79140 (October 4, 2023) is based on an existing, valid rule or statute. *See* A.A.C. R14-2-206(b)(2)(c). The Line Siting Committee's reliance on that rule and policy, in Line siting Docket No. L-00000C-24-0118-0232, Certificate of Environmental Compatibility (July 29, 2024) was therefore correct and legally warranted. *See*, Decision No. 79550 (September 13, 2024).

In addition to the rule, the policy is based on state law. Pursuant to A.R.S. §§ 40-341, et. seq., public service corporations can install underground transmission lines (1) *at their own*

[1] This statute provides, in relevant part:
A. Any person may petition an agency to do either of the following: 1. Make, amend or repeal a final rule. 2. Review an existing agency practice or substantive policy statement that the petitioner alleges to constitute a rule.

expense (i.e., that cannot be recovered in general rates) or (2) pursuant to a conversion service area. The legislature has created a statewide scheme for the creation of "underground conversion service areas" and each landowner within the "conversion area" must pay "the costs" for undergrounding to the public service corporation. The Decision advisory also cited A.R.S. § 48-620, which involves the creation of an improvement district established by a municipality via petitions from impacted property owners, for purposes of undergrounding. This statutory regime also requires the property owners to pay pro rata for the costs of undergrounding. Thus, under both the rule and the statutes, the costs of undergrounding cannot be recovered in the general utility rates.

The Commission policy in Decision No. 79140 fully complies with and is based upon these established laws. There are three lawful methods to pay for undergrounding:[2] (1) the utility can pay with no rate recovery; (2) an improvement district can be created, and the impacted property owners can pay; or (3) a conversion district can be created, and the impacted property owners can pay. No state law authorizes the costs of undergrounding to be spread among all ratepayers.

A complete analysis is provided below.

A. The Petition Is Validly Filed

The Petition from Mr. Dempsey is brought pursuant to A.R.S. § 41-1030. This statute provides that agencies must not make informal policies or guidelines that have the effect of being a rule of general application, nor can agencies make rules that exceed their statutory or Constitutional rulemaking authority.

The Petition here properly follows Arizona law, and the Commission informed the public in Attachment A, page 1, Note 1, of Decision No. 79140, of the public's right to file such a petition. Accordingly, a response from the Commission is required. The Petitioner is advised that he has 30 days to file an appeal if he so chooses.[3]

---

[2] The Commission is aware that other sources, unrelated to ratepayers, could theoretically exist, such as legislative grants.

[3] A.R.S. § 41-1033(E) ("If an agency rejects a petition pursuant to subsection C of this section, the petitioner has thirty days to appeal to the council to review whether the existing agency practice or substantive policy statement constitutes a rule."

B. The Advisory Statement and Contentions.

1. The Guidance in Decision No. 79140

At issue is the following statement in Decision No. 79140, which provides:

> 3. The Commission does not have express jurisdiction over the undergrounding of electric transmission lines. A.R.S. § 40-360(10). Installing electric transmission lines underground is much more expensive than building them above ground. Underground transmission lines also can be more costly and challenging to maintain and repair. As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates. Third parties, including cities, customers, and neighborhood groups seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. §§ 48-620 *et seq.*

Commission Decision No. 79140, ¶ 15. The above guidance statement was enacted on October 4, 2023. The guidance pertains to excluding the costs of undergrounding from recovery through rates. The guidance makes clear that those requesting and benefitting from undergrounding should pay for the costs of undergrounding, not ratepayers in general. As fully discussed below, this mirrors state law.

In a recent Line Siting Committee decision, the Committee referred to this guidance as a policy to which it will adhere. The Committee explained:

> [G]iven the Commission's Policy Statement found in Decision No. 79140 (October 4, 2023), the Committee finds pursuant to A.R.S. § 40-360.06(D) that any local ordinance or plan that requires TEP to incur an incremental cost to construct the Project below ground 'is unreasonably restrictive and compliance therewith is not feasible in view of technology available." This finding is conditioned on the City and TEP not finding a means to, within six (6) months of the date of the Commission's approval of this Certificate, either (a) fund the incremental cost to construct the Project below ground from a source other than through TEP's utility rates or from TEP, its affiliates, subsidiaries, or patent companies absent agreement between the parties; or (b) obtain the City's authorization to construct the Project above ground

> through the City's special exception or variance process, provided that TEP files a special exception or variance application for the route approved within ten (10) weeks of the Commission's approval of this Certificate.

Line Siting Committee, Certificate of Environmental Compatibility, p. 15 at ¶ 10, Docket No. L-00000C-24-0118-232 (July 29, 2024). Thus, the Committee logically deemed the guidance to be a policy it should follow, even without reference to the rule and passing reference to the improvement district statute.

In addition to the Committee's analysis and application of the guidance, the Commission's legal division provided guidance in a June 14, 2023, memorandum, in which it stated:

> It would not be appropriate to adopt a rule regarding ratepayer recovery as part of the line siting rules, however. The Line Siting Committee has no jurisdiction over rates, and a line siting rule regarding ratepayer recovery would therefore be outside the scope of authority granted under the line siting statutes. Additionally, the Line Siting Committee does not have jurisdiction over underground transmission lines.

Legal Division Memorandum, p. 16, Docket ALS-00000A-22-0320 (June 14, 2023). While the Line Siting Committee does not have express jurisdiction over undergrounding transmission lines,[4] and it does not have jurisdiction over ratepayer recovery of costs, the Commission does have jurisdiction over the rate allocations and underground conversion service areas.

The Committee's action to comport with Commission guidance is prudent and warranted. Moreover, both the Commission and the Committee are of aware of, and seek compliance with, state law regarding improvement districts and conversion districts. The Line Siting Committee has every reason, and obligation, to comport with state law, which plainly disallows undergrounding costs to be allocated among all ratepayers. Any decision by the Line Siting Committee would be reasonable to take those restrictions into account, and doing so does not assert jurisdiction over rates or over undergrounding.

---

[4] The Commission does, however, have jurisdiction in some circumstances to approve undergrounding in conversion service areas. ARS 40-344(J): "The corporation commission or the board of supervisors shall not establish any underground conversion service area without prior approval of such establishment by resolution of the local government"); and (K): "If the underground conversion service area contains overhead electric or communication facilities of a public service corporation and public agency, then neither the public service corporation nor the public agency shall be required to commence conversion until the corporation commission's order, the board of supervisors' order or the city or town council's order has become final." Query whether the Line Siting Committee should have the initial review of the creation of a conversion service area inasmuch as it has the technical and historic expertise on line siting issues.

C. The Commission Has The Legal Authority To Create an Advisory Policy Consistent With and Based on State Law.

The Petitioner asserts that the Commission does not have the Constitutional or legislative authority to create and enforce the guidance or policy that was set forth in Decision No. 79140. This is not correct.

In the Petition, p. 1, it is alleged that:

> In Line Siting Case 232, in Finding of Fact 10 of the Certificate of Environment Compatibility filed on July 29, 2024, PS3 was used by the Line Siting Committee to determine that any incremental undergrounding cost borne by ratepayers, or the utility was unrecoverable and therefore local ordinances and plans creating such costs were "unreasonably restrictive and compliance therewith [was] not feasible in view of technology available" under A.R.S. § 40- 360.06(D). If the underground costs were determined recoverable from ratepayers or the utility, this A.R.S. § 40-360.06(D) determination could not be made.

The Petition also asserts that the Commission legal counsel "warned" that adopting a policy within the line siting rules would be "outside the scope of authority granted under the line siting statute" and that "the Line Siting Committee does not have jurisdiction over underground transmission lines." The jurisdiction of the Line Siting Committee is not at issue here. The Committee was appropriately recognizing state law limitations on cost recovery for undergrounding. At issue is the ability of the Commission to have rules and policies regarding rates and recovery of costs, and this is definitively within the core jurisdiction of the Commission. The Committee merely recognized the Commission's role over rates, but in no manner did the Committee attempt to exert its authority extra jurisdictionally.

The letter referred to in the Petition from the Legal Division, dated June 14, 2023, did not refer to the rule here, A.A.C. R14-2-206(b)(2)(c) (the costs for undergrounding single phase (residential mainly) service lines to be paid by the user), or the undergrounding statutes pertaining to conversion and improvement districts. The Commission adopted the recommendations from the Legal Division as far as it went, stating: "We adopt Legal Division's recommendation: however, the Commission's Policy Statement shall also include the following" and thereafter the Commission set forth the guidance based on A.A.C. R14-2-206(b)(2)(c)). In this manner, the Commission did not err.

The Commission rule to prevent the extra costs of undergrounding from being rolled into general ratepayer rates is a core rule based on the Commission's plenary authority to

govern reasonable and just rates. Decision No. 79140 expressly noted that "The Commission has jurisdiction over the subject matter..." (Commission Decision No. 79140 at p. 3). The Commission has made it clear to the Municipalities, and others, that undergrounding is not prohibited. The Petition's reference to state law allowing municipalities to order undergrounding is not at issue and not in conflict. The Commission is simply noting that the very high cost of undergrounding, and the reliability and maintenance problems associated with undergrounding, cannot be recovered in the general rates—a core jurisdictional issue for the Commission. Further, as noted above, state law mirrors this advisory.

The Commission even referred those who want undergrounding (including Municipalities) to a possible method, such as creating an improvement district under A.R.S. § 48-620. (Decision No. 79140 at p. 3). More directly however, are the underground conversion districts set forth in A.R.S. §§ 40-341 *et. seq*. State law mandates that the requesting party or parties, and the beneficiary property owners, pay for all undergrounding costs.

There are multiple sections of statute and rules that address undergrounding:

A.A.C. R14-2-207: This regulation outlines the requirements for utilities regarding distribution line extensions, including underground extensions in subdivision developments. It specifies that single-phase electric lines necessary to furnish permanent electric service to new residential buildings or mobile homes within a subdivision must be installed underground unless it is not feasible from an engineering, operational, or economic standpoint. Under R14-2-206(B)(2)(b), costs are not allowed to be allocated to general ratepayers and the "customer requesting an underground service line in an area served by overhead facilities shall pay" for the costs of undergrounding. These rules establish jurisdiction of the Commission to address special conditions, exceptions, and approval of line extensions and who should pay.

A.R.S. § 48-620: This statute states that the assessment for an underground electrical power line shall be assessed against only the property owners benefiting from the burial of the power line.

A.R.S. § 40-342, 40-344, 40-346 & 347: These statutes provide the petition procedure for establishing an underground conversion service area, including the requirement for a hearing by the corporation commission, to determine the feasibility and approval of the conversion service area. Under A.R.S. 40-347, the underground conversion costs are to be allocated to each lot or parcel of real property within the underground conversion service area—not to the general ratepayers. ARS 40-343(F) (requiring "the estimated costs to be assessed to each

> lot or parcel of real property for placing underground the facilities of the public service corporation.").[5]

Should the Commission want to adopt the advisory as a formal rule, it could do so, and it would be in harmony with state law and public policy. The Arizona Constitution, Article 15, Section 3, grants the Commission the power to "make reasonable rules, regulations, and orders, by which such corporations shall be governed in the transaction of business within the state." *State v. Tucson Gas, Elec. Light & Power Co.,* 15 Ariz. 294 (1914). This constitutional provision vests exclusive power in the Commission to govern public service corporations, except where the Constitution explicitly grants such power to the Legislature. *State v. Tucson Gas, Elec. Light & Power Co.*, 15 Ariz. at 300-301. The Commission authority includes judicial, executive, and legislative powers, allowing it to adopt rules and regulations, as well as to adjudicate issues, and set rates. *Miller v. Arizona Corp. Com'n*, 227 Ariz. 21, 24-25 (2011).[6]

The Commission's creation and powers stem from the framers' intent to protect the public from corporate abuses and overreaching, granting it extensive regulatory authority unique among state commissions. *Burns v. Arizona Public Service Company*, 254 Ariz. 24 (2022). This historical context underscores the Commission's role in ensuring effective regulation and consumer protection. *Miller v. Arizona Corp. Com'n*, 227 Ariz. at 28-29. The Commission is also obligated to protect and prevent unfairness to consumers and ratepayers. Thus, compelling non-beneficiaries to pay for the costs of undergrounding has been deemed unfair and unreasonable by the Commission in its advisory policy, a policy that mirrors the state legislature's undergrounding statutory plan. In short, the Legislature and the Commission concur that the costs of undergrounding cannot be shared among non-beneficiaries as defined by law.

D. The Advisory Policy Mirrors Existing State Law.

As noted, the Petitioner is operating under the misimpression that the guidance and policy statement set forth in Decision No. 79140 is not based on an existing rule or state law and thus constitutes a new "rule" that was enacted without following the procedures of the Administrative Procedures Act (APA). The Petitioner errs.

---

[5] It is notable that the Commission has jurisdiction over petitions to underground "transmission lines" at "nominal voltages in excess of twenty-five thousand volts, or having a current capacity in excess of twelve thousand kva." ARS 40-342(E). This raises the question whether the Line Siting Committee should have the opportunity to address transmission line undergrounding petitions over 25Kv as it has expertise in this.

[6] Arizona statutory law, A.R.S. § 40-202, further confirms the Commission's authority to regulate public service corporations and to adopt rules necessary for this purpose. Specifically, the statute empowers the Commission to protect the public against deceptive practices, ensure confidentiality of customer information, and regulate contractors working with regulated entities. *Id.* The statute also mandates the Commission to encourage competition and growth in the telecommunications industry and to establish procedures for regulating competitive markets. *Id.*

The advisory policy in Decision No. 79140 is based on a previously enacted rule that complies with the APA as well as a state statutory scheme pertaining to undergrounding. The rule regarding undergrounding enacted in accordance with the APA, A.A.C. R14-2-206(b)(2)(c), provides:

> "[a] customer requesting an underground service line in an area served by overhead facilities shall pay for the difference between an overhead service connection and the actual cost of the underground connection as a nonrefundable contribution."

A.A.C. R14-2-206(b)(2)(c). Thus, this validly enacted rule establishes that the cost of undergrounding shall be borne by the "customer requesting underground service." The advisory policy reiterates this rule.

In addition to this rule, there is an extensive statutory scheme that also mandates that the customers who seek, and benefit from, undergrounding, shall pay for the costs of undergrounding, not the ratepayers in general. Specifically, A.R.S. § 40-342(F) provides:

> A summary of the estimate of the costs to be assessed against each lot or parcel of real property located within the proposed underground conversion service area for the conversion of facilities within public places and the estimated costs to be assessed to each lot or parcel of real property for placing underground the facilities of the public service corporation or public agency located within the boundaries of each parcel or lot then receiving service shall be mailed by the public service corporation or public agency to each owner of real property located within the proposed underground conversion service area to the address of such owner as set forth on the petition for the cost study.

A.R.S. § 40-342(F). The Commission advisory reflects this statutory payment scheme. The costs of undergrounding are to be paid for by the customers requesting and benefitting from the undergrounding. If the advisory is deficient, it is that it did not expressly refer to the rule and the statutes. But that is not required.

The Commission agrees that there is a rule already enacted, and the advisory statement in the decision is consistent with that rule.[7] Under the APA, a "rule" is defined as an agency

---

[7] "An entity's internal guidelines, however, are not rules." *Duke Energy Arlington Valley, LLC v. Ariz. Dep't of Rev.*, 219 Ariz. 76, 80, ¶ 18, 193 P.3d 330, 334 (App.2008). Whether the advisory constitutes an "internal guideline" need not be addressed inasmuch as there is an existing APA-enacted rule and a statutory regime that mirrors the advisory.

statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedure or practice requirements of an agency. *Phoenix Children's Hosp. v. Arizona Health Care Cost Containment System Admin.,* 195 Ariz. 277 (1999); A.R.S. § 41-1001(17).

In the present matter, there is existing state law and a state rule, all compelling the allocation of the undergrounding costs on those directly benefitting from the undergrounding. The advisory merely parrots those statutes, and the Commission need not formally adopt a potentially redundant rule.

The Commission, however, could adopt a formal rule on allocating the costs of undergrounding, if it so chose, as long as the formal rule was consistent with state law. The challenge to the undergrounding advisory pertains directly to rate making (i.e., can the costs of undergrounding be shared among all ratepayers), a core function of the Commission and one over which it has plenary authority. Thus, if the Commission so chose, it could enact the advisory as a stand-alone rule. Whether it should do so is a decision it can deliberate upon,[8] but the fact remains the advisory policy is itself consistent with an APA-enacted undergrounding cost rule and two statutory undergrounding cost statutes.

