ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: “permittees”) will be the primary bearers of costs associated with this rulemaking. Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultant have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|---|---|
| Costs | | |
| Cost estimates for mining reclamation/remediation | Matrix Report Chart 17 | Included for illustrative purposes |
| Costs and Benefits | | |
| National estimates of # of systems impacted, cancer risk from uranium/radionuclides, and estimated compliance costs | Matrix Report Chart 9 and related EPA documentation in 65 FR 76733 ff. | National numbers adjusted to potential Arizona cases and populations, based on greater presence of Uranium in groundwater and a lower proportion of affected population than nation |
| General | | |
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/cpicalc.pl | |

Approach to the EIS for Uranium. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Uranium Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (*see* Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA), which takes into account multiple factors affecting potential costs and benefits. Cost ranges generated by the Matrix Report and

used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP) program. According to ADEQ's database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| | |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|----------------------------------|--|--|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees | Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to hundreds of millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSSs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see A.R.S. § 49-104(B)(17)</i>). | Significant | |
| Industrial Facilities | Industrial operations are assumed to have a disproportionately higher representation among permittees treating for uranium, in relation to those treating urban wastewater | Significant | |
| Wastewater Treatment Plants | Most permittees in this category will not be treating for uranium, except for those where ambient levels are high | Significant | |
| Mines | Mining operations are assumed to represent a fairly high proportion of those permittees treating for uranium. | Significant | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below | Assumed to be minimal and spread broadly through the customer base, on a monthly basis | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|----------------------------------|-------------------------------------|
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that many permits may need to be amended to update monitoring tables that include Uranium as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. | | Significant |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. | | Significant |
| State costs | Some state-supported medical costs would decrease. | Minimal | Significant |
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be about \$24,000 for the direct and secondary hires. | | Minimal |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

In the Matrix Report, costs for treatment are given within a wide range. The complexity driving the variation in costs results primarily from: 1) permittees’ need to consider/analyze multiple treatment technologies that have varying applicability according to specific water conditions; 2) operational costs that vary by influent Uranium concentration and water quality, and 3) the scale of permittee operations, plus other factors. The Matrix Report recognized that the number

of permittees-affected needed to be adjusted downward because some facilities may have ambient Uranium concentrations exceeding the proposed AWQS, and in recognition of facilities that analyzed for total Uranium and had a quantified Uranium discharge limit, plus other technicalities.

For the purposes of this EIS, the Matrix Report's statewide cost range estimates (from nothing to millions) can be viewed as a theoretical total range, reflecting treatment options available, but within which permittees would tend to be minimizing costs where possible. Consequently the actual cost range is likely to be considerably narrower than the theoretical total range. The group of permittees that undertake treatment to reduce Uranium must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate.

Mines

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. Reclamation and remediation are additional requirements and costs related to uranium treatments associated with mining. Extensive mining activity in Arizona adds to the significance of this factor. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive, and constitutes an additional complicating factor in selecting and using technology for dealing with changes in AWQSs for individual contaminants, including uranium.

Industrial Facilities

The estimated number of industrial wastewater processing permittees is 56. This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources. Most of these will not be treating for uranium, except for those where ambient levels are high. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQSs, except where ambient water levels that exceed proposed AWQSs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQSs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele. For segment 2, according to the Matrix MCL Report the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This estimate was further reduced for this analysis based on the estimated number of facilities

treating for uranium and their distribution. Applying these two factors results in a relatively small estimated affected population of approximately 19,300. Estimates of benefits related to uranium reduction are based on the Matrix Report Chart 9 (p. 19) and the EPA backup. These factors, which include the relatively low estimate by EPA of cancer incidence associated with uranium exposure, yields a modest estimate of benefits of \$176,000. According to the Matrix Report, benefit estimates may underestimate the cost forgone for avoiding the cancer cases, as these medical-related costs do not take into account the loss of income and additional financial hardships or intangible factors, such as the psychological impact associated with the cancer. The uranium cancer risk reduction benefit estimates in EPA are based on a combination of cancers avoided but do not include the non-quantified kidney toxicity risk-reduction benefits. Other non-quantified benefits, according to EPA in 65 FR 76734, “include those related to the technologies used to remove radium and uranium from ground water (e.g., water softening technologies like ion exchange, lime softening, and membrane softening and iron removal technologies like green sand filtration and oxidation/filtration). EPA does not have enough information to estimate these benefits, but believes that they could be significant. Examples of benefits related to water softening include reductions in excessive calcium and manganese carbonate scaling in distribution systems, water heaters, and boilers and reductions in soap and detergent use. Examples of benefits related to iron removal include improvements in color and taste and reduction in staining of clothes, sinks, and basins.”

Community water systems (CWSs) and their clientele

Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. Estimates of the population served by municipal or other systems with water sources that included groundwater were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater. As many as 2.04 million Arizonans, as estimated, could be affected in this way. Because relatively few permittees will be treating for Uranium, the potentially affected population will likewise be reduced.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems).

Direct employment and earnings resulting from permittees’ investment in equipment are shown separately in the table below from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|---------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$3,148,517 |
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 5.67 |
| New Annual Earnings for Direct Jobs Created | \$529,186 |
| Total New Jobs (Direct + Secondary) | 17.38 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$24,034 |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated

through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee’s particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|--|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (see A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules: Potential savings could accrue to community water systems due to reduced Uranium in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary employment generated by investments in Uranium technology (using the low end of costs where ranges are given) are just over \$24,000.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Uranium Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (see Heading No. 8 above for citation). Other reference material was used to a lesser extent (see Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing specific contaminants referenced extensively in the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

AWP NFRM Public Comments - 18 AAC 11 - Uranium

Comment 1: Interest Group

Uranium. The EPA established an MCL of 30 parts per billion (ppb) for uranium in drinking water in 2000. However, ADEQ has not yet adopted this standard as an AWQS, leaving Arizona's aquifers—and the communities that depend on them—unprotected from the risks of uranium contamination. Facilities like the Pinyon Plain uranium mine exemplify the threats posed by inadequate regulation. Monitoring data from the mine has shown uranium levels as high as 130 ppb, far exceeding EPA's MCL. Such contamination poses serious health risks, including kidney damage, bone toxicity, and increased cancer risks, and jeopardizes hydrologically connected water sources like the springs on the Grand Canyon's South Rim. Recent studies from Crossey et al. and a report from EPA all indicate an increased risk from the mine for the Grand Canyon's waters and the drinking water of the Havasupai Tribe. We urge ADEQ to adopt the EPA's MCL of 30 ppb as an AWQS immediately and implement stricter compliance timelines for facilities already exceeding this standard.

ADEQ Response 1:

ADEQ appreciates the comment. The Uranium MCL is one of the seven (7) MCLs proposed for adoption as AWQs within the scope of the collective "AWQS Update" rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQs verbatim. As is detailed in this rulemaking, the Uranium MCL is in micrograms per liter ($\mu\text{g/L}$) which is equivalent to parts per billion or (ppb). 1000 micrograms is equivalent to 1 milligram. Therefore, the Uranium MCL of 30 $\mu\text{g/L}$ is equivalent to 0.030 mg/L. In order to align with the existing unit selection in the tables in R18-11-406, 0.030 mg/L is the final AWQS for Uranium.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. "Substantial Opposition" is a term defined in A.R.S. § 49-223(A) as, "... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS]." Upon receipt of "substantial opposition", the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is "appropriate" as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Uranium MCL as AWQS.

The release of this Chapter in Supp. 23-3 replaces Supp. 22-4, 1-99 pages.

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Authority: A.R.S. §§49-202(A), 49-203(A)(1)

Supp. 23-3

CHAPTER TABLE OF CONTENTS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

Tables in Article 1, Appendix A have been updated and now include historical notes (Supp. 16-4).

Article 1, consisting of Appendices A through C, repealed April 24, 1996 (Supp. 96-2).

Article 1, consisting of Section R18-11-103, reserved effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-105 and R18-11-106, and Appendices A and B, adopted April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 and R18-11-102, R18-11-104, R18-11-107 through R18-11-109, R18-11-111 through R18-11-113, R18-11-115, R18-11-117 and R18-11-118, R18-11-120 and R18-11-121, amended effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 through R18-11-121 and Appendices A through C, adopted effective February 18, 1992 (Supp. 92-1).

Article 1, consisting of Section R18-11-101, repealed effective February 18, 1992 (Supp. 92-1).

Article 1 consisting of Section R9-21-101 renumbered as Article 1, Section R18-11-101 (Supp. 87-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS**R18-11-101. Definitions**

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation (AgI)" means the use of a surface water for crop irrigation.
3. "Agricultural livestock watering (AgL)" means the use of a surface water as a water supply for consumption by livestock.
4. "Annual mean" is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. "Aquatic and wildlife (cold water) (A&Wc)" means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. "Aquatic and wildlife (effluent-dependent water) (A&Wedw)" means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. "Aquatic and wildlife (ephemeral) (A&We)" means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. "Aquatic and wildlife (warm water) (A&Ww)" means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. "Arizona Pollutant Discharge Elimination System (AZPDES)" means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. "Clean Water Act" means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. "Criteria" means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.
17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water or portion of a surface water, that consists of a point source discharge without which the surface water would be ephemeral. An effluent-dependent water may be perennial or intermittent depending on the volume and frequency of the point source discharge of treated wastewater.
20. "Ephemeral water" means a surface water or portion of surface water that flows or pools only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_Y = \sqrt[n]{(Y_1)(Y_2)(Y_3)\dots(Y_n)}$$
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

27. "Intermittent water" means a surface water or portion of surface water that flows continuously during certain times of the year and more than in direct response to precipitation, such as when it receives water from a spring, elevated groundwater table or another surface source, such as melting snowpack.
28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water or portion of surface water that flows continuously throughout the year.
33. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S. § 49-201(29)
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macroinvertebrates and algae are collected from these reference condition streams for calculating the Arizona Indexes of Biological Integrity thresholds.
37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
 - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
 - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means "WOTUS" as defined in A.R.S. § 49-201(53).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH₃), ammonium ion (NH₄⁺), nitrite (NO₂), and nitrate (NO₃), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
48. "Urban lake" means a manmade lake within an urban landscape.
49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.
51. "Wadable" means a surface water can be safely crossed on foot and sampled without a boat.
52. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Amended effective January 7, 1985 (Supp. 85-1). Amended by adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) "Navigable Water", previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-102. Applicability

- A. The water quality standards prescribed in this Article apply to surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is a part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores that is not a surface water or is located in an area that once was a surface water but is no longer a surface water because it has been and remains legally converted, including:
 - a. A pit,
 - b. Pregnant leach solution pond,
 - c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond or a sump in a mine pit associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product and that is being held for recycling,
 - h. Spill or upset catchment pond, or
 - i. A pond used for onsite remediation;
 3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-103. Repealed**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1). Repealed effective April 24, 1996 (Supp. 96-2).

R18-11-104. Designated Uses

- A. The Director shall adopt or remove a designated use or subcategory of a designated use by rule.
- B. Designated uses of a surface water may include full-body contact, partial-body contact, domestic water source, fish consumption, aquatic and wildlife (cold water), aquatic and wildlife (warm water), aquatic and wildlife (ephemeral), aquatic and wildlife (effluent-dependent water), agricultural irrigation, and agricultural livestock watering. The designated uses for specific surface waters are listed in Appendix B of this Article.
- C. Numeric water quality criteria to maintain and protect water quality for the designated uses are prescribed in Appendix A, R18-11-109, R18-11-110, and R18-11-112. Narrative water quality standards to protect all surface waters are prescribed in R18-11-108.
- D. If a surface water has more than one designated use listed in Appendix B, the most stringent water quality criterion applies.
- E. The Director shall revise the designated uses of a surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in Appendix B.
- F. In designating uses of a surface water and in establishing water quality criteria to protect the designated uses, the Director shall take into consideration the applicable water quality standards for downstream surface waters and shall ensure that the water quality standards that are established for an upstream surface water also provide for the attainment and maintenance of the water quality standards of downstream surface waters.
- G. A use attainability analysis shall be conducted prior to removal of a designated use or adoption of a subcategory of a designated use that requires less stringent water quality criteria.
- H. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria, provided the designated use is not an existing use and it is demonstrated through a use attainability analysis that attaining the designated use is not feasible for any of the following reasons:
1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A natural, ephemeral, intermittent, or low-flow condition or water level prevents the attainment of the use;
 3. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
 4. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
 5. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use; or
 6. Controls more stringent than those required by § 301 (b) and § 306 of the Clean Water Act [33 U.S.C. § 1311 and § 1316] are necessary to attain the use and implementation

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

of the controls would result in substantial and widespread economic and social impact.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-105. Tributaries; Designated Uses

The following water quality standards apply to a surface water that is not listed in Appendix B but that is a tributary to a listed surface water.

1. The aquatic and wildlife (ephemeral) and partial-body contact standards apply to an unlisted tributary that is an ephemeral water.
2. The aquatic and wildlife (cold water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is above 5000 feet in elevation.
3. The aquatic and wildlife (warm water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is below 5000 feet in elevation.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Section heading amended per instructions of the Department of Environmental Quality, August 9, 1996 (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-106. Net Ecological Benefit

- A. The Director may, by rule, modify a water quality standard on the ground that there is a net ecological benefit associated with the discharge of effluent to support or create a riparian and aquatic habitat in an area where water resources are limited. The Director may modify a water quality standard for a pollutant if it is demonstrated that:
 1. The discharge of effluent creates or supports an ecologically valuable aquatic, wetland, or riparian ecosystem in an area where these resources are limited;
 2. The ecological benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with the elimination of the discharge of effluent;
 3. The cost of treatment to achieve compliance with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent to the surface water. The discharger shall demonstrate that it is feasible to eliminate the discharge of effluent that creates or supports the ecologically valuable aquatic, wetland, or riparian ecosystem;
 4. The discharge of effluent to the surface water will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water;
 5. All practicable point source discharge control programs, including local pretreatment, waste minimization, and source reduction programs are implemented; and
 6. The discharge of effluent does not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.
- B. The Director shall not modify a water quality criterion for a pollutant to be less stringent than a technology-based effluent

limitation that applies to the discharge of that effluent. The discharge of effluent shall, at a minimum, comply with applicable technology-based effluent limitations.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-107. Antidegradation

- A. The Director shall, using R18-11-107.01 and this Section, determine whether there is degradation of water quality in a surface water on a pollutant-by-pollutant basis.
- B. Tier 1: The level of water quality necessary to support an existing use shall be maintained and protected. No degradation of existing water quality is permitted in a surface water where the existing water quality does not meet the applicable water quality standards.
- C. Tier 2: Where existing water quality in a surface water is better than the applicable water quality standard the existing water quality shall be maintained and protected. The Director may allow degradation of existing water quality in the surface water, if the Director makes all of the following findings:
 1. The water quality necessary for existing uses is fully protected and water quality is not lowered to a level that does not comply with applicable water quality standards,
 2. The highest statutory and regulatory requirements for new and existing point sources are achieved,
 3. All cost-effective and reasonable best management practices for nonpoint source pollution control are implemented, and
 4. Allowing lower water quality is necessary to accommodate important economic or social development in the area where the surface water is located.
- D. Tier 3: Existing water quality shall be maintained and protected in a surface water that is classified as an OAW under R18-11-112. Degradation of an OAW under subsection (C) is prohibited.
- E. The Director shall implement this Section in a manner consistent with § 316 of the Clean Water Act [33 U.S.C. 1326] if a potential water quality impairment associated with a thermal discharge is involved.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-107.01. Antidegradation Criteria

- A. Tier 1 antidegradation protection.
 1. Tier 1 antidegradation protection applies to the following surface waters:
 - a. A surface water listed on the 303(d) list for the pollutant that resulted in the listing,
 - b. An effluent dependent water,
 - c. An ephemeral water,
 - d. An intermittent water, and
 - e. A canal listed in Appendix B.
 2. A regulated discharge shall not cause a violation of a surface water quality standard or a wasteload allocation in a total maximum daily load approved by EPA.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. Except as provided in subsections (E) and (F), Tier 1 antidegradation review requirements are satisfied for a point-source discharge regulated under an individual AZPDES permit to an ephemeral water, effluent dependent water, intermittent water, or a canal listed in Appendix B, if water quality-based effluent limitations designed to achieve compliance with applicable surface water quality standards are established in the permit and technology-based requirements of the Clean Water Act for the point source discharge are met.
- B. Tier 2 antidegradation protection.**
1. Tier 2 antidegradation protection applies to a perennial water with existing water quality that is better than applicable water quality standards. A perennial water that is not listed in subsection (A)(1) nor classified as an OAW under A.A.C. R18-9-112(G) has Tier 2 antidegradation protection for all pollutants of concern.
 2. A regulated discharge that meets the following criteria, at critical flow conditions, does not cause significant degradation:
 - a. The regulated discharge consumes less than 20 percent of the available assimilative capacity for each pollutant of concern, and
 - b. At least 50 percent of the assimilative capacity for each pollutant of concern remains available in the surface water for each pollutant of concern.
 3. Antidegradation review. Any person proposing a new or expanded regulated discharge under an individual AZPDES permit that may cause significant degradation shall provide ADEQ with the following information:
 - a. Baseline characterization. A person seeking authorization to discharge under an individual AZPDES permit to a perennial water shall provide baseline water quality data on pollutants of concern where no data exists or there are insufficient data to characterize baseline water quality and to determine available assimilative capacity. A discharger shall characterize baseline water quality at a location upstream of the proposed discharge location;
 - b. Alternative analysis.
 - i. The person seeking authorization for the discharge shall prepare and submit a written analysis of alternatives to the discharge. The analysis shall provide information on all reasonable, cost-effective, less-degrading or non-degrading discharge alternatives. Alternatives may include wastewater treatment process changes or upgrades, pollution prevention measures, source reduction, water reclamation, alternative discharge locations, groundwater recharge, land application or treatment, local pretreatment programs, improved operation and maintenance of existing systems, seasonal or controlled discharge to avoid critical flow conditions, and zero discharge;
 - ii. The alternatives analysis shall include cost information on base pollution control measures associated with the regulated discharge and cost information for each alternative;
 - iii. The person shall implement the alternative that is cost-effective and reasonable, results in the least degradation, and is approved by the Director. An alternative is cost-effective and reasonable if treatment costs associated with the alternative are less than a 10 percent increase above the cost of base pollution control measures;
- iv. For purposes of this subsection, “base pollution control measures” are water pollution control measures required to meet technology-based requirements of the Clean Water Act and water quality-based effluent limits designed to achieve compliance with applicable water quality standards; and
- c. Social and economic justification. The person shall demonstrate to the Director that significant degradation is necessary to accommodate important economic or social development in the local area. The person seeking authorization for the discharge shall prepare a written social and economic justification that includes a description of the following:
 - i. The geographic area where significant degradation of existing water quality will occur;
 - ii. The current baseline social and economic conditions in the local area;
 - iii. The net positive social and economic effects of development associated with the regulated discharge and allowing significant degradation;
 - iv. The negative social, environmental, and economic effects of allowing significant degradation of existing water quality; and
 - v. Alternatives to the regulated discharge that do not significantly degrade water quality yet may yield comparable social and economic benefits.
4. For purposes of this Section, the term “pollutant of concern” means a pollutant with either a numeric or narrative water quality standard.
 5. Public participation. The Director shall provide public notice and an opportunity to comment on an antidegradation review under subsection (B)(3) and shall provide an opportunity for a public hearing under A.A.C. R18-9-A908(B).
- C. Tier 3 antidegradation protection.**
1. Tier 3 antidegradation protection applies only to an OAW listed in R18-11-112(G).
 2. A new or expanded point-source discharge directly to an OAW is prohibited.
 3. A person seeking authorization for a regulated discharge to a tributary to, or upstream of, an OAW shall demonstrate in a permit application or in other documentation submitted to ADEQ that the regulated discharge will not degrade existing water quality in the downstream OAW.
 4. A discharge regulated under a § 404 permit that may affect existing water quality of an OAW requires a determination by the Director to ensure that existing water quality is maintained and protected and any water quality impacts are temporary. Temporary water quality impacts are those impacts that occur for a period of six months or less and are not regularly occurring. The form of such a determination shall be as follows:
 - a. For Corps-issued § 404 permits, an individual § 401 water quality certification.
 - b. For Director-issued § 404 permits, a § 404 permit action, wherein the Director shall conduct a water quality evaluation as a part of the state’s requirements for issuing § 404 permits and in accordance with this Section.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. Antidegradation review of a § 404 permit shall be conducted as follows:
 - 1. For a Corps-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a nationwide or regional § 404 permit as part of the § 401 water quality certification prior to issuance of the nationwide or regional permit. The Director shall conduct the antidegradation review of an individual § 404 permit if the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters. For regulated discharges that may degrade water quality in an OAW or a water that is on the 303(d) List of impaired waters, the Director shall conduct the antidegradation review as part of the § 401 water quality certification process.
 - 2. For a Director-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a general § 404 permit as a part of its determination whether to issue a general permit in accordance with state requirements for issuing a § 404 general permit and with this Section. The Director shall conduct the antidegradation review of an individual § 404 permit as part of the § 404 permit action in accordance with state requirements for issuing a § 404 permit and in accordance with this Section.
- E. Antidegradation review of an AZPDES stormwater permit. An individual stormwater permit for a municipal separate storm sewer system (MS4) meets antidegradation requirements if the permittee complies with the permit, including developing a stormwater management plan containing controls that reduce the level of pollutants in stormwater discharges to the maximum extent practicable.
- F. Antidegradation review of a general permit. The Director shall conduct the antidegradation review of a regulated discharge authorized by a general permit at the time the general permit is issued or renewed. A person seeking authorization to discharge under a general permit is not required to undergo an individual antidegradation review at the time the Notice of Intent is submitted unless the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-108. Narrative Water Quality Standards

- A. A surface water shall not contain pollutants in amounts or combinations that:
 - 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 - 2. Cause objectionable odor in the area in which the surface water is located;
 - 3. Cause off-taste or odor in drinking water;
 - 4. Cause off-flavor in aquatic organisms;
 - 5. Are toxic to humans, animals, plants, or other organisms;
 - 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 - 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or

- 8. Change the color of the surface water from natural background levels of color.
- B. A surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard.
- C. A surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.
- D. A surface water shall not contain solid waste such as refuse, rubbish, demolition or construction debris, trash, garbage, motor vehicles, appliances, or tires.
- E. A Wadeable, perennial stream shall support and maintain a community of organisms having a taxa richness, species composition, tolerance, and functional organization comparable to that of a stream with reference conditions in Arizona.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.01. Narrative Biological Criteria for Wadeable, Perennial Streams

- A. The narrative biological criteria in this Section apply to a wadeable, perennial stream with either an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The biological standard in R18-11-108(E) is met when a bioassessment result, as measured by the Arizona Index of Biological Integrity (IBI), for cold or warm water is:
 - 1. Greater than or equal to the 25th percentile of reference condition, or
 - 2. Greater than the 10th percentile of reference condition and less than the 25th percentile of reference condition and a verification bioassessment result is greater than or equal to the 25th percentile of reference condition.
- C. Arizona Index of Biological Integrity (IBI) scores:

| Bioassessment Result | Index of Biological Integrity Scores | |
|--|--------------------------------------|---------|
| | A&Wc | A&Ww |
| Greater than or equal to the 25th percentile of reference condition | ≥52 | ≥50 |
| Greater than the 10th and less than the 25th percentile of reference condition | 46 - 51 | 40 - 49 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.02. Narrative Bottom Deposit Criteria for Wadeable, Perennial Streams

- A. The narrative bottom deposit criteria in this Section apply to wadeable, perennial streams with an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- B. The narrative water quality standard for bottom deposits at R18-11-108(A)(1) is met when:
 1. The percentage of fine sediments in the riffle habitats of a wadeable, perennial stream with an A&Wc designated use, as determined by a riffle pebble count, is less than or equal to 30 percent.
 2. The percentage of fine sediments in all stream habitats of a wadeable, perennial stream with an A&Ww designated use, as determined by a reach level pebble count, is equal to or less than 50 percent.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.03. Narrative Nutrient Criteria for Lakes and Reservoirs

- A. The narrative nutrient criteria in this Section apply to those lakes and reservoirs categorized in Appendix B.
- B. The narrative water quality standard for nutrients at R18-11-108(A)(6) is met when, based on a minimum of two lake sample events conducted during the peak season based on lake productivity, the results show an average chlorophyll-*a* value below the applicable threshold for designated use and lake and reservoir category in subsection (D).
 1. The mean chlorophyll-*a* concentration is less than the lower value in the target range chlorophyll-*a* for the lake and reservoir category, or
 2. The mean chlorophyll-*a* concentration is within the target range for the lake and reservoir category and:
 - a. The mean blue green algae count is at or below 20,000 per milliliter, and

- b. The blue green algae count is less than 50 percent of the total algae count, and
- c. There is no evidence of nutrient-related impairments such as:
 - i. An exceedance of dissolved oxygen or pH standards;
 - ii. A fish kill coincident with a dissolved oxygen or pH exceedance;
 - iii. A fish kill or other aquatic organism mortality coincident with algal toxicity;
 - iv. Secchi depth is less than the lower value prescribed for the lake and reservoir category;
 - v. A nuisance algal bloom is present in the limnetic portion of the lake or reservoir; or
 - vi. The concentration of total phosphorous, total nitrogen, or total Kjehldal nitrogen (TKN) is greater than the upper value in the range prescribed for the lake and reservoir category; or

- 3. For a shallow lake. In addition to meeting the mean chlorophyll-*a* concentrations in subsections (B)(1) or (2), submerged aquatic vegetation covers 50 percent or less of the lake bottom and there is less than a 5 mg/L swing in diel-dissolved oxygen concentration measured within the photic zone.

- C. The following threshold ranges apply during the peak season for lake productivity:
 1. Warm water lakes peak season, April – October;
 2. Cold water lakes peak season, May – September.
- D. The following table lists the numeric targets for lakes and reservoirs.

| NUMERIC TARGETS FOR LAKES AND RESERVOIRS | | | | | | | | | | |
|--|--------------------------|----------------------|------------------|-------------------------|-----------------------|--------------------------------------|---------------------------|-------------------------------------|-------------------------|---------|
| Designated Use | Lake Category | Chl- <i>a</i> (µg/L) | Secchi Depth (m) | Total Phosphorus (µg/L) | Total Nitrogen (mg/L) | Total Kjehldal Nitrogen (TKN) (mg/L) | Blue-Green Algae (per ml) | Blue-Green Algae (% of total count) | Dissolved Oxygen (mg/L) | pH (SU) |
| FBC and PBC | Deep | 10-15 | 1.5-2.5 | 70-90 | 1.2-1.4 | 1.0-1.1 | 20,000 | | | 6.5-9.0 |
| | Shallow | 10-15 | 1.5-2.0 | 70-90 | 1.2-1.4 | 1.0-1.1 | | | | |
| | Igneous | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Sedimentary | 20-30 | 1.5-2.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Urban | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| A&Wc | All | 5-15 | 1.5-2.0 | 50-90 | 1.0-1.4 | 0.7-1.1 | | <50 | 7 (top m) | 6.5-9.0 |
| A&Ww | All (except urban lakes) | 25-40 | 0.8-1.0 | 115-140 | 1.6-1.8 | 1.3-1.6 | | | 6 (top m) | |
| | Urban | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | |
| A&Wedw | All | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | 6.5-9.0 |
| DWS | All | 10-20 | 0.5-1.5 | 70-100 | 1.2-1.5 | 1.0-1.2 | 20,000 | | | 5.0-9.0 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-109. Numeric Water Quality Standards

- A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC | PBC |
|---|-----|-----|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

- B. pH. The following water quality standards for pH are expressed in standard units:

| pH | DWS | FBC, PBC, A&W ¹ | AgI | AgL |
|---------|-----|----------------------------|-----|-----|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

Footnotes:

- 1. "1" Includes A&Wc, A&Ww, A&Wedw, and A&We.

- C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww | A&Wedw | A&Wc |
|------|--------|------|
| | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|--------|--------|--------|
| 3.0° C | 3.0° C | 1.0° C |
|--------|--------|--------|

- D. Suspended sediment concentration.
- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:

| A&Wc | A&Ww |
|------|------|
| 25 | 80 |

- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.
- E. Dissolved oxygen. A surface water meets the water quality standard for dissolved oxygen when either:
- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
 - The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|---|---|
| A&Ww | 6.0 |
| A&Wc | 7.0 |
| A&W edw for a sample taken from three hours after sunrise to sunset | 3.0 |
| A&W edw for a sample taken from sunset to three hours after sunrise | 1.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

- F. Nutrient criteria. The following are water quality standards for total phosphorus and total nitrogen (expressed in milligrams per liter (mg/L)) that apply to the surface waters listed below. A minimum of 10 samples, each taken at least 10 days apart in a consecutive 12-month period, are required to determine a 90th percentile. Not more than 10 percent of the samples may exceed the 90th percentile value listed below. The Director will apply these water quality standards for total phosphorus and total nitrogen to the surface waters listed below, and to their perennial tributaries, if listed. The Director may also apply these total phosphorus and total nitrogen standards to any source discharging to any tributary (ephemeral, intermittent, effluent dependent water, or perennial) of the surface waters listed below, if necessary to protect nutrient water quality in the listed surface water, based on the volume, frequency, magnitude and duration of the discharge, and distance to the downstream surface water listed below:

- Verde River and its perennial tributaries from the Verde headwaters to Bartlett Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.30 | 1.00 |
| Total nitrogen | 1.00 | 1.50 | 3.00 |

- Black River, Tonto Creek and their perennial tributaries for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.20 | 0.80 |
| Total nitrogen | 0.50 | 1.00 | 2.00 |

- Salt River and its perennial tributaries above Roosevelt Lake for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.12 | 0.30 | 1.00 |
| Total nitrogen | 0.60 | 1.20 | 2.00 |

- Salt River below Stewart Mountain Dam to its confluence with the Verde River:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.05 | – | 0.20 |
| Total nitrogen | 0.60 | – | 3.00 |

- Little Colorado River and its perennial tributaries upstream from:
 - The headwaters to River Reservoir,
 - South Fork of Little Colorado River at 34°00'49"/109°24'18" to above South Fork Campground at 34°04'49"/109°24'18", and
 - The headwaters of Water Canyon Creek to the Apache-Sitgreaves National Forest boundary:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.08 | 0.10 | 0.75 |
| Total nitrogen | 0.60 | 0.75 | 1.10 |

- From the Little Colorado River and State Route 260 at 34°06'39"/109°18'55" to Lyman Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.20 | 0.30 | 0.75 |
| Total nitrogen | 0.70 | 1.20 | 1.50 |

- Colorado River at the Northern International Boundary near Morelos Dam:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | – | 0.33 | – |
| Total nitrogen | – | 2.50 | – |

- Oak Creek from its headwaters at 35°01'30"/111°44'12" to its confluence with the Verde River and the West Fork of Oak Creek from its headwaters at 35°02'44"/111°54'48" to its confluence with Oak Creek.

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.1 | 0.25 | 0.30 |
| Total nitrogen | 1.00 | 1.50 | 2.50 |

- No discharge of wastewater to Show Low Creek or its perennial tributaries upstream of and including Fools Hollow Lake shall exceed 0.16 mg/L total phosphates as P.
- No discharge of wastewater to the San Francisco River or its perennial tributaries upstream of Luna Lake Dam shall exceed 1.0 mg/L total phosphates as P.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-110. Salinity Standards for the Colorado River

- A. The flow-weighted average annual salinity in the lower main stem of the Colorado River shall not exceed the following criteria:

| Location | Total Dissolved Solids |
|------------------|------------------------|
| Below Hoover Dam | 723 mg/L |
| Below Parker Dam | 747 mg/L |
| At Imperial Dam | 879 mg/L |

- B. The plan of implementation contained in the “2014 Review, Water Quality Standards for Salinity, Colorado River System,” approved October 2014, is incorporated by reference to preserve the basin-wide approach to salinity control developed by the Colorado River Basin Salinity Control Forum and to ensure compliance with the numeric criteria for salinity in subsection (A). This material does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the Colorado River Basin Salinity Control Forum, 106 West 500 South, Suite 101, Bountiful, Utah 84010-6232 or at <http://www.coloradoriversalinity.org/>.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-111. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610, 40 CFR 136.3, or an alternative analytical method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-112. Outstanding Arizona Waters

- A. The Director shall classify a surface water as an outstanding Arizona water (OAW) by rule.
- B. The Director may adopt, under R18-11-115, a site-specific standard to maintain and protect existing water quality in an OAW.
- C. Any person may nominate a surface water for classification as an OAW by filing a nomination with the Director. The nomination shall include:
1. A map and a description of the surface water;

2. A written statement in support of the nomination, including specific reference to the applicable criteria for an OAW classification prescribed in subsection (D);
 3. Supporting evidence demonstrating that the criteria prescribed in subsection (D) are met; and
 4. Available water quality data relevant to establishing the baseline water quality of the proposed OAW.
- D. The Director may classify a surface water as an OAW based upon the following criteria:
1. The surface water is a perennial or intermittent water;
 2. The surface water is in a free-flowing condition. For purposes of this subsection, “in a free-flowing condition” means that a surface water does not have an impoundment, diversion, channelization, rip-rapping or other bank armor, or another hydrological modification within the reach nominated for an OAW classification;
 3. The surface water has good water quality. For purposes of this subsection, “good water quality” means that the surface water has water quality that meets or is better than applicable surface water quality standards. A surface water that is listed as impaired under R18-11-604(E) is ineligible for OAW classification; and
 4. The surface water meets one or both of the following conditions:
 - a. The surface water is of exceptional recreational or ecological significance because of its unique attributes, such as the geology, flora and fauna, water quality, aesthetic value, or the wilderness characteristic of the surface water;
 - b. An endangered or threatened species is associated with the surface water and the existing water quality is essential to the species' maintenance and propagation or the surface water provides critical habitat for the threatened or endangered species. An endangered or threatened species is identified in “Endangered and Threatened Wildlife,” 50 CFR 17.11 (revised 2005), and “Endangered and Threatened Plants,” 50 CFR 17.12 (revised 2005). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the National Archives and Records Administration at <http://www.access.gpo.gov/nara/cfr/cfr-table-search.html#page1>.
- E. The Director shall hold at least one public meeting in the local area of a surface water that is nominated for classification as an OAW to solicit public comment on the nomination.
- F. The Director shall consider the following factors when deciding whether to classify a surface water as an OAW:
1. Whether there is the ability to manage the surface water and its watershed to maintain and protect existing water quality;
 2. The social and economic impact of Tier 3 antidegradation protection;
 3. The public comments in support of, or in opposition to, an OAW classification;
 4. The timing of the nomination relative to the triennial review of surface water quality standards;
 5. The consistency of an OAW classification with applicable water quality management plans; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

6. Whether the nominated surface water is located within a national or state park, national monument, national recreation area, wilderness area, riparian conservation area, area of critical environmental concern, or it has another special use designation (for example, Wild and Scenic River).
- G.** The following surface waters are classified as OAWs:
1. The West Fork of the Little Colorado River, from its headwaters to Government Springs (approximately 9.1 river miles);
 2. Oak Creek, from its headwaters to its confluence with the Verde River (approximately 50.3 river miles);
 3. West Fork of Oak Creek, from its headwaters to its confluence with Oak Creek (approximately 15.8 river miles);
 4. Peeples Canyon Creek, from its headwaters to its confluence with the Santa Maria River (approximately 8.1 river miles);
 5. Burro Creek, from its headwaters to its confluence with Boulder Creek (approximately 29.5 miles);
 6. Francis Creek, from its headwaters to its confluence with Burro Creek (approximately 22.9 river miles);
 7. Bonita Creek, from its boundary of the San Carlos Indian Reservation to its confluence with the Gila River (approximately 14.7 river miles);
 8. Cienega Creek, from its confluence with Gardner Canyon to the USGS gaging station (#09484600) (approximately 28.3 river miles);
 9. Aravaipa Creek, from its confluence with Stowe Gulch to the downstream boundary of the Aravaipa Canyon Wilderness Area (approximately 15.5 river miles);
 10. Cave Creek, from its headwaters to the Coronado National Forest boundary (approximately 10.4 river miles);
 11. South Fork of Cave Creek, from its headwaters to its confluence with Cave Creek (approximately 8.6 river miles);
 12. Buehman Canyon Creek, from its headwaters to its confluence with unnamed tributary at 32°24'31"/110°32'08" (approximately 9.8 river miles);
 13. Lee Valley Creek, from its headwaters to Lee Valley Reservoir (approximately 1.6 river miles);
 14. Bear Wallow Creek, from its headwaters to the boundary of the San Carlos Indian Reservation (approximately 4.25 river miles);
 15. North Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 16. South Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 17. Snake Creek, from its headwaters to its confluence with the Black River (approximately 6.2 river miles);
 18. Hay Creek, from its headwaters to its confluence with the West Fork of the Black River (approximately 5.5 river miles);
 19. Stinky Creek, from the White Mountain Apache Indian Reservation boundary to its confluence with the West Fork of the Black River (approximately 3.0 river miles);
 20. KP Creek, from its headwaters to its confluence with the Blue River (approximately 12.7 river miles);
 21. Davidson Canyon, from the unnamed spring at 31°59'00"/110°38'49" to its confluence with Cienega Creek; and
22. Fossil Creek, from its headwaters at the confluence of Sandrock and Calf Pen Canyons above Fossil Springs to its confluence with the Verde River (approximately 17.2 river miles).
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Added "water quality standards" to R18-11-112, previously omitted in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).
- R18-11-113. Effluent-Dependent Waters**
- A.** The Director shall classify a surface water as an effluent-dependent water by rule.
- B.** The Director may adopt, under R18-11-115, a site-specific water quality standard for an effluent-dependent water.
- C.** Any person may submit a petition for rule adoption requesting that the Director classify a surface water as an effluent-dependent water. The petition shall include:
1. A map and a description of the surface water;
 2. Information that demonstrates that the surface water consists of a point source discharge of wastewater; and
 3. Information that demonstrates that, without a point source discharge of a wastewater, the receiving water is an ephemeral water.
- D.** The Director shall use the water quality standards that apply to an effluent-dependent water to derive water quality-based effluent limits for a point source discharge of wastewater to an ephemeral water.
- E.** The Director may use aquatic and wildlife (edw) acute standards only to derive water quality based effluent limits for a sporadic, infrequent, or emergency point source discharge to an ephemeral water or to an effluent-dependent water. The Director shall consider the following factors when deciding whether to apply A&Wedw (acute) standards:
1. The amount, frequency, and duration of the discharge;
 2. The length of time water may be present in the receiving water;
 3. The distance to a downstream water with aquatic and wildlife chronic standards; and
 4. The likelihood of chronic exposure to pollutants.
- F.** The Director may establish alternative water quality-based effluent limits in an AZPDES permit based on seasonal differences in the discharge.
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective December 18, 1992 (Supp. 92-4). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).
- R18-11-114. Mixing Zones**
- A.** The Director may establish a mixing zone for a point source discharge to a surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited in an ephemeral water or where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B.** The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

for a mixing zone as part of an application for an AZPDES permit. The request shall include:

1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C.** The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D.** Director determination.
1. The Director shall deny a request to establish a mixing zone if a water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E.** Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F.** The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- G.** Mixing zone requirements.
1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
 2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
 3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
 4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
 5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.
- H.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:
1. Chlordane,
 2. DDT and its metabolites (DDD and DDE),
 3. Dieldrin,
 4. Dioxin,
 5. Endrin,
 6. Endrin aldehyde,
 7. Heptachlor,
 8. Heptachlor epoxide,
 9. Lindane,
 10. Mercury,
 11. Polychlorinated biphenyls (PCBs), and
 12. Toxaphene.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-115. Site-Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in Appendix A;
 3. Resident aquatic organisms that occur in a surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in Appendix A;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A. "Natural background" means the concentration of a pollutant in a surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically-defensible procedure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Uses one of the following procedures, as defined by the most recent EPA guidance documents:
 - i. The recalculation procedure,
 - ii. The water effects ratio for metals,
 - iii. The streamlined water effects ratio, or
 - iv. The Biotic ligand model.
 - d. Demonstrates that all designated uses are protected.
2. Alternatively, a study outline submitted for the Director's approval must contain the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Describes the hydrologic regime of the waterbody;
 - d. Describes the scientifically-defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 - e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 - f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 - g. Demonstrates that all designated uses are protected; and
 - h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration. Modeling approaches include Better Assessment Science Integrating Source and Nonpoint Sources (Basins), Hydrologic Simulation Program-Fortran (HSPF), and Hydrologic Engineering Center (HEC) programs developed by the U.S. Army Corps of Engineers.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Section repealed by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-116. Resource Management Agencies

Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-117. Canals and Urban Park Lakes

A. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified in Appendix B. Physical or mechanical maintenance

includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified in Appendix B.

- B. The discharge of lubricating oil associated with the start-up of well pumps that discharge to canals is not a violation of R18-11-108(B).

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-118. Dams and Flood Control Structures

Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-119. Natural background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is not caused by human activity but is due solely to naturally-occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

R18-11-120. Enforcement of Non-permitted Discharges

- A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-121. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve com-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

pliance. The permittee shall demonstrate that all requirements under § 301(b) and § 306 of the Clean Water Act [33 U.S.C. 1311(b) and 1316] are achieved and that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-122. Variances

- A. Upon request, the Director may establish, by rule, a discharger-specific or water segment(s)-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B. A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.
 4. A detailed discussion of the discharge control technologies that are available for achieving compliance with the water quality standard for which a variance is sought.
 5. Documentation that more advanced treatment technology than applicable technology-based effluent limitations is necessary to achieve compliance with the water quality standard for which a variance is sought.
 6. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
 7. Documentation that the proposed term is only as long as necessary to achieve the highest attainable condition.
 8. Documentation that is appropriate to the type of use to which the variance would apply as follows:
 - a. For a water quality standard variance to a use specified in Clean Water Act § 101(a)(2), documentation must include demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - i. Naturally occurring pollutant concentrations prevent attainment of the use;
 - ii. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - iii. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - iv. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - v. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - vi. That installation and operation of each of the available discharge technologies more advanced than those required to comply with technology-based effluent limitations to achieve compliance with the water quality standard would result in substantial and widespread economic and social impact; or
 - vii. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
 - b. For a water quality standard variance to a use other than those uses specified in Clean Water Act § 101(a)(2), documentation must justify how consideration and value of the water subject to the use appropriately supports the variance and term. A demonstration consistent with (B)(8)(a) of this Section may be used to satisfy this requirement.
 9. For a waterbody segment(s)-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant(s) or water quality parameter(s) and water body or waterbody segment(s) specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(9)(a) previously applied to the water body or waterbody seg-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ment(s), documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant(s) or water quality parameter(s) subject to the water quality variance and the water quality progress achieved.

10. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification of the permittee subject to the variance;
 - b. For an existing point source discharge, a detailed description of the existing discharge control technologies that are used to achieve compliance with applicable water quality standards. For a new point source discharge, a detailed description of the proposed discharge control technologies that will be used to achieve compliance with applicable water quality standards; and
 - c. Documentation that the existing or proposed discharge control technologies will comply with applicable technology-based effluent limitations.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(8)(a)(vii). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable; or
 3. If no additional feasible pollutant control technology can be identified, the interim criterion or interim effluent condition that reflects the greatest pollutant reduction achievable with the pollutant control technologies installed at the time of the issuance of the variance, and the adoption and implementation of a Pollutant Minimization Program.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The Director may not grant a variance for a point source discharge to an OAW listed in R18-11-112(G).
 - I. Each variance established by the Director is subject to review and approval by the Regional Administrator.
 - J. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E). The variance term runs from the approval of the variance by the Regional Administrator.
 - K. The Director shall reevaluate, in its triennial review, whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance in its triennial review rulemaking.
 - L. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - M. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.
 - N. The following are discharger-specific variances adopted by the Director:
 - O. The following are water body and waterbody segment-specific variances adopted by the Director:

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).
- R18-11-123. Discharge Prohibitions**
- A. The discharge of wastewater to the following surface waters is prohibited:
 1. Sabino Canyon Creek;
 2. Vekol Wash, upstream of the Ak-Chin Indian Reservation; and
 3. Smith Wash, upstream of the Ak-Chin Indian Reservation.
 - B. The discharge to Lake Powell of human body wastes and the wastes from toilets and other receptacles intended to receive or retain wastes from a vessel is prohibited.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO₃, is determined according to the following criteria:
 - i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- e. pH is determined according to the following criteria:
 - i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- f. Table 1 abbreviations.
 - i. µg/L = micrograms per liter,
 - ii. mg/kg = milligrams per kilogram,
 - iii. pCi/L = picocuries per liter,
 - iv. D = dissolved,
 - v. T = total recoverable,
 - vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
 - e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
 - LN = is the natural logarithm
 - CMC = Criterion Maximum Concentration (acute)
 - CCC = Criterion Continuous Concentration (chronic)

Historical Note

Appendix A repealed; new Appendix A, Table 1 adopted effective April 24, 1996 (Supp. 96-2). Appendix A, Table 1 amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 1 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 1 repealed; new Appendix A, Table 1 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 1 amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix A, Table 14 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 14 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 14 renumbered to Table 13; new Table 14 renumbered from Table 15 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 14 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). New Appendix A, Table 14 made by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 15. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Warmwater and Effluent Dependent, Unionid Mussels Absent

For the aquatic and wildlife warmwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment. For the aquatic and wildlife effluent dependent uses, unionids will be assumed to be absent.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife coldwater, Unionid Mussels Absent
 For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

| pH | Temperature (°C) | | | | | | | | | | | | | | | | |

Table 26. Renumbered**Historical Note**

Appendix A, Table 26 renumbered from Table 25 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 26 renumbered to Table 12 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Appendix B. Surface Waters and Designated Uses

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Waters | Segment Description and Location (Latitude and Longitudes are in NAD 83) | Lake Category | Aquatic and Wildlife | | | | Human Health | | | | Agricultural | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix B repealed, new Appendix B adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix B amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Appendix B amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix C. Site-Specific Standards

| Watershed | Surface Water | Surface Water Description & Location | Parameter | Site-Specific Criterion |
|-----------|--------------------|--|-------------------------|---|
| LC | Rio de Flag (EDW) | Flagstaff WWTP outfall to the confluence with San Francisco Wash | Copper (D) | 36 µg/L (A&Wedw) |
| CL | Yuma East Wetlands | From inlet culvert from Colorado River into restored channel to Ocean Bridge | Selenium (T) | 2.2 µg/L (A&Ww chronic) |
| | | | Total residual chlorine | 33 µg/L (A&Ww acute) |
| | | | | 20 µg/L (A&Ww chronic) |
| SR | Pinto Creek | From confluence of Ellis Ranch tributary at 33°19'26.7"/110°54'57.5" to the confluence of West Fork of Pinto Creek at 33°27'32.3"/111°00'19.7" | Copper (D) | 34 µg/L (A&Ww acute for hardness values below 268 mg/L) |
| | | | | 34 µg/L (A&Ww chronic) |

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix C repealed effective April 24, 1996 (Supp. 96-2). New Appendix C made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix C amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

ARTICLE 2. WATER QUALITY STANDARDS FOR NON-WOTUS PROTECTED SURFACE WATERS

R18-11-201. Definitions

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation AZ (AgI AZ)" means the use of a non-WOTUS protected surface water for crop irrigation.
3. "Agricultural livestock watering AZ (AgL AZ)" means the use of a non-WOTUS protected surface water as a water supply for consumption by livestock.
4. "Aquatic and wildlife AZ (cold water) (A&Wc AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
5. "Aquatic and wildlife AZ (warm water) (A&Ww AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
6. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
7. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
8. "Criteria" means elements of water quality standards expressed as pollutant concentrations, levels, or narrative

statements representing a water quality that supports a designated use.

9. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health-based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
10. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health-based water quality standard criteria, in order to simulate long-term exposure, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

receiving water critical flow condition is the harmonic mean flow.

11. "Designated use" means a use specified on the Protected Surface Waters List for a non-WOTUS protected surface water.
12. "Domestic water source AZ (DWS AZ)" means the use of a non-WOTUS protected surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
13. "Fish consumption AZ (FC AZ)" means the use of a non-WOTUS protected surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
14. "Full-body contact AZ (FBC AZ)" means the use of a non-WOTUS protected surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely, and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
15. "Geometric mean" means the n th root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$

16. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
17. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
18. "Non-WOTUS protected surface water" means a protected surface water designated in Table A of R18-11-216 or added to the PSWL by an emergency action authorized by A.R.S. § 49-221(G)(7) that is not a WOTUS.
19. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
20. "Partial-body contact AZ (PBC AZ)" means the recreational use of a non-WOTUS protected surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and, sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
21. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance.
22. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
23. "Recharge Project" means a facility necessary or convenient to obtain, divert, withdraw, transport, exchange,

deliver, treat, or store water to infiltrate or reintroduce that water into the ground.

24. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
25. "Urban lake" means a manmade lake within an urban landscape.
26. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
27. "Wetland" means, for the purposes of non-WOTUS protected surface waters, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.
28. "WOTUS" means waters of the state that are also navigable waters as defined by Section 502(7) of the Clean Water Act.
29. "WOTUS protected surface water" means a protected surface water that is a WOTUS.
30. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1).
Amended subsection A. effective April 17, 1984 (Supp. 84-2). Former Section R9-21-201 repealed, former Section R9-21-203 renumbered as Section R9-21-201 and amended effective January 7, 1985 (Supp. 85-1).
Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-201 renumbered without change as Section R18-11-201 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-202. Applicability

- A. The water quality standards prescribed in this Article apply to non-WOTUS protected surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
 1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores including:
 - a. A pit,
 - b. Pregnant leach solution pond

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond of sump in a mine put associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product that is being held for recycling,
 - h. Spill or catchment pond, or
 - i. A pond used for onsite remediation
3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.
 5. WOTUS Protected Surface Waters.

Historical Note

Former Section R9-21-202 repealed, former Section R9-21-102 renumbered as Section R9-21-202 and amended effective January 7, 1985 (Supp. 85-1). Amended subsections (B), (D), and (E) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-202 renumbered without change as Section R18-11-202 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-203. Designated Uses for Non-WOTUS Protected Surface Waters

- A. The designated uses for specific non-WOTUS protected surface waters are listed in the Protected Surface Waters List in this article. The designated uses that may be assigned to a non-WOTUS protected surface water are:
 1. Full-body contact AZ,
 2. Partial-body contact AZ,
 3. Domestic water source AZ,
 4. Fish consumption AZ,
 5. Aquatic and wildlife AZ (cold water),
 6. Aquatic and wildlife AZ (warm water),
 7. Agricultural irrigation AZ, and
 8. Agricultural livestock watering AZ.
- B. Numeric water quality criteria to maintain and protect water quality for the designated uses assigned to non-WOTUS protected surface waters are prescribed in R18-11-215. Narrative water quality standards to protect non-WOTUS protected surface waters are prescribed in R18-11-214.
- C. If a non-WOTUS protected surface water has more than one designated use listed in the Protected Surface Waters List, the most stringent water quality criterion applies.
- D. The Director shall revise the designated uses of a non-WOTUS protected surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in the Protected Surface Waters List.
- E. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria through a rulemaking action for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;

3. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the non-WOTUS protected surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
4. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1). Amended subsection (B) by adding paragraphs (27) and (28) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-203 renumbered as Section R9-21-201, former Section R9-21-204 renumbered as Section R9-21-203 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-203 renumbered and amended as Section R9-21-204, new Section R9-21-203 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-203 renumbered without change as Section R18-11-203 (Supp. 87-3). Amended subsection (B) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-204. Interim, Presumptive Designated Uses

The following water quality standards apply to a non-WOTUS protected surface water that is not listed on the Protected Surface Waters List but is added on an emergency basis pursuant to A.R.S. § 49-221(G)(7):

1. The aquatic and wildlife AZ (cold water use applies to a non-WOTUS protected surface water above 5000 feet in elevation;
2. The aquatic and wildlife AZ (warm water) applies to a non-WOTUS protected surface water below 5000 feet in elevation;
3. The full-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
4. The partial-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans in a way that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
5. The fish consumption AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for harvesting aquatic organisms for con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

sumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.

6. The domestic water source AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans as a source of potable water.
7. The agricultural irrigation AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used for crop irrigation.
8. The agricultural livestock watering AZ use applies to any non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used as a water supply for consumption by livestock.

Historical Note

Former Section R9-21-204 renumbered and amended as Section R9-21-207, former Section R9-21-206 renumbered and amended as Section R9-21-204 effective January 29, 1980 (Supp. 80-1). Former Section

R9-21-204 renumbered as Section R9-21-203, former Section R9-21-205 renumbered as Section R9-21-204 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-204 renumbered and amended as Section R9-21-205, former Section R9-21-203 renumbered and amended as Section R9-21-204 effective August 12, 1986 (Supp. 86-4). Former Section

R9-21-204 renumbered without change as Section R18-11-204 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-205. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610 or an alternative method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Former Section R9-21-205 repealed, new Section R9-21-205 adopted effective January 29, 1980 (Supp. 80-1).

Former Section R9-21-205 renumbered as Section R9-21-204, former Section R9-21-206 renumbered as Section R9-21-205 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-205 renumbered and amended as Section R9-21-206, former Section R9-21-204 renumbered and amended as Section R9-21-205 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-205 renumbered without change as Section R18-11-205 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992

(Supp. 92-1). Section repealed April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-206. Mixing Zones

- A. The Director may establish a mixing zone for a point source discharge to a non-WOTUS protected surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B. The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:
 1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C. The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
 1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D. Director determination.
 1. The Director shall deny a request to establish a mixing zone if an applicable water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E. Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F. The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

G. Mixing zone requirements.

1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.

H. The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:

1. Chlordane,
2. DDT and its metabolites (DDD and DDE),
3. Dieldrin,
4. Dioxin,
5. Endrin,
6. Endrin aldehyde,
7. Heptachlor,
8. Heptachlor epoxide,
9. Lindane,
10. Mercury,
11. Polychlorinated biphenyls (PCBs), and
12. Toxaphene.

Historical Note

Former Section R9-21-206 renumbered and amended as Section R9-21-204, new Section R9-21-206 adopted effective January 29, 1980 (Supp. 80-1). Amended by adding subsection (B) effective October 14, 1981 (Supp. 81-5). Amended subsection (B) and Table 1 effective January 29, 1982 (Supp. 82-1). Amended subsection (B) and Table 1 effective August 13, 1982 (Supp. 82-4). Former Section R9-21-206 renumbered as Section R9-21-205, former Section R9-21-207 renumbered as Section R9-21-206 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-206 renumbered and amended as Section R9-21-207, former Section R9-21-205 renumbered and amended as R9-21-206 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-206 renumbered without change as Section R18-11-206 (Supp. 87-3). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-207. Natural Background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is caused solely by naturally occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Former Section R9-21-207 repealed, former Section R9-21-204 renumbered and amended as Section R9-21-207 effective January 29, 1980 (Supp. 80-1). Former Section R9-21-207 renumbered as Section R9-21-206, former Section R9-21-208 renumbered as Section R9-21-207

and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-207 renumbered without change as Section R9-21-208, former Section R9-21-206 renumbered and amended as Section R9-21-207 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-207 renumbered without change as Section R18-11-207 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-208. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Former Section R9-21-208 repealed, new Section R9-21-208 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-208 renumbered as Section R9-21-207, Appendices 1 through 9 amended as Appendix A (now shown following R9-21-213), former Section R9-21-209 renumbered as R9-21-208 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-208 renumbered and amended as Section R9-21-209, former Section R9-21-207 renumbered without change as Section R9-21-208 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-208 renumbered without change as Section R18-11-208 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-209. Variances

- A.** Upon request, the Director may establish, by rule, a discharger-specific or water segment-specific or water segments-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B.** A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.

4. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
5. Documentation that the proposed term is only as long as necessary to achieve compliance with applicable water quality standards.
6. Documentation that is appropriate to the type of designated use to which the variance would apply as follows. For a water quality standard variance documentation must include a demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - a. Naturally occurring pollutant concentrations prevent attainment of the use;
 - b. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - c. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - d. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - e. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - f. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
7. For a waterbody segment-specific or segments-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant or pollutants or water quality parameter or parameters and water body or waterbody segment or segments specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(7)(a) previously applied to the water body or waterbody segment or segments, documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant or pollutants or water quality parameter or parameters subject to the water quality variance and the water quality progress achieved.
8. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section: Identification of the permittee subject to the variance.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(6)(a)(vi). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E).
 - I. The Director shall periodically, but not more than every five years, reevaluate whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition during each rulemaking for this Article. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance during the rulemaking.
 - J. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - K. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.

Historical Note

Former Section R9-21-209 renumbered and amended as Section R9-21-210, new Section R9-21-209 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-209 renumbered as Section R9-21-208, Tables I and II amended as Appendix B (now shown following R9-21-213 and Appendix A), former Section R9-21-210 renumbered as Section R9-21-209 and amended effective

January 7, 1985 (Supp. 85-1). Former Section R9-21-209 renumbered and amended as Section R9-21-210, former Section R9-21-208 renumbered and amended as Section R9-21-209 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-209 renumbered without change as Section R18-11-209 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-210. Site Specific Standards

- A. The Director shall adopt a site-specific standard by rule.
- B. The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
 1. Local physical, chemical, or hydrological conditions of a non-WOTUS protected surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a non-WOTUS protected surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in R18-11-215;
 3. Resident aquatic organisms that occur in a non-WOTUS protected surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in R18-11-215;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in R18-11-215. "Natural background" means the concentration of a pollutant in a non-WOTUS protected surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a non-WOTUS protected surface water.
- C. Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically defensible procedure. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 1. Identifies the pollutant;
 2. Describes the reach's boundaries;
 3. Describes the hydrologic regime of the waterbody;
 4. Describes the scientifically defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 5. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 6. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 7. Demonstrates that all designated uses are protected; and
 8. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective January 29, 1980 (Supp. 80-1). Amended subsection (A) effective April 17, 1984 (Supp. 84-2). Former Section R9-21-210 renumbered as Section R9-21-209, former Section R9-21-211 renumbered as Section R9-21-210 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-210 renumbered without change as Section R18-11-210 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-211. Enforcement of Non-permitted Discharges to Non-WOTUS Protected Surface Waters

- A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211 effective January 29, 1980 (Supp. 80-1). Amended subsections (D), (G) three (I), and added (J) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-211 renumbered as Section R9-21-210, former Section R9-21-212 renumbered as Section R9-21-211 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-211 renumbered and amended as Section R9-21-212, former Section R9-21-210 renumbered and amended as Section R9-21-211 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-211 renumbered without change as Section R18-11-211 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-212. Statements of Intent and Limitations on the Reach of Article 2

- A. Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.
- B. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified as non-WOTUS protected surface waters on the Protected Surface Waters List. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified on the Protected Surface Waters List.

- C. Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article.
- D. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-212 renumbered as Section R9-21-211, former Section R9-21-213 renumbered as Section R9-21-212 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-212 repealed, former Section R9-21-211 renumbered and amended as Section R9-21-212 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-212 renumbered without change as Section R18-11-212 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-213. Procedures for Determining Economic, Social, and Environmental Cost and Benefits

- A. The Director shall perform an economic, social, and environmental cost and benefits analysis that shows the benefits outweigh the costs before conducting any of the following rulemaking actions:
 1. Adopting a water quality standard that applies to non-WOTUS protected surface waters at a particular level or for a particular water category of non-WOTUS protected surface waters;
 2. Adding a non-WOTUS protected surface water to the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(4) apply; or
 3. Removing a non-WOTUS protected surface water from the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(6) apply.
- B. The economic, social, and environmental cost and benefit analysis must include:
 1. A justification of the valuation methodology used to quantify the costs or benefits of the rulemaking action;
 2. A reference to any study relevant to the economic, social, and environmental cost and benefit analysis that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of the costs and benefits of the rulemaking action;
 3. A description of any data on which an economic, social, and environmental cost and benefits analysis is based and an explanation of how the data was obtained and why the data is acceptable data.
 4. A description of the probable impact of the rulemaking on any existing AZPDES permits that are impacted by the rulemaking action;
 5. A description of the probable amount of additional AZPDES permits that will be required for known and ongoing point-source discharges after the rulemaking is completed that otherwise would not have been required if the Director did not undertake the rulemaking action; and
 6. The administrative and other costs to ADEQ associated with the proposed rulemaking.
- C. The Director shall publish a copy of the economic, social, and environmental cost and benefits analysis to the agency website

prior to filing any rulemaking materials during any of the rulemaking actions listed in subsection (A) of this rule.

- D. If for any reason enough data is not reasonably available to comply with the requirements of subsection (B) of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms.
- E. The Director is not required to prepare the economic, social, and environmental cost and benefits analysis required by this rule when:
 1. Adding or removing a WOTUS-protected surface water from the Protected Surface Waters List; or
 2. Adding a water to the Protected Surface Waters List on an emergency basis pursuant to A.R.S. § 49-221(G)(7).

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Former Section R9-21-213 renumbered as Section R9-21-212, former Section R9-21-103 renumbered as Section R9-21-213 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-213 renumbered without change as Section R9-21-214, new Section R9-21-213 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-213 renumbered without change as Section R18-11-213 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-214. Narrative Water Quality Standards for Non-WOTUS Protected Surface Waters

- A. A non-WOTUS protected surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the non-WOTUS protected surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or
 8. Change the color of the non-WOTUS protected surface water from natural background levels of color.
- B. A non-WOTUS protected surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard
- C. A non-WOTUS protected surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Former Section R9-21-213 renumbered without change as Section R9-21-214 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-214 renumbered without change as Section R18-11-214 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-215. Numeric Water Quality Standards for Non-WOTUS Protected Surface Waters

A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony-forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC AZ | PBC AZ |
|---|--------|--------|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

B. pH. The following water quality standards for non-WOTUS protected surface waters pH are expressed in standard units:

| pH | DWS AZ | FBC AZ, PBC AZ, A&Ww AZ, A&Wc AZ | AgI AZ | AgL AZ |
|---------|--------|----------------------------------|--------|--------|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww AZ | A&Wc AZ |
|---------|---------|
| 3.0° C | 1.0° C |

D. Suspended sediment concentration.

- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:
- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

| A&Wc AZ | A&Ww AZ |
|---------|---------|
| 25 | 80 |

E. Dissolved oxygen. A non-WOTUS protected surface water meets the water quality standard for dissolved oxygen when either:

- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
- The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|----------------|---|
| A&Ww AZ | 6.0 |
| A&Wc AZ | 7.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

F. Tables 1 through 17 prescribe water quality criteria for individual pollutants by designated use.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Table 1. Water Quality Criteria by Designated Use (see footnote)

| Parameter | CAS NUMBER | DWS AZ (µg/L) | FC AZ (µg/L) | FBC AZ (µg/L) | PBC AZ (µg/L) | A&Wc AZ Acute (µg/L) | A&Wc AZ Chronic (µg/L) | A&Ww AZ Acute (µg/L) | A&Ww AZ Chronic (µg/L) | AgI AZ (µg/L) | AgL AZ (µg/L) |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Coldwater AZ, Unionid Mussels Absent
 For the Aquatic and Wildlife Coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

Table A made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table B. WOTUS Protected Surface Waters

The waters listed in this table have been tentatively identified by ADEQ as WOTUS, under the law governing on 8/26/2022. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table B will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the WOTUS Protected Surface Waters Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|--|
| BW | Big Sandy River | Headwaters to Alamo Lake |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Francis Creek (OAW) | Headwaters to confluence with Burro Creek |
| BW | Kirkland Creek | Headwaters to confluence with Santa Maria River |
| BW | Trout Creek | Below confluence with unnamed tributary to confluence with Knight Creek |
| CG | Beaver Dam Wash | Headwaters to confluence with the Virgin River |
| CG | Bright Angel Creek | Headwaters to confluence with Roaring Springs Creek |
| CG | Bright Angel Creek | Below Roaring Spring Springs Creek to confluence with Colorado River |
| CG | Colorado River | Lake Powell to Lake Mead |
| CG | Crystal Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Deer Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Garden Creek | Headwaters to confluence with Pipe Creek |
| CG | Havasupai Creek | From the Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Hermit Creek | Below Hermit Pack Trail crossing to confluence with the Colorado River |
| CG | Kanab Creek | Headwaters to confluence with the Colorado River |
| CG | Lake Mead | 36°06'18"/114°26'33" |
| CG | Lake Powell | 36°59'53"/111°08'17" |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Paria River | Utah border to confluence with the Colorado River |
| CG | Phantom Creek | Below confluence with unnamed tributary to confluence with Bright Angel Creek |
| CG | Pipe Creek | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Short Creek | Headwaters to confluence with Fort Pearce Wash |
| CG | Tapeats Creek | Headwaters to confluence with the Colorado River |
| CG | Thunder River | Headwaters to confluence with Tapeats Creek |
| CG | Vasey's Paradise | A spring at 36°29'52"/111°51'26" |
| CG | Virgin River | Headwaters to confluence with the Colorado River |
| CG | White Creek | Headwaters to confluence with unnamed tributary at 36°18'45"/112°21'03" |
| CG | White Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CL | A10 Backwater | 33°31'45"/114°33'19" |
| CL | A7 Backwater | 33°34'27"/114°32'04" |
| CL | Adobe Lake | 33°02'36"/114°39'26" |
| CL | Cibola Lake | 33°14'01"/114°40'31" |
| CL | Clear Lake | 33°01'59"/114°31'19" |
| CL | Colorado River | Lake Mead to Topock Marsh |
| CL | Colorado River | Topock Marsh to Morelos Dam |
| CL | Gila River | Painted Rock Dam to confluence with the Colorado River |
| CL | Hunter's Hole Backwater | 32°31'13"/114°48'07" |
| CL | Imperial Reservoir | 32°53'02"/114°27'54" |
| CL | Island Lake | 33°01'44"/114°36'42" |
| CL | Laguna Reservoir | 32°51'35"/114°28'29" |
| CL | Lake Havasu | 34°35'18"/114°25'47" |
| CL | Lake Mohave | 35°26'58"/114°38'30" |
| CL | Martinez Lake | 32°58'49"/114°28'09" |
| CL | Mittry Lake | 32°49'17"/114°27'54" |
| CL | Nortons Lake | 33°02'30"/114°37'59" |
| CL | Pretty Water Lake | 33°19'51"/114°42'19" |
| CL | Topock Marsh | 34°43'27"/114°28'59" |

| LC | Little Colorado River | Headwaters to Lyman Reservoir |
| LC | Little Colorado River | Below Lyman Reservoir to confluence with the Puerco River |
| LC | Little Colorado River | Below Puerco River confluence to the Colorado River, excluding segments on Native American Lands |
| LC | Little Colorado River, East Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, South Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, West Fork | Below Government Springs to confluence with the Little Colorado River |
| LC | Lyman Reservoir | 34°21'21"/109°21'35" |
| LC | Mamie Creek | Headwaters to confluence with Coyote Creek |
| LC | Morrison Creek | Headwaters to Mamie Creek @ 33°59'24.45"/109°03'51.94 |
| LC | Nutrioso Creek | Headwaters to confluence with the Little Colorado River |
| LC | Porter Creek | Headwaters to confluence with Show Low Creek |
| LC | Riggs Creek | Headwaters to Nutrioso Creek |
| LC | Rio de Flag | Headwaters to City of Flagstaff WWTP outfall at 35°12'21"/111°39'17" |
| LC | Rudd Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Rosey Creek | Headwaters to 34°02'28.72"/109°27'24.3" |
| LC | Scott Reservoir | 34°10'31"/109°57'31" |
| LC | Show Low Creek | Headwaters to confluence with Silver Creek |
| LC | Show Low Lake | 34°11'36"/110°00'12" |
| LC | Silver Creek | Headwaters to confluence with the Little Colorado River |
| LC | White Mountain Lake | 34°21'57"/109°59'21" |
| LC | Willow Creek | Headwaters to confluence with Clear Creek |
| LC | Zuni River | Headwaters to confluence with the Little Colorado River |
| MG | Agua Fria River | From State Route 169 to Lake Pleasant |
| MG | Ash Creek | Headwaters to confluence with Tex Canyon |
| MG | East Maricopa Floodway | From Brown and Greenfield Rds to the Gila River Indian Reservation Boundary |
| MG | Fain Lake | Town of Prescott Valley Park Lake 34°34'29"/112°21'06" |
| MG | Gila River | San Carlos Indian Reservation boundary to the Ashurst-Hayden Dam |
| MG | Gila River (EDW) | From the confluence with the Salt River to Gillespie Dam |
| MG | Hassayampa Lake | 34°25'45"/112°25'33" |
| MG | Hassayampa River | Below unnamed tributary to the Buckeye Irrigation Company Canal |
| MG | Hassayampa River | Headwaters to confluence with unnamed tributary at 34°26'09"/112°30'32" |
| MG | Lake Pleasant | 33°53'46"/112°16'29" |
| MG | Little Ash Creek | Headwaters to confluence with Ash Creek at 34°20'45.74"/112°4'17.26" |
| MG | Little Sycamore Creek | Headwaters to Sycamore Creek @ 34°21'39.13"/111°58'49.98" |
| MG | Mineral Creek (diversion tunnel and lined channel) | 33°12'24"/110°59'58" to 33°07'56"/110°58'34" |
| MG | Papago Park South Pond | Curry Road, Tempe 33°26'22"/111°55'55" |
| MG | Salt River | Verde River to 2 km below Granite Reef Dam |
| MG | Seven Springs Wash | Headwaters to Unnamed trib @ 33°57'58.66"/111°51'52.07" |
| MG | Tempe Town Lake | At Mill Avenue Bridge at 33°26'00"/111°56'26" |
| MG | Turkey Creek | Headwaters to confluence with unnamed tributary at 34°19'28"/112°21'33" |
| SC | Alum Gulch | Below 31°29'17"/110°44'25" to confluence with Sonoita Creek |
| SC | California Gulch | Headwaters To U.S./Mexico border |
| SC | Cienega Creek (OAW) | From confluence with Gardner Canyon to USGS gaging station (#09484600) |
| SC | Cox Gulch | Headwaters to Three R Canyons @ 31°28'28.03"/110°47'14.65" |
| SC | Holden Canyon Creek | Headwaters to U.S./Mexico border |
| SC | Julian Wash | Headwaters to confluence with the Santa Cruz River |
| SC | Nogales Wash | Headwaters to confluence with Potrero Creek |
| SC | Parker Canyon Creek | Below unnamed tributary to U.S./Mexico border |
| SC | Rillito Creek | Headwaters to confluence with the Santa Cruz River |
| SC | Romero Canyon Creek | Below unnamed tributary to confluence with Sutherland Wash |
| SC | Santa Cruz River | Headwaters to the at U.S./Mexico border |
| SC | Santa Cruz River | U.S./Mexico border to the Nogales International WWTP outfall at 31°27'25"/110°58'04" |
| SC | Santa Cruz River | Tubac Bridge to Agua Nueva WRF outfall at 32°17'04"/111°01'45" |
| SC | Santa Cruz River (EDW) | Agua Nueva WRF outfall to Baumgartner Road |
| SC | Sonoita Creek | Headwaters to the Town of Patagonia WWTP outfall at 31°32'25"/110°45'31" |
| SC | Sonoita Creek (EDW) | Town of Patagonia WWTP outfall to permanent groundwater upwelling point approximately 1600 feet downstream of outfall |
| SC | Sycamore Canyon | Headwaters to the U.S./Mexico border |
| SP | Aravaipa Creek | Below downstream boundary of Aravaipa Canyon Wilderness Area to confluence with the San Pedro River |
| SP | Aravaipa Creek (OAW) | Stowe Gulch to downstream boundary of Aravaipa Canyon Wilderness Area |
| SP | Bass Canyon Creek | Below confluence with unnamed tributary to confluence with Hot Springs Canyon Creek |
| SP | Bear Creek | Headwaters to U.S./Mexico border |
| SP | Black Draw | Headwaters to the U.S./Mexico border |
| SP | Carr Canyon Creek | Headwaters to confluence with unnamed tributary at 31°27'01"/110°15'48" |
| SP | Gold Gulch | Headwaters to U.S./Mexico border |
| SP | Ramsey Canyon Creek | Below Forest Service Road #110 to confluence with Carr Wash |
| SP | San Pedro River | U.S./ Mexico Border to Buehman Canyon |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table C. Historically Regulated as WOTUS and in Need of Confirmation

The waters listed in this table have historically been and will continue to be regulated as WOTUS unless ADEQ makes a determination that they are non-WOTUS. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Confirmation Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Table C made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-217. Best Management Practices for non-WOTUS Protected Surface Waters

- A.** The BMPs described in this rule are intended to ensure that activities within the ordinary high-water mark of perennial or intermittent non-WOTUS protected surface waters, or within the bed and bank of other waters that materially impact (i.e., are within 1/4 mile upstream of) non-WOTUS protected surface waters, do not violate applicable surface water quality standards in the non-WOTUS protected surface waters. For purposes of this Section, the activities described in the prior sentence will be referred to as “regulated activities.” Depending on the regulated activities conducted, not all of the BMPs described below may be applicable to a particular project. The owner or operator is responsible to consider the BMPs outlined below and to implement those necessary to ensure that the regulated activities will not violate applicable surface water quality standards in the non-WOTUS protected surface water.
- B.** The BMPs described below are not applicable to any activities that are addressed under an individual or general AZPDES permit that are otherwise regulated under A.R.S. Title 49.
- C.** Erosion and sedimentation control BMPs:
 - 1. When flow is present in any non-WOTUS protected surface waters within a project area, flow shall not be altered except to prevent erosion or pollution of any non-WOTUS protected surface waters.
 - 2. Any disturbance within the ordinary high-water mark of non-WOTUS protected surface waters or within the bed and banks of other waters, that is not intended to be permanently altered, shall be stabilized as soon as practicable to prevent erosion and sedimentation.
 - 3. When flow in any non-WOTUS protected surface water is sufficient to erode, carry, or deposit material, regulated activities shall cease until:
 - a. The flow decreases below the point where sediment movement ceases; or
 - b. Control measures have been undertaken, i.e., equipment and material easily transported by flow are protected within non-erodible barriers or moved outside the flow area.
 - 4. Silt laden or turbid water resulting from regulated activities should be managed in a manner to reduce sediment load prior to discharging.
 - 5. No washing or dewatering of fill material should occur within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters. Other than the replacement of native fill or material used to support vegetation rooting or growth, fill placed within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water must resist washout whether such resistance is derived via particle size limits, presence of a binder, vegetation, or other armoring.

D. Pollutant management BMPs:

- 1. If regulated activities are likely to violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water, operations shall cease until the problem is resolved or until control measures have been implemented.
- 2. Construction material and/or fill (other than native fill or that necessary to support revegetation) placed within surface waters as a result of regulated activities shall not include pollutants in concentrations that will violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water.

E. Construction phase BMPs:

- 1. Equipment staging and storage areas or fuel, oil, and other petroleum products storage and solid waste containment should not be located within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water.
- 2. Any equipment maintenance, washing, or fueling shall not be done within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters with the following exception: Equipment too large or unwieldy to be readily moved, such as large cranes, may be fueled and serviced in non-WOTUS protected surface waters (but outside of standing or flowing water) provided material specifically manufactured and sold as spill containment is in place during fueling/servicing.
- 3. All equipment shall be inspected for leaks, all leaks shall be repaired, and all repaired equipment shall be cleaned to remove any fuel or other fluid residue prior to use within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
- 4. Washout of concrete handling equipment shall not take place within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.

F. Post-construction BMPs:

- 1. Upon completion of regulated activities, areas within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters shall be promptly cleared of all forms, piling, construction residues, equipment, debris, or other obstructions.
- 2. If fully, partially, or occasionally submerged structures are constructed of cast-in-place concrete instead of pre-cast concrete, steps will be taken using sheet piling or temporary dams to prevent contact between water (instream and runoff) and the concrete until it cures and until any curing agents have evaporated or are no longer a pollutant threat.
- 3. Any permanent water crossings within the ordinary high-water mark of any perennial or intermittent in a non-WOTUS protected surface water (other than fords) shall

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

not be equipped with gutters, drains, scuppers, or other conveyances that allow untreated runoff (due to events equal to or lesser in magnitude than the design event for the crossing structure) to directly enter a non-WOTUS protected surface water if such runoff can be directed to a local stormwater drainage, containment, and/or treatment system.

4. Debris shall be cleared as needed from culverts, ditches, dips, and other drainage structures within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water to prevent clogging or conditions that may lead to a washout.
 5. Temporary structures constructed or imported materials shall be removed no later than upon completion of the regulated activities.
 6. Temporary structures constructed of native materials, if they provide an obstacle to flow or can contribute to or cause erosion, or cause changes in sediment load, shall be removed no later than upon completion of the regulated activities.
- G. Design consideration BMPs:**
1. All temporary structures constructed of imported materials and all permanent structures, including but not limited to, access roadways, culvert crossings, staging areas, material stockpiles, berms, dikes, and pads, shall be constructed so as to accommodate overtopping and resist washout by streamflow.
 2. Any temporary crossing, other than fords on native material, shall be constructed in such a manner so as to provide armoring of the stream channel. Materials used to provide this armoring shall not include anything easily transportable by flow. Examples of acceptable materials include steel plates, untreated wooden planks, pre-cast concrete planks or blocks. Examples of unacceptable materials include clay, silt, sand, and gravel finer than cobble (roughly fist-sized). The armoring shall, via mass, anchoring systems, or a combination of the two, resist washout.
- H. Notification.** The owner or operator of any regulated activities shall, five days prior to initiation of the regulated activities, submit a notice to ADEQ on a form that includes basic information including the GPS location, the waterbody ID of the nearest non-WOTUS protected surface water, general description of planned activities, types of BMPs to be employed during the project, and phone number and email for a contact person. Work may proceed after five calendar days have passed since the owner/operator provided notification to ADEQ unless ADEQ responds in writing to the contact person for the owner/operator.
- I. Exclusions:** The BMPs and notification requirements in this Section shall not apply to:
1. Activities that are already regulated under A.R.S. Title 49.
 2. Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 3. Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 4. Maintenance but not construction of drainage ditches.
 5. Construction and maintenance of irrigation ditches.
 6. Maintenance of structures as dams, dikes, and levees.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix A. Repealed**Historical Note**

Former Section R9-21-208, Appendices 1 through 9 renumbered and amended as new Appendix A adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

Appendix B. Repealed**Historical Note**

Former R9-21-209, Table 1 and Table 2 renumbered and amended as Appendix B adopted effective January 7, 1985 (Supp.85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

ARTICLE 3. RECLAIMED WATER QUALITY STANDARDS**R18-11-301. Definitions**

The terms in this Article have the following meanings:

“Direct reuse” has the meaning prescribed in R18-9-701(1).

“Disinfection” means a treatment process that uses oxidants, ultraviolet light, or other agents to kill or inactivate pathogenic organisms in wastewater.

“Filtration” means a treatment process that removes particulate matter from wastewater by passage through porous media.

“Gray water” means wastewater, collected separately from a sewage flow, that originates from a clothes washer, bathtub, shower, or sink, but it does not include wastewater from a kitchen sink, dishwasher, or a toilet.

“Industrial wastewater” means wastewater generated from an industrial process.

“Landscape impoundment” means a manmade lake, pond, or impoundment of reclaimed water where swimming, wading, boating, fishing, and other water-based recreational activities are prohibited. A landscape impoundment is created for storage, landscaping, or for aesthetic purposes only.

“NTU” means nephelometric turbidity unit.

“On-site wastewater treatment facility” has the meaning prescribed in A.R.S. § 49-201(24).

“Open access” means that access to reclaimed water by the general public is uncontrolled.

“Reclaimed water” has the meaning prescribed in A.R.S. § 49-201(31).

“Recreational impoundment” means a manmade lake, pond, or impoundment of reclaimed water where boating or fishing is an intended use of the impoundment. Swimming and other full-body recreation activities (for example, water-skiing) are prohibited in a recreational impoundment.

“Restricted access” means that access to reclaimed water by the general public is controlled.

“Secondary treatment” means a biological treatment process that achieves the minimum level of effluent quality defined by the federal secondary treatment regulation at 40 CFR § 133.102.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

“Sewage” means untreated wastes from toilets, baths, sinks, lavatories, laundries, and other plumbing fixtures in places of human habitation, employment, or recreation.

Historical Note

Adopted effective July 9, 1981 (Supp. 81-4). Former Section R9-21-301 renumbered without change as Section R18-11-301 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-302. Applicability

This Article applies to the direct reuse of reclaimed water, except for:

1. The direct reuse of gray water, or
2. The direct reuse of reclaimed water from an onsite wastewater treatment facility regulated by a general Aquifer Protection Permit under 18 A.A.C. 9, Article 3.

Historical Note

Adopted effective June 8, 1981 (Supp. 81-3). Amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-302 renumbered without change as Section R18-11-302 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-303. Class A+ Reclaimed Water

- A. Class A+ reclaimed water is wastewater that has undergone secondary treatment, filtration, nitrogen removal treatment, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A+ reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A+ reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
 3. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.

- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A+ reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.
- D. Class A+ reclaimed water is not required for any type of direct reuse. A person may use Class A+ reclaimed water for any type of direct reuse listed in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-303 renumbered without change as Section R18-11-303 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-304. Class A Reclaimed Water

- A. Class A reclaimed water is wastewater that has undergone secondary treatment, filtration, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in subsection (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tion (B)(2) before discharge to a reclaimed water distribution system.

