 - a. The owner or operator of a Class I, II, III or VI well permitted under this Article shall establish mechanical integrity prior to commencing injection or on a schedule determined by the Director. Thereafter the owner or operator of Class I, II, and III wells must maintain mechanical integrity as defined in R18-9-B613 and the owner or operator of Class VI wells must maintain mechanical integrity as defined in R18-9-J664.
 - b. When the Director determines that a Class I, II, III or VI well lacks mechanical integrity pursuant to R18-9-B613 or R18-9-J664 for Class VI, written notice of the determination will be given to the owner or operator. Unless the Director requires immediate cessation, the owner or operator shall cease injection into the well within 48 hours of receipt of the Director's determination. The Director may allow plugging of the well pursuant to the requirements of R18-9-B614 or require the permittee to perform such additional construction, operation, monitoring, reporting, and corrective action as is necessary to prevent the movement of fluid into or between USDWs caused by the lack of mechanical integrity. The owner or operator may resume injection upon written notification from the Director that the owner or operator has demonstrated mechanical integrity pursuant to R18-9-B613.
 - c. The Director may allow the owner or operator of a well that lacks mechanical integrity pursuant to R18-9-B613(A)(1) to continue or resume injection, if the owner or operator has made a satisfactory demonstration that there is no movement of fluid into or between USDWs.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-D636. Establishing Permit Conditions

- A. In addition to conditions required in R18-9-D635, the Director shall establish conditions, as required on a case-by-case basis under R18-9-C628 (Permit Duration), R18-9-D637 (Schedules of Compliance), and R18-9-D638 (Requirements for Recording and Reporting Monitoring Results). Permits for owners or operators of Class VI injection wells shall include conditions meeting the requirements of Part J of this Article. Permits for other wells shall contain the following requirements, when applicable.
 1. Construction requirements as set forth in this Article. Existing wells shall achieve compliance with such requirements according to a compliance schedule established as a permit condition. The owner or operator of a proposed new injection well shall submit plans for testing, drilling, and construction as part of the permit application. Except as authorized by an area permit, no construction may commence until a permit has been issued containing construction requirements. New wells shall be in compliance with these requirements prior to commencing injection operations. Changes in construction plans during construction may be approved by the Director as minor modifications as defined under R18-9-C633. No such changes may be physically incorporated into construction of the well prior to approval of the modification by the Director.
 2. Corrective action as set forth in R18-9-D639 and R18-9-J659.
 3. Operation requirements as set forth in this Article; the permit shall establish any maximum injection volumes and/or pressures necessary to assure that fractures are not initiated in the confining zone, that injected fluids do not migrate into any USDW, that formation fluids are not displaced into any USDW, and to assure compliance with the operating requirements under this Article.
 4. Monitoring and reporting requirements as set forth in this Article. The permittee shall be required to identify types of tests and methods used to generate the monitoring data. Monitoring of the nature of injected fluids shall comply with an analytical method prescribed in A.A.C. R9-14-610, or an alternative analytical method approved under A.A.C. R9-14-610(C), or as approved by the Director. A test result from a sample taken to determine compliance with a national primary drinking water standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

5. After a cessation of operations for two years the owner or operator shall plug and abandon the well in accordance with the plan unless they:
 - a. Provide notice to the Director; and
 - b. Describe actions or procedures, satisfactory to the Director, that the owner or operator will take to ensure that the well will not endanger USDWs during the period of temporary abandonment. These actions and procedures shall include compliance with the technical requirements applicable to active injection wells unless waived by the Director.
 6. Financial responsibility.
 - a. The permittee, including the transferor of a permit, is required to demonstrate and maintain financial responsibility and resources to close, plug, and abandon the underground injection operation in a manner prescribed by the Director until:
 - i. The well has been plugged and abandoned in accordance with an approved plugging and abandonment plan pursuant to R18-9-D635(15), R18-9-B614, and R18-9-J667, and submitted a plugging and abandonment report pursuant to R18-9-D635(16); or
 - ii. The well has been converted in compliance with the requirements of R18-9-D635(14); or
 - iii. The transferor of a permit has received notice from the Director that the owner or operator receiving transfer of the permit, the new permittee, has demonstrated financial responsibility for the well.
 - b. The permittee shall show evidence of such financial responsibility to the Director by the submission of a surety bond, or other adequate assurance, such as a financial statement or other materials acceptable to the Director. For Class VI wells, the permittee shall show evidence of such financial responsibility to the Director by the submission of a qualifying instrument, such as a financial statement or other materials acceptable to the Director. The owner or operator of a Class VI well must comply with the financial responsibility requirements set forth in R18-9-J660.
 7. A permit for any Class I, II, III or VI well or injection project that lacks mechanical integrity shall include, and for any Class V well may include, a condition prohibiting injection operations until the permittee shows to the satisfaction of the Director under R18-9-B613 or R18-9-J664 for Class VI, that the well has mechanical integrity.
 8. The Director shall impose on a case-by-case basis such additional conditions as are necessary to prevent the migration of fluids into USDWs.
- B.** In addition to conditions required in all permits, the Director shall establish conditions in permits as required on a case-by-case basis, to provide for and assure compliance with all applicable requirements of this Article. Applicable requirements include, but are not limited to:
1. State statutory or regulatory requirements in effect prior to final administrative disposition of a permit; or
 2. Any requirement in effect prior to the modification or revocation and reissuance of a permit, to the extent allowed under R18-9-C632.
- C. New or reissued permits, and to the extent allowed under R18-9-C632 modified or revoked and reissued permits, shall incorporate each of the applicable requirements referenced in this Section.
 - D. All permit conditions shall be incorporated either expressly or by reference. If incorporated by reference, a specific citation to the applicable regulations or requirements must be given in the permit.
 - E. Permits shall provide language on duration, expiration and termination.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-D637. Compliance Schedule

- A.** A permit may, when appropriate, specify a schedule for compliance with this Article.
1. Any compliance schedules shall require compliance as soon as possible, and in no case later than three years after the effective date of the permit.
 2. Except as provided in subsection (B)(1)(b), if a permit establishes a compliance schedule that exceeds one year from the date of permit issuance, the schedule shall set forth interim requirements and the dates for their achievement.
 - a. The time between interim dates shall not exceed one year.
 - b. If the time necessary for completion of any interim requirement is more than one year and is not readily divisible into stages for completion, the permit shall specify interim dates for the submission of reports of progress toward completion of the interim requirements and indicate a projected completion date.
 3. The permit shall be written to require that if subsection (A)(1) is applicable, progress reports be submitted no later than 30 days following each interim date and the final date of compliance.
- B.** A permit applicant or permittee may cease conducting regulated activities at a given time by plugging and abandonment rather than continue to operate and meet permit requirements as follows:
1. If the permittee decides to cease conducting regulated activities at a given time within the term of a permit which has already been issued:
 - a. The permit may be modified to contain a new or additional schedule leading to timely cessation of activities; or
 - b. The permittee shall cease conducting permitted activities before noncompliance with any interim or final compliance schedule requirement already specified in the permit.
 2. If the decision to cease conducting regulated activities is made before issuance of a permit whose term will include the termination date, the permit shall contain a schedule leading to termination that will ensure timely compliance with the applicable requirements.
 3. If the permittee is undecided whether to cease conducting regulated activities, the Director may issue or modify a permit to contain two schedules as follows:
 - a. Both schedules shall contain an identical interim deadline requiring a final decision on whether to cease conducting regulated activities no later than a date that ensures sufficient time to comply with

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- applicable requirements in a timely manner if the decision is to continue conducting regulated activities;
- b. One schedule shall lead to timely compliance with applicable requirements;
 - c. The second schedule shall lead to cessation of the regulated activities by a date that ensures timely compliance with applicable requirements; and
 - d. Each permit containing two schedules shall include a requirement that after the permittee has made a final decision under subsection (B)(3)(a) it shall follow the schedule leading to compliance if the decision is to continue conducting the regulated activities, and follow the schedule leading to termination if the decision is to cease conducting regulated activities.
4. The applicant's or permittee's decision to cease conducting regulated activities shall be evidenced by a firm public commitment satisfactory to the Director, such as a resolution of the board of Directors of a corporation.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-D638. Requirements for Recording and Reporting Monitoring Results

All permits shall specify:

1. Requirements concerning the proper use, maintenance, and installation, when appropriate, of monitoring equipment or methods, including biological monitoring methods when appropriate;
2. Required monitoring including type, intervals, and frequency sufficient to yield data that are representative of the monitored activity including when appropriate, continuous monitoring; and
3. Applicable reporting requirements based upon the impact of the regulated activity and as specified under this Article. Reporting shall be no less frequent than specified in the above rules.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-D639. Corrective Action

- A. Applicants for Class I, II, or III injection well permits shall identify the location of all known wells within the injection well's area of review that penetrates the injection zone, or in the case of Class II wells operating over the fracture pressure of the injection formation, all known wells within the area of review penetrating formations affected by the increase in pressure. For such wells that are improperly sealed, completed, or abandoned, the applicant shall also submit a plan consisting of such steps or modifications as are necessary to prevent movement of fluid into USDWs. Where the plan is adequate, the Director shall incorporate it into the permit as a condition. Where the Director's review of an application indicates that the permittee's plan is inadequate, the Director shall require the applicant to revise the plan, prescribe a plan for corrective action as a condition of the permit under subsection (B) through (E), or deny the application. The Director may disregard the provisions of R18-9-B612 and this Section when reviewing an application to permit an existing Class II well.