The Commission has the Constitutional authority to establish rules that pertain to public service corporation rates. The advisory statement at issue clearly pertains to the costs of undergrounding of utilities and the exclusion of those costs from being foisted upon classes of ratepayers who did not request, and do not benefit from, the undergrounding of utilities. This is within the Commission's Constitutional authority and is aligned with legislative policy.

---

[8] The rules pertaining to rate making can be created and enacted by the Commission without approval of the Attorney General or the APA. *See U S West Communications, Inc. v. Arizona Corp. Com'n*, 197 Ariz. 16 (1999) (appellate court invalidated some Commission rules that were not ratemaking rules and affirmed other rules that were rate making rules, none of which had APA or attorney general review). Courts in general grant deference to the agency's interpretation of statutes and its own regulations. *Arizona State University ex rel. Arizona Bd. of Regents v. Arizona State Retirement System*, 237 Ariz. 246 (2015).

The language in Decision No. 79140 stems from an existing rule and statutory scheme and is therefore valid. Under the rule, A.A.C. R14-2-206(b)(2)(c), whoever requests the undergrounding, and whoever benefits from it geographically (the adjoining properties) must pay for the undergrounding costs: "[a] customer requesting an underground service line in an area served by overhead facilities shall pay for the difference between an overhead service connection and the actual cost of the underground connection as a nonrefundable contribution." Thus, if a Municipality requests or mandates undergrounding, it must pay for it, not the ratepayers. This is consistent with the holding in *Arizona Pub. Serv. Co. v. Town of Paradise Valley*, 125 Ariz. 447 (Ariz. 1980), wherein the right of a municipality to require undergrounding was affirmed. However, that does not address who should pay. The Commission, through its advisory, and the Legislature, through statute, has made it clear that the customer mandating or requesting the undergrounding shall pay, and the costs cannot be shifted to all ratepayers.

E. The Guidance Does Not Exceed the Commission's Authority.

Mr. Dempsey asserts that the guidance exceeds the Commission's constitutional and statutory authority. On that basis he seeks its invalidation. This is incorrect because the Commission has plenary constitutional authority to make rules impacting rate designs.

Inasmuch as the guidance in Decision No. 79140 directly pertains to a public service corporation's recovery of costs in undergrounding utilities, Mr. Dempsey errs. The Commission has the Constitutional authority to formulate rules that pertain to rates. The Constitutional power and authority for the Corporation Commission to enact rules for rates are derived from Article 15, Section 3 of the Arizona Constitution. This section provides:

> The Corporation Commission shall have full power to, and shall, prescribe just and reasonable classifications to be used, and just and reasonable rates and charges to be made and collected, by public service corporations within the state for service rendered therein, ***and make reasonable rules, regulations, and orders***, by which such corporations shall be governed in the transaction of business within the state.

Arizona Constitution, Art. 15, Sec. 3 (emphasis added). *See State v. Tucson Gas, Elec. Light & Power Co.*, 15 Ariz. 294, 301, 138 P. 781, 784 (1914).

The Arizona Supreme Court has "repeatedly held that the power to make reasonable rules and regulations and orders by which a corporation shall be governed refers to the power to prescribe just and reasonable classifications and just and reasonable rates and charges." *U.S. West Comms v. Arizona Corporation Commission*, 197 Ariz. 16, 23, 3 P.3d 936, 943 (Az. App. 1999) *citing Tonto Creek Homeowners v. Arizona Corporation* 177 Ariz. 49, 56,

864 P.2d 1082, 1088 (App. 1993) (*quoting Williams v. Pipe Trades Indus. Program of Ariz.*, 100 Ariz. 14, 17, 409 P.2d 720, 722 (1966)).

The Commission is directly vested with rule making authority under the Arizona Constitution, Art. 15, Sec. 3, which means that no legislative action is necessary for the Commission to exercise its ratemaking powers, and it has exclusive authority to set rates and charges. *Johnson Utilities, L.L.C. v. Arizona Corporation Commission*, 249 Ariz. 215, 221, 468 P.3d 1176, 1182 (2020). Additionally, the rules and regulations related to ratemaking issued by the Commission do not require attorney general certification to be effective. Ariz. Const. Art. 15, § 3; *Phelps Dodge Corp. v. Arizona Elec. Power Co-op., Inc.*, 207 Ariz. 95, 115, 83 P.3d 576, 593 (App. 2004). Where the Commission is implementing rules pursuant to its constitutional authority, the rules are not subject to review by the executive branch. *State ex rel. Corbin v. Arizona Corporation Commission*, 174 Ariz. 216, 219, 848 P.2d 301, 304 (App.1992).[9]

The Office of General Counsel concludes that the Commission has the constitutional authority to create a formal rule if it so chooses, as set forth as A.A.C. R14-2-206(b)(2)(c), which the guidance set forth in Commission Decision No. 79140, ¶ 15 reiterated.

F. Is the Guidance a "rule" that should be formally adopted?

Agency guidelines, policies, suggestions or practices may need to be adopted as a rule under the APA when certain criteria are met. The APA defines a "rule" as:

> an agency statement of general applicability that implements, interprets or prescribes law or policy, or describes the procedure or practice requirements of an agency. Rule includes prescribing fees or the amendment or repeal of a prior rule but does not include intraagency memoranda that are not delegation agreements.

A.R.S. § 41–1001(19). The question here is whether the undergrounding guidance in the Decision rises to the level of a "policy" or is simply a reminder of state law and existing rule. Since several state laws require payment by the requesting customer, and the APA enacted rule also mandates the requesting party to pay for undergrounding, the advisory merely reiterates the obvious—the Commission will follow the law and it will not allow costs for undergrounding to be included in general rates. There is not a requirement to

[9] However, submitting a proposed rule to the Attorney General for review under the APA for purposes of determining if the rule is clear, concise, and understandable, if not also within the Commission's authority, can be done voluntarily. If a reviewing court were to conclude, as was done in *U.S. West*, that the rule should have been reviewed under the APA, then there is no harm in submitting to review.

adopt the guidance as a formal rule. The Decision recites what is state law. Adopting a formal rule would be duplicative to some extent.

In addition, A.R.S. § 40-346(F) grants the Commission the authority to issue an order "establishing the underground conversion service" and the Commission "***shall set forth the underground conversion costs to be charged to each lot or parcel.***" Thus, the Commission policy mirrors state law and state law directs the Commission on allocating costs to the parcel owner of the adjoining property. The costs for undergrounding cannot be included in a generalized rate, but must be assessed against the property owners directly benefitting from undergrounding in the geographic adjacent area.

These regulations and statutes collectively govern the process of undergrounding electrical transmission lines in Arizona, ensuring that the projects are economically feasible, technically sound, and fairly assessed to benefiting property owners. The Decision advisory merely repeats existing law.[10]

State law requires the costs of undergrounding to be borne by the beneficiaries of undergrounding, which is precisely what the Commission guidance emphasized in Decision No. 79140. For example, local governments have the authority to require the undergrounding of utility lines within their boundaries, absent a clear statewide preemptive policy. *Arizona Public Service Co. v. Town of Paradise Valley*, 125 Ariz. 447 (1980). The legislature has given cities and towns the power to require the undergrounding of utility lines as part of their zoning powers. *Town of Paradise Valley*, 125 Ariz. at 450-452.

However, the decision to mandate undergrounding is separate from the allocation of costs of undergrounding. As explained, conversion areas and improvement areas are allowed, but the costs are assessed to property owners within the underground conversion service area who benefit from the conversion or undergrounding. A.R.S. § 40-342. As set forth in statute:

> F. A summary of the estimate of the costs to be assessed against each lot or parcel of real property located within the proposed underground conversion service area for the conversion of facilities within public places and the estimated costs to be assessed to each lot or parcel of real property for placing

[10] The Commission has jurisdiction over some undergrounding, as conveyed by the Legislature: The Commission has adopted rules that impact and regulate single-phase undergrounding. *See* A.C.C. R14-2-207(E) (regulating "Single phase underground extensions"); (E)(2) ("The utility shall construct or cause to be constructed and shall own, operate, and maintain all underground electric distribution and service lines along public streets"); (d) "Underground service lines from underground residential distribution systems shall be owned, operated and maintained by the utility, and shall be installed pursuant to its effective underground line extension and service connection tariffs on file with the Commission").

> underground the facilities of the public service corporation or public agency located within the boundaries of each parcel or lot then receiving service shall be mailed by the public service corporation or public agency to each owner of real property located within the proposed underground conversion service area to the address of such owner as set forth on the petition for the cost study.

A.R.S. § 40-342(F). The Commission policy comports with Commission rules and state law. The costs of undergrounding are to be paid for by the customers requesting and benefiting from the undergrounding.

The policy at issue in Decision No. 79140 is reflected in the Commission's rules. Specifically, A.A.C. R14-2-206(b)(2)(c) states that, regarding company provided facilities, "[a] customer requesting an underground service line in an area served by overhead facilities shall pay for the difference between an overhead service connection and the actual cost of the underground connection as a nonrefundable contribution." *Id.* This rule supports the Commission's position because it indicates both that the Commission retains the authority to allocate undergrounding costs, and that Commission previously adopted a rule like its policy at issue.

Mr. Dempsey cites *Arizona Pub. Serv. Co. v. Town of Paradise Valley*, 125 Ariz. 447 (1980) and *Tucson Electric Power, Co. v. City of Tucson*, Pima County Sup. Ct., Case No. C20235484 (2024), but these decisions do not support Mr. Dempsey's position. The Commission advisory does not preclude or limit a municipality's right to require undergrounding. The Commission advisory merely parrots state law and policy on the allocation of the costs of undergrounding.

\\\

\\\

\\\

The Petition is denied. The Commission advisory is a restatement of existing law and public policy. While the Commission could adopt another formal rule on allocation of undergrounding costs, it is not required to do so.

Sincerely,

Douglas Clark

RE: A.R.S. 41-1033 Petition to Repeal Policy Statement 3 of Decision 79140

Dear Legal Division,

Pursuant to A.R.S. 41-1033, Underground Arizona is petitioning the Arizona Corporation Commission ("ACC") to repeal Policy Statement 3 of Decision 79140 ("PS3"), adopted on October 4, 2023, which is being treated as a rule.[1] Pursuant to A.R.S. 41-1033(G), PS3 "is not specifically authorized by statute, exceeds the agency's statutory authority, [and] is unduly burdensome."

In Line Siting Case 232, in Finding of Fact 10 of the Certificate of Environment Compatibility filed on July 29, 2024, PS3 was used by the Line Siting Committee to determine that any incremental undergrounding cost borne by ratepayers or the utility was unrecoverable and therefore local ordinances and plans creating such costs were "unreasonably restrictive and compliance therewith [was] not feasible in view of technology available" under A.R.S. 40-360.06(D).[2,3,4] Therefore, the ACC attempted to pre-empt local laws in the line-siting process via a ratepayer recovery pre-determination based on a mere policy statement that went through no formal, public rulemaking process and no ratemaking process.

As the record in Line Siting Case 232 shows, Arizona utilities regularly recover the cost of undergrounding transmission (and distribution) lines from ratepayers—even where that

[1] Docket ALS-00000A-22-0320.
[2] Docket L-00000C-24-0118-00232. Finding of Fact 10 and Conditions 3 and 4.
[3] To add insult to injury, in that very case, the utility's application included the incremental cost of undergrounding many miles of distribution lines at millions of dollars in ratepayer expense. The utility also testified that the ratio of distribution to transmission lines in a municipality was about 15:1. As such, if $15 million is spent undergrounding 15 miles of distribution lines, spending $15 million to underground 1 mile of transmission lines should be an equally prudent expense.
[4] And that's to say nothing of the fact that the depreciated cost to ratepayers would be insignificant by any reasonable definition of significance. Otherwise, all a utility's expenses are significant.

undergrounding is not required by law.[5] Indeed, the applicant could not produce a single example of a utility ever being denied the recovery of the incremental costs of undergrounding an electric line, whether that undergrounding was required by law or not.

To that point, the Arizona courts have repeatedly interpreted Arizona's laws as allowing municipalities to require transmission (and distribution) undergrounding at utility expense.[6] Expenses required by law cannot be reasonably determined imprudent and unrecoverable and such a determination would not make those laws unenforceable—it would merely create an undue burden on the utilities. Moreover, the ACC cannot change the law or extend and intermingle its powers through policy statements.[7]

While the ACC has the *ex-post* power to determine what expenses are recoverable from ratepayers in the ratemaking process, it does not have the *ex-ante* power or expertise to make such determinations in the line siting process. PS3 improperly attempts to confuse and transpose these independent statutory powers to *ex-ante* determine what expenses are recoverable from ratepayers. Therefore, PS3 is not authorized by statute, the ACC has exceeded its statutory authority, and it has created undue burdens on the parties.

The ACC's own legal counsel warned of this on June 14, 2023, months before PS3 was adopted: *"It would not be appropriate to adopt a rule regarding ratepayer recovery as part of the line siting rules, however. The Line Siting Committee has no jurisdiction over rates and a line siting rule regarding ratepayer recovery would therefore be outside the scope of authority granted under the line siting statute. Additionally, the Line Siting Committee does not have jurisdiction over underground transmission lines."*[8]

As such, we request that PS3 be repealed pursuant to A.R.S. 41-1033.

Sincerely,

~~Daniel~~ Dempsey
Underground Arizona

41-1033. Petition for a rule or review of an agency practice, substantive policy statement, final rule or unduly burdensome licensing requirement; notice

A. Any person may petition an agency to do either of the following:

1. Make, amend or repeal a final rule.

2. Review an existing agency practice or substantive policy statement that the petitioner alleges to constitute a rule.

B. An agency shall prescribe the form of the petition and the procedures for the petition's submission, consideration and disposition. The person shall state on the petition the rulemaking to review or the agency practice or substantive policy statement to consider revising, repealing or making into a rule.

C. Not later than sixty days after submission of the petition, the agency shall either:

1. Reject the petition and state its reasons in writing for rejection to the petitioner.

2. Initiate rulemaking proceedings in accordance with this chapter.

3. If otherwise lawful, make a rule.

D. The agency's response to the petition is open to public inspection.

E. If an agency rejects a petition pursuant to subsection C of this section, the petitioner has thirty days to appeal to the council to review whether the existing agency practice or substantive policy statement constitutes a rule. The petitioner's appeal may not be more than five double-spaced pages.

F. A person may petition the council to request a review of a final rule based on the person's belief that the final rule does not meet the requirements prescribed in section 41-1030. A petition submitted under this subsection may not be more than five double-spaced pages.

G. A person may petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern. On receipt of a properly submitted petition pursuant to this section, the council shall review the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement as prescribed by this section. A petition submitted under this subsection may not be more than five double-spaced pages. This subsection does not apply to an individual or institution that is subject to title 36, chapter 4, article 10 or chapter 20.

H. If the council receives information that alleges an existing agency practice or substantive policy statement may constitute a rule, that a final rule does not meet the requirements prescribed in section 41-1030 or that an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or does not meet the guidelines prescribed in subsection G of this section, or if the council receives an appeal under subsection E of this section, and at least three council members request of the chairperson that the matter be heard in a public meeting:

1. Within ninety days after receiving the third council member's request, the council shall determine whether any of the following applies:

(a) The agency practice or substantive policy statement constitutes a rule.

(b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

2. Within ten days after receiving the third council member's request, the council shall notify the agency that the matter has been or will be placed on the council's agenda for consideration on the merits.

3. Not later than thirty days after receiving notice from the council, the agency shall submit a statement of not more than five double-spaced pages to the council that addresses whether any of the following applies:

(a) The existing agency practice or substantive policy statement constitutes a rule.

(b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

I. At the hearing, the council shall allocate the petitioner and the agency an equal amount of time for oral comments not including any time spent answering questions raised by council members. The council may also allocate time for members of the public who have an interest in the issue to provide oral comments.

J. For the purposes of subsection H of this section, the council meeting shall not be scheduled until the expiration of the agency response period prescribed in subsection H, paragraph 3 of this section.