- D. A person shall use Class A reclaimed water for a type of direct reuse listed as Class A in Table A. A person may use Class A reclaimed water for a type of direct reuse listed as Class B or Class C in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-304 renumbered without change as Section R18-11-304 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-305. Class B+ Reclaimed Water

- A. Class B+ reclaimed water is wastewater that has undergone secondary treatment, nitrogen removal treatment, and disinfection.
- B. An owner of a facility shall ensure that:
1. Class B+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
 2. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.
- C. Class B+ reclaimed water is not required for a type of direct reuse. A person may use Class B+ reclaimed water for a type of direct reuse listed as Class B or Class C in Table A. A person shall not use Class B+ reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-306. Class B Reclaimed Water

- A. Class B reclaimed water is wastewater that has undergone secondary treatment and disinfection.
- B. An owner of a facility shall ensure that Class B reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
1. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 2. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
- C. A person shall use a minimum of Class B reclaimed water for a type of direct reuse listed as Class B in Table A. A person may use Class B reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class B reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-307. Class C Reclaimed Water

- A. Class C reclaimed water is wastewater that has undergone secondary treatment in a series of wastewater stabilization ponds, including aeration, with or without disinfection.
- B. The owner of a facility shall ensure that:
1. The total retention time of Class C reclaimed water in wastewater stabilization ponds is at least 20 days.
 2. Class C reclaimed water meets the following criteria after treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven reclaimed water samples taken is less than 1000 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 4000 / 100 ml.
- C. A person shall use a minimum of Class C reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class C reclaimed water for a type of direct reuse listed as Class A or Class B in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-308. Industrial Reuse

- A. The reclaimed water quality requirements for the following direct reuse applications are industry-specific and shall be determined by the Department on a case-by-case basis in a reclaimed water permit issued by the Department under 18 A.A.C. 9, Article 7:
1. Direct reuse of industrial wastewater containing sewage.
 2. Direct reuse of industrial wastewater for the production or processing of any crop used as human or animal food.
- B. The Department shall use best professional judgment to determine the reclaimed water quality requirements needed to protect public health and the environment for a type of direct reuse specified in subsection (A).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-309. Reclaimed Water Quality Standards for an Unlisted Type of Direct Reuse

- A. The Department may prescribe in an individual reclaimed water permit issued under 18 A.A.C. 9, Article 7, reclaimed water quality requirements for a type of direct reuse not listed in Table A. Before permitting a direct reuse of reclaimed water not listed in Table A, the Department shall, using its best professional judgment, determine and require compliance with reclaimed water quality requirements needed to protect public health and the environment.
- B. Department may determine that Class A+, A, B+, B, or C reclaimed water is appropriate for a new type of direct reuse.
- C. The Department shall consider the following factors when prescribing reclaimed water quality requirements for a new type of direct reuse:
1. The risk to public health;
 2. The degree of public access to the site where the reclaimed water is reused and human exposure to the reclaimed water;
 3. The level of treatment necessary to ensure that the reclaimed water is aesthetically acceptable;
 4. The level of treatment necessary to prevent nuisance conditions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

5. Specific water quality requirements for the intended type of direct reuse;
6. The means of application of the reclaimed water;
7. The degree of treatment necessary to avoid a violation of surface water quality standards or aquifer water quality standards;
8. The potential for improper or unintended use of the reclaimed water;
9. The reuse guidelines, criteria, or standards adopted or recommended by the U.S. Environmental Protection Agency or other federal or state agencies that apply to the new type of direct reuse; and
10. Similar wastewater reclamation experience of reclaimed water providers in the United States.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

Table A. Minimum Reclaimed Water Quality Requirements for Direct Reuse

| Type of Direct Reuse | Minimum Class of Reclaimed Water Required |
|--|---|
| Irrigation of food crops | A |
| Recreational impoundments | A |
| Residential landscape irrigation | A |
| Schoolground landscape irrigation | A |
| Open access landscape irrigation | A |
| Toilet and urinal flushing | A |
| Fire protection systems | A |
| Spray irrigation of an orchard or vineyard | A |
| Commercial closed loop air conditioning systems | A |
| Vehicle and equipment washing (does not include self-service vehicle washes) | A |
| Snowmaking | A |
| Surface irrigation of an orchard or vineyard | B |
| Golf course irrigation | B |
| Restricted access landscape irrigation | B |
| Landscape impoundment | B |
| Dust control | B |
| Soil compaction and similar construction activities | B |
| Pasture for milking animals | B |
| Livestock watering (dairy animals) | B |
| Concrete and cement mixing | B |
| Materials washing and sieving | B |
| Street cleaning | B |
| Pasture for non-dairy animals | C |
| Livestock watering (non-dairy animals) | C |
| Irrigation of sod farms | C |
| Irrigation of fiber, seed, forage, and similar crops | C |
| Silviculture | C |

Note: Nothing in this Article prevents a wastewater treatment plant from using a higher quality reclaimed water for a type of direct reuse than the minimum class of reclaimed water listed in Table A. For example, a wastewater treatment plant may provide Class A reclaimed water for a type of direct reuse where Class B or Class C reclaimed water is acceptable.

Historical Note

New Table adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

ARTICLE 4. AQUIFER WATER QUALITY STANDARDS

R18-11-401. Definitions

In addition to the definitions contained in A.R.S. §§ 49-101 and 49-201, the terms of this Article shall have the following meanings:

1. "Beta particle and photon radioactivity from man-made radionuclides" means all radionuclides emitting beta particles or photons, except Thorium-232, Uranium-235, Uranium-238 and their progeny.
2. "Dose equivalent" means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements.
3. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
4. "Gross alpha particle activity" means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.
5. "Mg/l" means milligrams per liter.
6. "Millirem" means 1/1000 of a rem. A rem means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system.
7. "Non-drinking water protected use" means the protection and maintenance of aquifer water quality for a use other than for human consumption.
8. "pCi" means picocurie, or the quantity of radioactive material producing 2.22 nuclear transformations per minute.
9. "Total trihalomethanes" means the sum of the concentrations of the following trihalomethane compounds: trichloromethane (chloroform), dibromo-chloromethane, bromodichloromethane and tribromo-methane (bromoform).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3).

R18-11-402. Repealed

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Repealed effective August 14, 1992 (Supp. 92-3).

R18-11-403. Analytical Methods

Analysis of a sample to determine compliance with an aquifer water quality standard shall be in accordance with an analytical method specified in A.A.C. Title 9, Chapter 14, Article 6 or an alternative analytical method that is approved by the Director of the Arizona Department of Health Services pursuant to A.A.C. R9-14-610(C).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3). Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-404. Laboratories

A test result from a sample taken to determine compliance with an aquifer water quality standard shall be valid only if the sample has

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

been analyzed by a laboratory that is licensed by the Arizona Department of Health Services for the analysis performed.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-405. Narrative Aquifer Water Quality Standards

- A. A discharge shall not cause a pollutant to be present in an aquifer classified for a drinking water protected use in a concentration which endangers human health.
- B. A discharge shall not cause or contribute to a violation of a water quality standard established for a navigable water of the state.
- C. A discharge shall not cause a pollutant to be present in an aquifer which impairs existing or reasonably foreseeable uses of water in an aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-406. Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- A. The aquifer water quality standards in this Section apply to aquifers that are classified for drinking water protected use.
- B. The following are the aquifer water quality standards for inorganic chemicals:

| Pollutant | mg/L |
|----------------------------|--|
| Antimony | 0.006 |
| Arsenic | 0.05 |
| Asbestos | 7 million fibers/liter (longer than 10 mm) |
| Barium | 2 |
| Beryllium | 0.004 |
| Cadmium | 0.005 |
| Chromium | 0.1 |
| Cyanide (As Free Cyanide) | 0.2 |
| Fluoride | 4.0 |
| Lead | 0.05 |
| Mercury | 0.002 |
| Nickel | 0.1 |
| Nitrate (as N) | 10 |
| Nitrite (as N) | 1 |
| Nitrate and nitrite (as N) | 10 |
| Selenium | 0.05 |
| Thallium | 0.002 |

- C. The following are the aquifer water quality standards for organic chemicals:

| Pollutant | (mg/L) |
|----------------------------|--------|
| Benzene | 0.005 |
| Benzo (a) pyrene | 0.0002 |
| Carbon Tetrachloride | 0.005 |
| o-Dichlorobenzene | 0.6 |
| para-Dichlorobenzene | 0.075 |
| 1,2-Dichloroethane | 0.005 |
| 1,1-Dichloroethylene | 0.007 |
| cis-1,2-Dichloroethylene | 0.07 |
| trans-1,2-Dichloroethylene | 0.1 |
| 1,2-Dichloropropane | 0.005 |
| Dichloromethane | 0.005 |
| Di (2-ethylhexyl) adipate | 0.4 |
| Di (2-ethylhexyl) pthalate | 0.006 |

| | |
|---------------------------|------------|
| Ethylbenzene | 0.7 |
| Hexachlorobenzene | 0.001 |
| Hexachlorocyclopentadiene | 0.05 |
| Monochlorobenzene | 0.1 |
| Pentachlorophenol | 0.001 |
| Styrene | 0.1 |
| 2,3,7,8-TCDD (Dioxin) | 0.00000003 |
| Tetrachloroethylene | 0.005 |
| Toluene | 1 |
| Trihalomethanes (Total) | 0.10 |
| 1,2,4-Trichlorobenzene | 0.07 |
| 1,1,1-Trichloroethane | 0.20 |
| 1,1,2-Trichloroethane | 0.005 |
| Trichloroethylene | 0.005 |
| Vinyl Chloride | 0.002 |
| Xylenes (Total) | 10 |

- D. The following are the aquifer water quality standards for pesticides and polychlorinated biphenyls (PCBs):

| Pollutant | (mg/L) |
|---|---------|
| Alachlor | 0.002 |
| Atrazine | 0.003 |
| Carbofuran | 0.04 |
| Chlordane | 0.002 |
| Dalapon | 0.2 |
| 1,2-Dibromo-3-Chloropropane (DBCP) | 0.0002 |
| 2,4,-Dichlorophenoxyacetic Acid(2,4-D) | 0.07 |
| Dinoseb | 0.007 |
| Diquat | 0.02 |
| Endothall | 0.1 |
| Endrin | 0.002 |
| Ethylene Dibromide (EDB) | 0.00005 |
| Glyphosate | 0.7 |
| Heptachlor | 0.0004 |
| Heptachlor Epoxide | 0.0002 |
| Lindane | 0.0002 |
| Methoxychlor | 0.04 |
| Oxamyl | 0.2 |
| Picloram | 0.5 |
| Polychlorinated Biphenols (PCBs) | 0.0005 |
| Simazine | 0.004 |
| Toxaphene | 0.003 |
| 2,4,5-Trichlorophenoxypropionic Acid (2,4,5-TP or Silvex) | 0.05 |

- E. The following are the aquifer water quality standards for radionuclides:

1. The maximum concentration for gross alpha particle activity, including Radium-226 but excluding radon and uranium, shall not exceed 15 pCi/l.
2. The maximum concentration for combined Radium-226 and Radium-228 shall not exceed 5 pCi/l.
3. The average annual concentration of beta particle and photon radioactivity from man-made radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem/year.
4. Except for the radionuclides listed in this subsection, the concentration of man-made radionuclides causing 4 millirem total body or organ dose equivalents shall be calculated on the basis of a 2-liter-per-day drinking water intake using the 168-hour data listed in "Maximum Permissible Body Burdens and Maximum Permissible Con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

centration of Radionuclides in Air or Water for Occupational Exposure,” National Bureau of Standards Handbook 69, National Bureau of Commerce, as amended August 1963 (and no future editions), incorporated herein by reference and on file with the Office of the Secretary of State and with the Department. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirem/year. The following average annual concentrations are assumed to produce a total body or organ dose of 4 millirem/year:

| Radionuclide | Critical Organ | pCi/l |
|--------------|----------------|--------|
| Tritium | Total body | 20,000 |
| Strontium-90 | Bone Marrow | 8 |

- F. The aquifer water quality standard for microbiological contaminants is based upon the presence or absence of total coliforms in a 100-milliliter sample. If a sample is total coliform-positive, a 100-milliliter repeat sample shall be taken within two weeks of the time the sample results are reported. Any total coliform-positive repeat sample following a total coliform-positive sample constitutes a violation of the aquifer water quality standard for microbiological contaminants.
- G. The following are the aquifer water quality standards for turbidity:
- One nephelometric turbidity unit as determined by a monthly average except that five or fewer nephelometric turbidity units may be allowed if it can be determined that the higher turbidity does not interfere with disinfection, prevent maintenance of effective disinfectant agents in water supply distribution systems, or interfere with microbiological determinations.
 - Five nephelometric turbidity units based on an average of two consecutive days.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended effective May 26, 1994 (Supp. 94-2).

R18-11-407. Aquifer Water Quality Standards in Reclassified Aquifers

- A. All aquifers in the state are classified for drinking water protected use except for aquifers which are reclassified to a non-drinking water protected use pursuant to A.R.S. § 49-224 and A.A.C. R18-11-503.
- B. Aquifer water quality standards for drinking water protected use apply to reclassified aquifers except where expressly superseded by aquifer water quality standards adopted pursuant to subsection (C).
- C. The Director shall adopt, by rule, aquifer water quality standards for reclassified aquifers within one year of the date of the order reclassifying the aquifer to a nondrinking water protected use. The Director shall adopt aquifer water quality standards for reclassified aquifers only for pollutants that are specifically identified in a petition for reclassification as prescribed by A.R.S. § 49-223(E) and A.A.C. R18-11-503(B). Aquifer water quality standards for reclassified aquifers shall be sufficient to protect the use of the reclassified aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-408. Petition for Adoption of a Numeric Aquifer Water Quality Standard

- A. Any person may petition the Director to adopt, by rule, a numeric aquifer water quality standard for a pollutant for which no numeric aquifer water quality standard exists.
- B. Petitions for adoption of a numeric aquifer water quality standard shall be filed with the Department and shall comply with the requirements applicable to petitions for rule adoption as provided by A.R.S. § 41-1033 and A.A.C. R18-1-302, except as otherwise provided by A.R.S. § 49-223 or this Section.
- C. In addition to the requirements of A.A.C. R18-1-302, a petition for rule adoption to establish a numeric aquifer water quality standard shall include specific reference to:
- Technical information that the pollutant is a toxic pollutant.
 - Technical information upon which the Director reasonably may base the establishment of a numeric aquifer water quality standard.
 - Evidence that the pollutant that is the subject of the petition is or may in the future be present in an aquifer or part of an aquifer that is classified for drinking water protected use. Evidence may include, but is not limited to, any of the following:
 - A laboratory analysis of a water sample by a laboratory licensed by the Arizona Department of Health Services which indicates the presence of the pollutant in the aquifer.
 - A hydrogeological study which demonstrates that the pollutant that is the subject of the petition may be present in an aquifer in the future. The hydrogeological study shall include the following:
 - A description of the use that results in a discharge of the pollutant that is the subject of the petition.
 - A description of the mobility of the pollutant in the vadose zone and in the aquifer.
 - A description of the persistence of the pollutant in the vadose zone and in the aquifer.
- D. Within 180 calendar days of the receipt of a complete petition for rule adoption to establish a numeric aquifer water quality standard, the Director shall make a written determination of whether the petition should be granted or denied. The Director shall give written notice by regular mail of the determination to the petitioner.
- E. If the petition for rule adoption is granted, the Director shall initiate rulemaking proceedings to adopt a numeric aquifer water quality standard. The Director shall, within one year of the date that the petition for adoption of a numeric aquifer water quality standard is granted, either adopt a rule establishing a numeric aquifer water quality standard or publish a notice of termination of rulemaking in the Arizona Administrative Register.
- F. If the petition for rule adoption is denied, the Director shall issue a denial letter to the petitioner which explains the reasons for the denial. The denial of a petition for rule adoption to establish a numeric aquifer water quality standard is not subject to judicial review.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).

ARTICLE 5. AQUIFER BOUNDARY AND PROTECTED USE CLASSIFICATION

R18-11-501. Definitions

In addition to the definitions contained in A.R.S. § 49-201, the words and phrases of this Article shall have the following meaning:

1. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
2. "Hardrock areas containing little or no water" means areas of igneous or metamorphic rock which do not yield usable quantities of water.
3. "Nondrinking water protected use" means the protection and maintenance of aquifer water quality for a use other than human consumption.
4. "Usable quantities" means five gallons of water per day.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-502. Aquifer Boundaries

- A. Except as provided in subsection (B), aquifer boundaries for the aquifers in this state are identified and defined as being identical to the hydrologic basin and subbasin boundaries, as found by the Director of the Department of Water Resources, Findings and Order In the Matter of The Designation of Groundwater Basins and Subbasins In The State of Arizona (dated June 21, 1984), pursuant to A.R.S. §§ 45-403 and 45-404, which is incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.
- B. Excluded from the boundaries of the aquifers are hard rock areas which contain little or no water, as identified in Plate 1 of the Department of Water Resources, Water Resource Hydro-

logic Map Series Report Number 2 (dated January 1981) and as further identified in the Bureau of Mines, University of Arizona County Geologic Map Series (individual county maps dated 1957 through 1960), which are incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.

- C. The Director may, by rule, modify or add an aquifer boundary provided that one or more of the following applies:
 1. The Department of Water Resources modifies the boundaries of its basins or subbasins.
 2. The Director is made aware of new technical information or data which supports refinement of an aquifer boundary.
- D. Facilities located outside of the boundaries defined in these rules shall be subject to A.R.S. § 49-241 except as provided therein.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-503. Petition for reclassification

- A. Any person may petition the Director to reclassify an aquifer from a drinking water protected use to a nondrinking water protected use pursuant to A.R.S. § 49-224(C).
- B. A written petition for reclassification pursuant to A.R.S. § 49-224(C) or A.R.S. § 49-224(D) shall be filed with the Department and shall include the following categories of information:
 1. The proposed protected use for which the reclassification is being requested.
 2. The pollutant and affected aquifer water quality standards for which the reclassification is being requested.
 3. A hydrogeologic report which demonstrates that the aquifer proposed for reclassification is or will be hydrologically isolated, to the extent described in A.R.S. § 49-224(C)(1). This report and demonstration of hydrologic isolation for the area containing such aquifer, and immediate adjacent geologic units, shall include at least the following:
 - a. Hydrogeologic area maps and cross sections.
 - b. An analysis of subsurface geology, including geologic and hydrologic separation.
 - c. Water level elevation or piezometric level contour maps.
 - d. Analysis of hydrologic characteristics of the aquifer and the immediate adjacent geologic units.
 - e. Description of existing water quality and analysis of water chemistry.
 - f. Projected annual quantity of water to be withdrawn.
 - g. Identification of pumping centers, cones of depression and areas of recharge.
 - h. A water balance.
 - i. Existing flow direction and evaluation of the effects of seasonal and future pumping on flow.
 - j. An evaluation as to whether the reclassification will contribute to or cause a violation of aquifer water quality standards in other aquifers, or in parts of the aquifer not being proposed for reclassification.
 4. Documentation demonstrating that water from the aquifer or part of the aquifer for which reclassification is pro-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

posed is not being used as drinking water. This documentation shall include at least the following:

- a. A list of all wells or springs including their location, ownership and use within the aquifer or part of the aquifer being proposed for reclassification.
 - b. Identification of groundwater withdrawal rights, on file with the Department of Water Resources, within the aquifer or part of the aquifer being proposed for reclassification.
 - c. A comprehensive list of agencies, persons and other information sources consulted for aquifer use documentation.
5. A cost-benefit analysis developed pursuant to the requirements of A.R.S. § 49-224(C)(3), except for petitions submitted pursuant to A.R.S. § 49-224(D). This analysis shall identify potential future uses of the aquifer being proposed for reclassification, as well as other opportunity costs associated with reclassification, and shall contain a description of the cost-benefit methodology used, including all assumptions, data, data sources and criteria considered and all supporting statistical analyses.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-504. Agency Action on Petition

- A. Upon receipt of a petition for reclassification, the Director shall review the petition for compliance with the requirements of R18-11-503. If additional information is necessary, the petitioner shall be notified of specific deficiencies in writing within 30 calendar days of receipt of the petition.
- B. Within 120 calendar days after receipt of a complete petition, and after consultation with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C), the Director shall make a final decision to grant or deny the petition and shall notify the petitioner of such decision and the reason for such determination in writing.
- C. Upon a decision to grant a petition for aquifer reclassification, the Director shall initiate proceedings for promulgation of aquifer water quality standards and, if applicable, for aquifer boundary designation for the reclassified aquifers.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-505. Public participation

- A. Within 30 days of receipt of a complete petition for reclassification filed pursuant to A.R.S. § 49-224(D), or if the Director deems it necessary to consider a reclassification under A.R.S. § 49-224(C), the Director shall give public notice of the proposed reclassification pursuant to A.A.C. R18-1-401.
- B. The Director shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification. The Director shall give notice of each public hearing and conduct the public hearing in accordance with the provisions of A.A.C. R18-1-402.

Historical Note

Adopted effective June 29, 1989 (Supp. 89-2).

R18-11-506. Rescission of Reclassification

The Director may, by rule, rescind an aquifer reclassification and return an aquifer to a drinking water protected use if he determines that any of the conditions under which the reclassification was

granted are no longer valid. If the Director initiates a change under this Section, he shall consult with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C).

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

ARTICLE 6. IMPAIRED WATER IDENTIFICATION

Article 6, consisting of Sections R18-11-601 through R18-11-606, made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-601. Definitions

In addition to the definitions established in A.R.S. §§ 49-201 and 49-231, and A.A.C. R18-11-101, the following terms apply to this Article:

1. "303(d) List" means the list of surface waters or segments required under section 303(d) of the Clean Water Act and A.R.S. Title 49, Chapter 2, Article 2.1, for which TMDLs are developed and submitted to EPA for approval.
2. "Attaining" means there is sufficient, credible, and scientifically defensible data to assess a surface water or segment and the surface water or segment does not meet the definition of impaired or not attaining.
3. "AZPDES" means the Arizona Pollutant Elimination Discharge System.
4. "Credible and scientifically defensible data" means data submitted, collected, or analyzed using:
 - a. Quality assurance and quality control procedures under A.A.C. R18-11-602;
 - b. Samples or analyses representative of water quality conditions at the time the data were collected;
 - c. Data consisting of an adequate number of samples based on the nature of the water in question and the parameters being analyzed; and
 - d. Methods of sampling and analysis, including analytical, statistical, and modeling methods that are generally accepted and validated by the scientific community as appropriate for use in assessing the condition of the water.
5. "Designated use" means those uses specified in 18 A.A.C. 11, Article 1 for each surface water or segment whether or not they are facing.
6. "EPA" means the U.S. Environmental Protection Agency.
7. "Impaired water" means a Navigable water for which credible scientific data exists that satisfies the requirements of A.R.S. § 49-232 and that demonstrates that the water should be identified pursuant to 33 United States Code § 1313(d) and the regulations implementing that statute. A.R.S. § 49-231(1).
8. "Laboratory detection limit" means a "Method Reporting Limit" (MRL) or "Reporting Limit" (RL). These analogous terms describe the laboratory reported value, which is the lowest concentration level included on the calibration curve from the analysis of a pollutant that can be quantified in terms of precision and accuracy.
9. "Monitoring entity" means the Department or any person who collects physical, chemical, or biological data used for an impaired water identification or a TMDL decision.
10. "Naturally occurring condition" means the condition of a surface water or segment that would have occurred in the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- absence of pollutant loadings as a result of human activity.
11. "Not attaining" means a surface water is assessed as impaired, but is not placed on the 303(d) List because:
 - a. A TMDL is prepared and implemented for the surface water;
 - b. An action, which meets the requirements of R18-11-604(D)(2)(h), is occurring and is expected to bring the surface water to attaining before the next 303(d) List submission; or
 - c. The impairment of the surface water is due to pollution but not a pollutant, for which a TMDL load allocation cannot be developed.
 12. "NPDES" means National Pollutant Discharge Elimination System.
 13. "Planning List" means a list of surface waters and segments that the Department will review and evaluate to determine if the surface water or segment is impaired and whether a TMDL is necessary.
 14. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. 33 U.S.C. 1362(6). Characteristics of water, such as dissolved oxygen, pH, temperature, turbidity, and suspended sediment are considered pollutants if they result or may result in the non-attainment of a water quality standard.
 15. "Pollution" means "the man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water." 33 U.S.C. 1362(19).
 16. "QAP" means a quality assurance plan detailing how environmental data operations are planned, implemented, and assessed for quality during the duration of a project.
 17. "Sampling event" means one or more samples taken under consistent conditions on one or more days at a distinct station or location.
 18. "SAP" means a site specific sampling and analysis plan that describes the specifics of sample collection to ensure that data quality objectives are met and that samples collected and analyzed are representative of surface water conditions at the time of sampling.
 19. "Spatially independent sample" means a sample that is collected at a distinct station or location. The sample is independent if the sample was collected:
 - a. More than 200 meters apart from other samples, or
 - b. Less than 200 meters apart, and collected to characterize the effect of an intervening tributary, outfall or other pollution source, or significant hydrographic or hydrologic change.
 20. "Temporally independent sample" means a sample that is collected at the same station or location more than seven days apart from other samples.
 21. "Threatened" means that a surface water or segment is currently attaining its designated use, however, trend analysis, based on credible and scientifically defensible data, indicates that the surface water or segment is likely to be impaired before the next listing cycle.
 22. "TMDL" means total maximum daily load.
 23. "TMDL decision" means a decision by the Department to:
 - a. Prioritize an impaired water for TMDL development,
 - b. Develop a TMDL for an impaired water, or
 - c. Develop a TMDL implementation plan.
 24. "Total maximum daily load" means an estimation of the total amount of a pollutant from all sources that may be added to a water while still allowing the water to achieve and maintain applicable surface water quality standards. Each total maximum daily load shall include allocations for sources that contribute the pollutant to the water, as required by section 303(d) of the clean water act (33 United States Code section 1313(d)) and regulations implementing that statute to achieve applicable surface water quality standards. A.R.S. § 49-231(4).
 25. "Water quality standard" means a standard composed of designated uses (classification of waters), the numerical and narrative criteria applied to the specific water uses or classification, the antidegradation policy, and moderating provisions, for example, mixing zones, site-specific alternative criteria, and exemptions, in A.A.C. Title 18, Chapter 11, Article 1.
 26. "WQARF" means the water quality assurance revolving fund established under A.R.S. § 49-282.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-602. Credible Data

- A. Data are credible and relevant to an impaired water identification or a TMDL decision when:
 1. Quality Assurance Plan. A monitoring entity, which contribute data for an impaired water identification or a TMDL decision, provides the Department with a QAP that contains, at a minimum, the elements listed in subsections (A)(1)(a) through (A)(1)(f). The Department may accept a QAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 - a. An approval page that includes the date of approval and the signatures of the approving officials, including the project manager and project quality assurance manager;
 - b. A project organization outline that identifies all key personnel, organizations, and laboratories involved in monitoring, including the specific roles and responsibilities of key personnel in carrying out the procedures identified in the QAP and SAP, if applicable;
 - c. Sampling design and monitoring data quality objectives or a SAP that meets the requirements of subsection (A)(2) to ensure that:
 - i. Samples are spatially and temporally representative of the surface water,
 - ii. Samples are representative of water quality conditions at the time of sampling, and
 - iii. The monitoring is reproducible;
 - d. The following field sampling information to assure that samples meet data quality objectives:
 - i. Sampling and field protocols for each parameter or parametric group, including the sampling methods, equipment and containers, sample preservation, holding times, and any analysis

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- proposed for completion in the field or outside of a laboratory;
- ii. Field and laboratory methods approved under subsection (A)(5);
 - iii. Handling procedures to identify samples and custody protocols used when samples are brought from the field to the laboratory for analysis;
 - iv. Quality control protocols that describe the number and type of field quality control samples for the project that includes, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - v. Procedures for testing, inspecting, and maintaining field equipment;
 - vi. Field instrument calibration procedures that describe how and when field sampling and analytical instruments will be calibrated;
 - vii. Field notes and records that describe the conditions that require documentation in the field, such as weather, stream flow, transect information, distance from water edge, water and sample depth, equipment calibration measurements, field observations of watershed activities, and bank conditions. Indicate the procedures implemented for maintaining field notes and records and the process used for attaching pertinent information to monitoring results to assist in data interpretation;
 - viii. Minimum training and any specialized training necessary to do the monitoring, that includes the proper use and calibration of field equipment used to collect data, sampling protocols, quality assurance/quality control procedures, and how training will be achieved;
- e. Laboratory analysis methods and quality assurance/quality control procedures that assure that samples meet data quality objectives, including:
 - i. Analytical methods and equipment necessary for analysis of each parameter, including identification of approved laboratory methods described in subsection (A)(5), and laboratory detection limits for each parameter;
 - ii. The name of the designated laboratory, its license number, if licensed by the Arizona Department of Health Services, and the name of a laboratory contact person to assist the Department with quality assurance questions;
 - iii. Quality controls that describe the number and type of laboratory quality control samples for the project, including, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - iv. Procedures for testing, inspecting, and maintaining laboratory equipment and facilities;
 - v. A schedule for calibrating laboratory instruments, a description of calibration methods, and a description of how calibration records are maintained; and
 - vi. Sample equipment decontamination procedures that outline specific methods for sample collection and preparation of equipment, identify the frequency of decontamination, and describe the procedures used to verify decontamination;
 - f. Data review, management, and use that includes the following:
 - i. A description of the data handling process from field to laboratory, from laboratory to data review and validation, and from validation to data storage and use. Include the role and responsibility of each person for each step of the process, type of database or other storage used, and how laboratory and field data qualifiers are related to the laboratory result;
 - ii. Reports that describe the intended frequency, content, and distribution of final analysis reports and project status reports;
 - iii. Data review, validation, and verification that describes the procedure used to validate and verify data, the procedures used if errors are detected, and how data are accepted, rejected, or qualified; and
 - iv. Reconciliation with data quality objectives that describes the process used to determine whether the data collected meets the project objectives, which may include discarding data, setting limits on data use, or revising data quality objectives.
2. Sampling and analysis plan.
 - a. A monitoring entity shall develop a SAP that contains, at a minimum, the following elements:
 - i. The experimental design of the project, the project goals and objectives, and evaluation criteria for data results;
 - ii. The background or historical perspective of the project;
 - iii. Identification of target conditions, including a discussion of whether any weather, seasonal variations, stream flow, lake level, or site access may affect the project and the consideration of these factors;
 - iv. The data quality objectives for measurement of data that describe in quantitative and qualitative terms how the data meet the project objectives of precision, accuracy, completeness, comparability, and representativeness;
 - v. The types of samples scheduled for collection;
 - vi. The sampling frequency;
 - vii. The sampling periods;
 - viii. The sampling locations and rationale for the site selection, how site locations are benchmarked, including scaled maps indicating approximate location of sites; and
 - ix. A list of the field equipment, including tolerance range and any other manufacturer's specifications relating to accuracy and precision.
 - b. The Department may accept a SAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 3. The monitoring entity may include any of the following in the QAP or SAP:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- a. The name, title, and role of each person and organization involved in the project, identifying specific roles and responsibilities for carrying out the procedures identified in the QAP and SAP;
 - b. A distribution list of each individual and organization receiving a copy of the approved QAP and SAP;
 - c. A table of contents;
 - d. A health and safety plan;
 - e. The inspection and acceptance requirements for supplies;
 - f. The data acquisition that describes types of data not obtained through this monitoring activity, but used in the project;
 - g. The audits and response actions that describe how field, laboratory, and data management activities and sampling personnel are evaluated to ensure data quality, including a description of how the project will correct any problems identified during these assessments; and
 - h. The waste disposal methods that identify wastes generated in sampling and methods for disposal of those wastes.
4. Exceptions. The Department may determine that the following data are also credible and relevant to an impaired water identification or TMDL decision when data were collected, provided the conditions in subsections (A)(5), (A)(6), and (B) are met, and where the data were collected in the surface water or segment being evaluated for impairment:
 - a. The data were collected before July 12, 2002 and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2);
 - b. The data were collected after July 12, 2002 as part of an ongoing monitoring effort by a governmental agency and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2); or
 - c. The instream water quality data were or are collected under the terms of a NPDES or AZPDES permit or a compliance order issued by the Department or EPA, a consent decree signed by the Department or EPA, or a sampling program approved by the Department or EPA under WQARF or CERCLA, and the Department determines that the data yield results of comparable reliability to data collected under subsections (A)(1) and (A)(2).
 5. Data collection, preservation, and analytical procedures. The monitoring entity shall collect, preserve, and analyze data using methods of sample collection, preservation, and analysis established under A.A.C. R9-14-610.
 6. Laboratory. The monitoring entity shall ensure that chemical and toxicological samples are analyzed in a state-licensed laboratory, a laboratory exempted by the Arizona Department of Health Services for specific analyses, or a federal or academic laboratory that can demonstrate proper quality assurance/quality control procedures substantially equal to those required by the Arizona Department of Health Services, and shall ensure that the laboratory uses approved methods identified in A.A.C. R9-14-610.
- B. Documentation for data submission. The monitoring entity shall provide the Department with the following information either before or with data submission:
 1. A copy of the QAP or SAP, or both, revisions to a previously submitted QAP or SAP, and any other information necessary for the Department to evaluate the data under subsection (A)(4);
 2. The applicable dates of the QAP and SAP, including any revisions;
 3. Written assurance that the methods and procedures specified in the QAP and SAP were followed;
 4. The name of the laboratory used for sample analyses and its certification number, if the laboratory is licensed by the Arizona Department of Health Services;
 5. The quality assurance/quality control documentation, including the analytical methods used by the laboratory, method number, detection limits, and any blank, duplicate, and spike sample information necessary to properly interpret the data, if different from that stated in the QAP or SAP;
 6. The data reporting unit of measure;
 7. Any field notes, laboratory comments, or laboratory notations concerning a deviation from standard procedures, quality control, or quality assurance that affects data reliability, data interpretation, or data validity; and
 8. Any other information, such as complete field notes, photographs, climate, or other information related to flow, field conditions, or documented sources of pollutants in the watershed, if requested by the Department for interpreting or validating data.
 - C. Recordkeeping. The monitoring entity shall maintain all records, including sample results, for the duration of the listing cycle. If a surface water or segment is added to the Planning List or to the 303(d) List, the Department shall coordinate with the monitoring entity to ensure that records are kept for the duration of the listing.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-603. General Data Interpretation Requirements

- A. The Department shall use the following data conventions to interpret data for impaired water identifications and TMDL decisions:
 1. Data reported below laboratory detection limits.
 - a. When the analytical result is reported as $<X$, where X is the laboratory detection limit for the analyte and the laboratory detection limit is less than or equal to the surface water quality standard, consider the result as meeting the water quality standard:
 - i. Use these statistically derived values in trend analysis, descriptive statistics or modeling if there is sufficient data to support the statistical estimation of values reported as less than the laboratory detection limit; or
 - ii. Use one-half of the value of the laboratory detection limit in trend analysis, descriptive statistics, or modeling, if there is insufficient data to support the statistical estimation of values reported as less than the laboratory detection limit.
 - b. When the sample value is less than or equal to the laboratory detection limit but the laboratory detection limit is greater than the surface water quality standard, shall not use the result for impaired water identifications or TMDL decisions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

2. Identify the field equipment specifications used for each listing cycle or TMDL developed. A field sample measurement within the manufacturer's specification for accuracy meets surface water quality standards;
 3. Resolve a data conflict by considering the factors identified under the weight-of-evidence determination in R18-11-605(B);
 4. When multiple samples from a surface water or segment are not spatially or temporally independent, or when lake samples are from multiple depths, use the following resultant value to represent the specific dataset:
 - a. The appropriate measure of central tendency for the dataset for:
 - i. A pollutant listed in the surface water quality standards 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - ii. A chronic water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2;
 - iii. A surface water quality standard for a pollutant that is expressed as an annual or geometric mean;
 - iv. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - v. The surface water quality standard for radioc chemicals in R18-11-109(G); or
 - vi. Except for chromium, all single sample maximum water quality standards in R18-11-112.
 - b. The maximum value of the dataset for:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and acute water quality standard in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1;
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A); or
 - iv. The 90th percentile water quality standard for nitrogen and phosphorus in R18-11-109(F) and R18-11-112.
 - c. The worst case measurement of the dataset for:
 - i. Surface water quality standard for dissolved oxygen under R18-11-109(E). For purposes of this subsection, worst case measurement means the minimum value for dissolved oxygen;
 - ii. Surface water quality standard for pH under R18-11-109(B). For purposes of this subsection, "worst case measurement" means both the minimum and maximum value for pH.
- B.** The Department shall not use the following data for placing a surface water or segment on the Planning List, the 303(d) List, or in making a TMDL decision.
1. Any measurement outside the range of possible physical or chemical measurements for the pollutant or measurement equipment,
 2. Uncorrected data transcription errors or laboratory errors, and
 3. An outlier identified through statistical procedures, where further evaluation determines that the outlier represents a valid measure of water quality but should be excluded from the dataset.
- C.** The Department may employ fundamental statistical tests if appropriate for the collected data and type of surface water when evaluating a surface water or segment for impairment or in making a TMDL decision. The statistical tests include descriptive statistics, frequency distribution, analysis of variance, correlation analysis, regression analysis, significance testing, and time series analysis.
- D.** The Department may employ modeling when evaluating a surface water or segment for impairment or in making a TMDL decision, if the method is appropriate for the type of waterbody and the quantity and quality of available data meet the requirements of R18-11-602. Modeling methods include:
1. Better Assessment Science Integrating Source and Non-point Sources (BASINS),
 2. Fundamental statistics, including regression analysis,
 3. Hydrologic Simulation Program-Fortran (HSPF),
 4. Spreadsheet modeling, and
 5. Hydrologic Engineering Center (HEC) programs developed by the Army Corps of Engineers.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-604. Types of Surface Waters Placed on the Planning List and 303(d) List

- A.** The Department shall evaluate, at least every five years, Arizona's surface waters by considering all readily available data.
1. The Department shall place a surface water or segment on:
 - a. The Planning List if it meets any of the criteria described in subsection (D), or
 - b. The 303(d) List if it meets the criteria for listing described in subsection (E).
 2. The Department shall remove a surface water or segment from the Planning List based on the requirements in R18-11-605(E)(1) or from the 303(d) List, based on the requirements in R18-11-605(E)(2).
 3. The Department may move surface waters or segments between the Planning List and the 303(d) List based on the criteria established in R18-11-604 and R18-11-605.
- B.** When placing a surface water or segment on the Planning List or the 303(d) List, the Department shall list the stream reach, derived from EPA's Reach File System or National Hydrography Dataset, or the entire lake, unless the data indicate that only a segment of the stream reach or lake is impaired or not attaining its designated use, in which case, the Department shall describe only that segment for listing.
- C.** Exceptions. The Department shall not place a surface water or segment on either the Planning List or the 303(d) List if the non-attainment of a surface water quality standard is due to one of the following:
1. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 2. The data were collected within a mixing zone or under a variance or nutrient waiver established in a NPDES or AZPDES permit for the specific parameter and the result does not exceed the alternate discharge limitation established in the permit. The Department may use data collected within these areas for modeling or allocating loads in a TMDL decision; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. An activity exempted under R18-11-117, R18-11-118, or a condition exempted under R18-11-119.
- D. Planning List.**
1. The Department shall:
 - a. Use the Planning List to prioritize surface waters for monitoring and evaluation as part of the Department's watershed management approach;
 - b. Provide the Planning List to EPA; and
 - c. Evaluate each surface water and segment on the Planning List for impairment based on the criteria in R18-11-605(D) to determine the source of the impairment.
 2. The Department shall place a surface water or segment on the Planning List based the criteria in R18-11-605(C). The Department may also include a surface water or segment on the Planning List when:
 - a. A TMDL is completed for the pollutant and approved by EPA;
 - b. The surface water or segment is on the 1998 303(d) List but the dataset used for the listing:
 - i. Does not meet the credible data requirements of R18-11-602, or
 - ii. Contains insufficient samples to meet the data requirements under R18-11-605(D);
 - c. Some monitoring data exist but there are insufficient data to determine whether the surface water or segment is impaired or not attaining, including:
 - i. A numeric surface water quality standard is exceeded, but there are not enough samples or sampling events to fulfill the requirements of R18-11-605(D);
 - ii. Evidence exists of a narrative standard violation, but the amount of evidence is insufficient, based on narrative implementation procedures and the requirements of R18-11-605(D)(3);
 - iii. Existing monitoring data do not meet credible data requirements in R18-11-602; or
 - iv. A numeric surface water quality standard is exceeded, but there are not enough sample results above the laboratory detection limit to support statistical analysis as established in R18-11-603(A)(1).
 - d. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act, but insufficient current or original monitoring data exist to determine whether the surface water or segment will meet current surface water quality standards;
 - e. Trend analysis using credible and scientifically defensible data indicate that surface water quality standards may be exceeded by the next assessment cycle;
 - f. The exceedance of surface water quality standards is due to pollution, but not a pollutant;
 - g. Existing data were analyzed using methods with laboratory detection limits above the numeric surface water quality standard but analytical methods with lower laboratory detection limits are available;
 - h. The surface water or segment is expected to attain its designated use by the next assessment as a result of existing or proposed technology-based effluent limitations or other pollution control requirements under local, state, or federal authority. The appropriate entity shall provide the Department with the following documentation to support placement on the Planning List:
 - i. Verification that discharge controls are required and enforceable;
 - ii. Controls are specific to the surface water or segment, and pollutant of concern;
 - iii. Controls are in place or scheduled for implementation; and
 - iv. There are assurances that the controls are sufficient to bring about attainment of water quality standards by the next 303(d) List submission; or
- E. 303(d) List.** The Department shall:
1. Place a surface water or segment on the 303(d) List if the Department determines:
 - a. Based on R18-11-605(D), that the surface water or segment is impaired due to a pollutant and that a TMDL decision is necessary; or
 - b. That the surface water or segment is threatened due to a pollutant and, at the time the Department submits a final 303(d) List to EPA, there are federal regulations implementing section 303(d) of the Clean Water Act that require threatened waters be included on the list.
 2. Provide public notice of the 303(d) List according to the requirements of A.R.S. § 49-232 and submit the 303(d) List according to section 303(d) of the Clean Water Act.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-605. Evaluating A Surface Water or Segment For Listing and Delisting

- A.** The Department shall compile and evaluate all reasonably current, credible, and scientifically defensible data to determine whether a surface water or segment is impaired or not attaining.
- B.** Weight-of-evidence approach.
1. The Department shall consider the following concepts when evaluating data:
 - a. Data or information collected during critical conditions may be considered separately from the complete dataset, when the data show that the surface water or segment is impaired or not attaining its designated use during those critical conditions, but attaining its uses during other periods. Critical conditions may include stream flow, seasonal periods, weather conditions, or anthropogenic activities;
 - b. Whether the data indicate that the impairment is due to persistent, seasonal, or recurring conditions. If the data do not represent persistent, recurring, or seasonal conditions, the Department may place the surface water or segment on the Planning List;
 - c. Higher quality data over lower quality data when making a listing decision. Data quality is established by the reliability, precision, accuracy, and represen-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tativeness of the data, based on factors identified in R18-11-602(A) and (B), including monitoring methods, analytical methods, quality control procedures, and the documented field and laboratory quality control information submitted with the data. The Department shall consider the following factors when determining higher quality data:

- i. The age of the measurements. Newer measurements are weighted heavier than older measurements, unless the older measurements are more representative of critical flow conditions;
 - ii. Whether the data provide a direct measure of an impact on a designated use. Direct measurements are weighted heavier than measurements of an indicator or surrogate parameter; or
 - iii. The amount or frequency of the measurements. More frequent data collection are weighted heavier than nominal datasets.
2. The Department shall evaluate the following factors to determine if the water quality evidence supports a finding that the surface water or segment is impaired or not attaining:
- a. An exceedance of a numeric surface water quality standard based on the criteria in subsections (C)(1), (C)(2), (D)(1), and (D)(2);
 - b. An exceedance of a narrative surface water quality standard based on the criteria in subsections (C)(3) and (D)(3);
 - c. Additional information that determines whether a water quality standard is exceeded due to a pollutant, suspected pollutant, or naturally occurring condition:
 - i. Soil type, geology, hydrology, flow regime, biological community, geomorphology, climate, natural process, and anthropogenic influence in the watershed;
 - ii. The characteristics of the pollutant, such as its solubility in water, bioaccumulation potential, sediment sorption potential, or degradation characteristics, to assist in determining which data more accurately indicate the pollutant's presence and potential for causing impairment; and
 - iii. Available evidence of direct or toxic impacts on aquatic life, wildlife, or human health, such as fish kills and beach closures, where there is sufficient evidence that these impacts occurred due to water quality conditions in the surface water.
 - d. Other available water quality information, such as NPDES or AZPDES water quality discharge data, as applicable.
 - e. If the Department determines that a surface water or segment does not merit listing under numeric water

quality standards based on criteria in subsections (C)(1), (C)(2), (D)(1), or (D)(2) for a pollutant, but there is evidence of a narrative standard exceedance in that surface water or segment under subsection (D)(3) as a result of the presence of the same pollutant, the Department shall list the surface water or segment as impaired only when the evidence indicates that the numeric water quality standard is insufficient to protect the designated use of the surface water or segment and the Department justifies the listing based on any of the following:

- i. The narrative standard data provide a more direct indication of impairment as supported by professionally prepared and peer-reviewed publications;
 - ii. Sufficient evidence of impairment exists due to synergistic effects of pollutant combinations or site-specific environmental factors; or
 - iii. The pollutant is bioaccumulative, relatively insoluble in water, or has other characteristics that indicate it is occurring in the specific surface water or segment at levels below the laboratory detection limits, but at levels sufficient to result in an impairment.
3. The Department may consider a single line of water quality evidence when the evidence is sufficient to demonstrate that the surface water or segment is impaired or not attaining.

C. Planning List.

- 1. When evaluating a surface water or segment for placement on the Planning List.
 - a. Consider at least ten spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the Planning List following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 1, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 80 percent confidence level using a binomial distribution for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 1, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 80 percent.

Table 1. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |
| 10 | 15 | 3 | 173 | 181 | 22 | 349 | 357 | 41 |

| 101 | 109 | 14 | 274 | 282 | 33 | 452 | 461 | 52 |
| 110 | 118 | 15 | 283 | 292 | 34 | 462 | 470 | 53 |
| 119 | 126 | 16 | 293 | 301 | 35 | 471 | 480 | 54 |
| 127 | 136 | 17 | 302 | 310 | 36 | 481 | 489 | 55 |
| 137 | 145 | 18 | 311 | 320 | 37 | 490 | 499 | 56 |
| 146 | 154 | 19 | 321 | 329 | 38 | 500 | | 57 |
| 155 | 163 | 20 | 330 | 338 | 39 | | | |
| 164 | 172 | 21 | 339 | 348 | 40 | | | |

2. When there are less than ten samples, the Department shall place a surface water or segment on the Planning List following subsection (B), if three or more temporally independent samples exceed the following surface water quality standards:
 - a. The surface water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - b. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - c. The surface water quality standard for radiochemicals in R18-11-109(G);
 - d. The surface water quality standard for dissolved oxygen under R18-11-109(E);
 - e. The surface water quality standard for pH under R18-11-109(B); or
 - f. The following surface water quality standards in R18-11-112:
 - i. Single sample maximum standards for nitrogen and phosphorus,
 - ii. All metals except chromium, or
 - iii. Turbidity.
3. The Department shall place a surface water or segment on the Planning List if information in subsections (B)(2)(c), (B)(2)(d), and (B)(2)(e) indicates that a narrative water

quality standard violation exists, but no narrative implementation procedure required under A.R.S. § 49-232(F) exists to support use of the information for listing.

- D. 303(d) List.
 1. When evaluating a surface water or segment for placement on the 303(d) List.
 - a. Consider at least 20 spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the 303(d) List, following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 2, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 90 percent confidence level using a binomial distribution, for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 2, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 90 percent.

Table 2. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |
| 20 | 25 | 5 | 174 | 182 | 24 | 344 | 352 | 43 |
| 26 | 32 | 6 | 183 | 191 | 25 | 353 | 361 | 44 |
| 33 | 40 | 7 | 192 | 199 | 26 | 362 | 370 | 45 |
| 41 | 47 | 8 | 200 | 208 | 27 | 371 | 379 | 46 |
| 48 | 55 | 9 | 209 | 217 | 28 | 380 | 388 | 47 |
| 56 | 63 | 10 | 218 | 226 | 29 | 389 | 397 | 48 |
| 64 | 71 | 11 | 227 | 235 | 30 | 398 | 406 | 49 |
| 72 | 79 | 12 | 236 | 244 | 31 | 407 | 415 | 50 |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | | | | | | | |
|-----|-----|----|-----|-----|----|-----|-----|----|
| 80 | 88 | 13 | 245 | 253 | 32 | 416 | 424 | 51 |
| 89 | 96 | 14 | 254 | 262 | 33 | 425 | 434 | 52 |
| 97 | 104 | 15 | 263 | 270 | 34 | 435 | 443 | 53 |
| 105 | 113 | 16 | 271 | 279 | 35 | 444 | 452 | 54 |
| 114 | 121 | 17 | 280 | 288 | 36 | 453 | 461 | 55 |
| 122 | 130 | 18 | 289 | 297 | 37 | 462 | 470 | 56 |
| 131 | 138 | 19 | 298 | 306 | 38 | 471 | 479 | 57 |
| 139 | 147 | 20 | 307 | 315 | 39 | 480 | 489 | 58 |
| 148 | 156 | 21 | 316 | 324 | 40 | 490 | 498 | 59 |
| 157 | 164 | 22 | 325 | 333 | 41 | 499 | 500 | 60 |
| 165 | 173 | 23 | 334 | 343 | 42 | | | |

2. The Department shall place a surface water or segment on the 303(d) List, following subsection (B) without the required number of samples or numeric water quality standard exceedances under subsection (D)(1), if either the following conditions occur:
 - a. More than one temporally independent sample in any consecutive three-year period exceeds the surface water quality standard in:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and the acute water quality standards in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1; or
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A).
 - b. More than one exceedance of an annual mean, 90th percentile, aquatic and wildlife chronic water quality standard, or a bacteria 30-day geometric mean water quality standard occurs, as specified in R18-11-109, R18-11-110, R18-11-112, or 18 A.A.C. 11, Article 1, Appendix A, Table 2.
 3. Narrative water quality standards exceedances. The Department shall place a surface water or segment on the Planning List if the listing requirements are met under A.R.S. § 49-232(F).
- E. Removing a surface water, segment, or pollutant from the Planning List or the 303(d) List.**
1. Planning List. The Department shall remove a surface water, segment, or pollutant from the Planning List when:
 - a. Monitoring activities indicate that:
 - i. There is sufficient credible data to determine that the surface water or segment is impaired under subsection (D), in which case the Department shall place the surface water or segment on the 303(d) List. This includes surface waters with an EPA approved TMDL when the Department determines that the TMDL strategy is insufficient for the surface water or segment to attain water quality standards; or
 - ii. There is sufficient credible data to determine that the surface water or segment is attaining all designated uses and standards.
 - b. All pollutants for the surface water or segment are delisted.
 2. 303(d) List. The Department shall:
 - a. Remove a pollutant from a surface water or segment from the 303(d) List based on one or more of the following criteria:
 - i. The Department developed, and EPA approved, a TMDL for the pollutant;
 - ii. The data used for previously listing the surface water or segment under R18-11-605(D) is superseded by more recent credible and scientifically defensible data meeting the requirements of R18-11-602, showing that the surface water or segment meets the applicable numeric or narrative surface water quality standard. When evaluating data to remove a pollutant from the 303(d) List, the monitoring entity shall collect the more recent data under similar hydrologic or climatic conditions as occurred when the samples were taken that indicated impairment, if those conditions still exist;
 - iii. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act;
 - iv. The surface water or segment no longer meets the criteria for impairment for the specific narrative water quality standard based on a change in narrative water quality standard implementation procedures;
 - v. A re-evaluation of the data indicate that the surface water or segment does not meet the criteria for impairment because of a deficiency in the original analysis; or
 - vi. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 - b. Remove a surface water, segment, or pollutant from the 303(d) List, based on criteria that are no more stringent than the listing criteria under subsection (D);
 - c. Remove a surface water or segment from the 303(d) List if all pollutants for the surface water or segment are removed from the list;
 - d. Remove a surface water, segment, or pollutant, from the 303(d) List and place it on the Planning List, if:
 - i. The surface water, segment or pollutant was on the 1998 303(d) List and the dataset used in the original listing does not meet the credible data requirements under R18-11-602, or contains insufficient samples to meet the data requirements under subsection (D); or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- ii. The monitoring data indicate that the impairment is due to pollution, but not a pollutant.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-606. TMDL Priority Criteria for 303(d) Listed Surface Waters or Segments

- A. In addition to the factors specified in A.R.S. § 49-233(C), the Department shall consider the following when prioritizing an impaired water for development of TMDLs:
 - 1. A change in a water quality standard;
 - 2. The date the surface water or segment was added to the 303(d) List;
 - 3. The presence in a surface water or segment of species listed as threatened or endangered under section 4 of the Endangered Species Act;
 - 4. The complexity of the TMDL;
 - 5. State, federal, and tribal policies and priorities; and
 - 6. The efficiencies of coordinating TMDL development with the Department's surface water monitoring program, the watershed monitoring rotation, or with remedial programs.
- B. The Department shall prioritize an impaired surface water or segment for TMDL development based on the factors specified in A.R.S. § 49-233(C) and subsection (A) as follows:
 - 1. Consider an impaired surface water or segment a high priority if:
 - a. The listed pollutant poses a substantial threat to the health and safety of humans, aquatic life, or wildlife based on:
 - i. The number and type of designated uses impaired;
 - ii. The type and extent of risk from the impairment to human health, aquatic life, or wildlife;
 - iii. The pollutant causing the impairment, or
 - iv. The severity, magnitude, and duration the surface water quality standard was exceeded;
 - b. A new or modified individual NPDES or AZPDES permit is sought for a new or modified discharge to the impaired water;
 - c. The listed surface water or segment is listed as a unique water in A.A.C. R18-11-112 or is part of an area classified as a "wilderness area," "wild and scenic river," or other federal or state special protection of the water resource;
 - d. The listed surface water or segment contains a species listed as threatened or endangered under the federal Endangered Species Act and the presence of the pollutant in the surface water or segment is likely to jeopardize the listed species;
 - e. A delay in conducting the TMDL could jeopardize the Department's ability to gather sufficient credible data necessary to develop the TMDL;
 - f. There is significant public interest and support for the development of a TMDL;
 - g. The surface water or segment has important recreational and economic significance to the public; or
 - h. The pollutant is listed for eight years or more.
 - 2. Consider an impaired surface water or segment a medium priority if:
 - a. The surface water or segment fails to meet more than one designated use;
 - b. The pollutant exceeds more than one surface water quality standard;
 - c. A surface water quality standard exceedance is correlated to seasonal conditions caused by natural events, such as storms, weather patterns, or lake turnover;
 - d. It will take more than two years for proposed actions in the watershed to result in the surface water attaining applicable water quality standards;
 - e. The type of pollutant and other factors relating to the surface water or segment make the TMDL complex; or
 - f. The administrative needs of the Department, including TMDL schedule commitments with EPA, permitting requirements, or basin priorities that require completion of the TMDL.
 - 3. Consider an impaired surface water or segment a low priority if:
 - a. The Department has formally submitted a proposal to delist the surface water, segment, or pollutant to EPA based on R18-11-605(E)(2). If the Department makes the submission outside the listing process cycle, the change in priority ranking will not be effective until EPA approves the submittal;
 - b. The Department has modified, or formally proposed for modification, the designated use or applicable surface water quality standard, resulting in an impaired water no longer being impaired, but the modification has not been approved by EPA;
 - c. The surface water or segment is expected to attain surface water quality standards due to any of the following:
 - i. Recently instituted treatment levels or best management practices in the drainage area,
 - ii. Discharges or activities related to the impairment have ceased, or
 - iii. Actions have been taken and controls are in place or scheduled for implementation that will likely to bring the surface water back into compliance;
 - d. The surface water or segment is ephemeral or intermittent. The Department shall re-prioritize the surface water or segment if the presence of the pollutant in the listed water poses a threat to the health and safety of humans, aquatic life, or wildlife using the water, or the pollutant is contributing to the impairment of a downstream perennial surface water or segment;
 - e. The pollutant poses a low ecological and human health risk;
 - f. Insufficient data exist to determine the source of the pollutant load;
 - g. The uncertainty of timely coordination with national and international entities concerning international waters;
 - h. Naturally occurring conditions are a major contributor to the impairment; and
 - i. No documentation or effective analytical tools exist to develop a TMDL for the surface water or segment with reasonable accuracy.
- C. The Department will target surface waters with high priority factors in subsections (B)(1)(a) through (B)(1)(d) for initiation of TMDLs within two years following EPA approval of the 303(d) List.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. The Department may shift priority ranking of a surface water or segment for any of the following reasons:
1. A change in federal, state, or tribal policies or priorities that affect resources to complete a TMDL;
 2. Resource efficiencies for coordinating TMDL development with other monitoring activities, including the Department's ambient monitoring program that monitors watersheds on a five-year rotational basis;
 3. Resource efficiencies for coordinating TMDL development with Department remedial or compliance programs;
 4. New information is obtained that will revise whether the surface water or segment is a high priority based on factors in subsection (B); and
 5. Reduction or increase in staff or budget involved in the TMDL development.
- E. The Department may complete a TMDL initiated before July 12, 2002 for a surface water or segment that was listed as impaired on the 1998 303(d) List but does not qualify for listing under the criteria in R18-11-605, if:
1. The TMDL investigation establishes that the water quality standard is not being met and the allocation of loads is expected to bring the surface water into compliance with standards,
 2. The Department estimates that more than 50 percent of the cost of completing the TMDL has been spent,
 3. There is community involvement and interest in completing the TMDL, or
 4. The TMDL is included within an EPA-approved state workplan initiated before July 12, 2002.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.
16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.
2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.
3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.
4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.
5. Contract with other agencies, including laboratories, in furthering any department program.
6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.
7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.
8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.
9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
 - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 - (c) Maintenance but not construction of drainage ditches.
 - (d) Construction and maintenance of irrigation ditches.
 - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.
7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.
12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.
13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.
2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

[49-221. Water quality standards in general; protected surface waters list](#)

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-WOTUS protected surface waters, the director shall apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to paragraph 2 of this subsection. Rules regarding the following shall not be adopted or applied as water quality standards for non-WOTUS protected surface waters:

- (a) Antidegradation.
- (b) Antidegradation criteria.
- (c) Outstanding Arizona waters.

2. Adopt, by rule, water quality standards for non-WOTUS protected surface waters, by December 31, 2022, consistent with paragraph 1 of this subsection and as determined necessary in the rulemaking process. In adopting those standards, the director shall consider the unique characteristics of this state's surface waters and the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

- 1. The protection of the public health and the environment.
- 2. The uses that have been made, are being made or with reasonable probability may be made of these waters.
- 3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
- 4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
- 5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
- 6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

- 1. The protection of public health and the environment.
- 2. The uses that are being made or may be made of the reclaimed water.
- 3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

- (i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.
- (ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected surface waters list. The department shall publish the initial list on the department's website and in the Arizona administrative register within thirty days after September 29, 2021. Not later than December 31, 2022, the department shall adopt by rule the protected surface waters list, including procedures for determining economic, social and environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action pursuant to title 41, chapter 6, article 10 and may be appealed by any party that provides evidence of an actual adverse effect that the party appealing the decision would suffer as a result of the director's decision. All of the following apply to the protected surface water list:

1. The protected surface waters list shall include:

(a) All WOTUS.

(b) Any perennial, intermittent and ephemeral reaches and any impoundments of the following rivers, not including tributaries or reaches of waters wholly within tribal jurisdiction or reaches of waters outside of the United States:

(i) The Bill Williams river, from the confluence of the Big Sandy and Santa Maria rivers at 113°31'38.617"w, 34°18'22.373"n, to its confluence with the Colorado river at 114°8'9.854"w, 34°18'9.33"n.

(ii) The Colorado river, from the Arizona-Utah border at 111°32'35.741"w, 36°58'51.698"n, to the Arizona-Mexico border at 114°43'12.564"w, 32°43'6.218"n.

(iii) The Gila river, from the Arizona-New Mexico border at 109°2'52.8"w, 32°41'11.2015"n, to the confluence with the Colorado river at 114°33'28.145"w, 32°43'14.408"n.

(iv) The Little Colorado river, from the confluence of the east and west forks of the Little Colorado river at 109°28'7.131"w, 33°59'39.852"n, to its confluence with the Colorado river at 111°49'4.693"w, 36°12'10.243"n.

(v) The Salt river, from the confluence of the Black and White rivers at 110°13'39.5"w, 33°44'6.082"n, to the confluence with the Gila river at 112°18'5.704"w, 33°22'42.978"n.

(vi) The San Pedro river, from the Arizona-Mexico border at 110°9'1.704"w, 31°20'2.387"n, to the confluence with the Gila river at 110°47'0.905"w, 32°59'5.671"n.

(vii) The Santa Cruz river, from its origins in the Canelo Hills of southeastern Arizona at 110°37'3.968"w, 31°27'39.21"n, to its confluence with the Gila river at 111°33'26.02"w, 32°41'39.058"n.

(viii) The Verde river, from Sullivan lake at 112°28'10.588"w, 34°52'11.136"n, to its confluence with the Salt river at 111°39'48.32"w, 33°33'20.538"n.

(c) Any non-WOTUS waters of the state that are added under paragraphs 3 and 4 of this subsection.

2. Notwithstanding paragraph 1 of this subsection, the protected surface waters list shall not contain any of the following non-WOTUS waters:

(a) Canals in the Yuma project and ditches, canals, pipes, impoundments and other facilities that are operated by districts organized under title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for human consumption, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner and operator of the ditch or canal until the owner and operator withdraws its request.

(b) Irrigated areas, including fields flooded for agricultural production.

(c) Ornamental and urban ponds and lakes such as those owned by homeowners' associations and golf courses, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the ornamental or urban pond or lake until the owner withdraws its request.

(d) Swimming pools and other bodies of water that are regulated pursuant to section 49-104, subsection B.

(e) Livestock and wildlife water tanks and aquaculture tanks that are not constructed within a protected surface water.

(f) Stormwater control features.

(g) Groundwater recharge, water reuse and wastewater recycling structures, including underground storage facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the groundwater recharge, water reuse or wastewater recycling structure until the owner withdraws its request.

(h) Water-filled depressions created as part of mining or construction activities or pits excavated to obtain fill, sand or gravel.

(i) All waste treatment systems components, including constructed wetlands, lagoons and treatment ponds, such as settling or cooling ponds, designed to either convey or retain, concentrate, settle, reduce or remove pollutants, either actively or passively, from wastewater before discharge or to eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those prescribed in paragraph 1, subdivision (b) of this subsection.

(l) Lakes and ponds owned and managed by the United States department of defense and other surface waters located on and that do not leave United States department of defense property, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the United States department of defense until it withdraws its request.

3. Unless listed in paragraph 2 of this subsection, the director shall add the following non-WOTUS surface waters to the protected surface waters list:

(a) All lakes, ponds and reservoirs that are public waters used as a drinking source, for recreational or commercial fish consumption or for water-based recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent tributaries to the Bill Williams river, the Colorado river, the Gila river, the Little Colorado river, the Salt river, the San Pedro river, the Santa Cruz river and the Verde river.

- (d) Perennial or intermittent public waters used for recreational or commercial fish consumption.
 - (e) Perennial or intermittent public waters used for water-based recreation such as swimming, wading, boating and other types of recreation in and on the water.
 - (f) Perennial or intermittent wetlands adjacent to waters on the protected surface waters list.
 - (g) Perennial or intermittent waters of the state that cross into another state, the Republic of Mexico or the reservation of a federally recognized tribe.
4. The director may add additional non-WOTUS surface waters to the protected surface waters list if all of the following apply:
- (a) The water is not required to be listed under paragraph 1 or 3 of this subsection.
 - (b) The water is not excluded under paragraph 2 of this subsection.
 - (c) The economic, environmental and social benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list.
5. The director shall remove any erroneously listed, non-WOTUS waters from the protected surface waters list when the water is excluded under paragraph 2 of this subsection and shall not regulate discharges to those waters in the interim.
6. The director shall remove non-WOTUS waters from the protected surface waters list when the water is not required to be listed under paragraph 3 of this subsection and the economic, environmental and social benefits of removing the water outweigh the economic, environmental and social costs of retaining the water on the list.
7. The director, on an emergency basis, may add a water to the protected surface waters list if the director discovers an imminent and substantial danger to public health or welfare or the environment, if the water would otherwise qualify to be added under paragraph 3 of this subsection. Notwithstanding any other law, the emergency addition shall take effect immediately on the director's determination that describes the imminent and substantial danger in writing. Within thirty days after the director's determination, the department shall publish a notice of that determination in the Arizona administrative register and on the department's website. Waters added under this subsection shall be incorporated into the protected surface waters list during the next rulemaking that follows the addition.

[49-223. Aquifer water quality standards](#)

- A. Primary drinking water maximum contaminant levels established by the administrator before August 13, 1986 are adopted as drinking water aquifer water quality standards. The director may only adopt additional aquifer water quality standards by rule. Within one year after the administrator establishes additional primary drinking water maximum contaminant levels, the director shall open a rule making docket pursuant to section 41-1021 for adoption of those maximum contaminant levels as drinking water aquifer water quality standards. If substantial opposition is demonstrated in the rule making docket regarding a particular constituent, the director may adopt for that constituent the maximum contaminant level as a drinking water aquifer water quality standard upon making a finding that this level is appropriate for adoption in Arizona as an aquifer water quality standard. In making this finding, the director shall consider whether the assumptions about technologies, costs, sampling and analytical methodologies and public health risk reduction used by the administrator in developing and implementing the maximum contaminant level are appropriate for establishing a drinking water aquifer water quality standard. For purposes of this subsection "substantial opposition" means information submitted to the director that explains with reasonable specificity why the maximum contaminant level is not appropriate as an aquifer water quality standard.
- B. The director may adopt by rule numeric drinking water aquifer water quality standards for pollutants for which the administrator has not established primary drinking water maximum contaminant levels or for which a maximum contaminant level has been established but the director has determined it to be inappropriate as an aquifer water quality standard pursuant to subsection A of this section. These standards shall be based on the protection of human health. In establishing numeric drinking water aquifer water quality standards, the director shall rely on technical protocols appropriate for the development of aquifer water quality standards and shall base the standards on credible medical and toxicological evidence that has been subjected to peer review.
- C. Any person may petition the director to adopt a numeric drinking water aquifer quality standard for any pollutant for which no drinking water aquifer quality standard exists. The director shall grant the petition and institute rule making proceedings adopting a numeric standard as provided under subsection B of this section within one hundred eighty days if the petition shows that the pollutant is a toxic pollutant, that the pollutant has been, or may in the future be, detected in any of the state's drinking water aquifers, and that there exists technical information on which a numeric standard might reasonably be based. Within one year of the commencement of the rule making proceeding, the director shall either adopt a numeric standard or make and publish a finding that, pursuant to subsection B of this section, the development of a numeric standard is not possible. The decision to not adopt a numeric standard shall, for purposes of judicial review, be treated in the same manner as a rule adopted pursuant to title 41, chapter 6.
- D. For purposes of assessing compliance with each aquifer water quality standard adopted pursuant to this section, the director shall for purposes of articles 3 and 4 of this chapter, and may for purposes of other provisions of this title, identify sampling and analytical protocols appropriate for detecting and measuring the pollutant in the aquifers in the state.
- E. Within one year from the reclassification of an aquifer to a non-drinking water status, pursuant to section 49-224, the director shall adopt water quality standards for that aquifer. For any pollutants which were not the basis for the reclassification, the applicable standard shall be identical with the standard for those pollutants adopted pursuant to subsections A and B of this section. For any pollutants which were the basis for reclassification, the standard shall be sufficient to achieve the purpose for which the aquifer was reclassified but shall minimize unnecessary degradation of the aquifer by taking into consideration the potential long-term uses of the aquifer and the short-term and long-term benefits of the activities resulting in discharges into the aquifer.
- F. The director shall adopt water quality standards for an aquifer for which a petition has been submitted pursuant to section 49-224, subsection D sufficient to achieve the non-drinking water use for which that aquifer was classified, taking into consideration the potential long-term uses of that aquifer and the short-term and long-term benefits of the discharging activities creating that aquifer.
- G. In any action pursuant to this title, aquifer water quality protection provisions, including monitoring requirements, may be imposed only for pollutants for which aquifer water quality standards have been established that are likely to be present in a discharge. Indicator parameters and quality assurance parameters appropriate for such pollutants also may be specified.

49-224. Aquifer identification, classification and reclassification

A. Not later than June 30, 1987 the director shall, by rule, identify and define the boundaries of all aquifers in this state utilizing, to the maximum extent possible, data available from the department of water resources.

B. All aquifers in this state identified and defined under subsection A of this section and any other aquifers subsequently discovered, identified and defined shall be classified for drinking water protected use unless the classification is changed in the manner provided in subsection C of this section.

C. The director, after consulting with the appropriate groundwater users advisory council established pursuant to title 45, chapter 2, article 2 if the aquifer is in an active management area, and a public hearing held pursuant to section 49-208, may change the classification of an aquifer or part of an aquifer for a protected use other than drinking water on making all of the following findings:

1. The identified aquifer or part of an aquifer is or will be so hydrologically isolated from other aquifers or other parts of the same aquifer that there is no reasonable probability that poorer quality water from the identified aquifer or part of an aquifer will cause or contribute to a violation of aquifer water quality standards in other aquifers or parts of the same aquifer.

2. Water from the identified aquifer or part of an aquifer is not being used as drinking water.

3. The short-term and long-term benefits to the public that would result from the degradation of the quality of the water in the identified aquifer or part of an aquifer below standards established pursuant to section 49-223, subsections A and B would significantly outweigh the short-term and long-term costs to the public of such degradation. Benefits and costs to be considered include economic, social and environmental.

D. Owners or operators of facilities whose discharges are solely responsible for creating an aquifer may petition the director for a classification of the aquifer for a non-drinking water use. The director may, by rule, classify that aquifer for a non-drinking water use upon making the findings prescribed in subsection C, paragraphs 1 and 2 of this section.

E. The director shall provide for public participation in proceedings under this section pursuant to section 49-208 and shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification.

D-16.

DEPARTMENT OF ENVIRONMENTAL QUALITY

Title 18, Chapter 11 (Total Trihalomethanes, Bromate, Chlorite, and Haloacetic Acids)

Amend: R18-11-406

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 22, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 11

Amend: R18-11-406

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend one (1) rule in Title 18, Chapter 11, regarding Aquifer Water Quality Standards.

The Department is proposing to make amendments and additions to Chapter 11 as part of a four part rulemaking package. The Department is required by A.R.S. § 49-223(A) to adopt Aquifer Water Quality Standards (AWQS) with these standards being based on maximum contaminant levels (MCLs). These MCLs are prescribed by the Environmental Protection Agency (EPA) and the Department is required to adopt the same MCLs unless there is a showing of substantial opposition, which allows the Department to prescribe different standards if the Department or stakeholder can show that the EPA levels are not appropriate for Arizona. The Department has indicated to Department staff that this substantial opposition language is unique to Arizona and the Department believes Arizona to be the only state to have this type of language.

For this part of the rulemaking package, the Department is proposing to adopt the MCL level prescribed by the EPA for Total Trihalomethanes, Bromate, Chlorite and Haloacetic Acids.

The rule does not currently state what is an acceptable amount of Bromate, Chlorite and Haloacetic Acids and the Department is proposing to add those three contaminants to the rule, with the allowable amounts being based on EPA standards. Additionally, the Department is proposing to align the EPA standard for Total Trihalomethanes from the current amount of .1 mg/L to the EPA standard of .080 mg/L. The Department has indicated that there has not been any substantial opposition, as defined in A.R.S. § 49-223, to the proposed amendment.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

- MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support: The Department indicates that this report was used to review EPA assumptions regarding the MCL for the four Disinfectant Byproducts (DBPs) at 71 Federal Register 388 and 63 Federal Register 69390 and included looking at technologies, costs, sampling, and analytical methodologies for public health risks reduction.
- Draft Economic Impact Statement for Arsenic Proposed AWQS: The Department indicates that this report informed DEQ on the economic impact of the subject matter of the rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Department states that this rulemaking is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Bromate, Chloride, Haloacetic Acids, and Total Trihalomethanes (hereinafter: "disinfection byproducts") as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. The Department indicates that the AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (see A.R.S. § 49-224(B)). The Department states the AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the voluntary Remediation Program (VRP), and elsewhere.

The Department states that the full scope of stakeholders who may incur direct impacts

from this rulemaking include individual APP Permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. The Department indicates that while not all costs and benefits are borne evenly, these are the identified groups generally impacted from this Disinfection Byproducts AWQS rulemaking. The Department states that the costs to permittees to meet the adjusted AWQS are significant and indeterminant at this time. The Department states that permittees must determine appropriate treatment technology for the specific conditions applicable to them, then upgrade or install technology and train personnel as needed to operate. Benefits to stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual users alike.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states that the controlling statute A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. The Department indicates that it simply requires ADEQ to open a rulemaking docket pursuant to A.R.S. § 41-1021 for adoption of new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

6. What are the economic impacts on stakeholders?

The Department says individual APP Permittees will be the primary bearers of costs associated with this rulemaking. The Department states that other costs to stakeholders could occur, such as rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment. The Department believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. The Department anticipates that hundreds of permits may need to be amended to update monitoring tables that include disinfection byproducts as a parameter.

The Department indicates that any additional costs would generally be covered by increased fees paid by permittees. The Department believes, generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resources as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224.

The Department states that savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstances} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike. In addition, the Department states that following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. Additionally, the Department states that investments in

treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenue.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department indicates that there were no changes between the proposed rulemaking and final rulemaking now before the Council.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Department indicates it received 1 public comment as it relates to this rulemaking. The Department indicates that they conducted

Comment 1 was from a utility organization and stated the following:

- If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

The Department responded with the following:

- ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the four (4) disinfection byproducts MCLs as AWQSs..

Council staff believes that the department adequately addressed the comments in accordance with A.R.S. § 41-1052(D)(7).

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

This rulemaking does not require a permit or a license.

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates that the rules are not more stringent than federal law.

11. Conclusion

This regular rulemaking by the Department seeks to amend one rule regarding aquifer purification standards. The Department specifically seeks to amend the rule to add the EPA standards for the amount of allowable Bromate, Chlorite and Haloacetic Acids in drinking water. Additionally, the Department is proposing to amend the rule to reflect the new EPA standards for the amount of allowable Total Trihalomethanes. The Department indicated that there was no substantial opposition for any of the EPA standards.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

March 13, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Aquifer Water Quality Standards Update Regular Rulemaking: Title 18,
Environmental Quality, Chapters 9 and 11

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for May 6th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. §§ 41-1039, 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

- (A)(1)(a) The public record closed for all rules on December 16th, 2024 at 11:59 p.m.
- (A)(1)(b) The rulemaking activity does relate to a five-year review report. The report on 18 AAC 11, Articles 4 and 5 was approved on November 3rd, 2020.
- (A)(1)(c) The rulemaking activity does not establish a new fee.
- (A)(1)(d) The rulemaking does not contain a fee increase.
- (A)(1)(e) An immediate effective date is not requested.
- (A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- (A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3) (a) (see subheading IV, below).
- (A)(1)(h) A list of documents is enclosed (see subheading IV, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

- (A)(2) Five (5) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (*see* subheading IV, below);
- (A)(3) The preambles contain economic, small business, and consumer impact statements that contain the information required by A.R.S. § 41-1055 (*see* subheading IV, below);
- (A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (*see* subheading IV, below);
- (A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
- (A)(6) No materials were incorporated by reference in this rulemaking;
- (A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (*see* subheading IV, below);
- (A)(8) All statutes referred to in the definitions are represented in the general and specific statutes authorizing the rule.

III. Governor's office approvals pursuant to A.R.S. § 41-1039:

- (A) ADEQ received prior written approval from the Governor's Office twice. Once for Title 18, Chapter 11, Article 4 on August 24, 2022 and then again for Title 18, Chapter 9, Articles 1 and 2 on February 5th, 2024 (*see* subheading IV, below);
- (B) ADEQ received written final approval from the Governor's Office for this rulemaking on March 11th, 2025 (*see* subheading IV, below).

IV. List of documents enclosed (25 documents total):

- One (1) Cover Letter (R1-6-201(A)(1));
 - AWQS_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));
 - AWQS_JLBC.pdf
- Five (5) NFRMs (R1-6-201(A)(2));
 - AWQS_NFRM_18_AAC_9_Impl.pdf
 - AWQS_NFRM_18_AAC_11_As.pdf
 - AWQS_NFRM_18_AAC_11_U.pdf
 - AWQS_NFRM_18_AAC_11_DBP.pdf
 - AWQS_NFRM_18_AAC_11_MBC.pdf
- Five (5) EISs (R1-6-201(A)(3));
 - AWQS_EIS_18_AAC_9_Impl.pdf
 - AWQS_EIS_18_AAC_11_As.pdf
 - AWQS_EIS_18_AAC_11_U.pdf
 - AWQS_EIS_18_AAC_11_DBP.pdf
 - AWQS_EIS_18_AAC_11_MBC.pdf
- Five (5) Public Comments Received Documents (R1-6-201(A)(4));

- AWQS_Cmts_18_AAC_9_Impl.pdf
- AWQS_Cmts_18_AAC_11_As.pdf
- AWQS_Cmts_18_AAC_11_U.pdf
- AWQS_Cmts_18_AAC_11_DBP.pdf
- AWQS_Cmts_18_AAC_11_MBC.pdf
- Five (5) General and Specific Authorizing Statutes (R1-6-201(A)(7));
 - 49-104 - Powers and duties of the department and director.pdf
 - 49-203 - Powers and duties of the director and department.pdf
 - 49-221 - Water quality standards in general; protected surface waters list.pdf
 - 49-223 - Aquifer water quality standards.pdf
 - 49-224 - Aquifer identification, classification and reclassification.pdf
- Three (3) A.R.S. § 41-1039 Governor's Approvals
 - 8_24_22_Gov_Approval.pdf
 - 2_5_24_Gov_Approval.pdf
 - 25_3_11_Gov_Approval.pdf

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov if you have any questions.

Sincerely,

Karen Peters, Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING
TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER QUALITY STANDARDS

PREAMBLE

1. Permission to proceed with this proposed rulemaking was granted under A.R.S. § 41-1039 by the governor on:

August 24, 2022, &
February 5, 2024

2. Article, Part, or Section Affected (as applicable) Rulemaking Action

R18-11-406

Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-221, and 49-223.

Implementing statute: A.R.S. §§ 49-221, and 49-223.

4. The effective date of the rule:

July 7, 2025

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3416, Issue Date: November 15, 2024, Issue Number: 46, File Number: R24-231.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2136, Issue Date: June 28, 2024, Issue Number: 26, File Number: R24-114.

6. The agency's contact person who can answer questions about the rulemaking:

Name: Jon Rezabek
Title: Legal Specialist
Division: Water Quality
Address: Arizona Department of Environmental Quality
1110 W. Washington Ave.
Phoenix, AZ 85007
Telephone: (602) 771-8219
Fax: (602) 771-2366
Email: awqs@azdeq.gov
Website: <https://www.azdeq.gov/awp-rulemaking>

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Introduction:

General Explanation of the Collective Rulemaking: The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. § 49-223(A) to open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency's (EPA's) establishment of new or adjusted MCLs. AWQSs for Arsenic, Bromate, Chlorite, Haloacetic Acids, Microbiological Contaminants, Total Trihalomethanes and Uranium with corresponding MCLs are either unestablished as AWQSs or are established but currently have a misaligned value as the standard. MCLs for the seven (7) pollutants can be viewed at 40 *Code of Federal Regulations* (C.F.R.) 141.60 *et seq.* A.R.S. § 49-223(A) requires ADEQ to move forward with the adoption of MCLs as AWQSs through the rulemaking process unless substantial opposition to the adoption is received from stakeholders. Upon receipt of substantial opposition, ADEQ may adopt for that pollutant the verbatim MCL as an AWQS, but only upon a finding that the MCL is appropriate for adoption in Arizona as an AWQS. In making this finding, ADEQ must consider whether the assumptions used by the EPA in developing and implementing the MCLs are appropriate for establishing an Arizona state AWQSs. The listed assumptions for consideration are technology, cost, sampling and analytical methodologies and public health risk reduction. If ADEQ determines the MCL is inappropriate as an AWQS, the Department may establish an alternative AWQS for the pollutant with an MCL. The alternative AWQS must be:

- (1) Based on the protection of human health and shall rely on technical protocols appropriate for the development of AWQSs,
and

(2) Based on credible medical and toxicological evidence that has been subjected to peer review.

Subject Matter of this NFRM: This *Notice of Final Rulemaking* (NFRM) proposes to align the AWQS for Total Trihalomethanes with the MCL for Total Trihalomethanes. Additionally, this NFRM proposes to establish AWQSs for Bromate, Chlorite and Haloacetic Acids that align with the MCLs for Bromate, Chlorite and Haloacetic Acids. The original MCLs for Total Trihalomethanes Bromate, Chlorite and Haloacetic Acids were established through Final Rules by the Environmental Protection Agency (EPA), published in the *Federal Register* at 71 *Federal Register* 388, 63 *Federal Register* 69390, 63 *Federal Register* 69390 and 71 388, respectively.

What are the MCLs for Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes that are proposed to be the new AWQSs and what are the current AWQSs for Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes?

| Pollutant | Current MCL / New or Adjusted AWQS | Previous AWQS |
|------------------------------|---|----------------------|
| Bromate | 0.010 mg/L | None |
| Chlorite | 1.0 mg/L | None |
| Haloacetic Acids | 0.060 mg/L | None |
| Total Trihalomethanes | 0.080 mg/L | 0.1 mg/L |

Substantial Opposition: ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the MCLs for Bromate, Chlorite, Haloacetic Acids, nor Total Trihalomethanes as AWQSs.

Associated Rulemakings ADEQ proposes a total of five (5) NFRMs in the collective AWQS Update rulemaking. Three (3) of the five (5) NFRMs, including this NFRM, propose to establish or align the AWQSs with the MCLs in *Arizona Administrative Code*, (A.A.C.) Title 18, Chapter 11, Article 4 for pollutants Arsenic, Bromate, Chlorite, Haloacetic Acids, Total Trihalomethanes and Uranium. This NFRM’s scope is limited to four (4) disinfection byproducts: Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes. A second NFRM’s scope includes Arsenic. A third NFRM’s scope includes Uranium. A fourth NFRM’s scope includes microbiological contaminants. A fifth and final NFRM includes in its scope a proposed new section and some amendments to A.A.C., Title 18, Chapter 9, Articles 1 and 2. With the fifth NFRM, ADEQ proposes a rule detailing implementation of new or adjusted AWQSs into existing Individual Aquifer Protection Program permits (APPs), along with adjacent amendments to existing rule to make way for this purpose.

What are Aquifer Water Quality Standards and what is their purpose? Aquifer Water Quality Standards or “AWQSs” are

protective groundwater standards that were put in place and designated by the Arizona Legislature to preserve Arizona’s aquifer quality for drinking water-protected use (See A.R.S. § 49-224(B)).

How are Aquifer Water Quality Standards Used? The AWQs are used in ADEQ’s Aquifer Protection Program (APP), and, to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

Sampling and Analytical Methodologies. In the Baseline Monitoring Requirement subsection of the final rule at R18-9-A215(E)(4), the following is provided,

“[s]ampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.”