- B. Any permit issued for an existing injection well, other than Class II wells, requiring corrective action shall include a compliance schedule requiring any corrective action accepted or prescribed under subsection (A) to be completed as soon as possible.
- C. No owner or operator of a new injection well may begin injection until all required corrective action has been taken.
- D. The Director may require as a permit condition that injection pressure be so limited that pressure in the injection zone does not exceed hydrostatic pressure at the site of any improperly completed or abandoned well within the area of review. This pressure limitation shall satisfy the corrective action requirement. Alternatively, such injection pressure limitation can be part of a compliance schedule and last until all other required corrective action has been taken.
- E. When setting corrective action requirements for Class III wells, the Director shall consider the overall effect of the project on the hydraulic gradient in potentially affected USDWs, and the corresponding changes in potentiometric surface or surfaces and flow direction or directions rather than the discrete effect of each well. If a decision is made that corrective action is not necessary based on the determinations above, the monitoring program required in R18-9-G647(B) shall be designed to verify the validity of such determinations.
- F. In determining the adequacy of corrective action proposed by the applicant under this Section and in determining the additional steps needed to prevent fluid movement into USDWs, the following criteria and factors shall be considered by the Director:
 1. Nature and volume of injected fluid;
 2. Nature of native fluids or by-products of injection;
 3. Potentially affected population;
 4. Geology;
 5. Hydrology;
 6. History of the injection operation;
 7. Completion and plugging records;
 8. Abandonment procedures in effect at the time the well was abandoned; and
 9. Hydraulic connections with USDWs.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART E. CLASS I INJECTION WELL REQUIREMENTS

R18-9-E640. Class I; Construction Requirements

- A. All Class I wells shall be sited in such a fashion that they inject into a formation which is beneath the lowermost formation containing, within one-quarter mile of the well bore, an USDW.
- B. All Class I wells shall be cased and cemented to prevent the movement of fluids into or between USDWs. The casing and cement used in the construction of each newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:
 1. Depth to the injection zone;
 2. Injection pressure, external pressure, internal pressure, and axial loading;
 3. Hole size;
 4. Size and grade of all casing strings, such as wall thickness, diameter, nominal weight, length, joint Specification, and construction material;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

5. Corrosiveness of injected fluid, formation fluids, and temperatures;
 6. Lithology of injection and confining intervals; and
 7. Type or grade of cement.
- C.** All Class I injection wells, except those municipal wells injecting non-corrosive wastes, shall inject fluids through tubing with a packer set immediately above the injection zone, or tubing with an approved fluid seal as an alternative. The tubing, packer, and fluid seal shall be designed for the expected service.
1. The use of other alternatives to a packer may be allowed with the written approval of the Director. To obtain approval, the operator shall submit a written request to the Director, which shall set forth the proposed alternative and all technical data supporting its use. The Director shall approve the request if the alternative method will reliably provide a comparable level of protection to USDWs. The Director may approve an alternative method solely for an individual well or for general use.
 2. In determining and specifying requirements for tubing, packer, or alternatives the following factors shall be considered:
 - a. Depth of setting;
 - b. Characteristics of injection fluid such as chemical content, corrosiveness, and density;
 - c. Injection pressure;
 - d. Annular pressure;
 - e. Rate, temperature and volume of injected fluid; and
 - f. Size of casing.
- D.** Appropriate logs and other tests shall be conducted during the drilling and construction of new Class I wells. A descriptive report interpreting the results of such logs and tests shall be prepared by a knowledgeable log analyst and submitted to the Director. At a minimum, such logs and tests shall include:
1. Deviation checks on all holes constructed by first drilling a pilot hole, and then enlarging the pilot hole by reaming or another method. Such checks shall be at sufficiently frequent intervals to assure that vertical avenues for fluid migration in the form of diverging holes are not created during drilling.
 2. Such other logs and tests as may be needed after taking into account the availability of similar data in the area of the drilling site, the construction plan, and the need for additional information that may arise from time to time as the construction of the well progresses. In determining which logs and tests shall be required, the following logs shall be considered for use in the following situations:
 - a. For surface casing intended to protect USDWs:
 - i. Resistivity, spontaneous potential, and caliper logs before the casing is installed; and
 - ii. A cement bond, temperature, or density log after the casing is set and cemented.
 - b. For intermediate and long strings of casing intended to facilitate injection:
 - i. Resistivity, spontaneous potential, porosity, and gamma ray logs before the casing is installed;
 - ii. Fracture finder logs; and
 - iii. A cement bond, temperature, or density log after the casing is set and cemented.
- E.** At a minimum, the following information concerning the injection formation shall be determined or calculated for new Class I wells:
1. Fluid pressure;
 2. Temperature;
 3. Fracture pressure;
 4. Other physical and chemical characteristics of the injection matrix; and
 5. Physical and chemical characteristics of the formation fluids.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-E641. Class I; Operating, Monitoring, and Reporting Requirements

- A.** Operating requirements shall, at a minimum, specify that:
1. Except during stimulation injection pressure at the wellhead shall not exceed a maximum which shall be calculated so as to assure that the pressure in the injection zone during injection does not initiate new fractures or propagate existing fractures in the injection zone. In no case shall injection pressure initiate fractures in the confining zone or cause the movement of injection or formation fluids into an USDW.
 2. Injection between the outermost casing protecting USDWs and the well bore is prohibited.
 3. Unless an alternative to a packer has been approved under R18-9-E640(C), the annulus between the tubing and the long string of casings shall be filled with a fluid approved by the Director and a pressure, also approved by the Director, shall be maintained on the annulus.
- B.** Monitoring requirements shall, at a minimum, include:
1. The analysis of the injected fluids with sufficient frequency to yield representative data of their characteristics;
 2. Installation and use of continuous recording devices to monitor injection pressure, flow rate and volume, and the pressure on the annulus between the tubing and the long string of casing;
 3. A demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the well; and
 4. The type, number and location of wells within the area of review to be used to monitor any migration of fluids into and pressure in the USDWs, the parameters to be measured and the frequency of monitoring.
- C.** Reporting requirements shall, at a minimum, include:
1. Quarterly reports to the Director on:
 - a. The physical, chemical and other relevant characteristics of injection fluids;
 - b. Monthly average, maximum and minimum values for injection pressure, flow rate and volume, and annular pressure; and
 - c. The results of monitoring prescribed under subsection (B)(4).
 2. Reporting the results, with the first quarterly report after the completion, of:
 - a. Periodic tests of mechanical integrity;
 - b. Any other test of the injection well conducted by the permittee if required by the Director; and
 - c. Any well work over.
- D.** Ambient monitoring.
1. Based on a site-specific assessment of the potential for fluid movement from the well or injection zone and on the potential value of monitoring wells to detect such movement, the Director shall require the owner or operator to develop a monitoring program. At a minimum, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Director shall require monitoring of the pressure buildup in the injection zone annually, including at a minimum, a shut down of the well for a time sufficient to conduct a valid observation of the pressure fall-off curve.

2. When prescribing a monitoring system the Director may also require:
 - a. Continuous monitoring for pressure changes in the first aquifer overlying the confining zone. When such a well is installed, the owner or operator shall, on a quarterly basis, sample the aquifer and analyze for constituents specified by the Director;
 - b. The use of indirect, geophysical techniques to determine the position of the waste front, the water quality in a formation designated by the Director, or to provide other site specific data;
 - c. Periodic monitoring of the ground water quality in the first aquifer overlying the injection zone;
 - d. Periodic monitoring of the ground water quality in the lowermost USDW; and
 - e. Any additional monitoring necessary to determine whether fluids are moving into or between USDWs.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-E642. Class I; Information to be Considered by the Director

- A. This Section sets forth the information which must be considered by the Director in authorizing Class I wells.
 1. For an existing or converted new Class I well the Director may rely on the existing permit file for those items of information listed in subsections (B), (C) and (D) which are current and accurate in the file.
 2. For a newly drilled Class I well, the Director shall require the submission of all the information listed in subsections (B), (C) and (D) which are current and accurate in the file.
 3. For both existing and new Class I wells certain maps, cross sections, tabulations of wells within the area of review and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.
- B. Prior to the issuance of a permit for an existing Class I well to operate or the construction or conversion of a new Class I well the Director shall consider the following:
 1. Information required in R18-9-C616;
 2. A map showing the injection well or wells for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number, or name, and location of all producing wells, injection wells, abandoned wells, dry holes, surface bodies of water, springs, mines, quarries, water wells and other pertinent surface features including residences and roads. The map should also show faults, if known or suspected. Only information of public record is required to be included on this map;
 3. A tabulation of data on all wells within the area of review which penetrate into the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require;

4. Maps and cross sections indicating the general vertical and lateral limits of all USDWs within the area of review, their position relative to the injection formation and the direction of water movement, where known, in each USDW which may be affected by the proposed injection;
 5. Maps and cross sections detailing the geologic structure of the local area;
 6. Generalized maps and cross sections illustrating the regional geologic setting;
 7. Proposed operating data:
 - a. Average and maximum daily rate and volume of the fluid to be injected;
 - b. Average and maximum injection pressure; and
 - c. Source and an analysis of the chemical, physical, radiological and biological characteristics of injection fluids;
 8. Proposed formation testing program to obtain an analysis of the chemical, physical and radiological characteristics of and other information on the receiving formation;
 9. Proposed stimulation program;
 10. Proposed injection procedure;
 11. Schematic or other appropriate drawings of the surface and subsurface construction details of the well.
 12. Contingency plans to cope with all shut-ins or well failures so as to prevent migration of fluids into any USDW;
 13. Plans, including maps, for meeting the monitoring requirements in R18-9-E641(B);
 14. For wells within the area of review which penetrate the injection zone but are not properly completed or plugged, the corrective action proposed to be taken under R18-9-D639;
 15. Construction procedures including a cementing and casing program, logging procedures, deviation checks, and a drilling, testing, and coring program; and
 16. A certificate that the applicant has assured, through a performance bond or other appropriate means, the resources necessary to close, plug or abandon the well as required by R18-9-D636(A)(6).
- C. Prior to granting approval for the operation of a Class I well the Director shall consider the following information:
 1. All available logging and testing program data on the well;
 2. A demonstration of mechanical integrity pursuant to R18-9-B613;
 3. The anticipated maximum pressure and flow rate at which the permittee will operate;
 4. The results of the formation testing program;
 5. The actual injection procedure;
 6. The compatibility of injected waste with fluids in the injection zone and minerals in both the injection zone and the confining zone; and
 7. The status of corrective action on defective wells in the area of review.
 - D. Prior to granting approval for the plugging and abandonment of a Class I well the Director shall consider the following information:
 1. The type and number of plugs to be used;
 2. The placement of each plug including the elevation of the top and bottom;
 3. The type and grade and quantity of cement to be used;
 4. The method for placement of the plugs; and
 5. The procedure to be used to meet the requirements of R18-9-B614(C).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART F. CLASS II INJECTION WELL REQUIREMENTS