K. An agency practice, substantive policy statement, final rule or regulatory licensing requirement considered by the council pursuant to this section shall remain in effect while under consideration of the council. If the council determines that the agency practice, substantive policy statement or regulatory licensing requirement exceeds the agency's statutory authority, is not authorized by statute or constitutes a rule or that the final rule does not meet the requirements prescribed in section 41-1030, the practice, policy statement, rule or regulatory licensing requirement shall be void. If the council determines that the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern, the council shall modify, revise or declare void any such existing agency practice, substantive policy statement, final rule or regulatory licensing requirement. If an agency decides to further pursue a practice, substantive policy statement or regulatory licensing requirement that has been declared void or has been modified or revised by the council, the agency may do so only pursuant to a new rulemaking.

L. A council decision pursuant to this section shall be made by a majority of the council members who are present and voting on the issue. Notwithstanding any other law, the council may not base any decision concerning an agency's compliance with the requirements of section 41-1030 in issuing a final rule or substantive policy statement on whether any party or person commented on the rulemaking or substantive policy statement.

M. A decision by the council pursuant to this section is not subject to judicial review, except that, in addition to the procedure prescribed in this section or in lieu of the procedure prescribed in this section, a person may seek declaratory relief pursuant to section 41-1034.

N. Each agency and the secretary of state shall post prominently on their websites notice of an individual's right to petition the council for review pursuant to this section.

40-360.06. Factors to be considered in issuing a certificate of environmental compatibility

A. The committee may approve or deny an application and may impose reasonable conditions on the issuance of a certificate of environmental compatibility and in so doing shall consider the following factors as a basis for its action with respect to the suitability of either plant or transmission line siting plans:

1. Existing plans of this state, local government and private entities for other developments at or in the vicinity of the proposed site.

2. Fish, wildlife and plant life and associated forms of life on which they are dependent.

3. Noise emission levels and interference with communication signals.

4. The proposed availability of the site to the public for recreational purposes, consistent with safety considerations and regulations.

5. Existing scenic areas, historic sites and structures or archaeological sites at or in the vicinity of the proposed site.

6. The total environment of the area.

7. The technical practicability of achieving a proposed objective and the previous experience with equipment and methods available for achieving a proposed objective.

8. The estimated cost of the facilities and site as proposed by the applicant and the estimated cost of the facilities and site as recommended by the committee, recognizing that any significant increase in costs represents a potential increase in the cost of electric energy to the customers or the applicant.

9. Any additional factors that require consideration under applicable federal and state laws pertaining to any such site.

B. The committee shall give special consideration to the protection of areas unique because of biological wealth or because they are habitats for rare and endangered species.

C. Notwithstanding any other provision of this article, the committee shall require in all certificates for facilities that the applicant comply with all applicable nuclear radiation standards and air and water pollution control standards and regulations, but shall not require either of the following:

1. Compliance with performance standards other than those established by the agency having primary jurisdiction over a particular pollution source.

2. That a contractor, subcontractor, material supplier or other person engaged in the construction, maintenance, repair or improvement of any project subject to approval of the commission negotiate, execute or otherwise become a party to any project labor agreement, neutrality agreement as defined in section 34-321, apprenticeship program participation or contribution agreement or other agreement with employees, employees' representatives or any labor organization as a condition of or a factor in the commission's approval of the project. This paragraph does not:

(a) Prohibit private parties from entering into individual collective bargaining relationships.

(b) Regulate or interfere with activity protected by law, including the national labor relations act.

D. Any certificate granted by the committee shall be conditioned on compliance by the applicant with all applicable ordinances, master plans and regulations of the state, a county or an incorporated city or town, except that the committee may grant a certificate notwithstanding any such ordinance, master plan or regulation,

exclusive of franchises, if the committee finds as a fact that compliance with such ordinance, master plan or regulation is unreasonably restrictive and compliance therewith is not feasible in view of technology available. When it becomes apparent to the chairman of the committee or to the hearing officer that an issue exists with respect to whether such an ordinance, master plan or regulation is unreasonably restrictive and compliance therewith is not feasible in view of technology available, the chairman or hearing officer shall promptly serve notice of such fact by certified mail on the chief executive officer of the area of jurisdiction affected and, notwithstanding any provision of this article to the contrary, shall make such area of jurisdiction a party to the proceedings on its request and shall give it an opportunity to respond on such issue.

IN THE MATTER OF THE APPLICATION OF TUCSON ELECTRIC POWER COMPANY, IN CONFORMANCE WITH THE REQUIREMENTS OF A.R.S. 40-360, ET SEQ., FOR A CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY AUTHORIZING THE MIDTOWN RELIABILITY PROJECT, WHICH INCLUDES THE CONSTRUCTION OF A NEW 138 KV TRANSMISSION LINE ORIGINATING AT THE EXISTING DEMOSS-PETRIE SUBSTATION (SECTION 35, TOWNSHIP 13 SOUTH, RANGE 13 EAST), WITH AN INTERCONNECTION AT THE PLANNED VINE SUBSTATION (SECTION 06, TOWNSHIP 14 SOUTH, RANGE 14 EAST), AND TERMINATING AT THE EXISTING KINO SUBSTATION (SECTION 30, TOWNSHIP 14 SOUTH, RANGE 14 EAST), EACH LOCATED WITHIN THE CITY OF TUCSON, PIMA COUNTY, ARIZONA.

DOCKET NO. L-00000C-24-0118-00232

CASE NO. 232

DECISION NO. 79550

ORDER

September 5, 2024
Open Meeting

BY THE COMMISSION:

Pursuant to A.R.S. § 40-360 et seq., after due consideration of all relevant matters, the Arizona Corporation Commission ("Commission") finds and concludes that the Certificate of Environmental Compatibility ("CEC") issued by the Arizona Power Plant and Transmission Line Siting Committee ("Siting Committee") is hereby approved as granted by this Order.

The Commission, in reaching its decision, has balanced all relevant matters in the broad public interest, including the need for an adequate, economical, and reliable supply of electric power with the desire to minimize the effect thereof on the environment and ecology of this state, and finds that granting the Project a CEC is in the public interest.

The Commission further finds and concludes that in balancing the broad public interest in this matter:

1. The Project is in the public interest because it aids the state in meeting the need for an adequate, economical, and reliable supply of electric power.

2. In balancing the need for the Project with its effect on the environment and ecology of the state, the conditions placed on the CEC effectively minimize its impact on the environment and ecology of the state.

3. The conditions placed on the CEC resolve matters concerning the need for the Project and its impact on the environment and ecology of the state raised during the course of proceedings and, as such, serve as the findings on the matters raised.

4. In light of these conditions, the balancing in the broad public interest results in favor of granting the CEC.

BEFORE THE ARIZONA POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE

IN THE MATTER OF THE APPLICATION OF TUCSON ELECTRIC POWER COMPANY, IN CONFORMANCE WITH THE REQUIREMENTS OF A.R.S. § 40-360, ET SEQ., FOR A CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY AUTHORIZING THE MIDTOWN RELIABILITY PROJECT, WHICH INCLUDES THE CONSTRUCTION OF A NEW 138 KV TRANSMISSION LINE ORIGINATING AT THE EXISTING DEMOSS-PETRIE SUBSTATION (SECTION 35, TOWNSHIP 13 SOUTH, RANGE 13 EAST), WITH AN INTERCONNECTION AT THE PLANNED VINE SUBSTATION (SECTION 06, TOWNSHIP 14 SOUTH, RANGE 14 EAST), AND TERMINATING AT THE EXISTING KINO SUBSTATION (SECTION 30, TOWNSHIP 14 SOUTH, RANGE 14 EAST), EACH LOCATED WITHIN THE CITY OF TUCSON, PIMA COUNTY, ARIZONA.	Docket No. L-00000C-24-0118-232 Case No. 232 **CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY**

A. INTRODUCTION

Pursuant to notice given as provided by law, the Arizona Power Plant and Transmission Line Siting Committee ("Committee") held public hearings in Tucson, Arizona, on July 8, 2024, through July 19, 2024, in conformance with the requirements of Arizona Revised Statutes ("A.R.S.") § 40-360 *et seq.* for the purpose of receiving evidence and deliberating on the May 24, 2024 Application of Tucson Electric Power Company ("TEP" or "Applicant") for a Certificate of Environmental Compatibility ("Certificate") authorizing construction of a 138 kilovolt ("kV") transmission line in Tucson, Arizona in Pima County (the "Midtown Reliability Project" or "Project").

The following members and designees of members of the Committee were

present at one or more of the hearing days for the evidentiary presentations, public comment and/or the deliberations:

Adam Stafford	Chairman, Designee for Arizona Attorney General Kris Mayes
Gabby Mercer	Designee of the Chairman, Arizona Corporation Commission ("Commission")
Leonard Drago	Designee for Director, Arizona Department of Environmental Quality
David French[1]	Designee for Director, Arizona Department of Water Resources
Nicole Hill	Designee for Director, Governor's Energy Office
Scott Somers	Appointed Member, representing cities and towns
David Kryder	Appointed Member, representing agricultural interests
Margaret "Toby" Little	Appointed Member, representing the general public
Jon Gold	Appointed Member, representing the general public
David Richins	Appointed Member, representing the general public

The Applicant was represented by Meghan H. Grabel and Elias J. Ancharski of Osborn Maledon, P.A. and in-house counsel for TEP, Megan C. Hill. The following parties were granted intervention pursuant to A.R.S. § 40-360.05: Banner—University Medical Center Tucson Campus, LLC and Banner Health represented by Michelle De Blasi of the Law Office of Michelle De Blasi; City of Tucson represented by Roi I. Lusk and Jennifer J. Stash; Pima County represented by Bobby Yu; and Underground Arizona represented by Daniel Dempsey.

At the conclusion of the hearing, the Committee, after considering the (i) Application, (ii) evidence, testimony, and exhibits presented by the parties, and (iii) comments of the public, and being advised of the legal requirements of A.R.S. §§ 40-360 through 40-360.13, upon motion duly made and seconded, voted 9 to 0 in

[1] Member French was excused from the second week of the hearing and did not participate in the vote.

favor of granting Applicant, its successors and assigns, this Certificate for the construction of the Project.

B. Overview Project Description

The Project will involve the construction of the new DeMoss Petrie-to-Vine-to-Kino 138 kV transmission line approximately 8.5 miles in length mounted on steel monopole structures. The Project will loop the existing TEP DeMoss Petrie ("DMP") 138 kV Substation to the existing TEP Kino 138 kV Substation with a connection at the planned Vine 138 kV Substation. TEP's preferred route is a combination of Alternative Routes B and 4.

DeMoss Petrie-to-Vine Alternatives

Alternative Route B (Preferred Route) – Preferred Route B leaves the existing DMP Substation to the southeast for a distance of 0.3 miles, turning east for approximately 2 miles on West Grant Road, which turns into East Grant Road at North Stone Avenue. Route B turns south on North Park Avenue for approximately 0.6 miles, then east onto East Adams Street for approximately 0.4 miles, then north on North Vine Avenue for approximately 0.16 miles, terminating at the planned Vine Substation. Alternative Route B is approximately 3.5 miles in length.

Alternative Route D – Alternative Route D leaves the existing DMP Substation to the southeast for a distance of 0.3 miles, turning east on West Grant Road for approximately 2.75 miles, which turns into East Grant Road at North Stone Avenue. Alternative Route D continues east along East Grant Road to North Campbell Avenue, where it turns south to an alignment centered between East Lester Street and North Ring Road for approximately 0.4 miles, turning west for approximately 0.35 miles, where it terminates at the planned Vine Substation. Alternative Route D is approximately 3.8 miles in length.

Vine-to-Kino Alternatives

Alternative Route 4 (Preferred Route) – Preferred Route 4 leaves the planned Vine Substation to the south on North Vine Avenue for a distance of 0.16 miles, turns west on East Adams Street for approximately 0.4 miles, and south onto North Park Avenue for approximately 0.3 miles. At East Speedway Boulevard the route turns west for approximately 0.15 miles, then south on North Euclid Avenue for approximately 1.1 miles, continuing to East 12th Street where it turns west for approximately 0.05 miles and then south for approximately 0.11 miles to span East Aviation Parkway and the Union Pacific Railroad. At South Toole Avenue Route 4 turns south for approximately 0.55 miles, following South Toole Avenue until it turns into South Euclid Avenue at East 16th Street. At East 19th Street the route jogs east for approximately 0.03 miles to then turn south for approximately 1.3 miles to continue on South Euclid Avenue. Route 4 turns east onto East 36th Street for approximately 0.78 miles, which it follows to terminate at the existing Kino Substation. Alternative Route 4 is approximately 5.0 miles in length.

Alternative Route 1 – Alternative Route 1 leaves the planned Vine Substation to the east on an alignment centered between East Lester Street and North Ring Road to North Campbell Avenue for a distance of 0.33 miles. At North Campbell Avenue the route turns south, continuing onto South Campbell Avenue at East Broadway Boulevard for approximately 2.8 miles. Route 1 crosses East Aviation Parkway and the Union Pacific Railroad, and continues on South Campbell Avenue where it intersects with East 22nd Street. At the intersection with East Fairland Stravenue, the route turns southwest onto East Willis Way for approximately 0.1 miles, then southeast on South Cherrybell

Stravenue for approximately 0.1 miles, and southwest onto East Silverlake Road for approximately 0.2 miles. Just east of South Warren Avenue, the route turns south onto an alley for approximately 0.03 miles, and then east for approximately 0.04 miles to the intersection of East Barleycorn Lane and South Martin Avenue, where it turns south onto South Martin Avenue, which it follows for approximately 0.5 miles to the intersection with East 36th Street. Route 1 turns west onto East 36th Street for approximately 0.05 miles, and then terminates at the existing Kino Substation.

Alternative Route 1.2 – Alternative Route 1.2 leaves the planned Vine Substation to the south along Vine Road to Mabel Street for a distanced of 0.2 miles. At Mabel Street the route turns east for 0.1 miles to Cherry Avenue. Route 1.2 turns south for a distance of 0.2 miles to Speedway Boulevard. At Speedway Boulevard the route turns east to Campbell Avenue for a distance of 0.25 miles then south on Campbell Avenue continuing onto South Campbell Avenue at East Broadway Boulevard for approximately 1.9 miles. Route 1.2 crosses East Aviation Parkway and the Union Pacific Railroad, and continues on South Campbell Avenue where it intersects with East 22nd Street. At the intersection with East Fairland Stravenue, the route turns southwest onto East Willis Way for approximately 0.1 miles, then southeast on South Cherrybell Stravenue for approximately 0.1 miles, and southwest onto East Silverlake Road for approximately 0.2 miles. Just east of South Warren Avenue, the route turns south onto an alley for approximately 0.03 miles, and then east for approximately 0.04 miles to the intersection of East Barleycorn Lane and South Martin Avenue, where it turns south onto South Martin Avenue, which it follows for approximately 0.5 miles to the intersection with East 36th Street. Route 1.2 turns west onto East 36th Street for approximately 0.05 miles, and then terminates at the existing Kino Substation.

The Committee approves the preferred route, B4, and alternative routes D, 1, and 1.2 in their entirety, subject to the Findings of Fact and Conclusions of Law contained herein. A map of the Project, including all of the preferred and alternative routes proposed by the Applicant, is included as **Exhibit A**. Maps of the final approved routes and their respective corridor widths are attached as **Exhibit B**.

CONDITIONS

This Certificate is granted upon the following conditions:

1. This authorization to construct the Project shall expire ten (10) years from the date this Certificate is approved by the Commission, with or without modification ("Time Period"). Construction of the Project shall be complete, defined as the Project being in-service, within this Time Period. However, prior to the expiration of the Time Period, the Applicant may request that the Commission extend the Time Period.

2. In the event that the Project requires an extension of the term(s) of this Certificate prior to completion of construction, the Applicant shall file such time extension request at least one hundred and eighty (180) days prior to the expiration of the Certificate. The Applicant shall use reasonable means to promptly notify the City of Tucson, the City of South Tucson, Pima County, Arizona Department of Transportation ("ADOT"), Arizona State Land Department ("ASLD"), and all landowners and residents within a one (1) mile radius of the centerline of the Project, all persons who made public comment at this proceeding who provided a mailing or email address, and all parties to this proceeding. The notification provided will include the request and the date, time, and place of the hearing or open meetings during which the Commission will consider the request for extension. Notification shall be no more than three (3) business days after the Applicant is made aware of the hearing date or the open meeting date.