At the time this NFRM was compiled, wastewater methods for some of the pollutants with new or adjusted AWQs were not ADHS-Approved (see A.A.C. Title 9, Chapter 14, Article 6, Tables 6.2.A and 6.2.B). In March 2025, ADEQ formally requested that the following sampling methods be reviewed and considered for addition to ADHS’s “Director Approved” list of sampling methods pursuant to A.A.C. R9-14-610, found published outside of the rule on ADHS’s website, here: <https://www.azdhs.gov/documents/preparedness/state-laboratory/lab-licensure-certification/environmental-laboratory/application/application-part-e.pdf>

Table 1. Analytical Methods for Baseline Monitoring

| Analyte | Analytical Method |
|-----------------------|--|
| Arsenic | EPA 200.8, SM 3113B, SM 3114B |
| Bromate | EPA 300.1, EPA 317.0 Rev 2.0, EPA 321.8, EPA 326.0 |
| Chlorite | EPA 300.0, EPA 300.1, EPA 317.0 Rev 2.0, EPA 326.0 |
| Haloacetic Acids | EPA 552.1, EPA 552.2, EPA 552.3, SM 6251B |
| Fecal coliform | SM 9223B |
| <i>E. coli</i> | SM 9223B |
| Total Trihalomethanes | EPA 502.2, EPA 524.2, EPA 551.1, SM 6251B |
| Uranium (Total) | EPA 200.8 |

* “EPA” - Environmental Protection Agency; “SM” - Standard Methods

Who are the stakeholders to this rulemaking? The stakeholders for this rulemaking are predominantly the permittees of the APP, and to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP). Other stakeholders include private well owners, community water systems and the constituents they serve, as well as all Arizonans who benefit from the state’s aquifers being protected for drinking water use.

What has been the stakeholder process thus far for this rulemaking? ADEQ has conducted a number of general and specific

stakeholder meetings, as well as tribal listening sessions, concerning this rulemaking. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support:

Summary: This report provides a review of the EPA assumptions used to change or establish the MCLs for the four Disinfectant Byproducts (DBPs) at 71 *Federal Register* 388 and 63 *Federal Register* 69390. The assumptions reviewed are listed in A.R.S. § 49-223(A) and include technologies, costs, sampling and analytical methodologies and public health risk reduction.

Study Resource: Provided review of the EPA assumptions used to establish the MCLs for the four DBPs at 71 *Federal Register* 388 and 63 *Federal Register* 69390 in order to inform ADEQ further on the subject matter and its applicability in the AWQS setting.

Public Review: The public may review this study or may obtain copies from the Department by request. Requests can be submitted to the Department by email at awqs@azdeq.gov or by mail to Arizona Department of Environmental Quality, 1110 W. Washington Ave. Phoenix, AZ 85007.

Reference: LaPat-Polasko, L., Hoagland-Stamatovski, B., and Brenton, H. (2023). MCL Assumptions Report – Disinfectant Byproducts Aquifer Water Quality Standards Technical Support. Matrix New World Engineering, Land Surveying and Landscape Architecture, PC.

Draft Economic Impact Statement for Arsenic Proposed AWQS:

Summary: This report provides the Department a draft economic impact statement on the proposed Arsenic AWQS modeled after the requirements of A.R.S. § 41-1055.

Study Resource: This report informs ADEQ on the economic impact of the subject matter of the rulemaking.

Public Review: The public may review this study or may obtain copies from the Department by request. Requests can be submitted to the Department by email at awqs@azdeq.gov or by mail to Arizona Department of Environmental Quality, 1110 W. Washington Ave. Phoenix, AZ 85007.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. The summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) and (C) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt four (4) new or adjusted Safe Drinking Water Act Maximum Contaminant Levels (MCL) for Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes (hereinafter: "disinfection byproducts") as Aquifer Water Quality Standards (AWQSs) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the four (4) new or adjusted disinfection byproducts MCLs as an AWQSs. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Disinfection Byproducts AWQS rulemaking.

Costs to permittees to meet the new or adjusted AWQSs for the Disinfection Byproducts are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or

install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSSs, as part of the “fee-for-service” model requirements ADEQ must operate under (see A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Disinfection Byproducts AWQSSs, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the new or adjusted AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables for the Disinfection Byproducts parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including a reduction in risk of getting cancer due to consumption, as well as a similar reduction to a variety of disorders. Loss of income and additional financial hardships associated with the aforementioned diseases are also an expected benefit.

Arizona’s many community water systems (CWSs) and their clientele could see savings due to a reduction in Disinfection Byproducts in the groundwater under the proposed new or adjusted AWQSSs. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just under \$116,500 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ’s dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: “permittees”) will be the primary bearers of costs associated with this rulemaking.

Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultants have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced disinfection byproducts in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|---|---|
| <i>Costs</i> | | |
| Cost estimates vary | Matrix Report Charts 8 and 9 | |
| <i>Benefits</i> | | |
| Bladder cancer incidence, costs, and similar factors related to DBPs | Table IV–8 and related text in 63 FR 69439 | |
| Adjustments to EPA estimates based on updated information | Matrix Report p. 29 | |
| <i>Bladder cancer data for Arizona</i> | National Cancer Institute seer.cancer.gov/statfacts/html/urinb.html | |
| <i>General</i> | | |
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and its consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/cpicalc.pl | |

Approach to the EIS for Disinfection Byproducts. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Disinfection Byproducts Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (*see* Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA) and data from the National Cancer Institute.

ADEQ and its consultant applied modeling factors as noted in the preceding table, using a combination of the Matrix Report for DBPs and their source material (primarily the Environmental Protection Agency (EPA)),

Cost ranges generated by the Matrix Report and used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP)

program. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| | |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|-----------------------------------|---|----------------------------------|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees: Mines | DBPs are least likely to be found in mine-related water being treated, compared to other permittee types. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSS, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | Significant | |
| Permittees: Industrial Facilities | DBPs would not be particularly likely to be found in industrial-related water being treated, compared to other permittee types, unless the industrial process has a tendency to produce DBP. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSS, as | Significant | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|---|--|
| | part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | | |
| Permittees: Wastewater Treatment Plants | This category of permittee type is most likely to be dealing with DBPs, because of the urban-use connection. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | Significant | |
| Clientele for Other Programs (UST, VRP, etc.) | Coming into compliance with new standards. | Minimal | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below. | Minimal, and spread broadly through the customer base, on a monthly basis | Savings on fees could accrue due to reduced DBP in the groundwater under the proposed AWQS |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update or install for the first time in the monitoring tables, disinfection byproducts as parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduction in bladder cancer cases, fatal and non-fatal, estimated for the affected population | | Significant |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced disinfection byproducts in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. As many as 2.04 million Arizonans could be potentially affected in this way | | Significant |
| State costs | Some state-supported medical costs would decrease | | Significant |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--------------------------------|--|----------------------------------|-------------------------------------|
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range) | | Significant |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

The group of permittees that undertake treatment to reduce DBP must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. Costs can vary based on multiple treatment technologies with varying applicability according to specific water and locational conditions. Also, permittees must balance trade-offs between minimizing initial costs, which could favor chlorination, and avoiding adding to the DBP problem by using alternatives to chlorination, which might be more expensive initially but produce savings over a longer term. If chlorination treatment is optimized and the underlying water does not contribute too many complications, DBP would be minimized, thus reducing the need for treatment. In general, DBP are more likely to be generated within municipal water treatment systems, and also in treated wastewater. DBP also can form in groundwater under certain conditions.

Mines

Because mines are not necessarily associated, locationally or otherwise, with water treated for household consumption, DBP are likely to be minimal compared with discharge systems that have an urban connection. The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive.

Industrial Facilities

This category of permittee is generally processing wastewater generated from an industrial process (separate from mining, which is treated as a separate category in this report). Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity. For some industrial processes, water use will involve treatments

similar to those for households, therefore DBP contamination would be expected; but other industrial processes will have minimal or no involvement with disinfectant treatments, and consequently DBP will be minimized.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources, and so will typically be dealing with DBP. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also Section F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost. Effects on small businesses related to DBP specifically are assumed to parallel those for discussed above related to the permittee categories of mining activity, industrial facilities, and wastewater treatment plants.

ADEQ

DEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQs, except where ambient water levels that exceed proposed AWQs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele.

For segment 2, according to the Matrix MCL Report for DBP, the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This group is assumed to receive some benefit from DBP treatment-level changes according to the proposed AWQs. The affected group would benefit from diseases forgone with the more stringent standards.

EPA made use of bladder cancer as the ailment to represent a DBP-related disease that could lead to loss of life and an extended illness, with the benefits representing the forgone effects of that representative ailment. Avoided health-related costs in the form of non-quantified benefits include potential benefits from reduced reproductive and developmental risks, reduced risks of cancers other than bladder cancer (e.g. colon and rectal cancer), spleen disorders, kidney disorders, mutagenicity, reproductive effects, immunotoxicity, liver disorders, and neurotoxicity (Matrix 2023, p. 30), along with improved water quality. If implementing the rule changes perceptions of the health risks associated with drinking water and improves taste and odor, it may reduce actions such as buying bottled water or installing filtration devices (EPA, 71 FR 451).

Community water systems (CWSs) and their clientele

This affected group (segment 1 as noted above) includes a portion of customers of municipal or water utility water systems.

Estimates of this segment of the population, served by water sources that included groundwater, were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater, along with populations served by various categories of providers. An estimated 2.04 million Arizonans could be affected in this way. The Matrix Report notes potential savings for

CWSs due to reduced DBP in the groundwater under the proposed AWQS, and that such savings could be substantial “considering the costs to treat DBP in water is much higher than the cost to prevent DBP from occurring” (MCL p. 43). These savings would presumably be passed on to customers. ADEQ and its consultant have not attempted to estimate dollar amounts associated with this effect.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems). In the summary of the model as tabulated below for the disinfection byproducts contaminants, direct employment and earnings resulting from permittees’ investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|---|---------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$15,259,767 |
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 27.47 |
| New Annual Earnings for Direct Jobs Created | \$2,564,781 |
| Total New Jobs (Direct + Secondary) | 84.24 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |

| | |
|--|-----------|
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$116,485 |
|--|-----------|

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases.

Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee’s particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in

A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|--|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (see A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced DBP in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted in that section, estimated state taxes for direct and secondary employment generated by investments in DBP technology (using the low end of costs where ranges are given) are approximately \$116,500.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why

the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Disinfection Byproducts Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing specific contaminants referenced extensively in the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Not applicable.

12. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 1:

ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the four (4) disinfection byproducts MCLs as AWQSs.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rulemaking does not create a requirement for a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is not applicable to the subject matter of the rule.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

Not applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 11 - Disinfection Byproducts

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) and (C) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt four (4) new or adjusted Safe Drinking Water Act Maximum Contaminant Levels (MCL) for Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes (hereinafter: "disinfection byproducts") as Aquifer Water Quality Standards (AWQSs) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the four (4) new or adjusted disinfection byproducts MCLs as an AWQSs. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Disinfection Byproducts AWQS rulemaking.

Costs to permittees to meet the new or adjusted AWQSs for the Disinfection Byproducts are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the "fee-for-service" model requirements ADEQ must operate under (*see* A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Disinfection Byproducts AWQSs, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the new or adjusted AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables for the Disinfection Byproducts parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including a reduction in risk of getting cancer due to consumption, as well as a similar reduction to a variety of disorders. Loss of income and additional financial hardships associated with the aforementioned diseases are also an expected benefit.

Arizona's many community water systems (CWSs) and their clientele could see savings due to a reduction in Disinfection Byproducts in the groundwater under the proposed new or adjusted AWQSs. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just under \$116,500 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on

ADEQ's dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: "permittees") will be the primary bearers of costs associated with this rulemaking. Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees' fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultants have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced disinfection byproducts in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees' existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a "no further degradation" standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|---|---|
| Costs | | |
| Cost estimates vary | Matrix Report Charts 8 and 9 | |
| Benefits | | |
| Bladder cancer incidence, costs, and similar factors related to DBPs | Table IV-8 and related text in 63 FR 69439 | |
| Adjustments to EPA estimates based on updated information | Matrix Report p. 29 | |
| <i>Bladder cancer data for Arizona</i> | National Cancer Institute seer.cancer.gov/statfacts/html/urinb.html | |
| General | | |
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and its consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/cpicalc.pl | |

Approach to the EIS for Disinfection Byproducts. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Disinfection Byproducts Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (see Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA) and data from the National Cancer Institute.

ADEQ and its consultant applied modeling factors as noted in the preceding table, using a combination of the Matrix Report for DBPs and their source material (primarily the Environmental Protection Agency (EPA)), Cost ranges generated by the Matrix Report and used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP) program. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| | |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|-----------------------------------|---|----------------------------------|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees: Mines | DBPs are least likely to be found in mine-related water being treated, compared to other permittee types. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSS, as part of the “fee-for-service” model requirements ADEQ must operate under (see A.R.S. § 49-104(B)(17)). | Significant | |
| Permittees: Industrial Facilities | DBPs would not be particularly likely to be found in industrial-related water being treated, compared to other permittee types, unless the industrial process has a tendency to produce DBP. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSS, as | Significant | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|---|--|
| | part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | | |
| Permittees: Wastewater Treatment Plants | This category of permittee type is most likely to be dealing with DBPs, because of the urban-use connection. However, permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | Significant | |
| Clientele for Other Programs (UST, VRP, etc.) | Coming into compliance with new standards. | Minimal | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below. | Minimal, and spread broadly through the customer base, on a monthly basis | Savings on fees could accrue due to reduced DBP in the groundwater under the proposed AWQS |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update or install for the first time in the monitoring tables, disinfection byproducts as parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduction in bladder cancer cases, fatal and non-fatal, estimated for the affected population | | Significant |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced disinfection byproducts in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. As many as 2.04 million Arizonans could be potentially affected in this way | | Significant |
| State costs | Some state-supported medical costs would decrease | | Significant |
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional | | Significant |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--------------------------------|---|----------------------------------|-------------------------------------|
| | employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range) | | |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

The group of permittees that undertake treatment to reduce DBP must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. Costs can vary based on multiple treatment technologies with varying applicability according to specific water and locational conditions. Also, permittees must balance trade-offs between minimizing initial costs, which could favor chlorination, and avoiding adding to the DBP problem by using alternatives to chlorination, which might be more expensive initially but produce savings over a longer term. If chlorination treatment is optimized and the underlying water does not contribute too many complications, DBP would be minimized, thus reducing the need for treatment. In general, DBP are more likely to be generated within municipal water treatment systems, and also in treated wastewater. DBP also can form in groundwater under certain conditions.

Mines

Because mines are not necessarily associated, locationally or otherwise, with water treated for household consumption, DBP are likely to be minimal compared with discharge systems that have an urban connection. The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive.

Industrial Facilities

This category of permittee is generally processing wastewater generated from an industrial process (separate from mining, which is treated as a separate category in this report). Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity. For some industrial processes, water use will involve treatments similar to those for households, therefore DBP contamination would be expected; but other industrial processes will have minimal or no involvement with disinfectant treatments, and consequently DBP will be minimized.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources, and so will typically be dealing with DBP. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also Section F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost. Effects on small businesses related to DBP specifically are assumed to parallel those for discussed above related to the permittee categories of mining activity, industrial facilities, and wastewater treatment plants.

ADEQ

DEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQs, except where ambient water levels that exceed proposed AWQs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele. For segment 2, according to the Matrix MCL Report for DBP, the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This group is assumed to receive some benefit from DBP treatment-level changes according to the proposed AWQs. The affected group would benefit from diseases forgone with the more stringent standards.

EPA made use of bladder cancer as the ailment to represent a DBP-related disease that could lead to loss of life and an extended illness, with the benefits representing the forgone effects of that representative ailment. Avoided health-related costs in the form of non-quantified benefits include potential benefits from reduced reproductive and developmental risks, reduced risks of cancers other than bladder cancer (e.g. colon and rectal cancer), spleen disorders, kidney disorders, mutagenicity, reproductive effects, immunotoxicity, liver disorders, and neurotoxicity (Matrix 2023, p. 30), along with improved water quality. If implementing the rule changes perceptions of the health risks associated with drinking water and improves taste and odor, it may reduce actions such as buying bottled water or installing filtration devices (EPA, 71 FR 451).

Community water systems (CWSs) and their clientele

This affected group (segment 1 as noted above) includes a portion of customers of municipal or water utility water systems. Estimates of this segment of the population, served by water sources that included groundwater, were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater, along with populations served by various categories of providers. An estimated 2.04 million Arizonans could be affected in this way. The Matrix Report notes potential savings for CWSs due to reduced DBP in the groundwater under the proposed AWQs, and that such savings could be substantial "considering the costs to treat DBP in water is much higher than the cost to prevent DBP from occurring" (MCL p. 43). These savings would presumably be passed on to customers. ADEQ and its consultant have not attempted to estimate dollar amounts associated with this effect.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled "Regional Input-Output Modeling System (RIMS) Model Explanation"). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems).

In the summary of the model as tabulated below for the disinfection byproducts contaminants, direct employment and earnings resulting from permittees' investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|---------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$15,259,767 |
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 27.47 |
| New Annual Earnings for Direct Jobs Created | \$2,564,781 |
| Total New Jobs (Direct + Secondary) | 84.24 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$116,485 |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the "productive capacity" is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants' revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue ("Output") allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee's particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, "'Small business' means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year."
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify "businesses" as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of

permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (see A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced DBP in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted in that section, estimated state taxes for direct and secondary employment generated by investments in DBP technology (using the low end of costs where ranges are given) are approximately \$116,500.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Disinfection Byproducts Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing specific contaminants referenced extensively in the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

AWP NFRM Public Comments - 18 AAC 11 - Disinfection Byproducts

Comment 1: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 1:

ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the four (4) disinfection byproducts MCLs as AWQs.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

The table of contents on page one contains links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of July 1, 2023 through September 30, 2023

| | | | | | |
|-----------------------------|---|--------------------|-----------------------------|--|--------------------|

| R18-11-407. | Aquifer Water Quality Standards in Reclassified | | R18-11-504. | Agency Action on Petition | 87 |
| | Aquifers | 85 | R18-11-506. | Rescission of Reclassification | 87 |

Questions about these rules? Contact:

Department: Arizona Department of Environmental Quality
 Address: 1110 W. Washington St.
 Phoenix, AZ 85007
 Website: www.azdeq.gov
 Name: Jon Rezabek
 Telephone: (602) 771-8219
 Email: rezabek.jon@azdeq.gov

The release of this Chapter in Supp. 23-3 replaces Supp. 22-4, 1-99 pages.

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Authority: A.R.S. §§49-202(A), 49-203(A)(1)

Supp. 23-3

CHAPTER TABLE OF CONTENTS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

Tables in Article 1, Appendix A have been updated and now include historical notes (Supp. 16-4).

Article 1, consisting of Appendices A through C, repealed April 24, 1996 (Supp. 96-2).

Article 1, consisting of Section R18-11-103, reserved effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-105 and R18-11-106, and Appendices A and B, adopted April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 and R18-11-102, R18-11-104, R18-11-107 through R18-11-109, R18-11-111 through R18-11-113, R18-11-115, R18-11-117 and R18-11-118, R18-11-120 and R18-11-121, amended effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 through R18-11-121 and Appendices A through C, adopted effective February 18, 1992 (Supp. 92-1).

Article 1, consisting of Section R18-11-101, repealed effective February 18, 1992 (Supp. 92-1).

Article 1 consisting of Section R9-21-101 renumbered as Article 1, Section R18-11-101 (Supp. 87-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

R18-11-101. Definitions

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation (AgI)" means the use of a surface water for crop irrigation.
3. "Agricultural livestock watering (AgL)" means the use of a surface water as a water supply for consumption by livestock.
4. "Annual mean" is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. "Aquatic and wildlife (cold water) (A&Wc)" means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. "Aquatic and wildlife (effluent-dependent water) (A&Wedw)" means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. "Aquatic and wildlife (ephemeral) (A&We)" means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. "Aquatic and wildlife (warm water) (A&Ww)" means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. "Arizona Pollutant Discharge Elimination System (AZPDES)" means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. "Clean Water Act" means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. "Criteria" means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.
17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water or portion of a surface water, that consists of a point source discharge without which the surface water would be ephemeral. An effluent-dependent water may be perennial or intermittent depending on the volume and frequency of the point source discharge of treated wastewater.
20. "Ephemeral water" means a surface water or portion of surface water that flows or pools only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_Y = \sqrt[n]{(Y_1)(Y_2)(Y_3)\dots(Y_n)}$$
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

27. "Intermittent water" means a surface water or portion of surface water that flows continuously during certain times of the year and more than in direct response to precipitation, such as when it receives water from a spring, elevated groundwater table or another surface source, such as melting snowpack.
28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water or portion of surface water that flows continuously throughout the year.
33. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S. § 49-201(29)
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macroinvertebrates and algae are collected from these reference condition streams for calculating the Arizona Indexes of Biological Integrity thresholds.
37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
 - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
 - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means "WOTUS" as defined in A.R.S. § 49-201(53).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH₃), ammonium ion (NH₄⁺), nitrite (NO₂), and nitrate (NO₃), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
48. "Urban lake" means a manmade lake within an urban landscape.
49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.
51. "Wadable" means a surface water can be safely crossed on foot and sampled without a boat.
52. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Amended effective January 7, 1985 (Supp. 85-1). Amended by adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) "Navigable Water", previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-102. Applicability

- A. The water quality standards prescribed in this Article apply to surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is a part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores that is not a surface water or is located in an area that once was a surface water but is no longer a surface water because it has been and remains legally converted, including:
 - a. A pit,
 - b. Pregnant leach solution pond,
 - c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond or a sump in a mine pit associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product and that is being held for recycling,
 - h. Spill or upset catchment pond, or
 - i. A pond used for onsite remediation;
 3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-103. Repealed**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1). Repealed effective April 24, 1996 (Supp. 96-2).

R18-11-104. Designated Uses

- A. The Director shall adopt or remove a designated use or subcategory of a designated use by rule.
- B. Designated uses of a surface water may include full-body contact, partial-body contact, domestic water source, fish consumption, aquatic and wildlife (cold water), aquatic and wildlife (warm water), aquatic and wildlife (ephemeral), aquatic and wildlife (effluent-dependent water), agricultural irrigation, and agricultural livestock watering. The designated uses for specific surface waters are listed in Appendix B of this Article.
- C. Numeric water quality criteria to maintain and protect water quality for the designated uses are prescribed in Appendix A, R18-11-109, R18-11-110, and R18-11-112. Narrative water quality standards to protect all surface waters are prescribed in R18-11-108.
- D. If a surface water has more than one designated use listed in Appendix B, the most stringent water quality criterion applies.
- E. The Director shall revise the designated uses of a surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in Appendix B.
- F. In designating uses of a surface water and in establishing water quality criteria to protect the designated uses, the Director shall take into consideration the applicable water quality standards for downstream surface waters and shall ensure that the water quality standards that are established for an upstream surface water also provide for the attainment and maintenance of the water quality standards of downstream surface waters.
- G. A use attainability analysis shall be conducted prior to removal of a designated use or adoption of a subcategory of a designated use that requires less stringent water quality criteria.
- H. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria, provided the designated use is not an existing use and it is demonstrated through a use attainability analysis that attaining the designated use is not feasible for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A natural, ephemeral, intermittent, or low-flow condition or water level prevents the attainment of the use;
 3. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
 4. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
 5. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use; or
 6. Controls more stringent than those required by § 301 (b) and § 306 of the Clean Water Act [33 U.S.C. § 1311 and § 1316] are necessary to attain the use and implementation

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

of the controls would result in substantial and widespread economic and social impact.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-105. Tributaries; Designated Uses

The following water quality standards apply to a surface water that is not listed in Appendix B but that is a tributary to a listed surface water.

1. The aquatic and wildlife (ephemeral) and partial-body contact standards apply to an unlisted tributary that is an ephemeral water.
2. The aquatic and wildlife (cold water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is above 5000 feet in elevation.
3. The aquatic and wildlife (warm water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is below 5000 feet in elevation.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Section heading amended per instructions of the Department of Environmental Quality, August 9, 1996 (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-106. Net Ecological Benefit

- A. The Director may, by rule, modify a water quality standard on the ground that there is a net ecological benefit associated with the discharge of effluent to support or create a riparian and aquatic habitat in an area where water resources are limited. The Director may modify a water quality standard for a pollutant if it is demonstrated that:
 1. The discharge of effluent creates or supports an ecologically valuable aquatic, wetland, or riparian ecosystem in an area where these resources are limited;
 2. The ecological benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with the elimination of the discharge of effluent;
 3. The cost of treatment to achieve compliance with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent to the surface water. The discharger shall demonstrate that it is feasible to eliminate the discharge of effluent that creates or supports the ecologically valuable aquatic, wetland, or riparian ecosystem;
 4. The discharge of effluent to the surface water will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water;
 5. All practicable point source discharge control programs, including local pretreatment, waste minimization, and source reduction programs are implemented; and
 6. The discharge of effluent does not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.
- B. The Director shall not modify a water quality criterion for a pollutant to be less stringent than a technology-based effluent

limitation that applies to the discharge of that effluent. The discharge of effluent shall, at a minimum, comply with applicable technology-based effluent limitations.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-107. Antidegradation

- A. The Director shall, using R18-11-107.01 and this Section, determine whether there is degradation of water quality in a surface water on a pollutant-by-pollutant basis.
- B. Tier 1: The level of water quality necessary to support an existing use shall be maintained and protected. No degradation of existing water quality is permitted in a surface water where the existing water quality does not meet the applicable water quality standards.
- C. Tier 2: Where existing water quality in a surface water is better than the applicable water quality standard the existing water quality shall be maintained and protected. The Director may allow degradation of existing water quality in the surface water, if the Director makes all of the following findings:
 1. The water quality necessary for existing uses is fully protected and water quality is not lowered to a level that does not comply with applicable water quality standards,
 2. The highest statutory and regulatory requirements for new and existing point sources are achieved,
 3. All cost-effective and reasonable best management practices for nonpoint source pollution control are implemented, and
 4. Allowing lower water quality is necessary to accommodate important economic or social development in the area where the surface water is located.
- D. Tier 3: Existing water quality shall be maintained and protected in a surface water that is classified as an OAW under R18-11-112. Degradation of an OAW under subsection (C) is prohibited.
- E. The Director shall implement this Section in a manner consistent with § 316 of the Clean Water Act [33 U.S.C. 1326] if a potential water quality impairment associated with a thermal discharge is involved.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-107.01. Antidegradation Criteria

- A. Tier 1 antidegradation protection.
 1. Tier 1 antidegradation protection applies to the following surface waters:
 - a. A surface water listed on the 303(d) list for the pollutant that resulted in the listing,
 - b. An effluent dependent water,
 - c. An ephemeral water,
 - d. An intermittent water, and
 - e. A canal listed in Appendix B.
 2. A regulated discharge shall not cause a violation of a surface water quality standard or a wasteload allocation in a total maximum daily load approved by EPA.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. Except as provided in subsections (E) and (F), Tier 1 antidegradation review requirements are satisfied for a point-source discharge regulated under an individual AZPDES permit to an ephemeral water, effluent dependent water, intermittent water, or a canal listed in Appendix B, if water quality-based effluent limitations designed to achieve compliance with applicable surface water quality standards are established in the permit and technology-based requirements of the Clean Water Act for the point source discharge are met.
- B. Tier 2 antidegradation protection.**
1. Tier 2 antidegradation protection applies to a perennial water with existing water quality that is better than applicable water quality standards. A perennial water that is not listed in subsection (A)(1) nor classified as an OAW under A.A.C. R18-9-112(G) has Tier 2 antidegradation protection for all pollutants of concern.
 2. A regulated discharge that meets the following criteria, at critical flow conditions, does not cause significant degradation:
 - a. The regulated discharge consumes less than 20 percent of the available assimilative capacity for each pollutant of concern, and
 - b. At least 50 percent of the assimilative capacity for each pollutant of concern remains available in the surface water for each pollutant of concern.
 3. Antidegradation review. Any person proposing a new or expanded regulated discharge under an individual AZPDES permit that may cause significant degradation shall provide ADEQ with the following information:
 - a. Baseline characterization. A person seeking authorization to discharge under an individual AZPDES permit to a perennial water shall provide baseline water quality data on pollutants of concern where no data exists or there are insufficient data to characterize baseline water quality and to determine available assimilative capacity. A discharger shall characterize baseline water quality at a location upstream of the proposed discharge location;
 - b. Alternative analysis.
 - i. The person seeking authorization for the discharge shall prepare and submit a written analysis of alternatives to the discharge. The analysis shall provide information on all reasonable, cost-effective, less-degrading or non-degrading discharge alternatives. Alternatives may include wastewater treatment process changes or upgrades, pollution prevention measures, source reduction, water reclamation, alternative discharge locations, groundwater recharge, land application or treatment, local pretreatment programs, improved operation and maintenance of existing systems, seasonal or controlled discharge to avoid critical flow conditions, and zero discharge;
 - ii. The alternatives analysis shall include cost information on base pollution control measures associated with the regulated discharge and cost information for each alternative;
 - iii. The person shall implement the alternative that is cost-effective and reasonable, results in the least degradation, and is approved by the Director. An alternative is cost-effective and reasonable if treatment costs associated with the alternative are less than a 10 percent increase above the cost of base pollution control measures;
- iv. For purposes of this subsection, “base pollution control measures” are water pollution control measures required to meet technology-based requirements of the Clean Water Act and water quality-based effluent limits designed to achieve compliance with applicable water quality standards; and
- c. Social and economic justification. The person shall demonstrate to the Director that significant degradation is necessary to accommodate important economic or social development in the local area. The person seeking authorization for the discharge shall prepare a written social and economic justification that includes a description of the following:
 - i. The geographic area where significant degradation of existing water quality will occur;
 - ii. The current baseline social and economic conditions in the local area;
 - iii. The net positive social and economic effects of development associated with the regulated discharge and allowing significant degradation;
 - iv. The negative social, environmental, and economic effects of allowing significant degradation of existing water quality; and
 - v. Alternatives to the regulated discharge that do not significantly degrade water quality yet may yield comparable social and economic benefits.
4. For purposes of this Section, the term “pollutant of concern” means a pollutant with either a numeric or narrative water quality standard.
 5. Public participation. The Director shall provide public notice and an opportunity to comment on an antidegradation review under subsection (B)(3) and shall provide an opportunity for a public hearing under A.A.C. R18-9-A908(B).
- C. Tier 3 antidegradation protection.**
1. Tier 3 antidegradation protection applies only to an OAW listed in R18-11-112(G).
 2. A new or expanded point-source discharge directly to an OAW is prohibited.
 3. A person seeking authorization for a regulated discharge to a tributary to, or upstream of, an OAW shall demonstrate in a permit application or in other documentation submitted to ADEQ that the regulated discharge will not degrade existing water quality in the downstream OAW.
 4. A discharge regulated under a § 404 permit that may affect existing water quality of an OAW requires a determination by the Director to ensure that existing water quality is maintained and protected and any water quality impacts are temporary. Temporary water quality impacts are those impacts that occur for a period of six months or less and are not regularly occurring. The form of such a determination shall be as follows:
 - a. For Corps-issued § 404 permits, an individual § 401 water quality certification.
 - b. For Director-issued § 404 permits, a § 404 permit action, wherein the Director shall conduct a water quality evaluation as a part of the state’s requirements for issuing § 404 permits and in accordance with this Section.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. Antidegradation review of a § 404 permit shall be conducted as follows:
 1. For a Corps-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a nationwide or regional § 404 permit as part of the § 401 water quality certification prior to issuance of the nationwide or regional permit. The Director shall conduct the antidegradation review of an individual § 404 permit if the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters. For regulated discharges that may degrade water quality in an OAW or a water that is on the 303(d) List of impaired waters, the Director shall conduct the antidegradation review as part of the § 401 water quality certification process.
 2. For a Director-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a general § 404 permit as a part of its determination whether to issue a general permit in accordance with state requirements for issuing a § 404 general permit and with this Section. The Director shall conduct the antidegradation review of an individual § 404 permit as part of the § 404 permit action in accordance with state requirements for issuing a § 404 permit and in accordance with this Section.
- E. Antidegradation review of an AZPDES stormwater permit. An individual stormwater permit for a municipal separate storm sewer system (MS4) meets antidegradation requirements if the permittee complies with the permit, including developing a stormwater management plan containing controls that reduce the level of pollutants in stormwater discharges to the maximum extent practicable.
- F. Antidegradation review of a general permit. The Director shall conduct the antidegradation review of a regulated discharge authorized by a general permit at the time the general permit is issued or renewed. A person seeking authorization to discharge under a general permit is not required to undergo an individual antidegradation review at the time the Notice of Intent is submitted unless the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-108. Narrative Water Quality Standards

- A. A surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or

- 8. Change the color of the surface water from natural background levels of color.
- B. A surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard.
- C. A surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.
- D. A surface water shall not contain solid waste such as refuse, rubbish, demolition or construction debris, trash, garbage, motor vehicles, appliances, or tires.
- E. A Wadeable, perennial stream shall support and maintain a community of organisms having a taxa richness, species composition, tolerance, and functional organization comparable to that of a stream with reference conditions in Arizona.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.01. Narrative Biological Criteria for Wadeable, Perennial Streams

- A. The narrative biological criteria in this Section apply to a wadeable, perennial stream with either an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The biological standard in R18-11-108(E) is met when a bioassessment result, as measured by the Arizona Index of Biological Integrity (IBI), for cold or warm water is:
 1. Greater than or equal to the 25th percentile of reference condition, or
 2. Greater than the 10th percentile of reference condition and less than the 25th percentile of reference condition and a verification bioassessment result is greater than or equal to the 25th percentile of reference condition.
- C. Arizona Index of Biological Integrity (IBI) scores:

| Bioassessment Result | Index of Biological Integrity Scores | |
|--|--------------------------------------|---------|
| | A&Wc | A&Ww |
| Greater than or equal to the 25th percentile of reference condition | ≥52 | ≥50 |
| Greater than the 10th and less than the 25th percentile of reference condition | 46 - 51 | 40 - 49 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.02. Narrative Bottom Deposit Criteria for Wadeable, Perennial Streams

- A. The narrative bottom deposit criteria in this Section apply to wadeable, perennial streams with an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- B. The narrative water quality standard for bottom deposits at R18-11-108(A)(1) is met when:
 1. The percentage of fine sediments in the riffle habitats of a wadeable, perennial stream with an A&Wc designated use, as determined by a riffle pebble count, is less than or equal to 30 percent.
 2. The percentage of fine sediments in all stream habitats of a wadeable, perennial stream with an A&Ww designated use, as determined by a reach level pebble count, is equal to or less than 50 percent.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.03. Narrative Nutrient Criteria for Lakes and Reservoirs

- A. The narrative nutrient criteria in this Section apply to those lakes and reservoirs categorized in Appendix B.
- B. The narrative water quality standard for nutrients at R18-11-108(A)(6) is met when, based on a minimum of two lake sample events conducted during the peak season based on lake productivity, the results show an average chlorophyll-*a* value below the applicable threshold for designated use and lake and reservoir category in subsection (D).
 1. The mean chlorophyll-*a* concentration is less than the lower value in the target range chlorophyll-*a* for the lake and reservoir category, or
 2. The mean chlorophyll-*a* concentration is within the target range for the lake and reservoir category and:
 - a. The mean blue green algae count is at or below 20,000 per milliliter, and

- b. The blue green algae count is less than 50 percent of the total algae count, and
- c. There is no evidence of nutrient-related impairments such as:
 - i. An exceedance of dissolved oxygen or pH standards;
 - ii. A fish kill coincident with a dissolved oxygen or pH exceedance;
 - iii. A fish kill or other aquatic organism mortality coincident with algal toxicity;
 - iv. Secchi depth is less than the lower value prescribed for the lake and reservoir category;
 - v. A nuisance algal bloom is present in the limnetic portion of the lake or reservoir; or
 - vi. The concentration of total phosphorous, total nitrogen, or total Kjehldal nitrogen (TKN) is greater than the upper value in the range prescribed for the lake and reservoir category; or

- 3. For a shallow lake. In addition to meeting the mean chlorophyll-*a* concentrations in subsections (B)(1) or (2), submerged aquatic vegetation covers 50 percent or less of the lake bottom and there is less than a 5 mg/L swing in diel-dissolved oxygen concentration measured within the photic zone.

- C. The following threshold ranges apply during the peak season for lake productivity:
 1. Warm water lakes peak season, April – October;
 2. Cold water lakes peak season, May – September.
- D. The following table lists the numeric targets for lakes and reservoirs.

| NUMERIC TARGETS FOR LAKES AND RESERVOIRS | | | | | | | | | | |
|--|--------------------------|----------------------|------------------|-------------------------|-----------------------|--------------------------------------|---------------------------|-------------------------------------|-------------------------|---------|
| Designated Use | Lake Category | Chl- <i>a</i> (µg/L) | Secchi Depth (m) | Total Phosphorus (µg/L) | Total Nitrogen (mg/L) | Total Kjehldal Nitrogen (TKN) (mg/L) | Blue-Green Algae (per ml) | Blue-Green Algae (% of total count) | Dissolved Oxygen (mg/L) | pH (SU) |
| FBC and PBC | Deep | 10-15 | 1.5-2.5 | 70-90 | 1.2-1.4 | 1.0-1.1 | 20,000 | | | 6.5-9.0 |
| | Shallow | 10-15 | 1.5-2.0 | 70-90 | 1.2-1.4 | 1.0-1.1 | | | | |
| | Igneous | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Sedimentary | 20-30 | 1.5-2.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Urban | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| A&Wc | All | 5-15 | 1.5-2.0 | 50-90 | 1.0-1.4 | 0.7-1.1 | | <50 | 7 (top m) | 6.5-9.0 |
| A&Ww | All (except urban lakes) | 25-40 | 0.8-1.0 | 115-140 | 1.6-1.8 | 1.3-1.6 | | | 6 (top m) | |
| | Urban | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | |
| A&Wedw | All | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | 6.5-9.0 |
| DWS | All | 10-20 | 0.5-1.5 | 70-100 | 1.2-1.5 | 1.0-1.2 | 20,000 | | | 5.0-9.0 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-109. Numeric Water Quality Standards

- A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC | PBC |
|---|-----|-----|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

- B. pH. The following water quality standards for pH are expressed in standard units:

| pH | DWS | FBC, PBC, A&W ¹ | AgI | AgL |
|---------|-----|----------------------------|-----|-----|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

Footnotes:

- 1. "1" Includes A&Wc, A&Ww, A&Wedw, and A&We.

- C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww | A&Wedw | A&Wc |
|------|--------|------|
| | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|--------|--------|--------|
| 3.0° C | 3.0° C | 1.0° C |
|--------|--------|--------|

- D. Suspended sediment concentration.
- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:

| A&Wc | A&Ww |
|------|------|
| 25 | 80 |

- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.
- E. Dissolved oxygen. A surface water meets the water quality standard for dissolved oxygen when either:
- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
 - The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|---|---|
| A&Ww | 6.0 |
| A&Wc | 7.0 |
| A&W edw for a sample taken from three hours after sunrise to sunset | 3.0 |
| A&W edw for a sample taken from sunset to three hours after sunrise | 1.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

- F. Nutrient criteria. The following are water quality standards for total phosphorus and total nitrogen (expressed in milligrams per liter (mg/L)) that apply to the surface waters listed below. A minimum of 10 samples, each taken at least 10 days apart in a consecutive 12-month period, are required to determine a 90th percentile. Not more than 10 percent of the samples may exceed the 90th percentile value listed below. The Director will apply these water quality standards for total phosphorus and total nitrogen to the surface waters listed below, and to their perennial tributaries, if listed. The Director may also apply these total phosphorus and total nitrogen standards to any source discharging to any tributary (ephemeral, intermittent, effluent dependent water, or perennial) of the surface waters listed below, if necessary to protect nutrient water quality in the listed surface water, based on the volume, frequency, magnitude and duration of the discharge, and distance to the downstream surface water listed below:

- Verde River and its perennial tributaries from the Verde headwaters to Bartlett Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.30 | 1.00 |
| Total nitrogen | 1.00 | 1.50 | 3.00 |

- Black River, Tonto Creek and their perennial tributaries for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.20 | 0.80 |
| Total nitrogen | 0.50 | 1.00 | 2.00 |

- Salt River and its perennial tributaries above Roosevelt Lake for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.12 | 0.30 | 1.00 |
| Total nitrogen | 0.60 | 1.20 | 2.00 |

- Salt River below Stewart Mountain Dam to its confluence with the Verde River:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.05 | – | 0.20 |
| Total nitrogen | 0.60 | – | 3.00 |

- Little Colorado River and its perennial tributaries upstream from:
 - The headwaters to River Reservoir,
 - South Fork of Little Colorado River at 34°00'49"/109°24'18" to above South Fork Campground at 34°04'49"/109°24'18", and
 - The headwaters of Water Canyon Creek to the Apache-Sitgreaves National Forest boundary:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.08 | 0.10 | 0.75 |
| Total nitrogen | 0.60 | 0.75 | 1.10 |

- From the Little Colorado River and State Route 260 at 34°06'39"/109°18'55" to Lyman Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.20 | 0.30 | 0.75 |
| Total nitrogen | 0.70 | 1.20 | 1.50 |

- Colorado River at the Northern International Boundary near Morelos Dam:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | – | 0.33 | – |
| Total nitrogen | – | 2.50 | – |

- Oak Creek from its headwaters at 35°01'30"/111°44'12" to its confluence with the Verde River and the West Fork of Oak Creek from its headwaters at 35°02'44"/111°54'48" to its confluence with Oak Creek.

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.1 | 0.25 | 0.30 |
| Total nitrogen | 1.00 | 1.50 | 2.50 |

- No discharge of wastewater to Show Low Creek or its perennial tributaries upstream of and including Fools Hollow Lake shall exceed 0.16 mg/L total phosphates as P.
- No discharge of wastewater to the San Francisco River or its perennial tributaries upstream of Luna Lake Dam shall exceed 1.0 mg/L total phosphates as P.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-110. Salinity Standards for the Colorado River

- A. The flow-weighted average annual salinity in the lower main stem of the Colorado River shall not exceed the following criteria:

| Location | Total Dissolved Solids |
|------------------|------------------------|
| Below Hoover Dam | 723 mg/L |
| Below Parker Dam | 747 mg/L |
| At Imperial Dam | 879 mg/L |

- B. The plan of implementation contained in the “2014 Review, Water Quality Standards for Salinity, Colorado River System,” approved October 2014, is incorporated by reference to preserve the basin-wide approach to salinity control developed by the Colorado River Basin Salinity Control Forum and to ensure compliance with the numeric criteria for salinity in subsection (A). This material does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the Colorado River Basin Salinity Control Forum, 106 West 500 South, Suite 101, Bountiful, Utah 84010-6232 or at <http://www.coloradoriversalinity.org/>.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-111. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610, 40 CFR 136.3, or an alternative analytical method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-112. Outstanding Arizona Waters

- A. The Director shall classify a surface water as an outstanding Arizona water (OAW) by rule.
- B. The Director may adopt, under R18-11-115, a site-specific standard to maintain and protect existing water quality in an OAW.
- C. Any person may nominate a surface water for classification as an OAW by filing a nomination with the Director. The nomination shall include:
1. A map and a description of the surface water;

2. A written statement in support of the nomination, including specific reference to the applicable criteria for an OAW classification prescribed in subsection (D);
 3. Supporting evidence demonstrating that the criteria prescribed in subsection (D) are met; and
 4. Available water quality data relevant to establishing the baseline water quality of the proposed OAW.
- D. The Director may classify a surface water as an OAW based upon the following criteria:
1. The surface water is a perennial or intermittent water;
 2. The surface water is in a free-flowing condition. For purposes of this subsection, “in a free-flowing condition” means that a surface water does not have an impoundment, diversion, channelization, rip-rapping or other bank armor, or another hydrological modification within the reach nominated for an OAW classification;
 3. The surface water has good water quality. For purposes of this subsection, “good water quality” means that the surface water has water quality that meets or is better than applicable surface water quality standards. A surface water that is listed as impaired under R18-11-604(E) is ineligible for OAW classification; and
 4. The surface water meets one or both of the following conditions:
 - a. The surface water is of exceptional recreational or ecological significance because of its unique attributes, such as the geology, flora and fauna, water quality, aesthetic value, or the wilderness characteristic of the surface water;
 - b. An endangered or threatened species is associated with the surface water and the existing water quality is essential to the species' maintenance and propagation or the surface water provides critical habitat for the threatened or endangered species. An endangered or threatened species is identified in “Endangered and Threatened Wildlife,” 50 CFR 17.11 (revised 2005), and “Endangered and Threatened Plants,” 50 CFR 17.12 (revised 2005). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the National Archives and Records Administration at <http://www.access.gpo.gov/nara/cfr/cfr-table-search.html#page1>.
- E. The Director shall hold at least one public meeting in the local area of a surface water that is nominated for classification as an OAW to solicit public comment on the nomination.
- F. The Director shall consider the following factors when deciding whether to classify a surface water as an OAW:
1. Whether there is the ability to manage the surface water and its watershed to maintain and protect existing water quality;
 2. The social and economic impact of Tier 3 antidegradation protection;
 3. The public comments in support of, or in opposition to, an OAW classification;
 4. The timing of the nomination relative to the triennial review of surface water quality standards;
 5. The consistency of an OAW classification with applicable water quality management plans; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

6. Whether the nominated surface water is located within a national or state park, national monument, national recreation area, wilderness area, riparian conservation area, area of critical environmental concern, or it has another special use designation (for example, Wild and Scenic River).
- G.** The following surface waters are classified as OAWs:
1. The West Fork of the Little Colorado River, from its headwaters to Government Springs (approximately 9.1 river miles);
 2. Oak Creek, from its headwaters to its confluence with the Verde River (approximately 50.3 river miles);
 3. West Fork of Oak Creek, from its headwaters to its confluence with Oak Creek (approximately 15.8 river miles);
 4. Peeples Canyon Creek, from its headwaters to its confluence with the Santa Maria River (approximately 8.1 river miles);
 5. Burro Creek, from its headwaters to its confluence with Boulder Creek (approximately 29.5 miles);
 6. Francis Creek, from its headwaters to its confluence with Burro Creek (approximately 22.9 river miles);
 7. Bonita Creek, from its boundary of the San Carlos Indian Reservation to its confluence with the Gila River (approximately 14.7 river miles);
 8. Cienega Creek, from its confluence with Gardner Canyon to the USGS gaging station (#09484600) (approximately 28.3 river miles);
 9. Aravaipa Creek, from its confluence with Stowe Gulch to the downstream boundary of the Aravaipa Canyon Wilderness Area (approximately 15.5 river miles);
 10. Cave Creek, from its headwaters to the Coronado National Forest boundary (approximately 10.4 river miles);
 11. South Fork of Cave Creek, from its headwaters to its confluence with Cave Creek (approximately 8.6 river miles);
 12. Buehman Canyon Creek, from its headwaters to its confluence with unnamed tributary at 32°24'31"/110°32'08" (approximately 9.8 river miles);
 13. Lee Valley Creek, from its headwaters to Lee Valley Reservoir (approximately 1.6 river miles);
 14. Bear Wallow Creek, from its headwaters to the boundary of the San Carlos Indian Reservation (approximately 4.25 river miles);
 15. North Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 16. South Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 17. Snake Creek, from its headwaters to its confluence with the Black River (approximately 6.2 river miles);
 18. Hay Creek, from its headwaters to its confluence with the West Fork of the Black River (approximately 5.5 river miles);
 19. Stinky Creek, from the White Mountain Apache Indian Reservation boundary to its confluence with the West Fork of the Black River (approximately 3.0 river miles);
 20. KP Creek, from its headwaters to its confluence with the Blue River (approximately 12.7 river miles);
 21. Davidson Canyon, from the unnamed spring at 31°59'00"/110°38'49" to its confluence with Cienega Creek; and
22. Fossil Creek, from its headwaters at the confluence of Sandrock and Calf Pen Canyons above Fossil Springs to its confluence with the Verde River (approximately 17.2 river miles).
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Added "water quality standards" to R18-11-112, previously omitted in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).
- R18-11-113. Effluent-Dependent Waters**
- A.** The Director shall classify a surface water as an effluent-dependent water by rule.
- B.** The Director may adopt, under R18-11-115, a site-specific water quality standard for an effluent-dependent water.
- C.** Any person may submit a petition for rule adoption requesting that the Director classify a surface water as an effluent-dependent water. The petition shall include:
1. A map and a description of the surface water;
 2. Information that demonstrates that the surface water consists of a point source discharge of wastewater; and
 3. Information that demonstrates that, without a point source discharge of a wastewater, the receiving water is an ephemeral water.
- D.** The Director shall use the water quality standards that apply to an effluent-dependent water to derive water quality-based effluent limits for a point source discharge of wastewater to an ephemeral water.
- E.** The Director may use aquatic and wildlife (edw) acute standards only to derive water quality based effluent limits for a sporadic, infrequent, or emergency point source discharge to an ephemeral water or to an effluent-dependent water. The Director shall consider the following factors when deciding whether to apply A&Wedw (acute) standards:
1. The amount, frequency, and duration of the discharge;
 2. The length of time water may be present in the receiving water;
 3. The distance to a downstream water with aquatic and wildlife chronic standards; and
 4. The likelihood of chronic exposure to pollutants.
- F.** The Director may establish alternative water quality-based effluent limits in an AZPDES permit based on seasonal differences in the discharge.
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective December 18, 1992 (Supp. 92-4). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).
- R18-11-114. Mixing Zones**
- A.** The Director may establish a mixing zone for a point source discharge to a surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited in an ephemeral water or where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B.** The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

for a mixing zone as part of an application for an AZPDES permit. The request shall include:

1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C.** The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D.** Director determination.
1. The Director shall deny a request to establish a mixing zone if a water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E.** Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F.** The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- G.** Mixing zone requirements.
1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
 2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
 3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
 4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
 5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.
- H.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:
1. Chlordane,
 2. DDT and its metabolites (DDD and DDE),
 3. Dieldrin,
 4. Dioxin,
 5. Endrin,
 6. Endrin aldehyde,
 7. Heptachlor,
 8. Heptachlor epoxide,
 9. Lindane,
 10. Mercury,
 11. Polychlorinated biphenyls (PCBs), and
 12. Toxaphene.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-115. Site-Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in Appendix A;
 3. Resident aquatic organisms that occur in a surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in Appendix A;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A. "Natural background" means the concentration of a pollutant in a surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically-defensible procedure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Uses one of the following procedures, as defined by the most recent EPA guidance documents:
 - i. The recalculation procedure,
 - ii. The water effects ratio for metals,
 - iii. The streamlined water effects ratio, or
 - iv. The Biotic ligand model.
 - d. Demonstrates that all designated uses are protected.
2. Alternatively, a study outline submitted for the Director's approval must contain the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Describes the hydrologic regime of the waterbody;
 - d. Describes the scientifically-defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 - e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 - f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 - g. Demonstrates that all designated uses are protected; and
 - h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration. Modeling approaches include Better Assessment Science Integrating Source and Nonpoint Sources (Basins), Hydrologic Simulation Program-Fortran (HSPF), and Hydrologic Engineering Center (HEC) programs developed by the U.S. Army Corps of Engineers.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Section repealed by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-116. Resource Management Agencies

Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-117. Canals and Urban Park Lakes

A. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified in Appendix B. Physical or mechanical maintenance

includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified in Appendix B.

B. The discharge of lubricating oil associated with the start-up of well pumps that discharge to canals is not a violation of R18-11-108(B).

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-118. Dams and Flood Control Structures

Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-119. Natural background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is not caused by human activity but is due solely to naturally-occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

R18-11-120. Enforcement of Non-permitted Discharges

A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.

B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-121. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve com-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

pliance. The permittee shall demonstrate that all requirements under § 301(b) and § 306 of the Clean Water Act [33 U.S.C. 1311(b) and 1316] are achieved and that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-122. Variances

- A. Upon request, the Director may establish, by rule, a discharger-specific or water segment(s)-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B. A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.
 4. A detailed discussion of the discharge control technologies that are available for achieving compliance with the water quality standard for which a variance is sought.
 5. Documentation that more advanced treatment technology than applicable technology-based effluent limitations is necessary to achieve compliance with the water quality standard for which a variance is sought.
 6. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
 7. Documentation that the proposed term is only as long as necessary to achieve the highest attainable condition.
 8. Documentation that is appropriate to the type of use to which the variance would apply as follows:
 - a. For a water quality standard variance to a use specified in Clean Water Act § 101(a)(2), documentation must include demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - i. Naturally occurring pollutant concentrations prevent attainment of the use;
 - ii. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - iii. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - iv. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - v. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - vi. That installation and operation of each of the available discharge technologies more advanced than those required to comply with technology-based effluent limitations to achieve compliance with the water quality standard would result in substantial and widespread economic and social impact; or
 - vii. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
 - b. For a water quality standard variance to a use other than those uses specified in Clean Water Act § 101(a)(2), documentation must justify how consideration and value of the water subject to the use appropriately supports the variance and term. A demonstration consistent with (B)(8)(a) of this Section may be used to satisfy this requirement.
 9. For a waterbody segment(s)-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant(s) or water quality parameter(s) and water body or waterbody segment(s) specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(9)(a) previously applied to the water body or waterbody seg-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ment(s), documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant(s) or water quality parameter(s) subject to the water quality variance and the water quality progress achieved.

10. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification of the permittee subject to the variance;
 - b. For an existing point source discharge, a detailed description of the existing discharge control technologies that are used to achieve compliance with applicable water quality standards. For a new point source discharge, a detailed description of the proposed discharge control technologies that will be used to achieve compliance with applicable water quality standards; and
 - c. Documentation that the existing or proposed discharge control technologies will comply with applicable technology-based effluent limitations.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(8)(a)(vii). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable; or
 3. If no additional feasible pollutant control technology can be identified, the interim criterion or interim effluent condition that reflects the greatest pollutant reduction achievable with the pollutant control technologies installed at the time of the issuance of the variance, and the adoption and implementation of a Pollutant Minimization Program.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The Director may not grant a variance for a point source discharge to an OAW listed in R18-11-112(G).
 - I. Each variance established by the Director is subject to review and approval by the Regional Administrator.
 - J. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E). The variance term runs from the approval of the variance by the Regional Administrator.
 - K. The Director shall reevaluate, in its triennial review, whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance in its triennial review rulemaking.
 - L. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - M. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.
 - N. The following are discharger-specific variances adopted by the Director:
 - O. The following are water body and waterbody segment-specific variances adopted by the Director:

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).
- R18-11-123. Discharge Prohibitions**
- A. The discharge of wastewater to the following surface waters is prohibited:
 1. Sabino Canyon Creek;
 2. Vekol Wash, upstream of the Ak-Chin Indian Reservation; and
 3. Smith Wash, upstream of the Ak-Chin Indian Reservation.
 - B. The discharge to Lake Powell of human body wastes and the wastes from toilets and other receptacles intended to receive or retain wastes from a vessel is prohibited.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO₃, is determined according to the following criteria:
 - i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- e. pH is determined according to the following criteria:
 - i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- f. Table 1 abbreviations.
 - i. µg/L = micrograms per liter,
 - ii. mg/kg = milligrams per kilogram,
 - iii. pCi/L = picocuries per liter,
 - iv. D = dissolved,
 - v. T = total recoverable,
 - vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
 - e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
 - LN = is the natural logarithm
 - CMC = Criterion Maximum Concentration (acute)
 - CCC = Criterion Continuous Concentration (chronic)

Historical Note

Appendix A repealed; new Appendix A, Table 1 adopted effective April 24, 1996 (Supp. 96-2). Appendix A, Table 1 amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 1 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 1 repealed; new Appendix A, Table 1 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 1 amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

| $e^{(1.005*(pH)-4.83)}$ | | $e^{(1.005*(pH)-5.29)}$ | | $e^{(1.005*(pH)-3.4306)}$ | |

Historical Note

Appendix A, Table 10 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 10 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 10 renumbered to Table 12; new Table 10 renumbered from Table 11 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 10 repealed; new Table 10 made by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 11. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Coldwater, Unionid Mussels Present

For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

| pH | Temperature (°C) | | | | | | | | | | | | | | | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife coldwater, Unionid Mussels Absent
 For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

| pH | Temperature (°C) | | | | | | | | | | | | | | | | |

Appendix A, Table 24 renumbered to Table 25; new Table 24 renumbered from Table 23 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 24 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 25. Renumbered**Historical Note**

Appendix A, Table 25 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 25 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 25 renumbered to Table 26; new Table 25 renumbered from Table 24 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 25 renumbered to Table 11 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 26. Renumbered**Historical Note**

Appendix A, Table 26 renumbered from Table 25 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 26 renumbered to Table 12 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Appendix B. Surface Waters and Designated Uses

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Waters | Segment Description and Location (Latitude and Longitudes are in NAD 83) | Lake Category | Aquatic and Wildlife | | | | Human Health | | | | Agricultural | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix B repealed, new Appendix B adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix B amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Appendix B amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix C. Site-Specific Standards

| Watershed | Surface Water | Surface Water Description & Location | Parameter | Site-Specific Criterion |
|-----------|--------------------|--|-------------------------|---|
| LC | Rio de Flag (EDW) | Flagstaff WWTP outfall to the confluence with San Francisco Wash | Copper (D) | 36 µg/L (A&Wedw) |
| CL | Yuma East Wetlands | From inlet culvert from Colorado River into restored channel to Ocean Bridge | Selenium (T) | 2.2 µg/L (A&Ww chronic) |
| | | | Total residual chlorine | 33 µg/L (A&Ww acute) |
| | | | | 20 µg/L (A&Ww chronic) |
| SR | Pinto Creek | From confluence of Ellis Ranch tributary at 33°19'26.7"/110°54'57.5" to the confluence of West Fork of Pinto Creek at 33°27'32.3"/111°00'19.7" | Copper (D) | 34 µg/L (A&Ww acute for hardness values below 268 mg/L) |
| | | | | 34 µg/L (A&Ww chronic) |

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix C repealed effective April 24, 1996 (Supp. 96-2). New Appendix C made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix C amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

ARTICLE 2. WATER QUALITY STANDARDS FOR NON-WOTUS PROTECTED SURFACE WATERS

R18-11-201. Definitions

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation AZ (AgI AZ)" means the use of a non-WOTUS protected surface water for crop irrigation.
3. "Agricultural livestock watering AZ (AgL AZ)" means the use of a non-WOTUS protected surface water as a water supply for consumption by livestock.
4. "Aquatic and wildlife AZ (cold water) (A&Wc AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
5. "Aquatic and wildlife AZ (warm water) (A&Ww AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
6. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
7. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
8. "Criteria" means elements of water quality standards expressed as pollutant concentrations, levels, or narrative

statements representing a water quality that supports a designated use.

9. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health-based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
10. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health-based water quality standard criteria, in order to simulate long-term exposure, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

receiving water critical flow condition is the harmonic mean flow.

11. "Designated use" means a use specified on the Protected Surface Waters List for a non-WOTUS protected surface water.
12. "Domestic water source AZ (DWS AZ)" means the use of a non-WOTUS protected surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
13. "Fish consumption AZ (FC AZ)" means the use of a non-WOTUS protected surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
14. "Full-body contact AZ (FBC AZ)" means the use of a non-WOTUS protected surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely, and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
15. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$

16. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
17. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
18. "Non-WOTUS protected surface water" means a protected surface water designated in Table A of R18-11-216 or added to the PSWL by an emergency action authorized by A.R.S. § 49-221(G)(7) that is not a WOTUS.
19. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
20. "Partial-body contact AZ (PBC AZ)" means the recreational use of a non-WOTUS protected surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and, sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
21. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance.
22. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
23. "Recharge Project" means a facility necessary or convenient to obtain, divert, withdraw, transport, exchange,

deliver, treat, or store water to infiltrate or reintroduce that water into the ground.

24. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
25. "Urban lake" means a manmade lake within an urban landscape.
26. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
27. "Wetland" means, for the purposes of non-WOTUS protected surface waters, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.
28. "WOTUS" means waters of the state that are also navigable waters as defined by Section 502(7) of the Clean Water Act.
29. "WOTUS protected surface water" means a protected surface water that is a WOTUS.
30. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1).
Amended subsection A. effective April 17, 1984 (Supp. 84-2). Former Section R9-21-201 repealed, former Section R9-21-203 renumbered as Section R9-21-201 and amended effective January 7, 1985 (Supp. 85-1).
Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-201 renumbered without change as Section R18-11-201 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-202. Applicability

- A. The water quality standards prescribed in this Article apply to non-WOTUS protected surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
 1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores including:
 - a. A pit,
 - b. Pregnant leach solution pond

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond of sump in a mine put associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product that is being held for recycling,
 - h. Spill or catchment pond, or
 - i. A pond used for onsite remediation
3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.
 5. WOTUS Protected Surface Waters.

Historical Note

Former Section R9-21-202 repealed, former Section R9-21-102 renumbered as Section R9-21-202 and amended effective January 7, 1985 (Supp. 85-1). Amended subsections (B), (D), and (E) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-202 renumbered without change as Section R18-11-202 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-203. Designated Uses for Non-WOTUS Protected Surface Waters

- A. The designated uses for specific non-WOTUS protected surface waters are listed in the Protected Surface Waters List in this article. The designated uses that may be assigned to a non-WOTUS protected surface water are:
 1. Full-body contact AZ,
 2. Partial-body contact AZ,
 3. Domestic water source AZ,
 4. Fish consumption AZ,
 5. Aquatic and wildlife AZ (cold water),
 6. Aquatic and wildlife AZ (warm water),
 7. Agricultural irrigation AZ, and
 8. Agricultural livestock watering AZ.
- B. Numeric water quality criteria to maintain and protect water quality for the designated uses assigned to non-WOTUS protected surface waters are prescribed in R18-11-215. Narrative water quality standards to protect non-WOTUS protected surface waters are prescribed in R18-11-214.
- C. If a non-WOTUS protected surface water has more than one designated use listed in the Protected Surface Waters List, the most stringent water quality criterion applies.
- D. The Director shall revise the designated uses of a non-WOTUS protected surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in the Protected Surface Waters List.
- E. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria through a rulemaking action for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;

3. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the non-WOTUS protected surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
4. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1). Amended subsection (B) by adding paragraphs (27) and (28) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-203 renumbered as Section R9-21-201, former Section R9-21-204 renumbered as Section R9-21-203 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-203 renumbered and amended as Section R9-21-204, new Section R9-21-203 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-203 renumbered without change as Section R18-11-203 (Supp. 87-3). Amended subsection (B) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-204. Interim, Presumptive Designated Uses

The following water quality standards apply to a non-WOTUS protected surface water that is not listed on the Protected Surface Waters List but is added on an emergency basis pursuant to A.R.S. § 49-221(G)(7):

1. The aquatic and wildlife AZ (cold water use applies to a non-WOTUS protected surface water above 5000 feet in elevation);
2. The aquatic and wildlife AZ (warm water) applies to a non-WOTUS protected surface water below 5000 feet in elevation;
3. The full-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
4. The partial-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans in a way that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
5. The fish consumption AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for harvesting aquatic organisms for con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

sumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.

6. The domestic water source AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans as a source of potable water.
7. The agricultural irrigation AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used for crop irrigation.
8. The agricultural livestock watering AZ use applies to any non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used as a water supply for consumption by livestock.

Historical Note

Former Section R9-21-204 renumbered and amended as Section R9-21-207, former Section R9-21-206 renumbered and amended as Section R9-21-204 effective January 29, 1980 (Supp. 80-1). Former Section

R9-21-204 renumbered as Section R9-21-203, former Section R9-21-205 renumbered as Section R9-21-204 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-204 renumbered and amended as Section R9-21-205, former Section R9-21-203 renumbered and amended as Section R9-21-204 effective August 12, 1986 (Supp. 86-4). Former Section

R9-21-204 renumbered without change as Section R18-11-204 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-205. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610 or an alternative method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Former Section R9-21-205 repealed, new Section R9-21-205 adopted effective January 29, 1980 (Supp. 80-1).

Former Section R9-21-205 renumbered as Section R9-21-204, former Section R9-21-206 renumbered as Section R9-21-205 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-205 renumbered and amended as Section R9-21-206, former Section R9-21-204 renumbered and amended as Section R9-21-205 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-205 renumbered without change as Section R18-11-205 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992

(Supp. 92-1). Section repealed April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-206. Mixing Zones

- A. The Director may establish a mixing zone for a point source discharge to a non-WOTUS protected surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B. The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:
 1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C. The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
 1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D. Director determination.
 1. The Director shall deny a request to establish a mixing zone if an applicable water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E. Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F. The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

G. Mixing zone requirements.

1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.

H. The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:

1. Chlordane,
2. DDT and its metabolites (DDD and DDE),
3. Dieldrin,
4. Dioxin,
5. Endrin,
6. Endrin aldehyde,
7. Heptachlor,
8. Heptachlor epoxide,
9. Lindane,
10. Mercury,
11. Polychlorinated biphenyls (PCBs), and
12. Toxaphene.

Historical Note

Former Section R9-21-206 renumbered and amended as Section R9-21-204, new Section R9-21-206 adopted effective January 29, 1980 (Supp. 80-1). Amended by adding subsection (B) effective October 14, 1981 (Supp. 81-5). Amended subsection (B) and Table 1 effective January 29, 1982 (Supp. 82-1). Amended subsection (B) and Table 1 effective August 13, 1982 (Supp. 82-4). Former Section R9-21-206 renumbered as Section R9-21-205, former Section R9-21-207 renumbered as Section R9-21-206 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-206 renumbered and amended as Section R9-21-207, former Section R9-21-205 renumbered and amended as R9-21-206 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-206 renumbered without change as Section R18-11-206 (Supp. 87-3). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-207. Natural Background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is caused solely by naturally occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Former Section R9-21-207 repealed, former Section R9-21-204 renumbered and amended as Section R9-21-207 effective January 29, 1980 (Supp. 80-1). Former Section R9-21-207 renumbered as Section R9-21-206, former Section R9-21-208 renumbered as Section R9-21-207

and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-207 renumbered without change as Section R9-21-208, former Section R9-21-206 renumbered and amended as Section R9-21-207 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-207 renumbered without change as Section R18-11-207 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-208. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Former Section R9-21-208 repealed, new Section R9-21-208 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-208 renumbered as Section R9-21-207, Appendices 1 through 9 amended as Appendix A (now shown following R9-21-213), former Section R9-21-209 renumbered as R9-21-208 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-208 renumbered and amended as Section R9-21-209, former Section R9-21-207 renumbered without change as Section R9-21-208 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-208 renumbered without change as Section R18-11-208 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-209. Variances

- A.** Upon request, the Director may establish, by rule, a discharger-specific or water segment-specific or water segments-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B.** A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.

4. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
 5. Documentation that the proposed term is only as long as necessary to achieve compliance with applicable water quality standards.
 6. Documentation that is appropriate to the type of designated use to which the variance would apply as follows. For a water quality standard variance documentation must include a demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - a. Naturally occurring pollutant concentrations prevent attainment of the use;
 - b. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - c. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - d. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - e. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - f. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
 7. For a waterbody segment-specific or segments-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant or pollutants or water quality parameter or parameters and water body or waterbody segment or segments specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(7)(a) previously applied to the water body or waterbody segment or segments, documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant or pollutants or water quality parameter or parameters subject to the water quality variance and the water quality progress achieved.
 8. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section: Identification of the permittee subject to the variance.
- C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(6)(a)(vi). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E).
 - I. The Director shall periodically, but not more than every five years, reevaluate whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition during each rulemaking for this Article. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance during the rulemaking.
 - J. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - K. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.

Historical Note

Former Section R9-21-209 renumbered and amended as Section R9-21-210, new Section R9-21-209 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-209 renumbered as Section R9-21-208, Tables I and II amended as Appendix B (now shown following R9-21-213 and Appendix A), former Section R9-21-210 renumbered as Section R9-21-209 and amended effective

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

January 7, 1985 (Supp. 85-1). Former Section R9-21-209 renumbered and amended as Section R9-21-210, former Section R9-21-208 renumbered and amended as Section R9-21-209 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-209 renumbered without change as Section R18-11-209 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-210. Site Specific Standards

- A. The Director shall adopt a site-specific standard by rule.
- B. The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
 1. Local physical, chemical, or hydrological conditions of a non-WOTUS protected surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a non-WOTUS protected surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in R18-11-215;
 3. Resident aquatic organisms that occur in a non-WOTUS protected surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in R18-11-215;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in R18-11-215. "Natural background" means the concentration of a pollutant in a non-WOTUS protected surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a non-WOTUS protected surface water.
- C. Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically defensible procedure. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 1. Identifies the pollutant;
 2. Describes the reach's boundaries;
 3. Describes the hydrologic regime of the waterbody;
 4. Describes the scientifically defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 5. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 6. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 7. Demonstrates that all designated uses are protected; and
 8. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective January 29, 1980 (Supp. 80-1). Amended subsection (A) effective April 17, 1984 (Supp. 84-2). Former Section R9-21-210 renumbered as Section R9-21-209, former Section R9-21-211 renumbered as Section R9-21-210 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-210 renumbered without change as Section R18-11-210 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-211. Enforcement of Non-permitted Discharges to Non-WOTUS Protected Surface Waters

- A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211 effective January 29, 1980 (Supp. 80-1). Amended subsections (D), (G) three (I), and added (J) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-211 renumbered as Section R9-21-210, former Section R9-21-212 renumbered as Section R9-21-211 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-211 renumbered and amended as Section R9-21-212, former Section R9-21-210 renumbered and amended as Section R9-21-211 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-211 renumbered without change as Section R18-11-211 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-212. Statements of Intent and Limitations on the Reach of Article 2

- A. Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.
- B. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified as non-WOTUS protected surface waters on the Protected Surface Waters List. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified on the Protected Surface Waters List.

- C. Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article.
- D. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-212 renumbered as Section R9-21-211, former Section R9-21-213 renumbered as Section R9-21-212 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-212 repealed, former Section R9-21-211 renumbered and amended as Section R9-21-212 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-212 renumbered without change as Section R18-11-212 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-213. Procedures for Determining Economic, Social, and Environmental Cost and Benefits

- A. The Director shall perform an economic, social, and environmental cost and benefits analysis that shows the benefits outweigh the costs before conducting any of the following rulemaking actions:
 1. Adopting a water quality standard that applies to non-WOTUS protected surface waters at a particular level or for a particular water category of non-WOTUS protected surface waters;
 2. Adding a non-WOTUS protected surface water to the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(4) apply; or
 3. Removing a non-WOTUS protected surface water from the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(6) apply.
- B. The economic, social, and environmental cost and benefit analysis must include:
 1. A justification of the valuation methodology used to quantify the costs or benefits of the rulemaking action;
 2. A reference to any study relevant to the economic, social, and environmental cost and benefit analysis that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of the costs and benefits of the rulemaking action;
 3. A description of any data on which an economic, social, and environmental cost and benefits analysis is based and an explanation of how the data was obtained and why the data is acceptable data.
 4. A description of the probable impact of the rulemaking on any existing AZPDES permits that are impacted by the rulemaking action;
 5. A description of the probable amount of additional AZPDES permits that will be required for known and ongoing point-source discharges after the rulemaking is completed that otherwise would not have been required if the Director did not undertake the rulemaking action; and
 6. The administrative and other costs to ADEQ associated with the proposed rulemaking.
- C. The Director shall publish a copy of the economic, social, and environmental cost and benefits analysis to the agency website

prior to filing any rulemaking materials during any of the rulemaking actions listed in subsection (A) of this rule.

- D. If for any reason enough data is not reasonably available to comply with the requirements of subsection (B) of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms.
- E. The Director is not required to prepare the economic, social, and environmental cost and benefits analysis required by this rule when:
 1. Adding or removing a WOTUS-protected surface water from the Protected Surface Waters List; or
 2. Adding a water to the Protected Surface Waters List on an emergency basis pursuant to A.R.S. § 49-221(G)(7).

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Former Section R9-21-213 renumbered as Section R9-21-212, former Section R9-21-103 renumbered as Section R9-21-213 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-213 renumbered without change as Section R9-21-214, new Section R9-21-213 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-213 renumbered without change as Section R18-11-213 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-214. Narrative Water Quality Standards for Non-WOTUS Protected Surface Waters

- A. A non-WOTUS protected surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the non-WOTUS protected surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or
 8. Change the color of the non-WOTUS protected surface water from natural background levels of color.
- B. A non-WOTUS protected surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard
- C. A non-WOTUS protected surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Former Section R9-21-213 renumbered without change as Section R9-21-214 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-214 renumbered without change as Section R18-11-214 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-215. Numeric Water Quality Standards for Non-WOTUS Protected Surface Waters

A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony-forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC AZ | PBC AZ |
|---|--------|--------|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

B. pH. The following water quality standards for non-WOTUS protected surface waters pH are expressed in standard units:

| pH | DWS AZ | FBC AZ, PBC AZ, A&Ww AZ, A&Wc AZ | AgI AZ | AgL AZ |
|---------|--------|----------------------------------|--------|--------|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww AZ | A&Wc AZ |
|---------|---------|
| 3.0° C | 1.0° C |

D. Suspended sediment concentration.

- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:
- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

| A&Wc AZ | A&Ww AZ |
|---------|---------|
| 25 | 80 |

E. Dissolved oxygen. A non-WOTUS protected surface water meets the water quality standard for dissolved oxygen when either:

- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
- The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|----------------|---|
| A&Ww AZ | 6.0 |
| A&Wc AZ | 7.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

F. Tables 1 through 17 prescribe water quality criteria for individual pollutants by designated use.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Table 1. Water Quality Criteria by Designated Use (see footnote)

| Parameter | CAS NUMBER | DWS AZ (µg/L) | FC AZ (µg/L) | FBC AZ (µg/L) | PBC AZ (µg/L) | A&Wc AZ Acute (µg/L) | A&Wc AZ Chronic (µg/L) | A&Ww AZ Acute (µg/L) | A&Ww AZ Chronic (µg/L) | AgI AZ (µg/L) | AgL AZ (µg/L) |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Coldwater AZ, Unionid Mussels Absent
 For the Aquatic and Wildlife Coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

Table A made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table B. WOTUS Protected Surface Waters

The waters listed in this table have been tentatively identified by ADEQ as WOTUS, under the law governing on 8/26/2022. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table B will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the WOTUS Protected Surface Waters Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|--|
| BW | Big Sandy River | Headwaters to Alamo Lake |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Francis Creek (OAW) | Headwaters to confluence with Burro Creek |
| BW | Kirkland Creek | Headwaters to confluence with Santa Maria River |
| BW | Trout Creek | Below confluence with unnamed tributary to confluence with Knight Creek |
| CG | Beaver Dam Wash | Headwaters to confluence with the Virgin River |
| CG | Bright Angel Creek | Headwaters to confluence with Roaring Springs Creek |
| CG | Bright Angel Creek | Below Roaring Spring Springs Creek to confluence with Colorado River |
| CG | Colorado River | Lake Powell to Lake Mead |
| CG | Crystal Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Deer Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Garden Creek | Headwaters to confluence with Pipe Creek |
| CG | Havasus Creek | From the Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Hermit Creek | Below Hermit Pack Trail crossing to confluence with the Colorado River |
| CG | Kanab Creek | Headwaters to confluence with the Colorado River |
| CG | Lake Mead | 36°06'18"/114°26'33" |
| CG | Lake Powell | 36°59'53"/111°08'17" |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Paria River | Utah border to confluence with the Colorado River |
| CG | Phantom Creek | Below confluence with unnamed tributary to confluence with Bright Angel Creek |
| CG | Pipe Creek | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Short Creek | Headwaters to confluence with Fort Pearce Wash |
| CG | Tapeats Creek | Headwaters to confluence with the Colorado River |
| CG | Thunder River | Headwaters to confluence with Tapeats Creek |
| CG | Vasey's Paradise | A spring at 36°29'52"/111°51'26" |
| CG | Virgin River | Headwaters to confluence with the Colorado River |
| CG | White Creek | Headwaters to confluence with unnamed tributary at 36°18'45"/112°21'03" |
| CG | White Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CL | A10 Backwater | 33°31'45"/114°33'19" |
| CL | A7 Backwater | 33°34'27"/114°32'04" |
| CL | Adobe Lake | 33°02'36"/114°39'26" |
| CL | Cibola Lake | 33°14'01"/114°40'31" |
| CL | Clear Lake | 33°01'59"/114°31'19" |
| CL | Colorado River | Lake Mead to Topock Marsh |
| CL | Colorado River | Topock Marsh to Morelos Dam |
| CL | Gila River | Painted Rock Dam to confluence with the Colorado River |
| CL | Hunter's Hole Backwater | 32°31'13"/114°48'07" |
| CL | Imperial Reservoir | 32°53'02"/114°27'54" |
| CL | Island Lake | 33°01'44"/114°36'42" |
| CL | Laguna Reservoir | 32°51'35"/114°28'29" |
| CL | Lake Havasu | 34°35'18"/114°25'47" |
| CL | Lake Mohave | 35°26'58"/114°38'30" |
| CL | Martinez Lake | 32°58'49"/114°28'09" |
| CL | Mittry Lake | 32°49'17"/114°27'54" |
| CL | Nortons Lake | 33°02'30"/114°37'59" |
| CL | Pretty Water Lake | 33°19'51"/114°42'19" |
| CL | Topock Marsh | 34°43'27"/114°28'59" |

| LC | Show Low Creek | Headwaters to confluence with Silver Creek |
| LC | Show Low Lake | 34°11'36"/110°00'12" |
| LC | Silver Creek | Headwaters to confluence with the Little Colorado River |
| LC | White Mountain Lake | 34°21'57"/109°59'21" |
| LC | Willow Creek | Headwaters to confluence with Clear Creek |
| LC | Zuni River | Headwaters to confluence with the Little Colorado River |
| MG | Agua Fria River | From State Route 169 to Lake Pleasant |
| MG | Ash Creek | Headwaters to confluence with Tex Canyon |
| MG | East Maricopa Floodway | From Brown and Greenfield Rds to the Gila River Indian Reservation Boundary |
| MG | Fain Lake | Town of Prescott Valley Park Lake 34°34'29"/112°21'06" |
| MG | Gila River | San Carlos Indian Reservation boundary to the Ashurst-Hayden Dam |
| MG | Gila River (EDW) | From the confluence with the Salt River to Gillespie Dam |
| MG | Hassayampa Lake | 34°25'45"/112°25'33" |
| MG | Hassayampa River | Below unnamed tributary to the Buckeye Irrigation Company Canal |
| MG | Hassayampa River | Headwaters to confluence with unnamed tributary at 34°26'09"/112°30'32" |
| MG | Lake Pleasant | 33°53'46"/112°16'29" |
| MG | Little Ash Creek | Headwaters to confluence with Ash Creek at 34°20'45.74"/112°4'17.26" |
| MG | Little Sycamore Creek | Headwaters to Sycamore Creek @ 34°21'39.13"/111°58'49.98" |
| MG | Mineral Creek (diversion tunnel and lined channel) | 33°12'24"/110°59'58" to 33°07'56"/110°58'34" |
| MG | Papago Park South Pond | Curry Road, Tempe 33°26'22"/111°55'55" |
| MG | Salt River | Verde River to 2 km below Granite Reef Dam |
| MG | Seven Springs Wash | Headwaters to Unnamed trib @ 33°57'58.66"/111°51'52.07" |
| MG | Tempe Town Lake | At Mill Avenue Bridge at 33°26'00"/111°56'26" |
| MG | Turkey Creek | Headwaters to confluence with unnamed tributary at 34°19'28"/112°21'33" |
| SC | Alum Gulch | Below 31°29'17"/110°44'25" to confluence with Sonoita Creek |
| SC | California Gulch | Headwaters To U.S./Mexico border |
| SC | Cienega Creek (OAW) | From confluence with Gardner Canyon to USGS gaging station (#09484600) |
| SC | Cox Gulch | Headwaters to Three R Canyons @ 31°28'28.03"/110°47'14.65" |
| SC | Holden Canyon Creek | Headwaters to U.S./Mexico border |
| SC | Julian Wash | Headwaters to confluence with the Santa Cruz River |
| SC | Nogales Wash | Headwaters to confluence with Potrero Creek |
| SC | Parker Canyon Creek | Below unnamed tributary to U.S./Mexico border |
| SC | Rillito Creek | Headwaters to confluence with the Santa Cruz River |
| SC | Romero Canyon Creek | Below unnamed tributary to confluence with Sutherland Wash |
| SC | Santa Cruz River | Headwaters to the at U.S./Mexico border |
| SC | Santa Cruz River | U.S./Mexico border to the Nogales International WWTP outfall at 31°27'25"/110°58'04" |
| SC | Santa Cruz River | Tabac Bridge to Agua Nueva WRF outfall at 32°17'04"/111°01'45" |
| SC | Santa Cruz River (EDW) | Agua Nueva WRF outfall to Baumgartner Road |
| SC | Sonoita Creek | Headwaters to the Town of Patagonia WWTP outfall at 31°32'25"/110°45'31" |
| SC | Sonoita Creek (EDW) | Town of Patagonia WWTP outfall to permanent groundwater upwelling point approximately 1600 feet downstream of outfall |
| SC | Sycamore Canyon | Headwaters to the U.S./Mexico border |
| SP | Aravaipa Creek | Below downstream boundary of Aravaipa Canyon Wilderness Area to confluence with the San Pedro River |
| SP | Aravaipa Creek (OAW) | Stowe Gulch to downstream boundary of Aravaipa Canyon Wilderness Area |
| SP | Bass Canyon Creek | Below confluence with unnamed tributary to confluence with Hot Springs Canyon Creek |
| SP | Bear Creek | Headwaters to U.S./Mexico border |
| SP | Black Draw | Headwaters to the U.S./Mexico border |
| SP | Carr Canyon Creek | Headwaters to confluence with unnamed tributary at 31°27'01"/110°15'48" |
| SP | Gold Gulch | Headwaters to U.S./Mexico border |
| SP | Ramsey Canyon Creek | Below Forest Service Road #110 to confluence with Carr Wash |
| SP | San Pedro River | U.S./ Mexico Border to Buehman Canyon |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table C. Historically Regulated as WOTUS and in Need of Confirmation

The waters listed in this table have historically been and will continue to be regulated as WOTUS unless ADEQ makes a determination that they are non-WOTUS. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Confirmation Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Table C made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-217. Best Management Practices for non-WOTUS Protected Surface Waters

- A.** The BMPs described in this rule are intended to ensure that activities within the ordinary high-water mark of perennial or intermittent non-WOTUS protected surface waters, or within the bed and bank of other waters that materially impact (i.e., are within 1/4 mile upstream of) non-WOTUS protected surface waters, do not violate applicable surface water quality standards in the non-WOTUS protected surface waters. For purposes of this Section, the activities described in the prior sentence will be referred to as “regulated activities.” Depending on the regulated activities conducted, not all of the BMPs described below may be applicable to a particular project. The owner or operator is responsible to consider the BMPs outlined below and to implement those necessary to ensure that the regulated activities will not violate applicable surface water quality standards in the non-WOTUS protected surface water.
- B.** The BMPs described below are not applicable to any activities that are addressed under an individual or general AZPDES permit that are otherwise regulated under A.R.S. Title 49.
- C.** Erosion and sedimentation control BMPs:
 - 1. When flow is present in any non-WOTUS protected surface waters within a project area, flow shall not be altered except to prevent erosion or pollution of any non-WOTUS protected surface waters.
 - 2. Any disturbance within the ordinary high-water mark of non-WOTUS protected surface waters or within the bed and banks of other waters, that is not intended to be permanently altered, shall be stabilized as soon as practicable to prevent erosion and sedimentation.
 - 3. When flow in any non-WOTUS protected surface water is sufficient to erode, carry, or deposit material, regulated activities shall cease until:
 - a. The flow decreases below the point where sediment movement ceases; or
 - b. Control measures have been undertaken, i.e., equipment and material easily transported by flow are protected within non-erodible barriers or moved outside the flow area.
 - 4. Silt laden or turbid water resulting from regulated activities should be managed in a manner to reduce sediment load prior to discharging.
 - 5. No washing or dewatering of fill material should occur within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters. Other than the replacement of native fill or material used to support vegetation rooting or growth, fill placed within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water must resist washout whether such resistance is derived via particle size limits, presence of a binder, vegetation, or other armoring.

