Former Rule 3. Former R4-4-103 repealed, new R4-4-103 adopted effective August 16, 1991 (Supp. 91-3). R20-4-103 recodified from R4-4-103 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4670, effective

November 14, 2000 (Supp. 00-4).

R20-4-104. Acceptance of Other Forms

If another entity's applications and forms provide all the information required by Arizona law, the Superintendent has the discretion to accept them, even if another provision of this Chapter requires use of a specific Department of Financial Institutions form. The Superintendent's exercise of the discretion to accept alternative forms does not limit the Superintendent's power to require additional information necessary to complete an application or other form.

Historical Note

Former Rule 4. Former R4-4-104 repealed, new R4-4-104 adopted effective August 16, 1991 (Supp. 91-3). R20-4-104 recodified from R4-4-104 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4670, effective November 14, 2000 (Supp. 00-4).

R20-4-105. Claims Against a Deposit in Place of Bond

- A. As used in this Section:
 - 1. "Deposit" means cash or alternatives to cash deposited by a licensee with the Superintendent in place of a bond.
 - 2. "Depositor" means licensee or an employee of the licensee who makes a deposit with the Superintendent.
 - 3. "Verified claim" means a claim filed with the Superintendent under subsection (B).
 - 4. "Award" means an amount of money granted under subsection (F).
- B. A person may file a claim against a deposit by delivering documentation of the claim to the Superintendent. The claim shall be based on a final judgment in favor of the claimant, entered by a court of competent jurisdiction. To support a claim, the judgment shall be:
 - 1. Against a depositor;
 - 2. For injury caused by the depositor's wrongful act, default, fraud, or misrepresentation committed in the course of the depositor's licensed business activity; and
 - 3. Documented by:
 - a. A certified copy of the complaint in the action;
 - b. A certified copy of the judgment in the action;
 - c. A statement that execution of the judgment has not been stayed, or an explanation of the terms and reason for any stay;
 - d. A statement of any amounts recovered on the judgment; and
 - e. A sworn and notarized statement that the claim is true and correct to the best of the claimant's knowledge and belief.
- C. A claimant shall file a claim with the Superintendent, and all required supporting documentation, not more than six months after entry of the judgment asserted in the claim. However, if execution of the asserted judgment is stayed during the first six months after its entry, the claimant may file a verified claim only during the six months after the stay is lifted. The Department shall process a timely-filed verified claim as a request for hearing under R20-4-1208.
- D. The claimant shall notify the depositor of the filing of a verified claim under this Section, and make the depositor a party to all proceedings on the claim. To do so, the claimant shall send the depositor a copy of all documents filed under subsection (B). The claimant shall make this delivery no more than 10 days after the original filing with the Superintendent under subsection (B). The Department considers a proceeding on a verified claim to be a contested case, governed by the provisions of 20 A.A.C. 4, Article 12.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- E.** The Superintendent shall, after a hearing, deny a verified claim if the hearing produces evidence of any of the following circumstances:
1. The judgment is not for an injury caused by the depositor and described in subsection (B)(2);
 2. The judgment was awarded by default, stipulation, or consent, and no showing is made in the hearing of an injury caused by the depositor and described in subsection (B)(2);
 3. The judgment's execution has been stayed for any reason;
 4. The judgment was procured through fraud or collusion;
 5. The judgment has been satisfied from other sources; or
 6. The action that produced the judgment was barred by the applicable statute of limitations at the time it was commenced.
- F.** If the Superintendent grants a verified claim, the Superintendent shall do so in the amount of the compensatory damages awarded against the depositor in the judgment, exclusive of:
1. Attorney's fees, and
 2. Amounts previously paid on the judgment.
- G.** A person injured by a depositor shall give the Superintendent written notice at the time of filing a civil action if the claims alleged could be made as a verified claim under this Section. The written notice shall include a statement of the amount of compensatory damages sought against the depositor. The injured person shall provide further information about the civil action to the Superintendent upon request.
- H.** If the Superintendent grants a verified claim under subsection (F), the Superintendent shall authorize the State Treasurer, in writing, to release the deposit to the claimant in the amount stated in subsection (F) if the Superintendent has not received notice of another pending civil action under subsection (G).
- I.** If given notice under subsection (G), the Superintendent shall determine whether the deposit is sufficient to satisfy all claims under subsection (F). The Superintendent shall determine award amounts for each claim of which the Superintendent has notice, and authorize payment, as follows:
1. If the deposit is sufficient to satisfy all claims under subsection (F), the Superintendent shall authorize its release as described in subsection (H).
 2. If the deposit is not sufficient to satisfy all claims under subsection (F), the Superintendent shall calculate the award on each claim as follows:
 - a. Each granted claim shall receive a pro rata share of the total deposit.
 - b. Each pro rata share shall be a dollar amount calculated by multiplying the total deposit by a fraction.
 - i. The numerator of the fraction is the amount of the Superintendent's award for the verified claim.
 - ii. The denominator of the fraction is the sum of the amount of the Superintendent's award for the verified claim plus the total compensatory damages sought in all other civil actions against the same depositor disclosed to the Superintendent under subsection (G).
 - c. The Superintendent shall authorize the State Treasurer to release the pro rata portion of the deposit calculated for each verified claim.
- J.** A depositor or former licensee may request return of its deposit if it substitutes a bond for the deposit, or if its license is surrendered, revoked, or expired, and if all statutory conditions for release of the deposit have been satisfied. The Superintendent shall not release any part of a deposit to a depositor or former licensee until the Superintendent determines whether there are any awards on verified claims unsatisfied because of an apportionment under subsection (I). The Superintendent shall use the deposit amount to pay any unsatisfied portion of those awards. If the deposit amount is not sufficient to pay in full all unsatisfied awards, the Superintendent shall pay the remaining amount of the deposit to claimants in the ratio their awards bear to the total of all awards granted against the deposit.
- K.** The court supervising a licensee in receivership may order the release of a deposit to persons injured by conduct described in subsection (B). In that event, the receiver shall deliver a certified copy of the court's order to the Superintendent. The copy may be uncertified if the receiver is the Superintendent or any other officer or agency of the state of Arizona. The Superintendent shall then authorize the State Treasurer, in writing, to release the deposit to the receiver. The receiver shall distribute the deposit as ordered by the receivership court, rather than under this Section.

Historical Note

Adopted effective August 16, 1991 (Supp. 91-3). R20-4-105 recodified from R4-4-105 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4670, effective November 14, 2000 (Supp. 00-4).

R20-4-106. Bankruptcy

An enterprise licensee or consumer lender licensee shall immediately deliver written notice to the Superintendent if it files a voluntary bankruptcy petition, or if its creditors name the licensee a debtor in an involuntary bankruptcy petition. On the date of each of the following documents' filing with the bankruptcy court, the licensee shall deliver to the Superintendent a copy of the:

1. Petition for relief,
2. Schedule of assets and liabilities,
3. Statement of financial affairs,
4. List of creditors, and
5. Plan of reorganization.

Historical Note

Adopted effective August 16, 1991 (Supp. 91-3). R20-4-106 recodified from R4-4-106 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 145, effective December 10, 2001 (Supp. 01-4).

R20-4-107. Licensing Time-frames

- A.** As used in this Section, "application" means a document specified or described in this Title, or in any statute enforced by the Department, requesting any permit, certificate, approval, registration, charter, or similar permission described in Table A, together with all supporting documentation required by statute or rule.
- B.** The time-frames in Table A apply solely to applications received by the Department after the effective date of this Section. Each overall time-frame consists of an administrative completeness review time-frame, and a substantive review time-frame. The administrative completeness review time-frame begins to run upon receipt of an application by the Department.
1. Within the administrative completeness review time-frame in Table A, the Department shall notify the applicant in writing whether the application is complete. If the application is incomplete, the notice shall specify the missing information or component.
 2. An applicant whose application is incomplete shall supply the missing information within 60 days after the date

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

of the notice. If an applicant shows good cause in writing before the expiration of the 60 day time limit, the Superintendent shall extend the period for administrative completion of an application. The administrative completeness review time-frame stops running on the postmark date of the Department's written notice of an incomplete application, and resumes when the Department receives a complete application. If the applicant fails to submit a complete application within the specified time limit, the Department shall reject the application and close the file. An applicant may reapply.

3. The substantive review time-frame begins to run on the postmark date of the Department's written notice that the application is administratively complete.
4. Within the overall time-frame set forth in Table A the Department shall send the applicant written notice of its decision to approve, conditionally approve, or deny a license, unless the time-frame is extended by mutual

agreement under A.R.S. § 41-1075. If the Department denies an application, it shall provide written justification for the denial and a written explanation of the applicant's right to a hearing or appeal in the form required by A.R.S. § 41-1076.

5. The Department shall calculate time limits prescribed in this Section under R2-19-107.
- C. The time-frames in this Section apply solely to actions taken by the Department. Nothing in this Section relieves a licensee or applicant of a duty to fulfill any other legal or regulatory requirement that is a condition of its power and authority to engage in business.

Historical Note

Adopted effective September 9, 1998 (Supp. 98-3).
Amended by final rulemaking at 8 A.A.R. 145, effective December 10, 2001 (Supp. 01-4).

Table A. Licensing Time-frames

Historical Note

Table A adopted effective September 9, 1998 (Supp. 98-3). Amended by final rulemaking at 8 A.A.R. 145, effective December 10, 2001 (Supp. 01-4). Amended by final rulemaking at 18 A.A.R. 2622, effective December 2, 2012 (Supp. 12-4).

ARTICLE 2. BANK ORGANIZATION AND REGULATION

R20-4-201. Articles of Incorporation

A licensee shall deliver to the Director a copy of each amendment to the licensee’s articles of incorporation within 30 days after the amendment is filed with the Arizona Corporation Commission. Before delivery to the Director, an officer of the licensee shall certify the copy delivered in compliance with this Section, in writing, signed by the certifying officer, attesting to the completeness, accuracy, and authenticity of the certified copy.

Historical Note

Former Rule 1. R20-4-201 recodified from R4-4-201 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 811, effective January 10, 2001 (Supp. 01-1). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-202. Bylaws

A licensee shall deliver to the Director a copy of each amendment to the licensee’s bylaws within 30 days after the amendment is adopted. An officer of the licensee shall certify the copy delivered in compliance with this Section, in writing, attesting to the completeness, accuracy, and authenticity of the certified copy.

Historical Note

Former Rule 2. R20-4-202 recodified from R4-4-202 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 811, effective January 10, 2001 (Supp. 01-1). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-203. Repealed

Historical Note

Former Rule 3; Amended subsection (C) effective Sep-

tember 4, 1981 (Supp. 81-5). R20-4-203 recodified from R4-4-203 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-204. Repealed

Historical Note

Former Rule 4. R20-4-204 recodified from R4-4-204 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-205. Repealed

Historical Note

Former Rule 5. R20-4-205 recodified from R4-4-205 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3188, effective August 3, 2000 (Supp. 00-3).

R20-4-206. Bankers Blanket Bond Coverage - A.R.S. § 6-188

- A. Each bank shall carry at least the following basic blanket bond coverage listed in Table B.
- B. Each bank shall supplement the bankers blanket bond coverage with at least a \$2,000,000 excess fidelity bond.

Historical Note

Former Rule 6. R20-4-206 recodified from R4-4-206 (Supp. 95-1). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

Table B. Basic Blanket Bond Coverage

| Banks with Deposits of: | | Amounts: |
|-------------------------|---------------|-----------|
| Less than \$25,000,000 | | \$300,000 |
| 25,000,000 | to 35,000,000 | 350,000 |

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

| | | | |
|---------------------|----|----------------|------------|
| 35,000,000 | to | 50,000,000 | 450,000 |
| 50,000,000 | to | 75,000,000 | 550,000 |
| 75,000,000 | to | 100,000,000 | 700,000 |
| 100,000,000 | to | 150,000,000 | 850,000 |
| 150,000,000 | to | 250,000,000 | 1,200,000 |
| 250,000,000 | to | 500,000,000 | 1,700,000 |
| 500,000,000 | to | 1,000,000,000 | 2,500,000 |
| 1,000,000,000 | to | 2,000,000,000 | 4,000,000 |
| 2,000,000,000 | to | 5,000,000,000 | 6,000,000 |
| 5,000,000,000 | to | 20,000,000,000 | 9,000,000 |
| Over 20,000,000,000 | | | 10,000,000 |

Historical Note

Table B removed from R20-4-206(A) to conform with the codification scheme of this Chapter and amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-207. Capital Obligations

- A. An applicant for a Director’s order of approval to issue a capital obligation shall submit the following documents to the Director and shall not issue any capital obligation before the Director issues the order of approval. The required documents are:
 - 1. A certified copy of the resolution adopted by the Board of Directors, or a certified copy of the unanimous written consent of the Board of Directors, authorizing the sale of the capital obligation;
 - 2. A copy of the agreement underlying the capital obligation;
 - 3. A copy of the note or debenture intended to represent the capital obligation; and
 - 4. A copy of the prospectus, if any, proposed for use in the sale of the capital obligation.
- B. Each document evidencing a capital obligation shall:
 - 1. Bear on its face, in bold face type, the following: This obligation is not a deposit and is not insured by the Federal Deposit Insurance Corporation.
 - 2. Have a maturity provision that either:
 - a. Gives the obligation a maturity of at least five years, or
 - b. In the case of an obligation or issue that provides for scheduled repayments of principal, gives an average maturity of at least five years. The restriction on maturity stated in this subsection does not apply to any obligation that otherwise meets all the requirements of this Section if the Director determines that exigent circumstances require the issuance of the obligation without regard to any restriction on maturity. The provisions of this subsection do not apply to mandatory convertible debt obligations or issues.
 - 3. State expressly on its face that the obligation:
 - a. Is subordinated and junior in right of payment to the issuing bank’s obligations to its depositors and to the bank’s other obligations to its general and secured creditors, and
 - b. Is ineligible as collateral for a loan by the issuing bank, except as provided in A.R.S. § 6-354.
 - 4. Be unsecured.
 - 5. State expressly on its face that the issuing bank may not retire any part of its capital obligation without the Director’s prior written order of approval, and the prior written consent of the Federal Deposit Insurance Corporation.

- 6. Include, if the obligation is issued to a depository institution, a specific waiver of the right of offset by the lending depository institution.
 - 7. State that, in the event of liquidation, all depositors and other creditors of the bank are to be paid in full before any payment of principal or interest is made on a capital obligation.
- C. No payment shall be made under an optional right of payment reserved to the bank without the separate authorization of the Director. The Director may grant that authority in the initial order of approval or in a later order of approval.

Historical Note

Former Rule 7. R20-4-207 recodified from R4-4-207 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 2155, effective May 4, 2001 (Supp. 01-2). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-208. Repealed

Historical Note

Former Rule 8. R20-4-208 recodified from R4-4-208 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3188, effective August 3, 2000 (Supp. 00-3).

R20-4-209. Notice of Permanent Closing of Banking Office

A bank may close fewer than all of its banking offices. Before closing any office, a bank shall deliver a letter to the Director specifying the banking office it plans to close and the closing date. The bank shall ensure that the Director receives the letter at least 10 days before the closing date. Closing the banking office shall terminate the bank’s authority to maintain that banking office on the date of the actual closure.

Historical Note

Former Rule 9. R20-4-209 recodified from R4-4-209 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 5388, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-210. Repealed

Historical Note

Former Rule 10. R20-4-210 recodified from R4-4-210 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3188, effective August 3, 2000 (Supp. 00-3).

R20-4-211. Application for a Banking Permit

- A. Before an application is filed, the representatives of the potential applicant shall meet with the Director to discuss capitalization, location, and management of the proposed bank.
- B. After the meeting required by subsection (A), persons who wish to proceed with the application process shall submit an application in the form the Director prescribes. The applicant shall support the application with sufficient information to enable the Director to make a determination.

Historical Note

Former Rule 11. R20-4-211 recodified from R4-4-211 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 3188, effective August 3, 2000 (Supp. 00-3). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-212. Repealed

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

Former Rule 12. Amended effective September 4, 1981 (Supp. 81-4). R20-4-212 recodified from R4-4-212 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-213. Repealed

Historical Note

Former Rule 13. Repealed effective September 13, 1981 (Supp. 81-5). R20-4-213 recodified from R4-4-213 (Supp. 95-1).

R20-4-214. Preservation of Records

- A. Every bank shall keep its corporate and business records as originals or as copies of the originals made by reproduction methods that accurately and permanently preserve the records. Copies complying with this subsection, when satisfactorily identified, have the same evidentiary status as an original. A bank may keep its records as electronic records if the bank can generate all information and copies required by this Section within the timeframe set by the Department for examination or other purposes.
- B. A bank shall keep its corporate and business records for the period required by this Section. These periods are measured from the date of the last entry or final action date. A bank shall have and comply with its own record retention schedule that is consistent with this Section. A bank may comply with this Section by complying with a preemptive federal regulation, even if the federal regulation requires a shorter retention period than is listed in this Section. This Section does not prohibit record retention for longer periods than these state-required minimums for any reason, including a retention period established by preemptive federal law or regulation. Likewise, this Section does not prohibit a bank from keeping any type of record not required in subsection (D).
- C. Beginning on the effective date of this Section, corporate and business records of a bank operating in the state of Arizona are classified, and their retention periods are prescribed, according to the schedule in subsection (D). Retention periods are listed in subsection (D) using the notations, acronyms, and abbreviations listed in subsections (C)(1) through (20).
 - 1. A numerical designation refers to a period of years unless a shorter period of time is specified in the schedule.
 - 2. "AC" means after closure.
 - 3. "ACH" means automated clearing house.
 - 4. "AE" means after expiration.
 - 5. "ALC" means after last contact.
 - 6. "AP" means after paid.
 - 7. "ATD" means after termination date.
 - 8. "CTR" means a cash transaction report required by the Federal Bank Secrecy Act.
 - 9. "FDIC" means the Federal Deposit Insurance Corporation.

Historical Note

Former Rule 14. R20-4-214 recodified from R4-4-214 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4142, effective September 12, 2001 (Supp. 01-3). Missing notation in subsection (D)(1)(j) corrected as proposed at 7 A.A.R. 2491 (Supp. 20-1). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-215. Trust Business

Each bank authorized to conduct trust business under their banking permit shall comply with the applicable requirements of R20-4-808 through R20-4-816.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-215 recodified from R4-4-215 (Supp. 95-1). Amended by final rulemaking at 29 A.A.R. 1919 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

ARTICLE 3. EXPIRED

R20-4-301. Expired

Historical Note

Former Rule 1. R20-4-301 recodified from R4-4-301 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-302. Repealed

Historical Note

Former Rule 2; Repealed effective January 19, 1984 (Supp. 84-1). R20-4-302 recodified from R4-4-302 (Supp. 95-1).

R20-4-303. Expired

Historical Note

Former Rule 3. R20-4-303 recodified from R4-4-303 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-304. Expired

Historical Note

Former Rule 4. R20-4-304 recodified from R4-4-304 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-305. Repealed

Historical Note

Former Rule 5. R20-4-305 recodified from R4-4-305 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-306. Repealed

Historical Note

Former Rule 6. R20-4-306 recodified from R4-4-306 (Supp. 95-1). Repealed effective September 19, 1996

(Supp. 96-3).

R20-4-307. Repealed

Historical Note

Former Rule 7. R20-4-307 recodified from R4-4-307 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-308. Repealed

Historical Note

Former Rule 8. R20-4-308 recodified from R4-4-308 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-309. Expired

Historical Note

Former Rule 9. R20-4-309 recodified from R4-4-309 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-310. Reserved

R20-4-311. Repealed

Historical Note

Former Rule 11; Repealed effective January 19, 1984 (Supp. 84-1). R20-4-311 recodified from R4-4-311 (Supp. 95-1).

R20-4-312. Repealed

Historical Note

Former Rule 12. R20-4-312 recodified from R4-4-312 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

Former Rule 24. R20-4-324 recodified from R4-4-324 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-325. Expired**Historical Note**

Former Rule 25. R20-4-325 recodified from R4-4-325 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-326. Expired**Historical Note**

Former Rule 26. R20-4-326 recodified from R4-4-326 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-327. Expired**Historical Note**

Former Rule 27. R20-4-327 recodified from R4-4-327 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-328. Expired**Historical Note**

Former Rule 28. R20-4-328 recodified from R4-4-328 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-329. Repealed**Historical Note**

Former Rule 29. R20-4-329 recodified from R4-4-329 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-330. Expired**Historical Note**

Original Rule. R20-4-330 recodified from R4-4-330 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 841, effective March 14, 2017 (Supp. 17-1).

R20-4-331. Repealed**Historical Note**

Original Rule. R20-4-331 recodified from R4-4-331 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

ARTICLE 4. CREDIT UNIONS**R20-4-401. Fidelity Bond Coverage**

- A. A credit union shall have a fidelity bond in the form and in the amount required to maintain federal insurance on its accounts.
- B. A fidelity bond purchased by a credit union to comply with this Section shall include faithful-performance-of-duty coverage.
- C. A credit union shall purchase its fidelity bond from an insurer that holds a certificate of authority from the Director to transact surety business in Arizona.

Historical Note

Former Rule 1. R20-4-401 recodified from R4-4-401 (Supp. 95-1). Amended effective April 21, 1995 (Supp. 95-2). Amended by final rulemaking at 7 A.A.R. 2229, effective May 3, 2001 (Supp. 01-2). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-402. Repealed**Historical Note**

Former Rule 2. R20-4-402 recodified from R4-4-402 (Supp. 95-1). Repealed effective April 21, 1995 (Supp. 95-2).

ARTICLE 5. CONSUMER LENDERS**R20-4-501. Repealed****Historical Note**

Former Rule 1. R20-4-501 recodified from R4-4-501 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-502. Repealed**Historical Note**

Former Rule 2. R20-4-502 recodified from R4-4-502 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3380, effective August 3, 2000 (Supp. 00-3).

R20-4-503. Adjustments in Precomputed Charges

A licensee shall adjust the total precomputed charges if the first installment period is more or less than one month in duration. The licensee's records shall reflect the adjustment's collection in one of three ways.

1. In the first installment payment,
2. Amortized over the life of the contract, or
3. As part of the final payment.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

Former Rule 3. R20-4-503 recodified from R4-4-503 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1942 (September 1, 2023), effective October 7, 2023 (Supp. 23-3).

R20-4-504. Repealed**Historical Note**

Former Rule 4. R20-4-504 recodified from R4-4-504 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4).

R20-4-505. Repealed**Historical Note**

Former Rule 5. R20-4-505 recodified from R4-4-505 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-506. Repealed**Historical Note**

Former Rule 6. R20-4-506 recodified from R4-4-506 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3380, effective August 3, 2000 (Supp. 00-3).

R20-4-507. Repealed**Historical Note**

Former Rule 7. R20-4-507 recodified from R4-4-507 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-508. Cut-off Date for Computing Refunds upon Early Repayment in Full

If a borrower repays a loan before the due date of the final installment, the licensee shall calculate any refund or credit due on the precomputed loan using the following rules:

1. A licensee shall credit any full repayment, made on or before the 15th day following an installment date, as if received on the last previous installment date.
2. A licensee shall credit any full repayment, made on or after the 16th day following an installment date, as if received on the next installment date.

Historical Note

Former Rule 8. R20-4-508 recodified from R4-4-508 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4605, November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1942 (September 1, 2023), effective October 7, 2023 (Supp. 23-3).

R20-4-509. Repealed**Historical Note**

Former Rule 9. R20-4-509 recodified from R4-4-509 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-510. Repealed**Historical Note**

Former Rule 10. R20-4-510 recodified from R4-4-510 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-511. Repealed**Historical Note**

Former Rule 11. R20-4-511 recodified from R4-4-511

(Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-512. Reserved**R20-4-513. Repealed****Historical Note**

Former Rule 13. R20-4-513 recodified from R4-4-513 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-514. Repealed**Historical Note**

Former Rule 14. R20-4-514 recodified from R4-4-514 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-515. Repealed**Historical Note**

Former Rule 15. R20-4-515 recodified from R4-4-515 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-516. Repealed**Historical Note**

Former Rule 16. R20-4-516 recodified from R4-4-516 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4).

R20-4-517. Repealed**Historical Note**

Former Rule 17. R20-4-517 recodified from R4-4-517 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-518. Deferral Fee

- A. A licensee may collect a deferral fee at the time it agrees to a deferral or at any time after the assessment of a deferral fee. If a licensee receives a payment after it agrees to a deferral, it may apply the payment first to the deferral fee. Any remainder of the payment shall be applied to the balance of the loan.
- B. If a licensee receives a payment that is large enough to pay in full a delinquent installment and all allowable delinquency fees, the licensee shall apply the payment first to the delinquent installment and fees. The licensee shall not show the paid installment as deferred, and shall not collect a deferral fee.

Historical Note

Former Rule 18. R20-4-518 recodified from R4-4-518 (Supp. 95-1). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1942 (September 1, 2023), effective October 7, 2023 (Supp. 23-3).

R20-4-519. Deferral Statement

A licensee shall give the borrower a statement at the time it agrees to a deferral and shall retain a copy of the statement in the borrower's credit file. The statement shall contain the following information:

1. The amount of the deferral fee,
2. The date of the borrower's next scheduled payment,
3. The amount of the borrower's next scheduled payment, and
4. The extended maturity date of the loan.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

Former Rule 19. R20-4-519 recodified from R4-4-519 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1942 (September 1, 2023), effective October 7, 2023 (Supp. 23-3).

R20-4-520. Repealed**Historical Note**

Former Rule 20. R20-4-520 recodified from R4-4-520 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3380, effective August 3, 2000 (Supp. 00-3).

R20-4-521. Repealed**Historical Note**

Former Rule 21. R20-4-521 recodified from R4-4-521 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3380, effective August 3, 2000 (Supp. 00-3).

R20-4-522. Repealed**Historical Note**

Former Rule 22. R20-4-522 recodified from R4-4-522 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-523. Repealed**Historical Note**

Former Rule 23. R20-4-523 recodified from R4-4-523 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-524. Books, Accounts, and Records

- A. A licensee may keep its books, accounts, and records as electronic records if the licensee can generate all information and copies required by this Section within the timeframe set by the Department for examination or other purposes.
- B. A licensee authorized under A.R.S. Title 6, Chapter 5 shall:
1. Keep its books, accounts, and records of operations separate from the books, accounts, and records of its other business activities; and
 2. In addition to any statutory requirements, the books, accounts, and records of operations shall include the following:
 - a. A file containing a record of all legal actions brought during the fiscal year which the licensee shall keep until the Department conducts its examination of the licensee;
 - b. An itemized record of disbursement of the proceeds of each loan which shall also include, if the licensee makes precomputed loans, the amount of refund on each loan that is renewed or refinanced;
 - c. A record of the receipt of all allowable fees;
 - d. A record for each borrower and each loan that contains documentary evidence of filing or recording each instrument of record for the loan; and
 - e. A record of the borrower's voluntary election to purchase any insurance in connection with a loan if that insurance is sold by the licensee.

Historical Note

Former Rule 24. R20-4-524 recodified from R4-4-524 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4605, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1942 (Sep-

tember 1, 2023), effective October 7, 2023 (Supp. 23-3).

R20-4-535. Reserved

R20-4-536. Repealed

Historical Note

Former Rule 36. R20-4-536 recodified from R4-4-536 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 3380, effective August 3, 2000 (Supp. 00-3).

ARTICLE 6. DEBT MANAGEMENT COMPANIES

Article 6, consisting of Sections R4-4-601 through R4-4-620, adopted effective October 26, 1978, except that Sections R4-4-603, R4-4-604 and R4-4-607 shall become effective January 1, 1979. R20-4-601 through R20-4-620 recodified from R4-4-601 through R4-4-620 (Supp. 95-1).

Former Article 6 consisting of Section R4-4-601 repealed effective October 26, 1978. R20-4-601 recodified from R4-4-601 (Supp. 95-1).

R20-4-601. Repealed

Historical Note

Former Rule 1; Former Section R4-4-601 repealed, new Section R4-4-601 adopted effective October 26, 1978 (Supp. 78-5). R20-4-601 recodified from R4-4-601 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-602. Applications

- A.** An applicant for a debt management company license shall send the Department an application on the form required by the Director. If the Director determines that a credit report is required as authorized under A.R.S. § 6-704(A), the applicant shall order a credit report from a credit reporting agency disclosing the credit history of the applicant's principals or managing agents and submit the credit report to the Department. A complete application shall include the credit report required by this Section and all of the following:

1. The surety bond required by A.R.S. § 6-704(B);

2. Fidelity bonds if required by the Director under A.R.S. § 6-704(D);
3. The nonrefundable application fee specified in A.R.S. § 6-126(A)(14);
4. An original license fee described in A.R.S. §§ 6-126(B), 6-126(D)(2), and 6-706;
5. A sample of the contract intended to be used by the applicant required by A.R.S. § 6-704(E);
6. Current financial statements as described in R20-4-604(A)(5);
7. A copy of the current articles of incorporation, by-laws, partnership agreement or other organizing documents used to form the applicant business entity;
8. The name and address information required under A.R.S. § 6-704(A); and
9. A background check, on the form required by the Department, for each of the applicant's principals, principal officers, trustees, partners, and managing agents.

- B.** A debt management company applying to operate a branch office or use an agency shall send the Department an application on the form required by the Director.

- C.** A debt management company applying to renew a license shall deliver, on or before June 15 of each year, an application to the Department on the form required by the Director. A debt management company shall apply separately to renew each authorized business location. With each application for renewal, a debt management company shall include the renewal fee described in A.R.S. § 6-706 and specified in A.R.S. § 6-126(D)(2).

- D.** The Department may require additional information the Director considers necessary in connection with an application under this Section.

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-602 recodified from R4-4-602 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-603. Reports

- A.** Each debt management company and each nonprofit corporation or association exempt from licensure under A.R.S. § 6-702(4) and (5), shall send the Department an annual report of its business and operations for each place of business during the previous year beginning July 1 and ending June 30, using the form required by the Director. A debt management company shall deliver its report to the Department on or before August 15.
- B.** Each debt management company shall notify the Department of any change in its ownership or in the names of its officers, directors, trustees, partners, or managing agents within 30 days of the change.

Historical Note

Adopted effective January 1, 1979 (Supp. 78-5). R20-4-603 recodified from R4-4-603 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-604. Records

- A.** A debt management company shall keep books, accounts, and records adequate to provide a clear and readily understandable

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

record of all its business activity. A debt management company may keep its books, accounts, and records as electronic records if the debt management company can generate all information and documentation required by this Section in the timeframe set by the Department for examination or other purposes. A debt management company's books, accounts, and records shall include:

1. A file for each account containing:
 - a. A copy of all correspondence concerning the account;
 - b. Evidence of the notice given to creditors of the debt management contract;
 - c. A subsidiary ledger disclosing all financial transactions concerning the account;
 - d. A copy of each written statement of account given to the debtor;
 - e. The original budget analysis required under R20-4-607; and
 - f. The original contract between the debt management company and the debtor, including all amendments.
 2. A trust account general ledger, which is kept current daily, which reflects each deposit to and disbursement from the trust account.
 3. Each reconciliation of the debt management company's trust account, prepared at least once a month.
 4. A general ledger, kept current monthly, which reflects each financial transaction by the debt management company except those recorded in its trust account general ledger.
 5. A financial statement produced in accordance with generally accepted accounting principles at least once every three months, or more frequently if directed by the Director, which reflects the financial condition of the debt management company. The financial statement shall include:
 - a. A balance sheet,
 - b. A statement of income and retained earnings,
 - c. A statement of changes in financial condition, and
 - d. Appropriate footnotes that either:
 - i. Explain entries in the documents listed in subsections (A)(5)(a), (b), and (c);
 - ii. Contain material information not required or not reportable in documents listed in subsections (A)(5)(a), (b), or (c); or
 - iii. Contain other disclosures required by generally accepted accounting principles.
 6. A record of all litigation naming the debt management company as a party including:
 - a. For pending litigation:
 - i. A copy of the complaint;
 - ii. A copy of any answer filed by the debt management company in response to the complaint; and
 - iii. A copy of any motion filed by the debt management company; and
 - b. For any litigation that is no longer pending, a copy of any judgment showing the settlement date, dismissal, or other final order disposing of the litigation.
- B.** All records required under this Section may be maintained at the debt management company's office in Arizona. A debt management company may keep its records outside this state if it:
1. Makes the records available to the Director, for examination or other purposes, in this state not more than three business days after demand; and
 2. Allows its debtor customers to call toll free to obtain information from the records that are not available from the debt management company's office in Arizona.
- C.** Each debt management company shall preserve its books, accounts, and records for the period required by A.R.S. §§ 6-709(J) and 6-710(1).

Historical Note

Adopted effective January 1, 1979 (Supp. 78-5). R20-4-604 recodified from R4-4-604 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-605. Reserved

R20-4-606. Reserved

R20-4-607. Budget Analysis

- A.** A debt management company shall not accept an account unless it first concludes that the debtor can reasonably meet the payments agreed upon by the debt management company and the debtor. The debt management company's conclusion shall be supported by a written budget analysis kept in the company's records.
- B.** The written budget analysis shall either be part of an application form or a separate document. The debtor shall date and sign the written budget analysis before the debt management company draws any conclusions from the budget analysis.
- C.** The budget analysis shall disclose the disposable income available for payment to the debt management company after the debtor pays their reasonable and necessary living expenses including taxes, insurance, child support, alimony, and residential rent or mortgage payments.

Historical Note

Adopted effective January 1, 1979 (Supp. 78-5). R20-4-607 recodified from R4-4-607 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-609. Repealed

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-609 recodified from R4-4-609 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-610. Repealed

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-610 recodified from R4-4-610 (Supp. 95-1). Repealed effective September 19, 1996 (Supp. 96-3).

R20-4-611. Advertising

- A.** A debt management company shall not use advertising, communication, or sales material that contains:
1. A false, misleading, or deceptive statement about the debt management company's services or charges. A statement is a violation of this Section if the person making the

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

statement does not state a material fact necessary to make the statement true, in light of the circumstances under which it is made;

- 2. A claim, direct or implied, that the debt management company consolidates debts or makes loans; or
- 3. A schedule of payments in any form.

B. A debt management company’s advertising, communication, and sales material shall contain the following legend, conspicuously displayed in at least 12 point type and in bold print: “NOT A LOAN COMPANY.”

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-611 recodified from R4-4-611 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-612. Solvency and Minimum Liquid Assets

- A.** A debt management company shall not operate if it is insolvent. For purposes of this Section “insolvent” has the same meaning as in A.R.S. § 47-1201(23).
- B.** To determine compliance with A.R.S. § 6-709(A), a debt management company’s liquid assets include funds held in its trust account. Liquid assets do not include goodwill and other intangible assets. A debt management company’s total liquid assets shall exceed by \$2,500.00 the total of all its current business liabilities together with all balances held for debtors as reflected in the company’s subsidiary ledgers.
- C.** Except as otherwise provided by this Section, or in a specific ruling by the Director, a debt management company shall use generally accepted accounting principles to compute assets and liabilities.

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-612 recodified from R4-4-612 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1945 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

- R20-4-618. Reserved**
- R20-4-619. Reserved**
- R20-4-620. Repealed**

Historical Note

Adopted effective October 26, 1978 (Supp. 78-5). R20-4-620 recodified from R4-4-620 (Supp. 95-1). Section repealed by final rulemaking at 8 A.A.R. 2708, effective June 6, 2002 (Supp. 02-2).

ARTICLE 7. ESCROW AGENTS

R20-4-701. Change in Location of Business

An escrow agent shall submit to the Director notice of any change in the location of the escrow agent’s business. The escrow agent

shall ensure that the Director receives the notice at least five days before the escrow agent conducts business at the new location. The escrow agent shall remit the fee required by A.R.S. § 6-126(A), to the Director with the notice of the location change.

Historical Note

Former Rule 1. R20-4-701 recodified from R4-4-701 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1949 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-702. Account Practices and Records

An escrow agent shall maintain records to enable the Director to reconstruct the details of each escrow transaction. The records shall include the following:

- 1. The seller’s name and address;
- 2. The buyer’s name and address;
- 3. The lender’s name and address, if any;
- 4. The borrower’s name and address, if any;
- 5. The real estate agent’s name and address, if any;
- 6. Complete escrow instructions;
- 7. Records and supporting documentation for each receipt and disbursement made through the escrow; and
- 8. A copy of the escrow settlement.

Historical Note

Former Rule 2. R20-4-702 recodified from R4-4-702 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1949 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-703. Preservation of Records

An escrow agent shall preserve the records, books, and accounts pertaining to each escrow transaction for at least three years following the final settlement date of the transaction. An escrow agent may keep its records as electronic records if the escrow agent can generate all information and copies of documents required by A.R.S. § 6-831 within the timeframe set by the Department for examination or other purposes.

Historical Note

Former Rule 3. R20-4-703 recodified from R4-4-703 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1949 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-704. Subsidiary Account Records

An escrow agent shall maintain subsidiary account records that identify the funds deposited in each escrow account. The total of all credit balances in the subsidiary accounts shall always equal the balance of the general ledger control account.

Historical Note

Former Rule 4. R20-4-704 recodified from R4-4-704 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1949 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-705. Reserved

R20-4-706. Repealed

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

Former Rule 6. R20-4-706 recodified from R4-4-706 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4).

R20-4-707. Expired**Historical Note**

Adopted effective June 25, 1993 (Supp. 93-2). R20-4-707 recodified from R4-4-707 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 411, effective September 30, 2014 (Supp. 15-1).

R20-4-708. Financial Condition and Resources

The Director shall consider the following criteria in evaluating an escrow agent's, other escrow agent's, or applicant's financial condition and resources under A.R.S. § 6-817:

1. Amount of positive net worth,
2. Amount of tangible net worth,
3. Amount of liquid assets,
4. Amount of cash provided by operations,
5. Ratio of debt to net worth,
6. Owner's personal financial resources,
7. Outside resources available,
8. Profitability,
9. Projected operating results,
10. Status as agent for a title insurance company, and
11. Sources of new business.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5385, effective November 9, 2001 (Supp. 01-4). Amended by final rulemaking at 29 A.A.R. 1949 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

ARTICLE 8. TRUST COMPANIES**R20-4-801. Definitions**

In addition to the definitions provided in A.R.S. § 6-851, the following terms apply to this Article unless the context otherwise requires:

"Account" means the trust, estate, or other fiduciary relationship established with a trust department or trust company.

"Affiliate" has the meaning stated at A.R.S. § 6-801.

"Director" has the meaning stated at A.R.S. § 20-102.

"Governing instrument" means a document, and all its operative amendments, that:

- Creates a trust and regulates the trustee's conduct,
- Creates an agency relationship between a trust department or trust company and a client, or
- Otherwise evidences a fiduciary relationship between a trust department or trust company and a client.

"Investment responsibility" means full and unrestricted discretion to invest trust funds without direction from anyone as to any matter, including the terms of the trade or the identity of the broker.

"Person" has the meaning stated at A.R.S. § 20-105.

"Trust asset" means any property or property right held by a trust department or trust company for the benefit of another.

"Trust department" means a permittee under both A.R.S. § 6-201 et seq. and Article 2 of this Chapter that possesses a banking permit authorizing it to engage in trust business.

"Trust funds" means any money held by a trust department or trust company for the benefit of another.

"Trustor" means a person who creates or funds a trust, or both.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-801 recodified from R4-4-801 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-802. Reserved**R20-4-803. Reserved****R20-4-804. Repealed****Historical Note**

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-804 recodified from R4-4-804 (Supp. 95-1). Repealed by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2).

R20-4-805. Reports

- A. Within 90 days following each December 31, each trust department and trust company shall file an annual report of trust assets with the Director on the form prescribed by the Director. The annual report shall include the current market value of all trust assets held by the trust department or trust company as of December 31. The report shall also identify and briefly describe all transactions conducted in the report period that are regulated by subsections R20-4-812(E) through (G).
- B. Each trust company shall deliver a copy of its annual report and certificate of disclosure to the Director within 10 days of filing the report and certificate at the Arizona Corporation Commission. A report or certificate covered by this subsection is one filed under the authority of A.R.S. §§ 10-202 or 10-1622. A copy delivered to the Director, as required in this subsection, shall be date-stamped by the Arizona Corporation Commission to confirm the actual filing date.
- C. Each trust company shall notify the Director of any change in the directors or officers of the company within 10 days of the change. Any trust company with more than 25 officers may, after obtaining the Director's written approval, limit the officers covered by this subsection to those with substantial involvement in the trust company's corporate operations or in the trust company's trust business in this state.

Historical Note

Adopted effective September 1, 1977 (Supp. 77-3). R20-4-805 recodified from R4-4-805 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-806. Records

- A. Every trust company shall keep its records as originals or as copies of the originals made by reproduction methods that accurately and permanently preserve the records. A trust company may keep its records as electronic records if the trust company can generate all information and copies required by

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

this Section within the timeframe set by the Department for examination or other purposes.

- B.** A trust department or trust company shall keep books, accounts, and records adequate to provide clear and readily understandable evidence of all business conducted by the trust department or trust company, including the following:
1. A file for each account that includes:
 - a. The governing instrument,
 - b. All contracts and other legal documents,
 - c. Copies of all correspondence,
 - d. Accounting records disclosing all the financial transactions, and
 - e. A listing of all the account's assets and liabilities.
 2. An investment file for each account that includes:
 - a. All original documentary evidence of the account's assets; or
 - b. Copies of the original documentary evidence of the account's assets, together with written evidence of custody or receipt of the originals by an authorized holder; and
 - c. A record of the initial and annual investment reviews for the account.
 3. The corporate general ledger kept current on a daily basis. This record shall identify and segregate all financial transactions conducted by the trust department or trust company for itself, distinguishing them from those relating to the trust department's or trust company's trust business;
 4. Unaudited financial statements. A trust department or trust company shall produce these statements quarterly or more frequently when required by the Director. The financial statements shall include at least:
 - a. A balance sheet; and
 - b. A statement of income, expenses, and retained earnings.
 5. Adequate records of all pending litigation that names the trust department or trust company as a party.
- C.** A trust department shall keep its fiduciary records separate and distinct from the trust department's corporate records.
- D.** A trust department or trust company shall keep records described in subsections (B)(1) and (2) for at least three years after closing an account. If litigation occurs concerning a particular account, the trust department or trust company shall keep that account's records, described in subsections (B)(1) and (2), for three years after the litigation is resolved.

Historical Note

Adopted effective September 1, 1977 (Supp. 77-3). R20-4-806 recodified from R4-4-806 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-807. Unsafe or Unsound Condition

For purposes of A.R.S. §§ 6-863 and 6-865, a trust company conducts business in an unsafe manner or its affairs are in an unsound condition if it:

1. Violates any fiduciary duty or obligation, including those listed in Sections R20-4-809 through R20-4-815;
2. Violates any state or federal requirement for operating or maintaining trusts, common trust funds, or other accounts;

3. Violates any applicable federal or state law or regulation regarding corporations or securities;
4. Employs an officer or director who violates a corporate fiduciary duty;
5. Is insolvent; or
6. Engages in any conduct that the Director determines constitutes an unsafe or unsound business practice jeopardizing the trust company's financial condition or the interests of a stockholder, creditor, trustor, beneficiary, or trust company's principal.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-807 recodified from R4-4-807 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-808. Administration of Fiduciary Powers

- A.** The board of directors and the officers share responsibility for the exercise of fiduciary powers by a trust department or trust company. The board of directors is responsible for determining policy; investing and disposing of trust assets; and directing and reviewing the actions of all directors, officers, and committees of the board that exercise fiduciary powers. The board of directors may delegate the necessary power and authority to perform the trust department's or trust company's duties as a fiduciary to selected directors, officers, employees, or committees of the board if the delegation is consistent with the corporate charter. The minutes of the board's meetings shall duly reflect all those delegations.
- B.** A trust department or trust company shall not accept a new account without first obtaining the board's approval, or that of the directors, officers, or committees that the board may have authorized to approve new accounts. The trust department or trust company shall keep a written record of each new account approval and of the closing of each account. The trust department or trust company shall conduct an asset review within 60 days after it accepts each new account if it has investment responsibility for that account. The trust department's or trust company's board shall ensure that an annual review of account assets is conducted for each account in which the trust department or trust company has investment responsibility, to determine whether to retain or dispose of the assets.
- C.** A trust department or trust company exercising fiduciary powers shall use independent legal counsel admitted to practice in Arizona to advise and inform the trust department or trust company on fiduciary matters and all other legal issues presented to the trust department or trust company by the conduct of its trust business.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-808 recodified from R4-4-808 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-809. Fiduciary Duties

A trust department or trust company shall perform all fiduciary duties imposed upon it by law, including the following:

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

1. Administer accounts strictly according to the governing instrument and solely in the account beneficiary's interests;
2. Use reasonable care and skill to make the account productive;
3. Provide complete and accurate information about the nature and amount of assets held to each account's beneficiary or principal and permit the beneficiary, principal, or any person duly authorized by the beneficiary or principal to inspect the account's records at any time during normal business hours. The information provided in compliance with this subsection shall be delivered at least quarterly, unless:
 - a. The trust department or trust company and its account's beneficiary, principal, or authorized person agree otherwise in writing;
 - b. The governing instrument provides otherwise; or
 - c. A different frequency is established by a lawful course of dealing before the effective date of this Section; and
4. Comply with all lawful provisions of the governing instrument.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-809 recodified from R4-4-809 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-810. Funds Awaiting Investment or Distribution

- A. Trust funds held by a trust department or trust company awaiting investment or distribution shall not remain uninvested or undistributed any longer than is reasonable for the account's proper management.
- B. A trust department or trust company may keep trust funds in deposit accounts maintained by the trust department or trust company unless prohibited by law or by the governing instrument. The trust department or trust company shall set aside collateral security for all deposited trust funds under a third party's control. The collateral shall be the following types of securities, in any combination:
 1. Direct obligations of the United States or any agency, department, division, or administration of the federal government;
 2. Any other obligations fully guaranteed by the United States government as to principal and interest;
 3. Obligations of a Federal Reserve Bank;
 4. Obligations of any state, political subdivision of a state, or public authority organized under the laws of a state; or
 5. Readily marketable securities that either:
 - a. Qualify as investment securities under the Investment Securities regulations of the Comptroller of the Currency, 12 CFR, Chapter 1, Part 1; or
 - b. Satisfy state pledging requirements under A.R.S. § 6-245(C).
- C. The securities set aside under subsection (B) shall, at all times, have a market value no less than the amount of trust funds deposited. No collateral security is required to the extent the Federal Deposit Insurance Corporation, or its successor, insures the deposited trust funds.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-810 recodified from R4-4-810 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-811. Investment of Trust Funds

- A. A trust department or trust company shall invest trust funds according to:
 1. The governing instrument; and
 2. All applicable laws, including A.R.S. §§ 6-862, 14-7402, and 14-7501 through 14-7512
- B. A trust department or trust company shall make any collective investment of trust funds exclusively under the terms of R20-4-815.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-811 recodified from R4-4-811 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-812. Self-dealing

- A. A trust department or trust company shall not invest trust funds in the following types of property unless expressly authorized by the governing instrument, applicable state or federal law, or court order:
 1. Its own securities;
 2. Other types of property acquired from the trust department or trust company;
 3. Property acquired from the trust department's or trust company's directors, officers, or employees;
 4. Property acquired from the trust department's or trust company's affiliates;
 5. Property acquired from its affiliates' directors, officers, or employees; or
 6. Property acquired from other individuals or organizations with an interest in the trust department or trust company if that interest might affect the trust department's or trust company's exercise of discretion to the detriment of its trust clients.
- B. A trust department or trust company may use trust funds to purchase its own securities, or its affiliates' securities:
 1. If the trust department or trust company has authority under subsection (A), and
 2. If those securities are offered pro rata to all stockholders of the trust department or trust company.
- C. A trust department or trust company shall not sell or loan trust property to itself, or to the following types of persons, unless expressly authorized by the governing instrument, applicable state or federal law, or court order:
 1. Its directors, officers, or employees;
 2. Its affiliates;
 3. Its affiliates' directors, officers, or employees; or
 4. Other individuals or organizations with an interest in the trust department or trust company if that interest might affect the trust department's or trust company's exercise of discretion to the detriment of its trust clients.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- D.** However, a trust department or trust company may sell or loan trust property to persons prohibited by subsection (C) if either:
1. Its counsel has advised in writing that, by holding certain property, the trust department or trust company has incurred a contingent or potential liability for breach of fiduciary duty; and
 - a. The proposed sale or loan avoids the contingent or potential liability;
 - b. Its board of directors authorizes the sale or loan by an action duly noted in the trust department's or trust company's minutes;
 - c. Its board of directors' action expressly authorizes reimbursement to the affected account; and
 - d. The affected account is reimbursed, in cash, at no loss to that account; or
 2. The Director requires or approves, in writing, the sale or loan to otherwise prohibited parties.
- E.** A trust department or trust company may sell trust property held in one account to another of its accounts if:
1. The transaction is fair to both accounts; and
 2. The transaction is not prohibited by the governing instruments, applicable state or federal law, or court order.
- F.** A trust department or trust company may loan trust property held in one account to another of its accounts if:
1. The transaction is fair to both accounts; and
 2. The transaction is not prohibited by the governing instruments, applicable state or federal law, or court order.
- G.** A trust department or trust company may make a loan to a trust account, taking trust assets of the borrowing account as security for repayment, if:
1. The transaction is fair to the borrowing account; and
 2. The transaction is not prohibited by the governing instrument, applicable state or federal law, or court order.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-812 recodified from R4-4-812 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-813. Custody of Investments

- A.** A trust department or trust company shall keep each account's investments separate from its own assets. A trust department or trust company shall place each account's assets in the joint control of at least two officers or employees of the trust department or trust company designated in writing for that purpose by:
1. The trust department's or trust company's board of directors, or
 2. One or more officers authorized by the trust department's or trust company's board of directors to make the designation.
- B.** A trust department or trust company shall either:
1. Keep each account's investments separate from all other accounts' investments, except as provided in R20-4-815; or
 2. Adequately identify each account's property in the trust department's or trust company's records.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-813 recodified from R4-4-813 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000

(Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-814. Compensation

- A.** A trust department or trust company acting as a fiduciary may charge a reasonable fee for its services. The trust department or trust company shall receive the fee allowed by the court when it is acting under a court appointment. Any agreement as to fees in the governing instrument shall control the fee unless contrary to law, regulation, or court order.
- B.** A trust department or trust company shall not permit any of its officers or employees to take any compensation for acting as a co-fiduciary with the trust department or trust company in the administration of an account.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-814 recodified from R4-4-814 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-815. Collective Investments

- A.** All collective investments made by a trust department or trust company shall be in a common trust fund established under A.R.S. § 6-871 and maintained by the trust department or trust company exclusively for the collective investment and reinvestment of funds contributed by the trust department or trust company acting as a fiduciary. A trust department or trust company shall not establish a common trust fund unless it first:
1. Prepares a written plan regarding the common trust fund; and
 2. Obtains its board of directors' approval of the plan, evidenced by a duly adopted resolution or the board's unanimous written consent.
- B.** The plan shall describe the common trust fund's operational details, including a description of:
1. The trust department's or trust company's investment powers and investment policy over all funds deposited in the common trust fund,
 2. The manner for allocating the common trust fund's income and losses,
 3. The criteria for admission to or withdrawal from participating in the common trust fund, and
 4. The method for valuing assets in the common trust fund and the frequency of valuation.
- C.** A trust department or trust company shall advise all persons having an interest in its common trust fund of the existence of the plan described in subsection (B), and shall provide a copy of the plan upon request.
- D.** The annual report required under R20-4-805(A) shall include all common trust funds operated by the trust department or trust company.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-815 recodified from R4-4-815 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

R20-4-816. Termination of Trust or Fiduciary Powers and Duties

- A.** Any trust department that wants to surrender its trust powers shall file with the Director a certified copy of the appropriate resolution of its board of directors or of the board's unanimous written consent. If, after investigation, the Director concludes that the trust department has no remaining fiduciary duties, the Director shall notify the trust department that it no longer has authority to exercise trust powers.
- B.** Any trust company that wants to surrender its certificate of authority to conduct trust business and wind up its affairs shall file with the Director a certified copy of the appropriate resolution of its board of directors or of the board's unanimous written consent. Upon receipt of the resolution or consent, the Director shall cancel the trust company's certificate of authority, and the trust company shall not accept new trust accounts.
- C.** After winding up its affairs, any trust company that wants to surrender its rights and obligations as a fiduciary and remove itself from the Director's supervision shall file with the Director a certified copy of the appropriate resolution of its board of directors or of the board's unanimous written consent. If, after investigation, the Director concludes that the trust company has no further fiduciary duties, the Director shall notify the trust company that it no longer has authority to exercise fiduciary powers.
- D.** Any trust department or trust company that surrenders its powers, rights, obligations, or certificate under this Section or that has them canceled, suspended, or revoked shall continue to be regulated under A.R.S. § 6-864 and this Article until it winds up its affairs. No action under this Section impairs any liability or cause of action, existing or incurred, against any trust department or trust company or its stockholders, directors, or officers.

Historical Note

Adopted effective June 30, 1977 (Supp. 77-3). R20-4-816 recodified from R4-4-816 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 2718, effective June 6, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 1952 (September 1, 2023), effective October 8, 2023 (Supp. 23-3).

Appendix A. Repealed**Historical Note**

Appendix A repealed by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2).

Appendix B. Repealed**Historical Note**

Appendix B repealed by final rulemaking at 6 A.A.R. 2471, effective June 8, 2000 (Supp. 00-2).

ARTICLE 9. MORTGAGE BROKERS**R20-4-901. Reserved****Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-901 recodified from R4-4-901 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-902. Reserved**Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-902 recodified from R4-4-902 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-903. Exemption for an Entity Regulated by an Agency of this State, Other States, or by the United States

- A.** The exemption under A.R.S. § 6-902 (A)(1) only applies to a person whose offers to make or negotiate a mortgage loan, as defined in A.R.S. § 6-901, and all mortgage loans made or negotiated by the person are regulated directly by an agency of this state, any other state, or the United States.
- B.** The required regulation of the transactions listed in subsection (A) includes:
1. Rules governing a claimant's accounting and recordkeeping practices;
 2. The authority to examine a claimant's books and records relating to its mortgage lending activities; and
 3. The ability to place a claimant in a receivership or conservatorship with regard to the claimant's mortgage lending activities.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-903 recodified from R4-4-903 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-904. Reserved**Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-904 recodified from R4-4-904 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-905. Repealed**Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-905 recodified from R4-4-905 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-906. Equivalent and Related Experience

- A.** An applicant may satisfy the three years' experience requirement of A.R.S. § 6-903 by the types of lending-related experience listed in this subsection. The Department counts each month in the following types of work experience toward the three years required for a mortgage broker license, under A.R.S. § 6-903(B), or as a responsible individual, under A.R.S. § 6-903(E). The Department counts a fractional month of experience, at least 15 days long, as a full month.
1. Mortgage broker with an Arizona license, responsible individual, or branch manager for a licensee;
 2. Mortgage banker with an Arizona license, responsible individual, or branch manager for a licensee;
 3. Loan officer with responsibility primarily for loans secured by lien interests on real property;
 4. Lender's branch manager with responsibility primarily for loans secured by lien interests on real property;
 5. Mortgage broker with license from another state, or responsible individual for a mortgage broker licensed in another state;

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- 6. Mortgage banker with license from another state, or responsible individual for a mortgage banker licensed in another state;
- 7. Attorney certified by any state as a real estate specialist.
- B.** An applicant with insufficient actual experience of the types listed in subsection (A) may satisfy the remainder of the three years' experience requirement of A.R.S. § 6-903 by the types of related experience listed in this subsection. The Department counts each month in the following types of work experience according to the ratio listed below, of actual experience to equivalent experience, credited towards qualifying for a license, under A.R.S. § 6-903(B), or as a responsible individual, under A.R.S. § 6-903(E). The Department counts a fractional month of experience, at least 15 days long, as a full month. An applicant receives credit in only one area listed and for not more than three years' actual experience. The remaining years of experience required to qualify for a license shall be obtained from types of work experiences listed in subsection (A).
 - 1. Attorney without state bar certified real estate specialty...3:2
 - 2. Paralegal with experience in real estate matters...3:2
 - 3. Loan underwriter...3:2
 - 4. Mortgage broker or mortgage banker from another state without license...3:2
 - 5. Real estate broker with an Arizona license or license from a state with substantially equivalent licensing requirements...3:2
 - 6. Escrow officer...3:2
 - 7. Trust officer with a title company...3:2
 - 8. Executive, supervisor, or policy maker involved in administering or operating a mortgage-related business...3:1.5
 - 9. Title officer with a title company...3:1.5
 - 10. Real estate broker, not qualified under subsection (B)(5)...3:1.5
 - 11. Loan processor with responsibility primarily for loans secured by lien interests on real property...3:1.5
 - 12. Lender's branch manager with responsibility primarily for loans not secured by lien interests on real property...3:1.5
 - 13. Real property salesperson with an Arizona license or a license from a state with substantially equivalent licensing requirements...3:1
 - 14. Loan officer, with responsibility primarily for loans not secured by lien interests on real property...3:1

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-906 recodified from R4-4-906 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-907. Course of Study

- A.** A course of study shall be satisfactorily completed if the applicant has:
 - 1. Attended at least 24 hours of class, and
 - 2. Received a passing grade on the final exam.
- B.** A course of study shall meet all the following requirements:
 - 1. The following items shall be submitted by the school to the Superintendent on an annual basis:

- a. Course materials;
- b. Class content outlines on a session-by-session basis; and
- c. Sample final exam.
- 2. The following subjects shall be taught:
 - a. Mortgage, deed of trust, and security agreement law;
 - b. Negotiable instrument law;
 - c. Mortgage broker law;
 - d. Escrow agent law;
 - e. Recordkeeping requirements of R20-4-917;
 - f. Federal Housing Administration, Veterans Administration, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation requirements;
 - g. Ethics;
 - h. Principal and agent law;
 - i. Arithmetical computations common to mortgage brokerage;
 - j. Real estate lending principles;
 - k. Real estate law;
 - l. Real Estate Settlement Procedures Act, 12 U.S.C. 2601 through 2617, and Consumer Credit Protection Act, 15 U.S.C. 1601 through 1666j; and
 - m. Securities law.
- 3. A final exam shall be given that substantially tests the student's knowledge of the subjects described above.
- C.** The Superintendent shall review the items submitted to the Department and determine within 60 days of submission whether the proposed course of study is satisfactory. The Superintendent may audit a course of study at any time. If the Superintendent finds that a course of study is unsatisfactory, or if the Superintendent has not received the course materials, course content outlines, and sample final exam within the prior 13 months, the Superintendent may withhold or suspend approval.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-907 recodified from R4-4-907 (Supp. 95-1).

R20-4-908. Reserved

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-908 recodified from R4-4-908 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-909. Reserved

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-909 recodified from R4-4-909 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-910. Reserved

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-910 recodified from R4-4-910 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-911. Qualified Replacement Responsible Individual

If a licensee chooses an individual to serve as a replacement responsible individual and that individual has not satisfactorily completed

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

the course of study required by A.R.S. § 6-903(B)(2) or passed the mortgage broker examination required by A.R.S. § 6-903(B)(3), and is not given the opportunity to do so prior to the expiration of the 90-day time period provided in A.R.S. § 6-903(F), but otherwise meets the requirements of A.R.S. § 6-903(B), the individual shall be qualified as a replacement responsible individual until the next course of study has been held and, if the person successfully completes the course of study, until the mortgage broker examination next following the completion of the course of study has been held and the results of the examination are available. If the individual fails to satisfactorily complete the course of study or fails the mortgage broker examination, the licensee shall then have a new 90-day time period within which to place itself under the active management of a qualified responsible individual. Notwithstanding the foregoing, a licensee shall have no longer than 180 days within which to place the license under the active management of a qualified responsible individual unless the Superintendent grants additional time to the licensee for good cause shown.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-911 recodified from R4-4-911 (Supp. 95-1).

R20-4-912. Restrictions on the Term of a Cash Alternative

If an applicant or a licensee elects to place with the Superintendent a deposit in the form of a certificate of deposit or investment certificate, in addition to the requirements of A.R.S. § 6-903(J), the certificate of deposit or investment certificate shall not be renewable, nor expire, earlier than 12 months from the date of issuance.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-912 recodified from R4-4-912 (Supp. 95-1).

R20-4-913. Reserved**Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-913 recodified from R4-4-913 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-914. Reserved**Historical Note**

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-914 recodified from R4-4-914 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-915. Requirements for a Person Intended to Oversee a Branch Office

A person designated to oversee the operations of a branch office shall be knowledgeable about the branch activities of the licensee, shall supervise compliance by the branch with applicable law and rules, and shall have sufficient authority to ensure such compliance. One person may oversee more than one branch.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-915 recodified from R4-4-915 (Supp. 95-1).

R20-4-916. Notification of Change of Address

If the address of the principal place of business or of any branch office is changed, the licensee shall notify the Superintendent of the change within five business days after the occurrence of the change of location. Together with such notice, the licensee shall provide to the Department the license for the office changing addresses

together with the fee required by A.R.S. § 6-126 for changing the address of an office. A copy of such license shall continue to be displayed at the place of business until a new license is issued.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-916 recodified from R4-4-916 (Supp. 95-1).

R20-4-917. Recordkeeping Requirements

- A.** The Superintendent shall approve a licensee's use of a computer or mechanical recordkeeping system if the licensee gives the Superintendent advanced written notice that it intends to do so. The Department shall not require a licensee to keep a written copy of the records if the licensee can generate all information required by this Section in a timely manner for examination or other purposes. A licensee may add, delete, modify, or customize an approved computer or mechanical recordkeeping system's hardware or software components. When requested, or in response to a written notice of an examination, a licensee shall report to the Superintendent any alteration in the approved system's fundamental character, medium, or function if the alteration changes:
1. Any approved computer or mechanical system back to a paper-based system;
 2. An approved mechanical system to a computer system; or
 3. An approved computer system to a mechanical system.
- B.** In addition to any statutory requirement regarding records, a record maintained by a mortgage broker shall include the following:
1. A list of all executed loan applications or executed fee agreements that includes the following information:
 - a. Applicant's name;
 - b. Application date;
 - c. Amount of initial loan request;
 - d. Final disposition date;
 - e. Disposition (funded, denied, etc.); and
 - f. Name of loan officer;
 2. A record, such as a cash receipts journal, of all money received in connection with a mortgage loan including:
 - a. Payor's name;
 - b. Date received;
 - c. Amount; and
 - d. Receipt's purpose, including identification of a related loan, if any;
 3. A sequential listing of checks written for each bank account relating to the mortgage broker business, such as a cash disbursement journal, including:
 - a. Payee's name;
 - b. Amount;
 - c. Date; and
 - d. Payment's purpose, including identification of a related loan, if any;
 4. Bank account activity source documents for the mortgage broker business including receipted deposit tickets, numbered receipts for cash, bank account statements, paid checks, and bank advices.
 5. A trust subsidiary ledger for each borrower that deposits trust funds showing:
 - a. Borrower's name or co-borrowers' names;
 - b. Loan number, if any;
 - c. Amount received;
 - d. Purpose for the amount received;
 - e. Date received;
 - f. Date deposited into trust account;
 - g. Amount disbursed;

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- h. Date disbursed;
- i. Disbursement's payee and purpose; and
- j. Balance;
6. A file for each application for a mortgage loan containing:
- a. The agreement with the customer concerning the broker's services, whether as a loan application, fee agreement, or both;
 - b. Document showing the application's final disposition, such as a settlement statement, or a denial or withdrawal letter;
 - c. Correspondence sent, received, or both by the licensee;
 - d. Contract, agreement, and escrow instructions to or with any depository;
 - e. Documents showing compliance with the Consumer Credit Protection Act's (15 U.S.C. §§ 1601 through 1666j) and the Real Estate Settlement Procedures Act's (12 U.S.C. §§ 2601 through 2617) disclosure requirements, to the extent applicable;
 - f. If the loan is funded by an investor that is not a financial institution, an enterprise, a licensed real estate broker or salesman, a profit sharing or pension trust or, an insurance company, the documents provided to the investor under A.R.S. § 6-907, a copy of the executed note and executed deed of trust or mortgage, and any assignment by the broker to the investor;
 - g. If the loan is closed in the mortgage broker's name, a copy of all closing documents including: closing instructions, any applicable rescission notice, HUD-1 settlement statement, final truth-in-lending disclosure, executed note, executed deed of trust or mortgage, and each assignment of beneficial interest by the licensee; and
 - h. Itemized list of all fees taken in advance including appraisal fee, credit report fee, and application fee;
7. Samples of every piece of advertising relating to the mortgage broker's business in Arizona;
8. Copies of governmental or regulatory compliance reviews;
9. If the licensee is not a natural person, a file containing:
- a. Organizational documents for the entity;
 - b. Minutes;
 - c. A record, such as a stock or ownership transfer ledger, showing ownership of all proportional equity interests in the licensee, ascertainable as of any given record date; and
 - d. Annual report, if required by law;
10. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has a felony conviction, a copy of the judgment or other record of conviction;
11. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has, in the previous seven years, been named a defendant in any civil suit, a copy of the complaint, any answer filed by the licensee, and any judgment, dismissal, or other final order disposing of the action; and
12. If the Superintendent has granted approval to maintain records outside this state, the specific address where the records are kept, and a person's name to contact for them.
- C. If 10 or fewer transactions have occurred during the prior calendar quarter, a licensee shall reconcile and update all records specified in subsection (B) at least once each calendar quarter.
- A licensee shall reconcile and update all records specified in subsection (B) monthly if more than 10 transactions occurred during the prior calendar quarter. In addition to reconciling each trust bank account, a licensee shall verify each trust balance to each trust subsidiary ledger at each reconciliation.
- D. A licensee shall retain the documents described in subsections (B)(1) and (B)(6) for the length of time provided in A.R.S. § 6-906. For the purposes of A.R.S. § 6-906, a mortgage loan's closing date, on a loan application that did not result in the making of a loan, is either:
1. The date a licensee receives a written cancellation notice from an applicant; or
 2. The date a licensee mails written notice to an applicant that the application has been denied, as required by federal law.
- E. A licensee shall maintain all records described in this Section, and not included in subsection (D), for at least two years.
- Historical Note**
Adopted effective August 14, 1991 (Supp. 91-3). R20-4-917 recodified from R4-4-917 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-918. Repealed**
- Historical Note**
Adopted effective August 14, 1991 (Supp. 91-3). R20-4-918 recodified from R4-4-918 (Supp. 95-1). Section repealed by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-919. Deposit of Monies Received by a Mortgage Broker**
- All monies received by a mortgage broker which are required to be deposited into an escrow account with an escrow agent licensed pursuant to A.R.S. § 6-801 et seq. shall be so deposited by 5:00 p.m. on the next business day after receipt of the funds.
- Historical Note**
Adopted effective August 14, 1991 (Supp. 91-3). R20-4-919 recodified from R4-4-919 (Supp. 95-1).
- R20-4-920. Requirements for the Testing Committee**
- A. No licensee shall submit more than five names as nominees to serve on the testing committee. The resumes of the nominees shall be included. The names and resumes shall be submitted to the Superintendent no later than August 1 of each even-numbered year. On or before September 30 of each even-numbered year, the Superintendent shall appoint four persons from the nominees submitted and one employee of the Department as members of the testing committee. A person may serve more than one two-year term. If the Superintendent does not find at least four persons from the list to be acceptable, the Superintendent shall solicit additional nominees from licensees.
- B. In the event of a vacancy on the testing committee, the remaining members of the committee shall submit a list of nominees within 45 days of the vacancy to the Superintendent containing not less than two nominees for each vacancy. The Superintendent shall then appoint a nominee from the list to fill each vacancy for the remainder of the term. If the Superintendent does not find at least one person from the list to be acceptable to fill each vacancy, the remaining members of the committee shall, upon request, submit an additional list of nominees to the Superintendent.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- C. The Superintendent may remove any member of the committee at any time without cause.
- D. The committee shall review and revise questions on the test not less than once every two years. All questions used on the test shall first be submitted to and approved by the Superintendent.
- E. The committee shall inform the applicant of the applicant's score on the test in writing within 30 days of administration of the test.
- F. The handbook for mortgage brokers shall be updated by the committee as necessary to reflect changes in the law.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-920 recodified from R4-4-920 (Supp. 95-1).

R20-4-921. Authorizations to Complete Blank Spaces

An authorization, under A.R.S. § 6-909, allowing a licensee or escrow agent to complete certain blank spaces in a document after it is signed by a party to the transaction shall:

1. Specifically identify the document and the blank spaces to be completed;
2. Be in writing, dated, and signed by the authorizing parties; and
3. Contain the following notice, conspicuously printed on its face: YOUR SIGNATURE BELOW AUTHORIZES YOUR MORTGAGE BROKER OR ESCROW AGENT TO FILL IN SPACES YOU LEFT BLANK IN SPECIFIED LOAN DOCUMENTS YOU ARE ABOUT TO SIGN OR MAY HAVE ALREADY SIGNED. UNDER STATE LAW YOU CAN GIVE THIS AUTHORITY, BUT YOU ARE NOT REQUIRED TO DO SO. YOU CAN REFUSE TO SIGN ANY DOCUMENTS UNTIL ALL BLANKS ARE COMPLETELY FILLED IN.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-921 recodified from R4-4-921 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-922. Determining Loan Amounts

In determining the amount of a mortgage loan pursuant to A.R.S. § 6-909(D) or (G), only the principal amount of the loan shall be considered and not any points, interest, finance charges, insurance premiums of any kind, compensation paid to third parties or compensation retained by the mortgage broker or its agents.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-922 recodified from R4-4-922 (Supp. 95-1).

R20-4-923. Delay or Cause Delay

A mortgage broker shall not be deemed to have delayed or caused delay if such delay occurs due to events outside the control of the mortgage broker.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-923 recodified from R4-4-923 (Supp. 95-1).

R20-4-924. Receipt and Disbursement of Monies

A licensee is not receiving or disbursing monies in servicing or arranging a mortgage loan if the licensee, at the request of the lender or servicing agent, on an infrequent basis, assists in the collection or servicing of a mortgage loan by receiving from the borrower a check or draft payable to the lender or servicing agent and forwarding such instrument to the lender or servicing agent not later

than 5:00 p.m. on the next business day after receipt by the licensee. For the purposes of this rule, an infrequent basis means, with regard to a particular loan, for not more than 25% of the regularly scheduled payments of the mortgage loan during any calendar year.

Historical Note

Adopted effective August 14, 1991 (Supp. 91-3). R20-4-924 recodified from R4-4-924 (Supp. 95-1).

R20-4-925. Waiver of Examination and Course of Study

The Superintendent's waiver of the examination and course of study requirement under A.R.S. § 6-903 extends to a person designated as a responsible individual by either an applicant or a licensee under A.R.S. § 6-903.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-926. Acquisition of Additional Interest in Licensee by Majority Owner

A person that owns 51% or more of a licensee's outstanding voting equity interests, and that acquires the power to vote additional fractional equity interests, shall deliver written notice of the acquisition to the Superintendent. The person shall deliver the notice before completing the acquisition. Within 10 days after completing the acquisition, the person shall deliver documentation evidencing the acquisition to the Superintendent.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-927. Conversion to Commercial Mortgage Broker License

- A. Under A.R.S. § 6-913, a mortgage broker licensee shall only be permitted to convert his or her license to a commercial mortgage broker license during the renewal period established by A.R.S. § 6-904.
- B. The licensee seeking conversion shall not be subject to the 12 continuing education units as prescribed by A.R.S. § 6-903(V).
- C. The licensee seeking conversion shall submit:
 1. The renewal fees required by A.R.S. § 6-126 for commercial mortgage brokers, and
 2. The information and documents required by A.R.S. § 6-903.

Historical Note

New Section adopted by final rulemaking at 18 A.A.R. 2622, effective December 2, 2012 (Supp. 12-4).

R20-4-928. Certificate of Exemption Application and Renewal

- A. Under A.R.S. § 6-912(C), upon application for a certificate of exemption, an applicant shall pay a nonrefundable fee of \$300.
- B. A person holding a certificate of exemption shall pay a renewal fee of \$150.00 on or before December 31 of each year. Certificates of exemption not renewed by December 31 are automatically suspended, and the certificate holder shall not act as a registered exempt person until the certificate is renewed or a new certificate is issued pursuant to A.R.S. § 6-912. While the certificate is suspended, the licensed loan originators sponsored by the registered exempt person may not transact business as a loan originator. A registered exempt person may renew an automatically suspended certificate by paying the renewal fee plus \$25.00 for each day after December 31 that a renewal fee is not received by the Superintendent and

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

applying for renewal as prescribed by the Superintendent. A certificate of exemption that is not renewed by January 31 expires. A certificate of exemption shall not be granted to the holder of an expired certificate of exemption except as provided in A.R.S. § 6-912 for the issuance of an original certificate of exemption. Each licensed loan originator that is sponsored by a registered exempt person whose certificate has expired shall have his or her license placed on inactive status and shall not transact business in Arizona as a loan originator pursuant to A.R.S. § 6-991.02(M).

- C. In addition to the application fee, on issuance of the certificate of exemption, the Superintendent shall collect the first year's renewal fee prorated according to the number of quarters remaining until the date of the next annual renewal, as required by A.R.S. § 6-126(B).
- D. The following fees are payable to the Department:
1. To change the name of the federally chartered savings bank on a certificate of exemption: \$250.00.
 2. To change the responsible individual for the exempt entity: \$250.00.
 3. To issue a duplicate or replace a lost certificate of exemption: \$100.00.
 4. To change the address of the federally chartered savings bank on a certificate of exemption: \$50.00.

Historical Note

New Section adopted by final rulemaking at 18 A.A.R. 2622, effective December 2, 2012 (Supp. 12-4).

ARTICLE 10. SAFE DEPOSIT AND SAFEKEEPING CODE**R20-4-1001. Notice of Change of Location of Safe Deposit Repository**

- A. A corporation or association that moves a repository shall give written notice of the location change to the Director and to its customers.
1. A corporation or association shall provide notice of the location change to the Director by mailing the notice required under this subsection by first class mail no less than 30 days before the scheduled moving date. The corporation or association shall include a copy of the notice to customers required under subsection (B).
 2. A corporation or association shall provide notice of the location change to its customers by:
 - a. Publishing notice of the change of location in:
 - i. An English language newspaper of general circulation in the county where the repository will be closed,
 - ii. In a weekly newspaper for two consecutive publications, or
 - iii. In a daily newspaper for three consecutive days; and
 - b. Publishing the notice no more than 90 days, and no less than 30 days, before the scheduled moving date.
- B. The corporation or association shall include all the following information in the notice:
1. The date the corporation or association intends to move the repository,
 2. The earliest date a customer can remove contents and transact other business related to the move,
 3. The latest date a customer can remove contents and transact other business related to the move,
 4. The street address of the repository to be closed, and
 5. The street address of the new repository.

Historical Note

Former Rule 1. R20-4-1001 recodified from R4-4-1001 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 5227, effective February 4, 2003 (Supp. 02-4). Preceding Historical Note entry corrected to read 2003 instead of 2002 (Supp. 03-1). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

ARTICLE 11. PUBLIC DEPOSITORIES FOR PUBLIC MONIES**R20-4-1101. Capital Structure of Banks; Defined**

"Capital structure" as the term is applied to banks under Article 2.1, Chapter 2, Title 35, Arizona Revised Statutes, means the sum of the following reserves and capital accounts of the institution as stated in the institution's report of condition required by the supervisory banking authority for the year end next preceding the institution's bid for deposit:

1. Reserve for bad debt losses on loans,
2. Other reserves on loans,
3. Reserves on securities,
4. Capital notes and debentures,
5. Preferred stock – total par value,
6. Common stock – total par value,
7. Surplus,
8. Undivided profits, and
9. Reserve for contingencies and other capital reserves.

Historical Note

Adopted as an emergency effective July 29, 1975 (Supp. 75-1). Amended effective December 26, 1975 (Supp. 75-2). R20-4-1101 recodified from R4-4-1101 (Supp. 95-1). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1102. Expired**Historical Note**

Adopted as an emergency effective July 29, 1975 (Supp. 75-1). Amended effective December 26, 1975 (Supp. 75-2). R20-4-1102 recodified from R4-4-1102 (Supp. 95-1). Section expired under A.R.S. § 41-1056(J) at 26 A.A.R. 382, effective February 5, 2020 (Supp. 20-1).

ARTICLE 12. RULES OF PRACTICE AND PROCEDURE BEFORE THE DIRECTOR**R20-4-1201. Scope of Article; Definitions**

- A. Scope. This Article, Title 6, Title 32, Chapters 9 and 36, and Title 44, Chapter 2.1 of the Arizona Revised Statutes govern administrative hearings before the Department. The Department shall use the authority of A.R.S. Title 41, Chapter 6, Article 10, the Office of Administrative Hearings' procedural rules and this Article to govern the initiation and conduct of administrative hearings. In an administrative hearing, special procedural requirements in state statute or another Section in this Article shall also govern the proceedings unless the requirements are inconsistent with either A.R.S. Title 41, Chapter 6, Article 10, the Office of Administrative Hearings' rules, or this Article. Except as otherwise provided in Section R20-4-1220 for rulemaking petitions, this Article does not apply to rulemaking or to investigative proceedings before the Director. Unless expressly applicable by rule or statute, the Arizona Rules of Civil Procedure do not apply to administrative hearings.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- B.** In addition to the definitions provided in A.R.S. §§ 41-1001 and 41-1092, the following terms apply to this Article:

“Administrative Hearing” means an appealable agency action as defined by A.R.S. § 41-1092(3) or a contested case as defined by A.R.S. § 41-1001(5) subject to A.R.S. Title 41, Chapter 6, Article 10.

“Attorney General” means the Attorney General of Arizona, and the Attorney General’s assistants and special agents.

“Department” means the Arizona Department of Insurance and Financial Institutions – Financial Institutions Division.

“Director” has the meaning stated at A.R.S. § 20-102.

“Party” has the meaning prescribed at A.R.S. § 41-1001(16) and includes any person or entity subject to the jurisdiction of the Department under A.R.S. Title 6, Title 32 - Chapter 9, Title 32 - Chapter 36, and Title 44 - Chapter 2.1.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1201 recodified from R4-4-1201 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1202. Appearance and Practice before the Director for Administrative Hearings

- A.** A party may appear on their own behalf or through counsel.
- B.** When an attorney other than the Attorney General appears or intends to appear before the Director or the Department, they shall promptly disclose their name and contact information and the name and contact information of the party on whose behalf they intend to appear.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1202 recodified from R4-4-1202 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1203. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1203 recodified from R4-4-1203 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1204. Filing; Service

- A.** A document filed by a party with the Department is filed on the date it is received by the Department as established by the Department’s earliest stamped date on the face of the document or by some other method of affixing a received date by the Department.
- B.** If a party is represented by an attorney, service is effectuated by service upon the attorney unless additional service upon the represented party is required by an administrative law judge or the Department.
- C.** A document is served upon a party as provided for under A.R.S. § 41-1092.04 and Section R2-19-108. A party effectuating service is responsible for producing proof of service if requested by the Department.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1204 recodified from R4-4-1204 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Amended to correct a typographical error in subsection (B) (Supp. 01-4). Amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1205. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1205 recodified from R4-4-1205 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1206. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1206 recodified from R4-4-1206 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1207. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1207 recodified from R4-4-1207 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1208. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1208 recodified from R4-4-1208 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Repealed by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1209. Answer to Notice of an Administrative Hearing

- A.** The Department may, in a notice of hearing, direct one or more parties to file a written answer to the allegations contained in the notice of hearing. Even if not directed to do so, any party to the proceeding may file an answer.
- B.** A party directed to file an answer shall do so within 20 days after issuance of a notice of hearing, unless the notice of hearing states a different period for the answer. The Department may require any party to answer, in a reasonable time, amendments to the assertions in the notice made after service of the original notice.
- C.** An answer filed under this Section shall briefly state the party’s position or defense to the proceeding and shall specifically admit or deny each of the allegations in the notice of hearing. An answering party who does not have, or cannot easily obtain, knowledge or information sufficient to admit or deny an allegation shall state that inability which shall have the effect of a denial. Any allegation not denied is admitted. A party who intends to deny only a part of an allegation, shall expressly admit as much of that allegation as is true and shall deny the remainder.
- D.** A party who fails to file an answer required by this Section within the time allowed is in default. The Director may resolve

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

the proceeding against a defaulting party. In doing so, the Director may regard any allegations in the notice of hearing as admitted by the defaulting party.

E. Defenses not raised in the answer are waived.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1209 recodified from R4-4-1209 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1210. Stay Pending a Hearing

A person aggrieved by the Department's action or order who files a timely written request for a hearing may ask, in the request for a hearing, that the Director stay an action or any part of an order that will become effective before a hearing. The Director may, in the Director's discretion, stay the legal effectiveness of any action or order until the matter can be heard and finally decided if the aggrieved person's request demonstrates that:

1. The person has a reasonable defense that might prevail on the merits at the hearing,
2. The person will suffer irreparable injury unless the Director grants the stay,
3. The stay would not substantially or irreparably harm other interested persons, and
4. The stay would not jeopardize the public interest or contravene public policy.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1210 recodified from R4-4-1210 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1211. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1211 recodified from R4-4-1211 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Repealed by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1212. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1212 recodified from R4-4-1212 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1213. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1213 recodified from R4-4-1213 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1214. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1214 recodified from R4-4-1214 (Supp. 95-1). Section

repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1215. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1215 recodified from R4-4-1215 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1216. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1216 recodified from R4-4-1216 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1217. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1217 recodified from R4-4-1217 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1218. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1218 recodified from R4-4-1218 (Supp. 95-1). Section repealed by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3).

R20-4-1219. Request for Rehearing or Review

- A. Any party aggrieved by an administrative decision may file with the Director within time limits and other procedural guidelines contained in A.R.S. § 41-1092.09, a written motion for rehearing or review of the decision specifying the particular reason for the request.
- B. A party filing a motion under this Section may amend the motion at any time before a response to the motion is filed. An amended motion tolls the time for filing a response and the time for rendering a decision on the motion.
- C. A request for rehearing or review which is not timely filed is deemed waived for the purpose of judicial review.
- D. A motion for rehearing or review shall specify which of the grounds listed in subsection (G) it is based upon and shall set forth the specific facts and laws in support of the motion. A motion may cite relevant portions of testimony from the hearing if a transcript is provided with the motion and may cite hearing exhibits by reference to the exhibit number. The motion shall specify the relief sought by the request, such as a different finding of fact, conclusion of law or order and may seek multiple forms of relief in the alternative. When a motion for rehearing or review is based on an affidavit, the moving party shall attach the affidavit to the motion.
- E. A party may file a separate request for a stay of the Director's decision. Filing a stay request or a motion for rehearing or review does not stay an order filed by the Director. The Director may stay an order pending the resolution of a motion for rehearing or review.
- F. Each party served with a motion for rehearing or review shall be permitted to file a written response within 15 days after the motion has been filed. Affidavits may be attached to and filed with a response. A response may cite relevant portions of testimony from the hearing if a transcript is provided with the

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

response and may cite hearing exhibits by reference to the exhibit number. The Director has the discretion to hear oral argument to consider a request for rehearing or review.

- G.** The Director may grant a motion for rehearing or review for any of the following causes:
1. Irregularity in the proceedings before the Department, in any order, or any abuse of discretion that deprives the moving party of a fair hearing;
 2. Misconduct by the Department, the administrative law judge, or the prevailing party;
 3. Accident or surprise that could not have been prevented by ordinary care;
 4. Newly discovered material evidence that could not reasonably have been discovered and produced at the original hearing;
 5. Excessive or insufficient penalties;
 6. Error in admitting or rejecting evidence or other legal errors occurring at the hearing; and
 7. The decision is not justified by the evidence or is contrary to law.
- H.** The Director may affirm or modify the decision or grant a rehearing as to all or any of the parties and on all or part of the issues for any reason listed in subsection (G). An order granting a rehearing shall specify the reason for granting the rehearing, and the rehearing shall cover only those matters specified.
- I.** The Director, within the time for filing a motion for rehearing, may without a motion for rehearing, order a rehearing for any reason that would allow the granting of a motion for rehearing by a party. The order for rehearing, granted without a motion, shall specify the reason for granting the rehearing.
- J.** The Director may grant a motion for rehearing, timely served, for a reason not stated in the motion. The order for rehearing, granted for a reason not stated in the motion, shall specify the reason for granting the rehearing.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1219 recodified from R4-4-1219 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4).

R20-4-1220. Petition for Rulemaking Action

- A.** The following definitions apply in this Section.
1. "Petitioner" means a person who petitions the Department for Rulemaking action as authorized under A.R.S. § 41-1033(A).
 2. "Rule" has the meaning stated at A.R.S. § 41-1001 and is enforceable by the Department.
 3. "Rulemaking action" means the process for formulation and finalization of a new rule, or amendment or repeal of an existing rule.
 4. "Substantive Policy Statement" has the meaning stated at A.R.S. § 41-1001, is advisory only, and is not enforceable by the Department.
- B.** Any person may petition the Department under A.R.S. § 41-1033(A) to either:
1. Make, amend, or repeal a final Rule; or
 2. Review an existing agency practice or Substantive Policy Statement that the Petitioner alleges to constitute a Rule.
- C.** A person who files a petition pursuant to A.R.S. § 41-1033(A), shall include the following information in the petition:
1. The Petitioner's name and contact information;

2. The name and address of any organization the Petitioner represents;
 3. Whether the Petitioner is petitioning the Department to:
 - a. Make, amend, or repeal a final Rule; or
 - b. Review an existing agency practice or Substantive Policy Statement that the Petitioner alleges to constitute a Rule;
 4. A detailed explanation of Petitioner's basis for submitting the petition;
 5. If the Petitioner is petitioning the Department to make a Rule, the language of the proposed new Section and the specific authority for the requested Rulemaking action;
 6. If the Petitioner is petitioning the Department to amend an existing Rule, a citation to the existing Section to be amended, the language of the proposed Rule amendment, and the specific authority for the requested Rulemaking action;
 7. If the Petitioner is petitioning the Department to repeal an existing Rule, a citation to the existing Section or subsection to be repealed, and an explanation of why the Rule should be repealed including, if applicable, how the Rule does not meet the requirements of A.R.S. § 41-1030;
 8. If the Petitioner is petitioning the Department to review an existing agency practice that the Petitioner alleges to constitute a Rule, a description of the Department's practice, an explanation of how the Department's practice constitutes a Rule being enforced by the Department, the language of the proposed new Rule, and the specific authority for the requested Rulemaking action;
 9. If the petitioner is petitioning the Department to review a Substantive Policy Statement that the Petitioner alleges to constitute a Rule, a citation to the Substantive Policy Statement, an explanation of how the Substantive Policy Statement is being enforced by the Department as a Rule, the language of the proposed new Rule, and the specific authority for the requested Rulemaking action; and
 10. The petitioner's dated signature.
- D.** The petitioner may submit additional supporting information, including:
1. Statistical data; and
 2. A list of other persons and entities likely to be affected by the proposed Rulemaking action, with an explanation of the likely effects.
- E.** Within 60 days of the date the Department receives the petition, the Director shall send the petitioner a written decision indicating whether the Department is denying the petition or will initiate the requested Rulemaking action, with the reasons for the decision.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). R20-4-1220 recodified from R4-4-1220 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4262, effective September 12, 2001 (Supp. 01-3). Section repealed; new Section amended by final rulemaking at 28 A.A.R. 3620 (November 25, 2022), effective January 1, 2023 (Supp. 22-4). Subsections C(5) through (10), (D) and (E) omitted when codified in Supp. 22-4; the rule text has been published as promulgated at 28 A.A.R. 3620 (Supp. 24-1).

ARTICLE 13. LOAN ORIGINATORS

- R20-4-1301. Scope of Article**
This Article applies to:

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

1. All loan originating activities of any person licensed under Arizona law as a loan originator, and
2. The conduct of any applicant for a loan originator license.

Historical Note

New Section made by emergency rulemaking at 16 A.A.R. 839, effective April 27, 2010 for 180 days (Supp. 10-2). Section renewed by emergency rulemaking and amended at 16 A.A.R. 2165, effective October 24, 2010 for 180 days (Supp. 10-4). Emergency expired April 21, 2011; new Section made by final rulemaking at 16 A.A.R. 2401, effective April 22, 2011 (Supp. 10-4). Since emergency expired, the emergency rulemaking has been removed. (Supp. 15-1).

R20-4-1302. Course of Study to Qualify for Licensure

- A. The Superintendent shall, under the authority of A.R.S. § 6-991.03(B)(1), approve a course of study that includes only those courses reviewed and approved by the Nationwide Mortgage Licensing System pursuant to A.R.S. § 6-991.03(E) and (F) and the Secure and Fair Enforcement for Mortgage Licensing Act of 2008 (P.L. 110-289; 122 Stat. 2810; 12 U.S.C. 5101 through 5116).
- B. An applicant for a loan originator license shall satisfactorily complete a course of study by:
 1. Attending at least 20 hours of instruction, and
 2. Receiving a passing grade of not less than 75 percent correct answers on both the national and Arizona state exam required by A.R.S. § 6-991.07 and the Secure and Fair Enforcement for Mortgage Licensing Act of 2008 (P.L. 110-289; 122 Stat. 2810; 12 U.S.C. 5101 through 5116).
- C. A pre-licensure course of study shall include 20 hours of instruction in the following areas:
 1. Federal law and regulation, including the Real Estate Settlement Procedures Act ("RESPA"), the Truth in Lending Act ("TILA"), good faith estimates, federal privacy laws, fair lending laws including the Equal Credit Opportunity Act ("ECOA") and the Fair Credit Reporting Act ("FCRA"): Three hours;
 2. Business ethics, including fraud, consumer protection laws, and fair lending practices: Three hours;
 3. Non-traditional mortgage product lending standards: Two hours;
 4. Arizona real estate and mortgage lending law, including loan origination and processing, Arizona law relating to agency and the obligations between principal and agent, and state privacy laws: Four hours;
 5. The remaining eight hours should be comprised of instruction in:
 - a. The obligations between principal and agent;
 - b. The statutory and regulatory laws governing loan originators;
 - c. Arithmetical computations common to mortgage lending;
 - d. Principles of real estate lending;
 - e. The purpose and effect of mortgages, deeds of trust, and security agreements;
 - f. The terms and conditions of conforming and non-conforming residential mortgages;
 - g. Real estate appraisal; and
 - h. The principles of appraisal independence.
- D. A continuing education course of study shall include eight hours of instruction each year in the following areas:
 1. Federal law and regulation, including the Real Estate Settlement Procedures Act ("RESPA"), the Truth in Lending

Act ("TILA"), good faith estimates, federal privacy laws, fair lending laws including the Equal Credit Opportunity Act ("ECOA") and the Fair Credit Reporting Act ("FCRA"): Three hours;

2. Business ethics, including fraud, consumer protection laws, and fair lending practices: Two hours;
3. Non-traditional mortgage product lending standards: Two hours;
4. Arizona real estate and mortgage lending law, including loan origination and processing, Arizona law relating to agency and the obligations between principal and agent, and state privacy laws: One hour.

Historical Note

New Section made by emergency rulemaking at 16 A.A.R. 839, effective April 27, 2010 for 180 days (Supp. 10-2). Section renewed by emergency rulemaking and amended at 16 A.A.R. 2165, effective October 24, 2010 for 180 days (Supp. 10-4). Emergency expired April 21, 2011; new Section made by final rulemaking at 16 A.A.R. 2401, effective April 22, 2011 (Supp. 10-4). Since emergency expired, the emergency rulemaking has been removed. (Supp. 15-1).

R20-4-1303. Financial Responsibility

An applicant for a loan originator license shall demonstrate financial responsibility, as required by A.R.S. § 6-991.03, by either:

1. Depositing with the Superintendent a bond as specified by A.R.S. § 6-991.03(B)(4) and paying to the Superintendent, for deposit into the Mortgage Recovery Fund, the sum of \$100 at the time of filing an original or a renewal application pursuant to A.R.S. § 6-991.03(B)(6); or
2. Depositing with the Superintendent a bond as specified by A.R.S. § 6-991.03(B)(4) and depositing with the Superintendent a bond as specified by A.R.S. § 6-991.03(B)(6).

Historical Note

New Section made by emergency rulemaking at 16 A.A.R. 839, effective April 27, 2010 for 180 days (Supp. 10-2). Section renewed by emergency rulemaking at 16 A.A.R. 2165, effective October 24, 2010 for 180 days (Supp. 10-4). Emergency expired April 21, 2011; new Section made by final rulemaking at 16 A.A.R. 2401, effective April 22, 2011 (Supp. 10-4). Since emergency expired, the emergency rulemaking has been removed. (Supp. 15-1).

R20-4-1304. Fees

Loan Originator program fees:

1. Initial application fee (non-refundable) pursuant to A.R.S. § 6-126(A)(33): \$350,
2. Initial license fee (prorated according to the number of quarters remaining until the next annual renewal) pursuant to A.R.S. § 6-126(B): \$150,
3. Annual renewal fee pursuant to A.R.S. § 6-126(C)(12) or fee for change to inactive status pursuant to A.R.S. §§ 6-126(C)(13) and 6-991.04(G): \$150,
4. Transfer license to new employer fee pursuant to A.R.S. § 6-126(A)(34): \$50,
5. Change of residence address fee pursuant to A.R.S. § 6-991.04(J): \$50,
6. Examination fee pursuant to A.R.S. § 6-991.07(E): the amount charged by the vendor,
7. Late renewal fee pursuant to A.R.S. § 6-991.04(E): \$25 per day after the filing deadline.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

New Section made by emergency rulemaking at 16 A.A.R. 839, effective April 27, 2010 for 180 days (Supp. 10-2). Section renewed by emergency rulemaking and amended at 16 A.A.R. 2165, effective October 24, 2010 for 180 days (Supp. 10-4). Emergency expired April 21, 2011; new Section made by final rulemaking at 16 A.A.R. 2401, effective April 22, 2011 (Supp. 10-4). Since emergency expired, the emergency rulemaking has been removed. (Supp. 15-1).

R20-4-1305. Practice and Procedure

Loan originators shall follow the practice outlined in 20 A.A.C. 4, Article 12 (Rules of Practice and Procedure Before the Superintendent) for challenging information the Superintendent enters into the Nationwide Mortgage Licensing System and Registry pursuant to A.R.S. §§ 6-991.03(K) and 6-991.04(M).

Historical Note

New Section made by emergency rulemaking at 16 A.A.R. 839, effective April 27, 2010 for 180 days (Supp. 10-2). Section repealed; new Section made by renewed emergency rulemaking at 16 A.A.R. 2165, effective October 24, 2010 for 180 days (Supp. 10-4). Emergency expired April 21, 2011; new Section made by final rulemaking at 16 A.A.R. 2401, effective April 22, 2011 (Supp. 10-4). Since emergency expired, the emergency rulemaking has been removed. (Supp. 15-1).

ARTICLE 14. INVESTIGATIONS**R20-4-1401. Definitions**

In this Article, unless the context otherwise requires:

1. "Examination" means reviewing an applicant's or licensee's operations, books, and records for any lawful purpose, including those listed in A.R.S. § 6-124(A).
2. "Investigation" means an inquiry, other than an examination, into the affairs of a licensed or unlicensed entity including a review of the entity's operations, books, and records, conducted by the Director for any lawful purpose, including those listed in A.R.S. § 6-124(A).
3. "Licensee" means a financial institution or enterprise licensed with the Department.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). Former Section R4-4-1401 repealed, new Section R4-4-1401 renumbered from R4-4-1402 and amended effective August 14, 1991 (Supp. 91-3). Amended effective August 14, 1991 (Supp. 91-3). R20-4-1401 recodified from R4-4-1401 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 4653, effective December 6, 2003 (Supp. 03-4). Amended by final rulemaking at 29 A.A.R. 1958 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1402. Repealed**Historical Note**

Former Section R4-4-1402 renumbered to R4-4-1401, new Section R4-4-1402 adopted effective August 14, 1991 (Supp. 91-3). R20-4-1402 recodified from R4-4-1402 (Supp. 95-1). Section repealed by final rulemaking at 9 A.A.R. 4653, effective December 6, 2003 (Supp. 03-4).

R20-4-1403. Subpoenas: Service; Amendment; Investigation or Examination not a Condition of the Director's Subpoena Power

The Director may serve a subpoena using any means intended to effectuate delivery of the subpoena. A Department employee, or an attorney or agent of the Attorney General's office, may accomplish service for the Director. The Director may amend a subpoena at any time, and may serve the amended subpoena as provided in this Section. Under A.R.S. §§ 6-123(3), 6-124(B), and 12-2212, the Director may compel testimony or document production, by subpoena or other means, regardless of whether an examination or investigation is in progress.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). Former Section R4-4-1403 repealed, new Section R4-4-1403 renumbered from R4-4-1407 and amended effective August 14, 1991 (Supp. 91-3). R20-4-1403 recodified from R4-4-1403 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 4653, effective December 6, 2003 (Supp. 03-4). Amended by final rulemaking at 29 A.A.R. 1958 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1404. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Repealed effective August 14, 1991 (Supp. 91-3). R20-4-1404 recodified from R4-4-1404 (Supp. 95-1).

R20-4-1405. Background Information

- A. In connection with an examination or investigation, the Director may investigate the following persons' background:
 1. An applicant or a licensee, or a person whom the Director reasonably believes may be violating any statute or rule administered by the Director; and
 2. An officer, director, agent, employee, partner, joint venturer, affiliate, or other person associated with a person described in subsection (A)(1), if the other person has or had any involvement in or control over the activities of the person described in subsection (A)(1).
- B. In connection with an examination or investigation, the Director may require a person described in A.R.S. § 6-123.01(A) or (E) to submit a statement of personal history to the Department.

Historical Note

Adopted effective February 7, 1978 (Supp. 78-1). Former Section R4-4-1405 repealed, new Section R4-4-1405 renumbered from R4-4-1409 and amended effective August 14, 1991 (Supp. 91-3). R20-4-1405 recodified from R4-4-1405 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 4653, effective December 6, 2003 (Supp. 03-4). Amended by final rulemaking at 29 A.A.R. 1958 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1406. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Repealed effective August 14, 1991 (Supp. 91-3). R20-4-1406 recodified from R4-4-1406 (Supp. 95-1).

R20-4-1407. Renumbered**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Renumbered to R4-4-1403 effective August 14, 1991

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

(Supp. 91-3). R20-4-1407 recodified from R4-4-1407 (Supp. 95-1).

final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1408. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Repealed effective August 14, 1991 (Supp. 91-3). R20-4-1408 recodified from R4-4-1408 (Supp. 95-1).

R20-4-1409. Renumbered**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Renumbered to R4-4-1405 effective August 14, 1991 (Supp. 91-3). R20-4-1409 recodified from R4-4-1409 (Supp. 95-1).

R20-4-1410. Repealed**Historical Note**

Adopted effective February 7, 1978 (Supp. 78-1). Repealed effective August 14, 1991 (Supp. 91-3). R20-4-1410 recodified from R4-4-1410 (Supp. 95-1).

ARTICLE 15. COLLECTION AGENCIES**R20-4-1501. Definitions**

In this Article, unless the context otherwise requires:

1. "Account" means a contractual arrangement between a client and a collection agency that obligates the collection agency to attempt to collect one or more debts on the client's behalf.
2. "Active Manager" means the person who is in active management of the conduct of the collection agency's business, and who meets the qualifications listed in A.R.S. § 32-1023(A).
3. "Client" means a person who has hired a collection agency to collect a debt.
4. "Collection agency" has the meaning in A.R.S. § 32-1001(2).
5. "Contact" means to communicate with, and includes attempted communications.
6. "Credit bureau" or "credit reporting agency" means any person engaged exclusively in the business of gathering, recording, and disseminating information about the credit-worthiness, financial responsibility, paying habits, and character of persons being considered for credit extension.
7. "Creditor" means a person who offers or extends credit creating a debt, or to whom a debt is owed. The term does not include a person that receives an assignment or transfer of a defaulted debt solely for use in collecting the debt for someone else.
8. "Debt" means a debtor's actual or claimed obligation to pay money, whether or not the obligation has been reduced to judgment.
9. "Debtor" means a person obligated to pay a debt. The term also means a person claimed to be obligated to pay a debt.
10. "Director" has the meaning stated at A.R.S. § 20-102.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1501 recodified from R4-4-1501 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by

R20-4-1502. Applications

- A. An applicant for a license shall complete and file an application, as required by the Department, by delivering the application to the Director, together with the following documents and payment:
 1. The bond required by A.R.S. § 32-1021;
 2. The nonrefundable investigation fee and original license fee required by A.R.S. § 32-1028 and stated in A.R.S. § 6-126;
 3. A current financial statement in the form required by the Department;
 4. A certified copy of the current articles of incorporation, by-laws, partnership agreement, or other organizational documents under which the applicant proposes to conduct business; and
 5. A statement of personal history for each principal officer, partner, and manager of the applicant, in the form required by the Department.
- B. An out-of-state collection agency applying for a license under A.R.S. § 32-1024 shall complete and file the application required by subsection (A), together with a signed statement declaring that:
 1. The requirements for securing the out-of-state license were, when issued, substantially the same or equivalent to the requirements imposed under A.R.S. Title 32, Chapter 9, Article 2. The statement shall also contain a complete description of those requirements.
 2. The state issuing the out-of-state license extends reciprocity to Arizona licensees under similar circumstances. The statement shall also contain a complete description of the conditions for reciprocity in the other state.
- C. A licensee applying for license renewal shall complete and file an application, as required by the Department, by delivering the renewal application to the Director before January 1, together with the renewal fee required by A.R.S. § 32-1028 and stated in A.R.S. § 6-126. An application for renewal shall also include a current financial statement in the form required by the Department.
- D. An applicant for a provisional license under A.R.S. § 32-1027 shall complete and file an application as required by the Department, by delivering the application to the Director within 30 days of the event justifying a provisional license. The applicant shall deliver the application together with each of the following:
 1. A bond that satisfies the requirements of A.R.S. § 32-1022;
 2. A current financial statement as required by the Department;
 3. A detailed description of the facts justifying the issuance of a provisional license; and
 4. Evidence that the licensee notified the Director as required by A.R.S. § 32-1023, in the event the licensee has terminated its active manager.
- E. An applicant for a provisional license shall, in each instance, be appropriate to the circumstances justifying the provisional license, as follows:
 1. A licensee's personal representative, or the personal representative's appointee, shall complete and file an application if the licensee, a natural person, has died;
 2. The surviving partners shall complete and file an application if the licensee, a partnership, has dissolved;

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

3. A licensee shall complete and file an application if an active manager's employment was terminated.
 - F. An applicant for a provisional license shall clearly label the top of the first page with the heading "APPLICATION FOR PROVISIONAL LICENSE UNDER A.R.S. § 32-1027."
 - G. The Director may require additional information the Director considers necessary in connection with any application under this Section.
4. A trust general ledger reflecting all deposits to and payments from a trust account. A licensee shall post transactions to its trust general ledger at least every five business days. A licensee shall bring its trust general ledger current within 24 hours when requested by the Director.
 5. The licensee's trust account reconciliation, prepared at least once a month.
 6. Books, records, and files maintained so that the Director can easily conduct an unannounced spot check, as well as the examinations and investigations required by A.R.S. §§ 6-122 and 6-124.
 7. A copy of all pleadings in pending litigation that names the collection agency as a defendant.
 8. A record of fictitious names used by the agency's debt collectors as required by R20-4-1520.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1502 recodified from R4-4-1502 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4742, effective November 13, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1503. Reports

A collection agency shall notify the Director in writing of any change in the officers, directors, partners, or active manager of the collection agency not more than 10 days after the change. With the notice, the collection agency shall provide the Director with a Statement of Personal History for each new officer, director, partner, or active manager on a form obtained from the Department.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1503 recodified from R4-4-1503 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1504. Records

- A. A licensee may keep its books, accounts, and records as electronic records if the licensee can generate all information and copies required by this Section within the timeframe set by the Department for examination or other purposes.
- B. All licensees shall keep and maintain books, accounts, and records adequate to provide a clear and readily understandable record of all business conducted by the collection agency, including:
 1. Records or books of account listing all clients' accounts. Each account shall reflect its true condition at each calendar month's end, and shall include:
 - a. The client's name and address;
 - b. Each debtor's name worked for collection in that month;
 - c. The amount, description, and date of each debit and each credit to the account; and
 - d. The balance due to, or owing from, the client.
 2. A record and history of each debt for collection that clearly shows:
 - a. The debtor's name;
 - b. The debt's principal amount;
 - c. The interest charged or collected;
 - d. The amount, and description, of any other charges;
 - e. The amount, and date, of each payment received or collected; and
 - f. The current balance due on the debt.
 3. An original of each written contract between the licensee and a client, including any contract amendments.

- C. A person issuing a receipt for a collection agency shall sign the receipt using that person's true name. Each receipt shall also show the collection agency's name.
- D. A licensee shall maintain all records required under this Section and shall make them available for examination, investigation, or audit in Arizona within three working days after the Director demands the records.
- E. A licensee shall retain the records required by this Section for the following periods:
 1. A licensee shall retain all records described in subsections (B)(1), and (B)(3) through (8) for at least seven years following their creation.
 2. A licensee shall retain all records described in subsection (B)(2) for at least three years from an account's assignment to the licensee. If a licensee collects any money on an account, the licensee shall retain the records described in subsection (B)(2) for at least three years from the last collection date.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). Amended effective December 18, 1979 (Supp. 79-6). R20-4-1504 recodified from R4-4-1504 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4742, effective November 13, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1505. Trust Account

- A. A licensee that maintains an office in Arizona shall deposit all funds collected for a client in a trust account at a federally insured depository institution in Arizona. A licensee that does not maintain an office in Arizona shall deposit all funds collected for a client in a trust account at a federally insured depository institution in the state where the licensee maintains its principal office. A licensee shall deposit all client funds before the close of its business on the third business day after the licensee receives the funds. Client funds shall remain on deposit as required by this Section until:
 1. Paid over to a client, or
 2. Otherwise paid as provided in this Section.
- B. A licensee shall pay funds from the trust account either:
 1. By prenumbered printed checks, or
 2. By electronic payment.
- C. A licensee shall deposit in its trust account only the funds it has collected for its client. A licensee, its officers, directors, partners, managers, members, or employees shall not commin-

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

gle, or permit the commingling of, their own funds with client funds. This prohibition includes any funds that a licensee, or any officer, director, partner, manager, member, or employee claims an interest in if that interest arises outside the licensee's contract with a client.

- D.** A licensee shall keep unpaid client funds in its trust account. A licensee may maintain a separate trust account for dormant accounts into which the licensee deposits unpaid funds such as those of a client that cannot be located, or any trust account check issued to a client that is returned without being negotiated. As to all those unpaid funds, under A.R.S. § 44-307, a licensee shall file an abandoned property report at the Arizona Department of Revenue as and when required by law.
- E.** A licensee shall withdraw from its trust account all fees and commissions due the licensee under its contract with a client and deposit them directly into its own operating account.
- F.** A licensee shall not pay funds from its trust account except as:
1. Provided in this Section,
 2. Expressly authorized in its contract with a client, or
 3. Authorized in writing by the Director.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1505 recodified from R4-4-1505 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 4742, effective November 13, 2000 (Supp. 00-4). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1506. Articles of Incorporation; Bylaws; Organizing Documents

- A.** A collection agency organized as a corporation shall file with the Director a copy of each amendment to its articles of incorporation within 30 days after the amendment is adopted. Before filing with the Director, an officer of the collection agency shall certify the copy filed in compliance with this Section, in writing, signed by the certifying officer, attesting to the completeness, accuracy, and authenticity of the certified copy.
- B.** A collection agency organized as a corporation shall file with the Director a copy of each amendment to its bylaws within 10 days after the amendment is adopted. An officer of the collection agency shall certify the copy filed in compliance with this Section, in writing, attesting to the completeness, accuracy, and authenticity of the certified copy.
- C.** A collection agency not organized as a corporation shall file with the Director a copy of each amendment to its organizing documents within 10 days after the amendment is adopted. A partner, active manager, or agent of the collection agency shall certify the copy filed in compliance with this Section, in writing, attesting to the completeness, accuracy, and authenticity of the certified copy.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1506 recodified from R4-4-1506 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1507. Representations of Collection Agency's Identity

In all communications with debtors, either orally or in writing, all the following rules apply:

1. A collection agency shall represent itself as a collection agency,

2. A collection agency shall not directly or indirectly claim to be a credit reporting agency or credit bureau if it is not,
3. A collection agency shall not directly or indirectly claim to be a law enforcement agency, and
4. A collection agency shall not directly or indirectly claim to be a law firm.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1507 recodified from R4-4-1507 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1508. Representations of the Law

A collection agency shall not:

1. Misrepresent the state of the law to a debtor;
2. Send a debtor written material that simulates legal process; or
3. Represent or imply that a debtor is, or may be, subject to criminal prosecution or arrest because of a failure to pay the debt.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1508 recodified from R4-4-1508 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1509. Representations as to Fees, Costs, and Legal Proceedings; Disinterested Counsel Required

- A.** A collection agency shall not threaten to collect, or attempt to collect, an attorney's fee, collection cost, or other fee that the debtor is not obliged to pay under the debtor's contract with the collection agency's creditor client.
- B.** A collection agency shall not inform a debtor that legal proceedings have been started unless, in fact, a lawsuit has been filed against the debtor.
- C.** A collection agency shall not threaten to start legal proceedings against a debtor unless the collection agency actually intends, at the time of the threat, to sue.
- D.** A collection agency shall not threaten to turn an account over to a lawyer unless the collection agency actually intends to do so at the time of the threat.
- E.** A collection agency shall not file a lawsuit against a debtor unless the lawsuit is filed by an attorney who has no personal or financial interest in the collection agency filing the lawsuit against the debtor.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1509 recodified from R4-4-1509 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1510. Representations as to Rights Waived or Rem-

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Remedies Available

- A.** A collection agency shall not inform a debtor that:
1. The debtor waives any legal right or legal defense by a failure to contact the collection agency, and
 2. The collection agency has the power or right to bypass the legal process.
- B.** A collection agency shall not misrepresent the remedies available to the collection agency.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1510 recodified from R4-4-1510 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1511. Prohibition of Harassment

- A.** A collection agency shall not use unauthorized or oppressive tactics designed to harass any person to pay a debt.
- B.** A collection agency shall not use written or oral communications that ridicule, disgrace, or humiliate any person, or tend to ridicule, disgrace, or humiliate any person.
- C.** A collection agency shall not state, imply, or tend to imply, in written or oral communications, that any person is guilty of fraud or any other crime.
- D.** A collection agency shall not permit its agents, employees, representatives, debt collectors, or officers to use obscene or abusive language in efforts to collect a debt.
- E.** A collection agency or its agents, employees, representatives or officers are subject to penalties listed in A.R.S. § 32-1056(B) for any violation of this Article, as well as other liabilities imposed under any other provision of law.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1511 recodified from R4-4-1511 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1512. Contacts with Debtors and Others

- A.** A collection agency shall contact a debtor by telephone only during reasonable hours. A collection agency shall make a reasonable attempt to contact a debtor at the debtor's residence. A collection agency may contact a debtor at the debtor's place of employment if a reasonable attempt to contact the debtor at the debtor's residence has failed.
- B.** A collection agency shall not threaten to or contact a third party, including a debtor's friend, relative, neighbor, or employer and:
1. Inform the third party of the debt;
 2. Ask the third party to pressure the debtor into paying the debt; or
 3. Ask the third party to pay the debt, unless the third party is legally obligated to pay the debt.
- C.** Despite the other provisions of this Section, a collection agency may make lawful service on third parties, including employers, of a writ of garnishment or other writ in aid of execution after judgment has been entered against a debtor.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1512 recodified from R4-4-1512 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1513. Cessation of Communication with the Debtor

- A.** A collection agency shall stop contacting a debtor, directly or indirectly, if the debtor tells the collection agency that the debtor is represented by a lawyer and wants the collection agency to communicate with the debtor through the debtor's lawyer. The collection agency may later contact the debtor if the collection agency contacts the lawyer named by the debtor and learns that the lawyer does not represent the debtor.
- B.** A collection agency shall stop contacting a debtor, directly or indirectly, if the debtor gives the collection agency written notice that the debtor:
1. Refuses to pay the debt, or
 2. Wants the collection agency to stop all further communication with the debtor.
- C.** Despite the provisions of subsection (B), a collection agency may contact a debtor to inform the debtor that:
1. The collection agency has stopped trying to collect the debt, or
 2. The collection agency or the creditor may invoke specific remedies that are customarily used by the collection agency or the creditor.
- D.** The debtor's written notice under subsection (B) is effective upon receipt by the collection agency if delivered by mail.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). Amended effective December 18, 1979 (Supp. 79-6). R20-4-1513 recodified from R4-4-1513 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1514. Disclosure of Information to Debtor

- A.** Within five days after the initial communication with the debtor, a collection agency shall obtain and be able to inform the debtor of:
1. The name of the creditor;
 2. The time and place of the creation of the debt;
 3. The merchandise, services, or other value provided in exchange for the debt; and
 4. The date when the account was turned over to the collection agency by the creditor.
- B.** A collection agency shall give the debtor access to any of the collection agency's records that contain the information listed in subsection (A).
- C.** At the debtor's request, the collection agency shall give the debtor, free of charge, a copy of any document from its records that contains the information listed in subsection (A).

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

(Supp. 78-6). R20-4-1514 recodified from R4-4-1514 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1515. Aiding and Abetting

A collection agency shall not help or encourage, directly or indirectly, any person to evade or violate any provision of:

1. This Article, or
2. A.R.S. Title 32, Chapter 9.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1515 recodified from R4-4-1515 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1516. Advertising

A collection agency shall not use any form of communication to state or imply that the collection agency is:

1. Approved, bonded by, or affiliated with the state of Arizona;
2. A state agency;
3. The director of any state agency; or
4. Authorized to practice law.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1516 recodified from R4-4-1516 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1517. Repealed**Historical Note**

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective December 6, 1978 (Supp. 78-6). R20-4-1517 recodified from R4-4-1517 (Supp. 95-1). Section repealed by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2).

R20-4-1518. Agreements with Clients

A collection agency's records shall document each client's account in writing. The records for an account shall include either a written agreement between the client creditor and the collection agency, or a written direction from the creditor to the collection agency concerning a specific debt placed for collection. The collection agency shall keep records that are specific, easily understood, and unambiguous. A provision of a written agreement or written direction that suggests the collection agency has authority to represent the client in court, or to practice law in any other way, is void and prohibited by this Section. The records for an account shall separately state:

1. The names of the parties to the agreement or written direction,
2. The terms or rate of compensation paid to the collection agency,

3. The length of time the agreement or written direction is intended to be in effect, and
4. Any conditions regarding collection of a particular debt.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1518 recodified from R4-4-1518 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1519. Licensee Names and Control

- A.** The Department shall not issue a license with a name that is:
1. Similar to, or that may be confused with, any federal, state, county, or municipal government function or agency;
 2. Descriptive of any business activity that the applicant does not actually conduct;
 3. The same as, or similar to, the name of any existing collection agency, or
 4. Otherwise deceptive or misleading.
- B.** The Department may permit the use of a name otherwise prohibited under subsection (A)(3) based on its analysis of whether the name includes geographic or other information that distinguishes it from the existing collection agency.
- C.** A collection agency shall not use a collection agency license to do business under more than one name. Each collection agency shall apply for and obtain a separate license for each business name it intends to use in Arizona.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1519 recodified from R4-4-1519 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1520. Representations of Collection Agency Employees' Identity or Position

- A.** A collection agency shall not allow its debt collector, agent, representative, employee, or officer to:
1. Misrepresent the person's true position with the collection agency;
 2. Claim to be, or imply that the person is, an attorney unless the person is licensed to practice law;
 3. Claim to be, or imply that the person is, a public official, peace officer, or any other type of public employee; or
 4. Claim to be, or imply that the person is, any other third party.
- B.** In any communication with a debtor, a person working for a collection agency shall indicate that the person is a debt collector.
- C.** A collection agency shall keep a record of all fictitious names used by its debt collectors during their employment. The collection agency shall record the information required by this subsection before permitting the use of a fictitious name. The collection agency shall file a copy of the record of fictitious names with the Department on July 1 and December 31 of each year. After filing the initial report, a collection agency shall identify all changes to the record on July 1 and December 31 of each year. The collection agency's record of fictitious names shall include:
1. The true name of each debt collector that uses a fictitious name;

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

2. Each fictitious name used by the debt collector, together with the dates when the name is used; and
3. The residential street address and residential mailing address of each debt collector that uses a fictitious name.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1520 recodified from R4-4-1520 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1521. Duty of Investigation

A collection agency shall give copies of its evidence of the debt to the debtor or the debtor's attorney upon request. After providing the evidence, but before continuing its collection efforts against the debtor, the collection agency shall investigate any claim by the debtor or the debtor's attorney that:

1. The debtor has been misidentified,
2. The debt has been paid,
3. The debt has been discharged in bankruptcy, or
4. Based on any other reasonable claim, the debt is not owed.

Historical Note

Adopted effective December 18, 1979 (Supp. 79-6). R20-4-1521 recodified from R4-4-1521 (Supp. 95-1). Amended by final rulemaking at 12 A.A.R. 1331, effective June 4, 2006 (Supp. 06-2). Amended by final rulemaking at 29 A.A.R. 1961 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1530 recodified from R4-4-1530 (Supp. 95-1). Section repealed by final rulemaking at 6 A.A.R. 4742, effective November 13, 2000 (Supp. 00-4).

ARTICLE 16. ACQUIRING CONTROL OF FINANCIAL INSTITUTIONS**R20-4-1601. Definitions**

In addition to the definitions provided in A.R.S. § 6-141, the following terms apply to this Article unless the context otherwise requires:

“Acquiring party” means a person who intends to acquire control of a bank, trust company, savings and loan association, or controlling person under A.R.S. Title 6, Chapter 1, Article 4.

“Bank” has the meaning stated in A.R.S. § 6-101.

“Director” has the meaning stated in A.R.S. § 6-101(7).

“Savings and loan association” means a person required to possess a permit issued by the Director under A.R.S. Title 6, Chapter 3.

“Target company” means a bank, savings and loan association, trust company, or controlling person to be acquired by an acquiring party.

“Trust company” has the meaning stated in A.R.S. § 6-851.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective January 12, 1979 (Supp. 79-1). R20-4-1601 recodified from R4-4-1601 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 5055, effective January 3, 2004 (Supp. 03-4). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1602. Application for Approval to Acquire Control of Financial Institution

A. An applicant seeking approval to acquire control of a bank, savings and loan association, or controlling person of a bank or savings and loan association, under A.R.S. Title 6, Chapter 1, Article 4, shall file with the Director copies of all application documents filed with federal regulatory agencies in connection with the planned acquisition of control.

B. As used in this subsection, “executive officer” includes the chairman of the board, president, each vice president, cashier, secretary, treasurer, and every other person who participates in major policymaking functions of the applicant. Under A.R.S. § 6-145(A), an applicant seeking approval to acquire control of a trust company or controlling person of a trust company, under A.R.S. Title 6, Chapter 1, Article 4 shall supply all information the Director requires under this subsection. The Director may require an applicant to supplement or amend its application based on issues raised by the initial submission. The initial application shall consist of the following items:

1. A copy of the signed purchase agreement;
2. The applicant's audited financial statement;
3. A personal history statement, on a form supplied by the Department, for each executive officer and each director of the acquiring party;
4. Each executive officer's and each director's personal financial statement;
5. A full set of fingerprints for each executive officer and each director; and
6. A copy of each executive officer's and each director's driver's license.

Historical Note

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective January 12, 1979 (Supp. 79-1). R20-4-1602 recodified from R4-4-1602 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 5055, effective January 3, 2004 (Supp. 03-4). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1603. Repealed**Historical Note**

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective January 12, 1979 (Supp. 79-1). R20-4-1603 recodified from R4-4-1603 (Supp. 95-

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- 1). Section repealed by final rulemaking at 9 A.A.R. 5055, effective January 3, 2004 (Supp. 03-4).

R20-4-1604. Repealed**Historical Note**

Adopted as an emergency effective September 6, 1978, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 78-5). Adopted effective January 12, 1979 (Supp. 79-1). R20-4-1604 recodified from R4-4-1604 (Supp. 95-1). Section repealed by final rulemaking at 9 A.A.R. 5055, effective January 3, 2004 (Supp. 03-4).

ARTICLE 17. ARIZONA INTERSTATE BANK AND SAVINGS AND LOAN ASSOCIATION ACT**R20-4-1701. Definitions**

In addition to the definitions provided in A.R.S. § 6-321, the following terms apply to this Article unless the context otherwise requires:

“Applicant” means an out-of-state financial institution that intends to acquire control of an in-state financial institution.

“Director” has the meaning stated in A.R.S. § 6-101(7).

Historical Note

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1701 recodified from R4-4-1701 (Supp. 95-1). Amended by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1702. Notice to the Director of Intent to Acquire Control of an In-state Financial Institution; Surrender of an Acquired Financial Institution’s Charter

- A. An applicant shall give written notice of an acquisition to the Director in the form of a courtesy copy of its federal application. The acquiring entity shall ensure that the notice is delivered to the Director not less than ten days before the effective date of the acquisition. No other application is required under the provisions of A.R.S. Title 6, Chapter 2, Article 7, the Arizona Interstate Bank and Savings and Loan Association Act. The Director may impose conditions on an acquisition under the authority of A.R.S. §§ 6-324 and 6-328.
- B. An acquired in-state financial institution shall surrender, by delivery to the Director, all permits and certificates issued by the Director within ten days after the effective date of the acquisition unless the acquired institution intends to continue operating, after the acquisition, as a stand-alone subsidiary under the authority of its existing Arizona banking permit.

Historical Note

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1702 recodified from R4-4-1702 (Supp. 95-1). Amended by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1703. Repealed**Historical Note**

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1703 recodified from R4-4-1703 (Supp. 95-1). Section repealed by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2).

R20-4-1704. Public Notice

- A. An applicant shall transmit to the Director one copy of each notice and the publisher’s affidavit of publication required by the Federal Reserve Board, the Federal Deposit Insurance Corporation, or other regulatory authority that has concurrent jurisdiction.
- B. An applicant shall provide the Director copies of any protests known to have been received by the Federal Reserve Board, the Federal Deposit Insurance Corporation, or other regulatory authority that has concurrent jurisdiction.

Historical Note

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1704 recodified from R4-4-1704 (Supp. 95-1). Amended by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2). Amended by final rulemaking at 29 A.A.R. 1937 (September 1, 2023), effective October 2, 2023 (Supp. 23-3).

R20-4-1705. Repealed**Historical Note**

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1705 recodified from R4-4-1705 (Supp. 95-1). Section repealed by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2).

R20-4-1706. Repealed**Historical Note**

Adopted effective October 1, 1986 (Supp. 86-5). R20-4-1706 recodified from R4-4-1706 (Supp. 95-1). Section repealed by final rulemaking at 11 A.A.R. 2031, effective July 2, 2005 (Supp. 05-2).

ARTICLE 18. MORTGAGE BANKERS**R20-4-1801. Exemption for an Entity Regulated by an Agency of this State, Other States, or by the United States**

- A. The exemption under A.R.S. § 6-942(A)(1) only applies to a person whose offers to make or negotiate a “mortgage banking loan” or a “mortgage loan,” as those terms are defined in A.R.S. § 6-941, and all mortgage banking loans and mortgage loans made or negotiated by the person are regulated directly by an agency of this state, any other state, or the United States.
- B. The required regulation of the transactions listed in subsection (A) includes:
1. Rules governing a claimant’s accounting and recordkeeping practices;
 2. The authority to examine a claimant’s books and records relating to its mortgage banking activities or mortgage lending activities, or both; and
 3. The ability to place a claimant in a receivership or conservatorship with regard to the claimant’s mortgage banking activities, mortgage lending activities, or both.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1802. Equivalent and Related Experience

- A. An applicant may satisfy the three years’ experience requirement of A.R.S. § 6-943 by the types of lending-related experience listed in this subsection. The Department counts each month in the following types of work experience toward the three years required either for a mortgage banker license, or as a responsible individual, both under A.R.S. § 6-943(C). The Department counts a fractional month of experience, at least 15 days long, as a full month.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

1. Mortgage banker with an Arizona license, responsible individual, or branch manager for a licensee;
 2. Mortgage broker with an Arizona license, responsible individual, or branch manager for a licensee;
 3. Loan officer with responsibility primarily for loans secured by lien interests on real property;
 4. Lender's branch manager with responsibility primarily for loans secured by lien interests on real property;
 5. Mortgage banker with license from another state, or responsible individual for the mortgage banker;
 6. Mortgage broker with license from another state, or responsible individual for the mortgage broker;
 7. Attorney certified by any state as a real estate specialist.
- B.** An applicant with insufficient actual experience of the types listed in subsection (A) may satisfy the remainder of the three years' experience requirement of A.R.S. § 6-943 by the types of related experience listed in this subsection. The Department counts each month in the following types of work experience according to the ratio listed below, of actual experience to equivalent experience, credited toward qualifying for a license, or as a responsible individual, both under A.R.S. § 6-943(C). The Department counts a fractional month of experience, at least 15 days long, as a full month. An applicant receives credit in only one area listed and for not more than three years' actual experience. The remaining years of experience required to qualify for a license shall be obtained from types of work experiences listed in subsection (A).
1. Attorney without state bar certified real estate specialty...3:2
 2. Paralegal with experience in real estate matters...3:2
 3. Loan underwriter...3:2
 4. Mortgage banker or mortgage broker from another state without license...3:2
 5. Real estate broker with an Arizona license or license from a state with substantially equivalent licensing requirements...3:2
 6. Escrow officer...3:2
 7. Trust officer with a title company...3:2
 8. Executive, supervisor, or policy maker involved in administering or operating a mortgage-related business...3:1.5
 9. Title officer with a title company...3:1.5
 10. Real estate broker, not qualified under subsection (B)(5)...3:1.5
 11. Loan processor with responsibility primarily for loans secured by lien interests on real property...3:1.5
 12. Lender's branch manager with responsibility primarily for loans not secured by lien interests on real property...3:1.5
 13. Real property salesperson, with an Arizona license or a license from a state with substantially equivalent licensing requirements...3:1
 14. Loan officer, with responsibility primarily for loans not secured by lien interests on real property...3:1

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1803. Restrictions on the Term of a Cash Alternative to a Surety Bond

A licensee or applicant shall not place a certificate of deposit or investment certificate as a cash alternative to a surety bond with the Superintendent that is renewable or expires earlier than 12 months from the date of issuance.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1804. Requirements for a Person Intended to Oversee a Branch Office

A person designated to oversee the operations of a branch office shall be knowledgeable about the branch activities of the licensee, supervise compliance by the branch with applicable law and rules, and have sufficient authority to ensure such compliance. One person may oversee more than one branch.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1805. Notification of Change of Address

If a licensee changes the licensee's principal place of business, or the location of a branch office, the licensee shall notify the Superintendent at least five business days before the address change. With the notice, a licensee shall provide the Superintendent with the license for the office changing its address and the fee required by A.R.S. § 6-126 for changing an office address. A copy of the license shall continue to be displayed at the place of business until a new license is issued.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2). Amended by final rulemaking at 8 A.A.R. 145, effective December 10, 2001 (Supp. 01-4).

R20-4-1806. Recordkeeping Requirements

- A.** The Superintendent shall approve a licensee's use of a computer or mechanical recordkeeping system if the licensee gives the Superintendent advanced written notice that it intends to do so. The Department shall not require a licensee to keep a written copy of the records if the licensee can generate all information required by this Section in a timely manner for examination or other purposes. A licensee may add, delete, modify, or customize an approved computer or mechanical recordkeeping system's hardware or software components. When requested, or in response to a written notice of an examination, a licensee shall report to the Superintendent any alteration in the approved system's fundamental character, medium, or function if the alteration changes:
1. Any approved computer or mechanical system back to a paper-based system; or
 2. An approved mechanical system to a computer system; or
 3. An approved computer system to a mechanical system.
- B.** In addition to any statutory requirement regarding records, a record maintained by a mortgage banker shall include the following:
1. A list of all executed loan applications or executed fee agreements that includes the following information:
 - a. Applicant's name;
 - b. Application date;
 - c. Amount of initial loan request;
 - d. Final disposition date;
 - e. Disposition (funded, denied); and
 - f. Name of loan officer;

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

2. A record, such as a cash receipts journal, of all money received in connection with mortgage banking loans or mortgage loans including:
 - a. Payor's name;
 - b. Date received;
 - c. Amount; and
 - d. Receipt's purpose including identification of a related loan, if any;
 3. A sequential listing of checks written for each bank account relating to the mortgage banker business, such as a cash disbursement journal, including:
 - a. Payee's name;
 - b. Amount;
 - c. Date; and
 - d. Payment's purpose including identification of a related loan, if any;
 4. Bank account activity source documents for the mortgage banker business including receipted deposit tickets, numbered receipts for cash, bank account statements, paid checks, and bank advices;
 5. A trust subsidiary ledger for each borrower that deposits trust funds showing:
 - a. Borrower's name or co-borrowers' names;
 - b. Loan number, if any;
 - c. Amount received;
 - d. Purpose for the amount received;
 - e. Date received;
 - f. Date deposited into trust account;
 - g. Amount disbursed;
 - h. Date disbursed;
 - i. Disbursement's payee and purpose; and
 - j. Balance;
 6. A file for each application for a mortgage banking loan or a mortgage loan containing:
 - a. The agreement with the customer concerning the mortgage banker's services, whether as a loan application, fee agreement, or both;
 - b. Document showing the application's final disposition, such as a settlement statement, or a denial or withdrawal letter;
 - c. Correspondence sent, received, or both by the licensee;
 - d. Contract, agreement and escrow instructions to or with any depository;
 - e. Documents showing compliance with the Consumer Credit Protection Act's (15 U.S.C. §§ 1601 through 1666j) and the Real Estate Settlement Procedures Act's (12 U.S.C. §§ 2601 through 2617) disclosure requirements, to the extent applicable;
 - f. If the loan is closed in the licensee's name, and funded by a lender that is not an institutional investor as defined at A.R.S. § 6-943, a copy of the executed note, executed deed of trust or mortgage, and each assignment of beneficial interest by the licensee, if any. If any of the documents listed in this subsection have been recorded, the file shall also contain legible copies of the recorded documents, and;
 - g. Itemized list of all fees taken in advance including appraisal fee, credit report fee, and application fee;
 7. Samples of every piece of advertising relating to the mortgage banker's business in Arizona;
 8. Copies of governmental or regulatory compliance reviews;
 9. If the licensee is not a natural person, a file containing:
 - a. Organizational documents for the entity;
 - b. Minutes;
 - c. A record, such as a stock or ownership transfer ledger, showing ownership of all proportional equity interests in the licensee, ascertainable as of any given record date; and
 - d. Annual report, if required by law;
 10. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has a felony conviction, a copy of the judgment or other record of conviction;
 11. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has, in the previous seven years, been named a defendant in any civil suit, a copy of the complaint, any answer filed by the licensee, and any judgment, dismissal or other final order disposing of the action;
 12. If the Superintendent has granted approval to maintain records outside this state, the specific address where the records are kept, and a person's name to contact for them;
 13. If a licensee does business in other states, it must be able to separate Arizona loan information from information relating to other states to enable the Superintendent to conduct an examination.
 14. A licensee shall produce a trial balance of the general ledger monthly to evidence the mortgage banker's net worth.
- C.** If 10 or fewer transactions have occurred during the prior calendar quarter, a licensee shall reconcile and update all records specified in subsection (B) at least once each calendar quarter. A licensee shall reconcile and update all records specified in subsection (B) monthly if more than 10 transactions occurred during the prior calendar quarter. In addition to reconciling each trust bank account, a licensee shall verify each trust balance to each trust subsidiary ledger at each reconciliation.
- D.** A licensee shall retain the documents described in subsections (B)(1) and (6) for the length of time provided in A.R.S. § 6-946. For the purposes of A.R.S. § 6-946, the mortgage banking loan's closing date, on a loan application that did not result in the making of a loan, is either:
1. The date a licensee receives a written cancellation notice from an applicant; or
 2. The date a licensee mails written notice to an applicant that an application has been denied, as required by federal law.
- E.** A licensee shall maintain all other records described in this Section, and not included in subsection (D), for at least two years.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1807. Providing Copies of Records

For each loan closed in an Arizona mortgage broker's name with a concurrent assignment of beneficial interest to a mortgage banker, the mortgage banker licensee shall provide to the mortgage broker in whose name the loan closed a copy of:

1. The closing instructions;
2. Any applicable rescission notice;
3. The HUD-1 settlement statement;
4. The final truth-in-lending disclosure;
5. The note;
6. The executed deed of trust or mortgage; and
7. Each assignment of beneficial interest by the mortgage banker licensee.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1808. Authorization to Complete Blank Spaces

An authorization, under A.R.S. § 6-947, allowing a licensee or escrow agent to complete certain blank spaces in a document after it is signed by a party to the transaction shall:

1. Specifically identify the document and the blank spaces to be completed;
2. Be in writing, dated, and signed by the authorizing parties, and
3. Contain the following notice, conspicuously printed on its face: YOUR SIGNATURE BELOW AUTHORIZES YOUR MORTGAGE BANKER OR ESCROW AGENT TO FILL IN SPACES YOU LEFT BLANK IN SPECIFIED LOAN DOCUMENTS YOU ARE ABOUT TO SIGN OR MAY HAVE ALREADY SIGNED. UNDER STATE LAW YOU CAN GIVE THIS AUTHORITY, BUT YOU ARE NOT REQUIRED TO DO SO. YOU CAN REFUSE TO SIGN ANY DOCUMENTS UNTIL ALL BLANKS ARE COMPLETELY FILLED IN.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1809. Determining Loan Amounts

The amount of a mortgage banking loan or a mortgage loan under A.R.S. § 6-947(E) or 6-947(K), is the principal amount of the loan and does not include any points, interest, finance charges, insurance premiums of any kind, compensation paid to third parties, or compensation retained by a mortgage banker or its agents.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1810. Delay or Cause Delay

A mortgage banker does not delay or cause delay if the delay occurs due to events outside the control of the mortgage banker.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1811. Impound Account

The total of all funds retained by a mortgage banker from all periodic payments made by a borrower to maintain a cushion, as defined in R20-4-102, shall not exceed 1/6th of the estimated total annual payments from the impound account.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1812. Acquisition of Additional Interest in Licensee by Majority Owner

A person that owns 51% or more of a licensee's outstanding voting equity interests, and that acquires the power to vote additional fractional equity interests, shall deliver written notice of the acquisition to the Superintendent. The person shall deliver the notice before completing the acquisition. Within 10 days after completing the acquisition, the person shall deliver documentation evidencing the acquisition to the Superintendent.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1813. Conversion to Mortgage Broker License

Under A.R.S. § 6-949 to apply for a conversion from a mortgage banker license to a mortgage broker license, the applicant shall submit during the renewal period all applicable renewal documents and renewal fees required by A.R.S. §§ 6-126 and 6-903 for mortgage brokers.

Historical Note

New Section adopted by final rulemaking at 18 A.A.R. 2622, effective December 2, 2012 (Supp. 12-4).

ARTICLE 19. COMMERCIAL MORTGAGE BANKERS**R20-4-1901. Exemption for an Institutional Investor**

A. The exemption from the licensure requirement for an institutional investor, solely as that term is used in A.R.S. §§ 6-971, 6-972, and this Article, applies only if a person claiming the exemption meets all the following criteria:

1. The claimant originates or directly or indirectly makes, negotiates, or offers to make or negotiate commercial mortgage loans that are all exclusively funded by the claimant's own resources, as defined in A.R.S. § 6-971;
2. The claimant does so in the regular course of business;
3. The claimant makes only commercial mortgage loans, as defined in A.R.S. § 6-971;
4. The claimant makes each loan on the security of commercial property, as defined in A.R.S. § 6-971; and
5. The claimant makes only loans of more than \$250,000.

B. If a claimant makes even one commercial mortgage loan that does not satisfy all the above criteria, any claim of exemption is invalid, and that person shall not engage in any lending activity before obtaining a license.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1902. Exemption for an Entity Regulated by an Agency of this State, Other States, or by the United States

A. The exemption under A.R.S. § 6-972(9) only applies to a person whose offers to make or negotiate a "commercial mortgage loan," as that term is defined in A.R.S. § 6-971, and all commercial mortgage loans made or negotiated by the person are regulated directly by an agency of this state, any other state, or the United States.

B. The required regulation of the transactions listed in subsection (A) includes:

1. Rules governing a claimant's accounting and recordkeeping practices;
2. The authority to examine a claimant's books and records relating to its commercial mortgage lending activities;
3. The ability to place a claimant in a receivership or conservatorship with regard to the claimant's commercial mortgage lending activities.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1903. Equivalent and Related Experience

A. An applicant may satisfy the three years' experience requirement of A.R.S. § 6-973 by the types of lending-related experience listed in this subsection. The Department counts each month in the following types of work experience towards the

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

three years required either for a commercial mortgage banker license, or as a responsible individual, both under A.R.S. § 6-973(D). The Department counts a fractional month of experience, at least 15 days long, as a full month.

1. Commercial mortgage banker with an Arizona license, or Responsible Individual or branch manager for a licensee;
 2. Mortgage broker with Arizona license, or Responsible Individual or branch manager for a licensee;
 3. Mortgage banker with an Arizona license, or Responsible Individual or branch manager for a licensee;
 4. Loan officer, with responsibility primarily for loans secured by lien interests on commercial real property;
 5. Lender's branch manager, with responsibility primarily for loans secured by lien interests on commercial real property;
 6. Commercial mortgage banker with license from another state, or Responsible Individual for the commercial mortgage banker;
 7. Mortgage broker with license from another state, or Responsible Individual for the mortgage broker;
 8. Mortgage banker with license from another state, or responsible individual for the mortgage banker;
 9. Attorney certified by any state as a real estate specialist.
- B.** The experience of an applicant with insufficient actual experience of the types listed in subsection (A) is reviewed and evaluated on a case by case basis.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1904. Restrictions on the Term of a Cash Alternative to a Surety Bond

A licensee or applicant shall not place a certificate of deposit or investment certificate as a cash alternative to a surety bond with the Superintendent that is renewable or expires earlier than 12 months from the date of issuance.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1905. Requirements for a Person Intended to Oversee a Branch Office

A Person designated to oversee the operations of a branch office shall be knowledgeable about the branch activities of the licensee, supervise compliance by the branch with applicable law and rules, and have sufficient authority to ensure such compliance. One Person may oversee more than one branch.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1906. Notification of Change of Address

If a licensee changes the licensee's principal place of business, or the location of a branch office, the licensee shall notify the Superintendent within five business days after the address change. With the notice, a licensee shall provide the Superintendent with the license for the office changing its address and the fee required by A.R.S. § 6-126 for changing an office address. A copy of the license shall continue to be displayed at the place of business until a new license is issued.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).

R20-4-1907. Recordkeeping Requirements

- A.** The Superintendent shall approve a licensee's use of a computer or mechanical recordkeeping system if the licensee gives the Superintendent advanced written notice that it intends to do so. The Department shall not require a licensee to keep a written copy of the records if the licensee can generate all information required by this Section in a timely manner for examination or other purposes. A licensee may add, delete, modify, or customize an approved computer or mechanical recordkeeping system's hardware or software components. When requested, or in response to a written notice of an examination, a licensee shall report to the Superintendent any material alteration in the approved system's fundamental character, medium, or function if the alteration changes:
1. Any approved computer or mechanical system back to a paper-based system; or
 2. An approved mechanical system to a computer system; or
 3. An approved computer system to a mechanical system.
- B.** In addition to any statutory requirement regarding records, a record maintained by a commercial mortgage banker shall include the following:
1. A list of all executed loan applications or executed fee agreements that includes the following information:
 - a. Applicant's name;
 - b. Application date;
 - c. Amount of initial loan request;
 - d. Final disposition date;
 - e. Disposition (funded, denied); and
 - f. Name of loan officer;
 2. A record, such as a cash receipts journal, of all money received in connection with commercial mortgage loans including:
 - a. Payor's name;
 - b. Date received;
 - c. Amount; and
 - d. Receipt's purpose including identification of a related loan, if any;
 3. A sequential listing of checks written for each bank account relating to the commercial mortgage banker business, such as a cash disbursement journal, including:
 - a. Payee's name;
 - b. Amount;
 - c. Date; and
 - d. Payment's purpose including identification of a related loan, if any;
 4. Bank account activity source documents for the commercial mortgage banker business including receipted deposit tickets, numbered receipts for cash, bank account statements, paid checks, and bank advices.
 5. A trust subsidiary ledger for each borrower that deposits trust funds showing:
 - a. Borrower's name or co-borrowers' names;
 - b. Loan number, if any;
 - c. Amount received;
 - d. Purpose for the amount received;
 - e. Date received;
 - f. Date deposited into trust account;
 - g. Amount disbursed;
 - h. Date disbursed;
 - i. Disbursement's payee and purpose, and
 - j. Balance.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

6. A file for each application for a commercial mortgage loan containing:
- The agreement with the customer concerning the commercial mortgage banker's services, whether as a loan application, fee agreement, or both;
 - The documents showing the application's final disposition, such as a settlement statements, a denial or withdrawal letter, or internal memorandum;
 - Correspondence sent, received, or both by the licensee;
 - Contract, agreement, and escrow instructions to or with any depository;
 - If the loan is closed in the licensee's name, a copy of all closing documents including: closing instructions, copy of the executed note, executed deed of trust or mortgage, and each assignment of beneficial interest by the licensee, if any. If any of the documents listed in this subsection have been recorded, the file shall also contain legible copies of the recorded documents, and
 - Itemized list of all fees taken in advance including appraisal fee, credit report fee, and application fee.
7. Samples of every piece of advertising relating to the commercial mortgage banker's business in Arizona;
8. Copies of governmental or regulatory reviews;
9. If the licensee is a not a natural person, a file containing:
- Organizational documents for the entity;
 - Minutes;
 - A record, such as a stock or ownership transfer ledger, showing ownership of all proportional equity interests in the licensee, ascertainable as of any given record date; and
 - Annual report, if required by law;
10. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has a felony conviction, a copy of the judgment or other record of conviction.
11. If the licensee or anyone directly or indirectly owning more than 20% of the licensee has, in the previous seven years, been named a defendant in any civil suit, a copy of the complaint, any answer filed by the licensee, and any judgment, dismissal or other final order disposing of the action.
12. If the Superintendent has granted approval to maintain records outside this state, the specific address where the records are kept, and a person's name to contact for them.
13. If a licensee does business in other states, it must be able to separate Arizona loan information from information relating to other states to enable the Superintendent to conduct an examination.
14. A licensee shall produce a trial balance of the general ledger monthly to evidence the commercial mortgage banker's net worth.
- C. If 10 or fewer transactions have occurred during the prior calendar quarter, a licensee shall reconcile and update all records specified in subsection (B) at least once each calendar quarter. A licensee shall reconcile and update all records specified in subsection (B) monthly if more than 10 transactions occurred during the prior calendar quarter. In addition to reconciling each trust bank account, a licensee shall verify each trust balance to each trust subsidiary ledger at each reconciliation.
- D. A licensee shall retain the documents described in subsections (B)(1) and (6) for the length of time provided in A.R.S. § 6-983. For the purposes of A.R.S. § 6-983, the commercial mortgage loan's closing date, on a loan application that did not result in the making of a loan, is either:
- The date a licensee receives a written cancellation notice from the applicant; or
 - The date a licensee mails written notice to an applicant that an application has been denied; or
 - The date of a licensee's internal memorandum closing a loan file.
- E. A licensee shall maintain all other records described in this Section, and not included in subsection (D), for at least two years.
- Historical Note**
New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-1908. Impound Accounts**
The total of all funds, if any, retained by the commercial mortgage banker from all periodic payments made by the borrower to maintain a Cushion, as defined in R20-4-102, is limited only by the written agreement of the parties, if at all.
- Historical Note**
New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-1909. Authorization to Complete Blank Spaces**
An authorization, under A.R.S. § 6-984, allowing a licensee or escrow agent to complete certain blank spaces in a document after it is signed by a party to the transaction shall:
- Specifically identify the document and the blank spaces to be completed;
 - Be in writing, dated, and signed by the authorizing party, and
 - Contain the following notice, conspicuously printed on its face: YOUR SIGNATURE BELOW AUTHORIZES YOUR COMMERCIAL MORTGAGE BANKER OR ESCROW AGENT TO FILL IN SPACES YOU LEFT BLANK IN SPECIFIED LOAN DOCUMENTS YOU ARE ABOUT TO SIGN OR MAY HAVE ALREADY SIGNED. UNDER STATE LAW YOU CAN GIVE THIS AUTHORITY, BUT YOU ARE NOT REQUIRED TO DO SO. YOU CAN REFUSE TO SIGN ANY DOCUMENTS UNTIL ALL BLANKS ARE COMPLETELY FILLED IN.
- Historical Note**
New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-1910. Delay or Cause Delay**
A commercial mortgage banker does not delay or cause delay if the delay occurs due to events outside the control of the commercial mortgage banker.
- Historical Note**
New Section adopted by final rulemaking at 5 A.A.R. 2094, effective June 10, 1999 (Supp. 99-2).
- R20-4-1911. Acquisition of Additional Interest in Licensee by Majority Owner**
A person that owns 51% or more of a licensee's outstanding voting equity interests, and that acquires the power to vote additional fractional equity interests, shall deliver written notice of the acquisition to the Superintendent. The person shall deliver the notice before completing the acquisition. Within 10 days after completing the acquisition, the person shall deliver documentation evidencing the acquisition to the Superintendent.

TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

Historical Note

New Section adopted by final rulemaking at 5 A.A.R.

2094, effective June 10, 1999 (Supp. 99-2).

Department of Insurance and Financial Institutions

Title 20. Commerce, Financial Institutions, and Insurance

Chapter 4. Department of Insurance and Financial Institutions – Financial Institutions

Article 19. Commercial Mortgage Bankers

Authorizing Statute

6-123. Deputy director; powers

In addition to the other powers, express or implied, the deputy director may:

1. Exercise all powers that are necessary for the administration and enforcement of the laws and rules relating to financial institutions and enterprises.
2. In accordance with title 41, chapter 6, adopt rules that are necessary or appropriate to administer, enforce and accomplish the purposes of this title and adopt rules and issue orders that limit transactions between financial institutions or enterprises and the directors, officers or employees of the financial institutions or enterprises.
3. Require appropriate records, documents, information and reports from any financial institution or enterprise.
4. Submit to the department of public safety, or the nationwide mortgage licensing system and registry established by the secure and fair enforcement for mortgage licensing act of 2008 (P.L. 110-289; 122 Stat. 2810; 12 United States Code sections 5101 through 5116) or its successor, the name and fingerprints of any applicant, licensee, active manager or responsible individual or the name and fingerprints of any organizer, director or officer of any corporate applicant or licensee for:
 - (a) A banking permit.
 - (b) Permission to organize a savings and loan association or credit union.
 - (c) Any license.
 - (d) Any certificate.
 - (e) Authority to engage in interstate banking and branching in this state.

The department of public safety shall report the criminal record, if any, of such applicant, licensee or organizer, director or officer of such corporate applicant or licensee within ninety days after receiving the deputy director's request.

5. Employ appraisers to appraise any property that is owned or held as security by any financial institution or enterprise. The reasonable expenses and compensation of such appraisers shall be paid by the financial institution or enterprise.

6. Hold membership in, pay dues to and attend the convention of the national and regional organizations of state officials occupying like offices or performing similar functions.

7. Cooperate with other regulatory agencies and professional associations to promote the efficient, safe and sound operation and regulation of interstate banking and branching activities, including the formulation of interstate examination policies and procedures and the drafting of model rules and agreements.

8. Participate in the nationwide mortgage licensing system and registry established by the secure and fair enforcement for mortgage licensing act of 2008 (P.L. 110-289; 122 Stat. 2810; 12 United States Code sections 5101 through 5116), or its successor, and use the system for all aspects of licensure pursuant to this title, title 32, chapter 9 and title 44, chapter 2.1. The deputy director may allow the system to collect licensing fees on behalf of the deputy director, to collect a processing fee for the services of the system directly from each applicant for a license or licensee and to process and maintain records on behalf of the deputy director, including information collected pursuant to this section and section 6-123.01. This paragraph does not affect the records disclosure requirements and limitations prescribed in section 6-129.01.

Implementing Statutes

6-971. Definitions

In this article, unless the context otherwise requires:

1. "Affiliate" means an entity that directly or indirectly, through one or more intermediaries, controls, is controlled by or is under common control with the specified entity.
2. "Commercial mortgage banker" means a person who engages in the following:
 - (a) Originating commercial mortgage loans.
 - (b) Servicing commercial mortgage loans.
 - (c) Either directly or indirectly making, negotiating or offering to make or negotiate commercial mortgage loans.
3. "Commercial mortgage loan" means a loan that is directly or indirectly secured by a mortgage or deed of trust or any lien interest on commercial property and created with the consent of the owner of the commercial property.
4. "Commercial mortgage loan closing" means the day by which all documents relating to the commercial mortgage loan have been executed and recorded and all monies have been accounted for under the terms of the escrow instructions.
5. "Commercial property" means real estate that is located in this state and that is not used for a one to four family residence.
6. "Compensation" means anything of value or any benefit including points, commissions, bonuses, referral fees, loan origination fees and other similar fees but excluding periodic interest resulting from the application of the note rate of interest to the outstanding principal balance remaining unpaid from time to time.
7. "Generally accepted accounting principles" means United States generally accepted accounting principles issued by the financial accounting standards board or the international financial reporting standards issued by the international accounting standards board.
8. "Institutional investor" means a person who in the regular course of business makes commercial mortgage loans of more than two hundred fifty thousand dollars that are funded exclusively from the institutional investor's own resources.
9. "Investor" means a person who directly or indirectly provides monies to a commercial mortgage banker that are, or are intended to be, used to make a loan, and any person who purchases a loan, or any interest in a loan, from a commercial mortgage banker or in a

transaction that has been directly or indirectly arranged or negotiated by a commercial mortgage banker.

10. "License" means a license issued under this article.

11. "Licensee" means a person who is licensed under this article.

12. "Own resources" means any of the following:

(a) Cash, corporate capital, warehouse credit lines at commercial banks, savings banks or savings and loan associations or other sources that are liability items on the person's financial statements.

(b) Correspondent contracts between the commercial mortgage banker and an institutional investor, bank, savings bank, trust company, savings and loan association, credit union, profit sharing or pension trust, consumer lender or insurance company.

(c) The person's affiliates' cash, corporate capital, warehouse credit lines at commercial banks or other sources that are liability items on the affiliates' financial statements for which the affiliates' assets are pledged.

13. "Servicing commercial mortgage loans" means collecting payments at a location in this state on commercial mortgage loans, including:

(a) Principal.

(b) Interest.

(c) Trust items such as hazard insurance premiums, taxes and various reserves on an obligation under the terms of the obligation.

(d) Operational procedures covering accounting, bookkeeping, insurance, tax records, loan payment follow-up, delinquency loan follow-up, loan analysis and property valuation.

6-972. Exemptions

This article does not apply to:

1. Institutional investors.

2. A person who funds a commercial mortgage loan that was originated and processed by a licensee or by an institutional investor and who meets all of the following conditions:

(a) Does not maintain a place of business in this state in connection with funding commercial mortgage loans.

(b) Does not directly or indirectly solicit borrowers in this state for the purpose of making commercial mortgage loans.

(c) Does not participate in negotiating commercial mortgage loans. For purposes of this subdivision, "negotiating commercial mortgage loans" does not include setting the terms under which a person may buy or make a commercial mortgage loan originated by a licensee, a mortgage banker or a mortgage broker licensed pursuant to article 1 or 2 of this chapter, or an institutional investor.

3. A person who as a seller of commercial property receives one or more mortgages or deeds of trust as security for a purchase money obligation.

4. A person who is licensed to practice law in this state but is not actively and principally engaged in the business of negotiating commercial mortgage loans, if this person renders services in the course of his practice as an attorney at law.

5. A person who receives a mortgage or deed of trust on commercial property as security for an obligation payable on an installment or deferred payment basis and arising out of materials furnished or services rendered in improving that commercial property or any lien created without the consent of the owner of commercial property.

6. A person who is licensed pursuant to article 1 or 2 of this chapter.

7. An agency of any state or of the United States.

8. A nonprofit federally tax exempt corporation certified by the United States small business administration, organized to promote economic development in this state and whose primary activity consists of providing financing for business expansion.

9. A bank, savings bank, trust company, savings and loan association, profit sharing trust, pension trust, credit union, insurance company, consumer lender or receivership if it is regulated by this state, another state, the United States or a court with respect to its commercial mortgage business.

6-973. Licensing commercial mortgage bankers required; qualifications

A. A person shall not act as a commercial mortgage banker without a license issued under this article.

B. A person who engages in commercial mortgage banking need not be licensed under article 1 or 2 of this chapter or chapter 7 of this title if the person is licensed under this article.

C. The deputy director shall not grant a commercial mortgage banker's license to a person, other than a natural person, who is not registered to do business in this state on the date the license is granted. The deputy director shall not issue to or renew a commercial mortgage banker's license of an applicant unless the applicant meets all of the requirements prescribed in subsection D of

this section. The deputy director shall determine whether the applicant meets the requirements based on the application, and evidence presented at a hearing, if any, or any other evidence that the deputy director may have regarding the applicant's qualifications.

D. In order to qualify for a commercial mortgage banker's license or a renewal of such a license an applicant shall:

1. Have at least three years' experience in the commercial mortgage business or equivalent experience in a related business. If the applicant is not a natural person, the responsible individual as prescribed by section 6-976 shall meet this requirement.

2. Have made in the past or intend to make or negotiate or offer to make or negotiate commercial mortgage loans.

3. Provide the deputy director with a current audited financial statement or that of its parent company prepared by an independent certified public accountant according to generally accepted accounting principles including:

(a) The certified public accountant's opinion as to the fairness of the presentation according to generally accepted accounting principles.

(b) A balance sheet prepared within the immediately preceding six months and certified by the licensee. The deputy director may require a more recent balance sheet.

(c) If the applicant has begun operations, a statement of operations and retained earnings and a statement of changes in financial position.

(d) Notes to the financial statement if applicable.

4. Have and maintain at all times a net worth of at least \$100,000.

E. Notwithstanding subsection D, paragraph 3 of this section, licensees and applicants whose own resources are derived exclusively from correspondent contracts with institutional investors shall provide the deputy director with a current financial statement or that of its parent company prepared according to generally accepted accounting principles including:

1. A balance sheet prepared within the immediately preceding six months and certified by the licensee. The deputy director may require a more recent balance sheet.

2. If the applicant has begun operations, a statement of operations and retained earnings and a statement of changes in financial position.

3. Notes to the financial statement if applicable.

6-975. Bond or other security

A. Each licensed commercial mortgage banker shall deposit with the deputy director, before doing business as a commercial mortgage banker, a bond executed by the licensee as principal and a surety company authorized to do business in this state as surety. The bond shall be conditioned on the licensee's faithful compliance, including the directors, officers, members, partners, trustees and employees, with this article. Only one bond is required for any person, firm, association or corporation regardless of the number of officers, directors, members, partners or trustees who are employed by or are members of the firm, association or corporation.

B. The bond is payable to any person who is injured by the wrongful act, default, fraud or misrepresentation of the licensee or the licensee's employees and to this state for the benefit of the person injured. No suit may be commenced on the bond after the expiration of one year following the commission of the act on which the suit is based, except that claims for fraud or mistake are limited to the limitation period prescribed in section 12-543, paragraph 3. If an injured person commences an action for a judgment to collect on the bond, the injured person shall notify the deputy director of the action in writing when the action is commenced and shall provide copies of all documents relating to the action to the deputy director on request.

C. The bond required by this section is \$25,000 for licensees whose investors are limited solely to institutional investors and \$100,000 for licensees whose investors include any other investors.

D. Notwithstanding section 35-155, in lieu of the bond described in this section, an applicant for a license or a licensee may deposit with the deputy director a deposit in the form of cash or alternatives to cash in the same amount as the bond required under subsection C of this section. The deputy director may accept any of the following as an alternative to cash:

1. Certificates of deposit, investment certificates or share accounts that are payable or assigned to the state treasurer, issued by banks, savings banks or savings and loan associations doing business in this state and fully insured by the federal deposit insurance corporation or any successor institution.

2. Certificates of deposit, investment certificates or share accounts that are payable or assigned to the state treasurer, issued by a credit union doing business in this state and fully insured by the national credit union administration or any successor institution.

E. The deputy director shall deposit the cash or alternatives to cash received under this section with the state treasurer. The state treasurer shall hold the cash or alternatives to cash in the name of this state to guarantee the faithful performance of all legal obligations of the person required to post bond pursuant to this section. The person is entitled to receive any accrued interest earned from the alternatives to cash. The state treasurer may impose a fee to reimburse the state treasurer for administrative expenses. The fee shall be paid by the applicant or licensee. The state treasurer may prescribe rules relating to the terms and conditions of each type of security provided by this section.

F. In addition to such other terms and conditions as the deputy director prescribes by rule or order, the principal amount of the deposit shall be released only on written authorization of the deputy director or on the order of a court of competent jurisdiction. The principal amount of the

deposit shall not be released before the expiration of three years after the first to occur of any of the following:

1. The date of substitution of a bond for a cash alternative.
2. The surrender of the license.
3. The revocation of the license.
4. The expiration of the license.