R18-9-F643. Class II; Construction Requirements

- A.** All new Class II wells shall be sited in such a fashion that they inject into a formation which is separated from any USDW by a confining zone that is free of known open faults or fractures within the area of review.
- B.** All Class II injection wells:
1. Shall be cased and cemented to prevent movement of fluids into or between USDWs. The casing and cement used in the construction of each newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:
 - a. Depth to the injection zone;
 - b. Depth to the bottom of all USDWs; and
 - c. Estimated maximum and average injection pressures.
 2. In addition the Director may consider information on:
 - a. Nature of formation fluids;
 - b. Lithology of injection and confining zones;
 - c. External pressure, internal pressure, and axial loading;
 - d. Hole size;
 - e. Size and grade of all casing strings; and
 - f. Class of cement.
- C.** The requirements in subsection (B) need not apply to existing or newly converted Class II wells located in existing fields if:
1. Regulatory controls for casing and cementing existed for those wells at the time of drilling and those wells are in compliance with those controls; and
 2. Well injection will not result in the movement of fluids into an USDW so as to create a significant risk to the health of persons.
- D.** The requirements in subsection (B) need not apply to newly drilled wells in existing fields if:
1. They meet the requirements of the State for casing and cementing applicable to that field at the time of submission of the State program to the Administrator; and
 2. Well injection will not result in the movement of fluids into an USDW so as to create a significant risk to the health of persons.
- E.** Appropriate logs and other tests shall be conducted during the drilling and construction of new Class II wells. A descriptive report interpreting the results of that portion of those logs and tests which specifically relate to (1) an USDW and the confining zone adjacent to it, and (2) the injection and adjacent formations shall be prepared by a knowledgeable log analyst and submitted to the Director. At a minimum, these logs and tests shall include:
1. Deviation checks on all holes constructed by first drilling a pilot hole and then enlarging the pilot hole, by reaming or another method. Such checks shall be at sufficiently frequent intervals to assure that vertical avenues for fluid movement in the form of diverging holes are not created during drilling.
 2. Such other logs and tests as may be needed after taking into account the availability of similar data in the area of the drilling site, the construction plan, and the need for additional information that may arise from time to time as

the construction of the well progresses. In determining which logs and tests shall be required the following shall be considered by the Director in setting logging and testing requirements:

- a. For surface casing intended to protect USDWs in areas where the lithology has not been determined:
 - i. Electric and caliper logs before casing is installed; and
 - ii. A cement bond, temperature, or density log after the casing is set and cemented.
 - b. For intermediate and long strings of casing intended to facilitate injection:
 - i. Electric, porosity and gamma ray logs before the casing is installed;
 - ii. Fracture finder logs; and
 - iii. A cement bond, temperature, or density log after the casing is set and cemented.
- F.** At a minimum, the following information concerning the injection formation shall be determined or calculated for new Class II wells or projects:
1. Fluid pressure;
 2. Estimated fracture pressure; and
 3. Physical and chemical characteristics of the injection zone.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-F644. Class II; Operating, Monitoring, and Reporting Requirements

- A.** Operating requirements shall, at a minimum, specify that:
1. Injection pressure at the wellhead shall not exceed a maximum which shall be calculated so as to assure that the pressure during injection does not initiate new fractures or propagate existing fractures in the confining zone adjacent to the USDWs. In no case shall injection pressure cause the movement of injection or formation fluids into an USDW.
 2. Injection between the outermost casing protecting USDWs and the well bore shall be prohibited.
- B.** Monitoring requirements shall, at a minimum, include:
1. Monitoring of the nature of injected fluids at time intervals sufficiently frequent to yield data representative of their characteristics;
 2. Observation of injection pressure, flow rate, and cumulative volume at least with the following frequencies:
 - a. Weekly for produced fluid disposal operations;
 - b. Monthly for enhanced recovery operations;
 - c. Daily during the injection of liquid hydrocarbons and injection for withdrawal of stored hydrocarbons; and
 - d. Daily during the injection phase of cyclic steam operations; and
 - e. Record one observation of injection pressure, flow rate and cumulative volume at reasonable intervals no greater than 30 days;
 3. A demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the injection well;
 4. Maintenance of the results of all monitoring until the next permit review; and
 5. Hydrocarbon storage and enhanced recovery may be monitored on a field or project basis rather than on an

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

individual well basis by manifold monitoring. Manifold monitoring may be used in cases of facilities consisting of more than one injection well, operating with a common manifold. Separate monitoring systems for each well are not required provided the owner/operator demonstrates that manifold monitoring is comparable to individual well monitoring.

C. Reporting requirements.

1. Reporting requirements shall at a minimum include an annual report to the Director summarizing the results of monitoring required under subsection (B). Such summary shall include monthly records of injected fluids, and any major changes in characteristics or sources of injected fluid. Previously submitted information may be included by reference.
2. Owners or operators of hydrocarbon storage and enhanced recovery projects may report on a field or project basis rather than an individual well basis where manifold monitoring is used.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-F645. Class II; Information to be Considered by the Director

- A.** This Section sets forth the information which must be considered by the Director in authorizing Class II wells. Certain maps, cross sections, tabulations of wells within the area of review, and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.
- B.** Prior to the issuance of a permit for an existing Class II well to operate or the construction or conversion of a new Class II well the Director shall consider the following:
 1. Information required in R18-9-C616.
 2. A map showing the injection well or project area for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number or name and location of all existing producing wells, injection wells, abandoned wells, dry holes, and water wells. The map may also show surface bodies of waters, mines (surface and subsurface), quarries and other pertinent surface features including residences and roads, and faults if known or suspected. Only information of public record and pertinent information known to the applicant is required to be included on this map. This requirement does not apply to existing Class II wells.
 3. A tabulation of data reasonably available from public records or otherwise known to the applicant on all wells within the area of review included on the map required under subsection (B)(2) which penetrate the proposed injection zone or, in the case of Class II wells operating over the fracture pressure of the injection formation, all known wells within the area of review which penetrate formations affected by the increase in pressure. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of plugging and completion, and any additional information the Director may require. In cases where the information would be repetitive and the wells are of similar age, type, and construction the Director may elect to only require data on a representative number of wells. This requirement does not apply to existing Class II wells.

4. Proposed operating data:
 - a. Average and maximum daily rate and volume of fluids to be injected;
 - b. Average and maximum injection pressure; and
 - c. Source and an appropriate analysis of the chemical and physical characteristics of the injection fluid.
5. Appropriate geological data on the injection zone and confining zone including lithologic description, geological name, thickness and depth.
6. Geologic name and depth to bottom of all USDWs which may be affected by the injection.
7. Schematic or other appropriate drawings of the surface and subsurface construction details of the well.
8. In the case of new injection wells the corrective action proposed to be taken by the applicant under R18-9-D639.
9. A certificate that the applicant has assured through a performance bond or other appropriate means, the resources necessary to close, plug or abandon the well as required by R18-9-D636(A)(6).

C. In addition the Director may consider the following:

1. Proposed formation testing program to obtain the information required by R18-9-F643(F);
2. Proposed stimulation program;
3. Proposed injection procedure;
4. Proposed contingency plans, if any, to cope with well failures so as to prevent migration of contaminating fluids into an USDW;
5. Plans for meeting the monitoring requirements of R18-9-F644(B).

D. Prior to granting approval for the operation of a Class II well the Director shall consider the following information:

1. All available logging and testing program data on the well;
2. A demonstration of mechanical integrity pursuant to R18-9-B613;
3. The anticipated maximum pressure and flow rate at which the permittee will operate;
4. The results of the formation testing program;
5. The actual injection procedure; and
6. For new wells the status of corrective action on defective wells in the area of review.

E. Prior to granting approval for the plugging and abandonment of a Class II well the Director shall consider the following information:

1. The type, and number of plugs to be used;
2. The placement of each plug including the elevation of top and bottom;
3. The type, grade, and quantity of cement to be used;
4. The method of placement of the plugs; and
5. The procedure to be used to meet the requirements of R18-9-B614(A).

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART G. CLASS III INJECTION WELL REQUIREMENTS

R18-9-G646. Class III; Construction Requirements

- A.** All new Class III wells shall be cased and cemented to prevent the migration of fluids into or between USDWs. The Director may waive the cementing requirement for new wells in existing projects or portions of existing projects where they have substantial evidence that no contamination of USDWs would result. The casing and cement used in the construction of each

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

newly drilled well shall be designed for the life expectancy of the well. In determining and specifying casing and cementing requirements, the following factors shall be considered:

1. Depth to the injection zone;
 2. Injection pressure, external pressure, internal pressure, axial loading, etc.;
 3. Hole size;
 4. Size and grade of all casing strings, such as wall thickness, diameter, nominal weight, length, joint specification, and construction material;
 5. Corrosiveness of injected fluids and formation fluids;
 6. Lithology of injection and confining zones; and
 7. Type and grade of cement.
- B.** Appropriate logs and other tests shall be conducted during the drilling and construction of new Class III wells. A descriptive report interpreting the results of such logs and tests shall be prepared by a knowledgeable log analyst and submitted to the Director. The logs and tests appropriate to each type of Class III well shall be determined based on the intended function, depth, construction and other characteristics of the well, availability of similar data in the area of the drilling site and the need for additional information that may arise from time to time as the construction of the well progresses. Deviation checks shall be conducted on all holes where pilot holes and reaming are used, unless the hole will be cased and cemented by circulating cement to the surface. Where deviation checks are necessary they shall be conducted at sufficiently frequent intervals to assure that vertical avenues for fluid migration in the form of diverging holes are not created during drilling.
- C.** Where the injection zone is a formation which is naturally water-bearing the following information concerning the injection zone shall be determined or calculated for new Class III wells or projects:
1. Fluid pressure;
 2. Fracture pressure; and
 3. Physical and chemical characteristics of the formation fluids.
- D.** Where the injection formation is not a water-bearing formation, the information in subsection (C)(2) must be submitted.
- E.** Where injection is into a formation which contains water with less than 10,000 mg/l TDS monitoring wells shall be completed into the injection zone and into any USDWs above the injection zone which could be affected by the mining operation. These wells shall be located in such a fashion as to detect any excursion of injection fluids, process by-products, or formation fluids outside the mining area or zone. If the operation may be affected by subsidence or catastrophic collapse the monitoring wells shall be located so that they will not be physically affected.
- F.** Where injection is into a formation which does not contain water with less than 10,000 mg/l TDS, no monitoring wells are necessary in the injection stratum.
- G.** Where the injection wells penetrate an USDW in an area subject to subsidence or catastrophic collapse an adequate number of monitoring wells shall be completed into the USDW to detect any movement of injected fluids, process by-products or formation fluids into the USDW. The monitoring wells shall be located outside the physical influence of the subsidence or catastrophic collapse.
- H.** In determining the number, location, construction and frequency of monitoring of the monitoring wells the following criteria shall be considered:
1. The population relying on the USDW affected or potentially affected by the injection operation;
 2. The proximity of the injection operation to points of withdrawal of drinking water;
 3. The local geology and hydrology;
 4. The operating pressures and whether a negative pressure gradient is being maintained;
 5. The nature and volume of the injected fluid, the formation water, and the process by-products; and
 6. The injection well density.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-G647. Class III; Operating, Monitoring, and Reporting Requirements