D. Pollutant management BMPs:

- 1. If regulated activities are likely to violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water, operations shall cease until the problem is resolved or until control measures have been implemented.
- 2. Construction material and/or fill (other than native fill or that necessary to support revegetation) placed within surface waters as a result of regulated activities shall not include pollutants in concentrations that will violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water.

E. Construction phase BMPs:

- 1. Equipment staging and storage areas or fuel, oil, and other petroleum products storage and solid waste containment should not be located within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water.
- 2. Any equipment maintenance, washing, or fueling shall not be done within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters with the following exception: Equipment too large or unwieldy to be readily moved, such as large cranes, may be fueled and serviced in non-WOTUS protected surface waters (but outside of standing or flowing water) provided material specifically manufactured and sold as spill containment is in place during fueling/servicing.
- 3. All equipment shall be inspected for leaks, all leaks shall be repaired, and all repaired equipment shall be cleaned to remove any fuel or other fluid residue prior to use within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
- 4. Washout of concrete handling equipment shall not take place within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.

F. Post-construction BMPs:

- 1. Upon completion of regulated activities, areas within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters shall be promptly cleared of all forms, piling, construction residues, equipment, debris, or other obstructions.
- 2. If fully, partially, or occasionally submerged structures are constructed of cast-in-place concrete instead of pre-cast concrete, steps will be taken using sheet piling or temporary dams to prevent contact between water (instream and runoff) and the concrete until it cures and until any curing agents have evaporated or are no longer a pollutant threat.
- 3. Any permanent water crossings within the ordinary high-water mark of any perennial or intermittent in a non-WOTUS protected surface water (other than fords) shall

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

not be equipped with gutters, drains, scuppers, or other conveyances that allow untreated runoff (due to events equal to or lesser in magnitude than the design event for the crossing structure) to directly enter a non-WOTUS protected surface water if such runoff can be directed to a local stormwater drainage, containment, and/or treatment system.

4. Debris shall be cleared as needed from culverts, ditches, dips, and other drainage structures within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water to prevent clogging or conditions that may lead to a washout.
 5. Temporary structures constructed or imported materials shall be removed no later than upon completion of the regulated activities.
 6. Temporary structures constructed of native materials, if they provide an obstacle to flow or can contribute to or cause erosion, or cause changes in sediment load, shall be removed no later than upon completion of the regulated activities.
- G. Design consideration BMPs:**
1. All temporary structures constructed of imported materials and all permanent structures, including but not limited to, access roadways, culvert crossings, staging areas, material stockpiles, berms, dikes, and pads, shall be constructed so as to accommodate overtopping and resist washout by streamflow.
 2. Any temporary crossing, other than fords on native material, shall be constructed in such a manner so as to provide armoring of the stream channel. Materials used to provide this armoring shall not include anything easily transportable by flow. Examples of acceptable materials include steel plates, untreated wooden planks, pre-cast concrete planks or blocks. Examples of unacceptable materials include clay, silt, sand, and gravel finer than cobble (roughly fist-sized). The armoring shall, via mass, anchoring systems, or a combination of the two, resist washout.
- H. Notification.** The owner or operator of any regulated activities shall, five days prior to initiation of the regulated activities, submit a notice to ADEQ on a form that includes basic information including the GPS location, the waterbody ID of the nearest non-WOTUS protected surface water, general description of planned activities, types of BMPs to be employed during the project, and phone number and email for a contact person. Work may proceed after five calendar days have passed since the owner/operator provided notification to ADEQ unless ADEQ responds in writing to the contact person for the owner/operator.
- I. Exclusions:** The BMPs and notification requirements in this Section shall not apply to:
1. Activities that are already regulated under A.R.S. Title 49.
 2. Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 3. Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 4. Maintenance but not construction of drainage ditches.
 5. Construction and maintenance of irrigation ditches.
 6. Maintenance of structures as dams, dikes, and levees.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix A. Repealed**Historical Note**

Former Section R9-21-208, Appendices 1 through 9 renumbered and amended as new Appendix A adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

Appendix B. Repealed**Historical Note**

Former R9-21-209, Table 1 and Table 2 renumbered and amended as Appendix B adopted effective January 7, 1985 (Supp.85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

ARTICLE 3. RECLAIMED WATER QUALITY STANDARDS**R18-11-301. Definitions**

The terms in this Article have the following meanings:

“Direct reuse” has the meaning prescribed in R18-9-701(1).

“Disinfection” means a treatment process that uses oxidants, ultraviolet light, or other agents to kill or inactivate pathogenic organisms in wastewater.

“Filtration” means a treatment process that removes particulate matter from wastewater by passage through porous media.

“Gray water” means wastewater, collected separately from a sewage flow, that originates from a clothes washer, bathtub, shower, or sink, but it does not include wastewater from a kitchen sink, dishwasher, or a toilet.

“Industrial wastewater” means wastewater generated from an industrial process.

“Landscape impoundment” means a manmade lake, pond, or impoundment of reclaimed water where swimming, wading, boating, fishing, and other water-based recreational activities are prohibited. A landscape impoundment is created for storage, landscaping, or for aesthetic purposes only.

“NTU” means nephelometric turbidity unit.

“On-site wastewater treatment facility” has the meaning prescribed in A.R.S. § 49-201(24).

“Open access” means that access to reclaimed water by the general public is uncontrolled.

“Reclaimed water” has the meaning prescribed in A.R.S. § 49-201(31).

“Recreational impoundment” means a manmade lake, pond, or impoundment of reclaimed water where boating or fishing is an intended use of the impoundment. Swimming and other full-body recreation activities (for example, water-skiing) are prohibited in a recreational impoundment.

“Restricted access” means that access to reclaimed water by the general public is controlled.

“Secondary treatment” means a biological treatment process that achieves the minimum level of effluent quality defined by the federal secondary treatment regulation at 40 CFR § 133.102.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

“Sewage” means untreated wastes from toilets, baths, sinks, lavatories, laundries, and other plumbing fixtures in places of human habitation, employment, or recreation.

Historical Note

Adopted effective July 9, 1981 (Supp. 81-4). Former Section R9-21-301 renumbered without change as Section R18-11-301 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-302. Applicability

This Article applies to the direct reuse of reclaimed water, except for:

1. The direct reuse of gray water, or
2. The direct reuse of reclaimed water from an onsite wastewater treatment facility regulated by a general Aquifer Protection Permit under 18 A.A.C. 9, Article 3.

Historical Note

Adopted effective June 8, 1981 (Supp. 81-3). Amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-302 renumbered without change as Section R18-11-302 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-303. Class A+ Reclaimed Water

- A. Class A+ reclaimed water is wastewater that has undergone secondary treatment, filtration, nitrogen removal treatment, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A+ reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A+ reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
 3. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.

- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A+ reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.
- D. Class A+ reclaimed water is not required for any type of direct reuse. A person may use Class A+ reclaimed water for any type of direct reuse listed in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-303 renumbered without change as Section R18-11-303 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-304. Class A Reclaimed Water

- A. Class A reclaimed water is wastewater that has undergone secondary treatment, filtration, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in subsection (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tion (B)(2) before discharge to a reclaimed water distribution system.

- D. A person shall use Class A reclaimed water for a type of direct reuse listed as Class A in Table A. A person may use Class A reclaimed water for a type of direct reuse listed as Class B or Class C in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-304 renumbered without change as Section R18-11-304 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-305. Class B+ Reclaimed Water

- A. Class B+ reclaimed water is wastewater that has undergone secondary treatment, nitrogen removal treatment, and disinfection.
- B. An owner of a facility shall ensure that:
1. Class B+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
 2. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.
- C. Class B+ reclaimed water is not required for a type of direct reuse. A person may use Class B+ reclaimed water for a type of direct reuse listed as Class B or Class C in Table A. A person shall not use Class B+ reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-306. Class B Reclaimed Water

- A. Class B reclaimed water is wastewater that has undergone secondary treatment and disinfection.
- B. An owner of a facility shall ensure that Class B reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
1. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 2. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
- C. A person shall use a minimum of Class B reclaimed water for a type of direct reuse listed as Class B in Table A. A person may use Class B reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class B reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-307. Class C Reclaimed Water

- A. Class C reclaimed water is wastewater that has undergone secondary treatment in a series of wastewater stabilization ponds, including aeration, with or without disinfection.
- B. The owner of a facility shall ensure that:
1. The total retention time of Class C reclaimed water in wastewater stabilization ponds is at least 20 days.
 2. Class C reclaimed water meets the following criteria after treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven reclaimed water samples taken is less than 1000 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 4000 / 100 ml.
- C. A person shall use a minimum of Class C reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class C reclaimed water for a type of direct reuse listed as Class A or Class B in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-308. Industrial Reuse

- A. The reclaimed water quality requirements for the following direct reuse applications are industry-specific and shall be determined by the Department on a case-by-case basis in a reclaimed water permit issued by the Department under 18 A.A.C. 9, Article 7:
1. Direct reuse of industrial wastewater containing sewage.
 2. Direct reuse of industrial wastewater for the production or processing of any crop used as human or animal food.
- B. The Department shall use best professional judgment to determine the reclaimed water quality requirements needed to protect public health and the environment for a type of direct reuse specified in subsection (A).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-309. Reclaimed Water Quality Standards for an Unlisted Type of Direct Reuse

- A. The Department may prescribe in an individual reclaimed water permit issued under 18 A.A.C. 9, Article 7, reclaimed water quality requirements for a type of direct reuse not listed in Table A. Before permitting a direct reuse of reclaimed water not listed in Table A, the Department shall, using its best professional judgment, determine and require compliance with reclaimed water quality requirements needed to protect public health and the environment.
- B. Department may determine that Class A+, A, B+, B, or C reclaimed water is appropriate for a new type of direct reuse.
- C. The Department shall consider the following factors when prescribing reclaimed water quality requirements for a new type of direct reuse:
1. The risk to public health;
 2. The degree of public access to the site where the reclaimed water is reused and human exposure to the reclaimed water;
 3. The level of treatment necessary to ensure that the reclaimed water is aesthetically acceptable;
 4. The level of treatment necessary to prevent nuisance conditions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

5. Specific water quality requirements for the intended type of direct reuse;
6. The means of application of the reclaimed water;
7. The degree of treatment necessary to avoid a violation of surface water quality standards or aquifer water quality standards;
8. The potential for improper or unintended use of the reclaimed water;
9. The reuse guidelines, criteria, or standards adopted or recommended by the U.S. Environmental Protection Agency or other federal or state agencies that apply to the new type of direct reuse; and
10. Similar wastewater reclamation experience of reclaimed water providers in the United States.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

Table A. Minimum Reclaimed Water Quality Requirements for Direct Reuse

| Type of Direct Reuse | Minimum Class of Reclaimed Water Required |
|--|---|
| Irrigation of food crops | A |
| Recreational impoundments | A |
| Residential landscape irrigation | A |
| Schoolground landscape irrigation | A |
| Open access landscape irrigation | A |
| Toilet and urinal flushing | A |
| Fire protection systems | A |
| Spray irrigation of an orchard or vineyard | A |
| Commercial closed loop air conditioning systems | A |
| Vehicle and equipment washing (does not include self-service vehicle washes) | A |
| Snowmaking | A |
| Surface irrigation of an orchard or vineyard | B |
| Golf course irrigation | B |
| Restricted access landscape irrigation | B |
| Landscape impoundment | B |
| Dust control | B |
| Soil compaction and similar construction activities | B |
| Pasture for milking animals | B |
| Livestock watering (dairy animals) | B |
| Concrete and cement mixing | B |
| Materials washing and sieving | B |
| Street cleaning | B |
| Pasture for non-dairy animals | C |
| Livestock watering (non-dairy animals) | C |
| Irrigation of sod farms | C |
| Irrigation of fiber, seed, forage, and similar crops | C |
| Silviculture | C |

Note: Nothing in this Article prevents a wastewater treatment plant from using a higher quality reclaimed water for a type of direct reuse than the minimum class of reclaimed water listed in Table A. For example, a wastewater treatment plant may provide Class A reclaimed water for a type of direct reuse where Class B or Class C reclaimed water is acceptable.

Historical Note

New Table adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

ARTICLE 4. AQUIFER WATER QUALITY STANDARDS

R18-11-401. Definitions

In addition to the definitions contained in A.R.S. §§ 49-101 and 49-201, the terms of this Article shall have the following meanings:

1. "Beta particle and photon radioactivity from man-made radionuclides" means all radionuclides emitting beta particles or photons, except Thorium-232, Uranium-235, Uranium-238 and their progeny.
2. "Dose equivalent" means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements.
3. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
4. "Gross alpha particle activity" means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.
5. "Mg/l" means milligrams per liter.
6. "Millirem" means 1/1000 of a rem. A rem means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system.
7. "Non-drinking water protected use" means the protection and maintenance of aquifer water quality for a use other than for human consumption.
8. "pCi" means picocurie, or the quantity of radioactive material producing 2.22 nuclear transformations per minute.
9. "Total trihalomethanes" means the sum of the concentrations of the following trihalomethane compounds: trichloromethane (chloroform), dibromo-chloromethane, bromodichloromethane and tribromo-methane (bromoform).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3).

R18-11-402. Repealed

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Repealed effective August 14, 1992 (Supp. 92-3).

R18-11-403. Analytical Methods

Analysis of a sample to determine compliance with an aquifer water quality standard shall be in accordance with an analytical method specified in A.A.C. Title 9, Chapter 14, Article 6 or an alternative analytical method that is approved by the Director of the Arizona Department of Health Services pursuant to A.A.C. R9-14-610(C).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3). Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-404. Laboratories

A test result from a sample taken to determine compliance with an aquifer water quality standard shall be valid only if the sample has

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

been analyzed by a laboratory that is licensed by the Arizona Department of Health Services for the analysis performed.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-405. Narrative Aquifer Water Quality Standards

- A. A discharge shall not cause a pollutant to be present in an aquifer classified for a drinking water protected use in a concentration which endangers human health.
- B. A discharge shall not cause or contribute to a violation of a water quality standard established for a navigable water of the state.
- C. A discharge shall not cause a pollutant to be present in an aquifer which impairs existing or reasonably foreseeable uses of water in an aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-406. Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- A. The aquifer water quality standards in this Section apply to aquifers that are classified for drinking water protected use.
- B. The following are the aquifer water quality standards for inorganic chemicals:

| Pollutant | mg/L |
|----------------------------|--|
| Antimony | 0.006 |
| Arsenic | 0.05 |
| Asbestos | 7 million fibers/liter (longer than 10 mm) |
| Barium | 2 |
| Beryllium | 0.004 |
| Cadmium | 0.005 |
| Chromium | 0.1 |
| Cyanide (As Free Cyanide) | 0.2 |
| Fluoride | 4.0 |
| Lead | 0.05 |
| Mercury | 0.002 |
| Nickel | 0.1 |
| Nitrate (as N) | 10 |
| Nitrite (as N) | 1 |
| Nitrate and nitrite (as N) | 10 |
| Selenium | 0.05 |
| Thallium | 0.002 |

- C. The following are the aquifer water quality standards for organic chemicals:

| Pollutant | (mg/L) |
|----------------------------|--------|
| Benzene | 0.005 |
| Benzo (a) pyrene | 0.0002 |
| Carbon Tetrachloride | 0.005 |
| o-Dichlorobenzene | 0.6 |
| para-Dichlorobenzene | 0.075 |
| 1,2-Dichloroethane | 0.005 |
| 1,1-Dichloroethylene | 0.007 |
| cis-1,2-Dichloroethylene | 0.07 |
| trans-1,2-Dichloroethylene | 0.1 |
| 1,2-Dichloropropane | 0.005 |
| Dichloromethane | 0.005 |
| Di (2-ethylhexyl) adipate | 0.4 |
| Di (2-ethylhexyl) pthalate | 0.006 |

| | |
|---------------------------|------------|
| Ethylbenzene | 0.7 |
| Hexachlorobenzene | 0.001 |
| Hexachlorocyclopentadiene | 0.05 |
| Monochlorobenzene | 0.1 |
| Pentachlorophenol | 0.001 |
| Styrene | 0.1 |
| 2,3,7,8-TCDD (Dioxin) | 0.00000003 |
| Tetrachloroethylene | 0.005 |
| Toluene | 1 |
| Trihalomethanes (Total) | 0.10 |
| 1,2,4-Trichlorobenzene | 0.07 |
| 1,1,1-Trichloroethane | 0.20 |
| 1,1,2-Trichloroethane | 0.005 |
| Trichloroethylene | 0.005 |
| Vinyl Chloride | 0.002 |
| Xylenes (Total) | 10 |

- D. The following are the aquifer water quality standards for pesticides and polychlorinated biphenyls (PCBs):

| Pollutant | (mg/L) |
|---|---------|
| Alachlor | 0.002 |
| Atrazine | 0.003 |
| Carbofuran | 0.04 |
| Chlordane | 0.002 |
| Dalapon | 0.2 |
| 1,2-Dibromo-3-Chloropropane (DBCP) | 0.0002 |
| 2,4,-Dichlorophenoxyacetic Acid(2,4-D) | 0.07 |
| Dinoseb | 0.007 |
| Diquat | 0.02 |
| Endothall | 0.1 |
| Endrin | 0.002 |
| Ethylene Dibromide (EDB) | 0.00005 |
| Glyphosate | 0.7 |
| Heptachlor | 0.0004 |
| Heptachlor Epoxide | 0.0002 |
| Lindane | 0.0002 |
| Methoxychlor | 0.04 |
| Oxamyl | 0.2 |
| Picloram | 0.5 |
| Polychlorinated Biphenols (PCBs) | 0.0005 |
| Simazine | 0.004 |
| Toxaphene | 0.003 |
| 2,4,5-Trichlorophenoxypropionic Acid (2,4,5-TP or Silvex) | 0.05 |

- E. The following are the aquifer water quality standards for radionuclides:

1. The maximum concentration for gross alpha particle activity, including Radium-226 but excluding radon and uranium, shall not exceed 15 pCi/l.
2. The maximum concentration for combined Radium-226 and Radium-228 shall not exceed 5 pCi/l.
3. The average annual concentration of beta particle and photon radioactivity from man-made radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem/year.
4. Except for the radionuclides listed in this subsection, the concentration of man-made radionuclides causing 4 millirem total body or organ dose equivalents shall be calculated on the basis of a 2-liter-per-day drinking water intake using the 168-hour data listed in "Maximum Permissible Body Burdens and Maximum Permissible Con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

centration of Radionuclides in Air or Water for Occupational Exposure,” National Bureau of Standards Handbook 69, National Bureau of Commerce, as amended August 1963 (and no future editions), incorporated herein by reference and on file with the Office of the Secretary of State and with the Department. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirem/year. The following average annual concentrations are assumed to produce a total body or organ dose of 4 millirem/year:

| Radionuclide | Critical Organ | pCi/l |
|--------------|----------------|--------|
| Tritium | Total body | 20,000 |
| Strontium-90 | Bone Marrow | 8 |

- F. The aquifer water quality standard for microbiological contaminants is based upon the presence or absence of total coliforms in a 100-milliliter sample. If a sample is total coliform-positive, a 100-milliliter repeat sample shall be taken within two weeks of the time the sample results are reported. Any total coliform-positive repeat sample following a total coliform-positive sample constitutes a violation of the aquifer water quality standard for microbiological contaminants.
- G. The following are the aquifer water quality standards for turbidity:
- One nephelometric turbidity unit as determined by a monthly average except that five or fewer nephelometric turbidity units may be allowed if it can be determined that the higher turbidity does not interfere with disinfection, prevent maintenance of effective disinfectant agents in water supply distribution systems, or interfere with microbiological determinations.
 - Five nephelometric turbidity units based on an average of two consecutive days.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended effective May 26, 1994 (Supp. 94-2).

R18-11-407. Aquifer Water Quality Standards in Reclassified Aquifers

- A. All aquifers in the state are classified for drinking water protected use except for aquifers which are reclassified to a non-drinking water protected use pursuant to A.R.S. § 49-224 and A.A.C. R18-11-503.
- B. Aquifer water quality standards for drinking water protected use apply to reclassified aquifers except where expressly superseded by aquifer water quality standards adopted pursuant to subsection (C).
- C. The Director shall adopt, by rule, aquifer water quality standards for reclassified aquifers within one year of the date of the order reclassifying the aquifer to a nondrinking water protected use. The Director shall adopt aquifer water quality standards for reclassified aquifers only for pollutants that are specifically identified in a petition for reclassification as prescribed by A.R.S. § 49-223(E) and A.A.C. R18-11-503(B). Aquifer water quality standards for reclassified aquifers shall be sufficient to protect the use of the reclassified aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-408. Petition for Adoption of a Numeric Aquifer Water Quality Standard

- A. Any person may petition the Director to adopt, by rule, a numeric aquifer water quality standard for a pollutant for which no numeric aquifer water quality standard exists.
- B. Petitions for adoption of a numeric aquifer water quality standard shall be filed with the Department and shall comply with the requirements applicable to petitions for rule adoption as provided by A.R.S. § 41-1033 and A.A.C. R18-1-302, except as otherwise provided by A.R.S. § 49-223 or this Section.
- C. In addition to the requirements of A.A.C. R18-1-302, a petition for rule adoption to establish a numeric aquifer water quality standard shall include specific reference to:
- Technical information that the pollutant is a toxic pollutant.
 - Technical information upon which the Director reasonably may base the establishment of a numeric aquifer water quality standard.
 - Evidence that the pollutant that is the subject of the petition is or may in the future be present in an aquifer or part of an aquifer that is classified for drinking water protected use. Evidence may include, but is not limited to, any of the following:
 - A laboratory analysis of a water sample by a laboratory licensed by the Arizona Department of Health Services which indicates the presence of the pollutant in the aquifer.
 - A hydrogeological study which demonstrates that the pollutant that is the subject of the petition may be present in an aquifer in the future. The hydrogeological study shall include the following:
 - A description of the use that results in a discharge of the pollutant that is the subject of the petition.
 - A description of the mobility of the pollutant in the vadose zone and in the aquifer.
 - A description of the persistence of the pollutant in the vadose zone and in the aquifer.
- D. Within 180 calendar days of the receipt of a complete petition for rule adoption to establish a numeric aquifer water quality standard, the Director shall make a written determination of whether the petition should be granted or denied. The Director shall give written notice by regular mail of the determination to the petitioner.
- E. If the petition for rule adoption is granted, the Director shall initiate rulemaking proceedings to adopt a numeric aquifer water quality standard. The Director shall, within one year of the date that the petition for adoption of a numeric aquifer water quality standard is granted, either adopt a rule establishing a numeric aquifer water quality standard or publish a notice of termination of rulemaking in the Arizona Administrative Register.
- F. If the petition for rule adoption is denied, the Director shall issue a denial letter to the petitioner which explains the reasons for the denial. The denial of a petition for rule adoption to establish a numeric aquifer water quality standard is not subject to judicial review.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).

ARTICLE 5. AQUIFER BOUNDARY AND PROTECTED USE CLASSIFICATION**R18-11-501. Definitions**

In addition to the definitions contained in A.R.S. § 49-201, the words and phrases of this Article shall have the following meaning:

1. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
2. "Hardrock areas containing little or no water" means areas of igneous or metamorphic rock which do not yield usable quantities of water.
3. "Nondrinking water protected use" means the protection and maintenance of aquifer water quality for a use other than human consumption.
4. "Usable quantities" means five gallons of water per day.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-502. Aquifer Boundaries

- A. Except as provided in subsection (B), aquifer boundaries for the aquifers in this state are identified and defined as being identical to the hydrologic basin and subbasin boundaries, as found by the Director of the Department of Water Resources, Findings and Order In the Matter of The Designation of Groundwater Basins and Subbasins In The State of Arizona (dated June 21, 1984), pursuant to A.R.S. §§ 45-403 and 45-404, which is incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.
- B. Excluded from the boundaries of the aquifers are hard rock areas which contain little or no water, as identified in Plate 1 of the Department of Water Resources, Water Resource Hydro-

logic Map Series Report Number 2 (dated January 1981) and as further identified in the Bureau of Mines, University of Arizona County Geologic Map Series (individual county maps dated 1957 through 1960), which are incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.

- C. The Director may, by rule, modify or add an aquifer boundary provided that one or more of the following applies:
 1. The Department of Water Resources modifies the boundaries of its basins or subbasins.
 2. The Director is made aware of new technical information or data which supports refinement of an aquifer boundary.
- D. Facilities located outside of the boundaries defined in these rules shall be subject to A.R.S. § 49-241 except as provided therein.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-503. Petition for reclassification

- A. Any person may petition the Director to reclassify an aquifer from a drinking water protected use to a nondrinking water protected use pursuant to A.R.S. § 49-224(C).
- B. A written petition for reclassification pursuant to A.R.S. § 49-224(C) or A.R.S. § 49-224(D) shall be filed with the Department and shall include the following categories of information:
 1. The proposed protected use for which the reclassification is being requested.
 2. The pollutant and affected aquifer water quality standards for which the reclassification is being requested.
 3. A hydrogeologic report which demonstrates that the aquifer proposed for reclassification is or will be hydrologically isolated, to the extent described in A.R.S. § 49-224(C)(1). This report and demonstration of hydrologic isolation for the area containing such aquifer, and immediate adjacent geologic units, shall include at least the following:
 - a. Hydrogeologic area maps and cross sections.
 - b. An analysis of subsurface geology, including geologic and hydrologic separation.
 - c. Water level elevation or piezometric level contour maps.
 - d. Analysis of hydrologic characteristics of the aquifer and the immediate adjacent geologic units.
 - e. Description of existing water quality and analysis of water chemistry.
 - f. Projected annual quantity of water to be withdrawn.
 - g. Identification of pumping centers, cones of depression and areas of recharge.
 - h. A water balance.
 - i. Existing flow direction and evaluation of the effects of seasonal and future pumping on flow.
 - j. An evaluation as to whether the reclassification will contribute to or cause a violation of aquifer water quality standards in other aquifers, or in parts of the aquifer not being proposed for reclassification.
 4. Documentation demonstrating that water from the aquifer or part of the aquifer for which reclassification is pro-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

posed is not being used as drinking water. This documentation shall include at least the following:

- a. A list of all wells or springs including their location, ownership and use within the aquifer or part of the aquifer being proposed for reclassification.
 - b. Identification of groundwater withdrawal rights, on file with the Department of Water Resources, within the aquifer or part of the aquifer being proposed for reclassification.
 - c. A comprehensive list of agencies, persons and other information sources consulted for aquifer use documentation.
5. A cost-benefit analysis developed pursuant to the requirements of A.R.S. § 49-224(C)(3), except for petitions submitted pursuant to A.R.S. § 49-224(D). This analysis shall identify potential future uses of the aquifer being proposed for reclassification, as well as other opportunity costs associated with reclassification, and shall contain a description of the cost-benefit methodology used, including all assumptions, data, data sources and criteria considered and all supporting statistical analyses.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-504. Agency Action on Petition

- A. Upon receipt of a petition for reclassification, the Director shall review the petition for compliance with the requirements of R18-11-503. If additional information is necessary, the petitioner shall be notified of specific deficiencies in writing within 30 calendar days of receipt of the petition.
- B. Within 120 calendar days after receipt of a complete petition, and after consultation with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C), the Director shall make a final decision to grant or deny the petition and shall notify the petitioner of such decision and the reason for such determination in writing.
- C. Upon a decision to grant a petition for aquifer reclassification, the Director shall initiate proceedings for promulgation of aquifer water quality standards and, if applicable, for aquifer boundary designation for the reclassified aquifers.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-505. Public participation

- A. Within 30 days of receipt of a complete petition for reclassification filed pursuant to A.R.S. § 49-224(D), or if the Director deems it necessary to consider a reclassification under A.R.S. § 49-224(C), the Director shall give public notice of the proposed reclassification pursuant to A.A.C. R18-1-401.
- B. The Director shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification. The Director shall give notice of each public hearing and conduct the public hearing in accordance with the provisions of A.A.C. R18-1-402.

Historical Note

Adopted effective June 29, 1989 (Supp. 89-2).

R18-11-506. Rescission of Reclassification

The Director may, by rule, rescind an aquifer reclassification and return an aquifer to a drinking water protected use if he determines that any of the conditions under which the reclassification was

granted are no longer valid. If the Director initiates a change under this Section, he shall consult with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C).

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

ARTICLE 6. IMPAIRED WATER IDENTIFICATION

Article 6, consisting of Sections R18-11-601 through R18-11-606, made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-601. Definitions

In addition to the definitions established in A.R.S. §§ 49-201 and 49-231, and A.A.C. R18-11-101, the following terms apply to this Article:

1. "303(d) List" means the list of surface waters or segments required under section 303(d) of the Clean Water Act and A.R.S. Title 49, Chapter 2, Article 2.1, for which TMDLs are developed and submitted to EPA for approval.
2. "Attaining" means there is sufficient, credible, and scientifically defensible data to assess a surface water or segment and the surface water or segment does not meet the definition of impaired or not attaining.
3. "AZPDES" means the Arizona Pollutant Elimination Discharge System.
4. "Credible and scientifically defensible data" means data submitted, collected, or analyzed using:
 - a. Quality assurance and quality control procedures under A.A.C. R18-11-602;
 - b. Samples or analyses representative of water quality conditions at the time the data were collected;
 - c. Data consisting of an adequate number of samples based on the nature of the water in question and the parameters being analyzed; and
 - d. Methods of sampling and analysis, including analytical, statistical, and modeling methods that are generally accepted and validated by the scientific community as appropriate for use in assessing the condition of the water.
5. "Designated use" means those uses specified in 18 A.A.C. 11, Article 1 for each surface water or segment whether or not they are facing.
6. "EPA" means the U.S. Environmental Protection Agency.
7. "Impaired water" means a Navigable water for which credible scientific data exists that satisfies the requirements of A.R.S. § 49-232 and that demonstrates that the water should be identified pursuant to 33 United States Code § 1313(d) and the regulations implementing that statute. A.R.S. § 49-231(1).
8. "Laboratory detection limit" means a "Method Reporting Limit" (MRL) or "Reporting Limit" (RL). These analogous terms describe the laboratory reported value, which is the lowest concentration level included on the calibration curve from the analysis of a pollutant that can be quantified in terms of precision and accuracy.
9. "Monitoring entity" means the Department or any person who collects physical, chemical, or biological data used for an impaired water identification or a TMDL decision.
10. "Naturally occurring condition" means the condition of a surface water or segment that would have occurred in the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- absence of pollutant loadings as a result of human activity.
11. "Not attaining" means a surface water is assessed as impaired, but is not placed on the 303(d) List because:
 - a. A TMDL is prepared and implemented for the surface water;
 - b. An action, which meets the requirements of R18-11-604(D)(2)(h), is occurring and is expected to bring the surface water to attaining before the next 303(d) List submission; or
 - c. The impairment of the surface water is due to pollution but not a pollutant, for which a TMDL load allocation cannot be developed.
 12. "NPDES" means National Pollutant Discharge Elimination System.
 13. "Planning List" means a list of surface waters and segments that the Department will review and evaluate to determine if the surface water or segment is impaired and whether a TMDL is necessary.
 14. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. 33 U.S.C. 1362(6). Characteristics of water, such as dissolved oxygen, pH, temperature, turbidity, and suspended sediment are considered pollutants if they result or may result in the non-attainment of a water quality standard.
 15. "Pollution" means "the man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water." 33 U.S.C. 1362(19).
 16. "QAP" means a quality assurance plan detailing how environmental data operations are planned, implemented, and assessed for quality during the duration of a project.
 17. "Sampling event" means one or more samples taken under consistent conditions on one or more days at a distinct station or location.
 18. "SAP" means a site specific sampling and analysis plan that describes the specifics of sample collection to ensure that data quality objectives are met and that samples collected and analyzed are representative of surface water conditions at the time of sampling.
 19. "Spatially independent sample" means a sample that is collected at a distinct station or location. The sample is independent if the sample was collected:
 - a. More than 200 meters apart from other samples, or
 - b. Less than 200 meters apart, and collected to characterize the effect of an intervening tributary, outfall or other pollution source, or significant hydrographic or hydrologic change.
 20. "Temporally independent sample" means a sample that is collected at the same station or location more than seven days apart from other samples.
 21. "Threatened" means that a surface water or segment is currently attaining its designated use, however, trend analysis, based on credible and scientifically defensible data, indicates that the surface water or segment is likely to be impaired before the next listing cycle.
 22. "TMDL" means total maximum daily load.
 23. "TMDL decision" means a decision by the Department to:
 - a. Prioritize an impaired water for TMDL development,
 - b. Develop a TMDL for an impaired water, or
 - c. Develop a TMDL implementation plan.
 24. "Total maximum daily load" means an estimation of the total amount of a pollutant from all sources that may be added to a water while still allowing the water to achieve and maintain applicable surface water quality standards. Each total maximum daily load shall include allocations for sources that contribute the pollutant to the water, as required by section 303(d) of the clean water act (33 United States Code section 1313(d)) and regulations implementing that statute to achieve applicable surface water quality standards. A.R.S. § 49-231(4).
 25. "Water quality standard" means a standard composed of designated uses (classification of waters), the numerical and narrative criteria applied to the specific water uses or classification, the antidegradation policy, and moderating provisions, for example, mixing zones, site-specific alternative criteria, and exemptions, in A.A.C. Title 18, Chapter 11, Article 1.
 26. "WQARF" means the water quality assurance revolving fund established under A.R.S. § 49-282.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-602. Credible Data

- A. Data are credible and relevant to an impaired water identification or a TMDL decision when:
 1. Quality Assurance Plan. A monitoring entity, which contribute data for an impaired water identification or a TMDL decision, provides the Department with a QAP that contains, at a minimum, the elements listed in subsections (A)(1)(a) through (A)(1)(f). The Department may accept a QAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 - a. An approval page that includes the date of approval and the signatures of the approving officials, including the project manager and project quality assurance manager;
 - b. A project organization outline that identifies all key personnel, organizations, and laboratories involved in monitoring, including the specific roles and responsibilities of key personnel in carrying out the procedures identified in the QAP and SAP, if applicable;
 - c. Sampling design and monitoring data quality objectives or a SAP that meets the requirements of subsection (A)(2) to ensure that:
 - i. Samples are spatially and temporally representative of the surface water,
 - ii. Samples are representative of water quality conditions at the time of sampling, and
 - iii. The monitoring is reproducible;
 - d. The following field sampling information to assure that samples meet data quality objectives:
 - i. Sampling and field protocols for each parameter or parametric group, including the sampling methods, equipment and containers, sample preservation, holding times, and any analysis

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- proposed for completion in the field or outside of a laboratory;
- ii. Field and laboratory methods approved under subsection (A)(5);
 - iii. Handling procedures to identify samples and custody protocols used when samples are brought from the field to the laboratory for analysis;
 - iv. Quality control protocols that describe the number and type of field quality control samples for the project that includes, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - v. Procedures for testing, inspecting, and maintaining field equipment;
 - vi. Field instrument calibration procedures that describe how and when field sampling and analytical instruments will be calibrated;
 - vii. Field notes and records that describe the conditions that require documentation in the field, such as weather, stream flow, transect information, distance from water edge, water and sample depth, equipment calibration measurements, field observations of watershed activities, and bank conditions. Indicate the procedures implemented for maintaining field notes and records and the process used for attaching pertinent information to monitoring results to assist in data interpretation;
 - viii. Minimum training and any specialized training necessary to do the monitoring, that includes the proper use and calibration of field equipment used to collect data, sampling protocols, quality assurance/quality control procedures, and how training will be achieved;
- e. Laboratory analysis methods and quality assurance/quality control procedures that assure that samples meet data quality objectives, including:
 - i. Analytical methods and equipment necessary for analysis of each parameter, including identification of approved laboratory methods described in subsection (A)(5), and laboratory detection limits for each parameter;
 - ii. The name of the designated laboratory, its license number, if licensed by the Arizona Department of Health Services, and the name of a laboratory contact person to assist the Department with quality assurance questions;
 - iii. Quality controls that describe the number and type of laboratory quality control samples for the project, including, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - iv. Procedures for testing, inspecting, and maintaining laboratory equipment and facilities;
 - v. A schedule for calibrating laboratory instruments, a description of calibration methods, and a description of how calibration records are maintained; and
 - vi. Sample equipment decontamination procedures that outline specific methods for sample collection and preparation of equipment, identify the frequency of decontamination, and describe the procedures used to verify decontamination;
 - f. Data review, management, and use that includes the following:
 - i. A description of the data handling process from field to laboratory, from laboratory to data review and validation, and from validation to data storage and use. Include the role and responsibility of each person for each step of the process, type of database or other storage used, and how laboratory and field data qualifiers are related to the laboratory result;
 - ii. Reports that describe the intended frequency, content, and distribution of final analysis reports and project status reports;
 - iii. Data review, validation, and verification that describes the procedure used to validate and verify data, the procedures used if errors are detected, and how data are accepted, rejected, or qualified; and
 - iv. Reconciliation with data quality objectives that describes the process used to determine whether the data collected meets the project objectives, which may include discarding data, setting limits on data use, or revising data quality objectives.
2. Sampling and analysis plan.
 - a. A monitoring entity shall develop a SAP that contains, at a minimum, the following elements:
 - i. The experimental design of the project, the project goals and objectives, and evaluation criteria for data results;
 - ii. The background or historical perspective of the project;
 - iii. Identification of target conditions, including a discussion of whether any weather, seasonal variations, stream flow, lake level, or site access may affect the project and the consideration of these factors;
 - iv. The data quality objectives for measurement of data that describe in quantitative and qualitative terms how the data meet the project objectives of precision, accuracy, completeness, comparability, and representativeness;
 - v. The types of samples scheduled for collection;
 - vi. The sampling frequency;
 - vii. The sampling periods;
 - viii. The sampling locations and rationale for the site selection, how site locations are benchmarked, including scaled maps indicating approximate location of sites; and
 - ix. A list of the field equipment, including tolerance range and any other manufacturer's specifications relating to accuracy and precision.
 - b. The Department may accept a SAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be samples, the type of surface water, and the purpose of the sampling.
 3. The monitoring entity may include any of the following in the QAP or SAP:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- a. The name, title, and role of each person and organization involved in the project, identifying specific roles and responsibilities for carrying out the procedures identified in the QAP and SAP;
 - b. A distribution list of each individual and organization receiving a copy of the approved QAP and SAP;
 - c. A table of contents;
 - d. A health and safety plan;
 - e. The inspection and acceptance requirements for supplies;
 - f. The data acquisition that describes types of data not obtained through this monitoring activity, but used in the project;
 - g. The audits and response actions that describe how field, laboratory, and data management activities and sampling personnel are evaluated to ensure data quality, including a description of how the project will correct any problems identified during these assessments; and
 - h. The waste disposal methods that identify wastes generated in sampling and methods for disposal of those wastes.
4. Exceptions. The Department may determine that the following data are also credible and relevant to an impaired water identification or TMDL decision when data were collected, provided the conditions in subsections (A)(5), (A)(6), and (B) are met, and where the data were collected in the surface water or segment being evaluated for impairment:
 - a. The data were collected before July 12, 2002 and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2);
 - b. The data were collected after July 12, 2002 as part of an ongoing monitoring effort by a governmental agency and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2); or
 - c. The instream water quality data were or are collected under the terms of a NPDES or AZPDES permit or a compliance order issued by the Department or EPA, a consent decree signed by the Department or EPA, or a sampling program approved by the Department or EPA under WQARF or CERCLA, and the Department determines that the data yield results of comparable reliability to data collected under subsections (A)(1) and (A)(2).
 5. Data collection, preservation, and analytical procedures. The monitoring entity shall collect, preserve, and analyze data using methods of sample collection, preservation, and analysis established under A.A.C. R9-14-610.
 6. Laboratory. The monitoring entity shall ensure that chemical and toxicological samples are analyzed in a state-licensed laboratory, a laboratory exempted by the Arizona Department of Health Services for specific analyses, or a federal or academic laboratory that can demonstrate proper quality assurance/quality control procedures substantially equal to those required by the Arizona Department of Health Services, and shall ensure that the laboratory uses approved methods identified in A.A.C. R9-14-610.
- B. Documentation for data submission. The monitoring entity shall provide the Department with the following information either before or with data submission:
 1. A copy of the QAP or SAP, or both, revisions to a previously submitted QAP or SAP, and any other information necessary for the Department to evaluate the data under subsection (A)(4);
 2. The applicable dates of the QAP and SAP, including any revisions;
 3. Written assurance that the methods and procedures specified in the QAP and SAP were followed;
 4. The name of the laboratory used for sample analyses and its certification number, if the laboratory is licensed by the Arizona Department of Health Services;
 5. The quality assurance/quality control documentation, including the analytical methods used by the laboratory, method number, detection limits, and any blank, duplicate, and spike sample information necessary to properly interpret the data, if different from that stated in the QAP or SAP;
 6. The data reporting unit of measure;
 7. Any field notes, laboratory comments, or laboratory notations concerning a deviation from standard procedures, quality control, or quality assurance that affects data reliability, data interpretation, or data validity; and
 8. Any other information, such as complete field notes, photographs, climate, or other information related to flow, field conditions, or documented sources of pollutants in the watershed, if requested by the Department for interpreting or validating data.
 - C. Recordkeeping. The monitoring entity shall maintain all records, including sample results, for the duration of the listing cycle. If a surface water or segment is added to the Planning List or to the 303(d) List, the Department shall coordinate with the monitoring entity to ensure that records are kept for the duration of the listing.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-603. General Data Interpretation Requirements

- A. The Department shall use the following data conventions to interpret data for impaired water identifications and TMDL decisions:
 1. Data reported below laboratory detection limits.
 - a. When the analytical result is reported as $<X$, where X is the laboratory detection limit for the analyte and the laboratory detection limit is less than or equal to the surface water quality standard, consider the result as meeting the water quality standard:
 - i. Use these statistically derived values in trend analysis, descriptive statistics or modeling if there is sufficient data to support the statistical estimation of values reported as less than the laboratory detection limit; or
 - ii. Use one-half of the value of the laboratory detection limit in trend analysis, descriptive statistics, or modeling, if there is insufficient data to support the statistical estimation of values reported as less than the laboratory detection limit.
 - b. When the sample value is less than or equal to the laboratory detection limit but the laboratory detection limit is greater than the surface water quality standard, shall not use the result for impaired water identifications or TMDL decisions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

2. Identify the field equipment specifications used for each listing cycle or TMDL developed. A field sample measurement within the manufacturer's specification for accuracy meets surface water quality standards;
 3. Resolve a data conflict by considering the factors identified under the weight-of-evidence determination in R18-11-605(B);
 4. When multiple samples from a surface water or segment are not spatially or temporally independent, or when lake samples are from multiple depths, use the following resultant value to represent the specific dataset:
 - a. The appropriate measure of central tendency for the dataset for:
 - i. A pollutant listed in the surface water quality standards 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - ii. A chronic water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2;
 - iii. A surface water quality standard for a pollutant that is expressed as an annual or geometric mean;
 - iv. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - v. The surface water quality standard for radiocarbon in R18-11-109(G); or
 - vi. Except for chromium, all single sample maximum water quality standards in R18-11-112.
 - b. The maximum value of the dataset for:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and acute water quality standard in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1;
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A); or
 - iv. The 90th percentile water quality standard for nitrogen and phosphorus in R18-11-109(F) and R18-11-112.
 - c. The worst case measurement of the dataset for:
 - i. Surface water quality standard for dissolved oxygen under R18-11-109(E). For purposes of this subsection, worst case measurement means the minimum value for dissolved oxygen;
 - ii. Surface water quality standard for pH under R18-11-109(B). For purposes of this subsection, "worst case measurement" means both the minimum and maximum value for pH.
- B.** The Department shall not use the following data for placing a surface water or segment on the Planning List, the 303(d) List, or in making a TMDL decision.
1. Any measurement outside the range of possible physical or chemical measurements for the pollutant or measurement equipment,
 2. Uncorrected data transcription errors or laboratory errors, and
 3. An outlier identified through statistical procedures, where further evaluation determines that the outlier represents a valid measure of water quality but should be excluded from the dataset.
- C.** The Department may employ fundamental statistical tests if appropriate for the collected data and type of surface water when evaluating a surface water or segment for impairment or in making a TMDL decision. The statistical tests include descriptive statistics, frequency distribution, analysis of variance, correlation analysis, regression analysis, significance testing, and time series analysis.
- D.** The Department may employ modeling when evaluating a surface water or segment for impairment or in making a TMDL decision, if the method is appropriate for the type of waterbody and the quantity and quality of available data meet the requirements of R18-11-602. Modeling methods include:
1. Better Assessment Science Integrating Source and Non-point Sources (BASINS),
 2. Fundamental statistics, including regression analysis,
 3. Hydrologic Simulation Program-Fortran (HSPF),
 4. Spreadsheet modeling, and
 5. Hydrologic Engineering Center (HEC) programs developed by the Army Corps of Engineers.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-604. Types of Surface Waters Placed on the Planning List and 303(d) List

- A.** The Department shall evaluate, at least every five years, Arizona's surface waters by considering all readily available data.
1. The Department shall place a surface water or segment on:
 - a. The Planning List if it meets any of the criteria described in subsection (D), or
 - b. The 303(d) List if it meets the criteria for listing described in subsection (E).
 2. The Department shall remove a surface water or segment from the Planning List based on the requirements in R18-11-605(E)(1) or from the 303(d) List, based on the requirements in R18-11-605(E)(2).
 3. The Department may move surface waters or segments between the Planning List and the 303(d) List based on the criteria established in R18-11-604 and R18-11-605.
- B.** When placing a surface water or segment on the Planning List or the 303(d) List, the Department shall list the stream reach, derived from EPA's Reach File System or National Hydrography Dataset, or the entire lake, unless the data indicate that only a segment of the stream reach or lake is impaired or not attaining its designated use, in which case, the Department shall describe only that segment for listing.
- C.** Exceptions. The Department shall not place a surface water or segment on either the Planning List or the 303(d) List if the non-attainment of a surface water quality standard is due to one of the following:
1. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 2. The data were collected within a mixing zone or under a variance or nutrient waiver established in a NPDES or AZPDES permit for the specific parameter and the result does not exceed the alternate discharge limitation established in the permit. The Department may use data collected within these areas for modeling or allocating loads in a TMDL decision; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. An activity exempted under R18-11-117, R18-11-118, or a condition exempted under R18-11-119.
- D. Planning List.**
1. The Department shall:
 - a. Use the Planning List to prioritize surface waters for monitoring and evaluation as part of the Department's watershed management approach;
 - b. Provide the Planning List to EPA; and
 - c. Evaluate each surface water and segment on the Planning List for impairment based on the criteria in R18-11-605(D) to determine the source of the impairment.
 2. The Department shall place a surface water or segment on the Planning List based the criteria in R18-11-605(C). The Department may also include a surface water or segment on the Planning List when:
 - a. A TMDL is completed for the pollutant and approved by EPA;
 - b. The surface water or segment is on the 1998 303(d) List but the dataset used for the listing:
 - i. Does not meet the credible data requirements of R18-11-602, or
 - ii. Contains insufficient samples to meet the data requirements under R18-11-605(D);
 - c. Some monitoring data exist but there are insufficient data to determine whether the surface water or segment is impaired or not attaining, including:
 - i. A numeric surface water quality standard is exceeded, but there are not enough samples or sampling events to fulfill the requirements of R18-11-605(D);
 - ii. Evidence exists of a narrative standard violation, but the amount of evidence is insufficient, based on narrative implementation procedures and the requirements of R18-11-605(D)(3);
 - iii. Existing monitoring data do not meet credible data requirements in R18-11-602; or
 - iv. A numeric surface water quality standard is exceeded, but there are not enough sample results above the laboratory detection limit to support statistical analysis as established in R18-11-603(A)(1).
 - d. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act, but insufficient current or original monitoring data exist to determine whether the surface water or segment will meet current surface water quality standards;
 - e. Trend analysis using credible and scientifically defensible data indicate that surface water quality standards may be exceeded by the next assessment cycle;
 - f. The exceedance of surface water quality standards is due to pollution, but not a pollutant;
 - g. Existing data were analyzed using methods with laboratory detection limits above the numeric surface water quality standard but analytical methods with lower laboratory detection limits are available;
 - h. The surface water or segment is expected to attain its designated use by the next assessment as a result of existing or proposed technology-based effluent limitations or other pollution control requirements under local, state, or federal authority. The appropriate entity shall provide the Department with the following documentation to support placement on the Planning List:
 - i. Verification that discharge controls are required and enforceable;
 - ii. Controls are specific to the surface water or segment, and pollutant of concern;
 - iii. Controls are in place or scheduled for implementation; and
 - iv. There are assurances that the controls are sufficient to bring about attainment of water quality standards by the next 303(d) List submission; or
- E. 303(d) List.** The Department shall:
1. Place a surface water or segment on the 303(d) List if the Department determines:
 - a. Based on R18-11-605(D), that the surface water or segment is impaired due to a pollutant and that a TMDL decision is necessary; or
 - b. That the surface water or segment is threatened due to a pollutant and, at the time the Department submits a final 303(d) List to EPA, there are federal regulations implementing section 303(d) of the Clean Water Act that require threatened waters be included on the list.
 2. Provide public notice of the 303(d) List according to the requirements of A.R.S. § 49-232 and submit the 303(d) List according to section 303(d) of the Clean Water Act.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-605. Evaluating A Surface Water or Segment For Listing and Delisting

- A.** The Department shall compile and evaluate all reasonably current, credible, and scientifically defensible data to determine whether a surface water or segment is impaired or not attaining.
- B. Weight-of-evidence approach.**
1. The Department shall consider the following concepts when evaluating data:
 - a. Data or information collected during critical conditions may be considered separately from the complete dataset, when the data show that the surface water or segment is impaired or not attaining its designated use during those critical conditions, but attaining its uses during other periods. Critical conditions may include stream flow, seasonal periods, weather conditions, or anthropogenic activities;
 - b. Whether the data indicate that the impairment is due to persistent, seasonal, or recurring conditions. If the data do not represent persistent, recurring, or seasonal conditions, the Department may place the surface water or segment on the Planning List;
 - c. Higher quality data over lower quality data when making a listing decision. Data quality is established by the reliability, precision, accuracy, and represen-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tativeness of the data, based on factors identified in R18-11-602(A) and (B), including monitoring methods, analytical methods, quality control procedures, and the documented field and laboratory quality control information submitted with the data. The Department shall consider the following factors when determining higher quality data:

- i. The age of the measurements. Newer measurements are weighted heavier than older measurements, unless the older measurements are more representative of critical flow conditions;
 - ii. Whether the data provide a direct measure of an impact on a designated use. Direct measurements are weighted heavier than measurements of an indicator or surrogate parameter; or
 - iii. The amount or frequency of the measurements. More frequent data collection are weighted heavier than nominal datasets.
2. The Department shall evaluate the following factors to determine if the water quality evidence supports a finding that the surface water or segment is impaired or not attaining:
- a. An exceedance of a numeric surface water quality standard based on the criteria in subsections (C)(1), (C)(2), (D)(1), and (D)(2);
 - b. An exceedance of a narrative surface water quality standard based on the criteria in subsections (C)(3) and (D)(3);
 - c. Additional information that determines whether a water quality standard is exceeded due to a pollutant, suspected pollutant, or naturally occurring condition:
 - i. Soil type, geology, hydrology, flow regime, biological community, geomorphology, climate, natural process, and anthropogenic influence in the watershed;
 - ii. The characteristics of the pollutant, such as its solubility in water, bioaccumulation potential, sediment sorption potential, or degradation characteristics, to assist in determining which data more accurately indicate the pollutant's presence and potential for causing impairment; and
 - iii. Available evidence of direct or toxic impacts on aquatic life, wildlife, or human health, such as fish kills and beach closures, where there is sufficient evidence that these impacts occurred due to water quality conditions in the surface water.
 - d. Other available water quality information, such as NPDES or AZPDES water quality discharge data, as applicable.
 - e. If the Department determines that a surface water or segment does not merit listing under numeric water

quality standards based on criteria in subsections (C)(1), (C)(2), (D)(1), or (D)(2) for a pollutant, but there is evidence of a narrative standard exceedance in that surface water or segment under subsection (D)(3) as a result of the presence of the same pollutant, the Department shall list the surface water or segment as impaired only when the evidence indicates that the numeric water quality standard is insufficient to protect the designated use of the surface water or segment and the Department justifies the listing based on any of the following:

- i. The narrative standard data provide a more direct indication of impairment as supported by professionally prepared and peer-reviewed publications;
 - ii. Sufficient evidence of impairment exists due to synergistic effects of pollutant combinations or site-specific environmental factors; or
 - iii. The pollutant is bioaccumulative, relatively insoluble in water, or has other characteristics that indicate it is occurring in the specific surface water or segment at levels below the laboratory detection limits, but at levels sufficient to result in an impairment.
3. The Department may consider a single line of water quality evidence when the evidence is sufficient to demonstrate that the surface water or segment is impaired or not attaining.

C. Planning List.

- 1. When evaluating a surface water or segment for placement on the Planning List.
 - a. Consider at least ten spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the Planning List following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 1, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 80 percent confidence level using a binomial distribution for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 1, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 80 percent.

Table 1. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |
| 10 | 15 | 3 | 173 | 181 | 22 | 349 | 357 | 41 |

| 101 | 109 | 14 | 274 | 282 | 33 | 452 | 461 | 52 |
| 110 | 118 | 15 | 283 | 292 | 34 | 462 | 470 | 53 |
| 119 | 126 | 16 | 293 | 301 | 35 | 471 | 480 | 54 |
| 127 | 136 | 17 | 302 | 310 | 36 | 481 | 489 | 55 |
| 137 | 145 | 18 | 311 | 320 | 37 | 490 | 499 | 56 |
| 146 | 154 | 19 | 321 | 329 | 38 | 500 | | 57 |
| 155 | 163 | 20 | 330 | 338 | 39 | | | |
| 164 | 172 | 21 | 339 | 348 | 40 | | | |

2. When there are less than ten samples, the Department shall place a surface water or segment on the Planning List following subsection (B), if three or more temporally independent samples exceed the following surface water quality standards:
 - a. The surface water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - b. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - c. The surface water quality standard for radiochemicals in R18-11-109(G);
 - d. The surface water quality standard for dissolved oxygen under R18-11-109(E);
 - e. The surface water quality standard for pH under R18-11-109(B); or
 - f. The following surface water quality standards in R18-11-112:
 - i. Single sample maximum standards for nitrogen and phosphorus,
 - ii. All metals except chromium, or
 - iii. Turbidity.
3. The Department shall place a surface water or segment on the Planning List if information in subsections (B)(2)(c), (B)(2)(d), and (B)(2)(e) indicates that a narrative water

quality standard violation exists, but no narrative implementation procedure required under A.R.S. § 49-232(F) exists to support use of the information for listing.

- D. 303(d) List.
 1. When evaluating a surface water or segment for placement on the 303(d) List.
 - a. Consider at least 20 spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the 303(d) List, following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 2, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 90 percent confidence level using a binomial distribution, for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 2, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 90 percent.

Table 2. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |
| 20 | 25 | 5 | 174 | 182 | 24 | 344 | 352 | 43 |
| 26 | 32 | 6 | 183 | 191 | 25 | 353 | 361 | 44 |
| 33 | 40 | 7 | 192 | 199 | 26 | 362 | 370 | 45 |
| 41 | 47 | 8 | 200 | 208 | 27 | 371 | 379 | 46 |
| 48 | 55 | 9 | 209 | 217 | 28 | 380 | 388 | 47 |
| 56 | 63 | 10 | 218 | 226 | 29 | 389 | 397 | 48 |
| 64 | 71 | 11 | 227 | 235 | 30 | 398 | 406 | 49 |
| 72 | 79 | 12 | 236 | 244 | 31 | 407 | 415 | 50 |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | | | | | | | |
|-----|-----|----|-----|-----|----|-----|-----|----|
| 80 | 88 | 13 | 245 | 253 | 32 | 416 | 424 | 51 |
| 89 | 96 | 14 | 254 | 262 | 33 | 425 | 434 | 52 |
| 97 | 104 | 15 | 263 | 270 | 34 | 435 | 443 | 53 |
| 105 | 113 | 16 | 271 | 279 | 35 | 444 | 452 | 54 |
| 114 | 121 | 17 | 280 | 288 | 36 | 453 | 461 | 55 |
| 122 | 130 | 18 | 289 | 297 | 37 | 462 | 470 | 56 |
| 131 | 138 | 19 | 298 | 306 | 38 | 471 | 479 | 57 |
| 139 | 147 | 20 | 307 | 315 | 39 | 480 | 489 | 58 |
| 148 | 156 | 21 | 316 | 324 | 40 | 490 | 498 | 59 |
| 157 | 164 | 22 | 325 | 333 | 41 | 499 | 500 | 60 |
| 165 | 173 | 23 | 334 | 343 | 42 | | | |

2. The Department shall place a surface water or segment on the 303(d) List, following subsection (B) without the required number of samples or numeric water quality standard exceedances under subsection (D)(1), if either the following conditions occur:
 - a. More than one temporally independent sample in any consecutive three-year period exceeds the surface water quality standard in:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and the acute water quality standards in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1; or
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A).
 - b. More than one exceedance of an annual mean, 90th percentile, aquatic and wildlife chronic water quality standard, or a bacteria 30-day geometric mean water quality standard occurs, as specified in R18-11-109, R18-11-110, R18-11-112, or 18 A.A.C. 11, Article 1, Appendix A, Table 2.
 3. Narrative water quality standards exceedances. The Department shall place a surface water or segment on the Planning List if the listing requirements are met under A.R.S. § 49-232(F).
- E. Removing a surface water, segment, or pollutant from the Planning List or the 303(d) List.**
1. Planning List. The Department shall remove a surface water, segment, or pollutant from the Planning List when:
 - a. Monitoring activities indicate that:
 - i. There is sufficient credible data to determine that the surface water or segment is impaired under subsection (D), in which case the Department shall place the surface water or segment on the 303(d) List. This includes surface waters with an EPA approved TMDL when the Department determines that the TMDL strategy is insufficient for the surface water or segment to attain water quality standards; or
 - ii. There is sufficient credible data to determine that the surface water or segment is attaining all designated uses and standards.
 - b. All pollutants for the surface water or segment are delisted.
 2. 303(d) List. The Department shall:
 - a. Remove a pollutant from a surface water or segment from the 303(d) List based on one or more of the following criteria:
 - i. The Department developed, and EPA approved, a TMDL for the pollutant;
 - ii. The data used for previously listing the surface water or segment under R18-11-605(D) is superseded by more recent credible and scientifically defensible data meeting the requirements of R18-11-602, showing that the surface water or segment meets the applicable numeric or narrative surface water quality standard. When evaluating data to remove a pollutant from the 303(d) List, the monitoring entity shall collect the more recent data under similar hydrologic or climatic conditions as occurred when the samples were taken that indicated impairment, if those conditions still exist;
 - iii. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act;
 - iv. The surface water or segment no longer meets the criteria for impairment for the specific narrative water quality standard based on a change in narrative water quality standard implementation procedures;
 - v. A re-evaluation of the data indicate that the surface water or segment does not meet the criteria for impairment because of a deficiency in the original analysis; or
 - vi. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 - b. Remove a surface water, segment, or pollutant from the 303(d) List, based on criteria that are no more stringent than the listing criteria under subsection (D);
 - c. Remove a surface water or segment from the 303(d) List if all pollutants for the surface water or segment are removed from the list;
 - d. Remove a surface water, segment, or pollutant, from the 303(d) List and place it on the Planning List, if:
 - i. The surface water, segment or pollutant was on the 1998 303(d) List and the dataset used in the original listing does not meet the credible data requirements under R18-11-602, or contains insufficient samples to meet the data requirements under subsection (D); or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- ii. The monitoring data indicate that the impairment is due to pollution, but not a pollutant.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-606. TMDL Priority Criteria for 303(d) Listed Surface Waters or Segments

- A. In addition to the factors specified in A.R.S. § 49-233(C), the Department shall consider the following when prioritizing an impaired water for development of TMDLs:
 - 1. A change in a water quality standard;
 - 2. The date the surface water or segment was added to the 303(d) List;
 - 3. The presence in a surface water or segment of species listed as threatened or endangered under section 4 of the Endangered Species Act;
 - 4. The complexity of the TMDL;
 - 5. State, federal, and tribal policies and priorities; and
 - 6. The efficiencies of coordinating TMDL development with the Department's surface water monitoring program, the watershed monitoring rotation, or with remedial programs.
- B. The Department shall prioritize an impaired surface water or segment for TMDL development based on the factors specified in A.R.S. § 49-233(C) and subsection (A) as follows:
 - 1. Consider an impaired surface water or segment a high priority if:
 - a. The listed pollutant poses a substantial threat to the health and safety of humans, aquatic life, or wildlife based on:
 - i. The number and type of designated uses impaired;
 - ii. The type and extent of risk from the impairment to human health, aquatic life, or wildlife;
 - iii. The pollutant causing the impairment, or
 - iv. The severity, magnitude, and duration the surface water quality standard was exceeded;
 - b. A new or modified individual NPDES or AZPDES permit is sought for a new or modified discharge to the impaired water;
 - c. The listed surface water or segment is listed as a unique water in A.A.C. R18-11-112 or is part of an area classified as a "wilderness area," "wild and scenic river," or other federal or state special protection of the water resource;
 - d. The listed surface water or segment contains a species listed as threatened or endangered under the federal Endangered Species Act and the presence of the pollutant in the surface water or segment is likely to jeopardize the listed species;
 - e. A delay in conducting the TMDL could jeopardize the Department's ability to gather sufficient credible data necessary to develop the TMDL;
 - f. There is significant public interest and support for the development of a TMDL;
 - g. The surface water or segment has important recreational and economic significance to the public; or
 - h. The pollutant is listed for eight years or more.
 - 2. Consider an impaired surface water or segment a medium priority if:
 - a. The surface water or segment fails to meet more than one designated use;
 - b. The pollutant exceeds more than one surface water quality standard;
 - c. A surface water quality standard exceedance is correlated to seasonal conditions caused by natural events, such as storms, weather patterns, or lake turnover;
 - d. It will take more than two years for proposed actions in the watershed to result in the surface water attaining applicable water quality standards;
 - e. The type of pollutant and other factors relating to the surface water or segment make the TMDL complex; or
 - f. The administrative needs of the Department, including TMDL schedule commitments with EPA, permitting requirements, or basin priorities that require completion of the TMDL.
 - 3. Consider an impaired surface water or segment a low priority if:
 - a. The Department has formally submitted a proposal to delist the surface water, segment, or pollutant to EPA based on R18-11-605(E)(2). If the Department makes the submission outside the listing process cycle, the change in priority ranking will not be effective until EPA approves the submittal;
 - b. The Department has modified, or formally proposed for modification, the designated use or applicable surface water quality standard, resulting in an impaired water no longer being impaired, but the modification has not been approved by EPA;
 - c. The surface water or segment is expected to attain surface water quality standards due to any of the following:
 - i. Recently instituted treatment levels or best management practices in the drainage area,
 - ii. Discharges or activities related to the impairment have ceased, or
 - iii. Actions have been taken and controls are in place or scheduled for implementation that will likely to bring the surface water back into compliance;
 - d. The surface water or segment is ephemeral or intermittent. The Department shall re-prioritize the surface water or segment if the presence of the pollutant in the listed water poses a threat to the health and safety of humans, aquatic life, or wildlife using the water, or the pollutant is contributing to the impairment of a downstream perennial surface water or segment;
 - e. The pollutant poses a low ecological and human health risk;
 - f. Insufficient data exist to determine the source of the pollutant load;
 - g. The uncertainty of timely coordination with national and international entities concerning international waters;
 - h. Naturally occurring conditions are a major contributor to the impairment; and
 - i. No documentation or effective analytical tools exist to develop a TMDL for the surface water or segment with reasonable accuracy.
- C. The Department will target surface waters with high priority factors in subsections (B)(1)(a) through (B)(1)(d) for initiation of TMDLs within two years following EPA approval of the 303(d) List.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. The Department may shift priority ranking of a surface water or segment for any of the following reasons:
1. A change in federal, state, or tribal policies or priorities that affect resources to complete a TMDL;
 2. Resource efficiencies for coordinating TMDL development with other monitoring activities, including the Department's ambient monitoring program that monitors watersheds on a five-year rotational basis;
 3. Resource efficiencies for coordinating TMDL development with Department remedial or compliance programs;
 4. New information is obtained that will revise whether the surface water or segment is a high priority based on factors in subsection (B); and
 5. Reduction or increase in staff or budget involved in the TMDL development.
- E. The Department may complete a TMDL initiated before July 12, 2002 for a surface water or segment that was listed as impaired on the 1998 303(d) List but does not qualify for listing under the criteria in R18-11-605, if:
1. The TMDL investigation establishes that the water quality standard is not being met and the allocation of loads is expected to bring the surface water into compliance with standards,
 2. The Department estimates that more than 50 percent of the cost of completing the TMDL has been spent,
 3. There is community involvement and interest in completing the TMDL, or
 4. The TMDL is included within an EPA-approved state workplan initiated before July 12, 2002.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.
16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.
2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.
3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.
4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.
5. Contract with other agencies, including laboratories, in furthering any department program.
6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.
7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.
8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.
9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
 - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 - (c) Maintenance but not construction of drainage ditches.
 - (d) Construction and maintenance of irrigation ditches.
 - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.
7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.
12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.
13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.
2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

[49-221. Water quality standards in general: protected surface waters list](#)

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-WOTUS protected surface waters, the director shall apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to paragraph 2 of this subsection. Rules regarding the following shall not be adopted or applied as water quality standards for non-WOTUS protected surface waters:

- (a) Antidegradation.
- (b) Antidegradation criteria.
- (c) Outstanding Arizona waters.

2. Adopt, by rule, water quality standards for non-WOTUS protected surface waters, by December 31, 2022, consistent with paragraph 1 of this subsection and as determined necessary in the rulemaking process. In adopting those standards, the director shall consider the unique characteristics of this state's surface waters and the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

- 1. The protection of the public health and the environment.
- 2. The uses that have been made, are being made or with reasonable probability may be made of these waters.
- 3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
- 4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
- 5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
- 6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

- 1. The protection of public health and the environment.
- 2. The uses that are being made or may be made of the reclaimed water.
- 3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

- (i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.
- (ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected surface waters list. The department shall publish the initial list on the department's website and in the Arizona administrative register within thirty days after September 29, 2021. Not later than December 31, 2022, the department shall adopt by rule the protected surface waters list, including procedures for determining economic, social and environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action pursuant to title 41, chapter 6, article 10 and may be appealed by any party that provides evidence of an actual adverse effect that the party appealing the decision would suffer as a result of the director's decision. All of the following apply to the protected surface water list:

1. The protected surface waters list shall include:

(a) All WOTUS.

(b) Any perennial, intermittent and ephemeral reaches and any impoundments of the following rivers, not including tributaries or reaches of waters wholly within tribal jurisdiction or reaches of waters outside of the United States:

(i) The Bill Williams river, from the confluence of the Big Sandy and Santa Maria rivers at 113°31'38.617"w, 34°18'22.373"n, to its confluence with the Colorado river at 114°8'9.854"w, 34°18'9.33"n.

(ii) The Colorado river, from the Arizona-Utah border at 111°32'35.741"w, 36°58'51.698"n, to the Arizona-Mexico border at 114°43'12.564"w, 32°43'6.218"n.

(iii) The Gila river, from the Arizona-New Mexico border at 109°2'52.8"w, 32°41'11.2015"n, to the confluence with the Colorado river at 114°33'28.145"w, 32°43'14.408"n.

(iv) The Little Colorado river, from the confluence of the east and west forks of the Little Colorado river at 109°28'7.131"w, 33°59'39.852"n, to its confluence with the Colorado river at 111°49'4.693"w, 36°12'10.243"n.

(v) The Salt river, from the confluence of the Black and White rivers at 110°13'39.5"w, 33°44'6.082"n, to the confluence with the Gila river at 112°18'5.704"w, 33°22'42.978"n.

(vi) The San Pedro river, from the Arizona-Mexico border at 110°9'1.704"w, 31°20'2.387"n, to the confluence with the Gila river at 110°47'0.905"w, 32°59'5.671"n.

(vii) The Santa Cruz river, from its origins in the Canelo Hills of southeastern Arizona at 110°37'3.968"w, 31°27'39.21"n, to its confluence with the Gila river at 111°33'26.02"w, 32°41'39.058"n.

(viii) The Verde river, from Sullivan lake at 112°28'10.588"w, 34°52'11.136"n, to its confluence with the Salt river at 111°39'48.32"w, 33°33'20.538"n.

(c) Any non-WOTUS waters of the state that are added under paragraphs 3 and 4 of this subsection.

2. Notwithstanding paragraph 1 of this subsection, the protected surface waters list shall not contain any of the following non-WOTUS waters:

(a) Canals in the Yuma project and ditches, canals, pipes, impoundments and other facilities that are operated by districts organized under title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for human consumption, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner and operator of the ditch or canal until the owner and operator withdraws its request.

(b) Irrigated areas, including fields flooded for agricultural production.

(c) Ornamental and urban ponds and lakes such as those owned by homeowners' associations and golf courses, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the ornamental or urban pond or lake until the owner withdraws its request.

(d) Swimming pools and other bodies of water that are regulated pursuant to section 49-104, subsection B.

(e) Livestock and wildlife water tanks and aquaculture tanks that are not constructed within a protected surface water.

(f) Stormwater control features.

(g) Groundwater recharge, water reuse and wastewater recycling structures, including underground storage facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the groundwater recharge, water reuse or wastewater recycling structure until the owner withdraws its request.

(h) Water-filled depressions created as part of mining or construction activities or pits excavated to obtain fill, sand or gravel.

(i) All waste treatment systems components, including constructed wetlands, lagoons and treatment ponds, such as settling or cooling ponds, designed to either convey or retain, concentrate, settle, reduce or remove pollutants, either actively or passively, from wastewater before discharge or to eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those prescribed in paragraph 1, subdivision (b) of this subsection.

(l) Lakes and ponds owned and managed by the United States department of defense and other surface waters located on and that do not leave United States department of defense property, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the United States department of defense until it withdraws its request.

3. Unless listed in paragraph 2 of this subsection, the director shall add the following non-WOTUS surface waters to the protected surface waters list:

(a) All lakes, ponds and reservoirs that are public waters used as a drinking source, for recreational or commercial fish consumption or for water-based recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent tributaries to the Bill Williams river, the Colorado river, the Gila river, the Little Colorado river, the Salt river, the San Pedro river, the Santa Cruz river and the Verde river.

- (d) Perennial or intermittent public waters used for recreational or commercial fish consumption.
 - (e) Perennial or intermittent public waters used for water-based recreation such as swimming, wading, boating and other types of recreation in and on the water.
 - (f) Perennial or intermittent wetlands adjacent to waters on the protected surface waters list.
 - (g) Perennial or intermittent waters of the state that cross into another state, the Republic of Mexico or the reservation of a federally recognized tribe.
4. The director may add additional non-WOTUS surface waters to the protected surface waters list if all of the following apply:
- (a) The water is not required to be listed under paragraph 1 or 3 of this subsection.
 - (b) The water is not excluded under paragraph 2 of this subsection.
 - (c) The economic, environmental and social benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list.
5. The director shall remove any erroneously listed, non-WOTUS waters from the protected surface waters list when the water is excluded under paragraph 2 of this subsection and shall not regulate discharges to those waters in the interim.
6. The director shall remove non-WOTUS waters from the protected surface waters list when the water is not required to be listed under paragraph 3 of this subsection and the economic, environmental and social benefits of removing the water outweigh the economic, environmental and social costs of retaining the water on the list.
7. The director, on an emergency basis, may add a water to the protected surface waters list if the director discovers an imminent and substantial danger to public health or welfare or the environment, if the water would otherwise qualify to be added under paragraph 3 of this subsection. Notwithstanding any other law, the emergency addition shall take effect immediately on the director's determination that describes the imminent and substantial danger in writing. Within thirty days after the director's determination, the department shall publish a notice of that determination in the Arizona administrative register and on the department's website. Waters added under this subsection shall be incorporated into the protected surface waters list during the next rulemaking that follows the addition.

[49-223. Aquifer water quality standards](#)

- A. Primary drinking water maximum contaminant levels established by the administrator before August 13, 1986 are adopted as drinking water aquifer water quality standards. The director may only adopt additional aquifer water quality standards by rule. Within one year after the administrator establishes additional primary drinking water maximum contaminant levels, the director shall open a rule making docket pursuant to section 41-1021 for adoption of those maximum contaminant levels as drinking water aquifer water quality standards. If substantial opposition is demonstrated in the rule making docket regarding a particular constituent, the director may adopt for that constituent the maximum contaminant level as a drinking water aquifer water quality standard upon making a finding that this level is appropriate for adoption in Arizona as an aquifer water quality standard. In making this finding, the director shall consider whether the assumptions about technologies, costs, sampling and analytical methodologies and public health risk reduction used by the administrator in developing and implementing the maximum contaminant level are appropriate for establishing a drinking water aquifer water quality standard. For purposes of this subsection "substantial opposition" means information submitted to the director that explains with reasonable specificity why the maximum contaminant level is not appropriate as an aquifer water quality standard.
- B. The director may adopt by rule numeric drinking water aquifer water quality standards for pollutants for which the administrator has not established primary drinking water maximum contaminant levels or for which a maximum contaminant level has been established but the director has determined it to be inappropriate as an aquifer water quality standard pursuant to subsection A of this section. These standards shall be based on the protection of human health. In establishing numeric drinking water aquifer water quality standards, the director shall rely on technical protocols appropriate for the development of aquifer water quality standards and shall base the standards on credible medical and toxicological evidence that has been subjected to peer review.
- C. Any person may petition the director to adopt a numeric drinking water aquifer quality standard for any pollutant for which no drinking water aquifer quality standard exists. The director shall grant the petition and institute rule making proceedings adopting a numeric standard as provided under subsection B of this section within one hundred eighty days if the petition shows that the pollutant is a toxic pollutant, that the pollutant has been, or may in the future be, detected in any of the state's drinking water aquifers, and that there exists technical information on which a numeric standard might reasonably be based. Within one year of the commencement of the rule making proceeding, the director shall either adopt a numeric standard or make and publish a finding that, pursuant to subsection B of this section, the development of a numeric standard is not possible. The decision to not adopt a numeric standard shall, for purposes of judicial review, be treated in the same manner as a rule adopted pursuant to title 41, chapter 6.
- D. For purposes of assessing compliance with each aquifer water quality standard adopted pursuant to this section, the director shall for purposes of articles 3 and 4 of this chapter, and may for purposes of other provisions of this title, identify sampling and analytical protocols appropriate for detecting and measuring the pollutant in the aquifers in the state.
- E. Within one year from the reclassification of an aquifer to a non-drinking water status, pursuant to section 49-224, the director shall adopt water quality standards for that aquifer. For any pollutants which were not the basis for the reclassification, the applicable standard shall be identical with the standard for those pollutants adopted pursuant to subsections A and B of this section. For any pollutants which were the basis for reclassification, the standard shall be sufficient to achieve the purpose for which the aquifer was reclassified but shall minimize unnecessary degradation of the aquifer by taking into consideration the potential long-term uses of the aquifer and the short-term and long-term benefits of the activities resulting in discharges into the aquifer.
- F. The director shall adopt water quality standards for an aquifer for which a petition has been submitted pursuant to section 49-224, subsection D sufficient to achieve the non-drinking water use for which that aquifer was classified, taking into consideration the potential long-term uses of that aquifer and the short-term and long-term benefits of the discharging activities creating that aquifer.
- G. In any action pursuant to this title, aquifer water quality protection provisions, including monitoring requirements, may be imposed only for pollutants for which aquifer water quality standards have been established that are likely to be present in a discharge. Indicator parameters and quality assurance parameters appropriate for such pollutants also may be specified.

49-224. Aquifer identification, classification and reclassification

A. Not later than June 30, 1987 the director shall, by rule, identify and define the boundaries of all aquifers in this state utilizing, to the maximum extent possible, data available from the department of water resources.

B. All aquifers in this state identified and defined under subsection A of this section and any other aquifers subsequently discovered, identified and defined shall be classified for drinking water protected use unless the classification is changed in the manner provided in subsection C of this section.

C. The director, after consulting with the appropriate groundwater users advisory council established pursuant to title 45, chapter 2, article 2 if the aquifer is in an active management area, and a public hearing held pursuant to section 49-208, may change the classification of an aquifer or part of an aquifer for a protected use other than drinking water on making all of the following findings:

1. The identified aquifer or part of an aquifer is or will be so hydrologically isolated from other aquifers or other parts of the same aquifer that there is no reasonable probability that poorer quality water from the identified aquifer or part of an aquifer will cause or contribute to a violation of aquifer water quality standards in other aquifers or parts of the same aquifer.

2. Water from the identified aquifer or part of an aquifer is not being used as drinking water.

3. The short-term and long-term benefits to the public that would result from the degradation of the quality of the water in the identified aquifer or part of an aquifer below standards established pursuant to section 49-223, subsections A and B would significantly outweigh the short-term and long-term costs to the public of such degradation. Benefits and costs to be considered include economic, social and environmental.

D. Owners or operators of facilities whose discharges are solely responsible for creating an aquifer may petition the director for a classification of the aquifer for a non-drinking water use. The director may, by rule, classify that aquifer for a non-drinking water use upon making the findings prescribed in subsection C, paragraphs 1 and 2 of this section.

E. The director shall provide for public participation in proceedings under this section pursuant to section 49-208 and shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification.

E-1.

DEPARTMENT OF CHILD SAFETY
Title 21, Chapter 8, Article 1

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: March 12, 2025

SUBJECT: DEPARTMENT OF CHILD SAFETY
Title 21, Chapter 8, Article 1

Summary

This Five-Year Review Report (5YRR) from the Department of Child Safety (Department) relates to fourteen (14) rules in Title 21, Chapter 8, Article 1 regarding Life Safety Inspections for Foster Homes and Child Welfare Agency Facilities. Specifically, A.R.S. § 8-504 requires the Department to inspect child welfare agencies and foster homes for sanitation, fire, and other actual and potential hazards. The Life Safety Inspection Unit is a unit within the Department's Office of Licensing and Regulation (OLR) which schedules and conducts these inspections.

In the prior 5YRR for these rules, which was approved by the Council in March 2020, the Department proposed to amend four (4) rules to improve clarity, conciseness, understandability, effectiveness, enforcement and consistency with other rules and statutes. The Department indicates it completed the prior proposed course of action indicated in the agency's previous 5YRR and the rules were amended by final rulemaking which became effective June 6, 2022.

Proposed Action

In the current report, the Department does not propose to take any action regarding the rules.

1. **Has the agency analyzed whether the rules are authorized by statute?**

The Department cites both general and specific statutory authority for these rules.

2. **Summary of the agency's economic impact comparison and identification of stakeholders:**

The Department's OLR is authorized by Arizona Revised Statutes to license foster home and child welfare agencies. The Department indicates the purpose of regulating Department foster homes and child welfare agencies is to protect vulnerable children receiving services through the establishment and enforcement of safe standards of care. The Department states that A.R.S. § 8-504 requires the Department to inspect child welfare agencies and foster homes for sanitation, fire, and other potential hazards.

The Department states that persons directly affected by, bearing the costs of, or directly benefiting from the rules include the following: child welfare agencies (group homes, emergency shelters); foster home licensing agencies; foster care providers (foster homes); children in out-of-home care; and the Department OLR. The Department states that the Life Safety Inspection Unit completed 2,203 Life Safety Inspections between 07/01/2023 and 06/30/2024. The Department says this number includes inspections for initial and renewal applications, provider or agency relocations, consultations, new construction and pool fence inspections.

3. **Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?**

The Department believes that the current rules pose the minimum cost and burden to the persons regulated by these rules. It is the Department's belief that any cost associated with the rules are offset by the greater benefit of ensuring the safety and protection of Arizona children. The Department states it does not charge a fee for conducting the inspections.

4. **Has the agency received any written criticisms of the rules over the last five years?**

The Department indicates it has not received any written criticisms of the rules in the last five years.

5. **Has the agency analyzed the rules' clarity, conciseness, and understandability?**

The Department indicates the rules are clear, concise, and understandable.

6. **Has the agency analyzed the rules' consistency with other rules and statutes?**

The Department indicates the rules are consistent with other rules and statutes.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Department indicates the rules are effective in achieving their objectives.

8. **Has the agency analyzed the current enforcement status of the rules?**

The Department indicates the rules are currently enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates the rules are not more stringent than corresponding federal law, which includes 42 U.S.C. 671.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

The Department indicates these rules do not require the issuance of a regulatory permit, license, or agency authorization.

11. **Conclusion**

This 5YRR from the Department relates to fourteen (14) rules in Title 21, Chapter 8, Article 1 regarding Life Safety Inspections for Foster Homes and Child Welfare Agency Facilities. Specifically, A.R.S. § 8-504 requires the Department to inspect child welfare agencies and foster homes for sanitation, fire, and other actual and potential hazards. The Life Safety Inspection Unit is a unit within the Department's Office of Licensing and Regulation (OLR) which schedules and conducts these inspections.

The Department does not propose to take any action regarding these rules. Council staff recommends approval of this report.

Phoenix, Arizona 85007

RE: Arizona Department of Child Safety, A.A.C. Title 21, Chapter 8, Article 1 Five-Year-Review Report

Dear Chairperson Klein:

Please find enclosed the Five-Year-Review Report of the Arizona Department of Child Safety (DCS) for A.A.C. Title 21, Chapter 8, Articles 1 which is due on November 29, 2024.

DCS hereby certifies compliance with A.R.S. § 41-1091.

For questions about this report, please contact Melissa Compian at Melissa.Compian@azdcs.gov.