6-976. Responsible individual; employees

A. A license entitles the licensee and all officers, directors, members, partners, trustees and employees of the licensee to engage in commercial mortgage banking if one officer, director, member, partner, employee or trustee of the person or an employee of an affiliated entity or the parent company of the licensee is designated in the license as the individual responsible for the licensee under this article. If the natural person is not a resident of this state, an employee of the licensee shall be designated in the license as the individual responsible for the licensee under this article. For the purposes of this subsection, employee does not include an independent contractor.

B. The responsible individual shall be active in managing the activities of the licensee governed by this article and shall meet the qualifications prescribed by section 6-973, subsection D, paragraph 1 for a licensee. A licensee shall notify the deputy director that its responsible individual will cease to be active in managing the activities of the licensee within ten days after learning of that fact. Within ninety days after the notification is received by the deputy director, the licensee shall replace the responsible individual with a qualified replacement and notify the deputy director. If the license is not placed under active management of a qualified responsible individual and if notice is not given to the deputy director within the ninety-day period, the license of the licensee expires.

C. A licensee shall not employ any person unless the licensee:

1. Conducts a reasonable investigation of the background, honesty, truthfulness, integrity and competency of the employee before hiring.
2. Keeps a record of the investigation for at least two years after termination.

D. The licensee is liable for any damages caused by any employee while acting as an employee of the licensee.

6-977. Displaying and using license number

A. A licensee shall prominently display the commercial mortgage banker license in the office of the commercial mortgage banker.

B. A licensee or an employee of the licensee shall not advertise for or solicit commercial mortgage loans in any manner without using the license name, or other assumed name or trade name that is submitted to the department pursuant to section 6-117, and the license number. If a license is issued in the name of a natural person, the advertising or solicitation may not imply that the license is in the name of another person or entity. For the purposes of this subsection, advertise does not include business cards, radio and television advertising directed at national or regional markets and promotional items unless those items contain rates or terms on which a commercial mortgage loan may be obtained.

6-978. Consent of deputy director for transferring, assigning or acquiring control of licensee; definition

A license is not transferable or assignable and control of a licensee may not be acquired through a stock purchase or any other device without the prior written consent of the deputy director. The deputy director shall not give written consent if the deputy director finds that any of the grounds for denial, revocation or suspension of a license as set forth in section 6-982 apply to the acquiring person. For the purpose of this section, "control" means the power to vote more than twenty percent of the outstanding voting shares of a licensed corporation, partnership, association or trust.

6-979. Principal place of business; branch office license; change of address

A. Each licensed commercial mortgage banker shall designate and maintain a principal place of business in this state to transact business. The license shall specify the address of the licensee's principal place of business.

B. If a licensee wishes to maintain one or more locations in addition to a principal place of business, the licensee shall first obtain a branch office license from the deputy director and designate a person for each branch office to oversee the operations of that office.

C. If the deputy director determines that the licensee is qualified, the deputy director shall issue a branch office license indicating the address of the branch office. The licensee shall conspicuously display the branch office license in the branch office.

D. If the address of the principal place of business or of any branch office is changed, the licensee shall immediately notify the deputy director of the change and the deputy director shall endorse the change of address on the license.

6-983. Required accounting practices and records; escrow of monies; disclosure

A. A commercial mortgage banker shall keep and maintain at all times correct and complete records as prescribed by the deputy director that will enable the deputy director to determine whether the licensee is complying with this article. A commercial mortgage banker shall make records available to the deputy director in this state not more than three business days after demand and shall provide for the acceptance of collect calls or provide a toll-free telephone number to borrowers to obtain information from the records if the licensed place of business in

this state cannot readily provide the information requested by the borrowers. A commercial mortgage banker shall maintain original documents or clearly legible copies of all commercial mortgage loan transactions for at least two years after the date of the commercial mortgage loan closing.

B. A commercial mortgage banker shall observe generally accepted accounting principles and practices.

C. If a commercial mortgage banker requires an advance or fee to be paid in connection with an application for a commercial mortgage loan, there shall be a written agreement. The parties shall sign the written agreement, and the agreement shall contain terms pertaining to the payment of the fee or disposition of the advance or fee, whether the loan is finally consummated or not, and a term for which the agreement is to remain in force before return of the advance or fee for nonperformance can be required. The licensee shall immediately deposit advances or fees in a trust account in a bank, savings bank or savings and loan association that is fully insured by the federal deposit insurance corporation or any successor agency, and the advances or fees shall not be commingled with other monies. The trust account shall designate the licensee as trustee and shall provide for withdrawing the monies without previous notice. Withdrawals shall only be disbursed according to the terms of the agreement. A licensee who receives advances or fees shall preserve and on request make available to the deputy director all deposits, withdrawal receipts and statements of account rendered by the bank, savings bank or savings and loan association. The licensee shall further preserve all agreements between the parties involved in the transaction and all contracts, agreements and instructions to or with the depository and shall keep an accurate accounting of each separate bank account in which the trust monies have been deposited. If the loan is declined by or on behalf of the lender or canceled by the applicant, all documents provided by or at the expense of the applicant, including any appraisal, are the property of the applicant. At the applicant's discretion, the documents shall be returned or transferred to any designated financial institution or enterprise without additional consideration except for fees for which the applicant has previously contracted, if the document is not prohibited by law from being transferred or returned.

D. If periodic payments are to be collected from the mortgagor to provide for payments by the mortgagee of taxes, assessments, insurance premiums, ground rents or other current charges against the real estate security, the estimated payment amount stated to the mortgagor by the commercial mortgage banker shall be such that the total of these payments collected for each category during the tax or other period will approximate the actual tax or other payment when due. The licensee shall annually account to the borrower for all such periodic payments of taxes, assessments, insurance premiums, ground rents and other current charges and, to the extent monies have been collected for payment, shall pay them promptly.

6-984. Prohibited acts

A. Except for employment verifications and deposit or account verifications, a person shall not induce, require or permit any document in connection with making a commercial mortgage loan to be signed by a party to the transaction if the document contains any blank spaces to be filled in

after it has been signed unless the party has specifically authorized the licensee or the escrow agent in writing to complete those blank spaces.

B. A person is not entitled to receive compensation in connection with arranging for or negotiating a commercial mortgage loan if the person is not licensed pursuant to or is not exempt from this article, except that a commercial mortgage banker, mortgage banker or mortgage broker licensed pursuant to this article or article 1 or 2 of this chapter may compensate a person who is a resident of another state and who meets the licensing requirements, if any, of the other state in connection with arranging for or negotiating a commercial mortgage loan.

C. A commercial mortgage banker may not commingle monies of borrowers or monies held for the benefit of borrowers with monies of the commercial mortgage banker.

D. A person engaged in commercial mortgage banking shall not knowingly advertise, display, distribute, broadcast or televise, or cause or permit to be advertised, displayed, distributed, broadcast or televised, in any manner whatever, a false, misleading or deceptive statement or representation with regard to the rates, terms or conditions for a commercial mortgage loan. The charges or rates of charge, if stated, shall be set forth in a clear and concise manner.

E. A commercial mortgage banker shall not, except in good faith, delay or cause delay in the closing of a loan that results in increased costs to a borrower.

F. A commercial mortgage banker shall not record or cause to be recorded a document that would give rise to liability under section 33-420.

G. A person who is employed by a licensee to act in the capacity of a commercial mortgage banker shall not be concurrently employed by any other licensee to act in the capacity of a commercial mortgage banker, except with the prior written approval of all concurrently employing licensees.

H. A commercial mortgage banker shall not collect compensation for rendering services as a real estate broker or real estate salesperson unless both of the following apply:

1. The commercial mortgage banker is licensed pursuant to title 32, chapter 20.
2. The commercial mortgage banker has disclosed to the person from whom the compensation is collected that the commercial mortgage banker is receiving compensation both for commercial mortgage banking and for services as a real estate broker or salesperson.

I. A licensee shall not accept any assignment of the borrower's wages or salary in connection with activities governed by this article.

J. A commercial mortgage banker shall not make or negotiate or offer to make or negotiate, for compensation, either directly or indirectly, a loan of money that is not secured by a mortgage or deed of trust or any other lien interest in real property or if the real estate security is a one to four family residence.

K. A commercial mortgage banker shall not make a false promise or misrepresentation or conceal an essential or material fact in the course of the commercial mortgage banker business.

L. A commercial mortgage banker shall not fail to truthfully account for the monies belonging to a party to a commercial mortgage loan or commercial mortgage banking loan transaction or fail to disburse monies in accordance with the agreements.

M. A commercial mortgage banker shall not record a mortgage or deed of trust if monies are not available for the immediate disbursement to the mortgagor unless, before that recording, the commercial mortgage banker informs the mortgagor in writing of a definite date by which payment shall be made and obtains the mortgagor's written permission for the delay.

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - EXPEDITED RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 14, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 18

Amend: R18-18-101; R18-18-103; R18-18-104; R18-18-105; R18-18-106;
R18-18-107; R18-18-109; R18-18-201; R18-18-202; R18-18-203;
R18-18-204; R18-18-205

Summary:

This expedited rulemaking from the Department of Environmental Quality (Department) seeks to amend twelve (12) rules in Title 18, Chapter 18, Articles 1 and 2 regarding Emergency Planning and Hazardous Materials Training. Rules in Article 1 relate to Emergency Planning and Community Right to Know. Rules in Article 2 relate to Hazardous Materials Training Program, Student and Instructor Evidence of Completion.

The Department seeks to amend these rules to incorporate the changes proposed in the Department's Five-Year Review Report for Title 18, Chapter 18, which was approved by the Council in July 2023. In that review, the Department identified the need to update statutory citations, correct clerical errors, and make minor clarifications to the rules. This rulemaking incorporates those changes as well as makes other minor typographical errors and updates out of date citations identified in the course of this rulemaking.

1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

The Department indicates the proposed amendments to the rules do not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of regulated persons. Furthermore, the Department indicates the rulemaking corrects typographical errors, makes address or name changes or clarifies language of a rule without changing its effect, adopts or incorporates by reference without material change federal statutes or regulations pursuant to section 41-1028, statutes of this state or rules of other agencies of this state, and amends or repeals rules that are outdated, redundant or otherwise no longer necessary for the operation of state government pursuant to A.R.S. § 41-1027(A)(3), (4), and (6). A breakdown of which statutory basis for expedited rulemaking the Department indicates each proposed amendment falls within is provided in Section 7 of the Preamble of the Department's Notice of Final Expedited Rulemaking. Council staff believes the Department's rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)(3), (4), and (6).

2. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Department indicates it did not receive any public comments regarding this rulemaking.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department indicates there were no changes between the Notice of Proposed Expedited Rulemaking published in the Administrative Register on October 4, 2024 and the Notice of Final Expedited Rulemaking now before the Council for consideration.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

Pursuant to A.R.S. § 41-1052(D)(9), "[t]he council shall not approve the rule unless...[t]he rule is not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law."

The Department indicates United States Code, Title 42, Section 11001 requires each state to establish a State emergency response commission as part of the Emergency Planning and Community Right-to Know Act (EPCRA). Each State emergency response commission must appoint local emergency planning committees (LEPCs), and must supervise and coordinate the

activities of the LEPCs. The Arizona Legislature established the Arizona State Emergency Response Commission (AZSERC) under A.R.S. § 49-123 to satisfy the federal requirement to establish a State emergency response commission. The Department states rules in Title 18, Chapter 18, Article 1 provide for the make-up, operation, and duties of LEPCs, satisfying the federal requirements of EPCRA without exceeding them.

Additionally, the Department indicates A.R.S. § 49-123(J) establishes requirements for mandatory hazardous materials training programs. The Department states the rules in Title 18, Chapter 18, Article 2 provides for the Hazardous Materials Training Program, including curriculum standards for the Hazmat First Responder course instructors and minimum standards for certification. The Department indicates, to meet the requirements of A.R.S. § 49-123(J) and for convenience, AZERC has modeled its course and curriculum after the federal Occupational Safety and Health Act (OSHA) requirements at 29 CFR 1910.120, without exceeding those requirements. The training requirements ensure the safety of employees engaged in operations at hazardous waste sites, at hazardous waste treatment, storage, or disposal facilities, and at the site of an emergency response to the release, or threatened release of hazardous substances.

7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rule does not require the issuance of a permit, license, or agency authorization.

8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates it did not review or rely on any study for this rulemaking.

9. **Conclusion**

This expedited rulemaking from the Department seeks to amend twelve (12) rules in Title 18, Chapter 18, Articles 1 and 2 regarding Emergency Planning and Hazardous Materials Training. The Department seeks to amend these rules to incorporate the changes proposed in the Department's Five-Year Review Report for Title 18, Chapter 18, which was approved by the Council in July 2023. In that review, the Department identified the need to update statutory citations, correct clerical errors, and make minor clarifications to the rules. This rulemaking incorporates those changes as well as makes other minor typographical errors and updates out of date citations identified in the course of this rulemaking.

Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on the filing of the approved Notice of Final Expedited Rulemaking with the Secretary of State.

Council staff recommends approval of this rulemaking.

Re: Rulemaking for Title 18. Environmental Quality, Chapter 18. Department of
Environmental Quality – Emergency Planning And Hazardous Materials Training

Dear Chairperson Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits an expedited rulemaking proposing changes to Arizona Administrative Code (A.A.C) Title 18, Chapter 18 to the Governor's Regulatory Review Council (GRRC) for its consideration and approval.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-202:

I. Information Required by A.A.C. R1-6-202(A)(1)

- The public record closed for the rule on December 18, 2024 at 5:00 p.m.
- Pursuant to A.R.S. § 41-1027(A)(3), (A)(4), and (A)(6), this expedited rulemaking corrects typographical errors, updates outdated citations, clarifies language for the rules without changing their effect. This expedited rulemaking does not increase the cost of regulatory compliance, increase a fee or reduce procedural rights of regulated persons.
- This rulemaking incorporates changes proposed in the Department's five-year rule review of 18 A.A.C. Chapter 18, Remedial Action, approved by GRRC December 5, 2023.
- The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- A list of documents enclosed under A.A.C. R1-6-201(A)(2)-(8), which are attached as electronic copies:
 - This cover letter.
 - The Notice of Final Expedited Rulemaking (NFERM), including the preamble, table of contents, and text of each rule.
 - ADEQ did not receive any written comments on the Notice of Proposed Expedited Rulemaking (NPERM).

Main Office

1110 W. Washington Street • Phoenix, AZ 85007
(602) 771-2300

Southern Regional Office

400 W. Congress Street • Suite 433 • Tucson, AZ 85701
(520) 628-6733

www.azdeq.gov

printed on recycled paper

- ADEQ received no analysis regarding the rules' impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states; therefore, no such analysis is included in this submittal.
- One electronic copy of each of the following is enclosed: Materials incorporated by reference in rules which have been updated by this rulemaking to reflect more recent publications: 29 CFR 1910.120, 40 CFR 355.10, 40 CFR 370, and 42 USC 11001.
- No statute was declared unconstitutional.
- One electronic copy of each of the following is enclosed: the general and specific statutes authorizing the rules, including relevant statutory definitions: A.R.S. § 49-104(B)(4), A.R.S. § 49-123(F), A.R.S. § 49-123(I), and A.R.S. § 49-123(J).
- No term is defined in the rule by referring to another.

Thank you for your timely review and approval. Please contact John MacBain, Rule Writer, Waste Programs Division, 602-771-0101 or macbain.john@azdeq.gov, if you have any questions.

Sincerely,

DocuSigned by:

NOTICE OF FINAL EXPEDITED RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY – EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

PREAMBLE

1. Permission to proceed with this final expedited rulemaking was granted under A.R.S. § 41-1039 by the governor on:

July 31, 2023

| <u>2. Article, Part, or Section Affected (as applicable)</u> | <u>Rulemaking Action</u> |
|---|---------------------------------|
| R18-18-101 | Amend |
| R18-18-103 | Amend |
| R18-18-104 | Amend |
| R18-18-105 | Amend |
| R18-18-106 | Amend |
| R18-18-107 | Amend |

Phoenix, AZ 85007
Telephone: (602) 771-0101

Fax: (602) 771-2366
Email: macbain.john@azdeq.gov

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Summary

Pursuant to A.R.S. § 41-1027(A)(7), ADEQ is engaged in this expedited rulemaking to incorporate the changes proposed in the Department's five-year review of 18 A.A.C. Chapter 18, Emergency Planning and Hazardous Materials Training approved by the Governor's Regulatory Review Council (GRRC) in July 2023. In that review, ADEQ identified the need to update statutory citations, correct clerical errors, and make minor clarifications to the rules. This rulemaking incorporates those changes as well as makes other minor typographical errors and updates out of date citations identified in the course of this rulemaking.

Background

During the five-year review, ADEQ identified several citations that required updating to reflect the transfer and renumbering of referenced statutes that occurred in 2015 in order to improve the clarity and understandability of the rules. As recommended in the five-year review, R18-18-101 has had references to A.R.S. § 26-341 updated to A.R.S. § 49-121; R18-18-104 has had references to A.R.S. § 26-347 updated to A.R.S. § 49-127; R18-18-105 has had references to A.R.S. § 26-345 updated to A.R.S. § 49-125; R18-18-106 has had references to A.R.S. § 26-348 updated to A.R.S. § 49-128; R18-18-107 has had references to A.R.S. § 26-350 updated to A.R.S. § 49-130; and R18-18-109 has had references to A.R.S. § 26-343 updated to A.R.S. § 49-123 to reflect the 2015 transfer and renumbering of the statutes.

During the five-year review, ADEQ also proposed adding several weblinks to materials referenced in the rules in order to modernize their requirements. The incorporation by reference in R18-18-103(A) has been updated to the latest version of the United States Code (USC) for clarity as no changes to the incorporated section has occurred. R18-18-103(A) has also been updated to include where the material incorporated by reference is available online from the U.S. Government Publishing Office. References to the Emergency Response Plan Questionnaire have been updated to Emergency Response Plan Template in R18-18-104(C) & (D) and a weblink where the Template can be found online has been added to R18-18-104(C).

The incorporation by reference of 40 CFR 370, Subpart B in R18-18-107(A) has been updated to the most recent version of the Code of Federal Regulations (CFR), including the addition of an incorporation of 40 CFR 370, Subpart C. 40 CFR 370, Subpart B was updated in 2014 to split the elements of Subpart B into Subparts B & C, providing additional clarifying details on how to comply with hazardous chemical reporting requirements. Updating the incorporation by reference does not change current processes or reporting requirements as ADEQ has previously incorporated the details in the updated 40 CFR 370, Subparts B & C into its hazardous chemical reporting processes. A weblink where the material incorporated by reference is available online from the U.S. Government Publishing Office has also been added for clarity.

Weblinks have been added to R18-18-203(A)(2)(a), providing the online location of the referenced “Participant Application”, and R18-18-203(A)(3), providing the online locations of information regarding scheduling and attending the referenced instructor workshops. A weblink has also been added to R18-18-204(A), providing the online location of the referenced “Course Request Form”. The incorporations by reference in R18-18-205(B) have been updated to the most recent version of the CFR for clarity, and a weblink where the material incorporated by reference is available online from the U.S. Government Publishing Office has been added.

This rulemaking also incorporates other courses of action that were proposed in the five-year review in order to improve clarity and understandability of the rules. The term “MSDS” has been removed from definitions in R18-18-101(B)(7) because the term is not used elsewhere in Chapter 18. An incorrect citation to A.R.S. § 49-201 in R18-18-201(7)(h) has been corrected to A.R.S. § 49-121. The five-year review also proposed adding language to R18-18-202(B) to adopt, without material change, language consistent with 29 CFR 1910.120(q)(6)(i)(F) to include the course topic, “How to realize the need for additional resources, and to make appropriate notifications to the communication center.” This rulemaking adds that language to R18-18-202(B) without material change.

During the course of this rulemaking several outdated references to the U.S. Government Printing Office were identified throughout the rule. In December 2014, the U.S. Government Printing Office was renamed the Government Publishing Office to reflect the Office’s growing role in providing access to government information in digital formats. ADEQ has taken the opportunity during this rulemaking to update references to the U.S. Government Printing Office to U.S. Government Publishing Office throughout Chapter 18 in order to improve clarity. The agency also took the opportunity to correct the citation to 29 CFR 1910.120(Q)(6) to 29 CFR 1910.120(q)(6) to properly reflect the formatting in the CFR.

An expedited rulemaking is appropriate pursuant to A.R.S. § 41-1027(A)(3) as this rulemaking corrects typographical errors, updates citations, and clarifies language without changing the effect of the rules; it will not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of those regulated. The following table summarizes the amendments and their justifications under A.R.S. § 41-1027(A):

| Rule | Justification under A.R.S. § 41-1027(A) | Amendment Summary |
|----------------------------|--|---|
| R18-18-101. Definitions | A.R.S. § 41-1027(A)(6) | A.R.S. § 26-341 has been updated in subsection (A) to A.R.S. § 49-121 because A.R.S. § 26-341 was transferred and renumbered in 2015. |
| | A.R.S. § 41-1027(A)(6) | A.R.S. § 26-341(2) has been updated in subsection (B)(6) to A.R.S. § 49-121 because A.R.S. § 26-341 was transferred and renumbered in 2015. |
| | A.R.S. § 41-1027(A)(6) | |

| | | |
|---|--|--|
| | | The term “MSDS” has been removed from the definitions in subsection (B)(7) because this term is not used elsewhere in Chapter 18. |
| R18-18-103. Responsibilities of an LEPC | A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(3) | The incorporation by reference in subsection (A) have been updated to the most recent version of the USC. there were no changes between the two versions. Reference to U.S. Government Printing Office has been updated to U.S. Government Publishing Office to reflect the Office’s 2014 name change. An internet website has been included where for the material incorporated in subsection (A) is available to modernize the requirement. |
| R18-18-104. Emergency Planning and Preparedness | A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) | 40 CFR 355.30 has been in subsection (A) to 40 CFR 355.10 because 40 CFR 355.30 was revised and renumbered in 2008. A.R.S. § 26-347(B) has been updated in subsection (B) to A.R.S. § 49-127(B) because A.R.S. § 26-347 was transferred and renumbered in 2015. A.R.S. § 26-347(D) has been updated in subsection (C) to A.R.S. § 49-127(D) because A.R.S. § 26-347 was transferred and renumbered in 2015. The reference to “the Questionnaire” and Worksheet in subsections (C) and (D) has been changed to “the Plan Template”, and an internet website where template is available has been included. |
| R18-18-105. Local Emergency Planning and Preparedness | A.R.S. § 41-1027(A)(6) | A.R.S. § 26-345(E) has been updated in subsection (A) to A.R.S. § 49-125(E) because A.R.S. § 26-345 was transferred and renumbered in 2015. |
| R18-18-106. Reportable Release Notification | A.R.S. § 41-1027(A)(6) | A.R.S. § 26-348(A) has been updated in subsection (A)(1) to A.R.S. § 49-128(A) because A.R.S. § 26-348 was transferred and renumbered in 2015. |

| | | |
|---|--|--|
| | A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) | A.R.S. § 26-348(B) has been updated in subsection (A)(2) to A.R.S. § 49-128(B) because A.R.S. § 26-348 was transferred and renumbered in 2015. A.R.S. § 26-348(C) has been updated in subsection (A)(3) to A.R.S. § 49-128(C) because A.R.S. § 26-348 was transferred and renumbered in 2015. |
| R18-18-107 Extremely Hazardous Substance (EHS) or Hazardous Chemical Reporting | A.R.S. § 41-1027(A)(4) A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(3) A.R.S. § 41-1027(A)(6) | The incorporation by reference of 40 CFR 370, Subpart B in subsection (A) has been updated to the most recent version of the CFR, including the addition of a reference to 40 CFR 370, Subpart C. The reference to U.S. Government Printing Office has been updated to U.S. Government Publishing office to reflect the Office's 2014 name change. An internet website for where the material incorporated in subsection (A) is available to modernize the requirement has been included. A.R.S. § 26-350 has been updated in subsection (B) to A.R.S. § 49-130 because A.R.S. § 26-350 was transferred and renumbered in 2015. |
| R18-18-109. Community Right-to-know Procedures | A.R.S. § 41-1027(A)(6) | A.R.S. § 26-343(G) has been updated in subsection (D) to A.R.S. § 49-123(G) because A.R.S. § 26-343 was transferred and renumbered in 2015. |
| R18-18-201. Definitions | A.R.S. § 41-1027(A)(3) | The citation to A.R.S. § 49-201 in subsection (7)(h) has been corrected to A.R.S. § 49-121. |
| R18-18-202. Hazmat First Responder Awareness Level Course and Hazmat First Responder Operations Level Course Curriculum | A.R.S. § 41-1027(A)(4) | Language has been added in subsection (B) to adopt, without material change, language consistent with 29 CFR 1910.120(q)(6)(i)(F) to include the following course topic: How to realize the need for additional resources, and to make appropriate notifications to the communication center. |

| | | |
|---|--|--|
| R18-18-203. Instructor Authorization and Renewal | A.R.S. § 41-1027(A)(3) A.R.S. § 41-1027(A)(3) | An internet website where the material incorporated in subsection (A)(2)(a) is available to modernize the requirement has been added. Language has been added in (A)(3) to clarify how to schedule or attend instructor workshops. |
| R18-18-204. Hazmat First Responder Operations Level Course Division Requirements | A.R.S. § 41-1027(A)(3) | An internet website where the material incorporated in subsection (A) is available to modernize the requirement has been added. |
| R18-18-205 Hazmat First Responder Awareness Level Personnel and Hazmat First Responder Operations Level Operatives Evidence Completion. | A.R.S. § 41-1027(A)(3) A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(4) A.R.S. § 41-1027(A)(3) | The citation to 29 CFR 1910.120(Q)(6) in and (Q)(8)(ii) subsection (B) have been corrected to 29 CFR 1910.120(q)(6) and (q)(8)(ii) to properly reflect the formatting in the CFR. The reference to U.S. Government Printing Office has been updated to U.S. Government Publishing office to reflect the Office's 2014 name change. The incorporations by reference in subsection (B) have been updated to the most recent version of the CFR. There were no changes between the two versions. An internet website for where the material incorporated in subsection (B) is available to modernize the requirement has been added. |

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. A statement that the agency is exempt from the requirements under A.R.S. § 41-1055(G) to obtain and file a summary of the economic, small business, and consumer impact under A.R.S. § 41-1055(D)(2):

The agency is exempt from the requirements to prepare and file an economic, small business, and consumer impact statement under A.R.S. § 41-1055(D)(2).

11. A description of any change between the proposed expedited rulemaking, to include a supplemental proposed notice, and the final rulemaking:

No changes.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

ADEQ did not receive comments regarding this proposed rulemaking.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statutes applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The proposed changes to these rules do not require a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

United States Code, Title 42, Section 11001 requires each state to establish a State emergency response commission as part of the Emergency Planning and Community Right-to Know Act (EPCRA). Each State emergency response commission must appoint local emergency planning committees (LEPCs), and must supervise and coordinate the activities of the LEPCs. The Arizona Legislature established the Arizona State Emergency Response Commission (AZSERC) under A.R.S. § 49-123 to satisfy the federal requirement under to establish a State emergency response commission. 18 A.A.C. 18, Article 1 provides for the make-up, operation, and duties of LEPCs, satisfying the federal requirements of EPCRA without exceeding them.

A.R.S. § 49-123(J) establishes requirements for mandatory hazardous materials training programs. 18 A.A.C. 18, Article 2 provides for the Hazardous Materials Training Program, including curriculum standards for the Hazmat First Responder course instructors and minimum standards for certification. To meet the requirements of A.R.S. § 49-123(J) and for convenience, AZERC has modeled its course and curriculum after the federal Occupational Safety and Health Act (OSHA) requirements at 29 CFR 1910.120, without exceeding those requirements. The training requirements ensure the safety of employees engaged in operations at hazardous waste sites, at hazardous waste treatment, storage, or disposal facilities, and at the site of an emergency response to the release, or threatened release of hazardous substances.

c. Whether a person submitted an analysis to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states under A.R.S. § 41-1055(I). If yes, include the analysis with the rulemaking package.

No analysis was submitted to the Department.

14. List all incorporated by reference material as specified in A.R.S. § 41-1028 and include a citation where the material is located:

| | |
|---|---------------|
| 42 U.S.C. § 11001(c), revised October 17, 1986 | R18-18-103(A) |
| 40 CFR 370, Subpart B, revised July 1, 2023 | R18-18-107(A) |
| 29 CFR 1910.120(Q)(6), revised July 1, 2023 | R18-18-205(B) |
| 29 CFR 1910.120(Q)(8)(ii), revised July 1, 2023 | R18-18-205(B) |

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A) state where the text was changed between the emergency and the final expedited rulemaking package:

The rules were not previously made as an emergency rule.

16. The full text of the rules follows:
Rule text begins on the next page.

ARTICLE 1. EMERGENCY PLANNING AND COMMUNITY RIGHT TO KNOW

R18-18-101. Definitions

- A. The definitions in ~~A.R.S. § 26-341~~ A.R.S. § 49-121 apply to this Chapter.
- B. In this Article, unless specified otherwise:
 - 1. “Emergency planning district” means an area that the Commission designates to facilitate preparing and implementing an emergency response plan.
 - 2. “EPA” means the United States Environmental Protection Agency.
 - 3. “EPCRA” means the Emergency Planning and Community Right-to-Know Act of 1986, commonly known as SARA Title III.
 - 4. “FD” means local fire department or the fire district with jurisdiction for a particular facility.
 - 5. “Hazardous substance” means a substance on the list that appears at 40 CFR 302.4.
 - 6. “LEPC” means “Committee,” as prescribed at ~~A.R.S. § 26-341(2)~~ A.R.S. § 49-121.
 - 7. ~~“MSDS” means material safety data sheet and has the same meaning as prescribed at 40 CFR 370.02.~~
 - 8. “NIMS” means National Incident Management System.
 - 9. “Reportable release” means a release that is not excluded under 40 CFR 355.40.
 - 10. “TPQ” means threshold planning quantity and has the same meaning as prescribed at 40 CFR 355.20.

R18-18-103. Responsibilities of an LEPC

- A. Members of an LEPC shall fulfill the responsibilities listed at 42 U.S.C. 11001(c), ~~October 17, 1986~~ January 5, 2023, which is incorporated by reference, contains no future editions or amendments, and is available from the Commission

and the U.S. Government ~~Printing~~ Publishing Office, P.O. Box 371954, Pittsburgh, PA 15250, at
<https://www.govinfo.gov/link/uscode/42/11001>.

 - 4. No Change

R18-18-104. Emergency Planning and Preparedness

- A. If a facility is required to comply with ~~40 CFR 355.30~~ 40 CFR 355.10, the owner or operator of the facility shall also comply with the emergency planning and preparedness requirements in this Section.
- B. If a facility is designated by the Commission under ~~A.R.S. § 26-347(B)~~ A.R.S. § 49-127(B), the owner or operator of the facility shall comply with the emergency planning and preparedness requirements in this Section and the reporting requirements of R18-18-107.
- C. No later than 60 days after a facility first becomes subject to the emergency planning and preparedness requirements of this Section, the owner or operator of the facility shall submit a facility emergency response plan according to ~~A.R.S. § 26-347(D)~~ A.R.S. § 49-127(D). The owner or operator of the facility may submit the facility emergency response plan by completing and submitting an Emergency Response Plan Questionnaire Template, which is available from the Commission, at <https://tier2.azserc.org/Content/HelpLinks/ERP%20Template%202021.pdf>.
- D. The owner or operator of a facility that submits an Emergency Response Plan Questionnaire Template under subsection (C) may also submit a Hazard Analysis Worksheet for each extremely hazardous substance at the facility that equals or exceeds the TPQ.
- E. No change
 - 1. No Change
 - 2. No Change
 - 3. No Change

R18-18-105. Local Emergency Response Plan

- A. Within 12 months after the Commission designates a new emergency planning district and appoints members of an LEPC for the newly designated emergency planning district, the LEPC shall prepare an emergency response plan that complies with the requirements at ~~A.R.S. § 26-345(E)~~ A.R.S. § 49-125(E) and complies with NIMS.
- B. No change
- C. No change
- D. No change
 - 1. No Change
 - 2. No Change
- E. No change
- F. No change
- G. No change

R18-18-106. Reportable Release Notification

The owner or operator of a facility at which a reportable release occurs shall:

- 1. Comply with the notification requirements of ~~A.R.S. § 26-348(A)~~ A.R.S. § 49-125(E);
- 2. Submit the written follow-up emergency notice required under ~~A.R.S. § 26-348(B)~~ A.R.S. § 49-128(B); and
- 3. Update the notice provided under subsection (2) as required under ~~A.R.S. § 26-348(C)~~ A.R.S. § 49-128(C).

R18-18-107. Extremely Hazardous Substance (EHS) or Hazardous Chemical Reporting

- A. The owner or operator of a facility shall comply with the extremely hazardous substance and hazardous chemical reporting requirements of 40 CFR 370, Subparts B & C, July 1, ~~2007~~ 2023, which is incorporated by this reference, contains no later amendments or editions, and is available from the Commission and the U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250, at <https://www.govinfo.gov/content/pkg/CFR-2023-title40-vol30/pdf/CFR-2023-title40-vol30-part370-subpartB.pdf>
- B. As required by ~~A.R.S. § 26-350~~ A.R.S. §49-130, an owner or operator described in subsection (A) shall submit a Tier Two Emergency and Hazardous Chemical Inventory Form, using a form available from the Commission, by March 1 of each year. All facilities subject to this reporting requirement shall be subject to the Tier II Emergency and Hazardous Chemical Inventory Reporting fee schedule:
 - 1. Each owner or operator of a facility required to file a hazardous chemical inventory report(s) (Tier II Reports) under the provisions of 42 U.S.C. § 11022 will be assessed a report filing fee of seventy-five dollars (\$75.00) for the first required facility report and an additional fee of twenty dollars (\$20.00) for each additional required facility report up to a maximum limit of five hundred dollars (\$500) per annual reporting period.
 - 2. Owners or operators of facilities meeting the following conditions are exempt from the reporting fee(s):
 - a. Any business or other outlet that primarily reports or sells gasoline, diesel and other motor fuel only at retail to the public.
 - b. Any business or other outlet that only files a Tier II report to claim lead acid batteries.
 - c. Any business or other outlet that only files a Tier II report to claim diesel or gasoline.
 - d. Any business or other outlet that resides on tribal lands or a tribal Nation and must report to a Tribal Emergency Response Commission (TERC) or Chemical-Tribal Emergency Response Commission (C-TERC).
- C. No change

R18-18-109. Community Right-to-know Procedures

- A. No change
- B. No change
 - 1. No Change
 - 2. No Change
 - 3. No Change
 - 4. No Change
 - a. No Change
 - b. No Change
 - c. No Change
 - d. No Change
- C. No change
- D. Under A.R.S. § 39-121, the Commission or LEPC shall charge the person making a request under this Section the cost of reproducing the information requested. The Commission shall deposit the funds received under this subsection in accordance with ~~A.R.S. § 26-343(G)~~ A.R.S. §49-123(G).

ARTICLE 2. HAZARDOUS MATERIALS TRAINING PROGRAM, STUDENT AND INSTRUCTOR EVIDENCE OF COMPLETION

R18-18-201. Definitions

The following definitions apply in this Article, unless the context requires otherwise:

- 1. No change
- 2. No change
- 3. No change
- 4. No change
- 5. No change
- 6. No change

7. "Hazardous materials" means:

R18-18-202. Hazmat First Responder Awareness Level Course and Hazmat First Responder Operations Level Course Curriculum

- A. No change
- B. Topics covered in the Hazmat First Responder Awareness Level course are:
 1. What hazardous materials are and the risks associated with a hazardous materials incident;
 2. Potential outcomes associated with an emergency created when hazardous materials are present;
 3. How to recognize the presence of hazardous materials in an emergency;
 4. How to identify different hazardous materials; and
 5. Role of a first responder awareness individual in an employer's emergency response plan, including site security and control, and use of current resource materials.
 6. The ability to realize the need for additional resources and to make appropriate notifications to the communication center.
- C. No change
 1. No Change
 2. No Change
 3. No Change
 4. No Change
 5. No Change

R18-18-203. Instructor Authorization and Renewal

- A. Instructor authorization:
 1. An instructor authorized by the Division shall teach each Hazmat First Responder Awareness Level and Hazmat First Responder Operations Level course.
 2. To be authorized as an instructor, an individual shall submit the following to the Division:
 - a. A "Participant Application" form obtained from the Division, located at the Department of Emergency and Military Affairs, 5636 E. McDowell Road, Bldg. 101, Phoenix, Arizona 85008, available at <https://dema.az.gov/emergency-management/preparedness/training-branch/adjunct-instructor-resources>. The applicant shall provide the following information to take an instructor workshop:
 - i. Course number;

- ii. Course date;
 - iii. Course title;
 - iv. Applicant's name;
 - v. SSN;
 - vi. Applicant's employer;
 - vii. Applicant's position or title;
 - viii. Phone number;
 - ix. Fax number, if any;
 - x. Work mailing address, city, state, zip code, and county;
 - xi. Electronic mail address, if any;
 - xii. Brief description of current duties and how training as an instructor will be used;
 - xiii. Applicant's signature and date; and
 - xiv. Supervisor's signature, if applicable, and date;
- b. Evidence of two years' experience in hazardous materials incident response;
 - c. Evidence of Completion of at least 80 hours for Awareness Level or at least 240 hours for Operations Level of hazardous materials training, and a signed copy of attendance and performance records. Information regarding scheduling or attending trainings is available from the Department of Emergency and Military Affairs at <https://dema.az.gov/emergency-management/preparedness/training-branch/adjunct-instructor-resources>;
 - d. A letter of recommendation to take instructor training from the applicant's employer, local emergency planning committee chair, county emergency management director, or coordinator; and
 - e. A brief summary of the applicant's experience in hazardous materials response and as an instructor of adult-level courses.
- 3. After an applicant submits to the Division the documentation described in subsection (A)(2)(a), the applicant shall:
 - a. Attend the instructor workshop,
 - b. Attain a score of at least 90% on the written exam, and
 - c. Successfully complete a teach back to demonstrate appropriate educational methodology and instructional techniques during an oral presentation.
 - 4. The Division shall issue Evidence of Completion to an individual who successfully completes the instructor workshop.
 - 5. The Division shall maintain records of instructor authorization.
 - 6. Instructor authorization is valid for two calendar years.
- B.** No change
 - 1. No Change
 - 2. No Change
 - 3. No Change
 - C.** No change

R18-18-204. Hazmat First Responder Awareness Level Course and Hazmat First Responder Operations Level Course Division Requirements

- A.** An instructor authorized by the Division shall teach each Hazmat First Responder Awareness Level course and Hazmat First Responder Operations Level course. An instructor shall notify the Division at least 30 days before course delivery by submitting a "Course Request Form" obtained from the Division, located at the Department of Emergency and Military Affairs, 5636 E. McDowell Road, Bldg. 101, Phoenix, Arizona 85008, available at <https://dema.az.gov/resources/demaem-training-exercise-event-request-form>. The instructor shall provide the following information:
 - 1. Name of requestor;
 - 2. Date;
 - 3. Agency of requestor;
 - 4. Mailing address, city, state, zip code and county;

5. Phone number;
6. Fax number, if any;
7. Name of agency head;
8. Applicant signature;
9. Electronic mail address;
10. Type of course;
11. Course name;
12. Course number;
13. Date course is offered;
14. Training site address and county;
15. Intended audience;
16. Estimated number of participants;
17. Name and signature of requestor; and
18. County emergency management director or local emergency planning committee chairperson endorsement: name, signature, title, and date.

B. No change

R18-18-205. Hazmat First Responder Awareness Level Personnel and Hazmat First Responder Operations Level Operatives Evidence of Completion

A. No change

B. The Division shall issue Evidence of Completion to an individual who successfully completes the Hazmat First Responder Awareness Level course or the Hazmat First Responder Operations Level course. The employer of an individual issued Evidence of Completion shall maintain evidence of the individual's competency under ~~29 CFR 1910.120(q)(6)~~ 29 CFR 1910.120(q)(6) and ~~(q)(8)(ii)~~ (q)(8)(ii), published by the United States Government ~~Printing~~ Printing Office and revised July 1, ~~2001~~ 2023, available at <https://www.govinfo.gov/content/pkg/CFR-2023-title29-vol5/pdf/CFR-2023-title29-vol5-sec1910-120.pdf>, with no later editions or amendments. This regulation is incorporated by reference and on file with the Division and the Office of the Secretary of State.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

The table of contents on page one contains links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be recodified in the *Arizona Administrative Code* between the dates of July 1, 2021 through September 30, 2021

This is a new Chapter. See the table of contents on page 1 for a list of rules recodified (Supp. 21-3).

Questions about these rules? Contact:

Department: Department of Environmental Quality
Waste Program Division

Name: Mark Lewandowski
Telephone: (602) 771-2230
Fax: (602) 771-4272
Email: lewandowski.mark@azdeq.gov

This is a new Chapter.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2021 is cited as Supp. 21-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the Code in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note

to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing Chapters using these paper colors.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

Administrative Rules Division
The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

Authority: A.R.S. § 49-123(F) and (I)

Supp. 21-3

Editor's Note: Chapter 208 (H.B. 2274), 52 Legislature, 2015 First Regular Session, transferred the duties of the Arizona Emergency Response Commission to the Department of Environmental Quality. The rules in this Chapter were recodified from 8 A.A.C. 4 and 8 A.A.C. 2, Article 6, at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

CHAPTER TABLE OF CONTENTS

ARTICLE 1. EMERGENCY PLANNING AND COMMUNITY RIGHT TO KNOW

Article 1, consisting of Sections R18-18-101 through R18-18-110, recodified from R8-4-101 through R8-4-110, at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

ARTICLE 1. EMERGENCY PLANNING AND COMMUNITY RIGHT TO KNOW

R18-18-101. Definitions

- A. The definitions in A.R.S. § 26-341 apply to this Chapter.
- B. In this Article, unless specified otherwise:
1. "Emergency planning district" means an area that the Commission designates to facilitate preparing and implementing an emergency response plan.
 2. "EPA" means the United States Environmental Protection Agency.
 3. "EPCRA" means the Emergency Planning and Community Right-to-Know Act of 1986, commonly known as SARA Title III.
 4. "FD" means local fire department or the fire district with jurisdiction for a particular facility.
 5. "Hazardous substance" means a substance on the list that appears at 40 CFR 302.4.
 6. "LEPC" means "Committee," as prescribed at A.R.S. § 26-341(2).
 7. "MSDS" means material safety data sheet and has the same meaning as prescribed at 40 CFR 370.02.
 8. "NIMS" means National Incident Management System.
 9. "Reportable release" means a release that is not excluded under 40 CFR 355.40.
 10. "TPQ" means threshold planning quantity and has the same meaning as prescribed at 40 CFR 355.20.

Historical Note

New Section R18-18-101 recodified from R8-4-101 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-102. General Provisions

- A. The Commission shall make all forms referenced in this Chapter available on its internet site.
- B. The owner or operator of a facility that is required to submit information under this Article may submit the information electronically to the Commission and LEPC and to the FD if, as indicated on the Commission's web site, the FD has entered into an agreement with the Commission regarding electronic submission.
- C. When the chair of an LEPC forwards to the Commission an item requiring action by the Commission before its next meeting, the Executive Director of the Commission shall respond to the LEPC on behalf of the Commission until the Commission takes action at its next meeting.

Historical Note

New Section R18-18-102 recodified from R8-4-102 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-103. Responsibilities of an LEPC

- A. Members of an LEPC shall fulfill the responsibilities listed at 42 U.S.C. 11001(c), October 17, 1986, which is incorporated by reference, contains no future editions or amendments, and is available from the Commission and the U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250.
- B. In addition to the responsibilities under subsection (A), members of an LEPC shall:
1. Establish procedures for access to the Local Emergency Response Plan;
 2. Evaluate the resources needed to develop and implement the Local Emergency Response Plan and make recommendations to the County Board of Supervisors and the Commission regarding mechanisms to provide the resources needed;

3. Ensure that newly appointed LEPC members participate in training provided by the Commission regarding the responsibilities of LEPC members; and
4. Ensure that LEPC members are aware of and have the opportunity to attend Commission-sponsored meetings regarding matters related to emergency planning and preparedness.

Historical Note

New Section R18-18-103 recodified from R8-4-103 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-104. Emergency Planning and Preparedness

- A. If a facility is required to comply with 40 CFR 355.30, the owner or operator of the facility shall also comply with the emergency planning and preparedness requirements in this Section.
- B. If a facility is designated by the Commission under A.R.S. § 26-347(B), the owner or operator of the facility shall comply with the emergency planning and preparedness requirements in this Section and the reporting requirements of R18-18-107.
- C. No later than 60 days after a facility first becomes subject to the emergency planning and preparedness requirements of this Section, the owner or operator of the facility shall submit a facility emergency response plan according to A.R.S. § 26-347(D). The owner or operator of the facility may submit the facility emergency response plan by completing and submitting an Emergency Response Plan Questionnaire, which is available from the Commission.
- D. The owner or operator of a facility that submits an Emergency Response Plan Questionnaire under subsection (C) may also submit a Hazard Analysis Worksheet for each extremely hazardous substance at the facility that equals or exceeds the TPQ.
- E. On or before March 1 of each year, the owner or operator of a facility described in subsection (A) or (B) shall:
1. Review and determine whether the facility emergency response plan submitted under subsection (C) is still accurate and, if changes are needed to ensure that the facility emergency response plan is accurate, submit information regarding the relevant changes. If information regarding relevant changes to the facility emergency response plan is submitted, the owner or operator of the facility may revise and submit the Hazard Analysis Worksheet previously submitted under subsection (D); and
 2. Comply with R18-18-107(C).

Historical Note

New Section R18-18-104 recodified from R8-4-104 with amendments to Chapter Section and subsection references at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-105. Local Emergency Response Plan

- A. Within 12 months after the Commission designates a new emergency planning district and appoints members of an LEPC for the newly designated emergency planning district, the LEPC shall prepare an emergency response plan that complies with the requirements at A.R.S. § 26-345(E) and complies with NIMS.
- B. On or before December 31 of each year and when there are changed circumstances in the community or at a facility, an LEPC shall review and update the emergency response plan for its emergency planning district.
- C. An LEPC shall submit a copy of the emergency response plan prepared under subsection (A) or (B) to the Commission.

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

- D.** Within 60 days after the Commission receives a copy of an emergency response plan under subsection (C), the Commission staff shall:
- Review the emergency response plan and make recommendations for revisions necessary to ensure that the emergency response plan complies with law and coordinates with the emergency response plans of adjoining emergency planning districts; and
 - Return the emergency response plan and recommendations to the LEPC.
- E.** An LEPC shall ensure that the emergency response plan prepared under subsection (B) and reviewed and amended under subsection (D) is incorporated into the county's emergency operations plan in accordance with county procedures.
- F.** At least biennially and after providing at least 30 days notice to the Commission, an LEPC shall conduct an exercise of its emergency response plan.
- G.** On or before December 31 of each year, an LEPC shall survey its emergency planning district to determine how many copies of the U.S. Department of Transportation Emergency Response Guidebook are needed and forward the information regarding the number of copies needed to the Commission.
- 2.** Owners or operators of facilities meeting the following conditions are exempt from the reporting fee(s):
- Any business or other outlet that primarily reports or sells gasoline, diesel and other motor fuel only at retail to the public.
 - Any business or other outlet that only files a Tier II report to claim lead acid batteries.
 - Any business or other outlet that only files a Tier II report to claim diesel or gasoline.
 - Any business or other outlet that resides on tribal lands or a tribal Nation and must report to a Tribal Emergency Response Commission (TERC) or Chemical-Tribal Emergency Response Commission (C-TERC).
- C.** If a facility ceases to meet the minimum reporting thresholds of 40 CFR 370, Subpart B, for EHS and hazardous chemical reporting with regard to a specific EHS or hazardous chemical, the owner or operator of the facility may submit a notice to the Commission, LEPC, and FD indicating that the specific EHS or hazardous chemical is no longer present in a quantity that meets the minimum reporting threshold.

Historical Note

New Section R18-18-107 recodified from R8-4-107 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

Historical Note
New Section R18-18-105 recodified from R8-4-105 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-106. Reportable Release Notification

The owner or operator of a facility at which a reportable release occurs shall:

- Comply with the notification requirements of A.R.S. § 26-348(A);
- Submit the written follow-up emergency notice required under A.R.S. § 26-348(B); and
- Update the notice provided under subsection (2) as required under A.R.S. § 26-348(C).

Historical Note

New Section R18-18-106 recodified from R8-4-106 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-107. Extremely Hazardous Substance (EHS) or Hazardous Chemical Reporting

- A.** The owner or operator of a facility shall comply with the extremely hazardous substance and hazardous chemical reporting requirements of 40 CFR 370, Subpart B, July 1, 2007, which is incorporated by this reference, contains no later amendments or editions, and is available from the Commission and the U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250.
- B.** As required by A.R.S. § 26-350, an owner or operator described in subsection (A) shall submit a Tier Two Emergency and Hazardous Chemical Inventory Form, using a form available from the Commission, by March 1 of each year. All facilities subject to this reporting requirement shall be subject to the Tier II Emergency and Hazardous Chemical Inventory Reporting fee schedule:
- Each owner or operator of a facility required to file a hazardous chemical inventory report(s) (Tier II Reports) under the provisions of 42 U.S.C. § 11022 will be assessed a report filing fee of seventy-five dollars (\$75.00) for the first required facility report and an additional fee of twenty dollars (\$20.00) for each additional required facility report up to a maximum limit of five hundred dollars (\$500) per annual reporting period.
- A.** The Commission shall make information regarding the EPCRA available to the owner or operator of a facility.
- B.** The owner or operator of a facility may obtain guidance, but not legal advice, regarding complying with the EPCRA by contacting the Commission.

Historical Note

New Section R18-18-108 recodified from R8-4-108 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-108. Compliance Procedures

R18-18-109. Community Right-to-know Procedures

- A.** To obtain information regarding a specific hazardous chemical or extremely hazardous substance at a specific facility, local emergency response plan, or notice regarding a reportable release, a person shall submit a written request to the Commission or LEPC. If a request is submitted to an LEPC, the LEPC may forward a copy of the request to the Commission so Commission staff can coordinate a response to the request. To obtain a copy of a Form R relating to toxic chemical releases, a person shall submit a written request to the Commission.
- B.** As required by 42 U.S.C. 11022, the Commission or LEPC shall respond to a written request for information. The response shall advise the person making the request of one of the following:
- The time and location at which the person may inspect and copy the requested information,
 - That additional information is needed to process the request,
 - That the requested information is not available but the Commission or LEPC will ask the owner or operator of the facility to provide the information, or
 - That the request is denied because:
 - The requested information does not exist,
 - The owner or operator of the facility is not required to provide the information,
 - The Commission or LEPC determined that disclosing the information will impair its ability to protect public health or safety and the public interest in non-

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

disclosure outweighs the public interest in disclosure, or

- d. The information is exempt by law from disclosure.
- C. Before releasing information, the Commission or LEPC shall advise the owner or operator of a facility of the request for information regarding the facility.
- D. Under A.R.S. § 39-121, the Commission or LEPC shall charge the person making a request under this Section the cost of reproducing the information requested. The Commission shall deposit the funds received under this subsection in accordance with A.R.S. § 26-343(G).

Historical Note

New Section R18-18-109 recodified from R8-4-109 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-110. Grants

- A. On or before September 1 of each year, the Commission shall provide notice that is consistent with A.R.S. § 41-2702 to all LEPCs regarding grants that are available from the Commission.
- B. To receive funds that are awarded on a non-competitive basis, an LEPC shall submit a "Certification and Request for Funding" form in which the LEPC certifies that it:
1. Is in compliance with all applicable law, including NIMS;
 2. Will use the funds in the manner intended;
 3. Will keep separate funds from the Emergency Response Fund and funds from other sources; and
 4. Will submit all required reports.
- C. To receive grant funds that are awarded on a competitive basis, an LEPC shall submit to the Commission a proposal that specifies:
1. The goal that the LEPC intends to accomplish with any grant funds received,
 2. Where the grant funds will be spent,
 3. The amount of grant funds needed to accomplish the goal,
 4. The time needed to accomplish the goal, and
 5. Other information that the Commission requests to assist the Commission to evaluate the grant proposal.
- D. On behalf of the Commission, Commission staff shall meet at least annually with members of the LEPCs to establish the criteria used to evaluate a grant proposal. Commission staff, on behalf of the Commission, shall evaluate each proposal that is timely received using the criteria established. The Commission shall ensure that the criteria used include consideration of both the qualification of and need for an LEPC to receive a grant.
1. The criteria regarding qualification of an LEPC to receive a grant may include:
 - a. The extent to which the LEPC fulfilled the responsibilities listed in R18-18-103;
 - b. Whether the LEPC complied with all provisions of R18-18-104;
 - c. Whether the LEPC submitted all reports required for grant funds previously received;
 - d. Whether previously received grant funds were used in a manner that achieved the goal established;
 - e. Attendance by LEPC members at Commission-sponsored meetings; and
 - f. The number of training sessions provided by LEPC members to emergency responders in the emergency planning district; and
 2. The criteria regarding need for an LEPC to receive a grant may include:

- a. The number of facilities required to report to the LEPC under this Chapter;
 - b. The population represented by the LEPC; and
 - c. The number of reportable releases during the past year in the area represented by the LEPC.
- E. Within 60 days after the grant-proposal deadline specified in the notice of grant availability, the Commission shall provide written notice to each LEPC that applies for grant funds regarding whether grant funds will be awarded and if so, the amount awarded.
- F. An LEPC that receives grant funds shall submit progress reports to the Commission on dates prescribed by the Commission. The LEPC shall include in each progress report a summary of the work done to accomplish the goal stated in the grant proposal and a detailed accounting of the expended and remaining grant funds.

Historical Note

New Section R18-18-110 recodified from R8-4-110 with amendments to Chapter Section references at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

ARTICLE 2. HAZARDOUS MATERIALS TRAINING PROGRAM, STUDENT AND INSTRUCTOR EVIDENCE OF COMPLETION

R18-18-201. Definitions

The following definitions apply in this Article, unless the context requires otherwise:

1. "Authorized instructor" means an individual who the Division determines meets the criteria at R18-18-202.
2. "Director" means the director of the Division.
3. "Division" means the Arizona Division of Emergency Management.
4. "Evidence of Completion" means a document issued by the Division to an individual who successfully completes a standardized course of instruction.
5. "Hazmat First Responder Awareness Level personnel" means individuals who are likely to witness or discover a hazardous material release and who are trained to initiate an emergency response sequence by notifying the proper authorities of the release.
6. "Hazmat First Responder Operations Level operatives" means individuals who are trained to respond in a defensive fashion without actually trying to stop a hazardous material release.
7. "Hazardous materials" means:
 - a. Any material designated under the hazardous materials transportation act of 1974 (49 U.S.C. 1801);
 - b. Any element, compound, mixture, solution, or substance designated under the comprehensive environmental response, compensation, and liability act of 1980 (42 U.S.C. 9602);
 - c. Any substance designated in the emergency planning and community right-to-know act of 1986 (42 U.S.C. 11002);
 - d. Any substance designated in the water pollution control act (33 U.S.C. 1317(a) and 1321(b)(2)(A));
 - e. Any hazardous waste having the characteristics identified under or listed under A.R.S. § 49-922;
 - f. Any imminently hazardous chemical substance or mixture with respect to which action is taken under the toxic substances control act (15 U.S.C. 2606);
 - g. Any material or substance determined to be radioactive under the atomic energy act of 1954 (42 U.S.C. 2011);

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

- h. Any substance designated as a hazardous substance under A.R.S. § 49-201; and
- i. Any highly hazardous chemical or regulated substance as listed in the clean air act of 1963 (42 U.S.C. 7401-7671).
- 8. "Hazardous materials incident" means an uncontrolled, unpermitted release or potential release of hazardous materials that presents an imminent and substantial danger to the public health or welfare or to the environment.
- 9. "Hazardous materials response experience" means knowledge and skills gained by responding to hazardous materials incidents.
- 10. "Instructor requirements" means the criteria listed at R18-18-202 for authorization as an instructor by the Division.
- 11. "Release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, but excludes:
 - a. Release that results in exposure to persons solely within a workplace, with respect to a claim that the persons may assert against their employer;
 - b. Emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine;
 - c. Release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954, if the release is subject to financial protection requirements established by the Nuclear Regulatory Commission under section 170 of the Act, or for the purposes of section 104 of the Comprehensive Environmental Response, Compensation, and Liability Act or any other response action, any release of source, byproduct, or special nuclear material from any processing site designated under section 102(a)(1) or 302(a) of the Uranium Mill Tailings Radiation Control Act of 1978; and
 - d. Normal application of fertilizer.
- C. Topics covered in the Hazmat First Responder Operations Level course are:
 - 1. Basic hazard and risk assessment techniques;
 - 2. How to select and use proper protective equipment;
 - 3. Basic hazardous materials terms;
 - 4. How to perform basic control, containment, or confinement operations with the resources and personal protective equipment available;
 - 5. How to implement basic decontaminating procedures; and
 - 6. Standard operating and terminating procedures.

Historical Note

New Section R18-18-202 recodified from R8-2-602 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-203. Instructor Authorization and Renewal

- A. Instructor authorization:
 - 1. An instructor authorized by the Division shall teach each Hazmat First Responder Awareness Level and Hazmat First Responder Operations Level course.
 - 2. To be authorized as an instructor, an individual shall submit the following to the Division:
 - a. A "Participant Application" form obtained from the Division, located at the Department of Emergency and Military Affairs, 5636 E. McDowell Road, Bldg. 101, Phoenix, Arizona 85008. The applicant shall provide the following information to take an instructor workshop:
 - i. Course number;
 - ii. Course date;
 - iii. Course title;
 - iv. Applicant's name;
 - v. SSN;
 - vi. Applicant's employer;
 - vii. Applicant's position or title;
 - viii. Phone number;
 - ix. Fax number, if any;
 - x. Work mailing address, city, state, zip code, and county;
 - xi. Electronic mail address, if any;
 - xii. Brief description of current duties and how training as an instructor will be used;
 - xiii. Applicant's signature and date; and
 - xiv. Supervisor's signature, if applicable, and date;
 - b. Evidence of two years' experience in hazardous materials incident response;
 - c. Evidence of Completion of at least 80 hours for Awareness Level or at least 240 hours for Operations Level of hazardous materials training, and a signed copy of attendance and performance records;
 - d. A letter of recommendation to take instructor training from the applicant's employer, local emergency planning committee chair, county emergency management director, or coordinator; and
 - e. A brief summary of the applicant's experience in hazardous materials response and as an instructor of adult-level courses.
 - 3. After an applicant submits to the Division the documentation described in subsection (A)(2)(a), the applicant shall:
 - a. Attend the instructor workshop,
 - b. Attain a score of at least 90% on the written exam, and

Historical Note

New Section R18-18-201 recodified from R8-2-601 with amendments to Chapter Section references at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-202. Hazmat First Responder Awareness Level Course and Hazmat First Responder Operations Level Course Curriculum

- A. An authorized instructor shall conduct a Hazmat First Responder Awareness Level course or a Hazmat First Responder Operations Level course in accordance with the standardized curriculum maintained by the Division. The Division shall promptly notify all authorized instructors of any change in the curriculum.
- B. Topics covered in the Hazmat First Responder Awareness Level course are:
 - 1. What hazardous materials are and the risks associated with a hazardous materials incident;
 - 2. Potential outcomes associated with an emergency created when hazardous materials are present;
 - 3. How to recognize the presence of hazardous materials in an emergency;
 - 4. How to identify different hazardous materials; and
 - 5. Role of a first responder awareness individual in an employer's emergency response plan, including site security and control, and use of current resource materials.

CHAPTER 18. DEPARTMENT OF ENVIRONMENTAL QUALITY - EMERGENCY PLANNING AND HAZARDOUS MATERIALS TRAINING

- c. Successfully complete a teach back to demonstrate appropriate educational methodology and instructional techniques during an oral presentation.
- 4. The Division shall issue Evidence of Completion to an individual who successfully completes the instructor workshop.
- 5. The Division shall maintain records of instructor authorization.
- 6. Instructor authorization is valid for two calendar years.
- B. To renew instructor authorization obtained from the Division, an authorized instructor shall:
 - 1. Submit a "Participant Application" form as described in subsection (A) to take an instructor refresher workshop;
 - 2. Attend an instructor refresher workshop sponsored by the Division before expiration of the current instructor authorization; and
 - 3. Provide evidence of having taught either a Hazmat First Responder Awareness Level course or refresher, or a Hazmat First Responder Operations Level course or refresher, two times in the current authorization period.
- C. An instructor who fails to comply with subsection (B), may obtain instructor authorization by applying and meeting the requirements as a new instructor under subsection (A).

Historical Note

New Section R18-18-203 recodified from R8-2-603 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-204. Hazmat First Responder Awareness Level Course and Hazmat First Responder Operations Level Course Division Requirements

- A. An instructor authorized by the Division shall teach each Hazmat First Responder Awareness Level course and Hazmat First Responder Operations Level course. An instructor shall notify the Division at least 30 days before course delivery by submitting a "Course Request Form" obtained from the Division, located at the Department of Emergency and Military Affairs, 5636 E. McDowell Road, Bldg. 101, Phoenix, Arizona 85008. The instructor shall provide the following information:
 - 1. Name of requestor;
 - 2. Date;
 - 3. Agency of requestor;
 - 4. Mailing address, city, state, zip code and county;
 - 5. Phone number;
 - 6. Fax number, if any;
 - 7. Name of agency head;
 - 8. Applicant signature;
 - 9. Electronic mail address;
 - 10. Type of course;
 - 11. Course name;
 - 12. Course number;
 - 13. Date course is offered;
 - 14. Training site address and county;
 - 15. Intended audience;
 - 16. Estimated number of participants;
 - 17. Name and signature of requestor; and
 - 18. County emergency management director or local emergency planning committee chairperson endorsement: name, signature, title, and date.

- B. Within two weeks following completion of either the Hazmat First Responder Awareness Level course or refresher, or the Hazmat First Responder Operations Level course or refresher, the instructor shall provide the Division with all course records, including student application forms, course roster, completed pre- and post-exam answer sheets, and instructor and course evaluations. In addition, the instructor shall return all unused course materials to the Division.

Historical Note

New Section R18-18-204 recodified from R8-2-604 at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

R18-18-205. Hazmat First Responder Awareness Level Personnel and Hazmat First Responder Operations Level Operatives Evidence of Completion

- A. To receive Evidence of Completion as Hazmat First Responder Awareness Level personnel or as Hazmat First Responder Operations Level operative, an individual shall:
 - 1. Submit a "Participant Application" form as described in R18-18-203(A) for Division-sponsored courses. For non-Division-sponsored courses, the individual shall submit the course application contained in the student manual:
 - a. Course number: U100 (First Responder Awareness Course) or U200 (First Responder Operations Level Course);
 - b. Course date;
 - c. Course name: First Responder Awareness Course or First Responder Operations Level Course;
 - d. Applicant's name;
 - e. SSN;
 - f. Title;
 - g. Phone number;
 - h. Fax number, if any;
 - i. Organization;
 - j. Electronic address; and
 - k. Work mailing address, city, state, zip and county; and
 - 2. Successfully complete the Hazmat First Responder Awareness Level course, or the Hazmat First Responder Operations Level course, and attain a score of at least 75% on the written exam.
- B. The Division shall issue Evidence of Completion to an individual who successfully completes the Hazmat First Responder Awareness Level course or the Hazmat First Responder Operations Level course. The employer of an individual issued Evidence of Completion shall maintain evidence of the individual's competency under 29 CFR 1910.120(Q)(6) and (Q)(8)(ii), published by the United States Government Printing Office and revised July 1, 2001, with no later editions or amendments. This regulation is incorporated by reference and on file with the Division and the Office of the Secretary of State.

Historical Note

New Section R18-18-205 recodified from R8-2-605 with amendments to a Chapter Section and subsection reference at 27 A.A.R. 1535, with an immediate effective date of September 1, 2021 (Supp. 21-3).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.
2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.
3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.
2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-123. Hazardous materials emergency management program; Arizona emergency response commission; emergency planning and community right-to-know

A. The department is designated the lead agency for developing and implementing a state hazardous materials emergency management program.

B. The director shall appoint a coordinator to work in consultation with the Arizona emergency response commission in the development and implementation of the hazardous materials emergency management program.

C. The Arizona emergency response commission is established consisting of representatives from the following agencies and departments:

1. The division of emergency management.
2. The department of health services.
3. The department of public safety.
4. The department of transportation.
5. The Arizona department of agriculture.
6. The corporation commission.
7. The industrial commission of Arizona.
8. The office of the state fire marshal in the Arizona department of forestry and fire management.
9. The office of state mine inspector.
10. Two representatives nominated by the Arizona fire chiefs association or its successor organization, one of whom represents a fire department or a fire district serving a population of less than two hundred fifty thousand persons.
11. Other agencies or offices deemed necessary by the director.

D. This article does not change or alter the existing regulatory authority or provisions of law relating to the agencies and departments listed in subsection C of this section.

E. The department is designated as the lead agency for implementing title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499). The director shall administer any monies received under subsection G of this section.

F. The department shall administer this article and the rules adopted under this article. The department shall administer title III in this state and may conduct whatever activities are necessary to implement this article and title III in this state. The department is granted all the authority and responsibilities of a state emergency response commission for purposes of title III.

G. The department may procure by contract the temporary or intermittent services of experts or consultants if such services are to be performed on a part-time or fee-for-services basis and do not involve the performance of administrative duties. The department may also enter into agreements with the federal government, Indian tribes, other states and political subdivisions of this state for the purposes of this article. The department may also accept on behalf of this state any reimbursement, grant or gift that may become available for purposes of this article. The department shall deposit, pursuant to sections 35-146 and 35-147, any such monies in the emergency response fund.

H. The department shall establish a program of financial grants to local governments funded through the department by appropriations to the emergency response fund. The grants shall be dedicated to and used for local compliance with this article. The department shall include procedures for applying for the grants and qualifying criteria for awarding the grants.

I. The department shall adopt and may modify, suspend or repeal rules pursuant to title 41, chapter 6. The rules may not be more stringent than title III and the federal regulations adopted under title III, except as specifically authorized in this article. These rules shall implement this article and title III in this state. The authority to adopt rules includes establishing:

1. Procedures for handling public information requests.
2. Procedures and implementing programs for chemical emergency planning and preparedness.
3. Community right-to-know program reporting requirements.
4. Fees to implement the community right-to-know program. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the emergency response fund established by section 49-132. The governor's regulatory review council must approve rules adopted pursuant to this paragraph.
5. Release reporting requirements.

J. The department shall ensure that mandatory hazardous materials training programs for on-scene command personnel that are developed, delivered or managed by their respective agencies, departments or divisions address notification procedures, coordination of services and comprehensive management for protection of the public health during and after a chemical or other toxic fire event. The training shall include notification and coordination with the department of public safety, the department of transportation, the commission, local emergency planning committees, the department of health services, the division of emergency management, the national response center and the Arizona poison control system. Training shall also include orientation on the state emergency response and recovery plan concerning hazardous materials. The department shall encourage private companies that deliver similar training in this state to include the same curriculum in their programs.

COMMUNITY RIGHT-TO-KNOW**

**SUBCHAPTER I—EMERGENCY PLANNING AND
NOTIFICATION**

- Sec.
11001. Establishment of State commissions, planning districts, and local committees.
11002. Substances and facilities covered and notification.
11003. Comprehensive emergency response plans.
11004. Emergency notification.
11005. Emergency training and review of emergency systems.

SUBCHAPTER II—REPORTING REQUIREMENTS

11021. Material safety data sheets.
11022. Emergency and hazardous chemical inventory forms.
11023. Toxic chemical release forms.

SUBCHAPTER III—GENERAL PROVISIONS

11041. Relationship to other law.
11042. Trade secrets.
11043. Provision of information to health professionals, doctors, and nurses.
11044. Public availability of plans, data sheets, forms, and followup notices.
11045. Enforcement.
11046. Civil actions.
11047. Exemption.
11048. Regulations.
11049. Definitions.
11050. Authorization of appropriations.

**SUBCHAPTER I—EMERGENCY PLANNING
AND NOTIFICATION**

**§ 11001. Establishment of State commissions,
planning districts, and local committees**

**(a) Establishment of State emergency response
commissions**

Not later than six months after October 17, 1986, the Governor of each State shall appoint a State emergency response commission. The Governor may designate as the State emergency response commission one or more existing emergency response organizations that are State-sponsored or appointed. The Governor shall, to the extent practicable, appoint persons to the State emergency response commission who have technical expertise in the emergency response field. The State emergency response commission shall appoint local emergency planning committees under subsection (c) and shall supervise and coordinate the activities of such committees. The State emergency response commission shall establish procedures for receiving and processing requests from the public for information under section 11044 of this title, including tier II information under section 11022 of this title. Such procedures shall include the designation of an official to serve as coordinator for information. If the Governor of any State does not designate a State emergency response commission within such period, the Governor shall operate as the State emergency response commission until the Governor makes such designation.

**(b) Establishment of emergency planning
districts**

Not later than nine months after October 17, 1986, the State emergency response commission shall designate emergency planning districts in

order to facilitate preparation and implementation of emergency plans. Where appropriate, the State emergency response commission may designate existing political subdivisions or multi-jurisdictional planning organizations as such districts. In emergency planning areas that involve more than one State, the State emergency response commissions of all potentially affected States may designate emergency planning districts and local emergency planning committees by agreement. In making such designation, the State emergency response commission shall indicate which facilities subject to the requirements of this subchapter are within such emergency planning district.

**(c) Establishment of local emergency planning
committees**

Not later than 30 days after designation of emergency planning districts or 10 months after October 17, 1986, whichever is earlier, the State emergency response commission shall appoint members of a local emergency planning committee for each emergency planning district. Each committee shall include, at a minimum, representatives from each of the following groups or organizations: elected State and local officials; law enforcement, civil defense, firefighting, first aid, health, local environmental, hospital, and transportation personnel; broadcast and print media; community groups; and owners and operators of facilities subject to the requirements of this subchapter. Such committee shall appoint a chairperson and shall establish rules by which the committee shall function. Such rules shall include provisions for public notification of committee activities, public meetings to discuss the emergency plan, public comments, response to such comments by the committee, and distribution of the emergency plan. The local emergency planning committee shall establish procedures for receiving and processing requests from the public for information under section 11044 of this title, including tier II information under section 11022 of this title. Such procedures shall include the designation of an official to serve as coordinator for information.

(d) Revisions

A State emergency response commission may revise its designations and appointments under subsections (b) and (c) as it deems appropriate. Interested persons may petition the State emergency response commission to modify the membership of a local emergency planning committee.

(Pub. L. 99-499, title III, §301, Oct. 17, 1986, 100 Stat. 1729.)

Statutory Notes and Related Subsidiaries

EFFECTIVE DATE

Chapter effective Oct. 17, 1986, see section 4 of Pub. L. 99-499, set out as an Effective Date of 1986 Amendment note under section 9601 of this title.

SHORT TITLE

Pub. L. 99-499, title III, §300(a), Oct. 17, 1986, 100 Stat. 1728, provided that: "This title [enacting this chapter] may be cited as the 'Emergency Planning and Community Right-To-Know Act of 1986'."

Executive Documents

EXECUTIVE ORDER NO. 12856

Ex. Ord. No. 12856, Aug. 3, 1993, 58 F.R. 41981, which provided for Federal compliance with right-to-know laws and pollution prevention requirements, was revoked by Ex. Ord. No. 13148, §901, Apr. 21, 2000, 65 F.R. 24604, formerly set out as a note under section 4321 of this title.

§ 11002. Substances and facilities covered and notification**(a) Substances covered****(1) In general**

A substance is subject to the requirements of this subchapter if the substance is on the list published under paragraph (2).

(2) List of extremely hazardous substances

Within 30 days after October 17, 1986, the Administrator shall publish a list of extremely hazardous substances. The list shall be the same as the list of substances published in November 1985 by the Administrator in Appendix A of the "Chemical Emergency Preparedness Program Interim Guidance".

(3) Thresholds

(A) At the time the list referred to in paragraph (2) is published the Administrator shall—

(i) publish an interim final regulation establishing a threshold planning quantity for each substance on the list, taking into account the criteria described in paragraph (4), and

(ii) initiate a rulemaking in order to publish final regulations establishing a threshold planning quantity for each substance on the list.

(B) The threshold planning quantities may, at the Administrator's discretion, be based on classes of chemicals or categories of facilities.

(C) If the Administrator fails to publish an interim final regulation establishing a threshold planning quantity for a substance within 30 days after October 17, 1986, the threshold planning quantity for the substance shall be 2 pounds until such time as the Administrator publishes regulations establishing a threshold for the substance.

(4) Revisions

The Administrator may revise the list and thresholds under paragraphs (2) and (3) from time to time. Any revisions to the list shall take into account the toxicity, reactivity, volatility, dispersability, combustability, or flammability of a substance. For purposes of the preceding sentence, the term "toxicity" shall include any short- or long-term health effect which may result from a short-term exposure to the substance.

(b) Facilities covered

(1) Except as provided in section 11004 of this title, a facility is subject to the requirements of this subchapter if a substance on the list referred to in subsection (a) is present at the facility in an amount in excess of the threshold planning quantity established for such substance.

(2) For purposes of emergency planning, a Governor or a State emergency response commis-

sion may designate additional facilities which shall be subject to the requirements of this subchapter, if such designation is made after public notice and opportunity for comment. The Governor or State emergency response commission shall notify the facility concerned of any facility designation under this paragraph.

(c) Emergency planning notification

Not later than seven months after October 17, 1986, the owner or operator of each facility subject to the requirements of this subchapter by reason of subsection (b)(1) shall notify the State emergency response commission for the State in which such facility is located that such facility is subject to the requirements of this subchapter. Thereafter, if a substance on the list of extremely hazardous substances referred to in subsection (a) first becomes present at such facility in excess of the threshold planning quantity established for such substance, or if there is a revision of such list and the facility has present a substance on the revised list in excess of the threshold planning quantity established for such substance, the owner or operator of the facility shall notify the State emergency response commission and the local emergency planning committee within 60 days after such acquisition or revision that such facility is subject to the requirements of this subchapter.

(d) Notification of Administrator

The State emergency response commission shall notify the Administrator of facilities subject to the requirements of this subchapter by notifying the Administrator of—

(1) each notification received from a facility under subsection (c), and

(2) each facility designated by the Governor or State emergency response commission under subsection (b)(2).

(Pub. L. 99-499, title III, §302, Oct. 17, 1986, 100 Stat. 1730.)

§ 11003. Comprehensive emergency response plans**(a) Plan required**

Each local emergency planning committee shall complete preparation of an emergency plan in accordance with this section not later than two years after October 17, 1986. The committee shall review such plan once a year, or more frequently as changed circumstances in the community or at any facility may require.

(b) Resources

Each local emergency planning committee shall evaluate the need for resources necessary to develop, implement, and exercise the emergency plan, and shall make recommendations with respect to additional resources that may be required and the means for providing such additional resources.

(c) Plan provisions

Each emergency plan shall include (but is not limited to) each of the following:

(1) Identification of facilities subject to the requirements of this subchapter that are within the emergency planning district, identification of routes likely to be used for the trans-

Environmental Protection Agency

§ 370.1

- b. The calculated TPQ changed after technical review as described in a technical support document for the final rule, April 22, 1987.
- c. Chemicals added by final rule, April 22, 1987.
- d. Revised TPQ based on new or re-evaluated toxicity data, April 22, 1987.
- e. The TPQ was revised due to calculation error, April 22, 1987.
- f. Chemicals on the original list that do not meet toxicity criteria but because of their acute lethality, high production volume and known risk are considered chemicals of concern ("Other chemicals"). (November 17, 1986, and February 15, 1990.)
- g. The TPQ was recalculated (September 8, 2003) since it was mistakenly calculated in the April 22, 1987, final rule under the wrong assumption that this chemical is a reactive solid, when in fact it is a liquid. RQ for this chemical was adjusted on September 11, 2006.

PART 370—HAZARDOUS CHEMICAL REPORTING: COMMUNITY RIGHT-TO-KNOW

Subpart A—General Information

Sec.

- 370.1 What is the purpose of this part?
- 370.2 Who do "you," "I," and "your" refer to in this part?
- 370.3 Which section contains the definitions of the key words used in this part?

Subpart B—Who Must Comply

- 370.10 Who must comply with the hazardous chemical reporting requirements of this part?
- 370.11 [Reserved]
- 370.12 What hazardous chemicals must I report under this part?
- 370.13 What substances are exempt from these reporting requirements?
- 370.14 How do I report mixtures containing hazardous chemicals?

Subpart C—Reporting Requirements

- 370.20 What are the reporting requirements of this part?

HOW TO COMPLY WITH MSDS REPORTING

- 370.30 What information must I provide and what format must I use?
- 370.31 Do I have to update the information?
- 370.32 To whom must I submit the information?
- 370.33 When must I submit the information?

HOW TO COMPLY WITH INVENTORY REPORTING

- 370.40 What information must I provide and what format must I use?
- 370.41 What is Tier I inventory information?
- 370.42 What is Tier II inventory information?
- 370.43 What codes are used to report Tier I and Tier II inventory information?
- 370.44 To whom must I submit the inventory information?
- 370.45 When must I submit the inventory information?

Subpart D—Community Access to Information

- 370.60 How does a person obtain MSDS information about a specific facility?
- 370.61 How does a person obtain inventory information about a specific facility?
- 370.62 What information may a State or local official request from a facility?
- 370.63 What responsibilities do the SERC and the LEPC have to make requested information available?
- 370.64 What information can I claim as trade secret or confidential?
- 370.65 Must I allow the local fire department to inspect my facility and must I provide specific location information about hazardous chemicals at my facility?
- 370.66 How are key words in this part defined?

AUTHORITY: Sections 302, 311, 312, 322, 324, 325, 327, 328, and 329 of the Emergency Planning and Community Right-To-Know Act of 1986 (EPCRA) (Pub. L. 99-499, 100 Stat. 1613, 42 U.S.C. 11002, 11021, 11022, 11042, 11044, 11045, 11047, 11048, and 11049).

SOURCE: 73 FR 65478, Nov. 3, 2008, unless otherwise noted.

Subpart A—General Information

§ 370.1 What is the purpose of this part?

(a) This part (40 CFR part 370) establishes reporting requirements for providing the public with important information on the hazardous chemicals in their communities. Reporting raises community awareness of chemical hazards and aids in the development of State and local emergency response plans. The reporting requirements established under this part consist of Material Safety Data Sheet (MSDS) reporting and inventory reporting.

(b) This part is written in a special format to make it easier to understand the regulatory requirements. Like other Environmental Protection Agency (EPA) regulations, this part establishes enforceable legal requirements. Information considered non-binding

§ 370.2

guidance under EPCRA is indicated in this regulation by the word “note” and a smaller typeface. Such notes are provided for information purposes only and are not considered legally binding under this part.

§ 370.2 Who do “you,” “I,” and “your” refer to in this part?

Throughout this part, “you,” “I,” and “your” refer to the owner or operator of a facility.

§ 370.3 Which section contains the definitions of the key words used in this part?

The definitions of key words used in this part are in § 370.66. It is important to read the definitions for key words because the definition explains the word’s specific meaning in the regulations in this part.

Subpart B—Who Must Comply

§ 370.10 Who must comply with the hazardous chemical reporting requirements of this part?

(a) You must comply with the reporting requirements of this part if the Occupational Safety and Health Administration’s (OSHA) Hazard Communication Standard (HCS) require your facility to prepare or have available a Material Safety Data Sheet (MSDS) for a hazardous chemical and if either of the following conditions is met:

(1) A hazardous chemical that is an Extremely Hazardous Substance (EHS) is present at your facility at any one time in an amount equal to or greater than 500 pounds (227 kg—approximately 55 gallons) or the Threshold Planning Quantity (TPQ), whichever is lower. EHSs and their TPQs are listed in Appendices A and B of 40 CFR part 355.

(2) A hazardous chemical that is not an EHS is present at your facility at any one time in an amount equal to or greater than the threshold level for that hazardous chemical. Threshold levels for such hazardous chemicals are:

(i) For any hazardous chemical that does not meet the criteria in paragraph (a)(2)(ii) or (iii) of this section, the threshold level is 10,000 pounds (or 4,540 kg).

40 CFR Ch. I (7–1–09 Edition)

(ii) For gasoline at a retail gas station (For purposes of this part, retail gas station means a retail facility engaged in selling gasoline and/or diesel fuel principally to the public, for motor vehicle use on land.), the threshold level is 75,000 gallons (approximately 283,900 liters) (all grades combined). This threshold is only applicable for gasoline that was in tank(s) entirely underground and was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the state UST program approved by the Agency under 40 CFR part 281.

(iii) For diesel fuel at a retail gas station (For purposes of this part, retail gas station means a retail facility engaged in selling gasoline and/or diesel fuel principally to the public, for motor vehicle use on land.), the threshold level is 100,000 gallons (approximately 378,500 liters) (all grades combined). This threshold is only applicable for diesel fuel that was in tank(s) entirely underground and was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the state UST program approved by the Agency under 40 CFR part 281.

(b) The threshold level for responding to the following requests is zero.

(1) If your LEPC requests that you submit an MSDS for a hazardous chemical for which you have not submitted an MSDS to your LEPC; or

(2) If your LEPC, SERC, or the fire department with jurisdiction over your facility requests that you submit Tier II information.

§ 370.11 [Reserved]

§ 370.12 What hazardous chemicals must I report under this part?

(a) You must report any hazardous chemical for which you are required to prepare or have available an MSDS under OSHA HCS that is present at your facility equal to or above the applicable threshold specified in § 370.10. (Specific exemptions from reporting are in § 370.13.)

Environmental Protection Agency

§ 370.14

(b) The EPA has not issued a list of hazardous chemicals subject to reporting under this part. A substance is a hazardous chemical if it is required to have an MSDS and meets the definition of hazardous chemical under the OSHA regulations found at 29 CFR 1910.1200(c).

§ 370.13 What substances are exempt from these reporting requirements?

You do not have to report substances for which you are not required to have an MSDS under the OSHA regulations, or that are excluded from the definition of hazardous chemical under EPCRA section 311(e). Each of the following substances are excluded under EPCRA section 311(e):

(a) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration.

(b) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use.

(c) Any substance to the extent it is used:

(1) For personal, family, or household purposes, or is present in the same

form and concentration as a product packaged for distribution and use by the general public. Present in the same form and concentration as a product packaged for distribution and use by the general public means a substance packaged in a similar manner and present in the same concentration as the substance when packaged for use by the general public, whether or not it is intended for distribution to the general public or used for the same purpose as when it is packaged for use by the general public;

(2) In a research laboratory or hospital or other medical facility under the direct supervision of a technically qualified individual; or

(3) In routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

§ 370.14 How do I report mixtures containing hazardous chemicals?

(a) For a mixture containing a hazardous chemical, use the following table to determine if a reporting threshold is equaled or exceeded, and to determine how to report:

| If your mixture contains a hazardous chemical | To determine if the threshold level for that hazardous chemical is equaled or exceeded you must | If the threshold level for that hazardous chemical is exceeded then you must |
|---|---|--|
| (1) That is an EHS | Determine the total quantity of the EHS present throughout your facility at any one time, by adding together the quantity present as a component in all mixtures and all other quantities of the EHS (you must include the quantity present in a mixture even if you are also counting the quantity of that particular mixture toward the threshold level for that mixture). | Report the EHS component—submit an MSDS for the EHS (or include the EHS on the list of chemicals submitted in lieu of the MSDSs), as provided under § 370.30, and submit Tier I (or Tier II) information for the EHS, as provided under § 370.40 or report the mixture itself—submit an MSDS for the mixture (or include the mixture on the list of chemicals submitted in lieu of the MSDSs), as provided under § 370.30, and submit Tier I (or Tier II) information for the mixture, as provided under § 370.40. If you report the mixture itself, then provide the total quantity of that mixture. |
| (2) That is not an EHS | Determine either: The total quantity of the hazardous chemical present throughout your facility at any one time by adding together the quantity present as a component in all mixtures and all other quantities of the hazardous chemical (you must include the quantity present in a mixture even if you are also applying that particular mixture as a whole toward the threshold level for that mixture) or the total quantity of that mixture present throughout your facility at any one time. | Report the non-EHS hazardous chemical component—submit an MSDS for the non-EHS hazardous chemical (or include the non-EHS on the list of chemicals submitted in lieu of the MSDSs), as provided under § 370.30, and submit Tier I (or Tier II) information for the non-EHS hazardous chemical as provided under § 370.40 or report the mixture itself—submit an MSDS for the mixture (or include the mixture on the list of chemicals submitted in lieu of MSDSs), as provided under § 370.30, and submit Tier I (or Tier II) information for the mixture, as provided under § 370.40. If you report the mixture itself, then provide the total quantity of that mixture. |

§ 370.20

(b) For each specific mixture, the reporting option used must be consistent for both MSDS and inventory reporting, unless it is not possible to do so. This means that if you report on a specific mixture as a whole for MSDS reporting, you must report on that mixture as a whole for inventory reporting too (unless it is not possible). MSDS reporting and inventory reporting are discussed in detail in subpart C of this part.

(c) To determine the quantity of an EHS or a non-EHS hazardous chemical component present in a mixture, multiply the concentration of the hazardous chemical component (in weight percent) by the weight of the mixture (in pounds). You do not have to count a hazardous chemical present in a mixture if the concentration is less than or equal to 1%, or less than or equal to 0.1% for a carcinogenic chemical.

Subpart C—Reporting Requirements

§ 370.20 What are the reporting requirements of this part?

The reporting requirements of this part consist of MSDS reporting and inventory reporting. If you are the owner or operator of a facility subject to the reporting requirements of this part then you must comply with both types of reporting requirements. MSDS reporting requirements are addressed in §§ 370.30 through 370.33. Inventory reporting requirements are addressed in §§ 370.40 through 370.45.

HOW TO COMPLY WITH MSDS REPORTING

§ 370.30 What information must I provide and what format must I use?

(a) You must report the hazardous chemicals present at your facility that meet or exceed the applicable threshold levels (threshold levels are in § 1A370.10) by either:

(1) Submitting an MSDS for each hazardous chemical present at your facility that meet or exceed its applicable threshold level; or

(2) Submitting a list of all hazardous chemicals present at your facility at or above the applicable threshold levels. The hazardous chemicals on your list must be grouped by Hazard Category as

40 CFR Ch. I (7–1–09 Edition)

defined under § 370.66. The list must contain the chemical or common name of each hazardous chemical as provided on the MSDS.

(b) Within 30 days of a request by the LEPC (as provided in § 370.10(b)), you must also submit an MSDS for any hazardous chemical present at your facility for which you have not submitted an MSDS.

§ 370.31 Do I have to update the information?

MSDS reporting stated in § 370.30 is a one-time requirement. However, you must update the information in all of the following ways:

(a) Submit a revised MSDS after you discover significant new information concerning a hazardous chemical for which an MSDS was submitted.

(b) Submit an MSDS, or a list as described in § 370.30(a), for any new hazardous chemical for which you become subject to these reporting requirements.

(c) Submit, as requested by the LEPC, an MSDS for any hazardous chemical present at your facility which you have not already submitted, as provided in § 370.30(b).

§ 370.32 To whom must I submit the information?

(a) You must submit an MSDS or list, as provided in § 370.30(a), to the LEPC, the SERC, and the fire department with jurisdiction over your facility.

(b) You must submit an MSDS requested by the LEPC, as provided in § 370.30(b), to the LEPC.

§ 370.33 When must I submit the information?

(a) You must submit an MSDS or a list, as provided in § 370.30(a), for a hazardous chemical subject to the reporting requirements of this part by October 17, 1987, or within 3 months after you first become subject to the reporting requirements of this part (as provided in §§ 370.30 and 370.31(b)).

(b) You must submit a revised MSDS, as provided in § 370.31(a), within 3 months after discovering significant new information about a hazardous chemical for which an MSDS was submitted.

(c) You must submit an MSDS requested by the LEPC, as provided in §§ 370.30(b) and 370.31(c), within 30 days of receiving the request.

HOW TO COMPLY WITH INVENTORY
REPORTING

§ 370.40 What information must I provide and what format must I use?

(a) If you are required to comply with the hazardous chemical reporting requirements of this part, then by March 1 every year you must submit inventory information regarding any hazardous chemical present at your facility at any time during the previous calendar year in an amount equal to or in excess of its threshold level. Threshold levels are provided in § 370.10.

(b) Tier I information is the minimum information that you must report to be in compliance with the inventory reporting requirements of this part as described in § 370.41. You may choose to report the Tier II information described in § 370.42 for any hazardous chemical at your facility. You must submit Tier II information to the SERC, LEPC, or fire department having jurisdiction over your facility if they request it. EPA publishes Tier I and Tier II Inventory Forms that provide uniform formats for reporting the Tier I and Tier II information. You may use a State or local format for reporting inventory information if the State or local format contains at least the Tier I information described in § 370.41. EPA's Tier I and Tier II forms are available at <http://www.epa.gov/emergencies>.

Note to paragraph (b):

Some States require Tier II information annually under State law.

(c) You should contact the SERC to determine that State's requirements for inventory reporting formats, procedures, and to obtain inventory forms.

§ 370.41 What is Tier I inventory information?

Tier I information provides State and local officials and the public with information on the general types and locations of hazardous chemicals present at your facility during the previous calendar year. The Tier I information is the minimum information that you

must provide to be in compliance with the inventory reporting requirements of this part. If you are reporting Tier I information, you must report aggregate information on hazardous chemicals by hazard categories. There are two health hazard categories and three physical hazard categories for purposes of reporting under this part. These five hazard categories are defined in 40 CFR 370.66. Tier I information includes all of the following:

(a) Certification. The owner or operator or the officially designated representative of the owner or operator must certify that all information included in the Tier I submission is true, accurate, and complete as follows: "I certify under penalty of law that I have personally examined and am familiar with the information and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete." This certification shall be accompanied by your full name, official title, signature, date signed, and total number of pages in the submission including all attachments. All other pages must also contain your signature or signature stamp, the date you signed the certification, and the total number of pages in the submission.

(b) The calendar year for the reporting period.

(c) The complete name (and company identifier where appropriate) and address of your facility. Include the full street address or state road, the city, county, State and zip code.

(d) The North American Industry Classification System (NAICS) code for your facility.

(e) The Dun & Bradstreet number of your facility.

(f) The owner's or operator's full name, mailing address, and phone number.

(g) Emergency contact. The name, title, and phone number(s) of at least one local individual or office that can act as a referral if emergency responders need assistance in responding to a chemical accident at your facility. You must provide an emergency phone number where such emergency information will be available 24 hours a day, every day.

§ 370.42

40 CFR Ch. I (7-1-09 Edition)

(h) An indication whether the information being reported is identical to that submitted the previous year.

(i) An estimate (in ranges) of the maximum amount of hazardous chemicals in each hazard category present at your facility at any time during the preceding calendar year. You must use codes that correspond to different ranges. The range codes are in §370.43.

(j) An estimate (in ranges) of the average daily amount of hazardous chemicals in each hazard category present at your facility during the preceding calendar year. You must use codes that correspond to different ranges. The range codes are in §370.43.

(k) The maximum number of days that any single hazardous chemical within each hazard category was present at your facility during the reporting period.

(l) The general location of hazardous chemicals in each hazard category within your facility. For each hazard type, list the locations of all applicable chemicals. As an alternative, you may choose to submit a site plan and list the site coordinates to indicate the locations of the chemicals.

§ 370.42 What is Tier II inventory information?

Tier II information provides State and local officials and the public with specific information on amounts and locations of hazardous chemicals present at your facility during the previous calendar year. If you are reporting Tier II information, you must include:

(a) Certification. The owner or operator or the officially designated representative of the owner or operator must certify that all information included in the Tier II submission is true, accurate, and complete as follows: "I certify under penalty of law that I have personally examined and am familiar with the information and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete." This certification must be accompanied by your full name, official title, original signature, date signed, and total number of pages in the submission including all Confidential and Non-Confiden-

tial Information Sheets and all attachments. All other pages must also contain your signature or signature stamp, the date you signed the certification, and the total number of pages in the submission.

(b) The calendar year for the reporting period.

(c) The complete name (and company identifier where appropriate) and address of your facility. Include the full street address or state road, the city, county, State and zip code.

(d) The North American Industry Classification System (NAICS) code for your facility.

(e) The Dun & Bradstreet number of your facility.

(f) The owner's or operator's full name, mailing address, and phone number.

(g) Emergency contact. The name, title, and phone number(s) of at least one local individual or office that can act as a referral if emergency responders need assistance in responding to a chemical accident at your facility. You must provide an emergency phone number where such emergency information will be available 24 hours a day, every day.

(h) An indication whether the information being reported is identical to that submitted the previous year.

(i) For each hazardous chemical that you are required to report, you must:

(1) Provide the chemical name or the common name of the chemical as provided on the Material Safety Data Sheet and its Chemical Abstract Service (CAS) registry number. If you are withholding the name in accordance with trade secret criteria, you must provide the generic class or category that is structurally descriptive of the chemical and indicate that the name is withheld because of trade secrecy. Trade secret criteria are addressed in §370.64(a).

(2) Indicate whether the chemical is: pure or mixture; solid, liquid, or gas; and whether the chemical is or contains an EHS.

(3) If the chemical is a mixture containing an EHS, provide the chemical name of each EHS in the mixture.

(4) Indicate which hazard categories apply to the chemical. The five hazard categories are defined in §370.66.

Environmental Protection Agency

§ 370.43

(5) Provide an estimate (in ranges) of the maximum amount of the hazardous chemical present at your facility on any single day during the preceding calendar year. You must use codes that correspond to different ranges. The range codes are in §370.43.

(6) Provide an estimate (in ranges) of the average daily amount of the hazardous chemical present at your facility during the preceding calendar year. You must use codes that correspond to different ranges. The range codes are in §370.43.

(7) The maximum number of days that the hazardous chemical was present at your facility during the preceding calendar year.

(8)(i) Provide a brief description of the precise location of the hazardous chemical at your facility. You may also attach one of the following with your Tier II inventory form.

(A) *A site plan* with site coordinates indicated for buildings, lots, areas, etc. throughout your facility.

(B) *A list of site coordinate abbreviations* that correspond to buildings, lots, areas, etc. throughout your facility.

(C) *A description of dikes and other safeguard measures* for storage locations throughout your facility.

(ii) Under EPCRA section 324, you may choose to withhold from disclosure to the public the location information for a specific chemical. If you choose to withhold the location infor-

mation from disclosure to the public, you must clearly indicate that the information is “confidential.” You must provide the confidential location information on a separate sheet from the other Tier II information (which will be disclosed to the public), and attach the Confidential Location Information Sheet to the other Tier II information. Indicate any attachments you are including.

(9) Provide a brief description of the manner of storage of the hazardous chemical, including container type, temperature and pressure for each location listed. You must use codes that correspond to different storage types and temperature and pressure conditions. The storage codes are in §370.43. If the specific location for which you are reporting storage conditions is a “confidential” location, then you must report the storage conditions on a separate Confidential Location Information Sheet.

[73 FR 65478, Nov. 3, 2008, as amended at 74 FR 13125, Mar. 26, 2009]

§ 370.43 What codes are used to report Tier I and Tier II inventory information?

(a) *Weight range codes.* Except as provided in paragraph (d) of this section, you must use the following codes to report the maximum amount and average daily amount when reporting Tier I or Tier II information:

| Range codes | Weight range in pounds | |
|-------------|------------------------|----------------------|
| | From | To |
| 01 | 0 | 99 |
| 02 | 100 | 999 |
| 03 | 1,000 | 9,999 |
| 04 | 10,000 | 99,999 |
| 05 | 100,000 | 999,999 |
| 06 | 1,000,000 | 9,999,999 |
| 07 | 10,000,000 | 49,999,999 |
| 08 | 50,000,000 | 99,999,999 |
| 09 | 100,000,000 | 499,999,999 |
| 10 | 500,000,000 | 999,999,999 |
| 11 | 1 billion | More than 1 billion. |

Note to paragraph (a): To convert gas or liquid volume to weight in pounds, multiply by an appropriate density factor.

(b) *Storage type codes.* Except as provided in paragraph (d) of this section, you must use the following codes to report storage types when you are reporting Tier II information:

| Codes | Types of storage |
|---------|-------------------------------|
| A | Above ground tank. |
| B | Below ground tank. |
| C | Tank inside building. |
| D | Steel drum. |
| E | Plastic or non-metallic drum. |
| F | Can. |

§ 370.44

| Codes | Types of storage |
|---------|--------------------------|
| G | Carboy. |
| H | Silo. |
| I | Fiber drum. |
| J | Bag. |
| K | Box. |
| L | Cylinder. |
| M | Glass bottles or jugs. |
| N | Plastic bottles or jugs. |
| O | Tote bin. |
| P | Tank wagon. |
| Q | Rail car. |
| R | Other. |

(c) *Storage condition codes.* Except as provided in paragraph (d) of this section, you must use the following codes to report storage conditions when you are reporting Tier II information:

| Codes | Storage conditions |
|-------------------------------|--|
| <i>Pressure conditions</i> | |
| 1 | Ambient pressure. |
| 2 | Greater than ambient pressure. |
| 3 | Less than ambient pressure. |
| <i>Temperature conditions</i> | |
| 4 | Ambient temperature. |
| 5 | Greater than ambient temperature. |
| 6 | Less than ambient temperature but not cryogenic. |
| 7 | Cryogenic conditions. |

(d) Your SERC or LEPC may provide other range codes for reporting maximum amounts and average daily amounts, or may require reporting of specific amounts. You may use your SERC's or LEPC's range codes (or specific amounts) provided the ranges are not broader than the ranges in paragraph (a) of this section. Your SERC or LEPC may also provide other codes for storage types or conditions. You may use those codes provided your SERC's or LEPC's storage types and conditions codes specify the same or more detailed information as the codes in paragraphs (b) and (c) of this section.

§ 370.44 To whom must I submit the inventory information?

You must submit the required inventory information to your SERC, LEPC, and fire department with jurisdiction over your facility.

§ 370.45 When must I submit the inventory information?

(a) You must submit the required inventory information on or before March 1 (beginning in 1988 or beginning

40 CFR Ch. I (7-1-09 Edition)

after your facility first becomes subject to this part), and on or before by March 1 of each year afterwards. Your submission must contain the required inventory information on hazardous chemicals present at your facility during the preceding calendar year at or above the threshold levels. Threshold levels are in § 370.10. The minimum required inventory information under EPCRA section 312 is Tier I information. Tier I information requirements are described in § 370.41.

(b) You must submit Tier II information within 30 days of the receipt of a request from the SERC, LEPC, or the fire department having jurisdiction over your facility, as provided in § 370.10(b). Tier II information requirements are described in § 370.42.

Subpart D—Community Access to Information

§ 370.60 How does a person obtain MSDS information about a specific facility?

Any person may obtain an MSDS for a specific facility by writing to the LEPC and asking for it.

(a) If the LEPC has the MSDS, it must provide it to the person making the request.

(b) If the LEPC does not have the MSDS, it must request the MSDS from the facility's owner or operator.

§ 370.61 How does a person obtain inventory information about a specific facility?

(a) Any person may request Tier II information for a specific facility by writing to the SERC or the LEPC and asking for such information.

(1) If the SERC or LEPC has the Tier II information, the SERC or LEPC must provide it to the person making the request.

(2) If the SERC or LEPC does not have the Tier II information, it must request it from the facility owner or operator in either of the following cases:

(i) The person making the request is a State or local official acting in his or her official capacity.

(ii) The request is for hazardous chemicals in amounts greater than 10,000 pounds stored at the facility at

Environmental Protection Agency

§ 370.65

any time during the previous calendar year.

(3) If the SERC or LEPC does not have the Tier II information, it may request it from the facility owner or operator when neither condition in paragraph (a)(2) of this section is met, but the person's request includes a general statement of need.

(b) A SERC or LEPC must respond to a request for Tier II information under this section within 45 days of receiving such a request.

§ 370.62 What information may a State or local official request from a facility?

The LEPC may ask a facility owner or operator to submit an MSDS for a hazardous chemical present at the facility. The SERC, LEPC, or fire department having jurisdiction over a facility may ask a facility owner or operator to submit Tier II information. The owner or operator must provide the MSDS (unless the owner or operator has already submitted an MSDS to the LEPC for that hazardous chemical) or Tier II information within 30 days of receipt of such request.

§ 370.63 What responsibilities do the SERC and the LEPC have to make request information available?

Under this subpart, the SERC or LEPC must make the following information (except for confidential location information discussed in § 370.64(b)) available if a person requests it:

(a) All information obtained from an owner or operator in response to a request under this subpart.

(b) Any requested Tier II information or MSDS otherwise in possession of the SERC or the LEPC.

§ 370.64 What information can I claim as trade secret or confidential?

(a) *Trade secrets.* You may be able to withhold the name of a specific chemical when submitting MSDS reporting or inventory reporting information if that chemical name is claimed as a trade secret. The requirements for withholding trade secret information are set forth in EPCRA section 322 and implemented in 40 CFR part 350. If you are withholding the name of a specific

chemical as a trade secret in accordance with trade secrecy requirements, you must report the generic class or category that is structurally descriptive of the chemical along with all other required information. You must also submit the withheld information to EPA and must adequately substantiate your claim. A Form for substantiating trade secret claims is available at the Agency Web site at <http://www.epa.gov/emergencies>.

(b) *Confidential location information.* You may request that the SERC or the LEPC not disclose to the public the location of any specific chemical required to be submitted in Tier II information. If you make such a request, the SERC or LEPC must not disclose the location of the specific chemical. If you use the Tier II Form to report your inventory information, you can choose to report confidential location information for a specific chemical on the Confidential Location Information Sheet, which must be attached to the other Tier II information you are reporting. Although you may request that location information with respect to a specific chemical be withheld from the public, you may not withhold this information from the SERC, the LEPC, or the local fire department. The Confidential Location Information Sheet is available on the Agency Web site at <http://www.epa.gov/emergencies>.

§ 370.65 Must I allow the local fire department to inspect my facility and must I provide specific location information about hazardous chemicals at my facility?

If you are the owner or operator of a facility that has submitted inventory information under this part, you must comply with the following two requirements upon request by the fire department with jurisdiction over your facility:

(a) You must allow the fire department to conduct an on-site inspection of your facility; and

(b) You must provide the fire department with information about the specific locations of hazardous chemicals at your facility.

§ 370.66 How are key words in this part defined?

Chief Executive Officer of the Tribe means the person who is recognized by the Bureau of Indian Affairs as the chief elected administrative officer of the Tribe.

Environment includes water, air, and land and the interrelationship that exists among and between water, air, and land and all living things.

EPCRA means the Emergency Planning and Community Right-To-Know Act of 1986.

Extremely hazardous substance (EHS) means a substance listed in Appendices A and B of 40 CFR part 355.

Facility means all buildings, equipment, structures, and other stationary items that are located on a single site or on contiguous or adjacent sites and that are owned or operated by the same person (or by any person that controls, is controlled by, or under common control with, such person).

Facility includes manmade structures, as well as all natural structures in which chemicals are purposefully placed or removed through human means such that it functions as a containment structure for human use.

Hazard category means any of the following:

(1) Immediate (acute) health hazard, including highly toxic, toxic, irritant, sensitizer, corrosive, (as defined under 29 CFR 1910.1200) and other hazardous chemicals that cause an adverse effect to a target organ and which effect usually occurs rapidly as a result of short-term exposure and is of short duration;

(2) Delayed (chronic) health hazard, including carcinogens (as defined under 29 CFR 1910.1200) and other hazardous chemicals that cause an adverse effect to a target organ and which effect generally occurs as a result of long-term exposure and is of long duration;

(3) Fire hazard, including flammable, combustible liquid, pyrophoric, and oxidizer (as defined under 29 CFR 1910.1200);

(4) Sudden release of pressure, including explosive and compressed gas (as defined under 29 CFR 1910.1200); and

(5) Reactive, including unstable reactive, organic peroxide, and water reactive (as defined under 29 CFR 1910.1200).

Hazardous chemical means any hazardous chemical as defined under 29 CFR 1910.1200(c), except that such term does not include:

(1) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration.

(2) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use.

(3) Any substance to the extent it is used:

(i) For personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public. Present in the same form and concentration as a product packaged for distribution and use by the general public means a substance packaged in a similar manner and present in the same concentration as the substance when packaged for use by the general public, whether or not it is intended for distribution to the general public or used for the same purpose as when it is packaged for use by the general public;

(ii) In a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual; or

(iii) In routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

Indian Country means Indian country as defined in 18 U.S.C. 1151 as:

(1) All land within the limits of any Indian reservation under the jurisdiction of the United States government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation;

(2) All dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a State; and

(3) All Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

Indian Tribe or Tribe means those Tribes federally recognized by the Secretary of the Interior.

Environmental Protection Agency

§ 372.1

Inventory form means the uniform Tier I and Tier II emergency and hazardous chemical inventory forms published by EPA. These forms can be used for reporting inventory information, as described in 40 CFR 370.40 through 370.45.

LEPC means the Local Emergency Planning Committee appointed by the State Emergency Response Commission.

Material Safety Data Sheet or MSDS means the sheet required to be developed under 29 CFR 1910.1200(g).

Mixture means mixture as defined under the Occupational Safety and Health Administration's Hazard Communication Standard in 29 CFR 1910.1200(c).

OSHA means the U.S. Occupational Safety and Health Administration.

Person means any individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or interstate body.

SERC means the State Emergency Response Commission for the State in which the facility is located except when the facility is located in Indian Country, in which case, SERC means the Emergency Response Commission for the Tribe under whose jurisdiction the facility is located. In the absence of a SERC for a State or an Indian Tribe, the Governor or the chief executive officer of the tribe, respectively, shall be the SERC. Where there is a cooperative agreement between a State and a Tribe, the SERC shall be the entity identified in the agreement.

State means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Northern Mariana Islands, any other territory or possession over which the United States has jurisdiction and Indian Country.

Threshold planning quantity (TPQ) means, for a substance listed in Appendices A and B of 40 CFR part 355, the quantity listed in the column "threshold planning quantity" for that substance.

PART 372—TOXIC CHEMICAL RELEASE REPORTING: COMMUNITY RIGHT-TO-KNOW

Subpart A—General Provisions

- Sec.
- 372.1 Scope and purpose.
 - 372.3 Definitions.
 - 372.5 Persons subject to this part.
 - 372.10 Recordkeeping.
 - 372.18 Compliance and enforcement.

Subpart B—Reporting Requirements

- 372.22 Covered facilities for toxic chemical release reporting.
- 372.23 SIC and NAICS codes to which this Part applies.
- 372.25 Thresholds for reporting.
- 372.27 Alternate threshold and certification.
- 372.28 Lower thresholds for chemicals of special concern.
- 372.30 Reporting requirements and schedule for reporting.
- 372.38 Exemptions.

Subpart C—Supplier Notification Requirements

- 372.45 Notification about toxic chemicals.

Subpart D—Specific Toxic Chemical Listings

- 372.65 Chemicals and chemical categories to which this part applies.

Subpart E—Forms and Instructions

- 372.85 Toxic chemical release reporting form and instructions.
- 372.95 Alternate threshold certification and instructions.

AUTHORITY: 42 U.S.C. 11023 and 11048.

SOURCE: 53 FR 4525, Feb. 16, 1988, unless otherwise noted.

Subpart A—General Provisions

§ 372.1 Scope and purpose.

This part sets forth requirements for the submission of information relating to the release of toxic chemicals under section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986. The information collected under this part is intended to inform the general public and the communities surrounding covered facilities about releases of toxic chemicals, to assist research, to aid in the development of regulations, guidelines, and

Environmental Protection Agency

§ 355.13

notification of chemical releases. This part also lists Extremely Hazardous Substances (EHSs) and Threshold Planning Quantities (TPQs) in Appendices A and B, which are used in determining if you are subject to these requirements.

(b) This part is written in a special format to make it easier to understand the regulatory requirements. Like other Environmental Protection Agency (EPA) regulations, this part establishes enforceable legal requirements. Information considered non-binding guidance under EPCRA is indicated in this regulation by the word “note” and a smaller typeface. Such notes are provided for information purposes only and are not considered legally binding under this part.

§ 355.2 Who do “you,” “I,” and “your” refer to in this part?

Throughout this part, “you,” “I,” and “your” refer to the owner or operator of a facility.

§ 355.3 Which section contains the definitions of the key words used in this part?

The definitions of key words used in this part are in § 355.61. It is important to read the definitions for these key words because the definition explains the word’s specific meaning associated with the regulations in this part.

Subpart B—Emergency Planning

WHO MUST COMPLY

§ 355.10 Must my facility comply with the emergency planning requirements of this subpart?

You must comply with the emergency planning requirements in this subpart if your facility meets either of the following two conditions:

(a) Any extremely hazardous substance (EHS) is present at your facility in an amount equal to or greater than its threshold planning quantity (TPQ), or

(b) Your facility has been designated for emergency planning purposes, after public notice and opportunity for comment, by one of the following three entities:

(1) The State Emergency Response Commission (SERC).

(2) The Governor of the State in which your facility is located.

(3) The Chief Executive Officer of the Tribe for the Indian Tribe under whose jurisdiction your facility is located.

§ 355.11 To what substances do the emergency planning requirements of this subpart apply?

The emergency planning requirements of this subpart apply to any EHS listed in Appendices A and B of this part. Additionally, if a facility is designated for emergency planning purposes, as provided in § 355.10(b), substances that are not EHSs at this facility may become subject to the emergency planning requirements.

§ 355.12 What quantities of extremely hazardous substances trigger emergency planning requirements?

Any EHS present at your facility in an amount equal to or greater than its TPQ triggers the emergency planning requirements of this subpart. The TPQs are listed in Appendices A and B of this part in the column labeled “threshold planning quantity.”

§ 355.13 How do I calculate the quantity of an extremely hazardous substance present in mixtures?

If an EHS is present in a mixture in a particular container, determine the quantity (in pounds) of the EHS in that container by multiplying the concentration of the EHS (in weight percent) by the weight (in pounds) of the mixture in the container. If the concentration of an EHS is less than or equal to one percent in the mixture, you do not have to count that EHS. Here is an example calculation:

Example: You have 150 pounds of a mixture that contains 20 weight percent of a certain EHS. The quantity of EHS present in the mixture is:

$$\begin{aligned} &\text{EHS (in pounds)} \\ &= (\text{weight percent of EHS}) \times (\text{weight of mixture}) \\ &= (20 \text{ percent}) \times (150 \text{ pound mixture}) \\ &= (0.20) \times (150) \\ &\text{EHS (in pounds)} \\ &= 30 \text{ pounds} \end{aligned}$$

§ 1910.120 Hazardous waste operations and emergency response.

(a) *Scope, application, and definitions—*

(1) *Scope.* This section covers the following operations, unless the employer can demonstrate that the operation does not involve employee exposure or the reasonable possibility for employee exposure to safety or health hazards:

(i) Clean-up operations required by a governmental body, whether Federal, state, local or other involving hazardous substances that are conducted at uncontrolled hazardous waste sites (including, but not limited to, the EPA's National Priority Site List (NPL), state priority site lists, sites recommended for the EPA NPL, and initial investigations of government identified sites which are conducted before the presence or absence of hazardous substances has been ascertained);

(ii) Corrective actions involving clean-up operations at sites covered by the Resource Conservation and Recovery Act of 1976 (RCRA) as amended (42 U.S.C. 6901 *et seq.*);

(iii) Voluntary clean-up operations at sites recognized by Federal, state, local or other governmental bodies as uncontrolled hazardous waste sites;

(iv) Operations involving hazardous wastes that are conducted at treatment, storage, and disposal (TSD) facilities regulated by 40 CFR parts 264 and 265 pursuant to RCRA; or by agencies under agreement with U.S.E.P.A. to implement RCRA regulations; and

(v) Emergency response operations for releases of, or substantial threats of releases of, hazardous substances without regard to the location of the hazard.

(2) *Application.* (i) All requirements of part 1910 and part 1926 of title 29 of the Code of Federal Regulations apply pursuant to their terms to hazardous waste and emergency response operations whether covered by this section or not. If there is a conflict or overlap, the provision more protective of employee safety and health shall apply without regard to 29 CFR 1910.5(c)(1).

(ii) Hazardous substance clean-up operations within the scope of paragraphs (a)(1)(i) through (a)(1)(iii) of this section must comply with all paragraphs of this section except paragraphs (p) and (q).

(iii) Operations within the scope of paragraph (a)(1)(iv) of this section must comply only with the requirements of paragraph (p) of this section.

NOTES AND EXCEPTIONS: (A) All provisions of paragraph (p) of this section cover any treatment, storage or disposal (TSD) operation regulated by 40 CFR parts 264 and 265 or by state law authorized under RCRA, and required to have a permit or interim status from EPA pursuant to 40 CFR 270.1 or from a state agency pursuant to RCRA.

(B) Employers who are not required to have a permit or interim status because they are conditionally exempt small quantity generators under 40 CFR 261.5 or are generators who qualify under 40 CFR 262.34 for exemptions from regulation under 40 CFR parts 264, 265 and 270 ("excepted employers") are not covered by paragraphs (p)(1) through (p)(7) of this section. Excepted employers who are required by the EPA or state agency

to have their employees engage in emergency response or who direct their employees to engage in emergency response are covered by paragraph (p)(8) of this section, and cannot be exempted by (p)(8)(i) of this section. Excepted employers who are not required to have employees engage in emergency response, who direct their employees to evacuate in the case of such emergencies and who meet the requirements of paragraph (p)(8)(i) of this section are exempt from the balance of paragraph (p)(8) of this section.

(C) If an area is used primarily for treatment, storage or disposal, any emergency response operations in that area shall comply with paragraph (p)(8) of this section. In other areas not used primarily for treatment, storage, or disposal, any emergency response operations shall comply with paragraph (q) of this section. Compliance with the requirements of paragraph (q) of this section shall be deemed to be in compliance with the requirements of paragraph (p)(8) of this section.

(iv) Emergency response operations for releases of, or substantial threats of releases of, hazardous substances which are not covered by paragraphs (a)(1)(i) through (a)(1)(iv) of this section must only comply with the requirements of paragraph (q) of this section.

(3) *Definitions—Buddy system* means a system of organizing employees into work groups in such a manner that each employee of the work group is designated to be observed by at least one other employee in the work group. The purpose of the buddy system is to provide rapid assistance to employees in the event of an emergency.

Clean-up operation means an operation where hazardous substances are removed, contained, incinerated, neutralized, stabilized, cleared-up, or in any other manner processed or handled with the ultimate goal of making the site safer for people or the environment.

Decontamination means the removal of hazardous substances from employees and their equipment to the extent necessary to preclude the occurrence of foreseeable adverse health effects.

Emergency response or responding to emergencies means a response effort by employees from outside the immediate release area or by other designated responders (i.e., mutual-aid groups, local fire departments, etc.) to an occurrence which results, or is likely to result, in an uncontrolled release of a hazardous

substance. Responses to incidental releases of hazardous substances where the substance can be absorbed, neutralized, or otherwise controlled at the time of release by employees in the immediate release area, or by maintenance personnel are not considered to be emergency responses within the scope of this standard. Responses to releases of hazardous substances where there is no potential safety or health hazard (i.e., fire, explosion, or chemical exposure) are not considered to be emergency responses.

Facility means (A) any building, structure, installation, equipment, pipe or pipeline (including any pipe into a sewer or publicly owned treatment works), well, pit, pond, lagoon, impoundment, ditch, storage container, motor vehicle, rolling stock, or aircraft, or (B) any site or area where a hazardous substance has been deposited, stored, disposed of, or placed, or otherwise come to be located; but does not include any consumer product in consumer use or any water-borne vessel.

Hazardous materials response (HAZMAT) team means an organized group of employees, designated by the employer, who are expected to perform work to handle and control actual or potential leaks or spills of hazardous substances requiring possible close approach to the substance. The team members perform responses to releases or potential releases of hazardous substances for the purpose of control or stabilization of the incident. A HAZMAT team is not a fire brigade nor is a typical fire brigade a HAZMAT team. A HAZMAT team, however, may be a separate component of a fire brigade or fire department.

Hazardous substance means any substance designated or listed under paragraphs (A) through (D) of this definition, exposure to which results or may result in adverse effects on the health or safety of employees:

(A) Any substance defined under section 103(14) of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (42 U.S.C. 9601).

(B) Any biological agent and other disease-causing agent which after release into the environment and upon

exposure, ingestion, inhalation, or assimilation into any person, either directly from the environment or indirectly by ingestion through food chains, will or may reasonably be anticipated to cause death, disease, behavioral abnormalities, cancer, genetic mutation, physiological malfunctions (including malfunctions in reproduction) or physical deformations in such persons or their offspring;

(C) Any substance listed by the U.S. Department of Transportation as hazardous materials under 49 CFR 172.101 and appendices; and

(D) Hazardous waste as herein defined.

Hazardous waste means—

(A) A waste or combination of wastes as defined in 40 CFR 261.3, or

(B) Those substances defined as hazardous wastes in 49 CFR 171.8.

Hazardous waste operation means any operation conducted within the scope of this standard.

Hazardous waste site or *Site* means any facility or location within the scope of this standard at which hazardous waste operations take place.

Health hazard means a chemical or a pathogen where acute or chronic health effects may occur in exposed employees. It also includes stress due to temperature extremes. The term *health hazard* includes chemicals that are classified in accordance with the Hazard Communication Standard, 29 CFR 1910.1200, as posing one of the following hazardous effects: Acute toxicity (any route of exposure); skin corrosion or irritation; serious eye damage or eye irritation; respiratory or skin sensitization; germ cell mutagenicity; carcinogenicity; reproductive toxicity; specific target organ toxicity (single or repeated exposure); aspiration toxicity or simple asphyxiant. (See Appendix A to §1910.1200—Health Hazard Criteria (Mandatory) for the criteria for determining whether a chemical is classified as a health hazard.)

IDLH or *Immediately dangerous to life or health* means an atmospheric concentration of any toxic, corrosive or asphyxiant substance that poses an immediate threat to life or would cause irreversible or delayed adverse health effects or would interfere with an indi-

vidual's ability to escape from a dangerous atmosphere.

Oxygen deficiency means that concentration of oxygen by volume below which atmosphere supplying respiratory protection must be provided. It exists in atmospheres where the percentage of oxygen by volume is less than 19.5 percent oxygen.

Permissible exposure limit means the exposure, inhalation or dermal permissible exposure limit specified in 29 CFR part 1910, subparts G and Z.

Published exposure level means the exposure limits published in "NIOSH Recommendations for Occupational Health Standards" dated 1986, which is incorporated by reference as specified in §1910.6 or if none is specified, the exposure limits published in the standards specified by the American Conference of Governmental Industrial Hygienists in their publication "Threshold Limit Values and Biological Exposure Indices for 1987-88" dated 1987, which is incorporated by reference as specified in §1910.6.

Post emergency response means that portion of an emergency response performed after the immediate threat of a release has been stabilized or eliminated and clean-up of the site has begun. If post emergency response is performed by an employer's own employees who were part of the initial emergency response, it is considered to be part of the initial response and not post emergency response. However, if a group of an employer's own employees, separate from the group providing initial response, performs the clean-up operation, then the separate group of employees would be considered to be performing post-emergency response and subject to paragraph (q)(11) of this section.

Qualified person means a person with specific training, knowledge and experience in the area for which the person has the responsibility and the authority to control.

Site safety and health supervisor (or official) means the individual located on a hazardous waste site who is responsible to the employer and has the authority and knowledge necessary to implement the site safety and health plan and verify compliance with applicable safety and health requirements.

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

Small quantity generator means a generator of hazardous wastes who in any calendar month generates no more than 1,000 kilograms (2,205 pounds) of hazardous waste in that month.

Uncontrolled hazardous waste site, means an area identified as an uncontrolled hazardous waste site by a governmental body, whether Federal, state, local or other where an accumulation of hazardous substances creates a threat to the health and safety of individuals or the environment or both. Some sites are found on public lands such as those created by former municipal, county or state landfills where illegal or poorly managed waste disposal has taken place. Other sites are found on private property, often belonging to generators or former generators of hazardous substance wastes. Examples of such sites include, but are not limited to, surface impoundments, landfills, dumps, and tank or drum farms. Normal operations at TSD sites are not covered by this definition.

(b) *Safety and health program.*

NOTE TO (b): Safety and health programs developed and implemented to meet other Federal, state, or local regulations are considered acceptable in meeting this requirement if they cover or are modified to cover the topics required in this paragraph. An additional or separate safety and health program is not required by this paragraph.

(1) *General.* (i) Employers shall develop and implement a written safety and health program for their employees involved in hazardous waste operations. The program shall be designed to identify, evaluate, and control safety and health hazards, and provide for emergency response for hazardous waste operations.

(ii) The written safety and health program shall incorporate the following:

- (A) An organizational structure;
- (B) A comprehensive workplan;
- (C) A site-specific safety and health plan which need not repeat the employer's standard operating procedures required in paragraph (b)(1)(ii)(F) of this section;
- (D) The safety and health training program;
- (E) The medical surveillance program;

(F) The employer's standard operating procedures for safety and health; and

(G) Any necessary interface between general program and site specific activities.

(iii) *Site excavation.* Site excavations created during initial site preparation or during hazardous waste operations shall be shored or sloped as appropriate to prevent accidental collapse in accordance with subpart P of 29 CFR part 1926.

(iv) *Contractors and sub-contractors.* An employer who retains contractor or sub-contractor services for work in hazardous waste operations shall inform those contractors, sub-contractors, or their representatives of the site emergency response procedures and any potential fire, explosion, health, safety or other hazards of the hazardous waste operation that have been identified by the employer, including those identified in the employer's information program.

(v) *Program availability.* The written safety and health program shall be made available to any contractor or subcontractor or their representative who will be involved with the hazardous waste operation; to employees; to employee designated representatives; to OSHA personnel, and to personnel of other Federal, state, or local agencies with regulatory authority over the site.

(2) *Organizational structure part of the site program.* (i) The organizational structure part of the program shall establish the specific chain of command and specify the overall responsibilities of supervisors and employees. It shall include, at a minimum, the following elements:

- (A) A general supervisor who has the responsibility and authority to direct all hazardous waste operations.
- (B) A site safety and health supervisor who has the responsibility and authority to develop and implement the site safety and health plan and verify compliance.
- (C) All other personnel needed for hazardous waste site operations and emergency response and their general functions and responsibilities.
- (D) The lines of authority, responsibility, and communication.

(ii) The organizational structure shall be reviewed and updated as necessary to reflect the current status of waste site operations.

(3) *Comprehensive workplan part of the site program.* The comprehensive workplan part of the program shall address the tasks and objectives of the site operations and the logistics and resources required to reach those tasks and objectives.

(i) The comprehensive workplan shall address anticipated clean-up activities as well as normal operating procedures which need not repeat the employer's procedures available elsewhere.

(ii) The comprehensive workplan shall define work tasks and objectives and identify the methods for accomplishing those tasks and objectives.

(iii) The comprehensive workplan shall establish personnel requirements for implementing the plan.

(iv) The comprehensive workplan shall provide for the implementation of the training required in paragraph (e) of this section.

(v) The comprehensive workplan shall provide for the implementation of the required informational programs required in paragraph (i) of this section.

(vi) The comprehensive workplan shall provide for the implementation of the medical surveillance program described in paragraph (f) of this section.

(4) *Site-specific safety and health plan part of the program—(i) General.* The site safety and health plan, which must be kept on site, shall address the safety and health hazards of each phase of site operation and include the requirements and procedures for employee protection.

(ii) *Elements.* The site safety and health plan, as a minimum, shall address the following:

(A) A safety and health risk or hazard analysis for each site task and operation found in the workplan.

(B) Employee training assignments to assure compliance with paragraph (e) of this section.

(C) Personal protective equipment to be used by employees for each of the site tasks and operations being conducted as required by the personal protective equipment program in paragraph (g)(5) of this section.

(D) Medical surveillance requirements in accordance with the program in paragraph (f) of this section.

(E) Frequency and types of air monitoring, personnel monitoring, and environmental sampling techniques and instrumentation to be used, including methods of maintenance and calibration of monitoring and sampling equipment to be used.

(F) Site control measures in accordance with the site control program required in paragraph (d) of this section.

(G) Decontamination procedures in accordance with paragraph (k) of this section.

(H) An emergency response plan meeting the requirements of paragraph (l) of this section for safe and effective responses to emergencies, including the necessary PPE and other equipment.

(I) Confined space entry procedures.

(J) A spill containment program meeting the requirements of paragraph (j) of this section.

(iii) *Pre-entry briefing.* The site specific safety and health plan shall provide for pre-entry briefings to be held prior to initiating any site activity, and at such other times as necessary to ensure that employees are apprised of the site safety and health plan and that this plan is being followed. The information and data obtained from site characterization and analysis work required in paragraph (c) of this section shall be used to prepare and update the site safety and health plan.

(iv) *Effectiveness of site safety and health plan.* Inspections shall be conducted by the site safety and health supervisor or, in the absence of that individual, another individual who is knowledgeable in occupational safety and health, acting on behalf of the employer as necessary to determine the effectiveness of the site safety and health plan. Any deficiencies in the effectiveness of the site safety and health plan shall be corrected by the employer.

(c) *Site characterization and analysis—(1) General.* Hazardous waste sites shall be evaluated in accordance with this paragraph to identify specific site hazards and to determine the appropriate safety and health control procedures

needed to protect employees from the identified hazards.

(2) *Preliminary evaluation.* A preliminary evaluation of a site's characteristics shall be performed prior to site entry by a qualified person in order to aid in the selection of appropriate employee protection methods prior to site entry. Immediately after initial site entry, a more detailed evaluation of the site's specific characteristics shall be performed by a qualified person in order to further identify existing site hazards and to further aid in the selection of the appropriate engineering controls and personal protective equipment for the tasks to be performed.

(3) *Hazard identification.* All suspected conditions that may pose inhalation or skin absorption hazards that are immediately dangerous to life or health (IDLH), or other conditions that may cause death or serious harm, shall be identified during the preliminary survey and evaluated during the detailed survey. Examples of such hazards include, but are not limited to, confined space entry, potentially explosive or flammable situations, visible vapor clouds, or areas where biological indicators such as dead animals or vegetation are located.

(4) *Required information.* The following information to the extent available shall be obtained by the employer prior to allowing employees to enter a site:

- (i) Location and approximate size of the site.
- (ii) Description of the response activity and/or the job task to be performed.
- (iii) Duration of the planned employee activity.
- (iv) Site topography and accessibility by air and roads.
- (v) Safety and health hazards expected at the site.
- (vi) Pathways for hazardous substance dispersion.
- (vii) Present status and capabilities of emergency response teams that would provide assistance to hazardous waste clean-up site employees at the time of an emergency.
- (viii) Hazardous substances and health hazards involved or expected at the site, and their chemical and physical properties.

(5) *Personal protective equipment.* Personal protective equipment (PPE) shall be provided and used during initial site entry in accordance with the following requirements:

(i) Based upon the results of the preliminary site evaluation, an ensemble of PPE shall be selected and used during initial site entry which will provide protection to a level of exposure below permissible exposure limits and published exposure levels for known or suspected hazardous substances and health hazards, and which will provide protection against other known and suspected hazards identified during the preliminary site evaluation. If there is no permissible exposure limit or published exposure level, the employer may use other published studies and information as a guide to appropriate personal protective equipment.

(ii) If positive-pressure self-contained breathing apparatus is not used as part of the entry ensemble, and if respiratory protection is warranted by the potential hazards identified during the preliminary site evaluation, an escape self-contained breathing apparatus of at least five minute's duration shall be carried by employees during initial site entry.

(iii) If the preliminary site evaluation does not produce sufficient information to identify the hazards or suspected hazards of the site, an ensemble providing protection equivalent to Level B PPE shall be provided as minimum protection, and direct reading instruments shall be used as appropriate for identifying IDLH conditions. (See appendix B for a description of Level B hazards and the recommendations for Level B protective equipment.)

(iv) Once the hazards of the site have been identified, the appropriate PPE shall be selected and used in accordance with paragraph (g) of this section.

(6) *Monitoring.* The following monitoring shall be conducted during initial site entry when the site evaluation produces information that shows the potential for ionizing radiation or IDLH conditions, or when the site information is not sufficient reasonably to eliminate these possible conditions:

(i) Monitoring with direct reading instruments for hazardous levels of ionizing radiation.

(ii) Monitoring the air with appropriate direct reading test equipment (i.e., combustible gas meters, detector tubes) for IDLH and other conditions that may cause death or serious harm (combustible or explosive atmospheres, oxygen deficiency, toxic substances).

(iii) Visually observing for signs of actual or potential IDLH or other dangerous conditions.

(iv) An ongoing air monitoring program in accordance with paragraph (h) of this section shall be implemented after site characterization has determined the site is safe for the start-up of operations.

(7) *Risk identification.* Once the presence and concentrations of specific hazardous substances and health hazards have been established, the risks associated with these substances shall be identified. Employees who will be working on the site shall be informed of any risks that have been identified. In situations covered by the Hazard Communication Standard, 29 CFR 1910.1200, training required by that standard need not be duplicated.

NOTE TO PARAGRAPH (c)(7): Risks to consider include, but are not limited to:

- (a) Exposures exceeding the permissible exposure limits and published exposure levels.
- (b) IDLH concentrations.
- (c) Potential skin absorption and irritation sources.
- (d) Potential eye irritation sources.
- (e) Explosion sensitivity and flammability ranges.
- (f) Oxygen deficiency.

(8) *Employee notification.* Any information concerning the chemical, physical, and toxicologic properties of each substance known or expected to be present on site that is available to the employer and relevant to the duties an employee is expected to perform shall be made available to the affected employees prior to the commencement of their work activities. The employer may utilize information developed for the hazard communication standard for this purpose.

(d) *Site control*—(1) *General.* Appropriate site control procedures shall be implemented to control employee exposure to hazardous substances before clean-up work begins.

(2) *Site control program.* A site control program for protecting employees which is part of the employer's site safety and health program required in paragraph (b) of this section shall be developed during the planning stages of a hazardous waste clean-up operation and modified as necessary as new information becomes available.

(3) *Elements of the site control program.* The site control program shall, as a minimum, include: A site map; site work zones; the use of a "buddy system"; site communications including alerting means for emergencies; the standard operating procedures or safe work practices; and, identification of the nearest medical assistance. Where these requirements are covered elsewhere they need not be repeated.

(e) *Training*—(1) *General.* (i) All employees working on site (such as but not limited to equipment operators, general laborers and others) exposed to hazardous substances, health hazards, or safety hazards and their supervisors and management responsible for the site shall receive training meeting the requirements of this paragraph before they are permitted to engage in hazardous waste operations that could expose them to hazardous substances, safety, or health hazards, and they shall receive review training as specified in this paragraph.

(ii) Employees shall not be permitted to participate in or supervise field activities until they have been trained to a level required by their job function and responsibility.

(2) *Elements to be covered.* The training shall thoroughly cover the following:

- (i) Names of personnel and alternates responsible for site safety and health;
- (ii) Safety, health and other hazards present on the site;
- (iii) Use of personal protective equipment;
- (iv) Work practices by which the employee can minimize risks from hazards;
- (v) Safe use of engineering controls and equipment on the site;
- (vi) Medical surveillance requirements, including recognition of symptoms and signs which might indicate overexposure to hazards; and

(vii) The contents of paragraphs (G) through (J) of the site safety and health plan set forth in paragraph (b)(4)(ii) of this section.

(3) *Initial training.* (i) General site workers (such as equipment operators, general laborers and supervisory personnel) engaged in hazardous substance removal or other activities which expose or potentially expose workers to hazardous substances and health hazards shall receive a minimum of 40 hours of instruction off the site, and a minimum of three days actual field experience under the direct supervision of a trained, experienced supervisor.

(ii) Workers on site only occasionally for a specific limited task (such as, but not limited to, ground water monitoring, land surveying, or geo-physical surveying) and who are unlikely to be exposed over permissible exposure limits and published exposure limits shall receive a minimum of 24 hours of instruction off the site, and the minimum of one day actual field experience under the direct supervision of a trained, experienced supervisor.

(iii) Workers regularly on site who work in areas which have been monitored and fully characterized indicating that exposures are under permissible exposure limits and published exposure limits where respirators are not necessary, and the characterization indicates that there are no health hazards or the possibility of an emergency developing, shall receive a minimum of 24 hours of instruction off the site and the minimum of one day actual field experience under the direct supervision of a trained, experienced supervisor.

(iv) Workers with 24 hours of training who are covered by paragraphs (e)(3)(ii) and (e)(3)(iii) of this section, and who become general site workers or who are required to wear respirators, shall have the additional 16 hours and two days of training necessary to total the training specified in paragraph (e)(3)(i).

(4) *Management and supervisor training.* On-site management and supervisors directly responsible for, or who supervise employees engaged in, hazardous waste operations shall receive 40 hours initial training, and three days of supervised field experience (the training may be reduced to 24 hours and one day if the only area of their re-

sponsibility is employees covered by paragraphs (e)(3)(ii) and (e)(3)(iii)) and at least eight additional hours of specialized training at the time of job assignment on such topics as, but not limited to, the employer's safety and health program and the associated employee training program, personal protective equipment program, spill containment program, and health hazard monitoring procedure and techniques.

(5) *Qualifications for trainers.* Trainers shall be qualified to instruct employees about the subject matter that is being presented in training. Such trainers shall have satisfactorily completed a training program for teaching the subjects they are expected to teach, or they shall have the academic credentials and instructional experience necessary for teaching the subjects. Instructors shall demonstrate competent instructional skills and knowledge of the applicable subject matter.

(6) *Training certification.* Employees and supervisors that have received and successfully completed the training and field experience specified in paragraphs (e)(1) through (e)(4) of this section shall be certified by their instructor or the head instructor and trained supervisor as having successfully completed the necessary training. A written certificate shall be given to each person so certified. Any person who has not been so certified or who does not meet the requirements of paragraph (e)(9) of this section shall be prohibited from engaging in hazardous waste operations.

(7) *Emergency response.* Employees who are engaged in responding to hazardous emergency situations at hazardous waste clean-up sites that may expose them to hazardous substances shall be trained in how to respond to such expected emergencies.

(8) *Refresher training.* Employees specified in paragraph (e)(1) of this section, and managers and supervisors specified in paragraph (e)(4) of this section, shall receive eight hours of refresher training annually on the items specified in paragraph (e)(2) and/or (e)(4) of this section, any critique of incidents that have occurred in the past year that can serve as training examples of related work, and other relevant topics.

(9) *Equivalent training.* Employers who can show by documentation or certification that an employee's work experience and/or training has resulted in training equivalent to that training required in paragraphs (e)(1) through (e)(4) of this section shall not be required to provide the initial training requirements of those paragraphs to such employees and shall provide a copy of the certification or documentation to the employee upon request. However, certified employees or employees with equivalent training new to a site shall receive appropriate, site specific training before site entry and have appropriate supervised field experience at the new site. Equivalent training includes any academic training or the training that existing employees might have already received from actual hazardous waste site work experience.

(f) *Medical surveillance—(1) General.* Employers engaged in operations specified in paragraphs (a)(1)(i) through (a)(1)(iv) of this section and not covered by (a)(2)(iii) exceptions and employers of employees specified in paragraph (q)(9) shall institute a medical surveillance program in accordance with this paragraph.

(2) *Employees covered.* The medical surveillance program shall be instituted by the employer for the following employees:

(i) All employees who are or may be exposed to hazardous substances or health hazards at or above the permissible exposure limits or, if there is no permissible exposure limit, above the published exposure levels for these substances, without regard to the use of respirators, for 30 days or more a year;

(ii) All employees who wear a respirator for 30 days or more a year or as required by § 1910.134;

(iii) All employees who are injured, become ill or develop signs or symptoms due to possible overexposure involving hazardous substances or health hazards from an emergency response or hazardous waste operation; and

(iv) Members of HAZMAT teams.

(3) *Frequency of medical examinations and consultations.* Medical examinations and consultations shall be made available by the employer to each em-

ployee covered under paragraph (f)(2) of this section on the following schedules:

(i) For employees covered under paragraphs (f)(2)(i), (f)(2)(ii), and (f)(2)(iv):

(A) Prior to assignment;

(B) At least once every twelve months for each employee covered unless the attending physician believes a longer interval (not greater than biennially) is appropriate;

(C) At termination of employment or reassignment to an area where the employee would not be covered if the employee has not had an examination within the last six months;

(D) As soon as possible upon notification by an employee that the employee has developed signs or symptoms indicating possible overexposure to hazardous substances or health hazards, or that the employee has been injured or exposed above the permissible exposure limits or published exposure levels in an emergency situation;

(E) At more frequent times, if the examining physician determines that an increased frequency of examination is medically necessary.

(ii) For employees covered under paragraph (f)(2)(iii) and for all employees including those of employers covered by paragraph (a)(1)(v) who may have been injured, received a health impairment, developed signs or symptoms which may have resulted from exposure to hazardous substances resulting from an emergency incident, or exposed during an emergency incident to hazardous substances at concentrations above the permissible exposure limits or the published exposure levels without the necessary personal protective equipment being used:

(A) As soon as possible following the emergency incident or development of signs or symptoms;

(B) At additional times, if the examining physician determines that follow-up examinations or consultations are medically necessary.

(4) *Content of medical examinations and consultations.* (i) Medical examinations required by paragraph (f)(3) of this section shall include a medical and work history (or updated history if one is in the employee's file) with special emphasis on symptoms related to the handling of hazardous substances and

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

health hazards, and to fitness for duty including the ability to wear any required PPE under conditions (i.e., temperature extremes) that may be expected at the work site.

(ii) The content of medical examinations or consultations made available to employees pursuant to paragraph (f) shall be determined by the attending physician. The guidelines in the *Occupational Safety and Health Guidance Manual for Hazardous Waste Site Activities* (See appendix D, Reference #10) should be consulted.

(5) *Examination by a physician and costs.* All medical examinations and procedures shall be performed by or under the supervision of a licensed physician, preferably one knowledgeable in occupational medicine, and shall be provided without cost to the employee, without loss of pay, and at a reasonable time and place.

(6) *Information provided to the physician.* The employer shall provide one copy of this standard and its appendices to the attending physician, and in addition the following for each employee:

(i) A description of the employee's duties as they relate to the employee's exposures.

(ii) The employee's exposure levels or anticipated exposure levels.

(iii) A description of any personal protective equipment used or to be used.

(iv) Information from previous medical examinations of the employee which is not readily available to the examining physician.

(v) Information required by §1910.134.

(7) *Physician's written opinion.* (i) The employer shall obtain and furnish the employee with a copy of a written opinion from the attending physician containing the following:

(A) The physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of the employee's health from work in hazardous waste operations or emergency response, or from respirator use.

(B) The physician's recommended limitations upon the employee's assigned work.

(C) The results of the medical examination and tests if requested by the employee.

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(ii) The written opinion obtained by the employer shall not reveal specific findings or diagnoses unrelated to occupational exposures.

(8) *Recordkeeping.* (i) An accurate record of the medical surveillance required by paragraph (f) of this section shall be retained. This record shall be retained for the period specified and meet the criteria of 29 CFR 1910.1020.

(ii) The record required in paragraph (f)(8)(i) of this section shall include at least the following information:

(A) The name of the employee;

(B) Physician's written opinions, recommended limitations, and results of examinations and tests;

(C) Any employee medical complaints related to exposure to hazardous substances;

(D) A copy of the information provided to the examining physician by the employer, with the exception of the standard and its appendices.

(g) *Engineering controls, work practices, and personal protective equipment for employee protection.* Engineering controls, work practices, personal protective equipment, or a combination of these shall be implemented in accordance with this paragraph to protect employees from exposure to hazardous substances and safety and health hazards.

(1) *Engineering controls, work practices and PPE for substances regulated in subparts G and Z.* (i) Engineering controls and work practices shall be instituted to reduce and maintain employee exposure to or below the permissible exposure limits for substances regulated by 29 CFR part 1910, to the extent required by subpart Z, except to the extent that such controls and practices are not feasible.

NOTE TO PARAGRAPH (g)(1)(i): Engineering controls which may be feasible include the use of pressurized cabs or control booths on equipment, and/or the use of remotely operated material handling equipment. Work

practices which may be feasible are removing all non-essential employees from potential exposure during opening of drums, wetting down dusty operations and locating employees upwind of possible hazards.

(ii) Whenever engineering controls and work practices are not feasible or not required, any reasonable combination of engineering controls, work practices and PPE shall be used to reduce and maintain employee exposures to or below the permissible exposure limits or dose limits for substances regulated by 29 CFR part 1910, subpart Z.

(iii) The employer shall not implement a schedule of employee rotation as a means of compliance with permissible exposure limits or dose limits except when there is no other feasible way of complying with the airborne or dermal dose limits for ionizing radiation.

(iv) The provisions of 29 CFR, subpart G, shall be followed.

(2) *Engineering controls, work practices, and PPE for substances not regulated in subparts G and Z.* An appropriate combination of engineering controls, work practices and personal protective equipment shall be used to reduce and maintain employee exposure to or below published exposure levels for hazardous substances and health hazards not regulated by 29 CFR part 1910, subparts G and Z. The employer may use the published literature and SDS as a guide in making the employer's determination as to what level of protection the employer believes is appropriate for hazardous substances and health hazards for which there is no permissible exposure limit or published exposure limit.

(3) *Personal protective equipment selection.* (i) Personal protective equipment (PPE) shall be selected and used which will protect employees from the hazards and potential hazards they are likely to encounter as identified during the site characterization and analysis.

(ii) Personal protective equipment selection shall be based on an evaluation of the performance characteristics of the PPE relative to the requirements and limitations of the site, the task-specific conditions and duration, and the hazards and potential hazards identified at the site.

(iii) Positive pressure self-contained breathing apparatus, or positive pressure air-line respirators equipped with an escape air supply, shall be used when chemical exposure levels present will create a substantial possibility of immediate death, immediate serious illness or injury, or impair the ability to escape.

(iv) Totally-encapsulating chemical protective suits (protection equivalent to Level A protection as recommended in appendix B) shall be used in conditions where skin absorption of a hazardous substance may result in a substantial possibility of immediate death, immediate serious illness or injury, or impair the ability to escape.

(v) The level of protection provided by PPE selection shall be increased when additional information on site conditions indicates that increased protection is necessary to reduce employee exposures below permissible exposure limits and published exposure levels for hazardous substances and health hazards. (See appendix B for guidance on selecting PPE ensembles.)

NOTE TO PARAGRAPH (g)(3): The level of employee protection provided may be decreased when additional information or site conditions show that decreased protection will not result in hazardous exposures to employees.

(vi) Personal protective equipment shall be selected and used to meet the requirements of 29 CFR part 1910, subpart I, and additional requirements specified in this section.

(4) *Totally-encapsulating chemical protective suits.* (i) Totally-encapsulating suits shall protect employees from the particular hazards which are identified during site characterization and analysis.

(ii) Totally-encapsulating suits shall be capable of maintaining positive air pressure. (See appendix A for a test method which may be used to evaluate this requirement.)

(iii) Totally-encapsulating suits shall be capable of preventing inward test gas leakage of more than 0.5 percent. (See appendix A for a test method which may be used to evaluate this requirement.)

(5) *Personal protective equipment (PPE) program.* A written personal protective equipment program, which is part of

the employer's safety and health program required in paragraph (b) of this section or required in paragraph (p)(1) of this section and which is also a part of the site-specific safety and health plan shall be established. The PPE program shall address the elements listed below. When elements, such as donning and doffing procedures, are provided by the manufacturer of a piece of equipment and are attached to the plan, they need not be rewritten into the plan as long as they adequately address the procedure or element.

- (i) PPE selection based upon site hazards,
- (ii) PPE use and limitations of the equipment,
- (iii) Work mission duration,
- (iv) PPE maintenance and storage,
- (v) PPE decontamination and disposal,
- (vi) PPE training and proper fitting,
- (vii) PPE donning and doffing procedures,
- (viii) PPE inspection procedures prior to, during, and after use,
- (ix) Evaluation of the effectiveness of the PPE program, and
- (x) Limitations during temperature extremes, heat stress, and other appropriate medical considerations.

(h) *Monitoring*—(1) *General*. (i) Monitoring shall be performed in accordance with this paragraph where there may be a question of employee exposure to hazardous concentrations of hazardous substances in order to assure proper selection of engineering controls, work practices and personal protective equipment so that employees are not exposed to levels which exceed permissible exposure limits, or published exposure levels if there are no permissible exposure limits, for hazardous substances.

(ii) Air monitoring shall be used to identify and quantify airborne levels of hazardous substances and safety and health hazards in order to determine the appropriate level of employee protection needed on site.

(2) *Initial entry*. Upon initial entry, representative air monitoring shall be conducted to identify any IDLH condition, exposure over permissible exposure limits or published exposure levels, exposure over a radioactive material's dose limits or other dangerous

condition such as the presence of flammable atmospheres or oxygen-deficient environments.

(3) *Periodic monitoring*. Periodic monitoring shall be conducted when the possibility of an IDLH condition or flammable atmosphere has developed or when there is indication that exposures may have risen over permissible exposure limits or published exposure levels since prior monitoring. Situations where it shall be considered whether the possibility that exposures have risen are as follows:

- (i) When work begins on a different portion of the site.
- (ii) When contaminants other than those previously identified are being handled.
- (iii) When a different type of operation is initiated (e.g., drum opening as opposed to exploratory well drilling).
- (iv) When employees are handling leaking drums or containers or working in areas with obvious liquid contamination (e.g., a spill or lagoon).

(4) *Monitoring of high-risk employees*. After the actual clean-up phase of any hazardous waste operation commences; for example, when soil, surface water or containers are moved or disturbed; the employer shall monitor those employees likely to have the highest exposures to hazardous substances and health hazards likely to be present above permissible exposure limits or published exposure levels by using personal sampling frequently enough to characterize employee exposures. If the employees likely to have the highest exposure are over permissible exposure limits or published exposure limits, then monitoring shall continue to determine all employees likely to be above those limits. The employer may utilize a representative sampling approach by documenting that the employees and chemicals chosen for monitoring are based on the criteria stated above.

NOTE TO PARAGRAPH (h): It is not required to monitor employees engaged in site characterization operations covered by paragraph (c) of this section.

(i) *Informational programs*. Employers shall develop and implement a program, which is part of the employer's safety and health program required in paragraph (b) of this section, to inform

employees, contractors, and subcontractors (or their representative) actually engaged in hazardous waste operations of the nature, level and degree of exposure likely as a result of participation in such hazardous waste operations. Employees, contractors and subcontractors working outside of the operations part of a site are not covered by this standard.

(j) *Handling drums and containers*—(1) *General.* (i) Hazardous substances and contaminated soils, liquids, and other residues shall be handled, transported, labeled, and disposed of in accordance with this paragraph.

(ii) Drums and containers used during the clean-up shall meet the appropriate DOT, OSHA, and EPA regulations for the wastes that they contain.

(iii) When practical, drums and containers shall be inspected and their integrity shall be assured prior to being moved. Drums or containers that cannot be inspected before being moved because of storage conditions (i.e., buried beneath the earth, stacked behind other drums, stacked several tiers high in a pile, etc.) shall be moved to an accessible location and inspected prior to further handling.

(iv) Unlabelled drums and containers shall be considered to contain hazardous substances and handled accordingly until the contents are positively identified and labeled.

(v) Site operations shall be organized to minimize the amount of drum or container movement.

(vi) Prior to movement of drums or containers, all employees exposed to the transfer operation shall be warned of the potential hazards associated with the contents of the drums or containers.

(vii) U.S. Department of Transportation specified salvage drums or containers and suitable quantities of proper absorbent shall be kept available and used in areas where spills, leaks, or ruptures may occur.

(viii) Where major spills may occur, a spill containment program, which is part of the employer's safety and health program required in paragraph (b) of this section, shall be implemented to contain and isolate the entire volume of the hazardous substance being transferred.

(ix) Drums and containers that cannot be moved without rupture, leakage, or spillage shall be emptied into a sound container using a device classified for the material being transferred.

(x) A ground-penetrating system or other type of detection system or device shall be used to estimate the location and depth of buried drums or containers.

(xi) Soil or covering material shall be removed with caution to prevent drum or container rupture.

(xii) Fire extinguishing equipment meeting the requirements of 29 CFR part 1910, subpart L, shall be on hand and ready for use to control incipient fires.

(2) *Opening drums and containers.* The following procedures shall be followed in areas where drums or containers are being opened:

(i) Where an airline respirator system is used, connections to the source of air supply shall be protected from contamination and the entire system shall be protected from physical damage.

(ii) Employees not actually involved in opening drums or containers shall be kept a safe distance from the drums or containers being opened.

(iii) If employees must work near or adjacent to drums or containers being opened, a suitable shield that does not interfere with the work operation shall be placed between the employee and the drums or containers being opened to protect the employee in case of accidental explosion.

(iv) Controls for drum or container opening equipment, monitoring equipment, and fire suppression equipment shall be located behind the explosion-resistant barrier.

(v) When there is a reasonable possibility of flammable atmospheres being present, material handling equipment and hand tools shall be of the type to prevent sources of ignition.

(vi) Drums and containers shall be opened in such a manner that excess interior pressure will be safely relieved. If pressure can not be relieved from a remote location, appropriate shielding shall be placed between the employee and the drums or containers to reduce the risk of employee injury.

(vii) Employees shall not stand upon or work from drums or containers.

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

(3) *Material handling equipment.* Material handling equipment used to transfer drums and containers shall be selected, positioned and operated to minimize sources of ignition related to the equipment from igniting vapors released from ruptured drums or containers.

(4) *Radioactive wastes.* Drums and containers containing radioactive wastes shall not be handled until such time as their hazard to employees is properly assessed.

(5) *Shock sensitive wastes.* As a minimum, the following special precautions shall be taken when drums and containers containing or suspected of containing shock-sensitive wastes are handled:

(i) All non-essential employees shall be evacuated from the area of transfer.

(ii) Material handling equipment shall be provided with explosive containment devices or protective shields to protect equipment operators from exploding containers.

(iii) An employee alarm system capable of being perceived above surrounding light and noise conditions shall be used to signal the commencement and completion of explosive waste handling activities.

(iv) Continuous communications (i.e., portable radios, hand signals, telephones, as appropriate) shall be maintained between the employee-in-charge of the immediate handling area and both the site safety and health supervisor and the command post until such time as the handling operation is completed. Communication equipment or methods that could cause shock sensitive materials to explode shall not be used.

(v) Drums and containers under pressure, as evidenced by bulging or swelling, shall not be moved until such time as the cause for excess pressure is determined and appropriate containment procedures have been implemented to protect employees from explosive relief of the drum.

(vi) Drums and containers containing packaged laboratory wastes shall be considered to contain shock-sensitive or explosive materials until they have been characterized.

CAUTION: Shipping of shock sensitive wastes may be prohibited under U.S. Depart-

ment of Transportation regulations. Employers and their shippers should refer to 49 CFR 173.21 and 173.50.

(6) *Laboratory waste packs.* In addition to the requirements of paragraph (j)(5) of this section, the following precautions shall be taken, as a minimum, in handling laboratory waste packs (lab packs):

(i) Lab packs shall be opened only when necessary and then only by an individual knowledgeable in the inspection, classification, and segregation of the containers within the pack according to the hazards of the wastes.

(ii) If crystalline material is noted on any container, the contents shall be handled as a shock-sensitive waste until the contents are identified.

(7) *Sampling of drum and container contents.* Sampling of containers and drums shall be done in accordance with a sampling procedure which is part of the site safety and health plan developed for and available to employees and others at the specific worksite.

(8) *Shipping and transport.* (i) Drums and containers shall be identified and classified prior to packaging for shipment.

(ii) Drum or container staging areas shall be kept to the minimum number necessary to identify and classify materials safely and prepare them for transport.

(iii) Staging areas shall be provided with adequate access and egress routes.

(iv) Bulking of hazardous wastes shall be permitted only after a thorough characterization of the materials has been completed.

(9) *Tank and vault procedures.* (i) Tanks and vaults containing hazardous substances shall be handled in a manner similar to that for drums and containers, taking into consideration the size of the tank or vault.

(ii) Appropriate tank or vault entry procedures as described in the employer's safety and health plan shall be followed whenever employees must enter a tank or vault.

(k) *Decontamination—(1) General.* Procedures for all phases of decontamination shall be developed and implemented in accordance with this paragraph.

(2) *Decontamination procedures.* (i) A decontamination procedure shall be developed, communicated to employees and implemented before any employees or equipment may enter areas on site where potential for exposure to hazardous substances exists.

(ii) Standard operating procedures shall be developed to minimize employee contact with hazardous substances or with equipment that has contacted hazardous substances.

(iii) All employees leaving a contaminated area shall be appropriately decontaminated; all contaminated clothing and equipment leaving a contaminated area shall be appropriately disposed of or decontaminated.

(iv) Decontamination procedures shall be monitored by the site safety and health supervisor to determine their effectiveness. When such procedures are found to be ineffective, appropriate steps shall be taken to correct any deficiencies.

(3) *Location.* Decontamination shall be performed in geographical areas that will minimize the exposure of uncontaminated employees or equipment to contaminated employees or equipment.

(4) *Equipment and solvents.* All equipment and solvents used for decontamination shall be decontaminated or disposed of properly.

(5) *Personal protective clothing and equipment.* (i) Protective clothing and equipment shall be decontaminated, cleaned, laundered, maintained or replaced as needed to maintain their effectiveness.

(ii) Employees whose non-impermeable clothing becomes wetted with hazardous substances shall immediately remove that clothing and proceed to shower. The clothing shall be disposed of or decontaminated before it is removed from the work zone.

(6) *Unauthorized employees.* Unauthorized employees shall not remove protective clothing or equipment from change rooms.

(7) *Commercial laundries or cleaning establishments.* Commercial laundries or cleaning establishments that decontaminate protective clothing or equipment shall be informed of the potentially harmful effects of exposures to hazardous substances.

(8) *Showers and change rooms.* Where the decontamination procedure indicates a need for regular showers and change rooms outside of a contaminated area, they shall be provided and meet the requirements of 29 CFR 1910.141. If temperature conditions prevent the effective use of water, then other effective means for cleansing shall be provided and used.

(1) *Emergency response by employees at uncontrolled hazardous waste sites—(1) Emergency response plan.* (i) An emergency response plan shall be developed and implemented by all employers within the scope of paragraphs (a)(1)(i)–(ii) of this section to handle anticipated emergencies prior to the commencement of hazardous waste operations. The plan shall be in writing and available for inspection and copying by employees, their representatives, OSHA personnel and other governmental agencies with relevant responsibilities.

(ii) Employers who will evacuate their employees from the danger area when an emergency occurs, and who do not permit any of their employees to assist in handling the emergency, are exempt from the requirements of this paragraph if they provide an emergency action plan complying with 29 CFR 1910.38.

(2) *Elements of an emergency response plan.* The employer shall develop an emergency response plan for emergencies which shall address, as a minimum, the following:

- (i) Pre-emergency planning.
- (ii) Personnel roles, lines of authority, and communication.
- (iii) Emergency recognition and prevention.
- (iv) Safe distances and places of refuge.
- (v) Site security and control.
- (vi) Evacuation routes and procedures.
- (vii) Decontamination procedures which are not covered by the site safety and health plan.
- (viii) Emergency medical treatment and first aid.
- (ix) Emergency alerting and response procedures.
- (x) Critique of response and follow-up.
- (xi) PPE and emergency equipment.

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

(3) *Procedures for handling emergency incidents.* (i) In addition to the elements for the emergency response plan required in paragraph (1)(2) of this section, the following elements shall be included for emergency response plans:

(A) Site topography, layout, and prevailing weather conditions.

(B) Procedures for reporting incidents to local, state, and federal governmental agencies.

(ii) The emergency response plan shall be a separate section of the Site Safety and Health Plan.

(iii) The emergency response plan shall be compatible and integrated with the disaster, fire and/or emergency response plans of local, state, and federal agencies.

(iv) The emergency response plan shall be rehearsed regularly as part of the overall training program for site operations.

(v) The site emergency response plan shall be reviewed periodically and, as necessary, be amended to keep it current with new or changing site conditions or information.

(vi) An employee alarm system shall be installed in accordance with 29 CFR 1910.165 to notify employees of an emergency situation; to stop work activities if necessary; to lower background noise in order to speed communication; and to begin emergency procedures.

(vii) Based upon the information available at time of the emergency, the employer shall evaluate the incident and the site response capabilities and proceed with the appropriate steps to implement the site emergency response plan.

(m) *Illumination.* Areas accessible to employees shall be lighted to not less than the minimum illumination intensities listed in the following Table H-120.1 while any work is in progress:

TABLE H-120.1—MINIMUM ILLUMINATION INTENSITIES IN FOOT-CANDLES

| Foot-candles | Area or operations |
|--------------|--|
| 5 | General site areas. |
| 3 | Excavation and waste areas, accessways, active storage areas, loading platforms, refueling, and field maintenance areas. |
| 5 | Indoors: Warehouses, corridors, hallways, and exitways. |

TABLE H-120.1—MINIMUM ILLUMINATION INTENSITIES IN FOOT-CANDLES—Continued

| Foot-candles | Area or operations |
|--------------|---|
| 5 | Tunnels, shafts, and general underground work areas. (Exception: Minimum of 10 foot-candles is required at tunnel and shaft heading during drilling mucking, and scaling. Mine Safety and Health Administration approved cap lights shall be acceptable for use in the tunnel heading.) |
| 10 | General shops (e.g., mechanical and electrical equipment rooms, active storerooms, barracks or living quarters, locker or dressing rooms, dining areas, and indoor toilets and workrooms.) |
| 30 | First aid stations, infirmaries, and offices. |

(n) *Sanitation at temporary workplaces—(1) Potable water.* (i) An adequate supply of potable water shall be provided on the site.