- A.** Operating requirements prescribed shall, at a minimum, specify that:
1. Except during well stimulation, injection pressure at the wellhead shall be calculated so as to assure that the pressure in the injection zone during injection does not initiate new fractures or propagate existing fractures in the injection zone. In no case, shall injection pressure initiate fractures in the confining zone or cause the migration of injection or formation fluids into an USDW.
 2. Injection between the outermost casing protecting USDWs and the well bore is prohibited.
- B.** Monitoring requirements shall, at a minimum, specify:
1. Monitoring of the nature of injected fluids with sufficient frequency to yield representative data on its characteristics. Whenever the injection fluid is modified to the extent that the analysis required by R18-9-G648(B)(7)(c) is incorrect or incomplete, a new analysis as required by R18-9-G648(B)(7)(c) shall be provided to the Director.
 2. Monitoring of injection pressure and either flow rate or volume semi-monthly, or metering and daily recording of injected and produced fluid volumes as appropriate.
 3. Demonstration of mechanical integrity pursuant to R18-9-B613 at least once every five years during the life of the well for salt solution mining.
 4. Monitoring of the fluid level in the injection zone semi-monthly, where appropriate and monitoring of the parameters chosen to measure water quality in the monitoring wells required by R18-9-G646(E), semi-monthly.
 5. Quarterly monitoring of wells required by R18-9-G646(G).
 6. All Class III wells may be monitored on a field or project basis rather than an individual well basis by manifold monitoring. Manifold monitoring may be used in cases of facilities consisting of more than one injection well, operating with a common manifold. Separate monitoring systems for each well are not required provided the owner/operator demonstrates that manifold monitoring is comparable to individual well monitoring.
- C.** Reporting requirements shall, at a minimum, include:
1. Quarterly reporting to the Director on required monitoring;
 2. Results of mechanical integrity and any other periodic test required by the Director reported with the first regular quarterly report after the completion of the test; and
 3. Monitoring may be reported on a project or field basis rather than individual well basis where manifold monitoring is used.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R.
1903 (August 5, 2022), effective September 6, 2022
(Supp. 22-3).

R18-9-G648. Class III; Information to be Considered by the Director

- A.** This Section sets forth the information which must be considered by the Director in authorizing Class III wells. Certain maps, cross sections, tabulations of wells within the area of review, and other data may be included in the application by reference provided they are current, readily available to the Director and sufficiently identified to be retrieved.
- B.** Prior to the issuance of a permit for an existing Class III well or area to operate or the construction of a new Class III well the Director shall consider the following:
1. Information required in R18-9-C616;
 2. A map showing the injection well or project area for which a permit is sought and the applicable area of review. Within the area of review, the map must show the number or name and location of all existing producing wells, injection wells, abandoned wells, dry holes, public water systems and water wells. The map may also show surface bodies of waters, mines (surface and subsurface) quarries and other pertinent surface features including residences and roads, and faults if known or suspected. Only information of public record and pertinent information known to the applicant is required to be included on this map;
 3. A tabulation of data reasonably available from public records or otherwise known to the applicant on wells within the area of review included on the map required under subsection (B)(2) which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of plugging and completion, and any additional information the Director may require. In cases where the information would be repetitive and the wells are of similar age, type, and construction the Director may elect to only require data on a representative number of wells;
 4. Maps and cross sections indicating the vertical limits of all USDWs within the area of review, their position relative to the injection formation, and the direction of water movement, where known, in every USDW which may be affected by the proposed injection;
 5. Maps and cross sections detailing the geologic structure of the local area;
 6. Generalized map and cross sections illustrating the regional geologic setting;
 7. Proposed operating data:
 - a. Average and maximum daily rate and volume of fluid to be injected;
 - b. Average and maximum injection pressure; and
 - c. Qualitative analysis and ranges in concentrations of all constituents of injected fluids. If the information is confidential pursuant to R18-9-A603 an applicant may, in lieu of the ranges in concentrations, choose to submit maximum concentrations which shall not be exceeded. In such a case the applicant shall retain records of the undisclosed concentrations and provide them upon request to the Director as part of any enforcement investigation.
 8. Proposed formation testing program to obtain the information required by R18-9-G646(C);

9. Proposed stimulation program;
 10. Proposed injection procedure;
 11. Schematic or other appropriate drawings of the surface and subsurface construction details of the well;
 12. Plans (including maps) for meeting the monitoring requirements of R18-9-G647(B);
 13. Expected changes in pressure, native fluid displacement, direction of movement of injection fluid;
 14. Contingency plans to cope with all shut-ins or well failures so as to prevent the migration of contaminating fluids into USDWs;
 15. A certificate that the applicant has assured, through a performance bond, or other appropriate means, the resources necessary to close, plug, or abandon the well as required by R18-9-D636(A)(5); and
 16. The corrective action proposed to be taken under R18-9-D639.
- C.** Prior to granting approval for the operation of a Class III well the Director shall consider the following information:
1. All available logging and testing data on the well;
 2. A satisfactory demonstration of mechanical integrity for all new wells and for all existing salt solution wells pursuant to R18-9-B613;
 3. The anticipated maximum pressure and flow rate at which the permittee will operate;
 4. The results of the formation testing program;
 5. The actual injection procedures; and
 6. The status of corrective action on defective wells in the area of review.
- D.** Prior to granting approval for the plugging and abandonment of a Class III well the Director shall consider the following information:
1. The type and number of plugs to be used;
 2. The placement of each plug including the elevation of the top and bottom;
 3. The type, grade and quantity of cement to be used;
 4. The method of placement of the plugs; and
 5. The procedure to be used to meet the requirements of R18-9-B614(A).

Historical Note

New Section made by final rulemaking at 28 A.A.R.
1903 (August 5, 2022), effective September 6, 2022
(Supp. 22-3).

PART H. CLASS IV INJECTION WELL REQUIREMENTS**R18-9-H649. Class IV; Closure Requirements and Remediation**

- A.** Closure.
1. Prior to abandoning any Class IV well, the owner or operator shall plug or otherwise close the well in a manner acceptable to the Director.
 2. The owner or operator of a Class IV well must notify the Director of intent to abandon the well at least 30 days prior to abandonment.
- B.** Remediation. Injection wells used to inject contaminated groundwater that has been treated and is being injected into the same formation from which it was drawn are authorized by rule for the life of the well if such subsurface emplacement of fluids is approved by the Administrator or the Director pursuant to subsections (B)(1), (2) or (3):
1. Provisions for cleanup of releases under CERCLA, or
 2. The requirements and provisions under RCRA, or
 3. The requirements and provisions under other applicable state laws for corrective and remedial action.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART I. CLASS V INJECTION WELL REQUIREMENTS

R18-9-I650. Class V; General Requirements

A. The following requirements apply to Class V Wells authorized by rule:

1. A Class V Injection well is authorized by rule subject to the conditions under this Section.
2. Well authorization under this Section expires upon the effective date of a permit issued pursuant to R18-9-I651, R18-9-C616, R18-9-C624, R18-9-C625, or upon proper closure of the well.
3. An owner or operator of a well that is authorized by rule pursuant to this Section is prohibited from injecting into the well:
 - a. Upon the effective date of an applicable permit denial;
 - b. Upon failure to submit a permit application in a timely manner pursuant to R18-9-I651 or R18-9-C616;
 - c. Upon failure to submit inventory information in a timely manner pursuant to R18-9-I652; or
 - d. Upon failure to comply with a request for information in a timely manner pursuant to R18-9-I653.
4. Submission of the following is required in order to transfer ownership of a well that is authorized by rule pursuant to this Section:
 - a. An inventory, and
 - b. Class V authorized by rule transfer fee pursuant to R18-14-111(3).

B. The following requirements apply for all Class V Wells:

1. With certain exceptions listed in subsection (B)(2), Class V injection activity is "authorized by rule," meaning owners and operators must comply with all the requirements of this Article but do not have to get an individual permit. Well authorization expires once the injection well has been properly closed.
2. A Class V well requires a permit and shall no longer be authorized by rule upon any of the following:
 - a. Failure to comply with the prohibition of movement standard in R18-9-B608(A).
 - b. The Director specifically requires a Class V permit for the well to operate pursuant to R18-9-I651. In which case rule authorization expires upon the effective date of the permit issued, or you are prohibited from injecting into your well upon:
 - i. Failure to submit a permit application in a timely manner as specified in a notice from the Director; or
 - ii. Upon the effective date of permit denial.
 - c. Failure to submit inventory information as required under R18-9-I652.
 - d. Failure to comply with the Director's request for additional information under R18-9-I653 in a timely manner.
3. Prior to abandoning a Class V well, the owner or operator shall meet the plugging requirements in R18-9-B614(C).
4. In limited cases, the Director may authorize the conversion (reclassification) of a motor vehicle waste disposal well to another type of Class V well. Motor vehicle wells may only be converted if: all motor vehicle fluids are seg-

regated by physical barriers and are not allowed to enter the well; and, injection of motor vehicle waste is unlikely based on a facility's compliance history and records showing proper waste disposal. The use of a semi-permanent plug as the means to segregate waste is not sufficient to convert a motor vehicle waste disposal well to another type of Class V well.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-I651. Class V; Requiring a Permit

A. The Director may require the owner or operator of any Class V injection well authorized by rule under this Article to apply for and obtain an individual or area UIC permit. Cases where individual or area UIC permits may be required include:

1. The injection well is not in compliance with any requirement under this Article or A.R.S. Title 49, Chapter 2, Article 3.3;
2. The injection well is not or no longer is within the category of wells and types of well operations authorized in the rule; or
3. The protection of USDWs requires that the injection operation be regulated by requirements, such as for corrective action, monitoring and reporting, or operation, which are not contained in the rule.

B. If an individual or area UIC permit is required, the Director shall notify the discharger in writing of the decision. The notice shall include:

1. A brief statement of the reasons for the decision,
2. An application form,
3. A statement setting a deadline to file the application,
4. A statement that on the effective date of issuance or denial of the individual or area UIC permit, coverage by rule will automatically terminate.
5. The applicant's right to appeal the individual permit requirement under A.R.S. § 49-323 and the name and telephone number of the Department contact person who can answer questions regarding the appeals process.

C. An owner or operator of a well authorized by rule may request to be excluded from the coverage of this Section by applying for an individual or area UIC permit. The owner or operator shall submit an application under R18-9-C616 with reasons supporting the request to the Director. The Director may grant any such requests.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-I652. Class V; Inventory Requirements for Class V Wells Authorized by Rule

A. The owner or operator of an injection well authorized by rule under R18-9-I650 shall submit inventory information to the Director. Such an owner or operator is prohibited from injecting into the well upon failure to submit inventory information for the well within the timeframe specified in subsection (D).