Sincerely,

Kathryn Blades Ptak

Kathryn Blades Ptak
General Counsel

Enclosure

ARIZONA DEPARTMENT OF CHILD SAFETY

Five-Year-Review Report

21 A.A.C. 08

Title 21. Child Safety

Chapter 8. Department of Child Safety - Foster Home and Child Welfare Agency Facility Safety

Article 1. Life Safety Inspections

November 2024

1. Authorization of the rule by existing statutes

General Statutory Authority: A.R.S. § 8-453(A)(5)

Specific Statutory Authority: A.R.S. §§ 8-504, 8-505, and 8-509

2. The objective of each rule:

| Rule | Objective |
|---|---|
| R21-8-101. Definitions | The objective of this rule is to promote and facilitate uniform understanding of terminology used in this Article. |
| R21-8-102. Application | The objective of this rule is to identify the entities regulated as they apply to this Article. |
| R21-8-103. Frequency of Inspection and Inspection Area | The objective of this rule is to clarify when an inspection is conducted and identify areas inspected. |
| R21-8-104. General Condition and Cleanliness of the Premises | The objective of this rule is to establish the minimum standards for cleanliness and the general condition of a setting used to provide regulated care. |
| R21-8-105. Safeguarding of Hazards | The objective of this rule is to identify the safeguards providers are required to implement to reduce the risk of hazards. |
| R21-8-106. Weapons and Firearms | The objective of this rule is to establish the standards foster parents are required to follow pertaining to weapons and firearms. |
| R21-8-107. Animals | The objective of this rule is to identify the requirements a care provider must follow when there is an animal in the home or premises. |

| | |
|--|---|
| R21-8-108. Storage of Medication | The objective of this rule is to establish the requirement for the storage and safeguarding of all medication. |
| R21-8-109. Safe Appliances | The objective of this rule is to inform the care provider of their requirement to ensure the availability of specific appliances within a regulated setting, and to ensure such appliances are in safe working order. |
| R21-8-110. Electrical Safety | The objective of this rule is to inform the care provider of their responsibility to ensure electrical systems are appropriately used and are in safe working order. |
| R21-8-111. Water and Plumbing Requirements | The objective of this rule is to ensure the availability of specific plumbing systems within a regulated setting, and to ensure such systems are in safe working order. |
| R21-8-112. Fire Safety | The objective of this rule is to identify the care provider's responsibility to establish fire safety precautions and equipment. |
| R-21-8-113 Emergency and Disaster Plan | The objective of this rule is to identify the care provider's responsibility to develop and maintain a written emergency and disaster plan, including an evacuation plan for the home. |
| R21-8-114. Pool Safety | The objective of this rule is to establish the required safeguards when there is a pool. |

3. **Are the rules effective in achieving their objectives?** Yes No

| Rule | Explanation |
|------|-------------|
| | |
| | |

4. **Are the rules consistent with other rules and statutes?** Yes No

| Rule | Explanation |
|------|-------------|
| | |
| | |

5. **Are the rules enforced as written?** Yes No

| Rule | Explanation |
|------|-------------|
| | |
| | |

6. **Are the rules clear, concise, and understandable?** Yes No

| Rule | Explanation |
|------|-------------|
| | |
| | |

7. **Has the agency received written criticisms of the rules within the last five years?** Yes ___ No X___

8. **Economic, small business, and consumer impact comparison:**

DCS Office of Licensing and Regulation (OLR) is authorized by Arizona Revised Statutes to license foster home and child welfare agencies. The purpose of regulating DCS foster homes and child welfare agencies is to protect vulnerable children receiving services through the establishment and enforcement of safe standards for care.

A.R.S. § 8-504 requires the Department to inspect child welfare agencies and foster homes for sanitation, fire, and other actual and potential hazards. A component of licensing is the inspection of foster homes and the facilities under a child welfare agency which are used for the provision of services. The Life Safety Inspection Unit is a unit within DCS OLR which schedules and conducts these inspections. In addition to initial licensing, the Arizona Administrative Code also requires periodic inspections of the foster home and child welfare agency for renewal licensure, relocation of licensed settings, and for significant new construction. Inspections directly impact the health and well-being of clients.

The persons directly affected by, bear the costs of, or directly benefit from the rules includes the following: child welfare agencies (group homes, emergency Shelters); foster home licensing agencies; foster care providers (foster homes); children in out-of-home care; and DCS OLR. DCS contracts with foster home licensing agencies to manage the licensing process for Arizona's licensed foster care providers. The agencies, as contractors, are expected to ensure the foster care provider complies with this Chapter in between OLR inspections of the foster homes and to verify foster care providers correct deficiencies OLR identified. Foster care providers and child welfare agencies as a residential group care facility must comply with this Chapter.

DCS OLR

DCS OLR consists of the Program Administrator, one (1) Policy Specialist, one (1) Management Analyst, four (4) administrative support staff, and nine (9) specialized units. One (1) of these units is the Life Safety Inspection Unit, which enforces and monitors the rules in Chapter 8. The Life Safety Inspection Unit consists of seven (7) full-time employees: one (1) Manager, one (1) Scheduler, and five (5) Life Safety Inspectors. This unit is responsible for the following functions:

- Schedules initial, renewal, amendment, and new construction Life-Safety Inspections for foster homes.
- Schedules initial, renewal, amendment, and new construction Life Safety Inspections for residential group care facilities.
- Provides technical assistance to foster parents, foster home licensing agencies, and residential group care facilities.
- Provides trainings to foster home licensing agencies at least once per quarter.
- Provides consultations upon request.
- Conducts Life-Safety inspections of foster homes and residential group care facilities.

- Schedules and conducts follow up inspections of foster homes and residential group care facilities, as needed.
- Works with foster home licensing agencies, foster homes, and residential group care facilities when deficiencies are discovered.

The Life Safety Inspection Unit completed 2,203 Life Safety Inspections between 07/01/2023 and 06/30/2024. This number includes inspections for initial and renewal applications, provider or agency relocations, consultations, new construction and pool fence inspections.

Funding

The following funding information applies to OLR as a whole and is not specific to the functions of the Life-Safety Inspection Unit. In FY 24, DCS budget \$5.4M to OLR operations. This included 59 FTE, supplies, fingerprinting, overhead, etc. In comparison, DCS budgeted \$3.2M to OLR operations in FY 19. This included 34 FTE, supplies, fingerprinting, overhead, etc. The funding source is both state General Fund and Federal funds. DCS OLR does not charge a fee for conducting inspections per this Chapter.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes ___ No X

10. **Has the agency completed the course of action indicated in the agency’s previous five-year-review report?**
DCS completed the course of action indicated in the agency’s previous five-year-review report and the rules were amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The Department believes that the current rules pose the minimum cost and burden to the persons regulated by these rules. It is the Department's belief that any cost associated with the rules are offset by the greater benefit of ensuring the safety and protection of Arizona children. The Department does not charge a fee for conducting the inspections referenced in this Article.

12. **Are the rules more stringent than corresponding federal laws?** Yes ___ No X

Corresponding federal laws are: 42 U.S.C. 671. The rules are not more stringent than federal law.

13. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

The Department has determined that A.R.S. § 41-1037 does not apply to these rules, because these rules do not require the issuance of a regulatory permit, license, or agency authorization.

14. Proposed course of action

The Department does not intend to take any action at this time.

TITLE 21. CHILD SAFETY

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

The table of contents on page one contains links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of April 1, 2022 through June 30, 2022

The release of this Chapter in Supp. 22-2 replaces Supp. 17-4, 1-7 pages

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

Administrative Rules Division
 The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

TITLE 21. CHILD SAFETY

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

Authority: A.R.S. § 8-453(A)(5)

Supp. 22-2

Editor's Note: Chapter 8 contains rules which were exempt from the regular rulemaking process under Laws 2014, 2nd Special Session, Ch. 1, Sec. 158. The law required the Department to post on its website proposed exempt rulemakings for a minimum of 30 days, at which time the public could provide written comments. In addition, at least two public hearings were held prior to the filing of the final exempt rules. Because the Department solicited comments on its proposed exempt rules, the rules filed with the Office of the Secretary of State are considered final exempt rules (Supp. 15-4).

CHAPTER TABLE OF CONTENTS

ARTICLE 1. LIFE SAFETY INSPECTIONS

Article 1, consisting of Sections R21-8-101 through R21-8-113, made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

ARTICLE 1. LIFE SAFETY INSPECTIONS**R21-8-101. Definitions**

The definitions in R21-6-101 apply to this Article, except the following terms are defined as:

1. "Animal or doggie door" means a small portal in a wall, window, or human door to allow pets to enter and exit a house on their own without a person to open the door.
2. "Home" means a foster home or Child Welfare Agency residential group care facility where the provider is licensed to provide care to a foster or privately placed child in a residential group care facility.
3. "Pool" means any natural or man-made body of water located at a home or on its premises that:
 - a. Could be used for swimming, recreational, therapeutic, or decorative purposes;
 - b. Is greater than 18 inches in depth; and
 - c. Includes swimming pools, spas, hot tubs, fountains, and fishponds.
4. "Pool enclosure" means a fence or barrier surrounding a pool and meets the requirements of R21-8-114(B)(2).
5. "Premises" means:
 - a. The home; and
 - b. The property surrounding the home that is owned, leased, or controlled by the provider.
6. "Provider" means a licensed foster parent or Child Welfare Agency residential group care facility, and applicants for these licenses.
7. "Structural modification" means:
 - a. Adding or removing walls, windows or doors; or
 - b. Converting a garage, attic, basement, or other similar space into a bedroom.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 23 A.A.R. 3548, effective December 12, 2017 (Supp. 17-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-102. Application

This Article applies to:

1. All foster homes regulated under A.A.C. Title 21, Chapter 6; and
2. A Child Welfare Agency operating a residential group care facility licensed by the Department of Child Safety.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-103. Frequency of Inspection and Inspection Area

- A. Each provider shall have a Life Safety Inspection of the premises completed by OLR.
- B. OLR shall conduct an inspection to verify compliance with Life Safety Inspection rules:
 1. Before an initial license is issued;
 2. Before an amended license is issued for a new location;
 3. Before an amended license is issued for structural modifications;
 4. Before an amended license is issued for an addition of a pool; and
 5. Before a renewal license is issued.
- C. The Life Safety Inspection shall include all rooms and dwellings on the premises including mobile homes and trailers.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-104. General Condition and Cleanliness of the Premises

The provider shall ensure:

1. The interior is clean, sanitary, and disinfected to prevent, minimize, and control illness, infection, or injury.
2. The premises is maintained in good repair and does not constitute a hazard. Damage that constitutes a hazard includes:
 - a. Broken glass;
 - b. Surfaces that are rusted, have sharp or jagged edges, or have nails protruding;
 - c. Holes in walls, ceilings, or floors; or
 - d. Broken furniture, fixtures, appliances, or equipment.
3. Play areas and therapy equipment are stable, in good repair, and do not constitute a hazard.
4. Swing sets are securely anchored to the ground.
5. The premises are clean to the degree that the condition does not constitute a hazard. Conditions that constitute a hazard include:
 - a. Rotting food,
 - b. Stale or accumulated urine or feces, or
 - c. An accumulation of mold.
6. Garbage is removed from the premises at least once each week.
7. The premises and outside play areas are free of insect and rodent infestation, or the premises have an effective ongoing system to eliminate insects or rodents.
8. Water in a pool on the premises is maintained, is not stagnant, and is clear enough to see through the water to the bottom surface of the pool.
9. Excessive weeds and brush that pose a fire hazard are trimmed or removed.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

R21-8-105. Safeguarding of Hazards

A. The provider shall ensure:

1. Highly toxic substances and materials are safeguarded in locked storage. Highly toxic substances include gasoline, lighter fluid, pesticides, radiator fluid, drain cleaner, ammonia, bleach, spray paint, turpentine, and other substances that can cause serious bodily harm or death if improperly used.
2. Household cleaning supplies are safeguarded to prevent unsafe or improper use. Household cleaning supplies are substances that are not intended for ingestion, but generally will not cause serious bodily harm or death if improperly used. Examples of household cleaning supplies include spray cleaners, laundry detergent, furniture polish, and dishwasher detergent.
3. Access to personal grooming supplies is not restricted unless the case plan or service plan for a foster child or child in a residential group care facility specifically restricts such access. Personal grooming supplies include toothpaste, hand-soap, shampoo, menstrual products, and deodorant.
4. Ramps, bathtubs, and showers have slip-resistant surfaces.
5. Handrails and grab-bars are securely attached and stationary.

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

6. Skirting is intact around the base of the setting, if the setting is a mobile home.
 7. The child's access is prevented as appropriate, for his or her age and development, from all medications, poisonous materials, cleaning supplies, other hazardous materials, and alcoholic beverages.
 8. That the home maintains first aid supplies.
- B.** OLR may require removal, repair, or safeguarding of physical and other hazards that are determined to be unsafe for a foster child or child in a residential group care facility, including a drained swimming pool and trampoline.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

R21-8-106. Weapons and Firearms

- A.** The provider shall meet the following standards concerning weapons:
1. The provider shall store the following weapons in an inoperable condition in a locked area inaccessible to children:
 - a. Air guns, including BB guns;
 - b. Bows and cross-bows;
 - c. Stun guns;
 - d. Hunting slingshots;
 - e. Any other projectile weapon; and
 - f. Hunting knives.
 2. Firearms are safeguarded to prevent unsafe or improper use. In addition:
 - a. Firearms are unloaded and kept in a tamper-proof, locked storage container made of unbreakable material; and
 - b. Ammunition is maintained in locked storage. Locked storage may be in the same container as the firearms.
- B.** OLR may approve a provider who is a foster parent applicant or foster parent who is also a law enforcement official, to maintain an assigned duty weapon when they:
1. Obtain documentation that the jurisdiction requires them to have ready and immediate access to the weapons at all times;
 2. Obtain documentation that the jurisdiction requires them to have their weapon stored in an official law enforcement vehicle, if applicable, which would prevent them from meeting the provisions of subsection (A);
 3. Provide official documentation that they have been trained in the law enforcement protocols for the safe use and carrying of a firearm;
 4. Maintain the weapon according to the provisions of this Section when the weapon is not on their person;
 5. Develop a safety plan with the guidance of the licensing agency; and
 6. Obtain approval from OLR.
- C.** Notwithstanding subsections (A) and (B), weapons are not permitted in a Child Welfare Agency residential group care facility or group foster home.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-107. Animals

The premises shall meet the following standards concerning animals:

1. Animals kept on the premises do not pose a hazard due to behavior, venom, or disease.
2. OLR may require an assessment by a veterinarian to determine whether a pet poses a hazard if the animal displays signs of aggressive or abnormal behavior or of disease.
3. The provider shall vaccinate any pets required to be vaccinated by state or tribal law against diseases that can transmit to humans, including rabies.
4. All dogs older than six months have current rabies vaccination or are otherwise in compliance with A.R.S. § 11-1010.
5. Vaccination shall be administered by a veterinarian.
6. Vaccination records shall be maintained in the home.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-108. Storage of Medication

- A.** The provider shall ensure:
1. Medication is maintained in a securely fastened and locked storage, with the exception of the following:
 - a. Medication that may be accessed by a foster child, as specified in that individual's case plan or service plan; and
 - b. Medication that must be readily and immediately accessible, such as an asthma inhaler or an autoinjector such as an epinephrine autoinjector, known as an Epi-pen.
 2. Medication that may be unlocked under subsections (A)(1)(a) or (1)(b) is safeguarded to prevent improper use.
 3. Medication that must be refrigerated is safeguarded in locked storage, without preventing access to refrigerated food. This may be accomplished by storing refrigerated medication in a locked box within the refrigerator.
- B.** A Child Welfare Agency provider shall safeguard medications using a double-lock system. A locked box stored inside a locked cabinet is an example of a double-lock system.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

R21-8-109. Safe Appliances

The provider shall ensure:

1. Safe and functioning appliances are available for food refrigeration and cooking, if applicable.
 - a. Safe and functioning refrigerators shall maintain food at or below a temperature of 41° F.
 - b. An outdoor cooking appliance that uses charcoal or gas shall not be used indoors.
2. Electrical lighting is available in bedrooms, living areas, and rooms used to provide services.
 - a. Lighting is sufficient to perform normal activities, and
 - b. Light sockets are equipped with light bulbs or safely covered to prevent electrical shock.
3. Adequate heating, cooling, and ventilation are available in bedrooms, living areas, and rooms used to provide services. Temperatures outside the range of 65° - 85° F are indicators of inadequate heating or cooling.
4. At least one operable telephone is available on the premises unless OLR has approved an alternative system for

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

- communication. Telephone includes cellular phones, digital phones, and phones with traditional land lines.
5. If the premises have a clothes dryer, the dryer is safely vented with a non-flammable vent hose.
 6. If a portable heater is on the premises, it has a protective covering to keep hands and objects away from the heating element and, it is:
 - a. Electric;
 - b. UL approved;
 - c. Equipped with a tip-over shut-off switch;
 - d. Placed at least three feet from curtains, paper, furniture, and any flammable object when in use;
 - e. Not used as the primary source for heat in the setting; and
 - f. Not used in bedrooms.
 7. A carbon monoxide detector-alarm is properly located according to manufacturer's instructions and functioning on each level of the premises that has an appliance or heating device using combustible fuel, including gas, oil, or wood. Such appliances or devices include fireplaces, wood stoves, gas stoves, and gas hot water heaters.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

R21-8-110. Electrical Safety

The provider shall ensure:

1. Electrical cords are in good condition; no broken or frayed cords are in use.
2. Electrical panels and outlets are in good condition; no wiring is exposed, and covers are in place.
3. Extension cords are not used on a permanent basis.
4. Electrical outlets are not overloaded.
5. Major appliances are plugged directly into grounded outlets. Major appliances include refrigerators, freezers, dishwashers, stoves, ovens, washers, and dryers.
6. Mid-sized appliances, which include computers, televisions, and stereo equipment, are plugged into:
 - a. Grounded outlets, or
 - b. Power strips or surge protectors that are plugged into grounded outlets.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4).

R21-8-111. Water and Plumbing Requirements

- A. The provider shall ensure that a continuous source of safe drinking water is available to a foster child or child in a residential group care facility receiving care.
- B. The provider shall obtain a written water analysis report if the home uses a non-municipal water source that shall meet the following standards:
 1. The analysis report shall be from a laboratory certified by the Arizona Department of Health Services;
 2. The analysis report shall be completed no more than 12 months prior to the date of the Life Safety Inspection completed by OLR;
 3. The analysis report shall be available in the home at all times and presented at the time of inspection; and
 4. If the analysis report details contaminants are found to exceed acceptable state and federal standards for drinking water the provider shall prepare a plan with the guidance of the licensing agency or OLR to include:
 - a. How the provider will ensure safe drinking water will be available in the home;

- b. Efforts to reduce identified contaminants to meet state and federal standards for drinking water; and
 - c. Approval by OLR.
- C. The provider shall ensure that the sewage disposal for the setting is functioning. If the setting has a septic tank, it shall be in good working order, with no visible signs of leakage on the ground.
 - D. The provider shall ensure that at least one working toilet, wash basin, and shower or tub is available for every seven persons living or receiving care in the home at the same time.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-112. Fire Safety

The provider shall ensure:

1. The premises is free of obvious fire hazards, such as defective heating equipment, or improperly stored flammable materials. Household heating equipment must be equipped with appropriate safeguards, maintained as recommended by the manufacturer.
2. Flammables and combustibles are stored more than three feet from water heaters, furnaces, portable heaters, fireplaces, and wood-burning stoves.
3. If the premises has a working fireplace or wood-burning stove, it is protected by a fire screen sufficient to shield the room from open flames and flying embers.
4. A functioning fire extinguisher with a rating of "2A 10BC" or greater is available near the kitchen area. If the home has multiple levels at least one functioning fire extinguisher with a rating of "2A 10BC" or greater is available on each level.
5. At least one UL approved and working smoke detector is installed:
 - a. In the main living or program area of the setting;
 - b. In each bedroom, if overnight care is provided; and
 - c. On each level of a multiple-level setting.
6. The exit routes for the home are clear of obstruction that could prevent safe and rapid evacuation.
7. The locks on exterior doors and windows, including the front door, screen doors, and bars on windows, are equipped with a quick release mechanism. A quick release mechanism is a lock that can be opened from inside the setting without special knowledge (such as a combination) or equipment (such as a key). The Department may grant an exception to this requirement for a double-key deadbolt on a door if:
 - a. There is breakable glass within 40 inches of the interior locking mechanism;
 - b. There is another exit with a quick release mechanism on the same level of the premises; and
 - c. The key for the deadbolt is permanently maintained in a location that is:
 - i. Within six feet of the locking mechanism;
 - ii. Accessible to all household members;
 - iii. Reviewed with persons residing in or receiving care in the home; and
 - iv. Identified on the emergency evacuation plan.
8. The address for the home is posted and visible from the street, or the local emergency response team, such as the local fire department, is notified of the location of the home in writing, with a copy of this notification maintained in the home.

Historical Note

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by emergency rulemaking at 23 A.A.R. 1040, effective April 14, 2017, for 180 days (Supp. 17-2). Emergency renewed at 23 A.A.R. 2946, effective October 2, 2017, for 180 days (Supp. 17-4). Emergency expired. Section amended by final rulemaking at 23 A.A.R. 3548, with an immediate effective date of December 12, 2017 (Supp. 17-4). Amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-113. Emergency and Disaster Plan

- A. A provider shall develop and maintain in the home a written emergency and disaster plan on a form provided by the Department that includes:
1. Contact information for each foster child, including the name and telephone number of the primary care physician and legal guardian;
 2. A comprehensive list of emergency telephone numbers;
 3. An evacuation plan for the home, as detailed in this Section; and
 4. A plan for relocation from the home in the event of displacement due to flood, fire, the breakdown of essential appliances, or other disasters.
- B. A provider shall ensure:
1. A written emergency evacuation plan is developed and maintained in the home, to provide guidance on the safe and rapid evacuation of the home. An emergency evacuation plan shall:
 - a. Be reviewed with the child within 72 hours of placement in the home and posted in a prominent place in the home;
 - b. Identify multiple exits from the home;
 - c. Identify two routes of evacuation from each bedroom on every floor used by individuals residing in or receiving care in the home. At least one of the exit routes for these bedrooms shall lead directly to the outside of the home. If that exit leads into an area that serves as a pool enclosure, a child six years of age or less receiving care in the home shall not reside in that bedroom.
 - i. If the exit is a window, it shall be secured with a latching device located a minimum of 54 inches above the floor; or
 - ii. If the exit is a door, it shall be locked at all times with a latching device or lock located a minimum of 54 inches above the floor. If there is no quick release mechanism on the lock, it must comply with the provisions of R21-8-112(7), and a key for the deadbolt shall be located a minimum of 54 inches above the floor. Bedroom doors that lead into an area that serves as a pool enclosure shall comply with this Section and also be self-closing and self-latching. Such doors that are hinged shall also swing outward from the pool area.
 - d. Identify the location of fire extinguishers and fire evacuation equipment, including rope or chain ladders, and emergency lighting, as applicable;
 - e. Designate a safe central meeting place close to the home, known to the child, at a safe distance from potential danger;
 - f. Be maintained in the home to review with individuals residing in or receiving care in the home; and
 - g. Include the placement of equipment, such as a ladder, that can be safely used by the individuals resid-

- ing in each upstairs bedroom that have been identified with fire exits.
 2. All windows identified as fire exits, must have enough space for an adult to move through.
 3. Each bedroom used by a foster child or child in a residential group care facility receiving care or services has two exits to the outside.
 - a. One exit shall be a path through the premises and leading to a door that opens to the outside. A garage door that opens either manually by lifting or with an automatic opener shall not be accepted as an exit.
 - b. Another exit shall be a window or door within the bedroom that opens directly to the outside.
 4. Premises authorized to provide care or services to five or more children shall train staff and children in evacuation procedures and conduct emergency drills at least every three months as prescribed in this subsection.
 - a. Practice drills shall include actual evacuation of children to safe areas, outside, and beyond the home.
 - b. Drills shall be held at random times and under varying conditions to simulate the possible conditions in case of fire or other disaster.
 - c. All persons in the home shall participate in the drill.
 - d. Records shall be maintained for each emergency drill and shall include:
 - i. Date and time of drill;
 - ii. Total evacuation time;
 - iii. Exits used;
 - iv. Problems noted; and
 - v. Measures taken to ensure that a foster child or a child in a residential group home facility understand the purpose of a drill and his or her responsibilities during a drill.
- C. A provider shall submit a copy of the emergency and disaster plan to the licensing agency or placing entity, as applicable.

Historical Note

New Section made by final exempt rulemaking at 21 A.A.R. 3517, effective January 24, 2016 (Supp. 15-4). Amended by emergency rulemaking at 23 A.A.R. 1040, effective April 14, 2017, for 180 days (Supp. 17-2). Emergency renewed at 23 A.A.R. 2946, effective October 2, 2017, for 180 days (Supp. 17-4). Emergency expired. Section amended by final rulemaking at 23 A.A.R. 3548, with an immediate effective date of December 12, 2017 (Supp. 17-4). R21-8-113 renumbered to R21-8-114; new Section R21-8-113 made by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

R21-8-114. Pool Safety

- A. The provisions of this Section apply to:
1. Each Child Welfare Agency residential group care facility; and
 2. A foster home licensed to provide care to a child six years of age or less, or an individual with a developmental disability.
- B. If a provider listed in subsection (A) has a pool the provider shall ensure the following:
1. That the pool complies with A.R.S. § 36-1681 and all local municipal codes to the extent not inconsistent with this Section.
 2. A fence or barrier meeting the following requirements is maintained between the pool and the home, or any building used to provide care and supervision.
 - a. The exterior side of the fence or barrier is at least five feet high;

CHAPTER 8. DEPARTMENT OF CHILD SAFETY - FOSTER HOME AND CHILD WELFARE AGENCY FACILITY SAFETY

- b. All openings shall measure less than four inches;
- c. If the barrier is a chain link fence or lattice, each opening in the mesh measures less than 1 3/4 inches horizontally. Chicken wire and other light gauge wire are prohibited as a primary fencing material for the pool;
- d. The exterior side of the barrier is free of hand holds, or foot holds, or other means that could be used to climb over it and if it has a horizontal component spaced at least 45 inches, measured vertically;
- e. The gate to the enclosure is locked, except when in use and there is an adult within the enclosure to supervise the pool and spa area;
- f. The connection between the panels of the fence cannot be separated without a key or a tool;
- g. The fence is secured to the ground or has sufficient tension to prevent the fence from being lifted more than four inches from the ground;
- h. If the home or building to provide care or supervision constitutes part of the enclosure:
 - i. The enclosure does not interfere with safe egress from the home;
 - ii. A door from the home does not open within the pool enclosure, unless it is a bedroom door in a bedroom not occupied by an individual six years of age or less receiving care and such a door cannot be opened by a foster child six years of age or less or child in a residential group care facility because it is either locked as required in R21-8-113(B)(1)(c)(ii) or inoperable. Any key shall not be accessible to a foster child six years of age or less or child in a residential group care facility;
 - iii. A window located in a room that is designated as a bedroom for a foster child six years of age or less or child in a residential group care facility shall not open into the pool enclosure or shall be permanently locked and not used for egress; and
 - iv. Other windows that open into the pool enclosure are permanently secured to open no more than four inches; or as required in R21-8-113(B)(1)(c)(i).
 - v. Animal or doggie doors shall not open directly into the pool enclosure.
- C. The Department shall not approve a locked cover in lieu of the fence required under subsection (B).
- D. After a fence has been inspected and approved by OLR as meeting the standards required under subsection (B), the provider shall ensure the fence is not dismantled or moved for as long as the provider is licensed by OLR.
- E. Regardless of the age of the foster child or child in a residential group care facility living in the home, if the pool is deeper than six feet, the care provider shall ensure the following rescue equipment is available in the pool area:
 1. A shepherd's crook attached to a pole; and
 2. A ring buoy attached to a rope that measures at least half of the distance across the pool plus 10 feet.
- F. A drained pool is a safety hazard. The provider shall comply with this Section or R21-8-105, if applicable.

Historical Note

New Section R21-8-114 renumbered from R21-8-113 and amended by final rulemaking at 28 A.A.R. 809 (April 22, 2022), effective June 6, 2022 (Supp. 22-2).

8-453. Powers and duties

A. The director shall:

1. Carry out the purposes of the department prescribed in section 8-451.
2. Provide transparency by being open and accountable to the public for the actions of the department.
3. Develop a data system that enables persons and entities that are charged with a responsibility relating to child safety to access all relevant information relating to an abused, neglected or abandoned child as provided by law.
4. Subject to title 41, chapter 4, article 4 and, as applicable, articles 5 and 6, employ deputy directors and other key personnel based on qualifications that are prescribed by the director.
5. Adopt rules to implement the purposes of the department and the duties and powers of the director.
6. Petition, as necessary to implement the case plan established under section 8-824 or 8-845, for the appointment of a guardian or a temporary guardian under title 14, chapter 5 for children who are in the custody of the department pursuant to court order. Persons applying to be guardians or temporary guardians under this section shall be fingerprinted. A foster parent or certified adoptive parent already fingerprinted is not required to be fingerprinted again, if the foster parent or certified adoptive parent is the person applying to be the guardian or temporary guardian.
7. Cooperate with other agencies of this state, county and municipal agencies, faith-based organizations and community social services agencies, if available, to achieve the purposes of this chapter.
8. Exchange information, including case specific information, and cooperate with the department of economic security for the administration of the department of economic security's programs.
9. Administer child welfare activities, including:
 - (a) Cross-jurisdictional placements pursuant to section 8-548.
 - (b) Providing the cost of care of:
 - (i) Children who are in temporary custody, are the subject of a dependency petition or are adjudicated by the court as dependent and who are in out-of-home placement, except state institutions.
 - (ii) Children who are voluntarily placed in out-of-home placement pursuant to section 8-806.
 - (iii) Children who are the subject of a dependency petition or are adjudicated dependent and who are in the custody of the department and ordered by the court pursuant to section 8-845 to reside in an independent living program pursuant to section 8-521.
 - (c) Providing services for children placed in adoption.
10. Formulate policies, plans and programs to effectuate the missions and purposes of the department.
11. Make contracts and incur obligations within the general scope of the department's activities and operations subject to the availability of funds.
12. Coordinate with, contract with or assist other departments, agencies and institutions of this state and local and federal governments in the furtherance of the department's purposes, objectives and programs.
13. Accept and disburse grants, matching funds and direct payments from public or private agencies for the conduct of programs that are consistent with the overall purposes and objectives of the department.

14. Collect monies owed to the department.
15. Act as an agent of the federal government in furtherance of any functions of the department.
16. Carry on research and compile statistics relating to the child welfare program throughout this state, including all phases of dependency.
17. Cooperate with the superior court in all matters related to this title and title 13.
18. Provide the cost of care and transitional independent living services for a person under twenty-one years of age pursuant to section 8-521.01.
19. Ensure that all criminal conduct allegations and reports of imminent risk of harm are investigated.
20. Ensure the department's compliance with the Indian child welfare act of 1978 (P.L. 95-608; 92 Stat. 3069; 25 United States Code sections 1901 through 1963).
21. Strengthen relationships with tribal child protection agencies or programs.

B. The director may:

1. Take administrative action to improve the efficiency of the department.
2. Contract with a private entity to provide any functions or services pursuant to this title.
3. Apply for, accept, receive and expend public and private gifts or grants of money or property on the terms and conditions as may be imposed by the donor and for any purpose provided for by this title.
4. Reimburse department volunteers, designated by the director, for expenses in transporting clients of the department on official business. Volunteers reimbursed for expenses are not eligible for workers' compensation under title 23, chapter 6.

C. The department shall administer individual and family services, including sections on services to children and youth and other related functions in furtherance of social service programs under the social security act, as amended, title IV, parts B and E, grants to states for aid and services to needy families with children and for child-welfare services, title XX, grants to states for services and other related federal acts and titles.

D. Notwithstanding any other law, a state or local governmental agency or a private entity is not subject to civil liability for the disclosure of information that is made in good faith to the department pursuant to this section.

E. Notwithstanding section 41-192, the department may employ legal counsel to provide legal advice to the director. The attorney general shall represent the department in any administrative or judicial proceeding pursuant to title 41, chapter 1, article 5.

F. The total amount of state monies that may be spent in any fiscal year by the department for foster care as provided in subsection A, paragraph 9, subdivision (b) of this section may not exceed the amount appropriated or authorized by section 35-173 for that purpose. This section does not impose a duty on an officer, agent or employee of this state to discharge a responsibility or create any right in a person or group if the discharge or right would require an expenditure of state monies in excess of the expenditure authorized by legislative appropriation for that specific purpose.

8-504. Sanitation, fire and hazard inspection

A. The division shall visit each child welfare agency and foster home and inspect the premises used for care of children for sanitation, fire and other actual and potential hazards. The division shall take action it deems necessary to carry out the duties imposed by this section including the denial of the application for licensure and the suspension or revocation of a license.

B. The division may delegate any additional inspection, examination or study provided for by this article, including inspection of premises for fire hazards, to an agency, department, political subdivision or governmental entity deemed appropriate by the division.

8-505. Issuance of licenses; application; investigation; renewal

- A. The issuance of initial and renewal licenses for child welfare agencies shall be made by the division.
- B. A child welfare agency shall not receive any child for care or maintenance or for placement in a foster home unless the agency is licensed by the division. Application for a license shall be made on a form prescribed by the division.
- C. The division shall, before issuing a license to an agency, investigate the activities and standards of care of the agency, its financial stability, the character and training of the applicant, the need for such agency, and the adequacy of its intended services to insure the welfare of children. A provisional license may be issued to any agency whose services are needed but which is temporarily unable to conform to the established standards of care. If the applicant meets the standards as established by the division a regular license shall be issued for a period of one year.
- D. Each license shall state in general terms the kind of child welfare service the licensee is authorized to undertake, the number of children that can be received if the licensee is a private agency, their ages and sex, and, if authorized to place and supervise children in foster homes, the geographical area the agency is equipped to serve.
- E. Every license shall expire one year from the date of issuance, and may be renewed annually on application of the agency, except that provisional licenses may be issued for not more than six months from the date of issuance and may not be renewed.

8-509. Licensing of foster homes; fingerprint waiver; restricted license; renewal of license; provisional license; exemption from licensure; immunization requirements

- A. The department shall license and certify foster homes. Licenses are valid for a period of two years.
- B. The department shall not issue a license without satisfactory proof that the foster parent or parents have completed six actual hours of approved initial foster parent training as set forth in section 8-503 and that each foster parent and each other adult member of the household has a valid fingerprint clearance card issued pursuant to section 41-1758.07. The foster parent and each other adult member of the household must certify on forms that are provided by the department and that are notarized whether the foster parent or other adult member of the household is awaiting trial on or has ever been convicted of any of the criminal offenses listed in section 41-1758.07, subsections B and C in this state or similar offenses in another state or jurisdiction.
- C. A kinship foster care parent shall apply for a fingerprint clearance card pursuant to section 41-1758.07. In its discretion and for good cause, the department may waive the requirement for a kinship foster care parent to obtain a fingerprint clearance card. In evaluating whether good cause exists, the department shall apply the criteria prescribed in section 41-1758.07, subsections B and C. If the department waives the requirement, the department shall issue to the kinship foster care parent a restricted license that applies only to the children placed with the kinship foster care parent for kinship foster care.
- D. The department shall not renew a license without satisfactory proof that the foster parent or parents have completed twelve actual hours of approved ongoing foster parent training during the two-year period of licensure as set forth in section 8-503.
- E. If the department determines that completing the training required in subsections B and D of this section would be a hardship to the foster parent or parents, the department may issue a provisional license for a period not to exceed six months. A provisional license may not be renewed.
- F. Child welfare agencies that submit foster homes for licensing shall conduct an investigation of the foster home pursuant to licensing rules of the department. The department shall conduct investigations of all other foster homes. If the foster home meets all requirements set by the department, the agency shall submit an application stating the foster home's qualifications to the department. The agency may also recommend the types of licensing and certification to be granted to the foster home.
- G. The department shall accept an adoptive home certification study as a licensing home study if the study has been updated within the past three months to include the information necessary to determine whether the home meets foster care licensing standards.
- H. This section does not apply if the child is placed in a home by a means other than by court order and if the home does not receive compensation from this state or any political subdivision of this state.
- I. The department may not prohibit a person operating a licensed foster home from applying for or receiving compensation as a foster home parent due to employment with this state.
- J. The department shall not require a foster parent to immunize the foster parent's natural or adoptive children as a condition of foster home licensure.
- K. A licensee may modify the renewal date of a license issued pursuant to this section by submitting an application for modification of renewal date with the department on a form prescribed by the department. The licensee must specify the new month of renewal on the application. The modified renewal date must be before, but not more than six months earlier than, the existing renewal date.
- L. The foster care review board shall review the cases of children placed by the department in foster homes licensed pursuant to this section as required by section 8-515.03.

E-2.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 7, Article 2

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: March 12, 2025

SUBJECT: DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 7, Article 2

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) relates to nine (9) rules and one (1) Appendix in Title 9, Chapter 7, Article 2 regarding Radiation Control, Specifically, these rules cover Registration, Installation, and Service of Ionizing Radiation-Producing Machines; and Certification of Mammography Facilities.

In the prior report, which was approved by the Council in January 2020, the Department stated that it planned to review the rules in the entire Chapter after completing the 5YRRs on all Articles in the Chapter. During this review, the Department determined that extensive changes were required throughout the entire Chapter and planned a rulemaking to be completed in stages. Pursuant to A.R.S. § 41-1039(A), the Department was granted approval to conduct rulemaking in the Chapter in May 2023.

Proposed Action

The Department has reviewed the current rules and proposes to amend the rules to address the issues identified in this report. The Department proposes to submit a Notice of Final Rulemaking to the Council by July 2026.

The Department is actively working on amending the rules in this Article, along with the other Articles found in Title 9, Chapter 7 and as reported in other 5YRRs related to this Chapter. The Department is complying with the rulemaking plan for the Chapter that was approved by Council on March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025. The Department is implementing the plan in an iterative fashion. Rules related to Nonionizing Radiation are expected to be completed by December 2025, while rules related to X-ray Radiation are expected to be completed by July 2026. The Department has been told that the NRC is planning to require rules for decommissioning financial assurance for sealed and unsealed radioactive materials, advanced reactor export licensing considerations, low-level radioactive waste disposal, items containing byproduct material incidental to production, release criteria of veterinary animals, reporting nuclear medicine injection extravasations as medical events, revisions to the exempt quantity thresholds for licensing, rubidium-82 generators and emerging medical technologies, and the regulatory framework for fusion machines, which will need to be added to the rules for Radiation Control. Because it would be inefficient and confusing to stakeholders/regulated entities for the Department to make changes to the current rules, then add the new requirements from the NRC, the Department wants to make all changes/additions as part of a single iteration of rulemaking for the rules in Chapter 7.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Department states that pursuant to Laws 2017, Ch. 313, and Laws 2018, Ch. 234, the Department succeeded to the authority, powers, and duties, and responsibilities of the Arizona Radiation Regulatory Agency for the regulation of radioactive materials, devices emitting ionizing or monitoring radiation, and those persons using them. The Department indicates that the rules in Article 2 were recodified in 2018 from 12 A.A.C. 1 to 9 A.A.C. 7.

The Department says the rules in Article 2 were variously last revised in 1997, 2003, 2005 and 2009. The Department states that except for 2009 there is no EIS available. The Department goes on to say the rules in Article 2 are currently used by approximately 5,651 persons, including x-ray registration and mammography.

The Department continues to believe that for the rulemakings with no EIS available, the rulemakings provided a minimal benefit to some stakeholders through improved clarity but had no other economic impact on any stakeholders. The Department states that for the 2009 rulemaking the changes were made to improve clarity and were not expected to have an economic impact on any business. The Department believes the economic impact continues as estimated.

Stakeholders include the Department; mammography facilities; facilities that use radiation-producing machines or particle accelerators; persons who assemble, install, sell or service radiation-producing machines; and the general public.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department believes that the substantive content of the rules is the minimum necessary to protect health and safety and comply with statutory requirements and that the probable benefits of the rules in the Article outweigh the probable costs of the rules.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it has not received any written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the rules are mostly clear, concise, and understandable except for the following:

- **R9-7-201**
 - This Section would be clearer and more concise if subsections (A), (C), and (D) were combined into one “exemptions” subsection.
 - This Section could be improved if it were clearer that radiation machines that are not in operation and are in the possession of financial institutions that have taken possession of these machines as a result of foreclosure, bankruptcy, or other default of payment are exempt from registration.
 - This Section may also benefit from defining “incidental x-ray device or system” and how it differs from “intentional device or system.”
 - This Section may also benefit from clarifying that providers of radiation machines for mobile services are not exempt from the rules in this Article.
- **R9-7-202**
 - Subsection (B) could be made clearer if the word “it” was replaced with the term to which it refers and if the cross-reference to the information in Appendix A were clarified.
 - This Section would also benefit from clarifying at what point of the application process a unit specified in the application may be used.
- **R9-7-204**
 - This Section would benefit from including information that clarified what happens if an application does not meet the specified requirements.
 - Subsection (B) could be clearer if passive voice language was changed to an active voice. This subsection may also benefit from defining “facility” and clarifying the requirements when registering a unit.
- **R9-7-205**

- Subsection (A) would benefit from clearer language and clearly specify when a Notice of Registration or Certification expires.
- Subsection (B) would benefit from including a reference to A.R.S. § 41-1092.11.
- **R9-7-205 and R9-7-209**
 - These Sections could be made clearer if the term “notice of registration” were either consistently capitalized, as in R9-7-205, or not capitalized, as in R9-7-209.
- **R9-7-206**
 - Subsection (A) could be made clearer if the rule elaborated what is meant by “within 15 days” and include the initial reference point to this statement.
 - This Section would be more concise if the requirements in subsection (C) were combined into subsection (A).
 - Subsection (D) is unclear what the phrase “of these rules” refers to.
- **R9-7-206 and R9-7-209**
 - R9-7-206(B) and R9-7-209(B) appear to be duplicative. The rules would be more effective if they were combined.
- **R9-7-207**
 - Subsection (C) could be clearer if passive voice language was changed to an active voice.
- **R9-7-208**
 - Subsections (1), (2), and (3) could be clearer if they referred to the application in R9-7-202.
 - Subsections (2) and (3) could be more concise if the requirements in these subsections were replaced with a requirement to comply with A.R.S. § 32-2842.
- **R9-7-209**
 - Subsection (A) could be made clearer if the difference between a “notice of registration” and a “certificate issued according to R9-7-208” were clarified.
- **Appendix A**
 - Appendix A could be clearer if renamed as “Appendix 2A” since there are several other Appendices A in the Chapter.

6. Has the agency analyzed the rules’ consistency with other rules and statutes?

The Department indicates the rules are mostly clear, concise, and understandable except for the following:

- **R9-7-208**
 - Subsection (3) references statute A.R.S. § 32-2842(C). Reference to this statute is outdated as this statute was removed through Laws 2011, Ch. 97.

7. Has the agency analyzed the rules’ effectiveness in achieving its objectives?

The Department indicates the rules are effective in achieving their objectives except for the following:

- **R9-7-205**

- This Section does not specify how often a certification must be renewed. This Section would be more effective if it specified or provided a reference to the time period(s) for certification.
- **R9-7-206**
 - Subsection (C) refers to the "assembler's report (FDA Report No. 2579)"; this reference is outdated as the FDA no longer uses the FDA Report No. 2579.
- **Appendix A**
 - This appendix would be more effective if updated to include current practice.

8. Has the agency analyzed the current enforcement status of the rules?

The Department indicates the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates the rules are based on state statutes, rather than federal regulations.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Department indicates the rules in Article 2 were adopted before July 29, 2010. However, the Department believes the rules fall under exception A.R.S. § 41-1037(A)(2) as the issuance of an alternative type of permit is authorized under A.R.S. §§ 30-672 and 30-672.01. Council staff believes the Department is in compliance with A.R.S. § 41-1037.

11. Conclusion

This 5YRR from the Department relates to nine (9) rules and one (1) Appendix in Title 9, Chapter 7, Article 2 regarding Radiation Control, Specifically, these rules cover Registration, Installation, and Service of Ionizing Radiation-Producing Machines; and Certification of Mammography Facilities.

The Department has reviewed the current rules and proposes to amend the rules to address the issues identified in this report. The Department proposes to submit a Notice of Final Rulemaking to the Council by July 2026.

The Department is actively working on amending the rules in this Article, along with the other Articles found in Title 9, Chapter 7 and as reported in other 5YRRs related to this Chapter. The Department is complying with the rulemaking plan for the Chapter that was approved by Council on March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025. The Department is implementing the plan in an iterative fashion. Rules related to Nonionizing Radiation are expected to be completed by December 2025, while rules related to X-ray Radiation are expected to be completed by July 2026. The Department has been told that the NRC is planning to require rules for decommissioning financial assurance for sealed and unsealed radioactive materials, advanced reactor export licensing considerations, low-level radioactive waste disposal, items containing byproduct material incidental to production, release criteria of veterinary animals, reporting nuclear medicine injection extravasations as medical events, revisions to the exempt quantity thresholds for licensing, rubidium-82 generators and emerging medical technologies, and the regulatory framework for fusion machines, which will need to be added to the rules for Radiation Control. Because it would be inefficient and confusing to stakeholders/regulated entities for the Department to make changes to the current rules, then add the new requirements from the NRC, the Department wants to make all changes/additions as part of a single iteration of rulemaking for the rules in Chapter 7.

Council staff recommends approval of this report.

Phoenix, AZ 85007

RE: Department of Health Services, 9 A.A.C. 7, Article 2, Five-Year-Review Report

Dear Ms. Klein:

Please find enclosed the Five-Year-Review Report from the Arizona Department of Health Services (Department) for 9 A.A.C. 7, Article 2, which is due on or before December 31, 2024.

The Department hereby certifies compliance with A.R.S. § 41-1091.

For questions about this Report, please contact Angie Trevino at angelica.trevino@azdhs.gov or (480) 589-0298.

Sincerely,

Stacie Gravito
Director's Designee

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 7. Department of Health Services

Radiation Control

**Article 2. Registration, Installation, and Service of Ionizing Radiation-Producing Machines;
and Certification of Mammography Facilities**

Due: December 31, 2024

Submitted: December 3, 2024¹

1. Authorization of the rule by existing statutes

General Statutory Authority: A.R.S. §§ 30-654(B)(5) and 36-136(G)

Specific Statutory Authority: A.R.S. §§ 30-654, 30-657, 30-671(B), 30-672, 30-672.01, and 30-673

2. The objective of each rule:

| Rule | Objective |
|-------------|---|
| R9-7-201 | To provide exemptions to requirements in the Article for certain sources of radiation for which there is no measured impact to the health and safety of the public. To specify that the production, testing, or factory servicing of certain exempt electronic equipment is not exempt from the requirements of this Article. |
| R9-7-202 | To specify requirements for registration of machines producing ionizing radiation, including fees and diagrams of the areas of the facility that may be affected by the radiation. To include requirements specific to mammography facilities and to particle accelerators used for medical purposes. |
| R9-7-203 | To specify requirements for registration of persons who install, sell, or service machines producing ionizing radiation, including X-ray machines, in compliance with A.R.S. § 30-672.01. |
| R9-7-204 | To specify that the Department shall issue a Notice of Registration to an applicant complying with applicable requirements, including that one Notice may be issued for all radiation machines located at the same facility. |
| R9-7-205 | To provide information about expiration of registration, including that registration does not expire if a timely application for renewal has been submitted. |
| R9-7-206 | To require a person assembling or installing a machine producing ionizing radiation or taking such a machine out of service to notify the Department of the event and provide specific information about the machine or assembly. To specify that radiation machines, when properly placed in operation and used, must meet the requirements of these rules. |
| R9-7-207 | To specify conditions of use for a radiation machine brought into Arizona for use on a temporary basis, including notification of the Department, adherence with Arizona requirements for safe operation and documentation, and duration of use. |

¹ Revised 3/14/25

| | |
|------------|---|
| R9-7-208 | To specify additional documentation required to be submitted with an application in R9-7-202 for certification of mammography facilities. |
| R9-7-209 | To specify situations requiring a registrant or other person possessing a registered radiation machine to notify the Department. |
| Appendix A | To specify the information required to be included on an application submitted according to R9-7-202. |

3. **Are the rules effective in achieving their objectives?** Yes No

| Rule | Explanation |
|------------|--|
| R9-7-205 | This Section does not specify how often a certification must be renewed. This Section would be more effective if it specified or provided a reference to the time period(s) for certification. |
| R9-7-206 | Subsection (C) refers to the "assembler's report (FDA Report No. 2579)"; this reference is outdated as the FDA no longer uses the FDA Report No. 2579. |
| Appendix A | This appendix would be more effective if updated to include current practice. |

4. **Are the rules consistent with other rules and statutes?** Yes No

| Rule | Explanation |
|----------|---|
| R9-7-208 | Subsection (3) references statute A.R.S. § 32-2842(C). Reference to this statute is outdated as this statute was removed through Laws 2011, Ch. 97. |

5. **Are the rules enforced as written?** Yes No

| Rule | Explanation |
|------|-------------|
| | |

6. **Are the rules clear, concise, and understandable?** Yes No

| Rule | Explanation |
|----------|---|
| R9-7-201 | <p>This Section would be clearer and more concise if subsections (A), (C), and (D) were combined into one "exemptions" subsection.</p> <p>This Section could be improved if it were clearer that radiation machines that are not in operation and are in the possession of financial institutions that have taken possession of these machines as a result of foreclosure, bankruptcy, or other default of payment are exempt from registration.</p> <p>This Section may also benefit from defining "incidental x-ray device or system" and how it differs from "intentional device or system."</p> |

| | |
|-----------------------|---|
| | This Section may also benefit from clarifying that providers of radiation machines for mobile services are not exempt from the rules in this Article. |
| R9-7-202 | Subsection (B) could be made clearer if the word “it” was replaced with the term to which it refers and if the cross-reference to the information in Appendix A were clarified. This Section would also benefit from clarifying at what point of the application process a unit specified in the application may be used. |
| R9-7-204 | This Section would benefit from including information that clarified what happens if an application does not meet the specified requirements. Subsection (B) could be clearer if passive voice language was changed to an active voice. This subsection may also benefit from defining "facility" and clarifying the requirements when registering a unit. |
| R9-7-205 | Subsection (A) would benefit from clearer language and clearly specify when a Notice of Registration or Certification expires. Subsection (B) would benefit from including a reference to A.R.S. § 41-1092.11. |
| R9-7-205 and R9-7-209 | These Sections could be made clearer if the term “notice of registration” were either consistently capitalized, as in R9-7-205, or not capitalized, as in R9-7-209. |
| R9-7-206 | Subsection (A) could be made clearer if the rule elaborated what is meant by “within 15 days” and include the initial reference point to this statement. This Section would be more concise if the requirements in subsection (C) were combined into subsection (A). Subsection (D) is unclear what the phrase “of these rules” refers to. |
| R9-7-206 and R9-7-209 | R9-7-206(B) and R9-7-209(B) appear to be duplicative. The rules would be more effective if they were combined. |
| R9-7-207 | Subsection (C) could be clearer if passive voice language was changed to an active voice. |
| R9-7-208 | Subsections (1), (2), and (3) could be clearer if they referred to the application in R9-7-202. Subsections (2) and (3) could be more concise if the requirements in these subsections were replaced with a requirement to comply with A.R.S. § 32-2842. |
| R9-7-209 | Subsection (A) could be made clearer if the difference between a “notice of registration” and a “certificate issued according to R9-7-208” were clarified. |
| Appendix A | Appendix A could be clearer if renamed as “Appendix 2A” since there are several other Appendices A in the Chapter. |

7. **Has the agency received written criticisms of the rules within the last five years?** Yes ___ No X

8. **Economic, small business, and consumer impact comparison:**

Pursuant to Laws 2017, Ch. 313, and Laws 2018, Ch. 234, the Department succeeded to the authority, powers, duties, and responsibilities of the Arizona Radiation Regulatory Agency for the regulation of radioactive

materials, devices emitting ionizing or nonionizing radiation, and those persons using them. The rules in Article 2 were recodified in 2018 from 12 A.A.C. 1 to 9 A.A.C. 7, and the current codification is used when describing the economic impact of the rules, even though the rulemakings were in 12 A.A.C. 1.

The rules in Article 2 were variously last revised in 1997, 2003, 2005, and 2009. If a rule included in a rulemaking was further revised in a subsequent rulemaking, the impact of the rule is considered in the description of the subsequent rulemaking. An economic, small business, and consumer impact statement (EIS) is available to the Department for only the 2009 rulemaking, but the Department is estimating the economic effect of the other rulemakings from available records and information. The rules in Article 2 are currently used by approximately 5,651 persons, including x-ray registration and mammography.

The information from the previous report remains the same. Only small changes were made to modernize the wording of the rule in R9-7-204 when it was amended in 1997. Sections R9-7-202 and R9-7-208 were last revised in 2003 with minor changes. Section R9-7-209 was last revised in 2005, moving licensing requirements for devices or equipment producing nonionizing radiation into Article 14, which provides requirements for these devices, and clarifying remaining requirements. Although no EIS is available for any of these rulemakings, the Department continues to believe the rulemakings may have provided a minimal benefit to some stakeholders through improved clarity, but had no other economic impact on any stakeholders.

In the 2009 rulemaking, the remaining six rules in the Article were revised. In R9-7-201, typographical errors and unit designations were corrected, and a rule change clarified that the “production, testing, or factory servicing” of specified electronic equipment is not exempt from the requirements of the Article. The changes to R9-7-203 included clarifying application requirements and what “install” means. R9-7-205 was revised to clarify information about certification, renewal, and certificate expiration. An incorporation by reference was updated in R9-7-206, and a grammatical error was corrected in R9-7-207. In Appendix A, a cross-reference to Article 11 was added to clarify that this Article contains other registration requirements. According to the EIS, these changes were made to improve clarity and were not expected to have an economic effect on any businesses. The Department believes the economic impact continues as estimated.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes ___ No X

10. **Has the agency completed the course of action indicated in the agency’s previous five-year-review report?**

In the 2019 five-year-review report, the Department stated that the Department planned to review the rules in the entire Chapter after completing the five-year-review reports on all Articles in the Chapter. During this review, the Department determined that extensive changes were required throughout the entire Chapter and planned a rulemaking to be completed in stages. Pursuant to A.R.S. § 41-1039(A), the Department was granted approval to conduct rulemaking in the Chapter in May 2023.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The Department believes that the substantive content of the rules is the minimum necessary to protect health and safety and comply with statutory requirements and that the probable benefits of the rules in the Article outweigh the probable costs of the rules. Other issues identified in this report may impose a minimally increased regulatory burden.

12. **Are the rules more stringent than corresponding federal laws?** Yes ___ No X

The requirements in this Article are based on state statutes, rather than federal regulations.

13. **For rules adopted after July 29, 2010 that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

The rules in Article 2 were adopted before July 29, 2010. However, the Department believes the rules are exempt from A.R.S. § 41-1037 due to paragraph (A)(2) as the issuance of an alternative type of permit is authorized under A.R.S. §§ 30-672 and 30-672.01.

14. **Proposed course of action**

The Department of Health Services has reviewed the current rules and proposes to amend the rules to address the issues identified in this report. The Department proposes to submit a Notice of Final Rulemaking to the Council by July 2026.

The Department is actively working on amending the rules in this Article, along with the other Articles found in Title 9, Chapter 7 and as reported in other Five-Year-Review Reports related to this Chapter. The Department is complying with the rulemaking plan for the Chapter that was approved by Council on March 2022. This plan stated that the Department does not expect to be able to submit a Notice of Final Rulemaking to the Council before December 2025. The Department is implementing the plan in an iterative fashion. Rules related to Nonionizing Radiation are expected to be completed by December 2025, while rules related to X-ray Radiation are expected to be completed by July 2026. The Department has been told that the NRC is planning to require rules for decommissioning financial assurance for sealed and unsealed radioactive materials, advanced reactor export licensing considerations, low-level radioactive waste disposal, items containing byproduct material incidental to production, release criteria of veterinary animals, reporting nuclear medicine injection extravasations as medical events, revisions to the exempt quantity thresholds for licensing, rubidium-82 generators and emerging medical technologies, and the regulatory framework for fusion machines, which will need to be added to the rules for Radiation Control. Because it would be inefficient and confusing to stakeholders/regulated entities for the

Department to make changes to the current rules, then add the new requirements from the NRC, the Department wants to make all changes/additions as part of a single iteration of rulemaking for the rules in Chapter 7.

TITLE 9. HEALTH SERVICES

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

vices that relate to a licensee's, registrant's, or applicant's activities in this Chapter, shall not:

1. Knowingly engage in conduct that violates or will result in a violation by a licensee, registrant, or applicant, of any statute, rule, regulation, or order; or any term, condition, or limitation of any license or registration issued by the Department; or
 2. Knowingly submit to the Department, or a licensee, registrant, or applicant, or a licensee's, registrant's, or applicant's contractor or subcontractor, information that is incomplete or inaccurate.
- B.** The Board shall impose the applicable civil penalty listed in R9-7-1216 on a person who violates subsection (A)(1) or (A)(2). For this purpose the person is classified as a Division II licensee and the violation is classified as a Severity II violation.
- C.** For the purposes of this Section, "misconduct" means conduct prohibited under subsection (A).
- D.** A person who is not a licensee, registrant, or applicant and knowingly violates a rule for the safe use of radiation sources in 9 A.A.C. 7 is subject to the enforcement actions in 9 A.A.C. 7, Article 12.

Historical Note

New Section R9-7-107 recodified from R12-1-107, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

ARTICLE 2. REGISTRATION, INSTALLATION, AND SERVICE OF IONIZING RADIATION-PRODUCING MACHINES; AND CERTIFICATION OF MAMMOGRAPHY FACILITIES

R9-7-201. Exemptions

- A.** Electronic equipment that produces X-radiation incidental to its operation for other purposes is exempt from the registration and notification requirements of this Article, provided that an exposure rate, from any accessible surface, averaged over an area of 10 centimeters squared (1.55 inches squared) does not exceed 5 microsieverts (0.5 milliroentgen) per hour at 5 centimeters (2.0 inches).
- B.** The production, testing, or factory servicing of the electronic equipment in subsection (A) is not exempt from the requirements of this Article.
- C.** Radiation machines in storage or in transit to or from storage are exempt from the requirements of this Article.
- D.** Radiation machines rendered incapable of producing radiation are exempt from the requirements of this Article.

Historical Note

New Section R9-7-201 recodified from R12-1-201, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-202. Application for Registration of Ionizing Radiation Producing Machines

- A.** A person shall not use a radiation machine except as authorized in this Article.
- B.** A person possessing a nonexempt radiation machine shall apply for registration of the machine with the Department within 30 days after its installation. The person applying for registration of a radiation-producing machine shall use the application forms provided by the Department. The applicant shall provide the information identified in Appendix A of this Article.
- C.** In addition to the application form or forms, the applicant shall remit the appropriate registration or licensing fee in R9-7-1306 and provide other information required by R9-7-208.
- D.** Each applicant that applies for registration of a stationary x-ray system, with the exception of applicants from bone densi-

tometry, cabinet radiography, podiatry, dental, bone mineral analyzer and mammography facilities, shall provide a scale drawing of the room in which the x-ray system is located, or provide measurements from the radiation source to the surrounding barrier surfaces. The drawing shall denote the type of materials and the thickness (or lead equivalence) of each barrier of the room (walls, ceilings, floors, doors, windows). The drawing shall also denote the type and frequency of occupancy in adjacent areas, including those above and below the x-ray room of concern (e.g., hallways, offices, parking lots, and lavatories). Estimates of workload shall also be provided with the drawing.

- E.** An applicant proposing to use a particle accelerator for medical purposes shall not use the particle accelerator until the Department inspection required in R9-7-914 has been completed.

Historical Note

New Section R9-7-202 recodified from R12-1-202, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-203. Application for Registration of Servicing and Installation

- A.** Each person who is engaged in the business of installing or offering to install radiation machines shall apply for registration. For purposes of this Chapter, install includes selling and servicing, or offering to sell or service, x-ray machines in Arizona.
- B.** The applicant shall complete the application for registration on forms that request information required by A.R.S. § 30-672.01, provided by the Department.

Historical Note

New Section R9-7-203 recodified from R12-1-203, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-204. Issuance of Notice of Registration

- A.** Upon determining that the application meets the requirements of the Act and this Article, the Department shall issue a Notice of Registration.
- B.** All radiation machines located at the same facility may be registered using one Notice of Registration.

Historical Note

New Section R9-7-204 recodified from R12-1-204, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-205. Expiration of Notice of Registration or Certification

- A.** Except as provided in subsection (B), a Notice of Registration, issued according to R9-7-204, or a certificate issued according to R9-7-208, expires at the end of the day on the expiration date stated in the Notice of Registration or certificate.
- B.** If an application for renewal is filed by the registrant or certificate holder not less than 30 days prior to the expiration of the Notice of Registration or certificate, the Notice of Registration or certificate does not expire until a final determination is made by the Department on the renewal application.

Historical Note

New Section R9-7-205 recodified from R12-1-205, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-206. Assembly, Installation, Removal from Service, and Transfer

- A.** A person who assembles, or installs ionizing radiation machines in this state shall notify the Department in writing within 15 days of:

TITLE 9. HEALTH SERVICES

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. The name and address of the person possessing the machine that was assembled or installed;
 2. The manufacturer, model, and serial number of each radiation machine with the tube housing model number and serial number, maximum kVp, and maximum mA, assembled or installed; and
 3. The date each machine was assembled or installed, or the first clinical procedure is performed.
- B.** Any person who possesses a radiation machine registered by the Department shall notify the Department within 15 days of the machine being taken out of service. The written notification shall contain the name and address of the person receiving the machine, if it is sold, leased, or transferred to another person; the manufacturer, model, and serial number of the machine; and the date the machine was taken out of service.
- C.** In the case of diagnostic x-ray systems that contain certified components, an assembler shall, within 15 days following completion of the assembly, submit to the Department a copy of the assembler's report (FDA Report No. 2579) prepared in compliance with requirements in 21 CFR 1020.30(d), revised April 1, 2008, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments. The report shall suffice in lieu of any other report by the assembler, if it contains the information required in subsection (A).
- D.** A person shall not make, sell, lease, transfer, lend, assemble, service, or install radiation machines or the supplies used in connection with radiation machines unless the supplies and equipment when properly placed in operation and used, meet the requirements of these rules.

Historical Note

New Section R9-7-206 recodified from R12-1-206, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-207. Reciprocal Recognition of Out-of-state Radiation Machines

- A.** If any radiation machine is to be brought into the state for temporary use, the person proposing to bring the radiation machine into the state shall provide written notice to the Department at least three working days before the radiation machine is to be used in the state. The notice shall include the type of radiation machine; the nature, duration, and scope of use; and the exact location where the radiation machine is to be used. If, for a specific case, the three working-day period would impose an undue hardship, the person may upon application to the Department, obtain permission to proceed sooner.
- B.** In addition, the owner of the radiation machine and the person possessing the machine while in the state shall:
1. Comply with all applicable rules of the Department;
 2. Upon request, supply the Department with a copy of the machine's registration and other information regarding the safe operation of the machine while it is in the state; and
 3. Upon request, supply the Department with the work authorization from the Department, machine registration, operating and emergency procedures, utilization log, survey instrument and associated calibration record, and training records for all users.
- C.** A radiation machine shall not be operated within the state on a temporary basis in excess of 180 calendar days per year.

Historical Note

New Section R9-7-207 recodified from R12-1-207, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-208. Certification of Mammography Facilities

An applicant seeking certification of a facility according to A.R.S. § 30-672(J) shall:

1. Provide evidence with the application that a quality assurance program has been established and is in use under R9-7-614(B)(1) and (2),
2. Provide evidence with the application that physicians reading mammographic images have the training and experience required in A.R.S. § 32-2842, and
3. Provide evidence with the application that physicians reading mammographic images have met the minimum criteria established by their respective licensing boards, as required in A.R.S. § 32-2842(C).

Historical Note

New Section R9-7-208 recodified from R12-1-208, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-209. Notifications

- A.** A registrant shall notify the Department within 30 days of any change to the information contained in the notice of registration or a certificate issued according to R9-7-208.
- B.** A person who possesses a radiation machine registered by the Department shall notify the Department within 15 days if the machine is discarded or transferred to another person. In the notice, the person shall provide the name and address of the person who receives the machine, if it is sold, leased, or transferred to another person; the manufacturer, model, and serial number of the machine; and the date the machine was taken out of service.

Historical Note

New Section R9-7-209 recodified from R12-1-209, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

Appendix A. Application Information

An application shall contain the following information as required in R9-7-202(B), before a registration will be issued. The Department shall provide an application form to an applicant with a guide, if available, or shall assist the applicant to ensure that only correct information is provided on the application.

| | |
|---|---|
| Name and mailing address of applicant | Use location |
| Person responsible for radiation safety program | Telephone number |
| Type of facility | Facility subtype |
| Legal structure and ownership | Signature of certifying agent |
| Radiation machine information | Equipment identifiers |
| Shielding information | Scale drawing, if applicable |
| Equipment operator instructions and restrictions | Physicist name and training, if applicable |
| Classification of professional in charge | |
| Record of calibration for therapy units | Type of request: amendment, new, or renewal |
| Protection survey results, if applicable | |
| Type of industrial radiography program, if applicable | |
| Radiation Safety Officer name, if applicable | Contact person |
| Other registration requirements listed in Articles 2, 6, 8, 9, and 11 | Appropriate fee listed in Article 13 schedule |

TITLE 9. HEALTH SERVICES

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Historical Note

New Article 2, Appendix A recodified from 12 A.A.C. 1, Article 2, Appendix A, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

ARTICLE 3. RADIOACTIVE MATERIAL LICENSING**R9-7-301. Ownership, Control, or Transfer of Radioactive Material**

- A.** In addition to the requirements of this Article, all licensees are subject to the requirements of 9 A.A.C. 7, Article 1, Article 4, and Article 10. Licensees engaged in industrial radiographic operations are subject to the requirements of 9 A.A.C. 7, Article 5; licensees using radioactive material in the practice of medicine are subject to the requirements of 9 A.A.C. 7, Article 7; licensees transporting radioactive material are subject to the requirements contained in 9 A.A.C. 7, Article 15; and licensees using radioactive material in well logging operations are subject to the requirements in 9 A.A.C. 7, Article 17.
- B.** Notwithstanding any other provisions of this Article, any person may own radioactive material, provided that the ownership does not include the actual possession, custody, use, or physical transfer of radioactive material or the manufacture or production of any article that contains radioactive material without the applicable certification, license, or registration.
- C.** A manufacturer, processor, or producer of any equipment, device, commodity, or other product that contains source material or radioactive material whose subsequent possession, use, transfer, or disposal by all other persons is exempt from regulatory requirements may only obtain authority to transfer possession or control of the material from the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Historical Note

New Section R9-7-301 recodified from R12-1-301, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-302. Source Material; Exemptions

- A.** Any person is exempt from this Article to the extent the person receives, possesses, uses, delivers or transfers source material in any chemical mixture, compound, solution, or alloy in which the source material is by weight less than 1/20th of 1 percent (0.0005) of the mixture, compound, solution, or alloy.
- B.** Any person is exempt from this Article to the extent the person receives, possesses, uses, or transfers unrefined and unprocessed ore containing source material, provided that, the person does not refine or process the ore except as authorized in a specific license.
- C.** Any person is exempt from the requirements for a license set forth in this Article if the person receives, possesses, uses, or transfers:
1. Any quantities of thorium contained in:
 - a. Incandescent gas mantles;
 - b. Vacuum tubes;
 - c. Welding rods;
 - d. Electric lamps for illuminating purposes provided that each lamp does not contain more than 50 milligrams of thorium;
 - e. Germicidal lamps, sunlamps, and lamps for outdoor or industrial lighting, provided that each lamp does not contain more than 2 grams of thorium;
 - f. Rare earth metals, compounds, mixtures, or products containing not more than 0.25 percent by weight thorium, uranium, or any combination of thorium and uranium; or
 - g. Individual neutron dosimeters, provided that each dosimeter does not contain more than 50 milligrams of thorium;
 2. Source material contained in the following products:
 - a. Glazed ceramic tableware manufactured before August 27, 2013, provided that the glaze contains not more than 20 percent by weight source material;
 - b. Glassware containing not more than 2 percent by weight source material or, for glassware manufactured before August 27, 2013, 10 percent by weight source material, but not including commercially manufactured glass brick, pane glass, ceramic tile or other glass or ceramic used in construction; or
 - c. Piezoelectric ceramic containing not more than 2 percent by weight source material;
 3. Photographic film, negatives, and prints containing uranium or thorium;
 4. Any finished product or part fabricated of, or containing, tungsten-thorium or magnesium-thorium alloys, provided that the thorium content of the alloy does not exceed 4 percent by weight and that the exemption contained in this subsection does not authorize the chemical, physical, or metallurgical treatment or processing of the finished product or part;
 5. Uranium contained in counterweights installed in aircraft, rockets, projectiles, and missiles, or stored or handled in connection with installation or removal of counterweights, provided that:
 - a. Each counterweight has been impressed with the following legend clearly legible through any plating or other covering: "DEPLETED URANIUM";
 - b. Each counterweight is durably and legibly labeled or marked with the identification of the manufacturer and the statement: "UNAUTHORIZED ALTERATIONS PROHIBITED";
 - c. The exemption contained in subsection (C)(5) does not authorize the chemical, physical, or metallurgical treatment or processing of any counterweight other than repair or restoration of any plating or other covering; and
 - d. The requirements specified in subsections (C)(5)(a) and (b) need not be met by counterweights manufactured prior to December 31, 1969; provided, that these counterweights were manufactured under a specific license issued by the Atomic Energy Commission and were impressed with the legend, "UNAUTHORIZED ALTERATIONS PROHIBITED";
 6. Natural or depleted uranium metal used as shielding and constituting part of any shipping container; provided that:
 - a. The shipping container is conspicuously and legibly impressed with the legend "CAUTION – RADIOACTIVE SHIELDING – URANIUM," and
 - b. The uranium metal is encased in mild steel or equally fire resistant metal with minimum wall thickness of 1/8 inch (3.2 mm);
 7. Thorium or uranium contained in or on finished optical lenses or mirrors, provided that each lens or mirror does not contain more than 10 percent by weight thorium or uranium or, for lenses manufactured before August 27, 2013, 30 percent by weight of thorium; and that the exemption contained in this Section does not authorize either:
 - a. The shaping, grinding, or polishing of such lens or mirror or manufacturing processes other than the assembly of such lens or mirror into optical systems and devices without any alteration of the lens or mirror; or

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.
2. Perform all duties necessary to carry out the functions and responsibilities of the department.
3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.
4. Administer and enforce the laws relating to health and sanitation and the rules of the department.
5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.
6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop, tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.
7. Prepare sanitary and public health rules.
8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term

lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health department, environmental department or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any monies that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases that are reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases that are transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meatpacking plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in

which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

- (a) Served at a noncommercial social event such as a potluck.
- (b) Prepared at a cooking school that is conducted in an owner-occupied home.
- (c) Not potentially hazardous and prepared in a kitchen of a private home for sale or distribution for noncommercial purposes.
- (d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.
- (e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.
- (f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.
- (g) A cottage food product that is prepared in a kitchen of a private home for commercial purposes consistent with chapter 8, article 2 of this title.
- (h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.
- (i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.
- (j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:
 - (i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.
 - (ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow

or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

(k) Spirituous liquor produced by a producer that is licensed by the department of liquor licenses and control or spirituous liquor imported and sold by wholesalers that is licensed by the department of liquor licenses and control. This exemption includes all commercially prepackaged spirituous liquor and all spirituous liquor poured at a licensed special event, festival or fair in this state.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for sanitary facilities to be used in identifying, storing, handling and selling all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for submitting samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and

vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to

contacts, suspects and associates of communicable disease patients. Confidential information may not be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection and chapter 8, article 2 of this title. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout this state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction if the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to

nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product" has the same meaning prescribed in section 36-931.
2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

30-654. Powers and duties of the department

A. The department may:

1. Accept grants or other contributions from the federal government or other sources, public or private, to be used by the department to carry out any of the purposes of this chapter.
2. Do all things necessary, within the limitations of this chapter, to carry out the powers and duties of the department.
3. Conduct an information program, including:
 - (a) Providing information on the control and regulation of sources of radiation and related health and safety matters, on request, to members of the legislature, the

executive offices, state departments and agencies and county and municipal governments.

(b) Providing such published information, audiovisual presentations, exhibits and speakers on the control and regulation of sources of radiation and related health and safety matters to the state's educational system at all educational levels as may be arranged.

(c) Furnishing to citizen groups, on request, speakers and such audiovisual presentations or published materials on the control and regulation of sources of radiation and related health and safety matters as may be available.

(d) Conducting, sponsoring or cosponsoring and actively participating in the professional meetings, symposia, workshops, forums and other group informational activities concerned with the control and regulation of sources of radiation and related health and safety matters when representation from this state at such meetings is determined to be important by the department.

B. The department shall:

1. Regulate the use, storage and disposal of sources of radiation.
2. Establish procedures for purposes of selecting any proposed permanent disposal site located within this state for low-level radioactive waste.
3. Coordinate with the department of transportation and the corporation commission in regulating the transportation of sources of radiation.
4. Assume primary responsibility for and provide necessary technical assistance to handle any incidents, accidents and emergencies involving radiation or sources of radiation occurring within this state.
5. Adopt rules deemed necessary to administer this chapter in accordance with title 41, chapter 6.
6. Adopt uniform radiation protection and radiation dose standards to be as nearly as possible in conformity with, and in no case inconsistent with, the standards contained in the regulations of the United States nuclear regulatory commission and the standards of the United States public health service. In the adoption of the standards, the department shall consider the total occupational radiation exposure of individuals, including that from sources that are not regulated by the department.
7. Adopt rules for personnel monitoring under the close supervision of technically competent people in order to determine compliance with safety rules adopted under this chapter.

8. Adopt a uniform system of labels, signs and symbols and the posting of the labels, signs and symbols to be affixed to radioactive products, especially those transferred from person to person.
9. By rule, require adequate training and experience of persons using sources of radiation with respect to the hazards of excessive exposure to radiation in order to protect health and safety.
10. Adopt standards for the storage of radioactive material and for security against unauthorized removal.
11. Adopt standards for the disposal of radioactive materials into the air, water and sewers and burial in the soil in accordance with 10 Code of Federal Regulations part 20.
12. Adopt rules that are applicable to the shipment of radioactive materials in conformity with and compatible with those established by the United States nuclear regulatory commission, the department of transportation, the United States department of the treasury and the United States postal service.
13. In individual cases, impose additional requirements to protect health and safety or grant necessary exemptions that will not jeopardize health or safety, or both.
14. Make recommendations to the governor and furnish such technical advice as required on matters relating to the utilization and regulation of sources of radiation.
15. Conduct or cause to be conducted off-site radiological environmental monitoring of the air, water and soil surrounding any fixed nuclear facility, any uranium milling and tailing site and any uranium leaching operation, and maintain and report the data or results obtained by the monitoring as deemed appropriate by the department.
16. Develop and utilize information resources concerning radiation and radioactive sources.
17. Prescribe by rule a schedule of fees to be charged to categories of licensees and registrants of radiation sources, including academic, medical, industrial, waste, distribution and imaging categories. The fees shall cover a significant portion of the reasonable costs associated with processing the application for license or registration, renewal or amendment of the license or registration and the costs of inspecting the licensee or registrant activities and facilities, including the cost to the department of employing clerical help, consultants and persons possessing technical expertise and using analytical instrumentation and information processing systems.
18. Adopt rules establishing radiological standards, personnel standards and quality assurance programs to ensure the accuracy and safety of screening and diagnostic mammography.

C. The department shall deposit, pursuant to sections 35-146 and 35-147, ninety percent of the monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the health services licensing fund established by section 36-414 and ten percent of the monies received from fees collected pursuant to subsection B, paragraph 17 of this section and section 32-2805 in the state general fund.

30-657. Records

A. Each person that possesses or uses a source of radiation shall maintain records relating to its receipt, storage, transfer or disposal and such other records as the department requires by rule.

B. The department shall require each person that possesses or uses a source of radiation to maintain appropriate records showing the radiation exposure of all individuals for whom personnel monitoring is required by rules adopted by the department. Copies of records required by this section shall be submitted to the department on request by the department.

C. Any person that possesses or uses a source of radiation shall furnish to each employee for whom personnel monitoring is required a copy of the employee's personal exposure record at such times as prescribed by rules adopted by the department.

D. Any person that possesses or uses a source of radiation, when requested, shall submit to the department copies of records or reports submitted to the United States nuclear regulatory commission regardless of whether the person is subject to regulation by the department. The department, by rule, shall specify the records or reports required to be submitted to the department under this subsection.

30-671. Radiation protection standards

A. Radiation protection standards in rules adopted by the department under this chapter do not limit the kind or amount of radiation that may be intentionally applied to a person or animal for diagnostic or therapeutic purposes by or under the direction of a licensed practitioner of the healing arts.

B. Radiation sources shall be registered, licensed or exempted at the discretion of the department.

30-672. Licensing and registration of sources of radiation; exemptions

A. The department by rule shall provide for general or specific licensing of by-product, source, special nuclear materials or devices or equipment using those materials. The department shall require from the applicant satisfactory evidence that the applicant is using methods and techniques that are demonstrated to be safe and

that the applicant is familiar with the rules adopted by the department under section 30-654, subsection B, paragraph 5 relative to uniform radiation standards, total occupational radiation exposure norms, labels, signs and symbols, storage, waste disposal and shipment of radioactive materials. The department may require that, before it issues a license, the employees or other personnel of an applicant who may deal with sources of radiation receive a course of instruction approved by the department concerning department rules. The department shall require that the applicant's proposed equipment and facilities be adequate to protect health and safety and that the applicant's proposed administrative controls over the use of the sources of radiation requested be adequate to protect health and safety.

B. The department may require registration or licensing of other sources of radiation if deemed necessary to protect public health or safety.

C. The department may exempt certain sources of radiation or kinds of uses or users from the licensing or registration requirements set forth in this section if it finds that exempting such sources of radiation or kinds of uses or users will not constitute a significant risk to the health and safety of the public.

D. The director may suspend or revoke, in whole or in part, any license issued under subsection A of this section if the licensee or an officer, agent or employee of the licensee:

1. Violates this chapter or rules of the department adopted pursuant to this chapter.
2. Has been, is or may continue to be in substantial violation of the requirements for licensure of the radiation source and as a result the health or safety of the general public is in immediate danger.

E. If the licensee, or an officer, agent or employee of the licensee, refuses to allow the department or its employees or agents to inspect the licensee's premises, such an action shall be deemed reasonable cause to believe that a substantial violation under subsection D, paragraph 2 of this section exists.

F. A license may not be suspended or revoked under this chapter without affording the licensee notice and an opportunity for a hearing as provided in title 41, chapter 6, article 10.

G. The department shall not require persons who are licensed in this state to practice as a dentist, physician assistant, chiropodist or veterinarian or licensed in this state to practice medicine, surgery, osteopathic medicine, chiropractic or naturopathic medicine to obtain any other license to use a diagnostic x-ray machine, but these persons are governed by their own licensing acts.

H. Persons who are licensed by the federal communications commission with respect to the activities for which they are licensed by that commission are exempt from this chapter.

I. Rules adopted pursuant to this chapter may provide for recognition of other state or federal licenses as the department deems desirable, subject to such registration requirements as the department prescribes.

J. Any licenses issued by the department shall state the nature, use and extent of use of the source of radiation. If at any time after a license is issued the licensee desires any change in the nature, use or extent, the licensee shall seek an amendment or a new license under this section.

K. The department shall prescribe by rule requirements for financial security as a condition for licensure under this article. The department shall deposit all amounts posted, paid or forfeited as financial security in the radiation regulatory and perpetual care fund established by section 30-694.

L. Persons applying for licensure shall provide notice to the city or town where the applicant proposes to operate as part of the application process.

M. Any facility that provides diagnostic or screening mammography examinations by or under the direction of a person who is exempt from further licensure under subsection G of this section shall obtain certification by the department. The department shall prescribe by rule the requirements of certification in order to ensure the accuracy and safety of diagnostic and screening mammography.

30-672.01. Registration of persons who install or service radiation machines; exception; roster of registrants

A. A person who is in the business of installing or servicing radiation machines that are required to be registered by the department shall register with the department on a form provided by the department.

B. Notwithstanding subsection A of this section, a person who is subject to the jurisdiction of the department and who operates a radiation machine is not required to register with the department.

C. The registration form required pursuant to subsection A of this section shall be limited to the following information:

1. The full business name of the registrant.
2. The names of the owners if the registrant is a corporation or partnership.
3. The names of employees who carry out installation or service work for the registrant.

4. The business address of the registrant.

D. The department shall maintain a roster of all registrants, including the date of initial registration. The roster shall be available for public inspection.

E. A registrant must reregister with the department if there is a change in the information provided under subsection C of this section.

30-673. Unlawful acts

It is unlawful for any person to receive, use, possess, transfer, install or service any source of radiation unless the person is registered, licensed or exempted by the department in accordance with this chapter and rules adopted under this chapter.

E-3.

DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 10, Article 19

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: March 12, 2025

SUBJECT: DEPARTMENT OF HEALTH SERVICES
Title 9, Chapter 10, Article 19

Summary

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) relates to ten (10) rules in Title 9, Chapter 10, Article 19 regarding the regulation of Counseling Facilities.

In the prior 5YRR for these rules, which was approved by the Council in February 2020, the Department proposed to amend four (4) rules to improve their clarity, conciseness, and understandability. The Department completed this prior proposed course of action through final expedited rulemaking which became effective on November 3, 2020.

Proposed Action

In the current report, the Department proposes to amend the rules to address issues identified in this report, outlined in more detail below. The Department plans to submit a Notice of Final Expedited Rulemaking to the Council by February 2026.

1. Has the agency analyzed whether the rules are authorized by statute?

The Department cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Department states that A.R.S. § 36-405 requires the Department to establish minimum standards and requirements for the construction; equipment; sanitation; staffing for medical, nursing, and personal care services; and recordkeeping of health care institutions necessary to assure the public's health, safety and welfare. The statute further allows the Department to classify and subclassify health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care, and standard of patient care required. The Department states that the rules in 9 A.A.C. 10 were amended to comply with Laws 2014, Ch. 233 which repealed the counseling facility rules in R9-10-117 and established a new Article 19 through exempt rulemaking. The Department indicates the rules in Article 19 include requirements governing supplemental application information; administration; quality management; contracted services; personnel; patient rights; medical records; counseling; physical plant, environmental services, and equipment standards for counseling facilities. The Department says that Article 19 also included requirements for affiliated outpatient treatment centers and affiliated counseling facilities.

The Department says that as of December 2024, there are 369 licensed counseling facilities in the state of Arizona. The Department received 356 renewal applications and 109 initial applications in 2023. In 2024, The Department also conducted 25 complaint surveys and 269 compliance surveys (plus 11 that were compliance/complaint), 39 counseling facilities closed or were licensed under another governing authority in 2024.

The Department believes the rule changes make them more easily understood, complied with, and enforced, and may have provided a significant benefit to the affected persons, including the Department, adult day health care facilities, and participants. The Department estimates that the actual costs and benefits experienced by persons affected by the rules is generally consistent with the costs and benefits considered in developing the rules.