(ii) Portable containers used to dispense drinking water shall be capable of being tightly closed, and equipped with a tap. Water shall not be dipped from containers.

(iii) Any container used to distribute drinking water shall be clearly marked as to the nature of its contents and not used for any other purpose.

(iv) Where single service cups (to be used but once) are supplied, both a sanitary container for the unused cups and a receptacle for disposing of the used cups shall be provided.

(2) *Nonpotable water.* (i) Outlets for nonpotable water, such as water for firefighting purposes, shall be identified to indicate clearly that the water is unsafe and is not to be used for drinking, washing, or cooking purposes.

(ii) There shall be no cross-connection, open or potential, between a system furnishing potable water and a system furnishing nonpotable water.

(3) *Toilet facilities.* (i) Toilets shall be provided for employees according to the following Table H-120.2.

TABLE H-120.2—TOILET FACILITIES

| Number of employees | Minimum number of facilities |
|------------------------------------|--|
| 20 or fewer | One. |
| More than 20, fewer than 200 | One toilet seat and one urinal per 40 employees. |
| More than 200 | One toilet seat and one urinal per 50 employees. |

(ii) Under temporary field conditions, provisions shall be made to assure that at least one toilet facility is available.

(iii) Hazardous waste sites not provided with a sanitary sewer shall be provided with the following toilet facilities unless prohibited by local codes:

- (A) Chemical toilets;
- (B) Recirculating toilets;
- (C) Combustion toilets; or
- (D) Flush toilets.

(iv) The requirements of this paragraph for sanitation facilities shall not apply to mobile crews having transportation readily available to nearby toilet facilities.

(v) Doors entering toilet facilities shall be provided with entrance locks controlled from inside the facility.

(4) *Food handling.* All food service facilities and operations for employees shall meet the applicable laws, ordinances, and regulations of the jurisdictions in which they are located.

(5) *Temporary sleeping quarters.* When temporary sleeping quarters are provided, they shall be heated, ventilated, and lighted.

(6) *Washing facilities.* The employer shall provide adequate washing facilities for employees engaged in operations where hazardous substances may be harmful to employees. Such facilities shall be in near proximity to the worksite; in areas where exposures are below permissible exposure limits and published exposure levels and which are under the controls of the employer; and shall be so equipped as to enable employees to remove hazardous substances from themselves.

(7) *Showers and change rooms.* When hazardous waste clean-up or removal operations commence on a site and the duration of the work will require six months or greater time to complete, the employer shall provide showers and change rooms for all employees exposed to hazardous substances and health hazards involved in hazardous waste clean-up or removal operations.

(i) Showers shall be provided and shall meet the requirements of 29 CFR 1910.141(d)(3).

(ii) Change rooms shall be provided and shall meet the requirements of 29 CFR 1910.141(e). Change rooms shall consist of two separate change areas separated by the shower area required in paragraph (n)(7)(i) of this section. One change area, with an exit leading

off the worksite, shall provide employees with a clean area where they can remove, store, and put on street clothing. The second area, with an exit to the worksite, shall provide employees with an area where they can put on, remove and store work clothing and personal protective equipment.

(iii) Showers and change rooms shall be located in areas where exposures are below the permissible exposure limits and published exposure levels. If this cannot be accomplished, then a ventilation system shall be provided that will supply air that is below the permissible exposure limits and published exposure levels.

(iv) Employers shall assure that employees shower at the end of their work shift and when leaving the hazardous waste site.

(o) *New technology programs.* (1) The employer shall develop and implement procedures for the introduction of effective new technologies and equipment developed for the improved protection of employees working with hazardous waste clean-up operations, and the same shall be implemented as part of the site safety and health program to assure that employee protection is being maintained.

(2) New technologies, equipment or control measures available to the industry, such as the use of foams, absorbents, adsorbents, neutralizers, or other means to suppress the level of air contaminants while excavating the site or for spill control, shall be evaluated by employers or their representatives. Such an evaluation shall be done to determine the effectiveness of the new methods, materials, or equipment before implementing their use on a large scale for enhancing employee protection. Information and data from manufacturers or suppliers may be used as part of the employer's evaluation effort. Such evaluations shall be made available to OSHA upon request.

(p) *Certain Operations Conducted Under the Resource Conservation and Recovery Act of 1976 (RCRA).* Employers conducting operations at treatment, storage and disposal (TSD) facilities specified in paragraph (a)(1)(iv) of this section shall provide and implement the programs specified in this paragraph. See the "Notes and Exceptions"

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

to paragraph (a)(2)(iii) of this section for employers not covered.)”.

(1) *Safety and health program.* The employer shall develop and implement a written safety and health program for employees involved in hazardous waste operations that shall be available for inspection by employees, their representatives and OSHA personnel. The program shall be designed to identify, evaluate and control safety and health hazards in their facilities for the purpose of employee protection, to provide for emergency response meeting the requirements of paragraph (p)(8) of this section and to address as appropriate site analysis, engineering controls, maximum exposure limits, hazardous waste handling procedures and uses of new technologies.

(2) *Hazard communication program.* The employer shall implement a hazard communication program meeting the requirements of 29 CFR 1910.1200 as part of the employer’s safety and program.

NOTE TO §1910.120: The exemption for hazardous waste provided in §1910.1200 is applicable to this section.

(3) *Medical surveillance program.* The employer shall develop and implement a medical surveillance program meeting the requirements of paragraph (f) of this section.

(4) *Decontamination program.* The employer shall develop and implement a decontamination procedure meeting the requirements of paragraph (k) of this section.

(5) *New technology program.* The employer shall develop and implement procedures meeting the requirements of paragraph (o) of this section for introducing new and innovative equipment into the workplace.

(6) *Material handling program.* Where employees will be handling drums or containers, the employer shall develop and implement procedures meeting the requirements of paragraphs (j)(1) (ii) through (viii) and (xi) of this section, as well as (j)(3) and (j)(8) of this section prior to starting such work.

(7) *Training program—(i) New employees.* The employer shall develop and implement a training program, which is part of the employer’s safety and health program, for employees exposed to health hazards or hazardous sub-

stances at TSD operations to enable the employees to perform their assigned duties and functions in a safe and healthful manner so as not endanger themselves or other employees. The initial training shall be for 24 hours and refresher training shall be for eight hours annually. Employees who have received the initial training required by this paragraph shall be given a written certificate attesting that they have successfully completed the necessary training.

(ii) *Current employees.* Employers who can show by an employee’s previous work experience and/or training that the employee has had training equivalent to the initial training required by this paragraph, shall be considered as meeting the initial training requirements of this paragraph as to that employee. Equivalent training includes the training that existing employees might have already received from actual site work experience. Current employees shall receive eight hours of refresher training annually.

(iii) *Trainers.* Trainers who teach initial training shall have satisfactorily completed a training course for teaching the subjects they are expected to teach or they shall have the academic credentials and instruction experience necessary to demonstrate a good command of the subject matter of the courses and competent instructional skills.

(8) *Emergency response program—(i) Emergency response plan.* An emergency response plan shall be developed and implemented by all employers. Such plans need not duplicate any of the subjects fully addressed in the employer’s contingency planning required by permits, such as those issued by the U.S. Environmental Protection Agency, provided that the contingency plan is made part of the emergency response plan. The emergency response plan shall be a written portion of the employer’s safety and health program required in paragraph (p)(1) of this section. Employers who will evacuate their employees from the worksite location when an emergency occurs and who do not permit any of their employees to assist in handling the emergency are exempt from the requirements of paragraph (p)(8) if they provide an

emergency action plan complying with 29 CFR 1910.38.

(ii) *Elements of an emergency response plan.* The employer shall develop an emergency response plan for emergencies which shall address, as a minimum, the following areas to the extent that they are not addressed in any specific program required in this paragraph:

- (A) Pre-emergency planning and coordination with outside parties.
- (B) Personnel roles, lines of authority, and communication.
- (C) Emergency recognition and prevention.
- (D) Safe distances and places of refuge.
- (E) Site security and control.
- (F) Evacuation routes and procedures.
- (G) Decontamination procedures.
- (H) Emergency medical treatment and first aid.
- (I) Emergency alerting and response procedures.
- (J) Critique of response and follow-up.
- (K) PPE and emergency equipment.

(iii) *Training.* (A) Training for emergency response employees shall be completed before they are called upon to perform in real emergencies. Such training shall include the elements of the emergency response plan, standard operating procedures the employer has established for the job, the personal protective equipment to be worn and procedures for handling emergency incidents.

Exception #1: An employer need not train all employees to the degree specified if the employer divides the work force in a manner such that a sufficient number of employees who have responsibility to control emergencies have the training specified, and all other employees, who may first respond to an emergency incident, have sufficient awareness training to recognize that an emergency response situation exists and that they are instructed in that case to summon the fully trained employees and not attempt control activities for which they are not trained.

Exception #2: An employer need not train all employees to the degree specified if arrangements have been made in advance for an outside fully-trained emergency response team to respond in a reasonable period and all employees, who may come to the incident first, have sufficient awareness training to

recognize that an emergency response situation exists and they have been instructed to call the designated outside fully-trained emergency response team for assistance.

(B) Employee members of TSD facility emergency response organizations shall be trained to a level of competence in the recognition of health and safety hazards to protect themselves and other employees. This would include training in the methods used to minimize the risk from safety and health hazards; in the safe use of control equipment; in the selection and use of appropriate personal protective equipment; in the safe operating procedures to be used at the incident scene; in the techniques of coordination with other employees to minimize risks; in the appropriate response to over exposure from health hazards or injury to themselves and other employees; and in the recognition of subsequent symptoms which may result from over exposures.

(C) The employer shall certify that each covered employee has attended and successfully completed the training required in paragraph (p)(8)(iii) of this section, or shall certify the employee's competency at least yearly. The method used to demonstrate competency for certification of training shall be recorded and maintained by the employer.

(iv) *Procedures for handling emergency incidents.* (A) In addition to the elements for the emergency response plan required in paragraph (p)(8)(ii) of this section, the following elements shall be included for emergency response plans to the extent that they do not repeat any information already contained in the emergency response plan:

(1) Site topography, layout, and prevailing weather conditions.

(2) Procedures for reporting incidents to local, state, and federal governmental agencies.

(B) The emergency response plan shall be compatible and integrated with the disaster, fire and/or emergency response plans of local, state, and federal agencies.

(C) The emergency response plan shall be rehearsed regularly as part of the overall training program for site operations.

§ 1910.120

29 CFR Ch. XVII (7-1-23 Edition)

(D) The site emergency response plan shall be reviewed periodically and, as necessary, be amended to keep it current with new or changing site conditions or information.

(E) An employee alarm system shall be installed in accordance with 29 CFR 1910.165 to notify employees of an emergency situation; to stop work activities if necessary; to lower background noise in order to speed communication; and to begin emergency procedures.

(F) Based upon the information available at time of the emergency, the employer shall evaluate the incident and the site response capabilities and proceed with the appropriate steps to implement the site emergency response plan.

(q) *Emergency response to hazardous substance releases.* This paragraph covers employers whose employees are engaged in emergency response no matter where it occurs except that it does not cover employees engaged in operations specified in paragraphs (a)(1)(i) through (a)(1)(iv) of this section. Those emergency response organizations who have developed and implemented programs equivalent to this paragraph for handling releases of hazardous substances pursuant to section 303 of the Superfund Amendments and Reauthorization Act of 1986 (Emergency Planning and Community Right-to-Know Act of 1986, 42 U.S.C. 11003) shall be deemed to have met the requirements of this paragraph.

(1) *Emergency response plan.* An emergency response plan shall be developed and implemented to handle anticipated emergencies prior to the commencement of emergency response operations. The plan shall be in writing and available for inspection and copying by employees, their representatives and OSHA personnel. Employers who will evacuate their employees from the danger area when an emergency occurs, and who do not permit any of their employees to assist in handling the emergency, are exempt from the requirements of this paragraph if they provide an emergency action plan in accordance with 29 CFR 1910.38.

(2) *Elements of an emergency response plan.* The employer shall develop an emergency response plan for emergencies which shall address, as a min-

imum, the following to the extent that they are not addressed elsewhere:

- (i) Pre-emergency planning and coordination with outside parties.
- (ii) Personnel roles, lines of authority, training, and communication.
- (iii) Emergency recognition and prevention.
- (iv) Safe distances and places of refuge.
- (v) Site security and control.
- (vi) Evacuation routes and procedures.
- (vii) Decontamination.
- (viii) Emergency medical treatment and first aid.
- (ix) Emergency alerting and response procedures.
- (x) Critique of response and follow-up.
- (xi) PPE and emergency equipment.
- (xii) Emergency response organizations may use the local emergency response plan or the state emergency response plan or both, as part of their emergency response plan to avoid duplication. Those items of the emergency response plan that are being properly addressed by the SARA Title III plans may be substituted into their emergency plan or otherwise kept together for the employer and employee's use.

(3) *Procedures for handling emergency response.* (i) The senior emergency response official responding to an emergency shall become the individual in charge of a site-specific Incident Command System (ICS). All emergency responders and their communications shall be coordinated and controlled through the individual in charge of the ICS assisted by the senior official present for each employer.

NOTE TO PARAGRAPH (q)(3)(i): The "senior official" at an emergency response is the most senior official on the site who has the responsibility for controlling the operations at the site. Initially it is the senior officer on the first-due piece of responding emergency apparatus to arrive on the incident scene. As more senior officers arrive (i.e., battalion chief, fire chief, state law enforcement official, site coordinator, etc.) the position is passed up the line of authority which has been previously established.

(ii) The individual in charge of the ICS shall identify, to the extent possible, all hazardous substances or conditions present and shall address as appropriate site analysis, use of engineering controls, maximum exposure limits, hazardous substance handling procedures, and use of any new technologies.

(iii) Based on the hazardous substances and/or conditions present, the individual in charge of the ICS shall implement appropriate emergency operations, and assure that the personal protective equipment worn is appropriate for the hazards to be encountered. However, personal protective equipment shall meet, at a minimum, the criteria contained in 29 CFR 1910.156(e) when worn while performing fire fighting operations beyond the incipient stage for any incident.

(iv) Employees engaged in emergency response and exposed to hazardous substances presenting an inhalation hazard or potential inhalation hazard shall wear positive pressure self-contained breathing apparatus while engaged in emergency response, until such time that the individual in charge of the ICS determines through the use of air monitoring that a decreased level of respiratory protection will not result in hazardous exposures to employees.

(v) The individual in charge of the ICS shall limit the number of emergency response personnel at the emergency site, in those areas of potential or actual exposure to incident or site hazards, to those who are actively performing emergency operations. However, operations in hazardous areas shall be performed using the buddy system in groups of two or more.

(vi) Back-up personnel shall stand by with equipment ready to provide assistance or rescue. Advance first aid support personnel, as a minimum, shall also stand by with medical equipment and transportation capability.

(vii) The individual in charge of the ICS shall designate a safety official, who is knowledgeable in the operations being implemented at the emergency response site, with specific responsibility to identify and evaluate hazards and to provide direction with respect to the safety of operations for the emergency at hand.

(viii) When activities are judged by the safety official to be an IDLH condition and/or to involve an imminent danger condition, the safety official shall have the authority to alter, suspend, or terminate those activities. The safety official shall immediately inform the individual in charge of the ICS of any actions needed to be taken to correct these hazards at the emergency scene.

(ix) After emergency operations have terminated, the individual in charge of the ICS shall implement appropriate decontamination procedures.

(x) When deemed necessary for meeting the tasks at hand, approved self-contained compressed air breathing apparatus may be used with approved cylinders from other approved self-contained compressed air breathing apparatus provided that such cylinders are of the same capacity and pressure rating. All compressed air cylinders used with self-contained breathing apparatus shall meet U.S. Department of Transportation and National Institute for Occupational Safety and Health criteria.

(4) *Skilled support personnel.* Personnel, not necessarily an employer's own employees, who are skilled in the operation of certain equipment, such as mechanized earth moving or digging equipment or crane and hoisting equipment, and who are needed temporarily to perform immediate emergency support work that cannot reasonably be performed in a timely fashion by an employer's own employees, and who will be or may be exposed to the hazards at an emergency response scene, are not required to meet the training required in this paragraph for the employer's regular employees. However, these personnel shall be given an initial briefing at the site prior to their participation in any emergency response. The initial briefing shall include instruction in the wearing of appropriate personal protective equipment, what chemical hazards are involved, and what duties are to be performed. All other appropriate safety and health precautions provided to the employer's own employees shall be used to assure the safety and health of these personnel.

(5) *Specialist employees.* Employees who, in the course of their regular job duties, work with and are trained in the hazards of specific hazardous substances, and who will be called upon to provide technical advice or assistance at a hazardous substance release incident to the individual in charge, shall receive training or demonstrate competency in the area of their specialization annually.

(6) *Training.* Training shall be based on the duties and function to be performed by each responder of an emergency response organization. The skill and knowledge levels required for all new responders, those hired after the effective date of this standard, shall be conveyed to them through training before they are permitted to take part in actual emergency operations on an incident. Employees who participate, or are expected to participate, in emergency response, shall be given training in accordance with the following paragraphs:

(i) *First responder awareness level.* First responders at the awareness level are individuals who are likely to witness or discover a hazardous substance release and who have been trained to initiate an emergency response sequence by notifying the proper authorities of the release. They would take no further action beyond notifying the authorities of the release. First responders at the awareness level shall have sufficient training or have had sufficient experience to objectively demonstrate competency in the following areas:

(A) An understanding of what hazardous substances are, and the risks associated with them in an incident.

(B) An understanding of the potential outcomes associated with an emergency created when hazardous substances are present.

(C) The ability to recognize the presence of hazardous substances in an emergency.

(D) The ability to identify the hazardous substances, if possible.

(E) An understanding of the role of the first responder awareness individual in the employer's emergency response plan including site security and control and the U.S. Department of

Transportation's Emergency Response Guidebook.

(F) The ability to realize the need for additional resources, and to make appropriate notifications to the communication center.

(ii) *First responder operations level.* First responders at the operations level are individuals who respond to releases or potential releases of hazardous substances as part of the initial response to the site for the purpose of protecting nearby persons, property, or the environment from the effects of the release. They are trained to respond in a defensive fashion without actually trying to stop the release. Their function is to contain the release from a safe distance, keep it from spreading, and prevent exposures. First responders at the operational level shall have received at least eight hours of training or have had sufficient experience to objectively demonstrate competency in the following areas in addition to those listed for the awareness level and the employer shall so certify:

(A) Knowledge of the basic hazard and risk assessment techniques.

(B) Know how to select and use proper personal protective equipment provided to the first responder operational level.

(C) An understanding of basic hazardous materials terms.

(D) Know how to perform basic control, containment and/or confinement operations within the capabilities of the resources and personal protective equipment available with their unit.

(E) Know how to implement basic decontamination procedures.

(F) An understanding of the relevant standard operating procedures and termination procedures.

(iii) *Hazardous materials technician.* Hazardous materials technicians are individuals who respond to releases or potential releases for the purpose of stopping the release. They assume a more aggressive role than a first responder at the operations level in that they will approach the point of release in order to plug, patch or otherwise stop the release of a hazardous substance. Hazardous materials technicians shall have received at least 24

hours of training equal to the first responder operations level and in addition have competency in the following areas and the employer shall so certify:

(A) Know how to implement the employer's emergency response plan.

(B) Know the classification, identification and verification of known and unknown materials by using field survey instruments and equipment.

(C) Be able to function within an assigned role in the Incident Command System.

(D) Know how to select and use proper specialized chemical personal protective equipment provided to the hazardous materials technician.

(E) Understand hazard and risk assessment techniques.

(F) Be able to perform advance control, containment, and/or confinement operations within the capabilities of the resources and personal protective equipment available with the unit.

(G) Understand and implement decontamination procedures.

(H) Understand termination procedures.

(I) Understand basic chemical and toxicological terminology and behavior.

(iv) *Hazardous materials specialist.* Hazardous materials specialists are individuals who respond with and provide support to hazardous materials technicians. Their duties parallel those of the hazardous materials technician, however, those duties require a more directed or specific knowledge of the various substances they may be called upon to contain. The hazardous materials specialist would also act as the site liaison with Federal, state, local and other government authorities in regards to site activities. Hazardous materials specialists shall have received at least 24 hours of training equal to the technician level and in addition have competency in the following areas and the employer shall so certify:

(A) Know how to implement the local emergency response plan.

(B) Understand classification, identification and verification of known and unknown materials by using advanced survey instruments and equipment.

(C) Know of the state emergency response plan.

(D) Be able to select and use proper specialized chemical personal protective equipment provided to the hazardous materials specialist.

(E) Understand in-depth hazard and risk techniques.

(F) Be able to perform specialized control, containment, and/or confinement operations within the capabilities of the resources and personal protective equipment available.

(G) Be able to determine and implement decontamination procedures.

(H) Have the ability to develop a site safety and control plan.

(I) Understand chemical, radiological and toxicological terminology and behavior.

(v) *On scene incident commander.* Incident commanders, who will assume control of the incident scene beyond the first responder awareness level, shall receive at least 24 hours of training equal to the first responder operations level and in addition have competency in the following areas and the employer shall so certify:

(A) Know and be able to implement the employer's incident command system.

(B) Know how to implement the employer's emergency response plan.

(C) Know and understand the hazards and risks associated with employees working in chemical protective clothing.

(D) Know how to implement the local emergency response plan.

(E) Know of the state emergency response plan and of the Federal Regional Response Team.

(F) Know and understand the importance of decontamination procedures.

(7) *Trainers.* Trainers who teach any of the above training subjects shall have satisfactorily completed a training course for teaching the subjects they are expected to teach, such as the courses offered by the U.S. National Fire Academy, or they shall have the training and/or academic credentials and instructional experience necessary to demonstrate competent instructional skills and a good command of the subject matter of the courses they are to teach.

(8) *Refresher training.* (i) Those employees who are trained in accordance with paragraph (q)(6) of this section

§ 1910.120

shall receive annual refresher training of sufficient content and duration to maintain their competencies, or shall demonstrate competency in those areas at least yearly.

(ii) A statement shall be made of the training or competency, and if a statement of competency is made, the employer shall keep a record of the methodology used to demonstrate competency.

(9) *Medical surveillance and consultation.* (i) Members of an organized and designated HAZMAT team and hazardous materials specialists shall receive a baseline physical examination and be provided with medical surveillance as required in paragraph (f) of this section.

(ii) Any emergency response employees who exhibits signs or symptoms which may have resulted from exposure to hazardous substances during the course of an emergency incident, either immediately or subsequently, shall be provided with medical consultation as required in paragraph (f)(3)(ii) of this section.

(10) *Chemical protective clothing.* Chemical protective clothing and equipment to be used by organized and designated HAZMAT team members, or to be used by hazardous materials specialists, shall meet the requirements of paragraphs (g) (3) through (5) of this section.

(11) *Post-emergency response operations.* Upon completion of the emergency response, if it is determined that it is necessary to remove hazardous substances, health hazards, and materials contaminated with them (such as contaminated soil or other elements of the natural environment) from the site of the incident, the employer conducting the clean-up shall comply with one of the following:

(i) Meet all of the requirements of paragraphs (b) through (o) of this section; or

(ii) Where the clean-up is done on plant property using plant or workplace employees, such employees shall have completed the training requirements of the following: 29 CFR 1910.38, 1910.134, 1910.1200, and other appropriate safety and health training made necessary by the tasks they are expected to perform such as personal pro-

29 CFR Ch. XVII (7–1–23 Edition)

ective equipment and decontamination procedures. All equipment to be used in the performance of the clean-up work shall be in serviceable condition and shall have been inspected prior to use.

APPENDICES TO § 1910.120—HAZARDOUS WASTE OPERATIONS AND EMERGENCY RESPONSE

NOTE: The following appendices serve as non-mandatory guidelines to assist employees and employers in complying with the appropriate requirements of this section. However paragraph 1910.120(g) makes mandatory in certain circumstances the use of Level A and Level B PPE protection.

APPENDIX A TO § 1910.120—PERSONAL PROTECTIVE EQUIPMENT TEST METHODS

This appendix sets forth the non-mandatory examples of tests which may be used to evaluate compliance with § 1910.120 (g)(4) (ii) and (iii). Other tests and other challenge agents may be used to evaluate compliance.

A. *Totally-encapsulating chemical protective suit pressure test*

1.0—Scope

1.1 This practice measures the ability of a gas tight totally-encapsulating chemical protective suit material, seams, and closures to maintain a fixed positive pressure. The results of this practice allow the gas tight integrity of a totally-encapsulating chemical protective suit to be evaluated.

1.2 Resistance of the suit materials to permeation, penetration, and degradation by specific hazardous substances is not determined by this test method.

2.0—Definition of terms

2.1 *Totally-encapsulated chemical protective suit (TECP suit)* means a full body garment which is constructed of protective clothing materials; covers the wearer's torso, head, arms, legs and respirator; may cover the wearer's hands and feet with tightly attached gloves and boots; completely encloses the wearer and respirator by itself or in combination with the wearer's gloves and boots.

2.2 *Protective clothing material* means any material or combination of materials used in an item of clothing for the purpose of isolating parts of the body from direct contact with a potentially hazardous liquid or gaseous chemicals.

2.3 *Gas tight* means, for the purpose of this test method, the limited flow of a gas under pressure from the inside of a TECP suit to atmosphere at a prescribed pressure and time interval.

3.0—Summary of test method

3.1 The TECP suit is visually inspected and modified for the test. The test apparatus is attached to the suit to permit inflation to

the pre-test suit expansion pressure for removal of suit wrinkles and creases. The pressure is lowered to the test pressure and monitored for three minutes. If the pressure drop is excessive, the TECP suit fails the test and is removed from service. The test is repeated after leak location and repair.

4.0—Required Supplies

4.1 Source of compressed air.

4.2 Test apparatus for suit testing, including a pressure measurement device with a sensitivity of at least ¼ inch water gauge.

4.3 Vent valve closure plugs or sealing tape.

4.4 Soapy water solution and soft brush.

4.5 Stop watch or appropriate timing device.

5.0—Safety Precautions

5.1 Care shall be taken to provide the correct pressure safety devices required for the source of compressed air used.

6.0—Test Procedure

6.1 Prior to each test, the tester shall perform a visual inspection of the suit. Check the suit for seam integrity by visually examining the seams and gently pulling on the seams. Ensure that all air supply lines, fittings, visor, zippers, and valves are secure and show no signs of deterioration.

6.1.1 Seal off the vent valves along with any other normal inlet or exhaust points (such as umbilical air line fittings or face piece opening) with tape or other appropriate means (caps, plugs, fixture, etc.). Care should be exercised in the sealing process not to damage any of the suit components.

6.1.2 Close all closure assemblies.

6.1.3 Prepare the suit for inflation by providing an improvised connection point on the suit for connecting an airline. Attach the pressure test apparatus to the suit to permit suit inflation from a compressed air source equipped with a pressure indicating regulator. The leak tightness of the pressure test apparatus should be tested before and after each test by closing off the end of the tubing attached to the suit and assuring a pressure of three inches water gauge for three minutes can be maintained. If a component is removed for the test, that component shall be replaced and a second test conducted with another component removed to permit a complete test of the ensemble.

6.1.4 The pre-test expansion pressure (A) and the suit test pressure (B) shall be supplied by the suit manufacturer, but in no case shall they be less than: (A) = three inches water gauge; and (B) = two inches water gauge. The ending suit pressure (C) shall be no less than 80 percent of the test pressure (B); i.e., the pressure drop shall not exceed 20 percent of the test pressure (B).

6.1.5 Inflate the suit until the pressure inside is equal to pressure (A), the pre-test expansion suit pressure. Allow at least one minute to fill out the wrinkles in the suit. Release sufficient air to reduce the suit pres-

sure to pressure (B), the suit test pressure. Begin timing. At the end of three minutes, record the suit pressure as pressure (C), the ending suit pressure. The difference between the suit test pressure and the ending suit test pressure (B - C) shall be defined as the suit pressure drop.

6.1.6 If the suit pressure drop is more than 20 percent of the suit test pressure (B) during the three-minute test period, the suit fails the test and shall be removed from service.

7.0—Retest Procedure

7.1 If the suit fails the test check for leaks by inflating the suit to pressure (A) and brushing or wiping the entire suit (including seams, closures, lens gaskets, glove-to-sleeve joints, etc.) with a mild soap and water solution. Observe the suit for the formation of soap bubbles, which is an indication of a leak. Repair all identified leaks.

7.2 Retest the TECP suit as outlined in Test procedure 6.0.

8.0—Report

8.1 Each TECP suit tested by this practice shall have the following information recorded:

8.1.1 Unique identification number, identifying brand name, date of purchase, material of construction, and unique fit features, e.g., special breathing apparatus.

8.1.2 The actual values for test pressures (A), (B), and (C) shall be recorded along with the specific observation times. If the ending pressure (C) is less than 80 percent of the test pressure (B), the suit shall be identified as failing the test. When possible, the specific leak location shall be identified in the test records. Retest pressure data shall be recorded as an additional test.

8.1.3 The source of the test apparatus used shall be identified and the sensitivity of the pressure gauge shall be recorded.

8.1.4 Records shall be kept for each pressure test even if repairs are being made at the test location.

CAUTION

Visually inspect all parts of the suit to be sure they are positioned correctly and secured tightly before putting the suit back into service. Special care should be taken to examine each exhaust valve to make sure it is not blocked.

Care should also be exercised to assure that the inside and outside of the suit is completely dry before it is put into storage.

B. Totally-encapsulating chemical protective suit qualitative leak test

1.0—Scope

1.1 This practice semi-qualitatively tests gas tight totally-encapsulating chemical protective suit integrity by detecting inward leakage of ammonia vapor. Since no modifications are made to the suit to carry out

this test, the results from this practice provide a realistic test for the integrity of the entire suit.

1.2 Resistance of the suit materials to permeation, penetration, and degradation is not determined by this test method. ASTM test methods are available to test suit materials for these characteristics and the tests are usually conducted by the manufacturers of the suits.

2.0—Definition of terms

2.1 *Totally-encapsulated chemical protective suit (TECP suit)* means a full body garment which is constructed of protective clothing materials; covers the wearer's torso, head, arms, legs and respirator; may cover the wearer's hands and feet with tightly attached gloves and boots; completely encloses the wearer and respirator by itself or in combination with the wearer's gloves, and boots.

2.2 *Protective clothing material* means any material or combination of materials used in an item of clothing for the purpose of isolating parts of the body from direct contact with a potentially hazardous liquid or gaseous chemicals.

2.3 *Gas tight* means, for the purpose of this test method, the limited flow of a gas under pressure from the inside of a TECP suit to atmosphere at a prescribed pressure and time interval.

2.4 *Intrusion Coefficient* means a number expressing the level of protection provided by a gas tight totally-encapsulating chemical protective suit. The intrusion coefficient is calculated by dividing the test room challenge agent concentration by the concentration of challenge agent found inside the suit. The accuracy of the intrusion coefficient is dependent on the challenge agent monitoring methods. The larger the intrusion coefficient the greater the protection provided by the TECP suit.

3.0—Summary of recommended practice

3.1 The volume of concentrated aqueous ammonia solution (ammonia hydroxide NH₃ OH) required to generate the test atmosphere is determined using the directions outlined in 6.1. The suit is donned by a person wearing the appropriate respiratory equipment (either a positive pressure self-contained breathing apparatus or a positive pressure supplied air respirator) and worn inside the enclosed test room. The concentrated aqueous ammonia solution is taken by the suited individual into the test room and poured into an open plastic pan. A two-minute evaporation period is observed before the test room concentration is measured, using a high range ammonia length of stain detector tube. When the ammonia vapor reaches a concentration of between 1000 and 1200 ppm, the suited individual starts a standardized exercise protocol to stress and flex the suit. After this protocol is completed, the test room concentration is measured again. The suited individual exits

the test room and his stand-by person measures the ammonia concentration inside the suit using a low range ammonia length of stain detector tube or other more sensitive ammonia detector. A stand-by person is required to observe the test individual during the test procedure; aid the person in donning and doffing the TECP suit; and monitor the suit interior. The intrusion coefficient of the suit can be calculated by dividing the average test area concentration by the interior suit concentration. A colorimetric ammonia indicator strip of bromophenol blue or equivalent is placed on the inside of the suit face piece lens so that the suited individual is able to detect a color change and know if the suit has a significant leak. If a color change is observed the individual shall leave the test room immediately.

4.0—Required supplies

4.1 A supply of concentrated aqueous ammonium hydroxide (58% by weight).

4.2 A supply of bromophenol/blue indicating paper or equivalent, sensitive to 5–10 ppm ammonia or greater over a two-minute period of exposure. [pH 3.0 (yellow) to pH 4.6 (blue)]

4.3 A supply of high range (0.5–10 volume percent) and low range (5–700 ppm) detector tubes for ammonia and the corresponding sampling pump. More sensitive ammonia detectors can be substituted for the low range detector tubes to improve the sensitivity of this practice.

4.4 A shallow plastic pan (PVC) at least 12"×14"×1" and a half pint plastic container (PVC) with tightly closing lid.

4.5 A graduated cylinder or other volumetric measuring device of at least 50 milliliters in volume with an accuracy of at least ±1 milliliters.

5.0—Safety precautions

5.1 Concentrated aqueous ammonium hydroxide, NH₃ OH, is a corrosive volatile liquid requiring eye, skin, and respiratory protection. The person conducting the test shall review the SDS for aqueous ammonia.

5.2 Since the established permissible exposure limit for ammonia is 35 ppm as a 15 minute STEL, only persons wearing a positive pressure self-contained breathing apparatus or a positive pressure supplied air respirator shall be in the chamber. Normally only the person wearing the totally-encapsulating suit will be inside the chamber. A stand-by person shall have a positive pressure self-contained breathing apparatus, or a positive pressure supplied air respirator available to enter the test area should the suited individual need assistance.

5.3 A method to monitor the suited individual must be used during this test. Visual contact is the simplest but other methods using communication devices are acceptable.

5.4 The test room shall be large enough to allow the exercise protocol to be carried out and then to be ventilated to allow for easy

exhaust of the ammonia test atmosphere after the test(s) are completed.

5.5 Individuals shall be medically screened for the use of respiratory protection and checked for allergies to ammonia before participating in this test procedure.

6.0—Test procedure

6.1.1 Measure the test area to the nearest foot and calculate its volume in cubic feet. Multiply the test area volume by 0.2 milliliters of concentrated aqueous ammonia solution per cubic foot of test area volume to determine the approximate volume of concentrated aqueous ammonia required to generate 1000 ppm in the test area.

6.1.2 Measure this volume from the supply of concentrated aqueous ammonia and place it into a closed plastic container.

6.1.3 Place the container, several high range ammonia detector tubes, and the pump in the clean test pan and locate it near the test area entry door so that the suited individual has easy access to these supplies.

6.2.1 In a non-contaminated atmosphere, open a pre-sealed ammonia indicator strip and fasten one end of the strip to the inside of the suit face shield lens where it can be seen by the wearer. Moisten the indicator strip with distilled water. Care shall be taken not to contaminate the detector part of the indicator paper by touching it. A small piece of masking tape or equivalent should be used to attach the indicator strip to the interior of the suit face shield.

6.2.2 If problems are encountered with this method of attachment, the indicator strip can be attached to the outside of the respirator face piece lens being used during the test.

6.3 Don the respiratory protective device normally used with the suit, and then don the TECP suit to be tested. Check to be sure all openings which are intended to be sealed (zippers, gloves, etc.) are completely sealed. DO NOT, however, plug off any venting valves.

6.4 Step into the enclosed test room such as a closet, bathroom, or test booth, equipped with an exhaust fan. No air should be exhausted from the chamber during the test because this will dilute the ammonia challenge concentrations.

6.5 Open the container with the pre-measured volume of concentrated aqueous ammonia within the enclosed test room, and pour the liquid into the empty plastic test pan. Wait two minutes to allow for adequate volatilization of the concentrated aqueous ammonia. A small mixing fan can be used near the evaporation pan to increase the evaporation rate of the ammonia solution.

6.6 After two minutes a determination of the ammonia concentration within the chamber should be made using the high range colorimetric detector tube. A concentration of 1000 ppm ammonia or greater

shall be generated before the exercises are started.

6.7 To test the integrity of the suit the following four minute exercise protocol should be followed:

6.7.1 Raising the arms above the head with at least 15 raising motions completed in one minute.

6.7.2 Walking in place for one minute with at least 15 raising motions of each leg in a one-minute period.

6.7.3 Touching the toes with a least 10 complete motions of the arms from above the head to touching of the toes in a one-minute period.

6.7.4 Knee bends with at least 10 complete standing and squatting motions in a one-minute period.

6.8 If at any time during the test the colorimetric indicating paper should change colors, the test should be stopped and section 6.10 and 6.12 initiated (See ¶4.2).

6.9 After completion of the test exercise, the test area concentration should be measured again using the high range colorimetric detector tube.

6.10 Exit the test area.

6.11 The opening created by the suit zipper or other appropriate suit penetration should be used to determine the ammonia concentration in the suit with the low range length of stain detector tube or other ammonia monitor. The internal TECP suit air should be sampled far enough from the enclosed test area to prevent a false ammonia reading.

6.12 After completion of the measurement of the suit interior ammonia concentration the test is concluded and the suit is doffed and the respirator removed.

6.13 The ventilating fan for the test room should be turned on and allowed to run for enough time to remove the ammonia gas. The fan shall be vented to the outside of the building.

6.14 Any detectable ammonia in the suit interior (five ppm ammonia (NH₃) or more for the length of stain detector tube) indicates that the suit has failed the test. When other ammonia detectors are used a lower level of detection is possible, and it should be specified as the pass/fail criteria.

6.15 By following this test method, an intrusion coefficient of approximately 200 or more can be measured with the suit in a completely operational condition. If the intrusion coefficient is 200 or more, then the suit is suitable for emergency response and field use.

7.0—Retest procedures

7.1 If the suit fails this test, check for leaks by following the pressure test in test A above.

7.2 Retest the TECP suit as outlined in the test procedure 6.0.

8.0—Report

8.1 Each gas tight totally-encapsulating chemical protective suit tested by this practice shall have the following information recorded.

8.1.1 Unique identification number, identifying brand name, date of purchase, material of construction, and unique suit features; e.g., special breathing apparatus.

8.1.2 General description of test room used for test.

8.1.3 Brand name and purchase date of ammonia detector strips and color change data.

8.1.4 Brand name, sampling range, and expiration date of the length of stain ammonia detector tubes. The brand name and model of the sampling pump should also be recorded. If another type of ammonia detector is used, it should be identified along with its minimum detection limit for ammonia.

8.1.5 Actual test results shall list the two test area concentrations, their average, the interior suit concentration, and the calculated intrusion coefficient. Retest data shall be recorded as an additional test.

8.2 The evaluation of the data shall be specified as "suit passed" or "suit failed," and the date of the test. Any detectable ammonia (five ppm or greater for the length of stain detector tube) in the suit interior indicates the suit has failed this test. When other ammonia detectors are used, a lower level of detection is possible and it should be specified as the pass fail criteria.

CAUTION

Visually inspect all parts of the suit to be sure they are positioned correctly and secured tightly before putting the suit back into service. Special care should be taken to examine each exhaust valve to make sure it is not blocked.

Care should also be exercised to assure that the inside and outside of the suit is completely dry before it is put into storage.

APPENDIX B TO § 1910.120—GENERAL DESCRIPTION AND DISCUSSION OF THE LEVELS OF PROTECTION AND PROTECTIVE GEAR

This appendix sets forth information about personal protective equipment (PPE) protection levels which may be used to assist employers in complying with the PPE requirements of this section.

As required by the standard, PPE must be selected which will protect employees from the specific hazards which they are likely to encounter during their work on-site.

Selection of the appropriate PPE is a complex process which should take into consideration a variety of factors. Key factors involved in this process are identification of the hazards, or suspected hazards; their routes of potential hazard to employees (inhalation, skin absorption, ingestion, and eye or skin contact); and the performance of the

PPE materials (and seams) in providing a barrier to these hazards. The amount of protection provided by PPE is material-hazard specific. That is, protective equipment materials will protect well against some hazardous substances and poorly, or not at all, against others. In many instances, protective equipment materials cannot be found which will provide continuous protection from the particular hazardous substance. In these cases the breakthrough time of the protective material should exceed the work durations.

Other factors in this selection process to be considered are matching the PPE to the employee's work requirements and task-specific conditions. The durability of PPE materials, such as tear strength and seam strength, should be considered in relation to the employee's tasks. The effects of PPE in relation to heat stress and task duration are a factor in selecting and using PPE. In some cases layers of PPE may be necessary to provide sufficient protection, or to protect expensive PPE inner garments, suits or equipment.

The more that is known about the hazards at the site, the easier the job of PPE selection becomes. As more information about the hazards and conditions at the site becomes available, the site supervisor can make decisions to up-grade or down-grade the level of PPE protection to match the tasks at hand.

The following are guidelines which an employer can use to begin the selection of the appropriate PPE. As noted above, the site information may suggest the use of combinations of PPE selected from the different protection levels (i.e., A, B, C, or D) as being more suitable to the hazards of the work. It should be cautioned that the listing below does not fully address the performance of the specific PPE material in relation to the specific hazards at the job site, and that PPE selection, evaluation and re-selection is an ongoing process until sufficient information about the hazards and PPE performance is obtained.

Part A. Personal protective equipment is divided into four categories based on the degree of protection afforded. (See part B of this appendix for further explanation of Levels A, B, C, and D hazards.)

1. *Level A*—To be selected when the greatest level of skin, respiratory, and eye protection is required.

The following constitute Level A equipment; it may be used as appropriate;

1. Positive pressure, full face-piece self-contained breathing apparatus (SCBA), or positive pressure supplied air respirator with escape SCBA, approved by the National Institute for Occupational Safety and Health (NIOSH).

2. Totally-encapsulating chemical-protective suit.

3. Coveralls.¹
4. Long underwear.¹
5. Gloves, outer, chemical-resistant.
6. Gloves, inner, chemical-resistant.
7. Boots, chemical-resistant, steel toe and shank.
8. Hard hat (under suit).¹
9. Disposable protective suit, gloves and boots (depending on suit construction, may be worn over totally-encapsulating suit).

II. *Level B*—The highest level of respiratory protection is necessary but a lesser level of skin protection is needed.

The following constitute Level B equipment; it may be used as appropriate.

1. Positive pressure, full-facepiece self-contained breathing apparatus (SCBA), or positive pressure supplied air respirator with escape SCBA (NIOSH approved).
2. Hooded chemical-resistant clothing (overall and long-sleeved jacket; coveralls; one or two-piece chemical-splash suit; disposable chemical-resistant overalls).
3. Coveralls.¹
4. Gloves, outer, chemical-resistant.
5. Gloves, inner, chemical-resistant.
6. Boots, outer, chemical-resistant steel toe and shank.
7. Boot-covers, outer, chemical-resistant (disposable).¹
8. Hard hat.¹
9. [Reserved]
10. Face shield.¹

III. *Level C*—The concentration(s) and type(s) of airborne substance(s) is known and the criteria for using air purifying respirators are met.

The following constitute Level C equipment; it may be used as appropriate.

1. Full-face or half-mask, air purifying respirators (NIOSH approved).
2. Hooded chemical-resistant clothing (overall; two-piece chemical-splash suit; disposable chemical-resistant overalls).
3. Coveralls.¹
4. Gloves, outer, chemical-resistant.
5. Gloves, inner, chemical-resistant.
6. Boots (outer), chemical-resistant steel toe and shank.¹
7. Boot-covers, outer, chemical-resistant (disposable).¹
8. Hard hat.¹
9. Escape mask.¹
10. Face shield.¹

IV. *Level D*—A work uniform affording minimal protection, used for nuisance contamination only.

The following constitute Level D equipment; it may be used as appropriate:

1. Coveralls.
2. Gloves.¹
3. Boots/shoes, chemical-resistant steel toe and shank.
4. Boots, outer, chemical-resistant (disposable).¹

5. Safety glasses or chemical splash goggles*.
6. Hard hat.¹
7. Escape mask.¹
8. Face shield.¹

Part B. The types of hazards for which levels A, B, C, and D protection are appropriate are described below:

I. *Level A*—Level A protection should be used when:

1. The hazardous substance has been identified and requires the highest level of protection for skin, eyes, and the respiratory system based on either the measured (or potential for) high concentration of atmospheric vapors, gases, or particulates; or the site operations and work functions involve a high potential for splash, immersion, or exposure to unexpected vapors, gases, or particulates of materials that are harmful to skin or capable of being absorbed through the skin;

2. Substances with a high degree of hazard to the skin are known or suspected to be present, and skin contact is possible; or

3. Operations are being conducted in confined, poorly ventilated areas, and the absence of conditions requiring Level A have not yet been determined.

II. *Level B*—Level B protection should be used when:

1. The type and atmospheric concentration of substances have been identified and require a high level of respiratory protection, but less skin protection;

2. The atmosphere contains less than 19.5 percent oxygen; or

3. The presence of incompletely identified vapors or gases is indicated by a direct-reading organic vapor detection instrument, but vapors and gases are not suspected of containing high levels of chemicals harmful to skin or capable of being absorbed through the skin.

NOTE: This involves atmospheres with IDLH concentrations of specific substances that present severe inhalation hazards and that do not represent a severe skin hazard; or that do not meet the criteria for use of air-purifying respirators.

III. *Level C*—Level C protection should be used when:

1. The atmospheric contaminants, liquid splashes, or other direct contact will not adversely affect or be absorbed through any exposed skin;

2. The types of air contaminants have been identified, concentrations measured, and an air-purifying respirator is available that can remove the contaminants; and

3. All criteria for the use of air-purifying respirators are met.

IV. *Level D*—Level D protection should be used when:

1. The atmosphere contains no known hazard; and

¹Optional, as applicable.

2. Work functions preclude splashes, immersion, or the potential for unexpected inhalation of or contact with hazardous levels of any chemicals.

NOTE: As stated before, combinations of personal protective equipment other than those described for Levels A, B, C, and D protection may be more appropriate and may be used to provide the proper level of protection.

As an aid in selecting suitable chemical protective clothing, it should be noted that the National Fire Protection Association (NFPA) has developed standards on chemical protective clothing. The standards that have been adopted by include:

NFPA 1991—Standard on Vapor-Protective Suits for Hazardous Chemical Emergencies (EPA Level A Protective Clothing).

NFPA 1992—Standard on Liquid Splash-Protective Suits for Hazardous Chemical Emergencies (EPA Level B Protective Clothing).

NFPA 1993—Standard on Liquid Splash-Protective Suits for Non-emergency, Non-flammable Hazardous Chemical Situations (EPA Level B Protective Clothing).

These standards apply documentation and performance requirements to the manufacture of chemical protective suits. Chemical protective suits meeting these requirements are labeled as compliant with the appropriate standard. It is recommended that chemical protective suits that meet these standards be used.

APPENDIX C TO § 1910.120—COMPLIANCE GUIDELINES

1. *Occupational Safety and Health Program.* Each hazardous waste site clean-up effort will require an occupational safety and health program headed by the site coordinator or the employer's representative. The purpose of the program will be the protection of employees at the site and will be an extension of the employer's overall safety and health program. The program will need to be developed before work begins on the site and implemented as work proceeds as stated in paragraph (b). The program is to facilitate coordination and communication of safety and health issues among personnel responsible for the various activities which will take place at the site. It will provide the overall means for planning and implementing the needed safety and health training and job orientation of employees who will be working at the site. The program will provide the means for identifying and controlling worksite hazards and the means for monitoring program effectiveness. The program will need to cover the responsibilities and authority of the site coordinator or the employer's manager on the site for the safety and health of employees at the site, and the relationships with contractors or support

services as to what each employer's safety and health responsibilities are for their employees on the site. Each contractor on the site needs to have its own safety and health program so structured that it will smoothly interface with the program of the site coordinator or principal contractor.

Also those employers involved with treating, storing or disposal of hazardous waste as covered in paragraph (p) must have implemented a safety and health program for their employees. This program is to include the hazard communication program required in paragraph (p)(1) and the training required in paragraphs (p)(7) and (p)(8) as parts of the employers comprehensive overall safety and health program. This program is to be in writing.

Each site or workplace safety and health program will need to include the following: (1) Policy statements of the line of authority and accountability for implementing the program, the objectives of the program and the role of the site safety and health supervisor or manager and staff; (2) means or methods for the development of procedures for identifying and controlling workplace hazards at the site; (3) means or methods for the development and communication to employees of the various plans, work rules, standard operating procedures and practices that pertain to individual employees and supervisors; (4) means for the training of supervisors and employees to develop the needed skills and knowledge to perform their work in a safe and healthful manner; (5) means to anticipate and prepare for emergency situations; and (6) means for obtaining information feedback to aid in evaluating the program and for improving the effectiveness of the program. The management and employees should be trying continually to improve the effectiveness of the program thereby enhancing the protection being afforded those working on the site.

Accidents on the site or workplace should be investigated to provide information on how such occurrences can be avoided in the future. When injuries or illnesses occur on the site or workplace, they will need to be investigated to determine what needs to be done to prevent this incident from occurring again. Such information will need to be used as feedback on the effectiveness of the program and the information turned into positive steps to prevent any reoccurrence. Receipt of employee suggestions or complaints relating to safety and health issues involved with site or workplace activities is also a feedback mechanism that can be used effectively to improve the program and may serve in part as an evaluative tool(s).

For the development and implementation of the program to be the most effective, professional safety and health personnel should be used. Certified Safety Professionals,

Board Certified Industrial Hygienists or Registered Professional Safety Engineers are good examples of professional stature for safety and health managers who will administer the employer's program.

2. *Training.* The training programs for employees subject to the requirements of paragraph (e) of this standard should address: the safety and health hazards employees should expect to find on hazardous waste clean-up sites; what control measures or techniques are effective for those hazards; what monitoring procedures are effective in characterizing exposure levels; what makes an effective employer's safety and health program; what a site safety and health plan should include; hands on training with personal protective equipment and clothing they may be expected to use; the contents of the OSHA standard relevant to the employee's duties and function; and, employee's responsibilities under OSHA and other regulations. Supervisors will need training in their responsibilities under the safety and health program and its subject areas such as the spill containment program, the personal protective equipment program, the medical surveillance program, the emergency response plan and other areas.

The training programs for employees subject to the requirements of paragraph (p) of this standard should address: the employers safety and health program elements impacting employees; the hazard communication program; the medical surveillance program; the hazards and the controls for such hazards that employees need to know for their job duties and functions. All require annual refresher training.

The training programs for employees covered by the requirements of paragraph (q) of this standard should address those competencies required for the various levels of response such as: the hazards associated with hazardous substances; hazard identification and awareness; notification of appropriate persons; the need for and use of personal protective equipment including respirators; the decontamination procedures to be used; preplanning activities for hazardous substance incidents including the emergency response plan; company standard operating procedures for hazardous substance emergency responses; the use of the incident command system and other subjects. Hands-on training should be stressed whenever possible. Critiques done after an incident which include an evaluation of what worked and what did not and how could the incident be better handled the next time may be counted as training time.

For hazardous materials specialists (usually members of hazardous materials teams), the training should address the care, use and/or testing of chemical protective clothing including totally encapsulating suits, the medical surveillance program, the standard oper-

ating procedures for the hazardous materials team including the use of plugging and patching equipment and other subject areas.

Officers and leaders who may be expected to be in charge at an incident should be fully knowledgeable of their company's incident command system. They should know where and how to obtain additional assistance and be familiar with the local district's emergency response plan and the state emergency response plan.

Specialist employees such as technical experts, medical experts or environmental experts that work with hazardous materials in their regular jobs, who may be sent to the incident scene by the shipper, manufacturer or governmental agency to advise and assist the person in charge of the incident should have training on an annual basis. Their training should include the care and use of personal protective equipment including respirators; knowledge of the incident command system and how they are to relate to it; and those areas needed to keep them current in their respective field as it relates to safety and health involving specific hazardous substances.

Those skilled support personnel, such as employees who work for public works departments or equipment operators who operate bulldozers, sand trucks, backhoes, etc., who may be called to the incident scene to provide emergency support assistance, should have at least a safety and health briefing before entering the area of potential or actual exposure. These skilled support personnel, who have not been a part of the emergency response plan and do not meet the training requirements, should be made aware of the hazards they face and should be provided all necessary protective clothing and equipment required for their tasks.

There are two National Fire Protection Association standards, NFPA 472—"Standard for Professional Competence of Responders to Hazardous Material Incidents" and NFPA 471—"Recommended Practice for Responding to Hazardous Material Incidents", which are excellent resource documents to aid fire departments and other emergency response organizations in developing their training program materials. NFPA 472 provides guidance on the skills and knowledge needed for first responder awareness level, first responder operations level, hazmat technicians, and hazmat specialist. It also offers guidance for the officer corp who will be in charge of hazardous substance incidents.

3. *Decontamination.* Decontamination procedures should be tailored to the specific hazards of the site, and may vary in complexity and number of steps, depending on the level of hazard and the employee's exposure to the hazard. Decontamination procedures and PPE decontamination methods will vary depending upon the specific substance, since one procedure or method may

not work for all substances. Evaluation of decontamination methods and procedures should be performed, as necessary, to assure that employees are not exposed to hazards by re-using PPE. References in appendix D may be used for guidance in establishing an effective decontamination program. In addition, the U.S. Coast Guard's Manual, "Policy Guidance for Response to Hazardous Chemical Releases," U.S. Department of Transportation, Washington, DC (COMDTINST M16465.30) is a good reference for establishing an effective decontamination program.

4. *Emergency response plans.* States, along with designated districts within the states, will be developing or have developed local emergency response plans. These state and district plans should be utilized in the emergency response plans called for in the standard. Each employer should assure that its emergency response plan is compatible with the local plan. The major reference being used to aid in developing the state and local district plans is the *Hazardous Materials Emergency Planning Guide, NRT-1*. The current Emergency Response Guidebook from the U.S. Department of Transportation, CMA's CHEMTREC and the Fire Service Emergency Management Handbook may also be used as resources.

Employers involved with treatment, storage, and disposal facilities for hazardous waste, which have the required contingency plan called for by their permit, would not need to duplicate the same planning elements. Those items of the emergency response plan that are properly addressed in the contingency plan may be substituted into the emergency response plan required in 1910.120 or otherwise kept together for employer and employee use.

5. *Personal protective equipment programs.* The purpose of personal protective clothing and equipment (PPE) is to shield or isolate individuals from the chemical, physical, and biologic hazards that may be encountered at a hazardous substance site.

As discussed in appendix B, no single combination of protective equipment and clothing is capable of protecting against all hazards. Thus PPE should be used in conjunction with other protective methods and its effectiveness evaluated periodically.

The use of PPE can itself create significant worker hazards, such as heat stress, physical and psychological stress, and impaired vision, mobility, and communication. For any given situation, equipment and clothing should be selected that provide an adequate level of protection. However, over-protection, as well as under-protection, can be hazardous and should be avoided where possible.

Two basic objectives of any PPE program should be to protect the wearer from safety and health hazards, and to prevent injury to the wearer from incorrect use and/or malfunction of the PPE. To accomplish these

goals, a comprehensive PPE program should include hazard identification, medical monitoring, environmental surveillance, selection, use, maintenance, and decontamination of PPE and its associated training.

The written PPE program should include policy statements, procedures, and guidelines. Copies should be made available to all employees, and a reference copy should be made available at the worksite. Technical data on equipment, maintenance manuals, relevant regulations, and other essential information should also be collected and maintained.

6. *Incident command system (ICS).* Paragraph 1910.120(q)(3)(ii) requires the implementation of an ICS. The ICS is an organized approach to effectively control and *manage* operations at an emergency incident. The individual in charge of the ICS is the senior official responding to the incident. The ICS is not much different than the "command post" approach used for many years by the fire service. During large complex fires involving several companies and many pieces of apparatus, a command post would be established. This enabled *one* individual to be in charge of managing the incident, rather than having several officers from different companies making separate, and sometimes conflicting, decisions. The individual in charge of the command post would delegate responsibility for performing various tasks to subordinate officers. Additionally, all communications were routed through the command post to reduce the number of radio transmissions and eliminate confusion. However, strategy, tactics, and all decisions were made by one individual.

The ICS is a very similar system, except it is implemented for emergency response to all incidents, both large and small, that involve hazardous substances.

For a small incident, the individual in charge of the ICS may perform many tasks of the ICS. There may not be any, or little, delegation of tasks to subordinates. For example, in response to a small incident, the individual in charge of the ICS, in addition to normal command activities, may become the safety officer and may designate only one employee (with proper equipment) as a back-up to provide assistance if needed. OSHA does recommend, however, that at least two employees be designated as back-up personnel since the assistance needed may include rescue.

To illustrate the operation of the ICS, the following scenario might develop during a small incident, such as an overturned tank truck with a small leak of flammable liquid.

The first responding senior officer would implement and take command of the ICS. That person would size-up the incident and determine if additional personnel and apparatus were necessary; would determine what

actions to take to control the leak; and, determine the proper level of personal protective equipment. If additional assistance is not needed, the individual in charge of the ICS would implement actions to stop and control the leak using the fewest number of personnel that can effectively accomplish the tasks. The individual in charge of the ICS then would designate himself as the safety officer and two other employees as a back-up in case rescue may become necessary. In this scenario, decontamination procedures would not be necessary.

A large complex incident may require many employees and difficult, time-consuming efforts to control. In these situations, the individual in charge of the ICS will want to delegate different tasks to subordinates in order to maintain a span of control that will keep the number of subordinates, that are reporting, to a manageable level.

Delegation of task at large incidents may be by location, where the incident scene is divided into sectors, and subordinate officers coordinate activities within the sector that they have been assigned.

Delegation of tasks can also be by function. Some of the functions that the individual in charge of the ICS may want to delegate at a large incident are: medical services; evacuation; water supply; resources (equipment, apparatus); media relations; safety; and, site control (integrate activities with police for crowd and traffic control). Also for a large incident, the individual in charge of the ICS will designate several employees as back-up personnel; and a number of safety officers to monitor conditions and recommend safety precautions.

Therefore, no matter what size or complexity an incident may be, by implementing an ICS there will be *one individual in charge* who makes the decisions and gives directions; and, all actions, and communications are coordinated through one central point of command. Such a system should reduce confusion, improve safety, organize and coordinate actions, and should facilitate effective management of the incident.

7. *Site Safety and Control Plans.* The safety and security of response personnel and others in the area of an emergency response incident site should be of primary concern to the incident commander. The use of a site safety and control plan could greatly assist those in charge of assuring the safety and health of employees on the site.

A comprehensive site safety and control plan should include the following: summary analysis of hazards on the site and a risk analysis of those hazards; site map or sketch; site work zones (clean zone, transition or decontamination zone, work or hot zone); use of the buddy system; site communications; command post or command center; standard operating procedures and safe work practices; medical assistance and

triage area; hazard monitoring plan (air contaminate monitoring, etc.); decontamination procedures and area; and other relevant areas. This plan should be a part of the employer's emergency response plan or an extension of it to the specific site.

8. *Medical surveillance programs.* Workers handling hazardous substances may be exposed to toxic chemicals, safety hazards, biologic hazards, and radiation. Therefore, a medical surveillance program is essential to assess and monitor workers' health and fitness for employment in hazardous waste operations and during the course of work; to provide emergency and other treatment as needed; and to keep accurate records for future reference.

The *Occupational Safety and Health Guidance Manual for Hazardous Waste Site Activities* developed by the National Institute for Occupational Safety and Health (NIOSH), the Occupational Safety and Health Administration (OSHA), the U.S. Coast Guard (USCG), and the Environmental Protection Agency (EPA); October 1985 provides an excellent example of the types of medical testing that should be done as part of a medical surveillance program.

9. *New Technology and Spill Containment Programs.* Where hazardous substances may be released by spilling from a container that will expose employees to the hazards of the materials, the employer will need to implement a program to contain and control the spilled material. Diking and ditching, as well as use of absorbents like diatomaceous earth, are traditional techniques which have proven to be effective over the years. However, in recent years new products have come into the marketplace, the use of which complement and increase the effectiveness of these traditional methods. These new products also provide emergency responders and others with additional tools or agents to use to reduce the hazards of spilled materials.

These agents can be rapidly applied over a large area and can be uniformly applied or otherwise can be used to build a small dam, thus improving the workers' ability to control spilled material. These application techniques enhance the intimate contact between the agent and the spilled material allowing for the quickest effect by the agent or quickest control of the spilled material. Agents are available to solidify liquid spilled materials, to suppress vapor generation from spilled materials, and to do both. Some special agents, which when applied as recommended by the manufacturer, will react in a controlled manner with the spilled material to neutralize acids or caustics, or greatly reduce the level of hazard of the spilled material.

There are several modern methods and devices for use by emergency response personnel or others involved with spill control efforts to safely apply spill control agents to

control spilled material hazards. These include portable pressurized applicators similar to hand-held portable fire extinguishing devices, and nozzle and hose systems similar to portable fire fighting foam systems which allow the operator to apply the agent without having to come into contact with the spilled material. The operator is able to apply the agent to the spilled material from a remote position.

The solidification of liquids provides for rapid containment and isolation of hazardous substance spills. By directing the agent at run-off points or at the edges of the spill, the reactant solid will automatically create a barrier to slow or stop the spread of the material. Clean-up of hazardous substances is greatly improved when solidifying agents, acid or caustic neutralizers, or activated carbon adsorbents are used. Properly applied, these agents can totally solidify liquid hazardous substances or neutralize or absorb them, which results in materials which are less hazardous and easier to handle, transport, and dispose of. The concept of spill treatment, to create less hazardous substances, will improve the safety and level of protection of employees working at spill clean-up operations or emergency response operations to spills of hazardous substances.

The use of vapor suppression agents for volatile hazardous substances, such as flammable liquids and those substances which present an inhalation hazard, is important for protecting workers. The rapid and uniform distribution of the agent over the surface of the spilled material can provide quick vapor knockdown. There are temporary and long-term foam-type agents which are effective on vapors and dusts, and activated carbon adsorption agents which are effective for vapor control and soaking-up of the liquid. The proper use of hose lines or hand-held portable pressurized applicators provides good mobility and permits the worker to deliver the agent from a safe distance without having to step into the untreated spilled material. Some of these systems can be recharged in the field to provide coverage of larger spill areas than the design limits of a single charged applicator unit. Some of the more effective agents can solidify the liquid flammable hazardous substances and at the same time elevate the flashpoint above 140 °F so the resulting substance may be handled as a nonhazardous waste material if it meets the U.S. Environmental Protection Agency's 40 CFR part 261 requirements (See particularly §261.21).

All workers performing hazardous substance spill control work are expected to wear the proper protective clothing and equipment for the materials present and to follow the employer's established standard operating procedures for spill control. All involved workers need to be trained in the established operating procedures; in the use

and care of spill control equipment; and in the associated hazards and control of such hazards of spill containment work.

These new tools and agents are the things that employers will want to evaluate as part of their new technology program. The treatment of spills of hazardous substances or wastes at an emergency incident as part of the immediate spill containment and control efforts is sometimes acceptable to EPA and a permit exception is described in 40 CFR 264.1(g)(8) and 265.1(c)(11).

APPENDIX E TO § 1910.120—TRAINING CURRICULUM GUIDELINES

The following non-mandatory general criteria may be used for assistance in developing site-specific training curriculum used to meet the training requirements of 29 CFR 1910.120(e); 29 CFR 1910.120(p)(7), (p)(8)(iii); and 29 CFR 1910.120(q)(6), (q)(7), and (q)(8). These are generic guidelines and they are not presented as a complete training cur-

riculum for any specific employer. Site-specific training programs must be developed on the basis of a needs assessment of the hazardous waste site, RCRA/TSDf, or emergency response operation in accordance with 29 CFR 1910.120.

It is noted that the legal requirements are set forth in the regulatory text of § 1910.120. The guidance set forth here presents a highly effective program that in the areas covered would meet or exceed the regulatory requirements. In addition, other approaches could meet the regulatory requirements.

Suggested General Criteria

Definitions:

“Competent” means possessing the skills, knowledge, experience, and judgment to perform assigned tasks or activities satisfactorily as determined by the employer.

“Demonstration” means the showing by actual use of equipment or procedures.

“Hands-on training” means training in a simulated work environment that permits each student to have experience performing tasks, making decisions, or using equipment appropriate to the job assignment for which the training is being conducted.

“Initial training” means training required prior to beginning work.

“Lecture” means an interactive discourse with a class lead by an instructor.

“Proficient” means meeting a stated level of achievement.

“Site-specific” means individual training directed to the operations of a specific job site.

“Training hours” means the number of hours devoted to lecture, learning activities, small group work sessions, demonstration, evaluations, or hands-on experience.

Suggested core criteria:

1. *Training facility.* The training facility should have available sufficient resources, equipment, and site locations to perform didactic and hands-on training when appropriate. Training facilities should have sufficient organization, support staff, and services to conduct training in each of the courses offered.

2. *Training Director.* Each training program should be under the direction of a training director who is responsible for the program. The Training Director should have a minimum of two years of employee education experience.

3. *Instructors.* Instructors should be deemed competent on the basis of previous documented experience in their area of instruction, successful completion of a “train-the-trainer” program specific to the topics they will teach, and an evaluation of instructional competence by the Training Director.

Instructors should be required to maintain professional competency by participating in

continuing education or professional development programs or by completing successfully an annual refresher course and having an annual review by the Training Director.

The annual review by the Training Director should include observation of an instructor's delivery, a review of those observations with the trainer, and an analysis of any instructor or class evaluations completed by the students during the previous year.

4. *Course materials.* The Training Director should approve all course materials to be used by the training provider. Course materials should be reviewed and updated at least annually. Materials and equipment should be in good working order and maintained properly.

All written and audio-visual materials in training curricula should be peer reviewed by technically competent outside reviewers or by a standing advisory committee.

Reviews should possess expertise in the following disciplines were applicable: occupational health, industrial hygiene and safety, chemical/environmental engineering, employee education, or emergency response. One or more of the peer reviewers should be an employee experienced in the work activities to which the training is directed.

5. *Students.* The program for accepting students should include:

a. Assurance that the student is or will be involved in work where chemical exposures are likely and that the student possesses the skills necessary to perform the work.

b. A policy on the necessary medical clearance.

6. *Ratios.* Student-instructor ratios should not exceed 30 students per instructor. Hands-on activity requiring the use of personal protective equipment should have the following student-instructor ratios. For Level C or Level D personal protective equipment the ratio should be 10 students per instructor. For Level A or Level B personal protective equipment the ratio should be 5 students per instructor.

7. *Proficiency assessment.* Proficiency should be evaluated and documented by the use of a written assessment and a skill demonstration selected and developed by the Training Director and training staff. The assessment and demonstration should evaluate the knowledge and individual skills developed in the course of training. The level of minimum achievement necessary for proficiency shall be specified in writing by the Training Director.

If a written test is used, there should be a minimum of 50 questions. If a written test is used in combination with a skills demonstration, a minimum of 25 questions should be used. If a skills demonstration is used, the tasks chosen and the means to rate successful completion should be fully documented by the Training Director.

The content of the written test or of the skill demonstration shall be relevant to the objectives of the course. The written test and skill demonstration should be updated as necessary to reflect changes in the curriculum and any update should be approved by the Training Director.

The proficiency assessment methods, regardless of the approach or combination of approaches used, should be justified, documented and approved by the Training Director.

The proficiency of those taking the additional courses for supervisors should be evaluated and documented by using proficiency assessment methods acceptable to the Training Director. These proficiency assessment methods must reflect the additional responsibilities borne by supervisory personnel in hazardous waste operations or emergency response.

8. *Course certificate.* Written documentation should be provided to each student who satisfactorily completes the training course. The documentation should include:

a. Student's name.

b. Course title.

c. Course date.

d. Statement that the student has successfully completed the course.

e. Name and address of the training provider.

f. An individual identification number for the certificate.

g. List of the levels of personal protective equipment used by the student to complete the course.

This documentation may include a certificate and an appropriate wallet-sized laminated card with a photograph of the student and the above information. When such course certificate cards are used, the individual identification number for the training certificate should be shown on the card.

9. *Recordkeeping.* Training providers should maintain records listing the dates courses were presented, the names of the individual course attenders, the names of those students successfully completing each course, and the number of training certificates issued to each successful student. These records should be maintained for a minimum of five years after the date an individual participated in a training program offered by the training provider. These records should be available and provided upon the student's request or as mandated by law.

10. *Program quality control.* The Training Director should conduct or direct an annual written audit of the training program. Program modifications to address deficiencies, if any, should be documented, approved, and implemented by the training provider. The audit and the program modification documents should be maintained at the training facility.

Suggested Program Quality Control Criteria

Factors listed here are suggested criteria for determining the quality and appropriateness of employee health and safety training for hazardous waste operations and emergency response.

A. Training Plan.

Adequacy and appropriateness of the training program's curriculum development, instructor training, distribution of course materials, and direct student training should be considered, including

1. The duration of training, course content, and course schedules/agendas;
2. The different training requirements of the various target populations, as specified in the appropriate generic training curriculum;
3. The process for the development of curriculum, which includes appropriate technical input, outside review, evaluation, program pretesting.
4. The adequate and appropriate inclusion of hands-on, demonstration, and instruction methods;
5. Adequate monitoring of student safety, progress, and performance during the training.

B. Program management, Training Director, staff, and consultants.

Adequacy and appropriateness of staff performance and delivering an effective training program should be considered, including

1. Demonstration of the training director's leadership in assuring quality of health and safety training.
2. Demonstration of the competency of the staff to meet the demands of delivering high quality hazardous waste employee health and safety training.
3. Organization charts establishing clear lines of authority.
4. Clearly defined staff duties including the relationship of the training staff to the overall program.
5. Evidence that the training organizational structure suits the needs of the training program.
6. Appropriateness and adequacy of the training methods used by the instructors.
7. Sufficiency of the time committed by the training director and staff to the training program.
8. Adequacy of the ratio of training staff to students.
9. Availability and commitment of the training program of adequate human and equipment resources in the areas of
 - a. Health effects,
 - b. Safety,
 - c. Personal protective equipment (PPE),
 - d. Operational procedures,
 - e. Employee protection practices/procedures.
10. Appropriateness of management controls.

11. Adequacy of the organization and appropriate resources assigned to assure appropriate training.

12. In the case of multiple-site training programs, adequacy of satellite centers management.

C. Training facilities and resources.

Adequacy and appropriateness of the facilities and resources for supporting the training program should be considered, including,

1. Space and equipment to conduct the training.
2. Facilities for representative hands-on training.
3. In the case of multiple-site programs, equipment and facilities at the satellite centers.
4. Adequacy and appropriateness of the quality control and evaluations program to account for instructor performance.
5. Adequacy and appropriateness of the quality control and evaluation program to ensure appropriate course evaluation, feedback, updating, and corrective action.
6. Adequacy and appropriateness of disciplines and expertise being used within the quality control and evaluation program.
7. Adequacy and appropriateness of the role of student evaluations to provide feedback for training program improvement.

D. Quality control and evaluation.

Adequacy and appropriateness of quality control and evaluation plans for training programs should be considered, including:

1. A balanced advisory committee and/or competent outside reviewers to give overall policy guidance;
2. Clear and adequate definition of the composition and active programmatic role of the advisory committee or outside reviewers.
3. Adequacy of the minutes or reports of the advisory committee or outside reviewers' meetings or written communication.
4. Adequacy and appropriateness of the quality control and evaluations program to account for instructor performance.
5. Adequacy and appropriateness of the quality control and evaluation program to ensure appropriate course evaluation, feedback, updating, and corrective action.
6. Adequacy and appropriateness of disciplines and expertise being used within the quality control and evaluation program.
7. Adequacy and appropriateness of the role of student evaluations to provide feedback for training program improvement.

E. Students

Adequacy and appropriateness of the program for accepting students should be considered, including

1. Assurance that the student already possess the necessary skills for their job, including necessary documentation.
2. Appropriateness of methods the program uses to ensure that recruits are capable of satisfactorily completing training.

§ 1910.120

29 CFR Ch. XVII (7–1–23 Edition)

3. Review and compliance with any medical clearance policy.

F. Institutional Environment and Administrative Support

The adequacy and appropriateness of the institutional environment and administrative support system for the training program should be considered, including

1. Adequacy of the institutional commitment to the employee training program.
2. Adequacy and appropriateness of the administrative structure and administrative support.

G. Summary of Evaluation Questions

Key questions for evaluating the quality and appropriateness of an overall training program should include the following:

1. Are the program objectives clearly stated?
2. Is the program accomplishing its objectives?
3. Are appropriate facilities and staff available?
4. Is there an appropriate mix of classroom, demonstration, and hands-on training?
5. Is the program providing quality employee health and safety training that fully meets the intent of regulatory requirements?
6. What are the program's main strengths?
7. What are the program's main weaknesses?
8. What is recommended to improve the program?
9. Are instructors instructing according to their training outlines?
10. Is the evaluation tool current and appropriate for the program content?
11. Is the course material current and relevant to the target group?

Suggested Training Curriculum Guidelines

The following training curriculum guidelines are for those operations specifically identified in 29 CFR 1910.120 as requiring training. Issues such as qualifications of instructors, training certification, and similar criteria appropriate to all categories of operations addressed in 1910.120 have been covered in the preceding section and are not re-addressed in each of the generic guidelines. Basic core requirements for training programs that are addressed include

1. General Hazardous Waste Operations
2. RCRA operations—Treatment, storage, and disposal facilities.
3. Emergency Response.

A. General Hazardous Waste Operations and Site-specific Training

1. *Off-site training.* Training course content for hazardous waste operations, required by 29 CFR 1910.120(e), should include the following topics or procedures:

a. Regulatory knowledge.

(1) An review of 29 CFR 1910.120 and the core elements of an occupational safety and health program.

(2) The content of a medical surveillance program as outlined in 29 CFR 1910.120(f).

(3) The content of an effective site safety and health plan consistent with the requirements of 29 CFR 1910.120(b)(4)(ii).

(4) Emergency response plan and procedures as outlined in 29 CFR 1910.38 and 29 CFR 1910.120(l).

(5) Adequate illumination.

(6) Sanitation recommendation and equipment.

(7) Review and explanation of OSHA's hazard-communication standard (29 CFR 1910.1200) and lock-out-tag-out standard (29 CFR 1910.147).

(8) Review of other applicable standards including but not limited to those in the construction standards (29 CFR part 1926).

(9) Rights and responsibilities of employers and employees under applicable OSHA and EPA laws.

b. Technical knowledge.

(1) Type of potential exposures to chemical, biological, and radiological hazards; types of human responses to these hazards and recognition of those responses; principles of toxicology and information about acute and chronic hazards; health and safety considerations of new technology.

(2) Fundamentals of chemical hazards including but not limited to vapor pressure, boiling points, flash points, ph, other physical and chemical properties.

(3) Fire and explosion hazards of chemicals.

(4) General safety hazards such as but not limited to electrical hazards, powered equipment hazards, motor vehicle hazards, walking-working surface hazards, excavation hazards, and hazards associated with working in hot and cold temperature extremes.

(5) Review and knowledge of confined space entry procedures in 29 CFR 1910.146.

(6) Work practices to minimize employee risk from site hazards.

(7) Safe use of engineering controls, equipment, and any new relevant safety technology or safety procedures.

(8) Review and demonstration of competency with air sampling and monitoring equipment that may be used in a site monitoring program.

(9) Container sampling procedures and safeguarding; general drum and container handling procedures including special requirement for laboratory waste packs, shock-sensitive wastes, and radioactive wastes.

(10) The elements of a spill control program.

(11) Proper use and limitations of material handling equipment.

(12) Procedures for safe and healthful preparation of containers for shipping and transport.

(13) Methods of communication including those used while wearing respiratory protection.

c. Technical skills.

(1) Selection, use maintenance, and limitations of personal protective equipment including the components and procedures for carrying out a respirator program to comply with 29 CFR 1910.134.

(2) Instruction in decontamination programs including personnel, equipment, and hardware; hands-on training including level A, B, and C ensembles and appropriate decontamination lines; field activities including the donning and doffing of protective equipment to a level commensurate with the employee's anticipated job function and responsibility and to the degree required by potential hazards.

(3) Sources for additional hazard information; exercises using relevant manuals and hazard coding systems.

d. Additional suggested items.

(1) A laminated, dated card or certificate with photo, denoting limitations and level of protection for which the employee is trained should be issued to those students successfully completing a course.

(2) Attendance should be required at all training modules, with successful completion of exercises and a final written or oral examination with at least 50 questions.

(3) A minimum of one-third of the program should be devoted to hands-on exercises.

(4) A curriculum should be established for the 8-hour refresher training required by 29 CFR 1910.120(e)(8), with delivery of such courses directed toward those areas of previous training that need improvement or re-emphasis.

(5) A curriculum should be established for the required 8-hour training for supervisors. Demonstrated competency in the skills and knowledge provided in a 40-hour course should be a prerequisite for supervisor training.

2. Refresher training.

The 8-hour annual refresher training required in 29 CFR 1910.120(e)(8) should be conducted by qualified training providers. Refresher training should include at a minimum the following topics and procedures:

(a) Review of and retraining on relevant topics covered in the 40-hour program, as appropriate, using reports by the students on their work experiences.

(b) Update on developments with respect to material covered in the 40-hour course.

(c) Review of changes to pertinent provisions of EPA or OSHA standards or laws.

(d) Introduction of additional subject areas as appropriate.

(e) Hands-on review of new or altered PPE or decontamination equipment or procedures. Review of new developments in personal protective equipment.

(f) Review of newly developed air and contaminant monitoring equipment.

3. On-site training.

a. The employer should provide employees engaged in hazardous waste site activities with information and training prior to initial assignment into their work area, as follows:

(1) The requirements of the hazard communication program including the location and availability of the written program, required lists of hazardous chemicals, and safety data sheets.

(2) Activities and locations in their work area where hazardous substance may be present.

(3) Methods and observations that may be used to detect the present or release of a hazardous chemical in the work area (such as monitoring conducted by the employer, continuous monitoring devices, visual appearances, or other evidence (sight, sound or smell) of hazardous chemicals being released, and applicable alarms from monitoring devices that record chemical releases.

(4) The physical and health hazards of substances known or potentially present in the work area.

(5) The measures employees can take to help protect themselves from work-site hazards, including specific procedures the employer has implemented.

(6) An explanation of the labeling system and safety data sheets and how employees can obtain and use appropriate hazard information.

(7) The elements of the confined space program including special PPE, permits, monitoring requirements, communication procedures, emergency response, and applicable lock-out procedures.

b. The employer should provide hazardous waste employees information and training and should provide a review and access to the site safety and plan as follows:

(1) Names of personnel and alternate responsible for site safety and health.

(2) Safety and health hazards present on the site.

(3) Selection, use, maintenance, and limitations of personal protective equipment specific to the site.

(4) Work practices by which the employee can minimize risks from hazards.

(5) Safe use of engineering controls and equipment available on site.

(6) Safe decontamination procedures established to minimize employee contact with hazardous substances, including:

- (A) Employee decontamination,
- (B) Clothing decontamination, and
- (C) Equipment decontamination.

(7) Elements of the site emergency response plan, including:

- (A) Pre-emergency planning.
- (B) Personnel roles and lines of authority and communication.

§ 1910.120

29 CFR Ch. XVII (7–1–23 Edition)

- (C) Emergency recognition and prevention.
- (D) Safe distances and places of refuge.
- (E) Site security and control.
- (F) Evacuation routes and procedures.
- (G) Decontamination procedures not covered by the site safety and health plan.
- (H) Emergency medical treatment and first aid.
- (I) Emergency equipment and procedures for handling emergency incidents.

c. The employer should provide hazardous waste employees information and training on personal protective equipment used at the site, such as the following:

- (1) PPE to be used based upon known or anticipated site hazards.
- (2) PPE limitations of materials and construction; limitations during temperature extremes, heat stress, and other appropriate medical considerations; use and limitations of respirator equipment as well as documentation procedures as outlined in 29 CFR 1910.134.
- (3) PPE inspection procedures prior to, during, and after use.
- (4) PPE donning and doffing procedures.
- (5) PPE decontamination and disposal procedures.
- (6) PPE maintenance and storage.
- (7) Task duration as related to PPE limitations.

d. The employer should instruct the employee about the site medical surveillance program relative to the particular site, including

- (1) Specific medical surveillance programs that have been adapted for the site.
- (2) Specific signs and symptoms related to exposure to hazardous materials on the site.
- (3) The frequency and extent of periodic medical examinations that will be used on the site.
- (4) Maintenance and availability of records.
- (5) Personnel to be contacted and procedures to be followed when signs and symptoms of exposures are recognized.

e. The employees will review and discuss the site safety plan as part of the training program. The location of the site safety plan and all written programs should be discussed with employees including a discussion of the mechanisms for access, review, and references described.

B. RCRA Operations Training for Treatment, Storage and Disposal Facilities.

1. As a minimum, the training course required in 29 CFR 1910.120 (p) should include the following topics:

- (a) Review of the applicable paragraphs of 29 CFR 1910.120 and the elements of the employer's occupational safety and health plan.
- (b) Review of relevant hazards such as, but not limited to, chemical, biological, and radiological exposures; fire and explosion hazards; thermal extremes; and physical hazards.

(c) General safety hazards including those associated with electrical hazards, powered equipment hazards, lock-out-tag-out procedures, motor vehicle hazards and walking-working surface hazards.

- (d) Confined-space hazards and procedures.
- (e) Work practices to minimize employee risk from workplace hazards.
- (f) Emergency response plan and procedures including first aid meeting the requirements of paragraph (p)(8).

(g) A review of procedures to minimize exposure to hazardous waste and various type of waste streams, including the materials handling program and spill containment program.

(h) A review of hazard communication programs meeting the requirements of 29 CFR 1910.1200.

(i) A review of medical surveillance programs meeting the requirements of 29 CFR 1910.120(p)(3) including the recognition of signs and symptoms of overexposure to hazardous substance including known synergistic interactions.

(j) A review of decontamination programs and procedures meeting the requirements of 29 CFR 1910.120(p)(4).

(k) A review of an employer's requirements to implement a training program and its elements.

(l) A review of the criteria and programs for proper selection and use of personal protective equipment, including respirators.

(m) A review of the applicable appendices to 29 CFR 1910.120.

(n) Principles of toxicology and biological monitoring as they pertain to occupational health.

(o) Rights and responsibilities of employees and employers under applicable OSHA and EPA laws.

(p) Hands-on exercises and demonstrations of competency with equipment to illustrate the basic equipment principles that may be used during the performance of work duties, including the donning and doffing of PPE.

(q) Sources of reference, efficient use of relevant manuals, and knowledge of hazard coding systems to include information contained in hazardous waste manifests.

(r) At least 8 hours of hands-on training.

(s) Training in the job skills required for an employee's job function and responsibility before they are permitted to participate in or supervise field activities.

2. The individual employer should provide hazardous waste employees with information and training prior to an employee's initial assignment into a work area. The training and information should cover the following topics:

(a) The Emergency response plan and procedures including first aid.

(b) A review of the employer's hazardous waste handling procedures including the materials handling program and elements of the

spill containment program, location of spill response kits or equipment, and the names of those trained to respond to releases.

(c) The hazardous communication program meeting the requirements of 29 CFR 1910.1200.

(d) A review of the employer's medical surveillance program including the recognition of signs and symptoms of exposure to relevant hazardous substance including known synergistic interactions.

(e) A review of the employer's decontamination program and procedures.

(f) An review of the employer's training program and the parties responsible for that program.

(g) A review of the employer's personal protective equipment program including the proper selection and use of PPE based upon specific site hazards.

(h) All relevant site-specific procedures addressing potential safety and health hazards. This may include, as appropriate, biological and radiological exposures, fire and explosion hazards, thermal hazards, and physical hazards such as electrical hazards, powered equipment hazards, lock-out-tag-out hazards, motor vehicle hazards, and walking-working surface hazards.

(i) Safe use engineering controls and equipment on site.

(j) Names of personnel and alternates responsible for safety and health.

C. Emergency response training.

Federal OSHA standards in 29 CFR 1910.120(q) are directed toward private sector emergency responders. Therefore, the guidelines provided in this portion of the appendix are directed toward that employee population. However, they also impact indirectly through State OSHA or USEPA regulations some public sector emergency responders. Therefore, the guidelines provided in this portion of the appendix may be applied to both employee populations.

States with OSHA state plans must cover their employees with regulations at least as effective as the Federal OSHA standards. Public employees in states without approved state OSHA programs covering hazardous waste operations and emergency response are covered by the U.S. EPA under 40 CFR 311, a regulation virtually identical to §1910.120.

Since this is a non-mandatory appendix and therefore not an enforceable standard, OSHA recommends that those employers, employees or volunteers in public sector emergency response organizations outside Federal OSHA jurisdiction consider the following criteria in developing their own training programs. A unified approach to training at the community level between emergency response organizations covered by Federal OSHA and those not covered directly by Federal OSHA can help ensure an effective community response to the release

or potential release of hazardous substances in the community.

a. General considerations.

Emergency response organizations are required to consider the topics listed in §1910.120(q)(6). Emergency response organizations may use some or all of the following topics to supplement those mandatory topics when developing their response training programs. Many of the topics would require an interaction between the response provider and the individuals responsible for the site where the response would be expected.

(1) Hazard recognition, including:

(A) Nature of hazardous substances present,

(B) Practical applications of hazard recognition, including presentations on biology, chemistry, and physics.

(2) Principles of toxicology, biological monitoring, and risk assessment.

(3) Safe work practices and general site safety.

(4) Engineering controls and hazardous waste operations.

(5) Site safety plans and standard operating procedures.

(6) Decontamination procedures and practices.

(7) Emergency procedures, first aid, and self-rescue.

(8) Safe use of field equipment.

(9) Storage, handling, use and transportation of hazardous substances.

(10) Use, care, and limitations of personal protective equipment.

(11) Safe sampling techniques.

(12) Rights and responsibilities of employees under OSHA and other related laws concerning right-to-know, safety and health, compensations and liability.

(13) Medical monitoring requirements.

(14) Community relations.

b. Suggested criteria for specific courses.

(1) *First responder awareness level.*

(A) Review of and demonstration of competency in performing the applicable skills of 29 CFR 1910.120(q).

(B) Hands-on experience with the U.S. Department of Transportation's Emergency Response Guidebook (ERG) and familiarization with OSHA standard 29 CFR 1910.1201.

(C) Review of the principles and practices for analyzing an incident to determine both the hazardous substances present and the basic hazard and response information for each hazardous substance present.

(D) Review of procedures for implementing actions consistent with the local emergency response plan, the organization's standard operating procedures, and the current edition of DOT's ERG including emergency notification procedures and follow-up communications.

(E) Review of the expected hazards including fire and explosions hazards, confined space hazards, electrical hazards, powered

§ 1910.120

29 CFR Ch. XVII (7–1–23 Edition)

equipment hazards, motor vehicle hazards, and walking-working surface hazards.

(F) Awareness and knowledge of the competencies for the First Responder at the Awareness Level covered in the National Fire Protection Association's Standard No. 472, *Professional Competence of Responders to Hazardous Materials Incidents*.

(2) *First responder operations level.*

(A) Review of and demonstration of competency in performing the applicable skills of 29 CFR 1910.120(q).

(B) Hands-on experience with the U.S. Department of Transportation's Emergency Response Guidebook (ERG), manufacturer safety data sheets, CHEMTREC/CANUTEC, shipper or manufacturer contacts, and other relevant sources of information addressing hazardous substance releases. Familiarization with OSHA standard 29 CFR 1910.1201.

(C) Review of the principles and practices for analyzing an incident to determine the hazardous substances present, the likely behavior of the hazardous substance and its container, the types of hazardous substance transportation containers and vehicles, the types and selection of the appropriate defensive strategy for containing the release.

(D) Review of procedures for implementing continuing response actions consistent with the local emergency response plan, the organization's standard operating procedures, and the current edition of DOT's ERG including extended emergency notification procedures and follow-up communications.

(E) Review of the principles and practice for proper selection and use of personal protective equipment.

(F) Review of the principles and practice of personnel and equipment decontamination.

(G) Review of the expected hazards including fire and explosions hazards, confined space hazards, electrical hazards, powered equipment hazards, motor vehicle hazards, and walking-working surface hazards.

(H) Awareness and knowledge of the competencies for the First Responder at the Operations Level covered in the National Fire Protection Association's Standard No. 472, *Professional Competence of Responders to Hazardous Materials Incidents*.

(3) *Hazardous materials technician.*

(A) Review of and demonstration of competency in performing the applicable skills of 29 CFR 1910.120(q).

(B) Hands-on experience with written and electronic information relative to response decision making including but not limited to the U.S. Department of Transportation's *Emergency Response Guidebook* (ERG), manufacturer safety data sheets, CHEMTREC/CANUTEC, shipper or manufacturer contacts, computer data bases and response models, and other relevant sources of information addressing hazardous substance releases. Familiarization with OSHA standard 29 CFR 1910.1201.

(C) Review of the principles and practices for analyzing an incident to determine the hazardous substances present, their physical and chemical properties, the likely behavior of the hazardous substance and its container, the types of hazardous substance transportation containers and vehicles involved in the release, the appropriate strategy for approaching release sites and containing the release.

(D) Review of procedures for implementing continuing response actions consistent with the local emergency response plan, the organization's standard operating procedures, and the current edition of DOT's ERG including extended emergency notification procedures and follow-up communications.

(E) Review of the principles and practice for proper selection and use of personal protective equipment.

(F) Review of the principles and practices of establishing exposure zones, proper decontamination and medical surveillance stations and procedures.

(G) Review of the expected hazards including fire and explosions hazards, confined space hazards, electrical hazards, powered equipment hazards, motor vehicle hazards, and walking-working surface hazards.

(H) Awareness and knowledge of the competencies for the Hazardous Materials Technician covered in the National Fire Protection Association's Standard No. 472, *Professional Competence of Responders to Hazardous Materials Incidents*.

(4) *Hazardous materials specialist.*

(A) Review of and demonstration of competency in performing the applicable skills of 29 CFR 1910.120(q).

(B) Hands-on experience with retrieval and use of written and electronic information relative to response decision making including but not limited to the U.S. Department of Transportation's *Emergency Response Guidebook* (ERG), manufacturer safety data sheets, CHEMTREC/CANUTEC, shipper or manufacturer contacts, computer data bases and response models, and other relevant sources of information addressing hazardous substance releases. Familiarization with OSHA standard 29 CFR 1910.1201.

(C) Review of the principles and practices for analyzing an incident to determine the hazardous substances present, their physical and chemical properties, and the likely behavior of the hazardous substance and its container, vessel, or vehicle.

(D) Review of the principles and practices for identification of the types of hazardous substance transportation containers, vessels and vehicles involved in the release; selecting and using the various types of equipment available for plugging or patching transportation containers, vessels or vehicles; organizing and directing the use of multiple teams of hazardous material technicians and

selecting the appropriate strategy for approaching release sites and containing or stopping the release.

(E) Review of procedures for implementing continuing response actions consistent with the local emergency response plan, the organization's standard operating procedures, including knowledge of the available public and private response resources, establishment of an incident command post, direction of hazardous material technician teams, and extended emergency notification procedures and follow-up communications.

(F) Review of the principles and practice for proper selection and use of personal protective equipment.

(G) Review of the principles and practices of establishing exposure zones and proper decontamination, monitoring and medical surveillance stations and procedures.

(H) Review of the expected hazards including fire and explosions hazards, confined space hazards, electrical hazards, powered equipment hazards, motor vehicle hazards, and walking-working surface hazards.

(I) Awareness and knowledge of the competencies for the Off-site Specialist Employee covered in the National Fire Protection Association's Standard No. 472, *Professional Competence of Responders to Hazardous Materials Incidents*.

(5) *Incident commander.*

The incident commander is the individual who, at any one time, is responsible for and in control of the response effort. This individual is the person responsible for the direction and coordination of the response effort. An incident commander's position should be occupied by the most senior, appropriately trained individual present at the response site. Yet, as necessary and appropriate by the level of response provided, the position may be occupied by many individuals during a particular response as the need for greater authority, responsibility, or training increases. It is possible for the first responder at the awareness level to assume the duties of incident commander until a more senior and appropriately trained individual arrives at the response site.

Therefore, any emergency responder expected to perform as an incident commander should be trained to fulfill the obligations of the position at the level of response they will be providing including the following:

(A) Ability to analyze a hazardous substance incident to determine the magnitude of the response problem.

(B) Ability to plan and implement an appropriate response plan within the capabilities of available personnel and equipment.

(C) Ability to implement a response to favorably change the outcome of the incident in a manner consistent with the local emergency response plan and the organization's standard operating procedures.

(D) Ability to evaluate the progress of the emergency response to ensure that the response objectives are being met safely, effectively, and efficiently.

(E) Ability to adjust the response plan to the conditions of the response and to notify higher levels of response when required by the changes to the response plan.

§ 1910.121 [Reserved]

DIPPING AND COATING OPERATIONS

SOURCE: 64 FR 13909, Mar. 23, 1999, unless otherwise noted.

§ 1910.122 Table of contents.

This section lists the paragraph headings contained in §§1910.123 through 1910.126.

§ 1910.123 *Dipping and coating operations: Coverage and definitions.*

- (a) Does this rule apply to me?
- (b) What operations are covered?
- (c) What operations are not covered?
- (d) How are terms used in §§1910.123 through 1910.126 defined?

§ 1910.124 *General requirements for dipping and coating operations.*

- (a) What construction requirements apply to dip tanks?
- (b) What ventilation requirements apply to vapor areas?
- (c) What requirements must I follow to recirculate exhaust air into the workplace?
- (d) What must I do when I use an exhaust hood?
- (e) What requirements must I follow when an employee enters a dip tank?
- (f) What first-aid procedures must my employees know?
- (g) What hygiene facilities must I provide?
- (h) What treatment and first aid must I provide?
- (i) What must I do before an employee cleans a dip tank?
- (j) What must I do to inspect and maintain my dipping or coating operation?

§ 1910.125 *Additional requirements for dipping and coating operations that use flammable or combustible liquids.*

- (a) What type of construction material must be used in making my dip tank?
- (b) When must I provide overflow piping?
- (c) When must I provide a bottom drain?

Title 18, Chapter 7

Amend: R18-7-201; R18-7-202; R18-7-205; R18-7-301; R18-7-503; R18-7-506;
R18-7-507

Repeal: Appendix B

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - EXPEDITED RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 14, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 7

Amend: R18-7-201; R18-7-202; R18-7-205; R18-7-301; R18-7-503;
R18-7-506; R18-7-507

Repeal: Appendix B

Summary:

This expedited rulemaking from the Department of Environmental Quality (Department) seeks to amend seven (7) rules and repeal (1) appendix in Title 18, Chapter 7, Articles 2, 3, and 5 related to Soil Remediation Standards, Prospective Purchaser Agreements, and Voluntary Remediation Program, respectively.

The Department seeks to amend these rules to incorporate the changes proposed in the Department's Five-Year Review Report of title 18, Chapter 7, which was approved by the Council in August 2022, and make additional corrections to citations and typographical errors identified in the course of this rulemaking. During the five-year review, the Department determined that there were rules and sections in this Chapter that were obsolete and could be removed, and sections that could be updated for clarity and provide modernized payment and communication options.

1. **Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?**

The Department indicates the proposed amendments to the rules do not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of regulated persons. Furthermore, the Department indicates the rulemaking corrects typographical errors, clarifies language without changing the effect of the rules, and amends or appeals outdated sections of the rules that are no longer necessary pursuant to A.R.S. § 41-1027(A)(3) and (6). A breakdown of which statutory basis for expedited rulemaking the Department indicates each proposed amendment falls within is provided in Section 7 of the Preamble of the Department's Notice of Final Expedited Rulemaking. Council staff believes the Department's rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)(3) and (6).

2. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

4. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Department indicates it did not receive any public comments regarding this rulemaking.

5. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department indicates there were no changes between the Notice of Proposed Expedited Rulemaking published in the Administrative Register on October 4, 2024 and the Notice of Final Expedited Rulemaking now before the Council for consideration.

6. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates these rules relate to the state Voluntary Remediation Program (VRP) and Water Quality Assurance Revolving Fund (WQARF) programs, which are state only programs adopted by the Arizona Legislature. The Department states the federal Comprehensive Environmental Response Compensation, and Liability Act of 1980 (CERCLA) is similar to Arizona's VRP and WQARF programs, however, there are no federal or state requirements that those programs be consistent with CERCLA.

7. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Not applicable. The rule does not require the issuance of a permit, license, or agency authorization.

8. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates it did not review or rely on any study for this rulemaking.

9. **Conclusion**

This expedited rulemaking from the Department seeks to amend seven (7) rules and repeal (1) appendix in Title 18, Chapter 7, Articles 2, 3, and 5 related to Soil Remediation Standards, Prospective Purchaser Agreements, and Voluntary Remediation Program, respectively. The Department seeks to amend these rules to incorporate the changes proposed in the Department's Five-Year Review Report of title 18, Chapter 7, which was approved by the Council in August 2022, and make additional corrections to citations and typographical errors identified in the course of this rulemaking. During the five-year review, the Department determined that there were rules and sections in this Chapter that were obsolete and could be removed, and sections that could be updated for clarity and provide modernized payment and communication options.

Pursuant to A.R.S. § 41-1027(H), an expedited rulemaking becomes effective immediately on the filing of the approved Notice of Final Expedited Rulemaking with the Secretary of State.

Council staff recommends approval of this rulemaking.

Katie Hobbs

Phoenix, AZ 85007

Re: Rulemaking for Title 18. Environmental Quality, Chapter 7. Department of
Environmental Quality – Remedial Action

Dear Chairperson Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits an expedited rulemaking proposing changes to Arizona Administrative Code (A.A.C) Title 18, Chapter 7 to the Governor's Regulatory Review Council (GRRC) for its consideration and approval.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-202:

I. Information Required by A.A.C. R1-6-202(A)(1)

- The public record closed for the rule on December 18, 2024 at 5:00 p.m.
- Pursuant to A.R.S. § 41-1027(A)(3) and (A)(6), this expedited rulemaking corrects typographical errors and clarifies language for the rules without changing their effect, and repeals an appendix related to outdated and unnecessary soil remediation levels. This expedited rulemaking does not increase the cost of regulatory compliance, increase a fee or reduce procedural rights of regulated persons.
- This rulemaking incorporates changes proposed in the Department's five-year rule review of 18 A.A.C. Chapter 7, Remedial Action, approved by GRRC December 6, 2022.
- The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- A list of documents enclosed under A.A.C. R1-6-201(A)(2)-(8), which are attached as electronic copies:
 - This cover letter.
 - The Notice of Final Expedited Rulemaking (NFERM), including the preamble, table of contents, and text of each rule.
 - ADEQ did not receive any written comments on the Notice of Proposed Expedited Rulemaking (NPERM).

Main Office

1110 W. Washington Street • Phoenix, AZ 85007
(602) 771-2300

Southern Regional Office

400 W. Congress Street • Suite 433 • Tucson, AZ 85701

www.azdeq.gov

printed on recycled paper

- ADEQ received no analysis regarding the rules' impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states; therefore, no such analysis is included in this submittal.
- The rules amended by this rulemaking do not incorporate materials by reference; therefore, no such materials are included.
- No statute was declared unconstitutional.
- One electronic copy of each of the following is enclosed: the general and specific statutes authorizing the rules, including relevant statutory definitions: A.R.S. §§ 41-1003, 49-104(B)(4), 49-104(B)(16), 49-152(A)(1), 49-152(K), 49-152(M), 49-158(G), 49-158(J), 49-179, 49-186, 49-285.01(H), and Laws 2000, Chapter 225.
- No term is defined in the rule by referring to another.

Thank you for your timely review and approval. Please contact John MacBain, Rule Writer, Waste Programs Division, 602-771-0101 or macbain.john@azdeq.gov, if you have any questions.

Sincerely,

DocuSigned by:

NOTICE OF FINAL EXPEDITED RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 7. DEPARTMENT OF ENVIRONMENTAL QUALITY – REMEDIAL ACTION

PREAMBLE

1. Permission to proceed with this final expedited rulemaking was granted under A.R.S. § 41-1039 by the governor on:

July 31, 2023

| <u>2. Article, Part, or Section Affected (as applicable)</u> | <u>Rulemaking Action</u> |
|---|---------------------------------|
| R18-7-201 | Amend |
| R18-7-202 | Amend |
| R18-7-205 | Amend |
| Appendix B | Repeal |
| R18-7-301 | Amend |
| R18-7-503 | Amend |
| R18-7-506 | Amend |
| R18-7-507 | Amend |

3. Citations to the agency’s statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statutes: A.R.S. §§ 41-1003 and 49-104(B)(4).

Implementing statutes: A.R.S. §§ 49-104(B)(16), 49-152(A)(1), 49-152(K), 49-152(M), 49-158(G), 49-158(J), 49-179, 49-186, 49-285.01(H), and Laws 2000, Chapter 225, §13.

4. The effective date of the rule:

This expedited rulemaking becomes effective immediately the date the notice is filed under A.R.S. § 41-1027(H). The effective date is **(to be filled in by Register editor)**.

5. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the current record of the final expedited rule:

Notice of Rulemaking Docket Opening: 29 A.A.R. 3443, October 27, 2023, Issue Number: 43, File Number: R23-208.

Notice of Proposed Expedited Rulemaking: 30 A.A.R. 2958, Issue Date: October 4, 2024, Issue Number: 40, File number: R24-189.

6. The agency’s contact person who can answer questions about the rulemaking:

Name: John MacBain
Title: Rule Writer
Division: Waste Programs Division
Address: Arizona Department of Environmental Quality
1110 W. Washington St.
Phoenix, AZ 85007
Telephone: (602) 771-0101
Fax: (602) 771-2366
Email: macbain.john@azdeq.gov

7. An agency’s justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Summary

ADEQ is engaged in this expedited rulemaking to incorporate the changes proposed in the Department's five-year review of 18 A.A.C. Chapter 7, Remedial Action, approved by the Governor's Regulatory Review Council (GRRC) on August 26, 2022, and make additional corrections to citations and typographical errors identified in the course of this rulemaking. During the five-year review, the Department determined that there were rules and sections in this Chapter that were obsolete and could be removed, and sections that could be updated for clarity and provide modernized payment and communication options.

Background

During the five-year review, ADEQ determined Appendix B should be repealed, and references to it removed, as it has become obsolete. The objective of Appendix B was to preserve the list of contaminants of concern and soil cleanup levels for certain grandfathered sites from the 1997 rules. Sites that were characterized before May 5, 2007 had the option to use Appendix B, and then had three years to meet the 1997 Soil Remediation Levels (SRLs) in Appendix B. After that date, the updated SRLs from Appendix A applied to these sites. No sites now exist that were characterized before May 5, 2007, where soil remediation can still be conducted with Appendix B standards. This rulemaking follows through with changes the Department recommended in the five-year review by repealing Appendix B and references to it in R18-7-201, R18-7-202, and R18-7-205(A).

The Department also determined in the five-year review that additional changes were appropriate in order to improve the clarity and understandability of the rules. The five-year review identified a web link to an Environmental Protection Agency (EPA) guidance document in the definition of "carcinogen" in R18-7-201 that was outdated. The guidance document remains the same but the link has been updated in order to improve clarity and understandability of the rule. Additionally, as recommended in the five-year review, R18-7-301(F) has been updated to include a weblink to the location in which the legal notices described in the section can be found.

In order to improve the rules' effect in achieving their objective, the Department recommended modernizing portions of the rule to provide additional payment and communication options. This rulemaking updates R18-7-503 to allow for Automated Clearing House (ACH) or wire transfers for payment of deposits for the Voluntary Remediation Program (VRP). This rulemaking also updates R18-7-506 and R18-7-507 to allow for emailing of billing statements for the VRP and removing the option to fax billing statements. Additionally, in the course of conducting this rulemaking a typographical error was identified in the R18-7-506 in the spelling of 'calendar', which has been corrected.

An expedited rulemaking is appropriate pursuant to A.R.S. § 41-1027(A)(3) and (A)(6) as this rulemaking corrects typographical errors, clarifies language without changing the effect of the rules, and amends or appeals outdated sections of the rules that are no longer necessary; it will not increase the cost of regulatory compliance, increase a fee, or reduce procedural rights of those regulated. The following table summarizes the amendments and their justifications under § 41-1027(A):

| Rule | Justification under A.R.S. § 41-1027(A) | Amendment Summary |
|-------------|--|---|
| R18-7-201 | A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) | The text in the “soil remediation level” definition related to Appendix B has been removed. The EPA guidance document link has been updated as the prior link was no longer active. |
| R18-7-202 | A.R.S. § 41-1027(A)(6) | Text related to Appendix B has been removed in subsection (E). |
| R18-7-205 | A.R.S. § 41-1027(A)(6) | Reference to Appendix B has been removed in subsection (A). |
| Appendix B | A.R.S. § 41-1027(A)(6) | Appendix B has been repealed. This Appendix has become outdated because no existing sites were characterized before May 5, 2010, where soil remediation could still be conducted with Appendix B standards. |
| R18-7-301 | A.R.S. § 41-1027(A)(3) | Language has been added to subsection (F) specifying where required publication of legal notices may be found. |
| R18-7-503 | A.R.S. § 41-1027(A)(6) | ACH and wire transfers have been added as options for payment of deposits to modernize the requirement and meet the rule objective. |
| R18-7-506 | A.R.S. § 41-1027(A)(6) A.R.S. § 41-1027(A)(6) | The spelling of calendar has been corrected. Email has been added and fax has been removed as an option for statement communication to modernize the requirement and meet the rule objective. |
| R18-7-507 | A.R.S. § 41-1027(A)(6) | Email has been added and fax has been removed as an option for statement communication to modernize the requirement and meet the rule objective. |

8. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. A statement that the agency is exempt from the requirements under A.R.S. § 41-1055(G) to obtain and file a summary of the economic, small business, and consumer impact under A.R.S. § 41-1055(D)(2):

The agency is exempt from the requirements to prepare and file an economic, small business, and consumer impact statement under A.R.S. § 41-1055(D)(2).

11. A description of any change between the proposed expedited rulemaking, to include a supplemental proposed notice, and the final rulemaking:

No changes.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

ADEQ did not receive comments regarding this proposed rulemaking.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statutes applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The proposed changes to these rules do not require a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

These rules relate to the state VRP and Water Quality Assurance Revolving Fund (WQARF) programs, which are state only programs adopted by the Arizona Legislature. The federal Comprehensive Environmental Response Compensation, and Liability Act of 1980 (CERCLA) is similar to Arizona's VRP and WQARF programs, however there are no federal or state requirements that those programs be consistent with CERCLA.

c. Whether a person submitted an analysis to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states under A.R.S. § 41-1055(I). If yes, include the analysis with the rulemaking package.

No analysis was submitted to the Department.

14. List all incorporated by reference material as specified in A.R.S. § 41-1028 and include a citation where the material is located:

None.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A) state where the text was changed between the emergency and the final expedited rulemaking package:

The rules were not previously made as an emergency rule.

16. The full text of the rules follows:

Rule text begins on the next page.

- F. As provided in A.R.S. § 49-285.01(G) ~~The~~ the Department shall publish a legal notice announcing an opportunity for public comment on the prospective purchaser agreement. The legal notice shall include:
 - 1. A general description of the contents of the agreement;
 - 2. The location where information regarding the agreement can be obtained;
 - 3. The name and address of the Department contact where comments may be sent; and
 - 4. The time and date that the comment period closes.
- G. No Change

ARTICLE 5. VOLUNTARY REMEDIATION PROGRAM

R18-7-503. Deposit

- A. No Change
- B. The deposit shall be in the form of Automated Clearing House (ACH) payment, ~~wire transfer~~, a company check, cashier's check, certified check, or money order made payable to the Arizona Department of Environmental Quality.
- C. No Change
- D. No Change
- E. No Change
- F. No Change

R18-7-506. Voluntary Remediation Program Accounting

Within a reasonable time after the end of each ~~calendar~~ calendar quarter, the Department shall mail, or ~~fax~~ email each applicant a statement itemizing reimbursable costs charged against the site-specific deposit account and a summary of account activity during that quarter. The statement shall be in a form consistent with generally accepted accounting principles.

R18-7-507. Account Reconciliation

- A. Within a reasonable time after completion of the remediation work at the site, or after termination or withdrawal of the applicant from participation in the program, the Department shall prepare and mail or ~~fax~~ email to the applicant a final statement which shall include:

1. No Change
 2. No Change
 3. No Change
- B.** No Change
- C.** No Change
- D.** No Change
- E.** No Change

TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 7. DEPARTMENT OF ENVIRONMENTAL QUALITY
REMEDIAL ACTION

Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (01-4).

Editor's Note: The proposed summary action amending the heading of Chapter 7 was remanded by the Governor's Regulatory Review Council (August 4, 1999), which revoked the interim effectiveness of the change as of January 22, 1999. The heading of Chapter 7 before the proposed summary action has been restored (Supp. 99-3).

Editor's Note: Chapter 7 heading repealed; new heading adopted; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4).

Editor's Note: At the request of the Department of Environmental Quality, interim rules removed in Articles 1 & 2 (Supp. 97-3) by the emergency expiring were reinstated. The Department determined these emergency rules were in effect until permanent rules were adopted pursuant to Laws 1995, Ch. 232, § 5, and Laws 1996, Chapter 151, § 9. Under these Laws the Department was required to "adopt risk based remediation standards formally by rule pursuant to A.R.S. § 49-152(A) ... no later than August 1, 1997."; and the "interim standards adopted pursuant to A.R.S. § 49-152(A)(1)(a) and (b) ... as emergency rules shall remain in effect until the formally established rules are adopted." The interim rules have not been reprinted because permanent final rules have now been filed. Refer to Supp. 97-1 for interim emergency rules (Supp. 97-4).

Editor's Note: A Section of this Chapter was adopted under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 1997, Ch. 296, §§ 3(E) and (G), (10) and (11). Although exempt from certain provisions of the rule-making process, the Department was required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 97-3).

Editor's Note: Some Sections of Chapter 7 were exempt from the rulemaking process (Laws 1995, Ch. 232, § 5). However the Department was required to provide a notice of hearing and public hearing before adoption of the emergency rules. The emergency rules were approved by the Attorney General (Supp. 96-1). Editor's note added to clarify exemptions of emergency adoptions (Supp. 97-1).

ARTICLE 1. EXPIRED

Article 1, consisting of Section R18-7-110, expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).

The proposed summary action renumbering Section R18-7-110 to R18-7-101 was remanded by the Governor's Regulatory Review Council (August 4, 1999), which revoked the interim effectiveness of the changes as of January 22, 1999. The numbering of Article 1 before the proposed summary action has been restored (Supp. 99-3).

Article 1, consisting of Sections R18-7-101 thru R18-7-109 repealed; R18-7-110 renumbered to R18-7-101; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4).

Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as permanent rules effective December 22, 1987.

Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as an emergency effective September 17, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.

Article 1 consisting of Sections R18-7-101 through R18-7-110 adopted as an emergency effective June 17, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.

Article 1 consisting of Sections R9-20-102, R9-20-104 through R9-20-106 and R9-20-111 adopted as an emergency effective March 6, 1987 pursuant to A.R.S. § 41-1026, valid for only 90 days. Emergency expired.

Article 1 consisting of Sections R9-20-102, R9-20-104 through R9-20-106 and R9-20-111 adopted as an emergency effective December 5, 1986 pursuant to A.R.S. § 41-1003, valid for only 90 days. Emergency expired.

ARTICLE 2. SOIL REMEDIATION STANDARDS

Article 2, consisting of interim Sections R18-7-201 through R18-7-209 and Appendices A through C, replaced by new permanent Sections, adopted effective December 4, 1997. Appendix D emergency expired (Supp. 97-4).

Article 2, consisting of Sections R18-7-201 through R18-7-209 and Appendices A through D, removed in Supp. 97-3 reinstated at the request of the Department. Refer to Supp. 97-1 for interim rules. Introduction stating the emergency expired has been removed for clarity (Supp. 97-4).

Article introduction revised below to clarify exemptions of emergency adoption (Supp. 97-1).

Article 2, consisting of Sections R18-7-201 through R18-7-209 and Appendices A through D, adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5. The Sections are in effect until permanent rules are adopted and in place by August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1).

ARTICLE 1. EXPIRED

Article 1, consisting of Section R18-7-110, expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).

R18-7-101. Repealed

Historical Note

Adopted as an emergency effective December 5, 1986,

pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Adopted, without change, as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-102 was renumbered as Section R18-7-101, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-101 repealed; new Section renumbered from R18-7-110; both by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Summary renumbering action revoked; former numbering of Sections R18-7-101 and R18-7-110 restored effective January 22, 1999. Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-102. Repealed

Historical Note

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-104 was renumbered as Section R18-7-102, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-102 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-103. Repealed

Historical Note

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-103 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-104. Repealed

Historical Note

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-

2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-104 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-105. Repealed**Historical Note**

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-105 was renumbered as Section R18-7-105, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-105 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-106. Repealed**Historical Note**

Adopted as an emergency effective December 5, 1986, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 86-6). Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-106 was renumbered as Section R18-7-106, amended and readopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-106 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-107. Repealed**Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3).

Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-107 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-108. Repealed**Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-108 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

Editor's Note: Emergency amendment R18-7-109, removed in Supp. 97-3, was reinstated at the request of the Department. Refer to Supp. 97-1 for emergency rule. This Section was subsequently amended under the regular rulemaking process effective (Supp. 97-4). This Section was repealed by summary action (Supp. 98-4).

R18-7-109. Repealed**Historical Note**

Adopted as an emergency effective December 6, 1986, pursuant to A.R.S. § 41-1003 valid for only 90 days. Emergency expired. Amended and adopted as an emergency effective March 6, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-1). Emergency expired. Former Section R9-20-111 was renumbered as Section R18-7-109, amended and readopted as an emergency effective June 18, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). Section amended by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Amendment adopted permanently effective December 4, 1997 (Supp. 97-4). R18-7-109 repealed by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Adopted summary rules filed August 10, 1999; interim effective date of January 22, 1999 now the permanent effective date (Supp. 99-3).

R18-7-110. Expired**Historical Note**

Adopted as an emergency effective June 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-2). Emergency expired. Readopted without change as an emergency effective September 17, 1987, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 87-3). Emergency expired. Amended and adopted as a permanent rule effective December 22, 1987 (Supp. 87-4). R18-7-110 renumbered by summary action with an interim effective date of January 22, 1999; filed in the Office of the Secretary of State December 29, 1998 (Supp. 98-4). Summary renumbering action revoked; former numbering of Sections R18-7-101 and R18-7-110 restored effective January 22, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(E) at 8 A.A.R. 4298, effective August 31, 2002 (Supp. 02-3).

Editor's Note: Emergency adopted Article 2 removed in Supp. 97-3, was reinstated at the request of the Department. Refer to Supp. 97-1 for emergency Sections. New Sections were subsequently adopted under the regular rulemaking process (Supp. 97-4).

ARTICLE 2. SOIL REMEDIATION STANDARDS**R18-7-201. Definitions**

In addition to the definitions provided in A.R.S. §§ 49-151 and 49-152, the following definitions apply in this Article:

1. "Aquifer Protection Permit Program" means the system of requirements prescribed in A.R.S. Title 49, Chapter 2, Article 3 and A.A.C. Title 18, Chapter 9, Articles 1 through 7.
2. "Background" means a concentration of a naturally occurring contaminant in soils.
3. "Carcinogen" or "carcinogenic" means the potential of a contaminant to cause cancer in humans as determined by lines of evidence in accordance with a narrative classification in "Guidelines for Carcinogen Risk Assessment", EPA/630/P-03/001F, March 2005, (and no future editions), which is incorporated by reference. "Guidelines for Carcinogen Risk Assessment" is available from ADEQ and at <http://cfpub.epa.gov/ncea/raf/recordisplay.cfm?deid=116283>.
4. "Child care facility" means any permanent facility on a property or portion of property in which care or supervision is provided for children below the age of 18, unaccompanied by a parent or guardian, for periods of less than 24 hours per day. Child care facility does not include private homes or facilities that care for fewer than five children.
5. "Contact" means exposure to a contaminant through ingestion, inhalation, or dermal absorption.
6. "Contaminant" means a substance regulated by the programs listed in R18-7-202(A) or R18-7-202(B) or defined in A.R.S. § 49-171(2).
7. "Department" means the Arizona Department of Environmental Quality.
8. "Deterministic risk assessment methodology" means a site-specific human health risk assessment, performed using a specific set of input variables, exposure assumptions, and toxicity criteria, represented by point estimates for each receptor evaluated, which results in a point estimate of risk.
9. "Declaration of Environmental Use Restriction" or "DEUR" means a restrictive covenant as described in A.R.S. § 49-152.
10. "Ecological community" means an assemblage of populations of different species within a specified location in space and time.
11. "Ecological receptor" means a specific ecological community, population, or individual organism, protected by federal or state laws and regulations, or a local population that provides an important natural or economic resource, function, and value.
12. "Ecological risk assessment" means a scientific evaluation of the probability of an adverse effect to ecological receptors from exposure to specific types and concentrations of contaminants. An ecological risk assessment contains four components: identification of potential contaminants; an exposure assessment; a toxicity assessment; and a risk characterization.
13. "Engineering control" means a remediation method, such as a barrier or cap, which is used to prevent or minimize exposure to contaminants, and includes technologies that reduce the mobility or migration of contaminants.
14. "Excess lifetime cancer risk" means the increased risk of developing cancer above the background cancer occurrence levels due to exposure to contaminants.
15. "Exposure" means contact between contaminants and organisms.
16. "Exposure pathway" means the course a contaminant takes from a source to an exposed organism. Each exposure pathway includes a source or release from a source, an exposure point, and an exposure route. If the exposure point differs from the source, transport/exposure media (that is, air, water) are also included.
17. "Exposure point" means a location of potential contact between a contaminant and an organism.
18. "Exposure route" means the way a contaminant comes into contact with an organism (that is, by ingestion, inhalation, or dermal contact).
19. "Groundwater" means water in an aquifer as defined in A.R.S. § 49-201(2).
20. "Hazard Index" means the sum of hazard quotients for multiple substances and/or multiple exposure pathways, or the sum of hazard quotients for chemicals acting by a similar mechanism and/or having the same target organ.
21. "Hazardous Waste Management Program" means the system of requirements prescribed in A.R.S. Title 49, Ch. 5, Article 2 and 18 A.A.C. 8, Article 2.
22. "Hazard quotient" means the value which quantifies non-carcinogenic risk for one chemical for one receptor population for one exposure pathway over a specified exposure period. The hazard quotient is equal to the ratio of a chemical-specific intake to the reference dose.
23. "Imminent and substantial endangerment to the public health or the environment" has the meaning found in A.R.S. § 49-282.02(C)(1).
24. "Institutional control" means a legal or administrative tool or action taken to reduce the potential for exposure to contaminants.
25. "Letter of Completion" means a Departmental statement that indicates whether the property in question has met the soil remediation standards in this Article.
26. "Migrate" or "migration" means the movement of contaminants from the point of release, emission, discharge, or spillage: through the soil profile; by volatilization from soil to air and subsequent dispersion to air; and by water, wind, or other mechanisms.
27. "Non-carcinogen" means a contaminant that has the potential upon exposure to an individual to cause adverse health effects other than cancer.

28. “Non-residential site-specific remediation level” means a level of contaminants remaining in soil after remediation that results in a cumulative excess lifetime cancer risk between 1×10^{-6} and 1×10^{-4} and a Hazard Index no greater than 1 based on non-residential exposure assumptions.
29. “Nuisance” means the activities or conditions that may be subject to A.R.S. § 49-141.
30. “Person” means any public or private corporation, company, partnership, firm, association, or society of persons, the federal government and any of its departments or agencies, this state or any of its agencies, departments, political subdivisions, counties, towns, municipal corporations, as well as a natural person.
31. “Population” means an aggregate of individuals of a species within a specified location in space and time.
32. “Probabilistic risk assessment methodology” means a site-specific human health risk assessment, performed using probability distributions of input variables and exposure assumptions that take into account the variability and uncertainty of these values, which results in a range or distribution of possible risk estimates.
33. “Reasonable Maximum Exposure” or “RME” means the highest human exposure case that is greater than the average, but is still within the range of possible exposures to humans at a site.
34. “Remediate” or “remediation” has the meaning found in A.R.S. § 49-151.
35. “Reference dose” means the toxicity factor expressed as a threshold level in units of (mg/kg-day) at which non-cancer effects are not expected to occur.
36. “Repository” means the Department’s database, established under A.R.S. § 49-152(E), from which the public may view information pertaining to remediation projects.
37. “Residential site-specific remediation level” means a level of contaminants remaining in the soil after remediation that results in a cumulative excess lifetime cancer risk between 1×10^{-6} and 1×10^{-4} and a Hazard Index no greater than 1 based on residential exposure assumptions.
38. “Residential use” has the meaning found in A.R.S. § 49-151.
39. “School” means any public institution under the jurisdiction of the Arizona State Board of Education or the Arizona State Board for Charter Schools, or any non-public institution, established for the purposes of offering instruction to children attending any grade from preschool through grade 12.
40. “Site-specific human health risk assessment” means a scientific evaluation of the probability of an adverse effect to human health from exposure to specific types and concentrations of contaminants. A site-specific human health risk assessment contains four components: identification of potential contaminants; an exposure assessment; a toxicity assessment; and a risk characterization.
41. “Soil” means all earthen materials, including moisture and pore space contained within earthen material, located between the land surface and groundwater including sediments and unconsolidated accumulations produced by the physical and chemical disintegration of rocks.
42. “Soil remediation level” or “SRL” means a pre-determined risk-based standard based upon the total contaminant concentration in soil, developed pursuant to A.R.S. § 49-152(A)(1) and listed in Appendix A or, as applicable, in Appendix B.
43. “Solid Waste Management Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 4, and the rules adopted under those statutes.
44. “Special Waste Management Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 4, Article 9 and 18 A.A.C. 13, Articles 13 and 16.
45. “Underground Storage Tank Program” or “UST Program” means the system of requirements prescribed in A.R.S. Title 49, Ch. 6, Article 1 and 18 A.A.C. 12.
46. “Water Quality Assurance Revolving Fund” or “WQARF” means the system of requirements prescribed in A.R.S. Title 49, Ch. 2, Article 5 and 18 A.A.C. 16.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-201 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-202. Applicability

- A.** This Article applies to a person legally required to conduct soil remediation by any of the following regulatory programs administered by the Department:
1. The Aquifer Protection Permit Program.
 2. The Hazardous Waste Management Program.
 3. The Solid Waste Management Program.
 4. The Special Waste Management Program.
 5. The Underground Storage Tank Program.
 6. The Water Quality Assurance Revolving Fund.
 7. Any other program under A.R.S. Title 49 that regulates soil remediation.
- B.** This Article also applies to a person who is not legally required to conduct soil remediation, but who chooses to do so under any program administered by the Department.
- C.** The requirements of this Article apply in addition to any specific requirements of the programs described in subsections (A) or (B).
- D.** This Article is limited to soil remediation.
- E.** A person who is remediating a site shall comply with the numeric soil remediation standards identified in either Appendix A or Appendix B if both of the following conditions are met. If either subsection (1) or subsection (2) is not met, a person who is remediating a site shall comply with the numeric soil remediation standards identified in Appendix A.
1. The site was characterized before May 5, 2007. A site is considered characterized when the laboratory analytical results of the soil samples delineating the nature, degree, and extent of soil contamination have been received by the person conducting the remediation.
 2. The site was remediated or a risk assessment completed before May 5, 2010. A risk assessment or remediation is considered completed when site closure, that meets the conditions in R18-7-209, has been requested.
- F.** Nothing in this Article limits the Department’s authority to establish more stringent soil remediation levels in response to:
1. A nuisance.
 2. An imminent and substantial endangerment to the public health or the environment.

G. This Article does not apply to persons remediating soil to numeric soil remediation levels specified in the following documents and entered into, issued, or approved before May 5, 2007:

1. Orders of the Director;
2. Orders of any Court;
3. Work agreements approved by the Director pursuant to A.R.S. § 49-282.05;
4. Closure plans approved by the Director pursuant to R18-8-265;
5. Post-closure permits approved by the Director pursuant to R18-8-270;
6. Records of Decision approved by the Director pursuant to R18-16-410;
7. Records of Decision approved by the Director pursuant to R18-16-413; and
8. Records of Decision approved by the Director pursuant to 40 CFR 300.430(f)(5).

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-202 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-203. Remediation Standards

- A.** A person subject to this Article shall remediate soil so that any concentration of contaminants remaining in the soil after remediation is less than or equal to one of the following:
1. The background remediation standards prescribed in R18-7-204.
 2. The pre-determined remediation standards prescribed in R18-7-205.
 3. The site-specific remediation standards prescribed in R18-7-206.
- B.** A person who conducts a soil remediation based on the standards in R18-7-205, R18-7-206, R18-7-207 shall remediate soil so that any concentration of contaminants remaining in the soil after remediation does not:
1. Cause or threaten to cause a violation of Water Quality Standards prescribed in 18 A.A.C. 11. If the remediation level for a contaminant in the soil is not protective of aquifer water quality and surface water quality, the person shall remediate soil to an alternative soil remediation level that is protective of aquifer water quality and surface water quality.
 2. Exhibit a hazardous waste characteristic of ignitability, corrosivity, or reactivity as defined in R18-8-261(A). If the remediation level for a contaminant in the soil results in leaving soils that exhibit a hazardous waste characteristic other than toxicity, the person shall remediate soil to an alternative soil remediation level such that the soil does not exhibit a hazardous waste characteristic other than toxicity.
 3. Cause or threaten to cause an adverse impact to ecological receptors. If the Department determines that the remediation level for a contaminant in soil may impact ecological receptors based on the existence of ecological

receptors and complete exposure pathways, the person shall conduct an ecological risk assessment. If the ecological risk assessment indicates that any concentration of contaminants remaining in the soil after remediation causes or threatens to cause an adverse impact to ecological receptors, the person shall remediate soil to an alternative soil remediation level, derived from the ecological risk assessment, that is protective of ecological receptors.

- C.** Soil vapor concentration may be used to estimate the total contaminant concentration in soil if the Department determines that the soil vapor concentration methodology will not be invalidated by the soil, hydrogeology, or other characteristics of the site.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 59; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-203 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-204. Background Remediation Standards

- A.** A person may elect to remediate to a background concentration for a contaminant.
- B.** A person who conducts a remediation to a background concentration for a contaminant shall establish the background concentration using all of the following factors:
1. Site-specific historical information concerning land use.
 2. Site-specific sampling of soils unaffected by a release, but having characteristics similar to those of the soils affected by the release.
 3. Statistical analysis of background concentrations using the 95th percentile upper confidence limit.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-204 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-205. Pre-determined Remediation Standards

- A.** A person may elect to remediate to the residential or non-residential soil remediation levels (SRLs) in Appendix A. If allowed under R18-7-202(E), a person may also elect to remediate to the residential or non-residential SRLs in Appendix B.
- B.** A person who conducts remediation pursuant to this Article shall remediate to the residential SRL on any property where there is residential use at the time remediation is completed.
- C.** A pre-determined contaminant standard established by federal law or regulation may be used for polychlorinated biphenyl cleanups regulated pursuant to the Toxic Substances Control

Act (TSCA) at 40 CFR 761.120 et seq., however, the Department has no regulatory authority to issue a Letter of Completion in TSCA-regulated cleanups.

- D.** A person who elects to utilize a residential or non-residential SRL for the following known human carcinogens shall remediate to a 1×10^{-6} excess lifetime cancer risk: benzene, benzidine, bis (chloromethyl) ether, chromium VI, diethylstilbestrol, direct black 38, direct blue 6, direct brown 95, nickel subsulfide, and vinyl chloride.
- E.** Except as provided below, a person who elects to remediate to a residential SRL may utilize a 1×10^{-5} excess lifetime cancer risk for any carcinogen other than a known human carcinogen. If the current or currently intended future use of the contaminated site is a child care facility or school where children below the age of 18 are reasonably expected to be in frequent, repeated contact with the soil, the person conducting remediation shall remediate to a 1×10^{-6} excess lifetime cancer risk.
- F.** For contaminants that exhibit both carcinogenic and non-carcinogenic effects, the numeric standard that is lower (more protective) shall apply.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-205 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-206. Site-specific Remediation Standards

- A.** A person may elect to remediate to a residential or a non-residential site-specific remediation level derived from a site-specific human health risk assessment.
- B.** A person who conducts a remediation to a residential or a non-residential site-specific remediation level shall use one of the following site-specific human health risk assessment methodologies:
1. A deterministic methodology. If a deterministic methodology is used, reasonable maximum exposures shall be evaluated for future use scenarios.
 2. A probabilistic methodology. If a probabilistic methodology is used, it shall be no less protective than the 95th percentile upper bound estimate of the distribution.
 3. An alternative methodology commonly accepted in the scientific community. An alternative methodology is considered accepted in the scientific community if it is published in peer-reviewed literature, such as a professional journal or publication of standards of general circulation, and there is general consensus within the scientific community that the methodology is sound.
- C.** A person who conducts a remediation to a site-specific remediation level shall remediate to the residential site-specific remediation level on any property where there is residential use at the time remediation is completed.
- D.** A person conducting a remediation to a residential or a non-residential site-specific remediation level shall remediate the contaminants in soil to a Hazard Index no greater than 1 and a cumulative excess lifetime cancer risk from 1×10^{-6} to 1×10^{-4} . The following site-specific factors shall be evaluated when determining the cumulative excess lifetime cancer risk:

1. The presence of multiple contaminants.
2. The existence of multiple pathways of exposure.
3. The uncertainty of exposure.
4. The sensitivity of the exposed population.
5. Other program-related laws and regulations that may apply.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-206 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-207. Site-specific Remediation Standards for Nitrates and Nitrites

A person who conducts remediation of nitrates or nitrites shall remediate to a site-specific remediation level pursuant to R18-7-203(B)(1), (2), and (3).

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-207 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Section repealed; new Section made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-208. Declaration of Environmental Use Restriction (DEUR)

A property owner who elects to leave contamination on a property that exceeds the applicable residential standard for the property under R18-7-205 or R18-7-206, or elects to use an institutional control or an engineering control to meet the requirements of R18-7-205, R18-7-206, or R18-7-207, shall record a DEUR pursuant to A.R.S. § 49-152 and comply with the related provisions of that statute and applicable rules.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Former R18-7-208 renumbered to R18-7-209; new R18-7-208 made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-209. Letter of Completion or Alternative Closure Document

- A.** If a person requests a Letter of Completion or an alternative closure document, a person shall submit, at a minimum, the following information to the applicable Departmental program listed in R18-7-202(A) or described in R18-7-202(B):
1. A description of the actual activities, techniques, and technologies used to remediate soil at the site, including the legal mechanism in place to ensure that any institutional and engineering controls are maintained.
 2. Documentation that requirements prescribed in R18-7-203(A) and R18-7-203(B)(1) and (2) have been satisfied.
 3. If the Department determines pursuant to R18-7-203(B)(3) that an ecological risk assessment is required, documentation that the requirements prescribed in R18-7-203(B)(3) have been satisfied.
 4. Soil sampling analytical results that are representative of the area remediated, including documentation that the laboratory analysis of samples has been performed by a laboratory licensed by the Arizona Department of Health Services under A.R.S. § 36-495 et seq. and 9 A.A.C. 14, Article 6.
 5. A statement signed by the person conducting the remediation certifying the following: I certify under penalty of law that this document and all attachments are, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violations.
- B.** The applicable Departmental program described in R18-7-202(A) or R18-7-202(B) shall evaluate the information described in R18-7-209(A). The Department may request additional information, or if the Department verifies compliance with the soil remediation standards set forth under this Article and closure requirements of the applicable program or programs identified in R18-7-202(A) or described in R18-7-202(B), the Department shall issue a Letter of Completion, or an alternative closure document provided for by statute or rule that certifies the soil standards in this Article have been achieved.
- C.** The applicable Departmental program described in R18-7-202(A) or R18-7-202(B) may revoke or amend any Letter of Completion or alternative closure document described in R18-7-209(B) if any of the information submitted pursuant to R18-7-208 or R18-7-209(A) is inaccurate or if any condition was unknown to the Department when the Department issued the Letter of Completion or alternative closure document.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Former R18-7-209 renumbered to R18-7-210; new R18-7-209 renumbered from R18-7-208 and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

R18-7-210. Notice of Remediation and Repository

- A.** A person conducting soil remediation shall submit a Notice of Remediation to the applicable Departmental program listed in R18-7-202(A) or R18-7-202(B) before beginning remediation. A person conducting a soil remediation to address an immediate and substantial endangerment to public health or the environment and who has notified the Department in accordance with notification requirements prescribed in A.R.S. § 49-284 is not required to submit a Notice of Remediation before beginning remediation. Any person who continues soil remediation after the immediate and substantial endangerment has been abated shall submit a Notice of Remediation. A Notice of Remediation shall include all of the following information:
1. The name and address of the real property owner;
 2. The name and address of the remediating party;
 3. A legal description and street address of the property;
 4. A list of each contaminant to be remediated;
 5. The background concentration, SRL, or site-specific remediation level selected to meet the remediation standards;
 6. A description of the current and post-remediation property use as either residential or non-residential;
 7. The rationale for the selection of residential or non-residential remediation; and
 8. The proposed technologies for remediating the site.
- B.** The Department shall maintain a repository available to the public for information regarding sites where soil is remediated. The Repository shall include a listing of sites for which a Notice of Remediation has been submitted or a Letter of Completion or alternative closure document has been issued.
1. For sites where a Notice of Remediation has been filed, the Repository shall contain the date the notice was filed and the information submitted as described in subsection (A).
 2. For sites where a Letter of Completion or alternative closure document has been issued, the Repository shall contain the following:
 - a. The name and address of the real property owner;
 - b. The name and address of the remediating party;
 - c. A legal description and street address of the property;
 - d. A listing of each contaminant that was remediated;
 - e. The background concentration, SRL, or site-specific remediation level selected to meet the remediation standard;
 - f. A description whether the residential or non-residential standard was achieved;
 - g. A description of any engineering or institutional control used to remediate the site; and
 - h. The date when the Letter of Completion or alternative closure document was issued.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency amendment reinstated at the request of the Department (see Supp. 97-1); historical note from Supp. 97-3 stating emergency expired removed for clarity. Section R18-7-208 adopted permanently effective December 4, 1997, replacing emergency rule (Supp. 97-4). Section R18-7-210 renumbered from R18-7-209 and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

Appendix A. Soil Remediation Levels (SRLs)

| CONTAMINANT | CASRN | Class | Residential (mg/kg) | | | Non-residential (mg/kg) |
|----------------------------|------------|--------|-----------------------|-----------------------|----------------|-------------------------|
| | | | Carcinogen | | Non-carcinogen | |
| | | | 10 ⁻⁶ Risk | 10 ⁻⁵ Risk | | |
| Acephate | 30560-19-1 | ca, nc | 63 | 630 | 240 | 2,000 |
| Acetaldehyde | 75-07-0 | ca, nc | 11 | 110 | 50 | 160 |

| | | | | | | |
| NA indicates not applicable. | | | | | | |
| Class is the classification of the chemical. “ca” indicates carcinogenic effects; “nc” indicates non-carcinogenic effects. Chemicals that have both carcinogenic and non-carcinogenic effects are classified “ca, nc”. | | | | | | |
| * Indicates SRL is based on the chemical-specific saturation level in soil for volatile organic chemicals only. | | | | | | |
| ** Indicates SRL is based on a 100% saturation ceiling limit for non-volatile organic chemicals. | | | | | | |
| ¹ Arsenic standards are not risk-based standards, but based on background. | | | | | | |
| ² Cyanide (free): Free cyanide is a subset of total cyanides. If any ADHS approved method for total cyanide reports a concentration exceeding this standard, further analyses to differentiate free cyanide from other cyanide metal complexes is required. | | | | | | |
| ³ Cyanide (hydrogen): If the cyanide concentrations using any method exceed the hydrogen cyanide standard, then hydrogen cyanide vapor samples should be collected at the site. | | | | | | |
| ⁴ PCBs, low-risk mixture: Use if laboratory analysis confirms that the total PCB concentration consists of 0.5 percent or less of congeners that contain five or more chlorines and that no dioxin-like congeners are present. | | | | | | |
| ⁵ PCBs, high-risk mixture: Use if only total PCB concentration is reported by any ADHS licensed analytical method, or if laboratory analysis confirms that the total PCB concentration consists of more than 0.5 percent congeners that contain five or more chlorines or that dioxin-like congeners are present. | | | | | | |
| Bold indicates adequate evidence to classify the chemical as a known human carcinogen. | | | | | | |
| CASRN is the Chemical Abstract System Registry Number. | | | | | | |

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix A adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Amended to correct measurement units in columns 5 and 6 from “mg/k” to “mg/kg” (Supp. 01-4). Former Appendix A renumbered to Appendix B; new Appendix A made by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

CARCINOGENICITY CLASSIFICATIONS:

A = Known human carcinogen

B1 = Probable human carcinogen, with limited data indicating human carcinogenicity.

B2 = Probable human carcinogen, with inadequate or no evidence of carcinogenicity in humans. Sufficient evidence for carcinogenicity in laboratory animals.

C = Possible human carcinogen.

D = Not classifiable as to human carcinogenicity.

E = Evidence of noncarcinogenicity in humans.

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix B adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Former Appendix B repealed; new Appendix B renumbered from Appendix A and amended by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

Appendix C. Repealed

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Interim emergency appendix reinstated at the request of the Department; historical note from Supp. 97-3 stating emergency expired removed for clarity. Appendix C adopted permanently effective December 4, 1997, replacing emergency appendix (Supp. 97-4). Appendix C repealed by final rulemaking at 13 A.A.R. 971, effective May 5, 2007 (Supp. 07-1).

Appendix D. Emergency Expired

Historical Note

Adopted by emergency action effective March 29, 1996, pursuant to A.R.S. § 41-1026 and Laws 1995, Ch. 232, § 5; in effect until permanent rules are adopted and in place no later than August 1, 1997, pursuant to A.R.S. § 49-152 and Laws 1995, Ch. 232, § 5 (Supp. 96-1). Historical note revised to clarify exemptions of emergency adoption (Supp. 97-1). Historical note from Supp. 97-3 stating emergency expired removed for clarity; interim emergency rule reinstated at the request of the Department. Emergency expired effective December 4, 1997 (Supp. 97-4).

ARTICLE 3. PROSPECTIVE PURCHASER AGREEMENT

R18-7-301. Prospective Purchaser Agreement Fee

- A.** An applicant for a prospective purchaser agreement with the Department under A.R.S. § 49-285.01 shall pay to the Department the fee prescribed in this Article. The Department shall not refund a fee once it accepts an application.
- B.** An applicant for a prospective purchaser agreement shall pay a fee for each prospective purchaser agreement application submitted to the Department for review. The fee includes:
1. An initial charge as prescribed in subsection (C);
 2. An hourly charge, if the conditions of subsection (D)(1) apply;
 3. The publication costs for the legal notice as prescribed in subsection (F); and
 4. A charge, as prescribed in subsection (D)(2), if an applicant requests a settlement.
- C.** An applicant shall pay an initial charge of \$2,500 for an application for a prospective purchaser agreement requiring minimal review for property within a site that is listed in the Water Quality Assurance Revolving Fund (WQARF) registry under A.R.S. § 49-287.01. For property that is not on the WQARF registry, an applicant shall pay an initial charge of \$3,600 for an application for a prospective purchaser agreement. The initial charge covers direct and indirect Department costs. An application for a prospective purchaser agreement requiring minimal review is one that requires 34 or fewer hours of review time for a site on the WQARF registry or 49 or fewer hours for a site not on the WQARF registry.
- D.** In addition to the initial charge described in subsection (C), the applicant shall pay the following charges, if applicable:

1. An hourly charge for reviewing a prospective purchaser agreement that requires more than the hours for review covered by the initial charge in subsection (C). The additional charge is \$73 per hour for Department staff time and Assistant Attorney General time.
 2. A charge in the amount of \$2,000, to accompany a request for a settlement that includes immunity from contribution claims for existing contamination, if requested under A.R.S. § 49-285.01. If costs for the settlement exceed \$2,000, the remainder of the costs will be paid for through the terms of the settlement.
- E.** The applicant may agree in writing to pay charges that exceed the initial charge described in subsection (C). Unless the applicant has so agreed, when the Department believes that the costs associated with the prospective purchaser agreement have begun to exceed the initial charge, the Department shall stop work on the prospective purchaser agreement and notify the applicant in writing. The applicant shall notify the Department in writing, within 30 days of the Department's notification under this subsection, whether the applicant wishes the Department to continue work on the application and to incur additional costs. The Department shall terminate the application if the applicant does not provide written confirmation within 30 days that it wishes the Department to continue work on the application.
- F.** The Department shall publish a legal notice announcing an opportunity for public comment on the prospective purchaser agreement. The legal notice shall include:
1. A general description of the contents of the agreement;

2. The location where information regarding the agreement can be obtained;
 3. The name and address of the Department contact where comments may be sent; and
 4. The time and date that the comment period closes.
- G.** The initial charge described in subsection (C) is due when the applicant submits the prospective purchaser agreement application to the Department. The publication cost specified in subsection (B)(3), and any hourly charge described in subsection (D)(1), are due within 30 days of the date the invoice is sent by the Department. Fee charges are payable to the state of Arizona, and shall be paid in full before the Department executes a prospective purchaser agreement.

Historical Note

Adopted effective February 7, 1997; filed with the Office of the Secretary of State January 14, 1997 (Supp. 97-1). Amended by final rulemaking at 12 A.A.R. 345, effective March 11, 2006 (Supp. 06-1).

Editor's Note: The heading for the following Article was amended by exempt rulemaking at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

Editor's Note: The following Article was originally adopted under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 1997, Ch. 296, §§ 3(E) & (G), 10 & 11. Although exempt from certain provisions of the rulemaking process, the Department was required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 97-3).

ARTICLE 4. REPEALED

R18-7-401. Repealed

Historical Note

Adopted effective August 5, 1997, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 1997, Ch. 296, §§ 3(E) & (G), 10 & 11 (Supp. 97-3). Section R18-7-401 repealed; new Section R18-7-401 adopted effective October 21, 1998 (Supp. 98-4). Repealed by final rulemaking at 15 A.A.R. 232, effective March 7, 2009 (Supp. 09-1).

Editor's Note: The rules in the following Article were adopted as interim rules under an exemption from the Arizona Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 2000, Ch. 225, § 13. Although exempt from certain provisions of the rulemaking process, the Department is required to submit notice of proposed rulemaking with the Secretary of State for publication in the Arizona Administrative Register and conduct a public hearing (Supp. 01-1).

ARTICLE 5. VOLUNTARY REMEDIATION PROGRAM

R18-7-501. Definitions

The following definitions shall apply in this Article, unless the context otherwise requires:

“Applicant” means a person who participates in the Voluntary Remediation Program. Participation in the Voluntary Remediation Program begins when the Department receives an application under A.R.S. § 49-173 and continues until any one of the following occurs:

The Department grants the applicant’s request for a no further action determination.

The applicant provides the Department with notice of the applicant’s intent to withdraw from the program.

The Department terminates the applicant’s participation under A.R.S. § 49-178(B).

“Department” means the Arizona Department of Environmental Quality.

“Voluntary Remediation Program” means the program authorized under A.R.S. Title 49, Chapter 1, Article 5.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-502. Application Fee

- A.** At the time of filing an application to participate in the Voluntary Remediation Program, the applicant shall pay a nonrefundable application fee in the amount of \$2,000.00.
- B.** The application fee shall be in the form of a company check, cashier’s check, certified check, or money order made payable to the Arizona Department of Environmental Quality.
- C.** Except as provided in subsection (D), an application does not meet the requirements in A.R.S. § 49-173 unless accompanied by the application fee. The Department shall not review an application until the application fee is paid in full.
- D.** At the request of an applicant that is a small business as defined under A.R.S. § 41-1001, the Department may review and approve an application upon receipt of a partial payment of the application fee in an amount approved by the Department and an agreement to pay the remainder of the fee in scheduled installments.
- E.** An applicant that withdraws or is terminated from participation in the Voluntary Remediation Program may reapply to the program by submitting an application that meets the requirements of A.R.S. § 49-173, including payment of the application fee.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-503. Deposit

- A.** At the time that an applicant submits a work plan under A.R.S. § 49-175 or a report under A.R.S. § 49-181, the applicant shall submit to the Department an initial deposit of \$4,000.00.
- B.** The deposit shall be in the form of a company check, cashier’s check, certified check, or money order made payable to the Arizona Department of Environmental Quality.
- C.** The Department shall begin review of the applicant’s work plan or the report submitted under A.R.S. § 49-181 upon receipt of the initial deposit.
- D.** Upon receipt of the initial deposit, the Department shall establish a site-specific deposit account identified by a unique account number. The Department shall charge all incurred reimbursable costs attributable to the applicant’s site against the site-specific deposit account.
- E.** If, at any time during the applicant’s participation in the program, the balance in the site-specific deposit account falls below \$1,000.00 and the Department reasonably estimates that the reimbursable costs chargeable to the account will exceed the amount available in the account, the Department shall mail or fax a written request that the applicant submit an additional deposit in an amount not to exceed \$4,000.00. The Department may request any number of additional deposits, in amounts of \$4,000.00 or less, at any time that the conditions of this subsection are met.

- F. If any requested additional deposit is not received within 30 days after the Department mails or faxes the request in subsection (E) and the Department determines that the applicant's site specific account balance is insufficient to support continued program participation, the Department shall mail a written notice of deficiency under A.R.S. § 49-178 and shall notify the applicant that work on the site may be suspended until the additional deposit is received. If the Department does not receive the requested additional deposit within 60 days after the notice of deficiency is mailed or faxed and the applicant does not dispute the Department's determination that the site specific account balance is insufficient to support continued program participation, the Department may terminate the applicant's participation in the program. An applicant whose participation is terminated under this subsection may reapply to the program as provided in R18-7-502(E).

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-504. Voluntary Remediation Program Reimbursement

- A. The applicant shall reimburse the Department, at an hourly reimbursement rate established under R18-7-505, for time spent by Voluntary Remediation Program staff on activities specifically related to the applicant's site, including the following:
1. Review of the application submitted under A.R.S. § 49-173, including review of any modifications requested by the Department or the applicant or additional information submitted by the applicant.
 2. Review of the work plan submitted under A.R.S. § 49-175, including review of any modifications requested by the Department under A.R.S. § 49-177 or by the applicant or the Department under A.R.S. § 49-180.
 3. Review of progress reports submitted as part of a work plan under A.R.S. § 49-175 or as requested by the Department under A.R.S. § 49-177 or A.R.S. § 49-180.
 4. Consideration by the Department under A.R.S. § 49-176(D) of written comments submitted in response to a public notice providing an opportunity to comment or a public meeting.
 5. Participation in public hearings required by the Department under A.R.S. § 49-176(D).
 6. Site inspections under A.R.S. § 49-177 and site investigations under A.R.S. § 49-181, including time spent in travel to and from the site.
 7. Review of the report and request for a no further action determination submitted under A.R.S. § 49-181, including review of any modifications requested by the applicant or the Department.
 8. Time spent in reviewing a request submitted by an applicant under A.R.S. § 49-182 for approval of a remedial action under A.R.S. § 49-285.
 9. Time spent in meetings or discussions requested by the applicant or the Department.
- B. The applicant shall reimburse the Department for the site-specific costs of goods and services contracted by the Department including:
1. Reasonable and necessary attorneys' fees billed to the Department by the Attorney General for legal services, including legal fees billed for representation in regard to appeals or dispute resolution under A.R.S. § 49-185.

2. Costs incurred by the Department for work provided under a contract described in A.R.S. § 49-179(D)(1) or A.R.S. § 49-179(D)(2).
3. Reasonable and necessary travel costs incurred in the performance of activities described in subsections (A)(5), (A)(6), or (A)(9) or performed at the request of the applicant.
4. Other reasonable site related expenses documented in writing by the Department.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-505. Hourly Reimbursement Rate

The hourly reimbursement rate is \$110.00 per hour.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-506. Voluntary Remediation Program Accounting

Within a reasonable time after the end of each calendar quarter, the Department shall mail or fax each applicant a statement itemizing reimbursable costs charged against the site-specific deposit account and a summary of account activity during that quarter. The statement shall be in a form consistent with generally accepted accounting principles.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

R18-7-507. Account Reconciliation

- A. Within a reasonable time after completion of the remediation work at the site, or after termination or withdrawal of the applicant from participation in the program, the Department shall prepare and mail or fax to the applicant a final statement which shall include:
1. An itemization of site-specific reimbursable costs incurred by the Department but not previously reported in a quarterly statement.
 2. The total amount of site-specific reimbursable costs incurred by the Department during the course of the project, including the costs reported in subsection (A)(1).
 3. The total amount submitted as deposits by the applicant and applied by the Department to the applicant's site-specific deposit account during the course of the project, plus the amount paid by the applicant as an application fee.
- B. If the final statement shows that the amounts submitted or paid during the course of the project are less than the Department's reimbursable costs, the applicant shall be responsible for and shall pay, within 30 days after receipt of the final statement, the difference between the costs incurred and the amounts submitted or paid.
- C. If the final statement shows that the amounts submitted or paid during the course of the project are more than the Department's reimbursable costs and the Department's reimbursable costs exceed \$2,000.00, the Department shall return to the applicant, within a reasonable time period, the difference between the amounts submitted or paid and the costs incurred.
- D. If the final statement shows that the amounts submitted or paid during the course of the project are more than the Depart-

ment's reimbursable costs and the Department's reimbursable costs total \$2,000.00 or less, the Department shall retain the applicant's nonrefundable application fee of \$2,000.00 and shall return to the applicant the amount of any deposits submitted.

- E. The Department may withhold any program approval or no further action determination until the applicant has paid any amount due and payable under the final statement.

Historical Note

New Section adopted as interim rules, under an exemption from certain provisions of the Administrative Procedure Act pursuant to Laws 2000, Ch. 225, § 13, at 7 A.A.R. 814, effective February 9, 2001 (Supp. 01-1).

ARTICLE 6. DECLARATION OF ENVIRONMENTAL USE RESTRICTION FEE

Article 6, consisting of R18-7-601 through R18-7-606, made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

R18-7-601. Definitions

The following definitions shall apply in this Article, unless the context otherwise requires:

“APP mine sites” means mining facilities which are subject to the aquifer protection permit provisions of Arizona Revised Statutes Title 49, Chapter 2, Article 3.

“Department” means the Arizona Department of Environmental Quality.

“DEUR” means declaration of environmental use restriction, as described in A.R.S. §§ 49-152 and 49-158. It is an institutional control and a restrictive covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns, and inures to the benefit of the Department and the state.

“Fee” means the fee authorized by A.R.S. §§ 49-152(K) and 49-158(G).

“Engineering control” has the meaning in A.R.S. § 49-151.

“Institutional control” has the meaning in A.R.S. § 49-151.

“Modification” means modification of a DEUR that continues to address the same spill or release, and the same contaminants, as in the original DEUR. No other changes are considered a modification of a DEUR, but would be the subject of a separate DEUR.

“One-time activities” includes reviewing and/or approving legal descriptions, control areas, contaminants, institutional or engineering controls, and draft DEUR documents.

“Ongoing activities” includes reviewing written reports, conducting site inspections, or otherwise verifying maintenance of institutional or engineering controls.

“Underground storage tanks” means those underground storage tanks defined and regulated under A.R.S. Title 49, Chapter 6, Article 1.

“WQARF sites” means sites that are listed on the site registry specified in A.R.S. § 49-287.01 and are the subject of remedial action pursuant to A.R.S. Title 49, Chapter 2, Article 5. A property that is within a registry site boundary, but does not involve a contaminant of concern identified for that registry site and is not the subject of remedial action pursuant to the above Chapter 2, is not a WQARF site for the purpose of this Section.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R.

573, effective February 20, 2004 (Supp. 04-1).

R18-7-602. Applicability

The provisions of this Article apply to properties where the owner has elected to use an institutional control and/or an engineering control to reduce the potential for exposure to contaminants on the property, or to leave contamination on the property that exceeds the applicable residential soil standard for the property. The owner of such property shall record, in each county where the property is located, a restrictive covenant labeled “declaration of environmental use restriction,” that contains the information required by A.R.S. §§ 49-152 or 49-158, as approved by the Department. The owner shall submit the information on a form provided by the Department.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

R18-7-603. Fee

Except as provided in R18-7-605, before recording the DEUR or DEUR modification, property owners shall pay to the Department a fee as provided in R18-7-604 by company, cashier, or certified check, or money order, or other method approved by the Department.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

R18-7-604. Fee Calculation

- A. Property owners who use only an institutional control shall pay to the Department a fee that is the sum of the following:
1. \$825, representing Department costs to perform one-time activities;
 2. An amount representing the costs of ongoing activities performed by the Department that is one of the following:
 - a. For properties contaminated only by a petroleum release from one or more underground storage tanks: \$110 multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years; or
 - b. For all other properties: \$220 multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years;
 3. \$770, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);
 4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
 5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).
- B. Property owners who use an engineering control without groundwater monitoring shall pay a fee to the Department that is the sum of the following:
1. \$1,595, representing Department costs to perform one-time activities;
 2. \$660, representing Department costs of annual ongoing activities, multiplied by the number of years the Department projects the property will require ongoing activities, not to exceed 30 years;
 3. \$1,320, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);

4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
 5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).
- C.** Property owners who use an engineering control with ground-water monitoring, and owners of WQARF sites and APP mine sites, shall pay to the Department a fee that is the sum of the following:
1. \$3,740, representing Department costs for performing one-time activities;
 2. A component of the fee to be determined on a case-by-case basis, at \$55 per hour, based on both:
 - a. The number of hours per year that the Department projects will be required for ongoing activities performed by the Department for the property, not to exceed 70 hours per year; and
 - b. The number of years that the Department projects the property will require ongoing activities, not to exceed 30 years;
 3. \$1,870, representing Department costs to review and render a decision on a request to release a DEUR, and to record the release, pursuant to A.R.S. §§ 49-152(D) or 49-158(L);
 4. \$1,985 per site, representing the property owner's pro-rata share of Department costs to oversee and coordinate its DEUR-related activities; plus
 5. \$550 per site, representing the property owner's pro-rata share of Department costs to administer the repository under A.R.S. § 49-152(E).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

R18-7-605. Postponement of the Release Portion of the DEUR Fee

Property owners may elect to postpone payment of the portion of the fee to release the DEUR, described in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3), on the condition that payment of the reasonable and necessary costs of releasing the DEUR is made with the request to the Department to release the DEUR from the property. Property owners electing to use this option acknowledge that the future amount of the release portion of the DEUR fee will be the amount established by this Article at the time the request for the release of the DEUR is filed with the Department, which may be greater than the amount described in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3) at the time the DEUR is recorded.

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

R18-7-606. DEUR Modification Fee

A property owner who wishes to request a modification to an existing DEUR pursuant to A.R.S. §§ 49-152(I)(2), 49-152(J)(2), 49-158(E), or 49-158(F) shall pay to the Department a fee, representing Department costs to review and render a decision on the request to modify the DEUR. The fee shall accompany the proposed modification, and shall be in the form of company, cashier, or certified check, or money order, or other method approved by the Department. The fee shall be the amount specified in R18-7-604(A)(3), R18-7-604(B)(3), or R18-7-604(C)(3), as appropriate for the category of site as described in R18-7-604(A), R18-7-604(B), or R18-7-604(C).

Historical Note

New Section made by exempt rulemaking at 10 A.A.R. 573, effective February 20, 2004 (Supp. 04-1).

41-1003. Required rule making

Each agency shall make rules of practice setting forth the nature and requirements of all formal procedures available to the public.

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.

16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.

17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.

2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.

3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.

4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.

5. Contract with other agencies, including laboratories, in furthering any department program.

6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.

7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.

8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.

9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.
2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.
3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.
2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-152. Soil remediation standards; restrictions on property use

A. Notwithstanding any other remediation levels established under this title, the director shall approve remediation levels calculated in accordance with this subsection and shall accomplish the following for remediation of contaminated soil to protect public health and the environment in accordance with the applicable provisions of this title and section 33-434.01:

1. Establish predetermined risk based standards by rule. At a minimum, separate standards shall be established for residential and nonresidential exposure assumptions. Until risk based remediation standards are formally established by rule, the director shall establish interim standards adopting:

(a) The Arizona health based guidance levels developed by the department of health services to include a health based standard for total petroleum hydrocarbons as the standards for residential uses.

(b) The guidance levels in subdivision (a) of this paragraph modified to reflect the United States environmental protection agency published assumptions for exposures that are not residential as the standards for nonresidential uses. The initial adoption of these interim standards shall be effective by December 15, 1995 and shall be deemed emergency rules pursuant to section 41-1026.

2. Issue guidance on methods for calculating case-by-case, site specific risk based remediation levels in accordance with risk assessment methodologies that are accepted in the scientific community and shall not preclude the use of newly developed risk assessment methodologies that are accepted in the scientific community.

B. The owner of a property may elect to remediate the property to meet a site specific residential or nonresidential risk based remediation standard or a predetermined residential or nonresidential risk based remediation standard. The property is suitable for unrestricted use if it has been remediated without the use of engineering or institutional controls to meet either of the following:

1. The predetermined residential risk based remediation standard.

2. A site specific risk based hazard index equal to or less than one or a risk of carcinogenic health effects that is less than or equal to the range of risk levels set forth in 40 Code of Federal Regulations section 300.430(e)(2)(i)(A)(2), based on residential exposure.