3. Subject to this Committee's findings as set forth in the Findings of Fact and Conclusions of Law, during the development, construction, operation, maintenance and reclamation of the Project, the Applicant shall comply with all existing applicable air and water pollution control standards and regulations, and with all existing applicable statutes, ordinances, master plans and regulations of any governmental entity having jurisdiction including, but not limited to, the United States of America, the State of Arizona, Pima County, the City of Tucson, the City of South Tucson, and their agencies and subdivisions, including but not limited to the following:

(a) All applicable land use regulations;

(b) All applicable zoning stipulations and conditions including, but not limited to, landscaping and dust control requirements;

(c) All applicable water use, discharge and/or disposal requirements of the Arizona Department of Water Resources and the Arizona Department of Environmental Quality;

(d) All applicable noise control standards; and

(e) All applicable regulations governing storage and handling of hazardous chemicals and petroleum products.

4. Subject to this Committee's findings as set forth in the Findings of Fact and Conclusions of Law, the Applicant shall obtain all approvals and permits necessary to construct, operate and maintain the Project required by any governmental entity having jurisdiction including, but not limited to, the United States of America, the State of Arizona, Pima County, the City of Tucson, the City of South Tucson, and their agencies and subdivisions.

5. The Applicant shall comply with the Arizona Game and Fish Department ("AGFD") guidelines for handling protected animal species, should any be encountered during construction and operation of the Project, and shall consult

with AGFD or U.S. Fish and Wildlife Service, as appropriate, on other issues concerning wildlife.

6. The Applicant shall design the Project's facilities to incorporate reasonable measures to minimize electrocution of and impacts to avian species in accordance with the Applicant's avian protection program. Such measures will be accomplished through incorporation of Avian Power Line Interaction Committee guidelines set forth in the current versions of *Suggested Practices for Avian Protection on Power Lines* and *Reducing Avian Collisions with Power Lines manuals*.

7. The Applicant shall consult the State Historic Preservation Office ("SHPO") pursuant to A.R.S. § 41-861 through 41-864, the State Historic Preservation Act. Construction for the Project shall not occur without SHPO concurrence. Any project involving federal land is a federal undertaking and requires SHPO concurrence on the adequacy of the survey and area of potential effects. The Applicant shall coordinate with SHPO regarding the status of Section 106 consultation.

8. If any archaeological, paleontological, or historical site or a significant cultural object is discovered on private, state, county, or municipal land during the construction or operation of the Project, the Applicant or its representative in charge shall promptly report the discovery to the Director of the Arizona State Museum ("ASM"), and in consultation with the Director, shall immediately take all reasonable steps to secure and maintain the preservation of the discovery as required by A.R.S. § 41-844 or A.R.S. § 41-865, as appropriate.

9. The Applicant shall comply with the notice and salvage requirements of the Arizona Native Plant Law (A.R.S. § 3-901 *et seq.*) and shall, to the extent feasible, minimize the destruction of native plants during the construction and operation of the Project.

10. The Applicant shall make every reasonable effort to promptly investigate, identify, and correct, on a case-specific basis, all complaints of interference with radio or television signals from operation of the Project addressed in this Certificate and where such interference is caused by the Project take reasonable measures to mitigate such interference. The Applicant shall maintain written records for a period of five (5) years of all complaints of radio or television interference attributable to operations, together with the corrective action taken in response to each complaint. All complaints shall be recorded and shall include notation on the corrective action taken. Complaints not leading to a specific action or for which there was no resolution shall be noted and explained. Upon request, the written records shall be provided to the Staff of the Commission. The Applicant shall respond to complaints and implement appropriate mitigation measures. In addition, the Project shall be evaluated on a regular basis so that damaged insulators or other line materials that could cause interference are repaired or replaced in a timely manner.

11. If human remains and/or funerary objects are encountered during the course of any ground-disturbing activities related to the construction or maintenance of the Project, the Applicant shall cease work on the affected area of the Project and notify the Director of the ASM as required by A.R.S. § 41-865 for private land, or as required by A.R.S. § 41-844 for state, county, or municipal lands.

12. One hundred eighty (180) days prior to construction of the Project, the Applicant shall post signs in or near public rights-of-way, to the extent authorized by law, reasonably adjacent to the Project giving notice of the Project. Such signage shall be no smaller than a roadway sign. The signs shall:

(a) Advise the area is a future site of the Project;

(b) Provide a phone number and website for public information regarding the Project; and

(c) refer the public to the Docket.

Such signs shall be inspected at least once annually and, if necessary, be repaired or replaced, and removed at the completion of construction.

The Applicant shall make every reasonable effort to communicate the decision either approving or disapproving the Certificate in digital media.

The Applicant shall also communicate through its Project website the status and location of the route ultimately constructed and the removal and undergrounding of the existing utility infrastructure along that route.

13. At least ninety (90) days before construction commences on the Project, the Applicant shall provide the City of Tucson, the City of South Tucson, Pima County, ADOT, ASLD, Pascua Yaqui Tribe, and known builders and developers who are building upon or developing land within one (1) mile of the centerline of the Project with a written description, including the approximate height and width measurements of all structure types, of the Project. The written description shall identify the location of the Project and contain a pictorial depiction of the facilities being constructed. The Applicant shall also encourage the developers and builders to include this information in their disclosure statements. Upon approval of this Certificate by the Commission, the Applicant may commence construction of the Project.

14. The Applicant shall use non-specular conductor and non-reflective surfaces for the transmission line structures on the Project.

15. The Applicant shall remove all 46 kV substations and lines, including wires, poles, and other equipment, that are no longer required as a result of the upgraded 138 kV substation and transmission line. Removals are estimated to begin in 2027 and complete by 2037, based on an estimated in-service date of the Vine Substation and associated 138 kV transmission line in 2027.

16. The Applicant shall move all existing parallel overhead lower voltage distribution lines underground, currently located within the same road right-of-way as

the Project as constructed. The Applicant shall notify all joint use attachers within six (6) months of Certificate approval so they can begin design to relocate their facilities.

17. The Applicant shall collaborate with each neighborhood and/or neighborhood association that parallels the route in which the Project is ultimately constructed on residential roads to determine the preferred transmission pole finish for that neighborhood. Pole finishes may include weathering steel, galvanized, or painted in Mojave Sage. In the event the neighborhood cannot decide on a preference following a good faith effort, the Applicant will use the preferred weathering steel pole finish.

18. The Applicant will work with the City of Tucson, as part of the Project, to discuss the potential to incorporate any right-of-way enhancements into the approved route including, but not limited to, multi-use pathways, chicanes, artwork, and landscaping;

19. The Applicant shall be responsible for arranging that all field personnel involved in the Project receive training as to proper ingress, egress, and on-site working protocol for environmentally sensitive areas and activities. Contractors employing such field personnel shall maintain records documenting that the personnel have received such training.

20. The Applicant shall follow the most current Western Electricity Coordinating Council ("WECC") and North American Electric Reliability Corporation ("NERC") planning standards, as approved by the Federal Energy Regulatory Commission ("FERC"), National Electrical Safety Code ("NESC") standards, and Federal Aviation Administration ("FAA") regulations.

21. The Applicant shall participate in good faith in state and regional transmission study forums to coordinate transmission expansion plans related to the Project and to resolve transmission constraints in a timely manner.

22. When Project facilities are located parallel to and within one hundred (100) feet of any existing natural gas or hazardous pipeline, the Applicant shall:

(a) Ensure grounding and cathodic protection studies are performed to show that the Project's location parallel to and within one hundred (100) feet of such pipeline results in no material adverse impacts to the pipeline or to public safety when both the pipeline and the Project are in operation. The Applicant shall take appropriate steps to ensure that any material adverse impacts are mitigated. The Applicant shall provide to Staff of the Commission, and file with Docket Control, a copy of the studies performed and additional mitigation, if any, that was implemented as part of its annual compliance-certification letter; and

(b) Ensure that studies are performed simulating an outage of the Project that may be caused by the collocation of the Project parallel to and within one hundred (100) feet of the existing natural gas or hazardous liquid pipeline. The studies should either: (a) show that such simulated outage does not result in customer outages; or (b) include operating plans to minimize any resulting customer outages. The Applicant shall provide a copy of the study results to Staff of the Commission and file them with Docket Control as part of the Applicant's annual compliance certification letter.

23. The designation of the corridors in this Certificate, as shown in **Exhibit B**, authorizes a right-of-way no greater than 100 feet wide for the transmission line nor does it grant the applicant exclusive rights within the corridors outside of the final designated transmission right-of-way.

24. The Applicant shall submit a compliance certification letter annually, identifying progress made with respect to and current status of each condition

contained in this Certificate. The letter shall be submitted to Commission's Docket Control commencing on December 1, 2025. Attached to each certification letter shall be documentation explaining how compliance with each condition was achieved. Copies of each letter, along with the corresponding documentation, shall be submitted to the Arizona Attorney General's Office. With respect to the Project, the requirement for the compliance letter shall expire on the date the Project is placed into operation. Notification of such filing with Docket Control shall be made to the City of Tucson, the City of South Tucson, Pima County, ADOT, ASLD, the Pascua Yaqui Tribe, all parties to this Docket, and all parties who made a limited appearance in this Docket.

25. The Applicant shall provide a copy of this Certificate to the City of Tucson, the City of South Tucson, Pima County, ADOT, ASLD, and the Pascua Yaqui Tribe.

26. Any transfer or assignment of this Certificate shall require the assignee or successor to assume, in writing, all responsibilities of the Applicant listed in this Certificate and its conditions as required by A.R.S. § 40-360.08(A) and R14-3-213(F) of the Arizona Administrative Code.

27. In the event the Applicant, its assignee, or successor, seeks to modify the Certificate's terms at the Commission, it shall provide copies of such request to the City of Tucson, the City of South Tucson, Pima County, ADOT, ASLD, the Pascua Yaqui Tribe, all parties to this Docket, and all parties who made a limited appearance in this Docket.

28. The Certificate Conditions shall be binding on the Applicant, its successors, assignee(s) and transferees, and any affiliates, agents, or lessees of the Applicant who have a contractual relationship with the Applicant concerning the construction, operation, maintenance or reclamation of the Project. The Applicant shall provide in any agreement(s) or lease(s) pertaining to the Project that the contracting parties and/or lessee(s) shall be responsible for compliance with the

Conditions set forth herein, and the Applicant's responsibilities with respect to compliance with such Conditions shall not cease or be abated by reason of the fact that the Applicant is not in control of or responsible for operation and maintenance of the Project facilities.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

This Certificate incorporates the following Findings of Fact and Conclusions of Law:

1. The Midtown Reliability Project is required to ensure the continued provision of safe and reliable electric service to TEP customers.

2. While no party disputed the need for the Midtown Reliability Project, certain parties asserted that applicable local ordinances and plans required that portions of the routes be constructed below ground.

3. Constructing the Midtown Reliability Project below ground is not needed for safety, reliability, or other utility operational reasons.

4. Evidence in the record indicates that constructing portions of the Project below ground could be more expensive than constructing the route entirely above ground.

5. As part of the Project as conditioned by this Certificate, TEP will relocate existing overhead distribution lines below ground along the selected route. Additionally, the Project will enable the retirement of up to eight existing 46 kV substations and approximately 19 miles of existing 46 kV lines in the next ten years.

6. The evidence indicated that the Applicant needs the Project to be in service by 2027 to maintain safe and reliable service in order to avoid additional investment in the existing 46 kV system serving the area.

7. The Applicant determined the need for and proposed location of the Vine substation through the use of a saturation study. The actual site was selected based on available land and its immediate adjacent proximity to two (2) existing

substations, one of which is a 46 kV substation that will be retired and removed as part of this Project.

8. In light of the incremental cost of building the Project underground compared to overhead, the Applicant requested a finding from this Committee that any local ordinance or plan that would require underground construction of the Project was "unreasonably restrictive and [that] compliance therewith is not feasible in view of technology available" pursuant to A.R.S. § 40-360.06(D).

9. The City and Underground Arizona disagree that a finding of fact pursuant to A.R.S. § 40-360.06(D) is necessary and believe that it is feasible to construct the Project consistent with local ordinances and plans with the technology available and those local ordinances are not unreasonably restrictive. The Parties have reserved and asserted all rights to judicial relief on this issue.

10. However, given the Commission's Policy Statement found in Decision No. 79140 (October 4, 2023), the Committee finds pursuant to A.R.S. § 40-360.06(D) that any local ordinance or plan that requires TEP to incur an incremental cost to construct the Project below ground "is unreasonably restrictive and compliance therewith is not feasible in view of technology available." This finding is conditioned on the City and TEP not finding a means to, within six (6) months of the date of the Commission's approval of this Certificate, either (a) fund the incremental cost to construct the Project below ground from a source other than through TEP's utility rates or from TEP, its affiliates, subsidiaries, or parent companies absent agreement between the parties; or (b) obtain the City's authorization to construct the Project above ground through the City's special exception or variance process, provided that TEP files a special exception or variance application for the route approved within ten (10) weeks of the Commission's approval of this Certificate.

11. A.R.S. § 40-360.06(D) provides that "[w]hen it becomes apparent to the chairman of the committee or to the hearing officer that an issue exists with respect to

whether such an ordinance, master plan or regulation is unreasonably restrictive and compliance therewith is not feasible in view of technology available, the chairman or hearing officer shall promptly serve notice of such fact by certified mail on the chief executive officer of the area of jurisdiction affected and, notwithstanding any provision of this article to the contrary, shall make such area of jurisdiction a party to the proceedings on its request and shall give it an opportunity to respond on such issue." The City of Tucson was provided notice and made a party to the proceedings under this provision and was provided an opportunity to respond.

12. The Project aids TEP and the state in meeting the need for an adequate, economical, and reliable supply of electric power without negatively affecting the southwestern electric grid.

13. When constructed in compliance with the conditions imposed in this Certificate, the Project aids the state, preserving a safe and reliable electric transmission system.

14. During the course of the hearing, the Committee considered evidence on the environmental compatibility of the Project as required by A.R.S. § 40-360 *et seq*. In doing so, the Committee determined that it was in the public interest to adopt Preferred Routes B and 4, and Alternatives D, 1, and 1.2, which are the final approved routes shown in **Exhibit B**.

15. The Project and the conditions placed on the Project in this Certificate effectively minimize the impact of the Project on the environment and ecology of the state.

16. The conditions placed on the Project of this Certificate resolve matters concerning balancing the need for the Project with its impact on the environment and ecology of the state arising during the course of the proceedings, and, as such, serve as finding and conclusions on such matters.

17. The Project is in the public interest because the Project's contribution to meeting the need for an adequate, economical, and reliable supply of electric power outweighs the minimized impact of the Project on the environment and ecology of the state.

18. The Project substation is not jurisdictional because the definition of a "transmission line" under A.R.S. § 40-360(10) only includes "new switchyards to be used therewith," not substations.

DATED this 29th day of July, 2024.

THE ARIZONA POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE

By: _____
Adam Stafford, Chairman

CERTIFICATION OF MAILING

Pursuant to A.A.C. R14-3-204, the **ORIGINAL** of the foregoing and 26 copies were filed this 29th day of July, 2024 with:

KEVIN THOMPSON
Commissioner
NICK MYERS
Commissioner

IN THE MATTER OF SUBSTANTIVE POLICY STATEMENTS TO GUIDE THE ARIZONA POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE.	DOCKET NO. ALS-00000A-22-0320 DECISION NO. 79140 ORDER

Open Meeting
September 21, 2023
Phoenix, Arizona

FINDINGS OF FACT

1. On December 23, 2023, Arizona Corporation Commission ("Commission") Chairwoman Márquez Peterson opened this docket by memorandum to consider the adoption of a substantive policy statement to guide the Arizona Power Plant and Transmission Line Siting Committee ("Line Siting Committee" or "Committee").

2. On January 5, 2023, Chairwoman Márquez Peterson docketed a letter and notice of inquiry seeking feedback on a potential policy statement.

3. On February 8, 2023, Arizona Electric Power Cooperative, Inc., ("AEPCO") Salt River Project Agricultural Improvement and Power District ("SRP"), Tucson Electric Power Company ("TEP"), and UNS Electric, Inc. ("UNSE") (collectively, "Affected Utilities") filed joint Comments in this docket.