Stakeholders include the Department, licensed counseling facilities and their patients, and persons who contract with licensees to provide counseling services.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states the purpose of the counseling facility rules is to ensure the safety, quality, and effectiveness of counseling services provided to patients by licensed facilities. The Department indicates that these rules establish comprehensive regulatory standards for all aspects of facility operation, from governance to service delivery, personnel, patient rights, and facility maintenance. The Department believes that the rules accomplish this purpose while protecting health and safety. The Department says the rules safeguard public health by ensuring counseling services are safe, effective, and respectful, promoting mental well-being and protecting patient rights. The Department states that the rules reflect national standards and

industry norms and are the minimum necessary to protect the health and safety of the public. The Department states that the minor changes made as part of the 2020 expedited rulemaking clarified the rules and, thus, also reduced regulatory burden. The Department indicates that the changes made the rules more consistent with practices and increased consistency with health care institution licensing rules. The Department believes that the rules impose the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective.

4. Has the agency received any written criticisms of the rules over the last five years?

The Department indicates it has not received any written criticisms of the rules in the last five years.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Department indicates the rules are mostly clear, concise, and understandable except for the following:

- **R9-10-1902**
 - The rules would be more clear, concise, and understandable if subsection (1) was separated into two subsections, to clarify that the clinical operational hours and administrative operational hours may be different, however, administrative hours may be longer than the clinical hours.
- **R9-10-1902**
 - The rules would be more clear, concise, and understandable if subsection (2) specified that a request to provide DUI screening, DUI education, DUI treatment, or misdemeanor domestic violence offender treatment is for court-ordered programs in accordance with 9 A.A.C. 20.
- **R9-10-1902**
 - The rules would be more clear, concise, and understandable if subsections (3) and (4) were combined, as well as subsections (5), and (6), which would make the rule language less duplicative
- **R9-10-1903**
 - The rules would be more clear, concise, and understandable if subsection (A)(1) was revised to correct a grammatical error and if (A)(6) was revised to be simplified and less duplicative. In addition, subsection (C)(10)(B) would be clearer if the rule clarified that a timeframe should be included in the counseling facility's steps for responding to a complaint.
- **R9-10-1906**
 - The rules would be more clear, concise, and understandable if subsection (6) was amended to clarify that a provider is required to be on the premises of the counseling facility when providing telehealth services.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Department indicates the rules are mostly consistent with other rules and statutes except for the following:

- **R9-10-1903**
 - Subsection (C)(9) is inconsistent with the statutory language in A.R.S. § 36-3601 which uses “telehealth” rather than “telemedicine.” In addition, the rule can be amended to be clearer and more consistent with the statute by clarifying that telehealth services are provided according to Title 36, Chapter 36 during clinical operational hours.
- **R9-10-1909**
 - Subsection (B)(7) would be more consistent with the other rules in Chapter 10 by amending “behavioral health issue” to “behavioral health issue condition”.

7. Has the agency analyzed the rules' effectiveness in achieving its objectives?

The Department indicates the rules are mostly effective in achieving their objectives except for the following:

- **R9-10-1902**
 - The rule is effective but would be more effective if it specified that the supplemental application requirements must indicate whether the counseling facility plans to provide services to patients under 18 years of age.

8. Has the agency analyzed the current enforcement status of the rules?

The Department indicates the rules are currently enforced as written.

9. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Department indicates there are no corresponding federal laws.

10. For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines “general permit” to mean “a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct

identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing.”

The Department states the rules require the issuance of a specific agency authorization, which is authorized by A.R.S. § 36-405, so a general permit is not applicable pursuant to A.R.S. § 41-1037(A)(2). Council staff believes the Department is in compliance with A.R.S. § 41-1037.

11. Conclusion

This Five-Year Review Report (5YRR) from the Department of Health Services (Department) relates to ten (10) rules in Title 9, Chapter 10, Article 19 regarding the regulation of Counseling Facilities. The Department proposes to amend the rules to make them more clear, concise, understandable, consistent, and effective. The Department plans to submit a Notice of Final Expedited Rulemaking to the Council by February 2026.

Council staff recommends approval of this report.

Arizona Department of Health Services

Five-Year-Review Report

Title 9. Health Services

Chapter 6. Department of Health Services -

Health Care Institutions: Licensing

Article 19. Counseling Facilities

December 2024

1. Authorization of the rule by existing statutes

General Statutory Authority: A.R.S. §§ 36-132(A)(1) and (17) and 36-136(G)

Specific Statutory Authority: A.R.S. §§ 36-405, 36-406, and 36-407

In addition, the following rules have additional specific statutory authority:

| Rule | Statutory Authority |
|------------------------------|----------------------------|
| R9-10-1902 | A.R.S. § 36-422 |
| R9-10-1906 | A.R.S. § 36-405.02 |
| R9-10-1906 and R9-10-1909 | A.R.S. § 36-425.03 |

2. The objective of each rule:

| Rule | Objective |
|-------------|--|
| R9-10-1902 | To specify license application requirements, in addition to those in A.R.S. § 36-422 and R9-10-105 that are specific to counseling facilities. |
| R9-10-1903 | To establish minimum requirements and responsibilities for a counseling facility's governing authority and administrator. |
| R9-10-1904 | To establish minimum requirements for a counseling facility's quality management program. |
| R9-10-1905 | To establish minimum requirements for persons who contract with the licensee to provide counseling services. |
| R9-10-1906 | To establish minimum standards for counseling facility personnel and minimum standards for documentation of personnel member qualifications. |
| R9-10-1907 | To establish minimum standards for patient rights. |
| R9-10-1908 | To establish minimum requirements for patient medical records. |
| R9-10-1909 | To establish minimum requirements for counseling services. |
| R9-10-1910 | To establish minimum standards for physical plant, environmental services, and equipment for a counseling facility. |
| R9-10-1911 | To establish minimum standards for a information and records maintained by an affiliated outpatient treatment center or an affiliated counseling facility. |

3. Are the rules effective in achieving their objectives?

Yes X No

If not, please identify the rule(s) that is not effective and provide an explanation for why the rule(s) is not effective.

| Rule | Explanation |
|------------|---|
| R9-10-1902 | The rule is effective but would be more effective if it specified that the supplemental application requirements must indicate whether the counseling facility plans to provide services to patients under 18 years of age. |

4. Are the rules consistent with other rules and statutes? Yes No

If not, please identify the rule(s) that is not consistent. Also, provide an explanation and identify the provisions that are not consistent with the rule.

| Rule | Explanation |
|------------|--|
| R9-10-1903 | Subsection (C)(9) is inconsistent with the statutory language in A.R.S. § 36-3601 which uses “telehealth” rather than “telemedicine.” In addition, the rule can be amended to be clearer and more consistent with the statute by clarifying that telehealth services are provided according to Title 36, Chapter 36 during clinical operational hours. |
| R9-10-1909 | Subsection (B)(7) would be more consistent with the other rules in Chapter 10 by amending “behavioral health issue” to “behavioral health issue condition”. |

5. Are the rules enforced as written? Yes No

If not, please identify the rule(s) that is not enforced as written and provide an explanation of the issues with enforcement. In addition, include the agency’s proposal for resolving the issue.

| Rule | Explanation |
|------|-------------|
| | |

6. Are the rules clear, concise, and understandable? Yes No

If not, please identify the rule(s) that is not clear, concise, or understandable and provide an explanation as to how the agency plans to amend the rule(s) to improve clarity, conciseness, and understandability.

| Rule | Explanation |
|------------|---|
| R9-10-1902 | The rules would be more clear, concise, and understandable if subsection one was separated into two subsections, to clarify that the clinical operational hours and administrative operational hours may be different, however, administrative hours may be longer than the clinical hours. |
| R9-10-1902 | The rules would be more clear, concise, and understandable if subsection two specified that a request to provide DUI screening, DUI education, DUI treatment, or misdemeanor domestic violence offender treatment is for court-ordered programs in accordance with 9 A.A.C. 20. |

| | |
|------------|---|
| R9-10-1902 | The rules would be more clear, concise, and understandable if subsections (3) and (4) were combined, as well as subsections (5), and (6), which would make the rule language less duplicative |
| R9-10-1903 | The rules would be more clear, concise, and understandable if subsection (A)(1) was revised to correct a grammatical error and if (A)(6) was revised to be simplified and less duplicative. In addition, subsection (C)(10)(B) would be clearer if the rule clarified that a timeframe should be included in the counseling facility’s steps for responding to a complaint. |
| R9-10-1906 | The rules would be more clear, concise, and understandable if subsection (6) was amended to clarify that a provider is required to be on the premises of the counseling facility when providing telehealth services. |

7. **Has the agency received written criticisms of the rules within the last five years?** Yes No

If yes, please fill out the table below:

| Rule | Explanation |
|------|-------------|
| | |

8. **Economic, small business, and consumer impact comparison:**

Arizona Revised Statutes (“A.R.S.”) § 36-405 requires the Arizona Department of Health Services (Department) to establish minimum standards and requirements for the construction; equipment; sanitation; staffing for medical, nursing, and personal care services; and recordkeeping of health care institutions necessary to assure the public’s health, safety and welfare. The statute further allows the Department to classify and subclassify health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care, and standard of patient care required. The rules in 9 A.A.C. 10 were amended to comply with Laws 2014, Ch. 233 which repealed the counseling facility rules in R9-10-117 and established a new Article 19 through exempt rulemaking. The rules in Article 19 included requirements governing supplemental application information; administration; quality management; contracted services; personnel; patient rights; medical records; counseling; physical plant, environmental services, and equipment standards for counseling facilities. Article 19 also included requirements for affiliated outpatient treatment centers and affiliated counseling facilities.

As of December 2024, there are 369 licensed counseling facilities in the state of Arizona. The Department received 356 renewal applications and 109 initial applications in 2023. In 2024, the Department also conducted 25 complaint surveys and 269 compliance surveys. (+11 that were compliance/complaint). 39 counseling facilities closed or were licensed under another governing authority in 2024.

Four Sections of the rules, R9-10-1903, R9-10-1909, R9-10-1910, and R9-10-1911, were last revised by final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020. The rules were amended to address issues identified in the 2019 five-year review report which included amending typographical errors, removing duplicative language, and making the rules more clear, concise, and understandable. The

changes also made the rules more consistent with practices and increased consistency within health care institution licensing rules.

The Department believes the rule changes, as described above, that are more easily understood, complied with, and enforced, may have provided a significant benefit to the affected persons, including the Department, adult day health care facilities, and participants. On the basis of the information described above, the Department estimates that the actual costs and benefits experienced by persons affected by the rules are generally consistent with the costs and benefits considered in developing the rules.

9. **Has the agency received any business competitiveness analyses of the rules?** Yes ___ No X

10. **Has the agency completed the course of action indicated in the agency's previous five-year-review report?**

Please state what the previous course of action was and if the agency did not complete the action, please explain why not.

In the 2019 five-year review report, the Department stated that the Department would revise the rules and the Department completed this course of action through final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020.

11. **A determination that the probable benefits of the rule outweigh within this state the probable costs of the rule, and the rule imposes the least burden and costs to regulated persons by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective:**

The purpose of the counseling facility rules is to ensure the safety, quality, and effectiveness of counseling services provided to patients by licensed facilities. These rules establish comprehensive regulatory standards for all aspects of facility operation, from governance to service delivery, personnel, patient rights, and facility maintenance. The Department believes that the rules accomplish this purpose while protecting health and safety. The rules safeguard public health by ensuring counseling services are safe, effective, and respectful, promoting mental well-being and protecting patient rights. The rules reflect national standards and industry norms and are the minimum necessary to protect the health and safety of the public. The minor changes made as part of the 2020 expedited rulemaking clarified the rules and, thus, also reduced the regulatory burden. The changes made the rules more consistent with practices and increased consistency within health care institution licensing rules. The benefits of these changes outweigh any possible costs. The Department believes that the rules impose the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs, necessary to achieve the underlying regulatory objective.

12. **Are the rules more stringent than corresponding federal laws?** Yes ___ No X

Please provide a citation for the federal law(s). And if the rule(s) is more stringent, is there statutory authority to exceed the requirements of federal law(s)?

Federal laws do not apply to the rule in 9 A.A.C. 10, Article 19.

13. **For rules adopted after July 29, 2010, that require the issuance of a regulatory permit, license, or agency authorization, whether the rules are in compliance with the general permit requirements of A.R.S. § 41-1037 or explain why the agency believes an exception applies:**

The rules require the issuance of a specific agency authorization, which is authorized by A.R.S. § 36-405, so a general permit is not applicable.

14. **Proposed course of action**

If possible, please identify a month and year by which the agency plans to complete the course of action.

The Department plans to amend the rules in 9 A.A.C. 10, Article 19 to address issues identified in this five-year-review report. The Department plans to submit a Notice of Final Expedited Rulemaking to the Council by February 2026.

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

Authority: A.R.S. §§ 36-132(A)(1), 36-136, 36-405, and 36-406

ARTICLE 19. COUNSELING FACILITIES

Article 19, consisting of Sections R9-10-1901 through R9-10-1911, made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

Section

ARTICLE 19. COUNSELING FACILITIES

R9-10-1901. Repealed

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Repealed by final rulemaking at 25 A.A.R. 1583, effective October 1, 2019 (Supp. 19-3).

R9-10-1902. Supplemental Application Requirements

In addition to the license application requirements in A.R.S. § 36-422 and 9 A.A.C. 10, Article 1, a governing authority applying for a license as a counseling facility shall submit, in a format provided by the Department:

1. The days and hours of clinical operation and, if different from the days and hours of clinical operation, the days and hours of administrative operation;
2. If applicable, a request to provide one of more of the following:
 - a. DUI screening,
 - b. DUI education,
 - c. DUI treatment, or
 - d. Misdemeanor domestic violence offender treatment;
3. Whether the counseling facility has an affiliated outpatient treatment center;
4. If the counseling facility has an affiliated outpatient treatment center:
 - a. The affiliated outpatient treatment center's name; and
 - b. Either:
 - i. The license number assigned to the affiliated outpatient treatment center by the Department; or
 - ii. If the affiliated outpatient treatment center is not currently licensed, the:
 - (1) Street address of the affiliated outpatient treatment center, and
 - (2) Date the affiliated outpatient treatment center submitted to the Department an application for a health care institution license;
5. Whether the counseling facility is sharing administrative support with an affiliated counseling facility; and
6. If the counseling facility is sharing administrative support with an affiliated counseling facility, for each affiliated counseling facility sharing administrative support with the counseling facility:
 - a. The affiliated counseling facility's name; and
 - b. Either:
 - i. The license number assigned to the affiliated counseling facility by the Department; or
 - ii. If the affiliated counseling facility is not currently licensed, the:
 - (1) Street address of the affiliated counseling facility, and
 - (2) Date the affiliated counseling facility submitted to the Department an application for a health care institution license.

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Amended by final rulemaking at 25 A.A.R. 1583, effective October 1, 2019 (Supp. 19-3).

R9-10-1903. Administration

- A.** A governing authority shall:
1. Consist of one of more individuals accountable for the organization, operation, and administration of a counseling facility;
 2. Establish, in writing:
 - a. A counseling facility's scope of services, and
 - b. Qualifications for an administrator;
 3. Designate, in writing, an administrator who has the qualifications established in subsection (A)(2)(b);
 4. Adopt a quality management program according to R9-10-1904;
 5. Review and evaluate the effectiveness of the quality management program in R9-10-1904 at least once every 12 months;
 6. Designate, in writing, an acting administrator who has the qualifications established in subsection (A)(2)(b) if the administrator is:
 - a. Expected not to be present on the premises for more than 30 calendar days, or
 - b. Not present on the premises for more than 30 calendar days; and
 7. Except as provided in subsection (A)(6), notify the Department according to A.R.S. § 36-425(I) when there is a change in an administrator and identify the name and qualifications of the new administrator.
- B.** An administrator:
1. Is directly accountable to the governing authority for the daily operation of the counseling facility and all services provided by or at the counseling facility;
 2. Has the authority and responsibility to manage the counseling facility; and
 3. Except as provided in subsection (A)(6), designates in writing, an individual who is present on the counseling facility's premises and accountable for the counseling facility when the administrator is not available.
- C.** An administrator or the administrator of the counseling facility's affiliated outpatient treatment center shall establish policies and procedures to protect the health and safety of a patient that:
1. Cover job descriptions, duties, and qualifications, including required skills, knowledge, education, and experience, for personnel members, employees, volunteers, and students;
 2. Cover orientation and in-service education for personnel members, employees, volunteers, and students;
 3. Include how a personnel member may submit a complaint relating to services provided to a patient;
 4. Cover the requirements in Title 36, Chapter 4, Article 11;
 5. Cover patient screening, admission, assessment, discharge planning, and discharge;
 6. Cover medical records;
 7. Cover the provision of counseling and any services listed in the counseling facility's scope of services;
 8. Include when general consent and informed consent are required;
 9. Cover telemedicine, if applicable;
 10. Cover specific steps for:
 - a. A patient or a patient's representative to file a complaint, and
 - b. A counseling facility to respond to a complaint; and
 11. Cover how personnel members will respond to a patient's sudden, intense, or out-of-control behavior to prevent harm to the patient or another individual.
- D.** An administrator shall ensure that:
1. Policies and procedures established according to subsection (C) are documented and implemented;
 2. Counseling facility policies and procedures are:
 - a. Reviewed at least once every three years and updated as needed, and
 - b. Available to personnel members and employees;
 3. Unless otherwise stated:
 - a. Documentation required by this Article is maintained and provided to the Department within two hours after a Department request; and
 - b. When documentation or information is required by this Chapter to be submitted on behalf of a counseling facility, the documentation or information is provided to the unit in the Department that is responsible for licensing and monitoring the counseling facility;
 4. The following are conspicuously posted:
 - a. The current license for the counseling facility issued by the Department;
 - b. The name, address, and telephone number of the Department;
 - c. A notice that a patient may file a complaint with the Department about the counseling facility;
 - d. A list of patient rights;
 - e. A map for evacuating the facility; and

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- f. A notice identifying the location on the premises where current license inspection reports required in A.R.S. § 36-425(H), with patient information redacted, are available;
- 5. Patient follow-up instructions are:
 - a. Provided, orally or in written form, to a patient or the patient's representative before the patient leaves the counseling facility unless the patient leaves against a personnel member's advice; and
 - b. Documented in the patient's medical record; and
- 6. Cardiopulmonary resuscitation training includes a demonstration of the individual's ability to perform cardiopulmonary resuscitation.
- E. If abuse, neglect, or exploitation of a patient is alleged or suspected to have occurred before the patient was admitted or while the patient is not on the premises and not receiving services from a counseling facility's employee or personnel member, an administrator shall report the alleged or suspected abuse, neglect, or exploitation of the patient as follows:
 - 1. For a patient 18 years of age or older, according to A.R.S. § 46-454; or
 - 2. For a patient under 18 years of age, according to A.R.S. § 13-3620.
- F. If an administrator has a reasonable basis, according to A.R.S. §§ 13-3620 or 46-454, to believe that abuse, neglect, or exploitation has occurred on the premises or while a patient is receiving services from a counseling facility's employee or personnel member, an administrator shall:
 - 1. If applicable, take immediate action to stop the suspected abuse, neglect, or exploitation;
 - 2. Report the suspected abuse, neglect, or exploitation of the patient as follows:
 - a. For a patient 18 years of age or older, according to A.R.S. § 46-454; or
 - b. For a patient under 18 years of age, according to A.R.S. § 13-3620;
 - 3. Document:
 - a. The suspected abuse, neglect, or exploitation;
 - b. Any action taken according to subsection (F)(1); and
 - c. The report in subsection (F)(2);
 - 4. Maintain the documentation in subsection (F)(3) for at least 12 months after the date of the report in subsection (F)(2);
 - 5. Initiate an investigation of the suspected abuse, neglect, or exploitation and document the following information within five working days after the report required in subsection (F)(2):
 - a. The dates, times, and description of the suspected abuse, neglect, or exploitation;
 - b. A description of any injury to the patient related to the suspected abuse or neglect and any change to the patient's physical, cognitive, functional, or emotional condition;
 - c. The names of witnesses to the suspected abuse, neglect, or exploitation; and
 - d. The actions taken by the administrator to prevent the suspected abuse, neglect, or exploitation from occurring in the future; and
 - 6. Maintain a copy of the documented information required in subsection (F)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Amended by final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-10-1904. Quality Management

An administrator shall ensure that:

- 1. A plan is established, documented, and implemented for an ongoing quality management program that, at a minimum, includes:
 - a. A method to identify, document, and evaluate incidents;
 - b. A method to collect data to evaluate services provided to patients;
 - c. A method to evaluate the data collected to identify a concern about the delivery of services related to patient care;
 - d. A method to make changes or take action as a result of the identification of a concern about the delivery of services related to patient care; and
 - e. The frequency of submitting a documented report required in subsection (2) to the governing authority;
- 2. A documented report is submitted to the governing authority that includes:
 - a. An identification of each concern about the delivery of services related to patient care, and
 - b. Any change made or action taken as a result of the identification of a concern about the delivery of services related to patient care; and
- 3. The report required in subsection (2) and the supporting documentation for the report are maintained for at least 12 months after the date the report is submitted to the governing authority.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

R9-10-1905. Contracted Services

An administrator shall ensure that:

1. Contracted services are provided according to the requirements in this Article, and
2. Documentation of current contracted services is maintained that includes a description of the contracted services provided.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

R9-10-1906. Personnel

An administrator shall ensure that:

1. The qualifications, skills, and knowledge required for each type of personnel member:
 - a. Are based on:
 - i. The type of counseling expected to be provided by the personnel member according to the established job description, and
 - ii. The acuity of the patients expected to be receiving the counseling from the personnel member according to the established job description; and
 - b. Include:
 - i. The specific skills and knowledge necessary for the personnel member to provide the counseling listed in the established job description,
 - ii. The type and duration of education that may allow the personnel member to have acquired the specific skills and knowledge for the personnel member to provide the counseling listed in the established job description, and
 - iii. The type and duration of experience that may allow the personnel member to have acquired the specific skills and knowledge for the personnel member to provide the counseling listed in the established job description;
2. A personnel member's skills and knowledge are verified and documented:
 - a. Before the personnel member provides counseling, and
 - b. According to policies and procedures;
3. Sufficient personnel members are present on a counseling facility's premises during hours of clinical operation with the qualifications, skills, and knowledge necessary to:
 - a. Provide the counseling in the counseling facility's scope of services,
 - b. Meet the needs of a patient, and
 - c. Ensure the health and safety of a patient;
4. At least one personnel member with cardiopulmonary resuscitation training is present on a counseling facility's premises during hours of clinical operation;
5. At least one personnel member with first aid training is present on a counseling facility's premises during hours of clinical operation;
6. A personnel member only provides counseling the personnel member is qualified to provide;
7. A plan is developed, documented, and implemented to provide orientation specific to the duties of personnel members, employees, volunteers, and students;
8. A personnel member completes orientation before providing counseling to a patient;
9. An individual's orientation is documented, to include:
 - a. The individual's name,
 - b. The date of the orientation, and
 - c. The subject or topics covered in the orientation;
10. A plan is developed, documented, and implemented to provide in-service education specific to the duties of a personnel member;
11. A personnel member's in-service education is documented, to include:
 - a. The personnel member's name,
 - b. The date of the in-service education, and
 - c. The subject or topics covered in the in-service education;
12. A personnel member who is a behavioral health technician or behavioral health paraprofessional complies with the applicable requirements in R9-10-115;
13. A record for a personnel member, an employee, a volunteer, or a student is maintained that includes:
 - a. The individual's name, date of birth, and contact telephone number;
 - b. The individual's starting date of employment or volunteer service and, if applicable, the ending date; and
 - c. Documentation of:
 - i. The individual's qualifications, including skills and knowledge applicable to the individual's job duties;
 - ii. The individual's education and experience applicable to the individual's job duties;
 - iii. The individual's completed orientation and in-service education as required by policies and procedures;
 - iv. The individual's license or certification, if the individual is required to be licensed or certified in this Article or policies and procedures;
 - v. If the individual is a behavioral health technician, clinical oversight required in R9-10-115;

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- vi. The individual's compliance with the fingerprinting requirements in A.R.S. § 36-425.03, if applicable;
 - vii. If applicable, cardiopulmonary resuscitation training; and
 - viii. If applicable, first aid training; and
14. The record in subsection (13) is:
- a. Maintained while an individual provides services for or at the counseling facility and for at least 24 months after the last date the individual provided services for or at the counseling facility; and
 - b. If the ending date of employment or volunteer service was 12 or more months before the date of the Department's request, provided to the Department within 72 hours after the Department's request.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

R9-10-1907. Patient Rights

- A.** An administrator shall ensure that at the time of admission, a patient or the patient's representative receives a written copy of the requirements in subsection (B) and the patient rights in subsection (C).
- B.** An administrator shall ensure that:
- 1. A patient is treated with dignity, respect, and consideration;
 - 2. A patient as not subjected to:
 - a. Abuse;
 - b. Neglect;
 - c. Exploitation;
 - d. Coercion;
 - e. Manipulation;
 - f. Sexual abuse;
 - g. Sexual assault;
 - h. Restraint or seclusion;
 - i. Retaliation for submitting a complaint to the Department or another entity; or
 - j. Misappropriation of personal and private property by a counseling facility's personnel member, employee, volunteer, or student; and
 - 3. A patient or the patient's representative:
 - a. Either consents to or refuses counseling;
 - b. May refuse or withdraw consent for receiving counseling before counseling is initiated;
 - c. Is informed of the following:
 - i. The counseling facility's policy on health care directives, and
 - ii. The patient complaint process;
 - d. Consents to photographs of the patient before the patient is photographed, except that a patient may be photographed when admitted to a counseling facility for identification and administrative purposes; and
 - e. Except as otherwise permitted by law, provides written consent to the release of information in the patient's:
 - i. Medical record, or
 - ii. Financial records.
- C.** A patient has the following rights:
- 1. Not to be discriminated against based on race, national origin, religion, gender, sexual orientation, age, disability, marital status, or diagnosis;
 - 2. To receive counseling that supports and respects the patient's individuality, choices, strengths, and abilities;
 - 3. To receive privacy during counseling;
 - 4. To review, upon written request, the patient's own medical record according to A.R.S. §§ 12-2293, 12-2294, and 12-2294.01;
 - 5. To receive a referral to another health care institution if the counseling facility is not authorized or not able to provide the behavioral health services needed by the patient;
 - 6. To participate or have the patient's representative participate in the development of, or decisions concerning, the counseling provided to the patient;
 - 7. To participate or refuse to participate in research or experimental treatment; and
 - 8. To receive assistance from a family member, the patient's representative, or other individual in understanding, protecting, or exercising the patient's rights.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

R9-10-1908. Medical Records

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- A.** An administrator shall ensure that:
1. A medical record is established and maintained for each patient according to A.R.S. Title 12, Chapter 13, Article 7.1;
 2. An entry in a patient's medical record is:
 - a. Recorded only by a personnel member authorized by policies and procedures to make the entry;
 - b. Dated, legible, and authenticated; and
 - c. Not changed to make the initial entry illegible;
 3. An order is:
 - a. Dated when the order is entered in the patient's medical record and includes the time of the order;
 - b. Authenticated by a medical practitioner or behavioral health professional according to policies and procedures; and
 - c. If the order is a verbal order, authenticated by the medical practitioner or behavioral health professional issuing the order;
 4. If a rubber-stamp signature or an electronic signature is used to authenticate an order, the individual whose signature the rubber-stamp signature or electronic signature represents is accountable for the use of the rubber-stamp signature or electronic signature;
 5. A patient's medical record is available to an individual:
 - a. Authorized according to policies and procedures to access the patient's medical record;
 - b. If the individual is not authorized according to policies and procedures, with the written consent of the patient or the patient's representative; or
 - c. As permitted by law; and
 6. A patient's medical record is protected from loss, damage, or unauthorized use.
- B.** If a counseling facility maintains patients' medical records electronically, an administrator shall ensure that:
1. Safeguards exist to prevent unauthorized access, and
 2. The date and time of an entry in a medical record is recorded by the computer's internal clock.
- C.** An administrator shall ensure that a patient's medical record contains:
1. Patient information that includes:
 - a. The patient's name and address, and
 - b. The patient's date of birth;
 2. A diagnosis or reason for counseling;
 3. Documentation of general consent and, if applicable, informed consent for counseling by the patient or the patient's representative;
 4. If applicable, the name and contact information of the patient's representative and:
 - a. If the patient is 18 years of age or older or an emancipated minor, the document signed by the patient consenting for the patient's representative to act on the patient's behalf; or
 - b. If the patient's representative:
 - i. Has a health care power of attorney established under A.R.S. § 36-3221 or a mental health care power of attorney executed under A.R.S. § 36-3282, a copy of the health care power of attorney or mental health care power of attorney; or
 - ii. Is a legal guardian, a copy of the court order establishing guardianship;
 5. Documentation of medical history;
 6. Orders;
 7. Assessment;
 8. Interval notes;
 9. Progress notes;
 10. Documentation of counseling provided to the patient;
 11. The name of each individual providing counseling;
 12. Disposition of the patient upon discharge;
 13. Documentation of the patient's follow-up instructions provided to the patient;
 14. A discharge summary; and
 15. If applicable, documentation of any actions taken to control the patient's sudden, intense, or out-of-control behavior to prevent harm to the patient or another individual.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4).

R9-10-1909. Counseling

- A.** An administrator of a counseling facility shall ensure that:
1. Counseling provided at the counseling facility is provided under the direction of a behavioral health professional;
 2. A personnel member who provides counseling is at least 18 years old; and
 3. If a counseling facility provides counseling to a patient who is less than 18 years of age, an employee or a volunteer and the owner comply with the fingerprint clearance card requirements in A.R.S. § 36-425.03.
- B.** An administrator of a counseling facility shall ensure that:

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

1. Before counseling for a patient is initiated, there is a behavioral health assessment for the patient that complies with the requirements in this Section that is:
 - a. Available:
 - i. In the patient's medical record maintained by the counseling facility;
 - ii. If the counseling facility is an affiliated counseling facility, in the patient's integrated medical record; or
 - iii. If the counseling facility has an affiliated outpatient treatment center, in the patient's integrated medical record maintained by the counseling facility's affiliated outpatient treatment center; and
 - b. Either:
 - i. Completed by a personnel member at the counseling facility; or
 - ii. Obtained from a behavioral health provider other than the counseling facility;
2. A behavioral health assessment, obtained from a behavioral health provider other than the counseling facility or available in a medical record or integrated medical record, was completed within 12 months before the date of the patient's current admission;
3. If a behavioral health assessment is obtained from a behavioral health provider other than the counseling facility or is available as stated in subsection (B)(1)(a), the information in the behavioral health assessment is reviewed and updated if additional information that affects the patient's behavioral health assessment is identified;
4. The review and update of the patient's assessment information in subsection (B)(3) is documented in the patient's medical record within 48 hours after the review is completed;
5. If a behavioral health assessment is conducted by a:
 - a. Behavioral health technician or a registered nurse, within 72 hours after the behavioral health assessment is conducted, a behavioral health professional certified or licensed to provide the counseling needed by the patient reviews and signs the behavioral health assessment to ensure that the behavioral health assessment identifies the counseling needed by the patient; or
 - b. Behavioral health paraprofessional, a behavioral health professional certified or licensed to provide the counseling needed by the patient supervises the behavioral health paraprofessional during the completion of the behavioral health assessment and signs the behavioral health assessment to ensure that the assessment identifies the counseling needed by the patient;
6. A behavioral health assessment:
 - a. Documents a patient's:
 - i. Presenting issue;
 - ii. Substance use history;
 - iii. Co-occurring disorder;
 - iv. Medical condition and history;
 - v. Legal history, including:
 - (1) Custody,
 - (2) Guardianship, and
 - (3) Pending litigation;
 - vi. Criminal justice record;
 - vii. Family history;
 - viii. Behavioral health treatment history; and
 - ix. Symptoms reported by the patient or the patient's representative and referrals needed by the patient, if any;
 - b. Includes:
 - i. Recommendations for further assessment or examination of the patient's needs;
 - ii. A description of the counseling, including type, frequency, and number of hours, that will be provided to the patient; and
 - iii. The signature and date signed of the personnel member conducting the behavioral health assessment; and
 - c. Is documented in patient's medical record;
7. A patient is referred to a medical practitioner if a determination is made that the patient requires immediate physical health services or the patient's behavioral health issue may be related to the patient's medical condition;
8. A request for participation in a patient's behavioral health assessment is made to the patient or the patient's representative;
9. An opportunity for participation in the patient's behavioral health assessment is provided to the patient or the patient's representative;
10. Documentation of the request in subsection (B)(8) and the opportunity in subsection (B)(9) is in the patient's medical record;
11. A patient's behavioral health assessment information is documented in the medical record within 48 hours after completing the assessment;
12. If information in subsection (B)(6)(a) is obtained about a patient after the patient's behavioral health assessment is completed, an interval note, including the information, is documented in the patient's medical record within 48 hours after the information is obtained;
13. Counseling is:

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Offered as described in the counseling facility's scope of services;
 - b. Provided according to the type, frequency, and number of hours identified in the patient's assessment; and
 - c. Provided by a behavioral health professional or a behavioral health technician;
14. A personnel member providing counseling to address a specific type of behavioral health issue has the skills and knowledge necessary to provide the counseling that addresses the specific type of behavioral health issue; and
15. Each counseling session is documented in the patient's medical record to include:
- a. The date of the counseling session;
 - b. The amount of time spent in the counseling session;
 - c. Whether the counseling was individual counseling, family counseling, or group counseling;
 - d. The treatment goals addressed in the counseling session; and
 - e. The signature of the personnel member who provided the counseling and the date signed.
- C. An administrator may provide any of the following, according to the applicable requirements in 9 A.A.C. 20, to individuals required to attend by a referring court, if approved by the Department to provide the services:
- 1. DUI screening,
 - 2. DUI education,
 - 3. DUI treatment, or
 - 4. Misdemeanor domestic violence offender treatment.
- D. An administrator of a counseling facility authorized to provide the services in subsection (C):
- 1. Shall comply with the requirements for the specific service in 9 A.A.C. 20, and
 - 2. May have a behavioral health technician who has the appropriate skills and knowledge established in policies and procedures provide the services.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Amended by final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-10-1910. Physical Plant, Environmental Services, and Safety Standards

- A. An administrator shall ensure that a counseling facility has either:
- 1. Both of the following:
 - a. A smoke detector installed in each hallway of the counseling facility that is:
 - i. Maintained in an operable condition;
 - ii. Either battery operated or, if hard-wired into the electrical system of the outpatient treatment center, has a back-up battery; and
 - iii. Tested monthly; and
 - b. A portable, operable fire extinguisher, labeled as rated at least 2A-10-BC by the Underwriters Laboratories, that:
 - i. Is available at the counseling facility;
 - ii. Is mounted in a fire extinguisher cabinet or placed on wall brackets so that the top handle of the fire extinguisher is not over five feet from the floor and the bottom of the fire extinguisher is at least four inches from the floor;
 - iii. If a disposable fire extinguisher, is replaced when its indicator reaches the red zone; and
 - iv. If a rechargeable fire extinguisher, is serviced at least once every 12 months and has a tag attached to the fire extinguisher that specifies the date of the last servicing and the name of the servicing person; or
 - 2. Both of the following that are tested and serviced at least once every 12 months:
 - a. A fire alarm system installed according to the National Fire Protection Association 72: National Fire Alarm and Signaling Code, incorporated by reference in R9-10-104.01, that is in working order; and
 - b. A sprinkler system installed according to the National Fire Protection Association 13: Standard for the Installation of Sprinkler Systems, incorporated by reference in R9-10-104.01, that is in working order.
- B. An administrator shall ensure that documentation of a test required in subsection (A) is maintained for at least 12 months after the date of the test.
- C. An administrator shall ensure that on a counseling facility's premises:
- 1. Exit signs are illuminated, if the local fire jurisdiction requires illuminated exit signs;
 - 2. Corridors and exits are kept clear of any obstructions;
 - 3. A patient can exit through any exit during hours of clinical operation;
 - 4. An extension cord is not used instead of permanent electrical wiring; and
 - 5. Each electrical outlet and electrical switch has a cover plate that is in good repair.
- D. An administrator shall:
- 1. Obtain a fire inspection conducted according to the time-frame established by the local fire department or the State Fire Marshal,
 - 2. Make any repairs or corrections stated on the fire inspection report, and
 - 3. Maintain documentation of a current fire inspection.
- E. An administrator shall ensure that:
- 1. A counseling facility's premises are:

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Sufficient to provide the counseling facility's scope of services;
- b. Cleaned and disinfected to prevent, minimize, and control illness and infection; and
- c. Free from a condition or situation that may cause an individual to suffer physical injury;
2. If a bathroom is on the premises, the bathroom contains:
 - a. A working sink with running water,
 - b. A working toilet that flushes and has a seat,
 - c. Toilet tissue,
 - d. Soap for hand washing,
 - e. Paper towels or a mechanical air hand dryer,
 - f. Lighting, and
 - g. A means of ventilation;
3. If a bathroom is not on the premises, a bathroom is:
 - a. Available for a patient's use,
 - b. Located in a building in contiguous proximity to the counseling facility, and
 - c. Free from a condition or situation that may cause an individual using the bathroom to suffer a physical injury; and
4. A tobacco smoke-free environment is maintained on the premises.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Amended by final expedited rulemaking, at 25 A.A.R. 3481 with an immediate effective date of November 5, 2019 (Supp. 19-4). Amended by final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-10-1911. Integrated Information

- A. An administrator of an affiliated outpatient treatment center may maintain the following information, required in this Article for a counseling facility for which the affiliated outpatient treatment center provides administrative support, integrated with information required in 9 A.A.C. 10, Article 10 for the outpatient treatment center:
 1. Quality management plan, documented incidents, and reports required in R9-10-1904;
 2. Contracted services information in R9-10-1905;
 3. Orientation plan, in-service education plan, and personnel records in R9-10-1906; and
 4. Medical records in R9-10-1908.
- B. An administrator of an affiliated counseling facility that shares administrative support with one or more other affiliated counseling facilities may maintain the information in subsections (A)(1) through (A)(4) integrated with information maintained by the other affiliated counseling facilities.
- C. If an administrator of an affiliated outpatient treatment center or an affiliated counseling facility maintains integrated information according to subsection (A) or (B), the administrator shall develop, document, and implement a method to ensure that:
 1. If the quality management plan is integrated, the incidents documented, concerns identified, and changes or actions taken are identified for each facility;
 2. If a person provides contracted services at more than one facility, the types of services the person provides at each facility is identified in the contract information;
 3. If an orientation plan is applicable to more than one facility, the orientation a personnel member is expected to obtain for each facility is identified in the orientation plan;
 4. If an in-service education plan is applicable to more than one facility, the in-service education a personnel member is expected to obtain for each facility is identified in the in-service education plan;
 5. If a personnel member provides counseling at more than one facility, the following is identified in the personnel member's record:
 - a. The days and hours the personnel member provides counseling for each facility;
 - b. If the personnel member's job description is different for each facility:
 - i. Each job description for the personnel member, and
 - ii. Verification of the skills and knowledge to provide counseling according to each of the personnel member's job descriptions; and
 - c. If a personnel member is a behavioral health technician, documentation of the clinical oversight provided to the personnel member, based on the number and acuity of the patients to whom the personnel member provided counseling at each facility; and
 6. If a patient receives counseling at more than one facility, the counseling received and any information related to the counseling received at each facility is identified in the patient's medical record.
- D. An administrator of a counseling facility receiving administrative support from an affiliated outpatient treatment center or an affiliated counseling facility shall ensure that if the counseling facility:

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

1. Has integrated information, the integrated information is provided to the Department for review within two hours after the Department's request:
 - a. In a written or electronic format at the counseling facility's premises; or
 - b. Electronically directly to the Department.
2. No longer receives or shares administrative support that includes integrating the information in subsection (A), the information for the counseling facility required in this Article is maintained by the counseling facility and provided to the Department according to the requirements in this Article.

Historical Note

New Section made by exempt rulemaking at 20 A.A.R. 3535, pursuant to Laws 2014, Ch. 233, § 5; effective January 1, 2015 (Supp. 14-4). Amended by final expedited rulemaking at 26 A.A.R. 3041, with an immediate effective date of November 3, 2020 (Supp. 20-4).

36-132. Department of health services; functions; contracts

A. The department, in addition to other powers and duties vested in it by law, shall:

1. Protect the health of the people of the state.
2. Promote the development, maintenance, efficiency and effectiveness of local health departments or districts of sufficient population and area that they can be sustained with reasonable economy and efficient administration, provide technical consultation and assistance to local health departments or districts, provide financial assistance to local health departments or districts and services that meet minimum standards of personnel and performance and in accordance with a plan and budget submitted by the local health department or districts to the department for approval, and recommend the qualifications of all personnel.
3. Collect, preserve, tabulate and interpret all information required by law in reference to births, deaths and all vital facts, and obtain, collect and preserve information relating to the health of the people of this state and the prevention of diseases as may be useful in the discharge of functions of the department not in conflict with chapter 3 of this title and sections 36-693, 36-694 and 39-122.
4. Operate sanitariums, hospitals or other facilities assigned to the department by law or by the governor.
5. Conduct a statewide program of health education relevant to the powers and duties of the department, prepare educational materials and disseminate information as to conditions affecting health, including basic information to promote good health on the part of individuals and communities, and prepare and disseminate technical information concerning public health to the health professions, local health officials and hospitals. In cooperation with the department of education, the department of health services shall prepare and disseminate materials and give technical assistance for the purpose of educating children in hygiene, sanitation and personal and public health, and provide consultation and assistance in community organization to counties, communities and groups of people.
6. Administer or supervise a program of public health nursing, prescribe the minimum qualifications of all public health nurses engaged in official public health work, and encourage and aid in coordinating local public health nursing services.
7. Encourage and aid in coordinating local programs concerning control of preventable diseases in accordance with statewide plans that shall be formulated by the department.
8. Encourage and aid in coordinating local programs concerning maternal and child health, including midwifery, antepartum and postpartum care, infant and preschool health and the health of schoolchildren, including special fields such as the prevention of blindness and conservation of sight and hearing.
9. Encourage and aid in coordinating local programs concerning nutrition of the people of this state.
10. Encourage, administer and provide dental health care services and aid in coordinating local programs concerning dental public health, in cooperation with the Arizona dental association. The department may bill and receive payment for costs associated with providing dental health care services and shall deposit the monies in the oral health fund established by section 36-138.

11. Establish and maintain adequate serological, bacteriological, parasitological, entomological and chemical laboratories with qualified assistants and facilities necessary for routine examinations and analyses and for investigations and research in matters affecting public health.

12. Supervise, inspect and enforce the rules concerning the operation of public bathing places and public and semipublic swimming pools adopted pursuant to section 36-136, subsection I, paragraph 10.

13. Take all actions necessary or appropriate to ensure that bottled water sold to the public and water used to process, store, handle, serve and transport food and drink are free from filth, disease-causing substances and organisms and unwholesome, poisonous, deleterious or other foreign substances. All state agencies and local health agencies involved with water quality shall provide to the department any assistance requested by the director to ensure that this paragraph is effectuated.

14. Enforce the state food, caustic alkali and acid laws in accordance with chapter 2, article 2 of this title, chapter 8, article 1 of this title and chapter 9, article 4 of this title, and collaborate in enforcing the federal food, drug, and cosmetic act (52 Stat. 1040; 21 United States Code sections 1 through 905).

15. Recruit and train personnel for state, local and district health departments.

16. Conduct continuing evaluations of state, local and district public health programs, study and appraise state health problems and develop broad plans for use by the department and for recommendation to other agencies, professions and local health departments for the best solution of these problems.

17. License and regulate health care institutions according to chapter 4 of this title.

18. Issue or direct the issuance of licenses and permits required by law.

19. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.

20. Subject to the availability of monies, develop and administer programs in perinatal health care, including:

(a) Screening in early pregnancy for detecting high-risk conditions.

(b) Comprehensive prenatal health care.

(c) Maternity, delivery and postpartum care.

(d) Perinatal consultation, including transportation of the pregnant woman to a perinatal care center when medically indicated.

(e) Perinatal education oriented toward professionals and consumers, focusing on early detection and adequate intervention to avert premature labor and delivery.

21. License and regulate the health and safety of group homes and behavioral-supported group homes for persons with developmental disabilities. The department shall issue a license to an

accredited facility for a period of the accreditation, except that a licensing period shall not be longer than three years. The department is authorized to conduct an inspection of an accredited facility to ensure that the facility meets health and safety licensure standards. The results of the accreditation survey shall be public information. A copy of the final accreditation report shall be filed with the department of health services. For the purposes of this paragraph, "accredited" means accredited by a nationally recognized accreditation organization.

B. The department may accept from the state or federal government, or any agency of the state or federal government, and from private donors, trusts, foundations or eleemosynary corporations or organizations grants or donations for or in aid of the construction or maintenance of any program, project, research or facility authorized by this title, or in aid of the extension or enforcement of any program, project or facility authorized, regulated or prohibited by this title, and enter into contracts with the federal government, or an agency of the federal government, and with private donors, trusts, foundations or eleemosynary corporations or organizations, to carry out such purposes. All monies made available under this section are special project grants. The department may also expend these monies to further applicable scientific research within this state.

C. The department, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

D. The department may enter into contracts with organizations that perform nonrenal organ transplant operations and organizations that primarily assist in the management of end-stage renal disease and related problems to provide, as payors of last resort, prescription medications necessary to supplement treatment and transportation to and from treatment facilities. The contracts may provide for department payment of administrative costs it specifically authorizes.

36-136. Powers and duties of director; compensation of personnel; rules; definitions

A. The director shall:

1. Be the executive officer of the department of health services and the state registrar of vital statistics but shall not receive compensation for services as registrar.
2. Perform all duties necessary to carry out the functions and responsibilities of the department.
3. Prescribe the organization of the department. The director shall appoint or remove personnel as necessary for the efficient work of the department and shall prescribe the duties of all personnel. The director may abolish any office or position in the department that the director believes is unnecessary.
4. Administer and enforce the laws relating to health and sanitation and the rules of the department.
5. Provide for the examination of any premises if the director has reasonable cause to believe that on the premises there exists a violation of any health law or rule of this state.
6. Exercise general supervision over all matters relating to sanitation and health throughout this state. When in the opinion of the director it is necessary or advisable, a sanitary survey of the whole or of any part of this state shall be made. The director may enter, examine and survey any source and means of water supply, sewage disposal plant, sewerage system, prison, public or private place of detention, asylum, hospital, school, public building, private institution, factory, workshop,

tenement, public washroom, public restroom, public toilet and toilet facility, public eating room and restaurant, dairy, milk plant or food manufacturing or processing plant, and any premises in which the director has reason to believe there exists a violation of any health law or rule of this state that the director has the duty to administer.

7. Prepare sanitary and public health rules.

8. Perform other duties prescribed by law.

B. If the director has reasonable cause to believe that there exists a violation of any health law or rule of this state, the director may inspect any person or property in transportation through this state, and any car, boat, train, trailer, airplane or other vehicle in which that person or property is transported, and may enforce detention or disinfection as reasonably necessary for the public health if there exists a violation of any health law or rule.

C. The director, after consultation with the department of administration, may take all necessary steps to enhance the highest and best use of the state hospital property, including contracting with third parties to provide services, entering into short-term lease agreements with third parties to occupy or renovate existing buildings and entering into long-term lease agreements to develop the land and buildings. The director shall deposit any monies collected from contracts and lease agreements entered into pursuant to this subsection in the Arizona state hospital charitable trust fund established by section 36-218. At least thirty days before issuing a request for proposals pursuant to this subsection, the department of health services shall hold a public hearing to receive community and provider input regarding the highest and best use of the state hospital property related to the request for proposals. The department shall report to the joint committee on capital review on the terms, conditions and purpose of any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, and the fiscal impact on the department and any revenues generated by the agreement. Any lease or sublease agreement entered into pursuant to this subsection relating to state hospital lands or buildings or the disposition of real property pursuant to this subsection, including state hospital lands or buildings, must be reviewed by the joint committee on capital review.

D. The director may deputize, in writing, any qualified officer or employee in the department to do or perform on the director's behalf any act the director is by law empowered to do or charged with the responsibility of doing.

E. The director may delegate to a local health department, county environmental department or public health services district any functions, powers or duties that the director believes can be competently, efficiently and properly performed by the local health department, county environmental department or public health services district if:

1. The director or superintendent of the local health department, environmental department or public health services district is willing to accept the delegation and agrees to perform or exercise the functions, powers and duties conferred in accordance with the standards of performance established by the director of the department of health services.

2. Monies appropriated or otherwise made available to the department for distribution to or division among counties or public health services districts for local health work may be allocated or reallocated in a manner designed to ensure the accomplishment of recognized local public health activities and delegated functions, powers and duties in accordance with applicable standards of

performance. If in the director's opinion there is cause, the director may terminate all or a part of any delegation and may reallocate all or a part of any monies that may have been conditioned on the further performance of the functions, powers or duties conferred.

F. The compensation of all personnel shall be as determined pursuant to section 38-611.

G. The director may make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.

H. Notwithstanding subsection I, paragraph 1 of this section, the director may define and prescribe emergency measures for detecting, reporting, preventing and controlling communicable or infectious diseases or conditions if the director has reasonable cause to believe that a serious threat to public health and welfare exists. Emergency measures are effective for not longer than eighteen months.

I. The director, by rule, shall:

1. Define and prescribe reasonably necessary measures for detecting, reporting, preventing and controlling communicable and preventable diseases. The rules shall declare certain diseases that are reportable. The rules shall prescribe measures, including isolation or quarantine, that are reasonably required to prevent the occurrence of, or to seek early detection and alleviation of, disability, insofar as possible, from communicable or preventable diseases. The rules shall include reasonably necessary measures to control animal diseases that are transmittable to humans.

2. Define and prescribe reasonably necessary measures, in addition to those prescribed by law, regarding the preparation, embalming, cremation, interment, disinterment and transportation of dead human bodies and the conduct of funerals, relating to and restricted to communicable diseases and regarding the removal, transportation, cremation, interment or disinterment of any dead human body.

3. Define and prescribe reasonably necessary procedures that are not inconsistent with law in regard to the use and accessibility of vital records, delayed birth registration and the completion, change and amendment of vital records.

4. Except as relating to the beneficial use of wildlife meat by public institutions and charitable organizations pursuant to title 17, prescribe reasonably necessary measures to ensure that all food or drink, including meat and meat products and milk and milk products sold at the retail level, provided for human consumption is free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe reasonably necessary measures governing the production, processing, labeling, storing, handling, serving and transportation of these products. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained in any warehouse, restaurant or other premises, except a meatpacking plant, slaughterhouse, wholesale meat processing plant, dairy product manufacturing plant or trade product manufacturing plant. The rules shall prescribe minimum standards for any truck or other vehicle in which food or drink is produced, processed, stored, handled, served or transported. The rules shall provide for the inspection and licensing of premises and vehicles so used, and for abatement as public nuisances of any premises or vehicles that do not comply with the rules and minimum standards. The rules shall provide an exemption relating to food or drink that is:

(a) Served at a noncommercial social event such as a potluck.

(b) Prepared at a cooking school that is conducted in an owner-occupied home.

(c) Not potentially hazardous and prepared in a kitchen of a private home for sale or distribution for noncommercial purposes.

(d) Prepared or served at an employee-conducted function that lasts less than four hours and is not regularly scheduled, such as an employee recognition, an employee fundraising or an employee social event.

(e) Offered at a child care facility and limited to commercially prepackaged food that is not potentially hazardous and whole fruits and vegetables that are washed and cut on-site for immediate consumption.

(f) Offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous.

(g) A cottage food product that is prepared in a kitchen of a private home for commercial purposes consistent with chapter 8, article 2 of this title.

(h) A whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption.

(i) Produce in a packing or holding facility that is subject to the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112) as administered by the Arizona department of agriculture pursuant to title 3, chapter 3, article 4.1. For the purposes of this subdivision, "holding", "packing" and "produce" have the same meanings prescribed in section 3-525.

(j) Spirituous liquor produced on the premises licensed by the department of liquor licenses and control. This exemption includes both of the following:

(i) The area in which production and manufacturing of spirituous liquor occurs, as defined in an active basic permit on file with the United States alcohol and tobacco tax and trade bureau.

(ii) The area licensed by the department of liquor licenses and control as a microbrewery, farm winery or craft distiller that is open to the public and serves spirituous liquor and commercially prepackaged food, crackers or pretzels for consumption on the premises. A producer of spirituous liquor may not provide, allow or expose for common use any cup, glass or other receptacle used for drinking purposes. For the purposes of this item, "common use" means the use of a drinking receptacle for drinking purposes by or for more than one person without the receptacle being thoroughly cleansed and sanitized between consecutive uses by methods prescribed by or acceptable to the department.

(k) Spirituous liquor produced by a producer that is licensed by the department of liquor licenses and control or spirituous liquor imported and sold by wholesalers that is licensed by the department of liquor licenses and control. This exemption includes all commercially prepackaged spirituous liquor and all spirituous liquor poured at a licensed special event, festival or fair in this state.

5. Prescribe reasonably necessary measures to ensure that all meat and meat products for human consumption handled at the retail level are delivered in a manner and from sources approved by the Arizona department of agriculture and are free from unwholesome, poisonous or other foreign substances and filth, insects or disease-causing organisms. The rules shall prescribe standards for

sanitary facilities to be used in identifying, storing, handling and selling all meat and meat products sold at the retail level.

6. Prescribe reasonably necessary measures regarding production, processing, labeling, handling, serving and transportation of bottled water to ensure that all bottled drinking water distributed for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions that shall be maintained at any source of water, bottling plant and truck or vehicle in which bottled water is produced, processed, stored or transported and shall provide for inspection and certification of bottled drinking water sources, plants, processes and transportation and for abatement as a public nuisance of any water supply, label, premises, equipment, process or vehicle that does not comply with the minimum standards. The rules shall prescribe minimum standards for bacteriological, physical and chemical quality for bottled water and for submitting samples at intervals prescribed in the standards.

7. Define and prescribe reasonably necessary measures governing ice production, handling, storing and distribution to ensure that all ice sold or distributed for human consumption or for preserving or storing food for human consumption is free from unwholesome, poisonous, deleterious or other foreign substances and filth or disease-causing organisms. The rules shall prescribe minimum standards for the sanitary facilities and conditions and the quality of ice that shall be maintained at any ice plant, storage and truck or vehicle in which ice is produced, stored, handled or transported and shall provide for inspection and licensing of the premises and vehicles, and for abatement as public nuisances of ice, premises, equipment, processes or vehicles that do not comply with the minimum standards.

8. Define and prescribe reasonably necessary measures concerning sewage and excreta disposal, garbage and trash collection, storage and disposal, and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels. The rules shall prescribe minimum standards for preparing food in community kitchens, adequacy of excreta disposal, garbage and trash collection, storage and disposal and water supply for recreational and summer camps, campgrounds, motels, tourist courts, trailer coach parks and hotels and shall provide for inspection of these premises and for abatement as public nuisances of any premises or facilities that do not comply with the rules. Primitive camp and picnic grounds offered by this state or a political subdivision of this state are exempt from rules adopted pursuant to this paragraph but are subject to approval by a county health department under sanitary regulations adopted pursuant to section 36-183.02. Rules adopted pursuant to this paragraph do not apply to two or fewer recreational vehicles as defined in section 33-2102 that are not park models or park trailers, that are parked on owner-occupied residential property for less than sixty days and for which no rent or other compensation is paid. For the purposes of this paragraph, "primitive camp and picnic grounds" means camp and picnic grounds that are remote in nature and without accessibility to public infrastructure such as water, electricity and sewer.

9. Define and prescribe reasonably necessary measures concerning the sewage and excreta disposal, garbage and trash collection, storage and disposal, water supply and food preparation of all public schools. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained in any public school and shall provide for inspection of these premises and facilities and for abatement as public nuisances of any premises that do not comply with the minimum standards.

10. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious health conditions at these places. The rules shall prescribe minimum standards for sanitary conditions that shall be maintained at any public or semipublic swimming pool or bathing place and shall provide for inspection of these

premises and for abatement as public nuisances of any premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of environmental quality and shall be consistent with the rules adopted by the director of the department of environmental quality pursuant to section 49-104, subsection B, paragraph 12.

11. Prescribe reasonably necessary measures to keep confidential information relating to diagnostic findings and treatment of patients, as well as information relating to contacts, suspects and associates of communicable disease patients. Confidential information may not be made available for political or commercial purposes.

12. Prescribe reasonably necessary measures regarding human immunodeficiency virus testing as a means to control the transmission of that virus, including the designation of anonymous test sites as dictated by current epidemiologic and scientific evidence.

13. Establish an online registry of food preparers that are authorized to prepare cottage food products for commercial purposes pursuant to paragraph 4 of this subsection and chapter 8, article 2 of this title. A registered food preparer shall renew the registration every three years and shall provide to the department updated registration information within thirty days after any change.

14. Prescribe an exclusion for fetal demise cases from the standardized survey known as "the hospital consumer assessment of healthcare providers and systems".

J. The rules adopted under the authority conferred by this section shall be observed throughout this state and shall be enforced by each local board of health or public health services district, but this section does not limit the right of any local board of health or county board of supervisors to adopt ordinances and rules as authorized by law within its jurisdiction if the ordinances and rules do not conflict with state law and are equal to or more restrictive than the rules of the director.

K. The powers and duties prescribed by this section do not apply in instances in which regulatory powers and duties relating to public health are vested by the legislature in any other state board, commission, agency or instrumentality, except that with regard to the regulation of meat and meat products, the department of health services and the Arizona department of agriculture within the area delegated to each shall adopt rules that are not in conflict.

L. The director, in establishing fees authorized by this section, shall comply with title 41, chapter 6. The department shall not set a fee at more than the department's cost of providing the service for which the fee is charged. State agencies are exempt from all fees imposed pursuant to this section.

M. After consultation with the state superintendent of public instruction, the director shall prescribe the criteria the department shall use in deciding whether or not to notify a local school district that a pupil in the district has tested positive for the human immunodeficiency virus antibody. The director shall prescribe the procedure by which the department shall notify a school district if, pursuant to these criteria, the department determines that notification is warranted in a particular situation. This procedure shall include a requirement that before notification the department shall determine to its satisfaction that the district has an appropriate policy relating to nondiscrimination of the infected pupil and confidentiality of test results and that proper educational counseling has been or will be provided to staff and pupils.

N. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (f) of this section, food and drink are exempt from the rules prescribed in subsection I of

this section if offered at locations that sell only commercially prepackaged food or drink that is not potentially hazardous, without a limitation on its display area.

O. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (h) of this section, a whole fruit or vegetable grown in a public school garden that is washed and cut on-site for immediate consumption is exempt from the rules prescribed in subsection I of this section.

P. Until the department adopts an exclusion by rule as required by subsection I, paragraph 14 of this section, the standardized survey known as "the hospital consumer assessment of healthcare providers and systems" may not include patients who experience a fetal demise.

Q. Until the department adopts exemptions by rule as required by subsection I, paragraph 4, subdivision (j) of this section, spirituous liquor and commercially prepackaged food, crackers or pretzels that meet the requirements of subsection I, paragraph 4, subdivision (j) of this section are exempt from the rules prescribed in subsection I of this section.

R. For the purposes of this section:

1. "Cottage food product" has the same meaning prescribed in section 36-931.

2. "Fetal demise" means a fetal death that occurs or is confirmed in a licensed hospital. Fetal demise does not include an abortion as defined in section 36-2151.

36-405. Powers and duties of the director

A. The director shall adopt rules to establish minimum standards and requirements for constructing, modifying and licensing health care institutions necessary to ensure the public health, safety and welfare. The standards and requirements shall relate to the construction, equipment, sanitation, staffing for medical, nursing and personal care services, and recordkeeping pertaining to administering medical, nursing, behavioral health and personal care services, in accordance with generally accepted practices of health care. The standards shall require that a physician who is licensed pursuant to title 32, chapter 13 or 17 medically discharge patients from surgery and shall allow an outpatient surgical center to require that either an anesthesia provider who is licensed pursuant to title 32, chapter 13, 15 or 17 or a physician who is licensed pursuant to title 32, chapter 13 or 17 remain present on the premises until all patients are discharged from the recovery room. Except as otherwise provided in this subsection, the director shall use the current standards adopted by the joint commission on accreditation of hospitals and the commission on accreditation of the American osteopathic association or those adopted by any recognized accreditation organization approved by the department as guidelines in prescribing minimum standards and requirements under this section.

B. The director, by rule, may:

1. Classify and subclassify health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care and standard of patient care required for the purposes of licensure. Classes of health care institutions may include hospitals, infirmaries, outpatient treatment centers, health screening services centers and residential care facilities. Whenever the director reasonably deems distinctions in rules and standards to be appropriate among different classes or subclasses of health care institutions, the director may make such distinctions.

2. Prescribe standards for determining a health care institution's substantial compliance with licensure requirements.
3. Prescribe the criteria for the licensure inspection process.
4. Prescribe standards for selecting health care-related demonstration projects.
5. Establish nonrefundable application and licensing fees for health care institutions, including a grace period and a fee for the late payment of licensing fees.
6. Establish a process for the department to notify a licensee of the licensee's licensing fee due date.
7. Establish a process for a licensee to request a different licensing fee due date, including any limits on the number of requests by the licensee.

C. The director, by rule, shall adopt licensing provisions that facilitate the colocation and integration of outpatient treatment centers that provide medical, nursing and health-related services with behavioral health services consistent with article 3.1 of this chapter.

D. The director shall establish a model in rule for the department to monitor health care institutions on-site that are found to not be in substantial compliance with the applicable licensure requirements. The director shall establish on-site monitoring fees for health care institutions that are subject to the on-site monitoring requirements. The department may not charge a fee pursuant to this subsection for a complaint or compliance-related survey or inspection if a health care institution is in substantial compliance.

E. The department may provide in-service training to health care institutions that request in-service training relating to regulatory compliance outside of the survey process. The director shall establish in rule in-service training fees for health care institutions that request in-service training from the department.

F. Ninety percent of the fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the health services licensing fund established by section 36-414 and ten percent of the fees collected pursuant to this section shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.

G. Subsection B, paragraph 5 of this section does not apply to a health care institution operated by a state agency pursuant to state or federal law or to adult foster care residential settings.

36-406. Powers and duties of the department

In addition to its other powers and duties:

1. The department shall:

(a) Administer and enforce this chapter and the rules, regulations and standards adopted pursuant thereto.

(b) Review, and may approve, plans and specifications for construction or modification or additions to health care institutions regulated by this chapter.

(c) Have access to books, records, accounts and any other information of any health care institution reasonably necessary for the purposes of this chapter.

(d) Require as a condition of licensure that nursing care institutions and assisted living facilities make vaccinations for influenza and pneumonia available to residents on site on a yearly basis. The department shall prescribe the manner by which the institutions and facilities shall document compliance with this subdivision, including documenting residents who refuse to be immunized. The department shall not impose a violation on a licensee for not making a vaccination available if there is a shortage of that vaccination in this state as determined by the director.

2. The department may:

(a) Make or cause to be made inspections consistent with standard medical practice of every part of the premises of health care institutions which are subject to the provisions of this chapter as well as those which apply for or hold a license required by this chapter.

(b) Make studies and investigations of conditions and problems in health care institutions, or any class or subclass thereof, as they relate to compliance with this chapter and rules, regulations and standards adopted pursuant thereto.

(c) Develop manuals and guides relating to any of the several aspects of physical facilities and operations of health care institutions or any class or subclass thereof for distribution to the governing authorities of health care institutions and to the general public.

36-407. Prohibited acts; required acts

A. A person shall not establish, conduct or maintain in this state a health care institution or any class or subclass of health care institution unless that person holds a current and valid license issued by the department specifying the class or subclass of health care institution the person is establishing, conducting or maintaining. The license is valid only for the establishment, operation and maintenance of the class or subclass of health care institution, the type of services and, except for emergency admissions as prescribed by the director by rule, the licensed capacity specified by the license.

B. The licensee shall not imply by advertising, directory listing or otherwise that the licensee is authorized to perform services more specialized or of a higher degree of care than is authorized by this chapter and the underlying rules for the particular class or subclass of health care institution within which the licensee is licensed.

C. The licensee may not transfer or assign the license. A license is valid only for the premises occupied by the institution at the time of its issuance.

D. The licensee shall not personally or through an agent offer or imply an offer of rebate or fee splitting to any person regulated by title 32 or chapter 17 of this title.

E. The licensee shall submit an itemized statement of charges to each patient.

F. A health care institution shall refer a patient who is discharged after receiving emergency services for a drug-related overdose to a behavioral health services provider.

E-4.

ARIZONA GAME AND FISH COMMISSION
Title 12, Chapter 4, Article 10

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - FIVE-YEAR REVIEW REPORT

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: March 12, 2025

SUBJECT: ARIZONA GAME AND FISH COMMISSION
Title 12, Chapter 4, Article 10

Summary

This Five-Year Review Report (5YRR) from the Arizona Game and Fish Commission (Commission) relates to five (5) rules in Title 12, Chapter 4, Article 10 regarding regulation of Off-Highway Vehicles.

This is the first 5YRR for these rules which were adopted in August 2019.

Proposed Action

In the current report, the Commission proposes to amend four (4) as outlined in the Commission's report and in more detail below. The Department anticipated requesting an exception to the rulemaking moratorium by December 2024 and anticipates submitting the Notice of Final Rulemaking for actions proposed in this report to the Council by September 2025, provided the Commission is granted permission to pursue rulemaking.

1. Has the agency analyzed whether the rules are authorized by statute?

The Commission cites both general and specific statutory authority for these rules.

2. Summary of the agency's economic impact comparison and identification of stakeholders:

The Commission states the rules appear to have resulted in the estimated economic, small business, and consumer impacts as stated in the final rulemaking package approved by the Council on July 2, 2019. The Department indicates the rules were adopted to implement the off-highway course approval requirements and user indicia established during the Second Regular Session of the 48th Arizona State Legislature; and the nonresident off-highway user indicia established during the Second Regular Session of the 53rd Arizona State Legislature. Stakeholders are the Commission, the Arizona Game and Fish Department, off-highway vehicle (OHV) users including nonresidents who participate in off-highway recreational activities in Arizona, educational course providers, and the general public.

3. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Commission states that OHV users may incur minimal additional administrative expenses; however, OHV educational courses are required by statute, not rule. The Department does indicate it offers a low-cost online course for OHV users. The Department states that the benefits of protecting the environment from untrained OHV operators are significant. The Department states that OHV recreation can damage numerous aspects of the wildlife habitat including soil, vegetation, and streambeds, establishing minimum requirements for OHV training in order to mitigate the environmental damage that untrained OHV users can cause is beneficial to Arizona, the public and land management agencies. The Department notes that OHV recreation is a voluntary activity, so only those choosing to participate in the activity will incur any burdens and costs. The Department believes the rules impose the least burden and costs to persons regulated by the rules.

4. Has the agency received any written criticisms of the rules over the last five years?

The Commission indicates no written criticisms were received from the public or stakeholders during the five-year period before the Commission initiated the review process. However, the Commission indicates, in an effort to garner public and stakeholder comment, it issued a press release notifying the public of the intent to review the Article and stating the Commission would accept comments regarding the off-highway vehicle rules for a period of thirty days. As a result of that outreach effort, the Commission received numerous public comments. Summaries of the comments and the Commission's responses are outlined in detail in Section 7 of the Commission's report.

5. Has the agency analyzed the rules' clarity, conciseness, and understandability?

The Commission indicates the rules are clear, concise, and understandable.

6. Has the agency analyzed the rules' consistency with other rules and statutes?

The Commission indicates, with the passage of Laws, 2024, Chapter 240, Section 6, rule amendments are necessary to make the rules consistent with statute. Specifically, the Commission indicates the following changes are needed to ensure compliance:

- R12-4-1001. Minimum Standards for an Approved Off-highway Vehicle Educational Course.
 - The Commission proposes to require an educational course provider to issue proof of certification to the Department of Transportation (ADOT) and the Department, as appropriate.
- R12-4-1002. Course-approval Procedure.
 - The Commission proposes to amend the rule to:
 - Transfer the responsibility for reviewing course provider applications to the Department's Education Program (from our Law Enforcement Program), as that program is more appropriate.
 - Require an applicant to specify whether the educational course will be an in-person or online course.
 - Remove references to a "written" examination as it implies the educational course must be in-person.
 - Establish an educational course provider is prohibited from making any changes to an approved educational course without prior approval from the Department to ensure the educational course continues to meet the minimum standards. If a course provider would like to make any changes to the approved course, they will be required to submit a new application.
- R12-4-1004. Off-highway Vehicle Sound-level Requirements.
 - The Commission proposes to amend the rule to incorporate by reference the most recent version of the International Organization for Standardization's Acoustics-Measurements of Sound Pressure Level Emitted by Stationary Road Vehicles, ISO 5130:2019.
- R12-4-1005. Nonresident Off-highway Vehicle User Indicia.
 - The Commission proposes to amend the rule to:
 - Reflect the most recent definition of an ATV/OHV established under A.R.S. § 28-1171.
 - Require an applicant for a nonresident OHV User Indicia to provide proof of certification (satisfactory completion) for the educational course in order to purchase a non-resident OHV decal in compliance with Laws, 2024, Chapter 240, Section 6(A).
 - Require the owner/operator of the ATV/OHV to place the indicia in a visible place on the ATV, OHV, or dirt bike, as applicable.
 - Reflect the most recent exemptions to the indicia requirement. This is necessary to ensure compliance with the educational requirements established under Laws, 2024, Chapter 240, Section 6(A) and A.R.S. § 28-1178.

7. **Has the agency analyzed the rules' effectiveness in achieving its objectives?**

The Commission indicates the rules are currently effective in achieving their objectives.

8. **Has the agency analyzed the current enforcement status of the rules?**

The Commission indicates the rules are currently being enforced as written.

9. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Commission indicates there are no corresponding federal laws.

10. **For rules adopted after July 29, 2010, do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

Pursuant to A.R.S. § 41-1037(A), if an agency proposes an amendment to an existing rule that requires the issuance of a regulatory permit, license, or agency authorization, the agency shall use a general permit, as defined by A.R.S. § 41-1001(12), if the facilities, activities or practices in the class are substantially similar in nature unless certain exceptions apply.

A.R.S. § 41-1001(12) defines "general permit" to mean "a regulatory permit, license or agency authorization that is for facilities, activities or practices in a class that are substantially similar in nature and that is issued or granted by an agency to a qualified applicant to conduct identified operations or activities if the applicant meets the applicable requirements of the general permit, that requires less information than an individual or traditional permit, license or authorization and that does not require a public hearing."

The Commission indicates The following rules require the issuance of a "general permit" as defined under A.R.S. § 41-1001(11) and are in compliance with A.R.S. § 41-1037:

- R12-4-1002 Course-approval Procedure
- R12-4-1005 Nonresident Off-highway Vehicle User Indicia

Council staff believes the Commission is in compliance with A.R.S. § 41-1037.

11. **Conclusion**

This 5YRR from the Commission relates to five (5) rules in Title 12, Chapter 4, Article 10 regarding regulation of Off-Highway Vehicles. The Commission proposes to amend four (4) as outlined in the Commission's report to improve their consistency with other rules and statutes in response to recent statutory changes. The Department anticipated requesting an exception to the rulemaking moratorium by December 2024 and anticipates submitting the Notice of Final Rulemaking for actions proposed in this report to the Council by September 2025, provided the Commission is granted permission to pursue rulemaking.

Council staff recommends approval of this report.

December 10, 2024

Jessica Klein, Madam Chair
The Governor's Regulatory Review Council
100 North 15th Avenue, Suite 305
Phoenix, AZ 85007

RE: Five-year-Review Report: 12 A.A.C. 4, Article 10. Off-highway Vehicle

Dear Ms Klein:

Please find enclosed the Five Year Review Report of the Arizona Game and Fish Commission for 12 A.A.C. 4, Article 10. Off-highway Vehicles which is due on December 31, 2024.

The Arizona Game and Fish Commission hereby certifies compliance with A.R.S. 41-1091.

For questions about this report, please contact Celeste Cook at (623) 236-7390 or at CCook@azgfd.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom P. Finley".

For
Tom Finley
Director

**ARIZONA GAME AND FISH
COMMISSION
2024 FIVE-YEAR REVIEW REPORT**

TITLE 12. NATURAL RESOURCES

CHAPTER 4. GAME AND FISH COMMISSION

ARTICLE 10. OFF-HIGHWAY VEHICLES

PREPARED FOR THE
GOVERNOR'S REGULATORY REVIEW COUNCIL

**ARTICLE 10 OFF HIGHWAY VEHICLES
FIVE-YEAR REVIEW REPORT**

1. General and specific statutes authorizing the rule, including any statute that authorizes the agency to make rules.

For all rules within Article 10, the authorizing statute is A.R.S. § 17-231(A)(1).

For each rule within Article 10, the implementing statutes are as follows:

| | |
|--|---|
| R12-4-1001. Minimum Standards for an Approved Off-highway Vehicle Educational Course | A.R.S. § 28-1175 |
| R12-4-1002. Course-approval Procedure | A.R.S. § 28-1175 |
| R12-4-1003. Fee for an Approved Course | A.R.S. § 28-1175 |
| R12-4-1004. Off-highway Vehicle Sound-level Requirements | A.R.S. § 28-1175 |
| R12-4-1005. Nonresident Off-highway Vehicle User Indicia | A.R.S. §§ 28-1175, 28-1177, and 28-1179 |

2. Objective of the rule, including the purpose for the existence of the rule.

R12-4-1001 Minimum Standards for an Approved Off-Highway Vehicle Educational Course

The objective of the rule is to outline what a standard Off Highway Vehicle educational course should contain. The rule also requires anyone providing a course to issue a written examination and requires the participant to demonstrate proficiency by passing the exam with a score of 80% or above. The rule was created to provide a mechanism to implement the requirements of A.R.S. 28-1175 and should be maintained. No change to this rule is required at this time.

R12-4-1002 Course-approval Procedure

The objective of this rule is to outline the application requirements to gain course approval by submitting the application to the OHV Law Enforcement Program Manager. The rule provides the required information for the application, the course curriculum and written exam. The rule also requires the Department to approve or deny the request within 60 days of receiving the application and allows the provider to appeal any denial to the Commission. The rule was created to provide a mechanism to implement the requirements of A.R.S. § 28-1175 and should be maintained. No change to this rule is required at this time.

R12-4-1003 Fee for an Approved Course

The objective of this rule is to allow a course provider to charge a fee for their course. The intent of the rule is to ensure the fee is reasonable and does not exceed \$300. This rule was created to describe what the maximum reasonable fee for an OHV safety course would be and the rule should be maintained. A.R.S. § 28-1175 states that an agency, corporation or an individual may collect a fee and that the fee should be reasonable. No change to this rule is required at this time.

R12-4-1004 Off Highway Vehicle Sound-level Requirements

The objective of this rule is to give law enforcement officers the authority to require an individual to submit their

OHV for sound testing if the officer believes the OHV is producing sound in excess of legal levels, defined in statute as 96 decibels. The rule describes the scientific procedures for measuring the sound level in accordance with A.R.S. § 28-1179 A. 3. This rule is required by statute and should be maintained. No change to this rule is required at this time.

R12-4-1005 Nonresident Off-highway Vehicle User Indicia

The objective of this rule is to spell out how the Department administers the non-resident indicia program and authorizes the Department to collect a fee for administering the program. The rule also specifies where the non-resident decals shall be placed on specific vehicle types and allows a printed receipt or an electronic copy of a receipt to serve as a valid non-resident decal for 30 days from the date of purchase. The rule also mirrors A.R.S. § 28-1178 and specifies when an OHV decal is not required for non-residents. The rule was created because A.R.S. § 28-1177(E). states, the Arizona Game and Fish Department may provide for a non-resident decal and may impose a service fee described in the rule. The rule should be maintained and no changes are required at this time.

3. Effectiveness of the rule in achieving the objective, including a summary of any available data supporting the conclusion reached.

At the beginning of each rule review, Department employees are asked to provide comments and suggested rule changes. No comments or recommendations were given. In addition, internal and external comments received since the rules were adopted are reviewed and considered. Comments indicate the rules are understandable and applicable. The Department believes this data indicates the rules are effective. The Department believes the following rules are effective in achieving the objectives identified above:

- R12-4-1001 Minimum Standards for an Approved Off-highway Vehicle Educational Course
- R12-4-1002 Course-approval Procedure
- R12-4-1003 Fee for an Approved Course
- R12-4-1004 Off-highway Vehicle Sound Level Requirements
- R12-4-1005 Nonresident Off-highway Vehicle User Indicia

4. Consistency of the rule with state and federal statutes and other rules made by the agency, and a listing of the statutes or rules used in determining the consistency.

Except as noted below, the Department believes the following rule is consistent with statutes and rules; statutes and rules used to determine consistency include A.R.S. §§ Titles 17 and 28.

- R12-4-1003 Fee for an Approved Course

With the passage of Laws, 2024, Chapter 240, Section 6, the Department has determined rule amendments are necessary to implement the legislative intent. The following changes are needed to ensure compliance:

R12-4-1001. Minimum Standards for an Approved Off-highway Vehicle Educational Course. The Department proposes to require an educational course provider to issue proof of certification to the Department of Transportation (ADOT) and the Department, as appropriate.

R12-4-1002. Course-approval Procedure. The Department proposes to amend the rule to:

- Transfer the responsibility for reviewing course provider applications to the Department’s Education Program (from our Law Enforcement Program), as that program is more appropriate.
- Require an applicant to specify whether the educational course will be an in-person or online course.
- Remove references to a “written” examination as it implies the educational course must be in-person.
- Establish an educational course provider is prohibited from making any changes to an approved educational course without prior approval from the Department to ensure the educational course continues to meet the minimum standards. If a course provider would like to make any changes to the approved course, they will be required to submit a new application.

R12-4-1004. Off-highway Vehicle Sound-level Requirements. The Department proposes to amend the rule to incorporate by reference the most recent version of the International Organization for Standardization’s Acoustics-Measurements of Sound Pressure Level Emitted by Stationary Road Vehicles, ISO 5130:2019.

R12-4-1005. Nonresident Off-highway Vehicle User Indicia. The Department proposes to amend the rule to:

- Reflect the most recent definition of an ATV/OHV established under A.R.S. § 28-1171.
- Require an applicant for a nonresident OHV User Indicia to provide proof of certification (satisfactory completion) for the educational course in order to purchase a non-resident OHV decal in compliance with Laws, 2024, Chapter 240, Section 6(A).
- Require the owner/operator of the ATV/OHV to place the indicia in a visible place on the ATV, OHV, or dirt bike, as applicable.
- Reflect the most recent exemptions to the indicia requirement. This is necessary to ensure compliance with the educational requirements established under Laws, 2024, Chapter 240, Section 6(A) and A.R.S. § 28-1178.

5. Agency enforcement policy, including whether the rule is currently being enforced and, if so, whether there are any problems with enforcement.

The rules are currently being enforced; however, no one has submitted an application for approval for an OHV education course to date, thus the first three rules in Article 10 have not been employed.

6. Clarity, conciseness, and understandability of the rule.

The Department believes the following rules are clear, concise, understandable, are logically organized, and generally written in the active voice:

- R12-4-1001 Minimum Standards for an Approved Off-highway Vehicle Educational Course
- R12-4-1002 Course-approval Procedure

- R12-4-1003 Fee for an Approved Course
- R12-4-1004 Off-highway Vehicle Sound Level Requirements
- R12-4-1005 Nonresident Off-highway Vehicle User Indicia

7. Summary of the written criticisms of the rule received by the agency within the five years immediately preceding the Five-year Review Report, including letters, memoranda, reports, written analyses submitted to the agency questioning whether the rule is based on scientific or reliable principles, or methods, and written allegations made in litigation and administrative proceedings in which the agency was a party that the rule is discriminatory, unfair, unclear, inconsistent with statute, or beyond the authority of the agency to enact, and the conclusion of the litigation and administrative proceedings.

No written criticisms were received from the public or stakeholders during the five-year period before the Department initiated the review process. In an effort to garner public and stakeholder comment, the Department issued a press release notifying the public of the intent to review the Article and stating the Department would accept comments regarding the off-highway vehicle rules for a period of thirty days. As a result of that outreach effort, the Department received the following written criticisms:

R12-4-1004. Off-highway Vehicle Sound-level Requirements

Comments suggest the Commission amend the rule(s) to establish stricter sound muffling equipment requirements.

Agency Response: Thank you for taking the time to comment. A.R.S. § 28-1179(A)(3) states, “Except when operating on a closed course, either a muffler or other noise dissipative device that prevents sound above ninety-six decibels. The director shall adopt the current sound measurement standard of the society of automotive engineers for all-terrain vehicles and motorcycles and the current sound measurement standard of the international organization for standardization for all other off-highway vehicles.” The industry standard for maximum sound level, including street motorcycles, is 96 decibels. The Commission’s rule complies with A.R.S. § 28-1179, which establishes sound level restrictions; and the Commission does not have the authority to establish such a requirement.

R12-4-1005. Nonresident Off-highway Vehicle User Indicia

Comments suggest the Commission amend the rule to increase the fee for the Off-highway Vehicle (OHV) User Indicia.

Agency Response: Thank you for taking the time to comment. The Department maintains a neutral position in regards to increasing the cost of the OHV indicia. However, the Legislature established an Arizona Off-highway Vehicle Study Committee composed of members of the Senate and House Committees, farmers, ranchers, concerned citizens, members of Tread Lightly, as well as OHV owners, OHV rental company owners, and OHV dealers. The committee is tasked with developing legislation to address statewide concerns regarding OHV use and several members of the committee have brought this idea forward. In addition, the

Department has shared all of the comments received to date with the committee.

Comments suggest the Commission amend the rule(s) to increase the fee for the Off-highway Vehicle (OHV) User Indicia with the added cost being allocated to the National Forest Service for use in maintaining roads and trails for OHV use.

Agency Response: Thank you for taking the time to comment. This suggestion would require a change to state law. Current statutes specify any revenue collected shall be spent as follows: The Game and Fish Department shall spend 35% on informational and educational programs related to safety, the environment and responsible use with respect to off-highway vehicle recreation, law enforcement activities relating to OHV use and equipment, and administering the indicia program (includes seven full-time employees); State Land Department shall spend 5% to mitigate damage to the land (within its jurisdiction), for necessary environmental, historical and cultural clearance or compliance activities, and to fund enforcement of off-highway vehicle laws. The Arizona State Parks Board shall spend 60% to fund staff support to plan and administer the off-highway vehicle recreation fund (limited to 12%); establish an off-highway vehicle program based on the priorities established in the off-highway vehicle recreational plan; to designate, construct, maintain, renovate, repair or connect off-highway vehicle routes and trails and to designate, manage and acquire land for access roads, off-highway vehicle recreation facilities and off-highway vehicle use areas; and no more than 35% of those funds for construction of new off-highway vehicle trails. Until these statutes are amended, this suggestion cannot be implemented.