C. If the owner has elected to use an engineering or institutional control to meet the standards prescribed in subsection B of this section, or if the owner has elected to leave contamination on the property that exceeds the applicable residential standard for the property at a site remediated under programs, settlements or orders administered by the department under this title, the owner shall record in each county where the property is located an institutional control that consists of a restrictive covenant that is labeled "declaration of environmental use restriction" pertaining to the area of the property necessary to protect the public health and the environment. A person who is conducting a remedial action, remediation, corrective action or response action that requires an institutional or engineering control and who is not the owner of the property shall obtain written consent from the owner before implementing the institutional control or constructing the engineering control. On implementation of the institutional or engineering control, the owner shall record a declaration of environmental use restriction in each county where the property is located. If the institutional control or engineering control will affect right-of-way that is owned, maintained or controlled by a public entity for public benefit, the person shall also obtain the public entity's written consent before implementing the institutional control or constructing the engineering control. The declaration of environmental use restriction shall limit by legal description:

1. The area of the property where the institutional control or engineering control shall be maintained.

2. The area of the property to be restricted to nonresidential use, because contamination remains on the property above the standards prescribed in subsection B, paragraph 1 or 2 of this section.

D. At the written request of the owner of property that is subject to a declaration of environmental use restriction, the director shall determine whether release or modification of the declaration of environmental use restriction is appropriate. If a release has been requested, the director shall make this determination within sixty days after the date of the property owner's request. If the director determines that release of the declaration of environmental use restriction is appropriate, the director shall record in each county where the property is located a notice releasing the declaration of environmental use restriction. The declaration of environmental use restriction is perpetual unless released pursuant to this section. The director shall determine that release of a declaration of environmental use restriction is appropriate if the property has been remediated, without the use of institutional controls or engineering controls, to either:

1. Meet predetermined risk based remedial standards for residential exposure assumptions.
2. Present a risk based hazard index equal to or less than one from noncancer health effects and a risk estimate of carcinogenic health effects equal to or less than the range of risk levels set forth in 40 Code of Federal Regulations section 300.430(e)(2)(i)(A)(2).

E. The department shall establish a repository in the department listing sites remediated under programs administered by the department under this title. The repository shall include the name and address of the owner of the property, when the remediation was conducted, the legal description and street address of the property, the applicability of section 33-434.01, the type of financial assurance mechanism that is being used, if applicable, and a description of the purpose of the declaration of environmental use restriction.

F. When recorded, an owner's declaration of environmental use restriction under subsection B of this section is a covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns and inures to the benefit of the department and the state. If notice of the declaration of environmental use restriction that includes a specific description of the area of the property that is subject to the declaration of environmental use restriction is contained in the repository maintained by the department pursuant to subsection E of this section, a declaration of environmental use restriction may not be extinguished, limited or impaired through any of the following:

1. Sale of a real property tax lien.
2. Foreclosure of a tax lien.
3. Foreclosure of any mortgage, deed of trust or other encumbrance or lien on the property.
4. Adverse possession.
5. Exercise of eminent domain.
6. Application of the doctrine of abandonment, the doctrine of waiver or any other common law doctrine.

G. Each party to a declaration of environmental use restriction shall incorporate the terms of the declaration of environmental use restriction into any lease, license or other agreement that is signed by the party and that grants a right with respect to the property that is subject to the declaration of environmental use restriction. The incorporation may be in full or by reference.

H. A declaration of environmental use restriction is sufficient if it contains all of the following information:

1. A legal description and the address of the area of the property that is subject to the declaration.
2. The date that remediation was completed and a map of the area of the property that is subject to the declaration.
3. A description of the environmental contaminants that were the subject of the remediation, remedial action, corrective action or response action.

4. A statement that more detailed information is available at the department, including the address at which that information will be maintained.
5. A notarized signature of a department official indicating approval of the declaration of environmental use restriction.
6. The notarized signature of the owner.

I. If institutional controls are used in addition to a declaration of environmental use restriction to satisfy the requirements of this section, the declaration of environmental use restriction, in addition to the information required by subsection H of this section, shall include all of the following:

1. A statement documenting any requirements for maintenance of the institutional control, including a description of the institutional control and the reason it must remain in place to protect public health and the environment.
2. A statement indicating that if any person desires to cancel or modify the institutional control in the future, the person must obtain prior written approval from the department pursuant to this section.
3. A statement acknowledging the department's right of access to the property at all reasonable times to verify that institutional controls are being maintained.

J. If engineering controls are used to satisfy the requirements of this section, the declaration of environmental use restriction, in addition to the information required by subsection H of this section, shall include all of the following:

1. A statement of all requirements for maintenance of the engineering control including a description of the control, the date it was constructed and the reason it must remain in place to protect public health and the environment.
2. A statement that if any person desires to change the engineering controls in the future that person shall obtain prior written approval from the department.
3. A statement acknowledging the department's right of access to the property at all reasonable times to verify that engineering controls are being maintained.
4. A brief description of the engineering control plan and financial assurance mechanism prescribed by section 49-152.01, if applicable.

K. When the declaration of environmental use restriction is recorded or modified, an owner electing to use institutional or engineering controls to satisfy the requirements of this section shall pay the department a fee established by rule. If the control is an institutional control, the owner shall submit to the department a written report once each calendar year regarding the status of the institutional control. If the control is an engineering control, the owner shall maintain the engineering control on the property to ensure that it continues to protect public health and the environment and shall inspect each engineering control at least once each calendar year. Within thirty days after each inspection, the owner shall submit to the department a written report that:

1. Describes the condition of the engineering control.
2. States the nature and cost of all restoration made to the engineering control during the calendar year.
3. Includes current photographs of the engineering control.
4. Describes the status of the financial assurance mechanism prescribed by section 49-152.01, if applicable, and a certification that the financial assurance mechanism is being maintained.

L. The department shall provide a copy of the declaration of environmental use restriction to the local jurisdiction with zoning and development plan approval for the property. The receipt of this copy does not create any new obligation or confer additional powers on the local jurisdiction. A declaration of environmental use restriction does not authorize a use of property that is otherwise prohibited by zoning ordinances or other ordinances or laws. A declaration of environmental use restriction may include activity limitations and use restrictions that would otherwise be permitted by zoning ordinances or other ordinances or laws.

M. The department shall adopt rules as necessary to implement this section. These rules may be combined with any rules necessary to implement section 49-158.

N. The department may enter on the property at all reasonable times to assess the condition of each engineering control. When the department enters on property to assess the condition of an engineering control, the department shall:

1. Provide twenty-four hours' advance notice of the entry to the property owner, if practicable.
2. Allow the owner or an authorized representative of the owner to accompany the department representative.
3. Present photographic identification on entry of the property.
4. Provide the owner or an authorized representative of the owner with notice of the right to have a duplicate sample or split of any sample taken during the inspection if the duplicate or split of any sample would not prohibit an analysis from being conducted or render an analysis inconclusive.

O. Nothing in this section shall preclude the department from initiating an action under other provisions of state or federal law.

49-158. Restrictions on property use; enforcement of engineering and institutional controls

A. Notwithstanding any other provisions of this title, if a remedial action, remediation or corrective action performed pursuant to this title or a response action performed pursuant to CERCLA as defined in section 49-201 includes an institutional control or an engineering control and the remedial action, remediation, corrective action or response action is not subject to section 49-152, the owner of the property on which the institutional control or engineering control is located, on implementation of the institutional control or on construction of the engineering control, shall record in each county where the property is located a restrictive covenant that is labeled "declaration of environmental use restriction". A person who is conducting a remedial action, remediation, corrective action or response action that requires an institutional or engineering control and who is not the owner of the property shall obtain written consent from the owner before implementing the institutional control or constructing the engineering control. On implementation of the institutional control or construction of the engineering control, the owner shall record a declaration of environmental use restriction in each county where the property is located. If the institutional control or engineering control will affect right-of-way that is owned, maintained or controlled by a public entity for public benefit, the person shall also obtain the public entity's written consent before implementing the institutional control or constructing the engineering control. The declaration of environmental use restriction shall limit by legal description the area of the property where the institutional control or engineering control shall be maintained.

B. When recorded, an owner's declaration of environmental use restriction under subsection A of this section is a covenant that runs with and burdens the property, binds the owner and the owner's heirs, successors and assigns and inures to the benefit of the department and the state. If notice of the declaration of environmental use restriction that includes a specific description of the area of the property that is subject to the declaration of environmental use restriction is contained in the repository maintained by the department pursuant to section 49-152, subsection E, a declaration of environmental use restriction may not be extinguished, limited or impaired through any of the following:

1. Issuance of a tax deed.
2. Foreclosure of a tax lien.
3. Foreclosure of any mortgage, deed of trust or other encumbrance or lien on the property.
4. Adverse possession.
5. Exercise of eminent domain.
6. Application of the doctrine of abandonment, the doctrine of waiver or any other common law doctrine.

C. Each party to a declaration of environmental use restriction shall incorporate the terms of the declaration of environmental use restriction into any lease, license or other agreement that is signed by the party and that grants a right with respect to the property that is subject to the declaration of environmental use restriction. The incorporation may be in full or by reference.

D. A declaration of environmental use restriction is sufficient if it contains all of the following information:

1. A legal description and the address of the area of the property that is subject to the declaration.
2. The date that remediation, remedial action, corrective action or response action was completed and a map of the area of the property that is subject to the declaration.
3. A description of the environmental contaminants that were the subject of the remediation, remedial action, corrective action or response action.

4. A statement that more detailed information is available at the department including the address at which that information will be maintained.
 5. A notarized signature of a department official indicating approval of the declaration of environmental use restriction.
 6. The notarized signature of the owner or owners of the property.
- E. If institutional controls are used in addition to the declaration of environmental use restriction, the declaration of environmental use restriction, in addition to the information required by subsection D of this section, shall include the same elements required pursuant to section 49-152, subsection I.
- F. If engineering controls are used, the declaration of environmental use restriction, in addition to the information required by subsection D of this section, shall include the same elements required pursuant to section 49-152, subsections F through J and section 49-152.01.
- G. When a declaration of environmental use restriction is recorded or modified, an owner shall pay to the department a fee established by rule. The owner shall follow the same requirements for institutional controls and engineering controls pursuant to section 49-152, subsection K and section 49-152.01.
- H. The department shall provide a copy of the declaration of environmental use restriction to the local jurisdiction with zoning and development plan approval for the property. A declaration of environmental use restriction does not authorize a use of property that is otherwise prohibited by zoning ordinances or other ordinances or laws. A declaration of environmental use restriction may include activity limitations and use restrictions that would otherwise be permitted by zoning ordinances or other ordinances or laws. The receipt of this copy does not create any new obligation or confer additional powers on the local jurisdiction.
- I. The department may enter the property pursuant to section 49-152. The department may also enforce this section as prescribed by section 49-152.02.
- J. The department shall adopt rules as necessary to implement this section.
- K. When the department enters on property pursuant to this section to verify that engineering controls are being maintained, the department shall meet the same requirements pursuant to section 49-152, subsection N.
- L. At the written request of the owner of property that is subject to a declaration of environmental use restriction recorded pursuant to subsection A of this section, the director shall determine whether release or modification of the declaration of environmental use restriction is appropriate. If a release has been requested, the director shall make this determination within sixty days after the date of the property owner's request. If the director determines that release of a declaration of environmental use restriction is appropriate, the director shall record in each county where the property is located a notice releasing the declaration of environmental use restriction. Release by the director under this subsection is appropriate if maintenance of the institutional control or engineering control is no longer necessary to protect public health and the environment.
- M. Nothing in this section shall preclude the department from initiating an action under other provisions of state or federal law.

49-179. Application fees; reimbursement of costs of review

A. Each application submitted under section 49-173 shall be accompanied by a nonrefundable fee to be established by rule.

B. An applicant shall reimburse the department for the reasonable and necessary costs of actions taken by the department pursuant to this section and sections 49-173 through 49-178, 49-180, 49-181, 49-182 and 49-185.

C. Reimbursable costs include time spent by the department's employees and the costs of goods and services contracted by the department to carry out the activities described in subsection B of this section. Time spent by the department's employees shall be reimbursed at a rate to be established by rule based upon the estimated direct and indirect costs to the department of conducting these activities. The department shall provide documentation to the applicant to support its claims for reimbursement consistent with generally accepted accounting principles. The department may require an applicant to pay an advance deposit to be applied against the department's reimbursable costs following the department's approval of an application under section 49-174. If an approved application is terminated or withdrawn pursuant to section 49-178, the applicant shall reimburse the department for its costs incurred prior to the termination or withdrawal.

D. The department may contract with an outside consultant to perform any technical review required to review a work plan submitted pursuant to section 49-175 or a report submitted pursuant to section 49-181 or to oversee work performed pursuant to a work plan approved pursuant to section 49-177 as follows:

1. The department may contract any work for which costs are reimbursable pursuant to subsection B of this section if the contract rate is less than or equal to the rate charged for time spent by the department's employees.
2. The department may contract any work upon the request of an applicant to establish deadlines for a review of a work plan or a task under an approved work plan if the applicant agrees to reimburse the department for the charges of the outside consultant.

49-186. Rules; no licensing

A. The department shall adopt rules as necessary to implement section 49-179. The adoption of rules under this section is not a prerequisite for implementation of this article.

B. Title 41, chapter 6, article 7.1 and section 41-1009 do not apply to this article.

49-285.01. Prospective purchaser agreements; assignment; notice; fees; rules

A. The department may provide, pursuant to section 49-292, to a prospective purchaser of a facility a written release and a covenant not to sue and may also agree to seek an order of the court granting approval of a settlement that includes immunity from contribution claims for any potential liability for existing contamination under this article or CERCLA if all of the following conditions are met:

1. The facility is within a site identified on the registry maintained by the department pursuant to section 49-287.01 or the department has been provided sufficient information to reasonably identify the extent of the contamination at the facility.
2. The person is not currently liable for an existing or threatened release of a hazardous substance at the facility.
3. The proposed redevelopment or reuse of the facility will not contribute to or exacerbate existing known contamination or unreasonably interfere with remedial measures necessary at the facility or cause the contamination to present a substantial health risk to the public.
4. The agreement will provide a substantial public benefit that may include any of the following:
 - (a) An agreement by the prospective purchaser to provide substantial funding or other resources to perform or facilitate remedial measures at the facility pursuant to this chapter.
 - (b) An agreement by the prospective purchaser to perform substantial remedial measures at the facility pursuant to this chapter.
 - (c) Productive reuse of a vacant or abandoned industrial or commercial facility.
 - (d) Development of a facility by a governmental entity or nonprofit organization to address an important public purpose.
 - (e) Creation of conservation or recreation areas.
5. The department consults with local planning and zoning authorities with jurisdiction over the facility and considers reasonably anticipated future land uses at the facility and surrounding properties.

B. If the prospective purchaser of a facility is affiliated with any other person who is a party responsible for the release or threatened release of a hazardous substance under this chapter, through any familial relationship or any corporate or contractual relationship other than a contract to protect a security interest, the director may refuse to provide a written release or covenant not to sue or may refuse to seek an order of the court granting immunity from contribution claims under this section.

C. An agreement between the department and a prospective purchaser shall include provisions deemed necessary by the department and may include:

1. A representation by the prospective purchaser that the purchaser did not cause or contribute to the contamination or otherwise cause or contribute to a release or threatened release of a hazardous substance at the property before the purchaser acquired title.
2. If the prospective purchaser does not undertake remedial action, a representation that the purchaser will not exacerbate or contribute to the existing contamination.
3. An agreement that any activity that the prospective purchaser may conduct or direct on the contaminated property will not unreasonably interfere with any ongoing remedial actions that are being performed by a responsible party or the department and that the purchaser will cooperate with those activities.

4. An agreement to undertake those measures that constitute a public benefit as prescribed by subsection A, paragraph 4 of this section.
 5. If remedial measures are to be performed under the agreement, an agreement to perform those measures in compliance with the applicable statutes and rules, including sections 49-151 and 49-152, and if pursuant to a consent judgment, under the department's supervision.
 6. Unless the contamination was caused by this state, a waiver by the person of any claim or cause of action against this state that arises from contamination at the facility that exists as of the date of acquisition of ownership or operation of the facility.
 7. A grant of an easement to the department and its authorized representatives for purposes of ensuring compliance with the agreement or for remedial measures authorized pursuant to this article in connection with contamination at the facility as of the date of acquisition of ownership or operation of the facility.
 8. A reservation of rights as to any person who is not a party to the agreement.
 9. The legal description of the property.
 10. In any case in which the state conducts remedial actions and there are unrecovered response costs at a property for which the prospective purchaser is not liable, the state as a condition of the agreement may impose a lien upon that property for the unrecovered costs. The priority of the lien is as of the date the lien is recorded in the county where the property is located. The lien becomes due on the sale, assignment or transfer of the property by the prospective purchaser unless the new purchaser, assignee or transferor accepts and assumes the lien as a personal obligation with the department's prior written agreement.
- D. Subject to satisfactory performance of the obligations under the agreement, the prospective purchaser is not liable to this state under this article for any release of a hazardous substance at the facility that exists on the date of acquisition of ownership or operation of the facility. The person shall bear the burden of proving that any hazardous substance existed on the facility as a result of releases of the hazardous substance before the date of acquisition of ownership or operation of the facility. This release from liability may be voided by the director if the person fails to perform any of the provisions of the prospective purchaser agreement.
- E. The purchaser shall provide written notice to the department of any sale, assignment or other transfer of the property at least fifteen business days before the date of the transfer.
- F. An agreement pursuant to this section is assignable if the assignee qualifies pursuant to subsections A and B of this section for a prospective purchaser agreement under this section and notice is given to the department as prescribed by subsection E of this section. On assignment, the assignee assumes the obligations and the benefits of the agreement. Unless the assignor has breached the agreement, the assignor retains the benefits of the agreement.
- G. The department shall provide notice of a prospective purchaser agreement by publication in a newspaper of general circulation in the county in which the property is located at least fifteen business days before the execution of a prospective purchaser agreement. The notice shall include a general description of the contents of the agreement. Any interested person may comment on the proposed agreement in writing to the director.
- H. The department may charge a reasonable fee for the preparation and execution of a prospective purchaser agreement. The director may adopt rules to implement this section.

CHAPTER 225

SENATE BILL 1454

AN ACT

AMENDING SECTION 49-104, ARIZONA REVISED STATUTES, AS AMENDED BY LAWS 1997, CHAPTER 49, SECTION 6, CHAPTER 287, SECTION 17 AND CHAPTER 296, SECTION 1; AMENDING SECTION 49-104, ARIZONA REVISED STATUTES, AS AMENDED BY LAWS 1999, CHAPTER 26, SECTION 3; AMENDING SECTIONS 49-151 AND 49-152, ARIZONA REVISED STATUTES; AMENDING TITLE 49, CHAPTER 1, ARTICLE 4, ARIZONA REVISED STATUTES, BY ADDING SECTIONS 49-158 AND 49-159; AMENDING TITLE 49, CHAPTER 1, ARIZONA REVISED STATUTES, BY ADDING ARTICLE 5; REPEALING SECTION 49-282.05, ARIZONA REVISED STATUTES; AMENDING TITLE 49, CHAPTER 2, ARTICLE 5, ARIZONA REVISED STATUTES, BY ADDING NEW SECTION 49-282.05; AMENDING SECTIONS 49-282.06 AND 49-285, ARIZONA REVISED STATUTES; PROVIDING FOR THE DELAYED REPEAL OF SECTION 49-104, ARIZONA REVISED STATUTES, AS AMENDED BY LAWS 1997, CHAPTER 49, SECTION 6, CHAPTER 287, SECTION 17 AND CHAPTER 296, SECTION 1 AND SECTION 1 OF THIS ACT; RELATING TO THE VOLUNTARY REMEDIATION PROGRAM.

(TEXT OF BILL BEGINS ON NEXT PAGE)

1 Be it enacted by the Legislature of the State of Arizona:

2 Section 1. Section 49-104, Arizona Revised Statutes, as amended by
3 Laws 1997, chapter 49, section 6, chapter 287, section 17 and chapter 296,
4 section 1, is amended to read:

5 49-104. Powers and duties of the department and director

6 A. The department shall:

7 1. Formulate policies, plans and programs to implement this title to
8 protect the environment.

9 2. Stimulate and encourage all local, state, regional and federal
10 governmental agencies and all private persons and enterprises that have
11 similar and related objectives and purposes, cooperate with those agencies,
12 persons and enterprises and correlate department plans, programs and
13 operations with those of the agencies, persons and enterprises.

14 3. Conduct research on its own initiative or at the request of the
15 governor, the legislature or state or local agencies pertaining to any
16 department objectives.

17 4. Provide information and advice on request of any local, state or
18 federal agencies and private persons and business enterprises on matters
19 within the scope of the department.

20 5. Consult with and make recommendations to the governor and the
21 legislature on all matters concerning department objectives.

22 6. Make annual reports to the governor and the legislature on its
23 activities, its finances and the scope of its operations.

24 7. Promote and coordinate the management of air resources to assure
25 their protection, enhancement and balanced utilization consistent with the
26 environmental policy of this state.

27 8. Promote and coordinate the protection and enhancement of the
28 quality of water resources consistent with the environmental policy of this
29 state.

30 9. Encourage industrial, commercial, residential and community
31 development which maximizes environmental benefits and minimizes the effects
32 of less desirable environmental conditions.

33 10. Assure the preservation and enhancement of natural beauty and
34 man-made scenic qualities.

35 11. Provide for the prevention and abatement of all water and air
36 pollution including that related to particulates, gases, dust, vapors, noise,
37 radiation, odor, nutrients and heated liquids in accordance with article 3 of
38 this chapter and chapters 2 and 3 of this title.

39 12. Promote and recommend methods for the recovery, recycling and reuse
40 or, if recycling is not possible, the disposal of solid wastes consistent
41 with sound health, scenic and environmental quality policies.

42 13. Prevent pollution through the regulation of the storage, handling
43 and transportation of solids, liquids and gases which may cause or contribute
44 to pollution.

45 14. Promote the restoration and reclamation of degraded or despoiled
46 areas and natural resources.

1 15. Assist the department of health services in recruiting and training
2 state, local and district health department personnel.

3 16. Participate in the state civil defense program and develop the
4 necessary organization and facilities to meet wartime or other disasters.

5 ~~17. Establish voluntary remediation programs, if appropriate, that
6 provide for the review by the department of voluntary remediations. The
7 department may adopt rules as necessary to implement the programs, including
8 rules governing the director's waiver of procedural requirements otherwise
9 applicable to remedial actions undertaken pursuant to programs authorized by
10 this title. Any person who requests approval of a remedial action shall
11 reimburse the department for the total reasonable costs for the review of the
12 remedial action, including, if requested, the additional costs to the
13 department to provide expedited review of the remedial action, unless the
14 director waives all or a part of the reimbursement. The department may
15 contract to provide expedited review. Costs that are reimbursed to the
16 department by a party that obtains approval for the remedial action
17 constitute remedial action costs that the party may recover from responsible
18 parties.~~

19 ~~18.~~ 17. Cooperate with the Arizona Mexico commission in the governor's
20 office and with researchers at universities in this state to collect data on
21 issues that are within the scope of the department's duties and that relate
22 to quality of life, trade and economic development in this state in a manner
23 that will help the Arizona Mexico commission to assess the economic
24 competitiveness of this state and of the state of Sonora, Mexico.

25 B. The department, through the director, shall:

26 1. Contract for the services of outside advisers, consultants and
27 aides reasonably necessary or desirable to enable the department to
28 adequately perform its duties.

29 2. Contract and incur obligations reasonably necessary or desirable
30 within the general scope of department activities and operations to enable
31 the department to adequately perform its duties.

32 3. Utilize any medium of communication, publication and exhibition
33 when disseminating information, advertising and publicity in any field of its
34 purposes, objectives or duties.

35 4. Adopt procedural rules that are necessary to implement the
36 authority granted under this title, but that are not inconsistent with other
37 provisions of this title.

38 5. Contract with other agencies including laboratories in furthering
39 any department program.

40 6. Use monies, facilities or services to provide matching
41 contributions under federal or other programs which further the objectives
42 and programs of the department.

43 7. Accept gifts, grants, matching monies or direct payments from
44 public or private agencies or private persons and enterprises for department
45 services and publications and to conduct programs which are consistent with
46 the general purposes and objectives of this chapter. Monies received

1 pursuant to this paragraph shall be deposited in the department fund
2 corresponding to the service, publication or program provided.

3 8. Provide for the examination of any premises if the director has
4 reasonable cause to believe that a violation of any environmental law or rule
5 exists or is being committed on the premises. The director shall give the
6 owner or operator the opportunity for its representative to accompany the
7 director on an examination of those premises. Within forty-five days after
8 the date of the examination, the department shall provide to the owner or
9 operator a copy of any report produced as a result of any examination of the
10 premises.

11 9. Supervise sanitary engineering facilities and projects in this
12 state, authority for which is vested in the department, and own or lease land
13 on which sanitary engineering facilities are located, and operate the
14 facilities, if the director determines that owning, leasing or operating is
15 necessary for the public health, safety or welfare.

16 10. Adopt and enforce rules relating to plans and specifications for
17 constructing, improving and operating sanitary engineering and other
18 facilities for disposing of solid, liquid or gaseous deleterious matter,
19 requiring that the plans and specifications be first approved by the director
20 or his designated agent before any work is begun, requiring inspection of the
21 projects during construction and enforcing compliance with the approved plans
22 and specifications.

23 11. Define and prescribe reasonably necessary rules regarding the water
24 supply, sewage disposal and garbage collection and disposal for
25 subdivisions. The rules shall:

26 (a) Provide for minimum sanitary facilities to be installed in the
27 subdivision and may require that water systems plan for future needs and be
28 of adequate size and capacity to deliver specified minimum quantities of
29 drinking water and to treat all sewage.

30 (b) Provide that the plans and specifications showing or describing
31 the water supply, sewage disposal and garbage collection facilities be
32 submitted with a fee to the department for review and that no lots in any
33 subdivision be offered for sale before compliance with the standards and
34 rules has been demonstrated by approval of the plans and specifications by
35 the department.

36 12. Prescribe reasonably necessary measures to prevent pollution of
37 water used in public or semipublic swimming pools and bathing places and to
38 prevent deleterious conditions at such places. The rules shall prescribe
39 minimum standards for the design of and for sanitary conditions at any public
40 or semipublic swimming pool or bathing place and provide for abatement as
41 public nuisances of premises and facilities which do not comply with the
42 minimum standards. The rules shall be developed in cooperation with the
43 director of the department of health services and shall be consistent with
44 the rules adopted by the director of the department of health services
45 pursuant to section 36-136, subsection H, paragraph 11.

1 13. Prescribe reasonable rules regarding sewage collection, treatment,
2 disposal and reclamation systems to prevent the transmission of sewage borne
3 or insect borne diseases. The rules shall:

4 (a) Prescribe minimum standards for the design of sewage collection
5 systems and treatment, disposal and reclamation systems and for operating the
6 systems.

7 (b) Provide for inspecting the premises, systems and installations and
8 for abating as a public nuisance any collection system, process, treatment
9 plant, disposal system or reclamation system which does not comply with the
10 minimum standards.

11 (c) Require that the plans and specifications for all sewage
12 collection systems, sewage collection system extensions, treatment plants,
13 processes, devices, equipment, disposal systems, on-site wastewater treatment
14 facilities and reclamation systems be submitted with a fee for review to the
15 department and may require that such plans and specifications anticipate and
16 provide for future sewage treatment needs.

17 (d) Prohibit construction, reconstruction, installation or initiation
18 of any sewage collection system, sewage collection system extension,
19 treatment plant, process, device, equipment, disposal system, on-site
20 wastewater treatment facility or reclamation system before the approval of
21 the plans and specifications and of the construction by the department after
22 payment of the appropriate fees.

23 14. Prescribe reasonably necessary rules regarding excreta storage,
24 handling, treatment, transportation and disposal. The rules shall:

25 (a) Prescribe minimum standards for human excreta storage, handling,
26 treatment, transportation and disposal and shall provide for inspection of
27 premises, processes and vehicles and for abating as public nuisances any
28 premises, processes or vehicles which do not comply with the minimum
29 standards.

30 (b) Provide that vehicles transporting human excreta from privies,
31 septic tanks, cesspools and other treatment processes shall be licensed by
32 the department subject to compliance with the rules.

33 15. Perform the responsibilities of implementing and maintaining a data
34 automation management system to support the reporting requirements of title
35 III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499)
36 and title 26, chapter 2, article 3.

37 16. Approve remediation levels pursuant to article 4 of this chapter.

38 ~~17. Establish voluntary remediation programs, if appropriate, that~~
39 ~~provide for the review by the department of voluntary remediations. The~~
40 ~~department may adopt rules as necessary to implement the programs, including~~
41 ~~rules governing the director's waiver of procedural requirements otherwise~~
42 ~~applicable to remedial actions undertaken pursuant to programs authorized by~~
43 ~~this title. Any person who requests approval of a remedial action shall~~
44 ~~reimburse the department for the total reasonable costs for the review of the~~
45 ~~remedial action, including, if requested, the additional costs to the~~
46 ~~department to provide expedited review of the remedial action, unless the~~

~~1 director waives all or a part of the reimbursement. The department may
2 contract to provide expedited review. Costs that are reimbursed to the
3 department by a party that obtains approval for the remedial action
4 constitute remedial action costs that the party may recover from responsible
5 parties.~~

6 C. The department may charge fees to cover the costs of all
7 inspections it performs to insure compliance with rules adopted under
8 subsection B, paragraph 11 or 13 of this section, except that state agencies
9 are exempt from paying the fees. Monies collected pursuant to subsection B,
10 paragraphs 11 and 13 of this section shall be deposited in the water quality
11 fee fund established by section 49-210. After appropriate fees are paid
12 under such paragraphs, the department may approve construction of any
13 facility.

14 D. The director may:

15 1. If he has reasonable cause to believe that a violation of any
16 environmental law or rule exists or is being committed, inspect any person or
17 property in transit through this state and any vehicle in which the person or
18 property is being transported and detain or disinfect the person, property or
19 vehicle as reasonably necessary to protect the environment if a violation
20 exists.

21 2. Authorize in writing any qualified officer or employee in the
22 department to perform any act that the director is authorized or required to
23 do by law.

24 Sec. 2. Section 49-104, Arizona Revised Statutes, as amended by Laws
25 1999, chapter 26, section 3, is amended to read:

26 49-104. Powers and duties of the department and director

27 A. The department shall:

28 1. Formulate policies, plans and programs to implement this title to
29 protect the environment.

30 2. Stimulate and encourage all local, state, regional and federal
31 governmental agencies and all private persons and enterprises that have
32 similar and related objectives and purposes, cooperate with those agencies,
33 persons and enterprises and correlate department plans, programs and
34 operations with those of the agencies, persons and enterprises.

35 3. Conduct research on its own initiative or at the request of the
36 governor, the legislature or state or local agencies pertaining to any
37 department objectives.

38 4. Provide information and advice on request of any local, state or
39 federal agencies and private persons and business enterprises on matters
40 within the scope of the department.

41 5. Consult with and make recommendations to the governor and the
42 legislature on all matters concerning department objectives.

43 6. Make annual reports to the governor and the legislature on its
44 activities, its finances and the scope of its operations.

1 7. Promote and coordinate the management of air resources to assure
2 their protection, enhancement and balanced utilization consistent with the
3 environmental policy of this state.

4 8. Promote and coordinate the protection and enhancement of the
5 quality of water resources consistent with the environmental policy of this
6 state.

7 9. Encourage industrial, commercial, residential and community
8 development which maximizes environmental benefits and minimizes the effects
9 of less desirable environmental conditions.

10 10. Assure the preservation and enhancement of natural beauty and
11 man-made scenic qualities.

12 11. Provide for the prevention and abatement of all water and air
13 pollution including that related to particulates, gases, dust, vapors, noise,
14 radiation, odor, nutrients and heated liquids in accordance with article 3 of
15 this chapter and chapters 2 and 3 of this title.

16 12. Promote and recommend methods for the recovery, recycling and reuse
17 or, if recycling is not possible, the disposal of solid wastes consistent
18 with sound health, scenic and environmental quality policies.

19 13. Prevent pollution through the regulation of the storage, handling
20 and transportation of solids, liquids and gases which may cause or contribute
21 to pollution.

22 14. Promote the restoration and reclamation of degraded or despoiled
23 areas and natural resources.

24 15. Assist the department of health services in recruiting and training
25 state, local and district health department personnel.

26 16. Participate in the state civil defense program and develop the
27 necessary organization and facilities to meet wartime or other disasters.

28 ~~17. Establish voluntary remediation programs, if appropriate, that
29 provide for the review by the department of voluntary remediations. The
30 department may adopt rules as necessary to implement the programs, including
31 rules governing the director's waiver of procedural requirements otherwise
32 applicable to remedial actions undertaken pursuant to programs authorized by
33 this title. Any person who requests approval of a remedial action shall
34 reimburse the department for the total reasonable costs for the review of the
35 remedial action, including, if requested, the additional costs to the
36 department to provide expedited review of the remedial action, unless the
37 director waives all or a part of the reimbursement. The department may
38 contract to provide expedited review. Costs that are reimbursed to the
39 department by a party that obtains approval for the remedial action
40 constitute remedial action costs that the party may recover from responsible
41 parties.~~

42 18. 17. Cooperate with the Arizona Mexico commission in the governor's
43 office and with researchers at universities in this state to collect data on
44 issues that are within the scope of the department's duties and that relate
45 to quality of life, trade and economic development in this state in a manner

1 that will help the Arizona Mexico commission to assess the economic
2 competitiveness of this state and of the state of Sonora, Mexico.

3 B. The department, through the director, shall:

4 1. Contract for the services of outside advisers, consultants and
5 aides reasonably necessary or desirable to enable the department to
6 adequately perform its duties.

7 2. Contract and incur obligations reasonably necessary or desirable
8 within the general scope of department activities and operations to enable
9 the department to adequately perform its duties.

10 3. Utilize any medium of communication, publication and exhibition
11 when disseminating information, advertising and publicity in any field of its
12 purposes, objectives or duties.

13 4. Adopt procedural rules that are necessary to implement the
14 authority granted under this title, but that are not inconsistent with other
15 provisions of this title.

16 5. Contract with other agencies including laboratories in furthering
17 any department program.

18 6. Use monies, facilities or services to provide matching
19 contributions under federal or other programs which further the objectives
20 and programs of the department.

21 7. Accept gifts, grants, matching monies or direct payments from
22 public or private agencies or private persons and enterprises for department
23 services and publications and to conduct programs which are consistent with
24 the general purposes and objectives of this chapter. Monies received
25 pursuant to this paragraph shall be deposited in the department fund
26 corresponding to the service, publication or program provided.

27 8. Provide for the examination of any premises if the director has
28 reasonable cause to believe that a violation of any environmental law or rule
29 exists or is being committed on the premises. The director shall give the
30 owner or operator the opportunity for its representative to accompany the
31 director on an examination of those premises. Within forty-five days after
32 the date of the examination, the department shall provide to the owner or
33 operator a copy of any report produced as a result of any examination of the
34 premises.

35 9. Supervise sanitary engineering facilities and projects in this
36 state, authority for which is vested in the department, and own or lease land
37 on which sanitary engineering facilities are located, and operate the
38 facilities, if the director determines that owning, leasing or operating is
39 necessary for the public health, safety or welfare.

40 10. Adopt and enforce rules relating to approving design documents for
41 constructing, improving and operating sanitary engineering and other
42 facilities for disposing of solid, liquid or gaseous deleterious matter.

43 11. Define and prescribe reasonably necessary rules regarding the water
44 supply, sewage disposal and garbage collection and disposal for subdivisions.
45 The rules shall:

1 (a) Provide for minimum sanitary facilities to be installed in the
2 subdivision and may require that water systems plan for future needs and be
3 of adequate size and capacity to deliver specified minimum quantities of
4 drinking water and to treat all sewage.

5 (b) Provide that the design documents showing or describing the water
6 supply, sewage disposal and garbage collection facilities be submitted with a
7 fee to the department for review and that no lots in any subdivision be
8 offered for sale before compliance with the standards and rules has been
9 demonstrated by approval of the design documents by the department.

10 12. Prescribe reasonably necessary measures to prevent pollution of
11 water used in public or semipublic swimming pools and bathing places and to
12 prevent deleterious conditions at such places. The rules shall prescribe
13 minimum standards for the design of and for sanitary conditions at any public
14 or semipublic swimming pool or bathing place and provide for abatement as
15 public nuisances of premises and facilities which do not comply with the
16 minimum standards. The rules shall be developed in cooperation with the
17 director of the department of health services and shall be consistent with
18 the rules adopted by the director of the department of health services
19 pursuant to section 36-136, subsection H, paragraph 11.

20 13. Prescribe reasonable rules regarding sewage collection, treatment,
21 disposal and reclamation systems to prevent the transmission of sewage borne
22 or insect borne diseases. The rules shall:

23 (a) Prescribe minimum standards for the design of sewage collection
24 systems and treatment, disposal and reclamation systems and for operating the
25 systems.

26 (b) Provide for inspecting the premises, systems and installations and
27 for abating as a public nuisance any collection system, process, treatment
28 plant, disposal system or reclamation system which does not comply with the
29 minimum standards.

30 (c) Require that design documents for all sewage collection systems,
31 sewage collection system extensions, treatment plants, processes, devices,
32 equipment, disposal systems, on-site wastewater treatment facilities and
33 reclamation systems be submitted with a fee for review to the department and
34 may require that the design documents anticipate and provide for future
35 sewage treatment needs.

36 (d) Require that construction, reconstruction, installation or
37 initiation of any sewage collection system, sewage collection system
38 extension, treatment plant, process, device, equipment, disposal system,
39 on-site wastewater treatment facility or reclamation system conform with
40 applicable requirements.

41 14. Prescribe reasonably necessary rules regarding excreta storage,
42 handling, treatment, transportation and disposal. The rules shall:

43 (a) Prescribe minimum standards for human excreta storage, handling,
44 treatment, transportation and disposal and shall provide for inspection of
45 premises, processes and vehicles and for abating as public nuisances any

1 premises, processes or vehicles which do not comply with the minimum
2 standards.

3 (b) Provide that vehicles transporting human excreta from privies,
4 septic tanks, cesspools and other treatment processes shall be licensed by
5 the department subject to compliance with the rules.

6 15. Perform the responsibilities of implementing and maintaining a data
7 automation management system to support the reporting requirements of title
8 III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499)
9 and title 26, chapter 2, article 3.

10 16. Approve remediation levels pursuant to article 4 of this chapter.

11 ~~17. Establish voluntary remediation programs, if appropriate, that~~
12 ~~provide for the review by the department of voluntary remediations. The~~
13 ~~department may adopt rules as necessary to implement the programs, including~~
14 ~~rules governing the director's waiver of procedural requirements otherwise~~
15 ~~applicable to remedial actions undertaken pursuant to programs authorized by~~
16 ~~this title. Any person who requests approval of a remedial action shall~~
17 ~~reimburse the department for the total reasonable costs for the review of the~~
18 ~~remedial action, including, if requested, the additional costs to the~~
19 ~~department to provide expedited review of the remedial action, unless the~~
20 ~~director waives all or a part of the reimbursement. The department may~~
21 ~~contract to provide expedited review. Costs that are reimbursed to the~~
22 ~~department by a party that obtains approval for the remedial action~~
23 ~~constitute remedial action costs that the party may recover from responsible~~
24 ~~parties.~~

25 C. The department may charge fees to cover the costs of all permits
26 and inspections it performs to insure compliance with rules adopted under
27 section 49-203, subsection A, paragraph 6, except that state agencies are
28 exempt from paying the fees. Monies collected pursuant to this subsection
29 shall be deposited in the water quality fee fund established by section
30 49-210.

31 D. The director may:

32 1. If he has reasonable cause to believe that a violation of any
33 environmental law or rule exists or is being committed, inspect any person or
34 property in transit through this state and any vehicle in which the person or
35 property is being transported and detain or disinfect the person, property or
36 vehicle as reasonably necessary to protect the environment if a violation
37 exists.

38 2. Authorize in writing any qualified officer or employee in the
39 department to perform any act that the director is authorized or required to
40 do by law.

41 Sec. 3. Section 49-151, Arizona Revised Statutes, is amended to read:

42 49-151. Definitions

43 In this article, unless the context otherwise requires:

44 1. "ENGINEERING CONTROL" MEANS A REMEDIATION METHOD SUCH AS A BARRIER
45 OR CAP THAT IS USED TO PREVENT OR MINIMIZE EXPOSURE TO CONTAMINANTS AND
46 INCLUDES TECHNOLOGIES THAT REDUCE THE MOBILITY OR MIGRATION OF CONTAMINANTS.

1 2. "INSTITUTIONAL CONTROL" MEANS A LEGAL OR ADMINISTRATIVE TOOL OR
2 ACTION TAKEN TO REDUCE THE POTENTIAL FOR EXPOSURE TO CONTAMINANTS.

3 ~~1-~~ 3. "Nonresidential use" means those uses of property other than
4 residential uses.

5 ~~2-~~ 4. "Remediation" means either:

6 (a) The treatment or removal of contaminated soils to meet
7 predetermined risk levels or site specific risk levels.

8 (b) Soils that meet predetermined risk levels or site specific risk
9 levels as determined by a risk assessment.

10 ~~3-~~ 5. "Residential use" means those uses of remediated property ~~upon~~
11 ~~which there are dwellings~~ where ~~the residents~~ NATURAL PERSONS are reasonably
12 expected to be in frequent, repeated contact with soil, ~~or other uses where~~
13 ~~natural persons are reasonably expected to be in similar contact, such as~~
14 ~~child care centers and elementary schools.~~

15 Sec. 4. Section 49-152, Arizona Revised Statutes, is amended to read:

16 49-152. Soil remediation standards; restrictions on property
17 use

18 A. Notwithstanding any other remediation levels established under this
19 title, the director shall approve remediation levels calculated in accordance
20 with this subsection and shall accomplish the following for remediation of
21 contaminated soil to protect public health and the environment in accordance
22 with the applicable provisions of this title and section 33-434.01:

23 1. Establish predetermined risk based standards by rule. At a
24 minimum, separate standards shall be established for residential and
25 nonresidential exposure assumptions. Until risk based remediation standards
26 are formally established by rule, the director shall establish interim
27 standards adopting:

28 (a) The Arizona health based guidance levels developed by the
29 department of health services to include a health based standard for total
30 petroleum hydrocarbons as the standards for residential uses.

31 (b) The guidance levels in subdivision (a) modified to reflect the
32 United States environmental protection agency published assumptions for
33 exposures that are not residential as the standards for nonresidential
34 uses. The initial adoption of these interim standards shall be effective by
35 December 15, 1995, ~~and~~ and shall be deemed emergency rules pursuant to section
36 41-1026.

37 2. Issue guidance on methods for calculating case-by-case, site
38 specific risk based remediation levels in accordance with risk assessment
39 methodologies that are accepted in the scientific community and shall not
40 preclude the use of newly developed risk assessment methodologies that are
41 accepted in the scientific community.

42 ~~B. The director shall provide that the owner of the property being~~
43 ~~remediated pursuant to subsection A of this section who has voluntarily~~
44 ~~elected to remediate the property for nonresidential uses shall record with~~
45 ~~the county recorder, in the county where the property is located, a voluntary~~
46 ~~environment mitigation use restriction limiting, by legal description, the~~

~~area necessary to protect public health and the environment to nonresidential uses if, after the approval by the director pursuant to subsection A of this section,~~ IF, TO COMPLY WITH SUBSECTION A OF THIS SECTION, THE OWNER OF PROPERTY HAS ELECTED TO REMEDIATE THE PROPERTY TO NONRESIDENTIAL USES OR HAS ELECTED TO USE AN INSTITUTIONAL CONTROL OR ENGINEERING CONTROL, THE OWNER SHALL RECORD IN EACH COUNTY WHERE THE PROPERTY IS LOCATED A RESTRICTIVE COVENANT THAT IS LABELED "DECLARATION OF ENVIRONMENTAL USE RESTRICTION" PERTAINING TO THE AREA OF THE PROPERTY NECESSARY TO PROTECT THE PUBLIC HEALTH AND THE ENVIRONMENT. THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION SHALL LIMIT BY LEGAL DESCRIPTION:

1. THE AREA OF THE PROPERTY WHERE THE INSTITUTIONAL CONTROL OR ENGINEERING CONTROL SHALL BE MAINTAINED.

2. THE AREA OF THE PROPERTY TO BE RESTRICTED TO NONRESIDENTIAL USE, IF contamination remains on the property at or above either of the following:

~~1-~~ (a) Predetermined risk based remediation standards for other than residential exposure assumptions.

~~2-~~ (b) Concentrations resulting in a hazard index greater than one, indicating that there may exist an appreciable risk to human health from noncancer health effects, or a risk of carcinogenic health effects greater than the range of risk levels set forth in 40 Code of Federal Regulations ~~part~~ SECTION 300.430(e)(2)(1)(A)(2).

~~C. A notice cancelling the voluntary environmental mitigation use restriction shall be recorded with the county recorder in the county where the property is located with respect to property which the director has determined to have been remediated to either:~~

C. AT THE WRITTEN REQUEST OF THE OWNER OF PROPERTY THAT IS SUBJECT TO A DECLARATION OF ENVIRONMENTAL USE RESTRICTION, THE DIRECTOR SHALL DETERMINE WHETHER RELEASE OF THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS APPROPRIATE. THE DIRECTOR SHALL MAKE THIS DETERMINATION WITHIN SIXTY DAYS AFTER THE DATE OF THE PROPERTY OWNER'S REQUEST. IF THE DIRECTOR DETERMINES THAT RELEASE OF THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS APPROPRIATE, THE DIRECTOR SHALL RECORD IN EACH COUNTY WHERE THE PROPERTY IS LOCATED A NOTICE RELEASING THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION. THE DIRECTOR SHALL DETERMINE THAT RELEASE OF A DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS APPROPRIATE IF THE PROPERTY HAS BEEN REMEDIATED, WITHOUT THE USE OF INSTITUTIONAL CONTROLS OR ENGINEERING CONTROLS, TO EITHER:

1. Meet predetermined risk based remedial standards for residential exposure assumptions.

2. Present a risk based hazard index equal to or less than one from noncancer health effects and a risk estimate of carcinogenic health effects equal to or less than the range of risk levels set forth in 40 Code of Federal Regulations ~~part~~ SECTION 300.430(e)(2)(1)(A)(2). ~~The director shall make this determination within sixty days from the date the property owner applies to the director for the voluntary environmental mitigation use restriction to be cancelled.~~

1 D. THE DEPARTMENT SHALL ESTABLISH a repository ~~shall be established~~ in
2 the department listing sites remediated under programs administered by the
3 department under this title. The repository shall include the name and
4 address of the owner of the property, when the remediation was conducted, the
5 legal description and street address of the ~~subject real~~ property, and the
6 applicability of ~~subsection B of this section and~~ section 33-434.01 AND A
7 DESCRIPTION OF THE PURPOSE OF THE DECLARATION OF ENVIRONMENTAL USE
8 RESTRICTION.

9 E. WHEN RECORDED, an owner's ~~voluntary~~ DECLARATION OF environmental
10 ~~mitigation~~ use restriction under subsection B of this section ~~shall be~~ IS A
11 COVENANT THAT RUNS WITH AND BURDENS THE PROPERTY, INURES TO THE BENEFIT OF
12 THE DEPARTMENT AND THE STATE AND IS sufficient if it ~~is in substantially the~~
13 ~~following form~~ CONTAINS ALL OF THE FOLLOWING INFORMATION:

~~Notice of Voluntary Environmental Mitigation
Use Restriction by Owner(s)~~

~~The undersigned owner(s) of the following described property:
(Legal description of entire parcel)
pursuant to section 49-152, subsection A, has (have) remediated a portion of
the above described property, which remediated portion is described as
follows:~~

~~(Legal description of remediated portion)~~

~~The date when such remediation was completed was:~~

~~(insert date)~~

~~The undersigned voluntarily agrees to limit and restrict the use of the
remediated portion of the property to nonresidential uses, as defined in
section 49-151, subsection A.~~

~~Date: _____~~

~~(Signature of owner(s))~~

~~Approved:~~

~~_____~~

~~(ADEQ official)~~

~~Date: _____~~

~~(Acknowledgement by notary)~~

~~F. An owner's cancellation of a previously recorded voluntary
environmental mitigation use restriction under subsection C of this section
shall be sufficient if it is in substantially the following form:~~

~~Cancellation of Voluntary Environmental Mitigation
Use Restriction by Owner(s)~~

~~The undersigned owner(s) of the following described property:~~

~~(Legal description of entire parcel)~~

1 ~~pursuant to section 49-152, subsection B, , caused to be recorded at document~~
2 ~~# _____ or docket or book _____ at page _____, records of _____~~
3 ~~county, Arizona, _____, 19__ , a notice of voluntary environmental~~
4 ~~mitigation use restriction by owner(s) affecting the following portion of the~~
5 ~~above described property:~~

6 ~~(Legal description of remediated portion of parcel)~~
7 ~~The undersigned has (have) remediated the above described portion of property~~
8 ~~pursuant to the levels prescribed in section 49-152, subsection C, Arizona~~
9 ~~Revised Statutes. Accordingly the above described property may now be used~~
10 ~~for any lawful purpose.~~

11 ~~The date when such remediation was completed was:~~
12 ~~(insert date)~~

13 ~~pursuant to section 49-152, subsection C, , the undersigned hereby cancel(s)~~
14 ~~the above described notice and declare(s) said notice to be of no further~~
15 ~~force and effect as of this _____ day of _____, 19__.~~

16 _____
17 _____

18
19 ~~(ADEQ official)~~

20
21 ~~Date: _____~~

22
23 ~~(Acknowledgement by notary)~~

24 1. A LEGAL DESCRIPTION AND THE ADDRESS OF THE AREA OF THE PROPERTY
25 THAT IS SUBJECT TO THE DECLARATION.

26 2. THE DATE THAT REMEDIATION WAS COMPLETED AND A MAP OF THE AREA OF
27 THE PROPERTY THAT IS SUBJECT TO THE DECLARATION.

28 3. A DESCRIPTION OF THE ENVIRONMENTAL CONTAMINANTS THAT WERE
29 REMEDIATED.

30 4. A STATEMENT THAT MORE DETAILED INFORMATION IS AVAILABLE AT THE
31 DEPARTMENT INCLUDING THE ADDRESS AT WHICH THAT INFORMATION WILL BE
32 MAINTAINED.

33 5. A NOTARIZED SIGNATURE OF A DEPARTMENT OFFICIAL INDICATING APPROVAL
34 OF THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION.

35 6. THE NOTARIZED SIGNATURE OF THE OWNER OF THE PROPERTY.

36 F. IF INSTITUTIONAL CONTROLS ARE USED BY THE OWNER TO SATISFY THE
37 REQUIREMENTS OF THIS SECTION, THE DECLARATION OF ENVIRONMENTAL USE
38 RESTRICTION, IN ADDITION TO THE INFORMATION REQUIRED BY SUBSECTION E OF THIS
39 SECTION, SHALL INCLUDE ALL OF THE FOLLOWING:

40 1. A STATEMENT DOCUMENTING ANY REQUIREMENTS FOR MAINTENANCE OF THE
41 INSTITUTIONAL CONTROL, INCLUDING A DESCRIPTION OF THE INSTITUTIONAL CONTROL
42 AND THE REASON IT MUST REMAIN IN PLACE TO PROTECT PUBLIC HEALTH AND THE
43 ENVIRONMENT.

44 2. A STATEMENT INDICATING THAT IF ANY PERSON DESIRES TO CANCEL OR
45 MODIFY THE INSTITUTIONAL CONTROL IN THE FUTURE, THE PERSON MUST OBTAIN PRIOR
46 WRITTEN APPROVAL FROM THE DEPARTMENT PURSUANT TO THIS SECTION.

1 3. A STATEMENT ACKNOWLEDGING THE DEPARTMENT'S RIGHT OF ACCESS TO THE
2 PROPERTY AT ALL REASONABLE TIMES TO VERIFY THAT INSTITUTIONAL CONTROLS ARE
3 BEING MAINTAINED.

4 G. IF ENGINEERING CONTROLS ARE USED BY THE OWNER TO SATISFY THE
5 REQUIREMENTS OF THIS SECTION, THE DECLARATION OF ENVIRONMENTAL USE
6 RESTRICTION, IN ADDITION TO THE INFORMATION REQUIRED BY SUBSECTION E OF THIS
7 SECTION, SHALL INCLUDE ALL OF THE FOLLOWING:

8 1. A STATEMENT OF ALL REQUIREMENTS FOR MAINTENANCE OF THE ENGINEERING
9 CONTROL INCLUDING A DESCRIPTION OF THE CONTROL, THE DATE IT WAS CONSTRUCTED
10 AND THE REASON IT MUST REMAIN IN PLACE TO PROTECT PUBLIC HEALTH AND THE
11 ENVIRONMENT.

12 2. A STATEMENT THAT IF ANY PERSON DESIRES TO CHANGE THE ENGINEERING
13 CONTROLS IN THE FUTURE THAT PERSON SHALL OBTAIN PRIOR WRITTEN APPROVAL FROM
14 THE DEPARTMENT.

15 3. A STATEMENT ACKNOWLEDGING THE DEPARTMENT'S RIGHT OF ACCESS TO THE
16 PROPERTY AT ALL REASONABLE TIMES TO VERIFY THAT ENGINEERING CONTROLS ARE
17 BEING MAINTAINED.

18 H. WHEN THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS RECORDED,
19 AN OWNER ELECTING TO USE INSTITUTIONAL OR ENGINEERING CONTROLS TO SATISFY THE
20 REQUIREMENTS OF THIS SECTION SHALL PAY THE DEPARTMENT A FEE ESTABLISHED BY
21 RULE. IF THE CONTROL IS AN INSTITUTIONAL CONTROL, THE OWNER SHALL SUBMIT TO
22 THE DEPARTMENT A WRITTEN REPORT ONCE EACH CALENDAR YEAR REGARDING THE STATUS
23 OF THE INSTITUTIONAL CONTROL. IF THE CONTROL IS AN ENGINEERING CONTROL, THE
24 OWNER SHALL MAINTAIN THE ENGINEERING CONTROL ON THE PROPERTY TO ENSURE THAT
25 IT CONTINUES TO PROTECT PUBLIC HEALTH AND THE ENVIRONMENT AND SHALL INSPECT
26 EACH ENGINEERING CONTROL AT LEAST ONCE EACH CALENDAR YEAR. WITHIN THIRTY
27 DAYS AFTER EACH INSPECTION, THE OWNER SHALL SUBMIT TO THE DEPARTMENT A
28 WRITTEN REPORT THAT:

29 1. DESCRIBES THE CONDITION OF THE ENGINEERING CONTROL.

30 2. STATES THE NATURE AND COST OF ALL REPAIRS MADE TO THE ENGINEERING
31 CONTROL DURING THE CALENDAR YEAR.

32 3. INCLUDES CURRENT PHOTOGRAPHS OF THE ENGINEERING CONTROL.

33 I. THE DEPARTMENT MAY ENTER ON THE PROPERTY AT ALL REASONABLE TIMES TO
34 ASSESS THE CONDITION OF EACH ENGINEERING CONTROL. IF THE DEPARTMENT
35 DETERMINES THAT REPAIR OR RESTORATION OF THE ENGINEERING CONTROL IS NECESSARY
36 TO ENSURE THE PROTECTION OF PUBLIC HEALTH OR THE ENVIRONMENT, THE DEPARTMENT
37 SHALL GIVE NOTICE TO THE OWNER. IF THE OWNER FAILS TO INITIATE REPAIR OR
38 RESTORATION OF THE ENGINEERING CONTROL WITHIN SIXTY DAYS OF THE NOTICE OR
39 FAILS TO COMPLETE THE REQUIRED REPAIR OR RESTORATION WITHIN A REASONABLE TIME
40 SET BY THE DEPARTMENT, THE DEPARTMENT MAY SEEK INJUNCTIVE RELIEF TO COMPEL
41 THE OWNER TO REPAIR OR RESTORE THE ENGINEERING CONTROL OR ENTER THE PROPERTY
42 AND REPAIR OR RESTORE THE ENGINEERING CONTROL AT THE DEPARTMENT'S EXPENSE.
43 THE DIRECTOR MAY RECOVER FROM THE OWNER ALL REASONABLE COSTS INCURRED IN
44 CONNECTION WITH THE REPAIR OR RESTORATION OF THE ENGINEERING CONTROL.

45 J. THE DEPARTMENT SHALL PROVIDE A COPY OF THE DECLARATION OF
46 ENVIRONMENTAL USE RESTRICTION TO THE LOCAL JURISDICTION WITH ZONING AND

1 DEVELOPMENT PLAN APPROVAL FOR THE PROPERTY. THE RECEIPT OF THIS COPY DOES
2 NOT CREATE ANY NEW OBLIGATION OR CONFER ADDITIONAL POWERS ON THE LOCAL
3 JURISDICTION.

4 K. THE DEPARTMENT SHALL ADOPT RULES AS NECESSARY TO IMPLEMENT THIS
5 SECTION. THESE RULES MAY BE COMBINED WITH ANY RULES NECESSARY TO IMPLEMENT
6 SECTION 49-158.

7 L. WHEN THE DEPARTMENT ENTERS ON PROPERTY PURSUANT TO THIS SECTION TO
8 VERIFY THAT ENGINEERING CONTROLS ARE BEING MAINTAINED, THE DEPARTMENT SHALL:

9 1. PROVIDE TWENTY-FOUR HOURS' ADVANCE NOTICE OF THE ENTRY TO THE
10 PROPERTY OWNER, IF PRACTICABLE.

11 2. ALLOW THE OWNER OR AN AUTHORIZED REPRESENTATIVE OF THE OWNER TO
12 ACCOMPANY THE DEPARTMENT REPRESENTATIVE.

13 3. PRESENT PHOTOGRAPHIC IDENTIFICATION ON ENTRY OF THE PROPERTY.

14 4. PROVIDE THE OWNER OR AN AUTHORIZED REPRESENTATIVE OF THE OWNER WITH
15 NOTICE OF THE RIGHT TO HAVE A DUPLICATE SAMPLE OR SPLIT OF ANY SAMPLE TAKEN
16 DURING THE INSPECTION IF THE DUPLICATE OR SPLIT OF ANY SAMPLE WOULD NOT
17 PROHIBIT AN ANALYSIS FROM BEING CONDUCTED OR RENDER AN ANALYSIS INCONCLUSIVE.

18 Sec. 5. Title 49, chapter 1, article 4, Arizona Revised Statutes, is
19 amended by adding sections 49-158 and 49-159, to read:

20 49-158. Restrictions on property use; enforcement of
21 engineering and institutional controls

22 A. NOTWITHSTANDING ANY OTHER PROVISIONS OF THIS TITLE, IF A REMEDIAL
23 ACTION, REMEDIATION OR CORRECTIVE ACTION PERFORMED PURSUANT TO THIS TITLE OR
24 A RESPONSE ACTION PERFORMED PURSUANT TO CERCLA AS DEFINED IN SECTION 49-201
25 INCLUDES AN INSTITUTIONAL CONTROL OR AN ENGINEERING CONTROL AND THE REMEDIAL
26 ACTION, REMEDIATION, CORRECTIVE ACTION OR RESPONSE ACTION IS NOT SUBJECT TO
27 SECTION 49-152, THE OWNER OF THE PROPERTY ON WHICH THE INSTITUTIONAL CONTROL
28 OR ENGINEERING CONTROL IS LOCATED SHALL RECORD IN EACH COUNTY WHERE THE
29 PROPERTY IS LOCATED A RESTRICTIVE COVENANT THAT IS LABELED "DECLARATION OF
30 ENVIRONMENTAL USE RESTRICTION". THE DECLARATION OF ENVIRONMENTAL USE
31 RESTRICTION SHALL LIMIT BY LEGAL DESCRIPTION THE AREA OF THE PROPERTY
32 NECESSARY TO PROTECT PUBLIC HEALTH AND THE ENVIRONMENT WHERE THE
33 INSTITUTIONAL CONTROL OR ENGINEERING CONTROL SHALL BE MAINTAINED.

34 B. WHEN RECORDED, AN OWNER'S DECLARATION OF ENVIRONMENTAL USE
35 RESTRICTION UNDER SUBSECTION A OF THIS SECTION IS A COVENANT THAT RUNS WITH
36 AND BURDENS THE PROPERTY, INURES TO THE BENEFIT OF THE DEPARTMENT AND THE
37 STATE AND IS SUFFICIENT IF IT CONTAINS ALL OF THE FOLLOWING INFORMATION:

38 1. A LEGAL DESCRIPTION AND THE ADDRESS OF THE AREA OF THE PROPERTY
39 THAT IS SUBJECT TO THE DECLARATION.

40 2. THE DATE THAT REMEDIATION, REMEDIAL ACTION, CORRECTIVE ACTION OR
41 RESPONSE ACTION WAS COMPLETED AND A MAP OF THE AREA OF THE PROPERTY THAT IS
42 SUBJECT TO THE DECLARATION.

43 3. A DESCRIPTION OF THE ENVIRONMENTAL CONTAMINANTS THAT WERE THE
44 SUBJECT OF THE REMEDIATION, REMEDIAL ACTION, CORRECTIVE ACTION OR RESPONSE
45 ACTION.

1 4. A STATEMENT THAT MORE DETAILED INFORMATION IS AVAILABLE AT THE
2 DEPARTMENT INCLUDING THE ADDRESS AT WHICH THAT INFORMATION WILL BE
3 MAINTAINED.

4 5. A NOTARIZED SIGNATURE OF A DEPARTMENT OFFICIAL INDICATING APPROVAL
5 OF THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION.

6 6. THE NOTARIZED SIGNATURE OF THE OWNER OR OWNERS OF THE PROPERTY.

7 C. IF INSTITUTIONAL CONTROLS ARE USED, THE DECLARATION OF
8 ENVIRONMENTAL USE RESTRICTION, IN ADDITION TO THE INFORMATION REQUIRED BY
9 SUBSECTION B OF THIS SECTION, SHALL INCLUDE THE SAME ELEMENTS REQUIRED
10 PURSUANT TO SECTION 49-152, SUBSECTION F.

11 D. IF ENGINEERING CONTROLS ARE USED, THE DECLARATION OF ENVIRONMENTAL
12 USE RESTRICTION, IN ADDITION TO THE INFORMATION REQUIRED BY SUBSECTION B OF
13 THIS SECTION, SHALL INCLUDE THE SAME ELEMENTS REQUIRED PURSUANT TO SECTION
14 49-152, SUBSECTION G.

15 E. WHEN A DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS RECORDED, AN
16 OWNER SHALL PAY TO THE DEPARTMENT A FEE ESTABLISHED BY RULE. THE OWNER SHALL
17 FOLLOW THE SAME REQUIREMENTS FOR INSTITUTIONAL CONTROLS AND ENGINEERING
18 CONTROLS PURSUANT TO SECTION 49-152, SUBSECTION H.

19 F. THE DEPARTMENT MAY ENTER ON THE PROPERTY AT ALL REASONABLE TIMES TO
20 ASSESS THE CONDITION OF EACH ENGINEERING CONTROL. THE SAME REQUIREMENTS APPLY
21 TO THE DEPARTMENT AND THE OWNER AS STATED IN SECTION 49-152, SUBSECTION I.

22 G. THE DEPARTMENT SHALL ADOPT RULES AS NECESSARY TO IMPLEMENT THIS
23 SECTION.

24 H. WHEN THE DEPARTMENT ENTERS ON PROPERTY PURSUANT TO THIS SECTION TO
25 VERIFY THAT ENGINEERING CONTROLS ARE BEING MAINTAINED, THE DEPARTMENT SHALL
26 MEET THE SAME REQUIREMENTS PURSUANT TO SECTION 49-152, SUBSECTION L.

27 I. AT THE WRITTEN REQUEST OF THE OWNER OF PROPERTY THAT IS SUBJECT TO
28 A DECLARATION OF ENVIRONMENTAL USE RESTRICTION RECORDED PURSUANT TO
29 SUBSECTION A OF THIS SECTION, THE DIRECTOR SHALL DETERMINE WHETHER RELEASE OF
30 THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS APPROPRIATE. THE
31 DIRECTOR SHALL MAKE THIS DETERMINATION WITHIN SIXTY DAYS AFTER THE DATE OF
32 THE PROPERTY OWNER'S REQUEST. IF THE DIRECTOR DETERMINES THAT RELEASE OF A
33 DECLARATION OF ENVIRONMENTAL USE RESTRICTION IS APPROPRIATE, THE DIRECTOR
34 SHALL RECORD IN EACH COUNTY WHERE THE PROPERTY IS LOCATED A NOTICE RELEASING
35 THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION. RELEASE BY THE DIRECTOR
36 UNDER THIS SECTION IS APPROPRIATE IF MAINTENANCE OF THE INSTITUTIONAL CONTROL
37 OR ENGINEERING CONTROL IS NO LONGER NECESSARY TO PROTECT PUBLIC HEALTH AND
38 THE ENVIRONMENT.

39 49-159. Institutional and engineering control fund; purpose

40 A. THE INSTITUTIONAL AND ENGINEERING CONTROL FUND IS ESTABLISHED TO BE
41 ADMINISTERED BY THE DIRECTOR. THE FUND CONSISTS OF MONIES FROM THE FOLLOWING
42 SOURCES:

- 43 1. FEES COLLECTED PURSUANT TO SECTION 49-152, SUBSECTION H.
- 44 2. FEES COLLECTED PURSUANT TO SECTION 49-158, SUBSECTION E.
- 45 3. COSTS OF REPAIRING OR RESTORING ENGINEERING CONTROLS THAT ARE
46 RECOVERED PURSUANT TO SECTION 49-152, SUBSECTION I.

1 4. COSTS OF REPAIRING OR RESTORING ENGINEERING CONTROLS THAT ARE
2 RECOVERED PURSUANT TO SECTION 49-158, SUBSECTION F.

3 5. GIFTS, GRANTS AND DONATIONS.

4 6. LEGISLATIVE APPROPRIATIONS.

5 B. MONIES IN THE INSTITUTIONAL AND ENGINEERING CONTROL FUND ARE
6 CONTINUOUSLY APPROPRIATED AND ARE EXEMPT FROM THE PROVISIONS OF SECTION
7 35-190 RELATING TO LAPSING OF APPROPRIATIONS. ON NOTICE FROM THE DIRECTOR,
8 THE STATE TREASURER SHALL INVEST AND DIVEST MONIES IN THE FUND AS PROVIDED BY
9 SECTION 35-313, AND MONIES EARNED FROM INVESTMENT SHALL BE CREDITED TO THE
10 FUND.

11 C. MONIES IN THE INSTITUTIONAL AND ENGINEERING CONTROL FUND SHALL BE
12 USED FOR THE FOLLOWING PURPOSES:

13 1. FOR ALL REASONABLE AND NECESSARY COSTS TO IMPLEMENT SECTION 49-152,
14 SUBSECTIONS B THROUGH L AND SECTION 49-158.

15 2. FOR THE REASONABLE AND NECESSARY COSTS TO ADMINISTER THE FUND.

16 3. FOR THE REPAIR OR RESTORATION OF ENGINEERING CONTROLS AS PROVIDED
17 BY SECTION 49-152, SUBSECTION I.

18 4. FOR THE REPAIR OR RESTORATION OF ENGINEERING CONTROLS AS PROVIDED
19 BY SECTION 49-158, SUBSECTION F.

20 Sec. 6. Title 49, chapter 1, Arizona Revised Statutes, is amended by
21 adding article 5, to read:

22 ARTICLE 5. VOLUNTARY REMEDIATION PROGRAM

23 49-171. Definitions

24 A. IN THIS ARTICLE, UNLESS THE CONTEXT OTHERWISE REQUIRES:

25 1. "CHARACTERIZATION" MEANS A PROCESS TO DETERMINE THE NATURE, DEGREE
26 AND EXTENT OF CONTAMINANTS AT A SITE OR A PORTION OF A SITE.

27 2. "CONTAMINANT" MEANS ANY SUBSTANCE THAT HAS BEEN RELEASED TO THE
28 ENVIRONMENT AND THAT QUALIFIES AS ANY OF THE FOLLOWING:

29 (a) A HAZARDOUS SUBSTANCE AS DEFINED IN SECTION 49-201.

30 (b) A POLLUTANT AS DEFINED IN SECTION 49-201.

31 3. "ENGINEERING CONTROL" HAS THE SAME MEANING PRESCRIBED IN SECTION
32 49-151.

33 4. "ENVIRONMENTAL CLAIM" MEANS A CLAIM FOR DEFENSE OR INDEMNITY
34 SUBMITTED UNDER A GENERAL LIABILITY INSURANCE POLICY BY AN INSURED IN
35 RESPONSE TO A CLAIM OF POTENTIAL LIABILITY FOR BODILY INJURY OR PROPERTY
36 DAMAGE ARISING FROM A RELEASE OF POLLUTANTS ONTO OR INTO LAND, AIR OR WATER.

37 5. "INSTITUTIONAL CONTROL" HAS THE SAME MEANING PRESCRIBED IN SECTION
38 49-151.

39 6. "INSURED" MEANS ANY PERSON WHO IS INCLUDED AS A NAMED INSURED ON A
40 GENERAL LIABILITY INSURANCE POLICY AND WHO HAS OR HAD A PROPERTY INTEREST IN
41 A SITE IN THIS STATE THAT INVOLVES AN ENVIRONMENTAL CLAIM.

42 7. "PERSON" HAS THE SAME MEANING PRESCRIBED IN SECTION 49-201.

43 8. "REMEDIATION" MEANS ACTION TAKEN TO ADDRESS A CONTAMINANT BY
44 REDUCING THE LEVEL OF THE CONTAMINANT IN THE ENVIRONMENT OR PREVENTING OR
45 REDUCING EXPOSURE TO THE CONTAMINANT.

46 9. "SITE" MEANS THE AREAL EXTENT OF CONTAMINATION.

1 10. "SOURCE" MEANS A SITE OR PORTION OF A SITE WHERE A CONTAMINANT IS
2 OR MAY BE RELEASED TO WATERS OF THE STATE.

3 11. "WATERS OF THE STATE" HAS THE SAME MEANING PRESCRIBED IN SECTION
4 49-201.

5 49-172. Applicability

6 A. EXCEPT AS PROVIDED IN SUBSECTION B OF THIS SECTION, ANY PERSON MAY
7 REQUEST THE DEPARTMENT TO REVIEW AND APPROVE WORK TO BE PERFORMED OR ALREADY
8 PERFORMED THAT ADDRESSES OR HAS ADDRESSED A RELEASE OF A CONTAMINANT TO THE
9 ENVIRONMENT BY SUBMITTING AN APPLICATION TO PARTICIPATE IN THE VOLUNTARY
10 REMEDIATION PROGRAM ESTABLISHED BY THIS ARTICLE.

11 B. THIS ARTICLE SHALL NOT APPLY TO ANY OF THE FOLLOWING ACTIVITIES:

12 1. CORRECTIVE ACTION AT OR CLOSURE OF A FACILITY THAT HAS QUALIFIED
13 FOR INTERIM STATUS OR TO WHICH A PERMIT HAS BEEN ISSUED PURSUANT TO SECTION
14 49-922.

15 2. CORRECTIVE ACTION PURSUANT TO SECTION 49-1005, UNLESS THE PERSON
16 WAIVES ANY RIGHT TO REIMBURSEMENT OF COSTS FROM THE STATE ASSURANCE FUND.

17 3. REMEDIAL ACTIONS REQUIRED BY THE TERMS OF ANY OF THE FOLLOWING:

18 (a) A WRITTEN AGREEMENT BETWEEN THE APPLICANT AND THE DIRECTOR ENTERED
19 INTO BEFORE THE DATE OF AN APPLICATION UNDER THIS ARTICLE.

20 (b) A JUDICIAL JUDGMENT OR DECREE.

21 (c) AN ADMINISTRATIVE ORDER ISSUED BEFORE THE DATE OF AN APPLICATION
22 UNDER THIS ARTICLE.

23 4. REMEDIAL ACTIONS SOUGHT TO BE REQUIRED IN THE COMPLAINT IN A
24 JUDICIAL ACTION FILED AND SERVED BY THE STATE BEFORE THE DATE OF THE
25 APPLICATION UNDER THIS ARTICLE.

26 5. REMEDIAL ACTIONS AT A SITE OR PORTION OF A SITE LISTED ON THE
27 REGISTRY MAINTAINED PURSUANT TO SECTION 49-287.01, SUBSECTION D THAT ADDRESS
28 A CONTAMINANT OF CONCERN AT THAT SITE, EXCEPT THAT THE DEPARTMENT MAY ACCEPT
29 AN APPLICATION UNDER THIS ARTICLE FOR REMEDIATION OF A SITE OR A PORTION OF A
30 SITE FOR WHICH A PRELIMINARY INVESTIGATION HAS BEEN COMMENCED OR COMPLETED
31 PURSUANT TO SECTION 49-287.01 BUT THAT HAS NOT BEEN LISTED ON THE REGISTRY
32 MAINTAINED PURSUANT TO SECTION 49-287.01, SUBSECTION D.

33 49-173. Application requirements

34 A. EACH APPLICATION TO PARTICIPATE IN A VOLUNTARY REMEDIATION PROGRAM
35 SHALL CONTAIN THE FOLLOWING INFORMATION:

36 1. THE NAME AND ADDRESS OF THE PERSON FILING THE APPLICATION AND THE
37 NATURE OF THE RELATIONSHIP OF THE PERSON TO THE SITE, IF ANY.

38 2. A DESCRIPTION OF THE LOCATION AND BOUNDARIES OF THE SITE OR PORTION
39 OF A SITE THAT IS THE SUBJECT OF THE REMEDIATION.

40 3. A DESCRIPTION OF CHARACTERIZATION PERFORMED AT THE SITE OR PORTION
41 OF THE SITE, IF KNOWN.

42 4. A GENERAL DESCRIPTION OF THE WORK TO BE PERFORMED OR ALREADY
43 PERFORMED BY THE APPLICANT. THE APPLICATION SHALL STATE WHETHER THE
44 APPLICANT IS REQUESTING ONE OR MORE OF THE FOLLOWING:

45 (a) APPROVAL OF REMEDIAL ACTIONS TO BE PERFORMED.

46 (b) APPROVAL OF REMEDIAL ACTIONS ALREADY PERFORMED.

1 5. A LIST OF THE ACTIONS OF THE DIRECTOR TO COMPEL REMEDIATION THAT
2 THE APPLICANT PROPOSES TO BE SUSPENDED BY THE APPROVAL.

3 6. INFORMATION TO CONFIRM THAT THE WORK TO BE PERFORMED OR ALREADY
4 PERFORMED IS ELIGIBLE PURSUANT TO SECTION 49-172.

5 7. THE FEE REQUIRED PURSUANT TO SECTION 49-179, SUBSECTION A.

6 8. AN AGREEMENT IN WHICH THE APPLICANT AGREES:

7 (a) TO GRANT ACCESS TO THE SITE OR PORTION OF A SITE TO THE DEPARTMENT
8 AT REASONABLE TIMES TO VERIFY THAT THE WORK IS BEING PERFORMED IN ACCORDANCE
9 WITH THE WORK PLAN APPROVED PURSUANT TO SECTION 49-177 OR HAS BEEN PERFORMED
10 IN ACCORDANCE WITH THE REPORT SUBMITTED PURSUANT TO SECTION 49-181.

11 (b) TO REIMBURSE THE DEPARTMENT FOR THE DEPARTMENT'S COSTS, PURSUANT
12 TO SECTION 49-179 FOR REVIEW OF, ACTION ON, AND OVERSIGHT OF THE WORK PLAN
13 PURSUANT TO SECTION 49-175 AND 49-177 OR THE REPORT PURSUANT TO SECTION
14 49-181.

15 (c) TO CARRY OUT THE TASKS DESCRIBED IN THE WORK PLAN PURSUANT TO
16 SECTION 49-175 IN ACCORDANCE WITH THE SCHEDULE PROVIDED IN THE WORK PLAN, OR
17 TO SUBMIT A REPORT PURSUANT TO SECTION 49-181.

18 (d) TO MEET AND CONFER WITH THE DEPARTMENT REGARDING THE PROGRESS OF
19 THE TASKS PERFORMED IN ACCORDANCE WITH THE WORK PLAN APPROVED PURSUANT TO
20 SECTION 49-177, IF APPLICABLE.

21 (e) TO SUBMIT AN ADVANCE DEPOSIT TO BE APPLIED AGAINST THE
22 DEPARTMENT'S REIMBURSABLE COSTS PURSUANT TO SECTION 49-179 FOR REVIEW OF,
23 ACTION ON, AND OVERSIGHT OF THE WORK PLAN SUBMITTED PURSUANT TO SECTION
24 49-175 OR THE REPORT SUBMITTED PURSUANT TO SECTION 49-181.

25 49-174. Application review and approval

26 A. AFTER RECEIPT OF AN APPLICATION SUBMITTED PURSUANT TO SECTION
27 49-173, THE DEPARTMENT SHALL PROMPTLY REVIEW THE APPLICATION AND APPROVE,
28 DENY OR REQUEST MODIFICATIONS TO DETERMINE THE APPLICANT'S ELIGIBILITY TO
29 PARTICIPATE IN THE VOLUNTARY REMEDIATION PROGRAM ESTABLISHED BY THIS ARTICLE.
30 AN APPLICANT IS ELIGIBLE TO PARTICIPATE IF THE APPLICATION CONTAINS ALL OF
31 THE INFORMATION LISTED IN SECTION 49-173 AND THE WORK PERFORMED OR TO BE
32 PERFORMED DOES NOT INCLUDE ACTIVITIES LISTED IN SECTION 49-172, SUBSECTION B.

33 B. AN APPLICATION SHALL BE DEEMED COMPLETE UNLESS THE DEPARTMENT,
34 WITHIN SIXTY DAYS OF RECEIPT, NOTIFIES THE APPLICANT THAT THE APPLICATION IS
35 INCOMPLETE OR HAS BEEN DENIED. IF THE DEPARTMENT DETERMINES THAT ADDITIONAL
36 INFORMATION IS NECESSARY TO EVALUATE OR TO TAKE FINAL ACTION ON THE
37 APPLICATION, THE DEPARTMENT MAY REQUEST SUCH INFORMATION IN WRITING AND SET A
38 REASONABLE DEADLINE FOR A RESPONSE.

39 C. AFTER AN APPLICATION IS APPROVED, THE APPLICANT SHALL, WITHIN A
40 REASONABLE TIME PERIOD, SUBMIT A WORK PLAN PURSUANT TO SECTION 49-175 OR A
41 REPORT PURSUANT TO SECTION 49-181, WHICHEVER IS APPLICABLE.

42 49-175. Work plans

43 A. A WORK PLAN TO ADDRESS A RELEASE OF A CONTAMINANT TO THE
44 ENVIRONMENT SHALL INCLUDE THE FOLLOWING:

45 1. A SUMMARY OF EXISTING INFORMATION ON SITE CHARACTERIZATION,
46 INCLUDING REFERENCES TO KNOWN SITE CHARACTERIZATION AND ASSESSMENT

1 INFORMATION AND INFORMATION REGARDING ANY REMEDIATION PREVIOUSLY CONDUCTED AT
2 THE SITE OR PORTION OF THE SITE. THE APPLICANT SHALL PROVIDE COPIES OF THE
3 REFERENCED REPORTS TO THE DEPARTMENT.

4 2. IF THE SITE OR PORTION OF THE SITE ADDRESSED IN THE APPLICATION HAS
5 NOT BEEN CHARACTERIZED, A PLAN TO CONDUCT SITE CHARACTERIZATION AND A
6 SCHEDULE FOR COMPLETION. THE APPLICANT SHALL PROVIDE A SCHEDULE FOR THE
7 SUBMISSION OF A WORK PLAN FOR REMEDIATION FOLLOWING APPROVAL OF SITE
8 CHARACTERIZATION.

9 3. IF SITE CHARACTERIZATION IS COMPLETED FOR THE SITE OR PORTION OF
10 THE SITE ADDRESSED IN THE APPLICATION, A PLAN FOR REMEDIATION WHICH WILL
11 COMPLY WITH SUBSECTION B OF THIS SECTION AND A SCHEDULE FOR COMPLETION AS
12 FOLLOWS:

13 (a) THE WORK PLAN SHALL DESCRIBE HOW THE REMEDIATION WILL COMPLY WITH
14 SUBSECTION B OF THIS SECTION AND HOW THE COMPLETION OF REMEDIATION WILL BE
15 VERIFIED. THE APPLICANT AND THE DEPARTMENT MAY AGREE ON INTERIM PERFORMANCE
16 GOALS. THE INTERIM PERFORMANCE GOALS SHALL BE GUIDELINES USED TO DETERMINE
17 THE ONGOING EFFECTIVENESS OF THE REMEDIATION TOWARD REACHING THE FINAL
18 REMEDIATION LEVELS.

19 (b) THE WORK PLAN MAY PROVIDE FOR THE REMEDIATION TO BE CONDUCTED IN
20 PHASES OR TASKS THAT, IF AGREED TO BY THE APPLICANT, PROVIDE FOR THE
21 DEPARTMENT TO REVIEW AND APPROVE A COMPLETED PHASE OR TASK BEFORE INITIATION
22 OF THE NEXT PHASE OR TASK OF THE WORK PLAN.

23 4. A SCHEDULE FOR SUBMISSION OF PROGRESS REPORTS TO THE DEPARTMENT.
24 THE PROGRESS REPORTS SHALL BE SUFFICIENT TO ALLOW THE DEPARTMENT TO DETERMINE
25 THE EFFECTIVENESS OF THE CHARACTERIZATION IF IT HAS NOT BEEN COMPLETED,
26 FOLLOWED BY THE REMEDIATION.

27 5. A PROPOSAL FOR COMMUNITY INVOLVEMENT AS PRESCRIBED BY SECTION
28 49-176.

29 6. IF KNOWN, A LIST OF INSTITUTIONAL OR ENGINEERING CONTROLS NECESSARY
30 DURING REMEDIATION AND AFTER COMPLETION OF THE PROPOSED REMEDIATION TO
31 CONTROL EXPOSURE TO CONTAMINANTS.

32 7. A PROPOSAL FOR MONITORING OF A SITE OR PORTION OF A SITE DURING THE
33 REMEDIATION AND AFTER THE REMEDIATION IF NECESSARY TO VERIFY WHETHER THE
34 APPROVED REMEDIATION LEVELS OR CONTROLS HAVE BEEN ATTAINED AND WILL BE
35 MAINTAINED.

36 8. A LIST OF ANY PERMITS OR LEGAL REQUIREMENTS KNOWN BY THE APPLICANT
37 TO APPLY TO THE WORK TO BE PERFORMED OR ALREADY PERFORMED BY THE APPLICANT.

38 9. IF REQUESTED BY THE DEPARTMENT, INFORMATION REGARDING THE FINANCIAL
39 CAPABILITY OF THE APPLICANT TO CONDUCT THE WORK IDENTIFIED IN THE
40 APPLICATION.

41 B. REMEDIATION LEVELS OR CONTROLS FOR REMEDIATION CONDUCTED PURSUANT
42 TO THIS ARTICLE SHALL BE ESTABLISHED IN ACCORDANCE WITH RULES ADOPTED
43 PURSUANT TO SECTION 49-282.06 UNLESS ONE OR MORE OF THE FOLLOWING APPLIES:

44 1. THE APPLICANT DEMONSTRATES THAT REMEDIATION LEVELS, INSTITUTIONAL
45 CONTROLS OR ENGINEERING CONTROLS FOR REMEDIATION OF CONTAMINATED SOIL COMPLY
46 WITH SECTION 49-152 AND THE RULES ADOPTED PURSUANT TO THAT SECTION.

1 2. THE APPLICANT DEMONSTRATES THAT REMEDIATION LEVELS, INSTITUTIONAL
2 CONTROLS OR ENGINEERING CONTROLS FOR REMEDIATION OF LANDFILLS OR OTHER
3 FACILITIES THAT CONTAIN MATERIALS THAT ARE NOT SUBJECT TO SECTION 49-152 AND
4 THE RULES ADOPTED PURSUANT TO THAT SECTION WILL RESULT IN A CONDITION THAT
5 DOES NOT EXCEED A CUMULATIVE EXCESS LIFETIME CANCER RISK BETWEEN 1×10^{-4} AND
6 1×10^{-6} , AND A HAZARD INDEX NO GREATER THAN 1. THE EXCESS LIFETIME CANCER
7 RISK SHALL BE SELECTED BASED ON SITE-SPECIFIC FACTORS INCLUDING THE PRESENCE
8 OF MULTIPLE CONTAMINANTS, THE EXISTENCE OF MULTIPLE PATHWAYS OF EXPOSURE, THE
9 UNCERTAINTY OF EXPOSURE AND THE SENSITIVITY OF THE EXPOSED POPULATION.
10 APPROVAL OF THE USE OF INSTITUTIONAL OR ENGINEERING CONTROLS SHALL REQUIRE A
11 DEMONSTRATION THAT THE CONTROLS WILL BE MAINTAINED AND THAT THE REQUIREMENTS
12 OF SECTION 49-158 HAVE BEEN MET.

13 3. THE APPLICANT DEMONSTRATES THAT ON ACHIEVING REMEDIATION LEVELS OR
14 CONTROLS FOR A SOURCE OR POTENTIAL SOURCE OF CONTAMINATION TO A NAVIGABLE
15 WATER, THE SOURCE OF CONTAMINATION WILL NOT CAUSE OR CONTRIBUTE TO AN
16 EXCEEDANCE OF SURFACE WATER QUALITY STANDARDS, OR IF A PERMIT IS REQUIRED
17 PURSUANT TO 33 UNITED STATES CODE SECTION 1342 FOR ANY DISCHARGE FROM THE
18 SOURCE, THAT ANY DISCHARGES FROM THE SOURCE WILL COMPLY WITH THE PERMIT.
19 APPROVAL OF THE USE OF INSTITUTIONAL OR ENGINEERING CONTROLS SHALL REQUIRE A
20 DEMONSTRATION THAT THE CONTROLS WILL BE MAINTAINED AND THAT THE REQUIREMENTS
21 OF SECTION 49-158 HAVE BEEN MET.

22 4. THE APPLICANT DEMONSTRATES THAT, ON ACHIEVING REMEDIATION LEVELS OR
23 CONTROLS FOR A SOURCE OF CONTAMINATION TO AN AQUIFER, THE SOURCE WILL NOT
24 CAUSE OR CONTRIBUTE TO AN EXCEEDANCE OF AQUIFER WATER QUALITY STANDARDS
25 BEYOND THE BOUNDARY OF THE FACILITY WHERE THE SOURCE IS LOCATED. IN
26 DETERMINING WHETHER REMEDIATION LEVELS OR CONTROLS SATISFY THIS REQUIREMENT,
27 THE DEPARTMENT SHALL CONSIDER A DEMONSTRATION BY THE APPLICANT THAT AQUIFER
28 WATER QUALITY STANDARDS ARE EXCEEDED BEYOND THE BOUNDARY OF THE FACILITY DUE
29 TO NATURALLY OCCURRING CONTAMINATION OR FROM SOURCES OUTSIDE OF THE BOUNDARY.
30 THE APPLICANT IS NOT REQUIRED TO IDENTIFY OR EVALUATE OTHER
31 SOURCES. APPROVAL OF THE USE OF INSTITUTIONAL OR ENGINEERING CONTROLS SHALL
32 REQUIRE A DEMONSTRATION THAT THE CONTROLS WILL BE MAINTAINED AND THAT THE
33 REQUIREMENTS OF SECTION 49-158 HAVE BEEN MET.

34 C. THE DEPARTMENT, AT ITS SOLE DISCRETION, MAY WAIVE ANY WORK PLAN
35 REQUIREMENT UNDER THIS SECTION THAT IT DETERMINES TO BE UNNECESSARY TO MAKE
36 ANY OF THE DETERMINATIONS REQUIRED UNDER SECTION 49-177. DECISIONS UNDER
37 THIS SUBSECTION ARE NOT SUBJECT TO APPEAL OR DISPUTE RESOLUTION UNDER SECTION
38 49-185.

39 49-176. Community involvement requirements

40 A. A WORK PLAN SUBMITTED PURSUANT TO SECTION 49-175 SHALL INCLUDE A
41 PLAN TO PROVIDE TO THE PUBLIC REASONABLE NOTICE AND INFORMATION REGARDING THE
42 REMEDIATION. A REPORT SUBMITTED PURSUANT TO SECTION 49-181 SHALL DESCRIBE THE
43 ACTIVITIES PREVIOUSLY UNDERTAKEN TO NOTIFY THE PUBLIC OF THE REMEDIATION.
44 PLANS AND ACTIVITIES UNDERTAKEN AFTER THE EFFECTIVE DATE OF THIS ARTICLE TO
45 NOTIFY THE PUBLIC SHALL BE CONSISTENT WITH THE FOLLOWING GUIDELINES:

1 1. FOR REMEDIATION WHERE THE REMEDIATION LEVELS AND CONTROLS ARE
2 ESTABLISHED IN ACCORDANCE WITH THE RULES ADOPTED PURSUANT TO SECTION
3 49-282.06, COMMUNITY INVOLVEMENT SHALL BE CONSISTENT WITH THE REQUIREMENTS OF
4 THOSE RULES.

5 2. FOR REMEDIATION WHERE THE REMEDIATION LEVELS AND CONTROLS ARE
6 ESTABLISHED IN ACCORDANCE WITH SECTION 49-175, SUBSECTION B, PARAGRAPH 1, 2,
7 3, OR 4, COMMUNITY INVOLVEMENT ACTIVITIES SHALL BE CONDUCTED APPROPRIATE TO
8 THE SCOPE AND SCHEDULE OF THE REMEDIATION, INCLUDING, AS APPLICABLE, ALL OF
9 THE FOLLOWING:

10 (a) FOR FIELD WORK CONDUCTED TO REMOVE CONTAMINANTS OF CONCERN OR THAT
11 MAY RESULT IN NOISE, LIGHT, ODOR, DUST AND OTHER ADVERSE IMPACTS OFF OF THE
12 SITE, PROVIDE GENERAL PUBLIC NOTICE. THE GENERAL PUBLIC NOTICE SHALL BE IN
13 THE FORM OF VISIBLE SIGNAGE AND DIRECT MAILING, DOOR HANGINGS, OR A SIMILAR
14 FORM OF NOTICE THAT IS DISTRIBUTED IN A MANNER SUFFICIENT TO REACH THOSE WHO
15 MAY BE IMPACTED. THE GENERAL PUBLIC NOTICE SHALL IDENTIFY THE NAME AND
16 TELEPHONE NUMBER OF A PERSON WHO MAY BE CONTACTED FOR INFORMATION REGARDING
17 THE FIELD WORK.

18 (b) FOR REMEDIATION THAT WILL TAKE MORE THAN ONE HUNDRED EIGHTY DAYS
19 TO COMPLETE, PROVIDE GENERAL NOTICE REGARDING THE NATURE AND PROGRESS OF THE
20 ACTION AND ESTABLISH A DOCUMENT REPOSITORY ACCESSIBLE TO THE PUBLIC WHERE
21 INFORMATION REGARDING THE SITE AND THE REMEDIATION IS AVAILABLE FOR REVIEW.
22 THE GENERAL NOTICE MAY BE IN THE FORM OF FACT SHEETS, NEWSLETTERS, OR NEWS
23 ARTICLES DISTRIBUTED BY DIRECT MAILINGS, DOOR HANGINGS OR ANY OTHER METHOD OF
24 DISTRIBUTION SUFFICIENT TO REACH OR BE ACCESSIBLE TO LOCAL GOVERNMENT
25 AGENCIES, PERSONS WITHIN THE COMMUNITY SURROUNDING THE SITE AND OTHER PERSONS
26 WHO HAVE REQUESTED INFORMATION REGARDING THE SITE AND DIRECT MAIL TO AFFECTED
27 WATER PROVIDERS. THE GENERAL NOTICE SHALL IDENTIFY THE NAME AND TELEPHONE
28 NUMBER OF A PERSON WHO MAY BE CONTACTED FOR INFORMATION REGARDING THE
29 REMEDIATION. THE DOCUMENT REPOSITORY SHALL BE ACCESSIBLE DURING NORMAL
30 BUSINESS HOURS OR BY APPOINTMENT AND SHALL CONTAIN ALL DOCUMENTS AND
31 INFORMATION REQUIRED TO BE PREPARED OR MAINTAINED BY THIS PROGRAM AND ANY
32 OTHER DOCUMENTS AND INFORMATION DEEMED APPROPRIATE BY THE PERSON CONDUCTING
33 THE WORK.

34 3. FOR REMEDIATION LEVELS OR CONTROLS SELECTED PURSUANT TO SECTION
35 49-175, SUBSECTION B, PARAGRAPHS 3 AND 4 OR REMEDIATION THAT INCLUDES AN
36 INSTITUTIONAL OR ENGINEERING CONTROL TO SATISFY THE REQUIREMENTS OF SECTION
37 49-152 OR SECTION 49-158 AND THE RULES ADOPTED PURSUANT TO THOSE SECTIONS,
38 NOTICE OF A WORK PLAN PURSUANT TO SECTION 49-175 OR A REPORT PURSUANT TO
39 SECTION 49-181 AND AN OPPORTUNITY FOR PUBLIC COMMENTS TO BE SUBMITTED FOR A
40 PERIOD OF FORTY-FIVE DAYS AFTER THE NOTICE SHALL BE PUBLISHED IN A NEWSPAPER
41 OF GENERAL CIRCULATION AND SHALL BE PROVIDED INDIVIDUALLY TO AFFECTED WATER
42 PROVIDERS, AFFECTED WELL OWNERS, LOCAL GOVERNMENT AGENCIES, ADJACENT
43 RESIDENTS, AND THE DEPARTMENT OF WATER RESOURCES.

44 B. IF THE APPLICANT REQUESTS A NO FURTHER ACTION DETERMINATION
45 PURSUANT TO SECTION 49-181, THE APPLICANT SHALL PROVIDE GENERAL NOTICE OF THE

1 REQUEST, THE REPORT SUBMITTED TO THE DEPARTMENT, AND THE OPPORTUNITY FOR
2 COMMENT.

3 C. COMMUNITY INVOLVEMENT ACTIVITIES UNDERTAKEN PURSUANT TO THIS
4 ARTICLE MAY BE COORDINATED OR COMBINED WITH SIMILAR PROCEDURES REQUIRED UNDER
5 OTHER LAWS APPLICABLE TO THE WORK TO AVOID DUPLICATION.

6 D. THE DIRECTOR SHALL CONSIDER WRITTEN COMMENTS IN RESPONSE TO A
7 PUBLIC NOTICE PROVIDING AN OPPORTUNITY TO COMMENT OR ANY PUBLIC MEETING HELD
8 PRIOR TO APPROVING A WORK PLAN PURSUANT TO SECTION 49-177 OR ISSUING A NO
9 FURTHER ACTION DETERMINATION PURSUANT TO SECTION 49-181. THE DIRECTOR MAY
10 REQUIRE THE APPLICANT TO CONDUCT A PUBLIC MEETING PRIOR TO APPROVING A WORK
11 PLAN FOR WHICH NOTICE IS REQUIRED PURSUANT TO SUBSECTION A, PARAGRAPH 3 OF
12 THIS SECTION OR ISSUING A NO FURTHER ACTION DETERMINATION.

13 E. THE DIRECTOR MAY REQUIRE ADDITIONAL COMMUNITY INVOLVEMENT
14 ACTIVITIES APPROPRIATE TO THE SCHEDULE AND SCOPE OF THE WORK AFTER
15 CONSIDERATION OF THE FOLLOWING FACTORS:

- 16 1. ACTUAL OR POTENTIAL IMPACT TO WATER SUPPLY.
- 17 2. EXTENT AND TOXICITY OF THE CONTAMINATION.
- 18 3. DURATION OF THE WORK.
- 19 4. LEVEL OF PUBLIC INTEREST.
- 20 5. NOISE, LIGHT, ODOR AND OTHER ADVERSE IMPACTS.
- 21 6. LIKELIHOOD OF CONTAMINANT EXPOSURE TO HUMAN OR ECOLOGICAL
22 RECEPTORS.

23 49-177. Work plan review and approval

24 A. AFTER RECEIPT OF A WORK PLAN SUBMITTED PURSUANT TO SECTION 49-175,
25 THE DEPARTMENT SHALL EXPEDITIOUSLY REVIEW, APPROVE, DENY OR REQUEST
26 MODIFICATIONS TO THE WORK PLAN. THE DEPARTMENT SHALL NOTIFY THE APPLICANT IN
27 WRITING OF ANY DEFICIENCIES IN THE WORK PLAN OR MODIFICATIONS NECESSARY FOR
28 APPROVAL.

29 B. THE DEPARTMENT SHALL APPROVE A WORK PLAN IF, AFTER CONSIDERING THE
30 INFORMATION IN THE WORK PLAN AND ANY PUBLIC COMMENTS THE DIRECTOR FINDS THAT:

31 1. IF CHARACTERIZATION HAS NOT BEEN COMPLETED, THAT CHARACTERIZATION
32 WILL BE COMPLETED IN A TIMELY MANNER.

33 2. IF CHARACTERIZATION HAS BEEN COMPLETED, THAT THE PROPOSED
34 REMEDIATION IS REASONABLY LIKELY TO ACHIEVE THE REMEDIATION LEVELS OR
35 CONTROLS ESTABLISHED PURSUANT TO SECTION 49-175, SUBSECTION B IN A TIMELY
36 MANNER.

37 3. THE PROPOSED COMMUNITY INVOLVEMENT MEETS THE REQUIREMENTS OF
38 SECTION 49-176.

39 4. THE WORK TO BE PERFORMED COMPLIES WITH ANY APPLICABLE CORRECTIVE OR
40 REMEDIAL ACTION REQUIREMENTS OF ANY APPLICABLE PERMIT REQUIRED UNDER THIS
41 TITLE. IF PROPOSED REMEDIATION UNDER THIS ARTICLE REQUIRES A PERMIT, A SOLID
42 WASTE FACILITY PLAN APPROVAL PURSUANT TO SECTION 49-762.03, OR A
43 MODIFICATION, THE PERMIT, PLAN APPROVAL, OR MODIFICATION SHALL BE OBTAINED
44 THROUGH THE APPLICABLE PROGRAM.

45 5. THE PROPOSED REMEDIATION IS CONSISTENT WITH TITLE 45, CHAPTER 2.

1 6. THE WORK TO BE PERFORMED COMPLIES WITH ANY OTHERWISE APPLICABLE
2 LAWS AND RULES.

3 C. THE DEPARTMENT MAY DENY A WORK PLAN IF THE APPLICANT FAILS OR
4 REFUSES TO CORRECT DEFICIENCIES OR MAKE MODIFICATIONS REQUIRED FOR APPROVAL,
5 IF THE PROPOSED REMEDIATION WOULD INTERFERE WITH OR SUBSTANTIALLY INCREASE
6 THE COST OF A REMEDIAL ACTION THAT THE DEPARTMENT MAY CONDUCT TO ADDRESS
7 WATERS OF THE STATE PURSUANT TO CHAPTER 2, ARTICLE 5 OF THIS TITLE, OR IF THE
8 DIRECTOR DETERMINES THAT THE APPLICANT IS NOT FINANCIALLY CAPABLE OF
9 CONDUCTING THE WORK PROPOSED IN THE WORK PLAN.

10 D. IF APPROVED, THE WORK PROPOSED IN THE WORK PLAN, INCLUDING THE
11 COMMUNITY INVOLVEMENT REQUIREMENTS, SHALL BE PERFORMED ACCORDING TO THE
12 REQUIREMENTS AND SCHEDULE SET FORTH IN THE WORK PLAN. ANY PERMITS OR PERMIT
13 MODIFICATIONS NEEDED TO IMPLEMENT AN APPROVED PLAN SHALL BE OBTAINED AS
14 REQUIRED THROUGH THE APPLICABLE PROGRAM. THE APPROVAL SUSPENDS ANY REMEDIAL
15 ACTION BY THE DIRECTOR AT THE SITE OR PORTION OF THE SITE DESCRIBED IN THE
16 APPROVED WORK PLAN, INCLUDING THE ISSUANCE OF ANY ORDER OR THE FILING OF ANY
17 ACTION TO COMPEL THE WORK APPROVED IN THE WORK PLAN, TO THE EXTENT DETERMINED
18 BY THE DIRECTOR TO BE APPROPRIATE. THE ACTIONS TO BE SUSPENDED SHALL BE
19 SPECIFICALLY STATED IN THE DIRECTOR'S APPROVAL.

20 E. THE DEPARTMENT MAY INSPECT SITES APPROVED UNDER THIS SECTION AT
21 REASONABLE TIMES AND REQUIRE REPORTING. THE DEPARTMENT MAY ALSO REQUEST
22 MODIFICATIONS PURSUANT TO SECTION 49-180.

23 F. AFTER APPROVAL OF THE WORK PLAN, THE DEPARTMENT SHALL NOT TAKE ANY
24 ACTION AGAINST THE APPLICANT THAT HAS BEEN SUSPENDED UNLESS THE APPLICANT
25 NOTIFIES THE DEPARTMENT THAT IT IS WITHDRAWING FROM THE VOLUNTARY REMEDIATION
26 PROGRAM OR THE DEPARTMENT TERMINATES AN APPLICANT'S PARTICIPATION IN THE
27 PROGRAM PURSUANT TO SECTION 49-178.

28 G. APPROVAL OF A WORK PLAN UNDER THIS SECTION THAT INCLUDES THE
29 WITHDRAWAL OF GROUNDWATER QUALIFIES THE APPLICANT FOR REMEDIATED GROUNDWATER
30 INCENTIVES SET FORTH IN LAWS 1997, CHAPTER 287, SECTIONS 51 AND 52 ONLY IF
31 THE REMEDIAL ACTION IS DESIGNED PRIMARILY TO ADDRESS A RELEASE OF A
32 CONTAMINANT THAT IS A HAZARDOUS SUBSTANCE.

33 H. IF THE DEPARTMENT DENIES THE WORK PLAN, THE APPLICANT MAY INITIATE
34 DISPUTE RESOLUTION UNDER SECTION 49-185, SUBSECTION B OR C.

35 49-178. Termination and withdrawal

36 A. AN APPLICANT MAY WITHDRAW FROM THE VOLUNTARY REMEDIATION PROGRAM AT
37 ANY TIME.

38 B. AFTER COMPLYING WITH SUBSECTION C OF THIS SECTION, THE DEPARTMENT
39 MAY TERMINATE AN APPLICANT'S PARTICIPATION IN THE VOLUNTARY REMEDIATION
40 PROGRAM IF THE APPLICANT DOES ANY OF THE FOLLOWING:

41 1. FAILS TO SUBMIT A WORK PLAN PURSUANT TO SECTION 49-175 OR A REPORT
42 PURSUANT TO SECTION 49-181 WITHIN A REASONABLE TIME PERIOD, WHICHEVER IS
43 APPLICABLE.

44 2. FAILS TO COMPLY WITH THE WORK PLAN REQUIREMENTS APPROVED UNDER
45 SECTION 49-177.

1 3. FAILS TO SUBSTANTIALLY COMPLY WITH THE SCHEDULE FOR COMPLETION
2 SUBMITTED PURSUANT TO SECTION 49-175, SUBSECTION A, PARAGRAPHS 2 OR 3 AND
3 APPROVED PURSUANT TO SECTION 49-177.

4 4. FAILS TO REIMBURSE THE DEPARTMENT FOR ITS COSTS AS REQUIRED BY
5 SECTION 49-179.

6 5. FAILS TO MODIFY THE WORK PLAN PURSUANT TO THE DEPARTMENT'S REQUEST
7 UNDER SECTION 49-180.

8 6. FAILS TO SUBMIT AND OBTAIN APPROVAL FOR PHASES OF WORK OR OTHER
9 TASKS DESCRIBED IN THE WORK PLAN IF SUCH APPROVAL IS A CONDITION OF THE WORK
10 PLAN.

11 7. SUBMITS FALSE INFORMATION, MISREPRESENTS INFORMATION OR FAILS TO
12 DISCLOSE MATERIAL INFORMATION.

13 C. BEFORE TERMINATING AN APPLICANT'S PARTICIPATION IN THE VOLUNTARY
14 REMEDIATION PROGRAM FOR ANY REASON PURSUANT TO THIS SECTION, THE DEPARTMENT
15 SHALL SEND TO THE APPLICANT A WRITTEN NOTICE OF DEFICIENCY AND SHALL PROVIDE
16 THE APPLICANT A REASONABLE OPPORTUNITY TO CORRECT THE DEFICIENCY. IF THE
17 DEFICIENCY IS NOT CORRECTED WITHIN A REASONABLE TIME SET BY THE DEPARTMENT,
18 THE DEPARTMENT MAY TERMINATE AN APPLICANT'S PARTICIPATION IN THE PROGRAM AS
19 PROVIDED IN SUBSECTION B OF THIS SECTION.

20 D. IF AN APPROVED APPLICATION IS TERMINATED OR WITHDRAWN, THE
21 SUSPENSION OF ACTIONS PURSUANT TO SECTION 49-177, SUBSECTION F IS WITHDRAWN.

22 49-179. Reimbursement of costs of review

23 A. EACH APPLICATION SUBMITTED UNDER SECTION 49-173 SHALL BE
24 ACCOMPANIED BY A NONREFUNDABLE FEE TO BE ESTABLISHED BY RULE.

25 B. AN APPLICANT SHALL REIMBURSE THE DEPARTMENT FOR THE REASONABLE AND
26 NECESSARY COSTS OF ACTIONS TAKEN BY THE DEPARTMENT PURSUANT TO THIS SECTION
27 AND SECTIONS 49-173 THROUGH 49-178, 49-180, 49-181, 49-182 AND 49-185.

28 C. REIMBURSABLE COSTS INCLUDE TIME SPENT BY THE DEPARTMENT'S EMPLOYEES
29 AND THE COSTS OF GOODS AND SERVICES CONTRACTED BY THE DEPARTMENT TO CARRY OUT
30 THE ACTIVITIES DESCRIBED IN SUBSECTION B OF THIS SECTION. TIME SPENT BY THE
31 DEPARTMENT'S EMPLOYEES SHALL BE REIMBURSED AT A RATE TO BE ESTABLISHED BY
32 RULE BASED UPON THE ESTIMATED DIRECT AND INDIRECT COSTS TO THE DEPARTMENT OF
33 CONDUCTING THESE ACTIVITIES. THE DEPARTMENT SHALL PROVIDE DOCUMENTATION TO
34 THE APPLICANT TO SUPPORT ITS CLAIMS FOR REIMBURSEMENT CONSISTENT WITH
35 GENERALLY ACCEPTED ACCOUNTING PRINCIPLES. THE DEPARTMENT MAY REQUIRE AN
36 APPLICANT TO PAY AN ADVANCE DEPOSIT TO BE APPLIED AGAINST THE DEPARTMENT'S
37 REIMBURSABLE COSTS FOLLOWING THE DEPARTMENT'S APPROVAL OF AN APPLICATION
38 UNDER SECTION 49-174. IF AN APPROVED APPLICATION IS TERMINATED OR WITHDRAWN
39 PURSUANT TO SECTION 49-178, THE APPLICANT SHALL REIMBURSE THE DEPARTMENT FOR
40 ITS COSTS INCURRED PRIOR TO THE TERMINATION OR WITHDRAWAL.

41 D. THE DEPARTMENT MAY CONTRACT WITH AN OUTSIDE CONSULTANT TO PERFORM
42 ANY TECHNICAL REVIEW REQUIRED TO REVIEW A WORK PLAN SUBMITTED PURSUANT TO
43 SECTION 49-175 OR A REPORT SUBMITTED PURSUANT TO SECTION 49-181 OR TO OVERSEE
44 WORK PERFORMED PURSUANT TO A WORK PLAN APPROVED PURSUANT TO SECTION 49-177 AS
45 FOLLOWS:

1 1. THE DEPARTMENT MAY CONTRACT ANY WORK FOR WHICH COSTS ARE
2 REIMBURSABLE PURSUANT TO SUBSECTION B OF THIS SECTION IF THE CONTRACT RATE IS
3 LESS THAN OR EQUAL TO THE RATE CHARGED FOR TIME SPENT BY THE DEPARTMENT'S
4 EMPLOYEES.

5 2. THE DEPARTMENT MAY CONTRACT ANY WORK UPON THE REQUEST OF AN
6 APPLICANT TO ESTABLISH DEADLINES FOR A REVIEW OF A WORK PLAN OR A TASK UNDER
7 AN APPROVED WORK PLAN IF THE APPLICANT AGREES TO REIMBURSE THE DEPARTMENT FOR
8 THE CHARGES OF THE OUTSIDE CONSULTANT.

9 49-180. Modification of work plan

10 A. AN APPLICANT MAY PROPOSE A MODIFICATION TO A WORK PLAN AT ANY TIME
11 BY SUBMITTING AN AMENDED WORK PLAN OR PORTIONS OF THE WORK PLAN. SECTIONS
12 49-175 AND 49-177, AS APPLICABLE, GOVERN THE AMENDED WORK PLAN.

13 B. BASED UPON THE PROGRESS REPORTS SUBMITTED BY THE APPLICANT, THE
14 DEPARTMENT MAY REQUEST AN APPLICANT TO SUBMIT A PROPOSED MODIFICATION TO THE
15 WORK PLAN PURSUANT TO THIS SECTION IF THE DEPARTMENT DETERMINES THAT A
16 MODIFICATION IS NECESSARY IN ORDER TO MEET THE REMEDIATION LEVELS OR
17 OBJECTIVES WITHIN THE APPROVED WORK PLAN AND SCHEDULE, INCLUDING ANY INTERIM
18 GOALS. IF THE APPLICANT OBJECTS TO THE REQUESTED MODIFICATIONS, THE
19 APPLICANT MAY SEEK DISPUTE RESOLUTION REGARDING THE REQUESTED MODIFICATIONS
20 PURSUANT TO SECTION 49-185, SUBSECTION B OR C, OR MAY WITHDRAW FROM THE
21 PROGRAM. IF THE APPLICANT DOES NOT MAKE THE MODIFICATIONS REQUESTED BY THE
22 DEPARTMENT, AND IF DISPUTE RESOLUTION IS NOT SUCCESSFUL OR IF THE APPLICANT
23 DOES NOT SEEK DISPUTE RESOLUTION WITHIN THE TIME PERIOD PROVIDED BY SECTION
24 49-185, SUBSECTION B OR C, THE DEPARTMENT MAY TERMINATE AN APPLICANT'S
25 PARTICIPATION IN THE PROGRAM PURSUANT TO SECTION 49-178.

26 C. MINOR CHANGES TO THE APPROVED WORK PLAN THAT DO NOT SUBSTANTIALLY
27 CHANGE THE SCOPE, NATURE OR DURATION OF THE WORK TO BE PERFORMED MAY BE
28 APPROVED IN WRITING BY THE DEPARTMENT AND ARE NOT SUBJECT TO SECTION 49-177.
29 MINOR CHANGES INCLUDE CHANGES IN THE SCHEDULE FOR SPECIFIC ACTIONS FOR GOOD
30 CAUSE SHOWN BY THE APPLICANT AS LONG AS THE OVERALL DURATION OF THE TASKS IN
31 THE WORK PLAN ARE NOT SUBSTANTIALLY AFFECTED.

32 49-181. Requests for no further action determination

33 A. UPON ACHIEVING THE REMEDIATION LEVELS AND CONTROLS DETERMINED
34 PURSUANT TO SECTION 49-175, SUBSECTION B, AN APPLICANT APPROVED PURSUANT TO
35 SECTION 49-174 MAY REQUEST THE DEPARTMENT TO PROVIDE A DETERMINATION THAT NO
36 FURTHER ACTION IS NEEDED FOR A SITE OR PORTION OF A SITE BY SUBMITTING A
37 REPORT TO THE DEPARTMENT. THE REPORT SHALL INCLUDE:

38 1. A DESCRIPTION OF THE SPECIFIC CONTAMINANTS FOR WHICH A NO FURTHER
39 ACTION DETERMINATION IS BEING SOUGHT.

40 2. A DESCRIPTION OF THE ACTIONS TAKEN TO ACHIEVE REMEDIATION LEVELS OR
41 CONTROLS DETERMINED IN ACCORDANCE WITH SECTION 49-175, SUBSECTION B.

42 3. A DESCRIPTION OF ANY SOIL, WATER, OR SOIL AND WATER TREATMENT
43 SYSTEMS USED AS PART OF THE REMEDIATION.

44 4. WHENEVER INSTITUTIONAL OR ENGINEERING CONTROLS ARE PLACED ON THE
45 SITE:

1 (a) A DEMONSTRATION THAT ANY ENGINEERING CONTROL OR COMBINATION OF
2 ENGINEERING CONTROLS HAS BEEN CONSTRUCTED, IS FUNCTIONING, AND WILL BE
3 MAINTAINED.

4 (b) A DESCRIPTION OF THE PROPOSED LAND USE FOR THE SITE AND A
5 DEMONSTRATION THAT THE USE WILL NOT COMPROMISE THE INTEGRITY OF THE
6 ENGINEERING CONTROLS AND WILL BE IN ACCORDANCE WITH ANY INSTITUTIONAL
7 CONTROLS.

8 5. IF POST-REMEDATION MONITORING IS PROPOSED, A DESCRIPTION OF THE
9 TYPE OF MONITORING, MONITORING LOCATIONS, CONTAMINANTS TO BE MONITORED,
10 MONITORING FREQUENCY AND SAMPLING PROCEDURES.

11 6. A DESCRIPTION OF COMMUNITY INVOLVEMENT ACTIVITIES UNDERTAKEN TO
12 MEET THE REQUIREMENTS OF SECTION 49-176.

13 7. A LIST OF PERMITS UNDER THIS TITLE OBTAINED FOR THE REMEDIAL ACTION
14 OR HELD BY THE APPLICANT PERTAINING TO THE SITE.

15 B. AFTER RECEIPT OF A REQUEST FOR A NO FURTHER ACTION DETERMINATION,
16 THE DEPARTMENT SHALL REVIEW, APPROVE, DENY OR REQUEST MODIFICATIONS TO THE
17 REQUEST. THE DIRECTOR MAY REQUEST ADDITIONAL INFORMATION BEFORE ACTING ON
18 THE REQUEST FOR A DETERMINATION OF NO FURTHER ACTION, MAY CONDUCT AN
19 INVESTIGATION OF THE SITE OR PORTION OF THE SITE, AND SHALL BE GIVEN ACCESS
20 TO THE SITE AT REASONABLE TIMES FOR THE PURPOSE OF VERIFYING THE COMPLETION
21 OF THE REMEDIAL ACTION.

22 C. THE DIRECTOR SHALL GRANT A REQUEST FOR A NO FURTHER ACTION
23 DETERMINATION IF, AFTER CONSIDERING ANY PUBLIC COMMENTS, THE DIRECTOR
24 DETERMINES THAT ALL OF THE FOLLOWING CONDITIONS EXIST:

25 1. THE REMEDIATION HAS ACHIEVED REMEDIATION LEVELS OR CONTROLS
26 DETERMINED IN ACCORDANCE WITH SECTION 49-175, SUBSECTION B.

27 2. THE COMMUNITY INVOLVEMENT REQUIREMENTS OF SECTION 49-176 HAVE BEEN
28 SATISFIED.

29 3. IF INSTITUTIONAL OR ENGINEERING CONTROLS ARE PROPOSED, PROOF THAT
30 THE DECLARATION OF ENVIRONMENTAL USE RESTRICTION HAS BEEN FILED THAT COMPLIES
31 WITH THE REQUIREMENTS OF SECTION 49-152 OR 49-158.

32 4. THE WORK PERFORMED COMPLIES WITH ANY APPLICABLE CORRECTIVE OR
33 REMEDIAL ACTION REQUIREMENTS OF ANY APPLICABLE PERMIT REQUIRED UNDER THIS
34 TITLE. IF REMEDIATION UNDER THIS ARTICLE REQUIRES A PERMIT, A SOLID WASTE
35 FACILITY PLAN APPROVAL PURSUANT TO SECTION 49-762.03, OR A MODIFICATION, THE
36 PERMIT, PLAN APPROVAL, OR MODIFICATION SHALL BE OBTAINED THROUGH THE
37 APPLICABLE PROGRAM.

38 5. THE REMEDIATION IS CONSISTENT WITH TITLE 45, CHAPTER 2.

39 6. THE WORK PERFORMED COMPLIES WITH ANY OTHERWISE APPLICABLE LAWS AND
40 RULES.

41 7. THE REMEDIATION WILL NOT INTERFERE WITH OR SUBSTANTIALLY INCREASE
42 THE COST OF A REMEDIAL ACTION THAT THE DEPARTMENT MAY CONDUCT TO ADDRESS
43 WATERS OF THE STATE PURSUANT TO CHAPTER 2, ARTICLE 5 OF THIS TITLE.

44 E. THE DEPARTMENT MAY ISSUE A CONDITIONAL NO FURTHER ACTION
45 DETERMINATION AT A SITE WHERE REMEDIATION LEVELS HAVE BEEN MET THROUGH THE
46 USE OF INSTITUTIONAL CONTROLS OR ENGINEERING CONTROLS BUT POST-REMEDATION

1 CARE OBLIGATIONS SUCH AS MONITORING OR MAINTENANCE OF ENGINEERING CONTROLS
2 MUST BE PERFORMED.

3 F. THE DEPARTMENT MAY RESCIND OR AMEND THE DETERMINATION OF NO FURTHER
4 ACTION UNDER THIS SECTION AND REQUIRE REMEDIAL ACTION PURSUANT TO APPLICABLE
5 LAW FOR ANY OF THE FOLLOWING REASONS:

6 1. ON DISCOVERY OF NEW INFORMATION THAT, BASED ON THE CRITERIA IN
7 SUBSECTION C OF THIS SECTION, WOULD RESULT IN THE POTENTIAL DENIAL OF A NO
8 FURTHER ACTION REQUEST.

9 2. THAT INFORMATION SUBMITTED PURSUANT TO SUBSECTION A OR B OF THIS
10 SECTION WAS INACCURATE, MISLEADING, OR INCOMPLETE.

11 3. THE REOPENING OF AN INVESTIGATION OR THE TAKING OF A REMEDIAL
12 ACTION IS NECESSARY TO RESPOND TO A RELEASE OR THE THREAT OF A RELEASE OF A
13 CONTAMINANT THAT MAY PRESENT AN IMMINENT AND SUBSTANTIAL DANGER TO THE PUBLIC
14 HEALTH OR WELFARE OR THE ENVIRONMENT.

15 G. A DETERMINATION OF NO FURTHER ACTION UNDER THIS SECTION MEANS THAT
16 NO FURTHER ACTION SHALL BE TAKEN BY THE DEPARTMENT UNDER THIS TITLE TO
17 REMEDIATE OR REQUIRE REMEDIATION OF THE SITE OR PORTION OF THE SITE COVERED
18 BY THE NO FURTHER ACTION DETERMINATION, UNLESS THE NO FURTHER ACTION
19 DETERMINATION IS RESCINDED OR AMENDED PURSUANT TO SUBSECTION F OF THIS
20 SECTION. A NO FURTHER ACTION DETERMINATION UNDER THIS SECTION DOES NOT
21 RELEASE OR DISCHARGE ANY PERSON FROM LIABILITY UNDER THIS TITLE OR ANY OTHER
22 LAW FOR A RELEASE OF CONTAMINANTS NOT COVERED BY THE WORK PLAN APPROVED
23 PURSUANT TO SECTION 49-177 OR OUTSIDE THE BOUNDARY OF THE SITE OR PORTION OF
24 THE SITE COVERED BY THE DETERMINATION. A DETERMINATION OF NO FURTHER ACTION
25 SHALL NOT PRECLUDE THE DIRECTOR FROM OBTAINING ACCESS TO THE AREA COVERED BY
26 THE DETERMINATION UNDER THIS SECTION OR ANY OTHER LAW.

27 49-182. Approval of remediations for cost recovery

28 ANY WORK NECESSARY TO CONDUCT REMEDIATION PURSUANT TO THIS ARTICLE MAY
29 QUALIFY AS A REMEDIAL ACTION FOR PURPOSES OF SECTION 49-285. ANY PERSON MAY
30 SUBMIT A REQUEST TO THE DEPARTMENT FOR APPROVAL OF A REMEDIAL ACTION FOR
31 PURPOSES OF SECTION 49-285 BY FILING AN APPLICATION IN ACCORDANCE WITH THE
32 RULES ADOPTED PURSUANT TO SECTION 49-282.06. A REQUEST MAY BE COMBINED WITH
33 ANY APPLICATION PURSUANT TO THIS ARTICLE, AND THE DEPARTMENT SHALL BE
34 REIMBURSED FOR THE COST OF REVIEWING THE APPLICATION AS PROVIDED IN THIS
35 ARTICLE. THE DIRECTOR'S APPROVAL UNDER THIS SECTION IS NOT REQUIRED TO
36 PRESERVE ANY RIGHT TO RECOVER REMEDIAL COSTS UNDER SECTION 49-285.

37 49-183. Insurance

38 INSURANCE COVERAGE SHALL NOT BE DENIED AN INSURED SOLELY ON THE BASIS
39 OF THE INSURED'S PARTICIPATION IN THE VOLUNTARY REMEDIATION PROGRAM PURSUANT
40 TO THIS ARTICLE OR CHAPTER 2, ARTICLE 5 OF THIS TITLE.

41 49-184 Reservation of rights

42 A. NOTHING IN THIS ARTICLE MAY BE CONSTRUED TO ABRIDGE OR ALTER ANY
43 RIGHT A PERSON MAY HAVE TO ENGAGE IN REMEDIAL ACTION PURSUANT TO OTHER
44 PROVISIONS OF THIS TITLE OR ANY OTHER PROVISIONS OF STATUTORY OR COMMON LAW.

45 B. NOTHING IN THIS ARTICLE MAY BE CONSTRUED TO ABRIDGE OR ALTER THE
46 DEPARTMENT'S AUTHORITY TO RECOVER PENALTIES OR TO TAKE ANY ACTION AUTHORIZED

1 BY LAW FOR ANY VIOLATION OF THIS TITLE, EXCEPT THAT THE DEPARTMENT SHALL NOT
2 TAKE AN ACTION TO COMPEL REMEDIAL ACTION OR CORRECTIVE ACTION THAT IS THE
3 SUBJECT OF AN APPLICATION APPROVED PURSUANT TO THIS ARTICLE UNLESS THE
4 APPROVAL IS WITHDRAWN OR TERMINATED PURSUANT TO SECTION 49-178.

5 C. UNLESS A REMEDY IS SELECTED IN ACCORDANCE WITH THE RULES ADOPTED
6 PURSUANT TO SECTION 49-282.06, THE AFFIRMATIVE DEFENSE UNDER SECTION 49-262,
7 SUBSECTION F APPLIES ONLY TO THE SITE OR PORTION OF THE SITE WHERE
8 REMEDIATION IS OR WILL BE CONDUCTED PURSUANT TO A WORK PLAN APPROVED PURSUANT
9 TO THIS ARTICLE.

10 49-185. Appeals and dispute resolution

11 A. UNDER THIS ARTICLE, ONLY THE DENIAL OR RESCISSION OF A NO FURTHER
12 ACTION DETERMINATION IS AN APPEALABLE AGENCY ACTION AS DEFINED IN SECTION
13 41-1092, A CONTESTED CASE AS DEFINED IN SECTION 41-1001, OR AN ACTION AGAINST
14 A PARTY AS DEFINED IN SECTION 41-1092.12.

15 B. IN A DISPUTE CONCERNING AN ISSUE OF GEOLOGIC, HYDROLOGIC, CHEMICAL,
16 BIOLOGICAL OR OTHER SCIENTIFIC INTERPRETATION UNDER THIS ARTICLE, THE
17 APPLICANT MAY REQUEST DISPUTE RESOLUTION UNDER THIS SUBSECTION. THE
18 APPLICANT AND THE DEPARTMENT SHALL SEEK IN GOOD FAITH TO RESOLVE THE DISPUTE
19 INFORMALLY. IF THE DISPUTE CANNOT BE RESOLVED INFORMALLY WITHIN THIRTY DAYS,
20 THE APPLICANT MAY SUBMIT A WRITTEN STATEMENT DESCRIBING THE DISPUTE, THE
21 APPLICANT'S PROPOSED RESOLUTION AND ANY SUPPORTING INFORMATION TO THE
22 DEPARTMENT WITHIN TWENTY DAYS AFTER THE END OF INFORMAL DISPUTE RESOLUTION.
23 WITHIN THIRTY DAYS AFTER RECEIPT OF THE APPLICANT'S WRITTEN STATEMENT, THE
24 DEPARTMENT SHALL DELIVER OR MAIL A WRITTEN RESPONSE TO THE APPLICANT. THE
25 APPLICANT'S STATEMENT AND THE DEPARTMENT'S RESPONSE MAY THEN BE SUBMITTED TO
26 A QUALIFIED PROFESSIONAL OTHER THAN A PROFESSIONAL RETAINED BY THE APPLICANT
27 OR AN EMPLOYEE OF THE DEPARTMENT. THE DEPARTMENT SHALL MAINTAIN A LIST OF
28 QUALIFIED PROFESSIONALS WHO MAY BE SELECTED TO PERFORM A REVIEW UNDER THIS
29 SUBSECTION. THE PROFESSIONAL SHALL REVIEW THE MATTER AND PROVIDE A
30 RECOMMENDED RESOLUTION TO THE DIRECTOR WITHIN THIRTY DAYS AFTER RECEIPT OF
31 THE INFORMATION REGARDING THE DISPUTE. THE APPLICANT SHALL PAY THE COST OF
32 THE REVIEW. WITHIN FORTY-FIVE DAYS AFTER RECEIPT OF THE PROFESSIONAL'S
33 RECOMMENDATIONS, THE DIRECTOR SHALL SELECT THE APPLICANT'S, THE DEPARTMENT'S
34 OR THE PROFESSIONAL'S PROPOSED RESOLUTION OF THE DISPUTE AND SHALL ISSUE A
35 WRITTEN EXPLANATION OF THE DECISION. DEADLINES UNDER THIS SUBSECTION MAY BE
36 EXTENDED BY AGREEMENT OF THE PARTIES.

37 C. ANY DISPUTE BETWEEN AN APPLICANT AND THE DEPARTMENT THAT ARISES
38 UNDER THIS ARTICLE MAY BE RESOLVED AS PROVIDED IN THIS SUBSECTION. BEFORE
39 MAKING ANY REQUEST UNDER THIS SUBSECTION, THE APPLICANT AND THE DEPARTMENT
40 SHALL SEEK IN GOOD FAITH TO RESOLVE THE DISPUTE INFORMALLY. IF THE DISPUTE
41 CANNOT BE RESOLVED IN THIRTY DAYS, THE APPLICANT MAY SUBMIT A WRITTEN
42 STATEMENT DESCRIBING THE DISPUTE AND THE APPLICANT'S PROPOSED RESOLUTION OF
43 THE DISPUTE TO THE DEPARTMENT WITHIN THIRTY DAYS AFTER CONCLUSION OF THE
44 INFORMAL DISPUTE RESOLUTION. WITHIN FORTY-FIVE DAYS AFTER RECEIPT OF THE
45 APPLICANT'S STATEMENT, THE DEPARTMENT SHALL DELIVER OR MAIL A WRITTEN
46 RESPONSE TO THE APPLICANT PROPOSING A RESOLUTION OF THE DISPUTE. THE

1 APPLICANT MAY SUBMIT A WRITTEN REQUEST FOR A DECISION ON THE DISPUTE BY THE
2 DIRECTOR. WITHIN TWENTY DAYS AFTER RECEIPT OF THE APPLICANT'S PROPOSAL, THE
3 DIRECTOR SHALL SELECT THE APPLICANT'S OR THE DEPARTMENT'S PROPOSED RESOLUTION
4 OF THE DISPUTE AND SHALL ISSUE A WRITTEN EXPLANATION OF THE DECISION.
5 DEADLINES UNDER THIS SUBSECTION MAY BE EXTENDED BY AGREEMENT OF THE PARTIES.

6 D. A DISPUTE REGARDING BILLINGS BY THE DEPARTMENT FOR REIMBURSEMENT OF
7 COSTS PURSUANT TO SECTION 49-179 SHALL BE RESOLVED PURSUANT TO SUBSECTION C
8 OF THIS SECTION. ANY DISPUTE REGARDING A BILLING SHALL BE RAISED IN WRITING
9 WITHIN THIRTY DAYS AFTER A BILL IS RECEIVED. THE DEPARTMENT SHALL NOT
10 REQUIRE PAYMENT OF THE DISPUTED PORTION OF THE BILL TO INVOKE DISPUTE
11 RESOLUTION. THE DEPARTMENT SHALL NOT TERMINATE AN APPLICATION PURSUANT TO
12 SECTION 49-178 FOR NONPAYMENT OF A DISPUTED PORTION OF A BILL WHILE DISPUTE
13 RESOLUTION IS BEING CONDUCTED UNTIL AFTER THE DIRECTOR ISSUES A DECISION.

14 49-186. Rules; program termination; no licensing

15 A. THE DEPARTMENT SHALL ADOPT RULES AS NECESSARY TO IMPLEMENT SECTION
16 49-179. THE ADOPTION OF RULES UNDER THIS SECTION IS NOT A PREREQUISITE FOR
17 IMPLEMENTATION OF THIS ARTICLE.

18 B. THE PROGRAM ESTABLISHED BY THIS ARTICLE ENDS ON JULY 1, 2010
19 PURSUANT TO SECTION 41-3102.

20 C. TITLE 41, CHAPTER 6, ARTICLE 7.1 AND SECTION 41-1009 DO NOT APPLY
21 TO THIS ARTICLE.

22 49-187. Voluntary remediation fund

23 A. THE VOLUNTARY REMEDIATION FUND IS ESTABLISHED. THE DIRECTOR SHALL
24 ADMINISTER THE FUND. THE FUND CONSISTS OF MONIES FROM THE FOLLOWING SOURCES:

- 25 1. FEES COLLECTED PURSUANT TO SECTION 49-179.
- 26 2. COSTS REIMBURSED TO THE DEPARTMENT PURSUANT TO SECTION 49-179.
- 27 3. GIFTS, GRANTS AND DONATIONS.
- 28 4. LEGISLATIVE APPROPRIATIONS.
- 29 5. UNTIL JULY 1, 2004, THE WATER QUALITY ASSURANCE REVOLVING FUND
30 PURSUANT TO SECTION 49-282, SUBSECTION E, PARAGRAPH 10, PROVIDED THAT NO MORE
31 THAN THREE HUNDRED FIFTY THOUSAND DOLLARS SHALL BE TRANSFERRED FROM THE WATER
32 QUALITY ASSURANCE REVOLVING FUND TO THE VOLUNTARY REMEDIATION FUND IN ANY
33 FISCAL YEAR.

34 B. MONIES IN THE FUND ARE CONTINUOUSLY APPROPRIATED AND ARE EXEMPT
35 FROM THE PROVISIONS OF SECTION 35-190 RELATING TO LAPSING OF
36 APPROPRIATIONS. ON NOTICE FROM THE DIRECTOR, THE STATE TREASURER SHALL
37 INVEST AND DIVEST MONIES IN THE FUND AS PROVIDED BY SECTION 35-313, AND
38 MONIES EARNED FROM INVESTMENT SHALL BE CREDITED TO THE FUND.

39 C. MONIES IN THE VOLUNTARY REMEDIATION FUND SHALL BE USED FOR THE
40 FOLLOWING PURPOSES:

- 41 1. FOR ALL REASONABLE AND NECESSARY COSTS TO IMPLEMENT THIS ARTICLE.
- 42 2. FOR THE REASONABLE AND NECESSARY COSTS OF ADMINISTERING THE FUND.

1 49-188. Department access to private property

2 A REPRESENTATIVE OF THE DEPARTMENT WHO ENTERS PRIVATE PROPERTY PURSUANT
3 TO THIS ARTICLE OR PURSUANT TO AN AGREEMENT ENTERED INTO PURSUANT TO THIS
4 ARTICLE SHALL:

5 1. ON ENTRY OF THE PREMISES, PRESENT PHOTOGRAPHIC IDENTIFICATION AND
6 STATE THE PURPOSE FOR THE INSPECTION.

7 2. ALLOW AN AUTHORIZED REPRESENTATIVE OF THE OWNER TO ACCOMPANY THE
8 DEPARTMENT REPRESENTATIVE, EXCEPT DURING CONFIDENTIAL INTERVIEWS. IF THE
9 DEPARTMENT HAS REASON TO BELIEVE THAT NO ON-SITE REPRESENTATIVE OF THE OWNER
10 WILL BE PRESENT AT A SITE AT THE TIME OF AN INSPECTION, THE DEPARTMENT SHALL
11 MAKE REASONABLE EFFORTS TO PROVIDE NOTICE SUFFICIENT TO ALLOW A REPRESENTATIVE
12 OF THE OWNER TO BE PRESENT DURING THE INSPECTION.

13 3. PROVIDE NOTICE OF THE RIGHT TO HAVE:

14 (a) COPIES OF ANY ORIGINAL DOCUMENTS TAKEN BY THE DEPARTMENT
15 REPRESENTATIVE DURING THE INSPECTION IF THE REPRESENTATIVE IS PERMITTED BY
16 LAW TO TAKE ORIGINAL DOCUMENTS.

17 (b) A SPLIT OF ANY SAMPLES TAKEN DURING THE SITE VISIT IF THE SPLIT
18 WOULD NOT PROHIBIT AN ANALYSIS FROM BEING CONDUCTED OR RENDER AN ANALYSIS
19 INCONCLUSIVE.

20 (c) COPIES OF ANY ANALYSES PERFORMED ON SAMPLES TAKEN DURING THE
21 INSPECTION.

22 4. INFORM EACH PERSON INTERVIEWED DURING THE INSPECTION THAT
23 STATEMENTS MADE BY THE PERSON MAY BE INCLUDED IN THE INSPECTION REPORT.

24 5. INFORM EACH PERSON WHOSE CONVERSATION WITH THE REPRESENTATIVE
25 DURING THE INSPECTION IS TAPE RECORDED THAT THE CONVERSATION IS BEING
26 RECORDED.

27 6. PROMPTLY NOTIFY THE APPLICANT IN WRITING OF ANY INCONSISTENCIES OR
28 DEFICIENCIES NOTED DURING THE INSPECTION.

29 Sec. 7. Repeal

30 Section 49-282.05, Arizona Revised Statutes, is repealed.

31 Sec. 8. Title 49, chapter 2, article 5, Arizona Revised Statutes, is
32 amended by adding a new section 49-282.05, to read:

33 49-282.05. Agreements for work; suspension of remedial action

34 A. THE DEPARTMENT MAY ENTER INTO AN AGREEMENT WITH ANY PERSON TO
35 PERFORM WORK AT A SITE ON THE SITE REGISTRY IF THE WORK WILL BE CONDUCTED IN
36 ACCORDANCE WITH THE RULES ADOPTED PURSUANT TO SECTION 49-282.06. THE TERMS
37 AND CONDITIONS OF THE AGREEMENT MAY INCLUDE A SUSPENSION OF ANY REMEDIAL
38 ACTION BY THE DIRECTOR AT THE SITE TO THE EXTENT DETERMINED BY THE DIRECTOR
39 TO BE APPROPRIATE. THE SUSPENSION SHALL BE SPECIFICALLY STATED IN THE
40 AGREEMENT OR THE APPROVAL OF WORK UNDER THE AGREEMENT AND SHALL CONTINUE AS
41 LONG AS THE PERSON IS IN COMPLIANCE WITH THE AGREEMENT.

42 B. AS A CONDITION OF AN AGREEMENT UNDER THIS SECTION, THE DEPARTMENT
43 MAY REQUIRE THE PERSON CONDUCTING THE WORK TO REIMBURSE THE DIRECTOR FOR THE
44 REASONABLE AND NECESSARY COSTS INCURRED IN REVIEWING AND OVERSEEING THE WORK,
45 INCLUDING COSTS CONSISTING OF SALARIES AND BENEFITS PAID TO STATE EMPLOYEES
46 AND OTHER DIRECT AND INDIRECT COSTS. A PERSON WHO REIMBURSES THE DEPARTMENT

1 FOR COSTS PURSUANT TO THIS SUBSECTION MAY RECOVER THOSE COSTS IN ANY ACTION
2 BROUGHT PURSUANT TO SECTION 49-285, SUBSECTION H.

3 Sec. 9. Section 49-282.06, Arizona Revised Statutes, is amended to
4 read:

5 49-282.06. Remedial action criteria; rules

6 A. Remedial actions shall:

7 1. Assure the protection of public health and welfare and the
8 environment.

9 2. To the extent practicable, provide for the control, management or
10 cleanup of the hazardous substances ~~so as~~ IN ORDER to allow the maximum
11 beneficial use of the waters of the state.

12 3. Be reasonable, necessary, cost-effective and technically feasible.

13 B. The director shall adopt rules necessary to implement this article.
14 The director may adopt CERCLA rules, guidelines or procedures by reference to
15 the extent consistent with this article. Rules adopted pursuant to this
16 subsection shall include rules for:

17 1. The use of monies from the fund, including establishing priorities
18 for the use of the monies from the fund.

19 2. The scoring and rescoring of sites or portions of sites.

20 3. The criteria for a finding of no further action for sites pursuant
21 to section 49-287.01.

22 4. The selection of remedial actions including the establishment of
23 the level and extent of cleanup at a site or a portion of a site. The rules
24 shall provide for the selection of a remedial action by comparison of
25 alternative remedial actions, which may include no action, monitoring, source
26 control, controlled migration, physical containment, plume remediation and
27 the consideration of the criteria in subsection C of this section. The rules
28 also shall provide that the selected remedial action meet the requirements of
29 subsection A of this section and the following:

30 (a) For remediation of soil, the selected remedial action shall be
31 consistent with the soil remediation standards adopted pursuant to section
32 49-152.

33 (b) For remediation of waters of the state, the selected remedial
34 action shall address, at a minimum, any well that at the time of selection of
35 the remedial action either supplies water for municipal, domestic,
36 industrial, irrigation or agricultural uses or is part of a public water
37 system if the well would now or in the reasonably foreseeable future produce
38 water that would not be fit for its current or reasonably foreseeable end
39 uses without treatment due to the release of hazardous substances. The
40 specific measures to address any such well shall not reduce the supply of
41 water available to the owner of the well.

42 5. Incentives for initiating early remedial actions, ~~AND~~ implementing
43 innovative remedial technologies ~~and initiating voluntary remedial actions.~~

44 C. In adopting the rules required by this section and in selecting
45 remedial actions, the director shall consider the following factors:

46 1. Population, environmental and welfare concerns at risk.

1 2. Routes of exposure.

2 3. Amount, concentration, hazardous properties, environmental fate,
3 such as the ability to bioaccumulate, persistence and probability of reaching
4 the waters of the state, and the form of the substance present.

5 4. Physical factors affecting human and environmental exposure such as
6 hydrogeology, climate and the extent of previous and expected migration.

7 5. The extent to which the amount of water available for beneficial
8 use will be preserved by a particular type of remedial action.

9 6. The technical practicality and cost-effectiveness of alternative
10 remedial actions applicable to a site.

11 7. The availability of other appropriate federal or state remedial
12 action and enforcement mechanisms, including, to the extent consistent with
13 this article, funding sources established under CERCLA, to respond to the
14 release.

15 D. Notwithstanding this article, the director may approve a remedial
16 action that may result in water quality exceeding water quality standards
17 after the completion of the remedy if the director finds that the remedial
18 action meets the requirements of this section.

19 E. The director's approval pursuant to this section does not affect
20 the classification of an aquifer pursuant to section 49-224.

21 F. Remedial actions required by this article shall be consistent with
22 the requirements of title 45, chapter 2, except as provided in section
23 49-290.01.

24 Sec. 10. Section 49-285, Arizona Revised Statutes, is amended to read:

25 49-285. Liability for remedial actions costs: limitation of
26 actions

27 A. Except as otherwise provided in section 49-283, a person who is a
28 responsible party shall be strictly and severally liable for such reasonable,
29 necessary and cost-effective expenditures for remedial actions as are
30 incurred by this state, a political subdivision of this state or any other
31 person in a manner consistent with the rules and procedures adopted under
32 section 49-282.06, but not including nonrecoverable costs. A responsible
33 party may be held liable for remedial action costs for a release of a
34 hazardous substance even though the conduct that resulted in the release or
35 the release itself occurred before August 13, 1986.

36 B. In order to preserve any right to recover remedial action costs
37 from responsible parties, remedial actions conducted by this state, a
38 political subdivision of this state or any other person shall when evaluated
39 as a whole be in substantial compliance with the rules and procedures adopted
40 pursuant to section 49-282.06. The director's approval of a remedial action
41 that is conducted by a person other than the state is not required to
42 preserve any right to recover remedial action costs from potentially
43 responsible parties. Any person other than the state who undertakes a
44 remedial action may request that the director approve the remedial action **AS**
45 **PRESCRIBED BY RULES ADOPTED PURSUANT TO SECTION 49-282.06** at any time before,
46 during or after the remedial action. The director's decision shall be in

1 writing and shall specify the basis of the decision. Any remedial action so
2 approved by the director shall be deemed to be in substantial compliance with
3 the rules and procedures adopted pursuant to section 49-282.06. Any person
4 who requests the director's approval of a remedial action shall reimburse the
5 department for the total reasonable cost to the department for the review of
6 the remedial action unless the director waives all or a part of the
7 reimbursement. These monies shall be deposited in the water quality
8 assurance revolving fund established by section 49-282. Costs that are
9 reimbursed to the department by a party that obtains the director's approval
10 of remedial actions pursuant to this subsection constitute remedial action
11 costs that may be recovered from responsible parties.

12 C. Any person who is a defendant in an enforcement proceeding brought
13 under section 49-287 may join in the action any other person who is or may be
14 a responsible party.

15 D. Except as prescribed by section 49-283.01, this article does not
16 affect or modify in any way the obligations or liability of any person, by
17 reason of subrogation or otherwise, under any other provision of state or
18 federal law, including common law, for damages, injury or loss resulting from
19 a release of any hazardous substance or for remedial action costs, except
20 that any person who receives compensation for remedial action costs pursuant
21 to this article is precluded from recovering compensation for the same
22 remedial action costs pursuant to any other federal or state law. Any person
23 who receives compensation for remedial action costs pursuant to any other
24 federal or state law is precluded from receiving compensation for the same
25 remedial action costs as provided in this article.

26 E. In allocating several liability between two or more potentially
27 responsible parties, the department, an allocator pursuant to section
28 49-287.06 or a court shall consider the following to determine each
29 responsible party's allocated shares and the orphan shares:

- 30 1. The amount and concentration of each hazardous substance involved.
- 31 2. The degree of toxicity of each hazardous substance involved.
- 32 3. The degree of involvement by the responsible parties in the
33 generation, transportation, treatment, storage or disposal of the hazardous
34 substance.

35 F. After the allocated shares and the orphan shares are determined
36 pursuant to subsection E of this section and reduced to writing, the
37 department, an allocator or the court may consider the following factors to
38 adjust the allocated shares of the responsible parties, except that any
39 adjustment under this subsection shall not adjust the amount allocated to
40 orphan shares:

- 41 1. The magnitude of the risk to human health or the environment caused
42 by each hazardous substance involved.
- 43 2. The degree of cooperation by the responsible party with federal,
44 state or local officials to prevent any harm to the public health or the
45 environment.

1 3. Any other factors deemed relevant by the department, an allocator
2 or the court in determining the liability of the parties under this section.

3 G. An action brought by a person other than the state to recover
4 remedial action costs from a responsible party shall be brought within three
5 years of the completion of the remedial action or within six years of the
6 initiation of on-site physical construction activities for the remediation,
7 removal or disposal of hazardous substances, whichever is earlier.

8 H. In an action brought for recovery of remedial action costs incurred
9 at a site not on the registry maintained pursuant to section 49-287.01 or
10 that is brought pursuant to section 49-287.07, subsection A, paragraph 3,
11 subdivision (a), (b) or (d), the court shall initially allocate costs among
12 the responsible parties based on the factors listed in subsection E of this
13 section. To the extent that the allocation results in costs being allocated
14 to orphan shares, those costs shall be reallocated to the responsible parties
15 based on such equitable factors as the court deems appropriate, including:

16 1. The factors listed in subsection F of this section.

17 2. Each responsible party's ability to pay.

18 3. The degree of care exercised by each responsible party with respect
19 to the hazardous substance of concern and taking into account the
20 characteristics of that substance.

21 Sec. 11. Voluntary remediation program intent

22 A. The legislature recognizes that in various circumstances certain
23 federal and state laws, rules and regulations impose a legal liability and
24 obligation on parties to investigate and remediate environmental property
25 damage. It is the intent of this act to establish a remediation program that
26 encourages actions that will reduce the risk to public health and the
27 environment and that allows contaminated sites to be remediated more quickly,
28 with lower transaction costs and with more cooperation between the
29 department, private parties and the public.

30 B. The legislature finds that there are many insurance coverage
31 disputes involving insureds who face potential liability for their ownership
32 of or roles at contaminated sites in this state. This state has a
33 substantial public interest in promoting the fair and efficient resolution of
34 environmental claims while encouraging voluntary compliance and regulatory
35 cooperation.

36 C. It is the intent of this act to ensure an appropriate level of
37 departmental supervision and public participation so that remedial actions
38 conducted under this program address relevant cleanup criteria and any public
39 concerns.

40 Sec. 12. Adequacy of funding for the voluntary remediation
41 program; report; suspension; termination

42 A. The department of environmental quality shall prepare and submit a
43 report to the governor, the president of the senate and the speaker of the
44 house of representatives evaluating the adequacy of funding for the voluntary
45 remediation program established pursuant to title 49, chapter 1, article 5,
46 Arizona Revised Statutes, as added by this act. The report shall be

1 submitted on or before December 1, 2002 and shall include an evaluation of
2 whether the fees and reimbursements collected pursuant to section 49-179,
3 Arizona Revised Statutes, as added by this act, are sufficient to sustain the
4 program or whether some other source is necessary to sustain administration
5 of the program.

6 B. If the fees and reimbursements collected pursuant to section
7 49-179, Arizona Revised Statutes, are not sufficient to sustain the program
8 and another source to sustain administration of the program is not obtained
9 by July 1, 2004, the department of environmental quality shall no longer
10 implement the voluntary remediation program.

11 C. If monies in the voluntary remediation fund pursuant to section
12 49-187, Arizona Revised Statutes, as added by this act, are inadequate to
13 administer the program, the review of pending applications is suspended, no
14 new applications will be accepted and the time frame for the review of
15 pending applications is tolled.

16 Sec. 13. Interim rules; expedited process

17 A. Notwithstanding title 41, chapter 6, article 3, Arizona Revised
18 Statutes, the director of the department of environmental quality shall adopt
19 the rules required by section 49-152, subsection H, Arizona Revised Statutes,
20 as amended by this act, and section 49-158, subsection G and section 49-179,
21 subsections A and C, Arizona Revised Statutes, as added by this act, as
22 interim rules by submitting the text of the rules to the office of the
23 secretary of state for publication in the Arizona administrative register,
24 and the secretary of state shall publish the rules. The director shall
25 provide for reasonable notice and at least one public hearing on the proposed
26 interim rules. The rules become effective no earlier than the thirtieth day
27 after the last public hearing.

28 B. Within ninety days after the director of the department of
29 environmental quality files the interim rules with the secretary of state,
30 the director shall file notice of docket opening for the permanent rule
31 making. The notice of proposed rule making for the permanent rules shall be
32 filed with the secretary of state within thirty days after the filing of the
33 notice of docket opening. The rules published pursuant to subsection A of
34 this section expire and are automatically repealed on the date that the
35 permanent rules become effective.

36 Sec. 14. Applicability of insurance provision

37 Section 49-183, Arizona Revised Statutes, as added by this act, applies
38 only to causes of action and civil actions filed after the effective date of
39 this act.

40 Sec. 15. Delayed repeal

41 Section 49-104, Arizona Revised Statutes, as amended by Laws 1997,
42 chapter 49, section 6, chapter 287, section 17 and chapter 296, section 1 and
43 section 1 of this act, is repealed from and after December 31, 2000.

44 Sec. 16. Effective date

S.B. 1454

1 Section 49-104, Arizona Revised Statutes, as amended by Laws 1999,
2 chapter 26, section 3 and section 2 of this act, is effective from and after
3 December 31, 2000.

APPROVED BY THE GOVERNOR APRIL 10, 2000.

FILED IN THE OFFICE OF THE SECRETARY OF STATE APRIL 10, 2000.

D-12.

DEPARTMENT OF ENVIRONMENTAL QUALITY

Title 18, Chapter 9

Amend: R18-9-101

New Section: R18-9-A215

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 22, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 9

New Section: R18-9-A215

Amend: R18-9-101

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend one (1) rule and add one (1) rule in Title 18, Chapter 9, regarding Aquifer Water Quality Standards.

Specifically, the amended rule will be to add the defined term of "New or adjusted aquifer water quality standard" or "New or adjusted AWOS" and to amend other definitions to accommodate the addition of the new term.

The new rule R18-9-A215 is intended to create a process for Aquifer Protection Permit (APP) holders to implement new or adjusted aquifer water quality standards (AWQS), and to update their permits with these new standards. The Department has indicated when either the Department adopts new or amends existing AWQSs there is no process in place for when an APP holder has to comply with the new standards or what steps they need to take to begin compliance. The Department has also indicated that these rules, while primarily impacting APP holders, may impact some remediation projects as well.

The new rule will cover both permit holder and Department responsibilities. The Department will be required to issue schedules for amending permits for new adjusted AWQSs and permit holders will be required to submit a complete application within that scheduled timeframe. An APP holder is expected to begin baseline monitoring within three months of the Department approving a new or amended AWQS. The Department indicated that this timeframe has caused some concern with stakeholders and that APP holders can apply for an alternative timeframe upon a showing of reasonable cause that the three month time period cannot be reached. The Department has also indicated that the new rule will detail what is required for baseline monitoring and what is required in the baseline monitoring report that is sent to the Department. Additionally, permit holders will be provided an opportunity to show why certain pollutants may not exist in their facilities and may receive an exemption from testing. The Department expects the cost for the new rule to be approximately \$15,000 for APP holders. There are 500 APP holders in the state.

The Department has indicated that they received a total 63 public comments regarding these rules, and the Department has indicated to Council Staff that these stakeholders were able to view and discuss the changes that were made as a result of these comments.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates it did not review any study relevant to this rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Department states that this rulemaking is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to establish a clear procedure for implementation of new or adjusted Aquifer Water Quality Standards (AWQS) to the issued and existing individual Aquifer Protection Permits (APP). The Department says that before this rulemaking, such implementation was unaddressed and unclear. The Department states that the new or adjusted Aquifer Water Quality Standards (AWQS) are added to an existing list when the Federal Environmental Protection Agency (EPA) establishes new or adjusts existing Safe Drinking Water Act Maximum Contaminant Levels (MCL). The Department indicates that the AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (see A.R.S. § 49-224(B)).

The Department states the AWQs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the voluntary Remediation Program (VRP), and elsewhere.

The Department states that the full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, and, to a lesser extent, regulated parties under certain remediation projects, such as WQARF and VRP. The Department indicates that while not all costs and benefits are borne evenly, these are the identified groups generally impacted from this "AWQS Implementation" rulemaking. The Department believes a general benefit is provided to the State of Arizona and its constituents, due to this rulemaking's functional part in protecting the state's aquifers, allowing them to remain a viable asset to community water portfolios and individual well users alike.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states it worked closely with stakeholders in the development of this new or adjusted AWQS implementation rule, focusing on the goal of clarity in administration and expectation for the Department and the applicable permittees, respectively. The Department indicates that neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement those new or adjusted AWQs into the existing and issued permits. The Department says for that reason ADEQ receive overwhelming support for this clarifying rule from the regulated parties. The Department states that after years of drafting, editing and stakeholder feedback ADEQ believes the structure of this rule properly balances the agency's mission of protecting public health and the environment with any requisite costs to stakeholders.

6. What are the economic impacts on stakeholders?

The Department says general costs to permittees as a result of this new or adjusted AWQS implementation rule are likely minimal, potentially significant and indeterminate at this time. The Department states that benefits to stakeholders include significant clarity in administering and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQs are to be implemented into existing and issued permits. The Department indicates that applicable permittees will be required to conduct Baseline Monitoring at discharge and groundwater monitoring locations, which could come at a considerable cost. The Department says, however, permittees will have much of the infrastructure to conduct this monitoring already in place, as the rule requires monitoring to occur at existing established locations. In addition, with that said, the Department estimates that the analytical laboratory fees for applicable permittees will cost \$4,500 for eight monitoring events for all seven of the new or adjusted AWQs at one monitoring location. The Department estimates that monitoring equipment could cost

around \$1,500 which includes rental for a water quality meter, meter and depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The Department estimates the employee labor costs at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. The Department states that this was estimated to cost \$5,600 for all eight monitoring events. Then the Department estimated the employee labor costs for preparing the Baseline Monitoring

Report with a request to establish Alert Levels, Discharge Limitations and/or Aquifer Quality Limits for all seven parameters. The Department indicates that this effort includes a draft report, internal review, final report edits, and submission by the permittee to the Department. The Department states that the employee effort for the Baseline Monitoring Report was estimated at \$3,400. The Department estimates that altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for an estimated total of \$15,000. The Department believes that although many facilities will absorb the additional work load and infrastructure/incidental needed into their existing labor force and equipment on site, certain permittees may need to acquire additional employees to help achieve the requirements.

The Department believes there should be little to no cost to private persons and consumers as this rule compels permittees to conduct Baseline Monitoring for all new or adjusted AWQSSs. The Department says it is conceivable that a Wastewater Treatment Plant may increase the rates in their service area as a result of the requirement to conduct Baseline Monitoring, but that would be a relatively small amount due to the cost estimates projected for Baseline Monitoring.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates that there were changes between the proposed draft and final rules before the Council. The changes can be found in full at pg.(13-23) of the NFR preamble, and the comments with responses are attached as part of the materials.

For R18-9-101, the Department made strictly grammatical changes with the exception of updating a cross reference.

For R18-9-A215, the Department made changes that went beyond grammatical changes. These changes were mostly a result of stakeholder input. Council staff reviewed the NPR and the NFR, and do not consider these changes to be substantively different because the persons affected by the rule understood why these changes were made, the subject matter did not change, and the effects of the rule do not appear to change.

Council staff does not believe these changes make the current rules in the Notice of Final Expedited Rulemaking substantially different from the proposed rules in the Notice of Proposed

Expedited Rulemaking pursuant to A.R.S. § 41-1025.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals? Pg 23-57

The Department indicates it received 63 public comments as it relates to this rulemaking, with 55 of those comments resulting in revisions to the rules. The Department indicates that they conducted stakeholder meetings on 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, and 2/20/25. The Department has also indicated to Council staff that stakeholders were able to review and comment on changes made as a result of these 63 comments. These comments and their responses can be found in the NFR in Item 12, pgs. (23-57). The comments were made by utilities, interest groups, and industry stakeholders.

The four most common concerns were:

- **Baseline Reporting Requirements:** The language in the NPR required APP holders to submit reports during the entirety of the baseline reporting period, which stakeholders stated were overly burdensome. The Department agreed and removed this language and clarified that a baseline monitoring report must be submitted at the conclusion of the three month implementation period.
- **Baseline Monitoring Time Period:** Stakeholders were concerned with the three month effective date for when APP holders must begin monitoring for new or revised AWQS. The Department responded by adding language to the rule for an alternative timeframe if an APP holders shows a reasonable reason for why additional time is needed. Additionally, the Department has indicated to Department staff that because AWQS come from EPA rulemaking activities, APP holders are made aware of the possibility of new or amended AWQS when the EPA begins its rulemaking. The Department has indicated to Department staff that between EPA rulemaking and Department rulemaking, all stakeholders would effectively have at least a year's notice of potential changes.
- **Sampling Conducted if No Department of Health Services (DHS) approved method:** Stakeholders raised concerns that DHS may not have implemented rules for testing for certain pollutants. The Department clarified that should DHS not have a testing method in place, stakeholders can either use an EPA approved method or another method approved by the Department.
- **Absence of Pollutants:** Stakeholders were concerned with the existing language regarding testing requirements for pollutants that would not be found in their facilities. The Department amended the rule to clarify the requirements for a not likely demonstration.

Council staff believes that the department adequately addressed the comments in accordance with A.R.S. § 41-1052(D)(7).

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

This specific rulemaking does not create a permit or a license.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates that the rules are not more stringent than federal law.

11. Conclusion

This regular rulemaking by the Department seeks to amend one rule and add one rule concerning the process that Aquifer Protection Permit (APP) holders need to do to receive a revised permit that considers the implementation of new or adjusted aquifer water quality standards (AWQS). Specifically, the Department will be creating a process for APP holders to show that they are in compliance with the new or amended AWQS, allowing APP holders to show that they need additional time to implement baseline reporting requirements, or if they need an alternative testing method.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

March 13, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Aquifer Water Quality Standards Update Regular Rulemaking: Title 18,
Environmental Quality, Chapters 9 and 11

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for May 6th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. §§ 41-1039, 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

- (A)(1)(a) The public record closed for all rules on December 16th, 2024 at 11:59 p.m.
- (A)(1)(b) The rulemaking activity does relate to a five-year review report. The report on 18 AAC 11, Articles 4 and 5 was approved on November 3rd, 2020.
- (A)(1)(c) The rulemaking activity does not establish a new fee.
- (A)(1)(d) The rulemaking does not contain a fee increase.
- (A)(1)(e) An immediate effective date is not requested.
- (A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- (A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3) (a) (see subheading IV, below).
- (A)(1)(h) A list of documents is enclosed (see subheading IV, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

- (A)(2) Five (5) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (*see* subheading IV, below);
- (A)(3) The preambles contain economic, small business, and consumer impact statements that contain the information required by A.R.S. § 41-1055 (*see* subheading IV, below);
- (A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (*see* subheading IV, below);
- (A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
- (A)(6) No materials were incorporated by reference in this rulemaking;
- (A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (*see* subheading IV, below);
- (A)(8) All statutes referred to in the definitions are represented in the general and specific statutes authorizing the rule.