B. As part of the inventory, the Director shall require and the owner/operator shall provide at least the following information:

1. Facility name and location;
2. Name and address of legal contact;
3. Ownership of facility;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

4. Nature and type of injection well; and
 5. Operating status of injection well.
- C. Upon approval of the Arizona UIC Program, the Director shall notify all known owners or operators of injection wells of their duty to submit inventory information in the manner specified by the Director.
- D. The owner or operator of an injection well shall submit inventory information no later than one year after the effective date of the Arizona UIC program. The Director need not require inventory information from any facility with interim status under RCRA.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-I653. Class V; Requiring Other Information

- A. In addition to the inventory requirements under R18-9-I652, the Director may require the owner or operator of any well authorized by rule under this Article to submit information as deemed necessary by the Director to determine whether a well may be endangering an USDW in violation of R18-9-B608 of this Part.
- B. Such information requirements may include, but are not limited to:
1. Performance of ground-water monitoring and the periodic submission of reports of such monitoring;
 2. An analysis of injected fluids, including periodic submission of such analyses; and
 3. A description of the geologic strata through and into which injection is taking place.
- C. Any request for information under this Section shall be made in writing, and include a brief statement of the reasons for requiring the information. An owner and operator shall submit the information within the time period or time periods provided in the notice.
- D. An owner or operator of an injection well authorized by rule under this Part is prohibited from injecting into the well upon failure of the owner or operator to comply with a request for information within the time period or time periods specified by the Director pursuant to subsection (C). An owner or operator of a well prohibited from injection under this Section shall not resume injection except under a permit issued pursuant to R18-9-I651; R18-9-C616, R18-9-C624, or R18-9-C625.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-I654. Class V; Prohibition of Class V Cesspools and Motor Vehicle Waste Disposal Wells

The construction and operation of cesspools and motor vehicle waste disposal wells are prohibited.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-I655. Class V; Prohibition of Non-Experimental Class V Wells for Geologic Sequestration

The construction, operation or maintenance of any non-experimental Class V geologic sequestration well is prohibited.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

PART J. CLASS VI INJECTION WELL REQUIREMENTS

R18-9-J656. Class VI; Applicability

- A. This Part establishes criteria and standards for underground injection control programs to regulate any Class VI carbon dioxide geologic sequestration injection wells.
- B. This Part applies to any well used to inject carbon dioxide specifically for the purpose of geologic sequestration.
- C. This Part also applies to owners or operators of permit- or rule-authorized Class V experimental carbon dioxide injection projects who seek to apply for Class VI geologic sequestration permit for their well or wells. Owners or operators seeking to convert existing Class I, Class II, or Class V experimental wells to Class VI geologic sequestration wells must demonstrate to the Director that the wells were engineered and constructed to meet the requirements of R18-9-J661 and ensure protection of USDWs, in lieu of requirements at R18-9-J661 and R18-9-J662. A converted well must still meet all other requirements under Part F of this Article.
- D. The following definitions apply to this Part and govern for Class VI wells to the extent that these definitions conflict with those in R18-9-A601:
1. "Area of review" means the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity. The area of review is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and displaced fluids, and is based on available site characterization, monitoring, and operational data as set forth in R18-9-J659.
 2. "Carbon dioxide plume" means the extent underground, in three dimensions, of an injected carbon dioxide stream.
 3. "Carbon dioxide stream" means carbon dioxide that has been captured from an emission source, plus incidental associated substances derived from the source materials and the capture process, and any substances added to the stream to enable or improve the injection process. This Part does not apply to any carbon dioxide stream that meets the definition of a hazardous waste under A.R.S. § 49-921.
 4. "Confining zone" means a geologic formation, group of formations, or part of a formation stratigraphically overlying the injection zone or zones that acts as barrier to fluid movement. For Class VI wells operating under an injection depth waiver, confining zone means a geologic formation, group of formations, or part of a formation stratigraphically overlying and underlying the injection zone or zones.
 5. "Corrective action" means the use of Director-approved methods to ensure that wells within the area of review do not serve as conduits for the movement of fluids into USDWs.
 6. "Geologic sequestration" means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.
 7. "Geologic sequestration project" means an injection well or wells used to emplace a carbon dioxide stream beneath the lowermost formation containing a USDW; or, wells used for geologic sequestration of carbon dioxide that

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

have been granted a waiver of the injection depth requirements pursuant to requirements at R18-9-J670; or, wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to R18-9-A605 and R18-9-A606. It includes the subsurface three-dimensional extent of the carbon dioxide plume, associated area of elevated pressure, and displaced fluids, as well as the surface area above that delineated region.

8. "Injection zone" means a geologic formation, group of formations, or part of a formation that is of sufficient areal extent, thickness, porosity, and permeability to receive carbon dioxide through a well or wells associated with a geologic sequestration project.
9. "Post-injection site care" means appropriate monitoring and other actions, including corrective action, needed following cessation of injection to ensure that USDWs are not endangered, as required under R18-9-J668.
10. "Pressure front" means the zone of elevated pressure that is created by the injection of carbon dioxide into the subsurface. For the purposes of this Part, the pressure front of a carbon dioxide plume refers to a zone where there is a pressure differential sufficient to cause the movement of injected fluids or formation fluids into a USDW.
11. "Site closure" means the point/time, as determined by the Director following the requirements under R18-9-J668, at which the owner or operator of a geologic sequestration site is released from post-injection site care responsibilities.
12. "Transmissive fault" or "fracture" means a fault or fracture that has sufficient permeability and vertical extent to allow fluids to move between formations.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J657. Class VI; Required Permit Information

- A. This Section sets forth the information which must be considered by the Director in authorizing Class VI wells. For converted Class I, Class II, or Class V experimental wells, certain maps, cross sections, tabulations of wells within the area of review and other data may be included in the application by reference provided they are current, readily available to the Director, and sufficiently identified to be retrieved.
- B. Prior to the issuance of a permit for the construction of a new Class VI well or the conversion of an existing Class I, Class II, or Class V well to a Class VI well, the owner or operator shall submit, pursuant to R18-9-J666, and the Director shall consider the following:
 1. Information required in R18-9-C616(D)(1) through (9);
 2. A map showing the injection well for which a permit is sought and the applicable area of review consistent with R18-9-J659. Within the area of review, the map must show the number or name, and location of all injection wells, producing wells, abandoned wells, plugged wells or dry holes, deep stratigraphic boreholes, State- or EPA-approved subsurface cleanup sites, surface bodies of water, springs, mines (surface and subsurface), quarries, water wells, other pertinent surface features including structures intended for human occupancy, State, Tribal, and Territory boundaries, and roads. The map should also

show faults, if known or suspected. Only information of public record is required to be included on this map;

3. Information on the geologic structure and hydrogeologic properties of the proposed storage site and overlying formations, including:
 - a. Maps and cross sections of the area of review;
 - b. The location, orientation, and properties of known or suspected faults and fractures that may transect the confining zone or zones in the area of review and a determination that they would not interfere with containment;
 - c. Data on the depth, areal extent, thickness, mineralogy, porosity, permeability, and capillary pressure of the injection and confining zone or zones; including geology/facies changes based on field data which may include geologic cores, outcrop data, seismic surveys, well logs, and names and lithologic descriptions;
 - d. Geomechanical information on fractures, stress, ductility, rock strength, and in situ fluid pressures within the confining zone or zones;
 - e. Information on the seismic history including the presence and depth of seismic sources and a determination that the seismicity would not interfere with containment; and
 - f. Geologic and topographic maps and cross sections illustrating regional geology, hydrogeology, and the geologic structure of the local area.
4. A tabulation of all wells within the area of review which penetrate the injection or confining zone or zones. Such data must include a description of each well's type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require;
5. Maps and stratigraphic cross sections indicating the general vertical and lateral limits of all USDWs, water wells and springs within the area of review, their positions relative to the injection zone or zones, and the direction of water movement, where known;
6. Baseline geochemical data on subsurface formations, including all USDWs in the area of review;
7. Proposed operating data for the proposed geologic sequestration site:
 - a. Average and maximum daily rate and volume and/or mass and total anticipated volume and/or mass of the carbon dioxide stream;
 - b. Average and maximum injection pressure;
 - c. The source or sources of the carbon dioxide stream; and
 - d. An analysis of the chemical and physical characteristics of the carbon dioxide stream.
8. Proposed pre-operational formation testing program to obtain an analysis of the chemical and physical characteristics of the injection zone or zones and confining zone or zones and that meets the requirements at R18-9-J662;
9. Proposed stimulation program, a description of stimulation fluids to be used and a determination that stimulation will not interfere with containment;
10. Proposed procedure to outline steps necessary to conduct injection operation;
11. Schematics or other appropriate drawings of the surface and subsurface construction details of the well;
12. Injection well construction procedures that meet the requirements of R18-9-J661;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

13. Proposed area of review and corrective action plan that meets the requirements under R18-9-J659;
 14. A demonstration, satisfactory to the Director, that the applicant has met the financial responsibility requirements under R18-9-J660;
 15. Proposed testing and monitoring plan required by R18-9-J665;
 16. Proposed injection well plugging plan required by R18-9-J667(B);
 17. Proposed post-injection site care and site closure plan required by R18-9-J668(A);
 18. At the Director's discretion, a demonstration of an alternative post-injection site care timeframe required by R18-9-J668(C);
 19. Proposed emergency and remedial response plan required by R18-9-J669;
 20. A list of contacts, submitted to the Director, for those States, Tribes, and Territories identified to be within the area of review of the Class VI project based on information provided in subsection (B)(2);
 21. A listing of any historic property or potential historic property as defined by R12-8-301; and
 22. Any other information requested by the Director.
- C.** The Director shall notify, in writing, any States, Tribes, or Territories within the area of review of the Class VI project based on information provided in subsections (B)(2) and (B)(20) of the permit application.
- D.** Prior to granting approval for the operation of a Class VI well, the Director shall consider the following information:
1. The final area of review based on modeling, using data obtained during logging and testing of the well and the formation as required by subsections (D)(2), (3), (4), (6), (7), and (10);
 2. Any relevant updates, based on data obtained during logging and testing of the well and the formation as required by subsections (D)(3), (4), (6), (7), and (10), to the information on the geologic structure and hydrogeologic properties of the proposed storage site and overlying formations, submitted to satisfy the requirements of subsection (B)(3);
 3. Information on the compatibility of the carbon dioxide stream with fluids in the injection zone or zones and minerals in both the injection and the confining zone or zones, based on the results of the formation testing program, and with the materials used to construct the well;
 4. The results of the formation testing program required at subsection (B)(8);
 5. Final injection well construction procedures that meet the requirements of R18-9-J661;
 6. The status of corrective action on wells in the area of review;
 7. All available logging and testing program data on the well required by R18-9-J662;
 8. A demonstration of mechanical integrity pursuant to R18-9-J664;
 9. Any updates to the proposed area of review and corrective action plan, testing and monitoring plan, injection well plugging plan, post-injection site care and site closure plan, or the emergency and remedial response plan submitted under subsection (B), which are necessary to address new information collected during logging and testing of the well and the formation as required by all subsections of this Section, and any updates to the alternative post-injection site care timeframe demonstration submitted under subsection (B), which are necessary to address new information collected during the logging and testing of the well and the formation as required by this Section; and
 10. Any other information requested by the Director.
- E.** Owners or operators seeking a waiver of the requirement to inject below the lowermost USDW must also refer to R18-9-J670 and submit a supplemental report, as required at R18-9-J670. The supplemental report is not part of the permit application.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J658. Class VI; Minimum Criteria for Siting