Comments suggest the Commission amend the rule(s) to no longer require an OHV user fee.

Agency Response. Thank you for taking the time to comment. The Department disagrees. The \$25 fee is divided between three agencies for the purpose of developing OHV specific law enforcement and education activities, signage, damage mitigation, and cultural clearances for trails. These funds are critical for maintaining the resources, mitigating damage, and creating opportunities for OHV users to enjoy.

Comments suggest the user fee is negatively impacting OHV use resulting in lost revenue (taxes, tourism, retail, etc.).

Agency Response: Thank you for taking the time to comment. The Department disagrees. Empirical data indicates OHV use continues to increase year after year, so it is not likely that other areas have lost revenue. The fee is necessary and is used for OHV specific law enforcement and education activities, OHV signage, to mitigate damage to the environment such as but not limited to soil erosion and compaction, impaired water quality due to sediment from erosion, reducing native plant and wildlife diversity by introducing and spreading of non-native invasive plants. These funds are critical for maintaining the resources and opportunities that OHV users enjoy.

The following comments are outside of the scope of the scope of the Article 10 laws and rules:

Comments suggest the Commission establish more single-track trails for OHV use near them.

Agency Response: Thank you for taking the time to comment. This is outside of the Commission's authority. The best way to increase the number of OHV trails in your area is to work with a local club with the same goals. Land management agencies often work with OHV clubs to obtain the required environmental clearances. There are a number of grants made available through Arizona State Parks and Trails that can help pay for the creation of trails.

Comments suggest more rigorous enforcement be applied to OHV users who are violating the law(s).

Agency Response: Thank you for taking the time to comment. The Department understands your frustration at the behavior and the perceived lack of enforcement as well as the impact OHVs are having on cultural resources, habitat, and wildlife. The Department has one OHV officer who is responsible for all of Region 3. The boundaries of Region 3 are roughly from Cordes to Sedona, to the Grand Canyon, and then west to the Colorado river. The Department has approximately 96 field officer positions (when fully staffed), and they are responsible for covering the entire state (with the exception of the reservations). Cross country travel and habitat damage are at the top of the list of things that our officers eagerly write tickets for. Please note, there may only be one Wildlife Manager per hunt unit, which makes it difficult to be at the right place at the right time, especially for OHV violations. Every agency is feeling the burden of complaints from people misusing OHVs, both in- and out-of-town and the Department works hard to educate other law enforcement agencies around the state on OHV laws and enforcement practices. As more agencies are trained on OHV enforcement, we can expect an increase in enforcement throughout the state. In addition, we have found that education is extremely effective in changing the behavior of OHV users. Many riders simply don't know the rules or best practices. The Department continually strives to find ways to provide education to the OHV community in an effort to better protect State resources and improve public safety.

Comments suggest establishing stricter OHV laws and rules to better protect Arizona's outdoor resources.

Agency Response: Thank you for taking the time to comment. While habitat damage from OHV use is of great concern, the Department maintains a neutral position in regards to establishing stricter OHV laws and rules. However, the Legislature established an Arizona Off-highway Vehicle Study Committee composed of members of the Senate and House Committees, farmers, ranchers, concerned citizens, members of Tread Lightly, as well as OHV owners, OHV rental company owners, and OHV dealers. The committee is tasked with developing legislation to address statewide concerns regarding OHV use and several members of the committee have brought this idea forward. In addition, the Department has shared all of the comments received to date with the committee. The Department also works hard to provide training to other law enforcement agencies around the State, including county sheriff's and municipal agencies, on OHV laws and enforcement practices. The goal is to greatly expand the law enforcement footprint as it relates to OHV enforcement.

Comments suggest establishing stricter OHV laws and rules that also address hunting from a

vehicle/roadway.

Agency Response: Thank you for taking the time to comment. It is already illegal to hunt from a vehicle or shoot across a roadway, however a Challenged Hunter Access/Mobility Permit (CHAMP) holder can legally hunt from a vehicle with some restrictions. The Department maintains a neutral position in regards to establishing stricter OHV laws and rules. However, the Legislature established an Arizona Off-highway Vehicle Study Committee composed of members of the Senate and House Committees, farmers, ranchers, concerned citizens, members of Tread Lightly, as well as OHV owners, OHV rental company owners, and OHV dealers. The committee is tasked with developing legislation to address statewide concerns regarding OHV use and several members of the committee have brought this idea forward. In addition, the Department has shared all of the comments received to date with the committee. In addition, the Department works hard to provide training to other law enforcement agencies around the State, including county sheriff's and municipal agencies, on OHV laws and enforcement practices. The goal is to greatly expand the law enforcement footprint as it relates to OHV enforcement.

Comments suggest the Commission amend the rule to require OHV rental companies and OHV dealers to provide educational videos in an effort to better protect the environment.

Agency Response: Thank you for taking the time to comment. The Department recognized a need to provide OHV renters with educational materials several years ago. The Department's OHV program created an educational video and then distributed it to over 90 rental companies in an effort to get them to voluntarily require their clients to watch the video prior to riding. In less than two years, the result of this effort is that the majority of the rental companies are utilizing this video and have had great success. The rental companies that show the video as a pre-ride requirement are enjoying a 50 to 75% reduction in the number of accidents. Please use the following link to watch the Department's "OHV Safety, Laws, and Ethics" video, <https://www.youtube.com/watch?v=Ikg0Z0mYiVk>

Comments suggest the Commission amend the rule to require mandatory OHV user education.

Agency Response: Thank you for taking the time to comment. While the Department agrees that OHV education is extremely important in addressing the OHV issues, this suggestion is outside of the Commission's rulemaking authority. Through Department outreach activities, the Department has learned that education on safe riding practices, ethics, and protecting the environment makes a big difference in the behavior of the OHV users. Members of the Legislature attempted to adopt an OHV education bill last year, but it did not pass. However, there is another bill currently working its way through the Legislature now.

Comments suggest the Commission amend the rule(s) to address noise caused by OHV riding, uncapped racing equipment, and speed and age restrictions.

Agency Response: Thank you for taking the time to comment. The Department understands your frustration at the behavior and the perceived lack of enforcement. With regard to OHV noise, A.R.S. § 28-1179 states an OHV cannot exceed 96 decibels; this is an industry standard and applies to street motorcycles as well. As

far as speed enforcement, our OHV officers enforce reasonable and prudent speed. However, it is much more difficult to enforce for OHVs because there are typically no posted speeds and one must determine a reasonable and prudent speed for the activity, location, weather, etc. As far as an age restriction, A.R.S. § 28-3151 states, "... a person shall not drive a motor vehicle or vehicle combination on a highway without a valid driver license and proper endorsement ..." and A.R.S. § 28-1171 defines "highway" as the entire width between the boundary lines of every way publicly maintained by the federal government, the department, a city, a town or a county if any part of the way is generally open to the use of the public for purposes of conventional two-wheel drive vehicular travel. Highway does not include routes designated for off-highway vehicle use." As far as an age restriction for operating an OHV, the driver's license statute requires a driver's license to operate a motor vehicle on a "highway," which is generally defined as any public road. So, a 10-year-old should not have been operating. With regards to signage, it is an unfortunate reality that signs are frequently torn down and all land management agencies struggle to maintain signage; particularly those that indicate road closures. The Department also works hard to provide training to other law enforcement agencies around the State, including county sheriff's and municipal agencies, on OHV laws and enforcement practices. The goal is to greatly expand the law enforcement footprint as it relates to OHV enforcement.

Comments suggest the Commission amend the rule to prohibit a person from operating an OHV on a paved roadway.

Agency Response: Thank you for taking the time to comment. The current OHV laws allow, and depending on the size of the OHV, may require OHV owners to register their OHVs provided they are "street legal" (meet the minimum structural and equipment requirements for "on road" operation). A legislative amendment is required before the Commission could implement such a restriction.

Comments suggest the Commission amend the rule to prohibit the use of OHVs weighing more than 1,800 lbs.

Agency Response: Thank you for taking the time to comment. While the definition of off-highway vehicle does not establish a minimum/maximum OHV weight, see A.R.S. § 17-1171; A.R.S. § 17-1177 establishes an OHV weighing 2,500 lbs. or less must display an OHV User Indicia. This requirement does not apply to OHVs that are used off-highway exclusively for agricultural, ranching, construction, mining, mining exploration, or building trade purposes. A legislative amendment is required before the Commission could implement such a restriction.

Comments suggest the Commission amend the rule to prohibit the use of OHVs in specific areas of the State in an effort to mitigate damage, ensure public safety, and/or prevent noise disturbances.

Agency Response: Thank you for taking the time to comment. It is unlawful for anyone to operate an OHV off an existing road, trail, or route in a manner that causes damage to wildlife habitat, riparian areas, cultural or natural resources or property or improvements. It is also unlawful to cause damage to the environment while operating an OHV. The Department works hard to educate other law enforcement agencies around the

state on OHV laws and enforcement practices. Each agency is aware of complaints about people misusing OHVs, both in- and out-of-town. As more agencies are trained on OHV enforcement, we can expect an increase in enforcement throughout the state.

Comments indicate the Commission should amend the rule or pursue legislation to implement a user indicia reciprocity program with bordering states.

Agency Response: Thank you for taking the time to comment. The Department disagrees. Bordering states ended reciprocity at the request of the OHV community. The OHV community wanted to ensure that the revenue provides funding that maintains and protects the resources in their own state. In addition, the \$25 OHV user indicia fee is divided between three land management agencies, State Parks and Trails, State Land Department, and Game and Fish Department. The Game and Fish Department is allotted 35% to use on informational and educational programs related to safety, the environment and responsible use with respect to off-highway vehicle recreation, law enforcement activities relating to OHV use and equipment, and administering the indicia program; State Land Department is allotted 5% to use to mitigate damage to the land, environmental, historical and cultural clearance or compliance activities, and to fund enforcement of off-highway vehicle laws; Arizona State Parks Board is allotted 60% to fund staff support to plan and administer the off-highway vehicle recreation fund; establish an off-highway vehicle program based on the priorities established in the off-highway vehicle recreational plan.

Comments suggest restricting OHV operators to designated areas, tracks, trails, etc.

Agency Response: Thank you for taking the time to comment. The Department understands your frustration and concern. The Department agrees that OHV recreation needs to be safe, responsible, and ethical. Laws and rules prohibiting cross country travel and habitat damage are strictly enforced. As far as speed enforcement, our OHV officers enforce reasonable and prudent speed. However, it is much more difficult to enforce for OHVs because there are typically no posted speeds and one must determine a reasonable and prudent speed for the activity, location, weather, etc. A person must operate their OHV at a speed that is reasonable and prudent even though there are no posted speed limits. This requires a person to operate their OHV at a speed that would allow them to safely avoid an obstacle when they encounter it without skidding, sliding, or losing control in any way.

The Department considers the following comments to be statements that do not require a response:

Unconstitutional, double taxation.

We don't need any more rules.

- 8. A comparison of the estimated economic, small business, and consumer impact of the rule with the economic, small business, and consumer impact statement prepared on the last making of the rule or, if no economic, small business, and consumer impact statement was prepared on the last making of the rule, an assessment of the actual economic, small business, and consumer impact of the rule.**

The rules appear to have resulted in the estimated economic, small business, and consumer impacts as stated in the final rulemaking package approved by G.R.R.C. on July 2, 2019. The rules were adopted to implement the off-highway course approval requirements and user indicia established during the Second Regular Session of the 48th Arizona State Legislature; and the nonresident off-highway user indicia established during the Second Regular Session of the 53rd Arizona State Legislature.

9. Any analysis submitted to the agency by another person regarding the rule’s impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states.

The Department did not receive any analyses.

10. If applicable, how the agency completed the course of action indicated in the agency’s previous five-year review report.

Not applicable; the rules were adopted on August 31, 2019; this is the first time they are undergoing a review under A.R.S. § 41-1056.

11. A determination after analysis that the probable benefits of the rule within this state outweigh the probable costs of the rule and the rule imposes the least burden and costs to persons regulated by the rule, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.

The purpose of the Arizona Game and Fish Commission (Commission), the Arizona Game and Fish Department (Department), and the Director of the Department is “to manage wildlife and wildlife habitat in this state as provided by law.” Laws 2012, Ch. 283 § 3. “Control of the department is vested in the game and fish commission.” A.R.S. § 17-201(A). The commission appoints the Director who is “the chief administrative officer of the game and fish department.” A.R.S. § 17-211(A).

With regard to general rulemaking authority, the Commission is required to “[a]dopt rules and establish services it deems necessary to carry out the provisions and purposes of [A.R.S. Title 17, Game and Fish].”

OHV recreation is one of the most popular recreational activities taking place on public and state lands in Arizona. The Arizona Off-Highway Vehicle Program was created by the Legislature in 1991 to manage off-highway vehicle (OHV) use in Arizona. The legislation defined the parameters for off-highway vehicle use in Arizona and created an OHV Recreation Fund to be used to meet the needs of OHV recreation. The use of OHVs has increased 347% since 1998; and has outpaced the existing funding to manage that growth, protect wildlife habitat, and help maintain recreational access.

Article 10 Five-year Review Report Criteria Continued...

During the Second Regular Session of the 48th Legislature, the Legislature amended A.R.S. § Title 28 to regulate the use of off-highway vehicles more closely and authorized the Arizona Department of Transportation in coordination with the Game and Fish Department to administer an OHV user indicia program.

A.A.C. Title 12, Chapter 10, Article 10 contains five rules that specify the minimum standards for an educational course of instruction in off-highway safety and environmental ethics to be approved; set the maximum fee that can be charged by providers of an approved educational course; adopt the current sound measurement standard of the Society of Automotive Engineers for all-terrain vehicles and motorcycles and the current sound measurement standard for the International Organization for Standardization for all other OHVs; and establish the application procedure, indicia placement, and user fee associated with the nonresident OHV user indicia prescribed under A.R.S. § 28-1177.

The Commission intent in adopting the off-highway vehicle rules was to provide better OHV management and protection of natural resources while maintaining access. Funds generated from this program are used to help ensure sustainable opportunities to recreate by bolstering grant programs that pay for maintenance, signage, habitat mitigation, education, and enforcement.

Since 2009, the Commission actively seeks to reduce regulatory burdens wherever and whenever possible. Most rules impose no costs on persons regulated by the rule and benefit persons regulated by the rule by adding additional clarity to Commission rules.

When amending Commission rules, the Department tasks a team of subject matter experts to review and make recommendations for rules. In its review, the team considers all comments from the public and agency staff that administer and enforce the rules, historical data, current processes and environment, and the Department's overall mission. The team takes a customer-focused approach, considers each recommendation from a resource perspective and determines whether the recommendation would cause undue harm to the Department's goals and objectives. The team then determines whether the request is in keeping with overarching guidance provided by the Governor, authorized by statute, in keeping with overarching guidance provided by the Commission, consistent with the Department's overall mission, is least burdensome to persons regulated by the rule, if it could be effectively implemented given agency resources, and if it is acceptable to the public.

Key stakeholders are the Commission, the Department, OHV users, educational course providers, and the general public. The economic impact for these stakeholders is minimal.

OHV users may incur minimal additional administrative expenses; however, OHV educational courses are required by statute, not rule. The Department offers a low-cost online course for OHV users.

The costs on the regulated public are minimal, and the benefits of protecting the environment from untrained

OHV operators are significant. OHV recreation can damage numerous aspects of the wildlife habitat including soil, vegetation, and streambeds, establishing minimum requirements for OHV training in order to mitigate the environmental damage that untrained OHV users can cause is beneficial to Arizona to the public and land management agencies.

The Department notes that OHV recreation is a voluntary activity, so only those choosing to participate in the activity will incur any burdens and costs.

The Department believes the rules impose the least burden and costs to persons regulated by the rules.

12. A determination after analysis that the rule is not more stringent than a corresponding federal law unless there is statutory authority to exceed the requirements of that federal law.

The rules are based on state law and federal law is not directly applicable to the rules.

13. For a rule adopted after July 29, 2010, that require the issuance of a regulatory permit, license, or agency authorization, whether the rule complies with A.R.S. § 41-1037.

The following rules require the issuance of a "general permit" as defined under A.R.S. § 41-1001(11) and are in compliance with A.R.S. § 41-1037:

- R12-4-1002 Course-approval Procedure
- R12-4-1005 Nonresident Off-highway Vehicle User Indicia

The following rules do not require the issuance of a regulatory permit, license, or agency authorization:

- R12-4-1001 Minimum Standards for an Approved Off-highway Vehicle Educational Course
- R12-4-1003 Fee for an Approved Course
- R12-4-1004 Off-highway Vehicle Sound Level Requirements

14. Course of action the agency proposes to take regarding the rule, including the month and year in which the agency anticipates submitting the rule to the Council if the agency determines it is necessary to amend or repeal an existing rule or make a rule. If no issues are identified for a rule in the report, an agency may indicate that no action is necessary for the rule.

The Department proposes no action for the following rules:

R12-4-1003. Fee for an Approved Course

The Department proposes to amend the following rules as indicated in this report:

- R12-4-1001. Minimum Standards for an Approved Off-highway Vehicle Educational Course

Article 10 Five-year Review Report Criteria Continued...

- R12-4-1002. Course-approval Procedure
- R12-4-1004. Off-highway Vehicle Sound-level Requirements
- R12-4-1005. Nonresident Off-highway Vehicle User Indicia

The Department anticipates requesting an exception to the rulemaking moratorium by December 2024 and submitting the Notice of Final Rulemaking for actions proposed in this report to the Council by September 2025, provided the Commission is granted permission to pursue rulemaking.

TITLE 12. NATURAL RESOURCES
CHAPTER 4. GAME AND FISH COMMISSION
ARTICLE 10. OFF-HIGHWAY VEHICLES
R12-4-1001, R12-4-1002, R12-4-1003, R12-4-1004, and R12-4-1005
Economic, Small Business and Consumer Impact Statement

A. Economic, small business and consumer impact summary:

1. Identification of the proposed rulemaking.

Off-highway vehicle (OHV) recreation is one of the most popular recreational activities taking place on public and state lands in Arizona. The Arizona Off-highway Vehicle Program was created by the Legislature in 1991 to manage OHV use in Arizona. The legislation defined the parameters for off-highway vehicle use in Arizona and created an OHV Recreation Fund to be used to meet the needs of OHV recreation.

The use of OHVs has increased 347% since 1998; and has outpaced the existing funding to manage that growth, protect wildlife habitat, and help maintain recreational access. During the Second Regular Session of the 48th Arizona State Legislature, the Legislature amended A.R.S. Title 28 to regulate the use of off-highway vehicles more closely and authorize the Arizona Department of Transportation to administer an off-highway vehicle user indicia program. The goal of these regulations is to provide better OHV management and protection of natural resources while maintaining access. Funds generated from this program will be used to help ensure sustainable opportunities by bolstering grant programs that pay for maintenance, signage, habitat mitigation, education and enforcement.

The Commission proposes to pursue rulemaking to specify the minimum standards for an educational course of instruction in off-highway safety and environmental ethics to be approved; establish a fee that is reasonable and commensurate for the educational course, and adopt the current sound measurement standard of the society of automotive engineers for all-terrain vehicles and motorcycles and the current sound measurement standard of the international organization for standardization for all other OHVs.

In addition, during the Second Regular Session of the 53rd Arizona State Legislature, the Legislature amended A.R.S. Titles 28 and 17 to allow the Arizona Game and Fish Commission to administer the nonresident off-highway user indicia program. The Commission proposes to pursue rulemaking to establish the application procedure, indicia placement, and user fee associated with the nonresident off-highway vehicle user indicia prescribed under A.R.S. § 28-1177.

(a) The conduct and its frequency of occurrence that the rule is designed to change.

The use of OHVs has increased 347% since 1998; and has outpaced the existing funding to manage that growth, protect wildlife habitat, and help maintain recreational access.

(b) The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed.

Habitat varies from species to species, but it encompasses all of the needs of that species. There are four basic elements: food, water, shelter and adequate space. Also included is the arrangement of the basic elements to one another. Each species must have all the basic elements in the necessary order to survive. Animals survive winter by creating fat reserves and limiting activity to conserve energy. Fat is needed to sustain body temperature in the extreme cold. Since plants are dormant and maintain low nutritional value during the winter, creation of sufficient energy reserves during the summer is critical. OHVs can destroy the plants animals need to create fat reserves. Vegetation also reduces erosion by increasing the stability of the soil. If the plant cover is destroyed the soil can be eroded by wind and rain. Impacts to soils are acceptable if managed and confined to trail corridors. Streams and their banks are exceptionally fragile. OHVs traveling along banks or through stream beds cause stream sedimentation. Stream sedimentation is the process where the stream fills with silt, soil and gravel and slowly fills in shallow pools. The pools that once contained fish and other aquatic species may become nothing but moist sand.

(c) The estimated change in frequency of the targeted conduct expected from the rule change.

The Commission does not anticipate the frequency of off-highway will be reduced; however, establishing the minimum standards for an educational course of instruction in off-highway safety and environmental ethics; incorporating by reference the current sound measurement standard of the society of automotive engineers for all-terrain vehicles and motorcycles and the current sound measurement standard of the international organization for standardization for all other OHVs; and establishing the application procedure, indicia placement, and user fee associated with the nonresident off-highway vehicle user indicia prescribed under A.R.S. § 28-1177 will aid in mitigating the environmental damage caused by off-highway recreation.

2. Brief summary of the information included in the economic, small business and consumer impact statement.

The rulemaking will have a positive economic impact on the provider of an educational course of instruction that is approved by the Department. A course provider is not required to have the course approved by the Department. However, there is an economic advantage to obtaining the Department's approval because under A.R.S. § 28-1174(G) a judge may require a person who violates the statute to take an approved course. The provider of an approved course may also charge any fee up to the course fee established in this rulemaking. In determining the maximum fee that the provider of an approved educational course of instruction in off-highway vehicle safety and environmental ethics may charge, the Director reviewed fees currently charged for related courses. For example: the Motorcycle Safety Foundation currently charges \$185 for basic rider training; the ATV Safety Institute charges \$55 to \$150 for ATV Rider training depending on the student's age. The Director set the maximum fee at an amount believed to be consistent with fees currently charged, allowing for market competition among providers and enabling providers to increase the fee over time. Because of the course fee, the rulemaking may have economic impact on those who participate in an approved course, either voluntarily or under court order. However, the Department offers a low-cost online course to the public through Kalkomey Enterprises, LLC;

and partners with the Recreational Off-highway Vehicle Association and the ATV Institute to offer no-fee online courses.

The Commission anticipates a minimal economic impact to qualified persons and business entities seeking to operate OHVs, as defined under A.R.S. § 28-1177. Depending on the owner's declared use, costs may include additional administrative expenses for preparing the prescribed application and a nominal user fee for each ATV or OHV registered with the Department under A.R.S. § 28-1179. It is important to note, operating an all-terrain or off-highway vehicle in this state is a voluntary recreational activity and only those persons who choose to participate in the activity will pay the fee. The Commission does not anticipate the fee will significantly affect a person's ability to participate in the activity or have a significant impact on a person's income, revenue, or employment in this state related to that activity.

3. The name and address of agency employees who may be contacted to submit or request additional data on the information included in the economic, small business and consumer impact statement.

Name: Celeste Cook, Director's Office Rules and Policy Manager
Address: Arizona Game and Fish Department
5000 W. Carefree Highway
Phoenix, Arizona 85086
Telephone: (623) 236-7390
Fax: (623) 236-7677
E-mail: CCook@azgfd.gov

B. The economic, small business and consumer impact statement:

1. Identification of the proposed rulemaking.

See paragraph (A)(1) above.

2. Identification of the persons who will be directly affected by, bear the costs of or directly benefit from the proposed rulemaking.

Persons who will be directly affected by and bear the costs of the proposed rulemaking:

Arizona Game and Fish Department
Nonresidents who participate in off-highway recreational activities in Arizona

Persons who directly benefit from the proposed rulemaking:

Arizona Game and Fish Department
Arizona State Parks Department
Arizona Department of Transportation
General public
State of Arizona

3. Cost benefit analysis:

Cost-revenue scale. Annual costs or revenues are defined as follows:

| | |
|----------|--------------------|
| Minimal | less than \$1,000 |
| Moderate | \$1,000 to \$9,999 |

Substantial \$10,000 or more

- (a) Probable costs and benefits to the implementing agency and other agencies directly affected by the implementation and enforcement of the proposed rulemaking. The probable costs to the implementing agency shall include the number of new full-time employees necessary to implement and enforce the proposed rule. The preparer of the Economic, Small Business, and Consumer Impact Statement shall notify the Joint Legislative Budget Committee of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by council.**

The Commission anticipates the Department will incur a substantial impact implementing the nonresident off-highway user indicia program: costs associated with rulemaking, implementation of the rules, which includes system programming, and the resources necessary to administer the program. However, the state of Arizona and the various agencies involved with the implementation of the nonresident off-highway vehicle indicia legislation, as well as the public will benefit substantially. Funds generated from this program will be used to help ensure sustainable opportunities by bolstering grant programs that pay for maintenance, signage, habitat mitigation, education and enforcement.

- (b) Probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the proposed rulemaking.**

The Commission does not anticipate the proposed rulemaking will significantly affect political subdivisions of this state.

- (c) Probable costs and benefits to businesses directly affected by the proposed rulemaking, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the proposed rulemaking.**

The Commission anticipates the proposed amendments will have no substantial impact on businesses, their revenues, or their payroll expenditures. Of those that do or may have an impact, the Commission does not anticipate the impact will be significant. The Commission's intent in the proposed rulemaking is to provide better OHV management and protection of natural resources while maintaining access.

- 4. General description of the probable impact on private and public employment in businesses, agencies and political subdivisions of this state directly affected by the proposed rulemaking.**

The Commission anticipates the proposed amendments will have no substantial impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the proposed rulemaking. Because, in most instances, the rulemaking either reduces or makes no change to the current regulatory burden, the Commission anticipates persons directly affected by the rule will not incur any additional costs as a result of the rulemaking. For most businesses directly affected by the rulemaking, any anticipated costs incurred are strictly administrative in nature and are believed to be moderate, if at all.

- 5. Statement of the probable impact of the proposed rulemaking on small businesses:**

- (a) Identification of the small businesses subject to the proposed rulemaking.**

Off-highway education course providers

Businesses that sell ATVs and/or OHVs

(b) Administrative and other costs required for compliance with the proposed rulemaking.

The Commission anticipates the proposed rulemaking will not create additional costs for compliance.

(c) Description of the methods that the agency may use to reduce the impact on small businesses.

The Commission believes establishing less stringent compliance requirements for small businesses is not necessary as the proposed rules do not place any reporting requirements on businesses.

(d) Probable cost and benefit to private persons and consumers who are directly affected by the proposed rulemaking.

The Commission anticipates the proposed rulemaking will result in a minimal impact to nonresidents who participate in off-highway recreational activities. The Commission anticipates a minimal impact to qualified persons and business entities seeking to operate OHVs, as defined under A.R.S. § 28-1177. Depending on the owner's declared use, costs may include additional administrative expenses for preparing the prescribed application and a nominal user fee for each ATV or OHV registered with the Department under A.R.S. § 28-1179. It is important to note, operating an all-terrain or off-highway vehicle in this state is a voluntary recreational activity and only those persons who choose to participate in the activity will pay the fee. The Commission does not anticipate the fee will significantly affect a person's ability to participate in the activity or have a significant impact on a person's income, revenue, or employment in this state related to that activity.

6. Statement of the probable effect on state revenues.

The proposed rulemaking will not significantly impact state revenues.

7. A description of any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking.

The Commission has determined that there are no alternative methods of achieving the objectives of the proposed rulemaking. The Commission holds that the benefits of the proposed rulemaking outweigh any costs.

8. Description of any data on which a rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data. An agency advocating that any data is acceptable data has the burden of proving that the data is acceptable. For the purposes of this paragraph, "acceptable data" means empirical, replicable and testable data as evidenced in supporting documentation, statistics, reports, studies or research.

For this rulemaking, the Commission relied on empirical data based on agency experience and observations, which included comments from the public, Arizona State Parks Department, Arizona Transportation Department and agency staff that administer and enforce the rules included in this rulemaking. The Department also solicited comment and information from industry professionals regarding the numbers of, types, and uses of off-highway vehicles. Additionally, the Commission relied on historical data (i.e., meeting notes from previous rulemaking teams, Department reports (sportsman data, violation data, etc.), other state agency rules, etc.), current processes, benchmarking with other states, and the Department's

overall mission. The subjects the rules address are based on statutory requirements rather than natural sciences, thus recommendations relied more heavily on empirical qualitative data using agency experience and observations instead of quantitative data. The Commission approached this rulemaking and the use of the documentation, statistics, and research in a methodical way, testing various approaches and trying to replicate approaches that were successful in other states.

- C. If for any reason adequate data are not reasonably available to comply with the requirements of subsection B of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms. The absence of adequate data, if explained in accordance with this subsection, shall not be grounds for a legal challenge to the sufficiency of the economic, small business and consumer impact statement.**

The Department tasked a team of subject matter experts to review and make recommendations for rules relating to off-highway vehicles. In its review, the team considered all comments from the public and agency staff that administer and enforce off-highway statutes and rules, historical data, current processes and environment, and the Department's overall mission. The team took a customer-focused approach, considering each recommendation from a resource perspective and determining whether the recommendation would cause undue harm to the Department's goals and objectives. The team then determined whether the request was consistent with the Department's overall mission, if it could be effectively implemented given agency resources, and if it was acceptable to the public. The Commission believes the data utilized in completing this economic, small business, and consumer statement is more than adequate.

ARTICLE 10. OFF-HIGHWAY VEHICLES

R12-4-1001. Minimum Standards for an Approved Off-highway Vehicle Educational Course

The Department may approve an educational course of instruction in basic off-highway vehicle (OHV) safety and environmental ethics, provided the course meets the following minimum standards:

1. Course content. The course shall provide information regarding:
 - a. OHV safety;
 - b. Responsibilities of users of OHVs;
 - c. Use of an OHV in a manner that does not harm the natural terrain, plants, or animals;
 - d. Use of an OHV in a manner that minimizes air pollution; and
 - e. State statutes and rules regarding use of OHVs.
2. Course procedures. The course provider shall:
 - a. Use a written examination to measure the extent to which a participant learned the course content; and
 - b. Provide a certificate of completion to a participant who receives a score of 80% or above on the written examination or that demonstrates an equivalent proficiency.

Authorizing Statute

General: A.R.S. § 17-231(A)(1)

Specific: A.R.S. § 28-1175

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1860, August 31, 2019 (Supp. 19-3).

R12-4-1002. Course-approval Procedure

- A. To obtain approval of an educational course of instruction in basic off-highway vehicle (OHV) safety and environmental ethics, the course provider shall submit an application to the Department's OHV Law Enforcement Program Manager using a form furnished by the Department. The provider shall include the following information on the application form:
 1. Name of provider;
 2. If the provider is not an individual, the name of the person who will maintain contact with the Department;
 3. Business address;
 4. Business email address; and
 5. Business and contact telephone numbers.
- B. In addition to the application form required under subsection (A), a provider shall include a copy of all of the following:
 1. The curriculum that will be used to provide the educational course;
 2. Any materials that will be provided to course participants;
 3. The written examination required under R12-4-1001(2)(a); and
 4. The certificate of completion required under R12-4-1001(2)(b).
- C. The Department shall either approve or deny a request to approve an educational course within 60 days of receiving the application. The Department shall not approve an educational course that fails to meet the requirements established under R12-4-1001 or this Section. The Department shall provide a written notice to the course provider stating the reason for the denial.
- D. The provider of an educational course of instruction that is not approved by the Department may appeal the denial to the Commission as prescribed under A.R.S. Title 41, Chapter 6, Article 10.

Authorizing Statute

General: A.R.S. § 17-231(A)(1)

Specific: A.R.S. § 28-1175

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1860, August 31, 2019 (Supp. 19-3).

R12-4-1003. Fee for an Approved Course

Under A.R.S. § 28-1175(B), the provider of an approved educational course of instruction in basic off-highway vehicle safety and environmental ethics may collect a fee from each participant that:

ARTICLE 10. OFF-HIGHWAY VEHICLES

1. Is reasonable and commensurate for the course, and
2. Does not exceed \$300.

Authorizing Statute

General: A.R.S. § 17-231(A)(1)

Specific: A.R.S. § 28-1175

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1860, August 31, 2019 (Supp. 19-3).

R12-4-1004. Off-highway Vehicle Sound-level Requirements

- A.** A peace officer who has reason to believe that an off-highway vehicle (OHV) is being operated in violation of A.R.S. § 28-1179(A)(3) may direct the operator to submit the OHV to an onsite test to measure the OHV's sound level. In accordance with A.R.S. § 28-1179(A)(3), the sound level of an OHV shall be measured using the following procedures, which are incorporated by reference and are available for inspection at the Arizona Game and Fish Department, 5000 W. Carefree Highway, Phoenix, Arizona 85086:
1. All terrain vehicle or motorcycle. Society of Automotive Engineers, J1287, Measurement of Exhaust Sound Pressure Levels of Stationary Motorcycles, April 2017, available from SAE International, 400 Commonwealth Dr., Warrendale, PA 15096 or online at www.sae.org; and
 2. Other OHV. International Organization for Standardization, ISO 5130:2007, Acoustics-Measurements of Sound Pressure Level Emitted by Stationary Road Vehicles, 2007, May 31, 2007 Edition 2, available from American National Standards Institute, Attention Customer Service Department, 25 W. 43rd St., 4th Floor, New York, NY 10056 or online at www.iso.org.
- B.** If a peace officer directs the operator of an OHV to submit the OHV to an onsite test to measure the OHV's sound level, the operator shall allow the OHV and associated equipment to be tested. If the peace officer believes that more than one test of the OHV's sound level is necessary to ensure that an accurate measure is obtained, the operator shall allow multiple tests.
- C.** If it is determined that an OHV is being operated in violation of A.R.S. § 28-1179(A)(3), the operator of the OHV shall:
1. Immediately stop operating the OHV; and
 2. Ensure the vehicle is not operated again until it can be operated in compliance with A.R.S. § 28-1179(A)(3), except:
 - a. During a period of emergency; or
 - b. When the operation is directed by a peace officer or other public authority.
- D.** This Section does not include any later amendments or editions of the incorporated materials.

Authorizing Statute

General: A.R.S. § 17-231(A)(1)

Specific: A.R.S. § 28-1175

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1860, August 31, 2019 (Supp. 19-3).

R12-4-1005. Nonresident Off-highway Vehicle User Indicia

- A.** The owner or operator of an all-terrain vehicle (ATV) or off-highway vehicle (OHV) as defined under A.R.S. § 28-1171 shall not operate the ATV or OHV off-highway in this state without an Arizona off-highway vehicle user indicia. This requirement only applies to an ATV or OHV that:
1. Is designed by the manufacturer primarily for travel over unimproved terrain.
 2. Has an unladen weight of two thousand five hundred pounds or less.
- B.** For lawful Arizona off-highway operation, the owner or operator of a qualifying nonresident ATV or OHV shall apply to the Department for an off-highway vehicle user indicia as prescribed under A.R.S. § 28-1177. The owner or operator shall submit to the Department:
1. The nonresident off-highway vehicle user indicia application furnished by the Department and available on the Department's website,
 2. The fee established under subsection (C)(1), and
 3. The convenience fee established under subsection (C)(2).
- C.** As authorized under A.R.S. § 28-1177:
1. The fee for the nonresident off-highway vehicle user indicia is \$25.
 2. The Department may also collect and retain a reasonable and commensurate fee for its services.
- D.** The owner or operator of the ATV or OHV titled or registered out-of-state shall display the nonresident off-highway user indicia in a manner that is clearly visible to outside inspection:
1. For vehicles with three or more wheels, on the left side rear quadrant of the vehicle.
 2. For two-wheeled vehicles, the indicia shall be displayed on the left fork leg.

ARTICLE 10. OFF-HIGHWAY VEHICLES

- E. A printed receipt or an electronic copy of the receipt of payment for an annual decal that is purchased online shall serve as a temporary permit for a period of 30 days from the date of purchase.
- F. Under A.R.S. § 28-1178, a person may operate an ATV or OHV in this state without the nonresident off-highway user indicia required under A.R.S. § 28-1177 when any one of the following applies:
 - 1. The person is loading or unloading an ATV or OHV from a vehicle.
 - 2. The person is participating in an off-highway special event.
 - 3. The person is operating an ATV or OHV:
 - a. During an emergency or as directed by a peace officer or other public authority.
 - b. Exclusively for agriculture, ranching, construction, mining or building trade purposes.
 - c. Exclusively on private land.

Authorizing Statute

General: A.R.S. § 17-231(A)(1)

Specific: A.R.S. §§ 28-1177 and 28-1179

Historical Note

New Section made by final rulemaking at 25 A.A.R. 1860, August 31, 2019 (Supp. 19-3).

TITLE 28. TRANSPORTATION
CHAPTER 3. TRAFFIC AND VEHICLE REGULATION
ART. 20. OFF-HIGHWAY VEHICLES

28-1171. Definitions

In this article, unless the context otherwise requires:

1. "Access road" means a multiple use corridor that meets all of the following criteria:
 - (a) Is maintained for travel by two-wheel vehicles.
 - (b) Allows entry to staging areas, recreational facilities, trail heads and parking.
 - (c) Is determined to be an access road by the appropriate land managing authority.
2. "Closed course" means a maintained facility that uses department approved dust abatement and fire abatement measures.
3. "Highway" means the entire width between the boundary lines of every way publicly maintained by the federal government, the department, a city, a town or a county if any part of the way is generally open to the use of the public for purposes of conventional two-wheel drive vehicular travel. Highway does not include routes designated for off-highway vehicle use.
4. "Mitigation" means the rectification or reduction of existing damage to natural resources, including flora, fauna and land or cultural resources, including prehistoric or historic archaeological sites, if the damage is caused by off-highway vehicles.
5. "Off-highway recreation facility" includes off-highway vehicle use areas and trails designated for use by off-highway vehicles.
6. "Off-highway vehicle":
 - (a) Means a motorized vehicle that is operated primarily off of highways and that is designed, modified or purpose-built primarily for recreational nonhighway all-terrain travel.
 - (b) Includes a tracked or wheeled vehicle, recreational or utility side-by-side vehicle, all-terrain vehicle, motorcycle, dirt bike, dune buggy, sand rail, amphibious vehicle, ground effects or air cushion vehicle and any other means of land transportation deriving motive power from a source other than muscle or wind. For the purposes of this subsection, "dirt bike" means a lightweight motorcycle that is designed for use on rough terrain, including unsurfaced roads or tracks.
 - (c) Does not include a vehicle that is either:
 - (i) Designed primarily for travel on, over or in the water.
 - (ii) Used in installation, inspection, maintenance, repair or related activities involving facilities for the provision of utility or railroad service or used in the exploration or mining of minerals or aggregates as defined in title 27.
7. "Off-highway vehicle special event" means an event that is endorsed, authorized, permitted or sponsored by a federal, state, county or municipal agency and in which the event participants operate off-highway vehicles on specific routes or areas designated by a local authority pursuant to section 28-627.

8. "Off-highway vehicle trail" means a multiple use corridor that is both of the following:
 - (a) Open to recreational travel by an off-highway vehicle.
 - (b) Designated or managed by or for the managing authority of the property that the trail traverses for off-highway vehicle use.
9. "Off-highway vehicle use area" means the entire area of a parcel of land, except for approved buffer areas, that is managed or designated for off-highway vehicle use.

28-1172. Applicability; private and Indian lands

This article applies to all lands in this state except private land and Indian land.

28-1173. Enforcement

All peace officers of this state and counties or municipalities of this state and other duly authorized state employees may enforce this article.

28-1174. Operation restrictions; violation; classification

- A. A person shall not operate or allow a minor who is under twelve years of age to operate an off-highway vehicle:
 1. With reckless disregard for the safety of persons or property.
 2. Off of an existing road, trail or route in a manner that causes damage to wildlife habitat, riparian areas, cultural or natural resources or property or improvements.
 3. On roads, trails, routes or areas closed as indicated in rules or regulations of a federal agency, this state or a county or a municipality or by proper posting if the land is private land.
 4. Over unimproved roads, trails, routes or areas unless driving on roads, trails, routes or areas where such driving is allowed by rule or regulation.
- B. A person shall operate or allow a minor who is under twelve years of age to operate an off-highway vehicle only on roads, trails, routes or areas that are opened as indicated in rules or regulations of a federal agency, this state, a county or a municipality.
- C. A person shall not operate or allow a minor who is under twelve years of age to operate an off-highway vehicle in a manner that damages the environment, including excessive pollution of air, water or land, abuse of the watershed or cultural or natural resources or impairment of plant or animal life, where it is prohibited by rule, regulation, ordinance or code.
- D. A person shall not place or remove a regulatory sign governing off-highway vehicle use on any public or state land. This subsection does not apply to an agent of an appropriate federal, state, county, town or city agency operating within that agency's authority.
- E. Except as provided in subsection (I) of this section, a person who violates subsection A, paragraph 1 is guilty of a class 2 misdemeanor.
- F. Except as provided in subsection (I) of this section, a person who violates any other provision of this section is guilty of a class 3 misdemeanor.

- G. In addition to or in lieu of a fine pursuant to this section, a judge may order the person to perform at least eight but not more than twenty-four hours of community restitution or to complete an approved safety course related to the off-highway operation of motor vehicles, or both.
- H. Subsections A and B of this section do not prohibit a private landowner or lessee from performing normal agricultural or ranching practices while operating an all-terrain vehicle or an off-highway vehicle on the private or leased land.
- I. If a minor who is under twelve years of age violates this section, a citation shall be issued to the parent or legal guardian of the minor and not to the minor. If a minor who is at least twelve years of age and under sixteen years of age violates this section, a citation shall be issued to the minor or to the parent or legal guardian of the minor but not to both.

28-1175. Instruction course; fee

- A. The Arizona game and fish department shall conduct or approve an educational course of instruction in off-highway vehicle safety and environmental ethics. The course shall include instruction on off-highway vehicle uses that limit air pollution and harm to natural terrain, vegetation and animals. Successful completion of the course requires successful passage of a written examination.
- B. Any governmental agency, corporation or other individual that conducts a training or educational course, or both, that is approved by the Arizona game and fish department, the United States bureau of land management or the United States forest service or that is approved or accepted by the all-terrain vehicle safety institute or the national off-highway vehicle conservation council may collect a fee from the participant that is reasonable and commensurate for the training and that is determined by the director of the Arizona game and fish department by rule.

28-1176. Off-highway vehicle recreation fund; annual reports; definition

- A. An off-highway vehicle recreation fund is established. The fund consists of:
 - 1. Monies appropriated by the legislature.
 - 2. Monies deposited pursuant to sections 28-1177 and 28-5927.
 - 3. Federal grants and private gifts.
- B. Monies in the off-highway vehicle recreation fund are appropriated to the Arizona state parks board solely for the purposes provided in this article. Interest earned on monies in the fund shall be credited to the fund. Monies in the off-highway vehicle recreation fund are exempt from the provisions of section 35-190 relating to lapsing of appropriations.
- C. The Arizona game and fish department shall spend thirty-five percent of the monies in the off-highway vehicle recreation fund for:
 - 1. Informational and educational programs related to safety, the environment and responsible use with respect to off-highway vehicle recreation.
 - 2. Law enforcement activities relating to this article.

3. The administration of the indicia program.
 4. Off-highway vehicle law enforcement pursuant to title 17, chapter 4, article 3, including seven full-time employees to enforce this article and title 17, chapter 4, article 3.
- D. The state land department shall spend five percent of the monies in the off-highway vehicle recreational fund to allow occupants of off-highway vehicles with resident or nonresident off-highway vehicle user indicia to cross state trust land on existing roads, trails and designated routes. The state land department shall use these monies for costs associated with off-highway vehicle use of lands within its jurisdiction, to mitigate damage to the land, for necessary environmental, historical and cultural clearance or compliance activities and to fund enforcement of off-highway vehicle laws.
- E. The Arizona state parks board shall spend sixty percent of the monies in the off-highway vehicle recreation fund for the following purposes:
1. No more than twelve percent to fund staff support to plan and administer the off-highway vehicle recreation fund.
 2. To establish an off-highway vehicle program based on the priorities established in the off-highway vehicle recreational plan.
 3. To designate, construct, maintain, renovate, repair or connect off-highway vehicle routes and trails and to designate, manage and acquire land for access roads, off-highway vehicle recreation facilities and off-highway vehicle use areas. After expenditures pursuant to paragraph 1 of this subsection, the Arizona state parks board shall not spend more than thirty-five percent of the remaining monies received pursuant to this subsection for construction of new off-highway vehicle trails.
 4. For enforcement of off-highway vehicle laws.
 5. For off-highway vehicle related informational and environmental education programs, information, signage, maps and responsible use programs.
 6. For the mitigation of damages to land, revegetation and the prevention and restoration of damages to natural and cultural resources, including the closure of existing access roads, off-highway vehicle use areas and off-highway vehicle routes and trails.
 7. For necessary environmental, historical and cultural clearance or compliance activities.
- F. The allocation of the monies in subsection E, paragraphs 3 through 7 of this section and the percentages allocated to each of the purposes prescribed in subsection E, paragraphs 3 through 7 of this section shall be based on an off-highway vehicle recreational plan.
- G. Monies in the off-highway vehicle recreation fund shall not be used to construct new off-highway vehicle trails or routes on environmentally or culturally sensitive land unless the appropriate land management agency determines that certain new trail construction would benefit or protect cultural or sensitive sites. For the purposes of this subsection, "environmentally or culturally sensitive land" means areas of lands that are either:
1. Administratively or legislatively designated by the federal government as any of the following:
 - (a) A national monument.
 - (b) An area of critical environmental concern.

- (c) A conservation area.
 - (d) An inventoried roadless area.
- 2. Determined by the applicable land management agency to contain significant natural or cultural resources or values.
- H. The Arizona state parks board shall examine applications for eligible projects and determine the amount of funding, if any, for each project. In determining the amount of monies for eligible projects, the Arizona state parks board shall give preference to applications for projects with mitigation efforts and for projects that encompass a large number of purposes described in subsection E, paragraphs 3 through 7 of this section.
- I. Beginning September 1, 2011, and on or before September 1 of each subsequent year, each agency that receives monies from the off-highway vehicle recreation fund shall submit an off-highway vehicle report to the president of the senate, the speaker of the house of representatives, the chairperson of the senate natural resources and rural affairs committee, or its successor committee, and the chairperson of the house of representatives natural resources and public safety committee, or its successor committee. The report shall be made available to the public. The report shall include information on all of the following if applicable:
 - 1. The amount of monies spent or encumbered in the fund during the preceding fiscal year for the purposes of off-highway vehicle law enforcement activities.
 - 2. The amount of monies spent from the off-highway vehicle recreation fund during the preceding fiscal year for employee services.
 - 3. The number of full-time employees employed in the preceding fiscal year in connection with off-highway vehicle law enforcement activities.
 - 4. The amount of monies spent from the off-highway vehicle recreation fund during the preceding fiscal year for information and education.
 - 5. The number and specific location of verbal warnings, written warnings and citations given or issued during the preceding fiscal year.
 - 6. A specific and detailed accounting for all monies spent in accordance with this section for construction of new off-highway vehicle trails, mitigation of damages to lands, revegetation, the prevention and restoration of damages to natural and cultural resources, signage, maps and necessary environmental, historical and cultural clearance or compliance activities.
- J. For the purposes of this section, "off-highway vehicle recreational plan" means a plan that is maintained by the Arizona state parks board pursuant to section 41-511.04.

28-1177. Off-highway vehicle user fee; indicia; registration; state trust land recreational permit; exception

- A. A person shall not operate or allow the operation of an all-terrain vehicle or an off-highway vehicle in this state without either a resident or nonresident off-highway vehicle user indicia issued by the department if the all-terrain vehicle or off-highway vehicle meets both of the following criteria:
 - 1. Is designed by the manufacturer primarily for travel over unimproved terrain.
 - 2. Has an unladen weight of two thousand five hundred pounds or less.

- B. A person shall apply to the department of transportation for a resident or nonresident off-highway vehicle user indicia by submitting an application prescribed by the department of transportation and a user fee for the indicia in an amount to be determined by the director of the department of transportation in cooperation with the director of the Arizona game and fish department and the Arizona state parks board. The resident or nonresident off-highway vehicle user indicia is valid for one year from the date of issuance and may be renewed. The department shall prescribe by rule the design and placement of the indicia.
- C. When a person pays for a resident off-highway vehicle user indicia pursuant to this section, the person may request a motor vehicle registration if the vehicle meets all equipment requirements to be operated on a highway pursuant to article 16 of this chapter. If a person submits a signed affidavit to the department affirming that the vehicle meets all of the equipment requirements for highway use and that the vehicle will be operated primarily off of highways, the department shall register the vehicle for highway use and the vehicle owner is not required to pay the registration fee prescribed in section 28-2003. This subsection does not apply to vehicles that as produced by the manufacturer meet the equipment requirements to be operated on a highway pursuant to article 16 of this chapter.
- D. The director shall deposit, pursuant to sections 35-146 and 35-147, seventy percent of the user fees collected pursuant to this section in the off-highway vehicle recreation fund established by section 28-1176 and thirty percent of the user fees collected pursuant to this section in the Arizona highway user revenue fund.
- E. The Arizona game and fish department may provide for the purchase of nonresident off-highway vehicle user indicia and may impose an additional service fee in an amount to be determined by the Arizona game and fish commission by rule. The Arizona game and fish department shall deposit, pursuant to sections 35-146 and 35-147, the service fees collected pursuant to this subsection in the game and fish fund established by section 17-261.
- F. An occupant of an off-highway vehicle with a resident or nonresident off-highway vehicle user indicia issued pursuant to this section who crosses state trust lands must comply with all of the rules and requirements under a state trust land recreational permit. All occupants of an off-highway vehicle with a resident or nonresident off-highway vehicle user indicia shall obtain a state trust land recreational permit from the state land department for all other authorized recreational activities on state trust land.
- G. This section does not apply to off-highway vehicles, all-terrain vehicles or off-road recreational motor vehicles that are used off-highway exclusively for agricultural, ranching, construction, mining, mining exploration or building trade purposes.
- H. In consultation with the department of transportation, the Arizona game and fish department may adopt rules necessary to implement this section.

28-1178. Operation of off-highway vehicles; exceptions

A person may operate an all-terrain vehicle or an off-highway vehicle in this state without a resident or nonresident off-highway vehicle user indicia issued pursuant to section 28-1177 if any of the following applies:

- 1. The person is participating in an off-highway special event.

2. The person is operating an all-terrain vehicle or an off-highway vehicle on private land.
3. The person is loading or unloading an all-terrain vehicle or an off-highway vehicle from a vehicle.
4. During a period of emergency or if the operation is directed by a peace officer or other public authority.
5. The vehicle displays a valid dealer license plate that the department issues pursuant to section 28-4533.

28-1179. Off-highway vehicle equipment requirements; rule making; exception

- A. An off-highway vehicle in operation in this state shall be equipped with all of the following:
 1. Brakes adequate to control the movement of the vehicle and to stop and hold the vehicle under normal operating conditions.
 2. Lighted headlights and taillights that meet or exceed original equipment manufacturer guidelines if operated between one-half hour after sunset and one-half hour before sunrise.
 3. Except when operating on a closed course, either a muffler or other noise dissipative device that prevents sound above ninety-six decibels. The director shall adopt the current sound measurement standard of the society of automotive engineers for all-terrain vehicles and motorcycles and the current sound measurement standard of the international organization for standardization for all other off-highway vehicles.
 4. A spark arrestor device that is approved by the United States department of agriculture and that is in constant operation except if operating on a closed course.
 5. A safety flag that is at least six by twelve inches and that is attached to the off-highway vehicle at least eight feet above the surface of level ground, if operated on sand dunes or areas designated by the managing agency.
- B. A person who is under eighteen years of age may not operate an off-highway vehicle or be an off-highway vehicle passenger on public or state land unless the person is wearing a protective helmet that is properly fitted and fastened, that is designed for motorized vehicle use and that has a minimum United States department of transportation safety rating.
- C. A person may not allow a person who is under eighteen years of age to operate an off-highway vehicle or be an off-highway vehicle passenger in violation of subsection B of this section.
- D. Subsections B and C of this section do not apply to a child who is an off-highway vehicle passenger if both of the following occur:
 1. The child is properly secured in a child restraint system pursuant to section 28-907.
 2. The off-highway vehicle is equipped with a rollover protection system.
- E. In consultation with the department, the Arizona game and fish commission may:
 1. Adopt rules necessary to implement this section.
 2. Prescribe additional equipment requirements not in conflict with federal laws.
- F. This section does not apply to a private landowner or lessee performing normal agricultural or ranching practices while operating an all-terrain vehicle or an off-highway vehicle on the private or leased land in accordance with the landowner's or lessee's lease.

28-1180. Race or organized event; authorization required

No person may organize, promote or hold an off-highway vehicle race or other organized event on any land or highway in this state, except as authorized by the appropriate agency that has jurisdiction over the land or highway or the landowner.

28-1181. Civil traffic violation

Unless otherwise specified in this article, a violation of this article is a civil traffic violation.

F.

CONSIDERATION, DISCUSSION, AND POSSIBLE ACTION ON A.R.S. § 41-1033(G)
PETITION RELATED TO DEPARTMENT OF HEALTH SERVICES PRACTICES
REGARDING ADULT BEHAVIORAL HEALTH THERAPEUTIC HOMES INSPECTIONS

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - PETITION

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 14, 2025

SUBJECT: A.R.S. 41-1033(G) Petition - Department of Health Services

Background

As described in Council staff's memorandum dated November 13, 2024, on October 30, 2024, Council staff received a petition from Spencer Scharff of Scharff, P.C. and Mayan Tahan of The Nelson Law Group on behalf of Devereux Advanced Behavioral Health Arizona (Petitioner) regarding the Department of Health Services (Department) practice of (1) requiring all inspections of Adult Behavioral Health Therapeutic Homes (ABHTH) to be unannounced; and the practice of (2) defining being away from home at the time of an unannounced inspection as a refusal to permit the inspection. *See* Petition at 1.

The Petitioner states it serves as the collaborating health care institution to ABHTH, pursuant to Department rule R9-10-1803. The Petitioner alleges the following:

Since February of 2023, the Department has repeatedly conducted unannounced inspections of Devereux-affiliated homes. Thirteen of these inspections occurred when there was no one home to answer the door. In a number of instances, the homes were not assigned any residents and their administrators were not even in the country at the time of the inspection. In other instances, the administrator was not home because they were, consistent with their licensure, transporting their residents to an appointment. In each instance, the Department issued a Statement of Deficiency ("SOD") alleging that by not being home the ABHTH "refuses to permit" the inspection thereby running afoul of A.R.S. § 36-427(B) and creating

reasonable cause to believe that the health or safety of one or more patients or the general public is in immediate danger and a license revocation is warranted.
See Petition at 2.

The Petitioner alleges these practices “are not specifically authorized by statute, exceed the Department’s statutory authority, and are unduly burdensome” pursuant to [A.R.S. § 41-1033\(G\)](#).

Petitioner’s Arguments

The Petitioner argues, of the applicable statutes authorizing Department inspections, none explicitly authorize unannounced inspections. *Id.* at 3. Furthermore, the Petitioner argues that an explicit reference to unannounced inspections was, in fact, removed from a prior version of [A.R.S. § 36-424](#) by the Legislature in 1989. *Id.* Moreover, the Petitioner argues the Legislature has authorized the Department to conduct unannounced annual inspections and other inspections in connection with certain other regulated facilities, but not ABHTH. *Id.* As such, the Petitioner argues the practice of requiring inspections of ABHTH to be unannounced, are not specifically authorized by statute, exceed the Department’s statutory authority, and are unduly burdensome.

The Petitioner also alleges that the Department’s practice of equating not being present with refusal to permit inspection under [A.R.S. § 36-427\(B\)](#) also exceeds the Department statutory authority. *Id.* at 5. Specifically, A.R.S. § 36-427(B) states, “[i]f the licensee...refuses to permit the department...the right to inspect the institution’s premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists.” The Petitioner argues that inspectors were not “refused” the right to inspect as that term is defined. The Petitioner alleges, “[b]y expanding the reach of A.R.S. § 36-427(B) to include absences from the premises and utilizing that unauthorized statutory expansion to warrant licensure revocations under A.R.S. § 36-427(A)(3), the Department has exceeded its statutory authority. *Id.*

Department’s Response

Council staff received the Department’s response to the Petition pursuant to [A.R.S. § 41-1033\(H\)\(3\)](#) on April 3, 2025. Therein, the Department argues it is authorized by statute to conduct unannounced compliance inspections of all health care institutions to ensure public health and safety. Specifically, as it relates to ABHTH, the Department argues that statutory language states, “[a]ny application for licensure under this chapter constitutes permission for and ***complete acquiescence in any entry or inspection of the premises*** during the pendency of the application and, if licensed, during the term of the license.” *See* A.R.S. § 36-424(C). The Department argues this does not suggest that the Department must schedule an appointment in order to have access. Furthermore, the Department argues the 1989 Senate Bill which amended A.R.S. § 36-424 only removed the portion of the statute that authorized local agencies to conduct unannounced inspections of residential care institutions, but did not change the statutory language requiring complete acquiescence to the Department’s inspections outlined above. Moreover, while the Department acknowledges explicit “unannounced inspection” language is included in statute for other facilities licensed by the Department, like child care facilities, child care group homes, clinical laboratories, and medical marijuana dispensaries, the Department

argues none of these facilities are health care institutions and “cannot be correlated to the legislative history and purpose of A.R.S. [T]itle 36, [C]hapter 4, [A]rticles 1 and 2.” The Department also notes it is aware of other agencies that perform unannounced inspections with statutory authority that does not explicitly use the term “unannounced” to set forth inspection parameters (e.g. Department of Agriculture).

The Department also argues that the Department is required by A.R.S. § 36-427(B) to presume health and safety violations if the Department is refused access to inspect. Specifically, the Department states, if an ABHTH provider is away from the facility, it is required to designate a back-up provider to be present in the ABHTH and accountable for services provided by the ABHTH when the provider is not present. *See* R9-10-1803(A)(5). Furthermore, the Department states, if an ABHTH is not providing services for any length of time, they must communicate that to the Department. *See* R9-10-109. As such, the Department argues that when the Department arrives for a compliance inspection during a facility’s hours of operation, a licensee’s absence (with no ABHTH back-up provider), is both a refusal and the possible abandonment of required services.

Supplemental Information

In addition to the A.R.S. § 41-1033(G) Petition and the Department’s response pursuant to A.R.S. § 41-1033(H)(3), the Petitioner has submitted supplemental information in the form of a reply to the Department’s response and letters sent to the Department in November 2024 from three collaborating health care institutions to ABHTH in Arizona: Arizona Council of Human Service Providers, Intermountain Centers for Human Development, and FSL, which purport to explain the impacts of the challenged practices on their providers. Copies of the Petition, the Department’s response pursuant to A.R.S. § 41-1033(H)(3), the above-referenced supplemental information, and all relevant exhibits are included in the final materials for the Council’s consideration.

Procedure

A.R.S. § 41-1033(G) allows a person to “petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern.” On receipt of a properly submitted petition pursuant to this section, the council shall review the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement as prescribed by this section.” If the Council receives information pursuant to A.R.S. § 41-1033(G), and at least three Council members request of the Chairperson that the matter be heard in a public meeting, within ninety days after receipt of the third council member's request, which occurred at the March 4, 2025 Council Meeting, the Council shall determine whether an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute, or meets the guidelines prescribed in A.R.S. § 41-1033(G). *See* A.R.S. 41-1033(H)(1)(c). As such, the Council has until June 2, 2025 to make

a decision. Any decision by the Council must be made by a majority of the council members who are present and voting on the issue. *See* A.R.S. § 41-1033(L).

After considering the Petition, the Department's response, and all relevant supplemental information, the Council must make its determination. Pursuant to A.R.S. § 41-1033(K), if the Council determines that the agency practice, substantive policy statement or regulatory licensing requirement exceeds the agency's statutory authority, is not authorized by statute or constitutes a rule or that the final rule does not meet the requirements prescribed in section 41-1030, the practice, policy statement, rule or regulatory licensing requirement shall be void. If the Council determines that the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern, the Council shall modify, revise or declare void any such existing agency practice, substantive policy statement, final rule or regulatory licensing requirement. *Id.*

Conclusion

The Petition is properly before the Council and both parties have submitted materials consistent with the requirements in the statute as indicated above. Council staff advises the Council to consider the materials both parties submitted and to question both parties as to whether the conducting unannounced inspections at Adult Behavioral Health Therapeutic Homes and treating being away from home at the time of an unannounced inspection as a refusal to permit the inspection violate A.R.S. 41-1033(G).

Re: *A.R.S. § 41-1033(G) Petition – Adult Behavioral Health Therapeutic Homes*

Governor's Regulatory Review Council:

Pursuant to A.R.S. § 41-1033(G), we write on behalf of Devereux Advanced Behavioral Health Arizona ("Devereux") to request a review of the following the Arizona Department of Health Services ("Department") practices and regulatory license requirements that are not specifically authorized by statute, exceed the Department's statutory authority, and are unduly burdensome: (1) the practice of requiring all inspections of Adult Behavioral Health Therapeutic Homes to be unannounced; and (2) the practice of defining being away from home at the time of an unannounced inspection as a refusal to permit the inspection.

Devereux is one of the nation's largest nonprofit organizations providing services, insight, and leadership in the field of behavioral health. Devereux has provided care in Arizona for 57 years and they serve more than 4,000 people with emotional, behavioral, and cognitive differences in our state each year. Devereux holds both Joint Commission Accreditation and Praesidium Accreditation and they pride themselves on maintaining compliance with the regulations that govern the operation of its programs. Devereux's services follow evidence-based practice treatment model, which integrates the latest scientific and medical advancements with time-tested philosophies and compassionate family engagement to provide practical, effective, and efficient care, making a meaningful difference in the lives of those they serve, and the world around them.

Devereux serves as the Collaborating Health Care Institution, pursuant to A.C.C. R9-10-1803, to Adult Behavioral Health Therapeutic Homes (“ABHTH”). By definition, a ABHTH is a residential home in which the provider lives with up to three residents. Unlike nearly all other health care institutions, ABHTHs are not paid for the services they provide to their residents. Rather, they are *reimbursed* on a per diem basis for the costs incurred in connection with their residents—such as food, clothing, transportation, housing, utilities, entertainment. In fact, Devereux requires the homes it works with to be financially self-sufficient. In other words, ABHTHs need a source income outside of the ABHTH reimbursements.

The Department has a practice of requiring all inspections to be unannounced. *See Exhibit A* (4-7-23 Email from the Department to Devereux (“We do not schedule compliance inspections.”)). Since February of 2023, the Department has repeatedly conducted unannounced inspections of Devereux-affiliated homes. Thirteen of these inspections occurred when there was no one home to answer the door. In a number of instances, the homes were not assigned any residents and their administrators were not even in the country at the time of the inspection. In other instances, the administrator was not home because they were, consistent with their licensure, transporting their residents to an appointment. In each instance, the Department issued a Statement of Deficiency (“SOD”) alleging that by not being home the ABHTH “refuses to permit” the inspection thereby running afoul of A.R.S. § 36-427(B) and creating reasonable cause to believe that the health or safety of one or more patients or the general public is in immediate danger and a license revocation is warranted.

As detailed below, the Council should declare the agency practices unlawful and void.

1. The applicable statutes do not authorize unannounced inspections of ABHTHs and imposing this requirement is unduly burdensome.

The statutes that authorize inspections of ABHTHs are A.R.S. § 36-424(A) (a substantial compliance inspection), A.R.S. § 36-424(C) (a complaint inspection), A.R.S. § 36-425(A) (an initial inspection), and A.R.S. § 36-425(D) (an annual inspection). None of these statutes authorize *unannounced* inspections. Despite the lack of statutory authority, the Department has determined that while initial inspections under A.R.S. § 36-425(A) are announced, the other three types of inspections, which they refer to as compliance inspections, are unannounced. *See Exhibit A* (4-7-23 Email from the Department to Devereux (“We do not schedule compliance inspections.”)).

A prior version of A.R.S. § 36-424 authorized certain unannounced inspections, but the Legislature repealed the authorizing provision in 1989. *See Arizona Senate Bill 1355*, 39th Leg., 1st Reg. Sess. (1989) (SB 1355).¹ The Legislature has authorized the Department to conduct unannounced annual inspections and other inspections in connection with certain other regulated facilities. *See, e.g.*, A.R.S. § 36-885(B) (“The department shall make at least one unannounced visit annually” to a child care facility); A.R.S. § 36-2806(H) (“The department shall make at least one unannounced visit annually to each nonprofit medical marijuana dispensary”); A.R.S. § 36-897.05(B) (“At least one unannounced visit shall be made annually” to a child care group home); A.R.S. § 36-463.02(A) (“Inspections may be unannounced and shall take place during regular working hours” of a clinical laboratory). Therefore, the Legislature knows how to authorize unannounced inspections but has chosen not to authorize such inspections under A.R.S. § 36-424 and A.R.S. § 36-425. *See CPEN v. Riffel*, 213 Ariz. 247, 249–50 (App. 2006) (holding that “when the legislature uses different language within a statutory scheme, it does so with the intent of

¹ Specifically, SB 1355 deleted Section E, which provided certain “unannounced inspections of nursing care institutions and residential care institutions”

ascribing different meanings and consequences to that language.”). By requiring some of these inspections to be unannounced, the Department has exceeded its statutory authority.

ABHTHs provide a home environment for their residents. This includes taking residents to appointments, activities, and errands. During these times, meeting their obligations to residents necessitates the providers being away from home. In other circumstances, residents are in their licensed day programs and the providers are at work. Occasionally, there are no residents assigned to a home and the providers are away on vacation. The Department’s policy of requiring unannounced inspections prevents ABHTHs from meeting the needs of their residents and themselves, and is simply not workable for this provider type. Therefore, by refusing to announce their inspections of these homes in contravention of the applicable statutes, the Department is creating an insurmountable burden on ABHTHs resulting in a loss of their licenses and therefore a loss of their residents’ homes.

2. The Department’s reliance upon A.R.S. § 36-427(B) to issue SODs is unlawful.

The “violations” alleged in the SODs are based entirely on A.R.S. § 36-427(B), which states that “[i]f the licensee... refuses to permit the department ... the right to inspect the institution’s premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists.” Importantly, A.R.S. § 36-427 does not define a refusal to include being away from the premises nor does the statute authorize the Department to implement a rule or policy expanding the applicability of the statute to include such a circumstance. A.R.S. § 36-427(B) is clear and concise—it applies only to situations when a licensee makes an affirmative refusal to permit an inspection. *See Refusal*, BLACK’S LAW DICTIONARY (12th ed. 2024) (“The denial or rejection of something offered or demanded.”).

By expanding the reach of A.R.S. § 36-427(B) to include absences from the premises and utilizing that unauthorized statutory expansion to warrant licensure revocations under A.R.S. § 36-427(A)(3), the Department has exceeded its statutory authority.

Subject: Re: Request to Meet

Good Afternoon,

Thank you for your email. The Department of Health Services does not license Adult Therapeutic Foster Care. We license and regulate Adult Behavioral Health Therapeutic Homes which is a health care institution outlined in Arizona Administrative Code, Title 9, Chapter 10, Article 1, (A.A.C. R9-10-102.A.23).

Arizona Revised Statutes 36-424, indicates that a health care institution must provide permission for and complete acquiescence in any entry or inspection of the premises, during the term of the license (A.R.S. 36-424.C)

Further, Arizona Revised Statutes 36-427 indicates that if the health care institution refuses to permit the Department or its employees the right to inspect, such action shall be deemed reasonable cause to believe that a substantial violation exists and allows the Department to revoke the license (A.R.S. 36-427.B)

It is the expectation that all licensed health care institutions permit the Department to inspect. If a provider is not available, the back-up provider must be available for the inspection. We do not schedule compliance inspections.

Please be advised that refusing to sign an enforcement agreement could result in a legal order being issued, up to and including a notice of intent to revoke. At that time, you would have appeal rights and the ability to request a hearing.

If you still want to meet on this matter, I have the following availability:

Monday, April 17, 2023 at 3 pm
Friday, April 21, 2023 at 11 am

The Department is Authorized by Statute to Perform Unannounced Compliance and Complaint Inspections of Health Care Institutions to Ensure Public Health and Safety.

Petitioner is wrong that the Department is acting outside its authority to conduct unannounced annual compliance and complaint inspection for all health care institutions (“HCI”) including Adult Behavioral Health Therapeutic Homes (“ABHTH”). The authority to do so was established by Legislature in 1971 and remains unchanged.

The Department is obliged by statute to license and regulate **all** HCIs in Arizona. When an applicant seeks licensure, A.R.S. §§ 36-424(A) and -425(A) require that the Department “inspect the premises of the [HCI] ...to ascertain whether the applicant and the [HCIs] are in substantial compliance...” And when the application is complete, the Department “*shall* conduct an inspection of the [HCI] as prescribed by [A.A.C. title 9, chapter 4].” The initial inspections are scheduled, as the applicant is not yet operating or providing services. The statutes further require the Department to conduct annual compliance inspections, A.R.S. § 36-425(D); and complaint inspections. A.R.S. § 36-424(C). These inspections are unannounced because the Legislature ensured that “[a]ny application for licensure under this chapter constitutes permission for and **complete acquiescence** in any entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license.” A.R.S. § 36-424(C). The statutory scheme speaks both to the Department’s obligation to inspect HCIs to ensure public health and welfare, *and* to the licensees’ obligation to provide complete access for the performance of that statutory duty— nothing in the statutes suggest that the Department must schedule an appointment in order to have access. While A.R.S. § 36-424(C) speaks to entry on a “reasonable belief” and at a “reasonable time,” this does not equate to restricting the Department to pre-scheduling its compliance or complaint inspections at the convenience of a licensee. Performing

an inspection during the hours a facility is purportedly providing health care services is *reasonable*, particularly since the licensee is required to provide “complete acquiescence” by virtue of licensure. Nor would this promote public health, safety and welfare.

Petitioners inaccurately argue that, based on a 1989 Senate Bill amending A.R.S. title 36, chapter 4, the statutes prohibit unannounced inspections. They surmise that the Legislature “repealed” the authorization for unannounced inspections in A.R.S § 36-424 which authorized the Department’s authority to conduct unannounced inspections. In 1989, the Legislature removed one portion of the statute [previously A.R.S. § 36-424(E)] authorizing *local agencies* to conduct *unannounced inspections of nursing care institutions and residential care institutions*. Specifically, the Legislature removed section A.R.S § 36-424(E) which read, in pertinent part: “The department shall conduct with authorized local agencies applying for such contracts to permit the authorized local agencies or their advisory committees to conduct unannounced inspections of nursing care institutions and residential care institutions which are located in the planning areas of the authorized local agencies.” 1989 Ariz. Sess. Laws, Ch. 255 § 6 (1st Reg. Sess.). Significantly, at the time the Legislature removed the section above, the Legislature *did not* change A.R.S. § 36-424(D) which preserved the language requiring complete acquiescence. *Id.* In fact, the language granting the Department authority to conduct inspections and requiring licensees to provide complete acquiescence for a Department inspection has remained identical since the statute was enacted in 1971:

The Department...shall...have the right to enter upon and into the premises of any health care institution licensed...at any reasonable time for the purpose of determining the state of compliance with the provisions of this chapter....*Any application for licensure under this chapter shall constitute permission for and complete acquiescence in any entry of inspection of the premises during the*

pendency of the application and if licensed, during the term of the license.”

1971 Ariz. Sess. Laws, Ch. 196 § 2 (1st Reg. Sess.) (emphasis added). The goal of statutory interpretation is to interpret the legislative intent, including the entire statutory scheme. The primary purpose “is to determine and give effect to the legislative intent behind the statute, considering among other things the context of the statute, the language used and the spirit and purpose of the law.” *Welch-Doden v. Roberts*, 202 Ariz. 201, 206, ¶ 22 (App. 2002). The Legislature’s removal of one portion of A.R.S. § 36-424 aimed at the authority of **local agencies**, in combination with the long-standing requirement of complete acquiescence that remains intact, demonstrates that the Legislature intended that *every* HCI licensed by the state must provide complete acquiescence for inspection by the Department to ensure public welfare— an intent that can be traced to 1971.¹ Reading the statutes as suggested by Petitioner would lead to an absurd result for the Department and for the public. If the Department were required to pre-schedule inspections, it would not provide the Department with an accurate representation of how *any* HCI is truly operating – to allow them to observe the real-time patient/resident care, safety of the environment, and accuracy of medical records. *See State v. Arizona Bd. of Regents*, 253 Ariz. 6, 13, ¶ 28 (2022). The statute need not use the term “unannounced” to make this clear, and reading the statutes in the manner Petitioner proposes would frustrate the underlying purpose set out by the Legislature for decades.²

¹ Petitioners refer to other categories of facilities – child care facilities, child care group homes, clinical laboratories and medical marijuana dispensaries – licensed by the Department that have “unannounced inspection” language included in statute. However, these facilities are *not* health care institutions and cannot be suitably correlated to the legislative history and purpose of A.R.S. title 36, chapter 4, articles 1 and 2. Simply citing to these as examples while ignoring the decades of legislative history is unhelpful and irrelevant.

² This exact language was adopted in 2014 to ensure unannounced compliance and complaint inspections at abortion clinics in Arizona. *See* 2014 Ariz. Legis. Serv. Ch. 33 (H.B. 2284) (adding A.R.S. §§ 36-449.02(D) and (E).

It should also be noted that it is the Department's understanding that other agencies and regulatory bodies perform unannounced inspections with statutory authority that does not explicitly use the term "unannounced" to set forth inspection parameters. See A.R.S. §§ 3-267 ("[t]he director [of the Department of Agriculture . . . shall inspect . . . at such time and place and to such extent as the director deems necessary"); -316, -420, -3107, and, -3415.³

The Department is Required by A.R.S. § 36-427(B) to Presume Health and Safety Violations if They Are Refused Access to Inspect.

Petitioner is also wrong when it claims that the Department is unlawfully applying A.R.S. § 36-427(B). The refusal of a licensee to provide access for a Department inspection is clearly delineated on the face of the statute: "such action *shall* be deemed reasonable cause to believe that a *substantial violation* ... exists." A.R.S. § 36-427(B). Petitioner alleges that an ABHTH cannot provide access because they may not be home when the Department arrives for inspection. However, if an ABHTH provider is away from the facility, it is required to designate a "back-up provider to be present in the [ABHTH] and accountable for services provided by the [ABHTH] when the provider is not present." A.A.C. R9-10-1803(A)(5). And if an ABHTH is not providing services for any length of time, they must communicate that to the Department. See A.A.C. R9-10-109. Petitioner is simply wrong that ABHTHs operators are "burdened" by this process based on the nature of their license. ABHTHs *are HCIs* and are required to provide

See Feb. 13, 2014 House Reform and Human Services Committee Meeting at 1:32:32 through 1:34:37 (Rep. Lesko stating that "for every other health institution...in the entire state, Department of Health Services is allowed to do an unannounced health inspection" and "if someone files a complaint against any other health care institution, ADHS can go in unannounced.") https://m-download.inventus.com/6361162879/azleg_cfd4819e-5f32-47e5-96bc-0064f43f445c.mp4 (last visited April 2, 2025); also see. <https://directorsblog.health.azdhs.gov/abortion-clinic-inspections-bill> (last visited April 2, 2025)("On Tuesday, the Governor signed HB 2284, which [when it becomes effective later this Summer] will make our abortion clinics inspection authority more consistent with *our authority for the other health care institutions we license.*")(emphasis added).

³See also, A.R.S. §§ 4-118; 32-542, -2271, and -2824; 36-495.07, -592, -851.02, -851.03, -2063, and -2232.

services to behavioral health residents 24/7; and they are similarly required to provide complete acquiescence to the Department for inspection pursuant to A.R.S. § 36-424(C). See A.R.S. § 36-401(A)(3) (defining an ABHTH as “a residence for individuals who are at least eighteen years of age, have behavioral health issues and need behavioral health services” that provides housing, assistance in daily skills, coordination of transportation to appointments, behavior monitoring and the assistance in the self-administration of medication.)

Petitioner’s theory that simply “being away” from a licensed facility would not equate to a refusal to permit the Department to inspect is inapposite to the statute’s plain language. When the Department arrives for a compliance inspection during a facility’s hours of operation - which it does - a licensee’s absence (with no ABHTH back-up provider), it is both a refusal and the possible abandonment of required services. Even using Petitioner’s definition, the *absence* of a licensee to permit access for inspection is “[t]he denial or rejection of something offered or demanded.” BLACK’S LAW DICTIONARY (12th ed. 2024). If the Department were restricted to await some vague “affirmative refusal” as suggested, it would render the requirement of complete acquiescence in A.R.S. § 36-424(C) and the presumption of non-compliance in A.R.S. § 36-427(B) futile. Not only would this fly in the face of legislative intent, but it would allow non-compliant licensees to use absence as regulatory evasion. Certainly, this would not support the health and safety of the most vulnerable Arizonans served by HCIs.

The fact that one particular type of licensed HCI is seeking to mold its version of statutory language to avoid regulation should greatly concern this Council and the public.

100 N. 15th Avenue, Suite 302
Phoenix, AZ 85007

Re: *Reply in support of Devereux's A.R.S. § 41-1033(G) Petition*

Governor's Regulatory Review Council:

Devereux Advanced Behavioral Health Arizona respectfully submits this reply in connection with the Department's April 3, 2025 Response as well as the attached inspection statute chart to aid the Council's review (Attachment 1). As described in Devereux's Petition, the Department has a practice of conducting unannounced annual inspections of Adult Behavioral Health Therapeutic Homes (ABHTHs) without statutory authorization, then issuing a deficiency when no one is home to answer the door and instituting enforcement actions, such as a revocation under A.R.S. § 36-427(B). The statutory provisions referenced in the Department's Response do not authorize such inspections, nor do they support equating being away from home during unannounced annual inspections with a refusal to permit inspection.

1. A.R.S. § 36-424 does not authorize the Department to conduct unannounced inspections of health care institutions—the 1989 amendment confirms that fact.

Prior to the 1989 amendment, “*authorized* local agencies” had statutory authority to conduct unannounced inspections and the Department did not have such authority. The fact that the legislature expressly authorized local agencies to conduct unannounced inspections at that time, but did not expressly authorize the Department to do so reflects a deliberate decision by the legislature that must be honored.¹ The 1989 Amendment repealed the local agency's authority to conduct unannounced inspections, thus placing local agencies and the Department in the same position—*not* having authority to conduct unannounced inspections.

2. ABHTHs are not required to provide services 24/7.

The Department incorrectly asserts (at 4–5) that “ABHTHs are HCIs and are required to provide services to behavioral health residents 24/7.” The statute cited by the Department to support this statement is A.R.S. § 36-401(A)(3), the definition of ABHTH, which does not reference any 24/7 requirement. In fact, these types of providers do not generally provide services inside the home 24/7 when they have residents, and sometimes there are no residents assigned to the home so there is no opportunity to provide services at all. In both circumstances—when the assigned residents are not in the home and when there are no residents assigned to the home—the Department has conducted unannounced inspections and issued revocations and/or initiated enforcement action.

3. Providing “complete acquiescence” during an inspection does not equate to conducting unannounced surveys.

The Department incorrectly relies on the phrase “complete acquiescence” in A.R.S. § 36-424(C) to justify unannounced inspections. “Acquiescence,” by definition, implies passive acceptance, consent without protest, or absence of intentional obstruction.² It does not, however, equate to constant availability or require that licensees always remain home in anticipation of a potential but unknown inspection.

The legislature’s decision to include explicit authorization of unannounced inspections under former subsection E while at the same time utilizing the phrase “complete acquiescence” in subsection C reflects an intentional distinction between the two concepts. This principle of statutory interpretation is well-established.³

4. “Complete acquiescence” applies *only* to reasonable-cause, complaint-based inspections undertaken pursuant to A.R.S. § 36-424(C).

The Department acknowledges several different types of inspections associated with health care institutions (HCIs). The four main types are:

- Initial inspections—A.R.S. § 36-425(A);
- Reasonable-cause, reasonable-time complaint inspections—A.R.S. § 36-424(C);
- Substantial-compliance inspections—A.R.S. § 36-424(A); and
- Annual inspections—A.R.S. § 36-425(D).

The “complete acquiescence” language is found only in 36-424(C), which authorizes reasonable-cause, reasonable-time complaint inspections. The Department’s response asserts that this language in 36-424(C) grants it authority to conduct unannounced annual inspections under 36-425 but provides no statutory basis in support thereof. The sentences in 36-424(C) must be read together.⁴ The “complete acquiescence” language in the middle of 36-424(C) only relates to 36-424(C).

Even in a situation where there is a complaint and thus the Department has a reasonable cause to conduct an 36-424(C) inspection, the Department can only conduct that inspection at a “reasonable time.” These are the limitations the legislature has put on the Department for inspections to which a provider must provide complete acquiescence.

Furthermore, 36-425(D) makes clear that annual inspections are to be treated differently from reasonable-cause inspections when it states that “[e]xcept as provided in section 36-424 . . . the department shall conduct a compliance inspection of a health care institution to determine compliance with this chapter and rules adopted pursuant to this chapter at least once annually.” (emphasis added). In other words, when there is sufficient reasonable cause to necessitate an inspection or a subsequent need to conduct a substantial compliance inspection, like an application to increase bed capacity, the Department is permitted to conduct additional inspections authorized in 36-424 outside of the annual inspection time frame authorized in 36-425. The Department has embraced this difference in administrative proceedings to contend

that “there is no requirement that the Department conduct an annual compliance inspection at a ‘reasonable time.’”⁵ This shows that the Department understands that the language in 36-424(C) does not apply to inspections conducted under 36-425 and this understanding must flow to all of section 36-424(C), including the complete acquiescence language.

5. It is not reasonable to conduct inspections when a home is unoccupied.

In its Response, the Department explains that they need to conduct the annual inspections at issue “during the hours a facility is purportedly providing health care services” and that they need to “to observe the real-time patient/resident care” but neither of these things can happen if the Department conducts inspections during times when nobody is at the home, which is contrary to the statutory framework. *See* Resp. at 2–3. That is the problem with the challenged practices—the Department does not provide notice of their annual inspections and yet insists on conducting their unannounced inspections during hours that residents are most likely to be away from home, so they arrive at an unoccupied house. If the Department were to instead follow the statutory process put in place by the legislature, they would notify a provider of the upcoming annual inspection and conduct the inspection during a reasonable time, meaning a time when the provider and, if needed, residents would be at the home. This would comply with the legislature’s intent as shown in the statutes at issue and it would allow the department to meet the goals they express in their Response. The current process does neither.

Despite there being no difference in statutory language and no related rules, the Department acknowledges that it opts to schedule some types of inspections. *See* Resp. at 1 (“The initial inspections are scheduled”); *see also* [4-11-22 ADHS Presentation](#) (noting that substantial compliance inspections for license modifications are “scheduled by a Surveyor”). The Department fails to identify any authority for its inconsistent survey processes.