III. Governor's office approvals pursuant to A.R.S. § 41-1039:

- (A) ADEQ received prior written approval from the Governor's Office twice. Once for Title 18, Chapter 11, Article 4 on August 24, 2022 and then again for Title 18, Chapter 9, Articles 1 and 2 on February 5th, 2024 (*see* subheading IV, below);
- (B) ADEQ received written final approval from the Governor's Office for this rulemaking on March 11th, 2025 (*see* subheading IV, below).

IV. List of documents enclosed (25 documents total):

- One (1) Cover Letter (R1-6-201(A)(1));
 - AWQS_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));
 - AWQS_JLBC.pdf
- Five (5) NFRMs (R1-6-201(A)(2));
 - AWQS_NFRM_18_AAC_9_Impl.pdf
 - AWQS_NFRM_18_AAC_11_As.pdf
 - AWQS_NFRM_18_AAC_11_U.pdf
 - AWQS_NFRM_18_AAC_11_DBP.pdf
 - AWQS_NFRM_18_AAC_11_MBC.pdf
- Five (5) EISs (R1-6-201(A)(3));
 - AWQS_EIS_18_AAC_9_Impl.pdf
 - AWQS_EIS_18_AAC_11_As.pdf
 - AWQS_EIS_18_AAC_11_U.pdf
 - AWQS_EIS_18_AAC_11_DBP.pdf
 - AWQS_EIS_18_AAC_11_MBC.pdf
- Five (5) Public Comments Received Documents (R1-6-201(A)(4));

- AWQS_Cmts_18_AAC_9_Impl.pdf
- AWQS_Cmts_18_AAC_11_As.pdf
- AWQS_Cmts_18_AAC_11_U.pdf
- AWQS_Cmts_18_AAC_11_DBP.pdf
- AWQS_Cmts_18_AAC_11_MBC.pdf
- Five (5) General and Specific Authorizing Statutes (R1-6-201(A)(7));
 - 49-104 - Powers and duties of the department and director.pdf
 - 49-203 - Powers and duties of the director and department.pdf
 - 49-221 - Water quality standards in general; protected surface waters list.pdf
 - 49-223 - Aquifer water quality standards.pdf
 - 49-224 - Aquifer identification, classification and reclassification.pdf
- Three (3) A.R.S. § 41-1039 Governor's Approvals
 - 8_24_22_Gov_Approval.pdf
 - 2_5_24_Gov_Approval.pdf
 - 25_3_11_Gov_Approval.pdf

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov if you have any questions.

Sincerely,

Karen Peters, Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING
TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

PREAMBLE

1. Permission to proceed with this proposed rulemaking was granted under A.R.S. § 41-1039 by the governor on:

August 24, 2022, &

February 5, 2024

2. Article, Part, or Section Affected (as applicable) Rulemaking Action

R18-9-101

Amend

R18-9-A215

New Section

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-104(B)(13), 49-203(A)(5), (A)(8), (A)(10), 49-221, 49-223, 49-224

Implementing statutes: A.R.S. §§ 49-221, 49-223

4. The effective date of the rule:

July 7, 2025

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3402, Issue Date: November 15, 2024, Issue Number: 46, File Number: R24-228.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2136, Issue Date: June 28, 2024, Issue Number: 26, File Number: R24-114.

6. The agency's contact person who can answer questions about the rulemaking:

Name: Jon Rezabek
Title: Legal Specialist
Division: Water Quality
Address: Arizona Department of Environmental Quality
1110 W. Washington Ave.
Phoenix, AZ 85007
Telephone: (602) 771-8219
Fax: (602) 771-2366
Email: awqs@azdeq.gov
Website: <https://www.azdeq.gov/awp-rulemaking>

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

General Explanation of this Rulemaking: The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. § 49-223(A) to open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSS) within one year of the Environmental Protection Agency's (EPA's) establishment of new or adjusted MCLs. AWQSS for Arsenic, Bromate, Chlorite, Haloacetic Acids, Microbiological Contaminants, Total Trihalomethanes and Uranium with corresponding MCLs are either unestablished as AWQSS or are established but currently have a misaligned value as the standard. In the four (4) associated *Notices of Final Rulemaking* (NFRM) for Title 18, Chapter 11, Article 4, ADEQ adopts the MCLs for the above listed contaminants or, in one case, an alternative MCL (Microbiological Contaminants). Please see the above-mentioned NFRMs for details.

Neither the AWQS statute at A.R.S. § 49-223, nor the rules that make up the Aquifer Protection Program (APP) address how ADEQ should implement new or adjusted AWQSS once the APP program is established. As of the writing of this NFRM, the APP has close to 500 individual permits, a majority of which have requirements for discharge and / or groundwater monitoring based on the AWQSS. In order to determine whether an amendment to an APP permit to effectuate the new or adjusted AWQSS is necessary (in accordance with A.R.S. § 49-243(B)) and to properly and orderly implement such a process, ADEQ proposes with this NFRM a new rule in Title 18, Chapter 9, Article 2 (Aquifer Protection Permits - Individual Permits) and a few new or adjusted associated definitions in Title 18, Chapter 9, Article 1 (Aquifer Protection Permits - General Provisions).

What are Aquifer Water Quality Standards and what is their purpose? Aquifer Water Quality Standards or "AWQSS" are protective groundwater standards that were put in place and designated by the Arizona Legislature to preserve Arizona's aquifer

quality for drinking water-protected use (see A.R.S. § 49-224(B)).

How are Aquifer Water Quality Standards Used? The AWQSs are used in ADEQ’s Aquifer Protection Program (APP), and, to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

How does the proposed new or adjusted AWQS implementation rule work?

Subsection A: Subsection (A) of the proposed rule at R18-9-A215 requires the ADEQ Director to develop a schedule to amend Individual APP permits that were issued on or before a new or adjusted AWQSs’ effective date.

Subsection B: Subsection (B) requires the APP permittee to submit an administratively complete application to amend their permit to reflect new or adjusted AWQS pursuant to the schedule specified in Subsection A. It further specifies that an administratively complete application shall be submitted to the Department no later than four years after a new or adjusted AWQS effective date. Also, a waiver of the application submission is made available to permittees that can demonstrate that a pollutant with a new or adjusted AWQS is not likely to be in their discharge pursuant to Subsection (H) and A.R.S. § 49-223(G).

Subsection C: Subsection (C) requires permittees with issued individual APP permits at the time of a new or adjusted AWQS effective date to begin Baseline Monitoring for new or adjusted AWQS within three months, unless the permit has no ongoing monitoring requirements, the permittee has not begun ongoing monitoring, the permittee has submitted a request for an alternative timeframe, duration or frequency pursuant to subsection (D), or the permittee has submitted a demonstration pursuant to subsection (H). The rule continues to define “ongoing monitoring” for the purposes of subsection (C) as permit-required monitoring at groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.

Subsection D: Subsection (D) allows permittees subject to Baseline Monitoring to submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and/or sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.

Subsection E: Subsection (E) provides all of the detailed requirements necessary to conduct Baseline Monitoring, if the permittee is applicable to Baseline Monitoring as is detailed in subsection (C).

Subsection F: Subsection (F) provides detail on the requirements of the Baseline Monitoring Report that is required to be developed at the conclusion of Baseline Monitoring.

Subsection G: Subsection (G) provides detail on the requirement to submit the Baseline Monitoring Report to the Department as a central component of a permit amendment application in accordance with the amendment schedule specified by the Department, itself detailed in subsection (A). This subsection also details the Department’s requirement to review, process and

determine whether Alert Levels, Discharge Limitations and / or Aquifer Quality Limits are necessary parts of the pending amendment.

Subsection H: Subsection (H) provides detail on a permitted right to remove a pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring if a demonstration is made showing the pollutant is not likely to be present in a facility’s discharge.

Subsection I: Subsection (I) provides detail on the Department’s right to require permittees with issued individual APP permits that do not have ongoing monitoring to characterize their discharge if the Department has a reasonable basis to believe that the pollutant is likely to be in the facility’s discharge. The subsection further defines “ongoing monitoring” for the purposes of the subsection in the exact same manner as it is defined in subsection (C) and allows a subjected permittee to this subsection the right to remove a pollutant with a new or adjusted AWQS upon a subsection (H) demonstration.

Sampling and Analytical Methodologies. In the Baseline Monitoring Requirement subsection of the final rule at R18-9-A215(E)(4), the following is provided,

“[s]ampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.”

At the time this NFRM was compiled, wastewater methods for some of the pollutants with new or adjusted AWQSS were not ADHS-Approved (*see* A.A.C. Title 9, Chapter 14, Article 6, Tables 6.2.A and 6.2.B). In March 2025, ADEQ formally requested that the following sampling methods be reviewed and considered for addition to ADHS’s “Director Approved” list of sampling methods pursuant to A.A.C. R9-14-610, found published outside of the rule on ADHS’s website, here: <https://www.azdhs.gov/documents/preparedness/state-laboratory/lab-licensure-certification/environmental-laboratory/application/application-part-e.pdf>

Table 1. Analytical Methods for Baseline Monitoring

| Analyte | Analytical Method |
|-----------------------|--|
| Arsenic | EPA 200.8, SM 3113B, SM 3114B |
| Bromate | EPA 300.1, EPA 317.0 Rev 2.0, EPA 321.8, EPA 326.0 |
| Chlorite | EPA 300.0, EPA 300.1, EPA 317.0 Rev 2.0, EPA 326.0 |
| Haloacetic Acids | EPA 552.1, EPA 552.2, EPA 552.3, SM 6251B |
| Fecal coliform | SM 9223B |
| <i>E. coli</i> | SM 9223B |
| Total Trihalomethanes | EPA 502.2, EPA 524.2, EPA 551.1, SM 6251B |
| Uranium (Total) | EPA 200.8 |

* “EPA” - Environmental Protection Agency; “SM” - Standard Methods

Applicability of Microbiological Contaminants AWQS Indicator Parameters to Baseline Monitoring. In Final Rule R18-9-A215(C), all persons with issued individual permits as of a new or adjusted AWQS effective date shall begin Baseline Monitoring, pursuant to R18-9-A215(E), for a new or adjusted AWQS within three months. The associated NFRM for Title 18, Chapter 11, Article 4 (specifically for Microbiological Contaminants) specifies that either Fecal Coliform or *E. coli* may be used in routine monitoring as indicator parameters. ADEQ understands that for various reasons, issued APP permits may be sampling for one or both or none of these indicator parameters already. In accordance with the rule, ADEQ's expectation is that an applicable permittee may choose one or both indicator parameters for the purpose of Baseline Monitoring under Final Rule R18-9-A215.

Who are the stakeholders in this rulemaking? The stakeholders for this rulemaking are predominantly the permittees of the APP, and to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF) and the Voluntary Remediation Program (VRP). Other stakeholders include private well owners, community water systems and the constituents they serve, as well as all Arizonans who benefit from the state's aquifers being protected for drinking water use.

What has been the stakeholder process for this rulemaking? ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. In particular, the Department met with representatives of the Arizona Mining Association and the Arizona Chamber of Commerce and Industry over the implementation rule language which is the subject of this rulemaking. After a collaborative effort, ADEQ is confident that the requirements of the proposed implementation rule put the least amount of burden on stakeholders that is necessary to achieve the goal of proper, orderly and environmentally protective implementation of new or adjusted AWQSs.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. The summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of adding a new section at R18-9-A215 in Title 18, Chapter 9, Article 2 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to establish a clear procedure for implementation of new or adjusted Aquifer Water Quality Standards (AWQS) to the issued and existing individual Aquifer Protection Permits (APP). Before this rulemaking, such implementation was unaddressed and unclear. New or adjusted Aquifer Water Quality Standards (AWQS) are added to an existing list when the Federal Environmental Protection Agency (EPA) establishes new or adjusts existing Safe Drinking Water Act Maximum Contaminant Levels (MCL). Pursuant to Arizona Revised Statutes (A.R.S.) § 49-223, upon this EPA action, ADEQ must, within one year, open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. However, neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement those new or adjusted AWQs into the existing and issued permits. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact public health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting a rule on the implementation of new or adjusted AWQs into applicable, existing and issued individual APPs. The AWQs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees (hereinafter: "permittees"), such as Mines, Industrial Facilities and Wastewater Treatment Plants, and, to a lesser extent, regulated parties under certain remediation projects, such as WQARF and VRP. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from this "AWQS Implementation" rulemaking.

A general benefit includes the State of Arizona and its constituents, due to this rulemaking's functional part in protecting the state's aquifers, allowing them to remain a viable asset to community water portfolios and individual well users alike.

General costs to permittees as a result of this new or adjusted AWQS implementation rule are likely minimal, potentially significant and indeterminate at this time. According to the proposed rule, applicable permittees with permit-required discharge

and/or groundwater monitoring at the effective date of a new or adjusted AWQS would be required to begin “Baseline Monitoring” for any and all new or adjusted AWQSs with three months unless an alternative Baseline Monitoring timeframe, duration and/or frequency is proposed or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility’s discharge pursuant to A.R.S. § 49-223(G). At the conclusion of Baseline Monitoring, a requirement to submit a Baseline Monitoring report to the Department as a component of an application to amend the individual permit comes into effect; where, after review, the Department determines whether new or adjusted Alert Levels, Discharge Limitations or Aquifer Quality Limits based on the AWQS are necessary pursuant to A.A.C. R18-9-A205.

Specific Impacts

Benefits to Stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQSs are to be implemented into existing and issued permits. Applicable permittees will be required to conduct Baseline Monitoring at discharge and groundwater monitoring locations, which could come as a considerable cost. However, permittees will have much of the infrastructure to conduct this monitoring already in place, as the rule requires the monitoring to occur at existing and established locations. With that said, the Department estimates that the analytical laboratory fees for applicable permittees will cost \$4,500 for (eight) 8 monitoring events for all seven (7) of the new or adjusted AWQSs at one monitoring location. The seven (7) new or adjusted AWQSs are detailed in the other four (4) Notices of Final Rulemaking (NFRMs) associated with this NFRM. The Department estimates that monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The Department estimates the employee labor costs at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all (eight) 8 monitoring events. Then, the Department estimated the employee labor costs for preparing the Baseline Monitoring Report with a request to establish Alert Levels, Discharge Limitations and/or Aquifer Quality Limits for all 7 parameters. This effort includes a draft report, internal review, final report edits, and submission by the permittee to the Department. The employee effort for the Baseline Monitoring Report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for an estimated total of \$15,000.

Although many facilities will absorb the additional work load and infrastructure / incidentals needed into their existing labor force and equipment on site, certain permittees may need to acquire additional employees to help achieve the requirements.

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening

sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials is published on ADEQ’s dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Permittees will be the primary bearers of costs associated with this rulemaking. Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Benefits to Stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQs are to be implemented into existing and issued permits. Generally, the state and the constituents of the state benefit through the efficiency unto which protection of the aquifer resource is administered, safeguarding aquifers as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224.

D. Benefit/Cost Analysis:

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|------------------|-------------------------|---------------------|--|
| \$10,000 or less | \$10,001 to \$1,000,000 | \$1,000,001 or more | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|---|---|----------------------------------|-------------------------------------|
| Permittees: Mines, Industrial Facilities, Wastewater Treatment Plants | Applicable permittees will be required to conduct Baseline discharge and/or groundwater monitoring for new or adjusted AWQs, which entail sampling and analytical costs | Minimal to Moderate | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing | Minimal to Moderate | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|----------------------------------|-------------------------------------|
| | permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQS. Any additional costs incurred would generally be covered by increased fees paid by permittees. | | |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Minimal to Moderate | |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees

Permittees could see minimal to moderate costs due to this rulemaking. Applicable permittees will be required to conduct Baseline discharge and/or groundwater monitoring for new or adjusted AWQSs, which entail sampling and analytical costs. The Department estimates that monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The Department estimates the employee labor costs at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then, the Department estimated the employee labor costs for preparing the Baseline Monitoring Report with a request to establish Alert Levels, Discharge Limitations and/or Aquifer Quality Limits for all 7 parameters. This effort includes a draft report, internal review, final report edits, and submission by the permittee to the Department as a component of a permit amendment application. The employee effort for the Baseline Monitoring Report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for an estimated total of \$15,000. Additional costs include an internally or externally developed amendment application and Departmental hourly fees for application review, permit writing, etcetera – pursuant to A.A.C. R18-14-102(B).

Small businesses as a segmented category

Generally, the same as the Permittees section above; albeit, taking into account the fact that small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases.

ADEQ

ADEQ could see minimal to moderate costs due to this rulemaking. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQS. Any additional costs incurred would generally be covered by increased fees paid by permittees.

In order to process the large number of individual APP permits that will need to be amended as a product of this rule and new or adjusted AWQS, ADEQ will incur costs for AWP-related staff expansion and performance of new AWQS-associated administrative responsibilities needed. ADEQ currently anticipates that it will need to hire new staff with the necessary technical expertise. These positions will include permit reviewers with engineering and hydrogeologic backgrounds, as well as, non-engineer staff for administrative tasks.

In order to support the implementation of this new rule, ADEQ plans on hiring 3 new full-time employees (FTE). Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees and annual fees.

Benefits to Stakeholders:

Permittees, Small Businesses as a segmented category & ADEQ

Benefits to stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQSs are to be implemented into existing and issued permits. Generally, the state and the constituents of the state benefit through the efficiency unto which protection of the aquifer resource is administered, safeguarding aquifers as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ estimates that, for the most part, this rulemaking will not have much of an impact on public or private employment. As is noted above, some permittees may need to hire additional help to meet the requirements of Baseline Monitoring for new or adjusted AWQSs, but, in most cases, will be able to absorb the responsibility through existing employees, infrastructure and equipment. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permit applications is already in place. ADEQ anticipates that potentially hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQS. Any additional costs incurred would generally be covered by increased fees paid by permittees.

However, and as mentioned above, all applicable permittees, whether public or private, stand to benefit through the state establishment of a streamlined new or adjusted AWQS implementation process. As explained in subsection A of this EIS above,

neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement new or adjusted AWQSs into the existing and issued permits, which would lead to significant confusion and waste for ADEQ and the permittees.

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with the new or adjusted AWQS implementation rule that are borne by small businesses may be minimal to moderate. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Many small businesses subject to this rule likely have personnel, infrastructure and equipment already in place for conducting Baseline Monitoring. It is possible that permittees may need to hire additional personnel or a contractor in complying with these rules. Also, samples must be analyzed at a laboratory at a cost to the permittee. Additionally, permittees may choose to hire a consultant in developing their Baseline Monitoring Report, an alternative Baseline Monitoring timeframe, duration and/or frequency request or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G).

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ estimates that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed new or adjusted AWQS implementation rule.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large likely have personnel, infrastructure and equipment already in place for conducting Baseline Monitoring. It is possible that permittees may need to hire additional personnel or a contractor in complying with these rules. Also, samples must be analyzed at a laboratory at a cost to the permittee. Additionally, permittees may choose to hire a consultant in developing their Baseline Monitoring Report, an alternative Baseline Monitoring timeframe, duration and/or frequency request or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G).

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|---|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Used for all applicable permittees. Through stakeholder input, the Department removed from a previous draft a requirement for all applicable permittees to report throughout Baseline Monitoring in lieu of simply reporting all at once through the Baseline Monitoring Report at the end of the Baseline Monitoring period. The rule also allows permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS. |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Used for all applicable permittees. Through stakeholder input, the Department built more flexibility into the rule through the allowance of an alternative Baseline Monitoring timeframe, duration and/or frequency request, as well as an ability for a permittee to make a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G), which results in the pollutant not being subject to Baseline Monitoring. |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Used for all applicable permittees. Through stakeholder input, the Department removed from a previous draft a requirement for all applicable permittees to report throughout Baseline Monitoring in lieu of simply reporting all at once through the Baseline Monitoring Report at the end of the Baseline Monitoring period. The rule also allows permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS. |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more prescriptive than necessary (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

There should be little to no costs to private persons and consumers as this rule compels permittees to conduct Baseline Monitoring for all new or adjusted AWQSS. It is conceivable that a Wastewater Treatment Plant may increase the rates in their service area as a result of the requirement to conduct Baseline Monitoring, but that would be a relatively small amount due to the cost estimates projected for Baseline Monitoring outlined above.

G. A statement of the probable effect on state revenues:

This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Investments in sampling, analytical

and report / request / demonstration work through employees or consultants could result in the generation of additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

ADEQ worked closely with stakeholders in the development of this new or adjusted AWQS implementation rule, focusing on the goal of clarity in administration and expectation for the Department and the applicable permittees, respectively. Neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement those new or adjusted AWQSs into the existing and issued permits. For this reason, ADEQ received overwhelming support for this clarifying rule from the regulated parties. After years of drafting, editing and stakeholder feedback, ADEQ believes the structure of this rule properly balances the agency’s mission of protecting public health and the environment with any requisite costs to stakeholders.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

No data was used in the development of this rule. ADEQ closely examined the relevant and existing statutes and rules, as well as multiple rounds of stakeholder feedback.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Generally: As a result of meeting with stakeholders between the proposed and final rules, some restructuring and clarification was made to draft rules, R18-9-101 and R18-9-A215. However, concerning R18-9-A215, it is important to note that changes to the rule are limited to logical re-arrangement and clarification. Upon careful comparison between the proposed and final rule, ADEQ believes the two versions of the rules do not differentiate substantially. Briefly overviewing the changes to R18-9-A215 can be described as follows: the Baseline Monitoring requirements in proposed subsection (C) are broken into four subsections in final rule, specifically subsections (C), (D), (E) and (F). This was done at the request of the stakeholders for clarification, flexibility and functionality purposes by way of developing dedicated Baseline Monitoring applicability language in final subsection (C), dedicated alternative Baseline Monitoring timeframe, duration and/or frequency request language in final subsection (D), dedicated Baseline Monitoring requirements language in final subsection (E), and dedicated Baseline Monitoring Report language in final subsection (F). Proposed subsections (A), (B), (D), (E) and (F) are largely the same in the final rule, although proposed subsections (D), (E) and (F) have moved to final subsections (G), (H) and (I) due to the breaking up of proposed subsection (C), as is described above.

Specifically:

Final Rule R18-9-101(4) - Definitions - “Aquifer Protection Permit”

- Removed “or ‘APP’ or ‘APPs’” because the acronym is not used in the Article.
- Revised “...means an individual or general permit or permits issued under...” to “...means an individual or general permit issued under...” for clarity.

Final Rule R18-9-101(31) - Definitions - “New or adjusted aquifer water quality standard”

- Changed “...an established AWQS for the purposes...” to “...an established AWQS, pursuant to R18-9-101(5), for the purposes...” for clarity.
- Changed “APP” to “Aquifer Protection Permit” for clarity.
- Changed citation “R18-9-A215(D)” to “(G)” to conform with final rule restructure.

Final Rule R18-9-A215(A) - New or Adjusted Aquifer Water Quality Standards

- Added subsection title, “Permit Amendment Schedule” for clarity in rule navigation.
- Replaced “Individual APPs” with “issued individual permits” to make more clear the temporal applicability.
- Replaced “[u]pon the establishment of a new or adjusted AWQS, the Director shall develop a schedule to amend Individual APPs that were issued as of the effective date of a new or adjusted AWQS pursuant to R18-9-A211” with “[u]pon the effective date of a new or adjusted AWQS, the Director shall develop a schedule to amend issued individual permits to reflect the new or adjusted AWQS pursuant to R18-9-A211”. This was done due to stakeholder feedback in order to increase clarity and to add the purpose of the schedule’s creation into the rule.

Final Rule R18-9-A215(B) - New or Adjusted Aquifer Water Quality Standards

- Added subsection title, “Permit Amendment” for clarity in rule navigation.
- Replaced “Individual APPs” with “issued individual permits” due to stakeholder feedback in order to make more clear the temporal applicability.

Final Rule R18-9-A215(B)(2) - New or Adjusted Aquifer Water Quality Standards

- Replaced, “[t]he subsection (B)(1) requirement may be waived if a demonstration is submitted to and approved by the Department that a pollutant with a new or adjusted AWQS is not likely to be present in a facility’s discharge pursuant to subsection (E)” with “[t]he requirement to submit an application to amend in subsection (B) is not applicable for pollutants with a new or adjusted AWQS that are within the scope of a demonstration submitted pursuant to subsection (H)” due to stakeholder feedback in order to supplant the waiving of the four year amendment application submission with the waiving of the requirement to submit an amendment application altogether for a particular pollutant as the effect of a subsection (H) demonstration indicates waiver of more than just the four year application submission deadline.

Final Rule R18-9-A215(C) - New or Adjusted Aquifer Water Quality Standards

- Final rule, subsection (C) is the first of four subsections that were split out from proposed rule due to stakeholder feedback, subsection (C) in order to add clarification, flexibility and functionality to Baseline Monitoring (*see* Heading No. 11, subheading “Generally”, above). Proposed subsection (C) language, “[p]ersons holding Individual APPs that were issued as of the effective date of a new or adjusted AWQS ... shall begin Baseline Discharge and/or Groundwater Monitoring ... within three months of the effective date...” is largely retained in final rule, subsection (C). Much of the language which was in proposed subsection (C) can be found in final rule, subsection (C); specifically, below final subsection (C)(4), as part of the definition of “ongoing monitoring”. Additionally, proposed subsection (C)'s language, “unless a demonstration is approved by the Department pursuant to subsection (E)” can be found in final subsection (C)(4), now referencing final subsection (H). Further clarifications brought up by stakeholders are represented in final subsections (C)(1), (2) and (3).

Final Rule R18-9-A215(C), (E) and (F) - New or Adjusted Aquifer Water Quality Standards

- “[A]ctive” was replaced with “issued” due to stakeholder feedback in order to make more clear the temporal applicability in four locations in these three subsections.

Final Rule R18-9-A215(D) - New or Adjusted Aquifer Water Quality Standards

- Final subsection (D) was added to address stakeholder concerns about flexibility when it comes to Baseline Monitoring, including flexibility in timeframes, duration and frequency.

Final Rule R18-9-A215(E) - New or Adjusted Aquifer Water Quality Standards

- The requirement to report Baseline Monitoring to the Director throughout the monitoring period (proposed subsection (C)(1)(a)) was removed from the final rule due to stakeholder feedback and a determination that reporting during the Baseline Monitoring periods is unnecessary as the results of the Baseline Monitoring periods will be submitted to the Department through the Baseline Monitoring Report and the amendment application pursuant to final subsection (F) and (G)
- The language in final rule, subsection (E)(1) was moved from proposed rule, subsection (C)(1)(c) for clarity, functionality and structural purposes.
- The language in final rule, subsection (E)(2) was moved from proposed rule, subsection (C)(1)(d) for clarity, functionality and structural purposes.
- The language in final rule, subsection (E)(3) was moved from proposed rule, subsection (C)(1)(f) for clarity, functionality and structural purposes.

- The language in final rule, subsection (E)(3), “[p]ermittees that have collected relevant samples prior to the Baseline Monitoring period at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205...” was changed from proposed language in subsection (C)(1)(f) “[p]ermittees that have collected samples prior to a Baseline Discharge and/or Groundwater Monitoring period at active discharge, groundwater point of compliance and/or other monitoring locations specified in the permit that are subject to limits based on AWQs...” due to stakeholder feedback because:
 - “Baseline Monitoring” captures both Discharge and Groundwater Monitoring;
 - “permit-required” adds more clarity to which monitoring locations are applicable than the word “active”;
 - “...subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205...” is a more exacting, clarifying phrase, further specifying which monitoring locations are applicable, as opposed to “...specified in the permit that are subject to limits based on AWQs...”
- The language in final rule, subsection (E)(3), “[p]reviously collected data may be used to shorten or eliminate a Baseline Monitoring period if all data components...” was changed from proposed language in subsection (C)(1)(f), “[p]reviously collected data submissions may result in a reduction of the sampling duration...” because stakeholders asked for criteria in submitting previously collected data and the language needed to set up a subsequent list.
- Final rule, subsections (E)(3)(a), (b), (c) and (d) were developed due to stakeholder feedback in order to add clarity in submitting previously collected data for Baseline Monitoring credit.
 - (E)(3)(a) references appropriate sampling and analytical methodologies in final rule, subsection (E)(4);
 - (E)(3)(b) establishes a standard for quality assurance and quality control procedures;
 - (E)(3)(c) establishes that while previous data may be used to shorten or eliminate a Baseline Monitoring period, the Baseline Monitoring Report and component submission must collectively be representative of a complete data set per the applicable requirements of Baseline Monitoring in R18-9-A215.
 - (E)(3)(d) establishes that while previous data may be used to shorten or eliminate a Baseline Monitoring period, the Baseline Monitoring Report and component submission must collectively meet the other applicable requirements of Baseline Monitoring in R18-9-A215.
- The language in final rule, subsection (E) no longer includes proposed subsection (C)(1)(E), “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available...” due to stakeholder feedback. Monitoring data beyond the requirements of Baseline Discharge and Groundwater monitoring may be submitted as part of a Baseline Monitoring Report in final subsection (F), as “additional information” (*see* final subsection (F)(5)).

- The language in final rule, subsection (E)(4) was moved from proposed rule, subsection (C)(1)(h) for clarity, functionality and structural purposes due to stakeholder feedback. While final subsection (E)(4) is similar to proposed (C)(1)(h), a citation to the Arizona Department of Health Services (ADHS) approved methods rule, R9-14-610, was added, along with a reference to the ADHS “Director Approved” list, due to stakeholder feedback in order to functionally capture the current and future state of appropriate sampling and analytical methodologies for the purposes of Baseline Monitoring pursuant to R18-9-A215.
- The language in final rule, subsection (E)(5) was moved from proposed rule, subsection (C)(1)(d) for clarity, functionality and structural purposes due to stakeholder feedback. Final subsection (E)(5) adds a subsection title, “Groundwater Monitoring” for clarity in rule navigation. The applicability language in final subsection (E)(5) was changed from “[p]ermittees that monitor groundwater at their site, pursuant to an existing Individual APP, shall conduct sampling for baseline groundwater monitoring at the applicable point(s) of compliance for eight quarters...” to “[p]ermittees that are required to monitor groundwater shall conduct Baseline Monitoring for a new or adjusted AWQS at the point of compliance monitoring location(s) for eight quarters...” due to stakeholder feedback in order to add clarity by specifying the permit’s monitoring requirements and the scope of the new or adjusted AWQSs. Final subsection (E)(5) adds language recognizing the exception to this requirement, which is an alternative timeframe, duration or frequency request approved by the Department (*see* final subsection (D)). Also, the following was removed from final subsection (E)(5) based on stakeholder feedback and reconsideration of the need, “[p]ermittees shall continue quarterly monitoring under this subsection until a determination is made by the Department on whether new or adjusted Alert Levels, Discharge Limits and/or AQLs are required pursuant to subsection (D) of this section.” Additionally, the following language in final subsection (E)(5) was changed from, “[t]he Director may shorten or lengthen the monitoring period if one or more of the following events occur...” to “[t]he Director may lengthen the monitoring period if one or more of the following events occur...” due to stakeholder feedback and Departmental reconsideration of the inappropriate nature of setting Alert Levels, Discharge Limits and/or AQLs based on a shortened data set. The list or criteria in final subsections (E)(5)(a), (b), (c), (d) and (e) were slightly edited due to stakeholder feedback in order to provide clarity:
 - (E)(5)(a) - “individual” was removed due to the tradition that the usage of “permit” in A.A.C. Title 18, Chapter 9, Article 2 refers to the namesake, individual aquifer protection permit, through a contextual certainty;
 - (E)(5)(b) - “alert or” was removed after a determination that “alert” level exceedances are not appropriate for lengthening the Baseline Monitoring period;
 - (E)(5)(c) - Typo fix. Proposed subsection (C)(1)(d)(iii) read, “[a]n exceedance of a new of adjusted AWQS”; final rule, subsection (E)(5)(c) reads, “[a]n exceedance of a new or adjusted AWQS”;

- (E)(5)(d) - “increasing” was replaced with “significant” to better scope the events that might appropriately lead to lengthening the Baseline Monitoring period;
- (E)(5)(e) - “increasing” was replaced with “significant” to better scope the events that might appropriately lead to lengthening the Baseline Monitoring period.
- The language in final rule, subsection (E)(6) was moved from proposed rule, subsection (C)(1)(g) for clarity, functionality and structural purposes due to stakeholder feedback. Final subsection (E)(6) adds a subsection title, “Discharge Monitoring” for clarity in rule navigation.” The applicability language in final subsection (E)(6) was changed from “[p]ermittees that monitor their discharge, pursuant to an existing Individual APP, shall conduct baseline discharge monitoring for newly established or adjusted AWQSs on a monthly frequency for one year” to “[p]ermittees that are required to monitor discharge or water quality shall conduct Baseline Monitoring for a new or adjusted AWQS at the discharge monitoring location(s) on a monthly frequency for one year...” due to stakeholder feedback in order to add clarity by using more inclusive language that encompasses the full scope of APP facilities specifying the permit’s monitoring requirements and the scope of the new or adjusted AWQSs. Final subsection (E)(6) adds language recognizing the exception to this requirement, which is an alternative timeframe, duration or frequency request that is approved by the Department. Final subsection (E)(6) adds the following language, “[i]f a permittee conducting Discharge Baseline Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware...” in order to address the original Departmental concern that led to the “shorten or lengthen” language in proposed subsections (C)(1)(d) and (g), specifically “shorten”. After receiving stakeholder feedback expressing concern that setting Alert Levels, Discharge Limits and/or AQLs based on a shortened data set is inappropriate, the Department added the notification language above to final subsection (E)(6). In both cases (“notification” & “shorten” language), the Department aimed and now aims to ascertain information from the permittee in the case where a facility is discharging at or above a new or adjusted AWQS during Baseline Monitoring. This is because, when a permittee notifies the Department of discharges at or above the new or adjusted AWQS, ADEQ can not only become aware, but be prompted to monitor the discharges in the meantime before an amendment application is submitted, in order to be properly informed of the potential impacts to local groundwater. Additionally, the following language in final subsection (E)(6) was changed from, “[t]he Director may shorten or lengthen the monitoring period if one or more of the following events occur...” to “[t]he Director may lengthen the monitoring period if one or more of the following events occur...” due to stakeholder feedback and Departmental reconsideration of the inappropriate nature of setting Alert Levels, Discharge Limits and/or AQLs based on a shortened data set. The list or criteria in final subsections (E)(6)(a), (b), (c), (d) and (e) were slightly edited due to stakeholder feedback in order to provide clarity:

- (E)(6)(a) - “individual” was removed due to the tradition that the usage of “permit” in A.A.C. Title 18, Chapter 9, Article 2 refers to the namesake, individual aquifer protection permit, through a contextual certainty;
- (E)(6)(b) - “alert or” was removed after a determination that “alert” level exceedances are not appropriate for lengthening the Baseline Monitoring period;
- (E)(6)(c) - Typo fix. Proposed subsection (C)(1)(g)(iii) read, “[a]n exceedance of a new of adjusted AWQS”; final rule, subsection (E)(5)(c) reads, “[a]n exceedance of a new or adjusted AWQS”.
- (E)(6)(d) - “increasing” was replaced with “significant” to better scope the events that might appropriately lead to lengthening the Baseline Monitoring period;
- (E)(5)(e) - “[a]ny other significant issue that affects baseline monitoring” was replaced with “[a]ny other significant issue that affects the representativeness of Baseline Monitoring” to better scope the events that might appropriately lead to lengthening the Baseline Monitoring period.

Final Rule R18-9-A215(F) - New or Adjusted Aquifer Water Quality Standards

- The language in final rule, subsection (F) was moved from proposed rule, subsection (C)(2) for clarity, functionality and structural purposes due to stakeholder feedback.
- The language in final rule, subsection (F)(1) was moved from proposed rule, subsection (C)(2)(a) for clarity, functionality and structural purposes due to stakeholder feedback. Final subsection (F)(1) was changed from, “[a]t the conclusion of the baseline discharge and/or groundwater monitoring, permittees shall submit to the Department a Baseline Monitoring Report within three months of the date of the last sample collected” to “[a]t the conclusion of Baseline Monitoring, or upon the compilation of a complete and representative data set pursuant to subsection (E)(3) above, permittees shall develop a Baseline Monitoring Report within three months of receipt of the last sample result” due to stakeholder feedback in order to clarify the ability of a permittee to use certain previously recorded data for the purposes of Baseline Monitoring pursuant to final subsection (E)(3), as well as, to change “submit” to “develop” so as to reflect the Baseline Monitoring Report’s status as a component of the amendment application, specified in final subsection (G), and the fact that the report and amendment application are subject to the amendment schedule specified in final subsection (A) and to change “..of the date of the last sample collected...” to “...of receipt of the last sample result...” due to stakeholder feedback / preference.

- The language in final rule, subsection (F)(2) was added due to stakeholder feedback pointing out that permittees subject to both Baseline Discharge and Groundwater Monitoring would have staggered start and finish dates (per the final rule, Baseline Discharge Monitoring lasts for 1 year, whereas Baseline Groundwater Monitoring lasts for 2 years). In the case where a permittee is subject to both monitoring periods, the Department found no issue clarifying that such permittees shall develop a Baseline Monitoring Report within three months of receipt of the last sample result between the two monitoring periods.
- The language in final rule, subsection (F)(3) was moved from proposed rule, subsection (C)(2)(b) for clarity, functionality and structural purposes due to stakeholder feedback. Final subsection (F)(3) was changed from, “[t]he samples collected and the report shall, at a minimum, characterize the discharge and/or groundwater quality at the compliance monitoring locations in the permit in relation to the pollutants with new or adjusted AWQs...” to “[t]he report shall characterize the discharge and/or groundwater quality at the permit-required monitoring locations pursuant to subsections (C) and (E) of this section...” due to stakeholder concern about clarity.
- The language in final rule, subsection (F) no longer includes proposed subsection (C)(2)(c), “[c]haracterization may also include up, cross or down gradient wells in relation to the facility that were sampled for the purposes of baseline groundwater monitoring, if available....” due to stakeholder feedback. Monitoring data beyond the requirements of Baseline Discharge and Groundwater monitoring may be submitted as part of a Baseline Monitoring Report pursuant to final subsection (F)(5), “[a] permittee may include additional information in a Baseline Monitoring Report...”.
- The language in final rule, subsection (F)(4) was moved from proposed rule, subsection (C)(2)(d) for clarity, functionality and structural purposes due to stakeholder feedback. The list of items to be included in the report, final subsections (F)(4)(a), (b) and (d), were slightly edited through stakeholder feedback to provide additional clarity:
 - (F)(4)(a) - “The sampling results of any pollutants with new or adjusted AWQs detected through discharge or groundwater monitoring...” was changed to “[t]he sampling results of discharge and/or groundwater monitoring for a pollutant with a new or adjusted AWQ...” for purpose of alignment with the scopes and language in the other subsections in the rule;
 - (F)(4)(b) - “A demonstration of the baseline concentrations of each new or adjusted AWQ at the applicable point(s) of compliance and other locations subject to active discharge and/or groundwater monitoring in the permit...” was changed to “[a] demonstration of the baseline concentration of a new or adjusted AWQ at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205...” for purpose of alignment with the scopes and language in the other subsections in the rule;

- (F)(4)(d) - “An Alert Level, Discharge Limit and AQL proposal, as applicable, for each pollutant with a new or adjusted AWQS...” was changed to “[a]n Alert Level, Discharge Limitation and/or AQL proposal in accordance with R18-9-A205, as applicable, for each pollutant with a new or adjusted AWQS...” for purpose of scoping the proposals to the relevant rule, R18-9-A205;
- The language in final rule, subsection (F)(5) was added in order to allow for additional information to be submitted as part of the report, if a permittee sees merit in doing so; such as, including data from up, cross or down gradient wells in relation to the facility.
- The language in final rule, subsection (F)(6) was added in order to allow the Department to require monitoring data in a specified manner so as to keep quality assurance and quality control of the monitoring data. This addition reflects a component of the now removed proposed subsection (C)(1)(a) which was not commented upon by stakeholders. Proposed (C)(1)(a) read, “[b]aseline discharge and groundwater monitoring shall be reported to the Director throughout the monitoring period in a method specified by the Director...”. Monitoring throughout Baseline Monitoring was removed due to stakeholder feedback. The submission manner remains in the final rule here.
- The language in final rule, subsection (F)(7) was moved from proposed rule, subsection (C)(2)(e) for clarity, functionality and structural purposes due to stakeholder feedback. Final subsection (F)(7) was changed from, “[f]ollowing receipt of the Baseline Monitoring Report and review by the Department, additional information may be required...” to “[a]fter review by the Department, additional information may be required...” in order to clarify that “review” not “receipt” is the event that would occur before additional information would be required.

Final Rule R18-9-A215(G) - New or Adjusted Aquifer Water Quality Standards

- Added subsection title, “Report Review and Permit Amendment” for clarity in rule navigation.
- The language in final rule, subsection (G) was moved from proposed rule, subsection (D) for clarity, functionality and structural purposes due to stakeholder feedback.
- Added subsection title, “Report Review and Permit Amendment” for clarity in rule navigation.

- Due to stakeholder feedback on a lack of clarity and guidelines for both the permittee and the Department in proposed subsection (D), the language in the beginning of final subsection (G) was changed to specify when the report should be compiled, that the report is a component of the amendment application, and that the amendment application should be submitted in accordance with the amendment schedule pursuant to final subsection (A). The language in the second half of final subsection (G) more clearly specifies, in relation to proposed subsection (D), the requirements of the Department upon receipt of the amendment application, including the reviewing, processing, determination and incorporation of the report and any Alert Levels, Discharge Limitations and/or AQLs in the permit for any new or adjusted AWQs in accordance with R18-9-A205.

Final Rule R18-9-A215(H) - New or Adjusted Aquifer Water Quality Standards

- Added subsection title, “Unlikely to be Present in Discharge Demonstration” for clarity in rule navigation.
- The language in final rule, subsection (H) was moved from proposed rule, subsection (E) for clarity, functionality and structural purposes due to stakeholder feedback.
- Added subsection title, “Unlikely to be Present in Discharge Demonstration” for clarity in rule navigation.
- Due to stakeholder feedback, the language in final subsection (H) removes the requirement for the “unlikely” demonstration to be “successful” as the statutory right to not be subject to monitoring if a pollutant is not likely to be in a facility’s discharge, pursuant to A.R.S. § 49-223(G), does not grant the Department a right to gatekeep whether a pollutant is likely or not to be in a permittee’s discharge. Therefore, “may” was changed to “shall”, in addition to the removal of the “successful demonstration” language. The requirement to demonstrate that a pollutant is not likely to be in a facility’s discharge remains. However, language was added for clarity which allows the Department to require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWQS after review of an “unlikely” demonstration if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Lastly, final rule (H)(3), one of three examples of what a demonstration could include, was changed due to stakeholder feedback from, “[a] demonstration of the background concentrations of the pollutant at the facility’s site” to “[p]rocess or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site” because the final language is simply a more appropriate demonstrative example.

Final Rule R18-9-A215(I) - New or Adjusted Aquifer Water Quality Standards

- Added subsection title, “Permits Without Monitoring” for clarity in rule navigation.
- The language in final rule, subsection (I) was moved from proposed rule, subsection (F) for clarity, functionality and structural purposes due to stakeholder feedback.

- Final rule, subsection (I) is based on proposed rule, subsection (F). Final subsection (I) uses similar language to proposed (F), but, at the request of stakeholders, puts a standard on when the Department may require a reasonable characterization, “...if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility’s discharge.” Also, in accord with a subsection-specific definition for “ongoing monitoring” being added to final rule subsection (C), the same subsection-specific definition is added to this subsection for clarity, under final subsection (I)(1). Lastly, final subsection (I)(2) recognizes a permittee’s right to remove a pollutant from the scope of a reasonable characterization if it is unlikely to be present in the facility’s discharge. Similarly to final subsection (H), language was added for clarity which allows the Department to require an applicable permittee to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS if, after review of a subsection (H) demonstration, the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility’s discharge. These additions were the result of stakeholder feedback.

12. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Utility

Proposed R18-9-Preamble and R18-9-A215. New or Adjusted Aquifer Water Quality Standard

30 AAR 3403 - Paragraph 9 – Subsection C

“Preliminary estimates on the cost of baseline monitoring based on an eight quarter time period at one sampling location for all seven (7) of the new AWQSs that are being established in the associated NPRMs is around \$15,000...”.

We request ADEQ share the information used to determine the cost of the new or adjusted AWQSs baseline monitoring with stakeholders.

ADEQ Response 1:

ADEQ appreciates the comment. ADEQ estimated that the analytical laboratory fees would cost \$4,500 for 8 monitoring events for all seven (7) of the new or adjusted AWQSs at one monitoring location. The monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The employee labor costs were estimated at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then ADEQ estimated the employee labor costs for preparing the baseline monitoring report with a request to establish Alert Levels and Aquifer Quality Limits for all 7 parameters. This effort included a draft report, internal review, final

report edits, and submission to ADEQ. The employee effort for the baseline monitoring report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for a total of \$15,000.

Comment 2: Utility

R18-9-A215. New or Adjusted Aquifer Water Quality Standard

30 AAR 3407 - Paragraph C.1.A --“Baseline discharge and groundwater monitoring shall be reported to the Director throughout the monitoring period in a method specified by the director.”

We request ADEQ clarify how the permittee is going to be notified of the method specified by the director to report baseline discharge and groundwater monitoring since it is not defined in the proposed rule or in the permittee’s current permit.

ADEQ Response 2:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 3: Utility

30 AAR 3407 - Paragraph C.2.A --“...permittees shall submit to the Department a Baseline Monitoring Report within three months of the date of the last sample collection.”

Our individual APP permits have discharge and groundwater monitoring locations. Please clarify if two separate baseline monitoring reports will be required since the frequency for baseline discharge and groundwater monitoring are different. We request ADEQ consider allowing flexibility for permittees with both discharge and groundwater monitoring locations to align the baseline monitoring schedules to eliminate preparing and submitting two separate baseline monitoring reports.

We request ADEQ revise the statement “within three months of the date of the last sample collection” to “within three months of receipt of the last sample result” since analytical results may take up to 30 days to be reported by the laboratory after sample collection.

ADEQ Response 3:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant language. Final Rule, subsection (F)(2) states, “[p]ermittees subject to both Groundwater and Discharge Baseline Monitoring may develop a combined, comprehensive Baseline Monitoring Report within three months of receipt of the last sample

result.” Additionally, concerning flexibility, Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 4: Utility

Currently, an ADHS - approved method for wastewater does not exist for Chlorite, Bromate or Haloacetic acids. Until there is an approved wastewater method, these parameters should not be required to have baseline monitoring or permitted monitoring on effluent discharge. Is ADEQ collaborating with ADHS to make sure this will occur prior to when monitoring will be required?

ADEQ Response 4:

ADEQ appreciates the comment. ADEQ has notified ADHS of the proposed establishment of Bromate, Chlorite, Haloacetic acids and Uranium as Aquifer Water Quality Standards (AWQSs). ADEQ agrees that at the time of this rulemaking, there are no ADHS - approved wastewater methods for Bromate, Chlorite, nor Haloacetic acids. However, the final rule accounts for this situation with the following language, “[s]ampling shall be conducted using an [ADHS] approved method for each pollutant with a newly established or adjusted [Aquifer Water Quality Standard] AWQSs, if available. If an [ADHS] approved method for a pollutant with a newly established or adjusted AWQSs does not exist, sampling shall be conducted using an EPA approved method or a method specified by the Director.” For example, EPA Method 300.1 is an appropriate method for chlorite and bromite baseline monitoring in drinking water and groundwater. Additionally, Standard Methods 6251 for Haloacetic acids (HAAs) is an appropriate method for determining the concentration of HAAs in water and wastewater. Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 5: Utility

The rule allows for the submission of a demonstration showing a pollutant with a new or adjusted AWQS is not likely to be present in the discharge in order to waive monitoring; however, the demonstrations allowed require submitting data from monitoring...

How can ADEQ require monitoring to prove, “not likely to be present”? Is there another example demonstration of not likely to be present that does not include monitoring?

ADEQ Response 5:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration language. Final Rule R18-9-A215, subsection (H) reads, “[a] pollutant with a new or adjusted AWQS shall be removed from the scope of Baseline Monitoring upon a demonstration that the pollutant is not likely to be present in a facility’s discharge. The Department may require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWQS after review of the demonstration if the Department has a

reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge. Demonstrations may include, but are not limited to: (1) [a] characterization of the facility's discharge in relation to the pollutant with a new or adjusted AWQS; (2) [p]ast monitoring and sampling data at the facility and the facility's site; or (3) [p]rocess or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site." This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration.

Comment 6: Utility

Permittees are expected to initiate baseline monitoring within 3 months of the effective date of a new or adjusted AWQS unless a demonstration is approved by the Department. Three months is a very brief amount of time for a permittee to submit a demonstration and the agency to approve it. How does ADEQ realistically plan to process these waiver requests, or are they not anticipating many? May a permittee pause monitoring if a demonstration is submitted (while waiting for approval)?

ADEQ Response 6:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, "Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein." While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee to conduct and submit a "not likely" demonstration pursuant to subsection (H). The submission of an Alternative Baseline Monitoring Timeframe, Duration and Frequency Request does not pause the Baseline Monitoring requirement until ADEQ approves or denies. However, scheduling a meeting with the Department to discuss any concerns with the Baseline Monitoring requirement is welcomed and encouraged. Additionally, the rule language (*see* Final Rule R18-9-A215, subsection (H)) for the "not likely" demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a "not likely" demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Comment 7: Utility

We're thinking through our complicated permits and trying to understand where Baseline Monitoring would occur. Our facilities

have impoundments so... we're thinking about the perceived differences between initial characterization and Baseline Monitoring.

ADEQ Response 7:

ADEQ appreciates the comment. The Department believes the revisions made to the proposed rule, represented in Final Rule R18-9-A215, subsections (C), (H) and (I), address your concern.

Comment 8: Utility

Proposed rule R18-9-A215(C)(1) says baseline monitoring will be reported throughout the monitoring period in a method specified by the Director. How will the permittee be expected to submit the monitoring throughout the monitoring period and at what frequency?

ADEQ Response 8:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 9: Utility

Will there be notification to permittees of the effective date of the new/adjusted limits (now and in the future) for permittees to know when to start the baseline monitoring?

ADEQ Response 9:

ADEQ appreciates the comment. Yes, there will be notification to permittees of upcoming effective dates of new or adjusted AWQSs. Please be on the lookout for those communications in the future. Also, yes, ADEQ is aware that communicating the commencement dates is critical to the function of the rule and will be communicated for this AWQS rulemaking and all future AWQS rulemakings. At a minimum, these communications will specify the effective date for the AWQSs and when baseline monitoring should start according to the final rule.

Comment 10: Utility

Will a Self Monitoring Report Form (SMRF) template be available for permittees or will they be submitted through myDEQ?

ADEQ Response 10:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore, no Self Monitoring Report Form (SMRF) template is necessary. However, the development of a Baseline Monitoring Report within

three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 11: Utility

With respect to implementation - Is there any intention to require baseline monitoring for permits that don't currently require any discharge or groundwater compliance monitoring?

ADEQ Response 11:

ADEQ appreciates the comment. The answer is: Potentially. The final rule does not mandate, but gives the Department the discretion to require permittees without ongoing monitoring requirements in their permit to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS within a reasonable amount of time if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility's discharge (*See* Final Rule R18-9-A215(I)). This requirement applies to issued APP permits as of the AWQS effective date and that do not have permit-issued groundwater point of compliance, discharge, nor other monitoring locations specified in their permit which are, themselves, subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205. ADEQ plans to notify these permittees on a case-by-case basis. Also, the requirement to reasonably characterize does not apply upon the demonstration that a pollutant is not likely to be present in a facility's discharge; unless, upon demonstration review, the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge (*See* Final Rule R18-9-A215(H)).

Comment 12: Utility

How soon after the effective date of the new rule would ADEQ have the amendment schedule so permittees can budget for the APP amendment application?

ADEQ Response 12:

ADEQ appreciates the comment. ADEQ plans to notify permittees of the effective date of the new or adjusted limits, as well as the permit amendment schedule, as soon as possible after the establishment or effective date of a new or adjusted AWQS. Please be on the lookout for these communications. At a minimum, these communications will specify the effective date for the AWQSs, when baseline monitoring should begin according to Final Rule R18-9-A215 and will lay out the amendment schedule.

Comment 13: Utility

Proposed Rule R18-9-A215(C)(1)(c) - Please clarify what an "active" discharge is. Is use of the word "active" meant to exclude contingency monitoring locations?

ADEQ Response 13:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

Comment 14: Utility

Proposed Rule R18-9-A215(C)(1)(c) - Suggest deletion of "that are subject to limits based on AWQs." Is it ADEQ's intent that baseline monitoring is not required at locations where a permit limit is set at a level greater than the AWQS?

ADEQ Response 14:

ADEQ appreciates the comment. The Final Rule language at R18-9-A215(E)(1) states that, “[b]aseline Monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205.” It is not the intention of the Department to not require Baseline Monitoring at locations where a permit limit is set at a level greater than the AWQS. The language “based on AWQs” is intended to distinguish any monitoring that may be required outside of compliance monitoring for an AWQS. Furthermore, the language “pursuant to R18-9-A205” includes the scenario referenced by the commenter, where an AQL is set at a level greater than the AWQS. If a parameter with an adjusted AWQS, such as Arsenic or Total Trihalomethanes, has an AQL set higher than the corresponding AWQS, the parameter is required to be within the scope of Baseline Monitoring, barring an exception outlined in R18-9-A215.

Comment 15: Utility

Proposed Rule R18-9-A215(C)(1)(d) - Include an option to add the new or adjusted parameters at the sampling frequency in the current APP. For example, if semi-annual groundwater sampling is conducted under the current APP, the permittee could add parameters to the existing sampling schedule rather than sample quarterly.

ADEQ Response 15:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 16: Utility

Proposed Rule R18-9-A215(C)(1)(e) - Please clarify if use of the word "may" in this provision allows the permittee (not ADEQ) to

decide whether or not up, cross or down gradient wells will be sampled.

ADEQ Response 16:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(1)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements: [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 17: Utility

Proposed Rule R18-9-A215(C)(1)(h)(i) - Please clarify if "a method specified by the Director" requires the permittee to request and receive approval from the Director of ADEQ prior to use of a method that is not ADHS-approved.

ADEQ Response 17:

ADEQ appreciates the comment. The final rule language specifies that sampling for Baseline Monitoring “...shall be conducted using an Arizona Department of Health Services (ADHS) approved method for each pollutant with a new or adjusted AWQS, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the Director.” Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 18: Utility

Proposed Rule R18-9-A215(E) - According to the proposed rule, a pollutant may be removed from baseline discharge and groundwater monitoring “upon a successful demonstration ...”. Does "successful" mean the demonstration is "approved by ADEQ"? Suggest using the same language as proposed in R18-9-A215(B)(2): " ... if a demonstration is submitted to and approved by the Department. ... " If the demonstration is not "successful," is the permittee required to begin baseline discharge and/or groundwater monitoring upon receipt of ADEQ's denial? Baseline monitoring is required to begin within three months of the effective date of a new or adjusted AWQS and it will likely take a permittee time to prepare the demonstration. Therefore, will ADEQ review a facility's demonstration and issue an approval or denial within three months of the effective date of a new or adjusted AWQS? If ADEQ's review extends beyond three months from the effective date of a new or adjusted AWQS, is the permittee required to conduct baseline discharge and/or groundwater monitoring while ADEQ is reviewing the demonstration? Is ADEQ's decision to approve or deny the demonstration subject to public notice (R18-9-108) and/or public participation

(R18-9-109)?

ADEQ Response 18:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. The submission of an Alternative Baseline Monitoring Timeframe, Duration and Frequency Request does not pause the Baseline Monitoring requirement until ADEQ approves or denies. However, scheduling a meeting with the Department to discuss any concerns with the Baseline Monitoring requirement is welcomed and encouraged. A Final Rule subsection (D) request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language (*see* Final Rule R18-9-A215, subsection (H)) for the “not likely” demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 19: Utility

The proposed rule does not mention how new or adjusted AWQSs fit into the APP closure (R18-9-A209(B)) and post-closure (R18-9-A209(C)) process. Would a permittee be required to complete baseline monitoring before submitting a closure plan to ADEQ?

ADEQ Response 19:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C) and (D). The answer to this question is “yes, generally”. The final rule governing Baseline Monitoring requires persons with issued individual permits as of a new or adjusted AWQS effective date to begin Baseline Monitoring within three months unless: (1) [t]he permit has no ongoing monitoring requirements, (2) [t]he permittee has not begun ongoing monitoring, (3) [t]he permittee has received approval of a submitted request for an alternative timeframe, duration or frequency pursuant to subsection (D) below, or (4) [t]he permittee has submitted a demonstration pursuant to subsection (H). The subsection continues, stating that for the purposes of this subsection,

“ongoing monitoring” means permit-required monitoring at groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.

Despite a permittee’s intention to close, if a permittee is applicable to Baseline Monitoring per Final Rule R18-9-A215, Baseline Monitoring is required. However, in the case of a permittee either planning on closing soon or currently in a permitted closure process, Final Rule R18-9-A215(D) allows for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and/or frequency, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include, for example, the adjustment of when to begin Baseline Monitoring, a proposal to combine Baseline Monitoring with a closure plan or another reasonable orientation that meets the applicable rule requirements, subject to review and approval by the Department. Additionally, the Department notes that the statute governing APP closure is A.R.S. § 49-252 and the rule governing APP closure is R18-9-A209.

Comment 20: Interest Group

We understand that if the required baseline monitoring envisioned under the NPRM (see proposed A.A.C. R18-9-A215(C)) confirms that a pollutant with a new or adjusted AWQS already exceeds the AWQS at the applicable POC, then no alert level will be set and the aquifer quality limit (“AQL”) for that pollutant will be established at an appropriate level higher than the new or adjusted AWQS and the pollutant will be subject to the “no further degradation” standard in A.R.S. § 49-243(B)(3). We request that ADEQ confirm and clarify this intent in the rule and preamble when ADEQ publishes the final version of the rule.

ADEQ Response 20:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (G). Yes, after the conclusion of Baseline Monitoring, a permittee shall submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS in accordance with R18-9-A205. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS in accordance with R18-9-A205. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3).

Comment 21: Interest Group

Although we support what appears to be the Notice of Proposed Rulemaking’s (NPRM’s) statutorily-based approach of implementing new or adjusted AWQS into existing individual APPs consistent with the statutory language at A.R.S. § 49-243(B)(2) and (3) and the implementing regulatory language at A.A.C. R18-9-A205(C), we are concerned that some of the language in the NPRM appears to be inconsistent with this approach.

ADEQ Response 21:

ADEQ appreciates the comment. Due to this comment and others submitted on the propped rule language showing concern over whether the language is in accord with the governing statute at A.R.S. § 49-243(B)(2) and (3), ADEQ has revised the rule language to make clear that it is in accord. For example, consider Final Rule R18-9-A215, subsection (G), which requires a permittee, after the conclusion of Baseline Monitoring, to submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS *in accordance with R18-9-A205*. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS *in accordance with R18-9-A205*. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3). While difficult to address with specificity a broad concern like the one in this comment, ADEQ believes the edits to the rule incorporating R18-9-A205 (including R18-9-A205’s reference to A.R.S. § 49-243(B)(2) and (3)) address this stakeholder concern.

Comment 22: Interest Group

We are also concerned, as applied particularly to the required monthly discharge monitoring, that the rule will create increased costs and regulatory burdens for permittees that may not be necessary in all situations. For instance, many facilities with discharges subject to limits based on AWQS have stable discharges with consistent quality. Consequently, we recommend that language be added to the discharge baseline monitoring requirements to clarify that the frequency and duration of monitoring for discharges can be negotiated with ADEQ on a case-by-case basis. This would, in part, address the increased cost concern.

ADEQ Response 22:

ADEQ appreciates the comment. See generally, Final Rule R18-9-A215, subsection (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and/or frequency. Final Rule, subsection (D) reads as follows, “...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative

timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 23: Interest Group

We support the recognition in the NPRM of the statutory language at A.R.S. § 49-223(G), which provides that monitoring or any other APP-related requirements cannot be imposed on pollutants with AWQS that are not likely to be present in a facility’s discharge (see proposed R18-9-A215(E)). Although we support this aspect of the NPRM, some of the language in the proposal is not consistent with the statutory language in A.R.S. § 49-223(G).

ADEQ Response 23:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G).

Comment 24: Interest Group

The suggestion that ADEQ “may” waive monitoring in proposed R18-9-A215(B)(2) and (E), the requirement in proposed R18-9-A215(B)(2) and (C) that ADEQ “approve” submittals showing that a certain pollutant is not likely to be present in a facility’s discharge, and the concept of a “successful” demonstration in proposed R18-9-A215(E) are not consistent with the statutory language in A.R.S. 49-223(G). The statutory language simply provides that ADEQ may impose APP monitoring requirements only for pollutants for which AWQS have been established that are likely to be present in a discharge. There is no requirement under the statute to obtain ADEQ’s approval for such a demonstration or for the agency to decide whether or not to waive monitoring when presented with a demonstration or what demonstrations are “successful.” Accordingly, we request that any suggestion or requirement that a demonstration under A.R.S. § 49-223(G) must be approved, determined to be “successful”, or subject to administrative discretion be removed. Obviously, if ADEQ disagrees or has concerns with a particular demonstration it can raise its concerns with the submitter and request additional information.

ADEQ Response 24:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G). The final rule language allows the submission of a “not likely” demonstration itself to be sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 25: Interest Group

The use of the term “active discharge” is confusing and it is not clear how the term relates to the statutory definition of “discharge” in A.R.S. § 49-201(12). We believe that the intent of the rule is to apply the baseline monitoring requirements to existing groundwater point of compliance monitoring locations or discharge monitoring locations specified in an existing individual permit for which monitoring has commenced. Also, the baseline monitoring requirements should not apply to facilities that have been permitted but not yet constructed. Consequently, in lieu of referring to “active discharge, groundwater points of compliance, and/or other monitoring locations,” we recommend that the following phrase be used in R18-9-A215: “existing groundwater point of compliance monitoring locations, discharge monitoring locations, or other monitoring locations specified in the permit.” We also recommend that the phrase “and that have commenced monitoring pursuant to the permit” be added to R18-9-A215(C).

ADEQ Response 25:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C), (D) and (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations. Additionally, the final rule exempts from Baseline Monitoring permittees who have not begun permit-required, ongoing monitoring. This includes facilities that are permitted, but have yet to be constructed and other circumstances where ongoing monitoring is not occurring.

Comment 26: Interest Group

It is not clear what is meant by “limits based on AWQS” since different terms are used in A.A.C. R18-9-A205, namely alert levels, discharge limitations, and aquifer quality limits (“AQLs”). To eliminate this confusion, we request that the phrase “limits based on AWQS” be replaced with the phrase “alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205.” The NPRM inconsistently uses and intermingles the terms “baseline monitoring” and “baseline discharge and/or groundwater monitoring.” We request that a single term (i.e., “baseline monitoring”) be used to include both baseline groundwater and baseline discharge monitoring.

ADEQ Response 26:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “limits based on AWQS” with “alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205.” Additionally, the inconsistency in usage of “Baseline Monitoring” has been addressed in the final rule. As is suggested by the commenter, the single term, “Baseline Monitoring” is used throughout.

Comment 27: Interest Group

Because it may be difficult in some instances (such as with complex individual APPs) to initiate baseline monitoring or to prepare

a demonstration under R18-9-A215(E) within three months after the effective date of new or adjusted AWQSSs, we request that language be added to the rule to give permittees and ADEQ flexibility to reach agreements to extend the three month period for initiating baseline monitoring or for submitting a demonstration under R18-9-A215(E).

ADEQ Response 27:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Comment 28: Interest Group

To provide more clarity to permittees with respect to baseline monitoring, we believe that the general baseline monitoring subsections in R18-9-A215(C)(1) should be grouped upfront and then followed by the language that distinguishes between groundwater versus discharge monitoring. We recommend the following reorganization: move subsection (c) to (a); move subsection (f) to (c); move subsection (h) to (d); and then put subsections (d) and (g) at the end.

ADEQ Response 28:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E). Due to this comment and others submitted on the proposed rule language, ADEQ has reorganized the structure of the Baseline Monitoring Requirements as is recommended by the commenter above.

Comment 29: Interest Group

We request that the discharge monitoring section of the baseline monitoring section include the ability for permittees with discharges subject to limits based on AWQSSs to negotiate a different frequency and duration of baseline monitoring on a permit-by-permit basis. This addition to the rule is critical to reduce unnecessary costs and burdens and to recognize that many discharges are stable and consistent in quality.

ADEQ Response 29:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and

others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Comment 30: Interest Group

We request that the language in this subsection should be removed. The language creates an unnecessary regulatory burden to report data that will eventually be submitted to ADEQ as part of the required baseline monitoring report. Current existing individual permits do not require intermittent reporting of ambient monitoring data. Rather, such data is submitted at the end of the required monitoring period. In addition, early submittal of such data ignores the technical reality that sufficient numbers of sampling events spread across an appropriate timeframe is required to establish an accurate baseline of either groundwater or effluent discharge. Early submittal of data before completing full baseline monitoring is therefore improper and could be used by ADEQ or others to support incorrect assertions regarding the state of groundwater or discharges at monitoring locations specified in the permit for new or adjusted AWQs.

ADEQ Response 30:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed rule language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). Additionally, proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language

reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring’s representative scope is larger, including natural background concentration and sources, as well as, off-property sources of a constituent.

Comment 31: Interest Group

ADEQ appears to have added language to the specific groundwater monitoring and discharge monitoring sections that was not in prior stakeholder drafts of the implementation rule. This language appears to give ADEQ broad discretion to set limits in permits even before the full baseline monitoring period has concluded for certain reasons, including an exceedance of a new or adjusted AWQS or an increasing trend in the monitoring data. Arbitrarily cutting short the baseline monitoring period is not only inconsistent with the statutory process in A.R.S. 49-243(B)(2) and (3) but also creates permit implementation concerns and other problems. This language must be removed as it appears to disregard the intended purpose of the rule as represented by ADEQ. A potential alternative to this language is to provide that the baseline monitoring period may be shortened or lengthened if the permittee so requests and ADEQ approves the request.

ADEQ Response 31:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring

shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring's representative scope is larger, including natural background concentration and sources, as well as, off-property sources of a constituent.

Comment 32: Interest Group

Although this language makes collection of groundwater monitoring at up, cross, or down gradient wells discretionary, the language should be removed because it creates unexplained suggestions contrary to the statutory process for setting limits at applicable points of compliance in A.R.S. § 49-243(B)(3). For instance, although the rule explains where groundwater sampling should be conducted for purposes of baseline monitoring (i.e., at applicable point of compliance monitoring locations), this language in proposed (C)(1)(e) suggests that baseline monitoring can be conducted at other locations, which creates confusion.

ADEQ Response 32:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E). Due to comments submitted on this proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(1)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 33: Interest Group

The requirement to provide “a demonstration of the background concentrations of the pollutant at the facility’s site” to support a demonstration that a pollutant is not likely to be present in a facility’s discharge is counterintuitive and should be removed. The requirement appears to require background monitoring of groundwater or effluent when the purpose of the demonstration is to exempt a permittee from background or baseline monitoring. This requirement should be removed from the text of the rule.

In its place, we recommend inserting the following: “Process or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.”

ADEQ Response 33:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has endorsed the commenter’s suggested language in the final rule.

Comment 34: Interest Group

Proposed rule R18-9-A215(F) appears to give ADEQ broad authority to require facilities without discharge or groundwater monitoring locations in their existing individual APPs to mandate installation of groundwater monitoring wells or discharge

monitoring when prior determinations were made that such monitoring was not required. This language should be removed or at least some type of reasonable criteria should be added to ensure that ADEQ only exercises the authority envisioned under the language when appropriate based on the presence of other relevant and reliable information.

ADEQ Response 34:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (I). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the language in the final rule to include a central criterion for when the Department may require permittees *without* ongoing monitoring specified in their individual permit to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS. That criterion is “...if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility’s discharge.” In preparation for this rulemaking, ADEQ scrutinized the individual permits and found that around 30 permits (out of approximately 500) do not have ongoing monitoring requirements. In most cases, this was specified in the permits due to the fact that the facilities released process water into sealed and contained, double-lined impoundments which can be assumed with reasonable certainty that no release or discharge from them can occur to the surrounding soils, vadose zone or aquifers under the approved design, construction and operation. With that said, and despite the fact that it is unlikely ADEQ would exercise this right, the Department wishes to retain the ability to require the reasonable characterization of such a facility’s discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS if the above criterion is present. This is because the determinations to not require discharge and/or groundwater monitoring during the original application review and permit issuance were made under a previous set of Aquifer Water Quality Standards. Given the new and adjusted AWQSs being added through this collective set of rulemakings to the previous set of AWQSs, the Department’s determinations concerning ongoing monitoring and other aspects of the permit may need to be re-evaluated as the factors relied upon in making those determinations have changed.

Comment 35: Industry

We support ADEQ’s apparent intent to incorporate new or adjusted AWQS into existing individual APPs consistent with the statutory language at A.R.S. § 49-243(B)(2) and (3) and the implementing regulatory language at A.A.C. R18-9-A205(C). For groundwater points of compliance (“POCs”), this approach calls for a determination of existing aquifer water quality at the POCs before aquifer quality limits are imposed in the permit. However, we request that this approach could be reflected more clearly in the proposed rule, and that some elements of the proposed rule are confusing and not fully consistent with the overall approach.

ADEQ Response 35:

ADEQ appreciates the comment. Due to this comment and others submitted on the propped rule language showing concern over whether the language is in accord with the governing statute at A.R.S. § 49-243(B)(2) and (3), ADEQ has revised the rule

language to make clear that it is in accord. For example, consider Final Rule R18-9-A215, subsection (G), which requires a permittee, after the conclusion of Baseline Monitoring, to submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS in accordance with R18-9-A205. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS in accordance with R18-9-A205. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3).

Comment 36: Industry

ADEQ should not have to “approve” a demonstration under A.R.S. § 49-223(G) that a particular pollutant with a new or adjusted AWQS is not likely to be present in a discharge.

ADEQ Response 36:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G). The final rule language allows the submission of a “not likely” demonstration itself to be sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 37: Industry

ADEQ should have the flexibility to allow for different schedules for commencement of baseline monitoring or submission of demonstrations under A.R.S. § 49-223(G).

ADEQ Response 37:

ADEQ appreciates the comment. Due to this comment and others, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which

would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language (*see* Final Rule, subsection (H)) for the “not likely” demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 38: Industry

ADEQ should not have the ability to cut short the baseline monitoring period unless the permittee concurs with this decision.

ADEQ Response 38:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule.

However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). Additionally, proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring’s representative scope is larger, including natural background concentration and sources, as well as, off-property sources of a constituent.

Comment 39: Industry

Permittees should not have to submit baseline monitoring data during the monitoring period, but instead only at the end of that

period as part of the baseline monitoring report (note that periodic monitoring for some pollutants covered in the new proposals, such as arsenic, will be occurring under existing permits, and that data will be promptly reported to ADEQ under those permits).

ADEQ Response 39:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 40: Industry

A.A.C. R18-9-A215(C)(1) would benefit from reorganization to improve clarity.

ADEQ Response 40:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E). Due to this comment and others submitted on the proposed rule language, ADEQ has reorganized the structure of the Baseline Monitoring Requirements.

Comment 41: Industry

References to monitoring at up, down or cross gradient wells, even if such monitoring is not mandatory, create confusion and should be eliminated.

ADEQ Response 41:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(1)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 42: Industry

The criteria for making a demonstration under A.R.S. § 49-223(G) should be modified.

ADEQ Response 42:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration language. Final Rule R18-9-A215,

subsection (H) reads, “[a] pollutant with a new or adjusted AWQS shall be removed from the scope of Baseline Monitoring upon a demonstration that the pollutant is not likely to be present in a facility’s discharge. The Department may require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWQS after review of the demonstration if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Demonstrations may include, but are not limited to: (1) [a] characterization of the facility’s discharge in relation to the pollutant with a new or adjusted AWQS; (2) [p]ast monitoring and sampling data at the facility and the facility’s site; or (3) [p]rocess or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.” This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration. This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration. It should be noted that the submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 43: Utility

While we support the agency’s goal of ensuring environmental protection, we believe the proposed measures will lead to significant operational challenges and unintended consequences for regulated facilities, other stakeholders, and analytical laboratories.

ADEQ Response 43:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsections (D), (E) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule language for proposed R18-9-A215, specifically addressing stakeholder concerns pertaining to operational challenges, unintended consequences for regulated facilities and analytical laboratory considerations. Concerning operational challenges, the Department notes that subsections (D) and (H) address many of the concerns stakeholders have cited on this topic. For example, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the

adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Final Rule, subsection (E)(4) addresses approved sampling methods for new or adjusted AWQS. ADEQ has notified the Arizona Department of Health Services (ADHS) of the proposed establishment of Bromate, Chlorite, Haloacetic acids and Uranium as new Aquifer Water Quality Standards (AWQSs). ADEQ agrees that at the time of this rulemaking, there are no ADHS - approved wastewater methods for Bromate, Chlorite nor Haloacetic acids. However, the final rule accounts for this situation with the following language, “[s]ampling shall be conducted using an [ADHS] approved method for each pollutant with a newly established or adjusted [Aquifer Water Quality Standard] AWQSs, if available. If an [ADHS] approved method for a pollutant with a newly established or adjusted AWQSs does not exist, sampling shall be conducted using an EPA approved method or a method specified by the Director.” For example, EPA Method 300.1 is an appropriate method for chlorite and bromite baseline monitoring in drinking water and groundwater. Additionally, Standard Methods 6251 for Haloacetic acids (HAAs) is an appropriate method for determining the concentration of HAAs in water and wastewater. Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 44: Utility

Monthly Discharge Sampling Frequency. The requirement for monthly discharge sampling is excessively burdensome, especially for facilities with consistent, stable discharge characteristics. In cases where there are no significant operational or process changes, the value of frequent sampling is minimal and does not justify the associated costs or effort. Less frequent sampling, such as semiannually, would provide sufficient data for regulatory oversight while reducing undue strain on facilities and laboratories and control the potential for undue costs to be passed on to utility customers. Recommendation: Adopt a tiered or site-specific sampling frequency that reflects discharge stability and operational changes rather than imposing a uniform monthly requirement.

ADEQ Response 44:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 45: Utility

Challenges with Empty Impoundments. Another area of concern involves the treatment of impoundments that are routinely kept in an empty state (e.g., stormwater ponds). Facilities often face significant challenges in addressing these structures due to the

practical inability to collect samples when no water is present. This limitation could lead to delays in site characterization or, worse, unintentional noncompliance if the agency does not approve a facility's demonstration that specific pollutants are absent from its discharge. Providing clearer guidance and flexibility in demonstrating pollutant absence is essential to prevent unnecessary compliance risks and operational disruptions. Recommendation: Provide guidance for addressing empty impoundments that ensures compliance while recognizing the practical limitations of sampling under such conditions.

ADEQ Response 45:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, "...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein." While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a "not likely" demonstration pursuant to subsection (H). Additionally, the rule language for the "not likely" demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a "not likely" demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge. Furthermore, a request for an alternative baseline monitoring timeframe, duration and frequency could leverage or include in a proposal a similar approach to that specified in the individual APP "Technical Requirements" rule, specifically R18-9-A202(A)(4), R18-9-A202(A)(8)(B)(vi), etcetera.

Comment 46: Utility

Substantial Increase in Costs, Personnel, and Backlog. The proposed rule changes will result in a substantial increase in costs at the site level and resource demands for analytical laboratories. The heightened sampling and analytical requirements will necessitate additional personnel, equipment, and infrastructure to manage the increased workload. Due to other routine job functions, on site personnel do not have the bandwidth to address the increased sampling and this task will require hiring additional contractors at an increased cost. Smaller facilities, in particular, may struggle to comply due to limited budgets and

resources, leading to potential backlogs and delays in meeting regulatory deadlines.

ADEQ Response 46:

ADEQ appreciates the comment. While ADEQ acknowledges that the Final Rule at R18-9-A215 will result in a cost increase for applicable permittees and a resource demand for analytical laboratories, the Department believes this rule language and its structure represent the least burdensome orientation necessary to properly implement new or adjusted AWQSs into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

In preparation for this rulemaking, ADEQ estimated that the analytical laboratory fees would cost \$4,500 for 8 monitoring events for all seven (7) of the new or adjusted AWQSs at one monitoring location. The monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The employee labor costs were estimated at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then, ADEQ estimated the employee labor costs for preparing the baseline monitoring report with a request to establish Alert Levels and Aquifer Quality Limits for all 7 parameters. This effort included a draft report, internal review, final report edits, and submission to ADEQ. The employee effort for the baseline monitoring report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report for a total of \$15,000.

Additionally, due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see* generally, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if

the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Comment 47: Utility

Submittal of Baseline Discharge and Groundwater Monitoring Data Throughout Monitoring Period. Given the objective of characterizing discharges and associated impacts, submittal of incomplete/partial data throughout the monitoring period is unwarranted, burdensome, and does not contribute to regulatory compliance. The data set as a whole will be presented in the Baseline Monitoring Report where it can be properly evaluated, and conclusions supported.

ADEQ Response 47:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 48: Utility

Consider developing clear, streamlined procedures for facilities to demonstrate the absence of pollutants without requiring extensive sampling or lengthy approval processes.

ADEQ Response 48:

Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see generally*, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if

the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Comment 49: Utility

We appreciate the agency's commitment to stakeholder engagement and urge you to carefully weigh the potential impacts of these proposals on the regulated community. By incorporating greater flexibility and clarity into the rulemaking process, the agency can achieve its regulatory objectives without imposing undue burdens.

ADEQ Response 49:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to be more flexible and clear while still achieving regulatory objectives in an orientation that the Department believes is the least burdensome necessary to properly implement new or adjusted AWQS into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

Comment 50: Local Government / Utility

Due to the number of APP permitted facilities operated by us and thereby the number of compliance monitoring locations, we are concerned that section R18-9-A215(C) will require us to begin baseline monitoring for routine discharge and groundwater within 3 months from the effective date of new or adjusted AWQS. This will also be a requirement each time that ADEQ releases new or adjusted AWQS in the future. Due to the extra burden this will place on our already tight budget, we request that ADEQ modify this timeline to allow for the baseline monitoring for a given permit to begin within 18 months from the effective date of new or adjusted AWQS. This would allow entities with many permits to begin baseline monitoring for one permit at a later date than another permit, and across several budget years.

This modification will not interfere with ADEQ's requirement to have all permit holders submit an administratively complete amendment application no later than four years after the effective date as proposed in R18-9-A215(B). Because the baseline monitoring will take 24 months of sampling, even a permit holder who begins baseline monitoring at the very end of our proposed 18 months would be able to complete the baseline monitoring at 42 months. In the given example, this permit holder would complete their monitoring with 6 months until the application deadline. Extending this time line is a justified request, and will allow entities with many permits to balance their baseline monitoring efforts across the four year implementation instead of starting baseline monitoring for all permits within the first 3 months.

ADEQ Response 50:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see* generally, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, "...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline

Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. While ADEQ acknowledges that the Final Rule at R18-9-A215 (including the changes described above) will result in a cost increase at facilities, the Department believes this rule represents the least burdensome orientation necessary to properly implement new or adjusted AWQSs into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

Comment 51: Interest Group

Concerns About Timelines and Exemptions. ADEQ’s proposed timelines for compliance - up to four years - are excessive, given that many federal standards have been in place for decades. Additionally, provisions allowing exemptions under R18-9-A215 undermine the effectiveness of these standards. We recommend that ADEQ:

- Reduce compliance timelines to no more than two years.
- Eliminate exemptions that weaken the protective intent of AWQS.
- Conduct immediate reviews of high-risk facilities, prioritizing those with documented violations.

ADEQ Response 51:

ADEQ appreciates the comment. ADEQ followed the lead of EPA in allowing individually permitted facilities a reasonable number of years to come into compliance with new water quality standards (*see* 89 *Federal Register* 32533). In EPA’s Final Rule for the new PFAS MCLs (effective 6/25/24) under the Safe Drinking Water Act (SDWA) regulating Public Water Systems (PWSs) the following timeline for compliance is laid out, including conducting monitoring within approximately 3 years of the effective date and installation of any necessary capital improvements in order to come into compliance within approximately 5 years of the effective date,

Consistent with the timelines set out under [Safe Drinking Water Act] SDWA, [Public Water Systems] PWSs are required to conduct their initial monitoring by April 26, 2027, and to conduct [Public Notice] PN and include PFAS information in the [Consumer Confidence Reports] CCR. After carefully considering public comment, the EPA is extending the

compliance deadline for all systems nationwide to meet the MCL to allow additional time for capital improvements. As such, PWSs are required to make any necessary capital improvements and comply with the PFAS MCLs by April 26, 2029 [89 FR 32533].

The only exemption present in the final rule at R18-9-A215 is for a “not likely” demonstration (*see* Final Rule, subsection (H)). This exemption is mandated by Arizona statute at A.R.S. § 49-223(G). The Department is considering a risk-based priority in the development of an amendment schedule pursuant to Final Rule subsection (A). ADEQ believes the structure of this rule properly balances the agency’s mission of protecting public health and the environment with a reasonable time frame for compliance for the regulated community.

Comment 52: Interest Group

Environmental Justice Considerations. We are concerned that the draft rule does not adequately address environmental justice impacts. Communities near high-risk facilities, such as the Havasupai Tribe near the Pinyon Plain Mine, face disproportionate risks of groundwater contamination. ADEQ must incorporate environmental justice analyses and engage directly with impacted communities, particularly Tribal nations, to ensure equitable protections.

ADEQ Response 52:

ADEQ appreciates the comment. Concerning Environmental Justice (EJ), in the case of this rulemaking, A.R.S. § 49-223 mandates that ADEQ open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency’s (EPA’s) establishment of new or adjusted MCLs. Through the Aquifer Protection Program (APP), the AWQSs apply to facilities discharging regulated pollutants to the ground in all Arizona lands under state jurisdiction. No special application of the standards exists beyond the specifics of the individual APP permits themselves. Besides the ability of the Department to establish an alternative AWQS upon receipt of “substantial opposition” from stakeholders, the AWQS statutory mandate from the Department is clear and simple. ADEQ carefully considered and took actions to ensure both fair treatment and meaningful involvement as part of the AWQS rulemaking. All stakeholders, including communities near high-risk facilities, tribes and other interested parties were welcome to participate in ADEQ’s extensive public participation process for this rulemaking. As part of this process, ADEQ held a 30 day public comment period in accordance with A.R.S. 41-1023(B), as well as, held nine formal stakeholder events over the course of over 2 years (9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25). With respect to tribal outreach, ADEQ Leadership presented a rulemaking briefing on the AWQS rulemaking at the Intertribal Council of Arizona (ITCA) - Tribal Leaders’ Water Policy Council Meeting on 8/23/23 (the Havasupai Tribe is a member of ITCA). Additionally, the Department held dedicated Tribal Listening Sessions throughout the development of the rule; specifically on 9/11/23, 12/12/23 and 11/20/24. ADEQ has for years aimed to meet the requirements in statute for tribal relation responsibilities pursuant to A.R.S. § 41-2051(C).

ADEQ believes the terms in the current tribal consultation and collaboration policy were followed while conducting this rulemaking. The policy can be reviewed here: https://static.azdeq.gov/policy/ADEQ_Tribal_Policy.pdf.

Comment 53: Utility

We encourage ADEQ to consider the timing of the process by which a regulated entity subject to R18-9-A215 would make a demonstration pursuant to R18-9-A215(E). As written, APP permittees subject to the rule must initiate Baseline Monitoring within three months of the effective date of a new or adjusted AWQS unless a demonstration is made pursuant to R18-9-A215(E). It is unclear exactly what this demonstration must entail, and it is likely that permittees will seek a pre-demonstration meeting with ADEQ to better understand the requirements. Three months does not leave sufficient time to compile a demonstration and obtain approval from ADEQ – particularly if there are multiple entities seeking to make similar demonstrations.

ADEQ Response 53:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Also, the Department has plans to release an amendment schedule pursuant to Final Rule R18-9-A215(A), and other guidance on Baseline Monitoring and the “not likely” demonstration, pursuant to Final Rule R18-9-A215(H).

Comment 54: Utility

It is less clear how the Proposed Rule would be applied to complex permits. A Baseline Monitoring plan will likely need to be tailored to capture relevant information that ADEQ seeks. It may not be relevant or necessary to conduct Baseline Monitoring at all groundwater points of compliance, discharge monitoring locations, and/or other monitoring locations identified in a complex

APP. ADEQ should provide a process for complex permits to develop a Baseline Monitoring plan in consultation with ADEQ.

ADEQ Response 54:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for clarity. The Department believes the Final Rule at R18-9-A215 delineates the requirements of Baseline Monitoring at subsection (E), while also providing sufficient and functional rule language for Baseline Monitoring timing and applicability at subsection (C), an opportunity for submission of a request for an alternative Baseline Monitoring timeframe, duration and/or frequency at subsection (D) and the Baseline Monitoring report requirements at subsection (G). The Department notes that Final Rule R18-9-A215(E) specifies which monitoring locations are required for baseline monitoring, limiting the scope to “...permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205.” The addition of Final Rule R18-9-A215, subsection (D), allows for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency, “...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 55: Utility

Usage of the Terms “Active Discharge” and “Limits Based on AWQS”. We recommend that ADEQ remove the term “active discharge” from the Proposed Rule. The term “active discharge” is undefined and differs from the definition of discharge in A.R.S. § 49-201(12), leading to confusion. Instead of referring to “active discharge, groundwater points of compliance and/or other monitoring locations” in R18-9-A215, we recommend that ADEQ refer to “groundwater points of compliance, discharge monitoring locations, or other monitoring locations specified in the permit.”

ADEQ Response 55:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

Comment 56: Utility

It is not clear what is meant by “limits based on AWQS.” We recommend that ADEQ utilize the terms from R18-9-A205 and replace the language “limits based on AWQS” with “alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205.”

ADEQ Response 56:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “limits based on AWQS” with “alert levels, discharge limitations or AQLs based on AWQSS pursuant to R18-9-A205”.

Comment 57: Utility

Definition of “Baseline Monitoring”. The Proposed Rule is inconsistent in its use of the terms Baseline Monitoring, Baseline Discharge and/or Groundwater Monitoring. We believe that Baseline Monitoring should be a defined term meant to encompass baseline groundwater monitoring and baseline discharge and/or other monitoring locations.

ADEQ Response 57:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215. Due to this comment and others submitted on the proposed rule language, ADEQ has made its usage of the term “Baseline Monitoring” more consistent in the final rule. ADEQ does not believe the term “Baseline Monitoring” needs to be defined for the purposes of final rule as the term inherently describes its function for the purpose of developing data to be used to appropriately implement new or adjusted AWQS into the applicable, issued individual permits.

Comment 58: Utility

Waivers and Demonstrations of Constituents Not Likely to be Present. A demonstration that a pollutant is not likely to be present in a facility’s discharge, per proposed rule subsection (E), provides only examples where monitoring has already occurred and submitted as evidence. We suggest adding language to allow for operational or design practices to demonstrate that pollutants with new or adjusted AWQS are not likely to be present. For example, if a facility does not utilize disinfection products, a facility should not be required to have data establishing the absence of disinfection byproducts.

ADEQ Response 58:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration rule language to more closely reflect A.R.S. § 49-223(G). Additionally, the revised rule makes more clear that the submission of a demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Also, the final rule language allows demonstrations to include, but to not be limited to, (1) a characterization of the facility’s discharge in relation to the pollutant with a new or adjusted AWQS, (2) past monitoring and sampling data at the facility and the facility’s site; or (3) process or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.

Comment 59: Utility

Monitoring Timeline. Proposed rule R18-9-A215(B)(2) requires monitoring to begin “within three months of the effective date of a new or adjusted AWQS unless a demonstration is approved by the Department.” As noted above, three months is an insufficient amount of time for a facility to make, and for ADEQ to approve, a demonstration. In addition, regulated entities should not be required to conduct baseline sampling while waiting for ADEQ to review and make a decision regarding a demonstration.

Consistent with its comments above, we suggest the following revision:

R18-9-A215(C) - *Persons holding Individual APPs that were issued as of the effective date of a new or adjusted AWQS with ~~active discharge~~ groundwater points of compliance, discharge monitoring locations and/or other monitoring locations specified in the permit that are subject to ~~limits~~ alert levels, discharge limitations, or AQLs based on AWQSs pursuant to R18-9-A205 shall begin Baseline Discharge and/or Groundwater Monitoring for all new or adjusted AWQS or submit a demonstration pursuant to subsection (E) to the Department within three months of the effective date of a new or adjusted AWQS ~~unless a demonstration is approved by the Department.~~*

ADEQ Response 59:

ADEQ appreciates the comment. See generally, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Additionally, at Final Rule, R18-9-A215, subsection (E)(1), ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations. Also, at Final Rule R18-9-A215, subsection (E)(1), ADEQ has replaced “limits based on

AWQS” with “alert levels, discharge limitations or AQLs pursuant to R18-9-A205”.

Comment 60: Utility

Clarification of Sample Collection Requirements. We request that ADEQ improve the clarity of the Baseline Monitoring sampling requirement by specifying whether samples should be discrete or “grab” samples, or composite samples.

ADEQ Response 60:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E)(2). Similarly to the applicability of Baseline Monitoring on individual APP permittees in subsection (C), the type of sampling (when it comes to discrete or grab or composite) expected when conducting Baseline Monitoring remains the same as the original permit’s routine discharge or groundwater monitoring sampling requirements, pursuant to R18-9-A206.

Comment 61: Utility

Clarification is necessary on the Baseline Monitoring Report submittal as to when a permit that has both discharge and groundwater monitoring specified in the permit should submit the report. Provided that the baseline report is to be submitted within three months following the last sample collection and that the discharge and monitoring well points are on different monitoring schedules, clarification is necessary as to whether separate baseline reports are required or a baseline report including both.

ADEQ Response 61:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant language. Final Rule, subsection (F)(2) states, “[p]ermittees subject to both Groundwater and Discharge Baseline Monitoring may develop a combined, comprehensive Baseline Monitoring Report within three months of receipt of the last sample result.” Additionally, Final Rule, subsection (G) requires, “[a]fter the conclusion of Baseline Monitoring, a permittee shall submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in subsection (A). The Baseline Monitoring Report shall be a component of the amendment application...” Also, concerning flexibility, Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 62: Utility

Clarification is necessary if analytes can be excluded or not from Baseline Monitoring if the compound is already on the permit and significant historical data sets already exist. For example, Arsenic and *E. coli* are already listed in our permits for both

discharge and groundwater monitoring, with significant historical data sets in existence.

ADEQ Response 62:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsections (D), (E) and (F). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule. Final Rule, subsection (E)(3) allows, “[p]ermittees that have collected relevant samples prior to the Baseline Monitoring period at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs pursuant to R18-9-A205, may use that data to develop the Baseline Monitoring Report. Previously collected data may be used to shorten or eliminate a Baseline Monitoring period if all data components are (a) [m]ethodologically sound, (b) [r]epresent a complete data set per the applicable requirements of Baseline Monitoring, and (c) [m]eets other applicable requirements of Baseline Monitoring.” Additionally, Final Rule, subsection (F)(1) states, “[a]t the conclusion of Baseline Monitoring, or upon the compilation of a complete and representative data set pursuant to subsection (E)(3) above, permittees shall develop a Baseline Monitoring Report within three months of receipt of the last sample result.” Also, concerning flexibility, Final Rule, subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 63: Utility

Proposed Rule R18-9-A215(F) - The term "active discharge" is used. Please refer to the comment above under R18-9-A215(C)(1)(c).

ADEQ Response 63:

ADEQ appreciates the comment. *See generally*, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rulemaking does not create a requirement for a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is not applicable to the subject matter of the rule.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

Not applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

TITLE 18. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER POLLUTION CONTROL

ARTICLE 1. AQUIFER PROTECTION PERMITS - GENERAL PROVISIONS

Section

R18-9-101. Definitions

ARTICLE 2. AQUIFER PROTECTION PERMITS - INDIVIDUAL PERMITS

Section

R18-9-A215. New or Adjusted Aquifer Water Quality Standards

ARTICLE 1. AQUIFER PROTECTION PERMITS - GENERAL PROVISIONS

Section

R18-9-101. Definitions

1. "Aggregate" No Change
2. "Alert level" No Change
3. "AQL" means an aquifer quality limit and is a permit limitation set for aquifer water quality measured at the point of compliance that either represents an Aquifer Water Quality Standard or, if an Aquifer Water Quality Standard for a pollutant is exceeded in an aquifer at the time of permit issuance or amendment to incorporate a new or adjusted aquifer water quality standard, represents the ambient or baseline water quality for that pollutant.
4. "Aquifer Protection Permit" means an individual ~~permit~~ or a general permit issued under A.R.S. §§ 49-203, 49-241 through 49-252, and Articles 1, 2, and 3 of this Chapter.
5. "Aquifer Water Quality Standard" or "AWQS" or "AWQSS" means a standard or standards established under A.R.S. §§ 49-221 and 49-223.
6. "AZPDES" No Change
7. "BADCT" No Change
8. "Bedroom" No Change
9. "Book net worth" No Change
10. "CCR" No Change
11. "CCR landfill" No Change
12. "CCR surface impoundment" No Change
13. "CCR unit" No Change

14. “Cesspool” No Change
15. “Chamber technology” No Change
16. “CMOM plan” No Change
17. “Design capacity” No Change
18. “Design flow” No Change
19. “Direct reuse site” No Change
20. “Disposal works” No Change
21. “Drywell” No Change
22. “Dwelling” No Change
23. “Final permit determination” No Change
24. “Gray water” No Change
25. “Groundwater quality protection permit” No Change
26. “Homeowner’s association” No Change
27. “Injection well” No Change
28. “Intermediate stockpile” No Change
29. “Land treatment facility” No Change
30. “Mining site” No Change
31. “New or adjusted aquifer water quality standard” or “New or adjusted AWQS” means a standard or standards established under A.R.S. §§ 49-221 and/or 49-223 after January 1, 2025, for the purposes of R18-9-A215. A “New or adjusted AWQS” becomes an established AWQS, pursuant to R18-9-101(5), for the purposes of an individual Aquifer Protection Permit when a determination is made by the Department on whether new or adjusted Alert Levels, Discharge Limits and/or AQLs are required pursuant to R18-9-A215(G).
32. “Nitrogen Management Area” means an area designated by the Director for which the Director prescribes measures on an area-wide basis to control sources of nitrogen, including cumulative discharges from on-site wastewater treatment facilities, that threaten to cause or have caused an exceedance of the Aquifer Water Quality Standard for nitrate.
33. “Notice of Disposal” means a document submitted to the Arizona Department of Health Services or the Department before September 27, 1989, giving notification of a pollutant discharge that may affect groundwater.
34. “On-site wastewater treatment facility” means a conventional septic tank system or alternative system that is installed at a site to treat and dispose of wastewater of predominantly human origin that is generated at that site. A.R.S. § 49-201(29). An on-site

wastewater treatment facility does not include a pre-fabricated, manufactured treatment works that typically uses an activated sludge unit process and has a design flow of 3000 gallons per day or more.

35. "Operational life" means the designed or planned period during which a facility remains operational while being subject to permit conditions, including closure requirements. Operational life does not include post-closure activities.
36. "Person" means an individual, employee, officer, managing body, trust, firm, joint stock company, consortium, public or private corporation, including a government corporation, partnership, association or state, a political subdivision of this state, a commission, the United States government or any federal facility, interstate body or other entity. A.R.S. § 49-201(33). For the purposes of permitting a sewage treatment facility under Article 2 of this Chapter, person does not include a homeowner's association.
37. "Pilot project" means a short-term, limited-scale test designed to gain information regarding site conditions, project feasibility, or application of a new technology.
38. "Process solution" means a pregnant leach solution, barren solution, raffinate, or other solution uniquely associated with the mining or metals recovery process.
39. "Residential soil remediation level" means the applicable predetermined standard established in 18 A.A.C. 7, Article 2, Appendix A.
- ~~39~~40. "Seasonal high water table" means the free surface representing the highest point of groundwater rise within an aquifer due to seasonal water table changes over the course of a year.
40. "Setback" means a minimum horizontal distance maintained between a feature of a discharging facility and a potential point of impact.
41. "Sewage" means untreated wastes from toilets, baths, sinks, lavatories, laundries, other plumbing fixtures, and waste pumped from septic tanks in places of human habitation, employment, or recreation. Sewage does not include gray water as defined in A.R.S. § 49-201(20), if the gray water is reused according to 18 A.A.C. 9, Article 7.
42. "Sewage collection system" means a system of pipelines, conduits, manholes, pumping stations, force mains, and all other structures, devices, and appurtenances that collect, contain, and convey sewage from its sources to the entry of a sewage treatment facility or on-site wastewater treatment facility serving sources other than a single-family dwelling.
43. "Sewage treatment facility" means a plant or system for sewage treatment and disposal, except for an on-site wastewater treatment facility, that consists of treatment works, disposal works and appurtenant pipelines, conduits, pumping stations, and related subsystems and devices. A sewage treatment facility does not include components of the sewage collection system or the reclaimed water distribution system.

445. "Surface impoundment" means a pit, pond, or lagoon with a surface dimension equal to or greater than its depth, and used for the storage, holding, settling, treatment, or discharge of liquid pollutants or pollutants containing free liquids.
456. "Tracer" means a substance, such as a dye or other chemical, used to change the characteristic of water or some other fluid to detect movement.
467. "Tracer study" means a test conducted using a tracer to measure the flow velocity, hydraulic conductivity, flow direction, hydrodynamic dispersion, partitioning coefficient, or other property of a hydrologic system.
478. "Treatment works" means a plant, device, unit process, or other works, regardless of ownership, used for treating, stabilizing, or holding municipal or domestic sewage in a sewage treatment facility or on-site wastewater treatment facility.
489. "Typical sewage" means sewage conveyed to an on-site wastewater treatment facility in which the total suspended solids (TSS) content does not exceed 430 mg/l, the five-day biochemical oxygen demand (BOD5) does not exceed 380 mg/l, the total nitrogen does not exceed 53 mg/l, and the content of oil and grease does not exceed 75 mg/l.
4950. "Underground storage facility" means a constructed underground storage facility or a managed underground storage facility. A.R.S. § 45-802.01(21).
501. "Waters of the United States" means:
- a. All waters that are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters that are subject to the ebb and flow of the tide;
 - b. All interstate waters, including interstate wetlands;
 - c. All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any waters:
 - i. That are or could be used by interstate or foreign travelers for recreational or other purposes;
 - ii. From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
 - iii. That are used or could be used for industrial purposes by industries in interstate commerce;
 - d. All impoundments of waters defined as waters of the United States under this definition;
 - e. Tributaries of waters identified in subsections (a) through (d);
 - f. The territorial sea; and
 - g. Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in subsections (a) through (f).

ARTICLE 2. AQUIFER PROTECTION PERMITS – INDIVIDUAL PERMITS

PART A. APPLICATION AND GENERAL PROVISIONS

Section

Revision: 6/14/2024

R18-9-A215. New or Adjusted Aquifer Water Quality Standards

A. Permit Amendment Schedule. Upon the effective date of a new or adjusted AWQS, the Director shall develop a schedule to amend issued individual permits to reflect the new or adjusted AWQS pursuant to R18-9-A211.

B. Permit Amendment Requirement. Persons holding issued individual permits as of the effective date of a new or adjusted AWQS shall submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in subsection (A).

1. Notwithstanding the amendment schedule described in subsection (A) above, administratively complete applications shall be submitted to the Department no later than four years after a new or adjusted AWQS effective date.

2. The requirement to submit an application to amend in subsection (B) is not applicable for pollutants with a new or adjusted AWQS that are within the scope of a demonstration submitted pursuant to subsection (H).

C. Baseline Monitoring. Persons with issued individual permits as of a new or adjusted AWQS effective date shall begin Baseline Monitoring, pursuant to subsection (E) below, for a new or adjusted AWQS within three months, unless:

1. The permit has no ongoing monitoring requirements.

2. The permittee has not begun ongoing monitoring.

3. The permittee has submitted a request for an alternative timeframe, duration or frequency pursuant to subsection (D) below, or

4. The permittee has submitted a demonstration pursuant to subsection (H).

For the purposes of this subsection, “ongoing monitoring” means permit-required monitoring at groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWOSs pursuant to R18-9-A205.

D. Alternative Baseline Monitoring Timeframe, Duration and/or Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and/or sampling frequency within three months of a new or adjusted AWOS effective date with reasonable cause for the request included therein.

E. Baseline Monitoring Requirements.

1. Baseline Monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWOSs pursuant to R18-9-A205.

2. Subsection R18-9-A206(B) applies to Baseline Monitoring.

3. Permittees that have collected relevant samples prior to the Baseline Monitoring period at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWOSs pursuant to R18-9-A205, may use that data to develop the Baseline Monitoring Report. Previously collected data may be used to shorten or eliminate a Baseline Monitoring period if all data components:

- a. Are sampled pursuant to subsection (E)(4) below.
 - b. Are analyzed using industry standard quality assurance and quality control procedures.
 - c. Collectively, are representative of a complete data set per the applicable requirements of Baseline Monitoring, and
 - d. Collectively, meet other applicable requirements of Baseline Monitoring.
4. Sampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.
5. Groundwater Monitoring. Permittees that are required to monitor groundwater shall conduct Baseline Monitoring for a new or adjusted AWQS at the point of compliance monitoring location(s) for eight quarters unless an alternative timeframe, duration or frequency is approved by the Department pursuant to subsection (D) above. The Director may lengthen the monitoring period if one or more of the following events occur:
- a. A deviation from an operational practice or design authorized in the permit;
 - b. An exceedance of any discharge limitation;
 - c. An exceedance of a new or adjusted AWQS;
 - d. A significant trend in the monitoring data; or
 - e. Any other significant issue that affects the representativeness of Baseline Monitoring.
6. Discharge Monitoring. Permittees that are required to monitor discharge or water quality shall conduct Baseline Monitoring for a new or adjusted AWQS at the discharge monitoring location(s) on a monthly frequency for one year unless an alternative timeframe, duration or frequency is approved by the Department pursuant to subsection (D) above. If a permittee conducting Discharge Baseline Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware. The Director may lengthen the monitoring period if one or more of the following events occur:
- a. A deviation from an operational practice or design authorized in the permit;
 - b. An exceedance of any discharge limitation;
 - c. An exceedance of a new or adjusted AWQS;
 - d. A significant trend in the monitoring data; or
 - e. Any other significant issue that affects the representativeness of Baseline Monitoring.

E. Baseline Monitoring Report.

- 1. At the conclusion of Baseline Monitoring, or upon the compilation of a complete and representative data set pursuant to

subsection (E)(3) above, permittees shall develop a Baseline Monitoring Report within three months of receipt of the last sample result.

2. Permittees subject to both Groundwater and Discharge Baseline Monitoring may develop a combined, comprehensive Baseline Monitoring Report within three months of receipt of the last sample result.
3. The report shall characterize the discharge and/or groundwater quality at the permit-required monitoring locations pursuant to subsections (C) and (E) of this section.
4. The report shall include:
 - a. The sampling results of discharge and/or groundwater monitoring for a pollutant with a new or adjusted AWQS.
 - b. A demonstration of the baseline concentration of a new or adjusted AWQS at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AOLs based on AWQSS pursuant to R18-9-A205.
 - c. Laboratory data from the entire Baseline Monitoring period, and
 - d. An Alert Level, Discharge Limitation and/or AOL proposal in accordance with R18-9-A205, as applicable, for each pollutant with a new or adjusted AWQS.
5. A permittee may include additional information in a Baseline Monitoring Report.
6. The permittee shall submit the monitoring data in a manner prescribed by the Director.
7. After review by the Department, additional information may be required.

G. Report Review and Permit Amendment. After the conclusion of Baseline Monitoring, a permittee shall submit an administratively complete application to amend their permit to reflect a new or adjusted AWOS in accordance with the amendment schedule described in subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AOL is required for a new or adjusted AWOS in accordance with R18-9-A205. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AOL for a new or adjusted AWOS in accordance with R18-9-A205.

H. Unlikely to be Present in Discharge Demonstration. A pollutant with a new or adjusted AWOS shall be removed from the scope of Baseline Monitoring upon a demonstration that the pollutant is not likely to be present in a facility's discharge. The Department may require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWOS after review of the demonstration if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Demonstrations may include, but are not limited to:

1. A characterization of the facility's discharge in relation to the pollutant with a new or adjusted AWOS:

2. Past monitoring and sampling data at the facility and the facility's site; or
 3. Process or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.
- I. Permits Without Monitoring. The Department may require persons with issued individual permits as of the effective date of a new or adjusted AWQS without ongoing monitoring to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS within a reasonable amount of time if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility's discharge.
1. For the purposes of this subsection, "ongoing monitoring" means permit-required monitoring at groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AOLs based on AWQSs pursuant to R18-9-A205.
 2. A requirement to reasonably characterize discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS does not apply upon the submission of a demonstration pursuant to subsection (H). The Department may require a permittee to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS if, after review of a subsection (H) demonstration, the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 9 - Implementation

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of adding a new section at R18-9-A215 in Title 18, Chapter 9, Article 2 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to establish a clear procedure for implementation of new or adjusted Aquifer Water Quality Standards (AWQS) to the issued and existing individual Aquifer Protection Permits (APP). Before this rulemaking, such implementation was unaddressed and unclear. New or adjusted Aquifer Water Quality Standards (AWQS) are added to an existing list when the Federal Environmental Protection Agency (EPA) establishes new or adjusts existing Safe Drinking Water Act Maximum Contaminant Levels (MCL). Pursuant to Arizona Revised Statutes (A.R.S.) § 49-223, upon this EPA action, ADEQ must, within one year, open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. However, neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement those new or adjusted AWQSs into the existing and issued permits. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact public health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting a rule on the implementation of new or adjusted AWQSs into applicable, existing and issued individual APPs. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees (hereinafter: "permittees"), such as Mines, Industrial Facilities and Wastewater Treatment Plants, and, to a lesser extent, regulated parties under certain remediation projects, such as WQARF and VRP. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from this "AWQS Implementation" rulemaking.

A general benefit includes the State of Arizona and its constituents, due to this rulemaking's functional part in protecting the state's aquifers, allowing them to remain a viable asset to community water portfolios and individual well users alike.

General costs to permittees as a result of this new or adjusted AWQS implementation rule are likely minimal, potentially significant and indeterminate at this time. According to the proposed rule, applicable permittees with permit-required discharge and/or groundwater monitoring at the effective date of a new or adjusted AWQS would be required to begin "Baseline Monitoring" for any and all new or adjusted AWQSs with three months unless an alternative Baseline Monitoring timeframe, duration and/or frequency is proposed or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G). At the conclusion of Baseline Monitoring, a requirement to submit a Baseline Monitoring report to the Department as a component of an application to amend the individual permit comes into effect; where, after review, the Department determines whether new or adjusted Alert Levels, Discharge Limitations or Aquifer Quality Limits based on the AWQS are necessary pursuant to A.A.C. R18-9-A205.

Specific Impacts

Benefits to Stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQSs are to be implemented into existing and issued permits. Applicable permittees will be required to conduct Baseline Monitoring at discharge and groundwater monitoring locations, which could come as a considerable cost. However, permittees will have much of the infrastructure to conduct this monitoring already in place, as the rule requires the monitoring to occur at existing and established locations. With that said, the Department estimates that the analytical laboratory fees for applicable permittees will cost \$4,500 for (eight) 8 monitoring events for all seven (7) of the new or adjusted AWQSs at one monitoring location. The seven (7) new or adjusted AWQSs are detailed in the other four (4) Notices of Final Rulemaking (NFRMs) associated with this NFRM. The Department estimates that monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The Department estimates the employee labor costs at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all (eight) 8 monitoring events. Then, the Department estimated the employee labor costs for preparing the Baseline Monitoring Report with a request to establish Alert Levels, Discharge Limitations and/or Aquifer Quality Limits

for all 7 parameters. This effort includes a draft report, internal review, final report edits, and submission by the permittee to the Department. The employee effort for the Baseline Monitoring Report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for an estimated total of \$15,000.

Although many facilities will absorb the additional work load and infrastructure / incidentals needed into their existing labor force and equipment on site, certain permittees may need to acquire additional employees to help achieve the requirements.

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials is published on ADEQ’s dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Permittees will be the primary bearers of costs associated with this rulemaking. Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Benefits to Stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQs are to be implemented into existing and issued permits. Generally, the state and the constituents of the state benefit through the efficiency unto which protection of the aquifer resource is administered, safeguarding aquifers as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224.

D. Benefit/Cost Analysis:

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|------------------|-------------------------|---------------------|--|
| \$10,000 or less | \$10,001 to \$1,000,000 | \$1,000,001 or more | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|---|--|----------------------------------|-------------------------------------|
| Permittees: Mines, Industrial Facilities, Wastewater Treatment Plants | Applicable permittees will be required to conduct Baseline discharge and/or groundwater monitoring for new or adjusted AWQs, which entail sampling and analytical costs | Minimal to Moderate | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQs. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Minimal to Moderate | |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Minimal to Moderate | |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees

Permittees could see minimal to moderate costs due to this rulemaking. Applicable permittees will be required to conduct Baseline discharge and/or groundwater monitoring for new or adjusted AWQs, which entail sampling and analytical costs. The Department estimates that monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The Department estimates the employee labor costs at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then, the Department estimated the employee labor costs for preparing the Baseline Monitoring Report with a request to establish Alert Levels, Discharge Limitations and/or Aquifer Quality Limits for all 7 parameters. This effort includes a draft report, internal review, final report edits, and submission by the permittee to the Department as a component of a permit amendment application. The employee effort for the Baseline Monitoring Report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for an estimated total of \$15,000. Additional costs include an internally or externally developed amendment application and Departmental hourly fees for application review, permit writing, etcetera – pursuant to A.A.C. R18-14-102(B).

Small businesses as a segmented category

Generally, the same as the Permittees section above; albeit, taking into account the fact that small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases.

ADEQ

ADEQ could see minimal to moderate costs due to this rulemaking. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQs. Any additional costs incurred would generally be covered by increased fees paid by permittees.

In order to process the large number of individual APP permits that will need to be amended as a product of this rule and new or adjusted AWQs, ADEQ will incur costs for AWP-related staff expansion and performance of new AWQs-associated administrative responsibilities needed. ADEQ currently anticipates that it will need to hire new staff with the necessary technical expertise. These positions will include permit reviewers with engineering and hydrogeologic backgrounds, as well as, non-engineer staff for administrative tasks.

In order to support the implementation of this new rule, ADEQ plans on hiring 3 new full-time employees (FTE). Funding those positions will incur moderate costs to ADEQ annually which will be offset by permit service fees and annual fees.

Benefits to Stakeholders:

Permittees, Small Businesses as a segmented category & ADEQ

Benefits to stakeholders include significant clarity in administration and expectation for the Department and the applicable permittees, respectively, as to how new or adjusted AWQs are to be implemented into existing and issued permits. Generally, the state and the constituents of the state benefit through the efficiency unto which protection of the aquifer resource is administered, safeguarding aquifers as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

ADEQ estimates that, for the most part, this rulemaking will not have much of an impact on public or private employment. As is noted above, some permittees may need to hire additional help to meet the requirements of Baseline Monitoring for new or adjusted AWQs, but, in most cases, will be able to absorb the responsibility through existing employees, infrastructure and equipment. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permit applications is already in place. ADEQ anticipates that potentially hundreds of permits may need to be amended to update monitoring tables associated with new or adjusted AWQs. Any additional costs incurred would generally be covered by increased fees paid by permittees.

However, and as mentioned above, all applicable permittees, whether public or private, stand to benefit through the state establishment of a streamlined new or adjusted AWQs implementation process. As explained in subsection A of this EIS above, neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement new or adjusted AWQs into the existing and issued permits, which would lead to significant confusion and waste for ADEQ and the permittees.

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with the new or adjusted AWQs implementation rule that are borne by small businesses may be minimal to moderate. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Many small businesses subject to this rule likely have personnel, infrastructure and equipment already in place for conducting Baseline Monitoring. It is possible that permittees may need to hire additional personnel or a contractor in complying with these rules. Also, samples must be analyzed at a laboratory at a cost to the permittee. Additionally, permittees may choose to hire a consultant in developing their Baseline

Monitoring Report, an alternative Baseline Monitoring timeframe, duration and/or frequency request or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G).

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ estimates that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed new or adjusted AWQS implementation rule.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large likely have personnel, infrastructure and equipment already in place for conducting Baseline Monitoring. It is possible that permittees may need to hire additional personnel or a contractor in complying with these rules. Also, samples must be analyzed at a laboratory at a cost to the permittee. Additionally, permittees may choose to hire a consultant in developing their Baseline Monitoring Report, an alternative Baseline Monitoring timeframe, duration and/or frequency request or a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G).

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|---|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Used for all applicable permittees. Through stakeholder input, the Department removed from a previous draft a requirement for all applicable permittees to report throughout Baseline Monitoring in lieu of simply reporting all at once through the Baseline Monitoring Report at the end of the Baseline Monitoring period. The rule also allows permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS. |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Used for all applicable permittees. Through stakeholder input, the Department built more flexibility into the rule through the allowance of an alternative Baseline Monitoring timeframe, duration and/or frequency request, as well as an ability for a permittee to make a demonstration that a pollutant with a new or adjusted AWQS is not likely to be in a facility's discharge pursuant to A.R.S. § 49-223(G), which results in the pollutant not being subject to Baseline Monitoring. |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Used for all applicable permittees. Through stakeholder input, the Department removed from a previous draft a requirement for all applicable permittees to report throughout Baseline Monitoring in lieu of simply reporting all at once through the Baseline Monitoring Report at the end of the Baseline Monitoring period. The rule also allows permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS. |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more prescriptive than necessary (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

There should be little to no costs to private persons and consumers as this rule compels permittees to conduct Baseline Monitoring for all new or adjusted AWQSs. It is conceivable that a Wastewater Treatment Plant may increase the rates in their service area as a result of the requirement to conduct Baseline Monitoring, but that would be a relatively small amount due to the cost estimates projected for Baseline Monitoring outlined above.

G. A statement of the probable effect on state revenues:

This rulemaking will not result in a significant increase, nor decrease in state revenues. Increased and decreased costs to ADEQ are expected to be minimal, as explained above in the analysis of costs and benefits to ADEQ. Investments in sampling, analytical and report / request / demonstration work through employees or consultants could result in the generation of additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

ADEQ worked closely with stakeholders in the development of this new or adjusted AWQS implementation rule, focusing on the goal of clarity in administration and expectation for the Department and the applicable permittees, respectively. Neither A.R.S. § 49-223 nor the rules in the individual APP article at Title 18, Chapter 9, Article 2 of the A.A.C. address how to implement those new or adjusted AWQSs into the existing and issued permits. For this reason, ADEQ received overwhelming support for this clarifying rule from the regulated parties. After years of drafting, editing and stakeholder feedback, ADEQ believes the structure of this rule properly balances the agency's mission of protecting public health and the environment with any requisite costs to stakeholders.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

No data was used in the development of this rule. ADEQ closely examined the relevant and existing statutes and rules, as well as multiple rounds of stakeholder feedback.

AWP NFRM Public Comments - 18 AAC 9 - Implementation

Comment 1: Utility

Proposed R18-9-Preamble and R18-9-A215. New or Adjusted Aquifer Water Quality Standard
30 AAR 3403 - Paragraph 9 – Subsection C

“Preliminary estimates on the cost of baseline monitoring based on an eight quarter time period at one sampling location for all seven (7) of the new AWQs that are being established in the associated NPRMs is around \$15,000...”

We request ADEQ share the information used to determine the cost of the new or adjusted AWQs baseline monitoring with stakeholders.

ADEQ Response 1:

ADEQ appreciates the comment. ADEQ estimated that the analytical laboratory fees would cost \$4,500 for 8 monitoring events for all seven (7) of the new or adjusted AWQs at one monitoring location. The monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The employee labor costs were estimated at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then ADEQ estimated the employee labor costs for preparing the baseline monitoring report with a request to establish Alert Levels and Aquifer Quality Limits for all 7 parameters. This effort included a draft report, internal review, final report edits, and submission to ADEQ. The employee effort for the baseline monitoring report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report, for a total of \$15,000.

Comment 2: Utility

R18-9-A215. New or Adjusted Aquifer Water Quality Standard

30 AAR 3407 - Paragraph C.1.A --“Baseline discharge and groundwater monitoring shall be reported to the Director throughout the monitoring period in a method specified by the director.”

We request ADEQ clarify how the permittee is going to be notified of the method specified by the director to report baseline discharge and groundwater monitoring since it is not defined in the proposed rule or in the permittee’s current permit.

ADEQ Response 2:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 3: Utility

30 AAR 3407 - Paragraph C.2.A --“...permittees shall submit to the Department a Baseline Monitoring Report within three months of the date of the last sample collection.”

Our individual APP permits have discharge and groundwater monitoring locations. Please clarify if two separate baseline monitoring reports will be required since the frequency for baseline discharge and groundwater monitoring are different. We request ADEQ consider allowing flexibility for permittees with both discharge and groundwater monitoring locations to align the baseline monitoring schedules to eliminate preparing and submitting two separate baseline monitoring reports. We request ADEQ revise the statement “within three months of the date of the last sample collection” to “within three months of receipt of the last sample result” since analytical results may take up to 30 days to be reported by the laboratory after sample collection.

ADEQ Response 3:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant language. Final Rule, subsection (F)(2) states, “[p]ermittees subject to both Groundwater and Discharge Baseline Monitoring may develop a combined, comprehensive Baseline Monitoring Report within three months of receipt of the last sample result.” Additionally, concerning flexibility, Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 4: Utility

Currently, an ADHS - approved method for wastewater does not exist for Chlorite, Bromate or Haloacetic acids. Until there is an approved wastewater method, these parameters should not be required to have baseline monitoring or permitted monitoring on effluent discharge. Is ADEQ collaborating with ADHS to make sure this will occur prior to when monitoring will be required?

ADEQ Response 4:

ADEQ appreciates the comment. ADEQ has notified ADHS of the proposed establishment of Bromate, Chlorite, Haloacetic acids and Uranium as Aquifer Water Quality Standards (AWQSs). ADEQ agrees that at the time of this rulemaking, there are no ADHS - approved wastewater methods for Bromate, Chlorite, nor Haloacetic acids. However, the final rule accounts for this situation with the following language, “[s]ampling shall be conducted using an [ADHS] approved method for each pollutant with a newly established or adjusted [Aquifer Water Quality Standard] AWQSs, if available. If an [ADHS] approved method for a pollutant with a newly established or adjusted AWQSs does not exist, sampling shall be conducted using an EPA approved method or a method specified by the Director.” For example, EPA Method 300.1 is an appropriate method for chlorite and bromite baseline monitoring in drinking water and groundwater. Additionally, Standard Methods 6251 for Haloacetic acids (HAAs) is an appropriate method for determining the concentration of HAAs in water and wastewater. Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 5: Utility

The rule allows for the submission of a demonstration showing a pollutant with a new or adjusted AWQS is not likely to be present in the discharge in order to waive monitoring; however, the demonstrations allowed require submitting data from monitoring... How can ADEQ require monitoring to prove, “not likely to be present”? Is there another example demonstration of not likely to be present that does not include monitoring?

ADEQ Response 5:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration language. Final Rule R18-9-A215, subsection (H) reads, “[a] pollutant with a new or adjusted AWQS shall be removed from the scope of Baseline Monitoring upon a demonstration that the pollutant is not likely to be present in a facility’s discharge. The Department may require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWQS after review of the demonstration if the Department has reason to believe the pollutant is, or is likely to be, present in the facility’s discharge. Demonstrations may include, but are not limited to: (1) [a] characterization of the facility’s discharge in relation to the pollutant with a new or adjusted AWQS; (2) [p]ast monitoring and sampling data at the facility and the facility’s site; or (3) [p]rocess or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.” This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration.

Comment 6: Utility

Permittees are expected to initiate baseline monitoring within 3 months of the effective date of a new or adjusted AWQS unless a demonstration is approved by the Department. Three months is a very brief amount of time for a permittee to submit a demonstration and the agency to approve it. How does ADEQ realistically plan to process these waiver requests, or are they not anticipating many? May a permittee pause monitoring if a demonstration is submitted (while waiting for approval)?

ADEQ Response 6:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee to conduct and submit a “not likely” demonstration pursuant to subsection (H). The submission of an Alternative Baseline Monitoring Timeframe, Duration and Frequency Request does not pause the Baseline Monitoring requirement until ADEQ approves or denies. However, scheduling a meeting with the Department to discuss any concerns with the Baseline Monitoring requirement is welcomed and encouraged. Additionally, the rule language (*see* Final Rule R18-9-A215, subsection (H)) for the “not likely” demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 7: Utility

We’re thinking through our complicated permits and trying to understand where Baseline Monitoring would occur. Our facilities have impoundments so... we’re thinking about the perceived differences between initial characterization and Baseline Monitoring.

ADEQ Response 7:

ADEQ appreciates the comment. The Department believes the revisions made to the proposed rule, represented in Final Rule R18-9-A215, subsections (C), (H) and (I), address your concern.

Comment 8: Utility

Proposed rule R18-9-A215(C)(1) says baseline monitoring will be reported throughout the monitoring period in a method specified by the Director. How will the permittee be expected to submit the monitoring throughout the monitoring period

and at what frequency?

ADEQ Response 8:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 9: Utility

Will there be notification to permittees of the effective date of the new/adjusted limits (now and in the future) for permittees to know when to start the baseline monitoring?

ADEQ Response 9:

ADEQ appreciates the comment. Yes, there will be notification to permittees of upcoming effective dates of new or adjusted AWQSS. Please be on the lookout for those communications in the future. Also, yes, ADEQ is aware that communicating the commencement dates is critical to the function of the rule and will be communicated for this AWQS rulemaking and all future AWQS rulemakings. At a minimum, these communications will specify the effective date for the AWQSS and when baseline monitoring should start according to the final rule.

Comment 10: Utility

Will a Self Monitoring Report Form (SMRF) template be available for permittees or will they be submitted through myDEQ?

ADEQ Response 10:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore, no Self Monitoring Report Form (SMRF) template is necessary. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 11: Utility

With respect to implementation - Is there any intention to require baseline monitoring for permits that don't currently require any discharge or groundwater compliance monitoring?

ADEQ Response 11:

ADEQ appreciates the comment. The answer is: Potentially. The final rule does not mandate, but gives the Department the discretion to require permittees without ongoing monitoring requirements in their permit to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS within a reasonable amount of time if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility's discharge (*See* Final Rule R18-9-A215(I)). This requirement applies to issued APP permits as of the AWQS effective date and that do not have permit-issued groundwater point of compliance, discharge, nor other monitoring locations specified in their permit which are, themselves, subject to alert levels, discharge limitations or AQLs based on AWQSS pursuant to R18-9-A205. ADEQ plans to notify these permittees on a case-by-case basis. Also, the requirement to reasonably characterize does not apply upon the demonstration that a pollutant is not likely to be present in a facility's discharge; unless, upon demonstration review, the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge (*See* Final Rule R18-9-A215(H)).

Comment 12: Utility

How soon after the effective date of the new rule would ADEQ have the amendment schedule so permittees can budget for the APP amendment application?

ADEQ Response 12:

ADEQ appreciates the comment. ADEQ plans to notify permittees of the effective date of the new or adjusted limits, as well as the permit amendment schedule, as soon as possible after the establishment or effective date of a new or adjusted AWQS. Please be on the lookout for these communications. At a minimum, these communications will specify the effective date for the AWQSS, when baseline monitoring should begin according to Final Rule R18-9-A215 and will lay out the amendment schedule.

Comment 13: Utility

Proposed Rule R18-9-A215(C)(l)(c) - Please clarify what an "active" discharge is. Is use of the word "active" meant to exclude contingency monitoring locations?

ADEQ Response 13:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced "active" with "permit-required". The new term's usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

Comment 14: Utility

Proposed Rule R18-9-A215(C)(l)(c) - Suggest deletion of "that are subject to limits based on AWQSS." Is it ADEQ's

intent that baseline monitoring is not required at locations where a permit limit is set at a level greater than the AWQS?

ADEQ Response 14:

ADEQ appreciates the comment. The Final Rule language at R18-9-A215(E)(1) states that, “[b]aseline Monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.” It is not the intention of the Department to not require Baseline Monitoring at locations where a permit limit is set at a level greater than the AWQS. The language “based on AWQSs” is intended to distinguish any monitoring that may be required outside of compliance monitoring for an AWQS. Furthermore, the language “pursuant to R18-9-A205” includes the scenario referenced by the commenter, where an AQL is set at a level greater than the AWQS. If a parameter with an adjusted AWQS, such as Arsenic or Total Trihalomethanes, has an AQL set higher than the corresponding AWQS, the parameter is required to be within the scope of Baseline Monitoring, barring an exception outlined in R18-9-A215.

Comment 15: Utility

Proposed Rule R18-9-A215(C)(l)(d) - Include an option to add the new or adjusted parameters at the sampling frequency in the current APP. For example, if semi-annual groundwater sampling is conducted under the current APP, the permittee could add parameters to the existing sampling schedule rather than sample quarterly.

ADEQ Response 15:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 16: Utility

Proposed Rule R18-9-A215(C)(l)(e) - Please clarify if use of the word "may" in this provision allows the permittee (not ADEQ) to decide whether or not up, cross or down gradient wells will be sampled.

ADEQ Response 16:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(l)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements: [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 17: Utility

Proposed Rule R18-9-A215(C)(1)(h)(i) - Please clarify if "a method specified by the Director" requires the permittee to request and receive approval from the Director of ADEQ prior to use of a method that is not ADHS-approved.

ADEQ Response 17:

ADEQ appreciates the comment. The final rule language specifies that sampling for Baseline Monitoring “...shall be conducted using an Arizona Department of Health Services (ADHS) approved method for each pollutant with a new or adjusted AWQS, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the Director.” Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 18: Utility

Proposed Rule R18-9-A215(E) - According to the proposed rule, a pollutant may be removed from baseline discharge and groundwater monitoring “upon a successful demonstration ...”. Does "successful" mean the demonstration is "approved by ADEQ"? Suggest using the same language as proposed in R18-9-A215(B)(2): “... if a demonstration is submitted to and approved by the Department. ...” If the demonstration is not "successful," is the permittee required to begin baseline discharge and/or groundwater monitoring upon receipt of ADEQ's denial? Baseline monitoring is required to begin within three months of the effective date of a new or adjusted AWQS and it will likely take a permittee time to prepare the demonstration. Therefore, will ADEQ review a facility's demonstration and issue an approval or denial within three months of the effective date of a new or adjusted AWQS? If ADEQ's review extends beyond three months from the effective date of a new or adjusted AWQS, is the permittee required to conduct baseline discharge and/or groundwater monitoring while ADEQ is reviewing the demonstration? Is ADEQ's decision to approve or deny the demonstration subject to public notice (R18-9-108) and/or public participation (R18-9-109)?

ADEQ Response 18:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the

requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. The submission of an Alternative Baseline Monitoring Timeframe, Duration and Frequency Request does not pause the Baseline Monitoring requirement until ADEQ approves or denies. However, scheduling a meeting with the Department to discuss any concerns with the Baseline Monitoring requirement is welcomed and encouraged. A Final Rule subsection (D) request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language (*see* Final Rule R18-9-A215, subsection (H)) for the “not likely” demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has reason to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 19: Utility

The proposed rule does not mention how new or adjusted AWQSs fit into the APP closure (R18-9-A209(B)) and post-closure (R18-9-A209(C)) process. Would a permittee be required to complete baseline monitoring before submitting a closure plan to ADEQ?

ADEQ Response 19:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C) and (D). The answer to this question is “yes, generally”. The final rule governing Baseline Monitoring requires persons with issued individual permits as of a new or adjusted AWQS effective date to begin Baseline Monitoring within three months unless: (1) [t]he permit has no ongoing monitoring requirements, (2) [t]he permittee has not begun ongoing monitoring, (3) [t]he permittee has received approval of a submitted request for an alternative timeframe, duration or frequency pursuant to subsection (D) below, or (4) [t]he permittee has submitted a demonstration pursuant to subsection (H). The subsection continues, stating that for the purposes of this subsection, “ongoing monitoring” means permit-required monitoring at groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.

Despite a permittee’s intention to close, if a permittee is applicable to Baseline Monitoring per Final Rule R18-9-A215, Baseline Monitoring is required. However, in the case of a permittee either planning on closing soon or currently in a permitted closure process, Final Rule R18-9-A215(D) allows for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and/or frequency, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include, for example, the adjustment of when to begin Baseline Monitoring, a proposal to combine Baseline Monitoring with a closure plan or another reasonable orientation that meets the applicable rule requirements, subject to review and approval by the Department. Additionally, the Department notes that the statute governing APP closure is A.R.S. § 49-252 and the rule governing APP closure is R18-9-A209.

Comment 20: Interest Group

We understand that if the required baseline monitoring envisioned under the NPRM (*see* proposed A.A.C. R18-9-A215(C)) confirms that a pollutant with a new or adjusted AWQS already exceeds the AWQS at the applicable POC, then no alert level will be set and the aquifer quality limit (“AQL”) for that pollutant will be established at an appropriate level higher than the new or adjusted AWQS and the pollutant will be subject to the “no further degradation” standard in A.R.S. § 49-243(B)(3). We request that ADEQ confirm and clarify this intent in the rule and preamble when ADEQ publishes the final version of the rule.

ADEQ Response 20:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (G). Yes, after the conclusion of Baseline Monitoring, a permittee shall submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS in accordance with R18-9-A205. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS in accordance with R18-9-A205. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3).

Comment 21: Interest Group

Although we support what appears to be the Notice of Proposed Rulemaking’s (NPRM’s) statutorily-based approach of implementing new or adjusted AWQS into existing individual APPs consistent with the statutory language at A.R.S. § 49-243(B)(2) and (3) and the implementing regulatory language at A.A.C. R18-9-A205(C), we are concerned that some of the language in the NPRM appears to be inconsistent with this approach.

ADEQ Response 21:

ADEQ appreciates the comment. Due to this comment and others submitted on the propped rule language showing concern over whether the language is in accord with the governing statute at A.R.S. § 49-243(B)(2) and (3), ADEQ has revised the rule language to make clear that it is in accord. For example, consider Final Rule R18-9-A215, subsection (G), which requires a permittee, after the conclusion of Baseline Monitoring, to submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS *in accordance with R18-9-A205*. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS *in accordance with R18-9-A205*. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3). While difficult to address with specificity a broad concern like the one in this comment, ADEQ believes the edits to the rule incorporating R18-9-A205 (including R18-9-A205's reference to A.R.S. § 49-243(B)(2) and (3)) address this stakeholder concern.

Comment 22: Interest Group

We are also concerned, as applied particularly to the required monthly discharge monitoring, that the rule will create increased costs and regulatory burdens for permittees that may not be necessary in all situations. For instance, many facilities with discharges subject to limits based on AWQS have stable discharges with consistent quality. Consequently, we recommend that language be added to the discharge baseline monitoring requirements to clarify that the frequency and duration of monitoring for discharges can be negotiated with ADEQ on a case-by-case basis. This would, in part, address the increased cost concern.

ADEQ Response 22:

ADEQ appreciates the comment. See generally, Final Rule R18-9-A215, subsection (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and/or frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 23: Interest Group

We support the recognition in the NPRM of the statutory language at A.R.S. § 49-223(G), which provides that monitoring or any other APP-related requirements cannot be imposed on pollutants with AWQS that are not likely to be present in a facility's discharge (see proposed R18-9-A215(E)). Although we support this aspect of the NPRM, some of the language in the proposal is not consistent with the statutory language in A.R.S. § 49-223(G).

ADEQ Response 23:

ADEQ appreciates the comment. See generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G).

Comment 24: Interest Group

The suggestion that ADEQ “may” waive monitoring in proposed R18-9-A215(B)(2) and (E), the requirement in proposed R18-9-A215(B)(2) and (C) that ADEQ “approve” submittals showing that a certain pollutant is not likely to be present in a facility's discharge, and the concept of a “successful” demonstration in proposed R18-9-A215(E) are not consistent with the statutory language in A.R.S. 49-223(G). The statutory language simply provides that ADEQ may impose APP monitoring requirements only for pollutants for which AWQS have been established that are likely to be present in a discharge. There is no requirement under the statute to obtain ADEQ's approval for such a demonstration or for the agency to decide whether or not to waive monitoring when presented with a demonstration or what demonstrations are “successful.” Accordingly, we request that any suggestion or requirement that a demonstration under A.R.S. § 49-223(G) must be approved, determined to be “successful”, or subject to administrative discretion be removed. Obviously, if ADEQ disagrees or has concerns with a particular demonstration it can raise its concerns with the submitter and request additional information.

ADEQ Response 24:

ADEQ appreciates the comment. See generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G). The final rule language allows the submission of a “not likely” demonstration itself to be sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Comment 25: Interest Group

The use of the term “active discharge” is confusing and it is not clear how the term relates to the statutory definition of “discharge” in A.R.S. § 49-201(12). We believe that the intent of the rule is to apply the baseline monitoring requirements to existing groundwater point of compliance monitoring locations or discharge monitoring locations specified in an existing individual permit for which monitoring has commenced. Also, the baseline monitoring

requirements should not apply to facilities that have been permitted but not yet constructed. Consequently, in lieu of referring to “active discharge, groundwater points of compliance, and/or other monitoring locations,” we recommend that the following phrase be used in R18-9-A215: “existing groundwater point of compliance monitoring locations, discharge monitoring locations, or other monitoring locations specified in the permit.” We also recommend that the phrase “and that have commenced monitoring pursuant to the permit” be added to R18-9-A215(C).

ADEQ Response 25:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C), (D) and (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations. Additionally, the final rule exempts from Baseline Monitoring permittees who have not begun permit-required, ongoing monitoring. This includes facilities that are permitted, but have yet to be constructed and other circumstances where ongoing monitoring is not occurring.

Comment 26: Interest Group

It is not clear what is meant by “limits based on AWQS” since different terms are used in A.A.C. R18-9-A205, namely alert levels, discharge limitations, and aquifer quality limits (“AQLs”). To eliminate this confusion, we request that the phrase “limits based on AWQS” be replaced with the phrase “alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205.” The NPRM inconsistently uses and intermingles the terms “baseline monitoring” and “baseline discharge and/or groundwater monitoring.” We request that a single term (i.e., “baseline monitoring”) be used to include both baseline groundwater and baseline discharge monitoring.

ADEQ Response 26:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “limits based on AWQS” with “alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205.” Additionally, the inconsistency in usage of “Baseline Monitoring” has been addressed in the final rule. As is suggested by the commenter, the single term, “Baseline Monitoring” is used throughout.

Comment 27: Interest Group

Because it may be difficult in some instances (such as with complex individual APPs) to initiate baseline monitoring or to prepare a demonstration under R18-9-A215(E) within three months after the effective date of new or adjusted AWQSs, we request that language be added to the rule to give permittees and ADEQ flexibility to reach agreements to extend the three month period for initiating baseline monitoring or for submitting a demonstration under R18-9-A215(E).

ADEQ Response 27:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Comment 28: Interest Group

To provide more clarity to permittees with respect to baseline monitoring, we believe that the general baseline monitoring subsections in R18-9-A215(C)(1) should be grouped upfront and then followed by the language that distinguishes between groundwater versus discharge monitoring. We recommend the following reorganization: move subsection (c) to (a); move subsection (f) to (c); move subsection (h) to (d); and then put subsections (d) and (g) at the end.

ADEQ Response 28:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E). Due to this comment and others submitted on the proposed rule language, ADEQ has reorganized the structure of the Baseline Monitoring Requirements as is recommended by the commenter above.

Comment 29: Interest Group

We request that the discharge monitoring section of the baseline monitoring section include the ability for permittees with discharges subject to limits based on AWQSs to negotiate a different frequency and duration of baseline monitoring on a permit-by-permit basis. This addition to the rule is critical to reduce unnecessary costs and burdens and to recognize that many discharges are stable and consistent in quality.

ADEQ Response 29:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the

requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Comment 30: Interest Group

We request that the language in this subsection should be removed. The language creates an unnecessary regulatory burden to report data that will eventually be submitted to ADEQ as part of the required baseline monitoring report. Current existing individual permits do not require intermittent reporting of ambient monitoring data. Rather, such data is submitted at the end of the required monitoring period. In addition, early submittal of such data ignores the technical reality that sufficient numbers of sampling events spread across an appropriate timeframe is required to establish an accurate baseline of either groundwater or effluent discharge. Early submittal of data before completing full baseline monitoring is therefore improper and could be used by ADEQ or others to support incorrect assertions regarding the state of groundwater or discharges at monitoring locations specified in the permit for new or adjusted AWQSS.

ADEQ Response 30:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed rule language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). Additionally, proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring’s representative scope is larger, including natural background concentration and sources, as well as, off-property sources of a constituent.

Comment 31: Interest Group

ADEQ appears to have added language to the specific groundwater monitoring and discharge monitoring sections that was not in prior stakeholder drafts of the implementation rule. This language appears to give ADEQ broad discretion to set limits in permits even before the full baseline monitoring period has concluded for certain reasons, including an exceedance of a new or adjusted AWQS or an increasing trend in the monitoring data. Arbitrarily cutting short the baseline monitoring period is not only inconsistent with the statutory process in A.R.S. 49-243(B)(2) and (3) but also creates permit implementation concerns and other problems. This language must be removed as it appears to disregard the intended purpose of the rule as represented by ADEQ.

A potential alternative to this language is to provide that the baseline monitoring period may be shortened or lengthened if the permittee so requests and ADEQ approves the request.

ADEQ Response 31:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring’s representative scope is larger, including natural background concentration and sources, as well as, off-property sources of a constituent.

Comment 32: Interest Group

Although this language makes collection of groundwater monitoring at up, cross, or down gradient wells discretionary, the language should be removed because it creates unexplained suggestions contrary to the statutory process for setting limits at applicable points of compliance in A.R.S. § 49-243(B)(3). For instance, although the rule explains where groundwater sampling should be conducted for purposes of baseline monitoring (i.e., at applicable point of compliance monitoring locations), this language in proposed (C)(1)(e) suggests that baseline monitoring can be conducted at other locations, which creates confusion.

ADEQ Response 32:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E). Due to comments submitted on this proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(1)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 33: Interest Group

The requirement to provide “a demonstration of the background concentrations of the pollutant at the facility’s site” to support a demonstration that a pollutant is not likely to be present in a facility’s discharge is counterintuitive and should be removed. The requirement appears to require background monitoring of groundwater or effluent when the purpose of the demonstration is to exempt a permittee from background or baseline monitoring. This requirement should be removed from the text of the rule.

In its place, we recommend inserting the following: “Process or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.”

ADEQ Response 33:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has endorsed the commenter’s suggested language in the final rule.

Comment 34: Interest Group

Proposed rule R18-9-A215(F) appears to give ADEQ broad authority to require facilities without discharge or groundwater monitoring locations in their existing individual APPs to mandate installation of groundwater monitoring wells or discharge monitoring when prior determinations were made that such monitoring was not required. This language should be removed or at least some type of reasonable criteria should be added to ensure that ADEQ only exercises the authority envisioned under the language when appropriate based on the presence of other relevant and reliable information.

ADEQ Response 34:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (I). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the language in the final rule to include a central criterion for when the Department may require permittees *without* ongoing monitoring specified in their individual permit to reasonably characterize their discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS. That criterion is “...if the Department has a reasonable basis to believe a pollutant with a new or adjusted AWQS is, or is likely to be, present in the facility’s discharge.” In preparation for this rulemaking, ADEQ scrutinized the individual permits and found that around 30 permits (out of approximately 500) do not have ongoing monitoring requirements. In most cases, this was specified in the permits due to the fact that the facilities released process water into sealed and contained, double-lined impoundments which can be assumed with reasonable certainty that no release or discharge from them can occur to the surrounding soils, vadose zone or aquifers under the approved design, construction and operation. With that said, and despite the fact that it is unlikely ADEQ would exercise this right, the Department wishes to retain the ability to require the reasonable characterization of such a facility’s discharge and/or groundwater quality in relation to a pollutant with a new or adjusted AWQS if the above criterion is present. This is because the determinations to not require discharge and/or groundwater monitoring during the original application review and permit issuance were made under a previous set of Aquifer Water Quality Standards. Given the new and adjusted AWQSs being added through this collective set of rulemakings to the previous set of AWQSs, the Department’s determinations concerning ongoing monitoring and other aspects of the permit may need to be re-evaluated as the factors relied upon in making those determinations have changed.

Comment 35: Industry

We support ADEQ’s apparent intent to incorporate new or adjusted AWQS into existing individual APPs consistent with the statutory language at A.R.S. § 49-243(B)(2) and (3) and the implementing regulatory language at A.A.C. R18-9-A205(C). For groundwater points of compliance (“POCs”), this approach calls for a determination of existing aquifer water quality at the POCs before aquifer quality limits are imposed in the permit. However, we request that this approach could be reflected more clearly in the proposed rule, and that some elements of the proposed rule are confusing and not fully consistent with the overall approach.

ADEQ Response 35:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language showing concern over whether the language is in accord with the governing statute at A.R.S. § 49-243(B)(2) and (3), ADEQ has

revised the rule language to make clear that it is in accord. For example, consider Final Rule R18-9-A215, subsection (G), which requires a permittee, after the conclusion of Baseline Monitoring, to submit an administratively complete application to amend their permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). The Baseline Monitoring Report shall be a component of the amendment application. Upon receipt, the Department shall review, process and determine whether a new or adjusted Alert Level, Discharge Limitation and/or AQL is required for a new or adjusted AWQS in accordance with R18-9-A205. Thereafter, the Department may incorporate, through a permit amendment, a new or adjusted Alert Level, Discharge Limitation and/or AQL for a new or adjusted AWQS in accordance with R18-9-A205. R18-9-A205(C) allows ADEQ to establish in individual permits an AQL that is higher than the corresponding AWQS in order to meet the criteria in A.R.S. § 49-243(B)(2) or (3).

Comment 36: Industry

ADEQ should not have to “approve” a demonstration under A.R.S. § 49-223(G) that a particular pollutant with a new or adjusted AWQS is not likely to be present in a discharge.

ADEQ Response 36:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to more closely align with the governing statute, A.R.S. § 49-223(G). The final rule language allows the submission of a “not likely” demonstration itself to be sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 37: Industry

ADEQ should have the flexibility to allow for different schedules for commencement of baseline monitoring or submission of demonstrations under A.R.S. § 49-223(G).

ADEQ Response 37:

ADEQ appreciates the comment. Due to this comment and others, ADEQ has revised the relevant rule language. Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Additionally, the rule language (*see* Final Rule, subsection (H)) for the “not likely” demonstration has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 38: Industry

ADEQ should not have the ability to cut short the baseline monitoring period unless the permittee concurs with this decision.

ADEQ Response 38:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (E) and (F). Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A). Additionally, proposed rule language allowing the Director to both shorten or lengthen the monitoring period if one or more events on a subsequent list occur has been revised to only allow the Director to lengthen if such an occurrence happens. The reasoning for this language adjustment is to require a full set of data be collected before characterization determinations are made (i.e. - “shorten” has been removed) and to retain an ability for the Director to lengthen the baseline monitoring period should the data collected not be usable or reliable for any appropriate reason. However, the original usage of the word “shorten” in the proposed language reflects the concern that data may come to light of a significant AWQS exceedance well before the end of the monitoring period and no notice to the Department would be made despite the potential degradation to public health and the environment. To address this concern, language has been added to Final Rule, subsection (E)(6) as follows, “[i]f a permittee conducting Baseline Discharge Monitoring collects a sample that is at or above a new or adjusted AWQS, the permittee shall notify ADEQ within five (5) days of becoming aware.” This language has been added to the final rule for Baseline Discharge Monitoring and not Baseline Groundwater Monitoring as discharge monitoring shows the immediate discharge of a facility; whereas, groundwater point of compliance monitoring’s representative scope is larger, including natural

background concentration and sources, as well as, off-property sources of a constituent.

Comment 39: Industry

Permittees should not have to submit baseline monitoring data during the monitoring period, but instead only at the end of that period as part of the baseline monitoring report (note that periodic monitoring for some pollutants covered in the new proposals, such as arsenic, will be occurring under existing permits, and that data will be promptly reported to ADEQ under those permits).

ADEQ Response 39:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 40: Industry

A.A.C. R18-9-A215(C)(1) would benefit from reorganization to improve clarity.

ADEQ Response 40:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E). Due to this comment and others submitted on the proposed rule language, ADEQ has reorganized the structure of the Baseline Monitoring Requirements.

Comment 41: Industry

References to monitoring at up, down or cross gradient wells, even if such monitoring is not mandatory, create confusion and should be eliminated.

ADEQ Response 41:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has eliminated the proposed subsection R18-9-A215(C)(l)(e) which read, “[b]aseline groundwater monitoring may additionally occur at up, cross or down gradient wells in relation to the facility, if available.” The Final Rule, at subsection (E)(1), reads, “Baseline Monitoring Requirements [1] Baseline monitoring shall occur at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205.” However, the final rule also provides, in the Baseline Monitoring Report subsection, that a permittee may include additional information in the report for any reason, which may include data from up, cross or down gradient wells in relation to the facility.

Comment 42: Industry

The criteria for making a demonstration under A.R.S. § 49-223(G) should be modified.

ADEQ Response 42:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration language. Final Rule R18-9-A215, subsection (H) reads, “[a] pollutant with a new or adjusted AWQS shall be removed from the scope of Baseline Monitoring upon a demonstration that the pollutant is not likely to be present in a facility’s discharge. The Department may require a permittee to begin Baseline Monitoring for a pollutant with a new or adjusted AWQS after review of the demonstration if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Demonstrations may include, but are not limited to: (1) [a] characterization of the facility’s discharge in relation to the pollutant with a new or adjusted AWQS; (2) [p]ast monitoring and sampling data at the facility and the facility’s site; or (3) [p]rocess or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.” This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration. This new language and non-exhaustive list on how demonstrations may be made serves to show some of the methods a permittee might use in making a demonstration. It should be noted that the submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 43: Utility

While we support the agency’s goal of ensuring environmental protection, we believe the proposed measures will lead to significant operational challenges and unintended consequences for regulated facilities, other stakeholders, and analytical laboratories.

ADEQ Response 43:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D), (E) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule language for proposed R18-9-A215, specifically addressing stakeholder concerns pertaining to operational challenges, unintended consequences for regulated facilities and analytical laboratory considerations. Concerning operational challenges, the Department notes that subsections (D) and (H) address many of the concerns stakeholders have cited on this topic. For example, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline

Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H).

Final Rule, subsection (E)(4) addresses approved sampling methods for new or adjusted AWQS. ADEQ has notified the Arizona Department of Health Services (ADHS) of the proposed establishment of Bromate, Chlorite, Haloacetic acids and Uranium as new Aquifer Water Quality Standards (AWQSs). ADEQ agrees that at the time of this rulemaking, there are no ADHS - approved wastewater methods for Bromate, Chlorite nor Haloacetic acids. However, the final rule accounts for this situation with the following language, “[s]ampling shall be conducted using an [ADHS] approved method for each pollutant with a newly established or adjusted [Aquifer Water Quality Standard] AWQSs, if available. If an [ADHS] approved method for a pollutant with a newly established or adjusted AWQSs does not exist, sampling shall be conducted using an EPA approved method or a method specified by the Director.” For example, EPA Method 300.1 is an appropriate method for chlorite and bromite baseline monitoring in drinking water and groundwater. Additionally, Standard Methods 6251 for Haloacetic acids (HAAs) is an appropriate method for determining the concentration of HAAs in water and wastewater. Please find a table in Heading No. 7, subheading “Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 44: Utility

Monthly Discharge Sampling Frequency. The requirement for monthly discharge sampling is excessively burdensome, especially for facilities with consistent, stable discharge characteristics. In cases where there are no significant operational or process changes, the value of frequent sampling is minimal and does not justify the associated costs or effort. Less frequent sampling, such as semiannually, would provide sufficient data for regulatory oversight while reducing undue strain on facilities and laboratories and control the potential for undue costs to be passed on to utility customers. Recommendation: Adopt a tiered or site-specific sampling frequency that reflects discharge stability and operational changes rather than imposing a uniform monthly requirement.

ADEQ Response 44:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 45: Utility

Challenges with Empty Impoundments. Another area of concern involves the treatment of impoundments that are routinely kept in an empty state (e.g., stormwater ponds). Facilities often face significant challenges in addressing these structures due to the practical inability to collect samples when no water is present. This limitation could lead to delays in site characterization or, worse, unintentional noncompliance if the agency does not approve a facility’s demonstration that specific pollutants are absent from its discharge. Providing clearer guidance and flexibility in demonstrating pollutant absence is essential to prevent unnecessary compliance risks and operational disruptions. Recommendation: Provide guidance for addressing empty impoundments that ensures compliance while recognizing the practical limitations of sampling under such conditions.

ADEQ Response 45:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Furthermore, a request for an alternative baseline monitoring timeframe, duration and frequency could leverage or include in a proposal a similar approach to that specified in the individual APP “Technical Requirements” rule, specifically R18-9-A202(A)(4), R18-9-A202(A)(8)(B)(vi), etcetera.

Comment 46: Utility

Substantial Increase in Costs, Personnel, and Backlog. The proposed rule changes will result in a substantial increase in costs at the site level and resource demands for analytical laboratories. The heightened sampling and analytical requirements will necessitate additional personnel, equipment, and infrastructure to manage the increased workload. Due to other routine job functions, on site personnel do not have the bandwidth to address the increased sampling and this task will require hiring additional contractors at an increased cost. Smaller facilities, in particular, may struggle to comply due to limited budgets and resources, leading to potential backlogs and delays in meeting regulatory deadlines.

ADEQ Response 46:

ADEQ appreciates the comment. While ADEQ acknowledges that the Final Rule at R18-9-A215 will result in a cost increase for applicable permittees and a resource demand for analytical laboratories, the Department believes this rule language and its structure represent the least burdensome orientation necessary to properly implement new or adjusted AWQs into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

In preparation for this rulemaking, ADEQ estimated that the analytical laboratory fees would cost \$4,500 for 8 monitoring events for all seven (7) of the new or adjusted AWQs at one monitoring location. The monitoring equipment could cost around \$1,500 which includes rental for a water quality meter and a depth to groundwater level sounder, plus purchase of consumable products such as deionized water, conductivity and pH calibration solutions, and nitrile sampling gloves. The employee labor costs were estimated at \$35 per hour and each monitoring event would require 4 hours of sampling equipment preparation, 12 hours for sample collection and lab delivery, and 4 hours to review the laboratory analytical results. This was estimated to cost \$5,600 for all 8 monitoring events. Then, ADEQ estimated the employee labor costs for preparing the baseline monitoring report with a request to establish Alert Levels and Aquifer Quality Limits for all 7 parameters. This effort included a draft report, internal review, final report edits, and submission to ADEQ. The employee effort for the baseline monitoring report was estimated at \$3,400. Altogether the cost estimate includes: \$4,500 lab + \$1,500 equipment + \$5,600 employee labor for sampling + \$3,400 employee labor for baseline monitoring report for a total of \$15,000.

Additionally, due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see* generally, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, "...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein." While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a "not likely" demonstration pursuant to subsection (H). Additionally, the rule language for the "not likely" demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a "not likely" demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge.

Comment 47: Utility

Submittal of Baseline Discharge and Groundwater Monitoring Data Throughout Monitoring Period. Given the objective of characterizing discharges and associated impacts, submittal of incomplete/partial data throughout the monitoring period is unwarranted, burdensome, and does not contribute to regulatory compliance. The data set as a whole will be presented in the Baseline Monitoring Report where it can be properly evaluated, and conclusions supported.

ADEQ Response 47:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed subsection language, ADEQ has determined that reporting of Baseline Monitoring will not be required throughout the baseline monitoring period(s). Therefore this proposed rule language has been removed from the final rule. However, the development of a Baseline Monitoring Report within three months of receipt of the last sample result remains a requirement, along with subsequent submittal of an administratively complete application to amend the permit to reflect a new or adjusted AWQS in accordance with the amendment schedule described in Final Rule R18-9-A215, subsection (A).

Comment 48: Utility

Consider developing clear, streamlined procedures for facilities to demonstrate the absence of pollutants without requiring extensive sampling or lengthy approval processes.

ADEQ Response 48:

Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see* generally, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, "...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein." While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS

automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge.

Comment 49: Utility

We appreciate the agency’s commitment to stakeholder engagement and urge you to carefully weigh the potential impacts of these proposals on the regulated community. By incorporating greater flexibility and clarity into the rulemaking process, the agency can achieve its regulatory objectives without imposing undue burdens.

ADEQ Response 49:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to be more flexible and clear while still achieving regulatory objectives in an orientation that the Department believes is the least burdensome necessary to properly implement new or adjusted AWQS into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

Comment 50: Local Government / Utility

Due to the number of APP permitted facilities operated by us and thereby the number of compliance monitoring locations, we are concerned that section R18-9-A215(C) will require us to begin baseline monitoring for routine discharge and groundwater within 3 months from the effective date of new or adjusted AWQS. This will also be a requirement each time that ADEQ releases new or adjusted AWQS in the future. Due to the extra burden this will place on our already tight budget, we request that ADEQ modify this timeline to allow for the baseline monitoring for a given permit to begin within 18 months from the effective date of new or adjusted AWQS. This would allow entities with many permits to begin baseline monitoring for one permit at a later date than another permit, and across several budget years.

This modification will not interfere with ADEQ's requirement to have all permit holders submit an administratively complete amendment application no later than four years after the effective date as proposed in R18-9-A215(B). Because the baseline monitoring will take 24 months of sampling, even a permit holder who begins baseline monitoring at the very end of our proposed 18 months would be able to complete the baseline monitoring at 42 months. In the given example, this permit holder would complete their monitoring with 6 months until the application deadline. Extending this time line is a justified request, and will allow entities with many permits to balance their baseline monitoring efforts across the four year implementation instead of starting baseline monitoring for all permits within the first 3 months.

ADEQ Response 50:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for flexibility purposes, allowing for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency (*see* generally, Final Rule R18-9-A215, subsections (D) and (H)). Final Rule, subsection (D) reads as follows, “[...]permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. While ADEQ acknowledges that the Final Rule at R18-9-A215 (including the changes described above) will result in a cost increase at facilities, the Department believes this rule represents the least burdensome orientation necessary to properly implement new or adjusted AWQSs into (potentially) 500 individual permits (*see* statutory mandate at A.R.S. § 49-223).

Comment 51: Interest Group

Concerns About Timelines and Exemptions. ADEQ’s proposed timelines for compliance - up to four years - are excessive, given that many federal standards have been in place for decades. Additionally, provisions allowing exemptions under R18-9-A215 undermine the effectiveness of these standards. We recommend that ADEQ:

- Reduce compliance timelines to no more than two years.
- Eliminate exemptions that weaken the protective intent of AWQS.
- Conduct immediate reviews of high-risk facilities, prioritizing those with documented violations.

ADEQ Response 51:

ADEQ appreciates the comment. ADEQ followed the lead of EPA in allowing individually permitted facilities a reasonable number of years to come into compliance with new water quality standards (*see* 89 *Federal Register* 32533).

In EPA's Final Rule for the new PFAS MCLs (effective 6/25/24) under the Safe Drinking Water Act (SDWA) regulating Public Water Systems (PWSs) the following timeline for compliance is laid out, including conducting monitoring within approximately 3 years of the effective date and installation of any necessary capital improvements in order to come into compliance within approximately 5 years of the effective date,

Consistent with the timelines set out under [Safe Drinking Water Act] SDWA, [Public Water Systems] PWSs are required to conduct their initial monitoring by April 26, 2027, and to conduct [Public Notice] PN and include PFAS information in the [Consumer Confidence Reports] CCR. After carefully considering public comment, the EPA is extending the compliance deadline for all systems nationwide to meet the MCL to allow additional time for capital improvements. As such, PWSs are required to make any necessary capital improvements and comply with the PFAS MCLs by April 26, 2029 [89 FR 32533].

The only exemption present in the final rule at R18-9-A215 is for a “not likely” demonstration (*see* Final Rule, subsection (H)). This exemption is mandated by Arizona statute at A.R.S. § 49-223(G). The Department is considering a risk-based priority in the development of an amendment schedule pursuant to Final Rule subsection (A). ADEQ believes the structure of this rule properly balances the agency’s mission of protecting public health and the environment with a reasonable time frame for compliance for the regulated community.

Comment 52: Interest Group

Environmental Justice Considerations. We are concerned that the draft rule does not adequately address environmental justice impacts. Communities near high-risk facilities, such as the Havasupai Tribe near the Pinyon Plain Mine, face disproportionate risks of groundwater contamination. ADEQ must incorporate environmental justice analyses and engage directly with impacted communities, particularly Tribal nations, to ensure equitable protections.