- A.** Owners or operators of Class VI wells must demonstrate to the satisfaction of the Director that the wells will be sited in areas with a suitable geologic system. The owners or operators must demonstrate that the geologic system comprises:
1. An injection zone or zones of sufficient areal extent, thickness, porosity, and permeability to receive the total anticipated volume of the carbon dioxide stream.
 2. Confining zone or zones free of transmissive faults or fractures and of sufficient areal extent and integrity to contain the injected carbon dioxide stream and displaced formation fluids and allow injection at proposed maximum pressures and volumes without initiating or propagating fractures in the confining zone or zones.
- B.** The Director may require owners or operators of Class VI wells to identify and characterize additional zones that will impede vertical fluid movement, are free of faults and fractures that may interfere with containment, allow for pressure dissipation, and provide additional opportunities for monitoring, mitigation, and remediation.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J659. Class VI; Area of Review and Corrective Action

- A.** The area of review is the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity. The area of review is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and is based on available site characterization, monitoring, and operational data.
- B.** The owner or operator of a Class VI well must prepare, maintain, and comply with a plan to delineate the area of review for a proposed geologic sequestration project, periodically reevaluate the delineation, and perform corrective action that meets the requirements of this Section and is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. As a part of the permit application for approval by the Director, the owner or operator must submit an area of review and corrective action plan that includes the following information:
1. The method for delineating the area of review that meets the requirements of subsection (C), including the model to be used, assumptions that will be made, and the site characterization data on which the model will be based.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

2. A description of:
 - a. The minimum fixed frequency, not to exceed five years, at which the owner or operator proposes to reevaluate the area of review;
 - b. The monitoring and operational conditions that would warrant a reevaluation of the area of review prior to the next scheduled reevaluation as determined by the minimum fixed frequency established in subsection (B)(2)(a);
 - c. How monitoring and operational data will be used to inform an area of review reevaluation; and
 - d. How corrective action will be conducted to meet the requirements of subsection (D), including what corrective action will be performed prior to injection and what, if any, portions of the area of review will have corrective action addressed on a phased basis and how the phasing will be determined; how corrective action will be adjusted if there are changes in the area of review; and how site access will be guaranteed for future corrective action.
- C. Owners or operators of Class VI wells must perform the following actions to delineate the area of review and identify all wells that require corrective action:
 1. Predict, using existing site characterization, monitoring and operational data, and computational modeling, the projected lateral and vertical migration of the carbon dioxide plume and formation fluids in the subsurface from the commencement of injection activities until the plume movement ceases, until pressure differentials sufficient to cause the movement of injected fluids or formation fluids into a USDW are no longer present, or until the end of a fixed time period as determined by the Director. The model must:
 - a. Be based on detailed geologic data collected to characterize the injection zone zones, confining zone or zones and any additional zones; and anticipated operating data, including injection pressures, rates, and total volumes over the proposed life of the geologic sequestration project;
 - b. Take into account any geologic heterogeneities, other discontinuities, data quality, and their possible impact on model predictions; and
 - c. Consider potential migration through faults, fractures, and artificial penetrations.
 2. Using methods approved by the Director, identify all penetrations, including active and abandoned wells and underground mines, in the area of review that may penetrate the confining zone or zones. Provide a description of each well's type, construction, date drilled, location, depth, record of plugging and/or completion, and any additional information the Director may require; and
 3. Determine which abandoned wells in the area of review have been plugged in a manner that prevents the movement of carbon dioxide or other fluids that may endanger USDWs, including use of materials compatible with the carbon dioxide stream.
- D. Owners or operators of Class VI wells must perform corrective action on all wells in the area of review that are determined to need corrective action, using methods designed to prevent the movement of fluid into or between USDWs, including use of materials compatible with the carbon dioxide stream, where appropriate.
- E. At the minimum fixed frequency, not to exceed five years, as specified in the area of review and corrective action plan, or when monitoring and operational conditions warrant, owners or operators must:
 1. Reevaluate the area of review in the same manner specified in subsection (C)(1);
 2. Identify all wells in the reevaluated area of review that require corrective action in the same manner specified in subsection (C);
 3. Perform corrective action on wells requiring corrective action in the reevaluated area of review in the same manner specified in subsection (C); and
 4. Submit an amended area of review and corrective action plan or demonstrate to the Director through monitoring data and modeling results that no amendment to the area of review and corrective action plan is needed. Any amendments to the area of review and corrective action plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements under R18-9-C632 or R18-9-C633, as appropriate.
- F. The emergency and remedial response plan and the demonstration of financial responsibility must account for the area of review delineated as specified in subsection (C)(1) or the most recently evaluated area of review delineated under subsection (E), regardless of whether or not corrective action in the area of review is phased.
- G. All modeling inputs and data used to support area of review reevaluations under subsection (E) shall be retained for 10 years.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J660. Class VI; Financial Responsibility

- A. The owner or operator must demonstrate and maintain financial responsibility as determined by the Director that meets the following conditions:
 1. The financial responsibility instrument or instruments used must be from the following list of qualifying instruments:
 - a. Trust Funds;
 - b. Surety Bonds;
 - c. Letter of Credit;
 - d. Insurance;
 - e. Self Insurance (i.e., Financial Test and Corporate Guarantee);
 - f. Escrow Account;
 - g. Any other instrument or instruments satisfactory to the Director.
 2. The qualifying instrument or instruments must be sufficient to cover the cost of:
 - a. Corrective action under R18-9-J659;
 - b. Injection well plugging under R18-9-J667;
 - c. Post injection site care and site closure under R18-9-J668; and
 - d. Emergency and remedial response under R18-9-J669.
 3. The financial responsibility instrument or instruments must be sufficient to address endangerment of USDWs.
 4. The qualifying financial responsibility instrument or instruments must comprise protective conditions of coverage.
 - a. Protective conditions of coverage must include at a minimum cancellation, renewal, and continuation

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

provisions, specifications on when the provider becomes liable following a notice of cancellation if there is a failure to renew with a new qualifying financial instrument, and requirements for the provider to meet a minimum rating, minimum capitalization, and ability to pass the bond rating when applicable.

- i. Cancellation – for purposes of this Part, an owner or operator must provide that their financial mechanism may not cancel, terminate or fail to renew except for failure to pay such financial instrument. If there is a failure to pay the financial instrument, the financial institution may elect to cancel, terminate, or fail to renew the instrument by sending notice by certified mail to the owner or operator and the Director. The cancellation must not be final for 120 days after receipt of cancellation notice. The owner or operator must provide an alternate financial responsibility demonstration within 60 days of notice of cancellation, and if an alternate financial responsibility demonstration is not acceptable (or possible), any funds from the instrument being cancelled must be released within 60 days of notification by the Director.
 - ii. Renewal – for purposes of this Part, owners or operators must renew all financial instruments, if an instrument expires, for the entire term of the geologic sequestration project. The instrument may be automatically renewed as long as the owner or operator has the option of renewal at the face amount of the expiring instrument. The automatic renewal of the instrument must, at a minimum, provide the holder with the option of renewal at the face amount of the expiring financial instrument.
 - iii. Cancellation, termination, or failure to renew may not occur and the financial instrument will remain in full force and effect in the event that on or before the date of expiration: The Director deems the facility abandoned; or the permit is terminated or revoked or a new permit is denied; or closure is ordered by the Director or a U.S. district court or other court of competent jurisdiction; or the owner or operator is named as debtor in a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code; or the amount due is paid.
5. The qualifying financial responsibility instrument or instruments must be approved by the Director.
 - a. The Director shall consider and approve the financial responsibility demonstration for all the phases of the geologic sequestration project prior to issue a Class VI permit under R18-9-J657.
 - b. The owner or operator must provide any updated information related to their financial responsibility instrument or instruments on an annual basis and if there are any changes, the Director must evaluate, within a reasonable time, the financial responsibility demonstration to confirm that the instrument or instruments used remain adequate for use. The owner or operator must maintain financial responsibility requirements regardless of the status of the Director's review of the financial responsibility demonstration.
 - c. The Director may disapprove the use of a financial instrument if they determine that it is not sufficient to meet the requirements of this Section.
 6. The owner or operator may demonstrate financial responsibility by using one or multiple qualifying financial instruments for specific phases of the geologic sequestration project.
 - a. In the event that the owner or operator combines more than one instrument for a specific geologic sequestration phase such combination must be limited to instruments that are not based on financial strength or performance, for example trust funds, surety bonds guaranteeing payment into a trust fund, letters of credit, escrow account, and insurance. In this case, it is the combination of mechanisms, rather than the single mechanism, which must provide financial responsibility for an amount at least equal to the current cost estimate.
 - b. When using a third-party instrument to demonstrate financial responsibility, the owner or operator must provide a proof that the third-party providers either have passed financial strength requirements based on credit ratings; or has met a minimum rating, minimum capitalization, and ability to pass the bond rating when applicable.
 - c. An owner or operator using certain types of third-party instruments must establish a standby trust to enable ADEQ to be party to the financial responsibility agreement without ADEQ being the beneficiary of any funds. The standby trust fund must be used along with other financial responsibility instruments (e.g., surety bonds, letters of credit, or escrow accounts) to provide a location to place funds if needed.
 - d. An owner or operator may deposit money to an escrow account to cover financial responsibility requirements; this account must segregate funds sufficient to cover estimated costs for Class VI (geologic sequestration) financial responsibility from other accounts and uses.
 - e. An owner or operator or its guarantor may use self insurance to demonstrate financial responsibility for geologic sequestration projects. In order to satisfy this requirement the owner or operator must meet a Tangible Net Worth of an amount approved by the Director, have a Net working capital and tangible net worth each at least six times the sum of the current well plugging, post injection site care and site closure cost, have assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current well plugging, post injection site care and site closure cost, and must submit a report of its bond rating and financial information annually. In addition the owner or operator must either: Have a bond rating test of AAA, AA, A, or BBB as issued by Standard & Poor's or Aaa, Aa, A, or Baa as issued by Moody's; or meet all of the following five financial ratio thresholds: A ratio of total liabilities to net worth less than 2.0; a ratio of current assets to current liabilities greater than 1.5; a ratio of the sum of net income plus depreciation, depletion, and amortization to total liabili-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ties greater than 0.1; A ratio of current assets minus current liabilities to total assets greater than -0.1; and a net profit (revenues minus expenses) greater than 0.