6. The presumption of a substantial violation provided in A.R.S. § 36-427(B) only applies to inspections conducted pursuant to A.R.S. § 36-424.

By its own terms, A.R.S. § 36-427(B) only applies to reasonable-cause, reasonable-time complaint inspections and substantial-compliance inspections conducted pursuant to 36-424:

If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department or its employees or agents the *right to inspect the institution’s premises as provided in section 36-424*, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists.

(emphasis added). The presumption is not applicable to initial inspections conducted under 36-425(A) or annual inspections conducted under 36-425(D). Yet, the Department uses the 36-427(B) presumption to revoke licenses when a provider is not present at the property during an annual inspection. By extending this statute to annual inspections, the Department exceeds its statutory authority and improperly broadens the statute’s scope.

7. Even in A.R.S. § 36-424 inspections, the presumption cannot attach when there is no one at the property.

By its own terms, the A.R.S. § 36-427(B) refusal must be made by “the licensee, the chief administrative officer or any other person in charge of the institution” in order for the presumption to attach. If there is *no one* at the property to answer the door, there is no basis for the Department to conclude that “the licensee, the chief administrative officer or any other person in charge of the institution” refused the inspection. By extending this statute to apply even when there is no refusal by “the licensee, the chief administrative officer or any other person in charge of the institution,” the Department exceeds its statutory authority and improperly broadens the statute’s scope.

8. Backup providers are not required to be present when the home is unoccupied.

Petitioner agrees that ABHTHs must designate a backup provider *to provide services* to residents when the provider is not available.⁶ However, the Department’s contention that a backup provider needs to be at the home even when there are no residents at the home is inconsistent with and expands the definition of backup provider.⁷ It is unreasonably burdensome and wasteful to force ABHTHs to pay for a backup provider to sit in an unoccupied home at the off chance that the Department decides to conduct an inspection. Yet, that is exactly what the Department is demanding. Given the unique operational realities of ABHTHs—which function primarily as private residences where providers may legitimately be away or may not have any assigned residents—the Department’s interpretation creates an impractical and unjust regulatory framework. In one instance, a Devereux-affiliated ABHTH provider was issued a statement of deficiency even though he was hospitalized in a foreign country and had no residents assigned to him at the time.⁸

9. The Department’s practice of revoking licenses due to the residents and providers being away from the home is harming residents and providers.

The Department’s improper practices challenged in the Petition negatively impact Arizona residents. In one instance, the Department issued a notice of revocation to a Devereux-affiliated ABHTH provider because she was not home when the Department showed up unannounced to conduct an annual inspection. No one was home so the compliance inspector contacted the provider by phone, and the provider informed the inspector that she was transporting her residents to scheduled appointments. Specifically, the provider was picking up a resident from her day program to take her to a *court ordered* appointment. That day’s appointment was the last required by the court and due to the provider’s diligence, the resident completed her court ordered treatment on time and was therefore allowed to live independently. In addition to picking this resident up and taking her to the appointment for court ordered treatment, the provider also purchased lunch for the resident and another resident, took the resident back to the day program, provided the lunch to the second resident, took the second resident to a medical appointment, and then brought the second resident back to the day program. All of these were critical services being provided to the residents by the provider outside of the home.

Coordinating “transportation to scheduled appointments” is one of six services that an ABHTH provider is *statutorily* required to provide its residents. *See* A.R.S. § 36-401(3)(c).⁹ Additionally, A.A.C. R9-10-1805(A) requires ABHTH providers to “ensure that behavioral health services and ancillary services are provided to a resident according to the resident’s treatment plan obtained from the adult behavioral health therapeutic home’s collaborating health care institution.” Facilitating residents’ attendance at medical appointments is part of the residents’ treatment plans and is the opposite of an “abandonment of required services” as the Department asserts in its Response. *See* Resp. at 5.

The Department is revoking the licenses of providers under 36-427(B) merely because they were actively ensuring legally required services were being provided to their residents during times the Department conducted unannounced 36-425(D) annual inspections. This is a situation where the legislative intent and statutory construction prevent unnecessary regulatory hardship and protect essential community-based services. If the Department conducted inspections in a manner consistent with applicable laws, then practical operational considerations would also be met.

10. Clarification of GRRC’s Authority.

On April 10, 2025, the Department filed an opposition to a motion to continue a scheduled hearing before the Office of Administrative Hearings pertaining to revocations based on the challenged practices. In that filing, the Department made the following statement:

The Devereux [41-1033(G)] Petition seeks consideration...of Devereux’s theory as it pertains to the inspection of [ABHTHs] and whether the Department’s application of A.R.S. § 36-427 is appropriate. However, the Devereux Petition is not an adequate basis upon which to delay the hearing for the license revocations...While it is possible that before June 16th, GRRC may issue some determination based on the Devereux Petition, ***a decision by GRRC pursuant to A.R.S. § 41-1033(K) is not an injunction, a declaratory judgment, or other form of court order that would serve as precedent for this tribunal.*** It is unclear at this time, and certainly before there is any definitive outcome from GRRC, in what manner this might affect these cases, if at all. *See* A.R.S. §§ 41-1033(K) and (L).¹⁰

(emphasis added). In light of the above, Devereux respectfully requests that the Council clarify and affirm its authority to declare a challenged practice void and unenforceable.

Sincerely,
/s/ Spencer G. Scharff

Counsel for Devereux Advanced Behavioral Health Arizona

¹ See Antonin Scalia & Bryan A. Garner, *Reading Law: The Interpretation of Legal Texts* 107 (2012) (“The expression of one thing implies the exclusion of others (*expressio unius est exclusio alterius*).”); *City of Surprise v. Arizona Corp. Comm’n*, 246 Ariz. 206, 211 (2019) (“Applying the *expressio unius* canon, we infer that the legislature’s decision to include the terms ‘sell, lease, assign,’ and ‘mortgage,’ but not ‘condemn’ or any variant thereof was intentional.”).

² ACQUIESCENCE, *Black’s Law Dictionary* (12th ed. 2024) (“[a] person’s tacit or passive acceptance; implied consent to an act.”). The antonym of “acquiescence,” per Merriam-Webster, is “defiance,” which implies intentional resistance or refusal to comply.

³ For example, in 1989 the Arizona Court of Appeals was called upon to determine whether campus security guards were eligible to participate in *Public Safety Personnel Retirement System*. *Arizona Bd. of Regents for & on Behalf of Univ. of Arizona v. State ex rel. State of Ariz. Pub. Safety Ret. Fund Manager Adm’r*, 160 Ariz. 150 (App. 1989). This required the court to analyze the definition of employee in A.R.S. § 38–842(11):

11. “Employee” means any person who is a member of a group of public safety personnel regularly assigned to hazardous duty, including groups of municipal policemen, municipal firemen, state highway patrolmen, county sheriffs and deputies, fish and game wardens, penitentiary guards, college campus policemen, and special agents, and excluding persons compensated on a contractual or fee basis.

The court held that campus security guards did not fall within the definition of employees because they were not expressly enumerated in the that definition. When finding that the legislature intended the list of enumerated groups to be exclusive and not “merely descriptive” of the types of groups covered under the definition, the court found it dispositive that “in subsection (12)(d) of the [same] statute, the legislature enumerated another group of items and used the language “including but not limited to” to make it clear that other items of the same class were not to be excluded.” *Id.* at 157 (“We find this to be a further indication that the legislature intended the enumerated groups of employees in Subsection (11), to be exclusive since it chose not to place the phrase ‘including but not limited to’ in that subsection but used it in another.”); see also *Luchanski v. Congrove*, 193 Ariz. 176, 179 (App. 1998) (same); cf. *HCZ Constr., Inc. v. First Franklin Fin. Corp.*, 199 Ariz. 361, 365 (App. 2001) (“When the Legislature has used both ‘may’ and ‘shall’ in the same paragraph of a statute, we infer that the Legislature acknowledged the difference and intended each word to carry its ordinary meaning.”). In sum, the court held that “[w]here the legislature has specifically used a term in certain places within a statute and excluded it in another place, courts will not read that term into the section from which it was excluded.” *Id.*

⁴ See *State v. Tsinnijinnie*, 206 Ariz. 477, 479 (App. 2003) (“Both sentences of subsection (K) must be read together and harmonized, however, to correctly discern the legislative intent.”); cf. *Price v. Wyeth Holdings Corp.*, 505 F.3d 624, 631 n.6 (7th Cir. 2007) (“The clause containing the one-year bar is part of the paragraph specifically addressing the time limits for cases that are not initially removable; its placement in this paragraph indicates that it modifies only the immediately preceding language in the same paragraph, not the more general time limitation contained in the preceding paragraph.”).

⁵ [Exhibit 1](#) (Department’s Response to Motion for Summary Adjudication) at 7.

⁶ A.C.C. § R9-10-1801(2) (defining backup provider to mean “an individual designated by a provider to be present in an adult behavioral health therapeutic home, when a provider is not

present, *who ensures that a resident receives the behavioral health services and ancillary services in the resident's treatment plan.*") (emphasis added).

⁷ Even if this is the proper reading of the relevant regulations, such regulations would be invalid as they are not specifically authorized by statute.

⁸ His son answered his ring doorbell to inform the inspectors of his father's circumstances.

⁹ Moreover, A.A.C. R9-10-1804(B)(2) states that an ABHTH resident has the right, "[t]o receive services that support and respect the resident's individuality, choices, strengths, and abilities." Transporting residents to their scheduled medical appointments and court ordered appointments is clearly a service that supports those residents, even if it takes place outside of the home.

Case No.: 2025-BBHL-0133-DHS
2025-BBHL-0153-DHS

**ADHS’ RESPONSE TO APPELLANTS’
MOTION FOR SUMMARY
ADJUDICATION**

(Honorable Sondra Vanella)

19 Pursuant to Arizona Administrative Code (“A.A.C”) R2-19-106(D) and Judge
20 Vanella’s December 2, 2024 Order, the Arizona Department of Health Services
21 (“Department” or “ADHS”) responds to the Motion for Summary Adjudication filed on
22 November 1, 2024 (“Motion”) by [REDACTED] and [REDACTED]
23 [REDACTED] (collectively “Appellants”) and non-party Devereux Advanced Behavioral
24 Health Arizona (“Devereux”).¹ The Motion is unsupported by law and fact,
25 misconstrues statute and must be denied.
26

27 ¹ Devereux is not a party to either of these matters and has not file a motion to intervene.
28

EXHIBIT 1

I. FACTUAL AND PROCEDURAL BACKGROUND.

1 On December 10, 2019, pursuant to Arizona Revised Statutes (“A.R.S.”) Title 36,
2 Chapter 4, Article 2 and A.A.C. Title 9, Chapter 10, the Department issued license
3 number [REDACTED] to operate an adult
4 behavioral health therapeutic home (“ABHTH”) at [REDACTED]
5 [REDACTED] Facility”).

6
7 On June 10, 2024, the Department attempted to conduct a compliance inspection
8 at the [REDACTED] Facility. The Department’s findings are outlined in a Statement of
9 Deficiencies (“SOD”). *See* Ex. A. The Compliance Officer (“Officer”) arrived at the
10 [REDACTED] Facility at 10:40 a.m. and knocked on the door. *Id.* at 2. [REDACTED] did not answer
11 the door. *Id.* At 10:44 a.m., the Officer called [REDACTED] but [REDACTED] did not answer the
12 phone. *Id.* The Officer left a voicemail notifying [REDACTED] that the Department was on-site
13 to conduct a compliance inspection. *Id.* At 10:48 a.m., the Department sent [REDACTED] an
14 email informing him that the Department was on-site to conduct a compliance
15 inspection. *Id.* The Officer sent two (2) text messages at 10:48 a.m. and 10:55 a.m.
16 respectively and [REDACTED] did not respond to either text message. *Id.* At 11: 45 a.m., the
17 Officer made an additional attempt to contact [REDACTED] by telephone and [REDACTED] did not
18 answer the call. *Id.* at 3. At 11:45 a.m., the Officer left the [REDACTED] Facility. *Id.* The
19 Department did not receive any response from the [REDACTED] Licensee on June 10, 2024
20 before 5:00 p.m. *Id.* On September 25, 2024, the Department issued a Notice of Intent
21 to Revoke Health Care Institution License and Notice of Right to Request
22 Administrative Hearing. *See* Ex. B.

23 On May 3, 2021, pursuant to A.R.S. Title 36, Chapter 4, Article 2, and A.A.C.
24 Title 9, Chapter 10, the Department issued license number [REDACTED] to [REDACTED]
25 [REDACTED] dba [REDACTED] to operate an ABHTH at [REDACTED]
26 Tucson, AZ 85730 (“[REDACTED] Facility”).

EXHIBIT 1

1 On May 28, 2024, the Department attempted to conduct a compliance inspection
2 at the ██████ Facility. The Department's findings are outlined in a SOD. *See* Ex. C.
3 At 9:35 a.m., the Officer arrived at the ██████ Facility and the gate was locked. *Id.* at
4 2. Shortly thereafter, the Officer called ██████ by telephone. *Id.* In a telephonic
5 interview, ██████ reported to be unavailable to meet the Officer because ██████
6 was with residents at scheduled appointments. *Id.* ██████ reported the back-up
7 provider was not available, and suggested the Officer schedule the inspection for another
8 date. *Id.* At 10:15 a.m., the Officer left the ██████ Facility. *Id.* at 3. On November
9 27, 2024, the Department issued a Notice of Intent to Revoke Health Care Institution
10 License and Notice of Right to Request Administrative Hearing. *See* Ex. D.

11 ██████ timely requested a hearing and one was originally set before this tribunal
12 for December 13, 2024 in Case No. 2025-BBHL-0133-DHS. ██████ timely
13 requested a hearing and one was originally set before this tribunal for January 8, 2025 in
14 Case No. 2025-BBHL-0153-DHS. These matters were consolidated by Judge Vanella's
15 December 2, 2024 Order.

16 On November 1, 2024, ██████ filed the Motion seeking "the tribunal order
17 Department to immediately rescind the unlawful [Notice of Intent to Revoke]" based on
18 its opinion that the Department was unauthorized to inspect the ██████ Facility and thus
19 the license revocation was unlawful. Motion at 7. ██████ joined the Motion on
20 November 25, 2025.

21 As delineated in the Department's November 12, 2024 Motion to Strike, the
22 Department maintains its argument that even *if* this tribunal were to be persuaded by any
23 of Appellants' arguments, it can only issue a recommended decision to the Director of
24 the Department; OAH has no authority to order the Department to rescind a Notice of
25 Intent to Revoke. *See* A.R.S. § 41-1092.08.

EXHIBIT 1

II. LEGAL ARGUMENT

A. The Department Has a Duty and Obligation to Protect the Health, Safety and Welfare of the People of Arizona By Licensing and Regulating Health Care Institutions.

ADHS is charged with the power and duty to protect the health of the people of Arizona. *See* A.R.S. § 36-132(A)(1). The Director of the Department (“Director”) is obligated to “make and amend rules necessary for the proper administration and enforcement of the laws relating to the public health.” A.R.S. § 36-136(G). Additionally, A.R.S. § 36-405(A) requires the Director to “adopt rules to establish minimum standards and requirements for constructing, modifying and licensing health care institutions² necessary to ensure the public health, safety and welfare.” The Department may “[c]lassify and subclassify health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care and standard of patient care required for the purposes of licensure;” and “prescribe the criteria for the licensure inspection process.” A.R.S. §§ 36-405(B)(1) and (3). In addition, A.R.S. §§ 36-406(1)(a) and (c) mandate that the Department “[a]dminister and enforce this chapter and the rules, regulations and standards adopted pursuant thereto,” and “[h]ave access to books, records, accounts and any other information of any health care institution reasonably necessary for the purposes of this chapter.”

Additionally, the Department by statute is obligated to “inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant and the health care institution are in

² A “health care institution” is defined in A.R.S. § 36-401(23) as “every place, institution, building or agency, whether organized for profit or not, that provides facilities with medical services, nursing services, behavioral health services, health screening services, other health-related services, supervisory care services, personal care services or directed care services and includes home health agencies as defined in § 36-151, outdoor behavioral health care programs and hospice service agencies.”

EXHIBIT 1

1 substantial compliance with the requirements of this chapter and the rules established
2 pursuant to [A.R.S. title 36, chapter 4].” A.R.S. § 36-424(A). Furthermore, A.R.S. § 36-
3 425 specifies that upon receipt of a complete application for a health care institution
4 license, the Department “shall conduct an inspection of the health care institution as
5 prescribed by [title 9, chapter 4];” and “shall conduct a compliance inspection of a health
6 care institution to determine compliance with this chapter and rules adopted pursuant to
7 this chapter at least once annually.” A.R.S. 36-425(A) and (D)³. And accordingly,
8 A.R.S. § 36-424(C) states:

9 On a determination by the director that there is reasonable
10 cause to believe a health care institution is not adhering to
11 the licensing requirements of this chapter, the director and
12 any duly designated employee or agent of the director,
13 including county health representatives and county or
14 municipal fire inspectors, consistent with standard medical
15 practices, may enter on and into the premises of any health
16 care institution that is licensed or required to be licensed
17 pursuant to this chapter at any reasonable time for the
18 purpose of determining the state of compliance with this
19 chapter, the rules adopted pursuant to this chapter and local
20 fire ordinances or rules. Any application for licensure under
21 this chapter constitutes permission for and complete
22 acquiescence in any entry or inspection of the premises
23 during the pendency of the application and, if licensed,
24 during the term of the license. If an inspection reveals that
25 the health care institution is not adhering to the licensing
26 requirements established pursuant to this chapter, the
27 director may take action authorized by [title 36, chapter 4].

21 Importantly, the statutory licensing scheme includes the presumption that, should
22 a licensee refuse “to permit the department or its employees or agents the right to inspect
23 the institution's premises as provided in section 36-424, such action shall be deemed
24 reasonable cause to believe that a substantial violation under subsection A, paragraph 3
25

26 ³ There are health care institutions that may be exempt from the annual inspection requirement
27 pursuant to A.R.S. §§ 36-424(B) and 36-425(E), however the [REDACTED] Facility and the [REDACTED]
28 Facility are not eligible for either statutory exemption.

EXHIBIT 1

1 of this section exists.” A.R.S. § 36-427(B). Thus, without access to a licensed health
2 care institution, the Department *shall* deem that licensee “in substantial violation of the
3 requirements for licensure of the institution, as a result of which the health or safety of
4 one or more patients or the general public is in immediate danger” and may suspend or
5 revoke the license. A.R.S. §§ 36-427(A)(3) and (B).

6 Moreover, it is unlawful to “establish, conduct or maintain in this state a health
7 care institution or any class or subclass of health care institution *unless* that person holds
8 a current and valid license issued by the department specifying the class or subclass of
9 health care institution the person is establishing, conducting or maintaining.” A.R.S. §
10 36-407(A) (emphasis added). Further, “the operation or maintenance of a health care
11 institution which does not hold a current and valid license or which exceeds the range of
12 the services authorized by the class or subclass for which it is licensed is a violation of
13 this chapter and is declared a nuisance inimical to the public health and safety” and the
14 Department’s Director may seek an injunction to enjoin an unlicensed facility from
15 operating to protect public health and safety. A.R.S. § 36-430. The entire statutory
16 scheme that governs health care institution licensure clarifies that public health, safety
17 and welfare are paramount, giving the Department broad authority to license, inspect and
18 regulate all health care institutions.

19 **B. The Department Has the Obligation and the Authority to Conduct** 20 **Compliance Inspections at Licensed Health Care Institutions.**

21 Appellants aver that the compliance inspections at the ██████ Facility and the
22 ██████ Facility lacked “reasonable cause” and were not conducted at a “reasonable
23 time” making them unlawful pursuant to A.R.S. § 36-424(C).⁴ Motion at 2-3; *see also*

24 _____
25 ⁴ Appellants misconstrue the *type* of inspection the Department attempted to perform at the
26 ██████ Facility and the ██████ Facility. They claim each inspection was “an unannounced
27 inspection” and later “an inspection under A.R.S. § 36-424(C).” Motion at 2, 3. They
28 mischaracterize the fact that these inspections were compliance inspections conducted pursuant
to A.R.S. § 36-425(D); Appellants’ failure to provide the Department access to the health care
institutions violated A.R.S. § 36-424(C). *See* Exs. A and C.

EXHIBIT 1

1 Ex. B at 4 and Ex. D at 4. Appellants misconstrue the statutes regarding inspections of
2 licensed health care institutions and thus their arguments fail.

3 First, there is no reasonable cause requirement in A.R.S. title 36, chapter 4 with
4 which the Department must comply before conducting a compliance inspection of a
5 licensed health care institution. As explained above, the Department is not only *allowed*
6 to perform compliance inspections, they are *required* to conduct annual compliance
7 inspections pursuant to A.R.S. § 36-425(D). Once the Department acts on that annual
8 obligation to inspect a licensed facility, the licensee must provide “complete
9 acquiescence in *any* entry or inspection...during the term of the license.” A.R.S. § 36-
10 424(C) (emphasis added). Nothing in any of the licensing statutes decreases, lessens or
11 removes the obligation of a licensee to permit the Department entry for any inspection,
12 including annual compliance as required in A.R.S. § 36-425(D).

13 Second, there is no requirement that the Department conduct an annual
14 compliance inspection at a “reasonable time.” Appellant is simply wrong that the
15 Department “can only conduct that inspection at a ‘reasonable time’” and that if the
16 provider of a licensed health care institution is not present when the Department arrives,
17 the inspection is unauthorized. Motion at 3-4. As explained above, an annual
18 compliance inspection is required and a licensed health care institution must provide
19 access in accordance with A.R.S §§ 36-424(C) and 36-425(D). And if the licensed
20 facility is a *residential* facility, such as an ABHTH, it is licensed to provide services
21 twenty-four hours a day, seven days a week, and thus must provide access twenty-four
22 hours a day, seven days a week.⁵ Therefore, Appellants’ suggestion that “the
23

24 ⁵ An ABHTH is defined as a “residence that provides room and board, assists in acquiring daily
25 living skills, coordinates transportation to scheduled appointments, monitors behaviors, assists in
26 the self-administration of medication, and provides feedback to a case manager related to
27 behavior for an individual 18 years of age or older based on the individual's behavioral health
28 issue and need for behavioral health services and may provide behavioral health services under
the clinical oversight of a behavioral health professional.” A.R.S. § 36-401(3) and A.A.C. R9-10-
101(13).

EXHIBIT 1

1 Department could wait for the provider to return home or the Department could return
2 later or the Department could ask the provider when they would be home” is, in fact, *not*
3 *reasonable* and is contrary to law.

4 The Department is obligated and authorized to conduct annual compliance
5 inspections. Therefore, the annual compliance inspections at the [REDACTED] Facility and
6 [REDACTED] Facility were grounded in the law and Appellants’ Motion must be denied.

7 **C. The Statutory Licensing Scheme Authorizes Unannounced Inspections of** 8 **Health Care Institutions.**

9 Appellants next argue that the statutes prohibit *any* unannounced inspections of
10 health care institutions. Motion at 4-5. They posit that in 1989, the Legislature
11 “repealed” the Department’s authority to conduct unannounced inspections for nursing
12 care institutions and residential care institutions in A.R.S § 36-424 as “proof” that the
13 Legislature intended to prevent any unannounced inspections by ADHS. Motion at 4.
14 However, Appellants are wrong. The Motion mischaracterizes the legislative history of
15 the statute, the actions taken by the Legislature and fails to apply any level of statutory
16 interpretation.

17 In 1989, during the 39th legislative session, the Legislature removed one portion
18 of the statute [previously A.R.S. § 36-424(E)] authorizing *local agencies* to conduct
19 unannounced inspections of nursing care institutions and residential care institutions.
20 The Legislature removed section A.R.S § 36-424(E) in its entirety which read:

21 The department shall conduct with authorized local agencies
22 applying for such contracts to permit the authorized local
23 agencies or their advisory committees to conduct
24 unannounced inspections of nursing care institutions and
25 residential care institutions which are located in the planning
26 areas of the authorized local agencies. The inspections shall
27 be conducted in addition, to the inspections performed by the
28 Department pursuant to this chapter, to evaluate the quality of
care provided at nursing care institutions and residential care
institutions. An authorized local agency may use its own
employees or may use volunteers to conduct the inspections.

EXHIBIT 1

1 Upon completion of an inspection the authorized local agency
2 shall notify the department of its findings and may report its
3 findings at a public hearing conducted by the agency in
 accordance with title 41, chapter 6.

4 1989 Ariz. Sess. Laws, Ch. 255 § 6 (1st Reg. Sess.). Importantly, at the time the
5 Legislature removed the section above, the Legislature did not make changes to A.R.S. §
6 36-424(D) which stated:

7 Upon a determination by the director that there is reasonable
8 cause to believe a health care institution is not adhering to the
9 licensing requirements established pursuant to this chapter,
10 the director and any duly designated employee or agent
11 thereof, including county health representatives and county or
12 municipal fire inspectors, shall, consistent with standard
13 medical practices, have the right to enter upon and into the
14 premises of any health care institution which is licensed, or
15 required to be licensed, pursuant to this chapter at any
16 reasonable time for the purpose of determining the state of
17 compliance with the provisions of this chapter, the rules of
18 the department adopted pursuant thereto, and local fire
19 ordinances or rules. *Any application for licensure under this
20 chapter shall constitute permission for and complete
21 acquiescence in any such entry or inspection of the premises
22 during the pendency of the application and, if licensed,
23 during the term of the license.* If an inspection reveals that the
24 health care institution is not adhering to the licensing
25 requirements established pursuant to this chapter, the director
26 may take action authorized by this chapter. Any health care
27 institution, including an accredited hospital, whose license
28 has been suspended or revoked in accordance with this
 section is subject to inspection upon application for
 relicensure or reinstatement of license.

1989 Ariz. Sess. Laws, Ch. 255 § 6 (1st Reg. Sess.) (emphasis added). Moreover, the
language granting the Department authority to conduct inspections and requiring any
licensee to provide complete acquiescence to a Department inspection has remained
identical since the time the statute was enacted in 1971. At the time of enactment,
A.R.S. § 36-424(B) read as follows:

EXHIBIT 1

1 The Department and any duly designated employee or agent
2 thereof, including county health representatives and county or
3 municipal fire inspectors, shall, consistent with standard
4 medical practices, have the right to enter upon and into the
5 premises of any health care institution licensed, or required to
6 be licensed pursuant to this chapter at any reasonable time for
7 the purpose of determining the state of compliance with the
8 provisions of this chapter, the regulations of the Department
9 adopted pursuant thereto, and local fire ordinances or
10 regulations. *Any application for licensure under this chapter
11 shall constitute permission for and complete acquiescence in
12 any entry of inspection of the premises during the pendency of
13 the application and if licensed, during the term of the license.*

14 1971 Ariz. Sess. Laws, Ch. 196 § 2 (1st Reg. Sess.) (emphasis added).

15 If Appellants seek to have this tribunal apply appropriate statutory interpretation
16 to their analysis, the entire statutory scheme must be considered. And if the removal of
17 one portion of a statute is to be used to support Appellants' absurd position, the entire
18 scheme must be read in context to determine the intent of the Legislature. The goal of
19 statutory interpretation is to interpret the legislative intent behind the statute, including a
20 consideration of the entire statutory scheme. The primary purpose of statutory
21 interpretation "is to determine and give effect to the legislative intent behind the statute,
22 considering among other things the context of the statute, the language used and the
23 spirit and purpose of the law." *Welch-Doden v. Roberts*, 202 Ariz. 201, 206, ¶ 22 (App.
24 2002) (citing *Midland Risk Management Co. v. Watford*, 179 Ariz. 168, 171
25 (App.1994)). "Statutes are not to be interpreted woodenly and without regard for their
26 aim." *State Farm Auto. Ins. Co. v. Dressler*, 153 Ariz. 527, 531 (App. 1987) (citing
27 *State ex rel. Corbin v. Pickrell*, 136 Ariz. 589 (1983)). Here, it must be considered that
28 the Legislature's removal of A.R.S. § 36-424(E) - aimed at the authority of local
agencies - in combination with the entire statutory language requiring complete
acquiescence by all licensees, straightforwardly supports that the legislative intent was to
ensure that every health care institution licensed by the state must provide complete

EXHIBIT 1

1 acquiescence to any entry for inspection by the Department. This legislative intent can
2 be traced to 1971. Therefore, if the Legislature had wanted to prohibit the Department
3 from complete, unannounced access to health care institutions for inspection, it would
4 have removed this requirement in the statute. *See Padilla v. Indus. Comm'n*, 113 Ariz.
5 104, 106 (1976) (“Equally fundamental is the presumption that what the Legislature
6 means, it will say.”).

7 In fact, the legislative history of the licensing statutes also reveal that the
8 presumption of immediate risk found in A.R.S. § 36-427(A)(3) has also remained the
9 same since 1971. At the time of enactment, the statute read, in pertinent part: “If the
10 licensee, the chief administrative officer or any other person in charge of the institution
11 refuses to permit the Department, its employees or agents the right to inspect its
12 premises as provided in section 36-424, subsection B, such action shall be deemed
13 reasonable cause to believe that a substantial violation exists.” 1971 Ariz. Sess. Laws,
14 Ch. 196 § 2 (1st Reg. Sess.) Thus, the Legislature not only found it necessary to include
15 the obligation of a licensed health care institution to permit immediate access, it also
16 found it crucial to put into place the presumption of harm should the licensee refuse
17 access to the Department. The fact that the statutory language has remained identical
18 since 1971 is fundamental. Appellants’ analysis, therefore, collapses.

19 In support of their argument, Appellants also refer to other categories of facilities
20 – child care facilities, child care group homes, clinical laboratories and medical
21 marijuana dispensaries – licensed by the Department that have “unannounced
22 inspection” language included in statute. Motion at 4. However, these facilities are *not*
23 health care institutions and this comparison has no effect regarding the legislative history
24 and purpose of A.R.S. title 36, chapter 4.

25 It is evident when performing a historical review of the statutory scheme
26 governing health care institution licensing that the Legislature did not seek to limit the
27
28

EXHIBIT 1

1 Department's ability to conduct unannounced inspections. In fact, it reveals the
2 opposite. The Motion fails and must be denied.

3 **D. Appellants Were Required to Provide Complete Acquiescence and Allow** 4 **the Department Access for the Annual Compliance Inspection.**

5 Appellants' Motion relies on the presumption that, despite their health care
6 institution licenses, they do not have to provide complete acquiescence to the
7 Department. Motion at 3-4. In fact, they theorize that it is *the Department* that should
8 "wait for the provider to return home" or "return later" or "ask the provider when they
9 would be home" in order to inspect the homes. Motion at 4. This is absurd.

10 A licensee is *required* to provide complete acquiescence to ADHS for an
11 inspection. The statute places the responsibility on the licensee because "[a]ny
12 application for licensure under this chapter constitutes permission for and complete
13 acquiescence in any entry or inspection of the premises during the pendency of the
14 application and, if licensed, during the term of the license." A.R.S. § 36-424(C).
15 Moreover, as discussed previously, the Department is *required* to inspect health care
16 institutions annually. A.R.S. § 36-425(K). In fact, the statutory scheme A.R.S. title 36,
17 chapter 4 places no limit on the manner in which the Department can conduct health care
18 institution compliance inspections.⁶

19 Further, unannounced inspections are necessary in ensuring health care
20 institutions comply with the rules and regulations that are aimed at protecting the health,
21 safety, and wellness of the public. Providing notice to a licensee, including scheduling
22 inspections, impedes the Department's obligation to ensure compliance with rules and
23 regulations. "If an inspection is to be effective and serve as a credible deterrent,
24 unannounced, even frequent, inspections are essential. The prerequisite of a warrant
25 could easily frustrate inspection. *Donovan v. Dewey*, 452 U.S. 594, 603 (1981) (citing

26 ⁶ As noted previously, there are exemptions to the requirement of the annual compliance
27 inspection in A.R.S. § 36-424(B), however this does not have any affect on the requirement that
28 a licensee permit access and acquiescence to the Department by virtue of licensure.

EXHIBIT 1

1 *United States v. Biswell*, 406 U.S. 311, 316 (1972)) (holding that the substantial
2 government interest in improving the health and safety conditions in mines warrants
3 unannounced inspections). In fact, unannounced, on-site inspections are essential to the
4 regulation of health care institutions. In *Blue v. Koren*, 72 F.3d 1075, 1079 (2d Cir.
5 1995) the Second Circuit Court of Appeals applied the standard for warrantless
6 administrative searches to inspections of health care institution regulated by Medicare
7 and Medicaid:

8 Whether a warrantless inspection or search of commercial
9 premises is reasonable turns on: (i) whether there is a
10 ‘substantial government interest’ that informs the regulatory
11 scheme underlying the inspection or search; (ii) whether the
12 inspection or search is necessary to further the regulatory
13 scheme; and (iii) whether the scheme provides a substitute
14 for a warrant by alerting the owner to the likelihood of such
15 inspections and by limiting the discretion of the inspecting
16 officials.

17 *Id.* (citing *New York v. Burger*, 482 U.S. 691, 702–03 (1987)). The Court stated that
18 “[w]ith regard to the substantiality of the government interest in the state and federal
19 regulation of nursing homes, it can hardly be doubted that the interest is of the highest
20 order.” *Id.* The Court also concluded that “[u]nannounced, on-site inspections are thus
21 essential to the regulatory scheme.” *Id.*

22 The objective of an inspection by the Department is to determine a licensee’s
23 compliance with statute and rule that ensure health care institutions are complying with
24 health and safety standards. Thus, the statutory scheme requires all health care
25 institutions to permit complete access to ADHS for inspection at any time. There is no
26 provision in law that would provide for the Department to, as suggested by Appellants,
27 make an appointment or return at the convenience of [REDACTED] or [REDACTED] or inspect at
28 the invitation of these licensees.

EXHIBIT 1

E. Appellants Failure to Provide Complete Acquiescence is Refusal to Permit Access for Inspection.

The Motion⁷ claims that the licensee was “merely away from his home at the time of the unannounced inspection” and that does not equate to a “refusal.” Motion at 6-7. Relying on bankruptcy case citations, Appellants surmise that in order for the Department to apply the presumption in A.R.S. § 36-427(B), the refusal must be intentional. They are wrong.

Refusing to provide complete acquiescence to a Department inspection is deemed to be reasonable cause to believe that a substantial violation exists pursuant to A.R.S. § 36-427(B). The Department has the authority to revoke the license of any health care institution if its owners, officers, agents, or employees “[h]ave been, are or may continue to be in substantial violation of the requirements for licensure of the [I]nstitution, as a result of which the health or safety of one or more patients or the general public is in immediate danger.” A.R.S. § 36-427(A)(3). The statutes do not support Appellants’ theory that “[b]eing away from home during an unannounced inspection does not and cannot constitute” a refusal to permit the Department the right to inspect. Motion at 6. In fact, the Department *cannot* access a health care institution without adhering to the inspection procedures in A.R.S. § 41-1009 – all of which presume the presence of an individual or individuals who grant the inspector access to the premises for the inspection. Therefore, the *absence* of all persons at the licensed health care institution is a *refusal* “to permit the department or its employees or agents the right to inspect the institution's premises.” Any other interpretation directly contradicts the mandate that the Department presume “substantial violation of the requirements for licensure of the

⁷ Although ██████ has joined in this Motion, this argument is based on the facts underlying the Notice of Intent to Revoke for ██████ Facility. The argument applies similarly to ██████ who was not present to allow access to the ██████ Facility. When the Department contacted “reported that the back up provider was not available either and suggested that the Compliance Officer schedule the inspection for another date.” Ex. C at 2.

EXHIBIT 1

1 institution, as a result of which the health or safety of one or more patients or the general
2 public is in immediate danger.” A.R.S. § 36-427(A)(3) and (C).

3 **F. Appellants Have No Right to Have an Authorized On-Site Representative** 4 **to Accompany the Officer Pursuant to A.R.S. § 41-1009(A)(4) Because** 5 **They Refused Access.**

6 Lastly, the Motion asserts that unannounced compliance inspections are
7 “inconsistent with A.R.S. § 41-1009(A)(4)” and the Department did not afford [REDACTED]
8 [and [REDACTED] the opportunity to have its collaborating health care institution
9 Devereux in attendance. Motion at 6. This argument is nonsensical. The right is
10 triggered only when “[a]n agency inspector, auditor or regulator who *enters any*
11 *premises* of a regulated person for the purpose of conducting an inspection.” A.R.S.
12 §41-1009(A) (emphasis added). It is true that A.R.S. § 41-1009(A)(4) grants a licensee
13 the ability to have “an authorized on-site representative of the regulated person
14 accompanies the agency inspector, auditor or regulator on the premises, except during
15 confidential interviews.” However, the Department was refused access to both the
16 [REDACTED] Facility and the [REDACTED] Facility.⁸ Appellants cannot complain about rights to
17 which they were not entitled based on their own refusal. This argument is another
18 illogical mischaracterization of the licensing and regulatory process by Appellants.

19 **III. CONCLUSION**

20 Appellants requests this tribunal to “order the Department to rescind the unlawful
21 Revocation(s).” Motion at 7. Because this tribunal has no authority to make such an
22 order, the Motion should be denied. Even if the tribunal were persuaded it could grant
23 the relief request, the Motion must also be denied because Appellants misconstrue
24 statute, fail to appropriately analyze legislative intent, and rely on their homemade

25 ⁸ Appellants also aver that the Department “provided no notice, and therefore no opportunity to
26 attend, to [REDACTED]’s Collaborating Health Care Institution, Devereux.” Motion at 6. The rights
27 afforded to licensees under A.R.S. § 41-1009 are the licensees – [REDACTED] and [REDACTED] – not
28 Devereux. The notion that the Department owes [REDACTED] [REDACTED] and Devereux the right to
pre-schedule a compliance inspection is nonsensical and reveals the conflict inherent in the role
Devereux plays in these matters.

EXHIBIT 1

1 interpretation of the authority of the Department to inspect their licensed health care
2 institutions.

16 Appellants.

Case No.: 2025-BBHL-0133-DHS
2025-BBHL-0153-DHS

ADHS’ RESPONSE AND OBJECTION TO APPELLANTS’ MOTION TO CONTINUE

(Honorable Sondra Vanella)

17
18 Pursuant to Arizona Administrative Code (“A.A.C.”) R2-19-106(D) and -110, the
19 Arizona Department of Health Services (“Department”) responds and objects to the
20 Motion to Continue filed on April 6, 2024 (“Motion”) by [REDACTED]
21 and [REDACTED] [REDACTED] [REDACTED] (collectively “Appellants”) and non-party
22 Devereux Advanced Behavioral Health Arizona (“Devereux”).¹ The Motion presents no
23 valid basis to further delay the hearing and should therefore be denied.

24 Appellants are seeking a ninety-day (90-day) continuance of the hearing in these
25 consolidated matters currently set for June 16-19, 2025, based on a petition filed by
26 Devereux (“Devereux Petition”) before the Governor’s Regulatory Review Council

27 ¹ Devereux is not a party to either of these matters and has not sought permission to intervene.
28

EXHIBIT 2

1 (“GRRC”). *See* Appellants’ February 27, 2025 Status Update at 8-12. The Devereux
2 Petition seeks consideration, pursuant to Arizona Revised Statute (“A.R.S.”) § 41-
3 1033(G), of Devereux’s theory as it pertains to the inspection of Adult Behavioral Health
4 Therapeutic Homes (“ABHTHs”) and whether the Department’s application of A.R.S. §
5 36-427 is appropriate. However, the Devereux Petition is not an adequate basis upon
6 which to delay the hearing for the license revocations for ██████ and ██████. While
7 it is possible that before June 16th, GRRC may issue some determination based on the
8 Devereux Petition, a decision by GRRC pursuant to A.R.S. § 41-1033(K) is not an
9 injunction, a declaratory judgment, or other form of court order that would serve as
10 precedent for this tribunal. It is unclear at this time, and certainly before there is any
11 definitive outcome from GRRC, in what manner this might affect these cases, if at all.
12 *See* A.R.S. §§ 41-1033(K) and (L). To delay the ██████ and ██████ hearing based on
13 an unknown outcome of the Devereux Petition would be unnecessary and unsupported.
14 *See* A.A.C. R2-19-110(D).

15 Importantly, ADHS is charged with the power and duty to protect the health of
16 the people of Arizona. *See* A.R.S. § 36-132(A)(1). The nature of the violations outlined
17 in the Notice of Intent to Revoke necessitate that the Department move forward with the
18 revocation actions at issue to reach a resolution. The facts in these matters indicate that
19 the Department was refused entry for inspection into the licensed ABHTHs operated by
20 ██████ and ██████ rendering the presumption that they were both operating out of
21 compliance with the statutes and rules aimed at ensuring the health and safety of their
22 residents. These ABHTHs are still operating and can still be providing services. Delay
23 on this presumptive legal basis is not warranted and thus should not be granted.

Attachment 1

| Citation | Subject Matter | Relevant Text |
|-----------------------------------|--|---|
| ARS §36-424(A) | HCI Substantial Compliance Inspection | [T]he director shall inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant and the health care institution are in substantial compliance with the requirements of this chapter and the rules established pursuant to this chapter |
| ARS §36-424(C) | HCI Reasonable-cause, Reasonable - time Complaint Inspection | On a determination by the director that there is reasonable cause to believe a health care institution is not adhering to the licensing requirements of this chapter, the director and any duly designated employee or agent of the director, including county health representatives and county or municipal fire inspectors, consistent with standard medical practices, may enter on and into the premises of any health care institution that is licensed or required to be licensed pursuant to this chapter at any reasonable time for the purpose of determining the state of compliance with this chapter, the rules adopted pursuant to this chapter and local fire ordinances or rules. Any application for licensure under this chapter constitutes permission for and complete acquiescence in any entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. |
| <i>Repealed</i> ARS §36-424(E) | HCI Local Agency Inspections | The department shall contract with authorized local agencies applying for such contracts to permit the authorized local agencies or their advisory committees to conduct <i>unannounced inspections</i> of nursing care institutions and residential care institutions which are located in the planning areas of the authorized local agencies. <i>The inspections shall be conducted, in addition to the inspections performed by the department pursuant to this chapter, to evaluate the quality of care provided at nursing care institutions and residential care institutions.</i> An authorized local agency may use its own employees or may use volunteers to conduct the inspections. Upon completion of an inspection the authorized local agency shall notify the department of its findings and may report its findings at a public hearing conducted by the agency in accordance with title 41, chapter 6. |
| ARS §36-425(A) | HCI Initial Inspection | On receipt of a properly completed application for a health care institution license, the director shall conduct an inspection of the health care institution as prescribed by this chapter. |
| ARS §36-425(D) | HCI Annual Inspection | Except as provided in section 36-424, subsection B and subsection E of this section, the department shall conduct a compliance inspection of a health care institution to determine compliance with this chapter and rules adopted pursuant to this chapter at least once annually. |

Attachment 1

| | | |
|-------------------|--|---|
| ARS §36-427(B) | HCI Refusal of a ARS §36-424 Inspection | If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department or its employees or agents the right to inspect the institution's premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists. |
| ARS §36-885(B) | Child Care Facility Inspections | The department shall visit each child care facility as often as necessary to assure continued compliance with this article and department rules. The department shall make at least one <i>unannounced</i> visit annually. |
| ARS §36-2806(H) | Medical Marijuana Dispensary Inspections | Registered nonprofit medical marijuana dispensaries are subject to reasonable inspection by the department. The department may visit and inspect a nonprofit medical marijuana dispensary at any time during regular hours of operation as necessary to determine whether the dispensary complies with this chapter and the rules adopted pursuant to this chapter. The department shall make at least one <i>unannounced</i> visit annually to each nonprofit medical marijuana dispensary that is registered pursuant to this chapter. |
| ARS §36-897.05(B) | Child Care Group Home Inspections | The department shall visit each child care group home as often as necessary to assure continued compliance with this article and the rules adopted pursuant to this article. At least one <i>unannounced</i> visit shall be made annually. |
| ARS §3-267 | Department of Agriculture's Fertilizer Inspections | The director, who may act through an authorized agent, shall sample, inspect and make analyses of fertilizer materials distributed within the state at <i>such time and place and to such an extent as the director deems necessary</i> to determine whether or not such fertilizer materials are in compliance with the provisions of this article. |
| ARS §36-463.02(A) | Clinical Laboratory Compliance Inspections | The department may inspect the premises and operations of a clinical laboratory subject to licensure pursuant to this article to study and evaluate the operation, supervision and procedures of that facility to determine if it is in substantial compliance with this article and rules adopted pursuant to this article. Inspections may be <i>unannounced</i> and shall take place during regular working hours. |
| ARS §36-463.02(D) | Clinical Laboratory Reasonable-cause, Reasonable - time Complaint Inspection | If the director has reasonable cause to believe that a licensed or unlicensed laboratory or a laboratory requesting licensure is not in substantial compliance with the licensing requirements established pursuant to this article, the director may make <i>announced or unannounced</i> on-site inspections of the laboratory at any reasonable time to determine compliance. |

To Whom It May Concern,

Subject: Collaborative Solutions for Supporting Adults in Therapeutic Foster Care

We are writing to share our collective commitment to ensuring the continued success of adult therapeutic foster care services, which play an indispensable role in Arizona's system of care for individuals with serious mental illness. Adult therapeutic foster care is a service that provides a safe, caring, family-like environment proven to reduce hospitalizations and increase stability for adults living with serious mental illness. This is only possible due to the unique commitment to the whole-person healthcare offered by adult therapeutic foster care providers to adults living with serious mental illness. This commitment includes a need for Adult Behavioral Health Therapeutic Homes (ABHTH) providers to be away from home for various purposes, including serving individuals by assisting with transportation, medical appointments, and other essential services.

In Arizona, homes that provide adult therapeutic foster care are licensed by the Arizona Department of Health Services (ADHS) as Adult Behavioral Health Therapeutic Homes (ABHTHs). Currently, ADHS inspection processes are not performed in a manner that is consistent with the nature of ABHTH services. Rigidity around unannounced visits during suboptimal hours and the related enforcement actions by ADHS threaten to displace individuals living with serious mental illness from their homes.

We respectfully urge ADHS to reconsider revocation of ABHTH licenses or other enforcement action based solely on ABHTH providers being away from their homes during unscheduled inspections conducted during hours when ABHTH homes are most likely to be vacant. These actions by ADHS, while convenient with ADHS's schedule and intended to ensure accountability, in actual practice, knowingly conflict with ABHTH schedules and risk disruptions to individual care and placement. Furthermore, the current practice of revoking licenses for not being home during daytime hours threatens the overall system's capacity to provide high-quality residential care in actual family settings – a best practice.

We believe there is opportunity for collaboration between ADHS, AHCCCS, MCOs, ABHTH providers and other stakeholders to develop solutions that balance oversight with the operational realities of therapeutic foster care. As examples, ADHS could implement an inspection process that considers the nature of ABHTH services by allowing ABHTHs, like other health care institutions, to provide administrative hours when they will be home so ADHS can conduct inspections at those times, or ADHS could schedule inspections so ABHTHs can ensure the inspection times do not conflict with needs outside the home. By working together, we can uphold the integrity of ABHTH services while maintaining the stability and continuity that individuals and their families deserve and depend upon.

Thank you for your attention to this critical matter. We hope to see a solution that allows providers to continue their invaluable work without jeopardizing the services that so many Arizonans depend on.

Sincerely,

Subject: Collaborative Solutions Supporting Adults in Therapeutic Foster Care

Dear Director Jennifer Cunico and Assistant Director Thomas Sallow,

We write to express our collective commitment to ensuring the continued success of adult therapeutic foster care services, a cornerstone of Arizona's behavioral health system for individuals with serious mental illness. These services offer safe, nurturing, family-like environments that demonstrably reduce hospitalizations and promote stability for adults living with serious mental illness. This success hinges on the extraordinary dedication of Adult Behavioral Health Therapeutic Homes (ABHTH) providers, who deliver whole-person care by meeting essential needs, such as transportation to medical appointments and facilitating critical services, all of which require the adult provider to be away from the home at various times.

Adult therapeutic foster care homes in Arizona are licensed by the Arizona Department of Health Services (ADHS). However, the current inspection processes implemented by ADHS do not adequately account for the unique nature of ABHTH operations. Specifically, unannounced visits during suboptimal hours—when providers are understandably away fulfilling their caregiving responsibilities—have resulted in enforcement actions, including the revocation of licenses. Such measures risk destabilizing the lives of individuals with serious mental illness and undermining a vital component of Arizona's care system.

We respectfully urge ADHS to reconsider revocations or enforcement actions that arise solely from providers not being present during inspections conducted at times when homes are commonly unoccupied, due to providing client care. While we recognize the importance of accountability, these practices unintentionally conflict with the operational realities of ABHTHs and jeopardize the stability of care for vulnerable individuals. The current approach threatens the systems' overall capacity and erodes the ability to deliver high-quality residential care within a family setting which is widely recognized as a best practice in therapeutic care.

We believe this challenge presents an opportunity for meaningful collaboration. ADHS, together with AHCCCS, managed care organizations (MCOs), ABHTH providers, and other stakeholders, can craft solutions that balance robust oversight with the practical demands of therapeutic foster care. Potential solutions include:

- **Structured Administrative Hours:** Allowing providers to designate times when they are available for inspections, similar to other healthcare institutions.
- **Scheduled Inspections:** Offering advance notice to providers so they can ensure their availability without disrupting critical caregiving duties.

By implementing such strategies, we can uphold the integrity of ABHTH services while preserving the continuity and quality of care that Arizonans with serious mental illness depend on.

We are confident that by working together, we can address these challenges and strengthen the therapeutic foster care system for the benefit of individuals, families, and the broader community. Thank you for your attention to this urgent matter, and we welcome the opportunity to engage in dialogue to explore and implement these solutions.

Sincerely,

A handwritten signature in cursive script that reads "Candy Espino".

Candy Espino, President & CEO
Arizona Council of Human Service Providers

36-424. Inspections; suspension or revocation of license; report to board of examiners of nursing care institution administrators and assisted living facility managers

A. Except as provided in subsection B of this section, the director shall inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant and the health care institution are in substantial compliance with the requirements of this chapter and the rules established pursuant to this chapter. The director may prescribe rules regarding department background investigations into an applicant's character and qualifications.

B. The director may accept proof that a health care institution is an accredited hospital or is an accredited health care institution in lieu of all compliance inspections required by this chapter if the director receives a copy of the health care institution's accreditation report for the licensure period and the health care institution is accredited by an independent, nonprofit accrediting organization approved by the secretary of the United States department of health and human services. If the health care institution's accreditation report is not valid for the entire licensure period, the department may conduct a compliance inspection of the health care institution during the time period the department does not have a valid accreditation report for the health care institution. For the purposes of this subsection, each licensed premises of a health care institution must have its own accreditation report. The director may not accept an accreditation report in lieu of a compliance inspection of:

1. An intermediate care facility for individuals with intellectual disabilities.
2. A nursing-supported group home.
3. A health care institution if the health care institution has been subject to an enforcement action pursuant to section 36-427 or 36-431.01 within the year preceding the annual licensing fee anniversary date.

C. On a determination by the director that there is reasonable cause to believe a health care institution is not adhering to the licensing requirements of this chapter, the director and any duly designated employee or agent of the director, including county health representatives and county or municipal fire inspectors, consistent with standard medical practices, may enter on and into the premises of any health care institution that is licensed or required to be licensed pursuant to this chapter at any reasonable time for the purpose of determining the state of compliance with this chapter, the rules adopted pursuant to this chapter and local fire ordinances or rules. Any application for licensure under this chapter constitutes permission for and complete acquiescence in any entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. If an inspection reveals that the health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director may take action authorized by this chapter. Any health care institution, including an accredited hospital, whose license has been suspended or revoked in accordance with this section is subject to inspection on application for relicensure or reinstatement of license.

D. The director shall immediately report to the board of examiners of nursing care institution administrators and assisted living facility managers information identifying that a nursing care institution administrator's conduct may be grounds for disciplinary action pursuant to section 36-446.07.

36-427. Suspension or revocation; intermediate sanctions

A. The director, pursuant to title 41, chapter 6, article 10, may suspend or revoke, in whole or in part, the license of any health care institution if its owners, officers, agents or employees:

1. Violate this chapter or the rules of the department adopted pursuant to this chapter.
2. Knowingly aid, permit or abet the commission of any crime involving medical and health-related services.
3. Have been, are or may continue to be in substantial violation of the requirements for licensure of the institution, as a result of which the health or safety of one or more patients or the general public is in immediate danger.
4. Fail to comply with section 36-2901.08.
5. Violate section 36-2302.

B. If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department or its employees or agents the right to inspect the institution's premises as provided in section 36-424, such action shall be deemed reasonable cause to believe that a substantial violation under subsection A, paragraph 3 of this section exists.

C. If the director reasonably believes that a violation of subsection A, paragraph 3 of this section has occurred and that life or safety of patients will be immediately affected, the director, on written notice to the licensee, may order the immediate restriction of admissions or readmissions, selected transfer of patients out of the facility, reduction of capacity and termination of specific services, procedures, practices or facilities.

D. The director may rescind, in whole or in part, sanctions imposed pursuant to this section on correction of the violation or violations for which the sanctions were imposed.

Text

Be it enacted by the Legislature of the State of Arizona:

Section 1. [Section 36-401, Arizona Revised Statutes](#), is amended to read:

36-401. Definitions

[D> A. <D] In this chapter, unless the context otherwise requires:

1. "Accredited hospital" means a hospital currently accredited by a nationally recognized commission on hospital accreditation.
2. "Adaptive services" means medical services provided on an outpatient basis.

3. "Adult day health care facility" means a facility providing adult day health services during a portion of a continuous twenty-four hour period for compensation on a regular basis for five or more adults not related to the proprietor.

4. "Adult day health services" means a program that provides planned care supervision and activities, personal care, personal living skills training, meals and health monitoring in a group setting during a portion of a continuous twenty-four hour period. Adult day health services may also include preventive, therapeutic and restorative health related services that do not include behavioral health services.

5. "Adult foster care" means a residential setting which provides room and board, personal care, transportation, respite, habilitation and supervision for one to four adults in a family environment who are eligible for participation in the Arizona long-term care system pursuant to chapter 29, article 2 of this title.

6. "Ambulatory person" means any individual, including one who uses a cane or other ambulatory support device, who is physically and mentally capable under emergency conditions of finding a way to safety without assistance.

[D] 7. "Authorized local agency" means either: **<D]**

[D] (a) A local health planning agency which is a public regional planning body with a governing board composed of a majority of elected officials of units of general local government who represents consumers of health care, which appoints a governing care body recognized by the department of health services. **<D]**

[D] (b) A nonprofit private corporation or single unit of general local government if such agency has been established in a geographic region determined to reflect unusual or highly unusual circumstances as provided in section 1511 of the federal public health service act. **<D]**

[D] 8. **<D]** 7. "Capital expenditure" means the acquisition by lease or purchase of a capital asset in the nature of buildings, fixtures or durable equipment.

[D] 9. **<D]** 8. "Construction" means the building, erection, fabrication, or installation of a health care institution or facilities therefor.

[D] 10. **<D]** 9. "Continuous" means available at all times without cessation, break or interruption.

[D] 11. **<D]** 10. "Department" means the department of health services.

[D] 12. **<D]** 11. "Direction" means authoritative policy or procedural guidance for the accomplishment of a function or activity.

[D] 13. **<D]** 12. "Director" means the director of the department of health services.

[D] 14. "Emergency need" means a condition which presents an immediate threat to the public health, safety or welfare of the patients who would be served and makes it impracticable, unnecessary or contrary to the public interest to conduct the regular certificate of need application review process. **<D]**

[D] 15. **<D]** 13. "Facilities" means buildings or capital equipment used by a health care institution for providing any of the types of services as defined in this chapter.

[D] 16. **<D]** 14. "Governing authority" means the individual, agency, group or corporation, appointed, elected or otherwise designated, in which the ultimate responsibility and authority for the conduct of the health care institution is vested.

[D] 17. **<D]** 15. "Habilitation" means the provision of physical therapy, occupational therapy, speech or audiology services or training in independent living, special developmental skills, sensory-motor development, behavior intervention, orientation and mobility.

1989 Ariz. SB 1355

[D] 18. [D] 16. "Health care institution" means every place, institution, building or agency, whether organized for profit or not, which provides facilities with medical services, nursing services, health screening services, other health-related services or supervisory care services and includes home health agencies as defined in [section 36-151](#) and hospice service agencies.

[D] 19. [D] 17. "Health-related services" means services, other than medical, pertaining to general supervision, protective, preventive and personal care services or supervisory care services.

[D] 20. [D] 18. "Health screening services" means the acquisition, analysis and delivery of health-related data of individuals to aid in the determination of the need for medical services.

[D] 21. [D] 19. "Hospice" means a hospice service agency or the provision of hospice services in an inpatient facility.

[D] 22. [D] 20. "Hospice service" means a program of palliative and supportive care for terminally ill persons and their families or caregivers.

[D] 23. [D] 21. "Hospice service agency" means an agency or organization, or a subdivision of that agency or organization, which is engaged in providing hospice services at the place of residence of its clients.

[D] 24. [D] 22. "Inpatient beds" or "resident beds" means accommodations with supporting services, such as food, laundry and housekeeping, for patients or residents who generally stay in excess of twenty-four hours.

[D] 25. [D] 23. "Medical services" means the services pertaining to medical care that are performed at the direction of a physician on behalf of patients by physicians, dentists, nurses and other professional and technical personnel.

[D] 26. [D] 24. "Modification" means the substantial improvement, enlargement, reduction, moving or alteration of, addition to, or other change in a health care institution or its facilities or in the services provided by such an institution.

[D] 27. [D] 25. "Nonproprietary institution" means any health care institution organized and operated exclusively for charitable purposes, no part of the net earnings of which inures to the benefit of any private shareholder or individual, or operated by the state or any political subdivision of the state.

[D] 28. [D] 26. "Nursing care institution" means a health care institution providing inpatient beds or resident beds and nursing services to persons who need nursing services on a continuing basis but who do not require hospital care or direct daily care from a physician.

[D] 29. [D] 27. "Nursing services" means those services pertaining to the curative, restorative and preventive aspects of nursing care that are performed at the direction of a physician by or under the supervision of a registered nurse licensed in this state.

[D] 30. [D] 28. "Organized medical staff" means a formal organization of physicians, and dentists where appropriate, with the delegated authority and responsibility to maintain proper standards of medical care and to plan for continued betterment of that care.

[D] 31. [D] 29. "Outpatient surgical center" means a type of health care institution with facilities and limited hospital services for the diagnosis or treatment of patients by surgery whose recovery, in the concurring opinions of the surgeon and the anesthesiologist, does not require inpatient care.

[D] 32. [D] 30. "Personal care services" means assistance with eating, bathing and dressing for individuals who are in need of a protective environment.

[D] 33. [D] 31. "Physician" means any person licensed under the provisions of title 32, chapter 13 or 17.

[D> 34. <D] 32. "Residential care institution" means a health care institution other than a hospital or a nursing care institution which provides resident beds and health-related services for persons who do not need inpatient nursing care.

[D> 35. <D] 33. "Respite care services" means services provided by a licensed health care institution to persons otherwise cared for in foster homes and in private homes to provide an interval of rest or relief of not more than thirty days to operators of foster homes or to family members.

[D> 36. <D] 34. "State plan" means the plan for construction and modernization of health care institutions formulated by the department as a part of the state comprehensive health plan. **<D]**

[D> 37. <D] 34. "Supervision" means direct overseeing and inspection of the act of accomplishing a function or activity.

[D> 38. <D] 35. "Supervisory care home" means a residential care institution which **[D>** provides only supervisory care services to more than **<D]** **[A> HAS <A]** five **[A> OR MORE <A]** ambulatory persons **[A> WHO REQUIRE SUPERVISORY CARE SERVICES AND WHO ARE <A]** unrelated to the administrator or owner of such home.

[D> 39. <D] 36. "Supervisory care services" means accommodation, board and general supervision, including assistance to persons in the self-administration of prescribed medications.

[D> B. Where there is no authorized local agency as defined in subsection A the state health planning advisory council shall serve as the authorized local agency. **<D]**

Sec. 2. [Section 36-405, Arizona Revised Statutes](#), is amended to read:

36-405. Powers and duties of the director

A. The director shall adopt**[D>** , repeal and amend reasonable **<D]** rules **[D>** and regulations **<D]** which shall establish minimum standards and requirements for the construction, modification and licensure of health care institutions necessary to assure the public health, safety and welfare. The standards and requirements shall relate to the construction, equipment, sanitation, staffing for medical, nursing and personal care services, and record keeping pertaining to the administration of medical, nursing and personal care services, in accordance with generally accepted practices of health care. The director shall use the current standards adopted by the joint commission on accreditation of hospitals and the commission on accreditation of the American osteopathic association, as guidelines in prescribing minimum standards and requirements under this section.

[D> B. The director shall, by regulation, establish a health care institution classification for nursing care institutions, with subclassifications including, but not limited to, skilled nursing facilities, intermediate care facilities and personal care facilities. Such regulations shall provide for the number, type and scope of nursing services, other supportive services and standards of patient care required for each subclass of institution. **<D]**

[D> C. <D] B. The director may, by **[D>** regulation **<D]** **[A> RULE, <A]** classify and subclassify **[D>** other **<D]** health care institutions according to character, size, range of services provided, medical or dental specialty offered, duration of care and standard of patient care required for the purposes of licensure. Classes of health care institutions may include but not be limited to hospitals, infirmaries, outpatient treatment centers, health screening services centers and residential care facilities. Whenever the director reasonably deems distinctions in **[D>** regulations **<D]** **[A> RULES <A]** and standards to be appropriate among different classes or subclasses of health care institutions the director may make such distinctions.

C. **[A> THE DIRECTOR SHALL ESTABLISH AND COLLECT THE FOLLOWING FEES FOR HEALTH CARE INSTITUTIONS: <A]**

1. **[A> NONREFUNDABLE FEES NOT TO EXCEED THE FOLLOWING AMOUNTS: <A]**

- (a) **[A>** FOR A PERMIT, TWENTY-FIVE DOLLARS. **<A]**
- (b) **[A>** FOR AN APPLICATION, FIFTY DOLLARS. **<A]**
2. **[A>** ARCHITECTURAL DRAWING REVIEW FEES NOT TO EXCEED THE FOLLOWING AMOUNTS: **<A]**
- (a) **[A>** FOR A PROJECT WITH A COST UNDER ONE HUNDRED THOUSAND DOLLARS, FIFTY DOLLARS. **<A]**
- (b) **[A>** FOR A PROJECT WITH A COST OF MORE THAN ONE HUNDRED THOUSAND DOLLARS AND LESS THAN FIVE HUNDRED THOUSAND DOLLARS, ONE HUNDRED DOLLARS. **<A]**
- (c) **[A>** FOR A PROJECT WITH A COST OF FIVE HUNDRED THOUSAND DOLLARS OR MORE, ONE HUNDRED FIFTY DOLLARS. **<A]**
3. **[A>** LICENSE FEES, WHICH MUST BE PAID ANNUALLY, NOT TO EXCEED THE FOLLOWING AMOUNTS: **<A]**
- (a) **[A>** FOR A FACILITY WITH NO BEDS, ONE HUNDRED DOLLARS. **<A]**
- (b) **[A>** FOR A FACILITY WITH ONE TO FIFTY-NINE BEDS, ONE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**
- (c) **[A>** FOR A FACILITY WITH SIXTY TO NINETY-NINE BEDS, TWO HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**
- (d) **[A>** FOR A FACILITY WITH ONE HUNDRED TO ONE HUNDRED FORTY-NINE BEDS, THREE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**
- (e) **[A>** FOR A FACILITY WITH ONE HUNDRED FIFTY BEDS OR MORE, FIVE HUNDRED DOLLARS, PLUS AN ADDITIONAL TEN DOLLARS PER BED. **<A]**

Sec. 3. Repeal

Sections 36-421.01 and 36-447.18, Arizona Revised Statutes, are repealed.

Sec. 4. Section 36-421.02, Arizona Revised Statutes, is amended to read:

36-421.02. Outpatient behavioral health service agencies; licensure; exception

A. If an outpatient behavioral health service agency is licensed pursuant to this chapter, the department shall not license such agency's outpatient behavioral health service facilities as defined by [section 36-401\[D>](#) , subsection A **<D]**.

B. This section does not apply to residential or day treatment facilities provided for in [section 36-550.05](#).

Sec. 5. [Section 36-422, Arizona Revised Statutes](#), is amended to read:

36-422. Application for license

A. Any person who desires to obtain a license under this chapter for operation of a health care institution shall file with the department an application on a form prescribed, prepared and furnished by the department. The application shall contain the following:

1. The name and location of the health care institution.

1989 Ariz. SB 1355

2. Whether it is to be operated as a proprietary or nonproprietary institution.
 3. The name of the governing authority, and, if other than an individual, the names of the persons having its control. The applicant shall be the governing authority having the operative ownership of, or the governmental agency charged with the administration of, the health care institution sought to be licensed.
 4. The class or subclass of health care institution to be established or operated.
 5. The types and extent of the health care services to be provided, including emergency services, community health services and services to indigent patients.
 6. The name and qualifications of the chief administrative officer implementing direction in that specific health care institution.
 7. **[D> Such <D]** Other pertinent information as may be required by the department for the proper administration of this chapter and department **[D> regulations <D]** **[A> RULES. <A]**
 8. For any health care institution newly constructed, or modified since it was last licensed, a copy of the appropriate permit issued pursuant to [section 36-421](#).
- B. The application shall be signed, in the case of an individual by the owner of the health care institution, or in the case of a partnership or a corporation, by two of the officers thereof, or in the case of a governmental unit, by the head of the governmental department having jurisdiction thereof.
- C. Application for licensure or relicensure shall be filed at least **[D> thirty <D]** **[A> SIXTY <A]** but not more than **[D> sixty <D]** **[A> ONE HUNDRED TWENTY <A]** days prior to anticipated operation or the expiration date of the then current license. Where the operation of any licensed health care institution is intended to be terminated, or where a change of ownership will occur, either during or at the expiration of the term of its license, the department shall be notified at least thirty days in advance.
- D. **[A> IN ADDITION TO THE REQUIREMENTS OF THIS CHAPTER, THE DEPARTMENT MAY PRESCRIBE BY RULE OTHER LICENSURE REQUIREMENTS AND MAY PRESCRIBE PROCEDURES FOR CONDUCTING INVESTIGATIONS INTO AN APPLICANT'S CHARACTER AND QUALIFICATIONS. <A]**

Sec. 6. [Section 36-424, Arizona Revised Statutes](#), is amended to read:

36-424. Inspections; suspension or revocation of license; report to board of examiners of nursing care institution administrators

- A. Every applicant for licensure as a health care institution shall submit to the director a properly completed application for a license accompanied by the necessary fee.
- B. Subject to the limitation prescribed by subsection C of this section, the department shall inspect the premises of the health care institution and investigate the character and other qualifications of the applicant to ascertain whether the applicant is in compliance with the requirements of this chapter and the rules established pursuant to this chapter. **[A> THE DEPARTMENT MAY PRESCRIBE RULES REGARDING DEPARTMENT BACKGROUND INVESTIGATIONS INTO AN APPLICANT'S CHARACTER AND QUALIFICATIONS. <A]**
- C. The director shall accept proof that a health care institution is an accredited hospital in lieu of all licensing inspections required by this chapter if the department receives a copy of the institution's accreditation report.
- D. Upon a determination by the director that there is reasonable cause to believe a health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director and any duly designated employee or agent thereof, including county health representatives and county or municipal fire inspectors, shall, consistent with standard medical practices, have the right to enter upon and into the premises of any health care

institution which is licensed, or required to be licensed, pursuant to this chapter at any reasonable time for the purpose of determining the state of compliance with the provisions of this chapter, the rules of the department adopted pursuant thereto, and local fire ordinances or rules. Any application for licensure under this chapter shall constitute permission for and complete acquiescence in any such entry or inspection of the premises during the pendency of the application and, if licensed, during the term of the license. If an inspection reveals that the health care institution is not adhering to the licensing requirements established pursuant to this chapter, the director may in accordance with [section 36-427](#) suspend or revoke the license of the institution or condition licensure upon corrective action by the health care institution to meet the licensing requirements. Any health care institution, including an accredited hospital, whose license has been suspended or revoked in accordance with this section, is subject to inspection upon application for relicensure or reinstatement of license.

[D] E. The department shall contract with authorized local agencies applying for such contracts to permit the authorized local agencies or their advisory committees to conduct unannounced inspections of nursing care institutions and residential care institutions which are located in the planning areas of the authorized local agencies. The inspections shall be conducted, in addition to the inspections performed by the department pursuant to this chapter, to evaluate the quality of care provided at nursing care institutions and residential care institutions. An authorized local agency may use its own employees or may use volunteers to conduct the inspections. Upon completion of an inspection the authorized local agency shall notify the department of its findings and may report its findings at a public hearing conducted by the agency in accordance with title 41, chapter 6. <D]

[D] F. <D] E. The directors shall immediately report to the board of examiners of nursing care institution administrators information identifying that a nursing care institution administrator's conduct may be grounds for disciplinary action as defined pursuant to [section 36-446.07](#).

Sec. 7. [Section 36-425, Arizona Revised Statutes](#), is amended to read:

36-425. Issuance of license; provisional license; denial of license

A. Upon receipt of a properly completed application and upon finding that the applicant and the health care institution for which the license is sought meet all the requirements of this chapter and the regulations of the department for licensure within one of the classes or subclasses of health care institutions, the director shall issue to the applicant a license. Otherwise he shall deny it.

B. The license shall show the name of the chief administrative officer of that specific health care institution and, except for home health agencies as defined by [section 36-151](#) and nursing care institutions, is valid for one year from the date of issuance. The license shall be conspicuously posted in the reception area of the licensed health care institution.

C. When an inspection or investigation of an applicant or a health care institution reveals a deficiency or deficiencies of a minor nature or of a hazardous but readily correctable nature, and the director has cause to believe that the immediate interests of the patients and of the general public would be served best by affording the institution the opportunity to correct such deficiency or deficiencies, the department shall issue a provisional license for a period of time not to exceed one year, if the applicant agrees to carry out a plan acceptable to the department to eliminate the deficiency or deficiencies within the term of the provisional license. A health care institution shall be relicensed after the expiration of its provisional license only if the licensee has fully corrected all conditions constituting failure to comply with requirements for licensure.

D. A health care institution shall have its license amended immediately at any time there is written notification of a change of the chief administrative officer specified in [section 36-422](#), subsection A, paragraph 6.

E. When the department issues an original regular license or an original provisional license to a health care institution it shall notify the owners and lessees of any agricultural land within one-fourth mile of the health care institution.

F. **[A>** THE DIRECTOR MAY PRESCRIBE BY RULE GROUNDS ON WHICH THE DEPARTMENT MAY DENY A LICENSE. THESE GROUNDS MAY INCLUDE A FINDING THAT THE APPLICANT AND ANYONE IN A BUSINESS RELATIONSHIP WITH THE APPLICANT, INCLUDING STOCKHOLDERS, HAS HAD A LICENSE TO OPERATE A HEALTH CARE INSTITUTION REVOKED OR SUSPENDED OR HAS A LICENSING HISTORY INDICATING RECENT SERIOUS VIOLATIONS WHICH WERE A THREAT TO THE HEALTH AND SAFETY OF THE PERSONS UTILIZING THE HEALTH CARE INSTITUTION. **<A]**

Sec. 8. [Section 36-427, Arizona Revised Statutes](#), is amended to read:

36-427. Suspension or revocation

A. The director may, pursuant to title 41, chapter 6, suspend or revoke the license of any health care institution if its owners, officers, agents or employees:

1. Violate any provision of this chapter or the rules of the department adopted pursuant to this chapter.
2. Knowingly aid, permit or abet the commission of any crime involving medical and health related services.
3. Have been, are or may continue to be in substantial violation of the requirements for licensure of the institution, as a result of which the health or safety of one or more patients or the general public is in immediate danger. If the licensee, the chief administrative officer or any other person in charge of the institution refuses to permit the department, its employees or agents the right to inspect its premises as provided in [section 36-424](#), such action shall be deemed reasonable cause to believe that a substantial violation exists.

B. The director may, if he reasonably believes that a violation of subsection A, paragraph 3 of this section has occurred and that life or safety of patients will be immediately affected, upon written notice to the licensee, order the immediate restriction of admissions, **[A> SELECTED TRANSFER OF PATIENTS OUT OF THE FACILITY, REDUCTION OF CAPACITY <A]** and termination of specific services, procedures, practices or facilities.

Sec. 9. [Section 36-428, Arizona Revised Statutes](#), is amended to read:

36-428. Hearings by the director

A. No license shall be suspended or revoked without affording the licensee notice and opportunity for a hearing as provided for in title 41, chapter 6.

B. Any person whose application for a permit or license has been denied by the director or who has been ordered by the director to restrict admissions, **[A> TRANSFER SELECTED PATIENTS OUT OF THE FACILITY, REDUCE CAPACITY <A]** and terminate specific services, procedures, practices or facilities may, at any time within thirty days after notice of **[D> such <D]** **[A> THE <A]** denial or order, request in writing a hearing before the director, to be held within thirty days following **[D> such <D]** **[A> THE <A]** written request **[D> , <D]** for the purpose of reviewing the action of the director.

C. All hearings shall be in accordance with title 41, chapter 6.

Sec. 10. [Section 36-431, Arizona Revised Statutes](#), is amended to read:

36-431. Violation; classification

A. A person is guilty of a **[D> petty offense <D]** **[A> CLASS 3 MISDEMEANOR <A]** who:

1. Establishes, operates or maintains any class or subclass of health care institution, as defined in this chapter, unless the person holds a current and valid license for such class or subclass from the department.

2. Knowingly violates any provision of this chapter unless another classification is specifically prescribed in this chapter.

B. Each day that a violation continues shall constitute a separate violation.

Sec. 11. [Section 36-435, Arizona Revised Statutes](#), is amended to read:

36-435. Staff privileges for podiatrists

A. The governing board of each health care institution classified by the director as a hospital pursuant to [section 36-405](#), subsection **[D> C <D]** B shall provide for the use of the health care institution by, and staff privileges for, duly licensed podiatrists subject to nondiscriminatory rules and regulations governing the use or privileges established by the governing board and medical staff for persons licensed under title 32, **[D> chapters <D] [A> CHAPTER 7, 13 <A] [D> and <D] [A> OR 17. <A]**

B. This article does not prohibit any health care institution which is a teaching facility owned or operated by a university operating a school of medicine from requiring that any podiatrist have a faculty teaching appointment as a condition for eligibility for staff privileges at the health care institution.

Sec. 12. [Section 36-436, Arizona Revised Statutes](#), is amended to read:

36-436. Filing and review of rates, rules and regulations as prerequisite to operation; findings

A. A new hospital or nursing care institution shall not engage in business within this state until its schedule on rates and charges and rules **[D>** and regulations **<D]** pertaining thereto are filed with and reviewed by the director. The schedules of rates and charges shall be in the form and contain such information as prescribed by the director.

B. The director shall adopt or establish reasonable guidelines for review of rates and charges for hospital or nursing care institutions. Those health care institutions which are classified by the director as hospitals pursuant to [section 36-405](#), subsection **[D> C <D]** B shall use the current edition of the statement on the financial requirements of health care institutions and services, as adopted by the American hospital association, or amended editions thereof if applicable, as a guide for establishing hospital rates and charges. The director shall use, but not be limited to, the statement on the financial requirements of health care institutions and services, as adopted by the American hospital association, as a guide for review of hospital rates and charges.

C. Promptly after the filing of such schedule, the director shall review such schedule and make public his findings. Such findings shall include information on:

1. How the rates and charges relate to the operating income and expenses of the institution.
2. The source and application of funds available to the institution.

Sec. 13. Section 36-447.05, Arizona Revised Statutes, is amended to read:

36-447.05. Delivery of basic medical services at nursing care institutions; restrictions

A. Basic health services shall be provided at a nursing care institution only under the general direction of an attending physician. The administrator shall establish procedures which shall be posted in a place readily accessible to all charge nurses for obtaining medical care when the attending physician is not available and shall arrange for such emergency medical services.

B. The administrator shall require a complete medical history prior to admission and shall also require, within thirty days before or after admission and annually thereafter, a physical examination of each person admitted to a nursing care institution.

C. A person who demonstrates clinical evidence or X-ray evidence of current pulmonary tuberculosis disease shall not be admitted to a nursing care institution.

D. All medications, medical treatment and telephone orders by the physician for laboratory tests and X-rays prescribed by a physician for a patient admitted to a nursing care institution shall be administered by licensed staff only on orders of a physician. Telephone orders from a physician for the administration of medication by licensed medical staff shall be countersigned by the physician and mailed within ten days of the telephone order. **[A]** TELEPHONE ORDERS FOR MEDICATIONS USED AS CHEMICAL RESTRAINTS, INCLUDING ALL CONTROLLED MEDICATIONS USED AS CHEMICAL RESTRAINTS, SHALL BE COUNTERSIGNED BY THE PHYSICIAN WITHIN SEVENTY-TWO HOURS OF THE TELEPHONE ORDER. THE NURSING CARE INSTITUTION SHALL NOT BE CHARGED WITH DEFICIENCIES BY THE DIRECTOR PURSUANT TO [SECTION 36-425](#), SUBSECTION C, IF TELEPHONE ORDERS FOR MEDICATION OR THE ADMINISTRATION OF MEDICATION ARE MAILED TO THE PHYSICIAN FOR COUNTERSIGNATURE BY THE NURSING CARE INSTITUTION WITHIN SEVENTY-TWO HOURS OF THE TELEPHONE ORDER. THE NURSING CARE INSTITUTION SHALL MAINTAIN A RECORD OF THE TELEPHONE ORDERS MAILED TO PHYSICIANS FOR COUNTERSIGNATURE. THE RECORD SHALL BE AVAILABLE TO THE DIRECTOR FOR INSPECTION. **<A]**

E. Each nursing care institution shall report changes in the medical condition of a patient to the patient's attending physician.

F. Each nursing care institution:

1. Is subject to periodic inspection by department personnel.
2. Shall make available all information and records required to be maintained by the nursing care institution and shall provide necessary assistance and cooperation to department personnel in the inspection of the nursing care institution as required by this chapter.

History

Approved by the Governor June 21, 1989

Filed in the Office of the Secretary of State June 21, 1989

ARIZONA ADVANCE LEGISLATIVE SERVICE

41-1033. Petition for a rule or review of an agency practice, substantive policy statement, final rule or unduly burdensome licensing requirement; notice

A. Any person may petition an agency to do either of the following:

1. Make, amend or repeal a final rule.
2. Review an existing agency practice or substantive policy statement that the petitioner alleges to constitute a rule.

B. An agency shall prescribe the form of the petition and the procedures for the petition's submission, consideration and disposition. The person shall state on the petition the rulemaking to review or the agency practice or substantive policy statement to consider revising, repealing or making into a rule.

C. Not later than sixty days after submission of the petition, the agency shall either:

1. Reject the petition and state its reasons in writing for rejection to the petitioner.
2. Initiate rulemaking proceedings in accordance with this chapter.
3. If otherwise lawful, make a rule.

D. The agency's response to the petition is open to public inspection.

E. If an agency rejects a petition pursuant to subsection C of this section, the petitioner has thirty days to appeal to the council to review whether the existing agency practice or substantive policy statement constitutes a rule. The petitioner's appeal may not be more than five double-spaced pages.

F. A person may petition the council to request a review of a final rule based on the person's belief that the final rule does not meet the requirements prescribed in section 41-1030. A petition submitted under this subsection may not be more than five double-spaced pages.

G. A person may petition the council to request a review of an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement that the petitioner alleges is not specifically authorized by statute, exceeds the agency's statutory authority, is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern. On receipt of a properly submitted petition pursuant to this section, the council shall review the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement as prescribed by this section. A petition submitted under this subsection may not be more than five double-spaced pages. This subsection does not apply to an individual or institution that is subject to title 36, chapter 4, article 10 or chapter 20.

H. If the council receives information that alleges an existing agency practice or substantive policy statement may constitute a rule, that a final rule does not meet the requirements prescribed in section 41-1030 or that an existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or does not meet the guidelines prescribed in subsection G of this section, or if the council receives an appeal under subsection E of this section, and at least three council members request of the chairperson that the matter be heard in a public meeting:

1. Within ninety days after receiving the third council member's request, the council shall determine whether any of the following applies:

- (a) The agency practice or substantive policy statement constitutes a rule.
- (b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

2. Within ten days after receiving the third council member's request, the council shall notify the agency that the matter has been or will be placed on the council's agenda for consideration on the merits.

3. Not later than thirty days after receiving notice from the council, the agency shall submit a statement of not more than five double-spaced pages to the council that addresses whether any of the following applies:

(a) The existing agency practice or substantive policy statement constitutes a rule.

(b) The final rule meets the requirements prescribed in section 41-1030.

(c) An existing agency practice, substantive policy statement, final rule or regulatory licensing requirement exceeds the agency's statutory authority, is not specifically authorized by statute or meets the guidelines prescribed in subsection G of this section.

I. At the hearing, the council shall allocate the petitioner and the agency an equal amount of time for oral comments not including any time spent answering questions raised by council members. The council may also allocate time for members of the public who have an interest in the issue to provide oral comments.

J. For the purposes of subsection H of this section, the council meeting shall not be scheduled until the expiration of the agency response period prescribed in subsection H, paragraph 3 of this section.

K. An agency practice, substantive policy statement, final rule or regulatory licensing requirement considered by the council pursuant to this section shall remain in effect while under consideration of the council. If the council determines that the agency practice, substantive policy statement or regulatory licensing requirement exceeds the agency's statutory authority, is not authorized by statute or constitutes a rule or that the final rule does not meet the requirements prescribed in section 41-1030, the practice, policy statement, rule or regulatory licensing requirement shall be void. If the council determines that the existing agency practice, substantive policy statement, final rule or regulatory licensing requirement is unduly burdensome or is not demonstrated to be necessary to specifically fulfill a public health, safety or welfare concern, the council shall modify, revise or declare void any such existing agency practice, substantive policy statement, final rule or regulatory licensing requirement. If an agency decides to further pursue a practice, substantive policy statement or regulatory licensing requirement that has been declared void or has been modified or revised by the council, the agency may do so only pursuant to a new rulemaking.

L. A council decision pursuant to this section shall be made by a majority of the council members who are present and voting on the issue. Notwithstanding any other law, the council may not base any decision concerning an agency's compliance with the requirements of section 41-1030 in issuing a final rule or substantive policy statement on whether any party or person commented on the rulemaking or substantive policy statement.

M. A decision by the council pursuant to this section is not subject to judicial review, except that, in addition to the procedure prescribed in this section or in lieu of the procedure prescribed in this section, a person may seek declaratory relief pursuant to section 41-1034.

N. Each agency and the secretary of state shall post prominently on their websites notice of an individual's right to petition the council for review pursuant to this section.