4. On February 16, 2023, Arizona Public Service Company filed a Response in this docket.

5. On February 20, 2023, the Affected Utilities filed joint Comments in this docket.

6. On March 14, 2023, Strata Clean Energy filed Comments in this docket.

7. On March 30, 2023, AEPCO, TEP, and UNSE filed joint Comments in this docket.

8. On May 5, 2023, Commissioner Myers docketed a letter requesting that Commission Utilities Division Staff ("Staff") and the Commission Legal Division ("Legal Division") respond to seven proposals for potential policy statements detailed in Commissioner Myers' letter.

9. On June 6, 2023, Southwestern Power Group filed a Response in this docket.

10. On June 14, 2023, Staff and the Legal Division filed their Response to Commissioner Myers' letter.

11. On June 19, 2023, SRP filed Comments in this docket.

12. On June 27, 2023, TEP and UNSE filed a joint Response in this docket.

13. On August 9, 2023, the proposals contained in Commissioner Myers' letter were discussed and considered at the Staff Open Meeting.

14. At the August 9, 2023, Staff Open Meeting, the Legal Division was directed to prepare a policy statement addressing proposals one and two in Commissioner Myers' letter concerning substations and hybrid hearings.

15. Attached to this Order as Attachment A is the Legal Division's recommendation for the Arizona Corporation Commission Policy Statement regarding Practice and Procedure Before the Power Plant and Transmission Line Siting Committee for Commission consideration. We adopt Legal Division's recommendation; however, the Commission's Policy Statement shall also include the following policy statement:

> 3. The Commission does not have jurisdiction over the undergrounding of electric transmission lines. A.R.S. § 40-360(10). Installing electric transmission lines

> underground is much more expensive than building them above ground. Underground transmission lines also can be more costly and challenging to maintain and repair. As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates. Third parties, including cities, customers, and neighborhood groups, seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. § 48-620 *et. seq.*

CONCLUSIONS OF LAW

1. The Commission has jurisdiction over the subject matter in this proceeding pursuant to Titles 40 and 41 of the Arizona Revised Statutes.

2. The Commission, having reviewed Attachment A and the record herein, concludes that it is just and reasonable and in the public interest to adopt the policy statement reflected in Attachment A, as modified herein.

ORDER

IT IS THEREFORE ORDERED that the policy statement reflected in Attachment A, Arizona Corporation Commission Policy Statement regarding Practice and Procedure Before the Power Plant and Transmission Line Siting Committee, is adopted as modified herein.

IT IS FURTHER ORDERED that this Decision shall become effective immediately.

BY THE ORDER OF THE ARIZONA CORPORATION COMMISSION

CHAIRMAN O'CONNOR COMMISSIONER MARQUEZ PETERSON

DISSENT

COMMISSIONER TOVAR COMMISSIONER THOMPSON COMMISSIONER MYERS

IN WITNESS WHEREOF, I, DOUGLAS R. CLARK, Executive Director of the Arizona Corporation Commission, have hereunto, set my hand and caused the official seal of this Commission to be affixed at the Capitol, in the City of Phoenix, this 4th day of October, 2023.

DOUGLAS R. CLARK
EXECUTIVE DIRECTOR

DISSENT: Anna Tovar

DISSENT: _____

ATTACHMENT A

ARIZONA CORPORATION COMMISSION POLICY STATEMENT[1] REGARDING PRACTICE AND PROCEDURE BEFORE THE POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE

Background

Before constructing a plant or transmission line in this state, Arizona law requires that utilities receive a Certificate of Environmental Compatibility ("CEC") from the Arizona Power Plant and Transmission Line Siting Committee ("Line Siting Committee" or "Committee") and approved by the Arizona Corporation Commission ("Commission"). The process for obtaining a CEC is governed by the line siting statutes, Arizona Revised Statutes ("A.R.S.") § 40-360 *et seq.* Prior to this year, the line siting statutes had not been updated since their adoption in 1971.

The outdated nature of the statutes, coupled with the increased need for power in the Southwest and Arizona specifically, has dramatically increased the number of CEC applications that have come before the Line Siting Committee. The Committee, Commission, and Arizona Legislature have taken numerous steps to address the backlog of applications pending before the Committee.

On December 23, 2022, Chairwoman Márquez Peterson's Office opened this docket to consider the adoption of substantive policy statements to provide guidance to the Line Siting Committee and regulated entities regarding when a CEC is required. The docket has generated valuable discussion and proposals from Commissioners and regulated entities alike.

On April 5, 2023, House Bill 2496 was signed into law by the Governor. That bill amends the definition of "transmission line" to clarify that "transmission line" means:

> five or more new structures that span more than one mile in length as measured from the first structure outside of the substation, switchyard or generating site to which the line connects to the fifth structure and that are erected above ground and support one or more conductors designed for the transmission of electric energy at nominal voltages of one hundred fifteen thousand volts or more and all new switchyards to be used therewith and related thereto for which expenditures or financial commitments for land acquisition, materials, construction or engineering exceeding $50,000 have not been made before August 13, 1971. Transmission line does not include structures located on the substation, switchyard or generating site to which the line connects.

[1] This substantive policy statement is advisory only. A substantive policy statement does not include internal procedural documents that only affect the internal procedures of the agency and does not impose additional requirements or penalties on regulated parties or include confidential information or rules made in accordance with the Arizona administrative procedure act. If you believe that this substantive policy statement does impose additional requirements or penalties on regulated parties you may petition the agency under section 41-1033, Arizona Revised Statutes, for a review of the statement.

This updated definition of "transmission line" addresses much of the ambiguity identified in the generic docket concerning when a CEC is required.

In addition, on March 6, 2023, the Commission's Legal Division opened Docket No. ALS-00000A-23-0063 for purposes of its 5-Year-Review of the Rules of Practice and Procedure before the Power Plant and Transmission Line Siting Committee, Arizona Administrative Code Title 14, Chapter 3, Article 2. On August 25, 2023, the Commission issued Decision No. 79083, directing the Legal Division to open a new rulemaking docket to update the line siting rules. Accordingly, revisions to the line siting rules will be addressed in that docket.

In order to provide additional guidance regarding the Commission's interpretation of the requirements under the line siting statutes, it is reasonable and appropriate to adopt the policy statements set forth herein. Policy Statement No. 1 addresses the Commission's interpretation of "transmission line," as updated in House Bill 2496. Policy Statement No. 2 provides the Commission's preferred approach to conducting hearings before the Line Siting Committee.

Policy Statements

1. The definition of "transmission line" provided in A.R.S. § 40-360, and as amended by House Bill 2496, includes "switchyards," but notably does not include "substations." The Commission presumes the Legislature intentionally excluded "substations" from the definition of "transmission line" and therefore interprets A.R.S. § 40-360 as imposing no requirement for a utility to obtain a CEC to construct a substation.

2. The line siting statutes require that a hearing be held on an application "in the general area within which the proposed plant or transmission line is to be located or at the state capitol at Phoenix," as determined by the Chairman of the Committee. A.R.S. § 40-360.04(A). Since the COVID-19 pandemic, the Committee has authorized virtual or hybrid virtual and in-person hearings. The Commission affirms the Committee's use of hybrid hearings and encourages the continued use of hybrid hearings to streamline the hearing process and allow for more robust public participation at Line Siting Committee hearings.

Re: In the Matter of Substantive Policy Statements to Guide the Arizona Power Plant and Transmission Line Siting Committee (ALS-00000A-22-0320)

Arizona Corporation Commissioners
Members of the Arizona Power Plant
and Transmission Line Siting Committee and
All Interested Stakeholders:

Arizona Electric Power Cooperative, Inc., Salt River Project Agricultural Improvement and Power District, Tucson Electric Power Company, and UNS Electric, Inc. (collectively "Affected Utilities") reiterate our thanks to Commissioner Marquez Peterson for opening this docket and raising important issues regarding the Arizona power plant and line siting process. As stated in the January 17, 2023 letter filed in this docket, the Affected Utilities support efforts to clarify and modernize the Arizona Power Plant and Transmission Line Siting Committee's ("Committee") rules and procedures. Among other things, the Affected Utilities are concerned with the current Committee backlog, which results primarily from the exceptionally large number of generation interconnection "tie-line" applications now being filed. At present, the backlog is such that applicants for a CEC cannot get a hearing scheduled until the end of 2024. That reality is highly concerning to our companies because it has the potential to hinder our respective abilities to get needed projects approved and on-line when required to serve our customers and members in Arizona.

Moreover, as Commissioner Marquez Peterson points out, the process for obtaining a certificate of environmental compatibility ("CEC") is complex and costly. Indeed, an applicant for a CEC typically must retain consultants to help prepare the environmental and other impact studies required by Arizona law to accompany a CEC Application, as well as attorneys to help facilitate the hearing process. In addition, the Committee is required by law to hold a hearing in the county in which the transmission line will be constructed, which is often in rural or remote areas of the State. The responsibility for securing and funding both a hearing venue of adequate size and hotel accommodations for Committee members, attorneys, witnesses, and other participants in the process falls on the applicant. The applicant must also fund an audio-visual team to provide internet and virtual hearing capabilities, as well as ensure that the room will be equipped with sufficient tables, chairs, and other amenities for all participants. Hearings are always scheduled to begin in the afternoon on the first day to give Committee members who reside far from the hearing location time to get there, which means that the hearing itself typically lasts a minimum of two days, even for the least controversial of applications. For this and other reasons, it is not unusual for the total cost of the CEC application process to exceed $250-300,000 for the most basic of applications, rising to in excess of $650,000 and much higher as the proceedings become increasingly complex. For the Affected Utilities, that amount ends up being recovered in rates paid by our customers and members.

ACC - Docket Control - Received 2/20/2023 10:05 AM
ACC - Docket Control - Docketed 2/21/2023 8:24 AM

The Affected Utilities understand the need for this process for most projects. Such an extensive evaluation is important for significant projects that must be fully vetted to ensure their compatibility with the environment and ecology of Arizona. But it should not be required for smaller projects that, by their nature, have little to no environmental footprint. We recognize that the Legislature may be taking steps to remedy this concern. However, we also agree with Commissioner Marquez Peterson that any legislative solution will take several months to implement if it passes at all, and that a more urgent, Commission-driven solution is needed.

The Affected Utilities therefore offer the following suggestions for the Commission's potential inclusion in a substantive policy statement:

(1) Interpret "series of structures" to mean "three or more" poles, but exclude from the series any poles located on the site of existing energy infrastructure.

An important first step, as suggested in the Draft Potential Substantive Policy Statement No. 1, is to clarify what projects constitute a "transmission line" within the meaning of A.R.S. § 40-360(10) – specifically, what constitutes "a series of new structures."[1] As a legal matter, no caselaw exists regarding how many poles constitute a "series" in the line siting context. However, the Arizona Court of Appeals has interpreted the meaning of the word "series" in the criminal context (examining the phrase "continuing series of violations") as meaning three or more.[2] In doing so, the Court relied on the definition of "series" contained in Webster's Third New International Dictionary (1966): "a group of *usually three or more* things or events standing or succeeding in order and having a like relationship to each other."[3] Notably, that version of Webster's dictionary was published close in time to the promulgation of the line siting statutes in 1971, thus indicating that the common and approved use of "series" at that time constituted "three or more."[4]

This interpretation is also consistent with how the phrase "series of structures" has historically been interpreted by the Commission and the Committee. For example, during a 2021 pre-filing meeting, former line siting Chairman Thomas Chenal expressed his observation that "the Corporation Commission . . . has, at least traditionally, customarily thought of a series as

---

[1] A.R.S. § 40-360.

[2] *State v. Tocco*, 156 Ariz. 110, 115 (App. 1986) (citing *United States v. Valenzuela*, 596 F.2d 1361, 1367 (9th Cir. 1979) ("[W]hile all dictionaries may not precisely specify the number of related, successive events which are necessary to constitute a series, we think the District Court's instruction that a series must consist of three or more federal narcotic law violations was squarely based on common usage.") (internal citations omitted)).

[3] *Id.* (emphasis added).

[4] *See* A.R.S. § 1-213 (requiring that statutory "[w]ords and phrases shall be construed according to the common and approved use of the language.")

being three or more."[5] The Commission has also opined that the construction of a substation and two transmission poles is **not** a "transmission" line that would trigger the need for a CEC.[6] This interpretation is also consistent with the Affected Utilities' historical understanding of the phrase.

However, absent from the definition of "transmission" line is any indication of what poles should be counted towards one of the series. Here, the Declaration of Policy underlying the siting statutes is instructive:

> The legislature hereby finds and declares that there is at present and will continue to be a growing need for electric service which will require the construction of **major new facilities**. It is recognized that such facilities cannot be built without in some way **affecting the physical environment where the facilities are located**. The legislature further finds that it is essential in the public interest **to minimize any adverse effect upon the environment and upon the quality of life of the people of the state which such new facilities might cause**.[7]

Clearly, the original drafters of the line siting statutes were focused on balancing the impact of "major new facilities" – large but necessary energy infrastructure – with the existing physical environment. However, if the environment is already impacted by energy infrastructure (be it a switchyard, substation, or generation site), the construction of the new facilities would have no incremental adverse effect on the environment or anyone's quality of life, and those facilities should thus not be considered part of the "series" of new structures for which the environmental impact should be analyzed. This reading of the statute makes it more likely that only "major new facilities" will be required to file for a CEC, not small projects to be constructed on land that, at least in part, has already been impacted by energy infrastructure.

For the same reason, reconductoring a line or replacing old structures with new ones within the location approved by the Commission in the underlying CEC should not trigger the CEC process, because doing so does not have any new adverse impact on the environment as contemplated by the line siting statutes.

The Commission's policy should also make clear that the "series of structures" contemplated is linear in nature and that a CEC would not be required for the construction of, for example, two sets of two poles that feed into a substation or switchyard in a parallel or another non-linear fashion. Such a construction conforms to the commonly understood meaning of "series" (things that are "succeeding in order"[8]) would be consistent with the legislature's intent that only "major new facilities" should be subject to the siting process (not a handful of minor new facilities).

---

[5] *See e.g.* Cielo Azul Prefiling Conference Transcript, June 17, 2021 (Chairman Chenal) at 25:16-19

[6] *See* Decision No. 77761 (October 2, 2020).

[7] *Declaration of Policy*, Laws of Arizona 1971, Chapter 67, p. 180 (emphasis added).

[8] *See State v. Tocco*, 156 Ariz. at 115.

Finally, the Commission should memorialize in policy its historical practice of not requiring a CEC for the construction of a substation. A.R.S. § 360(10) defines transmission line to mean, in relevant part, "a series of new structures erected above ground and supporting one or more conductors designed for the transmission of electric energy at nominal voltages of one hundred fifteen thousand volts or more **and all new switchyards** to be used therewith..." (emphasis added). While the statute requires a "switchyard" (which is part of the transmission system) to be sited as part of a transmission line, it makes no similar requirement for a substation. The Commission has acknowledged that substations do not need to go through the CEC process, *see* Decision No. 77761, and it makes sense to reflect that interpretation as part of any forthcoming policy.

(2) Establish a priority system for CEC hearings.

At present, the Committee Chair schedules hearings on a first-come, first-served basis. This practice worked fine when the Committee only handled a few CEC applications each year. However, the Committee is now scheduled to hear no fewer than 33 CEC applications in the next 18 months – and the pace of new applications is not slowing. To ensure that a project has a spot in the queue, the Affected Utilities must ask for hearings to be set years in advance. This process is unworkable, and there is no system in place to ensure that projects that need to be on-line sooner than the current scheduling process would allow will have a timely hearing. As a practical matter, the line siting statutes require the Committee to hold a hearing on an application within a specified timeframe after the application is filed.[9] A frustrated applicant, unable to work through the existing process, could just file an application with the Commission and the Committee will have to accommodate it, or the project could be built without any regulatory evaluation or approval.[10] Certainly, such an outcome is not in the public interest. The Commission should thus work with impacted stakeholders and the Committee Chair's office to develop a system for identifying and prioritizing more urgent projects.

(3) Make changes and provide guidance that will improve the CEC process for non-exempt projects.

Finally, the Commission should include in any policy the following recommendations that will improve the overall CEC process:

- The Affected Utilities are routinely asked by stakeholders to underground transmission facilities. As the Commission knows, undergrounding a transmission line can be ten to twenty times more expensive than building a line above ground. The Commission has often acknowledged that ratepayers should not pay the extra cost of undergrounding a transmission line. Including language to that effect in a policy would be helpful to applicants who need to explain the issue to stakeholders in a CEC proceeding.