- f. An owner or operator who is not able to meet corporate financial test criteria may arrange a corporate guarantee by demonstrating that its corporate parent meets the financial test requirements on its behalf. The parent's demonstration that it meets the financial test requirement is insufficient if it has not also guaranteed to fulfill the obligations for the owner or operator.
 - g. An owner or operator may obtain an insurance policy to cover the estimated costs of geologic sequestration activities requiring financial responsibility. This insurance policy must be obtained from a third party provider.
- B.** The requirement to maintain adequate financial responsibility and resources is directly enforceable regardless of whether the requirement is a condition of the permit.
1. The owner or operator must maintain financial responsibility and resources until:
 - a. The Director receives and approves the completed post-injection site care and site closure plan; and
 - b. The Director approves site closure.
 2. The owner or operator may be released from a financial instrument in the following circumstances:
 - a. The owner or operator has completed the phase of the geologic sequestration project for which the financial instrument was required and has fulfilled all its financial obligations as determined by the Director, including obtaining financial responsibility for the next phase of the geologic sequestration project, if required; or
 - b. The owner or operator has submitted a replacement financial instrument and received written approval from the Director accepting the new financial instrument and releasing the owner or operator from the previous financial instrument.
- C.** The owner or operator must have a detailed written estimate, in current dollars, of the cost of performing corrective action on wells in the area of review, plugging the injection well or wells, post-injection site care and site closure, and emergency and remedial response.
1. The cost estimate must be performed for each phase separately and must be based on the costs to the regulatory agency of hiring a third party to perform the required activities. A third party is a party who is not within the corporate structure of the owner or operator.
 2. During the active life of the geologic sequestration project, the owner or operator must adjust the cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument or instruments used to comply with subsection (A) and provide this adjustment to the Director. The owner or operator must also provide to the Director written updates of adjustments to the cost estimate within 60 days of any amendments to the area of review and corrective action plan as required under R18-9-J659, the injection well plugging plan under R18-9-J667, the post-injection site care and site closure plan as required under R18-9-J668, and the emergency and remedial response plan as required under R18-9-J669.
3. The Director must approve any decrease or increase to the initial cost estimate. During the active life of the geologic sequestration project, the owner or operator must revise the cost estimate no later than 60 days after the Director has approved the request to modify the area of review and corrective action plan as required under R18-9-J659, the injection well plugging plan under R18-9-J667, the post-injection site care and site closure plan as required under R18-9-J668, and the emergency and response plan as required under R18-9-J669, if the change in the plan increases the cost. If the change to the plan decreases the cost, any withdrawal of funds must be approved by the Director. Any decrease to the value of the financial assurance instrument must first be approved by the Director. The revised cost estimate must be adjusted for inflation as specified at subsection (C)(2).
 4. Whenever the current cost estimate increases to an amount greater than the face amount of a financial instrument currently in use, the owner or operator, within 60 days after the increase, must either cause the face amount to be increased to an amount at least equal to the current cost estimate and submit evidence of such increase to the Director, or obtain other financial responsibility instruments to cover the increase. Whenever the current cost estimate decreases, the face amount of the financial assurance instrument may be reduced to the amount of the current cost estimate only after the owner or operator has received written approval from the Director.
- D.** The owner or operator must notify the Director by certified mail of adverse financial conditions such as bankruptcy that may affect the ability to carry out injection well plugging and post-injection site care and site closure.
1. In the event that the owner or operator or the third party provider of a financial responsibility instrument is going through a bankruptcy, the owner or operator must notify the Director by certified mail of the commencement of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code, naming the owner or operator as debtor, within 10 days after commencement of the proceeding.
 2. A guarantor of a corporate guarantee must make such a notification to the Director if they are named as debtor, as required under the terms of the corporate guarantee.
 3. An owner or operator who fulfills the requirements of subsection (A) by obtaining a trust fund, surety bond, letter of credit, escrow account, or insurance policy will be deemed to be without the required financial assurance in the event of bankruptcy of the trustee or issuing institution, or a suspension or revocation of the authority of the trustee institution to act as trustee of the institution issuing the trust fund, surety bond, letter of credit, escrow account, or insurance policy. The owner or operator must establish other financial assurance within 60 days after such an event.
- E.** The owner or operator must provide an adjustment of the cost estimate to the Director within 60 days of notification by the Director, if the Director determines during the annual evaluation of the qualifying financial responsibility instrument or instruments that the most recent demonstration is no longer adequate to cover the cost of corrective action as required under R18-9-J659, injection well plugging under R18-9-J667, post-injection site care and site closure as required under R18-9-J668, and emergency and remedial response as required under R18-9-J669.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- F. The Director must approve the use and length of pay-in-periods for trust funds or escrow accounts.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J661. Class VI; Injection Well Construction Requirements

- A. The owner or operator must ensure that all Class VI wells are constructed and completed to:
1. Prevent the movement of fluids into or between USDWs or into any unauthorized zones;
 2. Permit the use of appropriate testing devices and work-over tools; and
 3. Permit continuous monitoring of the annulus space between the injection tubing and long string casing.
- B. Casing and Cementing of Class VI Wells.
1. Casing and cement or other materials used in the construction of each Class VI well must have sufficient structural strength and be designed for the life of the geologic sequestration project. All well materials must be compatible with fluids with which the materials may be expected to come into contact and must meet or exceed standards developed for such materials by the American Petroleum Institute, ASTM International, or comparable standards acceptable to the Director. The casing and cementing program must be designed to prevent the movement of fluids into or between USDWs. In order to allow the Director to determine and specify casing and cementing requirements, the owner or operator must provide the following information:
 - a. Depth to the injection zone or zones;
 - b. Injection pressure, external pressure, internal pressure, and axial loading;
 - c. Hole size;
 - d. Size and grade of all casing strings (wall thickness, external diameter, nominal weight, length, joint specification, and construction material);
 - e. Corrosiveness of the carbon dioxide stream and formation fluids;
 - f. Down-hole temperatures;
 - g. Lithology of injection and confining zone or zones;
 - h. Type or grade of cement and cement additives; and
 - i. Quantity, chemical composition, and temperature of the carbon dioxide stream.
 2. Surface casing must extend through the base of the lowermost USDW and be cemented to the surface through the use of a single or multiple strings of casing and cement.
 3. At least one long string casing, using a sufficient number of centralizers, must extend to the injection zone and must be cemented by circulating cement to the surface in one or more stages.
 4. Circulation of cement may be accomplished by staging. The Director may approve an alternative method of cementing in cases where the cement cannot be recirculated to the surface, provided the owner or operator can demonstrate by using logs that the cement does not allow fluid movement behind the well bore.
 5. Cement and cement additives must be compatible with the carbon dioxide stream and formation fluids and of sufficient quality and quantity to maintain integrity over the design life of the geologic sequestration project. The integrity and location of the cement shall be verified

using technology capable of evaluating cement quality radially and identifying the location of channels to ensure that USDWs are not endangered.

- C. Tubing and packer.
1. Tubing and packer materials used in the construction of each Class VI well must be compatible with fluids with which the materials may be expected to come into contact and must meet or exceed standards developed for such materials by the American Petroleum Institute, ASTM International, or comparable standards acceptable to the Director.
 2. All owners or operators of Class VI wells must inject fluids through tubing with a packer set at a depth opposite a cemented interval at the location approved by the Director.
 3. In order for the Director to determine and specify requirements for tubing and packer, the owner or operator must submit the following information:
 - a. Depth of setting;
 - b. Characteristics of the carbon dioxide stream (chemical content, corrosiveness, temperature, and density) and formation fluids;
 - c. Maximum proposed injection pressure;
 - d. Maximum proposed annular pressure;
 - e. Proposed injection rate (intermittent or continuous) and volume and/or mass of the carbon dioxide stream;
 - f. Size of tubing and casing; and
 - g. Tubing tensile, burst, and collapse strengths.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J662. Class VI; Logging, Sampling, and Testing Prior to Well Operation

- A. During the drilling and construction of a Class VI injection well, the owner or operator must run appropriate logs, surveys and tests to determine or verify the depth, thickness, porosity, permeability, and lithology of, and the salinity of any formation fluids in all relevant geologic formations to ensure conformance with the injection well construction requirements under R18-9-J661 and to establish accurate baseline data against which future measurements may be compared. The owner or operator must submit to the Director a descriptive report prepared by a knowledgeable log analyst that includes an interpretation of the results of such logs and tests. At a minimum, such logs and tests must include:
1. Deviation checks during drilling on all holes constructed by drilling a pilot hole which is enlarged by reaming or another method. Such checks must be at sufficiently frequent intervals to determine the location of the borehole and to ensure that vertical avenues for fluid movement in the form of diverging holes are not created during drilling; and
 2. Before and upon installation of the surface casing:
 - a. Resistivity, spontaneous potential, and caliper logs before the casing is installed; and
 - b. A cement bond and variable density log to evaluate cement quality radially, and a temperature log after the casing is set and cemented.
 3. Before and upon installation of the long string casing:
 - a. Resistivity, spontaneous potential, porosity, caliper, gamma ray, fracture finder logs, and any other logs

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

the Director requires for the given geology before the casing is installed; and

- b. A cement bond and variable density log, and a temperature log after the casing is set and cemented.
4. A series of tests designed to demonstrate the internal and external mechanical integrity of injection wells, which may include:
 - a. A pressure test with liquid or gas;
 - b. A tracer survey such as oxygen-activation logging;
 - c. A temperature or noise log;
 - d. A casing inspection log; and
5. Any alternative methods that provide equivalent or better information and that are required by and/or approved of by the Director.
- B.** The owner or operator must take whole cores or sidewall cores of the injection zone and confining system and formation fluid samples from the injection zone or zones, and must submit to the Director a detailed report prepared by a log analyst that includes: Well log analyses (including well logs), core analyses, and formation fluid sample information. The Director may accept information on cores from nearby wells if the owner or operator can demonstrate that core retrieval is not possible and that such cores are representative of conditions at the well. The Director may require the owner or operator to core other formations in the borehole.
- C.** The owner or operator must record the fluid temperature, pH, conductivity, reservoir pressure, and static fluid level of the injection zone or zones.
- D.** At a minimum, the owner or operator must determine or calculate the following information concerning the injection and confining zone or zones:
 1. Fracture pressure;
 2. Other physical and chemical characteristics of the injection and confining zone or zones; and
 3. Physical and chemical characteristics of the formation fluids in the injection zone or zones.
- E.** Upon completion, but prior to operation, the owner or operator must conduct the following tests to verify hydrogeologic characteristics of the injection zone or zones:
 1. A pressure fall-off test; and,
 2. A pump test; or
 3. Injectivity tests.
- F.** The owner or operator must provide the Director with the opportunity to witness all logging and testing by this Part. The owner or operator must submit a schedule of such activities to the Director 30 days prior to conducting the first test and submit any changes to the schedule 30 days prior to the next scheduled test.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J663. Class VI; Injection Well Operating Requirements

- A.** Except during stimulation, the owner or operator must ensure that injection pressure does not exceed 90 percent of the fracture pressure of the injection zone or zones so as to ensure that the injection does not initiate new fractures or propagate existing fractures in the injection zone or zones. In no case may injection pressure initiate fractures in the confining zone or zones or cause the movement of injection or formation fluids that endangers a USDW. Pursuant to requirements at R18-9-J657(B)(9), all stimulation programs must be approved by the

Director as part of the permit application and incorporated into the permit.