ADEQ Response 52:

ADEQ appreciates the comment. Concerning Environmental Justice (EJ), in the case of this rulemaking, A.R.S. § 49-223 mandates that ADEQ open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency’s (EPA’s) establishment of new or adjusted MCLs. Through the Aquifer Protection Program (APP), the AWQSs apply to facilities discharging regulated pollutants to the ground in all Arizona lands under state jurisdiction. No special application of the standards exists beyond the specifics of the individual APP permits themselves. Besides the ability of the Department to establish an alternative AWQS upon receipt of “substantial opposition” from stakeholders, the AWQS statutory mandate from the Department is clear and simple.

ADEQ carefully considered and took actions to ensure both fair treatment and meaningful involvement as part of the AWQS rulemaking. All stakeholders, including communities near high-risk facilities, tribes and other interested parties were welcome to participate in ADEQ’s extensive public participation process for this rulemaking. As part of this process, ADEQ held a 30 day public comment period in accordance with A.R.S. 41-1023(B), as well as, held nine formal stakeholder events over the course of over 2 years (9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25). With respect to tribal outreach, ADEQ Leadership presented a rulemaking briefing on the AWQS rulemaking at the Intertribal Council of Arizona (ITCA) - Tribal Leaders’ Water Policy Council Meeting on 8/23/23 (the Havasupai Tribe is a member of ITCA). Additionally, the Department held dedicated Tribal Listening Sessions throughout the development of the rule; specifically on 9/11/23, 12/12/23 and 11/20/24. ADEQ has for years aimed to meet the requirements in statute for tribal relation responsibilities pursuant to A.R.S. § 41-2051(C). ADEQ believes the terms in the current tribal consultation and collaboration policy were followed while conducting this rulemaking. The policy can be reviewed here: https://static.azdeq.gov/policy/ADEQ_Tribal_Policy.pdf.

Comment 53: Utility

We encourage ADEQ to consider the timing of the process by which a regulated entity subject to R18-9-A215 would make a demonstration pursuant to R18-9-A215(E). As written, APP permittees subject to the rule must initiate Baseline Monitoring within three months of the effective date of a new or adjusted AWQS unless a demonstration is made pursuant to R18-9-A215(E). It is unclear exactly what this demonstration must entail, and it is likely that permittees will seek a pre-demonstration meeting with ADEQ to better understand the requirements. Three months does not leave sufficient time to compile a demonstration and obtain approval from ADEQ – particularly if there are multiple entities seeking to make similar demonstrations.

ADEQ Response 53:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D) and (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove

the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility's discharge. Also, the Department has plans to release an amendment schedule pursuant to Final Rule R18-9-A215(A), and other guidance on Baseline Monitoring and the "not likely" demonstration, pursuant to Final Rule R18-9-A215(H).

Comment 54: Utility

It is less clear how the Proposed Rule would be applied to complex permits. A Baseline Monitoring plan will likely need to be tailored to capture relevant information that ADEQ seeks. It may not be relevant or necessary to conduct Baseline Monitoring at all groundwater points of compliance, discharge monitoring locations, and/or other monitoring locations identified in a complex APP. ADEQ should provide a process for complex permits to develop a Baseline Monitoring plan in consultation with ADEQ.

ADEQ Response 54:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule for clarity. The Department believes the Final Rule at R18-9-A215 delineates the requirements of Baseline Monitoring at subsection (E), while also providing sufficient and functional rule language for Baseline Monitoring timing and applicability at subsection (C), an opportunity for submission of a request for an alternative Baseline Monitoring timeframe, duration and/or frequency at subsection (D) and the Baseline Monitoring report requirements at subsection (G). The Department notes that Final Rule R18-9-A215(E) specifies which monitoring locations are required for baseline monitoring, limiting the scope to "...permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205." The addition of Final Rule R18-9-A215, subsection (D), allows for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency, "...[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein."

Comment 55: Utility

Usage of the Terms "Active Discharge" and "Limits Based on AWQS". We recommend that ADEQ remove the term "active discharge" from the Proposed Rule. The term "active discharge" is undefined and differs from the definition of discharge in A.R.S. § 49-201(12), leading to confusion. Instead of referring to "active discharge, groundwater points of compliance and/or other monitoring locations" in R18-9-A215, we recommend that ADEQ refer to "groundwater points of compliance, discharge monitoring locations, or other monitoring locations specified in the permit."

ADEQ Response 55:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced "active" with "permit-required". The new term's usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

Comment 56: Utility

It is not clear what is meant by "limits based on AWQS." We recommend that ADEQ utilize the terms from R18-9-A205 and replace the language "limits based on AWQS" with "alert levels, discharge limitations or AQLs based on AWQS pursuant to R18-9-A205."

ADEQ Response 56:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced "limits based on AWQS" with "alert levels, discharge limitations or AQLs based on AWQSs pursuant to R18-9-A205".

Comment 57: Utility

Definition of "Baseline Monitoring". The Proposed Rule is inconsistent in its use of the terms Baseline Monitoring, Baseline Discharge and/or Groundwater Monitoring. We believe that Baseline Monitoring should be a defined term meant to encompass baseline groundwater monitoring and baseline discharge and/or other monitoring locations.

ADEQ Response 57:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215. Due to this comment and others submitted on the proposed rule language, ADEQ has made its usage of the term "Baseline Monitoring" more consistent in the final rule. ADEQ does not believe the term "Baseline Monitoring" needs to be defined for the purposes of final rule as the term inherently describes its function for the purpose of developing data to be used to appropriately implement new or adjusted AWQS into the applicable, issued individual permits.

Comment 58: Utility

Waivers and Demonstrations of Constituents Not Likely to be Present. A demonstration that a pollutant is not likely to be present in a facility's discharge, per proposed rule subsection (E), provides only examples where monitoring has already occurred and submitted as evidence. We suggest adding language to allow for operational or design practices to demonstrate that pollutants with new or adjusted AWQS are not likely to be present. For example, if a facility does not utilize disinfection products, a facility should not be required to have data establishing the absence of disinfection byproducts.

ADEQ Response 58:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (H). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the “not likely” demonstration rule language to more closely reflect A.R.S. § 49-223(G). Additionally, the revised rule makes more clear that the submission of a demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Also, the final rule language allows demonstrations to include, but to not be limited to, (1) a characterization of the facility’s discharge in relation to the pollutant with a new or adjusted AWQS, (2) past monitoring and sampling data at the facility and the facility’s site; or (3) process or other information demonstrating that the pollutant is not used or generated at the site or is otherwise not likely to be present in discharges at the site.

Comment 59: Utility

Monitoring Timeline. Proposed rule R18-9-A215(B)(2) requires monitoring to begin “within three months of the effective date of a new or adjusted AWQS unless a demonstration is approved by the Department.” As noted above, three months is an insufficient amount of time for a facility to make, and for ADEQ to approve, a demonstration. In addition, regulated entities should not be required to conduct baseline sampling while waiting for ADEQ to review and make a decision regarding a demonstration. Consistent with its comments above, we suggest the following revision:

R18-9-A215(C) - *Persons holding Individual APPs that were issued as of the effective date of a new or adjusted AWQS with ~~active discharge, groundwater points of compliance, discharge monitoring locations and/or other monitoring locations specified in the permit that are subject to limits alert levels, discharge limitations, or AQLs based on AWQS pursuant to R18-9-A205~~ shall begin Baseline Discharge and/or Groundwater Monitoring for all new or adjusted AWQS or submit a demonstration pursuant to subsection (E) to the Department within three months of the effective date of a new or adjusted AWQS unless a demonstration is approved by the Department.*

ADEQ Response 59:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (C) and (D). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule to allow for a submittal to be sent to the Department requesting an alternative baseline monitoring timeframe, duration and frequency. Final Rule, subsection (D) reads as follows, “[p]ermittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.” While this language does not alter the requirement to begin Baseline Monitoring within three months of the effective date of a new or adjusted AWQS automatically, it does allow for an alternative timeframe request to be submitted to the Department within three months. Such a request could include the adjustment of when to begin Baseline Monitoring, which would, in turn, allow a permittee more time to conduct and submit a “not likely” demonstration pursuant to subsection (H). Additionally, the rule language for the “not likely” demonstration pursuant to Final Rule, subsection (H), has been updated to more closely reflect A.R.S. § 49-223(G). The submission of a “not likely” demonstration itself is sufficient for a permittee to remove the pollutant with a new or adjusted AWQS from the scope of Baseline Monitoring. However, upon review of the demonstration, the Department may require a permittee to commence Baseline Monitoring for the pollutant if the Department has a reasonable basis to believe the pollutant is, or is likely to be, present in the facility’s discharge. Additionally, at Final Rule, R18-9-A215, subsection (E)(1), ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations. Also, at Final Rule R18-9-A215, subsection (E)(1), ADEQ has replaced “limits based on AWQS” with “alert levels, discharge limitations or AQLs pursuant to R18-9-A205”.

Comment 60: Utility

Clarification of Sample Collection Requirements. We request that ADEQ improve the clarity of the Baseline Monitoring sampling requirement by specifying whether samples should be discrete or “grab” samples, or composite samples.

ADEQ Response 60:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(2). Similarly to the applicability of Baseline Monitoring on individual APP permittees in subsection (C), the type of sampling (when it comes to discrete or grab or composite) expected when conducting Baseline Monitoring remains the same as the original permit’s routine discharge or groundwater monitoring sampling requirements, pursuant to R18-9-A206.

Comment 61: Utility

Clarification is necessary on the Baseline Monitoring Report submittal as to when a permit that has both discharge and groundwater monitoring specified in the permit should submit the report. Provided that the baseline report is to be submitted within three months following the last sample collection and that the discharge and monitoring well points are on different monitoring schedules, clarification is necessary as to whether separate baseline reports are required or a baseline report including both.

ADEQ Response 61:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed rule language, ADEQ has revised the relevant language. Final Rule, subsection (F)(2) states, “[p]ermittees subject to both Groundwater and Discharge Baseline Monitoring may develop a combined, comprehensive Baseline Monitoring Report within three months of receipt of the last sample result.” Additionally, Final Rule, subsection (G) requires, “[a]fter the conclusion of Baseline Monitoring, a permittee shall submit an administratively complete application to amend their permit to reflect a

new or adjusted AWQS in accordance with the amendment schedule described in subsection (A). The Baseline Monitoring Report shall be a component of the amendment application...” Also, concerning flexibility, Final Rule subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 62: Utility

Clarification is necessary if analytes can be excluded or not from Baseline Monitoring if the compound is already on the permit and significant historical data sets already exist. For example, Arsenic and *E. coli* are already listed in our permits for both discharge and groundwater monitoring, with significant historical data sets in existence.

ADEQ Response 62:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsections (D), (E) and (F). Due to this comment and others submitted on the proposed rule language, ADEQ has revised the final rule. Final Rule, subsection (E)(3) allows, “[p]ermittees that have collected relevant samples prior to the Baseline Monitoring period at permit-required groundwater point of compliance, discharge or other monitoring locations subject to alert levels, discharge limitations or AQLs pursuant to R18-9-A205, may use that data to develop the Baseline Monitoring Report. Previously collected data may be used to shorten or eliminate a Baseline Monitoring period if all data components are (a) [m]ethodologically sound, (b) [r]epresent a complete data set per the applicable requirements of Baseline Monitoring, and (c) [m]eets other applicable requirements of Baseline Monitoring.” Additionally, Final Rule, subsection (F)(1) states, “[a]t the conclusion of Baseline Monitoring, or upon the compilation of a complete and representative data set pursuant to subsection (E)(3) above, permittees shall develop a Baseline Monitoring Report within three months of receipt of the last sample result.” Also, concerning flexibility, Final Rule, subsection (D) states, “Alternative Baseline Monitoring Timeframe, Duration and Frequency. Permittees subject to Baseline Monitoring may submit a request to conduct Baseline Monitoring under an alternative timeframe, monitoring duration and sampling frequency within three months of a new or adjusted AWQS effective date with reasonable cause for the request included therein.”

Comment 63: Utility

Proposed Rule R18-9-A215(F) - The term "active discharge" is used. Please refer to the comment above under R18-9-A215(C)(1)(c).

ADEQ Response 63:

ADEQ appreciates the comment. *See* generally, Final Rule R18-9-A215, subsection (E)(1). Due to this comment and others submitted on the proposed rule language, ADEQ has replaced “active” with “permit-required”. The new term’s usage eliminates ambiguity and makes it patently clear that baseline monitoring requirements are meant to occur at the permit-required compliance monitoring locations.

Email: montague-breakwell.chris@azdeq.gov

The release of this Chapter in Supp. 23-4 replaces Supp. 23-2, 1-180 pages.

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

PART B. TYPE 1 GENERAL PERMITS

Section
R18-9-B301. Type 1 General Permit 49

PART C. TYPE 2 GENERAL PERMITS

Section
R18-9-C301. 2.01 General Permit: Drywells That Drain Areas Where Hazardous Substances Are Used, Stored, Loaded, or Treated 50
R18-9-C302. 2.02 General Permit: Intermediate Stockpiles at Mining Sites 52
R18-9-C303. 2.03 General Permit: Hydrologic Tracer Studies 53
R18-9-C304. 2.04 General Permit: Drywells that Drain Areas at Motor Fuel Dispensing Facilities Where Motor Fuels are Used, Stored, or Loaded 53
R18-9-C305. 2.05 General Permit: Capacity, Management, Operation, and Maintenance of a Sewage Collection System 56
R18-9-C306. 2.06 General Permit: Fish Hatchery Discharge to a Perennial Surface Water 58

PART D. TYPE 3 GENERAL PERMITS

R18-9-D301. 3.01 General Permit: Lined Impoundments 58
R18-9-D302. 3.02 General Permit: Process Water Discharges from Water Treatment Facilities 60
R18-9-D303. 3.03 General Permit: Vehicle and Equipment Washes 61
R18-9-D304. 3.04 General Permit: Non-Stormwater Impoundments at Mining Sites 62
R18-9-D305. 3.05 General Permit: Disposal Wetlands 63
R18-9-D306. 3.06 General Permit: Constructed Wetlands to Treat Acid Rock Drainage at Mining Sites 63
R18-9-D307. 3.07 General Permit: Tertiary Treatment Wetlands 64

PART E. TYPE 4 GENERAL PERMITS

Section
R18-9-E301. 4.01 General Permit: Sewage Collection Systems 65
R18-9-E302. 4.02 General Permit: Septic Tank with Disposal by Trench, Bed, Chamber Technology, or Seepage Pit, Less Than 3000 Gallons Per Day Design Flow 70
R18-9-E303. 4.03 General Permit: Composting Toilet, Less Than 3000 Gallons Per Day Design Flow 73
R18-9-E304. 4.04 General Permit: Pressure Distribution System, Less Than 3000 Gallons Per Day Design Flow 75
R18-9-E305. 4.05 General Permit: Gravelless Trench, Less Than 3000 Gallons Per Day Design Flow 76
R18-9-E306. 4.06 General Permit: Natural Seal Evapotranspiration Bed, Less Than 3000 Gallons Per Day Design Flow 77
R18-9-E307. 4.07 General Permit: Lined Evapotranspiration Bed, Less Than 3000 Gallons Per Day Design Flow 78
R18-9-E308. 4.08 General Permit: Wisconsin Mound, Less Than 3000 Gallons Per Day Design Flow 79
R18-9-E309. 4.09 General Permit: Engineered Pad System, Less Than 3000 Gallons Per Day Design Flow 81
R18-9-E310. 4.10 General Permit: Intermittent Sand Filter, Less Than 3000 Gallons Per Day Design Flow 82
R18-9-E311. 4.11 General Permit: Peat Filter, Less Than 3000

Gallons Per Day Design Flow83
R18-9-E312. 4.12 General Permit: Textile Filter, Less Than 3000 Gallons Per Day Design Flow 84
R18-9-E313. 4.13 General Permit: Denitrifying System Using Separated Wastewater Streams, Less Than 3000 Gallons Per Day Design Flow85
R18-9-E314. 4.14 General Permit: Sewage Vault, Less Than 3000 Gallons Per Day Design Flow85
R18-9-E315. 4.15 General Permit: Aerobic System Less Than 3000 Gallons Per Day Design Flow86
R18-9-E316. 4.16 General Permit: Nitrate-Reactive Media Filter, Less Than 3000 Gallons Per Day Design Flow87
R18-9-E317. 4.17 General Permit: Cap System, Less Than 3000 Gallons Per Day Design Flow87
R18-9-E318. 4.18 General Permit: Constructed Wetland, Less Than 3000 Gallons Per Day Design Flow88
R18-9-E319. 4.19 General Permit: Sand-Lined Trench, Less Than 3000 Gallons Per Day Design Flow89
R18-9-E320. 4.20 General Permit: Disinfection Devices, Less Than 3000 Gallons Per Day Design Flow90
R18-9-E321. 4.21 General Permit: Surface Disposal, Less Than 3000 Gallons Per Day Design Flow90
R18-9-E322. 4.22 General Permit: Subsurface Drip Irrigation Disposal, Less Than 3000 Gallons Per Day Design Flow91
R18-9-E323. 4.23 General Permit: 3000 to less than 24,000 Gallons Per Day Design Flow93
Table 1. Unit Design Flows94

ARTICLE 4. NITROGEN MANAGEMENT GENERAL PERMITS

Section
R18-9-401. Definitions96
R18-9-402. Nitrogen Management General Permits: Nitrogen Fertilizers96
R18-9-403. Nitrogen Management General Permits: Concentrated Animal Feeding Operations97
R18-9-404. Revocation of Coverage under a Nitrogen Management General Permit98

ARTICLE 5. GRAZING BEST MANAGEMENT PRACTICES

Article 5, consisting of Section R18-9-501, made by final rulemaking at 7 A.A.R. 1768, effective April 5, 2001 (Supp. 01-2).

Section
R18-9-501. Surface Water Quality General Grazing Permit98

ARTICLE 6. UNDERGROUND INJECTION CONTROL

Article 6, consisting of Parts A through J, and Table 1, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Article 6, consisting of Sections R18-9-601 through R18-9-603, repealed by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

Article 6, consisting of Sections R18-9-601 through R18-9-603, adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1).

Section
R18-9-601. Repealed98
R18-9-602. Repealed98

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

R18-9-603. Repealed 99

PART A. GENERAL PROVISIONS

Article 6, Part A, consisting of Sections R18-9-A601 through R18-9-A606, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-A601. Definitions 99
 R18-9-A602. Applicability 101
 R18-9-A603. Confidentiality of Information 102
 R18-9-A604. Classification of Wells 102
 R18-9-A605. Identification of Underground Sources of Drinking Water and Exempt Aquifers 103
 R18-9-A606. Criteria for Exempted Aquifers 104

PART B. GENERAL PROGRAM REQUIREMENTS

Article 6, Part B, consisting of Sections R18-9-B607 through R18-9-B615, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-B607. Prohibition of Unauthorized Injection 104
 R18-9-B608. Prohibition of Movement of Fluid into Underground Sources of Drinking Water 104
 R18-9-B609. Prohibition of Hazardous Waste Injection and Class IV Wells 104
 R18-9-B610. Waiver of Requirement by Director 105
 R18-9-B611. Records 105
 R18-9-B612. Area of Review 105
 R18-9-B613. Mechanical Integrity 106
 R18-9-B614. Plugging and Abandoning Class I, II, III, IV, and V Wells 106
 R18-9-B615. Transitioning from Class II to Class VI Injection Well 107

PART C. AUTHORIZATION BY PERMIT FOR UNDERGROUND INJECTION

Article 6, Part C, consisting of Sections R18-9-C616 through R18-9-C634, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-C616. Individual Permits; Application for Individual Permits 107
 R18-9-C617. Signatories 107

R18-9-C634. Termination of Permits 113

PART D. PERMIT CONDITIONS FOR UNDERGROUND INJECTION

Article 6, Part D, consisting of Sections R18-9-D635 through R18-9-D639, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-D635. Conditions Applicable to All Permits 113
 R18-9-D636. Establishing Permit Conditions 115
 R18-9-D637. Compliance Schedule 116
 R18-9-D638. Requirements for Recording and Reporting Monitoring Results 117
 R18-9-D639. Corrective Action 117

PART E. CLASS I INJECTION WELL REQUIREMENTS

Article 6, Part E, consisting of Sections R18-9-E640 through R18-9-E642, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-E640. Class I; Construction Requirements 117
 R18-9-E641. Class I; Operating, Monitoring, and Reporting Requirements 118
 R18-9-E642. Class I; Information to be Considered by the Director 119

PART F. CLASS II INJECTION WELL REQUIREMENTS

Article 6, Part F, consisting of Sections R18-9-F643 through R18-9-F645, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-F643. Class II; Construction Requirements 119
 R18-9-F644. Class II; Operating, Monitoring, and Reporting Requirements 120
 R18-9-F645. Class II; Information to be Considered by the Director 121

PART G. CLASS III INJECTION WELL REQUIREMENTS

Article 6, Part F, consisting of Sections R18-9-G646 through R18-9-G648, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-G646. Class III; Construction Requirements 121
 R18-9-G647. Class III; Operating, Monitoring, and Reporting Requirements 122
 R18-9-G648. Class III; Information to be Considered by the Director 122

PART H. CLASS IV INJECTION WELL REQUIREMENTS

Article 6, Part H, consisting of Section R18-9-H649, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Section

R18-9-H649. Class IV; Closure Requirements and Remediation 123

PART I. CLASS V INJECTION WELL REQUIREMENTS

Article 6, Part I, consisting of Sections R18-9-I650 through R18-9-I655, made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ARTICLE 1. AQUIFER PROTECTION PERMITS - GENERAL PROVISIONS**R18-9-101. Definitions**

In addition to the definitions established in A.R.S. § 49-201, the following terms apply to Articles 1, 2, 3, and 4 of this Chapter:

1. "Aggregate" means a clean graded hard rock, volcanic rock, or gravel of uniform size, between 3/4 inch and 2 1/2 inches in diameter, offering 30 percent or more void space, washed or prepared to be free of fine materials that will impair absorption surface performance, and has a hardness value of three or greater on the Moh's Scale of Hardness (can scratch a copper penny).
2. "Alert level" means a value or criterion established in an individual permit that serves as an early warning indicating a potential violation of a permit condition related to BADCT or the discharge of a pollutant to groundwater.
3. "AQL" means an aquifer quality limit and is a permit limitation set for aquifer water quality measured at the point of compliance that either represents an Aquifer Water Quality Standard or, if an Aquifer Water Quality Standard for a pollutant is exceeded in an aquifer at the time of permit issuance, represents the ambient water quality for that pollutant.
4. "Aquifer Protection Permit" means an individual permit or a general permit issued under A.R.S. §§ 49-203, 49-241 through 49-252, and Articles 1, 2, and 3 of this Chapter.
5. "Aquifer Water Quality Standard" means a standard established under A.R.S. §§ 49-221 and 49-223.
6. "AZPDES" means the Arizona Pollutant Discharge Elimination System, which is the state program for issuing, modifying, revoking, reissuing, terminating, monitoring, and enforcing permits, and imposing and enforcing pretreatment and biosolids requirements under A.R.S. Title 49, Chapter 2, Article 3.1 and 18 A.A.C. 9, Articles 9 and 10.
7. "BADCT" means the best available demonstrated control technology, process, operating method, or other alternative to achieve the greatest degree of discharge reduction determined for a facility by the Director under A.R.S. § 49-243.
8. "Bedroom" means, for the purpose of determining design flow for an on-site wastewater treatment facility for a dwelling, any room that has:
 - a. A floor space of at least 70 square feet in area, excluding closets;
 - b. A ceiling height of at least 7 feet;
 - c. Electrical service and ventilation;
 - d. A closet or an area where a closet could be constructed;
 - e. At least one window capable of being opened and used for emergency egress; and
 - f. A method of entry and exit to the room that allows the room to be considered distinct from other rooms in the dwelling and to afford a level of privacy customarily expected for such a room.
9. "Book net worth" means the net difference between total assets and total liabilities.
10. "CCR" means coal combustion residuals which include fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.
11. "CCR landfill" means an area of land or an excavation that receives CCR and which is not a municipal solid waste landfill, a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine, or a cave. A CCR landfill also includes sand and gravel pits and quarries that receive CCR, CCR piles, and any practice that does not meet the definition of beneficial use of CCR.
12. "CCR surface impoundment" means a natural topographic depression, man-made excavation, or diked area, which is designed to hold an accumulation of CCR and liquids, and the unit treats, stores, or disposes of CCR.
13. "CCR unit" means any CCR landfill which receives CCR, any CCR surface impoundment designed to hold an accumulation of CCR and liquids, and the unit treats, stores or disposes of CCR. CCR unit includes a lateral expansion of a CCR unit, or a combination of more than one of these units that receives CCR.
14. "Cesspool" means a pit, collection structure, or subsurface fluid distribution system, which may or may not be partially lined, that receives discharged sewage. A cesspool is not an on-site wastewater treatment facility, such as a septic tank, vault, or other structure permitted under Article 3 of this Chapter.
15. "Chamber technology" means a method for dispersing treated wastewater into soil from an on-site wastewater treatment facility by one or more manufactured leaching chambers with an open bottom and louvered, load-bearing sidewalls that substitute for an aggregate-filled trench described in R18-9-E302.
16. "CMOM Plan" means a Capacity, Management, Operations, and Maintenance Plan, which is a written plan that describes the activities a permittee will engage in and actions a permittee will take to ensure that the capacity of the sewage collection system, when unobstructed, is sufficient to convey the peak wet weather flow through each reach of sewer, and provides for the management, operation, and maintenance of the permittee's sewage collection system.
17. "Design capacity" means the volume of a containment feature at a discharging facility that accommodates all permitted flows and meets all Aquifer Protection Permit conditions, including allowances for appropriate peaking and safety factors to ensure sustained, reliable operation.
18. "Design flow" means the daily flow rate a facility is designed to accommodate on a sustained basis while satisfying all Aquifer Protection Permit discharge limitations and treatment and operational requirements. The design flow either incorporates or is used with appropriate peaking and safety factors to ensure sustained, reliable operation.
19. "Direct reuse site" means an area where reclaimed water is applied or impounded.
20. "Disposal works" means the system for disposing treated wastewater generated by the treatment works of a sewage treatment facility or on-site wastewater treatment facility, by surface or subsurface methods. Disposal works do not include systems for activities regulated under 18 A.A.C. 9, Article 7.
21. "Drywell" means a well which is a bored, drilled or driven shaft or hole whose depth is greater than its width and is designed and constructed specifically for the disposal of storm water. Drywells do not include class 1, class 2, class 3 or class 4 injection wells as defined by the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- Federal Underground Injection Control Program (P.L. 93-523, part C), as amended. A.R.S. § 49-331(3)*
22. "Dwelling" means any building, structure, or improvement intended for residential use or related activity, including a house, an apartment unit, a condominium unit, a townhouse, or a mobile or manufactured home that has been constructed or will be constructed on real property.
 23. "Final permit determination" means a written notification to the applicant of the Director's final decision whether to issue or deny an Individual Aquifer Protection Permit.
 24. "Gray water" means wastewater that has been collected separately from a sewage flow and that originates from a clothes washer or a bathroom tub, shower or sink but that does not include wastewater from a kitchen sink, dishwasher or toilet. A.R.S. § 49-201(20).
 25. "Groundwater Quality Protection Permit" means a permit issued by the Arizona Department of Health Services or the Department before September 27, 1989 that regulates the discharge of pollutants that may affect groundwater.
 26. "Homeowner's association" means a nonprofit corporation or unincorporated association of owners created pursuant to a declaration to own and operate portions of a planned community and which has the power under the declaration to assess association members to pay the costs and expenses incurred in the performance of the association's obligations under the declaration.
 27. "Injection well" means a well that receives a discharge through pressure injection or gravity flow.
 28. "Intermediate stockpile" means in-process material not intended for long-term storage that is in transit from one process to another at a mining site. Intermediate stockpile does not include metallic ore concentrate stockpiles or feedstocks not originating at the mining site.
 29. "Land treatment facility" means an operation designed to treat and improve the quality of waste, wastewater, or both, by placement wholly or in part on the land surface to perform part or all of the treatment. A land treatment facility includes a facility that performs biosolids drying, processing, or composting, but not land application performed in compliance with 18 A.A.C. 9, Article 10.
 30. "Mining site" means a site assigned one or more of the following primary Standard Industrial Classification Codes: 10, 12, 14, 32, and 33, and includes noncontiguous properties owned or operated by the same person and connected by a right-of-way controlled by that person to which the public is not allowed access.
 31. "Nitrogen Management Area" means an area designated by the Director for which the Director prescribes measures on an area-wide basis to control sources of nitrogen, including cumulative discharges from on-site wastewater treatment facilities, that threaten to cause or have caused an exceedance of the Aquifer Water Quality Standard for nitrate.
 32. "Notice of Disposal" means a document submitted to the Arizona Department of Health Services or the Department before September 27, 1989, giving notification of a pollutant discharge that may affect groundwater.
 33. "On-site wastewater treatment facility" means a conventional septic tank system or alternative system that is installed at a site to treat and dispose of wastewater of predominantly human origin that is generated at that site. A.R.S. § 49-201(29). An on-site wastewater treatment facility does not include a pre-fabricated, manufactured treatment works that typically uses an activated sludge unit process and has a design flow of 3000 gallons per day or more.
 34. "Operational life" means the designed or planned period during which a facility remains operational while being subject to permit conditions, including closure requirements. Operational life does not include post-closure activities.
 35. "Person" means an individual, employee, officer, managing body, trust, firm, joint stock company, consortium, public or private corporation, including a government corporation, partnership, association or state, a political subdivision of this state, a commission, the United States government or any federal facility, interstate body or other entity. A.R.S. § 49-201(33). For the purposes of permitting a sewage treatment facility under Article 2 of this Chapter, person does not include a homeowner's association.
 36. "Pilot project" means a short-term, limited-scale test designed to gain information regarding site conditions, project feasibility, or application of a new technology.
 37. "Process solution" means a pregnant leach solution, barren solution, raffinate, or other solution uniquely associated with the mining or metals recovery process.
 38. "Residential soil remediation level" means the applicable predetermined standard established in 18 A.A.C. 7, Article 2, Appendix A.
 39. "Seasonal high water table" means the free surface representing the highest point of groundwater rise within an aquifer due to seasonal water table changes over the course of a year.
 40. "Setback" means a minimum horizontal distance maintained between a feature of a discharging facility and a potential point of impact.
 41. "Sewage" means untreated wastes from toilets, baths, sinks, lavatories, laundries, other plumbing fixtures, and waste pumped from septic tanks in places of human habitation, employment, or recreation. Sewage does not include gray water as defined in A.R.S. § 49-201(20), if the gray water is reused according to 18 A.A.C. 9, Article 7.
 42. "Sewage collection system" means a system of pipelines, conduits, manholes, pumping stations, force mains, and all other structures, devices, and appurtenances that collect, contain, and convey sewage from its sources to the entry of a sewage treatment facility or on-site wastewater treatment facility serving sources other than a single-family dwelling.
 43. "Sewage treatment facility" means a plant or system for sewage treatment and disposal, except for an on-site wastewater treatment facility, that consists of treatment works, disposal works and appurtenant pipelines, conduits, pumping stations, and related subsystems and devices. A sewage treatment facility does not include components of the sewage collection system or the reclaimed water distribution system.
 44. "Surface impoundment" means a pit, pond, or lagoon with a surface dimension equal to or greater than its depth, and used for the storage, holding, settling, treatment, or discharge of liquid pollutants or pollutants containing free liquids.
 45. "Tracer" means a substance, such as a dye or other chemical, used to change the characteristic of water or some other fluid to detect movement.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

46. "Tracer study" means a test conducted using a tracer to measure the flow velocity, hydraulic conductivity, flow direction, hydrodynamic dispersion, partitioning coefficient, or other property of a hydrologic system.
47. "Treatment works" means a plant, device, unit process, or other works, regardless of ownership, used for treating, stabilizing, or holding municipal or domestic sewage in a sewage treatment facility or on-site wastewater treatment facility.
48. "Typical sewage" means sewage conveyed to an on-site wastewater treatment facility in which the total suspended solids (TSS) content does not exceed 430 mg/l, the five-day biochemical oxygen demand (BOD₅) does not exceed 380 mg/l, the total nitrogen does not exceed 53 mg/l, and the content of oil and grease does not exceed 75 mg/l.
49. "Underground storage facility" means a constructed underground storage facility or a managed underground storage facility. A.R.S. § 45-802.01(21).
50. "Waters of the United States" means:
- All waters that are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters that are subject to the ebb and flow of the tide;
 - All interstate waters, including interstate wetlands;
 - All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any waters:
 - That are or could be used by interstate or foreign travelers for recreational or other purposes;
 - From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
 - That are used or could be used for industrial purposes by industries in interstate commerce;
 - All impoundments of waters defined as waters of the United States under this definition;
 - Tributaries of waters identified in subsections (a) through (d);
 - The territorial sea; and
 - Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in subsections (a) through (f).

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3). Amended by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final expedited rulemaking at 25 A.A.R. 3060, effective immediately September 23, 2019, pursuant to A.R.S. § 41-1027(H) (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-102. Facilities to which Articles 1, 2, and 3 Do Not Apply

Articles 1, 2, and 3 do not apply to:

- A drywell used solely to receive storm runoff and located so that no use, storage, loading, or treating of hazardous substances occurs in the drainage area;
- A direct pesticide application in the commercial production of plants and animals subject to the Federal Insecticide, Fungicide, and Rodenticide Act (P.L. 92-516; 86 Stat. 975; 7 United States Code 135 et seq., as amended), or A.R.S. §§ 49-301 through 49-309 and applicable rules, or A.R.S. Title 3, Chapter 2, Article 6 and applicable rules.

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3). Amended by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-103. Class Exemptions

Class exemptions. In addition to the classes or categories of facilities listed in A.R.S. § 49-250(B), the following classes or categories of facilities are exempt from the Aquifer Protection Permit requirements in Articles 1, 2, and 3 of this Chapter:

- Facilities that treat, store, or dispose of hazardous waste and have been issued a permit or have interim status, under the Resource Conservation and Recovery Act (P.L. 94580; 90 Stat. 2796; 42 U.S.C. 6901 et seq., as amended), or have been issued a permit according to the hazardous waste management rules adopted under 18 A.A.C. 8, Article 2;
- Underground storage tanks that contain a regulated substance as defined in A.R.S. § 49-1001;
- Facilities for the disposal of solid waste, as defined in A.R.S. § 49-701.01, that are located in unincorporated areas and receive solid waste from four or fewer households;
- Land application of biosolids in compliance with 18 A.A.C. 9, Articles 9 and 10;
- CCR Units regulated by 40 CFR 257, Subpart D or by a permit in effect under a Department program approved by the United States Environmental Protection Agency in accordance with 42 U.S.C. § 6945(d)(1);
- Underground Injection Control Class V injection wells regulated under an area or individual permit per 18 A.A.C. 9, Article 6, Part I.

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Subsection 4 citation corrected to reflect recodification at 7 A.A.R. 2522 (Supp. 03-1). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final expedited rulemaking at 25 A.A.R. 3060, effective immediately September 23, 2019, pursuant to A.R.S. § 41-1027(H) (Supp. 19-3). Amended by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-104. Transition from Notices of Disposal and Groundwater Quality Protection Permitted Facilities

A person who owns, operates, or operated a facility on or after January 1, 1986 for which a Notice of Disposal was filed or a Groundwater Quality Protection Permit was issued shall, within 90 days from the date on the Director's notification, submit an application for an Aquifer Protection Permit or a closure plan as specified under A.R.S. § 49-252. The person shall obtain a permit for continued operation, closure of the facility, or clean closure approval.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Failure to submit an application or closure plan as required terminates continuance of the Notice of Disposal or Groundwater Quality Protection Permit.

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3).
Amended by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-105. Permit Continuance**A. Continuance.**

1. Groundwater Quality Protection Permits.
 - a. Subject to R18-9-104 and other provisions of this Section, a Groundwater Quality Protection Permit issued before September 27, 1989 is valid according to the terms of the permit until replaced by an Aquifer Protection Permit issued by the Department.
 - b. A person who owns or operates a facility to which a Groundwater Quality Protection Permit was issued is in compliance with Articles 1, 2, and 3 of this Chapter and A.R.S. Title 49, Chapter 2, Article 3, if the facility:
 - i. Meets the conditions of the Groundwater Quality Protection Permit; and
 - ii. Is not causing or contributing to the violation of any Aquifer Water Quality Standard at a point of compliance, determined by the criteria in A.R.S. § 49-244.
2. Notice of Disposal. A person who owns or operates a facility for which a Notice of Disposal was filed before September 27, 1989 complies with Articles 1, 2, and 3 of this Chapter and A.R.S. Title 49, Chapter 2, Article 3 if the facility is not causing or contributing to the violation of an Aquifer Water Quality Standard at a point of compliance, determined by the criteria in A.R.S. § 49-244.
3. Aquifer Protection Permit application submittal. A person who did not file a Notice of Disposal and does not possess a Groundwater Quality Protection Permit or an Aquifer Protection Permit for an existing facility, but submitted the information required in applicable rules before December 27, 1989, is in compliance with Articles 1, 2, and 3 of this Chapter only if the person submitted an Aquifer Protection Permit application to the Department before January 1, 2001.

B. Applicability. Subsection (A) applies until the Director:

1. Issues an Aquifer Protection Permit for the facility,
2. Denies an Aquifer Protection Permit for the facility,
3. Issues a letter of clean closure approval for the facility under A.R.S. § 49-252, or
4. Determines that the person failed to submit an application under R18-9-104.

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3).
Amended effective November 12, 1996 (Supp. 96-4).
Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-106. Determination of Applicability

- A.** A person who engages or who intends to engage in an operation or an activity that may result in a discharge regulated under Articles 1, 2, and 3 of this Chapter may submit a

request, on a form provided by the Department, that the Department determine the applicability of A.R.S. §§ 49-241 through 49-252 and Articles 1, 2, and 3 of this Chapter to the operation or activity.

- B.** A person requesting a determination of applicability shall provide the following information and the applicable fee under 18 A.A.C. 14:
1. The name and location of the operation or activity;
 2. The name of any person who is engaging or who proposes to engage in the operation or activity;
 3. A description of the operation or activity;
 4. A description of the volume, chemical composition, and characteristics of materials stored, handled, used, or disposed of in the operation or activity; and
 5. Any other information required by the Director to make the determination of applicability.
- C.** Within 45 days after receipt of a request for a determination of applicability, the Director shall notify in writing the person making the request that the operation or activity:
1. Is not subject to the requirements of A.R.S. §§ 49-241 through 49-252 and Articles 1, 2, and 3 of this Chapter because the operation or facility does not discharge as described under A.R.S. § 49-241;
 2. Is not subject to the requirements of A.R.S. §§ 49-241 through 49-252 and Articles 1, 2, and 3 of this Chapter because the operation or activity is exempted by A.R.S. § 49-250 or R18-9-103;
 3. Is eligible for a general permit under A.R.S. §§ 49-245.01, 49-245.02 or 49-247 or Article 3 of this Chapter, specifying the particular general permit that would apply if the person meets the conditions of the permit; or
 4. Is subject to the permit requirements of A.R.S. §§ 49-241 through 49-252 and Articles 1, 2, and 3 of this Chapter.
- D.** If, after issuing a determination of applicability under this Section, the Director concludes that the determination or the information relied upon for a determination is inaccurate, the Director may modify or withdraw its determination upon written notice to the person who requested the determination of applicability.
- E.** If the Director determines that an operation or activity is subject to the requirements of A.R.S. §§ 49-241 through 49-252, the person who owns or operates the discharging facility shall, within 90 days from receiving the Director's written notification, submit an application for an Aquifer Protection Permit or a closure plan.

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3).
Amended by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-107. Consolidation of Aquifer Protection Permits

- A.** The Director may consolidate any number of individual permits or the coverage for any facility authorized to discharge under a general permit into a single individual permit, if:
1. The facilities are part of the same project or operation and are located in a contiguous geographic area, or
 2. The facilities are part of an area under the jurisdiction of a single political subdivision.
- B.** All applicable individual permit requirements established in Articles 1 and 2 of this Chapter apply to the consolidation of Aquifer Protection Permits.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-108. Public Notice**A. Individual permits.**

1. The Department shall provide the entities specified in subsection (A)(2), with monthly written notification, by regular mail or electronically, of the following:
 - a. Individual permit applications,
 - b. Temporary permit applications,
 - c. Preliminary and final decisions by the Director whether to issue or deny an individual or temporary permit,
 - d. Closure plans received under R18-9-A209(B),
 - e. Significant permit amendments and "other" permit amendments,
 - f. Permit revocations, and
 - g. Clean closure approvals.
2. Entities.
 - a. Each county department of health, environmental services department, or comparable department;
 - b. A federal, state, local agency, or council of government, that may be affected by the permit action; and
 - c. A person who requested, in writing, notification of the activities described in subsection (A).
3. The Department may post the information referenced in subsections (A)(1) and (2) on the Department web site: www.azdeq.gov.

B. General permits. Public notice requirements do not apply.**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-109. Public Participation**A. Notice of Preliminary Decision.**

1. The Department shall publish a Notice of Preliminary Decision regarding the issuance or denial of a significant permit amendment or a final permit determination in one or more newspapers of general circulation where the facility is located.
2. The Department shall accept written comments from the public before a significant permit amendment or a final permit determination is made.
3. The written public comment period begins on the publication date of the Notice of Preliminary Decision and extends for 30 calendar days.

B. Public hearing.

1. The Department shall provide notice and conduct a public hearing to address a Notice of Preliminary Decision regarding a significant permit amendment or final permit determination if:
 - a. Significant public interest in a public hearing exists, or
 - b. Significant issues or information has been brought to the attention of the Department that has not been considered previously in the permitting process.
2. If, after publication of the Notice of Preliminary Decision, the Department determines that a public hearing is

necessary, the Department shall schedule a public hearing and publish the Notice of Preliminary Decision at least once, in one or more newspapers of general circulation where the facility is located.

3. The Department shall accept written public comment until the close of the hearing record as specified by the person presiding at the public hearing.

C. The Department shall respond in writing to all comments submitted during the formal public comment period.**D. At the same time the Department notifies a permittee of a significant permit amendment or an applicant of the final permit determination, the Department shall send, through regular mail or electronically, a notice of the amendment or determination and the summary of response to comments to any person who submitted comments or attended a public hearing on the significant permit amendment or final permit determination.****E. General permits. Public participation requirements do not apply.****Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-110. Inspections, Violations, and Enforcement**A. The Department shall conduct an inspection of a permitted facility as specified under A.R.S. § 41-1009.****B. A person who owns or operates a facility contrary to a provision of Articles 1, 2, and 3 of this Chapter, violates a condition of an Aquifer Protection Permit, or violates a condition of a Groundwater Quality Protection Permit continued under R189105(A)(1) is subject to the enforcement actions established under A.R.S. Title 49, Chapter 2, Article 4.****Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-111. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-112. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-113. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-114. Repealed

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-115. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-120. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3).
Repealed effective July 14, 1998 (Supp. 98-3).

R18-9-121. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-122. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-123. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3).
Repealed effective November 15, 1996 (Supp. 96-4).

R18-9-124. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-125. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-126. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-127. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-128. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3).
Repealed effective November 12, 1996 (Supp. 96-4).

R18-9-129. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-130. Repealed**Historical Note**

Adopted effective September 27, 1989 (Supp. 89-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

Appendix I. Repealed**Historical Note**

Appendix I repealed by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

ARTICLE 2. AQUIFER PROTECTION PERMITS - INDIVIDUAL PERMITS**PART A. APPLICATION AND GENERAL PROVISIONS****R18-9-A201. Individual Permit Application**

- A.** An individual permit application covers one or more of the following categories:
1. Drywell,
 2. Industrial,
 3. Mining,
 4. Wastewater,
 5. Solid waste disposal, or
 6. Land treatment facility.
- B.** An applicant for an individual permit shall provide the Department with:
1. The following information on an application form:
 - a. The name and mailing address of the applicant;
 - b. The name and mailing address of the owner of the facility;
 - c. The name and mailing address of the operator of the facility;
 - d. The legal description, including latitude and longitude, of the location of the facility;
 - e. The expected operational life of the facility; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- f. The permit number for any other federal or state environmental permit issued to the applicant for that facility or site.
2. A copy of the certificate of disclosure required by A.R.S. § 49-109;
 3. Evidence that the facility complies with applicable municipal or county zoning ordinances, codes, and regulations;
 4. Two copies of the technical information required in R18-9-A202(A);
 5. Cost estimates for facility construction, operation, maintenance, closure, and post-closure as follows.
 - a. The applicant shall ensure that the cost estimates are derived by an engineer, controller, or accountant using competitive bids, construction plan take-off's, specifications, operating history for similar facilities, or other appropriate sources, as applicable.
 - b. The following cost estimates that are representative of regional fair market costs:
 - i. The cost of closure estimate under R18-9-A209(B)(2), consistent with the closure plan or strategy submitted under R18-9-A202(A)(10);
 - ii. The estimated cost of post-closure monitoring and maintenance under R18-9-A209(C), consistent with the post-closure plan or strategy submitted under R18-9-A202(A)(10); and
 - iii. For a sewage treatment facility or utility subject to Title 40 of the Arizona Revised Statutes, the operation and maintenance costs of those elements of the facility used to make the demonstration under A.R.S. § 49-243(B);
 6. For a sewage treatment facility:
 - a. Documentation that the sewage treatment facility or expansion conforms with the Certified Areawide Water Quality Management Plan and the Facility Plan, and
 - b. The additional information required in R18-9-B202 and R18-9-B203;
 7. Certification in writing that the information submitted in the application is true and accurate to the best of the applicant's knowledge; and
 8. The applicable fee established in 18 A.A.C. 14.
- C.** Special provision for an underground storage facility as defined in A.R.S. § 45-802.01(21). A person applying for an individual permit for an underground storage facility shall submit the information described in R18-9-A201 through R18-9-A203, except for the BADCT information specified in R18-9-A202(A)(5).
1. Upon receipt of the application, the Department shall process the application in coordination with the underground storage facility permit process administered by the Department of Water Resources.
 2. The Department shall advise the Department of Water Resources of each permit application received.
- D.** Pre-application conference. Upon request of the applicant, the Department shall schedule and hold a pre-application conference with the applicant to discuss any requirements in Articles 1 and 2 of this Chapter.
- E.** Draft permit. The Department shall provide the applicant with a draft of the individual permit before publication of the Notice of Preliminary Decision specified in R18-9-109.
- F.** Permit duration. Except for a temporary permit, an individual permit is valid for the operational life of the facility and any period during which the facility is subject to a post-closure plan under R18-9-A209(C).
- G.** Permit issuance or denial.
1. The Director shall issue an individual permit, based upon the information obtained by or made available to the Department, if the Director determines that the applicant will comply with A.R.S. §§ 49-241 through 49-252 and Articles 1 and 2 of this Chapter.
 2. The Director shall provide the applicant with written notification of the final decision to issue or deny the permit within the overall licensing time-frame requirements under 18 A.A.C. 1, Article 5, Table 10 and the following:
 - a. The applicant's right to appeal the final permit determination, including the number of days the applicant has to file a protest and the name and telephone number of the Department contact person who can answer questions regarding the appeals process;
 - b. If the permit is denied under R18-9-A213(B), the reason for the denial with reference to the statute or rule on which the denial is based; and
 - c. The applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A202. Technical Requirements

- A.** Except as specified in R18-9-A201(C)(1), an applicant shall, as required under R18-9-A201(B)(4), submit the following technical information as attachments to the individual permit application:
1. A topographic map, or other appropriate map approved by the Department, of the facility location and contiguous land area showing the known use of adjacent properties, all known water well locations found within one-half mile of the facility, and a description of well construction details and well uses, if available;
 2. A facility site plan showing all known property lines, structures, water wells, injection wells, drywells and their uses, topography, and the location of points of discharge. The facility site plan shall include all known borings. If the Department determines that borings are numerous, the applicant shall satisfy this requirement with a narrative description of the number and location of the borings;
 3. The facility design documents indicating proposed or as-built design details and proposed or as-built configuration of basins, ponds, waste storage areas, drainage diversion features, or other engineered elements of the facility affecting discharge. When formal as-built plan submittals are not available, the applicant shall provide documentation sufficient to allow evaluation of those elements of the facility affecting discharge, following the demonstration requirements of A.R.S. § 49-243(B). An applicant seeking an Aquifer Protection Permit for a sewage treatment facility satisfies the requirements of this subsection by submitting the documents required in R18-9-B202 and R18-9-B203;
 4. A summary of the known past facility discharge activities and the proposed facility discharge activities indicating all of the following:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. The chemical, biological, and physical characteristics of the discharge;
 - b. The rate, volume, and frequency of the discharge for each facility; and
 - c. The location of the discharge and a map outlining the pollutant management area described in A.R.S. § 49-244(1);
5. A description of the BADCT employed in the facility, including:
 - a. A statement of the technology, processes, operating methods, or other alternatives proposed to meet the requirements of A.R.S. § 49-243(B), (G), or (P), as applicable. The statement shall describe:
 - i. The alternative discharge control measures considered,
 - ii. The technical and economic advantages and disadvantages of each alternative, and
 - iii. The justification for selection or rejection of each alternative;
 - b. An evaluation of each alternative discharge control technology relative to the amount of discharge reduction achievable, site-specific hydrologic and geologic characteristics, other environmental impacts, and water conservation or augmentation;
 - c. For a new facility, an industry-wide evaluation of the economic impact of implementation of each alternative discharge control technology;
 - d. For an existing facility, a statement reflecting the consideration of factors listed in A.R.S. § 49-243(B)(1)(a) through (h);
 - e. A sewage treatment facility meeting the BADCT requirements under Article 2, Part B of this Chapter satisfies the requirements under subsections (A)(5)(a) through (d).
 6. Proposed points of compliance for the facility based on A.R.S. § 49-244. An applicant shall demonstrate that:
 - a. The facility will not cause or contribute to a violation of an Aquifer Water Quality Standard at the proposed point of compliance; or
 - b. If an Aquifer Water Quality Standard for a pollutant is exceeded in an aquifer at the time of permit issuance, no additional degradation of the aquifer relative to that pollutant and determined at the proposed point of compliance will occur as a result of the discharge from the proposed facility. In this case, the applicant shall submit an Ambient Groundwater Monitoring Report that includes:
 - i. Data from eight or more rounds of ambient groundwater samples collected to represent groundwater quality at the proposed points of compliance, and
 - ii. An AQL proposal for each pollutant that exceeds an Aquifer Water Quality Standard;
 7. A contingency plan that meets the requirements of R18-9-A204;
 8. A hydrogeologic study that defines the discharge impact area for the expected duration of the facility. The Department may allow the applicant to submit an abbreviated hydrogeologic study or, if warranted, no hydrogeologic study, based upon the quantity and characteristics of the pollutants discharged, the methods of disposal, and the site conditions. The applicant may include information from a previous study of the affected area to meet a requirement of the hydrogeologic study, if the previous study accurately represents current hydrogeologic conditions.
 - a. The hydrogeologic study shall demonstrate:
 - i. That the facility will not cause or contribute to a violation of an Aquifer Water Quality Standard at the applicable point of compliance; or
 - ii. If an Aquifer Water Quality Standard for a pollutant is exceeded in an aquifer at the time of permit issuance, that no additional degradation of the aquifer relative to that pollutant and determined at the applicable point of compliance will occur as a result of the discharge from the proposed facility;
 - b. Based on the quantity and characteristics of pollutants discharged, methods of disposal, and site conditions, the Department may require the applicant to provide:
 - i. A description of the surface and subsurface geology, including a description of all borings;
 - ii. The location of any perennial, intermittent, or ephemeral surface water bodies;
 - iii. The characteristics of the aquifer and geologic units with limited permeability, including depth, hydraulic conductivity, and transmissivity;
 - iv. The rate, volume, and direction of surface water and groundwater flow, including hydrographs, if available, and equipotential maps;
 - v. The precise location or estimate of the location of the 100-year flood plain and an assessment of the 100-year flood surface flow and potential impacts on the facility;
 - vi. Documentation of the existing quality of the water in the aquifers underlying the site, including, where available, the method of analysis, quality assurance, and quality control procedures associated with the documentation;
 - vii. Documentation of the extent and degree of any known soil contamination at the site;
 - viii. An assessment of the potential of the discharge to cause the leaching of pollutants from surface soils or vadose materials;
 - ix. For an underground water storage facility, an assessment of the potential of the discharge to cause the leaching of pollutants from surface soils or vadose materials or cause the migration of contaminated groundwater;
 - x. Any changes in the water quality expected because of the discharge;
 - xi. A description of any expected changes in the elevation or flow directions of the groundwater expected to be caused by the facility;
 - xii. A map of the facility's discharge impact area; or
 - xiii. The criteria and methodologies used to determine the discharge impact area.
 9. A detailed proposal indicating the alert levels, discharge limitations, monitoring requirements, compliance schedules, and temporary cessation or plans that the applicant will use to satisfy the requirements of A.R.S. Title 49, Chapter 2, Article 3, and Articles 1 and 2 of this Chapter;
 10. Closure and post-closure strategies or plans; and
 11. Any other relevant information required by the Department to determine whether to issue a permit.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- B.** An applicant shall demonstrate the ability to maintain the technical capability necessary to carry out the terms of the individual permit, including a demonstration that a certified operator will operate the facility if a certified operator is required under 18 A.A.C. 5. The applicant shall make the demonstration by submitting the following information for each person principally responsible for designing, constructing, or operating the facility:
1. Pertinent licenses or certifications held by the person;
 2. Professional training relevant to the design, construction, or operation of the facility; and
 3. Work experience relevant to the design, construction, or operation of the facility.
- d.** Any other details that demonstrate how the applicant is financially capable of meeting the costs described in R18-9-A201(B)(5); and
4. For a facility subject to R18-9-A201(B)(5)(b)(iii) and not owned by a state or federal agency, county, city, town, or other local governmental entity, submit evidence of financial arrangements to cover the operation and maintenance costs described in R18-9-A201(B)(5).
- C.** Financial assurance mechanisms. The applicant may use any of the following mechanisms to cover the financial assurance obligation under R18-9-A201(B)(5):
1. Financial test for self-assurance. If an applicant uses a financial test for self-assurance, the applicant shall not consolidate the financial statement with a parent or sibling company. The applicant shall make the demonstration in either subsection (C)(1)(a) or (b) and submit the information required in subsection (C)(1)(c):
 - a. The applicant may demonstrate:
 - i. One of the following:
 - (1) A ratio of total liabilities to net worth less than 2.0 and a ratio of current assets to current liabilities greater than 1.5;
 - (2) A ratio of total liabilities to net worth less than 2.0 and a ratio of the sum of net annual income plus depreciation, depletion, and amortization to total liabilities greater than 0.1; or
 - (3) A ratio of the sum of net annual income plus depreciation, depletion, and amortization to total liabilities greater than 0.1 and a ratio of current assets to current liabilities greater than 1.5;
 - ii. The net working capital and tangible net worth of the applicant each are at least six times the closure cost estimate; and
 - iii. The applicant has assets in the U.S. of at least 90 percent of total assets or six times the closure and post-closure cost estimate; or
 - b. The applicant may demonstrate:
 - i. The applicant's senior unsecured debt has a current investment-grade rating as issued by Moody's Investor Service, Inc.; Standard and Poor's Corporation; or Fitch Ratings;
 - ii. The tangible net worth of the applicant is at least six times the closure cost estimate; and
 - iii. The applicant has assets in the U.S. of at least 90 percent of total assets or six times the closure and post-closure cost estimate; and
 - c. The applicant shall submit:
 - i. A letter signed by the applicant's chief financial officer that identifies the criterion specified in subsection (C)(1)(a) or (b) and used by the applicant to satisfy the financial assurance requirements of this Section, an explanation of how the applicant meets the criterion, and certification of the letter's accuracy; and
 - ii. A statement from an independent certified public accountant verifying that the demonstration submitted under subsection (C)(1)(c)(i) is accurate based on a review of the applicant's financial statements for the latest completed fiscal year or more recent financial data and no adjustment to the financial statement is necessary.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A203. Financial Requirements**A. Definitions.**

1. "Book net worth" means the net difference between total assets and total liabilities.
2. "Face amount" means the total amount the insurer is obligated to pay under the policy.
3. "Net working capital" means current assets minus current liabilities.
4. "Substantial business relationship" means a pattern of recent or ongoing business transactions to the extent that a guaranty contract issued incident to that relationship is valid and enforceable.
5. "Tangible net worth" means an owner or operator's book net worth, plus subordinated debts, less goodwill, patent rights, royalties, and assets and receivables due from affiliates or shareholders.

B. Financial demonstration. A person applying for an individual permit shall demonstrate financial capability to construct, operate, close, and ensure proper post-closure care of the facility in compliance with A.R.S. Title 49, Chapter 2, Article 3; Articles 1 and 2 of this Chapter; and the conditions of the individual permit. The applicant shall:

1. Submit a letter signed by the chief financial officer stating that the applicant is financially capable of meeting the costs described in R18-9-A201(B)(5);
2. For a state or federal agency, county, city, town, or other local governmental entity, submit a statement specifying the details of the financial arrangements used to meet the estimated closure and post-closure costs submitted under R18-9-A201(B)(5), including any other details that demonstrate how the applicant is financially capable of meeting the costs described in R18-9-A201(B)(5);
3. For other than a state or federal agency, county, city, town, or other local governmental entity, submit the information required for at least one of the financial assurance mechanisms listed in subsection (C) that covers the closure and post-closure costs submitted under R18-9-A201(B)(5), including:
 - a. The selected financial mechanism or mechanisms;
 - b. The amount covered by each financial mechanism;
 - c. The institution or company that is responsible for each financial mechanism used in the demonstration; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. Performance surety bond. The applicant may use a performance surety bond if the following conditions are met:
 - a. The company providing the performance bond is listed as an acceptable surety on federal bonds in Circular 570 of the U.S. Department of the Treasury;
 - b. The bond provides for performance of all the covered items listed in R18-9-A201(B)(5) by the surety, or by payment into a standby trust fund of an amount equal to the penal amount if the permittee fails to perform the required activities;
 - c. The penal amount of the bond is at least equal to the amount of the cost estimate developed in R18-9-A201(B)(5) if the bond is the only method used to satisfy the requirements of this Section or a pro-rata amount if used with another financial assurance mechanism;
 - d. The surety bond names the Arizona Department of Environmental Quality as beneficiary;
 - e. The original surety bond is submitted to the Director;
 - f. Under the terms of the bond, the surety is liable on the bond obligation when the permittee fails to perform as guaranteed by the bond; and
 - g. The surety payments under the terms of the bond are deposited directly into the Standby Trust Fund.
3. Certificate of deposit. The applicant may use a certificate of deposit if the following conditions are met:
 - a. The applicant submits to the Director one or more certificates of deposit made payable to or assigned to the Department to cover the applicant's financial assurance obligation or a pro-rata amount if used with another financial assurance mechanism;
 - b. The certificate of deposit is insured by the Federal Deposit Insurance Corporation and is automatically renewable;
 - c. The bank assigns the certificate of deposit to the Arizona Department of Environmental Quality;
 - d. Only the Department has access to the certificate of deposit; and
 - e. Interest accrues to the permittee during the period the applicant gives the certificate as financial assurance, unless the interest is required to satisfy the requirements in R18-9-A201(B)(5).
4. Trust fund. The applicant may use a trust fund if the following conditions are met:
 - a. The trust fund names the Arizona Department of Environmental Quality as beneficiary, and
 - b. The trust is initially funded in an amount at least equal to:
 - i. The cost estimate of the closure plan or strategy submitted under R18-9-A201(B)(5),
 - ii. The amount specified in a compliance schedule approved in the permit, or
 - iii. A pro-rata amount if used with another financial assurance mechanism.
5. Letter of credit. The applicant may use a letter of credit if the following conditions are met:
 - a. The financial institution issuing the letter is regulated and examined by a federal or state agency;
 - b. The letter of credit is irrevocable and issued for at least one year in an amount equal to the cost estimate submitted under R18-9-A201(B)(5) or a pro-rata amount if used with another financial assurance mechanism. The letter of credit provides that the expiration date is automatically extended for a period of at least one year unless the issuing institution has canceled the letter of credit by sending notice of cancellation by certified mail to the permittee and to the Director 90 days in advance of cancellation or expiration. The permittee shall provide alternate financial assurance within 60 days of receiving the notice of expiration or cancellation;
 - c. The financial institution names the Arizona Department of Environmental Quality as beneficiary for the letter of credit; and
 - d. The letter is prepared by the financial institution and identifies the letter of credit issue date, expiration date, dollar sum of the credit, the name and address of the Department as the beneficiary, and the name and address of the applicant as the permittee.
6. Insurance policy. The applicant may use an insurance policy if the following conditions are met:
 - a. The insurance is effective before signature of the permit or substitution of insurance for other extant financial assurance instruments posted with the Director;
 - b. The insurer is authorized to transact the business of insurance in the state and has an AM BEST Rating of at least a B+ or the equivalent;
 - c. The permittee submits a copy of the insurance policy to the Department;
 - d. The insurance policy guarantees that funds are available to pay costs as submitted under R18-9-A201(B)(5) without a deductible. The policy also guarantees that once cleanup steps begin that the insurer will pay out funds to the Director or other entity designated by the Director up to an amount equal to the face amount of the policy;
 - e. The policy guarantees that while closure and post-closure activities are conducted the insurer will pay out funds to the Director or other entity designated by the Director up to an amount equal to the face amount of the policy;
 - f. The insurance policy is issued for a face amount at least equal to the current cost estimate submitted to the Director for performance of all items listed in R18-9-A201(B)(5) or a pro-rata amount if used with another financial assurance mechanism. Actual payments by the insurer will not change the face amount, although the insurer's future liability is reduced by the amount of the payments, during the policy period;
 - g. The insurance policy names the Arizona Department of Environmental Quality as additional insured;
 - h. The policy contains a provision allowing assignment of the policy to a successor permittee. The transfer of the policy is conditional upon consent of the insurer and the Department; and
 - i. The insurance policy provides that the insurer does not cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy, at a minimum, provides the insured with a renewal option at the face amount of the expiring policy. If the permittee fails to pay the premium, the insurer may cancel the policy by sending notice of cancellation by certified mail to the permittee and to the Director 90 days in advance of the cancellation. If the insurer cancels the policy, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- permittee shall provide alternate financial assurance within 60 days of receiving the notice of cancellation.
7. Cash deposit. The applicant may use a cash deposit if the cash is deposited with the Department to cover the financial assurance obligation under R18-9-A201(B)(5).
 8. Guarantees.
 - a. The applicant may use guarantees to cover the financial assurance obligation under R18-9-A201(B)(5) if the following conditions are met:
 - i. The applicant submits to the Department an affidavit certifying that the guarantee arrangement is valid under all applicable federal and state laws. If the applicant is a corporation, the applicant shall include a certified copy of the corporate resolution authorizing the corporation to enter into an agreement to guarantee the permittee's financial assurance obligation;
 - ii. The applicant submits to the Department documentation that explains the substantial business relationship between the guarantor and the permittee;
 - iii. The applicant demonstrates that the guarantor meets conditions of the financial mechanism listed in subsection (C)(1). For purposes of applying the criteria in subsection (C)(1) to a guarantor, substitute "guarantor" for the term "applicant" as used in subsection (C)(1);
 - iv. The guarantee is governed by and complies with state law;
 - v. The guarantee continues in full force until released by the Director or replaced by another financial assurance mechanism listed under subsection (C);
 - vi. The guarantee provides that, if the permittee fails to perform closure or post-closure care of a facility covered by the guarantee, the guarantor shall perform or pay a third party to perform closure or post-closure care, as required by the permit, or establish a fully funded trust fund as specified under subsection (C)(4) in the name of the owner or operator; and
 - vii. The guarantor names the Arizona Department of Environmental Quality as beneficiary of the guarantee.
 - b. Guarantee reporting. The guarantor shall notify or submit a report to the Department within 30 days of:
 - i. An increase in financial responsibility during the fiscal year that affects the guarantor's ability to meet the financial demonstration;
 - ii. Receiving an adverse auditor's notice, opinion, or qualification; or
 - iii. Receiving a Department notification requesting an update of the guarantor's financial condition.
 9. An applicant may use a financial assurance mechanism not listed in subsection (C)(1) through (8) if approved by the Director.
- D.** Loss of coverage. If the Director believes that a permittee will lose financial capability under subsection (C), the permittee shall, within 30 days from the date of receipt of the Director's request, submit evidence that the financial demonstration under subsection (B) is being met or provide an alternative financial assurance mechanism.
 - E.** Financial assurance mechanism substitution. A permittee may substitute one financial assurance mechanism for another if the substitution is approved by the Director through an amendment under subsection (F).
 - F.** Permit amendment. The permittee shall apply for an amendment to the individual permit if the permittee changes a financial assurance mechanism or if the permittee's revision of the closure strategy results in an increase in the estimated cost under R18-9-A201(B)(5). If a permittee seeks to amend a permit under R18-9-A211(B), the permittee shall submit a financial capability demonstration for all facilities covered by the amended individual permit with the permit amendment request.
 - G.** Previous financial demonstration. If an applicant shows that the financial assurance demonstration required under this Section is covered within a financial demonstration already made to a governmental agency and the Department has access to that information, the applicant is not required to resubmit the information. The applicant shall certify that the current financial condition is equal to or better than the condition reflected in the financial demonstration provided to the other governmental agency. This provision does not apply to a demonstration required under subsection (F).
 - H.** Recordkeeping. A permittee shall maintain the financial capability for the duration of the permit and report as specified in the permit.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A204. Contingency Plan

- A.** An individual permit shall specify a contingency plan that defines the actions to be taken if a discharge results in any of the following:
 1. A violation of an Aquifer Water Quality Standard or an AQL,
 2. A violation of a discharge limitation,
 3. A violation of any other permit condition,
 4. An alert level is exceeded, or
 5. An imminent and substantial endangerment to the public health or the environment.
- B.** The contingency plan may include one or more of the following actions if a discharge results in any of the conditions described in subsection (A):
 1. Verification sampling;
 2. Notification to downstream or downgradient users who may be directly affected by the discharge;
 3. Further monitoring that may include increased frequency, additional constituents, or additional monitoring locations;
 4. Inspection, testing, operation, or maintenance of discharge control features at the facility;
 5. Evaluation of the effectiveness of discharge control technology at the facility that may include technology upgrades;
 6. Evaluation of pretreatment for sewage treatment facilities;
 7. Preparation of a hydrogeologic study to assess the extent of soil, surface water, or aquifer impact;
 8. Corrective action that includes any of the following measures:
 - a. Control of the source of an unauthorized discharge,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- b. Soil cleanup,
 - c. Cleanup of affected surface waters,
 - d. Cleanup of affected parts of the aquifer, or
 - e. Mitigation measures to limit the impact of pollutants on existing uses of the aquifer.
- C. A permittee shall not take a corrective action proposed under subsection (B)(8) unless the action is approved by the Department.
- 1. Emergency response provisions and corrective actions specifically identified in the contingency plan submitted with a permit application are subject to approval by the Department during the application review process.
 - 2. The permittee may propose to the Department a corrective action other than those already identified in the contingency plan if a discharge results in any of the conditions identified in subsection (A).
 - 3. The Department shall approve the proposed corrective action if the corrective action provides a plan and expedient time-frame to return the facility to compliance with the facility's permit conditions, A.R.S. Title 49, Chapter 2, and Articles 1 and 2 of this Chapter.
 - 4. The Director may incorporate corrective actions into an Aquifer Protection Permit.
- D. A contingency plan shall contain emergency response provisions to address an imminent and substantial endangerment to public health or the environment including:
- 1. Twenty-four hour emergency response measures;
 - 2. The name of an emergency response coordinator responsible for implementing the contingency plan;
 - 3. Immediate notification to the Department regarding any emergency response measure taken;
 - 4. A list of people to contact, including names, addresses, and telephone numbers if an imminent and substantial endangerment to public health or the environment arises; and
 - 5. A general description of the procedures, personnel, and equipment proposed to mitigate unauthorized discharges.
- E. A permittee may amend a contingency plan required by the Federal Water Pollution Control Act (P.L. 92-500; 86 Stat. 816; 33 U.S.C. 1251, et seq., as amended), or the Resource Conservation and Recovery Act of 1976 (P.L. 94-580; 90 Stat. 2796; 42 U.S.C. 6901 et seq., as amended), to meet the requirements of this Section and submit it to the Department for approval instead of a separate aquifer protection contingency plan.
- F. A permittee shall maintain at least one copy of the contingency plan required by the individual permit at the location where day-to-day decisions regarding the operation of the facility are made. A permittee shall advise all employees responsible for the operation of the facility of the location of the contingency plan.
- G. A permittee shall promptly revise the contingency plan upon any change to the information contained in the plan.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A205. Alert Levels, Discharge Limitations, and AQLs**A. Alert levels.**

- 1. If the Department prescribes an alert level in an individual permit, the Department shall base the alert level on

the site-specific conditions described by the applicant in the application submitted under R18-9-A201(A)(2) or other information available to the Department.

- 2. The Department may specify an alert level based on a pollutant that indicates the potential appearance of another pollutant.
 - 3. The Department may specify the measurement of an alert level at a location appropriate for the discharge activity, considering the physical, chemical, and biological characteristics of the discharge, the particular treatment process, and the site-specific conditions.
- B. Discharge limitations.** If the Department prescribes discharge limitations in an individual permit, the Department shall base the discharge limitations on the considerations described in A.R.S. § 49-243.
- C. AQLs.** The Department may prescribe an AQL in an individual permit to ensure that the facility continues to meet the criteria under A.R.S. § 49-243(B)(2) or (3).
- 1. If the concentration of a pollutant in the aquifer does not exceed the Aquifer Water Quality Standard, the Department shall set the AQL at the Aquifer Water Quality Standard.
 - 2. If the concentration of a pollutant in the aquifer exceeds the Aquifer Water Quality Standard, the Department shall set the AQL higher than the Aquifer Water Quality Standard.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A206. Monitoring Requirements**A. Monitoring.**

- 1. The Department shall determine whether monitoring is required to assure compliance with Aquifer Protection Permit conditions and with the applicable Aquifer Water Quality Standards established under A.R.S. §§ 49-221, 49-223, 49-241 through 49-244, and 49-250 through 49-252.
- 2. If monitoring is required, the Director shall specify to the permittee:
 - a. The type and method of monitoring;
 - b. The frequency of monitoring;
 - c. Any requirements for the installation, use, or maintenance of monitoring equipment; and
 - d. The intervals at which the permittee reports the monitoring results to the Department.

B. Recordkeeping.

- 1. A permittee shall make a monitoring record for each sample taken as required by the individual permit consisting of all of the following:
 - a. The date, time, and exact place of a sampling and the name of each individual who performed the sampling;
 - b. The procedures used to collect the sample;
 - c. The date sample analysis was completed;
 - d. The name of each individual or laboratory performing the analysis;
 - e. The analytical techniques or methods used to perform the sampling and analysis;
 - f. The chain of custody records; and
 - g. Any field notes relating to the information described in subsections (B)(1)(a) through (f).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. A permittee shall make a monitoring record for each measurement made, as required by the individual permit, consisting of all of the following:
 - a. The date, time, and exact place of the measurement and the name of each individual who performed the measurement;
 - b. The procedures used to make the measurement; and
 - c. Any field notes relating to the information described in subsections (B)(2)(a) and (b).
3. A permittee shall maintain monitoring records for at least 10 years after the date of the sample or measurement, unless the Department specifies a shorter time period in the permit.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A207. Reporting Requirements

- A. A permittee shall notify the Department within five days after becoming aware of a violation of a permit condition or that an alert level was exceeded. The permittee shall inform the Department whether the contingency plan described in R18-9-A204 was implemented.
- B. In addition to the requirements in subsection (A), a permittee shall submit a written report to the Department within 30 days after the permittee becomes aware of a violation of a permit condition. The report shall contain:
 1. A description of the violation and its cause;
 2. The period of violation, including exact date and time, if known, and the anticipated time period the violation is expected to continue;
 3. Any action taken or planned to mitigate the effects of the violation or to eliminate or prevent recurrence of the violation;
 4. Any monitoring activity or other information that indicates that a pollutant is expected to cause a violation of an Aquifer Water Quality Standard; and
 5. Any malfunction or failure of a pollution control device or other equipment or process.
- C. A permittee shall notify the Department within five days after the occurrence of any of the following:
 1. The permittee's filing of bankruptcy, or
 2. The entry of any order or judgment not issued by the Director against the permittee for the enforcement of any federal or state environmental protection statute or rule.
- D. The Director shall specify the format for submitting results from monitoring conducted under R18-9-A206.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A208. Compliance Schedule

- A. A permittee shall follow the compliance schedule established in the individual permit.
 1. If a compliance schedule provides that an action is required more than one year after the date of permit issuance, the schedule shall establish interim requirements and dates for their achievement.
 2. If the time necessary for completion of an interim requirement is more than one year and is not readily

divisible into stages for completion, the permit shall contain interim dates for submission of reports on progress toward completion of the interim requirements and shall indicate a projected completion date.

3. Unless otherwise specified in the permit, within 30 days after the applicable date specified in a compliance schedule, a permittee shall submit to the Department a report documenting that the required action was taken within the time specified.
4. After reviewing the compliance schedule activity the Director may amend the Aquifer Protection Permit, based on changed circumstances relating to the required action.
- B. The Department shall consider all of the following factors when setting the compliance schedule requirements:
 1. The character and impact of the discharge,
 2. The nature of construction or activity required by the permit,
 3. The number of persons affected or potentially affected by the discharge,
 4. The current state of treatment technology, and
 5. The age of the facility.
- C. For a new facility, the Department shall not defer to a compliance schedule any requirement necessary to satisfy the criteria under A.R.S. § 49-243(B).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A209. Temporary Cessation, Closure, Post-closure

- A. Temporary cessation.
 1. A permittee shall notify the Department before a cessation of operations at the facility of at least 60 days duration.
 2. The permittee shall implement any condition specified in the individual permit for the temporary cessation.
 3. If the permit does not specify any temporary cessation condition, the permittee shall, prior to implementation, submit the proposed temporary cessation plan for Department approval.
- B. Closure.
 1. Before providing notice under subsection (B)(2), a person may request that the Director review a site investigation plan for a facility under subsection (B)(3)(a) or the results of a site investigation at a facility to determine compliance with this subsection and A.R.S. § 49-252.
 2. A person shall notify the Department of the person's intent to cease operations without resuming an activity for which the facility was designed or operated.
 3. The person shall submit a closure plan for Director approval within 90 days following the notification of intent to cease operations with the applicable fee established in 18 A.A.C. 14. A complete closure plan shall include:
 - a. A site investigation plan that includes a summary of relevant site studies already conducted and a proposed scope of work for any additional site investigation necessary to identify:
 - i. The lateral and vertical extent of contamination in soils and groundwater, using applicable standards;
 - ii. The approximate quantity and chemical, biological, and physical characteristics of each

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- waste, contaminated water, or contaminated soil proposed for removal from the facility;
- iii. The approximate quantity and chemical, biological, and physical characteristics of each waste, contaminated water, or contaminated soil that will remain at the facility; and
 - iv. Information regarding site conditions related to pollutant fate and transport that may influence the scope of sampling necessary to characterize the site for closure;
- b. A summary describing the results of a site investigation and any other information used to identify:
 - i. The lateral and vertical extent of soil and groundwater contamination, using applicable standards, and the analytical results that support the determination;
 - ii. The approximate quantity and chemical, biological, and physical characteristics of each material scheduled for removal;
 - iii. The destination of the materials and documentation that the destination is approved to accept the materials;
 - iv. The approximate quantity and chemical, biological, and physical characteristics of each material that remains at the facility; and
 - v. Any other relevant information the Department determines is necessary;
 - c. A closure design that identifies:
 - i. The method used, if any, to treat any material remaining at the facility;
 - ii. The method used to control the discharge of pollutants from the facility;
 - iii. Any limitation on future land or water uses created as a result of the facility's operations or closure activities and a Declaration of Environmental Use Restriction according to A.R.S. § 49-152, if necessary; and
 - iv. The methods used to secure the facility;
 - d. An estimate of the cost of closure;
 - e. A schedule for implementation of the closure plan and submission of a post-closure plan if clean closure is not achieved; and
 - f. For an implemented closure plan, a summary report of the results of site investigation performed during closure activities, including confirmation and verification sampling.
4. Within 60 days of receipt of a complete closure plan, the Department shall determine whether the closure plan achieves clean closure.
 - a. If the implemented complete closure plan achieves clean closure, the Director shall:
 - i. If the facility is not covered by an Aquifer Protection Permit, send the person a letter of approval; or
 - ii. If the facility is covered by an Aquifer Protection Permit, send the person a Permit Release Notice issued under subsection (C)(2)(c).
 - b. If the implemented complete closure plan did not achieve clean closure, the person shall submit a post-closure plan under subsection (C) and the following documents within 90 days from the date on the Department's notice or as specified under A.R.S. § 49-252(E):
 - i. An application for an individual permit, or
 - ii. A request to amend a current individual permit to address closure activities and post-closure monitoring and maintenance at the facility.
- C. Post-closure. A person shall describe post-closure monitoring and maintenance activities in an application for a permit or an amendment to an individual permit and submit it to the Department for approval.
 1. The application shall include:
 - a. The duration of post-closure care;
 - b. The monitoring procedures proposed by the permittee, including monitoring frequency, type, and location;
 - c. A description of the operating and maintenance procedures proposed for maintaining aquifer quality protection devices, such as liners, treatment systems, pump-back systems, surface water and stormwater management systems, and monitoring wells;
 - d. A schedule and description of physical inspections proposed at the facility following closure;
 - e. An estimate of the cost of post-closure maintenance and monitoring;
 - f. A description of limitations on future land or water uses, or both, at the facility site as a result of facility operations; and
 - g. The applicable fee established in 18 A.A.C. 14.
 2. The Director shall include the post-closure plan submitted under subsection (C)(1) in the individual permit or permit amendment.
 - a. The permittee shall provide the Department written notice that a closure plan or a post-closure plan was fully implemented within 30 calendar days of implementation of the plan. The notice shall include a summary report confirming the closure design and describing the results of sampling performed during closure activities and post-closure activities, if any, to demonstrate the level of cleanup achieved.
 - b. The Director may, upon receipt of the notice, inspect the facility to ensure that the closure plan has been fully implemented.
 - c. The Director shall issue a Permit Release Notice if the permittee satisfies all closure and post-closure requirements.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A210. Temporary Individual Permit

- A. A person may apply for a temporary individual permit for either of the following:
 1. A pilot project to develop data for an Aquifer Protection Permit application for the full-scale project, or
 2. A facility with a discharge lasting no more than six months.
- B. The applicant shall submit a preliminary application containing the information required in R18-9-A201(B)(1).
- C. The Department shall, based on the preliminary application and in consultation with the applicant, determine and provide the applicant notice of any additional information in R18-9-A201(B) that is necessary to complete the application.
- D. Public participation.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. If the Director issues a temporary individual permit, the Director shall postpone the public participation requirements under R18-9-109.
 2. The Director shall not postpone notification of the opportunity for public participation for more than 30 days from the date on the temporary individual permit.
 3. The Director may amend or revoke the temporary individual permit after consideration of public comments.
 4. The Director shall not issue a public notice or hold a public hearing if a temporary individual permit is renewed without change.
 5. The Director shall follow the public participation requirements under R18-9-109 when making a significant amendment to a temporary individual permit.
- E. A temporary individual permit expires after one year unless it is renewed. The Director may renew a temporary individual permit no more than one time.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A211. Permit Amendments

- A. The Director may amend an individual permit based upon a request or upon the Director’s initiative.
1. A permittee shall submit a request for permit amendment in writing on a form provided by the Department with the applicable fee established in 18 A.A.C. 14, explaining the facts and reasons justifying the request.
 2. The Department shall process amendment requests following the licensing time-frames established under 18 A.A.C. 1, Article 5, Table 10.
 3. An amended permit supersedes the previous permit upon the effective date of the amendment.
- B. Significant permit amendment. The Director shall make a significant amendment to an individual permit if:
1. Part or all of an existing facility becomes a new facility under A.R.S. § 49-201;
 2. A physical change in a permitted facility or a change in its method of operation results in:
 - a. An increase of 10 percent or more in the permitted volume of pollutants discharged, except a sewage treatment facility;
 - b. An increase in design flow of a sewage treatment facility as follows:

| Permitted Design Flow | Increase in Design Flow |
|--|-------------------------|
| 500,000 gallons per day or less | 10% |
| Greater than 500,000 gallons per day but less than or equal to five million gallons per day | 6% |
| Greater than five million gallons per day but less than or equal to 50 million gallons per day | 4% |
| Greater than 50 million gallons per day | 2% |

- c. Discharge of an additional pollutant not allowed by a facility’s original individual permit. The Director may consider the addition of a pollutant with a chemical composition substantially similar to a pollutant the permit currently allows by making an

- “other” amendment to the individual permit as prescribed in subsection (D);
- d. For any pollutant not addressed in a facility’s individual permit, any increase that brings the level of the pollutant to within 80 percent or more of a numeric Aquifer Water Quality Standard at the point of compliance; or
 - e. An increase in the concentration in the discharge of a pollutant listed under A.R.S. § 49-243(I);
3. Based upon available information, the facility can no longer demonstrate that its discharge will comply with A.R.S. § 49-243(B)(2) or (3);
 4. The permittee requests and the Department agrees to less stringent monitoring that reduces the frequency in monitoring or reporting or reduces the number of pollutants monitored, and the permittee demonstrates that the changes will not affect the permittee’s ability to remain in compliance with Articles 1 and 2 of this Chapter;
 5. It is necessary to change the designation of a point of compliance;
 6. It is necessary to update BADCT for a facility that was issued an individual permit and was not constructed within five years of permit issuance;
 7. The permittee requests and the Department agrees to less stringent discharge limitations when the permittee demonstrates that the changes will not affect the permittee’s ability to remain in compliance with Articles 1 and 2 of this Chapter;
 8. It is necessary to make an addition to or a substantial change in closure requirements or to provide for post-closure maintenance and monitoring; or
 9. Material and substantial alterations or additions to a permitted facility, including a change in disposal method, justify a change in permit conditions.
- C. Minor permit amendment. The Director shall make a minor amendment to an individual permit to:
1. Correct a typographical error;
 2. Change nontechnical administrative information, excluding a permit transfer;
 3. Correct minor technical errors, such as errors in calculation, locational information, citations of law, and citations of construction specifications;
 4. Increase the frequency of monitoring or reporting, or to revise a laboratory method;
 5. Make a discharge limitation more stringent;
 6. Make a change in a recordkeeping retention requirement; or
 7. Insert calculated alert levels, AQLs, or other permit limits into a permit based on monitoring subsequent to permit issuance, if a requirement to establish the levels or limits and the method for calculation of the levels or limits was established in the original permit.
- D. “Other” permit amendment.
1. The Director may make an “other” amendment to an individual permit if the amendment is not a significant or minor permit amendment prescribed in this Section, based on an evaluation of the information relevant to the amendment.
 2. Examples of an “other” amendment to an individual permit include:
 - a. A change in a construction requirement, treatment method, or operational practice, if the alteration complies with the requirements of Articles 1 and 2

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

of this Chapter and provides equal or better performance;

- b. A change in an interim or final compliance date in a compliance schedule, if the Director determines just cause exists for changing the date;
 - c. A change in the permittee's financial assurance mechanism under R18-9-A203(C);
 - d. A permit transfer under R18-9-A212;
 - e. The replacement of monitoring equipment, including a well, if the replacement results in equal or greater monitoring effectiveness;
 - f. Any increase in the volume of pollutants discharged that is less than that described in subsection (B)(2)(a) or (b);
 - g. An adjustment of the permit to conform to rule or statutory provisions;
 - h. A calculation of an alert level, AQL, or other permit limit based on monitoring subsequent to permit issuance;
 - i. An addition of a point of compliance monitor well;
 - j. A combination of two or more permits at the same site as specified under R18-9-107;
 - k. An adjustment or incorporation of monitoring requirements to ensure Reclaimed Water Quality Standards developed under 18 A.A.C. 11, Article 3 are met; or
 - l. A change in a contingency plan resulting in equal or more efficient responsiveness.
- E.** The public notice and public participation requirements of R18-9-108 and R18-9-109 apply to a significant amendment. The public notice requirements apply to an "other" amendment. A minor amendment does not require a public notice or public participation.
- F.** The Director shall not amend or reissue a permit to allow use of a discharge control technology that provides a lesser degree of pollutant discharge reduction than the BADCT established in the individual Aquifer Protection Permit previously issued for a facility, unless:
- 1. The industrial classification of the facility has changed so that a new assessment of BADCT is appropriate,
 - 2. The pollutant load has decreased or the pollutant composition has changed significantly to warrant a new assessment of the BADCT,
 - 3. The Director approves a corrective or contingency action that necessitates a change in the treatment technology, or
 - 4. The approved discharge control technology is not operating properly due to circumstances beyond the control of the owner or operator.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A212. Permit Transfer

- A.** The person subject to the continuance requirements under R18-9-105(A)(1), (2), or (3) shall notify the Department by certified mail within 15 days following a change of ownership. The notice shall include:
- 1. The name of the person transferring the facility;
 - 2. The name of the new owner or operator;
 - 3. The name and location of the facility;
 - 4. The written agreement between the person transferring the facility and the new owner or operator indicating a

specific date for transfer of all permit responsibility, coverage, and liability;

- 5. A signed declaration by the new owner or operator that the new owner or operator has reviewed the permit and agrees to the terms of the permit, including fee obligations under A.R.S. § 49-242; and
 - 6. The applicable fee established in 18 A.A.C. 14.
- B.** A permittee may request that the Department transfer an individual permit to a new owner or operator.
- 1. The new owner or operator shall:
 - a. Notify the Department by certified mail within 15 days after the change of ownership and include a written agreement between the previous and new owner indicating a specific date for transfer of all permit responsibility, coverage, and liability;
 - b. Submit the applicable fee established in 18 A.A.C. 14;
 - c. Demonstrate the technical and financial capability necessary to fully carry out the terms of the permit according to R18-9-A202 and R18-9-A203;
 - d. Submit a signed statement that the new owner or operator has reviewed the permit and agrees to the terms of the permit; and
 - e. Provide the Department with a copy of the Certificate of Disclosure if required by A.R.S. § 49-109.
 - 2. If the Director amends the individual permit for the transfer, the new permittee is responsible for all conditions of the permit.
- C.** A permittee shall comply with all permit conditions until the Director transfers the permit, regardless of whether the permittee has sold or disposed of the facility.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A213. Permit Suspension, Revocation, Denial, or Termination

- A.** The Director may, after notice and opportunity for hearing, suspend or revoke an individual permit or a continuance under R18-9-105(A)(1), (2), or (3) for any of the following:
- 1. A permittee failed to comply with any applicable provision of A.R.S. Title 49, Chapter 2, Article 3; Articles 1 and 2 of this Chapter; or any permit condition;
 - 2. A permittee misrepresented or omitted a fact, information, or data related to an Aquifer Protection Permit application or permit condition;
 - 3. The Director determines that a permitted activity is causing or will cause a violation of an Aquifer Water Quality Standard at a point of compliance;
 - 4. A permitted discharge is causing or will cause imminent and substantial endangerment to public health or the environment;
 - 5. A permittee failed to maintain the financial capability under R18-9-A203(B); or
 - 6. A permittee failed to construct a facility within five years of permit issuance and:
 - a. It is necessary to update BADCT for the facility, and
 - b. The Department has not issued an amended permit under R18-9-A211(B)(6).
- B.** The Director may deny an individual permit if the Director determines upon completion of the application process that the applicant has:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. Failed or refused to correct a deficiency in the permit application;
 2. Failed to demonstrate that the facility and the operation will comply with the requirements of A.R.S. §§ 49-241 through 49-252 and Articles 1 and 2 of this Chapter. The Director shall base this determination on:
 - a. The information submitted in the Aquifer Protection Permit application,
 - b. Any information submitted to the Department following a public hearing, or
 - c. Any relevant information that is developed or acquired by the Department; or
 3. Provided false or misleading information.
- C. The Director shall terminate an individual permit if each facility covered under the individual permit:
1. Has closed and the Director issued a Permit Release Notice under R18-9-A209(C)(2)(c) or R18-9-A209(B)(3)(a)(ii) for the closed facility, or
 2. Is covered under another Aquifer Protection Permit.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A214. Requested Coverage Under a General Permit

- A. If a person who applied for or was issued an individual permit qualifies to operate a facility under a general permit established in Article 3 of this Chapter, the person may request that the individual permit be terminated and replaced by the general permit. The person shall submit the Notice of Intent to Discharge under R18-9-A301(B) with the appropriate fee established in 18 A.A.C. 14.
- B. The individual permit is valid and enforceable with respect to a discharge from each facility until the Director determines that the discharge from each facility is covered under a general permit.
- C. The owner or operator operating under a general permit shall comply with all applicable general permit requirements in Article 3 of this Chapter.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

PART B. BADCT FOR SEWAGE TREATMENT FACILITIES

R18-9-B201. General Considerations and Prohibitions

- A. Applicability. The requirements in this Article apply to all sewage treatment facilities, including expansions of existing sewage treatment facilities, that treat wastewater containing sewage, unless the discharge is authorized by a general permit under Article 3 of this Chapter.
- B. The Director may specify alert levels, discharge limitations, design specifications, and operation and maintenance requirements in the permit that are based upon information provided by the applicant and that meet the requirements under A.R.S. § 49-243(B)(1).
- C. The permittee shall ensure that a sewage treatment facility is operated by a person certified under 18 A.A.C. 5, Article 1, for the grade of the facility.
- D. Operation and maintenance.
 1. The owner or operator shall maintain, at the sewage treatment facility, an operation and maintenance manual for the facility and shall update the manual as needed.

2. The owner or operator shall use the operation and maintenance manual to guide facility operations to ensure compliance with the terms of the Aquifer Protection Permit and to prevent any environmental nuisance described under A.R.S. § 49-141(A).
 3. The Director may specify adherence to any operation or maintenance requirement as an Aquifer Protection Permit condition to ensure that the terms of the Aquifer Protection Permit are met.
 4. The owner or operator shall make the operation and maintenance manual available to the Department upon request.
- E. A person shall not create or maintain a connection between any part of a sewage treatment facility and a potable water supply so that sewage or wastewater contaminates a potable or public water supply.
 - F. A person shall not bypass or release sewage or partially treated sewage that has not completed the treatment process from a sewage treatment facility.
 - G. Reclaimed water dispensed to a direct reuse site from a sewage treatment facility is regulated under Reclaimed Water Quality Standards in 18 A.A.C. 11, Article 3.
 - H. The preparation, transport, or land application of any biosolids generated by a sewage treatment facility is regulated under 18 A.A.C. 9, Article 10.
 - I. The owner or operator of a sewage treatment facility that is a new facility or undergoing a major modification shall provide setbacks established in the following table. Setbacks are measured from the treatment and disposal components within the sewage treatment facility to the nearest property line of an adjacent dwelling, workplace, or private property. If an owner or operator cannot meet a setback for a facility undergoing a major modification that incorporates full noise, odor, and aesthetic controls, the owner or operator shall not further encroach into setback distances existing before the major modification except as allowed in subsection (I)(2).

| Sewage Treatment Facility Design Flow (gallons per day) | No Noise, Odor, or Aesthetic Controls (feet) | Full Noise, Odor, and Aesthetic Controls (feet) |
|---|--|---|
| 3000 to less than 24,000 | 250 | 25 |
| 24,000 to less than 100,000 | 350 | 50 |
| 100,000 to less than 500,000 | 500 | 100 |
| 500,000 to less than 1,000,000 | 750 | 250 |
| 1,000,000 or greater | 1000 | 350 |

1. Full noise, odor, and aesthetic controls means that:
 - a. Noise due to the sewage treatment facility does not exceed 50 decibels at the facility property boundary on the A network of a sound level meter or a level established in a local noise ordinance,
 - b. All odor-producing components of the sewage treatment facility are fully enclosed,
 - c. Odor scrubbers or other odor-control devices are installed on all vents, and
 - d. Fencing aesthetically matched to the area surrounding the facility.
2. The owner or operator of a sewage treatment facility undergoing a major modification may decrease setbacks if:
 - a. Allowed by local ordinance; or
 - b. Setback waivers are obtained from affected property owners in which the property owner acknowledges awareness of the established setbacks, basic design

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

of the sewage treatment facility, and the potential for noise and odor.

- J.** The owner or operator of a sewage treatment facility shall not operate the facility so that it emits an offensive odor on a persistent basis beyond the setback distances specified in subsection (I).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-B202. Design Report

- A.** A person applying for an individual permit shall submit a design report signed, dated, and sealed by an Arizona-registered professional engineer. The design report shall include the following information:
1. Wastewater characterization, including quantity, quality, seasonality, and impact of increased flows as the facility reaches design flow;
 2. The proposed method of disposal, including solids management;
 3. A description of the treatment unit processes and containment structures, including diagrams and calculations that demonstrate that the design meets BADCT requirements and will achieve treatment levels specified in R18-9-B204 through R18-9-B206, as applicable, for all flow conditions indicated in subsection (A)(9). If soil aquifer treatment or other aspects of site conditions are used to meet BADCT requirements, the applicant shall document performance of the site in the design report or the hydrogeologic report;
 4. A description of planned normal operation;
 5. A description of key maintenance activities and a description of contingency and emergency operation for the facility;
 6. A description of construction management controls;
 7. A description of the facility startup plan, including pre-operational testing, expected treated wastewater characteristics and monitoring requirements during startup, expected time-frame for meeting performance requirements specified in R18-9-B204, and any other special startup condition that may merit consideration in the individual permit;
 8. A site diagram depicting compliance with the setback requirements established in R18-9-B201(I) for the facility at design flow, and for each phase if the applicant proposes expansion of the facility in phases;
 9. The following flow information in gallons per day for the proposed sewage treatment facility. If the application proposes expansion of the facility in phases, the following flow information for each phase:
 - a. The design flow of the sewage treatment facility. The design flow is the average daily flow over a calendar year calculated as the sum of all influent flows to the facility based on Table I, Unit Design Flows, unless a different basis for determining influent flows is approved by the Department;
 - b. The maximum day. The maximum day is the greatest daily total flow that occurs over a 24-hour period within an annual cycle of flow variations;
 - c. The maximum month. The maximum month is the average daily flow of the month with the greatest total flow within the annual cycle of flow variations;

- d. The peak hour. The peak hour is the greatest total flow during one hour, expressed in gallons per day, within the annual cycle of flow variations;
- e. The minimum day. The minimum day is the least daily total flow that occurs over a 24-hour period within the annual cycle of flow variations;
- f. The minimum month. The minimum month is the average daily flow of the month with the least total flow within the annual cycle of flow variations; and
- g. The minimum hour. The minimum hour is the least total flow during one hour, expressed in gallons per day, within the annual cycle of flow variations; and

10. Specifications for pipe, standby power source, and water and sewer line separation.

- B.** The Department may inspect an applicant's facility without notice to ensure that construction conforms to the design report.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-B203. Engineering Plans and Specifications

- A.** A person applying for an individual permit for a sewage treatment facility with a design flow under one million gallons per day, shall submit engineering plans and specifications to the Department. The Director may waive this requirement if the Director previously approved engineering plans and specifications submitted by the same owner or operator for a sewage treatment facility with a design flow of more than one million gallons per day.
- B.** A person applying for an individual permit for a sewage treatment facility with a design flow of one million gallons per day or greater shall submit engineering plans and specifications if, upon review of the design report required in R18-9-B202, the Department finds that:
1. The design report fails to provide sufficient detail to determine adequacy of the proposed sewage treatment facility design;
 2. The described design is innovative and does not reflect treatment technologies generally accepted within the industry;
 3. The Department's calculations of removal efficiencies based on the design report show that the treatment facility cannot achieve treatment performance requirements;
 4. The design report does not demonstrate:
 - a. Protection from physical damage due to a 100-year flood,
 - b. Ability to continuously operate during a 25-year flood, or
 - c. Provision for a standby power source;
 5. The design report shows inconsistency in sizing or compatibility between two or more unit process components of the sewage treatment facility;
 6. The designer of the facility has:
 - a. Designed a sewage treatment facility of at least a similar size on less than three previous occasions,
 - b. Designed a sewage treatment facility that has been the subject of a Director enforcement action due to the facility design, or
 - c. Been found by the Board of Technical Registration to have violated a provision in A.R.S. Title 32, Chapter 1;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

7. The permittee seeks to expand its sewage treatment facility and the Department believes that the facility will require upgrades to the design not described and evaluated in the design report to meet the treatment performance requirements; or
 8. The construction does not conform to the design report if the sewage treatment facility has already been constructed.
- C. The Department shall review engineering plans and specifications upon request by an applicant seeking a permit for a sewage treatment facility, regardless of its flow.
- D. The Department may inspect an applicant's facility without notice to ensure that construction generally conforms to engineering plans and specifications, as applicable.
- E. Before discharging under a permit, the permittee shall submit an Engineer's Certificate of Completion signed, dated, and sealed by an Arizona-registered professional engineer in a format approved by the Department, that confirms that the facility is constructed according to the Department-approved design report or plans and specifications, as applicable.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-B204. Treatment Performance Requirements for a New Facility

- A. Definition. "Week" means a seven-day period starting on Sunday and ending on the following Saturday.
- B. An owner or operator of a new sewage treatment facility shall ensure that the facility meets the following performance requirements upon release of the treated wastewater at the outfall:
1. Secondary treatment levels.
 - a. Five-day biochemical oxygen demand (BOD₅) less than 30 mg/l (30-day average) and 45 mg/l (seven-day average), or carbonaceous biochemical oxygen demand (CBOD₅) less than 25 mg/l (30-day average) or 40 mg/l (seven-day average);
 - b. Total suspended solids (TSS) less than 30 mg/l (30-day average) and 45 mg/l (seven-day average);
 - c. pH maintained between 6.0 and 9.0 standard units; and
 - d. A removal efficiency of 85 percent for BOD₅, CBOD₅, and TSS;
 2. Secondary treatment by waste stabilization ponds is not considered BADCT unless an applicant demonstrates to the Department that site-specific hydrologic and geologic characteristics and other environmental factors are sufficient to justify secondary treatment by waste stabilization ponds;
 3. Total nitrogen in the treated wastewater is less than 10 mg/l (five-month rolling geometric mean). If an applicant demonstrates, using appropriate monitoring that soil aquifer treatment will produce a total nitrogen concentration less than 10 mg/l in wastewater that percolates to groundwater, the Department may approve soil aquifer treatment for removal of total nitrogen as an alternative to meeting the performance requirement of 10 mg/l at the outfall;
 4. Pathogen removal.
 - a. For a sewage treatment facility with a design flow of less than 250,000 gallons per day at a site where the depth to the seasonally high groundwater table is greater than 20 feet and there is no karstic or fractured bedrock at the surface:
 - i. The concentration of fecal coliform organisms in four of the wastewater samples collected during the week is less than 200 cfu/100 ml or the concentration of *E. coli* bacteria in four of the wastewater samples collected during the week is less than 126 cfu/100 ml, based on a sampling frequency of seven daily samples per week;
 - ii. The single sample maximum concentration of fecal coliform organisms in a wastewater sample is not greater than 800 cfu/100 ml or the single sample maximum concentration of *E. coli* bacteria in a wastewater sample is not greater than 504 cfu/100 ml; and
 - iii. An owner or operator of a facility may request a reduction in the monitoring frequency required in subsection (B)(4)(a)(i) if equipment is installed to continuously monitor an alternative indicator parameter and the owner or operator demonstrates that the continuous monitoring will ensure reliable production of wastewater that meets the numeric concentration levels in subsections (B)(4)(a)(i) and (ii) at the discharge point;
 5. Unless governed by A.R.S. § 49-243(I), the performance requirement for each constituent regulated under R18-11-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

406(B) through (E) is the numeric Aquifer Water Quality Standard;

6. The performance requirement for a constituent regulated under A.R.S. § 49-243(I) is removal to the greatest extent practical regardless of cost.
 - a. An operator shall minimize trihalomethane compounds generated as disinfection byproducts using chlorination, dechlorination, ultraviolet, or ozone as the disinfection system or using a technology demonstrated to have equivalent or better performance for removing or preventing trihalomethane compounds.
 - b. For other pollutants regulated by A.R.S. § 49-243(I), an operator shall use one of the following methods to achieve industrial pretreatment:
 - i. Regulate industrial sources of influent to the sewage treatment facility by setting limits on pollutant concentrations, monitoring for pollutants, and enforcing the limits to reduce, eliminate, or alter the nature of a pollutant before release into a sewage collection system;
 - ii. Meet the pretreatment requirements of A.R.S. § 49-255.02; or
 - iii. For sewage treatment facilities without significant industrial input, conduct periodic monitoring to detect industrial discharge; and
 7. A maximum seepage rate less than 550 gallons per day per acre for all containment structures within the treatment works. A sewage treatment facility that consists solely of containment structures with no other form of discharge complies with Article 2 Part B by operating below the maximum 550 gallon per day per acre seepage rate.
- C. The Director shall incorporate treated wastewater discharge limitations and associated monitoring specified in this Section into the individual permit to ensure compliance with the BADCT requirements.
- D. An applicant shall formally request in writing and justify an alternative that allows less stringent performance than that established in this Section, based on the criteria specified in A.R.S. § 49-243(B)(1).
- E. If the request specified in subsection (D) involves treatment or disposal works that are a demonstration, experimental, or pilot project, the Director may issue an individual permit that places greater reliance on monitoring to ensure operational capability.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-B205. Treatment Performance Requirements for an Existing Facility

For a sewage treatment facility that is an existing facility defined in A.R.S. § 49-201(16), the BADCT shall conform with the following:

1. The designer shall identify one or more design improvements that brings the facility closer to or within the treatment performance requirements specified in R18-9-B204, considering the factors listed in A.R.S. § 49-243(B)(1)(a) and (B)(1)(c) through (h);
2. The designer may eliminate from consideration alternatives identified in subsection (1) that are more expensive than the number of gallons of design flow times \$1.00 per gallon; and

3. The designer shall select a design that incorporates one or more of the considered alternatives by giving preference to measures that will provide the greatest improvement toward meeting the treatment performance requirements specified in R18-9-B204.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-B206. Treatment Performance Requirements for Expansion of a Facility

For an expansion of a sewage treatment facility, the BADCT shall conform with the following:

1. New facility BADCT requirements in R18-9-B204 apply to the following expansions:
 - a. An increase in design flow by an amount equal to or greater than the increases specified in R18-9-A211(B)(2)(b); or
 - b. An addition of a physically separate process or major piece of production equipment, building, or structure that causes a separate discharge to the extent that the treatment performance requirements for the pollutants addressed in R18-9-B204 can practicably be achieved by the addition.
2. BADCT requirements for existing facilities established in R18-9-B205 apply to an expansion not covered under subsection (1).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended to correct a manifest typographical error in subsection (1) (Supp. 01-1). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

ARTICLE 3. AQUIFER PROTECTION PERMITS - GENERAL PERMITS**PART A. GENERAL PROVISIONS****R18-9-A301. Discharging Under a General Permit**

- A. Discharging requirements.
1. Type 1 General Permit. A person may discharge under a Type 1 General Permit without submitting a Notice of Intent to Discharge if the discharge is authorized by and meets:
 - a. The applicable requirements of Article 3, Part A of this Chapter; and
 - b. The specific terms of the Type 1 General Permit established in Article 3, Part B of this Chapter.
 2. Type 2 General Permit. A person may discharge under a Type 2 General Permit if:
 - a. The discharge is authorized by and meets the applicable requirements of Article 3, Part A of this Chapter and the specific terms of the Type 2 General Permit established in Article 3, Part C of this Chapter;
 - b. The person files a Notice of Intent to Discharge under subsection (B); and
 - c. The person submits the applicable fee established in 18 A.A.C. 14.
 3. Type 3 General Permit. A person may discharge under a Type 3 General Permit if:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. The discharge is authorized by and meets the applicable requirements of Article 3, Part A of this Chapter and the specific terms of the Type 3 General Permit established in Article 3, Part D of this Chapter;
 - b. The person files a Notice of Intent to Discharge under subsection (B);
 - c. The person satisfies any deficiency requests from the Department regarding the administrative completeness review and substantive review and receives a written Discharge Authorization from the Director; and
 - d. The person submits the applicable fee established in 18 A.A.C. 14.
4. Type 4 General Permit. A person may discharge under a Type 4 General Permit if:
- a. The discharge is authorized by and meets the applicable requirements of Article 3, Part A of this Chapter and the specific terms of the Type 4 General Permit established in Article 3, Part E of this Chapter;
 - b. The person files a Notice of Intent to Discharge under subsection (B);
 - c. The person satisfies any deficiency requests from the Department regarding the administrative completeness review and substantive review, including any deficiency relating to the construction of the facility;
 - d. The person receives a written Discharge Authorization from the Director before the facility discharges; and
 - e. The person submits the applicable fee established in 18 A.A.C. 14 or according to A.R.S. §§ 49-107 and 49-112.
- B. Notice of Intent to Discharge.**
1. A person seeking a Discharge Authorization under a general permit under subsections (A)(2), (3), or (4) shall submit, by certified mail, in person, or by another method approved by the Department, a Notice of Intent to Discharge on a form provided by the Department.
 2. The Notice of Intent to Discharge shall include:
 - a. The name, address, and telephone number of the applicant;
 - b. The name, address, and telephone number of a contact person familiar with the operation of the facility;
 - c. The name, position, address, and telephone number of the owner or operator of the facility who has overall responsibility for compliance with the permit;
 - d. The legal description of the discharge areas, including the latitude and longitude coordinates;
 - e. A narrative description of the facility or project, including expected dates of operation, rate, and volume of discharge;
 - f. The additional requirements, if any, specified in the general permit for which the authorization is being sought;
 - g. A listing of any other federal or state environmental permits issued for or needed by the facility, including any individual permit, Groundwater Quality Protection Permit, or Notice of Disposal that may have previously authorized the discharge; and
 - h. A signature on the Notice of Intent to Discharge certifying that the applicant agrees to comply with all applicable requirements of this Article, including specific terms of the general permit.
3. Receipt of a completed Notice of Intent to Discharge by the Department begins the administrative completeness review for a Type 3 or Type 4 General Permit.
- C. Type 3 General Permit authorization review.**
1. Inspection. The Department may inspect the facility to determine that the applicable terms of the general permit have been met.
 2. Discharge Authorization issuance.
 - a. If the Department determines, based on its review and an inspection, if conducted, that the facility conforms to the requirements of the general permit and the applicable requirements of this Article, the Director shall issue a Discharge Authorization.
 - b. The Discharge Authorization authorizes the person to discharge under terms of the general permit and applicable requirements of this Article.
 3. Discharge Authorization denial. If the Department determines, based on its review and an inspection, if conducted, that the facility does not conform to the requirements of the general permit or other applicable requirements of this Article, the Director shall notify the person of the decision not to issue the Discharge Authorization and the person shall not discharge under the general permit. The notification shall inform the person of:
 - a. The reason for the denial with reference to the statute or rule on which the denial is based;
 - b. The person's right to appeal the denial, including the number of days the applicant has to file a protest challenging the denial and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
 - c. The person's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.
- D. Type 4 General Permit review.**
1. Pre-construction phase and facility construction. A person shall not begin facility construction until the Director issues a Construction Authorization.
 - a. Inspection. The Department may inspect the facility site before construction to determine that the applicable terms of the general permit will be met.
 - b. Review. If the Department determines, based on an inspection or its review of design plans, specifications, or other required documents that the facility does not conform to the requirements of the general permit or other applicable requirements of this Article, the Department shall make a written request for additional information to determine whether the facility will meet the requirements of the general permit.
 - c. Construction Authorization. If the Department determines, based on the review described in subsection (D)(1)(b) and any additional information submitted in response to a written request, that the facility design conforms with the requirements of the general permit and other applicable requirements of this Article, the Director shall issue a Construction Authorization to the person seeking to discharge. A Construction Authorization for an on-site wastewater treatment facility shall contain:
 - i. The design flow of the facility,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- ii. The characteristics of the wastewater sources contributing to the facility,
 - iii. The general permits that apply, and
 - iv. A list of the documents that are the basis for the authorization.
- d. Construction Authorization denial. If the Department determines, based on the review described in subsection (D)(1)(b) and any additional information submitted in response to a written request, that the facility design does not conform to the requirements of the general permit or other applicable requirements of this Article, the Director shall notify the person of the decision not to issue a Construction Authorization. The notification shall include the information listed in subsections (D)(2)(d).
- e. Construction.
- i. A person shall complete construction within two years of receiving a Construction Authorization.
 - ii. Construction shall conform with the plans and documents approved by the Department in the Construction Authorization. A change in location, configuration, dimension, depth, material, or installation procedure does not require approval by the Department if the change continues to conform with the specific standard in this Article used as the basis for the original design.
 - iii. The person shall record all changes made during construction, including any changes approved under R18-9-A312(G) on the site plan as specified in R18-9-A309(C)(1) or on documents as specified in R18-9-A309(C)(2) or R18-9-E301(E), as applicable.
- f. Completion of construction.
- i. After completing construction of the facility, the person seeking to discharge shall submit any applicable documents specified in R18-9-A309(C) with the Request for Discharge Authorization form for an on-site wastewater treatment facility and the Engineer's Certificate of Completion specified in R18-9-E301(E) for a sewage collection system. Receipt of the documents by the Department initiates the post-construction review phase.
 - ii. If the Department does not receive the documentation specified in subsection (D)(1)(f)(i) by the end of the two-year construction period, the Notice of Intent to Discharge expires, and the person shall not continue construction or discharge.
 - iii. If the Notice of Intent to Discharge expires, the person shall submit a new Notice of Intent to Discharge under subsection (B) and the applicable fee under subsection (A)(4)(e) to begin or continue construction.
2. Post-construction phase.
- a. Inspection. The Department may inspect the facility before issuing a Discharge Authorization to determine whether:
 - i. The construction conforms with the design authorized by the Department under subsection (D)(1)(c) and any changes recorded on the site plan as specified in R18-9-A309(C)(1) or other documents as specified in R18-9-A309(C)(2), or R18-9-E301(E), as applicable; and
 - ii. Terms of the general permit and applicable terms of this Article are met.
 - b. Deficiencies. If the Department identifies deficiencies based on an inspection of the constructed facility or during the review of documents submitted with the request for the Discharge Authorization, the Director shall provide a written explanation of the deficiencies to the person.
 - c. Discharge Authorization issuance.
 - i. Upon satisfactory completion of construction and documents required under R18-9-A309(C)(1) R18-9-A309(C)(2), or R18-9-E301(E), as applicable, the Director shall issue a Discharge Authorization.
 - ii. The Discharge Authorization allows a person to discharge under terms of the general permit and applicable requirements of this Article and the stated terms of the Construction Authorization.
 - d. Discharge Authorization denial. If, after receiving evidence of correction submitted by the person seeking to discharge, the Department determines that the deficiencies are not satisfactorily corrected, the Director shall notify the person seeking to discharge of the Director's decision not to issue the Discharge Authorization and the person shall not discharge under the general permit. The notification shall inform the person of:
 - i. The reason for the denial with reference to the statute or rule on which the denial is based;
 - ii. The person's right to appeal the denial, including the number of days the applicant has to file a protest challenging the denial and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
 - iii. The person's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A302. Point of Compliance

The point of compliance is the point at which compliance with Aquifer Water Quality Standards is determined.

1. Except as provided in this Section or as stated in a specific general permit, the applicable point of compliance at a facility operating under a general permit is a vertical plane downgradient of the facility that extends through the uppermost aquifers underlying that facility.
2. The point of compliance is the limit of the pollutant management area.
 - a. The pollutant management area is the horizontal plane of the area on which pollutants are or will be placed.
 - b. If a facility operating under a general permit is located within a larger pollutant management area established under an individual permit issued to the same person, the point of compliance is the applica-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ble point of compliance established in the individual permit.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4).

R18-9-A303. Renewal of a Discharge Authorization

- A.** Unless a Discharge Authorization under a general permit is transferred, revoked, or expired, a person may discharge under the general permit for the authorization period as specified by the permit type, including any closure activities required by a specific general permit.
- B.** An authorization to discharge under a Type 1 or Type 4 General Permit is valid for the operational life of the facility.
- C.** A permittee authorized under a Type 2 or Type 3 General Permit shall submit an application for renewal on a form provided by the Department with the applicable fee established in 18 A.A.C. 14 at least 30 days before the end of the renewal period.
1. The following are the renewal periods for Type 2 and Type 3 General Permit Discharge Authorizations:
 - a. 2.01 General Permit, five years;
 - b. 2.02 General Permit, seven years;
 - c. 2.03 General Permit, two years;
 - d. 2.04 General Permit, five years;
 - e. 2.05 General Permit, five years;
 - f. 2.06 General Permit, five years; and
 - g. Type 3 General Permits, five years.
 2. The renewal period for coverage under a Type 2 General Permit begins on the date the Department receives the Notice of Intent to Discharge.
 3. The renewal period for coverage under a Type 3 General Permit begins on the date the Director issues the written Discharge Authorization.
- D.** If the Discharge Authorization is not renewed within the renewal period specified in subsection (C)(1), the Discharge Authorization expires.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A304. Notice of Transfer

- A.** Transfer of authorization under a Type 1 General Permit.
1. A permittee transferring ownership of a facility covered by a Type 1.01 through 1.08, or 1.10 through 1.12 General Permit is not required to notify the Department of the transfer.
 2. A permittee transferring ownership of an on-site wastewater treatment facility operating under a Type 1.09 General Permit shall follow the requirements under R18-9-A316.
 3. A permittee transferring ownership of a sewage treatment facility operating under a Type 1.09 General Permit shall submit a Notice of Transfer to the Department by certified mail within 15 days after the date that ownership changes.
- B.** Transfer of authorization under a Type 2, 3, or 4.01 General Permit.
1. If a change of ownership occurs for a facility covered by a Type 2, 3, or 4.01 General Permit facility, the permittee

shall provide a Notice of Transfer to the Department or to the health or environmental agency delegated by the Director to administer Type 4.01 General Permits, by certified mail within 15 days after the date that ownership changes. The Notice of Transfer, on a form approved by the Department, shall include:

- a. Any information that has changed from the original Notice of Intent to Discharge,
 - b. Any other transfer requirements specified for the general permit, and
 - c. The applicable fee established in 18 A.A.C. 14.
2. The Department may require a permittee covered by a Type 2, 3, or Type 4.01 General Permit to submit a new Notice of Intent to Discharge and to obtain a new authorization under R18-9-A301(A)(2), (3) and (4), as applicable, if the volume or characteristics of the discharge have changed from the original application.
- C.** Transfer of a Type 4.02 through 4.23 General Permit. A permittee transferring ownership of an on-site wastewater treatment facility operating under one or more Type 4.02 through 4.23 General Permits shall follow the requirements under R18-9-A316.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A305. Facility Expansion

- A.** A permittee may expand a facility covered by a Type 2 General Permit if, before the expansion, the permittee provides the Department with the following information by certified mail:
1. An updated Notice of Intent to Discharge,
 2. A certification signed by the facility owner stating that the expansion continues to meet all the conditions of the applicable general permit, and
 3. The applicable fee established under 18 A.A.C. 14.
- B.** A permittee may expand a facility covered by a Type 3 or Type 4 General Permit if the permittee submits a new Notice of Intent to Discharge and the Department issues a new Discharge Authorization.
1. The person submitting the Notice of Intent to Discharge for the expansion may reference the previous Notice of Intent to Discharge if the previous information is identical, but shall provide full and detailed information for any changed items.
 2. The Notice of Intent to Discharge shall include:
 - a. Any applicable fee established under 18 A.A.C. 14, and
 - b. A certification signed by the facility owner stating that the expansion continues to meet all of the requirements relating to the applicable general permit.
 3. Upon receiving the Notice of Intent to Discharge, the Department shall follow the applicable review and authorization procedures described in R18-9-A301(A)(3) or (4).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A306. Closure

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- A.** To satisfy the requirements under A.R.S. § 49-252, a permittee shall close a facility authorized to discharge under a general permit as follows:
1. If the discharge is authorized under a Type 1.01 through 1.08, 1.10, 1.11, 2.05, 2.06, or 4.01 General Permit, closure notification is unnecessary and clean closure is met when:
 - a. The permittee removes material that may contribute to a continued discharge; and
 - b. The permittee eliminates, to the greatest degree practical, any reasonable probability of further discharge from the facility and of exceeding any Aquifer Water Quality Standard at the applicable point of compliance;
 2. For a discharge authorized under a Type 2.02, 3.02, 3.05 through 3.07, or 4.23 General Permit, the facility meets clean closure requirements if the permittee provides notice and submits sufficient information for the Department to determine that:
 - a. Any material that may contribute to a continued discharge is removed;
 - b. The permittee has eliminated to the greatest degree practicable any reasonable probability of further discharge from the facility and of exceeding any Aquifer Water Quality Standard at the applicable point of compliance; and
 - c. Closure requirements, if any, established in the general permit are met;
 3. If the discharge is authorized under a Type 1.12, 2.01, 2.03, 2.04, 3.01, 3.03, or 3.04 General Permit, the permittee shall comply with the closure requirements in the general permit;
 4. If the discharge is from an on-site wastewater treatment facility authorized under a Type 1.09 or 4.02 through 4.22 General Permit, the permittee shall comply with the closure requirements in R18-9-A309(D); and
 5. If the discharge is from a sewage treatment facility authorized under a Type 1.09 General Permit, the permittee shall comply with the closure requirements under subsection (A)(1).
- B.** For a facility operating under a general permit and located at a site where an individual area-wide permit has been issued, a permittee may defer some or all closure activities required by this subsection if the Director approves the deferral in writing. The permittee shall complete closure activities no later than the date that closure activities identified in the individual area-wide permit are performed.
- B.** The Director may revoke coverage under a general permit for any or all facilities within a specific geographic area, if, due to geologic or hydrologic conditions, the cumulative discharge of the facilities has violated or will violate an Aquifer Water Quality Standard established under A.R.S. §§ 49-221 and 49-223. Unless the public health or safety is jeopardized, the Director may allow continuation of a discharge until the Department:
1. Issues a single individual permit,
 2. Authorizes a discharge under another general permit, or
 3. Consolidates the discharges authorized under the general permits by following R18-9-107.
- C.** If an individual permit is issued to replace general permit coverage, the coverage under the general permit allowing the discharge is automatically revoked upon issuance of the individual permit and notification under subsection (E) is not required.
- D.** If the Director revokes coverage under a general permit, the facility shall not discharge unless allowed under subsection (B) or under an individual permit.
- E.** If coverage under the general permit is revoked under subsections (A) or (B), the Director shall notify the permittee by certified mail of the decision. The notification shall include:
1. A brief statement of the reason for the decision;
 2. The effective revocation date of the general permit coverage;
 3. A statement of whether the discharge shall cease or whether the discharge may continue under the terms of revocation in subsection (B);
 4. Whether the Director requires a person to obtain an individual permit, and if so:
 - a. An individual permit application form, and
 - b. Identification of a deadline between 90 and 180 days after receipt of the notification for filing the application;
 5. The applicant's right to appeal the revocation, the number of days the applicant has to file an appeal, and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
 6. The applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A308. Repealed**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Repealed by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A307. Revocation of Coverage Under a General Permit

- A.** After notice and opportunity for a hearing, the Director may revoke coverage under a general permit and require the permittee to obtain an individual permit for any of the following:
1. The permittee fails to comply with the terms of the general permit as described in this Article, or
 2. The discharge activity conducted under the terms of the general permit causes or contributes to the violation of an Aquifer Water Quality Standard at the applicable point of compliance.

R18-9-A309. General Provisions for On-site Wastewater Treatment Facilities

- A.** General requirements and prohibitions.
1. No person shall discharge sewage or wastewater that contains sewage from an on-site wastewater treatment facility except under an Aquifer Protection Permit issued by the Director.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. A person shall not install, allow to be installed, or maintain a connection between any part of an on-site wastewater treatment facility and a drinking water system or supply so that sewage or wastewater contaminates the drinking water.
3. A person shall not bypass or release sewage or partially treated sewage that has not completed the treatment process from an on-site wastewater treatment facility.
4. A person shall not use a cesspool for sewage disposal.
5. A person constructing a new on-site wastewater treatment facility or replacing the treatment works or disposal works of an existing on-site wastewater treatment facility shall connect to a sewage collection system if either (a) or (b) apply:
 - a. One of the following applies:
 - i. A provision of a Nitrogen Management Area designation under R18-9-A317(C) requires connection;
 - ii. A county, municipal, or sanitary district ordinance requires connection; or
 - iii. The on-site wastewater treatment facility is located within an area identified for connection to a sewage collection system by a Certified Area-wide Water Quality Management Plan adopted under 18 A.A.C. 5 or a master plan adopted by a majority of the elected officials of a board or council for a county, municipality, or sanitary district; or
 - b. A sewer service line extension is available at the property boundary and both of the following apply:
 - i. The service connection fee is not more than \$6000 for a dwelling or \$10 times the daily design flow in gallons for a source other than a dwelling, and
 - ii. The cost of constructing the building sewer from the wastewater source to the service connection is not more than \$3000 for a dwelling or \$5 times the daily design flow in gallons for a source other than a dwelling.
6. The Department shall prohibit installation of an on-site wastewater treatment facility if the installation will create an unsanitary condition or environmental nuisance or cause or contribute to a violation of an Aquifer Water Quality Standard.
7. A person shall design and operate the permitted on-site wastewater treatment facility so that:
 - a. Flows to the facility consist of typical sewage and do not include any motor oil, gasoline, paint, varnish, solvent, pesticide, fertilizer, or other material not generally associated with toilet flushing, food preparation, laundry, or personal hygiene;
 - b. Flows to the facility from commercial operations do not contain hazardous wastes as defined under A.R.S. § 49921(5) or hazardous substances;
 - c. If the sewage contains a component of nonresidential flow such as food preparation, laundry service, or other source, the sewage is adequately pretreated by an interceptor that complies with R18-9-A315 or another device authorized by a general permit or approved by the Department under R18-9-A312(G);
 - d. Except as provided in subsection (A)(7)(c), a sewage flow that does not meet the numerical levels for typical sewage is adequately pretreated to meet the numerical levels before entry into an on-site wastewater treatment facility authorized by this Article;
8. A person shall control the discharge of total nitrogen from an on-site wastewater treatment facility as follows:
 - a. For an on-site wastewater treatment facility operating under the 1.09 General Permit or proposed for construction in a Notice of Intent to Discharge under a Type 4 General Permit and the facility is located within a Nitrogen Management Area, the provisions of R18-9-A317(D) apply;
 - b. For an on-site wastewater treatment facility proposed for construction in a Notice of Intent to Discharge under R18-9-E323, the provisions of R18-9-E323(A)(4) apply;
 - c. For a subdivision proposed under 18 A.A.C. 5, Article 4, for which on-site wastewater treatment facilities are used for sewage disposal, the permittee shall demonstrate in the geological report required in R18-5-408(E)(1) that total nitrogen loading from the on-site wastewater treatment facilities to groundwater is controlled by providing one of the following:
 - i. For a subdivision platted for a single family dwelling on each lot, calculations that demonstrate that the number of lots within the subdivision does not exceed the number of acres contained within the boundaries of the subdivision;
 - ii. For a subdivision platted for dwellings that do not meet the criteria specified in subsection (A)(8)(c)(i), calculations that demonstrate that the nitrogen loading over the total area of the subdivision is not more than 0.088 pounds (39.9 grams) of total nitrogen per day per acre calculated at a horizontal plane immediately beneath the active treatment of the disposal fields, based on a total nitrogen contribution to raw sewage of 0.0333 pounds (15.0 grams) of total nitrogen per day per person; or
 - iii. An analysis by another means of demonstration showing that the nitrogen loading to the aquifer due to on-site wastewater treatment facilities within the subdivision does not cause or contribute to a violation of the Aquifer Water Quality Standard for nitrate at the applicable point of compliance.
9. Repairs and Routine Work.
 - a. A Notice of Intent to Discharge is not required for repair or routine work that maintains a facility.
 - b. A Notice of Intent to Discharge is required for the following non-routine work or repairs:
 - i. Converting a facility from operation under gravity to one requiring a pump or other mechanical device for treatment or disposal;
 - ii. Modifying or replacing a treatment works or disposal works, as defined in R18-9-101; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- iii. Modifying a facility in any manner that is inconsistent with the originally approved design and installation of the facility.
- c. A permittee shall comply with any local ordinance that provides independent permitting requirements for repair or routine work.
- d. A person, as defined in R18-9-101, shall not modify the facility so as to create an unsanitary condition or environmental nuisance or cause or contribute to an exceedance of a water quality standard.
10. Cumulative flows. When there is more than one on-site wastewater treatment facility on a property or on a site under common ownership or subject to a larger plan of sale or development, the Director shall determine whether an individual permit is required or whether the applicant qualifies for coverage to discharge under a general permit based on the sum of the design flows from the proposed installation and existing on-site wastewater treatment facilities on the property or site.
- a. If the sum of the design flows is less than 3000 gallons per day, the Department will process the application under R18-9-E302 through R18-9-E322, as applicable.
- b. If the sum of the design flows is equal to or more than 3000 gallons per day but less than 24,000 gallons per day, the Department will process the application under R18-9-E323.
- c. If the sum of the design flows is equal to or more than 24,000 gallons per day, the project does not qualify for coverage under a Type 4 General Permit and the applicant shall submit an application for an individual permit under Article 2 of this Chapter.
11. The use of a gray water system does not change the design, capacity, or reserve area requirements for an on-site wastewater treatment facility regulated under R18-9-E302 through R18-9-E323. The design of an on-site facility shall ensure the on-site facility can treat and dispose of the combined black water and gray water flows generated at the site. Black water includes wastewater flows from a kitchen sink. Kitchen sink wastewater flows are not gray water. Kitchen sink wastewater flows are not gray water even if a holding tank receiving kitchen sink wastewater, such as a recreational vehicle holding tank, is labeled as holding gray water. Gray water, as defined in R18-9-101, may be utilized in accordance with Article 7 of this Chapter.
12. To obtain coverage under a Type 4 General Permit, an applicant must, in the following order:
- a. Submit a Notice of Intent to Discharge according to requirements in R18-9-A301(B), R18-9-A309(B), and according to permit-specific requirements in Part E of Article 3,
- b. Receive a Construction Authorization from the Director pursuant to R18-9-A301(D)(1)),
- c. Submit a Request for Discharge Authorization according to requirements in R18-9-A301(D)(1)(f), R18-9-A309(C), and according to permit-specific requirements in Part E of Article 3, and
- d. Receive a Discharge Authorization from the Director pursuant to R18-9-A301(D)(2) and R18-9-A309(C).
- B.** Notice of Intent to Discharge under a Type 4 General Permit. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit the following information in a format approved by the Department:
1. A site investigation report that summarizes the results of the site investigation conducted under R18-9-A310(B), including:
 - a. Results from any soil evaluation, percolation test, or seepage pit performance test;
 - b. Any surface limiting condition identified in R18-9-A310(C)(2); and
 - c. Any subsurface limiting condition identified in R18-9-A310(D)(2);
 2. A site plan that includes:
 - a. The parcel and lot number, if applicable, the property address or other appropriate legal description, the property size in acres, and the boundaries of the property;
 - b. A plan of the site drawn to scale, dimensioned, and with a north arrow that shows:
 - i. Proposed and existing on-site wastewater treatment facilities; dwellings and other buildings; driveways, swimming pools, tennis courts, wells, ponds, and any other paved, concrete, or water feature; down slopes and cut banks with a slope greater than 15 percent; retaining walls; and any other constructed feature that affects proper location, design, construction, or operation of the facility;
 - ii. Any feature less than 200 feet from the on-site wastewater treatment facility excavation and reserve area that constrains the location of the on-site wastewater treatment facility because of setback limitations specified in R18-9-A312(C);
 - iii. Topography, delineated with an appropriate contour interval, showing original and post-installation grades;
 - iv. Drainage patterns, and as applicable, drainage controls and erosion protection for the facility;
 - v. Location and identification of the treatment and disposal works and wastewater pipelines, the reserve disposal area, and location and identification of all sites of percolation testing and soil evaluation performed under R18-9-A310; and
 - vi. Location of any public sewer if 400 feet or less from the property line;
 3. The design flow of the on-site wastewater treatment facility, consisting of gray water and black water flows, expressed in gallons per day based on Table 1, Unit Design Flows, the expected strength of the wastewater if the strength exceeds the levels for typical sewage, and:
 - a. For a single family dwelling, a list of the number of bedrooms and plumbing fixtures and corresponding unit flows used to calculate the design flow of the facility; and
 - b. For a dwelling other than for a single family, a list of each wastewater source and corresponding unit flows used to calculate the design flow of the facility;
 4. A list of materials, components, and equipment for constructing the on-site wastewater treatment facility;
 5. Drawings, reports, and other information that are clear, reproducible, and in a size and format specified by the Department;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

6. If pretreatment is necessary for a facility to comply with the requirements of this Chapter, including R18-9-A309(A)(7), then a design report approved by the on-site wastewater treatment facility manufacturer or manufacturers that specifies component capacities, control settings, and supplemental installation and operation practices necessary to produce typical sewage numerical levels before entry into an on-site wastewater treatment facility; and
 7. For a facility that includes treatment or disposal works permitted under R18-9-E303 through R18-9-E323:
 - a. Construction quality drawings that show the following:
 - i. Systems, subsystems, and key components, including manufacturer's name, model number, and associated construction notes and inspection milestones, as applicable;
 - ii. A title block, including facility owner, revision date, space for addition of the Department's application number, and page numbers;
 - iii. A plan and profile with the elevations of wastewater pipelines, and treatment and disposal components, including calculations justifying the absorption area, to allow Department verification of hydraulic and performance characteristics;
 - iv. Cross sections showing wastewater pipelines, construction details and elevations of treatment and disposal components, original and finished grades of the land surface, seasonal high water table if less than 10 feet below the bottom of a disposal works or 60 feet below the bottom of a seepage pit, and a soil elevation evaluation to allow Department verification of installation design and performance; and
 - b. A draft operation and maintenance manual for the on-site wastewater treatment facility consisting of the tasks and schedules for operating and maintaining performance over a 20-year operational life;
- C. Additional requirements for a Request for Discharge Authorization and for the issuance of a Discharge Authorization under a Type 4 General Permit.**
1. If the entire on-site wastewater treatment facility, including treatment works and disposal works, will be permitted under R18-9-E302, the Director shall issue the Discharge Authorization if, as a part of the Request for Discharge Authorization:
 - a. The site plan accurately reflects the final location and configuration of the components of the treatment and disposal works, and
 - b. The applicant or the applicant's agent certifies on the Request for Discharge Authorization form that the septic tank passed the watertightness test required by R18-9-A314(5)(d).
 2. If the on-site wastewater treatment facility is proposed under R18-9-E303 through R18-9-E323, either separately or in any combination with each other or with R18-9-E302, the Director shall issue the Discharge Authorization if the following documents are submitted to the Department as part of the Request for Discharge Authorization:
 - a. As-built plans showing changes from construction quality drawings submitted under subsection (B)(6)(a);
 - b. A final list of equipment and materials showing changes from the list submitted under subsection (B)(4);
 - c. A final operation and maintenance manual for the on-site wastewater treatment facility consisting of the tasks and schedules for operating and maintaining performance over a 20-year operational life;
 - d. A certification that a service contract for ensuring that the facility is operated and maintained to meet the performance and other requirements of the applicable general permits exists for at least one year following the beginning of the operation of the on-site wastewater treatment facility, including the name of the service provider, if the on-site wastewater treatment facility is permitted under:
 - i. R18-9-E304;
 - ii. R18-9-E308 through R18-9-E315;
 - iii. R18-9-E316, if the facility includes a pump; or
 - iv. R18-9-E318 through R18-9-E322;
 - e. Other documents, if required by the separate general permits in 18 A.A.C. 9, Article 3, Part E;
 - f. A Certificate of Completion signed by the current engineer or designer of record assuring that installation of the facility conforms to the design approved under the Construction Authorization under R18-9-A301(D)(1)(c); and a regulatory representative, such as an inspector, may not act as an applicant's agent, nor authorize backfill before the current engineer or designer of record has verified proper installation of the system;
 - g. The name of the installation contractor and the Registrar of Contractor's license number issued to the installation contractor; and
 - h. A certification that any septic tank installed as a component of the on-site wastewater treatment facility passed the watertightness test required by R18-9-A314(5)(d).
- 3. The Director shall specify in the Discharge Authorization:**
- a. The permitted design flow of the facility,
 - b. The characteristics of the wastewater sources contributing to the facility, and
 - c. A list of the documents submitted to and reviewed by the Department satisfying subsection (C)(2).
- D. Closure requirements. A person who permanently discontinues use of an on-site wastewater treatment facility or a cesspool, or is ordered by the Director to close an abandoned facility shall:**
1. Remove all sewage from the facility and dispose of the sewage in a lawful manner;
 2. Disconnect and remove electrical and mechanical components;
 3. Remove or collapse the top of any tank or containment structure.
 - a. Punch a hole in the bottom of the tank or containment structure if the bottom is below the seasonal high groundwater table;
 - b. Fill the tank or containment structure or any cavity resulting from its removal with earth, sand, gravel, concrete, or other approved material; and
 - c. Regrade the surface to provide drainage away from the closed area;
 4. Cut and plug both ends of the abandoned sewer drain pipe between the building and the on-site wastewater treat-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ment facility not more than 5 feet outside the building foundation if practical, or cut and plug as close to each end as possible; and

5. Notify the Department within 30 days of closure.

E. Proprietary and other reviewed products.

1. The Department shall maintain a list of proprietary and other reviewed products that may be used for on-site wastewater treatment facilities to comply with the requirements of this Article. The list shall include appropriate information on the applicability and limitations of each product.

2. The list of proprietary and other reviewed products may include manufactured systems, subsystems, or components within the treatment works and disposal works if the products significantly contribute to the treatment performance of the system or provide the means to overcome site limitations. The Department will not list septic tanks, effluent filters or components that do not significantly affect treatment performance or provide the means to overcome site limitations.

3. A person may request that the Department add a product to the list of proprietary and other reviewed products. The request may include a proposed reference design for review. The Department shall ensure that performance values in the list reflect the treatment performance for defined wastewater characteristics. The Department shall assess fees under 18 A.A.C. 14 for product review.

F. Recordkeeping. A permittee authorized to discharge under one or more Type 4 General Permits shall maintain the Discharge Authorization and associated documents for the life of the facility.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A310. Site Investigation for Type 4 On-site Wastewater Treatment Facilities

A. Definition. For purposes of this Section, “clean water” means water free of colloidal material or additives that could affect chemical or physical properties if the water is used for percolation or seepage pit performance testing.

B. Site investigation. An applicant shall ensure that an investigator qualified under subsection (H) conducts a site investigation consisting of a surface characterization under subsection (C) and a subsurface characterization under subsection (D). The applicant shall submit the results in a format prescribed by the Department. The site investigation shall provide sufficient data to:

1. Select appropriate primary and reserve disposal areas for an on-site wastewater treatment facility considering all surface and subsurface limiting conditions in subsections (C)(2) and (D)(2); and
2. Effectively design and install the selected facility to serve the anticipated development at the site, whether or not limiting conditions exist.

C. Surface characterization.

1. Surface characterization method. The investigator shall characterize the surface of the site where an on-site wastewater treatment facility is proposed for installation using one of the following methods:

a. The “Standard Practice for Surface Site Characterization for On-site Septic Systems, D5879-95 (2003),” published by the American Society for Testing and Materials. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959; or

b. Another method of surface characterization that can, with accuracy and reliability, identify and delineate the surface limiting conditions specified in subsection (C)(2).

2. Surface limiting conditions. The investigator shall determine whether, and if so, where any of the following surface limiting conditions exist:

a. The surface slope is greater than 15 percent at the intended location of the on-site wastewater treatment facility;

b. Minimum setback distances are not within the limits specified in R18-9-A312(C);

c. Surface drainage characteristics at the intended location of the on-site wastewater treatment facility will adversely affect the ability of the facility to function properly;

d. A 100-year flood hazard zone, as indicated on the applicable flood insurance rate map, is located within the property on which the on-site wastewater treatment facility will be installed, and the flood hazard zone may adversely affect the ability of the facility to function properly;

e. An outcropping of rock that cannot be excavated exists in the intended location of the on-site wastewater treatment facility or will impair the function of soil receiving the discharge; and

f. Fill material deposits exist in the intended location of the on-site wastewater treatment facility.

D. Subsurface characterization.

1. Subsurface characterization method. The investigator shall characterize the subsurface of the site where an on-site wastewater treatment facility is proposed for installation using one or more of the following methods:

a. The following ASTM standard practice, which is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959: “Standard Practice for Subsurface Site Characterization of Test Pits for On-site Septic Systems, D5921-96(2003)e1 (2003),” published by the American Society for Testing and Materials;

b. Percolation testing as specified in subsection (F);

c. Seepage pit performance testing as specified in subsection (G); or

d. Another method of subsurface characterization, approved by the Department, that ensures compli-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- ance with water quality standards through proper system location, selection, design, installation, and operation.
2. Subsurface limiting conditions. The investigator shall determine whether any of the following limiting conditions exist in the primary and reserve areas of the on-site wastewater treatment facility within a minimum of 12 feet of the land surface or to an impervious soil or rock layer if encountered at a shallower depth:
 - a. The soil absorption rate determined under R18-9-A312(D)(2) is:
 - i. More than 1.20 gallons per day per square foot, or
 - ii. Less than 0.20 gallons per day per square foot;
 - b. The vertical separation distance from the bottom of the lowest point of the disposal works to the seasonal high water table is less than the minimum vertical separation specified in R18-9-A312(E)(1);
 - c. Seasonal saturation occurs within surface soils that could affect the performance of the on-site wastewater treatment facility;
 - d. One of the following subsurface conditions that may cause or contribute to the surfacing of wastewater:
 - i. An impervious soil or rock layer,
 - ii. A zone of saturation that substantially limits downward percolation from the disposal works,
 - iii. Soil with more than 50 percent rock fragments;
 - e. One of the following subsurface conditions that promotes accelerated downward movement of insufficiently treated wastewater:
 - i. Fractures or joints in rock that are open, continuous, or interconnected;
 - ii. Karst voids or channels; or
 - iii. Highly permeable materials such as deposits of cobbles or boulders; or
 - f. A subsurface condition that may convey wastewater to a water of the state and cause or contribute to an exceedance of a water quality standard established in 18 A.A.C. 11, Articles 1 and 4.
 3. Applicability of subsurface characterization methods. The investigator shall:
 - a. For a seepage pit constructed under R18-9-E302, test seepage pit performance using the procedure specified in subsection (G);
 - b. For an on-site wastewater treatment facility other than a seepage pit, characterize soil by using the ASTM method specified in subsection (D)(1)(a) if any of the following site conditions exists:
 - i. The natural surface slope at the intended location of the on-site wastewater treatment facility is greater than 15 percent;
 - ii. Bedrock or similar consolidated rock formation that cannot be excavated with a shovel outcrops on the property or occurs less than 12 feet below the land surface;
 - iii. The native soil at the surface or encountered in a boring, trench, or hole consists of more than 35 percent rock fragments;
 - iv. The seasonal high water table occurs within 12 feet of the natural land surface as encountered in trenches or borings, or evidenced by well records or hydrologic reports;
 - v. Seasonal saturation at the natural land surface occurs as indicated by soil mottling, vegetation adapted to near-surface saturated soils, or springs, seeps, or surface water near enough to the intended location of the on-site wastewater treatment facility to have a connection with potential seasonal saturation at the land surface; or
 - vi. A percolation test yields results outside the limits specified in subsection (D)(2)(a) and (b).
 - c. Percolation testing. The investigator may perform percolation testing as specified in subsection (F):
 - i. To augment another method of subsurface characterization if useful to locate or design an on-site wastewater treatment facility, or
 - ii. As the sole method of subsurface characterization if a subsurface characterization by an ASTM method is not required under subsection (D)(3)(b).
 - E. If an ASTM method is used for subsurface characterization, the investigator shall conduct subsurface characterization tests at the site to provide adequate, credible, and representative information to ensure proper location, selection, design, and installation of the on-site wastewater treatment facility. The investigator shall:
 1. Select at least two test locations in the primary area and one test location in the reserve area to conduct the tests;
 2. Perform the characterization at each test location at appropriate depths to:
 - a. Establish the wastewater absorption capacity of the soil under R18-9-A312(D), and
 - b. Aid in determining that a sufficient zone of unsaturated flow is provided below the disposal works to achieve necessary wastewater treatment; and
 3. Submit with the site investigation report:
 - a. A log of soil formations for each test location with information on soil type, texture, and classification; percentage of rock; structure; consistence; and mottles;
 - b. A determination of depth to groundwater below the land surface by test trenches or borings, published groundwater data, subdivision reports, or relevant well data; and
 - c. A determination of the water absorption characteristics of the soil, under R18-9-A312(D)(2)(b), sufficient to allow location and design of the on-site wastewater treatment facility.
 - F. Percolation testing method for subsurface characterization.
 1. Planning and preparation. The investigator shall:
 - a. Select at least two locations in the primary area and at least one location in the reserve area for percolation testing, to provide adequate and credible information to ensure proper location, selection, design, and installation of a properly working on-site wastewater treatment facility;
 - b. Perform percolation testing at each location at intervals in the soil profile sufficient to:
 - i. Establish the wastewater absorption capability of the soil under R18-9-A312(D), and
 - ii. Aid in determining that a sufficient zone of unsaturated flow is provided below the disposal works to achieve necessary wastewater treatment. The investigator shall perform percolation tests at multiple depths if there is an indication of an obvious change in soil characteristics that affect the location, selection,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- design, installation, or disposal performance of the on-site wastewater treatment facility;
- c. Excavate percolation test holes in undisturbed soil at least 12 inches deep with dimensions of 12 inches by 12 inches, if square, or a diameter of 15 inches, if round. The investigator shall not alter the structure of the soil during the excavation;
 - d. Place percolation test holes away from site or soil features that yield unrepresentative or misleading data pertaining to the location, selection, design, installation, or performance of the on-site wastewater treatment facility;
 - e. Scarify smeared soil surfaces within the percolation test holes and remove any loosened materials from the bottom of the hole; and
 - f. Use buckets with holes in the sides to support the sidewalls of the percolation test hole, if necessary. The investigator shall fill any voids between the walls of the hole and the bucket with pea gravel to reduce the impact of the enlarged hole.
2. Presoaking procedure. The investigator shall:
 - a. Fill the percolation test hole with clean water to a depth of 12 inches above the bottom of the hole;
 - b. Observe the decline of the water level in the hole and record time in minutes for the water to completely drain away;
 - c. Repeat the steps specified in subsection (F)(2)(a) and (b) if the water drains away in less than 60 minutes.
 - i. If the water drains away the second time in less than 60 minutes, the investigator shall repeat the steps specified in subsections (F)(2)(a) and (b).
 - ii. If the water drains away a third time in less than 60 minutes, the investigator shall perform the percolation test by following subsection (F)(3); and
 - d. Add clean water to the hole after 60 minutes and maintain the water at a minimum depth of 9 inches for at least four more hours if it takes 60 minutes or longer for the water to drain away. The investigator shall protect the hole from precipitation and runoff, and perform the percolation test specified in subsection (F)(3) between 16 and 24 hours after presoaking.
 3. Conducting the test. The investigator shall:
 - a. Conduct the percolation test before soil hydraulic conditions established by the presoaking procedure substantially change. The investigator shall remove loose materials in the percolation test hole to ensure that the specified dimensions of the hole are maintained and the infiltration surfaces are undisturbed native soil;
 - b. Fill the test hole to a depth of six inches above the bottom with clean water;
 - c. Observe the decline of the water level in the test hole and record the time in minutes for the water level to fall exactly 1 inch from a fixed reference point. The investigator shall:
 - i. Immediately refill the hole with clean water to a depth of 6 inches above the bottom, and determine and record the time in minutes for the water level to fall exactly 1 inch,
 - ii. Refill the hole again with clean water to a depth of 6 inches above the bottom and determine and record the time in minutes for the water to fall exactly 1 inch, and
 - iii. Ensure that the method for measuring water level depth is accurate and does not significantly affect the percolation rate of the test hole;
 - d. If the percolation rate stabilizes for three consecutive measurements by varying no more than 10 percent, use the highest percolation rate value of the three measurements. If three consecutive measurements indicate that the percolation rate results are not stabilizing or the percolation rate is between 60 and 120 minutes per inch, the investigator shall use an alternate method based on a graphical solution of the test data to approximate the stabilized percolation rate;
 - e. Record the percolation rate results in minutes per inch; and
 - f. Submit the following information with the site investigation report:
 - i. A log of the soil formations encountered for all percolation tests including information on texture, structure, consistence, percentage of rock fragments, and mottles, if present;
 - ii. Whether and which test hole was reinforced with a bucket;
 - iii. The locations, depths, and bottom elevations of the percolation test holes on the site investigation map;
 - iv. A determination of depth to groundwater below the land surface by test trenches or borings, published groundwater data, subdivision reports, or relevant well data; and
 - v. A determination of the water absorption characteristics of the soil, under R18-9-A312(D)(2)(a), sufficient to allow location and design of the on-site wastewater treatment facility.
 - G. Seepage pit performance testing method for subsurface characterization. The investigator shall test seepage pits described in R18-9-E302 as follows:
 1. Planning and Preparation. The investigator shall:
 - a. Identify the disposal areas at the site and drill a test hole at least 18 inches in diameter to the depth of the proposed seepage pit, at least 30 feet deep, and
 - b. Scarify soil surfaces within the test hole and remove loosened materials from the bottom of the hole.
 2. Presoaking procedure. The investigator shall:
 - a. Fill the bottom 6 inches of the test hole with gravel, if necessary, to prevent scouring;
 - b. Fill the test hole with clean water up to 3 feet below the land surface;
 - c. Observe the decline of the water level in the hole and determine the time in hours and minutes for the water to completely drain away;
 - d. Repeat the procedure if the water drains away in less than four hours; If the water drains away the second time in less than four hours, the investigator shall conduct the seepage pit performance test by following subsection (G)(3);
 - e. Add water to the hole and maintain the water at a depth that leaves at least the top 3 feet of hole

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

exposed to air for at least four more hours if the water drains away in four or more hours; and

- f. Not remove the water from the hole before the seepage pit performance test if there is standing water in the hole after at least 16 hours of presoaking.
3. Conducting the test. The investigator shall:
 - a. Fill the test hole with clean water up to 3 feet below land surface;
 - b. Observe the decline of the water level in the hole and determine and record the vertical distance to the water level from a fixed reference point every 10 minutes. The investigator shall ensure that the method for measuring water level depth is accurate and does not significantly affect the rate of fall of the water level in the test hole;
 - c. Measure the decline of the water level continually until three consecutive 10-minute measurements indicate that the infiltration rates are within 10 percent. If measurements indicate that infiltration is not approaching a steady rate or if the rate is close to a numerical limit specified in R18-9-A312(E)(1), the investigator shall use, an alternate method based on a graphical solution of the test data to approximate the final stabilized infiltration rate;
 - d. Percolation test rate. Calculate the stabilized infiltration rate for a seepage pit determined by the test hole procedure specified in subsection (G)(1)(a) using the formula $P = (15 / DS) \times IS$ to determine an equivalent percolation test rate. Once "P" is determined, the investigator shall use R18-9-A312(D)(2)(a) to establish the design SAR for wastewater treated under R18-9-E302 and to calculate the required minimum sidewall area for the seepage pit using the equation specified in R18-9-E302(C)(5)(k).
 - i. "P" is the percolation test rate (minutes per inch) tabulated in the first column of the table in R18-9-A312(D)(2)(a),
 - ii. "DS" is the diameter of the seepage pit test hole in inches, and
 - iii. "IS" is the seepage pit stabilized infiltration rate (minutes per inch) determined by the procedure specified in R18-9-A310(G)(3)(c);
 - e. Submit the following information with the site investigation report:
 - i. The results of the seepage pit performance testing including data, calculations, and findings on a form provided by the Department;
 - ii. The log of the test hole indicating lithologic characteristics and points of change;
 - iii. The location of the test hole on the site investigation map;
 - iv. A determination of depth to groundwater below the land surface by borings, published groundwater data, subdivision reports, or relevant well data.
 - f. Fill the test hole so that groundwater quality and public safety are not compromised if the seepage pit is drilled elsewhere or if a seepage pit cannot be sited at the location because of unfavorable test results.
- H. Qualifications. An investigator shall not perform a site investigation under this Section unless the investigator has knowledge and competence in the subject area and is licensed in

good standing or otherwise qualified in one of the following categories:

1. Arizona-registered professional engineer,
2. Arizona-registered geologist,
3. Arizona-registered sanitarian,
4. A certificate of training from a course recognized by the Department as sufficiently covering the information specified in this Section, or
5. Qualifies under another category designated in writing by the Department.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A311. Facility Selection for Type 4 On-site Wastewater Treatment Facilities

- A. A person shall select, design, and install an on-site wastewater treatment facility that is appropriate for the site's geographic location, setback limitations, slope, topography, drainage and soil characteristics, wastewater infiltration capability, depth to the seasonal high water table, and any surface or subsurface limiting condition.
 1. A person may use on-site treatment and disposal technologies covered by a Type 4 General Permit alone or in combination with another Type 4 General Permit to overcome site limitations.
 2. An applicant may submit a single Notice of Intent to Discharge for an on-site wastewater treatment facility consisting of components or technologies covered by multiple general permits if the information submittal requirements of all the general permits are met.
 3. The Director shall issue a single Construction Authorization under R18-9-A301(D)(1) and a single Discharge Authorization under R18-9-A301(D)(2) for an on-site wastewater treatment facility that consists of components or technologies covered by multiple general permits.
 4. If either a septic tank or disposal method, or both, as identified in R18-9-E302, is appropriately used in combination with an alternative technology listed under R18-9-E303 through R18-9-E322, the applicant shall apply the design requirements specified in R18-9-E302, except that the specific requirements for R18-9-E303 through R18-9-E323, as applicable, supersede requirements in R18-9-E302 if the rules conflict. If additional modifications are necessary and appropriate to ensure adequate treatment, the applicant may request review under R18-9-A312(G) to allow the Department to approve the application.
- B. A person may install a septic tank and disposal works system described in R18-9-E302 as the sole method of wastewater treatment and disposal at a site if the site investigation conducted under R18-9-A310 indicates that no limiting condition identified under R18-9-A310(C) or R18-9-A310(D) exists at the site.
 1. A person may install a seepage pit only in valley-fill sediments in a basin-and-range alluvial basin and only if the seepage pit performance test results meet the criteria specified in R18-9-A312(E).
 2. The person shall specify in the Notice of Intent to Discharge that no limiting conditions described in R18-9-A310(C) and (D) were identified at the site.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- C.** If any surface or subsurface limiting condition is identified in the site investigation report, an applicant may propose installation of a septic tank and disposal works system described in R18-9-E302 as the sole method of wastewater treatment and disposal at a facility only if:
1. The applicant submits information under R18-9-A312(G) that describes:
 - a. How the design of the septic tank and disposal works system specified in R18-9-E302 was modified to overcome limiting conditions;
 - b. How the modified design meets the criteria of R18-9-A312(G)(3); and
 - c. A site-specific SAR under R18-9-A312(D)(2)(a) or (b), as applicable; and
 2. None of the following surface or subsurface limiting conditions are identified at the site:
 - a. An outcropping of rock that cannot be excavated or will impair the function of soil receiving the discharge exists in the intended location of the on-site wastewater treatment facility, as described in R18-9-A310(C)(2)(e);
 - b. The vertical separation distance from the bottom of the lowest point of the disposal works to the seasonal high water table is less than the minimum vertical separation distance, as described in R18-9-A310(D)(2)(b); or
 - c. A subsurface condition that promotes accelerated downward movement of insufficiently treated wastewater as described in R18-9-A310(D)(2)(e).
- D.** If a site can accommodate a septic tank and disposal works system described in R18-9-E302, the applicant shall not install a treatment works or disposal works described in R18-9-E303 through R18-9-E322 unless the applicant submits a statement to the Department with the Notice of Intent to Discharge acknowledging the following:
1. The applicant is aware that although a septic tank and disposal works system described in R18-9-E302 is appropriate for the site, the applicant desires to install a treatment works or disposal works authorized under R18-9-E303 through R18-9-E322; and
 2. The applicant is aware that a treatment works or disposal works authorized under R18-9-E303 through R18-9-E322 may result in higher capital, operation, and maintenance costs than a septic tank and disposal works system described in R18-9-E302.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A312. Facility Design for Type 4 On-site Wastewater Treatment Facilities

- A.** General design requirements. An applicant shall ensure that the person designing an on-site wastewater treatment facility:
1. Signs the design documents submitted as part of the Notice of Intent to Discharge to obtain a Construction Authorization, including plans, specifications, drawings, reports, and calculations; and
 2. Locates and designs the on-site wastewater treatment facility project using good design judgment and relies on appropriate design methods and calculations.
- B.** Design considerations and flow determination. An applicant shall ensure that the person designing the on-site wastewater treatment facility shall:
1. Design the facility to satisfy a 20-year operational life;
 2. Design the facility based on the provisions of one or more of the general permits in R18-9-E302 through R18-9-E322 for facilities with a design flow of less than 3000 gallons per day, and R18-9-E323 for facilities with a design flow of 3000 gallons per day to less than 24,000 gallons per day;
 3. Design the facility based on the facility's design flow and wastewater characteristics as specified in R18-9-A309(A)(7), (10) and (11) and R18-9-A309(B)(3);
 4. For on-site wastewater treatment facilities permitted under R18-9-E303 through R18-9-E323, apply the following design requirements, as applicable:
 - a. Include the power source and power components in construction drawings if electricity or another type of power is necessary for facility operation;
 - b. If a hydraulic analysis is required under subsection (E), perform the analysis based on the location and dimensions of the bottom and sidewall surfaces of the disposal works that are identified in the design documentation;
 - c. Design components, piping, ports, seals, and appurtenances to withstand installation loads, internal and external operational loads, and buoyant forces. Design ports for resistance against movement, and cap or cover openings for protection from damage and entry by rodents, mosquitoes, flies, or other organisms capable of transporting a disease-causing organism;
 - d. Design tanks, liners, ports, seals, piping to and within the facility, and appurtenances for watertightness under all operational conditions;
 - e. Provide adequate storage capacity above high operating level to:
 - i. Accommodate a 24-hour power or pump outage, and
 - ii. Contain wastewater that is incompletely treated or cannot be released by the disposal works to the native soil;
 - f. If a fixed media process is used, provide in the construction drawings the media material, installation specification, media configuration, and wastewater loading rate of the media at the daily design flow;
 - g. Provide a fail-safe wastewater control or operational process, if required by the general permit to prevent discharge of inadequately treated wastewater; and
 - h. Reference design. If using a reference design on file with the Department, indicate the reference design within the information submitted with the Notice of Intent to Discharge.
- C.** Setbacks. The following setbacks apply unless the Department:
1. Specifies alternative setbacks under Article 3, Part E of this Chapter;
 2. Approves a different setback under the procedure specified in subsection (G); or
 3. Establishes a more stringent setback on a site- or area-specific basis to ensure compliance with water quality standards.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

| Features Requiring Setbacks | Setback For An On-Site Wastewater Treatment Facility, Including Reserve Area (In Feet) | Special Provisions |
|---|--|---|
| 1. Building | 10 | Includes porches, decks (including pool decks), and steps (covered or uncovered), breezeways, roofed patios, carports, covered walks, and similar structures and appurtenances. |
| 2. Property line shared with any adjoining lot or parcel not served by a common drinking water system* or an existing water well | 50 | A person may reduce the setback to a minimum of 5 feet from the property line if: a. The owners of any affected undeveloped adjacent properties agree, as evidenced by an appropriately recorded document, to limit the location of any new well on their property to at least 100 feet from the proposed treatment works and primary and reserve disposal works; and b. The arrangements and documentation are approved by the Department. |
| 3. All other property lines | 5 | None |
| 4. Public or private water supply well | 100 | None |
| 5. Perennial or intermittent stream | 100 | Measured horizontally from the high water line of the peak streamflow from a 10-year, 24-hour rainfall event. |
| 6. Lake, reservoir, or canal | 100 | Measured horizontally from the high water line from a 10-year, 24-hour rainfall event at the lake or reservoir and measured horizontally from the edge of the canal. |
| 7. Drinking water intake from a surface water source (includes an open water body, downslope spring or a well tapping stream-side saturated alluvium) | 200 | Measured horizontally from the on-site wastewater treatment facility to the structure or mechanism for withdrawing raw water such as a pipe inlet, grate, pump, intake or diversion box, spring box, well, or similar structure. |
| 8. Wash or drainage easement with a drainage area of more than 20 acres | 50 | Measured horizontally from the nearest edge of the defined natural channel bank or drainage easement boundary. A person may reduce the setback to 25 feet if natural or constructed erosion protection is approved by the appropriate flood plain administrator. |
| 9. Water main or branch water line | 10 | None |
| 10. Domestic service water line (including domestic water holding tanks) | 5 | Measured horizontally between the water line and the wastewater pipe, except that the following are allowed: a. A water line may cross above a wastewater pipe if the crossing angle is between 45 and 90 degrees and the vertical separation distance is 1 foot or more. b. A water line may parallel a wastewater pipe with a horizontal separation distance of 1 foot to 5 feet if the bottom of the water line is 1 foot or more above the top of the wastewater pipe and is in a separate trench or on a bench in the same trench. |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

| | | |
|--|-----|---|
| 11. Downslopes or cut banks greater than 15 percent, culverts, and ditches from: | | |
| a. Treatment works components | 10 | Measured horizontally from the bottom of the treatment works component to the closest point of daylighting on the surface. |
| b. Trench, bed, chamber technology, or gravelless trench with: | | Measured horizontally from the bottom of the lowest point of the disposal pipe or drip lines, as applicable, to the closest point of daylighting on the surface. |
| i. No limiting subsurface condition specified in R18-9-A310(D)(2), | 20 | |
| ii. A limiting subsurface condition. | | |
| c. Subsurface drip lines. | 50 | |
| | 3 | Measured horizontally from the bottom of the lowest point of the disposal pipe or drip lines, as applicable, to the closest point of daylighting on the surface. |
| 12. Driveway | 5 | Measured horizontally to the nearest edge of an on-site wastewater treatment facility excavation. A person may place a properly reinforced and protected wastewater treatment facility, except for disposal works, at any location relative to a driveway if access openings, risers, and covers carry the design load and are protected from inflow. |
| 13. Swimming pool excavation | 5 | Except if soil loading or stability concerns indicate the need for a greater separation distance. |
| 14. Easement (except drainage easement) | 5 | None |
| 15. Earth fissures | 100 | None |
| * A "common drinking water system" means a system that currently serves or is under legal obligation to serve the property and may include a drinking water utility, a well-sharing agreement, or other viable water supply agreement. | | |

D. Soil absorption rate (SAR) and disposal works sizing.

1. An applicant shall determine the soil absorption area by dividing the design flow by the applicable soil absorption rate. If soil characterization and percolation test methods yield different SAR values or if multiple applications of the same approach yield different values, the designer of the disposal works shall use the lowest SAR value unless a higher SAR value is proposed and justified to the

Department's satisfaction in the Notice of Intent to Discharge.