---

[9] *See* A.R.S. § 40-360.04.
[10] *See* A.R.S. § 40-360.08(B).

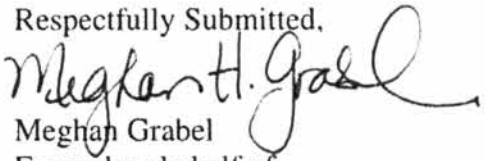
- A frequent issue in CEC proceedings is the efficacy of the applicant's public outreach process. The statutory outreach requirements are minimal, providing only for notice in a newspaper of general circulation and to certain affected jurisdictions. However, the Committee and the Commission often, and reasonably, expect more than that from applicants. Explaining what type of and how much public outreach the Commission expects of CEC applicants would be useful to ensure that all are on the same page as to what is required and that all reasonable expectations are met.

- Since the COVID-19 pandemic, CEC hearings have been conducted in a hybrid virtual/physical attendance platform. Given the remoteness of certain projects that require a CEC, the practice of allowing virtual participation has proven to be helpful to both the applicants and the Committee. The Commission should endorse the continuation of the hybrid platform for CEC hearings.

- CEC dockets are one of the two types of proceedings before the Commission that still require physical filings. Applicants are required to file 25 physical copies of a CEC application and all other documents that need to be filed during the course of the CEC proceeding (and then 13 hard copies for any documents to be filed after the CEC is awarded). Given the size of CEC applications, this requirement is both costly and environmentally unsound. The Commission should allow electronic filing in CEC dockets, with the understanding that if any Commissioner or Committee member wants a hard copy, they can reach out to the applicant through the Chairperson of the Committee and will receive one.

Again, we are grateful for Commissioner Marquez Peterson's attention to these matters and look forward to working with Chairman O'Connor and all of the Commissioners on the important issues raised in this docket.

Respectfully Submitted,



Meghan Grabel
For and on behalf of
Arizona Electric Power Cooperative, Inc.,

MEMORANDUM

TO: Docket Control

FROM: Douglas R. Clark
Interim Director
Utilities Division

Robin Mitchell
Director/Chief Counsel
Legal Division

DATE: June 14, 2023

RE: IN THE MATTER OF SUBSTANTIVE POLICY STATEMENTS TO GUIDE THE ARIZONA POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE. (DOCKET NO. ALS-00000A-22-0320)

SUBJECT: RESPONSE TO COMMISSIONER NICK MYERS' MAY 5 LETTER

On May 5, 2023, Arizona Corporation Commission ("Commission") Commissioner Nick Myers docketed a letter requesting Commission Utilities Division Staff ("Staff") and the Commission Legal Division ("Legal Division") respond to seven proposals detailed in Commissioner Myers' letter. This memorandum represents Staff's and the Legal Division's joint response to the seven proposals. Staff and the Legal Division appreciate the opportunity to provide this response addressing recommendations regarding the backlog of Certificate of Environmental Compatibility ("CEC") applications with the Arizona Power Plant and Transmission Line Siting Committee ("Committee").

The responses below include a brief analysis from the Commission's Legal Division regarding whether the proposed changes can be adopted by Commission vote, substantive policy statement, rulemaking, or if a statutory change is required. Many of the proposals require revising existing rules, and therefore necessitate rulemaking.

Conveniently, the five-year review of the Rules of Practice and Procedure before the Power Plant and Transmission Line Siting Committee ("line siting rules") is taking place in Docket No. ALS-00000A-23-0063. Stakeholder comments regarding revisions to the line siting rules are due June 19, 2023. In that Docket, the Legal Division will prepare and submit to the Commission a Five-Year-Review Report, which will identify areas that could be improved in a subsequent rulemaking docket. While some of the recommendations in Commissioner Myers' letter may properly be adopted through a substantive policy statement, the Legal Division generally recommends adopting these changes through rulemaking rather than policy statements.

ACC - Docket Control - Received 6/14/2023 2:29 PM
ACC - Docket Control - Docketed 6/14/2023 2:48 PM

1. Substations

The first recommendation was to affirm that the construction of a substation does not require a CEC.

Arizona Revised Statutes ("A.R.S.") § 40-360(10) does not include "substation" as part of the definition of a "transmission line" but does include "switchyard."

For clarity, Staff suggests defining "switchyard" and "substation." A switchyard transmits high voltage power from generation plants to a utility's distribution system. On the other hand, a substation transforms high voltage power into lower voltages suitable for local distribution.[1]

Staff does not oppose clarifying that constructing a substation does not require a CEC; however, this clarification may not have any substantial impact to the number of applications coming before the Committee. Staff is not aware of any previous CEC applications only involving substations that would not have gone to a hearing due to the proposed clarification.[2]

It may be beneficial to seek input from the Line Siting Committee on the number of utilities that seek a CEC to construct only a substation and whether adopting a policy regarding substations would reduce the number of CEC applications that require a hearing.

Clarifying that constructing a substation does not require a CEC and/or that the definition of "transmission line" does *not* include substations would require the Commission to issue a substantive policy statement because the Commission would be informing the public of the agency's approach to or opinion of requirements under the line siting statutes.[3] The substantive policy statement could also include the Commission's approach to or opinion of what constitutes a "switchyard" and "substation," as recommended by Staff. However, these changes may be better addressed through rulemaking, which the Legal Division generally recommends.

2. Hybrid hearings

Staff understands why the Committee began conducting hybrid virtual/in-person hearings and has no issue with the Committee's decision to conduct hybrid virtual/in-person hearings.

---

[1] In Case No. 186, Tucson Electric Power witness Edmond Beck provided a helpful discussion of the difference between substation and switchyard, noting that the legislature's use of only "switchyard" in the statute was likely deliberate because "[s]witchyards are required to interconnect transmission lines whereas substations are typically used for load serving purposes." Direct Testimony of Edmond Beck at 6, https://docket.images.azcc.gov/0000200968.pdf.

[2] *See Id.* (stating that "TEP's long-standing position has been to include information regarding substations but not request approval of them.").

[3] A substantive policy statement informs the public of the agency's approach to or opinion of the requirements under statutes and regulations, including the agency's "current practice, procedure or method of action based upon that approach or opinion." A.R.S. 41-1001(24). A substantive policy is advisory only. *Id.* It can only affect the internal procedures of the agency and cannot impose additional requirements or penalties on regulated parties. *Id.*

A.A.C. R14-3-201(A) provides the Committee with discretion to hold sessions at the time and place that the Committee's business may require. Accordingly, any directive from the Commission that the Committee *must* conduct hybrid hearings would require a change to the rules.[4]

3. Undergrounding transmission lines

The Legal Division cautions against setting policies that may constrain the Commission in exercising its discretion when setting rates. The facts of each case are unique, and there may be instances where a utility demonstrates that ratepayer recovery of undergrounding transmission lines is warranted. Importantly, the Commission has discretion to disallow investments that were not prudently incurred. Thus, the Commission can ensure ratepayers do not bear the burden of undergrounding transmission lines where it is not warranted.

It is worth noting that stakeholders often cover the cost of undergrounding transmission lines so that costs are not passed on to ratepayers. For example, industrial customers, like data centers, have paid the cost to underground lines or have split costs with the municipality requesting the lines be undergrounded.

If the Commission decides to move forward with this proposal, a rulemaking would be required because the Commission would be prescribing law or policy. It would not be appropriate to adopt a rule regarding ratepayer recovery as part of the line siting rules, however. The Line Siting Committee has no jurisdiction over rates, and a line siting rule regarding ratepayer recovery would therefore be outside the scope of authority granted under the line siting statutes. Additionally, the Line Siting Committee does not have jurisdiction over underground transmission lines. A.R.S. § 40-360(10) defines "transmission lines" as "a series of new structures erected *above ground* . . ." (emphasis added).

4. Public outreach

Additional public outreach prior to filing a CEC application can be beneficial. Additional forms of public outreach could include posts or ads on social media and mailing fliers to a wider radius of homes and businesses in the project area.

Specifying the additional forms of public notice would require a rule change because an existing rule defines what is required for public notice. *See* A.A.C. R14-3-208(C). A policy statement would not be sufficient in this instance because the proposal would impose new requirements on regulated parties.

---

[4] A rule is a "statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedure or practice requirements of an agency." A.R.S. § 41-1001(21). Prescribing fees or the amendment or repeal of a prior rule requires rulemaking. *Id.* Rules must only be promulgated pursuant to existing constitutional or statutory authority. In other words, a rule cannot exceed the scope of authority granted in the constitution or statute.

5. Electronic filing

Similar to the filing of other documents, the electronic filing of line siting documents would be beneficial. Eliminating the paper filing requirement would require a rule change because an existing rule establishes the paper filing requirement. *See* A.A.C. R14-3-203.

6. Reconductoring a line or replacing old structures

Careful consideration should be given to whether or not replacing structures should require a CEC hearing, since there is a possibility that older structures may be replaced with different ones that were not originally approved or discussed during the hearing. One option may be to consider establishing that reconductoring a line or replacing old structures with new ones **that do not differ in size or appearance from the previously approved ones** does not require a hearing or CEC process.

The Commission could issue a substantive policy statement informing the public that it does not believe reconductoring a line requires a CEC. If the Commission includes language that a CEC is not needed to replace old structures with new structures **that do not differ in size or appearance from those previously approved**, as recommended by Staff, the Commission could likely adopt the change through a policy statement. A.A.C. R14-3-207(B) requires Committee approval of amendments that substantially deviate from the original project. Including the language suggested by Staff would be consistent with the rule, and therefore would not require a rule change. If the language is not included, however, a rule change may be necessary.

It is unclear whether this proposal would have a significant impact on reducing the number of hearings since the passage of HB 2496 changed the definition of "transmission line" to "five or more new structures that span more than one mile in length . . ." It is possible that the new definition of "transmission line" will exclude a large portion of repair projects identified in this proposal.

It may be beneficial to receive input from the Line Siting Committee as to whether adopting a policy statement would reduce the number of CEC applications that require a hearing after the new definition of "transmission line" takes effect.

7. Establish a priority system for CEC hearings

Making a determination on the urgency of projects without clear standards for prioritizing projects may be difficult and subjective. Staff therefore recommends that if the Commission decides to move forward with this proposal, the Commission should take steps to establish clear criteria for the prioritization of projects.

In addition, Staff analyzes System Impact Studies ("SIS") after a CEC application is filed to determine whether the proposed project improves the reliability and/or safety of the operation of the grid and the delivery of power in Arizona. When an applicant wishes to interconnect with one

of Arizona's load-serving entities, it submits a request for interconnection and the project is placed in an interconnection queue. It is Staff's understanding that the SIS must be completed in the order of the interconnection requests. Thus, having the Committee select projects it deems more urgent could lead to some applications being filed without the necessary studies being completed, which would make it difficult for Staff to evaluate the technical impacts of proposed projects.

Additionally, the line siting statutes **require** applicants to provide an SIS as part of a power flow and stability analysis. A.R.S. § 40-360.02(C)(7). Failure to provide this analysis "constitute[s] a ground for refusing to consider an application of such a person." A.R.S. § 40-360.02(E). Because processing an application without a power flow and stability analysis would violate the line siting statutes, regulated entities may be hesitant to proceed without one.

Replacing the first-come, first-served approach would require *both* a statutory change and a rule change. A.R.S. § 40-360.04 requires the Chairman of the Committee to provide public notice of the time and place for a hearing within 10 days of receiving an application. The statute requires a hearing be held not less than 30 nor more than 60 days after notice is given. *Id.* The line siting rules require the same timeline. A.A.C. R14-3-208(A)-(B). The statute and rules effectively establish the first-come, first-served approach utilized by the Line Siting Committee, and therefore both the statute and rules would need to be amended.

As discussed above, adopting a prioritization system would likely impact the requirement to submit a power flow and stability analysis under A.R.S. § 40-360.02(C)(7) and could require a change to that statute as well. However, Staff does not recommend removing that requirement, as it enables Staff to determine impacts from proposed projects to the grid.

Finally, if a prioritization system were to be adopted through statutory and rule change, the Legal Division agrees with Staff's recommendation that the Commission establish clear criteria for prioritizing projects. The criteria would need to be adopted by statute or rule.

ARIZONA PUBLIC SERVICE COMPANY, a public service corporation, Plaintiff-Appellee, v. TOWN OF PARADISE VALLEY, a municipal corporation, Defendant-Appellant, Bud Tims, Ernest Garfield and Jim Weeks as members of and constituting the Arizona Corporation Commission, Defendants-Appellees

Prior History: **[***1]** Appeal from the Superior Court of Maricopa County

Cause No. C-355464

The Honorable Kenneth C. Chatwin, Judge

Opinion of the Court of Appeals, Division One, Ariz. , P.2d (App. 1979) Vacated

Disposition: Reversed and remanded.

Counsel: Snell & Wilmer by H. William Fox, Phoenix, for plaintiff-appellee.

Roger A. McKee and Douglas A. Jorden, Paradise Valley, for defendant-appellant.

John A. LaSota, Jr., former Atty. Gen., Robert K. Corbin, Atty. Gen. by Charles S. Pierson, Asst. Atty. Gen., Phoenix, for defendants-appellees.

J. LaMar Shelley, Mesa, brief amicus curiae of League of Arizona Cities and Towns.

Judges: In Banc. Cameron, Justice. Struckmeyer, C. J., Holohan, V. C. J., and Hays and Gordon, JJ., concur.

Opinion by: CAMERON

Opinion

[*448] **[**450]** We granted the petition for review of the appellant, Town of Paradise Valley, of a decision and opinion of the Court of Appeals affirming a summary judgment in favor of Arizona Public Service and the members of the Arizona Corporation Commission. A.R.S. § 12-120.24; Rule 23, Rules of Civil Appellate Procedure, 17A A.R.S.

There is only one question on appeal and that is whether the legislature may constitutionally **[***2]** delegate to cities and towns the authority to direct the undergrounding of public utility poles.

The facts necessary for a determination of this matter on appeal are as follows. In 1964, the Town of Paradise Valley passed Ordinance No. 30 requiring new and higher capacity utility lines to be placed underground. The ordinance stated:

> "* * * no person shall erect within the town boundaries and above the surface of the ground any new utility poles and wires except after securing a special permit therefor from the Town Council * * *."

Criminal penalties were provided for failure to comply with the ordinance.

Arizona Public Service replaced some of its existing utility poles without applying to the Town for a special use permit. As a result, Arizona Public Service was charged with a misdemeanor criminal complaint before the town magistrate. Arizona Public Service then instituted a special action in the Superior Court, joining the Arizona Corporation Commission and the Town. The Superior Court, in granting appellee's motion for summary judgment, declared the ordinance invalid. The Town appealed to the Court of Appeals which affirmed the decision of the trial court. **[***3]** We granted the Town's petition for review.

[*449] **[**451]** Because this is a review from the granting of a motion for summary judgment, we must look at the facts in a light most favorable to the party against whom the summary judgment has been taken, in this case, the Town. Rule 56, Arizona Rules of Civil Procedure, 16 A.R.S.; *Hall v. Motorists Ins. Corp.*, 109 Ariz. 334, 509 P.2d 604 (1973). For that reason, we accept the Town's allegations that although the initial cost of undergrounding may be more, the maintenance costs are less and the long term cost is the same or less

than the cost of above ground utility poles.