2. The SAR used to calculate disposal works size for systems described in R18-9-E302 is as follows:
 - a. The SAR by percolation testing as described in R18-9-A310(F) or (G), as applicable, is determined as follows:

| Percolation Rate from Percolation Test (minutes per inch) | SAR, Trench, Chamber, and Pit (gal/day/ft ²) | SAR, Bed (gal/day/ft ²) |
|---|--|-------------------------------------|
| Less than 1.00 | A site-specific SAR is required | A site-specific SAR is required |
| 1.00 to less than 3.00 | 1.20 | 0.93 |
| 3.00 | 1.10 | 0.73 |
| 4.00 | 1.00 | 0.67 |
| 5.00 | 0.90 | 0.60 |
| 7.00 | 0.75 | 0.50 |
| 10.0 | 0.63 | 0.42 |
| 15.0 | 0.50 | 0.33 |
| 20.0 | 0.44 | 0.29 |
| 25.0 | 0.40 | 0.27 |
| 30.0 | 0.36 | 0.24 |
| 35.0 | 0.33 | 0.22 |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

| | | |
|------------------|---------------------------------|---------------------------------|
| 40.0 | 0.31 | 0.21 |
| 45.0 | 0.29 | 0.20 |
| 50.0 | 0.28 | 0.19 |
| 55.0 | 0.27 | 0.18 |
| 55.0+ to 60.0 | 0.25 | 0.17 |
| 60.0+ to 120 | 0.20 | 0.13 |
| Greater than 120 | A site-specific SAR is required | A site-specific SAR is required |

b. The SAR using the soil evaluation method described in R18-9-A310(E) is determined by answering the questions in the following table. The questions are read in sequence starting with "A." The first "yes" answer determines the SAR. A seepage pit is

required to determine percolation rate under the procedure described in R18-9-A310(G) and would only use this table to augment the percolation test results, if appropriate.

| Sequence of Soil Characteristics Questions | SAR, Trench, Chamber, and Pit gal/day/ft ² | SAR, Bed gal/day/ft ² |
|---|---|----------------------------------|
| A. Is the horizon gravelly coarse sand or coarser? | A site-specific SAR is required | A site-specific SAR is required |
| B. Is the structure of the horizon moderate or strongly platy? | A site-specific SAR is required | A site-specific SAR is required |
| C. Is the texture of the horizon sandy clay loam, clay loam, silty clay loam, or finer and the soil structure weak platy? | A site-specific SAR is required | A site-specific SAR is required |
| D. Is the moist consistence stronger than firm or any cemented class? | A site-specific SAR is required | A site-specific SAR is required |
| E. Is the texture sandy clay, clay, or silty clay of high clay content and the structure massive or weak? | A site-specific SAR is required | A site-specific SAR is required |
| F. Is the texture sandy clay loam, clay loam, silty clay loam, or silt loam and the structure massive? | A site-specific SAR is required | A site-specific SAR is required |
| G. Is the texture of the horizon loam or sandy loam and the structure massive? | 0.20 | 0.13 |
| H. Is the texture sandy clay, clay, or silty clay of low clay content and the structure moderate or strong? | 0.20 | 0.13 |
| I. Is the texture sandy clay loam, clay loam, or silty clay loam and the structure weak? | 0.20 | 0.13 |
| J. Is the texture sandy clay loam, clay loam, or silty clay loam and the structure moderate or strong? | 0.40 | 0.27 |
| K. Is the texture sandy loam, loam, or silty loam and the structure weak? | 0.40 | 0.27 |
| L. Is the texture sandy loam, loam, or silt loam and the structure moderate or strong? | 0.60 | 0.40 |
| M. Is the texture fine sand, very fine sand, loamy fine sand, or loamy very fine sand? | 0.40 | 0.27 |
| N. Is the texture loamy sand or sand? | 0.80 | 0.53 |
| O. Is the texture coarse sand? | 1.20 | A site-specific SAR is required |

c. If the percolation rate determined under R18-9-A310(F) or (G), whichever is applicable, is a value that lies between two consecutive percolation rate values listed in subsection (2)(a), the applicant must use the higher of the two listed percolation rates to obtain the most conservative SAR.

3. For an on-site wastewater treatment facility described in a general permit other than R18-9-E302, the SAR is dependent on the ability of the facility to reduce the level of TSS and BOD₅ and is calculated using the following formula:

$$SAR_a = \left[\left(\frac{11.39}{\sqrt[3]{TSS + BOD_5}} - 1.87 \right) SAR^{1.13} + 1 \right] SAR$$

- a. "SAR_a" is the adjusted soil absorption rate for disposal works design in gallons per day per square foot,
- b. "TSS" is the total suspended solids in wastewater delivered to the disposal works in milligrams per liter,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. "BOD₅" is the five-day biochemical oxygen demand of wastewater delivered to the disposal works in milligrams per liter, and
- d. "SAR" is the soil absorption rate for septic tank effluent determined by the subsurface characterization method described in R18-9-A310.
- 4. An applicant shall ensure that the facility is designed so that the area of the intended installation is large enough to allow for construction of the facility and for future replacement or repair and is at least as large as the following:
 - a. For a dwelling, a primary area for the disposal works sized according to subsection (D)(1) and a reserve area of 100 percent of the primary area, excluding the footprint of the treatment works. A reserve area is not required for a lot in a subdivision approved before 1974 if the lot conforms to its original approved configuration;
 - b. For other than a dwelling, a primary area for the disposal works sized according to subsection (D)(1) and a reserve area of 100 percent of the primary area, excluding the footprint of the treatment works.
- 5. An applicant shall ensure that the subsurface disposal works is designed to achieve the design flow established in R18-9-A309(B)(3) through proper hydraulic function, including conditions of seasonally cold and wet weather.
- E. Vertical separation distances.
 - 1. Minimum vertical separation to the seasonal high water table for a disposal works described in R18-9-E302 receiving septic tank effluent. For a disposal works described in R18-9-E302 receiving septic tank effluent at a facility where the septic tank and disposal system described in R18-9-E302 is the sole method of treatment and disposal of wastewater, the minimum vertical separation distance between the lowest point in the disposal works and the seasonal high water table is dependent on the soil absorption rate and is determined as follows:

| Soil Absorption Rate (gallons per day per square foot) | | | Minimum Vertical Separation Between The Bottom Of The Disposal Works And The Seasonal High Water Table (feet) | |
|---|----------------|----------------|---|-------------|
| Trench and Chamber | Bed | Seepage Pit | Trench, Chamber, and Bed | Seepage Pit |
| 1.20+ | 0.93+ | 1.20+ | Not allowed for septic tank effluent | Not Allowed |
| 0.63+ to 1.20 | 0.42 to 0.93 | 0.63+ to 1.20 | 10 | 60 |
| 0.20 to 0.63 | 0.13 to 0.42 | 0.36 to 0.63 | 5 | 60 |
| Less than 0.20 | Less than 0.13 | Less than 0.36 | Not allowed for septic tank effluent | Not Allowed |

- 2. Minimum vertical separation to the seasonal high water table for treatment and disposal works technologies described in R18-9-E303 through R18-9-E322. If the minimum vertical separation distance to the seasonal high water table for a disposal works receiving septic tank effluent specified in subsection (E)(1) is not met, the applicant shall comply with the following:
 - a. Employ one or more technologies described in R18-9-E303 through R18-9-E322 to achieve a reduced concentration of harmful microorganisms, expressed as total coliform in colony forming units per 100 milliliters (cfu/100 ml) delivered to native soil at the bottom of the disposal works. The applicant shall use the following table to select works that achieve a reduced total coliform concentration corresponding to the available vertical separation distance between the bottom of the disposal works and the seasonal high water table:

| Available Vertical Separation Distance Between the Bottom of The Disposal Works and the Seasonal High Water Table (feet) | | Maximum Allowable Total Coliform Concentration, 95 th Percentile, Delivered to Natural Soil by the Disposal Works (Log ₁₀ of coliform concentration in cfu per 100 milliliters) |
|--|-------------------------|---|
| For SAR*, 0.20 to 0.63 | For SAR*, 0.63+ to 1.20 | |
| 5 | 10 | 8** |
| 4 | 8 | 7 |
| 3.5 | 7 | 6 |
| 3 | 6 | 5 |
| 2.5 | 5 | 4 |
| 2 | 4 | 3 |
| 1.5 | 3 | 2 |
| 1 | 2 | 1 |
| 0 | 0 | 0*** |

* Soil absorption rate from percolation testing or soil characterization, in gallons per square foot per day.
 ** Nominal value for a standard septic tank and disposal field (10⁸ colony forming units per 100 ml).
 *** Nominally free of coliform bacteria.

- b. Include a hydraulic analysis with the Notice of Intent to Discharge, based on the dimensions of the absorption surfaces specified in R18-9-A312(B)(4)(b), showing that the soil is sufficiently permeable to conduct wastewater downward and laterally without surfacing for the site conditions at the disposal works.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- 3. Vertical separation from a subsurface limiting condition described in R18-9-A310(D)(2)(d) that may cause or contribute to surfacing of wastewater. If a subsurface limiting condition described in R18-9-A310(D)(2)(d) exists at the location of the disposal works, the applicant shall ensure that the design for the on-site wastewater treatment facility meets one of the following:
 - a. A zone of acceptable native soil with the following characteristics exists between the bottom of the disposal works and the top of the subsurface limiting condition:
 - i. The zone of soil is at least 4 feet thick, and
 - ii. The zone of soil is sufficiently permeable to conduct wastewater released from the disposal works vertically downward and laterally without causing surfacing of the wastewater as documented by a hydraulic analysis submitted with the Notice of Intent to Discharge that is based on the dimensions of the absorption surfaces specified in R18-9-A312(B)(4)(b);
 - b. The subsurface limiting condition is thin enough to allow placement of a disposal works into acceptable

native soil beneath the subsurface limiting condition if the following criteria are met:

- i. The bottom of the subsurface limiting condition is not deeper than 10 feet below the land surface, and
- ii. The vertical separation distance from the bottom of the disposal works to the seasonal high water table complies with subsection (E)(1) or (2), as applicable; or
- c. If the disposal works is placed above the subsurface limiting condition and the depth to the subsurface limiting condition is less than 4 feet below the bottom of the disposal works, the design for the on-site wastewater treatment facility shall comply with all of the following:
 - i. Employ one or more technologies described in R18-9-E303 through R18-9-E322 to achieve a reduced concentration of harmful microorganisms, expressed as total coliform in colony forming units per 100 milliliters (cfu/100 ml), delivered to acceptable native soil at the bottom of the disposal works, as follows:

| Available Vertical Separation Distance from the Bottom of the Disposal Works to the Subsurface Limiting Condition (feet) | Maximum Allowable Total Coliform Concentration, 95 th Percentile, Delivered to Acceptable Native Soil by the Disposal Works (Log ₁₀ of coliform concentration in cfu per 100 milliliters) |
|--|---|
| 3.5 | 7 |
| 3 | 6 |
| 2.5 | 5 |
| 2 | 4 |
| 1.5 | 0* |
| 1 | 0* |
| 0.5 | 0* |
| 0 | 0* |

* Nominally free of coliform bacteria.

- ii. Include a hydraulic analysis with the Notice of Intent to Discharge, based on the location and dimensions of the absorption surfaces specified in R18-9-A312(B)(4)(b), showing that the soil is sufficiently permeable to conduct wastewater vertically downward and laterally without surfacing for the site conditions at the disposal works; and
- iii. If a disinfection device under R18-9-E320 is proposed but is not used with surface disposal of wastewater under R18-9-E321 or "Category A" drip irrigation disposal under R18-9-E322, provide a justification with the Notice of Intent to Discharge stating why the selected type of disposal works is favored over disposal under R18-9-E321 or R18-9-E322.
- 4. Vertical separation from a subsurface limiting condition described in R18-9-A310(D)(2)(e) that promotes accelerated downward movement of insufficiently treated wastewater. If a subsurface limiting condition described in R18-9-A310(D)(2)(e) exists at the location of the proposed disposal works, the applicant shall ensure that the design for the on-site wastewater treatment facility meets one of the following:

- a. A zone of naturally occurring soil with the following characteristics exists between the bottom of the disposal works and the top of the subsurface limiting condition:
 - i. The zone of soil is at least 2 feet thick, and
 - ii. The SAR of the soil is not less than 0.20 gallons per day per square foot nor more than 1.20 gallons per day per square foot; or
- b. The on-site wastewater treatment facility employs one or more technologies described in R18-9-E303 through R18-9-E322 that produces treated wastewater that meets a total coliform concentration of 1,000,000 (Log₁₀6) colony forming units per 100 milliliters, 95th percentile.

- F. Materials and manufactured system components.
 - 1. Materials. An applicant shall use aggregate if no specification for disposal works material is provided in this Article.
 - 2. Manufactured components. If manufactured components are used, an applicant shall design, install, and operate the on-site wastewater treatment facility following the manufacturer's specifications. The applicant shall ensure that:
 - a. Treatment and containment components, mechanical equipment, instrumentation, and controls have mon-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- itoring, inspection, access and cleanout ports or covers, as appropriate, for monitoring and service;
- b. Treatment and containment components, pipe, fittings, pumps, and related components and controls are durable, watertight, structurally sound, and capable of withstanding stress from installation and operational service; and
 - c. Distribution lines for disposal works are constructed of perforated high density polyethylene pipe, perforated ABS pipe, perforated PVC pipe, or other pipe material, if the pipe is suitable for wastewater disposal use and sufficient openings are available for distribution of the wastewater into the trench or bed area.
3. Electronic components. When electronic components are used, the applicant shall ensure that:
 - a. The component connections are compliant with the electrical code encompassed in the local building codes applicable in the county in which the facility is installed, except as required for a pressure distribution system under R18-9-E304(D)(2)(e);
 - b. Instructions and a wiring diagram are mounted on the inside of a control panel cover;
 - c. The control panel is equipped with a multimode operation switch, red alarm light, buzzer, and reset button;
 - d. The multimode operation switch operates in the automatic position for normal system operation; and
 - e. An anomalous condition is indicated by a glowing alarm light and sounding buzzer. The continued glowing of the alarm light after pressing the reset button shall signal the need for maintenance or repair of the system at the earliest practical opportunity.
 4. If a conflict exists between this Article and the manufacturer's specifications, the requirements of this Article apply. Except for the requirements in subsection (D) and (E), which always apply, if the conflict voids a manufacturer's warranty, the applicant may submit a request under subsection (G) justifying use of the manufacturer's specifications.
- G.** Alternative design, setback, installation, or operational features. When an applicant submits a Notice of Intent to Discharge, the applicant may request that the Department review and approve a feature of improved or alternative technology, design, setback, installation, or operation that differs from a general permit requirement in this Article. Designs incorporating alternative features already approved in a current listing on the "proprietary and other reviewed product list" pursuant to R18-9-A309(E) do not need additional approval under this subsection for only those specific alternative features already approved in the proprietary products listing.
1. The applicant shall make the request for an improved or alternative feature of technology, design, setback, installation, or operation on a form provided by the Department and include:
 - a. A description of the requested change;
 - b. A citation to the applicable feature or technology, design, setback, installation, or operational requirement for which the change is being requested; and
 - c. Justification for the requested change, including any necessary supporting documentation.
 2. The applicant shall submit the appropriate fee specified under 18 A.A.C. 14 for each requested change. For purposes of calculating the fee, a requested change that is applied multiple times in a similar manner throughout the facility is considered a single request if submitted for concurrent review.
 3. The applicant shall provide sufficient information for the Department to determine that the change achieves equal or better performance compared with the general permit requirement, or addresses site or system conditions more satisfactorily than the requirements of this Article.
 4. The Department shall review and may approve the request for change.
 5. The Department shall deny the request for the change if the change will adversely affect other permittees or cause or contribute to a violation of an Aquifer Water Quality Standard.
 6. The Department shall deny the request for the change if the change:
 - a. Fails to achieve equal or better performance compared to the general permit requirement;
 - b. Fails to address site or system conditions more satisfactorily than the general permit requirement;
 - c. Is insufficiently justified based on the information provided in the submittal;
 - d. Requires excessive review time, research, or specialized expertise by the Department to act on the request; or
 - e. For any other justifiable cause.
 7. The Department may approve a reduced setback for a facility authorized to discharge under one or more of the general permits in R18-9-E302 through R18-9-E323, either separately or in combination, if the applicant additionally demonstrates at least one of the following:
 - a. The treatment performance is significantly better than that provided under R18-9-E302(B),
 - b. The wastewater loading rate is reduced, or
 - c. Surface or subsurface characteristics ensure that reduced setbacks are protective of human health or water quality.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended to correct a manifest typographical error in subsection (E)(1) (Supp. 01-1). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A313. Facility Installation, Operation, and Maintenance for On-site Wastewater Treatment Facilities

- A.** Facility installation. In addition to installation requirements in the general permit, the applicant shall ensure that the following tasks are performed, as applicable:
1. The facility is installed as described in design documents submitted with the Notice of Intent to Discharge;
 2. Components are installed on a firm foundation that supports the components and operating loads;
 3. The site is prepared to protect native soil beneath the soil absorption area and in adjacent areas from compaction, prevent smeared absorption surfaces, minimize disturbances from grubbing, and otherwise preclude damage to the disposal area that would impair performance;
 4. Components are protected from damage at the construction site and installed in conformance with the manufacturer's instructions if consistent with this Article;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

5. Treatment media are placed to achieve uniform density, prevent differential settling, produce a level inlet surface unless otherwise specified by the manufacturer, and avoid introduction of construction contaminants;
6. Backfill is placed to prevent damage to geotextile, liners, tanks, and other components;
7. Soil cover is shaped to shed rainfall away from the backfill areas and prevent ponding of runoff; and
8. Anti-buoyancy measures are implemented during construction if temporary saturated backfill conditions are anticipated during construction.

B. Operation and maintenance. In addition to operation and maintenance requirements in the general permit or specified in the operation and maintenance manual, the permittee shall ensure that the following tasks are performed, as applicable:

1. Pump accumulated residues, inspect and clean wastewater treatment and distribution components, and manage residues to protect human health and the environment;
2. Clean, backwash, or replace effluent filters according to the manufacturer's instructions, and manage residues to protect human health and the environment;
3. Inspect and clean the effluent baffle screen and pump tank, and properly dispose of cleaning residue;
4. Clean the dosing tank effluent screen, pump switches, and floats, and properly dispose of cleaning residue;
5. Flush lateral lines and return flush water to the pretreatment headworks;
6. Inspect, remove and replace, if necessary, and properly dispose of filter media;
7. Rod pressurized wastewater delivery lines and secondary distribution lines (for dosing systems), and return cleaning water to the pretreatment headworks;
8. Inspect and clean pump inlets and controls and return cleaning water to the pretreatment headworks;
9. Implement corrective measures if anomalous ponding, dryness, noise, odor, or differential settling is observed;
10. Inspect and monitor inspection and access ports, as applicable, to verify that operation is within expected limits for:
 - a. Influent wastewater quality;
 - b. The pressurized dosing system;
 - c. The aggregate infiltration bed and mound system;
 - d. Wastewater delivery and the engineered pad;
 - e. The pressurized delivery system, filter, underdrain, and native soil absorption system;
 - f. Saturation condition status in peat and other media; and
 - g. Treatment system components;
11. Inspect tanks, liners, ports, seals, piping, and appurtenances for watertightness under all operational conditions;
12. Manage vegetation in areas that contain components subject to physical impairment or damage due to root invasion or animals;
13. Maintain drainage, berms, protective barriers, cover materials, and other features; and
14. Maintain the usefulness of the reserve area to allow for repair or replacement of the on-site wastewater treatment facility.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by

final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-A314. Septic Tank Design, Manufacturing, and Installation for On-site Wastewater Treatment Facilities

A person shall not install a septic tank in an on-site wastewater treatment facility unless the tank meets the following requirements:

1. The tank is:
 - a. Designed to produce a clarified effluent and provide adequate space for sludge and scum accumulations;
 - b. Watertight and constructed of solid durable materials not subject to excessive corrosion or decay;
 - c. Manufactured with at least two compartments unless two separate structures are placed in series. The tank is designed so that:
 - i. The inlet compartment of any septic tank not placed in series is nominally 67 percent to 75 percent of the total required capacity of the tank,
 - ii. Septic tanks placed in series are considered a unit and meet the same criteria as a single tank,
 - iii. The liquid depth of the septic tank is at least 42 inches, and
 - iv. A septic tank of 1000 gallon capacity is at least 8 feet long and the tank length of septic tanks of greater capacity is at least 2 times but not more than 3 times the width;
 - d. Manufactured with at least two access openings to the tank interior, each at least 20 inches in diameter. The tank is designed so that:
 - i. One access opening is located over the inlet end of the tank and one access opening is located over the outlet end;
 - ii. Whenever a first compartment exceeds 12 feet in length, another access opening is provided over the baffle wall; and
 - iii. Access openings and risers are constructed to ensure accessibility within 6 inches below finished grade;
 - e. Manufactured so that the sewage inlet and wastewater outlet openings are not smaller than the connecting sewer pipe. The tank is designed so that:
 - i. The vertical leg of round inlet and outlet fittings is at least 4 inches but not smaller than the connecting sewer pipe, and
 - ii. A baffle fitting has the equivalent cross-sectional area of the connecting sewer pipe and not less than a 4 inch horizontal dimension if measured at the inlet and outlet pipe inverts;
 - f. Manufactured so that the inlet and outlet pipe or baffle extends 4 inches above and at least 12 inches below the water surface when the tank is installed according to the manufacturer's instructions consistent with this Chapter. The invert of the inlet pipe is at least 2 inches above the invert of the outlet pipe;
 - g. Manufactured so that the inlet and outlet fittings or baffles and compartment partitions have a free vent area equal to the required cross-sectional area of the connected sewer pipe to provide free ventilation above the water surface from the disposal works or seepage pit through the septic tank, house sewer, and stack to the outer air;
 - h. Manufactured so that the open space extends at least 9 inches above the liquid level and the cover of the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

septic tank is at least 2 inches above the top of the inlet fitting vent opening;

- i. Manufactured so that partitions or baffles between compartments are of solid durable material (wooden baffles are prohibited) and extend at least 4 inches above the liquid level. The open area of the baffle shall be between one and 2 times the open area of the inlet pipe or horizontal slot and located at the midpoint of the liquid level of the baffle. If a horizontal slot is used, the slot shall be no more than 6 inches in height;
 - j. Structurally designed to withstand all anticipated earth or other loads. The tank is designed so that:
 - i. All septic tank covers are capable of supporting an earth load of 300 pounds per square foot; and
 - ii. If the top of the tank is greater than 2 feet below finish grade, the septic tank and cover are capable of supporting an additional load of 150 pounds per square foot for each additional foot of cover;
 - k. Manufactured or installed so that the influent and effluent ends of the tank are clearly and permanently marked on the outside of the tank with the words "INLET" or "IN," and "OUTLET" or "OUT," above or to the right or left of the corresponding openings; and
 - l. Clearly and permanently marked with the manufacturer's name or registered trademark, or both, the month and year, or Julian date, of manufacture, the maximum recommended depth of earth cover in feet, and the design liquid capacity of the tank. The tank is manufactured to protect the markings from corrosion so that they remain permanent and readable for the operational life of the tank.
2. Materials used to construct or manufacture septic tanks.
- a. A septic tank cast-in-place at the site of use shall be protected from corrosion by coating the tank with a bituminous coating, by constructing the tank using a concrete mix that incorporates 15 percent to 18 percent fly ash, or by any other Department-approved means. The tank is designed so that:
 - i. The coating extends at least 4 inches below the wastewater line and covers all of the internal area above that point; and
 - ii. A septic tank cast-in-place complies with the "Building Code Requirements for Structural Concrete and Commentary ACI 318-02/318R-02 (2002)," and the "Code Requirements for Environmental Engineering Concrete Structures and Commentary, ACI 350/350R-01 (2001)," published by the American Concrete Institute. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington Street, Phoenix, AZ 85007 or may be obtained from American Concrete Institute, P.O. Box 9094, Farmington Hills, MI 48333-9094.
 - b. A steel septic tank shall have a minimum wall thickness of No. 12 U.S. gauge steel and be protected from corrosion, internally and externally, by a bituminous coating or other Department-approved means.
 - c. A prefabricated concrete septic tank shall meet the "Standard Specification for Precast Concrete Septic Tanks, C1227-20," published by the American Society for Testing and Materials. This information is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington Street, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International West.
 - d. A septic tank manufactured using fiberglass or thermoplastic shall meet the requirements set forth in "Prefabricated Septic Tanks – IAPMO/ANSI Z1000-2019," published by the International Association of Plumbing and Mechanical Officials. This information is incorporated by reference, does not include any later amendments or editions of the incorporated material, and may be viewed at the Arizona Department of Environmental Quality, 1110 W. Washington Street, Phoenix, AZ 85007 or obtained from International Association of Plumbing and Mechanical Officials, 4755 E. Philadelphia Street, Ontario, CA 917761.
3. Conformance with design, materials, and manufacturing requirements.
- a. If any conflict exists between this Article and the information incorporated by reference in subsection (2), the requirements of this Article apply.
 - b. The Department may approve use of alternative construction materials under R18-9-A312(G). Tanks constructed of wood, block, or bare steel are prohibited.
 - c. The Department may inspect septic tanks at the site of manufacturing to verify compliance with subsections (1) and (2).
 - d. The septic tank sale documentation includes:
 - i. A certificate attesting that the septic tank conforms with the design, materials, and manufacturing requirements in subsections (1) and (2); and
 - ii. Instructions for handling and installing the septic tank.
4. The septic tank's daily design flow is determined as follows:
- a. For a single family dwelling:
 - i. The design liquid capacity of the septic tank and the septic tank's daily design flow are determined based on the number of bedrooms and fixture count as follows:

| Criteria for Septic Tank Size and Design Flow | | | |
|---|---------------|--|-----------------------|
| Number of Bedrooms | Fixture Count | Minimum Design Liquid Capacity (gallons) | Design Flow (gal/day) |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

| | | | |
|---|--------------|------|------|
| 1 | 7 or less | 1000 | 150 |
| | More than 7 | 1000 | 300 |
| 2 | 14 or less | 1000 | 300 |
| | More than 14 | 1000 | 450 |
| 3 | 21 or less | 1000 | 450 |
| | More than 21 | 1250 | 600 |
| 4 | 28 or less | 1250 | 600 |
| | More than 28 | 1500 | 750 |
| 5 | 35 or less | 1500 | 750 |
| | More than 35 | 2000 | 900 |
| 6 | 42 or less | 2000 | 900 |
| | More than 42 | 2500 | 1050 |
| 7 | 49 or less | 2500 | 1050 |
| | More than 49 | 3000 | 1200 |
| 8 | 56 or less | 3000 | 1200 |
| | More than 56 | 3000 | 1350 |

ii. Fixture count is determined as follows:

| Residential Fixture Type | Fixture Units | Residential Fixture Type | Fixture Units |
|------------------------------------|---------------|---|---------------|
| Bathtub | 2 | Sink, bar | 1 |
| Bidet | 2 | Sink, kitchen (including dishwasher) | 2 |
| Clothes washer | 2 | Sink, service | 3 |
| Dishwasher (Separate from kitchen) | 2 | Utility tub or sink | 2 |
| Lavatory, single | 1 | Water closet, 1.6 gallons per flush (gpf) | 3 |
| Lavatory, double in master bedroom | 1 | Water closet, >1.6 to 3.2 gpf | 4 |
| Shower, single stall | 2 | Water closet, greater than 3.2 gpf | 6 |

- b. For other than a single family dwelling, the design liquid capacity of a septic tank in gallons is 2.1 times the daily design flow into the tank as determined from Table 1, Unit Design Flows. If the wastewater strength exceeds that of typical sewage, additional tank volume is required.
- c. A person may place two septic tanks in series to meet the septic tank design liquid capacity requirements if the capacity of the first tank is at least 67 percent of the total required tank capacity and the capacity of the second tank is at least 33 percent of the total required tank capacity.
- 5. The following requirements regarding new or replacement septic tank installation apply:
 - a. Permanent surface markers for locating the septic tank access openings are provided for maintenance;
 - b. A septic tank installed under concrete or pavement has the required access openings extended to grade;
 - c. A septic tank effluent filter is installed on the septic tank. The filter shall:
 - i. Prevent the passage of solids larger than 1/8 inch in diameter while under two feet of hydrostatic head; and
 - ii. Be constructed of materials that are resistant to corrosion and erosion, sized to accommodate hydraulic and organic loading, and removable for cleaning and maintenance; and
 - d. The septic tank is tested for watertightness after installation by the water test described in subsections (5)(d)(i) and (5)(d)(ii) and repaired or replaced, if necessary.
 - i. The septic tank is filled with clean water, as specified in R18-9-A310(A), to the invert of the outlet and the water left standing in the tank for 24 hours and:
 - (1) After 24 hours, the tank is refilled to the invert, if necessary;
 - (2) The initial water level and time is recorded; and
 - (3) After one hour, water level and time is recorded.
 - ii. The tank passes the water test if the water level does not drop over the one-hour period. Any visible leak of flowing water is considered a failure. A damp or wet spot that is not flowing is not considered a failure.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A315. Interceptor Design, Manufacturing, and Installation for On-site Wastewater Treatment Facilities

A. Interceptor requirement. An applicant shall ensure that an interceptor as required by R18-9-A309(A)(7)(c) or necessary due to excessive amounts of grease, garbage, sand, or other

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

wastes in the sewage is installed between the sewage source and the on-site wastewater treatment facility.

B. Interceptor design. An applicant shall ensure that:

1. An interceptor has not less than two compartments with fittings designed for grease retention and capable of removing excessive amounts of grease, garbage, sand, or other similar wastes. An interceptor may not accept human excreta or toilet wastewater. Applicable structural and materials requirements prescribed in R18-9-A314 apply;
2. Interceptors are located as close to the source as possible and are accessible for servicing. The applicant shall ensure that access openings for servicing are at grade level and gas-tight;
3. The interceptor size for grease and garbage from non-residential kitchens is calculated using by the following equation: Interceptor Size (in gallons) = $M \times F \times T \times S$.
 - a. "M" is the number of meals per peak hour;
 - b. "F" is the applicable waste flow rate from Table 1, Unit Design Flows.
 - c. "T" is the estimated retention time:
 - i. Commercial kitchen waste, dishwasher or disposal: 2.5 hours; or
 - ii. Single service kitchen with utensil wash disposal: 1.5 hours;
 - d. "S" is the estimated storage factor:
 - i. Fully equipped commercial kitchen, 8-hour operation: 1.0;
 - ii. Fully equipped commercial kitchen, 16-hour operation: 2.0;
 - iii. Fully equipped commercial kitchen, 24-hour operation: 3.0; or
 - iv. Single service kitchen, 1.5;
4. The interceptor size for silt and grease from laundries and laundromats is calculated using the following equation: Interceptor Size (in gallons) = $M \times C \times F \times T \times S$.
 - a. "M" is the number of machines;
 - b. "C" is the machine cycles per hour (assume 2);
 - c. "F" is the waste flow rate from Table 1, Unit Design Flows;
 - d. "T" is the estimated retention time (assume 2); and
 - e. "S" is the estimated storage factor (assume 1.5 that allows for rock filter).

C. The applicant may calculate the size of an interceptor using different factor values than those given in subsections (B)(3) and (4) based on the values justified by the applicant in the Notice of Intent to Discharge submitted to the Department for the on-site wastewater treatment facility.

D. The Department may require installation of a sampling box if the volume or characteristics of the waste will impair the performance of the on-site wastewater treatment facility.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-A316. Transfer of Ownership Inspection for On-site Wastewater Treatment Facilities

A. Conforming with this Section satisfies the Notice of Transfer requirements under R18-9-A304.

B. Within six months before the date of property transfer, the person who is transferring a property served by an on-site wastewater treatment facility shall retain an inspector to perform a transfer of ownership inspection of the on-site wastewater treatment facility who meets the following qualifications:

1. Possesses working knowledge of the type of facility and the inspection process;
2. Holds a certificate of training from a course recognized by the Department as sufficiently covering the information specified in this Section by July 1, 2006; and
3. Holds a license in one of the following categories:
 - a. An Arizona-registered engineer;
 - b. An Arizona-registered sanitarian;
 - c. An owner of a vehicle with a human excreta collection and transport license issued under 18 A.A.C. 13, Article 11 or an employee of the owner of the vehicle;
 - d. A contractor licensed by the Registrar of Contractors in one of the following categories:
 - i. Residential license B-4 or C-41;
 - ii. Commercial license A, A-12, or L-41; or
 - iii. Dual license KA or K-41;
 - e. A wastewater treatment plant operator certified under 18 A.A.C 5, Article 1; or
 - f. A person qualifying under another category designated by the Department.

C. The inspector shall complete a Report of Inspection on a form approved by the Department, sign it, and provide it to the person transferring the property. The Report of Inspection shall:

1. Address the physical and operational condition of the on-site wastewater treatment facility and describe observed deficiencies and repairs completed, if any;
2. Indicate that each septic tank or other wastewater treatment container on the property was pumped or otherwise serviced to remove, to the maximum extent possible, solid, floating, and liquid waste accumulations, or that pumping or servicing was not performed for one of the following reasons:
 - a. A Discharge Authorization for the on-site wastewater treatment facility was issued and the facility was put into service within 12 months before the transfer of ownership inspection,
 - b. Pumping or servicing was not necessary at the time of the inspection based on the manufacturer's written operation and maintenance instructions, or
 - c. No accumulation of floating or settled waste was present in the septic tank or wastewater treatment container; and
3. Indicate the date the inspection was performed.

D. Before the property is transferred, the person transferring the property shall provide to the person to whom the property is transferred:

1. The completed Report of Inspection; and
2. Documents in the person's possession relating to permitting, operation, and maintenance of the on-site wastewater treatment facility.

E. The person to whom the property is transferred shall complete a Notice of Transfer on a form approved by the Department and send the form with the applicable fee specified in 18 A.A.C. 14 within 15 calendar days after the property transfer to:

1. The Department for transfer of a property with an on-site wastewater treatment facility for which construction was completed before January 1, 2001; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. The health or environmental agency delegated by the Director to administer the on-site wastewater treatment facility program for transfer of a property with an on-site wastewater treatment facility constructed on or after January 1, 2001.
- F.** If the Department issued a Discharge Authorization for the on-site wastewater treatment facility but the facility was not put into service before the property transfer, an inspection of the facility is not required and the transferee shall complete the Notice of Transfer form as specified in subsection (E).
- G.** Effective date.
1. The owner of an on-site wastewater treatment facility operating under a Type 4 General Permit shall comply with this Section by November 12, 2005.
 2. The owner of any on-site wastewater treatment facility other than a facility identified in subsection (G)(1) shall comply with this Section by July 1, 2006.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2002 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-A317. Nitrogen Management Area**
- A.** The Director may designate a new Nitrogen Management Area to control groundwater pollution by sources of nitrogen regulated by Title 49, Chapter 2, Article 3 of the Arizona Revised Statutes and not covered under an individual permit, modify the boundaries or requirements of a Nitrogen Management Area, or rescind designation of a Nitrogen Management Area.
1. If existing conditions or trends in nitrogen loading to an aquifer will cause or contribute to an exceedance of the Aquifer Water Quality Standard for nitrate at a point or points of current or reasonably foreseeable use of the aquifer, the Director shall use the following criteria to determine whether to designate the area as a Nitrogen Management Area:
 - a. Population of the area;
 - b. The degree to which the area is unsewered;
 - c. Gross areal nitrogen loading, calculated as the amount of nitrogen discharged into the subsurface by use of on-site wastewater treatment facilities, divided by the land area under consideration for designation as a Nitrogen Management Area;
 - d. Population growth rate of area;
 - e. Existing contamination of groundwater by nitrogen species;
 - f. Existing and potential impact to groundwater by sources of nitrogen other than on-site wastewater treatment facilities;
 - g. Characteristics of the vadose zone and aquifer;
 - h. Location, number, and areal extent of existing and potential sources of nitrogen;
 - i. Location and characteristics of existing and potential drinking water supplies; and
 - j. Any other information relevant to determining the severity of actual or potential nitrogen impact on the aquifer.
 2. The Director may modify the boundaries or requirements of a Nitrogen Management Area or rescind designation of a Nitrogen Management Area based on:
 - a. A material change to one or more criterion specified in subsection (A)(1); or
 - b. The adoption by a local agency of a master plan to substantially sewer the area as soon as possible, but with a completion deadline within 10 years, unless a completion deadline of more than 10 years is approved by the Director.
- B.** Preliminary designation, modification, or rescission.
1. The Director shall provide a report to the mayors and members of the Board of Supervisors of all towns, cities, and counties and the directors of all sanitary districts affected by the Department's proposed action to designate, modify, or rescind a Nitrogen Management Area as follows:
 - a. If the Department proposes to designate a Nitrogen Management Area, the Department shall provide a report discussing each criterion specified in subsection (A)(1).
 - b. If the Department proposes to modify the boundaries or requirements of a Nitrogen Management Area or rescind the designation of a Nitrogen Management Area, the Department shall provide a report discussing applicable criteria in subsections (A)(1) and (2).
 2. The town, city, county, or sanitary district receiving the Director's report may provide written comments to the Department within 120 days to dispute the factual information presented in the report and supply any information supporting the comments.
 3. The Director shall evaluate the comments and supporting information obtained under subsection (B)(2) and either designate, modify, or rescind the Nitrogen Management Area or withdraw the proposal.
- C.** Final designation.
1. If the Director designates or modifies the Nitrogen Management Area, the Department shall:
 - a. Issue or modify the Nitrogen Management Area designation and any special provisions established for the area to control groundwater pollution by sources of nitrogen regulated by Title 49, Chapter 2, Article 3 of the Arizona Revised Statutes but not covered under an individual permit. The Department shall provide notice to the mayors and members of the Board of Supervisors of all towns, cities, and counties and the directors of all sanitary districts affected by the determination;
 - b. Maintain the designation and a map showing the boundaries of the Nitrogen Management Area at the Arizona Department of Environmental Quality, 1110 West Washington, Phoenix, Arizona 85007 and on the Department's web site at www.azdeq.gov; and
 - c. Provide, upon request, a copy of the Nitrogen Management Area designation and a map of the area.
 2. If the Director withdraws the preliminary Nitrogen Management Area designation or rescinds the Nitrogen Management Area designation, the Director shall issue a determination stating the decision and post it on the Department's web site at www.azdeq.gov.
- D.** Nitrogen Management Area requirements. Within a Nitrogen Management Area:
1. The Department shall issue a Construction Authorization, under R18-9-A301(D)(1)(c), for an on-site wastewater treatment facility only if the applicant proposes, in the Notice of Intent to Discharge, to employ one or more of the technologies allowed under R18-9-E302 through R18-9-E322 that achieves a discharge level containing not more than 15 mg/l of total nitrogen.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. An agricultural operation shall use the best control measure necessary to reduce nitrogen discharge when implementing the best management practices developed under 18 A.A.C. 9, Article 4. The Director may require the owner or operator to reassess the performance of the impoundment liner systems constructed under R18-9-403 before November 12, 2005.
3. A person shall comply with any special provision established for the Nitrogen Management Area, as applicable, for the person's facility.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

PART B. TYPE 1 GENERAL PERMITS**R18-9-B301. Type 1 General Permit**

- A. A 1.01 General Permit allows any discharge of wash water from a sand and gravel operation, placer mining operation, or other similar activity, including construction, foundation, and underground dewatering, if only physical processes are employed and only hazardous substances at naturally occurring concentrations in the sand, gravel, or other rock material are present in the discharge.
- B. A 1.02 General Permit allows any discharge from hydrostatic tests of a drinking water distribution system and pipelines not previously used, if all the following conditions are met:
 1. The quality of the water used for the test does not exceed an Aquifer Water Quality Standard or for non-drinking water pipelines, if reclaimed water is used, the reclaimed water meets Class A+ Reclaimed Water Quality Standards under A.A.C. R18-11-303 or Class B+ Reclaimed Water Quality Standards under A.A.C. R18-11-305;
 2. The discharge is not to a water of the United States, unless the discharge is under an AZPDES permit; and
 3. The test site is restored to its natural grade.
- C. A 1.03 General Permit allows any discharge from hydrostatic tests of a pipeline, tank, or appurtenance previously used for transmission of fluid, other than those previously used for drinking water distribution systems, if all the following conditions are met:
 1. All liquid discharge is contained in an impoundment lined with flexible geomembrane. The liquid is evaporated or removed from the impoundment and taken to a treatment works or landfill authorized to accept the material within:
 - a. 60 days of the hydrostatic test if the liner is 10 mils, or
 - b. 180 days of the hydrostatic test if the liner is 30 mils or greater;
 2. The liner is placed over a layer, at least 3 inches thick, of well-sorted sand or finer grained material, or over an underliner that provides protection equal to or better than sand or finer grained material and the calculated seepage is less than 550 gallons per acre per day;
 3. The liner is removed and disposed of at an approved landfill unless the liner can be reused at another test location without a reduction in integrity;
 4. The test site is restored to its natural grade; and
 5. If the test waters are removed using a method not specified in subsection (C)(1), including a discharge under an AZPDES permit, the test waters meet Aquifer Water Quality Standards and the specific method is approved by the Department before the discharge.
- D. A 1.04 General Permit allows any discharge from a facility that, for water quality sampling, hydrologic parameter testing, well development, redevelopment, or potable water system maintenance and repair purposes, receives water, drilling fluids, or drill cuttings from a well if the discharge is to the same aquifer in approximately the same location from which the water supply was originally withdrawn, or the discharge is under an AZPDES permit.
- E. A 1.05 General Permit allows a discharge to an injection well, surface impoundment, and leach line only if the discharge is filter backwash from a potable water treatment system, condensate from a refrigeration unit, overflows from an evaporative cooler, heat exchange system return water, or swimming pool filter backwash and the discharge is less than 1000 gallons per day. The 1.05 General Permit allows a discharge of those sources to a navigable water if the discharge is authorized by an AZPDES permit.
- F. A 1.06 General Permit allows the burial of mining industry off-road motor vehicle waste tires at the mine site in a manner consistent with the cover requirements in R18-13-1203.
- G. A 1.07 General Permit allows the operation of dockside facilities and watercraft if the following conditions are met:
 1. Docks that service watercraft equipped with toilets provide sanitary facilities at dockside for the disposal of sewage from watercraft toilets. No wastewater from sinks, showers, laundries, baths, or other plumbing fixtures at a dockside facility is discharged into waters of the state;
 2. Docks that service watercraft have conveniently located toilet facilities for men and women;
 3. No boat, houseboat, or other type of watercraft is equipped with a marine toilet constructed and operated to discharge sewage directly or indirectly into a water of the state, nor is any container of sewage placed, left, discharged, or caused to be placed, left, or discharged in or near any waters of the state by a person;
 4. Watercraft with marine toilets constructed to allow sewage to be discharged directly into waters of the state are locked and sealed to prevent usage. Chemical or other type marine toilets with approved storage containers are permitted if dockside disposal facilities are provided; and
 5. No bilge water or wastewater from sinks, showers, laundries, baths, or other plumbing fixtures on houseboats or other watercraft is discharged into waters of the state.
- H. A 1.08 General Permit allows for any earth pit privy, fixed or transportable chemical toilet, incinerator toilet or privy, or pail or can-type privy if allowed by a county health or environmental department under A.R.S. Title 36 or a delegation agreement under A.R.S. § 49-107.
- I. A 1.09 General Permit allows:
 1. The operation of:
 - a. A sewage treatment facility with flows less than 20,000 gallons per day and approved by the Department before January 1, 2001, and
 - b. An on-site wastewater treatment facility with flows less than 20,000 gallons per day operating before January 1, 2001;
 2. The person who owns or operates a facility under subsections (I)(1)(a) or (b) to operate the facility if the following conditions are met:
 - a. The discharge from the facility does not cause or contribute to a violation of a water quality standard;
 - b. The owner or operator does not expand the facility to accommodate flows above the design flow or 20,000 gallons per day, whichever is less;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. The facility only treats typical sewage;
 - d. The facility does not treat flows from commercial operations using hazardous substances or creating hazardous wastes, as defined in A.R.S. § 49-921(5);
 - e. The discharge from the facility does not create any environmental nuisance condition listed in A.R.S. § 49-141; or
 - f. The owner or operator does not alter the treatment or disposal characteristics of the original facility, except as allowed under R18-9-A309(A)(9)(a).
- J.** A 1.10 General Permit allows the operation of a sewage collection system installed before January 1, 2001 that serves downstream from the point where the daily design flow is 3000 gallons per day or that includes a manhole, force main, or lift station serving more than one dwelling regardless of flow, if:
- 1. The system complies with the performance standards in R18-9-E301(B),
 - 2. No sewage is released from the sewage collection system to the land surface, and
 - 3. The system is not operating under the 2.05 General Permit.
- K.** A 1.11 General Permit allows the operation of a sewage collection system that serves upstream from the point where the daily design flow is 3000 gallons per day to the building drains, or a single gravity sewer line conveying sewage from a building drain directly to an interceptor, lateral, or manhole, regardless of daily design flow, if all of the following are met:
- 1. The system does not cause or contribute to an exceedance of a water quality standard established in 18 A.A.C. 11, Articles 1 and 4;
 - 2. No sewage is released from the sewage collection system to the land surface;
 - 3. No environmental nuisance condition listed in A.R.S. § 49-141 is created;
 - 4. The system does not include a manhole, force main, or lift station serving more than one dwelling;
 - 5. Applicable local administrative requirements for review and approval of design and construction are followed;
 - 6. The performance standards specified in R18-9-E301(B) are met using:
 - a. Local building and construction codes,
 - b. Relevant design and construction standards specified in R18-9-E301, and
 - c. Appropriate operation and maintenance;
 - 7. The system flows directly into one of the following downstream facilities:
 - a. An on-site wastewater treatment facility;
 - b. A sewage treatment facility operating under an individual permit; or
 - c. A sewage collection system operating under a 1.10, 2.05, or 4.01 General Permit; and
 - 8. The system is not operating under a 2.05 General Permit.
- L.** A 1.12 General Permit allows the discharge of wastewater resulting from washing concrete from trucks, pumps, and ancillary equipment to an impoundment if the following conditions are met:
- 1. The person holds an AZPDES Construction General Permit authorizing the concrete washout activities;
 - 2. The Stormwater Pollution Prevention Plan required by the Construction General Permit issued according to 18 A.A.C. 9, Article 9, Part C, for the construction activity addresses the concrete washout activities;
 - 3. The vegetation at the soil base of the impoundment is cleared, grubbed, and compacted to uniform density not less than 95 percent. If the impoundment is located above grade, the berms or dikes are compacted to a uniform density not less than 95 percent;
 - 4. If groundwater is less than 20 feet below land surface, the impoundment is lined with a synthetic liner at least 30 mils thick;
 - 5. The impoundment is located at least 50 feet from any storm drain inlet, open drainage facility, or watercourse and 100 feet from any water supply well;
 - 6. The impoundment is designed and operated to maintain adequate freeboard to prevent overflow or discharge of wastewater;
 - 7. The concrete washout wastewater from any wash pad is routed to the impoundment;
 - 8. The impoundment receives only concrete washout wastewater;
 - 9. The annual average daily flow of wastewater to the impoundment is less than 3000 gallons per day; and
 - 10. The following closure requirements are met.
 - a. The facility is closed by removing and appropriately disposing of any liquids remaining in the impoundment,
 - b. The area is graded to prevent ponding of water, and
 - c. Closure activities are completed before filing of the Notice of Termination under the AZPDES Construction General Permit.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

PART C. TYPE 2 GENERAL PERMITS

R18-9-C301. 2.01 General Permit: Drywells That Drain Areas Where Hazardous Substances Are Used, Stored, Loaded, or Treated

- A.** A 2.01 General Permit allows for a drywell that drains an area where hazardous substances are used, stored, loaded, or treated.
- B.** Notice of Intent to Discharge. In addition to the requirements in R18-9-A301(B), an applicant shall submit:
- 1. The Department registration number for the drywell or documentation that a drywell registration form was submitted to the Department;
 - 2. For a drywell constructed more than 90 days before submitting the Notice of Intent to Discharge to the Department, a certification signed, dated, and sealed by an Arizona-registered professional engineer or geologist that a site investigation has concluded that:
 - a. Analytical results from sampling the drywell settling chamber sediment for pollutants reasonably expected to be present do not exceed either the residential soil remediation levels or the groundwater protection levels;
 - b. The settling chamber does not contain sediments that could be used to characterize and compare results to soil remediation levels and the chamber has not been cleaned out within the last six months;
 - c. Neither a soil remediation level nor groundwater protection level is exceeded in soil samples collected from a boring drilled within 5 feet of the drywell and sampled in 5-foot increments starting from 5 feet

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

below ground surface and extending to 10 feet below the base of the drywell injection pipe; or

- d. If coarse grained lithology prevents the collection of representative soil samples in a soil boring, a groundwater investigation demonstrates compliance with Aquifer Water Quality Standards in groundwater at the applicable point of compliance;
 3. Design information to demonstrate that the requirements in subsection (C) are satisfied; and
 4. A copy of the Best Management Practices Plan described in subsection (D)(5).
- C. Design requirements. An applicant shall:
1. Locate the drywell no closer than 100 feet from a water supply well and 20 feet from an underground storage tank;
 2. Clearly mark the drywell "Stormwater Only" on the surface grate or manhole cover;
 3. Locate the bottom of the drywell hole at least 10 feet above groundwater. If during drilling and well installation the drywell borehole encounters saturated conditions, the applicant shall backfill the borehole with cement grout to at least 10 feet above the elevation of saturated conditions before constructing the drywell in the borehole;
 4. Ensure that the drywell design or drainage area design includes a method to remove, intercept, or collect pollutants that may be present at the operation with the potential to reach the drywell. The applicant may include a flow control or pretreatment device, such as an interceptor, sump, or another device or structure designed to remove, intercept, or collect pollutants. The applicant may use flow control or pretreatment devices listed under R18-9-C304(D)(1) or (2) to satisfy the design requirements of this subsection;
 5. Record the accurate latitude and longitude of the drywell using a Global Positioning System device or site survey; and
 6. Develop and maintain a current site plan showing the location of the drywell, the latitude and longitude coordinates of the drywell, surface drainage patterns, the location of floor drains and French drains plumbed to the drywell, water supply wells, monitor wells, underground storage tanks, and chemical and waste usage, storage, loading, and treatment areas.
- D. Operational and maintenance requirements.
1. A permittee shall operate the drywell only for the disposal of stormwater. The permittee shall not release industrial process waters or wastes in the drywell or drywell retention basin drainage area.
 2. The permittee shall implement a Best Management Practices Plan for operation of the drywell and control of pollutants in the drywell drainage area.
 3. The permittee shall keep the Best Management Practices Plan on-site or at the closest practical place of work and provide the plan to the Department upon request.
 4. The permittee may substitute any Spill Prevention Containment and Control Plan, facility response plan, or an AZPDES Stormwater Pollution Prevention Plan that meets the requirements of this subsection for a Best Management Practices Plan. If the permittee submits a substitute for the Best Management Practices Plan, the permittee shall identify the conditions within the substitute plan that satisfy the requirements of subsection (D).
 5. The Best Management Practices Plan shall include:
 - a. A site plan showing surface drainage patterns and the location of floor drains, water supply, monitor wells, underground storage tanks, and chemical and waste usage, storage, loading, and treatment areas. The site plan shall show surface grading details designed to prevent drainage and spills of hazardous substances from leaving the drainage area and entering the drywell;
 - b. A design plan showing details of drywell design and drainage design, including flow control or pretreatment devices, such as interceptors, sumps, and other devices and structures designed to remove, intercept, and collect any pollutant that may be present at the operation with the potential to reach the drywell;
 - c. Procedures to prevent and contain spills and minimize discharges to the drywell;
 - d. Operational practices that include routine inspection and maintenance of the drywell and associated pretreatment and flow-control devices, periodic inspection of waste storage facilities, and proper handling of hazardous substances to prevent discharges to the drywell. Routine inspection and maintenance shall include:
 - i. Replacing the adsorbent material in the skimmers, if installed, when the adsorbent capacity is reached;
 - ii. Maintaining valves and associated piping for a drywell injection and treatment system;
 - iii. Maintaining magnetic caps and mats, if installed;
 - iv. Removing sludge from the oil/water separator, if installed, and replacing the filtration or adsorption material to maintain treatment capacity;
 - v. Removing sediment from the catch basin inlet filters and retention basin to maintain required storage capacity; and
 - e. Procedures for periodic employee training on practices required by the Best Management Practices Plan specific to the drywell and prevention of unauthorized discharges.
 6. The permittee shall implement waste management practices to prohibit and prevent discharges, other than those exempted in A.R.S. § 49-250(B)(23), in the drywell drainage area, including:
 - a. Maintaining an up-to-date inventory of generated wastes and waste products;
 - b. Disposing or recycling all wastes or solvents through a company licensed to handle the material;
 - c. Where possible, collecting and storing waste in waste receptacles located outside the drywell drainage area. If the permittee collects and stores the waste within the drywell drainage area, the permittee shall collect and store the waste in properly designed receptacles; and
 - d. Using a licensed waste hauler to transport waste off-site to a permitted waste disposal facility.
- E. Inspection. A permittee shall:
1. Conduct an annual inspection of the drywell for sediment accumulation in the chambers and the flow-control and treatment systems, and remove sediment annually or when 25 percent of the effective capacity is filled, whichever comes first, to restore capacity and ensure that the drywell functions properly. The permittee shall character-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- ize the sediments that are removed from the drywell after inspection and dispose of the sediments according to local, state, and federal requirements; and
2. If the stormwater fails to drain through the drywell within 36 hours, inspect the treatment system and piping to ensure that the treatment system is functioning properly, make repairs, and perform maintenance as needed to restore proper function.
- F. Recordkeeping.** A permittee shall maintain for at least 10 years, the following documents on-site or at the closest place of work and make the documents available to the Department upon request:
1. Documentation of drywell maintenance, inspections, employee training, and sampling activities;
 2. A site plan showing the location of the drywell, the latitude and longitude coordinates of the drywell, surface drainage patterns and the location of floor drains or French drains that are plumbed to the drywell or are used to alter drainage patterns, the location of water supply wells, monitor wells, underground storage tanks, and places where hazardous substances are used, stored, or loaded;
 3. A design plan showing details of drywell design and drainage design, including any flow control and pretreatment technologies;
 4. An operations and maintenance manual that includes:
 - a. Procedures to prevent and contain spills and minimize any discharge to the drywell and a list of actions and methods proposed to prevent and contain hazardous substance spills or leaks;
 - b. Methods and procedures for inspection, operation, and maintenance activities;
 - c. Procedures for spill response; and
 - d. A description of the employee training program for drywell inspections, operations, maintenance, and waste management practices;
 5. Drywell sediment waste characteristics and disposal manifest records for sediments removed during routine inspections and maintenance activities; and
 6. Sampling plans, certified laboratory reports, and chain of custody forms for soil, sediment, and groundwater sampling associated with drywell site investigations.
- G. Spills.**
1. In the event of a spill, the permittee shall:
 - a. Notify the Department within 24 hours of any spill of hazardous or toxic substance that enters the drywell inlet;
 - b. Contain, clean up, and dispose of, according to local, state, and federal requirements, any spill or leak of a hazardous substance in the drywell drainage area and basin drainage area;
 - c. If a pretreatment system is present, verify that treatment capacity has not been exceeded; and
 - d. If the spill reaches the drywell injection pipe, drill a soil boring within 5 feet of the drywell inlet chamber and sample the soil in 5-foot increments from 5 feet below ground surface to a depth extending at least 10 feet below the base of the injection pipe to determine whether a soil remediation level or groundwater protection level has been exceeded in the subsurface. The permittee shall:
 - i. Submit the results to the Department within 60 days of the date of the spill; and
 - ii. Notify the Department if soil contamination at the facility, not related to the spill, is being addressed by an existing approved remedial action plan.
 2. Based on the results of subsection (G)(1)(d), the Director may require the permittee to submit an application for clean closure or an individual Aquifer Protection Permit.
- H. Closure and decommissioning requirements.**
1. A permittee shall:
 - a. Retain a drywell drilling contractor, licensed under 4 A.A.C. 9, to close the drywell;
 - b. Remove sediments and any drainage component, such as standpipes and screens from the drywell's settling chamber and backfill the injection pipe with cement grout;
 - c. Remove the settling chamber;
 - d. Backfill the settling chamber excavation to the land surface with clean silt, clay, or engineered material. Materials containing hazardous substances are prohibited from use in backfilling the drywell; and
 - e. Mechanically compact the backfill.
 2. Within 30 days of closure and decommissioning, the permittee shall submit a written verification to the Department that all material that contributed to a discharge has been removed and any reasonable probability of further discharge from the facility and of exceeding any Aquifer Water Quality Standard at the applicable point of compliance has been eliminated to the greatest degree practical. The written verification shall specify:
 - a. The reason for the closure;
 - b. The drywell registration number;
 - c. The general permit reference number;
 - d. The materials and methods used to close the drywell;
 - e. The name of the contractor who performed the closure;
 - f. The completion date;
 - g. Any sampling data;
 - h. Sump construction details, if a sump was constructed to replace the abandoned drywell; and
 - i. Any other information necessary to verify that closure has been achieved.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-C302. 2.02 General Permit: Intermediate Stockpiles at Mining Sites

- A.** A 2.02 General Permit allows for intermediate stockpiles not qualifying as inert material under A.R.S. § 49-201(19) at a mining site.
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge under R18-9-A301(B), an applicant shall submit the construction and operation specifications used to satisfy the requirements in subsection (C)(1).
- C. Design and operational requirements.**
1. An applicant shall design, construct, and operate the stockpile so that it does not impound water. An applicant may rely on stormwater run-on controls or facility design features, such as drains, or both.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. An applicant shall direct storm runoff contacting the stockpile to a mine pit or a facility covered by an individual or general permit.
 3. A permittee shall maintain any engineered feature of the facility in good working condition.
 4. A permittee shall visually inspect the facility at least quarterly and repair any defect as soon as practical.
 5. A permittee shall not add hazardous substances to the stockpiled material.
- D. Closure requirements.** In addition to the closure requirements in R18-9-A306, the following apply:
1. If an intermediate stockpile covered under a 2.02 General Permit is permanently closed, a permittee shall remove any remaining material, to the greatest extent practical, and regrade the area to prevent impoundment of water.
 2. The permittee shall submit a narrative description of closure measures to the Department within 30 days after closure.
- Historical Note**
New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-C303. 2.03 General Permit: Hydrologic Tracer Studies**
- A.** A 2.03 General Permit allows for a discharge caused by the performance of tracer studies.
1. The 2.03 General Permit does not authorize the use of any hazardous substance, radioactive material, or any substance identified in A.R.S. § 49-243(I) in a tracer study.
 2. A permittee shall complete a single tracer test within two years of the Notice of Intent to Discharge.
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
1. A narrative description of the tracer test including the type and amount of tracer used;
 2. A Material Safety Data Sheet for the tracer; and
 3. Unless the injection or distribution is within the capture zone of an established passive containment system meeting the requirements of A.R.S. § 49-243(G), the following information:
 - a. A narrative description of the impacts that may occur if a solution migrates outside the test area, including a list of downgradient users, if any;
 - b. The anticipated effects and expected concentrations, if possible to calculate; and
 - c. A description of the monitoring, including types of tests and frequency.
- C.** Design and operational requirements. A permittee shall:
1. Ensure that injection into a well inside the capture zone of an established passive containment system that meets the requirements of A.R.S. § 49-243(G) does not exceed the total depth of the influence of the hydrologic sink;
 2. Ensure that injection into a well outside the capture zone of an established passive containment system that meets the requirements of A.R.S. § 49-243(G) does not exceed rock fracture pressures during injection of the tracer;
 3. Not add a substance to a well that is not compatible with the well's construction;
 4. Ensure that a tracer is compatible with the construction materials at the impoundment if a tracer is placed or collected in an existing impoundment;
 5. For at least two years, monitor quarterly a well that is hydraulically downgradient of the test site for the tracer if a tracer is used outside the capture zone of an established passive containment system that meets the requirements of A.R.S. § 49-243(G) and less than 85 percent of the tracer is recovered. The permittee may adjust this period with the consent of the Department if the permittee shows that the hydraulic gradient causes the tracer to reach the monitoring point in a shorter or longer period of time;
 6. Ensure that a tracer does not leave the site in concentrations distinguishable from background water quality; and
 7. Monitor the amount of tracer used and recovered and submit a report summarizing the test and results to the Department within 30 calendar days of test completion.
- D.** Recordkeeping. A permittee shall retain the following information at the site where the facility is located for at least three years after test completion and make it available to the Department upon request.
1. Test protocols,
 2. Material Safety Data Sheet information,
 3. Recovery records, and
 4. A copy of the report submitted to the Department under subsection (C)(7).
- E.** Closure requirements.
1. If a tracer was used outside the capture zone of an established passive containment system that meets the requirements of A.R.S. § 49-243(G), a permittee shall account for any tracer not recovered through attenuation, modeling, or monitoring.
 2. The permittee shall achieve closure immediately following the test, or if the test area is within a pollutant management area defined in an individual permit, at the conclusion of operations.
- Historical Note**
New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-C304. 2.04 General Permit: Drywells that Drain Areas at Motor Fuel Dispensing Facilities Where Motor Fuels are Used, Stored, or Loaded**
- A.** A 2.04 General Permit allows for a drywell that drains an area at a facility for dispensing motor fuel, as defined in A.A.C. R20-2-701(19), including a commercial gasoline station with an underground storage tank.
1. A drywell at a motor fuel dispensing facility using hazardous substances is eligible for coverage under the 2.04 General Permit.
 2. A drywell at a vehicle maintenance facility owned or operated by a commercial enterprise or by a federal, state, county, or local government is not eligible for coverage under this general permit, unless the facility design ensures that only motor fuel dispensing areas will drain to the drywell. Areas where hazardous substances other than motor fuels are used, stored, or loaded, including service bays, are not covered under the 2.04 General Permit.
 3. Definition. For purposes of this Section, "hazardous substances" means substances that are components of commercially packaged automotive supplies, such as motor oil, antifreeze, and routine cleaning supplies such as those

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

used for cleaning windshields, but not degreasers, engine cleaners, or similar products.

- B. Notice of Intent to Discharge.** In addition to the requirements in R18-9-A301(B), an applicant shall submit:
1. The Department registration number for the drywell or documentation that a drywell registration form was submitted to the Department;
 2. For a drywell constructed more than 90 days before submitting the Notice of Intent to Discharge to the Department, a certification signed, dated, and sealed by an Arizona-registered professional engineer or geologist that a site investigation concluded that:
 - a. Analytical results from sampling sediment from the drywell settling chamber sediment for pollutants reasonably expected to be present do not exceed either the residential soil remediation levels or the groundwater protection levels;
 - b. The settling chamber does not contain sediment that could be used to characterize and compare results to soil remediation levels and the chamber has not been cleaned out within the last six months;
 - c. Neither a soil remediation level nor groundwater protection level is exceeded in soil samples collected from a boring drilled within 5 feet of the drywell and sampled in 5 foot increments starting at a depth of 5 feet below ground surface and extending to a depth of 10 feet below the base of the drywell injection pipe; or
 - d. If coarse grained lithology prevents the collection of soil samples in a soil boring, a groundwater investigation demonstrates compliance with Aquifer Water Quality Standards in groundwater at the applicable point of compliance.
 3. Design information to demonstrate that the requirements in subsection (C) are satisfied.
- C. Design requirements.**
1. An applicant shall:
 - a. Include a flow control or pretreatment device identified in subsections (D)(1) or (2), or both, that removes, intercepts, or collects spilled motor fuel or hazardous substances before stormwater enters the drywell injection pipe;
 - b. Calculate the volume of runoff generated in the design storm event and anticipate the maximum potential contaminant release quantity to design the treatment and holding capacity of the drywell;
 - c. Follow local codes and regulations to meet retention periods for removing standing water;
 - d. Locate the drywell at least 100 feet from a water supply well and 20 feet from an underground storage tank;
 - e. Locate the bottom of the drywell injection pipe at least 10 feet above groundwater. If during drilling and well installation the drywell borehole encounters saturated conditions, the applicant shall backfill the borehole with cement grout to a level at least 10 feet above the elevation at which saturated conditions were encountered in the borehole before constructing the drywell in the borehole;
 - f. Record the accurate latitude and longitude of the drywell using a Global Positioning System device or site survey and record the location on the site plans;
 - g. Clearly mark the drywell "Stormwater Only" on the surface grate or manhole cover;
 - h. Develop and maintain a current site plan showing the location of the drywell, the latitude and longitude coordinates of the drywell, surface drainage patterns and the location of floor drains and French drains that are plumbed to the drywell or are used to alter drainage patterns, water supply wells, monitor wells, underground storage tanks, and chemical and waste usage, storage, loading, and treatment areas; and
 - i. Prepare design plans showing details of drywell design and drainage design, including one or a combination of pre-approved technologies described in subsections (D)(1) and (2) designed to remove, intercept, and collect any pollutant that may be present at the operation with the potential to reach the drywell.
2. For an existing drywell, an applicant that cannot meet the design requirements in subsections (C)(1)(d) and (e) shall provide the Department with the date of drywell construction, the depth of the drywell borehole and injection pipe, the distance from the drywell to the nearest water supply well and from the drywell to the underground storage tank, and the depth to the groundwater from the bottom of the drywell injection pipe.
- D. Flow control and pretreatment.** A permittee shall ensure that motor fuels and other hazardous substances are not discharged to the subsurface. A permittee may use any of the following flow control or pretreatment technologies:
1. Flow control. The permittee shall ensure that motor fuel and hazardous substance spills are removed before allowing stormwater to enter the drywell.
 - a. Normally closed manual or automatic valve. The permittee shall leave a normally closed valve in a closed position except when stormwater is allowed to enter the drywell;
 - b. Raised drywell inlet. The permittee shall:
 - i. Raise the drywell inlet at least six inches above the bottom of the retention basin or other storage structure, or install a six-inch asphalt or concrete raised barrier encircling the drywell inlet to provide a non-draining storage capacity within the retention basin or storage structure for complete containment of a spill; and
 - ii. Ensure that the storage capacity is at least 110 percent of the volume of the design storm event required by the local jurisdiction and the estimated volume of a potential motor fuel spill based on the facility's past incident reports or incident reports for other facilities that are similar in design;
 - c. Magnetic mat or cap. The permittee shall ensure that the drywell inlet is sealed with a mat or cap at all times, except after rainfall or a storm event when the mat or cap is temporarily removed to allow stormwater to enter the drywell; and that the mat or cap is always used with a retention basin or other type of storage;
 - d. Primary sump, interceptor, or settling chamber. The permittee may use a primary sump, interceptor, or settling chamber only in combination with another flow control or pre-treatment technology.
 - i. The permittee shall remove motor fuel or hazardous substances from the sump, interceptor,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- or chamber before allowing stormwater to enter the drywell.
- ii. The permittee shall install a settling chamber or sump and allow the suspended solids to settle before stormwater flows into a drywell; install the drywell injection pipe in a separate chamber and connect the sump, interceptor, or chamber to the drywell inlet by piping and valving to allow the stormwater to enter the drywell.
 - iii. The permittee may install fuel hydrocarbon detection sensors in the sump, interceptor, or settling chamber that use flow control to prevent fuel from discharging into the drywell;
2. Pretreatment. The permittee shall prevent the bypass of motor fuels and hazardous substances from the pretreatment system to the drywell during periods of high flow.
 - a. Catch basin inlet filter. The permittee shall:
 - i. Install a catch basin inlet filter to fit inside a catchment drain to prevent motor fuels and hazardous substances from entering the drywell,
 - ii. Ensure that a motor fuel spill or a spill during a high rainfall does not bypass the system and directly release to the drywell injection pipe, and
 - iii. Combine the catch basin inlet filter with a flow control technology to prevent contaminated stormwater from entering the drywell injection pipe;
 - b. Combined settling chamber and an oil/water separator.
 - i. The permittee shall install a system that incorporates a catch basin inlet, a settling chamber, and an oil/water separator.
 - ii. The permittee may incorporate a self-sealing mechanism, such as fuel hydrocarbon detection sensors that activate a valve to cut off flow to the drywell inlet.
 - c. Combined settling chamber and oil/water separator, and filter/adsorption. The permittee shall:
 - i. Allow for adequate collection and treatment capacity for solid and liquid separation; and
 - ii. Allow a minimum treated outflow from the system to the drywell inlet of 20 gallons per minute. If a higher outflow rate is anticipated, the applicant shall design a larger collection system with storage capacity.
 - d. Passive skimmer.
 - i. If a passive skimmer is used, the permittee shall install sufficient hydrocarbon adsorbent materials, such as pads and socks, or suspend the materials on top of the static water level in a sump or other catchment to absorb the entire volume of expected or potential spill.
 - ii. The permittee may use a passive skimmer only in combination with another flow control or pre-treatment technology.
- E. Operation and maintenance.** A permittee shall:
1. Operate the drywell only for the subsurface disposal of stormwater;
 2. Remove or treat any motor fuel or hazardous substance spills;
 3. Replace the adsorbent material in skimmers, if installed; when the adsorbent capacity is reached;
 4. Maintain valves and associated piping;
 5. Maintain magnetic caps and mats, if installed;
 6. Remove sludge from the oil/water separator and replace the filtration or adsorption materials to maintain treatment capacity;
 7. Remove sediment from the catch basin inlet filters and retention basins to maintain required storage capacity;
 8. Remove accumulated sediment from the settling chamber annually or when 25 percent of the effective settling capacity is filled, whichever occurs first; and
 9. Provide new employee training within one month of hire and annual employee training on how to maintain and operate flow control and pretreatment technology used in the drywell.
- F. Inspection.** A permittee shall:
1. Conduct an annual inspection of the drywell for sediment accumulation in the chambers and in the flow control and treatment systems to ensure that the drywell is functioning properly; and
 2. If the stormwater fails to drain through the drywell within 36 hours, inspect the treatment system and piping to ensure that it is functioning properly, make repairs, and perform maintenance as needed to restore proper function.
- G. Recordkeeping.** A permittee shall maintain, for at least 10 years, the following documents on-site or at the closest place of work and make the documents available to the Department upon request:
1. Documentation of drywell maintenance, inspections, employee training, and sampling activities;
 2. A site plan showing the location of the drywell, the latitude and longitude coordinates of the drywell, surface drainage patterns and the location of floor drains or French drains that are plumbed to the drywell or are used to alter drainage patterns, water supply wells, monitor wells, underground storage tanks, and places where motor fuel and hazardous substances are used, stored, or loaded;
 3. A design plan showing details of drywell design and drainage design, including one or a combination of the pre-approved flow control and pretreatment technologies;
 4. An operations and maintenance manual that includes:
 - a. Procedures to prevent and contain spills and minimize any discharge to the drywell and a list of actions and specific methods proposed for motor fuel and hazardous substance spills or leaks;
 - b. Methods and procedures for inspection, operation, and maintenance activities;
 - c. Procedures for spill response; and
 - d. A description of the employee training program for drywell inspections, operations, and maintenance;
 5. Drywell sediment waste characterization and disposal manifest records for sediments removed during routine inspections and maintenance activities; and
 6. Sampling plans, certified laboratory reports, and chain of custody forms for soil, sediment, and groundwater sampling associated with drywell site investigations.
- H. Spills.**
1. In the event of a spill, a permittee shall:
 - a. Notify the Department within 24 hours of any spill of motor fuel or hazardous or toxic substances that enters into the drywell inlet;
 - b. Contain, clean up, and dispose of, according to local, state, and federal requirements, any spill or leak of

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

motor fuel or hazardous substance in the drywell drainage area and basin drainage area;

- c. If a pretreatment system is present, verify that treatment capacity has not been exceeded; and
- d. If the spill reaches the injection pipe, drill a soil boring within 5 feet of the drywell inlet chamber and sample in 5-foot increments from 5 feet below ground surface to a depth extending at least 10 feet below the base of the injection pipe to determine whether a soil remediation level or groundwater protection level has been exceeded in the subsurface. The permittee shall:
 - i. Submit the results to the Department within 60 days of the date of the spill; and
 - ii. Notify the Department if soil contamination at the facility, not related to the spill, is being addressed by an existing approved remedial action plan.

- 2. The Director may, based on the results of subsection (H)(1)(d), require the permittee to submit an application for clean closure or an individual Aquifer Protection Permit.

I. Closure and decommissioning requirements.

- 1. A permittee shall:
 - a. Retain a drywell drilling contractor, licensed under 4 A.A.C. 9, to close the drywell;
 - b. Remove sediments and any drainage component, such as standpipes and screens from the drywell's settling chamber and backfill the injection pipe with cement grout;
 - c. Remove the settling chamber;
 - d. Backfill the settling chamber excavation to the land surface with clean silt, clay, or engineered material. A permittee shall not use materials containing hazardous substances in backfilling the drywell; and
 - e. Mechanically compact the backfill.
- 2. Within 30 days of closure and decommissioning, the permittee shall submit a written verification to the Department that all material that contributed to a discharge has been removed and any reasonable probability of further discharge from the facility and of exceeding any Aquifer Water Quality Standard at the applicable point of compliance has been eliminated to the greatest degree practical. The written verification shall specify:
 - a. The reason for the closure;
 - b. The drywell registration number;
 - c. The general permit reference number;
 - d. The materials and methods used to close the drywell;
 - e. The name of the contractor who performed the closure;
 - f. The completion date;
 - g. Any sampling data;
 - h. Sump construction details, if a sump was constructed to replace the abandoned drywell; and
 - i. Any other information necessary to verify that closure has been achieved.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 4096, effective September 15, 2002 (Supp. 02-3). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

Operation, and Maintenance of a Sewage Collection System

- A. Definition.** For purposes of this Section, "imminent and substantial threat to public health or the environment" means when:
- 1. The volume of a release is more than 2000 gallons; or
 - 2. The volume of a release is more than 50 gallons but less than 2000 gallons and any one of the following apply:
 - a. The release entered onto a recognized public area and members of the public were present during the release or before the release was mitigated;
 - b. The release occurred on a public or private street and pedestrians were at risk of being splashed by vehicles during the release or before the release was mitigated;
 - c. The release entered a perennial stream, an intermittent stream during a time of flow, a waterbody other than an ephemeral stream, a normally dry detention or sedimentation basin, or a drywell;
 - d. The release occurred within an occupied building due to a condition in the permitted sewage collection system; or
 - e. The release occurred within 100 feet of a school or a public or private drinking water supply well.
- B. A 2.05 General Permit allows a permittee to manage, operate, and maintain a sewage collection system under the terms of a CMOM Plan that complies with subsection (D). The Department considers a sewage collection system operating in compliance with an AZPDES permit that incorporates provisions for capacity, management, operation, and maintenance of the system to comply with the provisions of the 2.05 General Permit regardless of whether a Notice of Intent to Discharge for the system was submitted to the Department.**
- C. Notice of Intent to Discharge.** In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
- 1. The name and ownership of any downstream sewage collection system and sewage treatment facility that receives sewage from the applicant's sewage collection system;
 - 2. A map of the service area for which general permit coverage is sought, showing streets and sewage service boundaries for the sewage collection system;
 - 3. A statement indicating that the CMOM Plan is in effect and the principal officer or ranking elected official of the sewage collection system has approved the plan; and
 - 4. A statement indicating whether a local ordinance requires an on-site wastewater treatment facility to hookup to the sewage collection system.
- D. CMOM Plan.**
- 1. A permittee shall continuously implement a CMOM Plan for the sewage collection system under the permittee's ownership, management, or operational control. The CMOM Plan shall include information to comply with subsection (E)(1) and instructions on:
 - a. How to properly manage, operate, and maintain all parts of the sewage collection system that are owned or managed by the permittee or under the permittee's operational control, to meet the performance requirements in R18-9-E301(B);
 - b. How to maintain sufficient capacity to convey the base flows and peak wet weather flow of a 10-year, 24-hour storm event for all parts of the collection system owned or managed by the permittee or under the permittee's operational control;

R18-9-C305. 2.05 General Permit: Capacity, Management,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. All reasonable and prudent steps to minimize infiltration to the sewage collection system;
 - d. All reasonable and prudent steps to stop all releases from the collection system owned or managed by the permittee or under the permittee's operational control; and
 - e. The procedure for reporting releases described in subsection (F).
2. The permittee shall maintain and update the CMOM Plan for the duration of this general permit and make it available for Department and public review.
 3. If the Department requests the CMOM Plan and upon review finds that the CMOM Plan is deficient, the Department shall:
 - a. Notify the permittee in writing of the specific deficiency and the reason for the deficiency, and
 - b. Establish a deadline of at least 60 days to allow the permittee to correct the deficiency and submit the amended provision to the Department for approval.
- E. Sewage release response determination.** If the sewage collection system releases sewage, the Director shall consider any of the following factors in determining compliance:
1. Sufficiency of the CMOM Plan.
 - a. The level of detail provided by the CMOM Plan is appropriate for the size, complexity, and age of the system;
 - b. The level of detail provided by the CMOM Plan is appropriate considering geographic, climatic, and hydrological factors that may influence the sewage collection system;
 - c. The CMOM Plan provides schedules for the periodic preventative maintenance of the sewage collection system, including cleaning of all reaches of the sewage collection system below a specified pipe diameter.
 - i. The CMOM Plan may allow inspection of sewer lines by Closed Circuit Television (CCTV) and postponement of cleaning to the next scheduled cleaning cycle if the CCTV inspection indicated that cleaning of a reach of the sewer is not needed.
 - ii. The CMOM Plan may specify inspection and cleaning schedules that differ according to pipe diameter or other characteristics of the sewer;
 - d. The CMOM Plan identifies components of the sewage collection system that have insufficient capacity to convey, when properly maintained, the peak wet weather flow of a 10-year, 24-hour storm event. For those identified components, a capital improvement plan exists for achieving sufficient wet weather flow capacity within ten years of the effective date of permit coverage;
 - e. The CMOM Plan includes an overflow emergency response plan appropriate to the size, complexity, and age of the sewage collection system considering geographic, climatic, and hydrological factors that may influence the system;
 - f. The CMOM Plan establishes a procedure to investigate and enforce against any commercial or industrial entity whose flows to the sewage collection system have caused or contributed to a release;
 - g. The CMOM Plan adequately addresses management of flows from upstream sewage collection systems not under the ownership, management, or operational control of the permittee; or
 - h. Any other factor necessary to determine if the CMOM Plan is sufficient;
2. Compliance with the CMOM Plan.
 - a. The permittee's response to releases as established in the overflow emergency response plan, including whether:
 - i. Maintenance staff responds to and arrive at the release within the time period specified in the plan;
 - ii. Maintenance staff follow all written procedures to remove the cause of the release;
 - iii. Maintenance staff contain, recover, clean up, disinfect, and otherwise mitigate the release of sewage; and
 - iv. Required notifications to the Department, public health agencies, drinking water suppliers, and the public are provided;
 - b. The permittee's activities and timeliness in:
 - i. Implementing specified periodic preventative maintenance measures;
 - ii. Implementing the capital improvement plan; and
 - iii. Investigating and enforcing against an upstream sewage collection system, not under the ownership and operational control of the permittee, if those systems are impediments to the proper management of flows in the permittee's sewage collection system; or
 - c. Any other factor necessary to determine CMOM Plan compliance;
 3. Compliance with the reporting requirements in subsection (F) and the public notice requirements in subsection (G); or
 4. The release substantially endangers public health or the environment.
- F. Reporting requirements.**
1. Sewage releases.
 - a. A permittee shall report to the Department, by telephone, facsimile, or on the applicable notification form on the Department's Internet web site, any release that is an imminent and substantial threat to public health or the environment as soon as practical, but no later than 24 hours of becoming aware of the release.
 - b. A permittee shall submit a report to the Department within five business days after becoming aware of a release that is an imminent and substantial threat to public health or the environment. The report shall include:
 - i. The location of the release;
 - ii. The sewage collection system component from which the release occurred;
 - iii. The date and time the release began, was stopped, and when mitigation efforts were completed;
 - iv. The estimated number of persons exposed to the release, the estimated volume of sewage released, the reason the release is considered an imminent and substantial threat to public health or the environment if the volume is 2000 gallons or less, and where the release flowed;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- v. The efforts made by the permittee to stop, contain, and clean up the released material;
- vi. The amount and type of disinfectant applied to mitigate any associated public health or environmental risk; and
- vii. The cause of the release or effort made to determine the cause and any effort made to help prevent a future reoccurrence.

2. Annual report. The permittee shall:

- a. Submit an annual report to the Department post-marked no later than March 1. The report shall:
 - i. Tabulate all releases of more than 50 gallons from the permitted sewage collection system;
 - ii. Provide the date of any release that is an imminent and substantial threat to public health or the environment; and
 - iii. For other reportable releases under subsection (F)(2)(a)(i), provide the information in subsection (F)(1)(b);
- b. Provide an amended map of the service area boundaries if, during the calendar year, any area was removed from the service area or if any area was added to the service area that the permittee wishes to include under the 2.05 General Permit and associated CMOM Plan.

G. Public notice. The permittee shall:

- 1. Post a notice, in a format approved by the Department, at any location where there were more than three reportable releases under subsection (F)(2)(a) from the sewage collection system during any 12-month period,
- 2. Include within the notice a warning that identified the releases or potential releases at the location and potential health hazards from any release,
- 3. Post the notice at a place where the public is likely to come in contact with the release, and
- 4. Maintain the postings until no releases from the location are reported for at least 12 months from the last release and the permittee followed all actions specified in the CMOM Plan to prevent releases at that location during the period.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-C306. 2.06 General Permit: Fish Hatchery Discharge to a Perennial Surface Water

- A. A 2.06 General Permit allows a fish hatchery to discharge to a perennial surface water if Aquifer Water Quality Standards are met at the point of discharge and the fish hatchery is operating under a valid AZPDES permit.
- B. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall provide:
 - 1. The applicable AZPDES permit number;
 - 2. A description of the facility; and
 - 3. A laboratory report characterizing the wastewater discharge, including the analytical results for all numeric Aquifer Water Quality Standards under R18-11-406.
- C. Design and operational requirements. An applicant shall:
 - 1. Collect a representative sample of the discharge to demonstrate compliance with all numeric Aquifer Water Quality Standards and make the results available to the Department upon request, and

- 2. Maintain a record of the average and daily flow rates and make it available to the Department upon request.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

PART D. TYPE 3 GENERAL PERMITS

R18-9-D301. 3.01 General Permit: Lined Impoundments

- A. A 3.01 General Permit allows a lined surface impoundment and a lined secondary containment structure. A permittee shall:
 - 1. Ensure that inflow to the lined surface impoundment or lined secondary containment structure does not contain organic pollutants identified in A.R.S. § 49-243(I);
 - 2. Ensure that inflow to the lined surface impoundment or lined secondary containment structure is from one or more of the following sources:
 - a. Evaporative cooler overflow, condensate from a refrigeration unit, or swimming pool filter backwash;
 - b. Wastewater that does not contain sewage, temporarily stored for short periods of time due to process upsets or rainfall events, provided the wastewater is promptly removed from the facility as required under subsection (D)(5). Facilities that continually contain wastewater as a normal function of facility operations are not covered under this general permit;
 - c. Stormwater runoff that is not permitted under A.R.S. § 49-245.01 because the facility does not receive solely stormwater or because the runoff is regulated but not considered stormwater under the Clean Water Act;
 - d. Emergency fire event water;
 - e. Wastewater from air pollution control devices at asphalt plants if the wastewater is routed through a sedimentation trap or sump and an oil/water separator before discharge;
 - f. Non-contact cooling tower blowdown and non-contact cooling water, except discharges from electric generating stations with more than 100 megawatts generating capacity;
 - g. Boiler blowdown;
 - h. Wastewater derived from a potable water treatment system, including clarification sludge, filtration backwash, lime and lime-softening sludge, ion exchange backwash, and reverse osmosis spent waste;
 - i. Wastewater from food washing;
 - j. Heat exchanger return water;
 - k. Wastewater from industrial laundries;
 - l. Hydrostatic test water from a pipeline, tank, or appurtenance previously used for transmission of fluid;
 - m. Wastewater treated through an oil/water separator before discharge; and
 - n. Cooling water or wastewater from food processing.
- B. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
 - 1. A listing and description of all sources of inflow;
 - 2. A representative chemical analysis of each expected source of inflow. If a sample is not available before facility construction, a permittee shall provide the chemical

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

analysis of each inflow to the Department within 60 days of each inflow to the facility;

3. A narrative description of how the conditions of this general permit are satisfied. The narrative shall include a Quality Assurance/Quality Control program for liner installation, impoundment maintenance and repair, and impoundment operational procedures; and
 4. A contingency plan that specifies actions proposed in case of an accidental release from the facility, overtopping of the impoundment, breach of the berm, or unauthorized inflows into the impoundment or containment structure.
- C. Design and installation requirements. An applicant shall:
1. Design and construct surface water controls to:
 - a. Ensure that the impoundment or secondary containment structure maintains, using design volume or mechanical systems, normal operating volumes, if any, and any inflow from the 100-year, 24-hour storm event. The facility shall maintain at least 2 feet of freeboard or an alternative level of freeboard that the applicant demonstrates is reasonable, considering the size of the impoundment and meteorologic and other site-specific factors; and
 - b. Direct any surface water run-on from the 100-year 24-hour storm event around the facility if not intended for capture by facility;
 2. Ensure that the facility design accommodates any significant geologic hazard, addressing static and seismic stability. The applicant shall document any design adjustments made for this reason in the Notice of Intent to Discharge;
 3. Ensure that site preparation includes, as appropriate, clearing the area of vegetation, grubbing, grading, and embankment and subgrade preparation. The applicant shall ensure that supporting surface slopes and foundation are stable and structurally sound; and
 4. Comply with the following impoundment lining requirements:
 - a. If a synthetic liner is used, ensure that the liner is at least a 30-mil geomembrane liner or a 60-mil liner if High Density Polyethylene, or an alternative, that the liner's calculated seepage rate is less than 550 gallons per acre per day, and:
 - i. Anchor the liner by securing it in an engineered anchor trench;
 - ii. Ensure that the liner is ultraviolet resistant if it is regularly exposed to sunlight; and
 - iii. Ensure that the liner is constructed of a material that is chemically compatible with the wastewater or impounded solution and is not affected by corrosion or degradation;
 - b. If a soil liner is used:
 - i. Ensure that it resists swelling, shrinkage, and cracking and that the liner's calculated seepage rate is less than 550 gallons per acre per day;
 - ii. Ensure that the soil is at least 1-foot thick and compacted to a uniform density of 95 percent to meet the "Standard Test Method for Laboratory Compaction Characteristics of Soil Using Standard Effect (12,400 ft-lbf/ft³, D698-00ae1," (2000) published by the American Society for Testing and Materials. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959; and
 - iii. Upon installation, protect the soil liner to prevent desiccation; and
- c. For new facilities, develop and implement a construction Quality Assurance/Quality Control program that addresses site and subgrade preparation, inspection procedures, field testing, laboratory testing, and final inspection after construction of the liner to ensure functional integrity.
- D. Operational requirements. A permittee shall:
1. Maintain sufficient freeboard to manage the 100-year, 24-hour storm event including at least 2 feet of freeboard under normal operating conditions. Management of the 100-year, 24-hour storm event may be through design, pumping, or a combination of both;
 2. Remove accumulated residues, sediments, debris, and vegetation to maintain the integrity of the liner and the design capacity of the impoundment;
 3. Perform and document a visual inspection for damage to the liner and for accumulation of residual material at least monthly. The operator shall conduct an inspection within 72 hours after the facility receives a significant volume of stormwater inflow;
 4. Repair damage to the liner by following the Quality Assurance/Quality Control Plan required under subsection (B)(3); and
 5. Remove all inflow from the impoundment as soon as practical, but no later than 60 days after a temporary event, for facilities designed to contain inflow only for temporary events, such as process upsets.
- E. Recordkeeping. A permittee shall maintain at the site, the following information for at least 10 years and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available;
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure;
 3. Capacity design criteria;
 4. A list of standard operating procedures;
 5. The construction Quality Assurance/Quality Control program documentation; and
 6. Records of any inflow into the impoundment other than those permitted by this Section.
- F. Reporting requirements.
1. If the liner leaks, as evidenced by a drop in water level not attributable to evaporation, or if the berm breaches or an impoundment is overtopped due to a catastrophic or other significant event, the permittee shall report the circumstance to the Department within five days of discovery and implement the contingency plan required in subsection (B)(4). The permittee shall submit a final report to the Department within 60 days of the event summarizing the circumstances of the problem and corrective actions taken.
 2. The permittee shall report unauthorized flows into the impoundment to the Department within five days of discovery and implement the contingency plan required in subsection (B)(4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- G.** Closure requirements. The permittee shall notify the Department of the intent to close the facility permanently. Within 90 days following closure notification the permittee shall comply with the following requirements, as applicable:
1. Remove liquids and any solid residue on the liner and dispose appropriately;
 2. Inspect the liner for evidence of holes, tears, or defective seams that could have leaked;
 3. If evidence of leakage is discovered, remove the liner in the area of suspected leakage and sample potentially impacted soil. If soil remediation levels are exceeded, the permittee shall define the lateral and vertical extent of contamination and, within 60 days of the exceedance, notify the Department and submit an action plan for achieving clean closure for the Department's approval before implementing the plan;
 4. If there is no evidence of holes, tears, or defective seams that could have leaked:
 - a. Cover the liner in place or remove it for disposal or reuse if the impoundment is an excavated impoundment,
 - b. Remove and dispose of the liner elsewhere if the impoundment is bermed, and
 - c. Grade the facility to prevent the impoundment of water; and
 5. Notify the Department within 60 days following closure that the action plan was implemented and the closure is complete.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-D302. 3.02 General Permit: Process Water Discharges from Water Treatment Facilities**
- A.** A 3.02 General Permit allows filtration backwash and discharges obtained from sedimentation and coagulation in the water treatment process from facilities that treat water for industrial process or potable uses. The permittee shall ensure that:
1. Liquid fraction. The discharge meets:
 - a. All numeric Aquifer Water Quality Standards for inorganic chemicals, organic chemicals, and pesticides established in R18-11-406(B) through (D);
 - b. The discharge meets one of the following criteria for microbiological contaminants:
 - i. Either the concentration of fecal coliform organisms is not more than 2/100 ml or the concentration of *E. coli* bacteria is not more than 1/100 ml, or
 - ii. Either the concentration of fecal coliform organisms is less than 200/100 ml or the concentration of *E. coli* bacteria is less than 126/100 ml if the average daily flow processed by the water treatment facility is less than 250,000 gallons; and
 2. Solid Fraction. The solid material in the discharge qualifies as inert material, as defined in A.R.S. § 49-201(19).
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
1. A characterization of the discharge, including a representative chemical and biological analysis of expected discharges and all source waters; and
 2. The design capacity of any impoundment covered by this general permit.
- C.** Impoundment design and siting requirements. An applicant shall:
1. Ensure that the depth to the static groundwater table is greater than 20 feet;
 2. Not locate the area of discharge immediately above karstic or fractured bedrock, unless the discharge meets the microbial limits specified in subsection (A)(1)(b)(i);
 3. Maintain a minimum horizontal setback of 100 feet between the facility and any water supply well;
 4. Design and construct an impoundment to maintain, using design volume or mechanical systems, normal operating volumes and any inflow from the 100-year, 24-hour storm event. The applicant shall:
 - a. Divert any surface water run-on from the 100-year, 24-hour storm event around the facility if not intended for capture by facility design; and
 - b. Design the facility to maintain 2 feet of freeboard or an alternative level of freeboard that the applicant demonstrates is reasonable, considering meteorological factors, the size of the impoundment, and other site-specific factors; or
 - c. Discharge to surface water under the conditions of an AZPDES permit; and
 5. Manage off-site disposal of sludge according to A.R.S. Title 49, Chapter 4.
- D.** Operational requirements.
1. Inorganic chemical, organic chemical, and pesticide monitoring.
 - a. The permittee shall monitor any discharge annually to determine compliance with the requirements of subsection (A).
 - b. If the concentration of any pollutant exceeds the numeric Aquifer Water Quality Standard, the permittee shall submit a report to the Department with a proposal for mitigation and shall increase monitoring frequency for that pollutant to quarterly.
 - c. If, in the quarterly sampling, the condition in subsection (D)(1)(b) continues for two consecutive quarters, the permittee shall submit an application for an individual permit.
 2. Microbiological contaminant monitoring.
 - a. The permittee shall monitor any discharge annually to determine compliance with the requirements of subsection (A)(1)(b).
 - b. If the concentration of any pollutant exceeds the limits established in subsection (A)(1)(b), the permittee shall submit a report to the Department with a proposal for mitigation and increase monitoring frequency for that pollutant to monthly.
 - c. If, in the monthly sampling, the condition in subsection (D)(2)(b) continues for three consecutive months, the permittee shall submit an application for an individual permit.
- E.** Recordkeeping. A permittee shall maintain at the site, the following information, if applicable for the disposal method, for at least 10 years, and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure;
 3. Water quality data collected under subsection (D);
 4. Standard operating procedures; and
 5. Records of any discharge other than those identified under subsection (B).
- F. Reporting requirements.** The permittee shall:
1. Report unauthorized flows into the impoundment to the Department within five days of discovery, and
 2. Submit the report required in subsections (D)(1)(b) or (2)(b) within 30 days of receiving the analytical results.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-D303. 3.03 General Permit: Vehicle and Equipment Washes**
- A.** A 3.03 General Permit allows a facility to discharge water from washing vehicle exteriors and vehicle equipment. The 3.03 General Permit does not authorize:
1. Discharge water that typically results from the washing of vehicle engines unless the discharge is to a lined surface impoundment;
 2. Direct discharges of sanitary sewage, vehicle lubricating oils, antifreeze, gasoline, paints, varnishes, solvents, pesticides, or fertilizers;
 3. Discharges resulting from washing the interior of vessels used to transport fuel products or chemicals, or washing equipment contaminated with fuel products or chemicals; or
 4. Discharges resulting from washing the interior of vehicles used to transport mining concentrates that originate from the same mine site, unless the discharge is to a lined surface impoundment.
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit a narrative description of the facility and a design of the disposal system and wash operations.
- C.** Design, installation, and testing requirements. An applicant shall:
1. Design and construct the wash pad:
 - a. To drain and route wash water to a sump or similar sediment-settling structure and an oil/water separator or a comparable pretreatment technology;
 - b. Of concrete or material chemically compatible with the wash water and its constituents; and
 - c. To support the maximum weight of the vehicle or equipment being washed with an appropriate safety factor;
 2. Not use unlined ditches or natural channels to convey wash water;
 3. Ensure that a surface impoundment meets the requirements in R18-9-D301(C)(1) through (3). The applicant shall ensure that berms or dikes at the impoundment can withstand wave action erosion and are compacted to a uniform density not less than 95 percent;
 4. Ensure that a surface impoundment required for wash water described in subsection (A)(1) meets the design and installation requirements in R18-9-D301(C);
- 5.** If wash water is received by an unlined surface impoundment or engineered subsurface disposal system, the applicant shall:
- a. Ensure that the annual daily average flow is less than 3000 gallons per day;
 - b. Maintain a minimum horizontal setback of 100 feet between the impoundment or subsurface disposal system and any water supply well;
 - c. Ensure that the bottom of the surface impoundment or subsurface disposal system is at least 50 feet above the static groundwater level and the intervening material does not consist of karstic or fractured bedrock;
 - d. Ensure that the wash water receives primary treatment before discharge through, at a minimum, a sump or similar structure for settling sediments or solids and an oil/water separator or a comparable pretreatment technology designed to reduce oil and grease in the wastewater to 15 mg/l or less;
 - e. Withdraw the separated oil from the oil/water separator using equipment such as adjustable skimmers, automatic pump-out systems, or level sensing systems to signal manual pump-out; and
 - f. If a subsurface disposal system is used, design the system to prevent surfacing of the wash water.
- D.** Operational requirements. The permittee shall:
1. Inspect the oil/water separator before operation to ensure that there are no leaks and that the oil/water separator is in operable condition;
 2. Inspect the entire facility at least quarterly. The inspection shall, at a minimum, consist of a visual examination of the wash pad, the sump or similar structure, the oil/water separator, and all surface impoundments;
 3. Visually inspect each surface impoundment at least monthly, to ensure the volume of wash water is maintained within the design capacity and freeboard limitation;
 4. Repair damage to the integrity of the wash pad or impoundment liner as soon as practical;
 5. Maintain the oil/water separator to achieve the operational performance of the separator;
 6. Remove accumulated sediments in all surface impoundments to maintain design capacity; and
 7. Use best management practices to minimize the introduction of chemicals not typically associated with the wash operations. Only biodegradable surfactant or soaps are allowed. The permittee shall not use products that contain chemicals in concentrations likely to cause a violation of an Aquifer Water Quality Standard at the applicable point of compliance.
- E.** Monitoring requirements.
1. If wash water is discharged to an unlined surface impoundment or other area for subsurface disposal, the permittee shall monitor the wash water quarterly at the point of discharge for pH and for the presence of C₁₀ through C₃₂ hydrocarbons using a Department of Health Services certified method.
 2. If pH is not between 6.0 and 9.0 or the concentration of C₁₀ through C₃₂ hydrocarbons exceeds 50 mg/l, the permittee shall, within 30 days of the monitorings, submit a report to the Department with a proposal for mitigation and shall increase monitoring frequency to monthly.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. If the condition in subsection (E)(2) persists for three consecutive months, the permittee shall submit, within 90 days, an application for an individual permit.
- F.** Recordkeeping. A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available;
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure; and
 3. The Material Safety Data Sheets for the chemicals used in the wash operations and any required monitoring results.
- G.** Closure requirements. A permittee shall comply with the closure requirements specified in R18-9-D301(G) if a liner has been used. If no liner is used the permittee shall remove and appropriately dispose of any liquids and grade the facility to prevent impoundment of water.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-D304. 3.04 General Permit: Non-Stormwater Impoundments at Mining Sites**
- A.** A 3.04 General Permit allows discharges to lined surface impoundments, lined secondary containment structures, and associated lined conveyance systems at mining sites.
1. The following discharges are allowed under the 3.04 General Permit:
 - a. Seepage from tailing impoundments, unleached rock piles, or process areas;
 - b. Process solution temporarily stored for short periods of time due to process upsets or rainfall, provided the solution is promptly removed from the facility as required under subsection (D);
 - c. Stormwater runoff not permitted under A.R.S. § 49-245.01 because the facility does not receive solely stormwater or because the runoff is regulated but not considered stormwater under the Clean Water Act; and
 - d. Wash water specific to sand and gravel operations not covered by R18-9-B301(A).
 2. Facilities that continually contain process solution as a normal function of facility operations are not eligible for coverage under the 3.04 General Permit. If a normal process solution contains a pollutant regulated under A.R.S. § 49-243(I) the 3.04 General Permit does not apply if the pollutant will compromise the integrity of the liner.
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
1. A description of the sources of inflow to the facility. An applicant shall include a representative chemical analysis of expected sources of inflow to the facility unless a sample is not available, before facility construction, in which case the applicant shall provide a chemical analysis of solution present in the facility to the Department within 90 days after the solution first enters the facility;
 2. Documentation demonstrating that the facility design and operation under subsections (C) and (D) have been reviewed by a mining engineer or an Arizona-registered professional engineer before submission to the Department; and
3. A contingency plan that specifies actions proposed in case of an accidental release from the facility, overtopping of the impoundment, breach of the berm, or unauthorized inflows into the impoundment or containment structure.
- C.** Design, construction, and installation requirements. An applicant shall:
1. Design and construct the impoundment or secondary containment structure as specified under R18-9-D301(C)(1);
 2. Ensure that conveyance systems are capable of handling the peak flow from the 100-year storm;
 3. Construct the liner as specified in R18-9-D301(C)(4)(a);
 4. Develop and implement a Quality Assurance/Quality Control program that meets or exceeds the liner manufacturer's guidelines. The program shall address site and subgrade preparation, inspection procedures, field testing, laboratory testing, repair of seams during installation, and final inspection of the completed liner for functional integrity;
 5. If the facility is located in the 100-year flood plain, design the facility so it is protected from damage or flooding as a result of a 100-year, 24-hour storm event;
 6. Design and manage the facility so groundwater does not come into contact with the liner;
 7. Ensure that the facility design addresses any significant geologic hazard relating to static and seismic stability. The applicant shall document any design adjustments made for this reason in the Notice of Intent to Discharge;
 8. Ensure that the site preparation includes, as appropriate, clearing the area of vegetation, grubbing, grading, and embankment and subgrade preparation. The applicant shall ensure that supporting surface slopes and foundation are stable and structurally sound;
 9. Ensure that the liner is anchored by being secured in an engineered anchor trench. If regularly exposed to sunlight, the applicant shall ensure that the liner is ultraviolet resistant; and
 10. Use compacted clay subgrade in areas with shallow groundwater conditions.
- D.** Operational requirements. The permittee shall:
1. Maintain the freeboard required in subsection (C)(1) through design, pumping, or both;
 2. Remove accumulated residues, sediments, debris, and vegetation to maintain the integrity of the liner and the design capacity of the impoundment;
 3. Perform and document a visual inspection for cracks, tears, perforations and residual build-up at least monthly. The operator shall conduct and document an inspection after the facility receives significant volumes of stormwater inflow;
 4. Report cracks, tears, and perforations in the liner to the Department, and repair them as soon as practical, but no later than 60 days under normal operating conditions, after discovery of the crack, tear, or perforation;
 5. For facilities that temporarily contain a process solution due to process upsets, remove the process solution from the facility as soon as practical, but no later than 60 days after cessation of the upset; and
 6. For facilities that temporarily contain a process solution due to rainfall, remove the process solution from the facility as soon as practical.
- E.** Recordkeeping. A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. Construction drawings and as-built plans, if available;
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results and facility closure;
 3. Capacity design criteria;
 4. A list of standard operating procedures;
 5. The Quality Assurance/Quality Control program required under subsection (C)(4); and
 6. Records of any unauthorized flows into the impoundment.
- F. Reporting requirements.**
1. If the liner is breached, as evidenced by a drop in water level not attributable to evaporation, or if the impoundment breaches or is overtopped due to a catastrophic or other significant event, the permittee shall report the circumstance to the Department within five days of discovery and implement the contingency plan required in subsection (B)(3). The permittee shall submit a final report to the Department within 60 days of the event summarizing the circumstances of the problem and corrective actions taken.
 2. The permittee shall report unauthorized flows into the impoundment to the Department within five days of discovery and implement the contingency plan required in subsection (B)(3).
- G. Closure requirements.**
1. The permittee shall notify the Department of the intent to close the facility permanently.
 2. Within 90 days following closure notification the permittee shall comply with the following requirements, as applicable:
 - a. Remove liquids and any solid residue on the liner and dispose appropriately;
 - b. Inspect the liner for evidence of holes, tears, or defective seams that could have leaked;
 - c. If evidence of leakage is discovered, remove the liner in the area of suspected leakage and sample potentially impacted soil. If soil remediation levels are exceeded, the permittee shall, within 60 days notify the Department and submit an action plan for the Department's approval before implementing the plan;
 - d. If there is no evidence of holes, tears, or defective seams that could have leaked:
 - i. Cover the liner in place or remove it for disposal or reuse if the impoundment is an excavated impoundment,
 - ii. Remove and dispose of the liner elsewhere if the impoundment is bermed, and
 - iii. Grade the facility to prevent the impoundment of water; and
 3. Notify the Department within 60 days following closure that the action plan has been implemented and the closure is complete.
- posal.** This general permit does not apply if the purpose of the wetlands is to provide treatment.
- B. Notice of Intent to Discharge.** In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit the name and individual permit number of the facility providing the reclaimed water.
- C. Design requirements.** An applicant shall:
1. Ensure that the reclaimed water released into the wetland meets numeric and narrative Aquifer Water Quality Standards for all parameters except for coliform bacteria and is Class A+ reclaimed water. A+ reclaimed water is wastewater that has undergone secondary treatment established under R18-9-B204(B)(1), filtration, and meets a total nitrogen concentration under R18-9-B204(B)(3) and fecal coliform limits under R18-9-B204(B)(4);
 2. Maintain a minimum horizontal separation of 100 feet between any water supply well and the maximum wetted area of the wetland;
 3. Post signs at points of access and every 250 feet along the perimeter of the wetland stating, "CAUTION. THESE WETLANDS CONTAIN RECLAIMED WATER. DO NOT DRINK." The applicant shall ensure that the signs are in English and Spanish, or in English with inclusion of the international "do not drink" symbol; and
 4. Ensure that wetland siting is consistent with local zoning and land use requirements.
- D. Operational requirements.**
1. A permittee shall manage the wetland to minimize vector problems.
 2. The permittee shall submit to the Department and implement a Best Management Practices Plan for operation of the wetland. The Best Management Practices Plan shall include:
 - a. A site plan showing the wetland footprint, point of inflow, stormwater drainage, and placement of vegetation;
 - b. Management of flows into and through the wetland to minimize erosion and damage to vegetation;
 - c. Management of visitation and use of the wetlands by the public;
 - d. A management plan for vector control;
 - e. A plan or criteria for enhancing or supplementing of wetland vegetation; and
 - f. Management of shallow groundwater conditions on existing on-site wastewater treatment facilities.
 3. The permittee shall perform quarterly inspections to review bank integrity, erosion evidence, the condition of signage and vegetation, and correct any problem noted.
- E. Recordkeeping.** A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available; and
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure.
- F. Reporting requirements.** The permittee shall, by January 30, provide the Department in writing with an annual assessment of the biological condition of the wetland, including the volume of inflow to the wetland in the past year.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-D305. 3.05 General Permit: Disposal Wetlands

- A.** A 3.05 General Permit allows discharges of reclaimed water into constructed or natural wetlands, including waters of the United States, waters of the state, and riparian areas, for dis-

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-D306. 3.06 General Permit: Constructed Wetlands to Treat Acid Rock Drainage at Mining Sites

- A.** A 3.06 General Permit allows the operation of constructed wetlands that receive, with the intent to treat, acid rock drainage from a closed facility.
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit a design, including information on the quality of the influent, the treatment process to be used, the expected quality of the wastewater, and the nutrients and other constituents that will indicate wetland performance.
- C.** Design, construction, and installation. An applicant shall:
1. Ensure that:
 - a. Water released into the treatment wetland is compatible with construction materials and vegetation;
 - b. Water released from the treatment wetland:
 - i. Meets numeric Aquifer Water Quality Standards,
 - ii. Has a pH between 6.0 and 9.0, and
 - iii. Has a sulfate concentration less than 1000 mg/l; and
 - c. Water released from the treatment wetland complies with and is released under an individual permit and an AZPDES Permit, if required;
 2. Construct the treatment wetland with a liner, using a low-hydraulic conductivity synthetic liner, site-specific liner, or both, to achieve a calculated seepage rate of less than 550 gallons per acre per day. The applicant shall:
 - a. Ensure that, if a synthetic liner is used, such as geomembrane, the liner is underlain by at least 6 inches of prepared and compacted subgrade;
 - b. Anchor the liner along the perimeter of the treatment wetland; and
 - c. Manage the plants in the treatment wetland to prevent species with root penetration that impairs liner performance;
 3. Design the treatment wetland for optimum:
 - a. Sizing appropriate for the anticipated treatment,
 - b. Cell configuration,
 - c. Vegetative species composition, and
 - d. Berm configuration;
 4. Construct and locate the treatment wetland so that it:
 - a. Maintains physical integrity during a 100-year, 24-hour storm event; and
 - b. Operates properly during a 25-year, 24-hour storm event;
 5. Ensure that the bottom of the treatment wetland is at least 20 feet above the seasonal high groundwater table; and
 6. If public access to the treatment wetland is anticipated or encouraged, post signs at points of access and every 250 feet along the perimeter of the treatment wetland stating, "CAUTION. THESE WETLANDS CONTAIN MINE DRAINAGE WATER. DO NOT DRINK." The permittee shall ensure that the signs are in English and Spanish, or in English with inclusion of the international "do not drink" symbol.
- D.** Operational requirements.
1. The permittee shall monitor the water leaving the treatment wetlands at least quarterly for the standards specified in subsection (C)(1)(b). Monitoring shall include nutrients or other constituents used as indicators of treatment wetland performance.
2. The permittee shall submit to the Department and implement a Best Management Practices Plan for operation of the treatment wetland. The Best Management Practices Plan shall include:
 - a. A site plan showing the treatment wetland footprint, point of inflow, stormwater drainage, and placement of vegetation;
 - b. A contingency plan to address problems, including treatment performance, wash-out and vegetation die-off, and a plan to apply for an individual permit if the treatment wetland is unable to achieve the treatment standards in subsection (C)(1)(b) on a continued basis;
 - c. Management of flows into and through the treatment wetland to minimize erosion and damage to vegetation;
 - d. A description of the measures for restricting access to the treatment wetlands by the public;
 - e. A management plan for vector control; and
 - f. A plan or criteria for enhancing or supplementing treatment wetland vegetation.
 3. The permittee shall perform quarterly inspections to review the bank and liner integrity, erosion evidence, and the condition of signage and vegetation, and correct any problems noted.
- E.** Recordkeeping. A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available; and
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure.
- F.** Reporting requirements.
1. If preliminary laboratory results indicate that the quality of the water leaving the treatment wetlands does not meet the standards specified in subsection (C)(1)(b), the permittee may request that the laboratory re-analyze the sample before reporting the results to the Department. The permittee shall:
 - a. Conduct verification sampling within 15 days of receiving final laboratory results,
 - b. Conduct verification sampling only for parameters that are present in concentrations greater than the standards specified in subsection (C)(1)(b), and
 - c. Notify the Department in writing within five days of receiving final laboratory results.
 2. If the final laboratory result confirms that the quality of the water leaving the treatment wetlands does not meet the standards in subsection (C)(1)(b), the permittee shall implement the contingency plan required by subsection (D)(2)(b) and notify the Department that the plan is being implemented.
 3. The permittee shall, by January 30, provide the Department in writing with an annual assessment of the biological condition of the treatment wetland, including the volume of inflow to the treatment wetland in the past year.

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-D307. 3.07 General Permit: Tertiary Treatment Wetlands

- A.** A 3.07 General Permit allows constructed wetlands that receive with the intent to treat, discharges of reclaimed water that meet the secondary treatment level requirements specified in R18-9-B204(B)(1).
- B.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit:
1. The name and individual permit number of any facility that provides the reclaimed water to the treatment wetland;
 2. The name and individual permit number of any facility that receives water released from the treatment wetland;
 3. The design of the treatment wetland construction and management project, including information on the quality of the influent, the treatment process, and the expected quality of the wastewater;
 4. A Best Management Practices Plan that includes:
 - a. A site plan showing the treatment wetland footprint, point of inflow, stormwater drainage, and placement of vegetation;
 - b. A contingency plan to address any problem, including treatment performance, wash-out, and vegetation die-off;
 - c. A management plan for flows into and through the treatment wetland to minimize erosion and damage to vegetation;
 - d. A description of the measures for restricting access to the treatment wetlands by the public;
 - e. A management plan for vector control; and
 - f. A plan or criteria for enhancing or supplementing treatment wetland vegetation.
- C.** Design requirements. An applicant shall:
1. Release water from the treatment wetland under an individual permit and an AZPDES permit, if required. The applicant shall release water from the treatment wetland only to a direct reuse site if the site is permitted to receive reclaimed water of the quality generated under the individual permit specified in subsection (B)(1);
 2. Construct and locate the treatment wetland so that it:
 - a. Maintains physical integrity during a 100-year, 24-hour storm event; and
 - b. Operates properly during a 25-year, 24-hour storm event;
 3. Ensure that the bottom of the treatment wetland is at least 20 feet above the seasonal high groundwater table;
 4. Maintain a minimum horizontal separation of 100 feet between a water supply well and the maximum wetted area of the treatment wetland;
 5. Maintain the setbacks specified in R18-9-B201(I) for no noise, odor, or aesthetic controls between the property boundary at the site and the maximum wetted area of the treatment wetland;
 6. Fence the treatment wetland area to prevent unauthorized access;
 7. Post signs at points of access stating "CAUTION. THESE WETLANDS CONTAIN RECLAIMED WATER, DO NOT DRINK." The applicant shall ensure that the signs are in English and Spanish, or in English with inclusion of the international "do not drink" symbol;
 8. Construct the treatment wetland with a liner using low hydraulic conductivity liner, site-specific liner, or both, to achieve a calculated seepage rate of less than 550 gallons per acre per day. The applicant shall:
 - a. Ensure that if a synthetic liner is used, such as geomembrane, the liner is underlain by at least 6 inches of prepared and compacted subgrade;
 - b. Anchor the liner along the perimeter of the treatment wetland; and
 - c. Manage the plants in the treatment wetland to prevent species with root penetration that impairs liner performance;
 9. Calculate the size and depth of the treatment wetland so that the rate of flow allows adequate treatment detention time. The applicant shall design the treatment wetland with at least two parallel treatment cells to allow for efficient system operation and maintenance;
 10. Ensure that the treatment wetland vegetation includes cat-tails, bulrush, common reed, or other species of plants with high pollutant treatment potential to achieve the intended water quality identified in subsection (B)(3); and
 11. Ensure that construction and operation of the treatment wetlands is consistent with local zoning and land use requirements.
- D.** Operational requirements. The permittee shall:
1. Implement the Best Management Practices Plan approved under subsection (B);
 2. Monitor wastewater leaving the treatment wetland to ensure that discharge water quality meets the expected wastewater quality specified in subsection (B)(3). The permittee shall ensure that analyses of wastewater samples are conducted by a laboratory certified by the Department of Health Services, following the Department's Quality Assurance/Quality Control requirements;
 3. Follow the prescribed measures as required in the contingency plan under subsection (B)(4)(b) and submit a written report to the Department within five days if verification sampling demonstrates that an alert level or discharge limit is exceeded;
 4. Inspect the treatment wetlands at least quarterly for bank and liner integrity, erosion evidence, and condition of signage and vegetation, and correct any problem discovered; and
 5. Ensure that the treatment wetland is operated by a certified operator under 18 A.A.C. 5, Article 1.
- E.** Recordkeeping. A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
1. Construction drawings and as-built plans, if available; and
 2. A log book or similar documentation to record inspection results, repair and maintenance activities, monitoring results, and facility closure.
- F.** Reporting requirements. The permittee shall, by January 30, provide the Department in writing with an annual assessment of the biological condition of the treatment wetland including the volume of inflow to the treatment wetland in the past year.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

PART E. TYPE 4 GENERAL PERMITS

R18-9-E301. 4.01 General Permit: Sewage Collection Systems

A. A 4.01 General Permit allows for construction and operation of a new sewage collection system or expansion of an existing sewage collection system involving new construction as follows:

1. A sewage collection system or portion of a sewage collection system that serves downstream from the point where the daily design flow is 3000 gallons per day based on Table 1, Unit Design Flows, except a gravity sewer line conveying sewage from a single building drain directly to an interceptor, collector sewer, lateral, or manhole regardless of daily design flow;
2. A sewage collection system that includes a manhole; or
3. A sewage collection system that includes a force main or lift station serving more than one dwelling.

B. Performance. An applicant shall design, construct, and operate a sewage collection system so that the sewage collection system:

1. Provides adequate wastewater flow capacity for the planned service area;
2. Minimizes sedimentation, blockage, and erosion through maintenance of proper flow velocities throughout the system;
3. Prevents releases of sewage to the land surface through appropriate sizing, capacities, and inflow and infiltration prevention measures throughout the system;
4. Protects water quality through minimization of exfiltration losses from the system;
5. Provides for adequate inspection, maintenance, testing, visibility, and accessibility;
6. Maintains system structural integrity; and
7. Minimizes septic conditions in the sewage collection system.

C. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B), an applicant shall submit the following information:

1. A statement on a form approved by the Director, signed by the owner or operator of the sewage treatment facility that treats or processes the sewage from the proposed sewage collection system.
 - a. The statement shall affirm that the additional volume of wastewater delivered to the facility by the proposed sewage collection system will not cause any flow or effluent quality limits of the individual permit for the facility to be exceeded.
 - b. If the facility is classified as a groundwater protection permit facility under A.R.S. § 49-241.01(C), or if no flow or effluent limits are applicable, the statement shall affirm that the design flow of the facility will not be exceeded;
2. If the proposed sewage collection system delivers wastewater to a downstream sewage collection system under different ownership or control, a statement on a form approved by the Director, signed by the owner or operator of the downstream sewage collection system, affirming that the downstream system can maintain the performance required by subsection (B) when receiving the increased flows;
3. A general site plan showing the boundaries and key aspects of the project;

4. Construction quality drawings that provide overall details of the site and the engineered works comprising the project including:

- a. The plans and profiles for all sewer lines, manholes, force mains, depressed sewers, and lift stations with sufficient detail to allow Department verification of design and performance characteristics;
- b. Relevant cross sections showing construction details and elevations of key components of the sewage collection system to allow Department verification of design and performance characteristics, including the slope of each gravity sewer segment stated as a percentage; and
- c. Drainage features and controls, and erosion protection as applicable, for the components of the project; and
- d. Horizontal and vertical location of utilities within the area affected by the sewer line construction;

5. Documentation of design flows for significant components of the sewage collection system and the basis for calculating the design flows;

6. Drawings, reports, and other information that are clear, reproducible, and in a size and format specified by the Department. The applicant may submit the drawings in a Department-approved electronic format; and

7. Design documents, including plans, specifications, drawings, reports, and calculations that are signed, dated, and sealed by an Arizona-registered professional engineer. The designer shall use good engineering judgment by following engineering standards of practice, and rely on appropriate engineering methods, calculations, and guidance.

D. Design requirements.

1. General Provisions. An applicant shall design and construct a new sewage collection system or an expansion of an existing sewage collection system involving new construction, according to the requirements of this general permit. An applicant shall:

- a. Base design flows for components of the system on unit flows specified in Table 1, Unit Design Flows.
- b. Design gravity sewer lines and all other sewage collection system components, including, manholes, force mains, lift stations, depressed sewers, and appurtenant devices and structures to accommodate maximum sewage flows as follows:

- i. Any point in a sewer main when flowing full can accommodate a peak wet weather flow calculated by multiplying the sum of the upstream sources of flow from Table 1, Unit Design Flows by a dry weather peaking factor based on upstream population, as tabulated below, and adding a wet weather infiltration and inflow rate based on either a percentage of peak dry weather flow or a gallons per acre rate of flow;

| Upstream Population | Dry Weather Peaking Factor |
|---------------------|----------------------------|
| 100 | 3.62 |
| 200 | 3.14 |
| 300 | 2.90 |
| 400 | 2.74 |
| 500 | 2.64 |
| 600 | 2.56 |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

| | |
|--|--|
| 700 | 2.50 |
| 800 | 2.46 |
| 900 | 2.42 |
| 1000 | 2.38 |
| 1001 to 10,000 | $PF = (6.330 \times p^{-0.231}) + 1.094$ |
| 10,001 to 100,000 | $PF = (6.177 \times p^{-0.233}) + 1.128$ |
| More than 100,000 | $PF = (4.500 \times p^{-0.174}) + 0.945$ |
| PF = Dry Weather Peaking Factor p = Upstream Population | |

- ii. For a lift station serving less than 600 single family dwelling units (d.u.), use either of the following methods to size the pumps for peak dry weather flow in gallons per minute and add an allowance for wet weather flow and infiltration:
 - (1) Peak dry weather flow = 17 d.u.^{0.42}, or
 - (2) Peak dry weather flow = 11.2 (population)^{0.42}
- iii. If justified by the applicant, the Department may accept lower unit flow values in the served area due to significant use of low-flow fixtures, hydrographs of actual flows, or other factors;
- c. Use the "Uniform Standard Specifications for Public Works Construction" (revisions through 2004) and the "Uniform Standard Details for Public Works Construction" (revisions through 2004) published by the Maricopa Association of Governments, and the "Standard Specifications for Public Improvements," (2003 Edition), and "Standard Details for Public Improvements," (2003 Edition), published jointly by Pima County Wastewater Management and the City of Tucson, as the applicable design and construction criteria, unless the Department approves alternative design standards or specifications. An applicant in a county other than Maricopa and Pima shall use design and construction criteria from either the Maricopa Association of Governments or the Pima County Wastewater Management and the City of Tucson for the facility unless alternative criteria are designated by the Department.
 - i. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material.
 - ii. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the Maricopa Association of Governments, 302 N. 1st Avenue, Suite 300, Phoenix, Arizona 85003, or on the web at <http://www.mag.maricopa.gov/archive/Newpages/on-line.htm>; or from Pima County Wastewater Management, 201 N. Stone Avenue, Tucson, Arizona 85701-1207, or on the web at <http://www.pima.gov/wwm/stdtdet>;
- d. Ensure that sewage collection system components are separated from drinking water distribution system components as specified in 18 A.A.C. 5, Article 5;
- e. Ensure that sewage collection system components are separated from reclaimed water system components as specified in 18 A.A.C. 9, Article 6; and

- f. Request review and approval of an alternative to a design feature specified in this Section by following the requirements in R18-9-A312(G).
- 2. Gravity sewer lines. An applicant shall:
 - a. Ensure that any sewer line that runs between man-holes, if not straight, is of constant horizontal curvature with a radius of curvature not less than 200 feet;
 - b. Cover each sewer line with at least 3 feet of earth cover meeting the requirements of subsection (D)(2)(h). The applicant shall:
 - i. Include at least one note specifying this requirement in construction plans;
 - ii. If site-specific limitations prevent 3 feet of earth cover, provide the maximum cover attainable, construct the sewer line of ductile iron pipe or other design of equivalent or greater tensile and compressive strength, and note the change on the construction plans; and
 - iii. Ensure that the design of the pipe and joints can withstand crushing or shearing from any expected static and live load to protect the structural integrity of the pipe. Construction plans shall note locations requiring these measures;
 - c. If sewer lines cross or are constructed in floodways;
 - i. Place the lines at least 2 feet below the level of the 100-year storm scour depth and calculated 100-year bed degradation and construct the lines using ductile iron pipe or pipe with equivalent tensile strength, compressive strength, shear resistance, and scour protection.
 - ii. If it is not possible to maintain the 2 feet of clearance specified in subsection (D)(2)(c)(i), using the process described in R18-9-A312(G), provide a design that ensures that the sewer line will withstand any lateral and vertical load for the scour and bed degradation conditions specified in subsection (D)(2)(c)(i);
 - iii. Ensure that sewer lines constructed in a floodway extend at least 10 feet beyond the boundary of the 100-year storm scouring;
 - iv. If a sewer line is constructed in a floodway and is longer than the applicable maximum man-hole spacing distance in subsection (D)(3)(a), using the process described in R18-9-A312(G), provide a design that ensures the performance standards in subsection (B) are met; and
 - v. Note locations requiring these measures on the construction plans;
 - d. Ensure that each sewer line is 8 inches in diameter or larger except the first 400 feet of a dead end sewer line with no potential for extension may be 6 inches in diameter if the design flow criteria specified in subsections (D)(1)(a) and (D)(1)(b) are met and the sewer line is installed with a slope sufficient to achieve a velocity of at least 3 feet per second when flowing full. If the line is extended, the applicant seeking the extension shall replace the entire length with larger pipe to accommodate the new design flow unless the applicant demonstrates with engineering calculations that using the existing 6-inch pipe will accommodate the design flow;
 - e. Design sewer lines with at least the minimum slope calculated from Manning's Formula using a coeffi-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

cient of roughness of 0.013 and a sewage velocity of 2 feet per second when flowing full.

- i. An applicant may request a smaller minimum slope under R18-9-A312(G) if the smaller slope is justified by a quarterly program of inspections, flushings, and cleanings.
- ii. If a smaller minimum slope is requested, the applicant shall not specify a slope that is less than 50 percent of that calculated from Manning’s formula using a coefficient of roughness of 0.013 and a sewage velocity of 2 feet per second.
- iii. The ratio of flow depth in the pipe to the diameter of the pipe shall not exceed 0.75 in peak dry weather flow conditions;
- f. Design sewer lines to avoid a slope that creates a sewage velocity greater than 10 feet per second. The applicant shall construct any sewer line carrying a flow with a normal velocity of greater than 10 feet per second using ductile iron pipe or pipe with equivalent erosion resistance, and structurally reinforce the receiving manhole or sewer main;
- g. Design and install sewer lines, connections, and fittings with materials that meet or exceed manufacturer’s specifications consistent with this Chapter to:
 - i. Limit inflows, infiltration, and exfiltration;
 - ii. Resist corrosion in the ambient electrochemical environment;
 - iii. Withstand anticipated static and live loads; and
 - iv. Provide internal erosion protection;
- h. Indicate trenching and bedding details applicable for each pipe material and size in the design plans. Unless the Department approved alternative design standards or specifications under subsection (D)(1)(c), the applicant shall place and bed the sewer lines in trenches following the specifications in “Trench Excavation, Backfilling, and Compaction” (Section 601) revised 2004, published by the Maricopa Association of Governments; and “Rigid Pipe Bedding for Sanitary Sewers” (WWM 104) revised July 2002, and “Flexible Pipe Bedding for Sanitary Sewers” (WWM 105) revised July 2002, published by Pima County Wastewater Management. This material is part of the material incorporated by reference in subsection (D)(1)(b).
- i. Perform a deflection test of the total length of all sewer lines made of flexible materials to ensure that the installation meets or exceeds the manufacturer’s recommendations and record the results;
- j. Test each segment of the sewer line for leakage using the applicable method below and record the results:
 - i. “Standard Test Method for Installation of Acceptance of Plastic Gravity Sewer Lines Using Low-Pressure Air, F1417-92(1998),” published by the American Society for Testing and Materials;
 - ii. “Standard Practice for Testing Concrete Pipe Sewer Lines by Low-Pressure Air Test Method, C924-02 (2002),” published by the American Society for Testing and Materials;
 - iii. “Standard Test Method for Low-Pressure Air Test of Vitrified Clay Pipe Lines, C828-03

- (2003),” published by the American Society for Testing and Materials;
- iv. “Standard Test Method for Hydrostatic Infiltration Testing of Vitrified Clay Pipe Lines, C1091-03a (2003),” published by the American Society for Testing Materials;
- v. “Standard Practice for Infiltration ion and Exfiltration Acceptance Testing of Installed Precast Concrete Pipe Sewer Lines, C969-02 (2002),” published by the American Society for Testing Material; or
- vi. “Standard Practice for Underground Installation of Thermoplastic Pipe for Sewers and Other Gravity-Flow Applications, D2321-00 (2000),” published by the American Society for Testing Materials; or
- vii. The material listed in subsections (D)(2)(j)(i) through (vi) is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959;
- k. Test the total length of the sewer line for uniform slope by lamp lighting, remote camera or similar method approved by the Department, and record the results; and
- l. Minimize the planting within the disturbed area of new sewage collection system construction of plant species having roots that are likely to reach and damage the sewer or impair the operation of the sewer or visual and vehicular access to any manhole.

3. Manholes.

- a. An applicant shall install manholes at all grade changes, size changes, alignment changes, sewer intersections, and at any location necessary to comply with the following spacing requirements:

| Sewer Pipe Diameter (inches) | Maximum Manhole Spacing (feet) |
|------------------------------|--------------------------------|
| Less than 8 | 400 |
| 8 to less than 18 | 500 |
| 18 to less than 36 | 600 |
| 36 to less than 60 | 800 |
| 60 or greater | 1300 |

- b. The Department shall allow greater manhole spacing if the applicant follows the procedure provided in R18-9-A312(G) and provides documentation showing the operator possesses or has available specialized sewer cleaning equipment suitable for the increased spacing.
- c. The applicant shall ensure that manhole design is consistent with “Pre-cast Concrete Sewer Manhole” #420-1, revised January 1, 2004 and #420-2, revised January 1, 2001, “Offset Manhole for 8” – 30” Pipe” #421 (1998), and “Sewer Manhole and Cover Frame Adjustment” #422, revised January 1, 2001, published by the Maricopa Association of Governments; and “Manholes and Appurtenant Items” (WWM 201 through WWM 211, except WWM 204, 205, and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- 206), revised July 2002, published by Pima County Wastewater Management. This material is part of the material incorporated by reference in subsection (D)(1)(b).
- d. The applicant shall not locate manholes in areas subject to more than incidental runoff from rain falling in the immediate vicinity unless the manhole cover assembly is designed to restrict or eliminate storm-water inflow.
 - e. The applicant shall test each manhole using one of the following test protocols:
 - i. Watertightness testing by filling the manhole with water. The applicant shall ensure that the drop in water level following presoaking does not exceed 0.0034 of total manhole volume per hour;
 - ii. Negative air pressure testing using the "Standard Test Method for Concrete Sewer Manholes by Negative Air Pressure (Vacuum) Test, C1244-02e1 (2002)," published by the American Society for Testing and Materials. This material is incorporated by reference, does not include any later amendments or editions of the incorporated material and may be viewed at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007, or obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959; or
 - iii. Holiday testing of a lined manhole constructed with uncoated rebar using the "High-Voltage Electrical Inspection of Pipeline Coatings, RP0274-2004 (2004)," published by the National Association of Corrosion Engineers (NACE International). This material is incorporated by reference as modified below, does not include any later amendments or editions of the incorporated material and may be viewed at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or obtained from NACE International, 1440 South Creek Drive, Houston, Texas 77084-4906. The following substitutions apply:
 - (1) Where the word "metal" is used in the standard, use the word "surface" instead; and
 - (2) Where the words "pipe" or "pipeline" are used, use the word "manhole" instead.
 - f. The applicant shall perform manhole testing under subsection (D)(3)(e) after installation of the manhole cone or top riser to verify watertightness integrity of the manhole from the top of the cone or riser down.
 - i. Upon satisfactory test results, the applicant shall install the manhole ring and any spacers, complete the joints, and seal the manhole to a watertight condition.
 - ii. If the applicant can install the manhole cone or top riser, spacers, and ring to final grade without disturbance or adjustment by later construction, the applicant may perform the testing from the top of the manhole ring on down.
 - g. The applicant shall locate a manhole to provide adequate visibility and vehicular maintenance accessibility following construction.
4. Force mains. An applicant may install a force main if it meets the following design, installation, and testing requirements. The applicant shall:
 - a. Design force mains to maintain a minimum flow velocity of 3 feet per second and a maximum flow velocity of 7 feet per second. The applicant may design for sustained periods of flow above 7 feet per second, if the applicant justifies the design using the process specified in R18-9-A312(G);
 - b. Ensure that force mains have the appropriate valves and controls required to prevent drainback to the lift station. If drainback is necessary during cold weather to prevent freezing, the control system may allow manual or automatic drainback;
 - c. Incorporate air release valves or other appropriate components in force mains at all high points along the line to eliminate air accumulation. If engineering calculations provided by the applicant demonstrate that air will not accumulate in a given high point under typical flow conditions, the Department shall waive the requirement for an air release valve;
 - d. Design restrained joints or thrust blocks on force mains to accommodate water hammer, surge control, and to prevent excessive movement of the force main. Submitted construction plans shall show restrained joint or thrust block locations and details;
 - e. If a force main is proposed to discharge directly to a sewage treatment facility without entering a flow equalization basin, include in the Notice of Intent to Discharge a statement from the owner or operator of the sewage treatment facility that the design is acceptable;
 - f. Design a force main to withstand a pressure of 50 pounds per square inch or more above the design working pressure for two hours and test upon completion to ensure no leakage;
 - g. Supply flow to a force main using a lift station that meets the requirements of subsection (D)(5); and
 - h. Ensure that force mains are designed to control odor.
 5. Lift stations. An applicant shall:
 - a. Secure a lift station to prevent tampering and affix on its exterior, or on the nearest vertical object if the lift station is entirely below grade, at least one warning sign that includes the 24-hour emergency phone number of the owner or operator of the collection system;
 - b. Protect lift stations from physical damage from a 100-year flood event. An applicant shall not construct a lift station in a floodway;
 - c. Lift station wet well design.
 - i. Ensure that the minimum wet well volume in gallons is 1/4 of the product of the minimum pump cycle time, in minutes, and the total pump capacity, in gallons per minute;
 - ii. Protect the wet well against corrosion to provide at least a 20-year operational life;
 - iii. Ensure that wet well volume does not allow the sewage retention time to exceed 30 minutes unless the sewage is aerated, chemicals are added to prevent or eliminate hydrogen sulfide formation, or adequate ventilation is provided.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- Notwithstanding these measures, the applicant shall not allow the septic condition of the sewage to adversely affect downstream collection systems or sewage treatment facility performance;
- iv. Ensure that excessively high or low levels of sewage in the wet well trigger an audible or visible alarm at the wet well site and at the system control center;
 - v. Ensure that a wet well designed to accommodate more than 5000 gallons per day has a horizontal cross-sectional area of at least 20 square feet; and
 - vi. Ensure that lift stations are designed to prevent odor from emanating beyond the lift station site;
- d. Equip a lift station wet well with at least two pumps. The applicant shall ensure that:
 - i. The pumps are capable of passing a 2.5-inch sphere or are grinder pumps;
 - ii. The lift station is capable of operating at design flow with any one pump out of service; and
 - iii. Piping, valves, and controls are arranged to allow independent operation of each pump;
 - e. Not use suction pumps if the sewage lift is more than 15 feet. The applicant shall ensure that other types of pumps are self-priming and that pump water brake horsepower is at least 0.00025 times the product of the required discharge, in gallons per minute, and the required total dynamic head, in feet; and
 - f. For lift stations receiving an average flow of more than 10,000 gallons per day, include a standby power source and redundant wastewater level controls in the lift station design that will provide immediate service and remain available for 24 hours per day if the main power source or controls fail.
6. Depressed sewers. An applicant shall:
 - a. Size the depressed sewer to attain a minimum velocity of 3 feet per second through all barrels of the depressed sewer when the flow equals or exceeds the design daily peak dry weather flow,
 - b. Design the depressed sewer to convey the sewage flow through at least two parallel pipes at least 6 inches in diameter,
 - c. Include an inlet and outlet structure at each end of the inverted sewer,
 - d. Design the depressed sewer so that the barrels are brought progressively into service as flow increases to its design value, and
 - e. Design the depressed sewer to minimize release of odors to the atmosphere.
- E. Additional Discharge Authorization requirements. An applicant shall:
 1. Supply a signed, dated, and sealed Engineer's Certificate of Completion in a format approved by the Department that provides the following:
 - a. Confirmation that the project was completed in compliance with the requirements of this Chapter, as described in the plans and specifications corresponding to the Construction Authorization issued by the Director, or with changes that are reflected in as-built plans submitted with the Engineer's Certificate of Completion;
 - b. As-built plans, if required, that are properly identified and numbered; and
 - c. Satisfactory field test results from deflection, leakage, and uniform slope testing;
 2. Provide any other relevant information required by the Department to determine that the facility conforms to the terms of the 4.01 General Permit; and
 3. Provide a signed certification on a form approved by the Department that:
 - a. Confirms that an operation and maintenance manual exists for the sewage collection system;
 - b. Confirms that the operation and maintenance manual addresses components of operation and maintenance specified on the certification form;
 - c. Provides the 24-hour emergency number of the owner or operator of the sewage collection system; and
 - d. Provides an address where the operation and maintenance manual is maintained and confirms that the manual is available for inspection at that address by the Department on request.
 - F. Operation and maintenance requirements. The permittee shall:
 1. Operate the new sewage collection system or expansion of an existing sewage collection system involving new construction using the operation and maintenance manual certified by the owner or operator in subsection (E)(3), to meet the performance standards specified in subsection (B), unless the permittee is operating the sewage collection system under a CMOM Plan under the general permit established in R18-9-C305;
 2. Ensure that the sewage collection system is operated according to the operator certification requirements in 18 A.A.C. 5, Article 1; and
 3. For safety during operation and maintenance of lift station and other confined space components of the sewage collection system, follow all applicable state and federal confined space entry requirements.
 - G. Recordkeeping. A person owning or operating a facility permitted under this Section shall maintain the documents listed in subsection (E) for the life of the facility and make them available to the Department upon request.
 - H. Repairs.
 1. A Notice of Intent to Discharge is not required for sewage collection system repairs. Repairs include work performed in response to deterioration or damage of existing structures, devices, and appurtenances with the intent to maintain or restore the system to its original design flow and operational characteristics. Repairs do not include changes in vertical or horizontal alignment.
 2. Components used in the repair shall meet the design, installation, and operational requirements of this Section.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E302. 4.02 General Permit: Septic Tank with Disposal by Trench, Bed, Chamber Technology, or Seepage Pit, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.02 General Permit allows for the construction and operation of a system with less than 3000 gallons per day design flow consisting of a septic tank dispensing wastewater to an approved means of disposal described in this Section. Only

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

gravity flow of wastewater from the septic tank to the disposal works is authorized by this general permit.

1. The standard septic tank and disposal works design specified in the 4.02 General Permit serves sites where no site limitations are identified by the site investigation conducted under R18-9-A310.
 2. If site conditions allow, this general permit authorizes the discharge of wastewater from a septic tank meeting the requirements of R18-9-A314 to one of the following disposal works:
 - a. Trench,
 - b. Bed,
 - c. Chamber technology, or
 - d. Seepage pit.
- B. Performance.** An applicant shall design a system consisting of a septic tank and one of the disposal works listed in subsection (A)(2) so that treated wastewater released to the native soil meets the following criteria:
1. TSS of 75 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 150 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and
 4. Total coliform level of 100,000,000 (Log₁₀ 8) colony forming units per 100 milliliters, 95th percentile.
- C. Design and installation requirements.**
1. General provisions. In addition to the applicable requirements in R18-9-A312, the applicant shall:
 - a. Ensure that the septic tank meets the requirements specified in R18-9-A314;
 - b. Before placing aggregate or disposal pipe in a prepared excavation, remove all smeared or compacted surfaces from trenches by raking to a depth of 1 inch and removing loose material. The applicant shall:
 - i. Place aggregate in the trench to the depth and grade specified in subsection (C)(2);
 - ii. Place the drain pipe on aggregate and cover it with aggregate to the minimum depth specified in subsection (C)(2); and
 - iii. Cover the aggregate with landscape filter material, geotextile, or similar porous material to prevent filling of voids with earth backfill;
 - c. Use a grade board stake placed in the trench to the depth of the aggregate if the disposal pipe is constructed of drain tile or flexible pipe that will not maintain alignment without continuous support;
 - d. Disposal pipe. If two or more disposal pipes are installed, install a distribution box approved by the Department of sufficient size to receive all lateral lines and flows at the head of each disposal works and:
 - i. Ensure that the inverts of all outlets are level and the invert of the inlet is at least 1 inch above the outlets;
 - ii. Design distribution boxes to ensure equal flow and install the boxes on a stable level surface such as a concrete slab or native or compacted soil; and
 - iii. Protect concrete distribution boxes from corrosion by coating them with an appropriate bituminous coating, constructing the boxes with concrete that has a 15 to 18 percent fly ash content, or by using other equivalent means;

- e. Construct all lateral pipes running from a distribution box to the disposal works with watertight joints and ensure that multiple disposal laterals, wherever practical, are of uniform length;
 - f. Lay pipe connections between the septic tank and a distribution box on natural ground or compact fill and construct the pipe connections with watertight joints;
 - g. Construct steps within distribution line trenches or beds, if necessary, to maintain a level disposal pipe on sloping ground. The applicant shall construct the lines between each horizontal section with watertight joints and install them on natural or unfilled ground; and
 - h. Ensure that a disposal works consisting of trenches, beds, chamber technology, or seepage pits is not paved over or covered by concrete or any material that can reduce or inhibit possible evaporation of wastewater through the soil to the land surface or oxygen transport to the soil absorption surfaces.
2. Trenches.
- a. The applicant shall calculate the trench absorption area as the total of the trench bottom area and the sum of both trench sidewall areas to a maximum depth of 48 inches below the bottom of the disposal pipe.
 - b. The applicant shall ensure that trench bottoms and disposal pipe are level. The applicant shall calculate trench sizing from the soil absorption rate specified under R18-9-A312(D) and the design flow established in R18-9-A312(B).
 - c. The following design criteria for trenches apply:

| Trenches | Minimum | Maximum |
|--|---|------------------------|
| 1. Number of trenches | 1 (2 are recommended) | No Maximum |
| 2. Length of trench ¹ | ---- | 100 feet |
| 3. Bottom width of trench | 12 inches | 36 inches |
| 4. Trench absorption area (sq. ft. of absorption area per linear foot of trench) | No Minimum | 11 sq. ft. |
| 5. Depth of cover over aggregate surrounding disposal pipe | 9 inches | 24 inches ² |
| 6. Thickness of aggregate material over disposal pipe | 2 inches | 2 inches |
| 7. Thickness of aggregate material under disposal pipe | 12 inches | No Maximum |
| 8. Slope of disposal pipe | Level | Level |
| 9. Disposal pipe diameter | 3 inches | 4 inches |
| 10. Spacing of trenches (measured between nearest sidewalls) | 2 times effective depth ³ or five feet, whichever is greater | No Maximum |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Notes:

- ¹ If unequal trench lengths are used, proportional distribution of wastewater is required.
 - ² For more than 24 inches, Standard Dimensional Ratio 35 or equivalent strength pipe is required.
 - ³ The effective depth is the distance between the bottom of the disposal pipe and the bottom of the trench bed.
- d. The applicant may substitute clean, durable, crushed, and washed recycled concrete for aggregate if noted in design documents and the trench absorption area calculation excludes the trench bottom.

3. Beds. An applicant shall:
- a. If a bed is installed, use the soil absorption rate specified in R18-9-A312(D) for "SAR, Bed. The applicant may, in computing the bed bottom absorption area, include the bed bottom and the perimeter sidewall area not more than 36 inches below the disposal pipe;
 - b. Comply with the following design criteria for beds:

| Gravity Beds | Minimum | Maximum |
|--|--|------------|
| 1. Number of disposal pipes | 2 | No Maximum |
| 2. Length of bed | No Minimum | 100 feet |
| 3. Distance between disposal pipes | 4 feet | 6 feet |
| 4. Spacing of beds measured between nearest sidewalls | 2 times effective depth ¹ or 5 feet, whichever is greater | No Maximum |
| 5. Width of bed | 10 feet | 12 feet |
| 6. Distance from disposal pipe to sidewall | 3 feet | 3 feet |
| 7. Depth of cover over disposal pipe | 9 inches | 14 inches |
| 8. Thickness of aggregate material under disposal pipe | 12 inches | No Maximum |
| 9. Thickness of aggregate material over disposal pipe | 2 inches | 2 inches |
| 10. Slope of disposal pipe | Level | Level |
| 11. Disposal pipe diameter | 3 inches | 4 inches |

Note:

- ¹ The effective depth is the distance between the bottom of the disposal pipe and the bottom of the bed.

4. Chamber technology. An applicant shall:
- a. Calculate an effective chamber absorption area to size the disposal works area and determine the number of chambers needed. The effective absorption area of each chamber is calculated as follows:
 $A = (1.8 \times B \times L) + (2 \times V \times L)$
 - i. "A" is the effective absorption area of each chamber,
 - ii. "B" is the exterior width of the bottom of the chamber,

- iii. "V" is the vertical height of the louvered sidewall of the chamber, and
 - iv. "L" is the length of the chamber;
 - b. Calculate the disposal works size and number of chambers from the effective absorption area of each chamber and the soil absorption rates specified in R18-9-A312(D);
 - c. Ensure that the sidewall of the chamber provides at least 35 percent open area for sidewall credit and that the design and construction minimizes the movement of fines into the chamber area. The applicant shall not use filter fabric or geotextile against the sidewall openings.
5. Seepage pits. If allowed by R18-9-A311(B)(1), the applicant shall:
- a. Design a seepage pit to comply with R18-9-A312(E)(1) for minimum vertical separation distance;
 - b. Ensure that multiple seepage pit installations are served through a distribution box approved by the Department or connected in series with a watertight connection laid on undisturbed or compacted soil. The applicant shall ensure that the outlet from the pit has a sanitary tee with the vertical leg extending at least 12 inches below the inlet;
 - c. Ensure that each seepage pit is circular and has an excavated diameter of 4 to 6 feet. If multiple seepage pits are installed, ensure that the minimum spacing between seepage pit sidewalls is 12 feet or three times the diameter of the seepage pit, whichever is greater. The applicant may use the alternative design procedure specified in R18-9-A312(G) for a proposed seepage pit more than 6 feet in diameter;
 - d. For a gravel filled seepage pit, backfill the entire pit with aggregate. The applicant shall ensure that each pit has a breather conductor pipe that consists of a perforated pipe at least 4 inches in diameter, placed vertically within the backfill of the pit. The pipe shall extend from the bottom of the pit to within 12 inches below ground level;
 - e. For a lined, hollow seepage pit, lay a concrete liner or a liner of a different protective material in the pit on a firm foundation and fill excavation voids behind the liner with at least 9 inches of aggregate;
 - f. For the cover of a lined seepage pit, use an approved one or two piece reinforced concrete slab with a minimum compressive strength of 2500 pounds per square inch. The applicant shall ensure that the cover:
 - i. Is at least 5 inches thick and designed to support an earth load of at least 400 pounds per square foot;
 - ii. Has a 12-inch square or diameter minimum access hole with a plug or cap that is coated on the underside with an protective bituminous seal, constructed of concrete with 15 percent to 18 percent fly ash content, or made of other nonpermeable protective material; and
 - iii. Has a 4 inch or larger inspection pipe placed vertically not more than 6 inches below ground level;
 - g. Ensure that the top of the seepage pit cover is 4 to 18 inches below the surface of the ground;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- h. Install a vented inlet fitting in every seepage pit to prevent flows into the seepage pit from damaging the sidewall. An applicant may use a 1/4 bend fitting placed through an opening in the top of the slab cover if a one or two piece concrete slab cover inlet is used;
- i. Bore seepage pits five feet deeper than the proposed pit depth to verify underlying soil characteristics and backfill the five feet of overdrill with low permeability drill cuttings or other suitable material;
- j. Backfill seepage pits that terminate in gravelly, coarse sand zones five feet above the beginning of the zone with low permeability drill cuttings or other suitable material;
- k. Determine the minimum sidewall area for a seepage pit from the design flow and the soil absorption rate derived from the testing procedure described in R18-9-A310(G). The effective absorption surface for a seepage pit is the sidewall area only. The sidewall area is calculated using the following formula:

$$A = 3.14 \times D \times H$$
 - "A" is the minimum sidewall area in square feet needed for the design flow and soil absorption rate for the installation,
 - "D" is the diameter of the proposed seepage pit in feet,
 - "H" is the vertical height in feet in the seepage pit through which wastewater infiltrates native soil. The applicant shall ensure that H is at least 10 feet for any seepage pit.
- D. Operation and maintenance. The permittee shall follow the applicable operation and maintenance requirements in R18-9-A313.
- Historical Note**
 New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-E303. 4.03 General Permit: Composting Toilet, Less Than 3000 Gallons Per Day Design Flow**
- A. A 4.03 General Permit allows for the use of a composting toilet with less than 3000 gallons per day design flow.
- Definition. For purposes of this Section, "composting toilet" means a manufactured turnkey or kit form treatment technology that receives human waste from a waterless toilet directly into an aerobic composting chamber where dehydration and biological activity reduce the waste volume and the content of nutrients and harmful microorganisms to an appropriate level for later disposal at the site or by other means.
 - An applicant may use a composting toilet if:
 - Limited water availability prevents use of other types of on-site wastewater treatment facilities,
 - Environmental constraints prevent the discharge of wastewater or nutrients to a sensitive area,
 - Inadequate space prevents use of other systems,
 - Severe site limitations exist that make other forms of treatment or disposal unacceptable, or
 - The applicant desires maximum water conservation.
 - A permittee may use a composting toilet only if:
 - Wastewater is managed as provided in this Section and, if gray water is separated and reused, the gray water reuse complies with 18 A.A.C. 9, Article 7; and
 - Soil conditions support subsurface disposal of all wastewater sources.
- B. Restrictions.
- A permittee shall ensure that no more than 50 persons per day use the composting toilet.
 - A composting toilet shall only receive human excrement unless the manufacturer's specifications allow the deposit of kitchen or other wastes into the toilet.
- C. Performance. An applicant shall ensure that:
- The composting toilet provides containment to prevent the discharge of toilet contents to the native soil except leachate, which may drain to the wastewater disposal works described in subsection (F);
 - The composting toilet limits access by vectors to the contained waste; and
 - Wastewater is disposed into the subsurface to prevent any wastewater from surfacing.
- D. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), the applicant shall submit the following information:
- Composting toilet.
 - The name and address of the composting toilet system manufacturer;
 - A copy of the manufacturer's warranty, and the specifications for installation operation, and maintenance;
 - The product model number;
 - Composting rate, capacity, and waste accumulation volume calculations;
 - Documentation of listing by a national listing organization indicating that the composting toilet meets the stated manufacturer's specifications for loading, treatment performance, and operation, unless the composting toilet is listed under R18-9-A309(E) or is a component of a reference design approved by the Department;
 - The method of vector control;
 - The planned method and frequency for disposing the composted human excrement residue; and
 - The planned method for disposing of the drainage from the composting unit; and
 - Wastewater.
 - The number of bedrooms in the dwelling or persons served on a daily basis, as applicable, and the corresponding design flow of the disposal works for the wastewater;
 - The results from soil evaluation or percolation testing that adequately characterize the soils into which the wastewater will be dispersed and the locations of soil evaluation and percolation testing on the site plan; and
 - The design for the disposal works in subsection (F), including the location of the interceptor, the location and configuration of the trench or bed used for wastewater dispersal, the location of connecting wastewater pipelines, and the location of the reserve area.
- E. Design requirements for a composting toilet. An applicant shall ensure that:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. The composting chamber is watertight, constructed of solid durable materials not subject to excessive corrosion or decay, and is constructed to exclude access by vectors;
2. The composting chamber has airtight seals to prevent odor or toxic gas from escaping into the building. The system may be vented to the outside;
3. The capacity of the chamber and rate of composting are calculated based on:
 - a. The lowest monthly average chamber temperature; or
 - b. The yearly average chamber temperature, if the composting toilet is designed to compost on a yearly cycle or longer; and
4. The composting system provides adequate storage of all waste produced during the months when the average temperature is below 55°F, unless a temperature control

device is installed to increase the composting rate and reduce waste volume.

- F. Design requirements for the disposal works.**
1. Interceptor. An applicant shall ensure that the design complies with the following:
 - a. An interceptor may not accept human excreta or toilet wastewater;
 - b. Wastewater passes into an interceptor before it is conducted to the subsurface for dispersal;
 - c. The interceptor is designed to remove grease, oil, fibers, and solids to ensure long-term performance of the trench or bed used for subsurface dispersal;
 - d. The interceptor is covered to restrict access and eliminate habitat for mosquitoes and other vectors; and
 - e. Minimum interceptor size is based on design flow.
 - i. For a dwelling, the following apply:

| No. of Bedrooms | Design Flow (gallons per day) | Minimum Interceptor Size (gallons) | |
|------------------------------------|-------------------------------|---|---|
| | | Kitchen Wastewater Only (All gray water sources are collected and reused) | Combined Non-Toilet Wastewater (Gray water is not separated and reused) |
| 1 (7 fixture units or less) | 90 | 42 | 200 |
| 1-2 (greater than 7 fixture units) | 180 | 84 | 400 |
| 3 | 270 | 125 | 600 |
| 4 | 330 | 150 | 700 |
| 5 | 380 | 175 | 800 |
| 6 | 420 | 200 | 900 |
| 7 | 460 | 225 | 1000 |

ii. For other than a dwelling, minimum interceptor size in gallons is 2.1 times the design flow from Table 1, Unit Design Flows.

2. Dispersal of wastewater. An applicant shall ensure that the design complies with the following:
 - a. A trench or bed is used to disperse the wastewater into the subsurface;
 - b. Sizing of the trench or bed is based on the design flow as determined in subsection (F)(1)(e), including all black and gray water, and an SAR determined under R18-9-A312(D);
 - c. The minimum vertical separation from the bottom of the trench or bed to a limiting subsurface condition is at least 5 feet; and
 - d. Other aspects of trench or bed design follow R18-9-E302, as applicable.
3. Setback distances. Setback distances are no less than 1/4 of the setback distances specified in R18-9-A312(C), but not less than 5 feet, except the setback distance from wells is 100 feet.

G. Operation and maintenance requirements. A permittee shall:

1. Composting toilet.
 - a. Provide adequate mixing, ventilation, temperature control, moisture, and bulk to reduce fire hazard and prevent anaerobic conditions;
 - b. Follow manufacturer's specifications for addition of any organic bulking agent to control liquid drainage, promote aeration, or provide additional carbon;
 - c. Follow the manufacturer's specifications for operation and maintenance regarding movement of material within the composting chamber;

- d. If batch system containers are mounted on a carousel, place a new container in the toilet area if the previous one is full;
- e. Ensure that only human waste, paper approved for septic tank use, and the amount of bulking material required for proper maintenance is introduced to the composting chamber. The permittee shall remove all other materials or trash. If allowed by the manufacturer's specifications the permittee may add, other nonliquid compostable food preparation residues to the toilet;
- f. Ensure that any liquid end product is:
 - i. Sprayed back onto the composting waste material;
 - ii. Removed by a person who licensed a vehicle under 18 A.A.C. 13, Article 11; or
 - iii. Is drained to the interceptor described in subsection (F);
- g. Remove and dispose of composted waste as necessary, using a person who licensed a vehicle under 18 A.A.C. 13, Article 11 if the waste is not placed in a disposal area for burial or used on-site as mulch;
- h. Before ending use for an extended period take measures to ensure that moisture is maintained to sustain bacterial activity and free liquids in the chamber do not freeze; and
- i. After an extended period of non-use, empty the composting chamber of solid end product and inspect all mechanical components to verify that the mechanical components are operating as designed;

2. Wastewater Disposal Works.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. Ensure that the interceptor is maintained regularly according to manufacturer's instructions to prevent grease and solid wastes from impairing performance of the trench or bed used for dispersal of wastewater, and
- b. Protect the area of the trench or bed from soil compaction or other activity that will impair dispersal performance.