Our Constitution reads:

> "Art. 15
> "§ 3 Power of commission as to classifications, rates and charges, rules, contracts, and accounts; local regulation
>
> "Section 3. The Corporation Commission shall have full power to, and shall, prescribe just and reasonable classifications to be used and just and reasonable rates and charges to be made and collected, by public service corporations, within the State for service rendered therein, and make reasonable rules, regulations, and orders, by which such corporations shall be governed in the transaction **[***4]** of business within the State, and may prescribe the forms of contracts and the systems of keeping accounts to be used by such corporations in transacting such business, and make and enforce reasonable rules, regulations, and orders for the convenience, comfort, and safety, and the preservation of the health, of the employees and patrons of such corporations; *Provided, that incorporated cities and towns may be authorized by law to exercise supervision over public service corporations doing business therein, including the regulation of rates and charges to be made and collected by such corporations*; Provided further that classifications, rates, charges, rules, regulations, orders, and forms or systems prescribed or made by said Corporation Commission may from time to time be amended or repealed by such Commission." (Emphasis added)

Early in our history, we held that the Corporation Commission's power was paramount, *State v. Tucson Gas, Electric Light and Power Company*, 15 Ariz. 294, 138 P. 781 (1914), and that the legislature could not delegate powers possessed by the Corporation Commission to a local government unless the Corporation Commission was, at the same time, divested **[***5]** of such powers. *Phoenix Railway Co. v. Lount*, 21 Ariz. 289, 187 P. 933 (1920). In later cases, however, we held that the Corporation Commission's paramount power is limited to rates, charges or classifications and that, as to all other matters, the legislature has the power to take what action it deems appropriate. *Williams v. Pipe Trades Industry Program of Arizona*, 100 Ariz. 14, 409 P.2d 720 (1966); *Southern Pacific Co. v. Arizona Corporation Commission*, 98 Ariz. 339, 404 P.2d 692 (1965). We stated:

> "[T]he paramount power to make all rules and regulations governing public service corporations not specifically and expressly given to the commission by some provision of the Constitution, rests in the legislature, and it may, therefore, either exercise such powers directly or delegate them * * *." *Corporation Commission v. Pacific Greyhound Lines*, 54 Ariz. 159, 176-77, 94 P.2d 443, 450 (1939).

The question before the court, then, is not whether the legislature has the power to authorize the Town to pass an ordinance requiring undergrounding, but whether it has, in fact, done so. In the instant case, we believe that the legislature has given cities and **[***6]** towns the power to require the undergrounding of utility poles as part of the town's zoning powers. The statute reads as follows:

> "A. Pursuant to the provisions of this article, the legislative body of any municipality by ordinance may:
> * * *
> "3. Regulate location, height, bulk, number of stories and size of buildings and structures * * *." A.R.S. § 9-462.01(A)(3).

[*450] **[**452]** This statute is a legislative grant to the cities of the authority to regulate the use, location, height and size of utility poles as part of the towns' general planning and zoning power. The height and location of utility poles is a common subject of planning and zoning statutes and ordinances, *Kahl v. Consolidated Gas, Electric Light & Power Co.*, 60 A.2d 754, 191 Md. 249 (1948). We find nothing in the Arizona statutes which exempts utility poles from the grant of authority to the towns to enact zoning laws. We believe this statute gives the Town the power to require the undergrounding of utility poles in the Town pursuant to statute.

A second statute is cited by the Town and reads as follows:

> "A. In addition to the powers already vested in cities by their respective **[***7]** charters and by general law, cities and their governing bodies may:
> * * *
> "5. Regulate the erection of poles and wires, the laying of street railway tracks, and the operating of street railways in and upon its streets, alleys, public grounds and plazas." A.R.S. § 9-276(A)(5).

The Court of Appeals and the appellees contend that the doctrine of ejusdem generis obviously applies to this

statute, and that therefore the Town has the power to regulate "poles and wires" only in connection with the laying and operation of street railways. We do not agree.

Ejusdem generis is applicable to statutes in which there are listed specific categories followed by a general category:

> "Where, in a statute, general words follow a designation of particular subjects or classes of persons, the meaning of the general words will ordinarily be presumed to be restricted by the particular designation, and to include only things or persons of the same kind, class, or nature as those specifically enumerated, unless there is a clear manifestation of a contrary purpose. A statute enumerating things inferior cannot, by general words, be construed so as to extend to and embrace those which are **[***8]** superior. In accordance with the rule of ejusdem generis, such terms, as 'other,' 'other thing,' 'others,' or 'any other,' when preceded by a specific enumeration, are commonly given a restricted meaning, and limited to articles of the same nature as those previously described. * * *" 25 R.C.L. §§ 996, et seq., cited in 39 A.L.R. 1404.

In an early case of this court wherein the legislature enumerated nine particular businesses engaged primarily in the tourist industry, such as hotels, dude ranches, etc., followed by the term "or any other business or occupation charging * * * rents," we said:

> "The rule of ejusdem generis invoked by appellant removes any doubt that may exist as to its intention in this respect, if applicable, and it occurs to us that it is. According to it the Legislature, in following the enumeration of the nine particular businesses by the general term 'or any other business or occupation charging * * * rents,' intended to limit or restrict the meaning of this general language to businesses or occupations of the same kind, class or character as those specifically mentioned, that is, to those furnishing living accommodations to tourists or transients." **[***9]** *White v. Moore*, 46 Ariz. 48, 57, 46 P.2d 1077, 1081 (1935). See also *State Board of Barber Examiners v. Walker*, 67 Ariz. 156, 192 P.2d 723 (1948).

A.R.S. § 9-276(A)(5) is not a case of a general category following the enumeration of specific categories. Section 5 gives the Town the power to regulate three different items -- the erection of poles and wires, the laying of street railway tracks, and the operation of street railways on the streets, alleys, and public grounds and plazas of the towns. Each grant of authority stands equal and alone.

The doctrine of ejusdem generis, like other rules of statutory construction, is an aid in ascertaining the legislative intent. *United States v. Gilliland*, 312 U.S. 86, 61 S.Ct. 518, 85 L.Ed. 598 (1941); *Orr Ditch* ***[*451]*** **[**453]** *and Water Co. v. Justice Ct. of Reno*, 64 Nev. 138, 178 P.2d 558 (1947). Where the intent of the legislature is apparent, it may not be used to obscure and defeat the intent and purpose of the legislation. *United States v. Alpers*, 338 U.S. 680, 70 S.Ct. 352, 94 L.Ed. 457 (1950); *People v. McGuane*, 13 Ill.2d 520, 150 N.E.2d 168, 71 A.L.R.2d 580, cert. denied 358 U.S. 828, 79 **[***10]** S.Ct. 46, 3 L.Ed.2d 67 (1958). We do not believe that the doctrine applies here.

Appellees further rely on A.R.S. § 40-341, et seq., for the position that the legislature intended that cities and towns should not have the authority to require undergrounding at the expense of the utility. § 40-341, et seq., provide for the creation of underground conversion districts for the purpose of converting overhead electric lines to underground facilities to be paid for by the property holder in the district and not the utility. § 40-344(J) recognizes the role of the cities and towns by stating that:

> "J. The corporation commission or the board of supervisors shall not establish any underground conversion service area without prior approval of such establishment by resolution of the local government."

We do not believe this statute is evidence of a legislative intent that the cities and towns do not have power over utility poles in the town. The fact that property owners may petition for the creation of an underground conversion district and be bound to pay for the undergrounding instead of the utility, does not prevent the Town from mandating the undergrounding at utility expense.

[*11]** Finally, reference is made to A.R.S. § 40-360, et seq., concerning the creation of a siting committee for transmission lines of 115 KV or greater. The lines in the Town of Paradise Valley are mostly 12 KV, with some 69 KV. The statute does not apply to lines in the Town. Even so, the statute states as to the high energy transmission lines:

> "Any certificate granted by the committee shall be conditioned on compliance by the applicant with all

> applicable ordinances, master plans and regulations of the state, a county or an incorporated city or town, except that the committee may grant a certificate notwithstanding any such ordinance, master plan or regulation, exclusive of franchises, if the committee finds as a fact that compliance with such ordinance, master plan or regulation is unreasonably restrictive and compliance therewith is not feasible in view of technology available." A.R.S. § 40-360.06(D).

These exceptions evidence a legislative recognition that the cities and towns have the power to act in this area.

We believe that, in the absence of a clear statewide preemptive policy not shown here, local governments can prescribe undergrounding within their boundaries. **[***12]** See *Kahl v. Consolidated Gas, Electric Light & Power Co.*, supra; *Benzinger v. Union Light, Heat & Power Co.*, 293 Ky. 747, 170 S.W.2d 38 (1943); *Central Me. Power Co. v. Waterville Urban Ren'l Auth.*, 281 A.2d 233 (Me.1971); *Sleepy Hollow Lake, Inc. v. Public Service Commission*, 352 N.Y.S.2d 274, 43 A.D.2d 439 (1974); 7 McQuillin, Municipal Corporations, § 24.588 (3d ed. 1968).

Reversed and remanded for proceedings not inconsistent with this opinion.

40-347. Establishment of conversion costs; apportionment of costs; method of payment

A. The order authorizing the establishment of the underground conversion service area shall authorize each public service corporation or public agency whose overhead electric or communication facilities are to be converted to charge the underground conversion costs to each lot or parcel of real property within the underground conversion service area. The underground conversion costs shall be in an amount sufficient to repay the public service corporation or public agency for the following:

1. The remaining undepreciated original costs of the existing overhead electric and communication facilities to be removed as determined in accordance with the uniform system of accounts applicable to the public service corporation or public agency.

2. The actual costs of removing such overhead electric and communication facilities, less the salvage value of the facilities removed.

3. The contribution in aid of construction which the public service corporation or public agency would require under its rules and regulations applicable to underground conversion service areas.

4. If not paid in full as provided in section 40-348, the actual cost of converting to underground the facilities from the public place to the point of delivery on the lot or parcel owned by each owner receiving service, in the case of an electric public service corporation or public agency, or to the connection point within the house or structures, in the case of a communication corporation, less any credit which may be given such owner under the line extension policy of the public service corporation or public agency then in existence.

5. If property belonging to the United States, this state, county, city, school district or any other political subdivision or institution of the state or county is included in the underground conversion service area, and they do not voluntarily assume such costs, the underground conversion cost applicable to such property shall be charged pro rata against the remaining property included within the underground conversion service area.

B. The cost incurred in placing underground the facilities in public places shall be apportioned among the owners of property within the area on the basis of relative size of each parcel by the corporation commission, the board of supervisors or the city or town council. The underground conversion cost, as determined by the method prescribed in subsection A shall not exceed the estimated costs indicated in the joint report prepared by the public service corporation or public agency pursuant to subsection D of section 40-342 and, may be paid in cash by the property owners within sixty days from the date the overhead facilities are removed from public places, or may be paid by a uniform plan applicable to all property owners not paying within the sixty-day period in equal periodic installments over a reasonable period of time, not exceeding fifteen years, as established by the corporation commission, the board of supervisors or the city or town council, together with interest at a rate to be determined by the corporation commission, the board of supervisors or the city or town council but not to exceed eight per cent per annum.

C. If funds become available from other public or private sources to pay all or any part of the underground conversion costs, any such funds shall be applied on a pro rata basis to reduce the underground conversion cost charged against each parcel or lot.

D. Notwithstanding the provisions of subsection B of this section, the public service corporation or public agency serving such area may by agreement with all the owners of the property in an underground conversion service area provide for reimbursement to it of the cost of such conversion on a different basis as to payment or security than that set out by the terms of this article.

48-620. Improvement districts for underground utility and cable television facilities in public rights-of-way and easements; procedures; costs; definitions

A. Subject to the limitations contained in this section, the powers and duties of the governing body of a municipality for establishing underground utility facilities are as provided in this article for other types of improvement districts.

B. Notwithstanding section 48-507, after the governing body passes a resolution or notice declaring its intention to order an improvement district for underground utility facilities, the governing body shall hold a hearing at least thirty days after the completion of the posting and publication of the notice of intention pursuant to section 48-506. At the hearing, the governing body shall consider the issue of ordering an election on the formation of the improvement district and shall receive public comment on the proposed district. Section 48-507, regarding written protests of the proposed improvement, does not apply to a district formed pursuant to this section. The governing body may only order the election on the issue of formation of the district if the owners of real property in the district have signed and submitted petitions to the clerk of the governing body in support of the formation of the district. The petitions shall comply with the following:

1. Clearly state that they are petitions in support of the formation of an underground utility improvement district and shall specifically describe in words or by use of a map the location of the proposed district's boundaries. The petitions shall require the signer's signature, name and address or description of the property that is owned in the district in a manner sufficient to determine ownership through the use of public records.

2. Be signed by owners of a majority of the real property within the boundaries of the proposed district as measured by square footage or acreage owned. Signatures are not required to be notarized and for property with more than one owner, the signature of one owner is binding on the remaining owners of the property. On submittal to the clerk of the governing body, the petitions are a public record. Ownership of property is as of the date of the hearing and is determined by records of the county assessor or other public records regarding property ownership. For purposes of this paragraph, "owner" means a person, association, corporation or other entity without regard to residency.

C. If the governing body finds that sufficient signatures are submitted pursuant to subsection B of this section, the governing body may proceed with a simplified ballot card election pursuant to subsection G of this section. If there are not sufficient signatures, the governing body shall not proceed with the formation of the district. If no registered voters reside within the area of the proposed district, an election is not required and the governing body may declare the formation of the district.

D. The requirement pursuant to section 48-577 that plans and specifications be filed prior to adoption of the resolution of intention may be satisfied by a general plan showing at least the general location and type of facilities to be constructed. Actual plans and specifications shall be filed following the adoption of the resolution ordering the election regarding the improvement but before the election and the recording of the assessment and warrant. A person interested and objecting to an improvement or to the extent of the assessment district for a district established pursuant to this section may file a written protest with the city or town clerk within thirty days after completion or posting of the notice, or within thirty days after the date of the last publication of the notice if that date is after the completion of the posting.

E. The requirement pursuant to section 48-584 for notice of the award of contract may be satisfied by the inclusion in the resolution of intention of the name of the coordinating utility. The fifteen-day period for filing notice of objections under section 48-584, subsection E shall begin on completion of publication and posting of the notice of proposed improvement stating the name of the coordinating utility.

F. The governing body shall determine the boundaries of the district and designate the transmission facilities and, if applicable, any independent parallel facilities, to be placed underground and shall obtain from the coordinating utility an accurate statement of the costs of the project, including an estimate of the average cost in assessments

on an average single family residence in the district. The amount shall be included in the engineer's estimate required by section 48-577. The costs shall include:

1. The amount by which the cost of placing facilities underground would exceed the cost of placing comparable facilities overhead.

2. The reconstruction cost and net depreciation costs of any existing facilities to be removed.

3. The actual costs of removing such existing facilities, less the salvage value of the facilities removed.

4. The charge to finance the costs prescribed in this subsection over a stated period of not to exceed fifteen years.

5. The tax reimbursement amount.

G. On receipt of an accurate estimate of the costs of the project, the governing body shall call a simplified ballot card election in the area affected by the proposed district. The simplified ballot card shall contain the words for a district formation election "district, yes" and "district, no" and for an assessment election "assessment, yes" and "assessment, no". A single simplified ballot card may be used for both the question of the formation of the district and the question of the assessment. The election may be conducted in a simplified format and administered by the governing body. The governing body shall mail to all registered voters and property owners within the proposed district simplified ballot cards with return postage prepaid. The simplified ballot card shall clearly state that to be valid a voted ballot card shall be returned to the governing body within thirty days after the governing body mails the ballot card and a ballot card that is not timely returned shall not be counted. A person who is qualified to vote in a municipal election for that municipality or a property owner who owns land within the proposed improvement district is qualified to vote in an election for a municipal improvement district formed pursuant to this section, except that only residents of or property owners in the area that is within the proposed district may vote. If a majority of the persons voting with the simplified ballot card approves the formation of the district and if a majority of the persons voting with the simplified ballot card approves the assessment, the governing body may form the district and make the assessment. If more than one governing body is affected by a proposed district, each governing body may form its own district for the portion of the work within its jurisdiction. Assessments for districts that are formed for a portion of the same project shall be distributed between districts in proportion to the benefits to be received. When the governing body acquires jurisdiction to order the work, it shall not call for construction bids but may enter into a contract or contracts with the utility, utilities or licensed cable television system whose facilities are to be placed underground. Prior to entering into a contract or contracts the coordinating utility shall submit a final report to the municipality. The amount stated in the final report may be based on detailed engineering studies. If the amount stated in the final report exceeds the amount stated in the preliminary report the governing body may either:

1. Terminate the project.

2. Call a new election on the improvement.

H. The contract shall provide for payment to the utility or licensed cable television system over a term of not to exceed fifteen years of the amount set forth in the final report, shall specify those facilities to be owned by the municipality and those to be owned by the utility, utilities or licensed cable television system and shall contain such provisions for the prepayment of any assessment at the option of any property owner, and such other terms, covenants and conditions as the governing body and the utility, utilities or licensed cable television system determine. The licensed cable television system shall not be entitled to reimbursement except where the cable television system's parallel facilities are installed to replace existing cable television facilities other than independent parallel facilities not included by the governing body in the work. The amount payable on the contract or contracts is payable solely from amounts collected on the assessment levied in the district. A payment or performance bond is not required of a utility or licensed cable television system entering into a contract with the governing body.