H. Reference design.

1. An applicant may use a composting toilet that achieves the performance requirements in subsection (C) by following a reference design on file with the Department.
2. The applicant shall file a form provided by the Department for supplemental information about the proposed system with the applicant's submittal of the Notice of Intent to Discharge.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-E304. 4.04 General Permit: Pressure Distribution System, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.04 General Permit allows for the use of a pressurized distribution of wastewater system with a design flow less than 3000 gallons per day that treats wastewater to a level equal to or better than that specified in R18-9-E302(B).
 1. Definition. For purposes of this Section, a "pressure distribution system" means a tank, pump, controls, and piping that conducts wastewater under pressure in controlled amounts and intervals to a bed or trench or other means of distribution authorized by a general permit for an on-site wastewater treatment facility.
 2. An applicant may use a pressure distribution system if a gravity flow system is unsuitable, inadequate, unfeasible, or cost prohibitive because of site limitations or other conditions, or if needed to optimally distribute wastewater.
- B.** Performance. An applicant shall ensure that a pressure distribution system:
 1. Disperses wastewater so that:
 - a. Loading rates are optimized for the intended purpose, and
 - b. The wastewater is delivered under pressure and evenly distributed within the disposal works, and
 2. Prevents ponding on the land surface.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), the applicant shall submit:
 1. A copy of operation, maintenance, and warranty materials for the principal components; and
 2. A copy of dosing specifications, including pump curves, dispersing component details, and float control settings.
- D.** Design requirements.
 1. Pumps. An applicant shall ensure that pumps used in the on-site wastewater treatment facility:
 - a. Are rated for wastewater service by the manufacturer and certified by Underwriters Laboratories;
 - b. Achieve the minimum design flow rate and total dynamic head requirements for the particular site; and
 2. Switches, controls, alarms, timers, and electrical components. An applicant shall ensure that:
 - a. Switches and controls accommodate the minimum and maximum dose capacities of the distribution network design. The applicant shall not use pressure diaphragm level control switches;
 - b. Fail-safe controls that can be tested in the field are used to prevent discharge of inadequately treated wastewater. The applicant shall include counters or flow meters if critical to control functions, such as timed dosing;
 - c. Control panels and alarms:
 - i. Are either mounted in an exterior location visible from the structure served, mounted in a conspicuous location on the side of the structure served, or mounted in a conspicuous location adjacent to the structure served,
 - ii. Provide manual pump switch and alarm test features, and
 - iii. Include written instructions covering standard operation and alarm events;
 - d. Audible and visible alarms are used for all critical control functions, such as pump failures, treatment failures, and excess flows. The applicant shall ensure that:
 - i. The visual portion of the signal is conspicuous from a distance 50 feet from the system and its appurtenances;
 - ii. The audible portion of the signal is between 70 and 75 db at 5 feet and is discernible from a distance of 50 feet from the system and its appurtenances;
 - iii. Alarms, test features, and controls are on a non-dedicated electrical circuit separate from the dedicated circuit for the pump with constant visual confirmation that the circuit is electrically active; and
 - iv. The alarm is clearly audible and visible inside the structure served;
 - e. All electrical wiring complies with the National Electrical Code, 2005 Edition, published by the National Fire Protection Association. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the National Fire Protection Association, 1 Batterymarch Park, P.O. Box 9101, Quincy, MA 02269-9101. The applicant shall ensure that:
 - i. Connections are made using National Electrical Manufacturers Association (NEMA) 4x junction boxes certified by Underwriters Laboratories; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- ii. All controls are in NEMA 3r, 4, or 4x enclosures for outdoor use.
- 3. Dosing tanks and wastewater distribution components.
 - a. An applicant shall:
 - i. Design dosing tanks to withstand anticipated internal and external loads under full and empty conditions, and design concrete tanks to meet the "Standard Specification for Precast Concrete Water and Wastewater Structures, C913-02 (2002)," published by the American Society for Testing and Materials. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959;
 - ii. Design dosing tanks to be easily accessible and have secured covers;
 - iii. Install risers to provide access to the inlet and outlet of the tank and to service internal components;
 - iv. Ensure that the volume of the dosing tank accommodates bottom depth below maximum drawdown, maximum design dose, including any drainback, volume to high water alarm, and a reserve volume above the high water alarm level that is not less than the daily design flow volume. If the tank is time dosed, the applicant shall ensure that the combined surge capacity and reserve volume above the high water alarm is not less than the daily design flow volume;
 - v. Ensure that dosing tanks are watertight and anti-buoyant;
 - vi. Design the wastewater distribution components to withstand system pumping pressures;
 - vii. Design the wastewater distribution system to allow air to purge from the system;
 - viii. Design pressure piping to minimize freezing during cold weather;
 - ix. Ensure that the end of each wastewater distribution line is accessible for maintenance;
 - x. Ensure that orifices emit the design discharge rate uniformly throughout the wastewater distribution system; and
 - xi. Design orifices using orifice shields to provide proper distribution of wastewater to the receiving medium.
 - b. An applicant may use a septic tank second compartment or a second septic tank in series as a dosing tank if all dosing tank requirements of this Section are met and a screened vault is used instead of the septic tank effluent filter.
- 4. Design SAR. If the site conditions of the property for the on-site wastewater treatment facility do not require pressure distribution, but an applicant chooses to use pressure distribution, the applicant shall use a design SAR for the absorption surfaces in the disposal works that is not more than 1.10 times the adjusted SAR determined in R18-9-A312(D).
 - E. Additional Discharge Authorization requirements. An applicant shall obtain copies of instructions for the critical controls of the system from the person who installed the pressure distribution system. The applicant shall submit one copy of the instructions with the information required in subsection (C).
 - F. Operation and maintenance requirements. In addition to the applicable requirements specified in R18-9-A313(B), a permittee shall ensure that:
 - 1. The operation and maintenance manual for the on-site wastewater treatment facility that supplies the wastewater to the pressure distribution system specifies inspection and maintenance needed for the following items:
 - a. Sludge level in the bottom of the treatment and dosing tanks,
 - b. Watertightness,
 - c. Condition of electrical and mechanical components, and
 - d. Piping and other components functioning within design limits;
 - 2. All critical control functions are specified in the operation and maintenance manual for testing to demonstrate compliance with design specifications, including:
 - a. Alarms, test features, and controls;
 - b. Float switch level settings;
 - c. Dose rate, volume, and frequency, if applicable;
 - d. Distal pressure or squirt height, if applicable; and
 - e. Voltage test on pumps, motors, and controls, as applicable;
 - 3. The finished grade is observed and maintained for proper surface drainage. The applicant shall observe the levelness of the tank for differential settling. If there is settling, the applicant shall grade the facility to maintain surface drainage.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-E305. 4.05 General Permit: Gravelless Trench, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.05 General Permit allows for the use of a gravelless trench with less than 3000 gallons per day design flow receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
 - 1. Definition. For purposes of this Section, a "gravelless trench" means a disposal technology characterized by installation of a proprietary pipe and geocomposite or other substitute media into native soil instead of the distribution pipe and aggregate fill used in a trench allowed in R18-9-E302.
 - 2. A permittee may use a gravelless trench if suitable gravel or volcanic rock aggregate is unavailable, excessively expensive, or if adverse site conditions make movement of gravel difficult, damaging, or time consuming.
- B. Performance. An applicant shall design a gravelless trench so that treated wastewater released to the native soil meets the following criteria:
 - 1. TSS of 75 milligrams per liter, 30-day arithmetic mean;
 - 2. BOD₅ of 150 milligrams per liter, 30-day arithmetic mean;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. Total nitrogen (as nitrogen) of 53 milligrams per liter, 5-month arithmetic mean; and
 4. Total coliform level of 100,000,000 (Log_{10} 8) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit the following:
1. The soil absorption area that would be required if a conventional disposal trench filled with aggregate was used at the site,
 2. The configuration and size of the proposed gravelless disposal works, and
 3. The manufacturer's installation instructions and warranty of performance for absorbing wastewater into the native soil.
- D.** Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall:
1. Ensure that the top of the gravelless disposal pipe or similar disposal mechanism is at least 6 inches below the surface of the native soil and 12 to 36 inches below finished grade if approved fill is placed on top of the installation;
 2. Calculate the infiltration surface as follows:
 - a. For 8-inch diameter pipe, 2 square feet of absorption area is allowed per linear foot;
 - b. For 10-inch diameter pipe, 3 square feet of absorption area is allowed per linear foot;
 - c. For bundles of two pipes of the same diameter, the absorption area is calculated as 1.67 times the absorption area of one pipe; and
 - d. For bundles of three pipes of the same diameter, the absorption area is calculated as 2.00 times the absorption area of one pipe;
 3. Use a pressure distribution system meeting the requirements of R18-9-E304 in medium sand, coarse sand, and coarser soils; and
 4. Construct the drainfield of material that will not decay, deteriorate, or leach chemicals or byproducts if exposed to sewage or the subsurface soil environment.
- E.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall:
1. Install the gravelless pipe material according to manufacturer's instructions if the instructions are consistent with this Chapter,
 2. Ensure that the installed disposal system can withstand the physical disturbance of backfilling and the load of any soil cover above natural grade placed over the installation, and
 3. Shape any backfill and soil cover in the area of installation to prevent settlement and ponding of rainfall for the life of the disposal works.
- F.** Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), the permittee shall inspect the finished grade in the vicinity of the gravelless disposal works for maintenance of proper drainage and protection from damaging loads.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-E306. 4.06 General Permit: Natural Seal Evapotranspiration Bed, Less Than 3000 Gallons Per Day Design Flow**
- A.** A 4.06 General Permit allows for the use of a natural seal evapotranspiration bed with less than 3000 gallons per day design flow receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
1. Definition. For purposes of this Section, a "natural seal evapotranspiration bed" means a disposal technology characterized by a bed of sand or other media with an internal wastewater distribution system, contained on the bottom and sidewalls by an engineered liner consisting of natural soil and clay materials.
 2. An applicant may use a natural seal evapotranspiration bed if site conditions restrict soil infiltration or require reduction of the volume of wastewater discharged to the native soil underlying the natural seal liner.
- B.** Restrictions. Unless a person provides design documentation to show that a natural seal evapotranspiration bed will properly function, the person shall not install this technology if:
1. Average minimum temperature in any month is 20° F or less,
 2. Over 1/3 of the average annual precipitation falls in a 30-day period, or
 3. Design flow exceeds net evaporation.
- C.** Performance. An applicant shall ensure that a natural seal evapotranspiration bed:
1. Minimizes discharge to the native soil through the natural seal liner,
 2. Maximizes wastewater disposed to the atmosphere by evapotranspiration, and
 3. Prevents ponding of wastewater on the bed surface and maintains an interval of unsaturated media directly beneath the bed surface.
- D.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. Capillary rise potential test results for the media used to fill the evapotranspiration bed, unless sand meeting a D_{50} of 0.1 millimeter (50 percent by weight of grains equal to or smaller than 0.1 millimeter) is used; and
 2. Water mass balance calculations used to size the evapotranspiration bed.
- E.** Design requirements. An applicant shall:
1. Ensure that the evapotranspiration bed is from 18 to 36 inches deep and shall calculate the bed design based on the capillary rise of the bed media, following the "Standard Test Method for Capillary-Moisture Relationships for Coarse- and Medium-Textured Soils by Porous-Plate Apparatus, D2325-68 (2000)," incorporated by reference in R18-9-E307(E), and the anticipated maximum frost depth;
 2. Ensure the media is sand or other durable material;
 3. Base design area calculations on a water mass balance for the winter months and the design seepage rate;
 4. Ensure that the natural seal liner is a durable, low-hydraulic conductivity liner and is accompanied by the liner performance specification and calculations for bottom and sidewall seepage rate;
 5. If a surfacing layer is used, use topsoil, dark cinders, decomposed granite, or similar landscaping material placed to a maximum depth of 2 inches and ensure that:
 - a. If topsoil is used as a surfacing layer for growth of landscape plants:
 - i. The topsoil is a fertile, friable soil obtained from well-drained arable land;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- ii. The topsoil is free of nut grass, refuse, roots, heavy clay, clods, noxious weeds, or any other material toxic to plant growth;
 - iii. The pH of the topsoil is between 5.5 and 8.0;
 - iv. The plasticity index of the topsoil is between 3 and 15; and
 - v. The topsoil contains approximately 1-1/2 percent organic matter, by dry weight, either natural or added;
- b. If landscaping material other than topsoil is used as a surfacing layer, the material meets the following gradation:

| Sieve Size | Percent Passing |
|------------|-----------------|
| 1" | 100 |
| 1/2" | 95-100 |
| No. 4 | 90-100 |
| No. 10 | 70-100 |
| No. 200 | 15-70 |

- 6. Use shallow-rooted, non-invasive, salt- and drought-tolerant evergreens if vegetation is planted on the evapotranspiration bed;
 - 7. Install at least two observation ports to determine the level of the liquid surface of wastewater within the evapotranspiration bed;
 - 8. Design the bed to pump out the saturated zone if accumulated salts or a similar condition impairs bed performance; and
 - 9. Instead of the minimum vertical separation required under R18-9-A312(E), ensure that the minimum vertical separation from the bottom of the natural seal evapotranspiration bed liner to the seasonal high water table is at least 12 inches.
- F. Installation requirements.** In addition to the applicable requirements in R18-9-A313(A), an applicant shall ensure that:
- 1. The liner covers the bottom and all sidewalls of the bed and is installed on a stable base according to the manufacturer's installation specifications;
 - 2. If the inlet pipe passes through the liner, the joint is tightly sealed to minimize leakage during the operational life of the facility;
 - 3. The liner is leak tested under the supervision of an Arizona-registered professional engineer to confirm the design leakage rate; and
 - 4. A 2- to 4-inch layer of 1/2- to 1-inch gravel or crushed stone is placed around the distribution pipes within the bed. The applicant shall ensure that the filter cloth is placed on top of the gravel or crushed stone to prevent sand from settling into the gravel or crushed stone.
- G. Additional Discharge Authorization requirements.** An applicant shall submit the satisfactory results of the leakage test required under subsection (F)(3) to the Department before the Department issues the Discharge Authorization.
- H. Operation and maintenance requirements.** In addition to the applicable requirements in R18-9-A313(B), the permittee shall:
- 1. Not allow irrigation of an evapotranspiration bed, and
 - 2. Protect the bed from vehicle loads and other damaging activities.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by

final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E307. 4.07 General Permit: Lined Evapotranspiration Bed, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.07 General Permit allows for the use of a lined evapotranspiration bed receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
- 1. Definition. For purposes of this Section, a "lined evapotranspiration bed" means a disposal technology characterized by a bed of sand or other media with an internal wastewater distribution system contained on the bottom and sidewalls by an impervious synthetic liner.
 - 2. An applicant may use a lined evapotranspiration bed if site conditions restrict soil infiltration or require reduction or elimination of the volume of wastewater or nitrogen load discharged to the native soil.
 - 3. Provision of a reserve area is not required for a lined evapotranspiration bed.
- B. Restrictions.** Unless a person provides design documentation to show that a lined evapotranspiration bed will properly function, the person shall not install this technology if:
- 1. Average minimum temperature in any month is 20° F or less,
 - 2. Over 1/3 of average annual precipitation falls in a 30-day period, or
 - 3. Design flow exceeds net evaporation.
- C. Performance.** An applicant shall ensure that a lined evapotranspiration bed:
- 1. Prevents discharge to the native soil by a synthetic liner,
 - 2. Attains full disposal of wastewater to the atmosphere by evapotranspiration, and
 - 3. Prevents ponding of wastewater on the bed surface and maintains an interval of unsaturated media directly beneath the bed surface.
- D. Notice of Intent to Discharge.** In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
- 1. Capillary rise potential test results for the media used to fill the evapotranspiration bed, unless sand meeting a D₅₀ of 0.1 millimeter (50 percent by weight of grains equal to or smaller than 0.1 millimeter in size) is used; and
 - 2. Water mass balance calculations used to size the evapotranspiration bed.
- E. Design requirements.** In addition to the applicable requirements in R18-9-A312, an applicant shall:
- 1. Ensure that the evapotranspiration bed is from 18 to 36 inches deep and calculate the bed design on the basis of the capillary rise of the bed media, according to the "Standard Test Method for Capillary-Moisture Relationships for Coarse- and Medium-Textured Soils by Porous-Plate Apparatus, D2325-68 (2003)," published by the American Society for Testing and Materials and the anticipated maximum frost depth. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959;
 - 2. Ensure the media is sand or other durable material;
 - 3. Base design area calculations on a water mass balance for the winter months;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- 4. Ensure that the evapotranspiration bed liner is a durable, low hydraulic conductivity synthetic liner that has a calculated bottom area and sidewall seepage rate of less than 550 gallons per acre per day;
- 5. If a surfacing layer is used, use topsoil, dark cinders, decomposed granite, or similar landscaping material placed to a maximum depth of 2 inches. The applicant shall ensure that:
 - a. If topsoil is used as a surfacing layer for growth of landscape plants:
 - i. The topsoil is a fertile, friable soil obtained from well-drained arable land;
 - ii. The topsoil is free of nut grass, refuse, roots, heavy clay, clods, noxious weeds, or any other material toxic to plant growth;
 - iii. The pH of the topsoil is between 5.5 and 8.0;
 - iv. The plasticity index of the topsoil is between 3 and 15; and
 - v. The topsoil contains approximately 1 1/2 percent organic matter, by dry weight, either natural or added;
 - b. If another landscaping material is used as a surfacing layer, the material meets the following gradation:

| Sieve Size | Percent Passing |
|------------|-----------------|
| 1" | 100 |
| 1/2" | 95-100 |
| No. 4 | 90-100 |
| No. 10 | 70-100 |
| No. 200 | 15-70 |

- 6. Use shallow-rooted, non-invasive, salt and drought tolerant evergreens if vegetation is planted on the evapotranspiration bed;
- 7. Install at least two observation ports to allow determination of the depth to the liquid surface of wastewater within the evapotranspiration bed;
- 8. Design the bed to pump out the saturated zone if accumulated salts or a similar condition impairs bed performance; and
- 9. Instead of the minimum vertical separation required under R18-9-A312(E), ensure that the minimum vertical separation from the bottom of the evapotranspiration bed liner to the surface of the seasonal high water table or impervious layer or formation is at least 12 inches.

- F. Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall ensure that:
 - 1. All liner seams are factory fabricated or field welded according to manufacturer's specifications. The applicant shall ensure that:
 - 2. The liner covers the bottom and all sidewalls of the bed and is cushioned on the top and bottom with layers of sand at least 2 inches thick or other puncture-protective material;
 - 3. If the inlet pipe passes through the liner, the joint is tightly sealed to minimize leakage during the operational life of the facility;
 - 4. The liner is leak tested under the supervision of an Arizona-registered professional engineer; and
 - 5. A 2- to 4-inch layer of one-half to 1-inch gravel or crushed stone is placed around the distribution pipes within the bed. The applicant shall place filter cloth on top of the gravel or crushed stone to prevent sand from settling into the crushed stone or gravel.

- G. Additional Discharge Authorization requirements. An applicant shall submit the liner test results sealed by an Arizona-registered professional engineer to the Department for issuance of the Discharge Authorization.
- H. Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), the permittee shall:
 - 1. Not allow irrigation of an evapotranspiration bed; and
 - 2. Protect the bed from vehicle loads and other damaging activities.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E308. 4.08 General Permit: Wisconsin Mound, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.08 General Permit allows for the use of a Wisconsin mound with a design flow of less than 3000 gallons per day receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
 - 1. Definition. For purposes of this Section, a "Wisconsin mound" means a disposal technology characterized by:
 - a. An above-grade bed system that blends with the land surface into which is dispensed pressure dosed wastewater from a septic tank or other upstream treatment device,
 - b. Dispersal of wastewater under unsaturated flow conditions through the engineered media system contained in the mound, and
 - c. Wastewater treated by passage through the mound before percolation into the native soil below the mound.
 - 2. An applicant may use a Wisconsin mound if:
 - a. The native soil has excessively high or low permeability,
 - b. There is little native soil overlying fractured or excessively permeable rock, or
 - c. A reduction in minimum vertical separation is desired.
- B. Performance. An applicant shall design a Wisconsin mound so that treated wastewater released to the native soil meets the following criteria:
 - 1. Performance Category A.
 - a. TSS of 20 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 20 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, 5-month arithmetic mean; and
 - d. Total coliform level of 1000 (Log₁₀ 3.0) colony forming units per 100 milliliters, 95th percentile; or
 - 2. Performance Category B.
 - a. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, 5-month arithmetic mean; and
 - d. Total coliform level of 300,000 (Log₁₀ 5.5) colony forming units per 100 milliliters, 95th percentile.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- C. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. Specifications for the internal wastewater distribution system media proposed for use in the Wisconsin mound;
 2. Two scaled or dimensioned cross sections of the mound (one of the shortest basal area footprint dimension and one of the lengthwise dimension); and
 3. Design calculations following the "Wisconsin Mound Soil Absorption System: Siting, Design, and Construction Manual," published by the University of Wisconsin – Madison, January 1990 Edition (the Wisconsin Mound Manual). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the University of Wisconsin – Madison, SSWMP, 1525 Observatory Drive, Room 345, Madison, WI 53706.
- D. Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
1. Pressure dosed wastewater is delivered into the Wisconsin mound through a pressurized line and secondary distribution lines into an engineered aggregate infiltration bed, or equivalent system, in conformance with R18-9-E304 and the Wisconsin Mound Manual. The applicant shall ensure that the aggregate is washed;
 2. Wastewater is applied to the inlet surface of the mound media at not more than 1.0 gallon per day per square foot of mound bed inlet surface if the mound bed media conforms with the "Standard Specification for Concrete Aggregates, C33-03 (2003)," published by the American Society for Testing and Materials and the Wisconsin Mound Manual, except if cinder sand is used that is the appropriate grade with not more than 5 percent passing a #200 screen. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959. The applicant shall:
 - a. For cinder sand, ensure that the rate is not more than 0.8 gallons per day per square foot of mound bed inlet surface; and
 - b. Wash the media used for the mound bed;
 3. The aggregate infiltration bed and mound bed is capped by coarser textured soil, such as sand, sandy loam, or silt loam. An applicant shall not use silty clay, clay loam, or clays;
 4. The cap material is covered by topsoil, following the procedure in the Wisconsin Mound Manual, and the topsoil is capable of supporting vegetation, is not clay, and is graded to drain;
 5. The top and bottom surfaces of the aggregate infiltration bed are level and do not exceed 10 feet in width and that:
 - a. The minimum depth of the aggregate infiltration bed is 9 inches, or
 - b. Synthetic filter fabric permeable to water and air and capable of supporting the cap and topsoil load is placed on the top surface of the aggregate infiltration bed;
 6. The minimum depth of mound bed media is:
 - a. Performance Category A, 24 inches; or
 - b. Performance Category B, 12 inches;
 7. The maximum allowable side slope of the mound bed, cap material, and topsoil is not more than one vertical to three horizontal;
 8. Ports for inspection and monitoring are provided to verify performance, including verification of unsaturated flow within the aggregate infiltration bed. The applicant shall:
 - a. Install a vertical PVC pipe and cap with a minimum diameter of 4 inches as an inspection port at the end of the disposal line, and
 - b. Install the pipe with a physical restraint to maintain pipe position;
 9. The main pressurized line and secondary distribution lines for the aggregate infiltration bed are equipped at appropriate locations with cleanouts to grade;
 10. The following requirements and the setbacks specified in R18-9-A312(C) are observed:
 - a. Increase setbacks for the following downslope features at least 30 feet from the toe of the mound system:
 - i. Property line,
 - ii. Driveway,
 - iii. Building,
 - iv. Ditch or interceptor drain, or
 - v. Any other feature that impedes water movement away from the mound; and
 - b. Ensure that no upslope natural feature or improvement channels surface water or groundwater to the mound area;
 11. The portion of the basal area of native soil below the mound conforms to the Wisconsin Mound Manual. The applicant shall:
 - a. Calculate the absorption of wastewater into the native soil for only the effective basal area;
 - b. Apply the soil absorption rate specified in R18-9-A312(D). The applicant may increase allowable loading rate to the mound bed inlet surface up to 1.6 times if the wastewater dispersed to the mound is pretreated to reduce the sum of TSS and BOD₅ to 60 mg/l or less. The applicant may increase the soil absorption rate to not more than 0.20 gallons per day per square foot of basal area if the following slowly permeable soils underlie the mound:
 - i. Sandy clay loam, clay loam, silty clay loam, or finer with weak platy structure; or
 - ii. Sandy clay loam, clay loam, silty clay loam, or silt loam with massive structure;
 12. The slope of the native soil at the basal area does not exceed 25 percent, and a slope stability analysis is performed whenever the basal area or site slope within 50 horizontal feet from the mound system footprint exceeds 15 percent.
- E. Installation. An applicant shall:
1. Prepare native soil for construction of a Wisconsin mound system. The applicant shall:
 - a. Mow vegetation and cut down trees in the vicinity of the basal area site to within 2 inches of the surface;
 - b. Leave in place boulders and tree stumps and other herbaceous material that would excessively alter the soil structure if removed after mowing and cutting;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. Plow native soil serving as the basal area footprint along the contours to 7- to 8- inch depth;
 - d. Not substitute rototilling for plowing; and
 - e. Begin mound construction immediately after plowing;
2. Place each layer of the bed system to prevent differential settling and promote uniform density; and
 3. Use the Wisconsin Mound Manual to guide any other detail of installation. The applicant may vary installation procedures and criteria depending on mound design but shall use installation procedures and criteria that are at least equivalent to those in the Wisconsin Mound Manual.
- F. Operation and maintenance requirements.** In addition to the applicable requirements specified in R18-9-A313(B), the permittee shall:
1. If an existing mound system shows evidence of overload or hydraulic failure, conduct the following sequence of evaluations:
 - a. Verify the actual loading and performance of the pretreatment system.
 - b. Verify the watertightness of the pretreatment and dosing tanks;
 - c. Determine the dosing rates and dosing intervals to the aggregate infiltration bed and compare it with the original design to evaluate the presence or absence of saturated conditions in the aggregate infiltration bed;
 - d. If the above steps in subsections (F)(1)(a) through (c) do not indicate an anomalous condition, evaluate the site and recalculation of the disposal capability to determine if mound lengthening is feasible;
 - e. Determine if site modifications are possible including changing surface drainage patterns at upgrade locations and lowering the groundwater level by installing interceptor drains to reduce native soil saturation at shallow levels; and
 - f. Determine if the basal area can be increased, consistent with R18-9-A309(A)(9)(b)(iv);
 2. Prepare servicing and waste disposal procedures and task schedules necessary for clearing the main pressurized wastewater line and secondary distribution lines, septic tank effluent filter, pump intake, and controls.
 - flow conditions to provide additional passive biological treatment.
 2. The applicant may use an engineered pad system if:
 - a. The native soil is excessively permeable,
 - b. There is little native soil overlying fractured or excessively permeable rock, or
 - c. The available area is limited for installing a disposal works authorized by R18-9-E302.
- B. Performance.** An applicant shall ensure that:
1. The engineered pad system is designed so that the treated wastewater released to the native soil meets the following criteria:
 - a. TSS of 50 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 50 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, 5-month arithmetic mean; and
 - d. Total coliform level of 1,000,000 (Log₁₀ 6) colony forming units per 100 milliliters, 95th percentile; or
 2. The engineered pad system is designed to meet any other performance, loading rate, and configuration criteria specified in the reviewed product list maintained by the Department as required under R18-9-A309(E).
- C. Notice of Intent to Discharge.** In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit design materials and construction specifications for the engineered pad system.
- D. Design requirements.** In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
1. Gravity and pressurized wastewater delivery is from a septic tank or intermediate watertight chamber equipped with a pump and controls. The applicant shall ensure that:
 - a. Delivered wastewater is distributed onto the top of the engineered pad system and achieves even distribution by good engineering practice, and
 - b. The dosing rate for pressurized wastewater delivery is at least four doses per day and no more than 24 doses per day;
 2. The sand bed consists of mineral sand washed to conform to the "Standard Specification for Concrete Aggregates, C33-03 (2003)," which is incorporated by reference in R18-9-E308(D)(2), unless the performance testing and design specifications of the engineered pad manufacturer justify a substitute specification. The applicant shall ensure that:
 - a. The sand bed design provides for the placement of at least 6 inches of sand bed material below and along the perimeter of each pad, and
 - b. The contact surface between the bottom of the sand bed and the native soil is level;
 3. The spacing between adjacent two-pad-wide rows is at least two times the distance between the bottom of the distribution pipe and the bottom of the sand bed or 5 feet, whichever is greater;
 4. The wastewater distribution system installed on the top of the engineered pad system is covered with a breathable geotextile material and the breathable geotextile material is covered with at least 10 inches of backfill.
 - a. The applicant shall ensure that rocks and cobbles are removed from backfill cover and grade the backfill for drainage.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E309. 4.09 General Permit: Engineered Pad System, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.09 General Permit allows for the use of an engineered pad system receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
1. Definition. For purposes of this Section, an "engineered pad system" means a treatment and disposal technology characterized by:
 - a. The delivery of pretreated wastewater by gravity or pressure distribution to the engineered pad and sand bed assembly, followed by dispersal of the wastewater into the native soil; and
 - b. Wastewater movement through the engineered pad and sand bed assembly by gravity under unsaturated

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- b. The applicant may place the engineered pad system above grade, partially bury it, or fully bury it depending on site and service circumstances;
 - 5. The engineered pad system is constructed with durable materials and capable of withstanding stress from installation and operational service; and
 - 6. At least two inspection ports are installed in the engineered pad system to confirm unsaturated wastewater treatment conditions at diagnostic locations.
 - E. Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall place sand media to obtain a uniform density of 1.3 to 1.4 grams per cubic centimeter.
 - F. Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), an applicant shall inspect the backfill cover for physical damage or erosion and promptly repair the cover, if necessary.
- 2. An intermittent sand filter with a bottomless filter is designed so that it produces treated wastewater released to the native soil that meets the following criteria:
 - a. TSS of 20 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 20 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and
 - d. Total coliform level of 100,000 (Log₁₀ 5 colony forming units per 100 milliliters, 95th percentile).
 - C. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit specifications for the media proposed for use in the intermittent sand filter.
 - D. Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
 - 1. Pressurized wastewater delivery is from the septic tank or separate watertight chamber with a pump sized and controlled to deliver the pretreated wastewater to the top of the intermittent sand filter. The applicant shall ensure that the dosing rate is at least 4 doses per day and not more than 24 doses per day;
 - 2. The pressurized wastewater delivery system provides even distribution in the sand filter through good engineering practice. The applicant shall:
 - a. Specify all necessary controls, pipes, valves, orifices, filter cover materials, gravel, or other distribution media, and monitoring and servicing components in the design documents; and
 - b. Ensure that the cover and topsoil is 6 to 12 inches in depth and graded to drain;
 - 3. The sand filter containment vessel is watertight, structurally sound, durable, and capable of withstanding stress from installation and operational service. The applicant may place the intermittent sand filter above grade, partially buried, or fully buried depending on site and service circumstances;
 - 4. Media used in the intermittent sand filter is mineral sand and that the media is washed and conforms to "Standard Specification for Concrete Aggregates, C33-03," which is incorporated by reference in R18-9-E308(D)(2);
 - 5. The sand media depth is a minimum of 24 inches with the top and bottom surfaces level and the maximum wastewater loading rate is 1.0 gallons per day per square foot of inlet surface at the rated daily design flow;
 - 6. The underdrain system:
 - a. Is within the containment vessel;
 - b. Supports the filter media and all overlying loads from the unsupported construction above the top surface of the sand media;
 - c. Has sufficient void volume above the normal high level of the intermittent sand filter effluent to prevent saturation of the bottom of the sand media by a 24-hour power outage or pump malfunction; and
 - d. Includes necessary monitoring, inspection, and servicing features;
 - 7. Inspection ports are installed in the distribution media and in the underdrain;
 - 8. The bottomless filter is designed similar to the underdrain system, except that the sand media is positioned on top of the native soil absorption surface. The applicant shall ensure that companion modifications are made that eliminate the containment vessel bottom and underdrain and

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended to correct a manifest typographical error in subsection (B)(2) (Supp. 01-1). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E310. 4.10 General Permit: Intermittent Sand Filter, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.10 General Permit allows for the use of an intermittent sand filter receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
 - 1. Definition. For purposes of this Section, an "intermittent sand filter" means a treatment technology characterized by:
 - a. The pressurized delivery of pretreated wastewater to an engineered sand bed in a containment vessel equipped with an underdrain system or designed as a bottomless filter;
 - b. Delivered wastewater dispersed throughout the sand media by periodic doses from the delivery pump to maintain unsaturated flow conditions in the bed; and
 - c. Wastewater that is treated during passage through the media, collected by a bed underdrain chamber, and removed by pump or gravity to the disposal works, or wastewater that percolates downward directly into the native soil as part of a bottomless filter design.
 - 2. An applicant may use an intermittent sand filter if:
 - a. The native soil is excessively permeable,
 - b. There is little native soil overlying fractured or excessively permeable rock, or
 - c. The applicant desires a reduction in setback distances or minimum vertical separation.
- B. Performance. An applicant shall ensure that:
 - 1. An intermittent sand filter with underdrain system is designed so that it produces treated wastewater that meets the following criteria:
 - a. TSS of 10 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 10 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 40 milligrams per liter, 5-month arithmetic mean; and
 - d. Total coliform level or 1000 (Log₁₀ 3) colony forming units per 100 milliliters, 95th percentile; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

relocate the underdrain inspection port to ensure reliable indication of the presence or absence of water saturation in the sand media;

9. The native soil absorption system is designed to ensure that the linear loading rate does not exceed site disposal capability; and
 10. The bottomless sand filter discharge rate per unit area to the native soil does not exceed the adjusted soil absorption rate for the quality of wastewater specified in subsection (B)(2).
- E.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall place the containment vessel, underdrain system, filter media, and pressurized wastewater distribution system in an excavation with adequate foundation and each layer installed to prevent differential settling and promote a uniform density throughout of 1.3 to 1.4 grams per cubic centimeter within the sand media.
- F.** Operation and maintenance requirements. The applicant shall follow the applicable requirements in R18-9-A313(B).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E311. 4.11 General Permit: Peat Filter, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.11 General Permit allows for the use of a peat filter receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
1. Definition. For purposes of this Section, a "peat filter" means a disposal technology characterized by:
 - a. The dosed delivery of treated wastewater to the peat bed, which can be a manufactured module or a disposal bed excavated in native soil and filled with compacted peat;
 - b. Wastewater passing through the peat that is further treated by removal of positively charged molecules, filtering, and biological activity before entry into native soil; and
 - c. If the peat filter system is constructed as a disposal bed filled with compacted peat, wastewater that is absorbed into native soil at the bottom and sides of the bed.
 2. An applicant may configure a modular system if a portion of the wastewater that has passed through the peat filter is recirculated back to the pump chamber.
 3. An applicant may use a peat filter system if:
 - a. The native soil is excessively permeable,
 - b. There is little native soil overlying fractured or excessively permeable rock,
 - c. A reduction in setback distances or minimum vertical separation is desired, or
 - d. Cold weather inhibits performance of other treatment or disposal technologies.
- B.** Performance. An applicant shall ensure that a peat filter is designed so that it produces treated wastewater that meets the following criteria:
1. TSS of 15 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 15 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 53 milligrams per liter, 5-month arithmetic mean; and
 4. Total coliform level of 100,000 (Log₁₀ 5) colony forming units per 100 milliliters, 95th percentile.

- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. Specifications for the peat media proposed for use in the peat filter or provided in the peat module, including:
 - a. Porosity;
 - b. Degree of humification;
 - c. pH;
 - d. Particle size distribution;
 - e. Moisture content;
 - f. A statement of whether the peat is air dried, and whether the peat is from sphagnum moss or bog cotton; and
 - g. A description of the degree of decomposition;
 2. Specifications for installing the peat media; and
 3. If a peat module is used:
 - a. The name and address of the manufacturer,
 - b. The model number, and
 - c. A copy of the manufacturer's warranty.
- D.** Design requirements.
1. If a pump tank is used to dose the peat module or bed, an applicant shall:
 - a. Ensure that the pump tank is sized to contain the dose volume and a reserve volume above the high water alarm that will contain the volume of daily design flow; and
 - b. Use a control panel with a programmable timer to dose at the applicable loading rate.
 2. Peat module system. In addition to the applicable requirements in R18-9-A312, the applicant shall:
 - a. Size the gravel bed supporting the peat filter modules to allow it to act as a disposal works and ensure that the bed is level, long, and narrow, and installed on contour to optimize lateral movement away from the disposal area;
 - b. For modules designed to allow wastewater flow through the peat filter and base material into underlying native soil, size the base on which the modules rest to accommodate the soil absorption rate of the native soil;
 - c. Place fill over the module so that it conforms to the manufacturer's specification. If the fill is planted, the applicant shall use only grass or shallow rooted plants; and
 - d. Ensure that the peat media depth is at least 24 inches, the peat is installed with the top and bottom surfaces level, and the maximum wastewater loading rate is 5.5 gallons per day per square foot of inlet surface at the rated daily design flow, unless the Department approves a different wastewater loading rate under R18-9-A309(E).
 3. Peat filter bed system. In addition to the applicable requirements in R18-9-A312, the applicant shall ensure that:
 - a. The bed is filled with peat derived from sphagnum moss and compacted according to the installation specification;
 - b. The maximum wastewater loading rate is 1 gallon per day per square foot of inlet surface at the rated daily design flow;
 - c. At least 24 inches of installed peat underlies the distribution piping and 10 to 14 inches of installed peat overlies the piping;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- d. The cover material over the peat filter bed is slightly mounded to promote runoff of rainfall. The applicant shall not place additional fill over the peat; and
- e. The peat is air dried, with a porosity greater than 90 percent, and a particle size distribution of 92 to 100 percent passing a No. 4 sieve and less than 8 percent passing a No. 30 sieve.
- E.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), the applicant shall:
1. Peat module system.
 - a. Compact the bottom of all excavations for the filter modules, pump, aerator, and other components to provide adequate foundation, slope the bottom toward the discharge to minimize ponding, and ensure that the bottom is flat, and free of debris, rocks, and sharp objects. If the excavation is uneven or rocky, the applicant shall use a bed of sand or pea gravel to create an even, smooth surface;
 - b. Place the peat filter modules on a level, 6-inch deep gravel bed;
 - c. Place backfill around the modules and grade the backfill to divert surface water away from the modules;
 - d. Not place objects on or move objects over the system area that might damage the module containers or restrict airflow to the modules;
 - e. Cover gaps between modules to prevent damage to the system;
 - f. Fit each system with at least one sampling port that allows collection of wastewater at the exit from the final treatment module;
 - g. Provide the modules and other components with anti-buoyancy devices to ensure stability in the event of flooding or high water table conditions; and
 - h. Provide a mechanism for draining the filter module inlet line; or
 2. Peat filter bed system.
 - a. Scarify the bottom and sides of the leaching bed excavation to remove any smeared surfaces, and:
 - i. Unless directed by an installation specification consistent with this Chapter, place peat media in the excavation in 6-inch lifts; and
 - ii. Compact each lift before the next lift is added. The applicant shall take care to avoid compaction of the underlying native soil;
 - b. Lay distribution pipe in trenches cut in the compacted peat, and
 - i. Ensure that at least 3 inches of aggregate underlie the pipe to reduce clogging of holes or scouring of the peat surrounding the pipe, and
 - ii. Place peat on top of and around the sides of the pipes.
- F.** Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), the permittee shall inspect the finished grade over the peat filter for proper drainage, protection from damaging loads, and root invasion of the wastewater distribution system and perform maintenance as needed.
- Historical Note**
- New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).
- R18-9-E312. 4.12 General Permit: Textile Filter, Less Than 3000 Gallons Per Day Design Flow**
- A.** A 4.12 General Permit allows for the use of a textile filter receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
1. Definition. For purposes of this Section, a "textile filter" means a disposal technology characterized by:
 - a. The flow of wastewater into a packed bed filter in a containment structure or structures. The packed bed filter uses a textile filter medium with high porosity and surface area; and
 - b. The textile filter medium provides further treatment by removing suspended material from the wastewater by physical straining, and reducing nutrients by microbial action.
 2. An applicant may use a textile filter in conjunction with a two-compartment septic tank or a two-tank system if the second compartment or tank is used as a recirculation and blending tank. The applicant shall divert a portion of the wastewater flow from the textile filter back into the second tank for further treatment.
 3. An applicant may use a textile filter if:
 - a. Nitrogen reduction is desired,
 - b. The native soil is excessively permeable,
 - c. There is little native soil overlying fractured or excessively permeable rock, or
 - d. A reduction in setback distances or minimum vertical separation is desired.
- B.** Performance. An applicant shall ensure that a textile filter is designed so that it produces treated wastewater that meets the following criteria:
1. TSS of 15 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 15 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 30 milligrams per liter, five-month arithmetic mean, or 15 milligrams, five-month arithmetic mean per liter if documented under subsection (C)(4); and
 4. Total coliform level of 100,000 (Log₁₀ 5) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. The name and address of the filter manufacturer;
 2. The filter model number;
 3. A copy of the manufacturer's filter warranty;
 4. If the system is for nitrogen reduction to 15 milligrams per liter, five-month arithmetic mean, specifications on the nitrogen reduction performance of the filter system and corroborating third-party test data;
 5. The manufacturer's operation and maintenance recommendations to achieve a 20-year operational life; and
 6. If a pump or aerator is required for proper operation, the pump or aerator model number and a copy of the manufacturer's warranty.
- D.** Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
1. The textile medium has a porosity of greater than 80 percent;
 2. The wastewater is delivered to the textile filter by gravity flow or a pump;
 3. If a pump is used to dose the textile filter, the pump and appurtenances meet following criteria:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. The textile media loading rate and wastewater recirculation rate are based on calculations that conform with performance data listed in the reviewed product list maintained by the Department as required under R18-9-A309(E),
 - b. The tank and recirculation components are sized to contain the dose volume and a reserve volume above the high water level alarm that will contain the volume of daily design flow, and
 - c. A control panel with a programmable timer is used to dose the textile media at the applicable loading rate and wastewater recirculation rate.
- E.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall:
- 1. Before placing the filter modules, slope the bottom of the excavation for the modules toward the discharge point to minimize ponding;
 - 2. Ensure that the bottom of all excavations for the filter modules, pump, aerator, or other components is level and free of debris, rocks, and sharp objects. If the excavation is uneven or rocky, the applicant shall use a bed of sand or pea gravel to create an even, smooth surface;
 - 3. Provide the modules and other components with anti-buoyancy devices to ensure they remain in place in the event of high water table conditions; and
 - 4. Provide a mechanism for draining the filter module inlet line.
- F.** Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313, the permittee shall not flush corrosives or other materials known to damage the textile material into any drain that transmits wastewater to the on-site wastewater treatment facility.
- e. An engineered sampling assembly is installed at the midpoint of the disposal line run and at the base of the composite bed during construction to monitor system performance.
 - 2. An applicant may use a separated wastewater streams, denitrifying system where total nitrogen reduction is required under this Article before release to the native soil.
- B.** Performance. An applicant shall ensure that a separated wastewater streams, denitrifying system is designed so that the treated wastewater released to the native soil meets the following criteria:
- 1. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 - 2. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 - 3. Total nitrogen (as nitrogen) of 30 milligrams per liter, five-month arithmetic mean; and
 - 4. Total coliform level of 1,000,000 (Log₁₀ 6) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. The applicant shall comply with the Notice of Intent to Discharge requirements in R18-9-A301(B) and R18-9-A309(B).
- D.** Design, installation, operation, and maintenance requirements. The applicant shall comply with the applicable design, installation, operation, and maintenance requirements in R18-9-A312, R18-9-A313(A), and R18-9-A313(B).
- E.** Reference design.
- 1. An applicant may use a separated wastewater streams, denitrifying system achieving the performance requirements specified in subsection (B) by following a reference design on file with the Department.
 - 2. The applicant shall file a form provided by the Department for supplemental information about the proposed system with the applicant's submittal of the Notice of Intent to Discharge.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E313. 4.13 General Permit: Denitrifying System Using Separated Wastewater Streams, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.13 General Permit allows for the use of a separated wastewater streams, denitrifying system for a dwelling.
- 1. Definition. For purposes of this Section a "denitrifying system using wastewater streams" means a gravity flow treatment and disposal system for a dwelling that requires separate plumbing drains for conducting dishwasher, kitchen sink, and toilet flush water to wastewater treatment tank "A" and all other wastewater to a wastewater treatment tank "B."
 - a. Treated wastewater from tanks "A" and "B" is delivered to an engineered composite disposal bed system that includes an upper distribution pipe to deliver treated wastewater from tank "A" to a columnar celled, sand-filled bed.
 - b. The wastewater drains downward into a sand bed, then into a pea gravel bed with an internal distribution pipe system that delivers the treated wastewater from tank "B."
 - c. The entire composite bed is constructed within an excavation about 6 feet deep.
 - d. The system operates under gravity flow from tanks "A" and "B."

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E314. 4.14 General Permit: Sewage Vault, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.14 General Permit allows for the use of a sewage vault that receives sewage.
- 1. An applicant may use a sewage vault if a severe site or operational constraint prevents installation of a conventional septic tank and disposal works or any other on-site wastewater treatment facility allowed under this Article; or
 - 2. An applicant may install a sewage vault as a temporary measure if connection to a sewer or installation of another on-site wastewater treatment facility occurs within two years of the connection or installation.
- B.** Performance. An applicant shall:
- 1. Not allow a discharge from a sewage vault to the native soil or land surface, and
 - 2. Pump and dispose of vault contents at a sewage treatment facility or other sewage disposal mechanism allowed by law.
- C.** Notice of Intent to Discharge. The applicant shall comply with the Notice of Intent to Discharge requirements in R18-9-A301(B) and R18-9-A309(B), except that a site investigation under R18-9-A309(B)(1) is not required if the reason for using a sewage vault is an operational constraint that exists irrespec-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

tive of the results of a site investigation conducted under R18-9-A310(B).

- D.** Design requirements. In addition to the requirements in R18-9-A312, an applicant shall:
1. Install a sewage vault with a capacity that is at least 10 times the daily design flow determined by R18-9-A314(4)(a)(i),
 2. Use design elements to prevent the buoyancy of the vault if installed in an area where a high groundwater table may impinge on the vault,
 3. Test the sewage vault for leakage using the procedure under R18-9-A314(5)(d). The tank passes the water test if the water level does not drop over a 24-hour period,
 4. Install an alarm or signal on the vault to indicate when 85 percent of the vault capacity is reached, and
 5. Contract with a person who licensed a vehicle under 18 A.A.C. 13, Article 11 to pump out the vault on a schedule specified within the contract to ensure that the vault is pumped before full.
- E.** Installation, operation, and maintenance requirements. The applicant shall comply with the applicable installation, operation, and maintenance requirements in R18-9-A313(A) and (B).
- F.** Reference design.
1. An applicant may use a sewage vault that achieves the performance requirements in subsection (B) by following a reference design on file with the Department.
 2. The applicant shall file a form provided by the Department for supplemental information about the proposed storage vault with the applicant's submittal of the Notice of Intent to Discharge.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-E315. 4.15 General Permit: Aerobic System Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.15 General Permit allows for the construction and use of an aerobic system that uses aeration for treatment.
1. Definition. For purposes of this Section, an "aerobic system" means a treatment unit consisting of components that:
 - a. Mechanically introduce oxygen to wastewater,
 - b. Typically provide clarification of the wastewater after aeration, and
 - c. Convey the treated wastewater by pressure or gravity distribution to the disposal works.
 2. An applicant may use an aerobic system if:
 - a. Enhanced biological processing is needed to treat wastewater with high organic content,
 - b. A soil or site condition is not adequate for installation of a standard septic tank and disposal works under R18-9-E302,
 - c. A highly treated wastewater amenable to disinfection is needed, or
 - d. Nitrogen removal from the wastewater is needed and removal performance of the system is documented according to subsection (C)(6).
- B.** Performance.

1. An applicant shall ensure that the aerobic system is designed so that the treated wastewater released to the native soil meets the following criteria:
 - a. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean, or as low as 15 milligrams, five-month arithmetic mean per liter if documented under subsection (C)(6); and
 - d. Total coliform level of 300,000 (Log₁₀ 5.5) colony forming units per 100 milliliters, 95th percentile.
 2. An applicant may use an aerobic system that meets the following less stringent performance criteria if the aerobic technology is listed by the Department under R18-9-A309(E) and the Department bases its review and listing on the technology being less costly and simpler to operate when compared to other aerobic technologies:
 - a. TSS of 60 milligrams per liter, 30-day arithmetic mean;
 - b. BOD₅ of 60 milligrams per liter, 30-day arithmetic mean;
 - c. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean, or as low as 15 milligrams, five month arithmetic mean per liter, if documented under subsection (C)(6); and
 - d. Total coliform level of 1,000,000 (Log₁₀ 7) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. The name and address of the aerobic system manufacturer;
 2. The model number of the aerobic system;
 3. Evidence of performance specified in subsection (B)(1) or (B)(2), as applicable;
 4. A list of pretreatment components needed to meet performance requirements;
 5. A copy of the manufacturer's warranty and operation and maintenance recommendations to achieve performance over a 20-year operational life; and
 6. If the aerobic system will be used for nitrogen removal from the wastewater, either:
 - a. Evidence of a valid product listing under R18-9-E309(E) indicating nitrogen removal performance, or
 - b. Specifications and third party test data corroborating nitrogen reduction to the intended level.
- D.** Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
1. The wastewater is delivered to the aerobic treatment unit by gravity flow either directly or by a lift pump;
 2. An interceptor or other pretreatment device is incorporated if necessary to meet the performance criteria specified in subsection (B)(1) or (2), or if recommended by the manufacturer for pretreatment if a garbage disposal appliance is used;
 3. A clarifier is provided after aeration for any treatment technology that achieves performance that is equal to or better than the performance criteria specified in subsection (B)(1); and
 4. Ports for inspection and monitoring are provided to verify performance.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- E.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall ensure that:
1. The installation of the aerobic treatment components conforms to manufacturer's specifications that do not conflict with Articles 1 and 3 of this Chapter and to the design documents specified in the Construction Authorization issued under R18-9-A301(D)(1)(c); and
 2. Excavation and foundation work, and backfill placement is performed to prevent differential settling and adverse drainage conditions.
- F.** Operation and maintenance requirements. The permittee shall:
1. Follow the applicable requirements in R18-9-A313(B), and
 2. Ensure that filters are cleaned and replaced as necessary.
- G.** Reference design.
1. An applicant may use an aerobic system that achieves the applicable performance requirements by following a reference design on file with the Department.
 2. An applicant using a reference design shall submit, with the Notice of Intent to Discharge, supplemental information specific to the proposed installation on a form approved by the Department.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E316. 4.16 General Permit: Nitrate-Reactive Media Filter, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.16 General Permit allows for the construction and use of a nitrate-reactive media filter receiving pretreated wastewater.
1. Definition. "Nitrate-reactive media filter" means a treatment technology characterized by:
 - a. The application of pretreated, nitrified wastewater to a packed bed filter in a containment structure. A packed bed filter consists of nitrate-reactive media that receives pretreated wastewater under appropriate design and operational conditions, and
 - b. The ability of the nitrate-reactive filter to further treat the nitrified wastewater by removing total nitrogen by chemical and physical processes.
 2. An applicant shall use a nitrate-reactive media filter with a treatment or disposal works to pretreat and dispose of the wastewater.
 3. An applicant may use a nitrate-reactive media filter if nitrogen reduction is required under this Article.
- B.** Restrictions. The applicant shall not use any product to supply pretreated wastewater to the nitrate-reactive media filter unless:
1. The product meets the pretreatment requirements for the filter based on product performance information in the product listing, and
 2. The product is listed by the Department as a reviewed product under R18-9-A309(E).
- C.** Performance. An applicant shall ensure that a nitrate-reactive media filter is designed so that it produces treated wastewater that does not exceed the following criteria:
1. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 10 milligrams per liter, five-month arithmetic mean; and
 4. Total coliform level of 1,000,000 (Log₁₀ 6) colony forming units per 100 milliliters, 95th percentile.

- D.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
1. The name and address of the filter manufacturer;
 2. The filter model number;
 3. The manufacturer's requirements for pretreated wastewater supplied to the nitrate-reactive media filter;
 4. The manufacturer's specifications for design, installation, and operation for the nitrate-reactive media filter system and appurtenances;
 5. The manufacturer's warranty for the nitrate-reactive media filter system and appurtenances;
 6. The manufacturer's operation and maintenance recommendations to achieve a 20-year operational life for the nitrate-reactive media filter system and appurtenances; and
 7. The manufacturer name and model number for all appurtenances that significantly contribute to achieving the performance required in subsection (C).

- E.** Design requirements. In addition to the applicable design requirements specified in R18-9-A312, an applicant shall ensure that:
1. The nitrate-reactive media filter and appurtenances conform with manufacturer's specifications,
 2. The loading rate of pretreated wastewater to the nitrate-reactive media inlet surface meets the manufacturer's specification and does not exceed 5.00 gallons per day per square foot of media inlet surface area, and
 3. The bed packed with nitrate reactive media is at least 24 inches thick.
- F.** Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall ensure that:
1. The nitrate-reactive media filter and appurtenances are installed according to manufacturer's specifications to achieve proper wastewater treatment, hydraulic performance, and operational life; and
 2. Anti-buoyancy devices are installed when high water table or extreme soil saturation conditions are likely during operational life of the facility.
- G.** Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B) and the manufacturer's specifications for the nitrate-reactive media filter, the permittee shall not dispose of corrosives or other materials that are known to damage the nitrate-reactive media filter system into the on-site wastewater treatment facility.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (Supp. 05-3).

R18-9-E317. 4.17 General Permit: Cap System, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.17 General Permit allows for the use of a cap fill cover over a conventional trench disposal works receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
1. Definition. For purposes of this Section, a "cap system" means a disposal technology characterized by:
 - a. A soil cap, consisting of engineered fill placed over a trench that is not as deep as a trench allowed by R18-9-E302; and
 - b. A design that compensates for reduced trench depth by maintaining and enhancing the infiltration of

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

wastewater into native soil through the trench side-walls.

2. An applicant may use a cap system if:
 - a. There is little native soil overlying fractured or excessively permeable rock, or
 - b. A high water table does not allow the minimum vertical separation to be met by a system authorized by R18-9-E302.
- B. Performance. An applicant shall ensure that the design soil absorption rate and vertical separation complies with this Chapter for a trench, based on the following performance, unless additional pretreatment is provided:
 1. TSS of 75 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 150 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and
 4. Total coliform level of 100,000,000 (Log₁₀ 8) colony forming units per 100 milliliters, 95th percentile.
- C. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit specifications for the proposed cap fill material.
- D. Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
 1. The soil texture from the natural grade to the depth of the layer or the water table that limits the soil for unsaturated wastewater flow is no finer than silty clay loam;
 2. Cap fill material used is free of debris, stones, frozen clods, or ice, and is the same as or one soil group finer than that of the disposal site material, except that the applicant shall not use fill material finer than clay loam as an additive;
 3. Trench construction.
 - a. The trench bottom is at least 12 inches below the bottom of the disposal pipe and not more than 24 inches below the natural grade, and the trench bottom and disposal pipe are level;
 - b. The aggregate cover over the disposal pipe is 2 inches thick and the top of the aggregate cover is level and not more than 9 inches above the natural grade;
 - c. The cap fill cover above the top of the aggregate cover is at least 9 inches but not more than 18 inches thick. The applicant shall ensure that:
 - i. The cap surface is protected to prevent erosion and sloped to route surface drainage around the ends of the trench; and
 - ii. If the top of the aggregate is at or below the original ground surface, the cap surface has side slopes not more than one vertical to three horizontal; or
 - iii. If the top of the aggregate is above the original ground surface, the horizontal extent of the finished fill edges is at least 10 feet beyond the nearest trench sidewall or endwall;
 - d. The criteria for trench length, bottom width and spacing, and disposal pipe size is the same as that for the trench system prescribed in R18-9-E302;
 - e. Permeable geotextile fabric is placed on the aggregate top, trench end, and sidewalls extending above natural grade;
 - f. The native soil within the disposal site and the adjacent downgradient area to a 50-foot horizontal distance does not exceed a 12 percent slope if the top of the aggregate cover extends above the natural grade at any location along the trench length. The applicant shall ensure that the slope within the disposal site and the adjacent downgradient area to a 50-foot horizontal distance does not exceed 20 percent if the top of the aggregate cover does not extend above the natural grade;
 - g. The fill material is compacted to a density of 90 percent of the native soil if the invert elevation of the disposal pipe is at or above the natural grade at any location along the trench length;
 - h. At least one observation port is installed to the bottom of each cap fill trench;
 - i. The effective absorption area for each trench is the sum of the trench bottom area and the sidewall area. The height of the sidewall used for calculating the sidewall area is the vertical distance between the trench bottom and the lowest point of the natural land surface along the trench length; and
 - j. If the applicant uses correction factors for soil absorption rate under R18-9-A312(D)(3) and minimum vertical separation under R18-9-A312(E), additional wastewater pretreatment is provided.
- E. Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall prepare the disposal site when high soil moisture is not present and equipment operations do not create platy soil conditions. The applicant shall:
 1. Plow or scarify the fill area to disrupt the vegetative mat while avoiding smearing,
 2. Construct trenches as specified in subsection (D)(3),
 3. Scarify the site and apply part of the cap fill to the fill area and blend the fill with the scarified native soil within the contact layers, and
 4. Follow the construction design specified in the Construction Authorization issued under R18-9-A301(D)(1)(c).
- F. Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), the permittee shall inspect and repair the cap fill and other surface features as needed to ensure proper disposal function, proper drainage of surface water, and prevention of damaging loads on the cap.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E318. 4.18 General Permit: Constructed Wetland, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.18 General Permit allows for the use of a constructed wetland receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
 1. Definition. "Constructed wetland" means a treatment technology characterized by a lined excavation, filled with a medium for growing plants and planted with marsh vegetation. The treated wastewater flows horizontally through the medium in contact with the aquatic plants.
 - a. As the wastewater flows through the wetland system, additional treatment is provided by filtering, settling, volatilization, and evapotranspiration.
 - b. The wetland system allows microorganisms to break down organic material and plants to take up nutrients and other pollutants.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. The wastewater treated by a wetland system is discharged to a subsurface soil disposal system.
- 2. An applicant may use a constructed wetland if further wastewater treatment is needed before disposal.
- B.** Performance. An applicant shall ensure that a constructed wetland is designed so that it produces treated wastewater that meets the following criteria:
 - 1. TSS of 20 milligrams per liter, 30-day arithmetic mean;
 - 2. BOD₅ of 20 milligrams per liter, 30-day arithmetic mean;
 - 3. Total nitrogen (as nitrogen) of 45 milligrams per liter, five-month arithmetic mean; and
 - 4. Total coliform level of 100,000 (Log₁₀ 5) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. The applicant shall comply with the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B).
- D.** Design, installation, operation, and maintenance requirements. The permittee shall comply with the applicable design, installation, operation, and maintenance requirements in R18-9-A312, R18-9-A313(A), and R18-9-A313(B).
- E.** Reference design.
 - 1. An applicant may use a constructed wetland that achieves the performance requirements in subsection (B) by following a reference design on file with the Department.
 - 2. The applicant shall file a form provided by the Department for supplemental information about the proposed constructed wetland with the applicant's submittal of the Notice of Intent to Discharge.
- 4. Total coliform level of 100,000 (Log₁₀ 5) colony forming units per 100 milliliters, 95th percentile.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit specifications for the proposed media in the trench.
- D.** Design requirements. In addition to the applicable requirements in R18-9-A312, an applicant shall ensure that:
 - 1. The media used in the trench is mineral sand, crushed glass, or cinder sand and that:
 - a. The media conforms to "Standard Specifications for Concrete Aggregates, C33-03," which is incorporated by reference in R18-9-E308(D)(2), "Standard Test Method for Materials Finer than 75-µm (No. 200) Sieve in Mineral Aggregates by Washing, C117-04 (2004)," published by the American Society for Testing and Materials, or an equivalent method approved by the Department. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959; and
 - b. Sieve analysis complies with the "Standard Test Method for Materials Finer than 75-µm (No. 200) Sieve in Mineral Aggregates by Washing, C11704," which is incorporated by reference in subsection (D)(1)(a), or an equivalent method approved by the Department;
 - 2. Trenches.
 - a. Distribution pipes are capped on the end;
 - b. The spacing between trenches is at least two times the distance between the bottom of the distribution pipe and the bottom of the trench or 5 feet, whichever is greater;
 - c. The inlet filter media surface, wastewater distribution pipe, and bottom of the trench are level and the maximum effluent loading rate is not more than 1.0 gallon per day per square foot of sand media inlet surface;
 - d. The depth of sand below the gravel layer containing the distribution system is at least 24 inches;
 - e. The gravel layer containing the distribution system is 5 to 12 inches thick, at least 36 inches wide, and level;
 - f. Permeable geotextile fabric is placed at the base of and along the sides of the gravel layer, as necessary. The applicant shall ensure that:
 - i. Geotextile fabric is placed on top of the gravel layer, and
 - ii. Any cover soil placed on top of the geotextile fabric is capable of maintaining vegetative growth while allowing passage of air;
 - g. At least one observation port is installed to the bottom of each sand lined trench;
 - h. If the trench is installed in excessively permeable soil or rock, at least 1 foot of loamy sand is placed in the trench below the filter media. The minimum vertical separation distance is measured from the bottom of the loamy sand; and

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E319. 4.19 General Permit: Sand-Lined Trench, Less Than 3000 Gallons Per Day Design Flow

- A.** A 4.19 General Permit allows for the use of a sand-lined trench receiving wastewater treated to a level equal to or better than that specified in R18-9-E302(B).
 - 1. Definition. For purposes of this Section, a "sand-lined trench" means a disposal technology characterized by:
 - a. Engineered placement of sand or equivalently graded glass in trenches excavated in native soil,
 - b. Wastewater dispersed throughout the media by pressure distribution technology as specified in R18-9-E304 using a timer-controlled pump in periodic uniform doses that maintain unsaturated flow conditions, and
 - c. Wastewater treated during travel through the media and absorbed into the native soil at the bottom of the trench.
 - 2. An applicant may use a sand-lined trench if:
 - a. The native soil is excessively permeable,
 - b. There is little native soil overlying fractured or excessively permeable rock, or
 - c. Reduction in setback distances, or minimum vertical separation is desired.
- B.** Performance. An applicant shall ensure that a sand-lined trench is designed so that treated wastewater released to the native soil meets the following criteria:
 - 1. TSS of 20 milligrams per liter, 30-day arithmetic mean;
 - 2. BOD₅ of 20 milligrams per liter, 30-day arithmetic mean;
 - 3. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- i. The trench design is based on the design flow, native soil absorption area at the trench bottom, minimum vertical separation below the trench bottom, design effluent infiltration rate at the top of the sand fill, and the adjusted soil absorption rate for the final effluent quality; and
- 3. The dosing system consists of a timer-controlled pump, electrical components, and distribution network and that:
 - a. Orifice spacing on the distribution piping does not exceed 4 square feet of media infiltrative surface area per orifice, and
 - b. The dosing rate is at least four doses per day and not more than 24 doses per day.
- E. Installation requirements. In addition to the applicable requirements in R18-9-A313(A), an applicant shall ensure that the filter media is placed in the trench to prevent differential settling and promote a uniform density throughout of 1.3 to 1.4 grams per cubic centimeter.
- F. Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B), the permittee shall ensure that:
 - 1. The septic tank filter and pump tank are inspected and cleaned;
 - 2. The dosing tank pump screen, pump switches, and floats are cleaned yearly and any residue is disposed of lawfully; and
 - 3. Lateral lines are flushed and the liquid waste discharged into the treatment system headworks.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E320. 4.20 General Permit: Disinfection Devices, Less Than 3000 Gallons Per Day Design Flow

- A. A 4.20 General Permit allows for the use of a disinfection device to reduce the level of harmful organisms in wastewater, provided the wastewater is pretreated to equal or better than

the performance criteria in R18-9-E315(B)(1)(a). An applicant may use a disinfection device if:

- 1. The disinfection device kills the microorganisms by exposing the wastewater to heat, ultraviolet radiation, or a chemical disinfectant.
- 2. Some means of disinfection is required before discharge.
- 3. A reduction in harmful microorganisms, as represented by the total coliform level, is needed for surface or near surface disposal of the wastewater or reduction of the minimum vertical separation distance specified in R18-9-A312(E) is desired.
- B. Restrictions.
 - 1. Unless the disinfection device is designed to operate without electricity, an applicant shall not install the device if electricity is not permanently available at the site.
 - 2. The 4.20 General Permit does not authorize a disinfection device that releases chemical disinfectants or disinfection byproducts harmful to plants or wildlife in the discharge area or causes a violation of an Aquifer Water Quality Standard.
- C. Performance. An applicant shall ensure that:
 - 1. A fail-safe wastewater control or operational process is incorporated to prevent a release of inadequately treated wastewater;
 - 2. The performance of a disinfection device meets the level of disinfection needed for the type of disposal and produces effluent that:
 - a. Is nominally free of coliform bacteria;
 - b. Is clear and odorless, and
 - c. Has a dissolved oxygen content of at least 6 milligrams per liter;
- D. Design requirements. An applicant shall ensure that an on-site wastewater treatment facility with a disposal works designed to discharge to the land surface includes disinfection technology that conforms with the following requirements:
 - 1. Chlorine disinfection.
 - a. Available chlorine is maintained as indicated in the following table:

| pH of Wastewater (s.u.) | Required Concentration of Available Chlorine in Wastewater (mg/L) | |
|-------------------------|--|--|
| | Wastewater to the Disinfection Device Meets a TSS of 30 mg/L and BOD5 of 30 mg/L | Wastewater to the Disinfection Device Meets a TSS of 20 mg/L and BOD5 of 20 mg/L |
| 6 | 15 – 30 | 6 – 10 |
| 7 | 20 – 35 | 10 – 20 |
| 8 | 30 – 45 | 20 – 35 |

- b. The minimum chlorine contact time is 15 minutes for wastewater at 70°F and 30 minutes for wastewater at 50°F, based on a flow equal to four times the daily design flow;
- 2. Contact chambers are watertight and made of plastic, fiberglass, or other durable material and are configured to prevent short-circuiting; and
- 3. For a device that disinfects by another method other than chlorine disinfection, dose and contact time are determined to reliably produce treated wastewater that is nominally free of coliform bacteria, based on a flow equal to four times the daily design flow.
- E. Operation and maintenance. A permittee shall ensure that:
 - 1. If the disinfection device relies on the addition of chemicals for disinfection, the device is operated to minimize

- the discharge of disinfection chemicals while achieving the required level of disinfection; and
- 2. The disinfection device is inspected and maintained at least once every three months by a qualified person.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

R18-9-E321. 4.21 General Permit: Surface Disposal, Less Than 3000 Gallons Per Day Design Flow

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- A.** A 4.21 General Permit allows for surface application of treated wastewater that is nominally free of coliform bacteria produced by the treatment works of an on-site wastewater treatment facility.
- B.** Performance. An applicant shall ensure that the treated wastewater distributed for surface application meets the following criteria:
1. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 2. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 3. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean;
 4. Is nominally free of total coliform bacteria as indicated by a total coliform level of Log₁₀ 0 colony forming units per 100 milliliters, 95th percentile.
- C.** Restrictions. The applicant shall not install the disposal works if weather records indicate that:
1. Average minimum temperature in any month is 20°F or less, or
 2. Over 1/3 of the average annual precipitation falls in a 30-day period.
- D.** Design requirements. An applicant shall ensure that:
1. The land surface application rate does not exceed the lowest application rate as determined under R18-9-A312(D) minus no greater than 50 percent of the evapotranspiration that may occur during the month with the least evapotranspiration in any soil zone within the top 5 feet of soil;
 2. The design incorporates sprinklers, bubbler heads, or other dispersal components that optimize wastewater loading rates and prevent ponding on the land surface;
 3. The design specifies containment berms:
 - a. Compacted to a minimum of 95 percent Proctor;
 - b. Designed to contain the runoff of the 10-year, 24-hour storm event in addition to the daily design flow; and
 - c. Designed to remain intact in the event of a more severe rainfall event; and
 4. The design incorporates placement of signage on hose bibs, human ingress points to the surface disposal area, and at intervals around the perimeter of the surface disposal area to provide notification of use of treated wastewater and a warning against ingestion.
- E.** Installation requirements. An applicant shall ensure that installation of the wastewater dispersal components conforms to manufacturer's specifications that do not conflict with this Article and to the design documents specified in the Construction Authorization issued under R18-9-A301(D)(1)(c).
- F.** Operation and maintenance. In addition to the requirements specified in R18-9-A313(B), the permittee shall operate and maintain the surface disposal works to:
1. Prevent treated wastewater from coming into contact with drinking fountains, water coolers, or eating areas;
 2. Contain all treated wastewater within the bermed area; and
 3. Ensure that hose bibs discharging treated wastewater are secured to prevent use by the public.
- A.** A 4.22 General Permit allows for the construction and use of a subsurface drip irrigation disposal works that receives high quality wastewater from an on-site wastewater treatment facility to dispense the wastewater to an irrigation system that is buried at a shallow depth in native soil. A 4.22 General Permit includes a pressure distribution system under R18-9-E304.
1. The subsurface drip irrigation disposal works is designed to disperse the treated wastewater into the soil under unsaturated conditions by pressure distribution and timed dosing. The applicant shall ensure that the pressure distribution system meets the requirements specified in R18-9-E304, and the Department shall consider whether the requirements of R18-9-E304 are met when processing the application under R18-9-A301(B).
 2. A subsurface drip irrigation disposal works reduces the downward percolation of wastewater by enhancing evapotranspiration to the atmosphere.
 3. An applicant may use a subsurface drip irrigation disposal works to overcome site constraints, such as high groundwater, shallow soils, slowly permeable soils, or highly permeable soils, or if water conservation is needed.
 4. The subsurface drip irrigation disposal works includes pipe, pressurization and dosing components, controls, and appurtenances to reliably deliver treated wastewater to driplines using supply and return manifold lines.
- B.** Performance. An applicant shall ensure that:
1. Treated wastewater that meets the following criteria is delivered to a subsurface drip irrigation disposal works:
 - a. Performance Category A.
 - i. TSS of 20 milligrams per liter, 30-day arithmetic mean;
 - ii. BOD₅ of 20 milligrams per liter, 30-day arithmetic mean;
 - iii. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and
 - iv. Total coliform level of one colony forming unit per 100 milliliters, 95th percentile; or
 - b. Performance Category B.
 - i. TSS of 30 milligrams per liter, 30-day arithmetic mean;
 - ii. BOD₅ of 30 milligrams per liter, 30-day arithmetic mean;
 - iii. Total nitrogen (as nitrogen) of 53 milligrams per liter, five-month arithmetic mean; and
 - iv. Total coliform level of 300,000 (Log₁₀ 5.5) colony forming units per 100 milliliters, 95th percentile; and
 2. The subsurface drip irrigation works is designed to meet the following performance criteria:
 - a. Prevention of ponding on the land surface, and
 - b. Incorporation of a fail-safe wastewater control or operational process to prevent inadequately treated wastewater from being discharged.
- C.** Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements in R18-9-A301(B), R18-9-A309(B), and R18-9-E304, the applicant shall submit:
1. Documentation of the pretreatment method proposed to achieve the wastewater criteria specified in subsection (B)(1), such as the type of pretreatment system and the manufacturer's warranty;
 2. Initial filter and drip irrigation flushing settings;
 3. Site evapotranspiration calculations if used to reduce the size of the disposal works; and

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Section repealed; new Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (Supp. 05-3).

R18-9-E322. 4.22 General Permit: Subsurface Drip Irrigation Disposal, Less Than 3000 Gallons Per Day Design Flow

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

4. If supplemental irrigation water is introduced to the subsurface drip irrigation disposal works, an identification of the cross-connection controls, backflow controls, and supplemental water sources.
- D. Design requirements.** In addition to the applicable design requirements specified in R18-9-A312, an applicant shall ensure that:
 1. The design requirements of R18-9-E304 are followed, except that:
 - a. The requirement for quick disconnects in R18-9-E304(D)(1)(c) is not applicable, and
 - b. The applicant may provide the reserve volume specified in R18-9-E304(D)(3)(a)(iv) in an oversized treatment tank or a supplemental storage tank;
 2. Drip irrigation components and appurtenances are properly placed.
 - a. Performance category A subsurface drip irrigation disposal works. The applicant shall ensure that:
 - i. Driplines and emitters are placed to prevent ponding on the land surface, and
 - ii. Cover material and placement depth follow manufacturer's requirements to prevent physical damage or ultraviolet degradation of components and appurtenances; or
 - b. Performance category B subsurface drip irrigation disposal works. The applicant shall ensure that:
 - i. Driplines and emitters are placed at least 6 inches below the surface of the native soil;
 - ii. A cover of soil or engineered fill is placed on the surface of the native soil to achieve a total emitter burial depth of at least 12 inches;
 - iii. Cover material and placement depth follow manufacturer's requirements to prevent physical damage or ultraviolet degradation of components and appurtenances; and
 - iv. The drip irrigation disposal works is not used for irrigating food crops;
 3. Wastewater is filtered upstream of the dripline emitters to remove particles 100 microns in size and larger;
 4. A pressure regulator is provided to limit the pressure of wastewater in the drip irrigation disposal works;
 5. Wastewater pipe meets the approved pressure rating in "Standard Specification for Poly (Vinyl Chloride) (PVC) Plastic Pipe, Schedules 40, 80, and 120, D1785-04a (2004)," or "Standard Specification for Chlorinated Poly (Vinyl Chloride) (CPVC) Plastic Pipe, Schedules 40 and 80, F441/F441M-02 (2002)," published by the American Society for Testing and Materials. This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959;
 6. The system design flushes the subsurface drip irrigation disposal works components with wastewater at a minimum velocity of 2 feet per second, unless the manufacturer's manual and warranty specify another flushing practice. The applicant shall ensure that piping and appurtenances allow the wastewater to be pumped in a line flushing mode of operation with discharge returned to the treatment system headworks;
 7. Air vacuum release valves are installed to prevent water and soil drawback into the emitters;
 8. Driplines.
 - a. Driplines are placed from 12 to 24 inches apart unless other configurations are allowed by the manufacturer's specifications;
 - b. Dripline installation and design requirements, including the allowable deflection, follow manufacturer's requirements;
 - c. The maximum length of a single dripline follows manufacturer's specifications to provide even distribution;
 - d. The dripline incorporates a herbicide to prevent root intrusion for at least 10 years;
 - e. The dripline incorporates a bactericide to reduce bacterial slime buildup;
 - f. Disinfection does not reduce the life of the bactericide or herbicide in the dripline;
 - g. Any return flow from a drip irrigation disposal works to the treatment works does not impair the treatment performance; and
 - h. When dripline installation is under subsection (E)(1)(b) or (c), backfill consists of the excavated soil or similar soil obtained from the site that is screened for removal of debris and rock larger than 1/2-inch;
 9. Emitters.
 - a. Emitters are spaced no more than 2 feet apart, and
 - b. Emitters are designed to discharge from 0.5 to 1.5 gallons per hour;
 10. A suitable backflow prevention system is installed if supplemental water for irrigation is introduced to the pumping system. The applicant shall not introduce supplemental water to the treatment works;
 11. The drip irrigation disposal works is installed in soils classified as:
 - a. Sandy clay loam, clay loam, silty clay loam, or finer with weak platy structure or in soil with a percolation rate from 45 to 120 minutes per inch;
 - b. Sandy clay loam, clay loam, silty clay loam, or silt loam with massive structure or in soil with a percolation rate from 31 to 120 minutes per inch; and
 - c. Other soils if an appropriate site-specific SAR is determined;
 12. The minimum vertical separation distances are 1/2 of those specified in R18-9-A312(E)(2) if the design evapotranspiration rate during the wettest 30-day period of the year is 50 percent or more of design flow, except that the applicant shall not use a minimum vertical separation distance less than 1 foot;
 13. In areas where freezing occurs, the irrigation system is protected as recommended by the manufacturer;
 14. If drip irrigation components are used for a disposal works using a shaded trench constructed in native soil, the following requirements are met:
 - a. The trench is between 12 and 24 inches wide;
 - b. The trench bottom is between 12 and 30 inches below the original grade of native soil and level to within 2 inches per 100 feet of length;
 - c. Two driplines are positioned in the bottom of the trench, not more than 4 inches from each sidewall;
 - d. The trench with the positioned driplines is filled to a depth of 6 to 10 inches with decomposed granite or C-33 sand or a mixture of both, with mixture com-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

position, if applicable, and placement specified on the construction drawing;

- e. A minimum of 8 inches of backfill is placed over the decomposed granite or C-33 sand fill to an elevation of 1 to 3 inches above the native soil finished grade;
 - f. Observation ports are placed at both ends of each shaded trench to confirm the saturated wastewater level during operation; and
 - g. A separation distance of 24 inches or more is maintained between the nearest sidewall of an adjacent trench; and
15. The soil absorption area used for design of a drip irrigation works is calculated using:
- a. For a design that uses the shaded trench method described in subsection (D)(14), the bottom and sidewall area of the shaded trench not more than 4 square feet per linear foot of trench; or
 - b. For all other designs, the number of emitters times an area for each emitter where the emitter area is a square centered on each emitter with the side dimension equal to the emitter separation distance selected by the designer in accordance with R18-9-E322(D)(9)(a), excluding all areas of overlap of adjacent squares.
- E. Installation requirements. In addition to the applicable requirements in R18-9-A313(A) and R18-9-E304, the applicant shall ensure that:
- 1. The dripline is installed by:
 - a. A plow mechanism that cuts a furrow, dispenses pipe, and covers the dripline in one operation;
 - b. A trencher that digs a trench 4 inches wide or less;
 - c. Digging the trench with hand tools to minimize trench width and disruption to the native soil; or
 - d. Without trenching, removing surface vegetation, scarifying the soil parallel with the contours of the land surface, placing the pipe grid, and covering with fill material, unless prohibited in subsection (D)(2)(b)(ii);
 - 2. Drip irrigation pipe is stored to preserve the herbicidal and bactericidal characteristics of the pipe;
 - 3. Pipe deflection conforms to the manufacturer's requirements and installation is completed without kinking to prevent flow restriction;
 - 4. A shaded trench drip irrigation disposal works is installed as specified in the design documents used for the Construction Authorization; and
 - 5. The pressure piping and electrical equipment are installed according to the Construction Authorization in R18-9-A301(D)(1)(c) and any local building codes.
- F. Operation and maintenance requirements. In addition to the applicable requirements in R18-9-A313(B) and R18-9-E304, the permittee shall:
- 1. Test any fail-safe wastewater control or operational process quarterly to ensure proper operation to prevent discharge of inadequately treated wastewater, and
 - 2. Maintain the herbicidal and bacteriological capability of the drip irrigation disposal works.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-E323. 4.23 General Permit: 3000 to less than 24,000

Gallons Per Day Design Flow

- A. A 4.23 General Permit allows for the construction and use of an on-site wastewater treatment facility with a design flow from 3000 gallons per day to less than 24,000 gallons per day or more than one on-site wastewater treatment facility on a property or on adjacent properties under common ownership with a combined design flow from 3000 to less than 24,000 gallons per day if all of the following apply:
- 1. Except as specified in subsection (A)(3), the treatment and disposal works consists of technologies or designs that would otherwise be covered under other general permits, but are either sized larger to accommodate increased flows or, will be located at a site that cumulatively accommodates flows between 3000 gallons per day to less than 24,000 gallons per day;
 - 2. The on-site wastewater treatment facility complies with all applicable requirements of Articles 1, 2, and 3 of this Chapter;
 - 3. The facility is not a system or a technology that would otherwise be covered by one of the following general permits available for a design flow of less than 3000 gallons per day:
 - a. An aerobic system as described in R18-9-E315;
 - b. A disinfection device described in R18-9-E320, except that an ultraviolet radiation disinfection device is allowed; or
 - c. A seepage pit or pits described in R18-9-E302; and
 - 4. The discharge of total nitrogen to groundwater is controlled.
 - a. An applicant shall:
 - i. Demonstrate that the nitrogen loading calculated over the property served by the on-site wastewater treatment facility, including streets, common areas, and other non-contributing areas, is not more than 0.088 pounds (39.9 grams) of total nitrogen per day per acre calculated at a horizontal plane immediately beneath the zone of active treatment of the on-site wastewater treatment facility including its disposal field; or
 - ii. Justify a nitrogen loading that is equally protective of aquifer water quality as the nitrogen loading specified in subsection (A)(4)(a)(i) based on site-specific hydrogeological or other factors.
 - b. For purposes of the demonstration in subsection (A)(4)(a)(i), the applicant may assume that 0.0333 pounds (15.0 grams) of total nitrogen per day per person is contributed to raw sewage and may determine the nitrogen concentration in the treated wastewater at a horizontal plane immediately beneath the zone of active treatment of the on-site wastewater treatment facility including its disposal field.
- B. Notice of Intent to Discharge. In addition to the Notice of Intent to Discharge requirements specified in R18-9-A301(B) and R18-9-A309(B), an applicant shall submit:
- 1. A performance assurance plan consisting of tasks, schedules, and estimated annual costs for operating, maintaining, and monitoring performance over a 20-year operational life;
 - 2. Design documents and the performance assurance plan, signed, dated, and sealed by an Arizona-registered professional engineer;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- 3. Any documentation submitted under the alternative design procedure in R18-9-A312(G) that pertains to achievement of better performance levels than those specified in the general permit for the corresponding facility with a design flow of less than 3000 gallons per day, or for any other alternative design, construction, or operational change proposed by the applicant; and
- 4. A demonstration of total nitrogen discharge control specified in subsection (A)(4).
- C. Design requirements. The applicant shall comply with the applicable requirements in R18-9-A312 and the applicable general permits for the treatment works and disposal works used in the design of the on-site wastewater treatment facility.
- D. Installation requirements. The applicant shall comply with the applicable requirements in R18-9-A313(A) and the applicable general permits for the treatment works and disposal works used in the design of the on-site wastewater treatment facility.
- E. Operation and maintenance requirements. The applicant shall comply with the applicable requirements in R18-9-A313(B) and the applicable general permits for the treatment works and disposal works used in the design of the on-site wastewater treatment facility.
- F. Additional Discharge Authorization requirements. In addition to any other requirements, the applicant shall submit the following information before the Discharge Authorization is issued.
 - 1. A signed, dated, and sealed Engineer’s Certificate of Completion in a format approved by the Department affirming that:
 - a. The project was completed in compliance with the requirements of this Section and as described in the plans and specifications, or
 - b. Any changes are reflected in as-built plans submitted with the Engineer’s Certificate of Completion.
 - 2. The name of the service provider or certified operator that is responsible for implementing the performance assurance plan.
- G. Reporting requirement. The permittee shall provide the Department with the following information on the anniversary date of the Discharge Authorization:
 - 1. A form signed by the certified operator or service provider that:
 - a. Provides any data or documentation required by the performance assurance plan,
 - b. Certifies compliance with the requirements of the performance assurance plan, and
 - c. Describes any additions to the facility during the year that increased flows and certifies that the flow did not exceed 24,000 gallons per day during any day; and
 - 2. Any applicable fee required by 18 A.A.C. 14.
- H. Facility expansion. If an expansion of an on-site wastewater treatment facility or site operating under this Section involves the installation of a separate on-site wastewater treatment facility on the property with a design flow of less than 3000 gallons per day, the applicant shall submit the applicable Notice of Intent to Discharge and fee required under 18 A.A.C. 14 for the separate on-site wastewater treatment facility in order to add the facility to the existing site operating under this Section.
 - 1. The applicant shall indicate in the Notice of Intent to Discharge the Department’s file number and the issuance date of the Discharge Authorization previously issued by the Director under this Section for the property.
 - 2. Upon satisfactory review, the Director shall reissue the Discharge Authorization for this Section, with the new issuance date and updated information reflecting the expansion.
 - 3. If the expansion causes the accumulative design flow from on-site wastewater treatment facilities on the property to equal or exceed 24,000 gallons per day, the Director shall not reissue the Discharge Authorization, but shall require the applicant to submit an application for an individual permit addressing all proposed and operating facilities on the property.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 235, effective January 1, 2001 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3). Amended by final rulemaking at 29 A.A.R. 1023 (May 12, 2023), effective June 19, 2023 (Supp. 23-2).

ARTICLE 4. NITROGEN MANAGEMENT GENERAL PERMITS

R18-9-401. Definitions

In addition to the definitions established in A.R.S. §§ 49-101 and 49-201 and A.A.C. R18-9-101, the following terms apply to this Article:

1. “Application of nitrogen fertilizer” means any use of a substance containing nitrogen for the commercial production of a crop or plant. The commercial production of a crop or plant includes commercial sod farms and nurseries.
2. “Contact stormwater” means stormwater that comes in contact with animals or animal wastes within a concentrated animal feeding operation.
3. “Crop or plant needs” means the amount of water and nitrogen required to meet the physiological demands of a crop or plant to achieve a defined yield.
4. “Crop or plant uptake” means the amount of water and nitrogen that can be physiologically absorbed by the roots and vegetative parts of a crop or plant following the application of water.
5. “Impoundment” means any structure, other than a tank or a sump, designed and maintained to contain liquids. A structure that stores or impounds only non-contact stormwater is not an impoundment under this Article.
6. “Liner” or “lining system” means any natural, amendment, or synthetic material used to reduce seepage of impounded liquids into a vadose zone or aquifer.

7. “NRCS guidelines” means the United States Department of Agriculture, Natural Resources Conservation Service, National Engineering Handbook, Part 651 Agricultural Waste Management Field Handbook, Chapter 10, 651.1080, Appendix 10D – Geotechnical, Design, and Construction Guideline (November 1997). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the United States Department of Agriculture, Natural Resources Conservation Service at <ftp://ftp.wcc.nrcs.usda.gov/downloads/wastemgmt/AWMFH/awmfh-chap10-app10d.pdf>.

Historical Note

Adopted effective January 4, 1991 (Supp. 91-1). Section R18-9-401 renumbered from R18-9-201 and amended by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-402. Nitrogen Management General Permits: Nitrogen Fertilizers

An owner or operator may apply a nitrogen fertilizer under this general permit without submitting a notice to the Director, if the owner or operator complies with the following best management practices:

1. Limit application of the fertilizer so that it meets projected crop or plant needs;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. Time application of the fertilizer to coincide to maximum crop or plant uptake;
3. Apply the fertilizer by a method designed to deliver nitrogen to the area of maximum crop or plant uptake;
4. Manage and time application of irrigation water to minimize nitrogen loss by leaching and runoff; and
5. Use tillage practices that maximize water and nitrogen uptake by a crop or plant.

Historical Note

Adopted effective January 4, 1991 (Supp. 91-1). Section R18-9-402 renumbered from R18-9-202 and amended by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-403. Nitrogen Management General Permits: Concentrated Animal Feeding Operations

- A.** An owner or operator may discharge from a concentrated animal feeding operation without submitting a notice to the Director, if the owner or operator complies with the following best management practices:
1. Harvest, stockpile, and dispose of animal manure from a concentrated animal feeding operation to minimize discharge of any nitrogen pollutant by leaching and runoff;
 2. Control and dispose of nitrogen-contaminated water resulting from an activity associated with a concentrated animal feeding operation, up to a 25-year, 24-hour storm event equivalent, to minimize the discharge of any nitrogen pollutant;
 3. Following the requirements in subsection (B), construct and maintain a lining for an impoundment, used to contain process wastewater or contact stormwater from a concentrated animal feeding operation to minimize the discharge of any nitrogen pollutant; and
 4. Close a facility in a manner that will minimize the discharge of any nitrogen pollutant. If a liner was used in an impoundment:
 - a. Remove liquids and any solid residue on the liner and dispose appropriately;
 - b. Inspect any synthetic liner for evidence of holes, tears, or defective seams that could have leaked. If evidence of leakage is discovered:
 - i. Remove the liner in the area of suspected leakage,
 - ii. Sample potentially impacted soil, and
 - iii. Properly dispose of impacted soil or restore to background nitrogen levels;
 - c. Cover the liner in place or remove it for disposal or reuse if the impoundment is an excavated impoundment,
 - d. Remove and dispose of the liner elsewhere if the impoundment is bermed;
 - e. Grade the facility to prevent the impoundment of water; and
 - f. Notify the Department within 60 days following closure.
- B.** Lining requirements for concentrated animal feeding operation impoundments.
1. New impoundments. The owner or operator shall:
 - a. Follow the NRCS guidelines for any newly constructed impoundment or an impoundment first used after November 12, 2005, and
 - b. Use a coefficient of permeability of 1×10^{-7} centimeters per second or less as acceptable liner performance. The owner or operator may include up to 1 order of magnitude reduction in permeability from manure sealing in impoundments that hold wastes having manure as a significant component.
 2. Impoundments already in use.
 - a. The owner or operator shall maintain the existing seal for any impoundment first used before November 12, 2005.
 - b. If any of the following conditions exist at a concentrated animal feeding operation, the Director shall send a notice requiring the owner or operator to reassess the performance of the lining system:
 - i. The concentrated animal feeding operation is located within a Nitrogen Management Area designated under R18-9-A317; or
 - ii. Existing conditions or trends in nitrogen loading to an aquifer will cause or contribute to an exceedance of an Aquifer Water Quality Standard for a nitrogen pollutant at the point of compliance determined under A.R.S. § 49-244, based on the following information:
 - (1) Existing contamination of groundwater by nitrogen species;
 - (2) Existing and potential impact to groundwater by sources of nitrogen other than the concentrated animal feeding operation;
 - (3) Characteristics of the soil surface, vadose zone, and aquifer;
 - (4) Depth to groundwater;
 - (5) The estimated operational life of the impoundment;
 - (6) Location and characteristics of existing and potential drinking water supplies;
 - (7) Construction material and design of existing impoundment structure; and
 - (8) Any other information relevant to determining the severity of actual or potential nitrogen impact on the aquifer.
 - c. The owner or operator shall, within 90 days of the Director's notice, submit either:
 - i. A report to the Department demonstrating consistency with NRCS guidelines and the acceptable liner performance criteria established in subsection (B)(1)(b); or
 - ii. Plans and a schedule to upgrade the liner for the impoundment to meet the NRCS guidelines and the acceptable liner performance criteria in subsection (B)(1)(b). The Director may provide additional time for the submittal of the plans and a schedule for upgrade, if the owner or operator demonstrates that technical or financial assistance to develop the plans is needed.
 - d. Preliminary decision.
 - i. Within 90 days from the date of receipt, the Director shall review the report or the plans submitted under subsection (B)(2)(c) and provide to the owner or operator a preliminary decision on the submittal.
 - ii. The owner or operator may, within 30 days of the preliminary decision, submit written comments and supporting information to the Director on the preliminary decision.
 - iii. The Director shall evaluate any comments on the preliminary decision and supporting information.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- mation and, within 90 days of receipt of the comments and information, make a final decision.
- e. Final decision.
 - i. If the Director determines that the owner or operator has demonstrated that the lining system meets NRCS guidelines and the acceptable performance criteria in subsection (B)(1)(b), no additional action is necessary.
 - ii. If the Director approves the plans and schedules under subsection (B)(2)(c)(ii), the owner or operator shall implement the plans within the time-frame specified in the approved schedule.
 - iii. If the Director determines that the owner or operator failed to demonstrate that the lining system meets NRCS guidelines and the acceptable performance criteria in subsection (B)(1)(b) or that the schedule to upgrade the lining is not acceptable, the owner or operator shall upgrade the lining system within a time-frame specified by the Director.
 - iv. The owner or operator may appeal the Director's decision under A.R.S. Title 41, Chapter 6, Article 10.
 3. Notification requirement. The owner or operator of any lined impoundment shall either:
 - a. Notify the Department of the type of liner that was used to line each impoundment by February 19 of each year following either:
 - i. The first use of an impoundment not used before November 12, 2005; or
 - ii. Completion of a liner upgrade required under this Section for an impoundment used before November 12, 2005; or
 - b. Include the information required in subsections (B)(3)(a)(i) and (ii) in the next annual report submitted for the AZPDES Concentrated Animal Feeding Operation General Permit, issued under 18 A.A.C. 9, Article 9, Part C.

Historical Note

Adopted effective January 4, 1991 (Supp. 91-1). Section R18-9-403 renumbered from R18-9-203 and amended by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4). Amended by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

R18-9-404. Revocation of Coverage under a Nitrogen Management General Permit

- A. The Director may revoke coverage under a nitrogen management general permit and require the permittee to obtain an individual permit under 18 A.A.C. 9, Article 2, if the Director determines that the permittee failed to comply with the best management practices under R18-9-403.
- B. Notification.
 1. If coverage under the nitrogen management general permit is revoked under subsection (A), the Director shall notify the permittee by certified mail of the decision according to the notification and hearing procedures in A.R.S. Title 41, Chapter 6, Article 10. The notification shall include:
 - a. A brief statement of the reason for the decision,
 - b. The effective revocation date of the general permit coverage, and

- c. A statement of whether the discharge shall cease immediately or whether the discharge may continue until the individual permit is issued, and
2. If the Director requires a person to obtain an individual permit, the notification shall include:
 - a. An individual permit application form, and
 - b. A deadline between 90 and 180 days after receipt of the notification for filing the application.
- C. When the Director issues an individual permit to an owner or operator of a facility covered under a nitrogen management general permit, the coverage under the nitrogen management general permit is superseded by the individual permit allowing the discharge.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 4544, effective November 12, 2005 (05-3).

ARTICLE 5. GRAZING BEST MANAGEMENT PRACTICES**R18-9-501. Surface Water Quality General Grazing Permit**

- A. A person who engages in livestock grazing and applies any of the following voluntary best management practices to maintain soil cover and prevent accelerated erosion, nitrogen discharges, and bacterial impacts to surface water greater than the natural background amount is issued a Surface Water Quality General Grazing Permit:
 1. Manages the location, timing, and intensity of grazing activities to help achieve Surface Water Quality Standards;
 2. Installs rangeland improvements, such as fences, water developments, trails, and corrals to help achieve Surface Water Quality Standards;
 3. Implements land treatments to help achieve Surface Water Quality Standards;
 4. Implements supplemental feeding, salting, and parasite control measures to help achieve Surface Water Quality Standards.
- B. The person to whom a permit is issued shall make the following information available to the Department, at the person's place of business, within 10 business days of Department notice:
 1. The name and address of the person grazing livestock, and
 2. The best management practices selected for livestock grazing.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 1768, effective April 5, 2001 (Supp. 01-2).

ARTICLE 6. UNDERGROUND INJECTION CONTROL**R18-9-601. Repealed****Historical Note**

PART A. GENERAL PROVISIONS

R18-9-A601. Definitions

The following terms apply to this Article:

1. "Abandoned well" means a well whose use has been permanently discontinued or which is in a state of disrepair such that it cannot be used for its intended purpose or for observation purposes.
2. "Administrator" means the Administrator of the United States Environmental Protection Agency (EPA), or an authorized representative.
3. "Application" means the ADEQ prescribed method, such as a form, for applying for a permit, including any additions, revisions or modifications thereof.
4. "Appropriate Act and regulations" means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA); or Safe Drinking Water Act (SDWA), whichever is applicable; and applicable regulations promulgated under those statutes.
5. "Aquifer" means a geological formation, group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.
6. "Area of review" means the area surrounding an injection well described according to the criteria set forth in R18-9-B612 or in the case of an area permit, the project area plus a circumscribing area the width of which is either 1/4 of a mile or a number calculated according to the criteria set forth in R18-9-B612.
7. "Arizona UIC Memorandum of Agreement" means the agreement between the Administrator and the Director that coordinates EPA and ADEQ activities, responsibilities, and programs under the Arizona UIC Program.
8. "Arizona UIC Program" means the UIC program administered by the Director and approved by EPA according to 42 U.S.C. § 300h-1.
9. "Casing" means a pipe or tubing of appropriate material, of varying diameter and weight, lowered into a borehole during or after drilling to support the sides of the hole and prevent the walls from caving; to prevent loss of drilling mud into porous ground; or to prevent water, gas, or other fluid from entering or leaving the hole.
10. "Catastrophic collapse" means the sudden and utter failure of overlying strata caused by removal of underlying materials.
11. "Cementing" means the operation whereby a cement slurry is pumped into a drilled hole and/or forced behind the casing.
12. "Cesspool" means a drywell that receives untreated sanitary waste containing human excreta, and which sometimes has an open bottom and/or perforated sides.
13. "Confining zone" means a geological formation, group of formations, or parts of a formation that is capable of limiting fluid movement above an injection zone.
14. "Contaminant" means any physical, chemical, biological, or radiological substance or matter in water.
15. "Conventional mine" means an open pit or underground excavation for the production of minerals.
16. "Director" means the Director of the Arizona Department of Environmental Quality or the Director's designee.
17. "Disposal well" means a well that is used for the disposal of waste into a subsurface stratum.
18. "Draft permit" means a document prepared under R18-9-C618 indicating the Director's tentative decision to issue, renew, modify, revoke and reissue, or terminate a permit. A notice of intent to terminate a permit, and a notice of intent to deny a permit, as discussed in R18-9-C631 are types of draft permits. A denial of a request for modification, revocation and reissuance, or termination, of a permit is not a draft permit, except as discussed in R18-9-C631(B).
19. "Drilling mud" means a heavy suspension used in drilling an injection well, introduced down the drill pipe and through the drill bit.
20. "Drywell" means a well, other than an improved sinkhole or subsurface fluid distribution system, completed above the water table so that its bottom and sides are typically dry except when receiving fluids.
21. "Effective date of the Arizona UIC Program" means the date that the Arizona UIC Program is approved or established by the Administrator.
22. "Emergency permit" means a UIC permit issued in accordance with R18-9-C625.
23. "Environmental Protection Agency" or "EPA" means the United States Environmental Protection Agency.
24. "Exempted aquifer" means an aquifer or its portion that meets the criteria in the definition of underground source of drinking water (USDW) but has been exempted according to the procedures in R18-9-A605.
25. "Existing injection well" means an injection well other than a new injection well.
26. "Experimental technology" means a technology which has not been proven feasible under the conditions in which it is being tested.
27. "Facility" or "activity" means any UIC injection well subject to regulation under this Article.
28. "Fault" means a surface or zone of rock fracture along which there has been displacement.
29. "Final permit decision" means the Director's decision to issue, renew, modify, revoke and reissue, deny or terminate a permit as described in R18-9-C627.
30. "Flow rate" means the volume per time unit given the flow of gases or other fluid substance which emerges from an orifice, pump, turbine, or passes along a conduit or channel.
31. "Fluid" means any material or substance which flows or moves whether in a semisolid, liquid, sludge, gas, or any other form or state.
32. "Formation" means a body of consolidated or unconsolidated rock characterized by a degree of lithologic homogeneity which is prevailing, but not necessarily, tabular and is mappable on the earth's surface or traceable in the subsurface.
33. "Formation fluid" means fluid present in a formation under natural conditions as opposed to introduced fluids, such as drilling mud.
34. "Generator" means any person, by site location, whose act or process produces hazardous waste identified or listed in A.A.C. Title 18, Chapter 8 (Hazardous Waste Management).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

35. "Geologic sequestration" means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.
36. "Ground water" means water below the land surface in a zone of saturation.
37. "Hazardous waste" means a hazardous waste as defined in A.R.S. § 49-921.
38. "Improved sinkhole" means a naturally occurring karst depression or other natural crevice found in volcanic terrain and other geologic settings which have been modified by man for the purpose of directing and emplacing fluids into the subsurface.
39. "Indian lands" means Indian country as defined in 18 U.S.C. 1151.
40. "Indian Tribe" means any Indian Tribe having a Federally recognized governing body carrying out substantial governmental duties and powers over a defined area.
41. "Injection well" means a well into which fluids are being injected.
42. "Injection zone" means a geological formation group of formations, or part of a formation receiving fluids through a well.
43. "Lithology" means the description of rocks on the basis of their physical and chemical characteristics.
44. "Major facility" means any UIC facility or activity classified as such by the Administrator in conjunction with the Director.
45. "New injection wells" means an injection well which began injection after the effective date of the Arizona UIC Program.
46. "Owner" or "operator" means the owner or operator of any facility or activity subject to regulation under the Arizona UIC program.
47. "Packer" means a device lowered into a well to produce a fluid-tight seal.
48. "Permit" means an authorization issued by the Director pursuant to this Article. 'Permit' includes an area permit under R18-9-C624 and an emergency permit under R18-9-C625. 'Permit' does not include UIC authorization by rule or any permit which has not yet been subject to a final permit decision, such as a 'draft permit.'
49. "Person" means an individual, employee, officer, managing body, trust, firm, joint-stock company, consortium, public or private corporation, Partnership, association or state, a political subdivision of this state, a commission, the United States government or any federal facility, interstate body, Tribal agency, or other entity.
50. "Plugging" means the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.
51. "Plugging record" means a systematic listing of permanent or temporary abandonment of water, oil, gas, test, exploration and waste injection wells, and may contain a well log, description of amounts and types of plugging material used, the method employed for plugging, a description of formations which are sealed and a graphic log of the well showing formation location, formation thickness, and location of plugging structures.
52. "Pressure" means the total load or force per unit area acting on a surface.
53. "Project" means a group of wells in a single operation.
54. "Radioactive Waste" means any waste which contains radioactive material in concentrations which exceed those listed in 10 CFR part 20, appendix B, table II column 2.
55. "RCRA" means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94-580, as amended by Pub. L. 95-609, Pub. L. 96-510, 42 U.S.C. 6901 et seq.).
56. "Sanitary waste" means liquid or solid wastes originating solely from humans and human activities, such as wastes collected from toilets, showers, wash basins, sinks used for cleaning domestic areas, sinks used for food preparation, clothes washing operations, and sinks or washing machines where food and beverage serving dishes, glasses, and utensils are cleaned. Sources of these wastes may include single or multiple residences, hotels and motels, restaurants, bunkhouses, schools, ranger stations, crew quarters, guard stations, campgrounds, picnic grounds, day-use recreation areas, other commercial facilities, and industrial facilities provided the waste is not mixed with industrial waste.
57. "Schedule of compliance" means a schedule of remedial measures included in a permit including an enforceable sequence of interim requirements leading to compliance with this Article.
58. "SDWA" or "Safe Drinking Water Act" means the Safe Drinking Water Act (Pub. L. 93-523, as amended; 42 U.S.C. 300f et seq.).
59. "Septic system" means a well that is used to emplace sanitary waste below the surface and is typically comprised of a septic tank and subsurface fluid distribution system or disposal system.
60. "Site" means the land or water area where any facility or activity is physically located or conducted, including adjacent land used in connection with the facility or activity.
61. "Stratum" means a single sedimentary bed or layer, or series of layers that consists of generally the same kind of rock material regardless of thickness. The plural of stratum is strata.
62. "Subsidence" means the lowering of the natural land surface in response to earth movements; lowering fluid pressures; removal of underlying support material by mining or solution of solids, either artificially or from natural causes; compaction due to wetting; oxidation of organic matter in soils; or added load on the land surface.
63. "Subsurface fluid distribution system" means an assemblage of perforated pipes, drain tiles, or other similar mechanisms intended to distribute fluids below the surface of the ground.
64. "Surface casing" means the first string of well casing to be installed in the well.
65. "Total dissolved solids" or "TDS" means the total dissolved (filterable) solids as determined by use of the method specified in A.A.C. R9-14-610 or R9-14-611.
66. "Transferee" means the owner or operator receiving ownership and/or operational control of the well.
67. "Transferor" means the owner or operator transferring ownership and/or operational control of the well.
68. "Underground injection" means a well injection; which excludes the underground injection of natural gas for purposes of storage and the underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

69. "Underground Injection Control" or "UIC" means the Underground Injection Control program under Part C of the Safe Drinking Water Act, including the Arizona UIC Program.
70. "USDW," "USDWs," or "Underground source of drinking water" means an aquifer or aquifers or its portion that:
- Supplies any public water system; or
 - Contains a sufficient quantity of ground water to supply a public water system; and
 - Currently supplies drinking water for human consumption; or
 - Contains fewer than 10,000 mg/l total dissolved solids; and
 - Is not an exempted aquifer.
71. "Well" means a bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or a subsurface fluid distribution system.
72. "Well injection" means the subsurface emplacement of fluids through a well.
73. "Well plug" means a watertight and gastight seal installed in a borehole or well to prevent movement of fluids.
74. "Well monitoring" means the measurement, by on-site instruments or laboratory methods, of the quality of water in a well.
75. "Well stimulation" means several processes used to clean the well bore, enlarge channels and increase pore space in the interval to be injected thus making it possible for wastewater to move more readily into the formation and includes surging, jetting, blasting, acidizing, or hydraulic fracturing.
- Historical Note**
New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).
- R18-9-A602. Applicability**
- A.** This Article becomes effective upon the date of the Environmental Protection Agency's approval of the Arizona UIC Program. Upon that date, the Department shall, under A.R.S. Title 49, Chapter 2, Articles 3.3, 4 and Article 6 of this Chapter, administer and enforce any permit which has been previously authorized or issued in this state under the Federal UIC program.
- B.** This Article and 40 CFR Part 145, Subpart C provide the minimum requirements of the State of Arizona's Underground Injection Control (UIC) program under A.R.S. Title 49, Chapter 2, Article 3.3 (Underground Injection Control Permit Program) and pursuant to Part C of the Safe Drinking Water Act (SDWA) (Pub. L. 93-523, as amended; 42 U.S.C. 300h et seq.).
- C.** Underground injection is prohibited in lands under the jurisdiction of the State of Arizona unless:
- Authorized by permit or rule under this Article in accordance with 42 U.S.C. 300h et seq., or
 - Authorized by OGCC pursuant to regulations approved by EPA.
- D.** Any injection activity authorized by permit or rule under this Article shall prohibit the movement of fluid containing any contaminant into underground sources of drinking water (USDWs), where the presence of that contaminant may cause a violation of this Article or may adversely affect the health of persons.
- E.** Injection wells regulated under this Article are categorized into six classes based on characteristics of the injection well activity. Owners or operators of injection wells regulated under all six classes must be authorized by permit (all classes) or rule (Class V only if no permit is required) pursuant to the requirements of this Article.
- F.** Specific inclusions. The following wells are included among those types of injection activities which are covered by the UIC regulations in this Article. (This list is not intended to be exclusive but is for clarification only.)
- Any injection well located on a drilling platform inside the State's territorial waters.
 - Any dug hole or well that is deeper than its largest surface dimension, where the principal function of the hole is emplacement of fluids.
 - Any well used by generators of hazardous waste, or by owners or operators of hazardous waste management facilities, to dispose of fluids containing hazardous waste. This includes the disposal of hazardous waste into what would otherwise be septic systems and cesspools, regardless of their capacity.
 - Any septic tank, cesspool, or other well used by a multiple dwelling, or community, or other large system for the injection of wastes.
- G.** Specific exclusions. The following are not covered by these regulations:
- Septic systems or similar waste disposal systems if such systems:
 - Are used solely for the disposal of sanitary waste, and
 - Have a design capacity of less than 3,000 gallons per day.
 - Injection wells used for injection of hydrocarbons which are of pipeline quality and are gases at standard temperature and pressure for the purpose of storage.
 - Any dug hole, drilled hole, or bored shaft which is not used for the subsurface emplacement of fluids.
 - Injection wells authorized by OGCC pursuant to regulations approved by EPA, in accordance with 42 U.S.C. 300h et seq.
- H.** Safe Drinking Water Act exemptions. The following activities are exempt from the Arizona UIC Program:
- The underground injection of natural gas for purposes of storage.
 - The underground injection of fluids or propping agents (other than diesel fuels) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities.
- I.** The Director may identify aquifers and portions of aquifers which are actual or potential sources of drinking water, to assist in carrying out the Director's duty pursuant to this Article. Any aquifer meeting the criteria under R18-9-A601(70) shall be protected as an USDW, even if it has not been explicitly identified pursuant to this Section.
- J.** The Director may also designate aquifers or portions of aquifers as exempt from the program using the criteria in R18-9-A605 and R18-9-A606, subject to EPA approval. Any aquifer or portion thereof within the State that has previously been designated exempt by EPA pursuant to 40 CFR § 144.7 shall be part of the Arizona UIC program upon the effective date of the Arizona UIC program.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-A603. Confidentiality of Information

- A.** In accordance with A.R.S. § 49-205, any information submitted to the Director pursuant to these regulations may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions or, in the case of other submissions, by stamping the words “confidential business information” on each page containing such information. If no claim is made at the time of submission, the Director may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in A.R.S. § 49-205 (Availability of information to the public).
- B.** Claims of confidentiality for the following information will be denied:
1. The name and address of any permit applicant or permittee.
 2. Information which deals with the existence, absence, or level of contaminants in drinking water.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-A604. Classification of Wells

- A.** Class I wells are:
1. Wells used by generators of hazardous waste or owners or operators of hazardous waste management facilities to inject hazardous waste beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.
 2. Other industrial and municipal disposal wells which inject fluids beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.
 3. Radioactive waste disposal wells which inject fluids beneath the lowermost formation that contains, within one-quarter mile of the well bore, an USDW.
- B.** Class II wells are injection wells that inject fluids:
1. That are brought to the surface in connection with natural gas storage operations, or conventional oil or natural gas production and may be commingled with waste waters from gas plants which are an integral part of production operations, unless those waters are classified as a hazardous waste at the time of injection.
 2. For enhanced recovery of oil or natural gas.
 3. For storage of hydrocarbons which are liquid at standard temperatures and pressure.
- C.** Class III wells are injection wells used for the extraction of minerals, including:
1. Sulfur mining by the Frasch process.
 2. In-situ production of uranium or other metals from those ore bodies not conventionally mined. Solution mining of conventional mines such as stopes leaching is included in Class V.
 3. Solution mining of salts or potash.
- D.** Class IV wells are injection wells that either:
1. Inject hazardous or radioactive wastes into or above a formation with an USDW located within one-quarter mile of the well bore, or
 2. Inject hazardous wastes and cannot be classified under subsection (A)(1), or (D)(1) (e.g., wells used to dispose of hazardous wastes into or above a formation which contains an aquifer which has been previously exempted or exempted pursuant to R18-9-A606).
- E.** Class V wells are injection wells not included in Class I, II, III, IV, or VI.
1. Class V wells include but are not limited to:
 - a. Air conditioning return flow wells used to return to the supply aquifer the water used for heating or cooling in a heat pump.
 - b. Cesspools including multiple dwelling, community or regional cesspools, or other devices that receive wastes which have an open bottom and sometimes have perforated sides. The UIC requirements do not apply to single family residential cesspools nor to non-residential cesspools which receive solely sanitary wastes and have the capacity to serve fewer than 20 persons a day.
 - c. Cooling water return flow wells used to inject water previously used for cooling.
 - d. Drainage wells used to drain surface fluid, primarily storm runoff, into a subsurface formation.
 - e. Dry wells used for the injection of wastes into a subsurface formation.
 - f. Recharge wells used to replenish the water in an aquifer.
 - g. Salt water intrusion barrier wells used to inject water into a fresh water aquifer to prevent the intrusion of salt water into the fresh water.
 - h. Sand backfill and other backfill wells used to inject a mixture of water and sand, mill tailings or other solids into mined out portions of subsurface mines, except for radioactive wastes.
 - i. Septic system wells used to inject the waste or effluent from a multiple dwelling, business establishment, community or regional business establishment septic tank.
 - j. Subsidence control wells, other than those used in oil or natural gas production, that inject fluids into a non-oil or gas producing zone to reduce or eliminate subsidence associated with freshwater overdraft.
 - k. Injection wells associated with the recovery of geothermal energy for heating, aquaculture, and production of electric power.
 - l. Wells used for solution mining of conventional mines such as stopes leaching.
 - m. Wells used to inject spent brine into the same formation from which it was withdrawn after extraction of halogens or their salts.
 - n. Injection wells used in experimental technologies.
 - o. Injection wells used for in situ recovery of lignite, coal, tar sands, and oil shale.
 2. Class V wells do not include single-family residential septic system wells or non-residential septic system wells used solely for the disposal of sanitary waste with a design capacity of less than 3,000 gallons per day.
- F.** Class VI wells are:
1. Not experimental in nature that are used for geologic sequestration of carbon dioxide beneath the lowermost formation containing a USDW;
 2. Wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at R18-9-J670; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. Wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to R18-9-A605 of this Chapter and R18-9-A604.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-A605. Identification of Underground Sources of Drinking Water and Exempt Aquifers

- A. The Director may identify, by narrative description, illustration, maps, or other means, and shall protect as USDWs, all aquifers and parts of aquifers that meet the definition of USDW in R18-9-A601(70) except to the extent there is an applicable aquifer exemption under subsection (B) or an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration under subsection (D). Other than EPA-approved aquifer exemption expansions that meet the criteria set forth in R18-9-A606(4), new aquifer exemptions shall not be issued for Class VI injection wells. Even if an aquifer has not been specifically identified by the Director, it is an USDW if it meets the definition in R18-9-A601(70).
- B. Aquifer exemptions procedure:
 1. The Director may identify, by narrative description, illustrations, maps, or other means, and describe in geographic and/or geometric terms, such as vertical and lateral limits and gradient, that are clear and definite, all aquifers or parts thereof that the Director proposes to designate as exempted aquifers using the criteria in R18-9-A606.
 2. No designation of an exempted aquifer submitted as part of Arizona's UIC program shall be final until approved by EPA as part of the Arizona UIC Program. No designation of an expansion to the areal extent of a Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration shall be final until approved by the EPA as a substantial revision of the Arizona UIC Program in accordance with 40 CFR 145.32.
 3. Subsequent to the program approval or promulgation, the Director may, after notice and opportunity for public hearing, identify additional exempted aquifers.
 4. Exemption of aquifers identified:
 - a. Under R18-9-A606(2) shall be treated as a program revision under 40 CFR 145.32;
 - b. Under R18-9-A606(3) shall become final if the Director submits the exemption in writing to the Administrator and the Administrator has not disapproved the designation within 45 days.
- C. Additional aquifer exemption requirements:
 1. For Class III wells, the Director shall require an applicant for a permit which necessitates an aquifer exemption under R18-9-A606(2)(a) to furnish the data necessary to demonstrate that the aquifer is expected to be mineral or hydrocarbon producing. Information contained in the mining plan for the proposed project, such as a map and general description of the mining zone, general information on the mineralogy and geochemistry of the mining zone, analysis of the amenability of the mining zone to the proposed mining method, and a time-table of planned development of the mining zone shall be considered by the Director in addition to the information required by R18-9-C616(D).
2. For Class II wells, a demonstration of commercial producibility shall be made as follows:
 - a. For a Class II well to be used for enhanced oil recovery processes in a field or project containing aquifers from which hydrocarbons were previously produced, commercial producibility shall be presumed by the Director upon a demonstration by the applicant of historical production having occurred in the project area or field.
 - b. For Class II wells not located in a field or project containing aquifers from which hydrocarbons were previously produced, information such as logs, core data, formation description, formation depth, formation thickness and formation parameters such as permeability and porosity shall be considered by the Director, to the extent such information is available.
- D. Owners or operators of Class II enhanced oil recovery or enhanced gas recovery wells may request that the Director approve an expansion to the areal extent of an aquifer exemption already in place for a Class II enhanced oil recovery or enhanced gas recovery well for the exclusive purpose of Class VI injection for geologic sequestration. Such requests must be treated as a substantial program revision to the Arizona UIC program under 40 CFR 145.32 and will not be final until approved by EPA.
 1. The owner or operator of a Class II enhanced oil recovery or enhanced gas recovery well that requests an expansion of the areal extent of an existing aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration must define, by narrative description, illustrations, maps or other means, and describe in geographic and/or geometric terms, such as vertical and lateral limits and gradient, that are clear and definite, all aquifers or parts thereof that are requested to be designated as exempted using the criteria in R18-9-A606.
 2. In evaluating a request to expand the areal extent of an aquifer exemption of a Class II enhanced oil recovery or enhanced gas recovery well for the purpose of Class VI injection, the Director must determine that the request meets the criteria for exemptions in R18-9-A606. In making the determination, the Director shall consider:
 - a. Current and potential future use of the USDWs to be exempted as drinking water resources;
 - b. The predicted extent of the injected carbon dioxide plume, and any mobilized fluids that may result in degradation of water quality, over the lifetime of the geologic sequestration project, as informed by computational modeling performed pursuant to R18-9-J659(C)(1), in order to ensure that the proposed injection operation will not at any time endanger USDWs including non-exempted portions of the injection formation;
 - c. Whether the areal extent of the expanded aquifer exemption is of sufficient size to account for any possible revisions to the computational model during reevaluation of the area of review, pursuant to R18-9-J659(E); and
 - d. Any information submitted to support a waiver request made by the owner or operator under R18-9-J670 if appropriate.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-A606. Criteria for Exempted Aquifers

An aquifer or a portion thereof which meets the criteria for an "USDW" in R18-9-A601(70) may be determined under R18-9-A605 to be an "exempted aquifer" for Class I-V wells if it meets the criteria in subsections (A)(1) through (A)(3). Class VI wells must meet the criteria under subsection (A)(4).

1. It does not currently serve as a source of drinking water; and
2. It cannot now and will not in the future serve as a source of drinking water because:
 - a. It is mineral hydrocarbon or geothermal energy producing, or can be demonstrated by a permit applicant as part of a permit application for a Class II or Class III operation to contain minerals or hydrocarbons that considering their quantity and location are expected to be commercially producible;
 - b. It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technically impractical;
 - c. It is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption; or
 - d. It is located over a Class III well mining area subject to subsidence or catastrophic collapse; or
3. The total dissolved solids content of the ground water is more than 3,000 and less than 10,000 mg/l and it is not reasonably expected to supply a public water system.
4. The areal extent of an aquifer exemption for a Class II enhanced oil recovery or enhanced gas recovery well may be expanded for the exclusive purpose of Class VI injection for geologic sequestration under R18-9-A605(D) if it meets the following criteria:
 - a. It does not currently serve as a source of drinking water; and
 - b. The total dissolved solids content of the ground water is more than 3,000 mg/l and less than 10,000 mg/l; and
 - c. It is not reasonably expected to supply a public water system.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART B. GENERAL PROGRAM REQUIREMENTS**R18-9-B607. Prohibition of Unauthorized Injection**

Any underground injection, except into a well authorized by rule or authorized by permit under the Arizona UIC program, is prohibited. The construction of any well required to have a permit is prohibited until the permit has been issued.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B608. Prohibition of Movement of Fluid into Underground Sources of Drinking Water

A. No owner or operator shall construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a

manner that allows the movement of fluid containing any contaminant into USDWs, if the presence of that contaminant may cause a violation of any primary drinking water regulation under this Article, as shown in Table 1, or may otherwise adversely affect the health of persons. The applicant for a permit shall have the burden of showing that the requirements of this subsection are met.

- B.** For Class I, II, III, and VI wells, if any water quality monitoring of an USDW indicates the movement of any contaminant into the USDW, except as authorized under this Article, the Director shall prescribe such additional requirements for construction, corrective action, operation, monitoring, or reporting (including closure of the injection well) as are necessary to prevent such movement. In the case of wells authorized by permit, these additional requirements shall be imposed by modifying the permit in accordance with R18-9-C632 or the permit may be terminated under R18-9-C634 if cause exists, or appropriate enforcement action may be taken if the permit has been violated. In the case of Class V wells authorized by rule see R18-9-I650 through R18-9-I655 in Part I of this Article.
- C.** For Class V wells, if at any time the Director learns that a Class V well may cause a violation of primary drinking water regulations under this Article, they shall:
 1. Require the injector to obtain an individual permit;
 2. Order the injector to take such actions (including, where required, closure of the injection well) as may be necessary to prevent the violation; or
 3. Take enforcement action.
- D.** Whenever the Director learns that a Class V well may be otherwise adversely affecting the health of persons, they may prescribe such actions as may be necessary to prevent the adverse effect, including any action authorized under subsection (C).
- E.** Notwithstanding any other provision of this Section, the Director may take emergency action upon receipt of information that a contaminant which is present in or likely to enter a public water system or USDW may present an imminent and substantial endangerment to the health of persons.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B609. Prohibition of Hazardous Waste Injection and Class IV Wells

- A.** Hazardous Waste Injection.
 1. The following are prohibited, except as provided in subsection (B)(3):
 - a. The construction of any well for the purpose of hazardous waste injection.
 - b. The operation of any well for the purpose of hazardous waste injection.
 2. The owner or operator of a well for the purpose of hazardous waste injection shall close the well in accordance with this subsection.
 3. The owner or operator of a well for the purpose of hazardous waste injection shall comply with the following requirements regarding closure of the well.
 - a. Prior to abandoning any well for the purpose of hazardous waste injection, the owner or operator shall plug or otherwise close the well in a manner acceptable to the Director.
 - b. The owner or operator of a well for the purpose of hazardous waste injection must notify the Director

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

of intent to abandon the well at least 30 days prior to abandonment.

- B. Class IV.
 1. The following are prohibited, except as provided in subsection (B)(3):
 - a. The construction of any Class IV well.
 - b. The operation or maintenance of any Class IV well.
 2. The owner or operator of a Class IV well shall comply with the requirements of R18-9-H649 regarding closure of Class IV wells.
 3. Wells used to inject contaminated groundwater that has been treated and is being reinjected into the same formation that it was drawn are not prohibited by this Section if such injection is approved by the Administrator or the Director pursuant to subsections (B)(3)(a), (b) or (c):
 - a. Provisions for cleanup of releases under CERCLA, or
 - b. The requirements and provisions under RCRA, or
 - c. The requirements and provisions under other applicable state laws for corrective and remedial action.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B610. Waiver of Requirement by Director

- A. When injection does not occur into, through, or above an USDW, the Director may authorize a well or project with less stringent requirements for area of review, construction, mechanical integrity, operation, monitoring, and reporting than required under this Article or R18-9-D636 to the extent that reduction in requirements will not result in an increased risk of movement of fluids into an USDW.
- B. When injection occurs through or above an USDW, but the radius of endangering influence when computed under R18-9-B612(A) is smaller or equal to the radius of the well, the Director may authorize a well or project with less stringent requirements for operation, monitoring, and reporting than required under R18-9-D636 to the extent that a reduction in requirements will not result in an increased risk of movement of fluids into an USDW.
- C. When reducing requirements under this Section, the Director shall prepare a fact sheet under R18-9-C619 explaining the reasons for the action.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B611. Records

The Director may require, by written notice on a selective well-by-well basis, an owner or operator of an injection well to establish and maintain records, make reports, conduct monitoring, and provide other information as is deemed necessary to determine whether the owner or operator has acted or is acting in compliance with this Article and Part C of the SDWA or its implementing regulations.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B612. Area of Review

- A. The area of review for each injection well or each field, project or area of the State shall be determined according to this Sec-

tion. The Director may solicit input from the owners or operators of injection wells within the State as to which method is most appropriate for each geographic area or field.

- B. Where the area of review is determined according to the zone of endangering influence:
 1. The zone of endangering influence shall be:
 - a. In the case of application or applications for well permit or permits under R18-9-C616 that area the radius of which is the lateral distance in which the pressures in the injection zone may cause the migration of the injection and/or formation fluid into an USDW; or
 - b. In the case of an application for an area permit under R18-9-C624, the project area plus a circumscribing area the width of which is the lateral distance from the perimeter of the project area, in which the pressures in the injection zone may cause the migration of the injection and/or formation fluid into an USDW.
 2. Computation of the zone of endangering influence may be based upon the parameters listed in the following equation and should be calculated for an injection time period equal to the expected life of the injection well or pattern. The following modified Theis equation illustrates one form which the mathematical model may take.
 - a.

$$r = \left(\frac{2.25KHt}{S10^x} \right)^{1/2}$$

where:

$$X = \frac{4\pi KH(h_w - h_{bo} \times S_p G_b)}{2.3Q}$$

- r = Radius of endangering influence from injection well (length)
- K = Hydraulic conductivity of the injection zone (length/time)
- H = Thickness of the injection zone (length)
- t = Time of injection (time)
- S = Storage coefficient (dimensionless)
- Q = Injection rate (volume/time)
- h_{bo} = Observed original hydrostatic head of injection zone (length) measured from the base of the lowermost USDW
- h_w = Hydrostatic head of USDW (length) measured from the base of the lowest USDW
- S_p G_b = Specific gravity of fluid in the injection zone (dimensionless)
- π = 3.142 (dimensionless)

- b. The equation in subsection (B)(2)(a) is based on the following assumptions:
 1. The injection zone is homogeneous and isotropic;
 2. The injection zone has infinite area extent;
 3. The injection well penetrates the entire thickness of the injection zone;
 4. The well diameter is infinitesimal compared to “r” when injection time is longer than a few minutes; and
 5. The emplacement of fluid into the injection zone creates instantaneous increase in pressure.

- C. Where Fixed Radius is used, the following shall apply:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. In the case of application of applications for well permit or permits under R18-9-C616 a fixed radius around the well of not less than one-quarter mile may be used.
 2. In the case of an application for an area permit under R18-9-C624, a fixed radius width of not less than one-quarter mile for circumscribing area may be used.
 3. In determining the fixed radius, the following factors shall be taken into consideration: Chemistry of injected and formation fluids; hydrogeology; population and ground-water use and dependence; and historical practices in the area.
- D.** If the area of review is determined by a mathematical model according to subsection (B), the permissible radius is the result of such calculation even if it is less than one-fourth mile.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B613. Mechanical Integrity

- A.** An injection well has mechanical integrity if:
1. There is no significant leak in the casing, tubing or packer; and
 2. There is no significant fluid movement into an USDW through vertical channels adjacent to the injection well bore.
- B.** One of the following methods must be used to evaluate the absence of significant leaks under subsection (A)(1):
1. Following an initial pressure test, monitoring of the tubing-casing annulus pressure with sufficient frequency to be representative, as determined by the Director, while maintaining an annulus pressure different from atmospheric pressure measured at the surface;
 2. Pressure test with liquid or gas; or
 3. Records of monitoring showing the absence of significant changes in the relationship between injection pressure and injection flow rate for the following Class II enhanced recovery wells:
 - a. Existing wells completed without a packer provided that a pressure test has been performed and the data is available and provided further that one pressure test shall be performed at a time when the well is shut down and if the running of such a test will not cause further loss of significant amounts of oil or gas; or
 - b. Existing wells constructed without a long string casing, but with surface casing which terminates at the base of fresh water provided that local geological and hydrological features allow such construction and provided further that the annular space shall be visually inspected. For these wells, the Director shall prescribe a monitoring program which will verify the absence of significant fluid movement from the injection zone into an USDW.
- C.** One of the following methods must be used to determine the absence of significant fluid movement under subsection (A)(2):
1. The results of a temperature or noise log;
 2. For Class II only, cementing records demonstrating the presence of adequate cement to prevent such migration;
 3. For Class III wells where the nature of the casing precludes the use of the logging techniques prescribed at subsection (C)(1), cementing records demonstrating the

presence of adequate cement to prevent such migration; or

4. For Class III wells where the Director elects to rely on cementing records to demonstrate the absence of significant fluid movement, the monitoring program prescribed by R18-9-G647(B) shall be designed to verify the absence of significant fluid movement.
- D.** The Director may allow the use of a test to demonstrate mechanical integrity other than those listed in subsections (B) and (C)(2) with the written approval of the Administrator.
- E.** In conducting and evaluating the tests enumerated in this Section or others to be allowed by the Director, the owner or operator and the Director shall apply methods and standards generally accepted in the industry. When the owner or operator reports the results of mechanical integrity tests to the Director, they shall include a description of the test or tests and the method or methods used. In making the evaluation, the Director shall review monitoring and other test data submitted since the previous evaluation.
- F.** The Director may require additional or alternative tests if the results presented by the owner or operator under subsection (E) are not satisfactory to the Director to demonstrate that there is no movement of fluid into or between USDWs resulting from the injection activity.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B614. Plugging and Abandoning Class I, II, III, IV, and V Wells

- A.** Requirements for Class I, II and III wells.
1. Prior to abandoning Class I, II and III wells, the well shall be plugged with cement in a manner which will not allow the movement of fluids either into or between USDWs. The Director may allow Class III wells to use other plugging materials if the Director is satisfied that such materials will prevent movement of fluids into or between USDWs.
 2. Placement of the cement plugs shall be accomplished by one of the following:
 - a. The Balance method;
 - b. The Dump Bailer method;
 - c. The Two-Plug method; or
 - d. An alternative method approved by the Director, which will reliably provide a comparable level of protection to USDWs.
 3. The well to be abandoned shall be in a state of static equilibrium with the mud weight equalized top to bottom, either by circulating the mud in the well at least once or by a comparable method prescribed by the Director, prior to the placement of the cement plug or plugs.
 4. The plugging and abandonment plan required under R18-9-D635(15) and R18-9-D636(A)(5) shall, in the case of a Class III project which underlies or is in an aquifer which has been exempted under R18-9-A606, also demonstrate adequate protection of USDWs. The Director shall prescribe aquifer cleanup and monitoring where it is deemed necessary and feasible to insure adequate protection of USDWs.
- B.** Requirements for Class IV wells. Prior to abandoning a Class IV well, the owner or operator shall close the well in accordance with R18-9-H649.
- C.** Requirements for Class V wells.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. Prior to abandoning a Class V well, the owner or operator shall close the well in a manner that prevents the movement of fluid containing any contaminant into an USDW, if the presence of that contaminant may cause a violation of any primary drinking water regulation under Table 1 of this Article or may otherwise adversely affect the health of persons.
 2. The owner or operator shall dispose of or otherwise manage any soil, gravel, sludge, liquids, or other materials removed from or adjacent to the well in accordance with all applicable Federal, State, and local regulations and requirements.
- C. Any person who performs or proposes an underground injection for which a permit is or will be required shall submit an application to the Director in accordance with the Arizona UIC program as follows:
 1. For existing wells, as expeditiously as practicable.
 2. For new injection wells, except new wells authorized by an existing area permit under R18-9-C624(C), at a reasonable time before construction is expected to begin.
 - D. All applicants for Class I, II, III, and V permits shall provide the following information to the Director, using the application form provided by the Director. Applicants for Class VI permits shall follow the criteria provided in R18-9-J657.
 1. Activities conducted by the applicant which require a permit;
 2. Name, mailing address, and location of the facility for which the application is submitted;
 3. Up to four NAICS codes which best reflect the principal products or services provided by the facility;
 4. The operator's name, address, telephone number, ownership status, and status as Federal, State, private, public, or other entity;
 5. A listing of all state and federal environmental permits or construction approvals received or applied for and other relevant environmental permits;
 6. A topographic map (or other map if a topographic map is unavailable) extending one mile beyond the property boundaries of the source depicting the facility and each of its intake and discharge structures; each of its hazardous waste treatment, storage, or disposal facilities; each well where fluids from the facility are injected underground; and those wells, springs, and other surface water bodies, and drinking water wells listed in public records or otherwise known to the applicant within a quarter mile of the facility property boundary;
 7. A brief description of the nature of the business;
 8. A plugging and abandonment plan that meets the requirements of R18-9-B614 and is acceptable to the Director;
 9. A listing of any historic property or potential historic property as defined by R12-8-301.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-B615. Transitioning from Class II to Class VI Injection Well

- A. Owners and operators that are injecting carbon dioxide for the primary purpose of long-term storage into an oil and gas reservoir must apply for and obtain a Class VI geologic sequestration permit when there is an increased risk to the USDWs compared to Class II operations. In determining if there is an increased risk to USDWs, the owner or operator must consider the factors specified in subsection (B).
- B. The Director shall determine when there is an increased risk to USDWs compared to Class II operations and a Class VI permit is required. In order to make this determination the Director shall consider the following:
 1. Increase in reservoir pressure within the injection zone or zones;
 2. Increase in carbon dioxide injection rates;
 3. Decrease in reservoir production rates;
 4. Distance between the injection zone or zones and USDWs;
 5. Suitability of the Class II area of review delineation;
 6. Quality of abandoned well plugs within the area of review;
 7. The owner's or operator's plan for recovery of carbon dioxide at the cessation of injection;
 8. The source and properties of injected carbon dioxide; and
 9. Any additional site-specific factors as determined by the Director.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART C. AUTHORIZATION BY PERMIT FOR UNDERGROUND INJECTION**R18-9-C616. Individual Permits; Application for Individual Permits**

- A. Unless an underground injection well is authorized by rule under R18-9-I650, all injection activities including construction of an injection well are prohibited until the owner or operator is authorized by permit. Authorization by rule for a well or project that has submitted a permit application terminates for the well or project upon the effective date of the permit. Procedures for applications, issuance, and administration of emergency permits are found exclusively under R18-9-C625.
- B. When a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C617. Signatories

- A. All permit applications, except those submitted for Class II wells, shall be signed as follows:
 1. For a corporation: by a responsible corporate officer. For the purpose of this Section, a responsible corporate officer means:
 - a. A president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation; or
 - b. The manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million, if authority to sign docu-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ments has been assigned or delegated to the manager in accordance with corporate procedures.

2. For a Partnership or sole proprietorship: by a general Partner or the proprietor, respectively; or
 3. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this Section, a principal executive officer of a Federal agency includes:
 - a. The chief executive officer of the agency; or
 - b. A senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.
- B.** All reports required by permits, other information requested by the Director, and all permit applications submitted for Class II wells under R18-9-C616 shall be signed by a person described in subsection (A), or by a duly authorized representative of that person. A person is a duly authorized representative only if:
1. The authorization is made in writing by a person described in subsection (A);
 2. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, or position of equivalent responsibility; and
 3. The written authorization is submitted to the Director.
- C.** If an authorization under subsection (B) is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of subsection (B) must be submitted to the Director prior to or together with any reports, information, or applications to be signed by an authorized representative.
- D.** Any person signing a document under subsection (A) or (B) shall make the following certification: *I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.*

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C618. Draft Permits

- A.** Once an application is complete, the Director shall tentatively decide whether to prepare a draft permit or to deny the application.
- B.** If the Director tentatively decides to deny the permit application, they shall issue a notice of intent to deny. A notice of intent to deny the permit application is a type of draft permit which follows the same procedures as any draft permit prepared under this Section. If the Director's final decision is that the tentative decision to deny the permit application was incorrect, they shall withdraw the notice of intent to deny and proceed to prepare a draft permit under subsection (D).
- C.** If the Director decides to prepare a draft permit, it shall contain the following information, to the extent applicable:

1. All conditions under R18-9-D635;
2. All compliance schedules under R18-9-D637;
3. All monitoring requirements under R18-9-D638; and
4. Permit conditions under R18-9-D636.

- D.** All draft permits prepared under this Section shall be accompanied by a brief summary of the basis for the draft permit conditions or the intent to deny, including references to applicable statutory or regulatory provisions and a fact sheet pursuant to R18-9-C619. The Director shall provide the applicant with the draft permit and the fact sheet and allow reasonable time for informal comment by the applicant prior to publicly noticing the draft permit and fact sheet. The Director shall give notice of opportunity for a public hearing and public comment, issue a final permit decision, and respond to comments.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C619. Fact Sheet

- A.** A fact sheet shall be prepared for every draft permit for a UIC facility or activity. The fact sheet shall briefly set forth the principal facts and the significant factual, legal, methodological, and policy questions considered in preparing the draft permit. The Director shall send the fact sheet to the applicant and, on request, to any other person.
- B.** The fact sheet shall include, when applicable:
1. A brief description of the type of facility or activity that is the subject of the draft permit.
 2. The type and quantity of wastes, fluids, or pollutants that are proposed to be or are being injected.
 3. A brief summary of the basis for the draft permit conditions including references to applicable statutory or regulatory provisions and appropriate supporting references to the administrative record.
 4. Reasons why any requested variance or alternatives to required standards do or do not appear justified.
 5. A description of the procedures for reaching a final decision on the draft permit, including:
 - a. The beginning and ending dates of the comment period under R18-9-C620 and the address where comments will be received;
 - b. Procedures for requesting a hearing and the nature of that hearing; and
 - c. Any other procedures by which the public may Participate in the final decision.
 6. The name and telephone number of a person to contact for additional information.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C620. Public Notice of Permit Actions and Public Comment Period

- A.** The Director shall give public notice that the following actions have occurred:
1. A draft permit that has been prepared under R18-9-C618, and
 2. A hearing has been scheduled under R18-9-C622.
- B.** Public notices may describe more than one permit or permit action.
- C.** Public notice of the preparation of a draft permit required under subsection (A):

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. Shall allow at least 30 days for public comment; and
 2. Shall be given at least 30 days before the hearing date.
- D.** Public notice of activities described in subsection (A) shall be given by the following methods:
1. Delivery of a copy of the notice to:
 - a. The applicant;
 - b. Any affected federal, state, tribal, or local agency, or council of government;
 - c. Federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources, and the State Historic Preservation Office;
 - d. Any person who requested, in writing, notification of the activity;
 - e. Any persons on a contact list developed from past permit proceedings and public outreach; and
 - f. For Class VI injection well UIC permits, mailing or e-mailing a notice to State and local oil and gas regulatory agencies and State agencies regulating mineral exploration and recovery and all agencies that oversee injection wells in the State.
 2. For Major Facilities only, newspaper publication in accordance with A.A.C. R18-1-401(A)(1).
- E.** All public notices issued under this Part shall contain the following information:
1. Name and address of the Department;
 2. Name and address of the permittee or permit applicant and, if different, of the facility or activity regulated by the permit;
 3. A brief description of the business conducted at the facility or activity described in the permit application or the draft permit;
 4. Name, address, and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit or draft general permit, as the case may be, fact sheet, and the application;
 5. A brief description of the comment procedures, the time and place of any hearing, including a statement of procedures to request a hearing, unless a hearing has already been scheduled, and other procedures that the public may use to participate in the final permit decision; and
 6. Any additional information considered necessary to the permit decision.
- F.** In addition to the general public notice described in subsection (E), the public notice of hearing under R18-9-C622 shall contain the following information:
1. Reference to the date of previous public notices relating to the permit;
 2. Date, time, and place of the hearing; and
 3. A brief description of the nature and purpose of the hearing, including the applicable rules and procedures.
- G.** In addition to the general public notice described in subsection (E), the Director shall deliver a copy of the fact sheet, permit application, and draft permit to all persons identified in subsections (D)(1)(a), (b), and (c).

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C621. Public Comments and Requests for Public Hearings

During the public comment period provided under R18-9-C620, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already

been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered as provided in R18-9-C623.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C622. Public Hearings

- A.** The Director shall hold a public hearing whenever they find, on the basis of a request, a significant degree of public interest in a draft permit or permits.
- B.** The Director may also hold a public hearing at their discretion such as when a hearing might clarify one or more issues involved in the permit decision. The Director may designate a presiding officer if a hearing is held.
- C.** Public notice of the hearing shall be given as specified in R18-9-C620.
- D.** Any person may submit oral or written statements and data concerning the draft permit. Reasonable limits may be set upon the time allowed for oral statements, and the submission of statements in writing may be required. The public comment period under R18-9-C620 shall automatically be extended to the close of any public hearing under this Section. The hearing officer may also extend the comment period by so stating at the hearing.
- E.** An audio recording or written transcript of the hearing shall be made available to the public upon request.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C623. Response to Comments

- A.** At the time that any final permit is issued under R18-9-C627, the Director shall issue a response to comments. This response shall:
1. Specify which provisions, if any, of the draft permit have been changed in the final permit decision, and the reasons for the change; and
 2. Briefly describe and respond to all significant comments on the draft permit raised during the public comment period, or during any hearing.
- B.** The response to comments shall be available to the public.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C624. Area Permits

- A.** The Director may issue a permit on an area basis, rather than for each well individually, provided that the permit is for injection wells:
1. Described and identified by location in permit application or applications if they are existing wells, except that the Director may accept a single description of wells with substantially the same characteristics;
 2. Within the same well field, facility site, reservoir, project, or similar unit located in Arizona;
 3. Operated by a single owner or operator;
 4. Used to inject fluids other than hazardous waste; and
 5. Other than Class VI wells.
- B.** Area permits shall specify:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. The area within which underground injections are authorized; and
 2. The requirements for construction, monitoring, reporting, operation, and abandonment, for all wells authorized by the permit.
- C. The area permit may authorize the permittee to construct and operate, convert, or plug and abandon wells within the permit area provided:
1. The permittee notifies the Director at such time as the permit requires;
 2. The additional well satisfies the criteria in subsection (A) and meets the requirements specified in the permit under subsection (B); and
 3. The cumulative effects of drilling and operation of additional injection wells are considered by the Director during evaluation of the area permit application and are acceptable to the Director.
- D. If the Director determines any well that is constructed pursuant to subsection (C) does not satisfy any of the requirements of subsections (C)(1) and (2) the Director may modify the permit under R18-9-C632, terminate under R18-9-C634, or take enforcement action. If the Director determines that cumulative effects are unacceptable, the permit may be modified under R18-9-C632.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C625. Emergency Permits

- A. Notwithstanding any other provision of this Article, the Director may temporarily permit a specific underground injection if:
1. An imminent and substantial endangerment to the health of persons will result unless a temporary emergency permit is granted; or
 2. A substantial and irretrievable loss of oil or gas resources will occur unless a temporary emergency permit is granted to a Class II well; and
 - a. Timely application for a permit could not practically have been made; and
 - b. The injection will not result in the movement of fluids into USDWs; or
 3. A substantial delay in production of oil or gas resources will occur unless a temporary emergency permit is granted to a new Class II well and the temporary authorization will not result in the movement of fluids into an USDW.
- B. Requirements for issuance.
1. Any temporary permit under subsection (A)(1) shall be for no longer term than required to prevent the hazard.
 2. Any temporary permit under subsection (A)(2) shall be for no longer than 90 days, except that if a permit application has been submitted prior to the expiration of the 90-day period, the Director may extend the temporary permit until final action on the application.
 3. Any temporary permit under subsection (A)(3) shall be issued only after a complete permit application has been submitted and shall be effective until final action on the application.
 4. Notice of any temporary permit under this Section shall be published in accordance with R18-9-C621 within 10 days of the issuance of the permit.

5. The temporary permit under this Section may be either oral or written. If oral, it must be followed within five calendar days by a written temporary emergency permit.
6. The Director shall condition the temporary permit in any manner they determine is necessary to ensure that the injection will not result in the movement of fluids into an USDW.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C626. Effect of a Permit

- A. Except for Class II and III wells, compliance with a permit during its term constitutes compliance, for purposes of enforcement, with this Article and Part C of the SDWA. However, a permit may be modified, revoked and reissued, or terminated during its term for cause as set forth in R18-9-C632 and R18-9-C634.
- B. The issuance of a permit does not convey any property rights of any sort, or any exclusive privilege.
- C. The issuance of a permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of State or local law or regulations.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C627. Final Permit Decision and Notification

- A. Issuance of a final permit decision by the Director shall be accompanied by the permit and an updated fact sheet per R18-9-C619, if applicable, and a notification to the applicant and each person who has submitted written comments or requested notice of the final permit decision. The notice and hearing procedures are subject to either A.R.S. Title 41, Chapter 6, Article 10, or A.R.S. Title 49, Chapter 2, Article 7.
- B. The notice shall include:
1. If applicable, the reasons for the denial, revocation or termination, including reference to the statutes or rules on which the decision is based.
 2. A description of the party's right to request a hearing and a reference to the procedures for appealing the final permit decision, including the number of days within which an appeal may be filed and the name and telephone number of the Department contact person who can answer questions regarding the appeals process.
 3. A reference to the applicant's right to request an informal settlement conference under A.R.S. § 41-1092.06.
- C. If the final permit decision is based on a determination by the Director that the applicable criteria under R18-9-A606 are not satisfied, then that determination may be included as part of the appeal.
- D. The final permit decision shall take effect 30 days after its issuance in accordance with the notification requirements of subsection A unless stayed pursuant to A.R.S. Title 41, Chapter 6, Article 10, or A.R.S. Title 49, Chapter 2, Article 7.
- E. If, under this Article, the issuance, modification, or revocation and reissuance of a permit necessitates a new aquifer exemption or enlargement of a previously approved aquifer exemption, then the issuance, modification, or revocation and reissuance of the permit is appealable, but shall not become effective unless the new aquifer exemption or enlargement of

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

the previously approved aquifer exemption has been approved by the Administrator.

- F. If, under this Article, the issuance, modification, or revocation and reissuance of a permit necessitates an injection depth waiver pursuant to R18-9-J670 of this Article then the issuance, modification, or revocation and reissuance of the permit is appealable, but shall not become effective until the Director is in receipt of written concurrence from the Administrator.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C628. Permit Duration

- A. Permits for Class I and Class V wells shall be effective for a fixed term not to exceed 10 years. UIC permits for Class II and III wells shall be issued for a period up to the operating life of the facility. UIC permits for Class VI wells shall be issued for the operating life of the facility and the post-injection site care period. The Director shall review each issued Class II, III, and VI well UIC permit at least once every five years to determine whether it should be modified, revoked and reissued, terminated, or a minor modification made as provided in R18-9-C632.
- B. Except as provided in R18-9-C629, the term of a permit shall not be extended by modification beyond the maximum duration specified in this Section.
- C. The Director may issue any permit for a duration that is less than the full allowable term under this Section.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C629. Continuation of Expiring Permits

- A. The conditions of an expiring permit continue in force under A.R.S. § 41-1092.11(A) until the effective date of a new permit if:
1. The permittee has submitted a timely application that is a complete application for a new permit; and
 2. The Director, through no fault of the permittee, does not issue a new permit with an effective date on or before the expiration date of the prior permit.
- B. Permits continued under this Section remain fully effective and enforceable.
- C. When the permittee is not in compliance with the conditions of the expiring or expired permits the Director may choose to do any or all of the following:
1. Initiate enforcement action based upon the permit that has been continued;
 2. Issue a notice of intent to deny the new permit. If the permit is denied, the owner or operator would then be required to cease the activities authorized by the continued permit or be subject to enforcement action for operating without a permit;
 3. Issue a new permit under this Article with appropriate conditions; or
 4. Take other action as authorized under this Article.
- D. Upon the effective date of EPA's approval of Arizona's UIC program, the Department shall administer any permit authorized or issued under the EPA UIC program in the state of Arizona, excluding Indian lands. The Director may continue expired or expiring EPA-issued UIC permits until the effective date of a new state-issued UIC permit.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C630. Permit Transfer

- A. Except as provided in subsection (B), a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued under R18-9-C632(F)(2), or a minor modification made under R18-9-C633(4), to identify the new permittee and incorporate such other requirements as may be necessary under this Article the Safe Drinking Water Act.
- B. As an alternative to transfers under subsection (A), any UIC permit for a well not injecting hazardous waste or injecting carbon dioxide for geological sequestration may be automatically transferred to a new permittee if:
1. The current permittee notifies the Director at least 30 days in advance of the proposed transfer date referred to in subsection (B)(2);
 2. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer or permit responsibility, coverage, and liability between them, and the notice demonstrates that the financial responsibility requirements of R18-9-D636(A)(6) will be met by the new permittee; and
 3. The Director does not notify the existing permittee and the proposed new permittee of the Director's intent to modify or revoke and reissue the permit. A modification under this Section may also be a minor modification under R18-9-C633. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in subsection (B)(2).

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C631. Modification; Revocation and Reissuance; or Termination of Permits

- A. Permits may only be modified or revoked and reissued pursuant to R18-9-C632 or terminated pursuant to R18-9-C634 either at the request of any interested person, including the permittee, or upon the Director's initiative. All requests shall be made in writing and shall contain facts or reasons supporting the request.
- B. If the Director decides a request to modify, revoke and reissue, or terminate is not justified, they shall send the requestor a brief written response giving a reason for the decision. Denial of a request to terminate does not require a notice of intent to deny. Denial of a request for modification or revocation and reissuance requires a notice of intent to deny only when the request is made by the permittee, the scope of the request has not previously been requested and denied and the request is not for a minor modification. A notice of intent to deny is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.
- C. If the Director preliminarily decides to modify or revoke and reissue a permit under R18-9-C632, they shall prepare a draft permit under R18-9-C618 incorporating the proposed changes and notify the permittee in writing of the reason for the preliminary decision to modify or revoke and reissue a permit with reference to the statute or rule on which the decision is based. The Director may request additional information and, in the case of a modified permit, may require the submission of an

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

updated application. The Director shall require the submission of a new application in the case of revoked and reissued permits.

- D. In a permit modification under this Section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this Section, the entire permit is reopened just as if the permit had expired and was being reissued. During any modification or revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is issued.
- E. Minor modifications pursuant to R18-9-C633 are not subject to the requirements of this Section.
- F. If the Director preliminarily decides to terminate under R18-9-C634(A)(1), (2) or (3), the Director shall issue a notice of intent to terminate that identifies the reason for the preliminary decision to terminate with reference to the statute or rule on which the decision is based. A notice of intent to terminate is not required when a permittee requests termination under R18-9-C634(A)(4). A notice of intent to terminate is a type of draft permit which shall follow the same procedures as any draft permit prepared pursuant to R18-9-C618.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C632. Modification; Revocation and Reissuance of Permits

- A. When the Director receives any information (for example, inspects the facility, receives information submitted by the permittee as required in the permit, receives a request for modification or revocation and reissuance under R18-9-C631, or conducts a review of the permit file) they may determine whether or not one or more of the causes listed in subsections (E) and (F) for modification or revocation and reissuance or both exist.
- B. If cause exists, the Director may modify or revoke and reissue the permit accordingly, subject to the limitations of subsection (G), and may request an updated application if necessary.
- C. If cause does not exist under this Section or R18-9-C633, the Director shall not modify or revoke and reissue the permit.
- D. If a permit modification satisfies the criteria in R18-9-C633 for "minor modifications" the permit may be modified without a draft permit or public review. Otherwise, a draft permit must be prepared and other procedures under this Article must be followed.
- E. For Class II, Class III or Class VI wells the following may be causes for revocation and reissuance as well as modification; and for all other wells the following may be cause for revocation or reissuance as well as modification when the permittee requests or agrees:
 - 1. There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.
 - 2. Permits other than for Class II and III wells may be modified during their terms for this cause only if the information was not available at the time of permit issuance, other than revised regulations, guidance, or test methods, and would have justified the application of different permit conditions at the time of issuance. For UIC area per-

mits under R18-9-C624, this cause shall include any information indicating that cumulative effects on the environment are unacceptable.

- 3. The standards or regulations on which the permit was based have been changed by promulgation of new regulations or by judicial decision after the permit was issued. Permits other than those for Class II, Class III or Class VI wells may be modified during their permit terms for this cause only as follows:
 - a. For promulgation of amended standards or regulations, when:
 - i. The permit condition requested to be modified was based on a regulation promulgated under this Article;
 - ii. ADEQ has revised, withdrawn, or modified that portion of the regulation on which the permit condition was based; and
 - iii. A permittee requests modification in accordance with R18-9-C631 within 90 days after *Arizona Administrative Register* notice of the ADEQ action on which the request is based.
 - b. For judicial decisions, a court of competent jurisdiction has remanded and stayed ADEQ promulgated regulations if the remand and stay concern that portion of the regulations on which the permit condition was based and a request is filed by the permittee in accordance with R18-9-C631 within 90 days of judicial remand.
- 4. The Director determines if good cause exists for modification of a compliance schedule. Good cause includes unforeseen circumstances, like a strike, a flood, a materials shortage or other events over which the permittee has little or no control and for which there is no reasonably available remedy. See also R18-9-C633 (minor modifications).
- 5. Additionally, for Class VI wells, whenever the Director determines that permit changes are necessary based on:
 - a. Area of review reevaluations under R18-9-J659(E)(1);
 - b. Any amendments to the testing and monitoring plan under R18-9-J665(10);
 - c. Any amendments to the injection well plugging plan under R18-9-J667(C);
 - d. Any amendments to the post-injection site care and site closure plan under R18-9-J668(A)(3);
 - e. Any amendments to the emergency and remedial response plan under R18-9-J669(D); or
 - f. A review of monitoring and/or testing results conducted in accordance with permit requirements.
- F. The following are causes to modify or, alternatively, revoke and reissue a permit:
 - 1. Cause exists for termination under R18-9-C634, and the Director determines that modification or revocation and reissuance is appropriate.
 - 2. The Director has received notification of a proposed transfer of the permit. A permit also may be modified to reflect a transfer after the effective date of an automatic transfer under R18-9-C630(B) but will not be revoked and reissued after the effective date of the transfer except upon the request of the new permittee.
 - 3. A determination that the waste being injected is a hazardous waste as defined in A.R.S. § 49-921 either because the definition has been revised, or because a previous determination has been changed.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- G.** Suitability of the facility location will not be considered at the time of permit modification or revocation and reissuance unless new information or standards indicate that a threat to human health or the environment exists which was unknown at the time of permit issuance.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C633. Minor Modifications of Permits

Upon the consent of the permittee, the Director may modify a permit to make the corrections or allowances for changes in the permitted activity listed in this Section, without following the procedures of this Article. Any permit modification not processed as a minor modification under this Section must be made for cause and with a draft permit and public notice as required by R18-9-C632. Minor modifications may only:

1. Correct typographical errors;
2. Require more frequent monitoring or reporting by the permittee;
3. Change an interim compliance date in a schedule of compliance, provided the new date is not more than 120 days after the date specified in the existing permit and does not interfere with attainment of the final compliance date requirement;
4. Allow for a change in ownership or operational control of a facility where the Director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittees has been submitted to the Director;
5. Change quantities or types of fluids injected which are within the capacity of the facility as permitted and, in the judgment of the Director, would not interfere with the operation of the facility or its ability to meet conditions described in the permit and would not change its classification;
6. Change construction requirements approved by the Director pursuant to R18-9-D636(A)(1), provided that any such alteration shall comply with the requirements of this Article;
7. Amend a plugging and abandonment plan that has been updated under R18-9-D636(A)(5); or
8. Amend a Class VI injection well testing and monitoring plan, plugging plan, post-injection site care and site closure plan, or emergency and remedial response plan where the modifications merely clarify or correct the plan, as determined by the Director.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-C634. Termination of Permits

- A.** The Director may terminate a permit during its term, or deny a permit renewal application for the following causes:
1. Noncompliance by the permittee with any condition of the permit;
 2. The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time; or

3. A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or
4. The permittee has requested termination of their permit due to the completion of the terms and conditions therein, including proper abandonment or plugging pursuant to R18-9-B614.

- B.** The Director shall follow the applicable procedures as required under R18-9-C631(F) in terminating any permit under this Section.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART D. PERMIT CONDITIONS FOR UNDERGROUND INJECTION

R18-9-D635. Conditions Applicable to All Permits

The following conditions apply to all UIC permits. All conditions applicable to all permits shall be incorporated into the permits issued under this Article, either expressly or referenced by specific citation. If incorporated by reference, a specific citation to this Section must be given in the permit.

1. The permittee must comply with all conditions of any permit issued under this Article. Any permit noncompliance constitutes a violation of this Article and is grounds for enforcement action; for permit modification, revocation and reissuance, or termination; or for denial of a permit renewal application unless otherwise authorized in an emergency permit under R18-9-C625.
2. If the permittee wishes to continue any activity regulated by permit under this Article after the expiration date of this permit, the permittee must apply for and obtain a new permit.
3. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
4. The permittee shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit.
5. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control, and related appurtenances, that are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit.
6. This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.
7. This permit does not convey property rights of any sort, or any exclusive privilege.
8. The permittee shall furnish to the Director, within a time specified, any information which the Director may

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the Director, upon request, copies of records required to be kept by this permit.
9. The permittee shall allow the Director, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:
 - a. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;
 - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
 - c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
 - d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by this Article the SDWA, any substances or parameters at any location.
 10. Monitoring and records.
 - a. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
 - b. The permittee shall retain records of all monitoring information, including the following:
 - i. Calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three years from the date of the sample, measurement, report, or application. This period may be extended by request of the Director at any time; and
 - ii. The nature and composition of all injected fluids until three years after the completion of any plugging and abandonment procedures specified under R18-9-D636(A)(5), or under this Article as appropriate. The Director may require the owner or operator to deliver the records to the Director at the conclusion of the retention period.
 - c. Records of monitoring information shall include:
 - i. The date, exact place, and time of sampling or measurements;
 - ii. The individual or individuals who performed the sampling or measurements;
 - iii. The date or dates analyses were performed;
 - iv. The individual or individuals who performed the analyses;
 - v. The analytical techniques or methods used; and
 - vi. The results of such analyses.
 - d. Owners or operators of Class VI wells shall retain records as specified in Part J of this Article, including R18-9-J659(G), R18-9-J666(6), R18-9-J667(D), R18-9-J668(F), and R18-9-J668(H).
 11. All applications, reports, or information submitted to the Director shall be signed and certified as required under R18-9-C617.
 12. Reporting requirements.
 - a. The permittee shall give notice to the Director as soon as possible of any planned physical alterations or additions to the permitted facility.
 - b. The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity that may result in noncompliance with permit requirements.
 - c. This permit is not transferable to any person except after notice to the Director. The Director may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under this Article.
 - d. Monitoring results shall be reported at the intervals specified in this permit.
 - e. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 30 days following each schedule date.
 - f. The permittee shall report any noncompliance that may endanger health or the environment within 24 hours, including:
 - i. Any monitoring or other information that indicates any contaminant may cause an endangerment to a USDW; or
 - ii. Any noncompliance with a permit condition or malfunction of the injection system that may cause fluid migration into or between USDWs. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within five days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause, the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.
 - g. The permittee shall report all instances of noncompliance not reported under subsections (A)(12)(a), (d), (e), and (f), at the time monitoring reports are submitted. The reports shall contain the information listed in subsection (A)(12)(f).
 - h. Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Director, it shall promptly submit such facts or information.
 13. Except for all new wells authorized by an area permit under R18-9-C624(C), a new injection well may not commence injection until construction is complete; and:
 - a. The permittee has submitted notice of completion of construction to the Director; and
 - b. Either of the following apply:
 - i. The Director has inspected or otherwise reviewed the new injection well and finds it is in compliance with the conditions of the permit; or
 - ii. The permittee has not received notice from the Director of the intent to inspect or otherwise

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- review the new injection well within 13 days of the date of the notice under subsection (A)(13)(a), in which case prior inspection or review is waived and the permittee may commence injection. The Director shall include in the notice a reasonable time period in which the well shall be inspected.
14. The permittee shall notify the Director at such times as the permit requires before conversion or abandonment of the well or in the case of area permits before closure of the project.
 15. A Class I, II, or III permit shall include, and a Class V permit may include, conditions that meet the requirements of R18-9-B614 to ensure that plugging and abandonment of the well will not allow the movement of fluids into or between USDWs. Where the plan meets the requirements of R18-9-B614, the Director shall incorporate the plan into the permit as a permit condition. Where the Director's review of an application indicates that the permittee's plan is inadequate, the Director may require the applicant to revise the plan, prescribe conditions meeting the requirements of this subsection, or deny the permit. A Class VI permit shall include conditions that meet the requirements set forth in R18-9-J667. Where the plan meets the requirements of R18-9-J667, the Director shall incorporate it into the permit as a permit condition. For purposes of this subsection, temporary or intermittent cessation of injection operations is not abandonment.
 16. Within 60 days after plugging a well or at the time of the next quarterly report, whichever is less, the owner or operator shall submit a report to the Director. If the quarterly report is due less than 15 days before completion of plugging, then the report shall be submitted within 60 days. The report shall be certified as accurate by the person who performed the plugging operation. Such report shall consist of either:
 - a. A statement that the well was plugged in accordance with the plan previously submitted to the Director; or
 - b. Where actual plugging differed from the plan previously submitted, an updated version of the plan on the form supplied by the Director, specifying the differences.
 17. Duty to establish and maintain mechanical integrity.