I. The municipality may retain an independent engineering consultant to review all reports, estimates and costs provided by the coordinating utility.

J. The coordinating utility shall advance or reimburse a governing body for the costs of forming the district and the cost of printing, advertising and posting incurred or to be incurred by a governing body and shall bear its own expenses for engineering and design, and preparing the reports, plans and specifications. On completion of the work, the coordinating utility shall reimburse a governing body for its reasonable expenses incurred with respect to the district. Unless otherwise provided for in a manner acceptable to the coordinating utility, the amounts advanced or reimbursed shall be included in the contract and in the amount assessed.

K. This section does not amend or modify any existing line extension policies of any utility involved. The costs to be reimbursed under the contract shall be reduced to the extent of amounts paid or to be paid by landowners or from other sources directly to the utility or cable television system for the installation of the facilities.

L. The assessment and warrant may be recorded at any time following approval of the project at an election. The hearing on the assessment may be held at any time not less than twenty days from the date of recording of the assessment and warrant. An additional hearing following notice from the superintendent of streets to the governing body of completion of the work shall be requested only if any member of the governing body or any owner of or any person claiming an interest in any lot that received an assessment, within one year of the date of the notice of completion, files a written notice with the clerk stating that the work has not been performed substantially in accordance with the resolution of intention, the plans and specifications and estimate. The notice shall state in particular the failure to perform and may also state, if applicable, any requested reduction in the assessment of any one or more parcels due solely to the failure of such performance. The notice shall state the name and address of the person filing the notice and shall describe such person's interest in land subject to assessment. The governing body may enforce the contract and may recess the hearing to permit the utility or licensed cable television system to complete the work. If the work cannot be completed, the assessment may be adjusted to take the failure to complete into consideration. The amount due under the agreement with the utility or licensed cable television system shall be adjusted accordingly. Repayment under the contract shall be conditioned on completion of the work and approval of the assessment as provided by law. Unless an objection has been filed, repayment shall begin within nine months of the notice of completion.

M. An improvement district formed pursuant to this section shall not issue bonds, and the assessment for district purposes against the property within the district shall not exceed the amount specified in the engineer's estimate. Notwithstanding any other statute, the assessment for an underground electrical power line shall not be assessed against the owners of the frontage of the right-of-way of the underground power line but shall be assessed against all property owners benefiting from the burial of the power line.

N. The governing body shall provide for the levy and collection of assessments on the real property in the district in the manner provided for in this article. However, the assessment may be paid in installments necessary to pay amounts due under the contract and to reimburse the municipality for expenses incurred as provided in the assessment.

O. A district formed under this section shall not engage in any activity other than contracting for or establishing underground transmission facilities together, where applicable, with parallel facilities.

P. The governing body by resolution may summarily determine that it will participate in the costs of the improvement. If the municipality is willing to assume the total outstanding assessment for the underground utility facilities, the governing body may summarily dissolve the district by resolution after payment of all liabilities including all amounts due under the contract.

Q. The formation of an improvement district for underground utility facilities under this section does not prevent the establishment of other improvement districts which may include all or part of the same property for any purposes authorized by law.

R. If a petition for the formation of an improvement district for underground utilities is presented to the governing body, and the petition purports to be signed by all of the real property owners in the proposed district exclusive of mortgagees and other lienholders, the governing body, after verifying such ownership and making a finding of such fact, may adopt a resolution of intention to order the proposed improvement pursuant to section 48-576 and has immediate jurisdiction to adopt the resolution ordering the improvement pursuant to section 48-581, without the necessity of publication and posting of the resolution of intention provided for in section 48-578.

S. If the governing body determines that a parcel of property is a single family residence and that payment of the assessment would cause a financial hardship on the owners which would be likely to cause a delinquency in payment of the assessment, the assessment for an improvement made under this section shall provide for an extension in the time to pay principal and interest on the assessment against that parcel for a period of time not to exceed ten years. If the governing body determines that the grounds for extension no longer exist, then the extension will be terminated and all payments that would have been due but for the extension shall become due. The assessment shall provide for adjustments in the assessments against the remaining parcels to provide for timely payment under the agreement.

T. Notice of the passage of a resolution of intention for an improvement under this section shall be given to the corporation commission and, where the improvement involves a utility regulated thereby, the rural electrification administration.

U. In this section, unless the context otherwise requires:

1. "Coordinating utility" means the utility whose proposed or existing transmission facilities are to be placed underground. The coordinating utility is responsible for assembling into one report cost estimates and other data provided by each utility or licensed cable television system whose facilities are to be placed underground.

2. "Cost" means all costs of design and construction of facilities.

3. "Facilities" means any works or improvements used or useful in providing electric, communications, licensed cable television service or video service, including poles, supports, tunnels, manholes, vaults, conduits, pipes, wires, conductors, guys, studs, platforms, crossarms, braces, transformers, insulators, cutouts, switches, capacitors, meters, communication circuits, appliances, attachments and appurtenances but excluding any works for transmission by microwave or radio. Facilities shall include only transmission facilities and parallel facilities.

4. "Governing body" means the council of a city or town or the board of supervisors of a county.

5. "Independent parallel facilities" means existing parallel facilities that do not rely for their support on poles or other structures to be removed as part of the work. If the utility or licensed cable television system elects to remove the independent parallel facilities but the removal and underground replacement thereof was not included by the governing body in the work, the reconstruction and removal costs of such independent parallel facilities shall not be included in a contract or be assessed.

6. "Parallel facilities" means facilities that run or are permitted to run in the easement in which the transmission facilities are to be placed underground and that may be included underground with the transmission facilities, and facilities appurtenant thereto. Any parallel facilities shall have a right to be included underground and have access to a trench on such reasonable terms and conditions as the coordinating utility and the owners of the parallel facility may determine provided they do not interfere with the installation or operation of the transmission facilities.

7. "Private parallel facilities" means parallel facilities other than those owned or operated by a public utility or licensed cable television system. Private parallel facilities have the rights of parallel facilities except that the costs thereof shall not be included in a contract or be assessed.

8. "Tax reimbursement" means an annual charge for reimbursement for property taxes, or voluntary contributions in lieu of property taxes as provided in chapter 1, article 8 of this title, by applying the tax rates in effect on the date of adoption of the resolution of intention to the amount by which the estimated average taxable value of underground facilities, excluding the value of trenches, backfill and compaction, on completion exceeds the estimated average taxable value of comparable overhead facilities. In this paragraph, "estimated average taxable value" means the average of the estimated taxable value for each year of reimbursement. The value of the trenches, backfill and compaction of the underground facilities shall be attributed to and shall inure to the benefit of the owners of property within the district and shall be owned by the city. Reimbursement shall not be for a period longer than fifteen years.

9. "Transmission facilities" means facilities that are, or are appurtenant to, electric transmission lines of more than twenty-five kilovolts but not more than two hundred thirty kilovolts in size.

Re: Arizona Corporation Commission Decision 79140, Policy Statement 3

Dear Chairperson Klein:

This letter is to put forth the Arizona Corporation Commission's ("Commission") legal office's position on an appeal to the Governor's Regulatory Review Council ("GRRC") from Underground Arizona dated November 8, 2024. Thank you for taking the time to listen to our concerns. When we were notified of the petition, we were also informed "[a]t this time there is nothing the Arizona Corporation Commission need to do with regards to this petition." Therefore, we did not have a representative attend the February 25, 2025, meeting.

A. The Governor's Regulatory Review Council Does Not Have Authority to Review the Arizona Corporation Commissions Rules or Policy Statements

Arizona Revised Statutes ("A.R.S.") title 41 article 5 establishes and identifies powers given to GRRC. A.R.S. § 41-1057(A) states that this article does not apply to the Commission. Because the article that establishes GRRC specifically exempts the ACC from the powers given to GRRC, our rules and policies are not subject to review in this forum.

A.R.S. § 41-1057(A)(2) states that the Commission shall adopt substantially similar rule review procedures, but we are outside of the procedures adopted and administered by GRRC. The Commission's rules are published in the Arizona Administrative Code Title 14 and have complied with the rulemaking process and have been published accordingly. The policy statement issued in Commission decision 79140 is not a rule and is not required to go through the formal rulemaking process. The guidance issued in the form of a policy statement, as discussed below, is simply a restatement of existing laws and rules.

B. Costs Associated with Undergrounding Transmission Lines Are Part of The Ratemaking Process

At issue is Commission decision number 79140 dated October 4, 2023, and specifically, the guidance provided in policy statement 3 contained in the decision. Policy statement 3 basically restates existing state law and properly promulgated rules. The policy states that installing electric transmission lines underground is more expensive to install and more costly and challenging to maintain and repair. Because of the additional expense, they should only be installed if necessary for reliability or safety purposes. If the stakeholder wants them underground for other reasons, they should form an improvement district as provided in A.R.S. § 48-620 et. seq. Forming an improvement district will ensure that the additional cost of undergrounding the transmission lines will be paid for by the stakeholders making the request.

The cost of undergrounding transmission lines is significantly more expensive than above ground. Costs associated with installation of transmission lines feed directly into rates and ratemaking and is a constitutionally directed function of the Commission. The Arizona Constitution, Article 15, Section 3 provides that "[t]he corporation commission shall have full power to, and shall, prescribe just and reasonable classifications to be used and just and reasonable rates and charges to be made and collected, by public service corporations within the state for service rendered therein." The section goes on to grant the Commission the power to "make reasonable rules, regulations, and orders, by which such corporations shall be governed in the transactions within the state."

All aspects of ratemaking, including determining appropriate costs, and issuing rules, are core constitutional duties of the Commission. Because these matters are constitutionally directed, the executive and legislature do not have the authority to reduce or alter the scope of responsibilities tasked to the Commission.

The Commission determines the rates that a public service corporation (a "utility") may charge. The Commission sets rates by finding the "fair value" of a utility's in-state property. Because the cost of undergrounding transmission lines directly impacts the fair value of those lines, the costs associated with installing and maintaining transmission lines is directly included in ratemaking. The Commissions guidance that requires the stakeholder to directly pay for the additional expense is following the law, as set forth below, and directly within the Commission's ratemaking authority.

C. The policy is Well Grounded in Existing State Law

Arizona law has three distinct statutes that address apportioning additional costs of undergrounding directly to the person requesting the change.

First, under A.R.S. § 40-341 et. seq. petitioners can form an underground conversion service area. When an underground service area is proposed, the utility for that area shall make a study to determine the "underground conversion cost." "Underground conversion cost means the costs to be paid by each owner to each public service corporation or public agency by the property owners within an underground conversion service area, as provided in this article." The statute directly requires the cost to be paid by each owner in the area, and not be apportioned to all utility ratepayers.

Second, A.R.S. § 48-620 allows a municipal governing body to establish an underground utility facility. And again, costs are determined prior to approval, and then if approved, the expense shall be collected through a tax assessment not to exceed fifteen years.

Third, A.A.C. R 14-2-206.B(2)(c) states a "customer requesting an underground service line in an area served by overhead facilities shall pay for the difference between an overhead service connection and the actual cost of the underground connection to the nonrefundable contribution."

These are the direct basis for the guidance issued in Decision 79140 through policy statement 3. The policy is merely a restatement of the law and is intended to provide guidance of the stakeholder's responsibility to pay additional costs associated with undergrounding transmission lines.

The reason for the policy is to assure that the cost of any unnecessary undergrounding is bore by the stakeholders that want it. Under A.R.S. §§ 40-341 et seq., public service corporations can install underground transmission lines (1) at their own expense (i.e., that cannot be recovered in general rates) or (2) pursuant to a conversion service area. The legislature has created a statewide scheme for the creation of "underground conversion service area" and each landowner with the conversion area must pay the costs for undergrounding to the public service corporation.

Underground Arizona, in its petition, cites Arizona Public Service Co. v. Town of Paradise Valley, 125 Ariz. 447 (1980), for the premise that state law allows municipalities to require undergrounding at utility expense. APS v Paradise Valley did say that state law does not prevent a city from mandating undergrounding of utilities at utility expense, but that was in a motion for summary judgment in which the Supreme Court accepted "the Town's allegations that although the initial cost of undergrounding may be more, the maintenance costs are less and the long term cost is the same or less that the cost of above ground utility poles." Because this was an issue of fact, the Court had to look at it in a light most favorable to the Town. Forty-five years later, and same policy statement at issue here, included a statement that underground lines are much more expensive to install and can be more costly and challenging to maintain and repair.

D. Conclusion

For the reasons stated above, the Commission requests that GRRC take no action on Underground Arizona's appeal of the Commission's determination. If you have any questions, feel free to reach out to our office.

Sincerely,

Robert Ridenour

RE: Arizona Corporation Commission March 3, 2025 Letter

Dear Members of the Governor's Regulatory Review Council,

This letter is a response to the March 3, 2025 letter sent to you by the Arizona Corporation Commission ("Commission"). The Commission makes a lot of arguments that are irrelevant to the questions before you.

A. The Governor's Regulatory Review Council ("GRRC") Does Have Authority

Arizona Revised Statutes ("A.R.S.") § 41-1057(B) states that the Commission may opt into the GRRC process. The Commission advised Underground Arizona that it could appeal pursuant to A.R.S. § 41-1033(E), which exclusively refers to the GRRC process. Moreover, the Commission did not advise Underground Arizona of an equivalent Commission-established independent process and we remain unaware of an equivalent independent process at the Commission.

A.R.S. 41-1044 mandates that exemptions under A.R.S. 41-1057 are subject to attorney general review. It would seem to us that if GRRC denies itself jurisdiction then the attorney general's office has jurisdiction. However, we see no reason for GRRC to deny itself jurisdiction when the Commission's actions clearly align with A.R.S. § 41-1057(B) and it is best equipped to issue an opinion. To deny jurisdiction is to leave Underground Arizona and similar parties at the mercy of non-existent processes.

B. The Issue is Line Siting Jurisdiction Not Ratemaking Jurisdiction

Again, as with its original response, the Commission spends most of its letter arguing red herrings. The issue before GRRC is a line siting policy statement not a ratemaking policy statement. Decision 79140 makes this fact very clear.[1] Frankly, reading the policy statement alone makes it clear because the leading sentence is effectively, "we don't have jurisdiction over any of this."[2] Can you issue policy statements or rules on issues for which you lack jurisdiction? Can you avoid having a rule reviewed by calling it a policy statement? We believe the answers to both are obviously no. Again, the Commission's own counsel said as much in a public legal memo on June 14, 2023.[3] By focusing only on its ratemaking jurisdiction and ignoring the limits of its line siting jurisdiction and the memo of its legal counsel, it seems the Commission is trying to confuse you and sidestep the actual issue because it has no arguments responsive to the actual issue.

Line siting jurisdiction is limited to overhead transmission lines under A.R.S. § 40-360(10). The Commission cannot expand line siting jurisdiction beyond its statutory limitations with policy statements or rules. Additionally, line siting is a creature of statute not the Arizona Constitution. Thus, the constitutional questions the Commission is attempting to raise by mischaracterizing a line siting policy statement as a ratemaking policy statement are a distraction and not responsive to the actual issue.

C. Conclusion

For the aforementioned reasons, Underground Arizona requests that GRRC determine the Commission's line siting policy statement is a rule, and that whether it is a policy statement or a rule, it is invalid and contrary to the very statute that created the Line Siting Committee.

Sincerely,

/s/ Daniel Dempsey

[2] *"3. The Commission does not have jurisdiction over the undergrounding of electric transmission lines. A.R.S. § 40-360(10). Installing electric transmission lines underground is much more expensive than building them above ground. Underground transmission lines also can be more costly and challenging to maintain and repair. As a general matter, utilities under the Commission's jurisdiction should avoid incurring these higher costs unless underground installation of a transmission line is necessary for reliability or safety purposes, or to satisfy other prudent operational needs. Installing a transmission line underground for other reasons, such as stakeholders' preferences, would add unnecessarily to costs recovered through rates. Third parties, including cities, customers and neighborhood groups, seeking to fund the underground construction of a transmission line may do so, among other ways, by forming an improvement district for underground utilities as provided in A.R.S. § 48-620 et. seq."*