- B.** Injection between the outermost casing protecting USDWs and the well bore is prohibited.
- C.** The owner or operator must fill the annulus between the tubing and the long string casing with a non-corrosive fluid approved by the Director. The owner or operator must maintain on the annulus a pressure that exceeds the operating injection pressure, unless the Director determines that such requirement might harm the integrity of the well or endanger USDWs.
- D.** Other than during periods of well workover (maintenance) approved by the Director in which the sealed tubing-casing annulus is disassembled for maintenance or corrective procedures, the owner or operator must maintain mechanical integrity of the injection well at all times.
- E.** The owner or operator must install and use:
 1. Continuous recording devices to monitor: The injection pressure; the rate, volume and/or mass, and temperature of the carbon dioxide stream; and the pressure on the annulus between the tubing and the long string casing and annulus fluid volume; and
 2. Alarms and automatic surface shut-off systems or, at the discretion of the Director, down-hole shut-off systems for onshore wells or, other mechanical devices that provide equivalent protection.
- F.** If a shutdown (such as down-hole or at the surface) is triggered or a loss of mechanical integrity is discovered, the owner or operator must immediately investigate and identify as expeditiously as possible the cause of the shutoff. If, upon such investigation, the well appears to be lacking mechanical integrity, or if monitoring required under subsection (E) otherwise indicates that the well may be lacking mechanical integrity, the owner or operator must:
 1. Immediately cease injection;
 2. Take all steps reasonably necessary to determine whether there may have been a release of the injected carbon dioxide stream or formation fluids into any unauthorized zone;
 3. Notify the Director within 24 hours;
 4. Restore and demonstrate mechanical integrity to the satisfaction of the Director prior to resuming injection; and
 5. Notify the Director when injection can be expected to resume.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J664. Class VI; Mechanical Integrity

- A.** A Class VI well has mechanical integrity if:
 1. There is no significant leak in the casing, tubing, or packer; and
 2. There is no significant fluid movement into a USDW through channels adjacent to the injection well bore.
- B.** To evaluate the absence of significant leaks under subsection (A)(1), owners or operators must, following an initial annulus pressure test, continuously monitor injection pressure, rate, injected volumes; pressure on the annulus between tubing and long-string casing; and annulus fluid volume as specified in R18-9-J663;
- C.** At least once per year, the owner or operator must use one of the following methods to determine the absence of significant fluid movement under subsection (A)(2):

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. An approved tracer survey such as an oxygen-activation log; or
 2. A temperature or noise log.
- D.** If required by the Director, at a frequency specified in the testing and monitoring plan required at R18-9-J665, the owner or operator must run a casing inspection log to determine the presence or absence of corrosion in the long-string casing.
- E.** The Director may require any other test to evaluate mechanical integrity under subsections (A)(1) or (2). Also, the Director may allow the use of a test to demonstrate mechanical integrity other than those listed above with the written approval of the Administrator. To obtain approval for a new mechanical integrity test, the Director must submit a written request to the Administrator setting forth the proposed test and all technical data supporting its use.
- F.** In conducting and evaluating the tests enumerated in this Section or others to be allowed by the Director, the owner or operator and the Director must apply methods and standards generally accepted in the industry. When the owner or operator reports the results of mechanical integrity tests to the Director, they shall include a description of the test or tests and the method or methods used. In making his or her evaluation, the Director must review monitoring and other test data submitted since the previous evaluation.
- G.** The Director may require additional or alternative tests if the results presented by the owner or operator under subsections (A) through (F) are not satisfactory to the Director to demonstrate that there is no significant leak in the casing, tubing, or packer, or to demonstrate that there is no significant movement of fluid into a USDW resulting from the injection activity as stated in subsections (A)(1) and (2).
- Historical Note**
New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).
- R18-9-J665. Class VI; Testing and Monitoring Requirements**
- The owner or operator of a Class VI well must prepare, maintain, and comply with a testing and monitoring plan to verify that the geologic sequestration project is operating as permitted and is not endangering USDWs. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The testing and monitoring plan must be submitted with the permit application, for Director approval, and must include a description of how the owner or operator will meet the requirements of this Section, including accessing sites for all necessary monitoring and testing during the life of the project. Testing and monitoring associated with geologic sequestration projects must, at a minimum, include:
1. Analysis of the carbon dioxide stream with sufficient frequency to yield data representative of its chemical and physical characteristics;
 2. Installation and use, except during well workovers as defined in R18-9-J663, of continuous recording devices to monitor injection pressure, rate, and volume; the pressure on the annulus between the tubing and the long string casing; and the annulus fluid volume added;
 3. Corrosion monitoring of the well materials for loss of mass, thickness, cracking, pitting, and other signs of corrosion, which must be performed on a quarterly basis to ensure that the well components meet the minimum standards for material strength and performance set forth in R18-9-J661, by:
 - a. Analyzing coupons of the well construction materials placed in contact with the carbon dioxide stream; or
 - b. Routing the carbon dioxide stream through a loop constructed with the material used in the well and inspecting the materials in the loop; or
 - c. Using an alternative method approved by the Director;
 4. Periodic monitoring of the ground water quality and geochemical changes above the confining zone or zones that may be a result of carbon dioxide movement through the confining zone or zones or additional identified zones including:
 - a. The location and number of monitoring wells based on specific information about the geologic sequestration project, including injection rate and volume, geology, the presence of artificial penetrations, and other factors; and
 - b. The monitoring frequency and spatial distribution of monitoring wells based on baseline geochemical data that has been collected under R18-9-J657 and on any modeling results in the area of review evaluation required by R18-9-J659(C).
 5. A demonstration of external mechanical integrity pursuant to R18-9-J664(C) at least once per year until the injection well is plugged; and, if required by the Director, a casing inspection log pursuant to requirements under R18-9-J664(D) at a frequency established in the testing and monitoring plan;
 6. A pressure fall-off test at least once every five years unless more frequent testing is required by the Director based on site-specific information;
 7. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of elevated pressure (e.g., the pressure front) by using:
 - a. Direct methods in the injection zone or zones; and,
 - b. Indirect methods (e.g., seismic, electrical, gravity, or electromagnetic surveys and/or down-hole carbon dioxide detection tools), unless the Director determines, based on site-specific geology, that such methods are not appropriate;
 8. The Director may require surface air monitoring and/or soil gas monitoring to detect movement of carbon dioxide that could endanger a USDW.
 - a. Design of Class VI surface air and/or soil gas monitoring must be based on potential risks to USDWs within the area of review;
 - b. The monitoring frequency and spatial distribution of surface air monitoring and/or soil gas monitoring must be decided using baseline data, and the monitoring plan must describe how the proposed monitoring will yield useful information on the area of review delineation and/or compliance with standards under R18-9-B608;
 - c. If an owner or operator demonstrates that monitoring employed under 40 CFR §§ 98.440 to 98.449 (Clean Air Act, 42 U.S.C. 7401 et seq.) accomplishes the goals of subsections (A)(8)(a) and (b), and meets the requirements pursuant to R18-9-J666(3)(e), a Director that requires surface air/soil gas monitoring must approve the use of monitoring employed under 40 CFR §§ 98.440 to 98.449. Compliance with 40 CFR §§ 98.440 to 98.449 pursuant

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- to this provision is considered a condition of the Class VI permit;
9. Any additional monitoring, as required by the Director, necessary to support, upgrade, and improve computational modeling of the area of review evaluation required under R18-9-J659(C) and to determine compliance with standards under R18-9-B608;
 10. The owner or operator shall periodically review the testing and monitoring plan to incorporate monitoring data collected under this Part, operational data collected under R18-9-J663, and the most recent area of review reevaluation performed under R18-9-J659(E). In no case shall the owner or operator review the testing and monitoring plan less often than once every five years. Based on this review, the owner or operator shall submit an amended testing and monitoring plan or demonstrate to the Director that no amendment to the testing and monitoring plan is needed. Any amendments to the testing and monitoring plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements under R18-9-C632 or R18-9-C633, as appropriate. Amended plans or demonstrations shall be submitted to the Director as follows:
 - a. Within one year of an area of review reevaluation;
 - b. Following any significant changes to the facility, such as addition of monitoring wells or newly permitted injection wells within the area of review, on a schedule determined by the Director; or
 - c. When required by the Director.
 11. A quality assurance and surveillance plan for all testing and monitoring requirements.
 - c. Any other test of the injection well conducted by the permittee if required by the Director.
 3. Report, within 24 hours:
 - a. Any evidence that the injected carbon dioxide stream or associated pressure front may cause an endangerment to a USDW;
 - b. Any noncompliance with a permit condition, or malfunction of the injection system, which may cause fluid migration into or between USDWs;
 - c. Any triggering of a shut-off system (i.e., down-hole or at the surface);
 - d. Any failure to maintain mechanical integrity; or
 - e. Pursuant to compliance with the requirement at R18-9-J665(8) for surface air/soil gas monitoring or other monitoring technologies, if required by the Director, any release of carbon dioxide to the atmosphere or biosphere.
 4. Owners or operators must notify the Director in writing 30 days in advance of:
 - a. Any planned well workover;
 - b. Any planned stimulation activities, other than stimulation for formation testing conducted under R18-9-J657; and
 - c. Any other planned test of the injection well conducted by the permittee.
 5. Owners or operators must submit all required reports, submittals, and notifications under Part J of this Article to EPA in an electronic format approved by EPA.
 6. Records shall be retained by the owner or operator as follows:
 - a. All data collected under R18-9-J657 for Class VI permit applications shall be retained throughout the life of the geologic sequestration project and for 10 years following site closure.
 - b. Data on the nature and composition of all injected fluids collected pursuant to R18-9-J665(1) shall be retained until 10 years after site closure. The Director may require the owner or operator to deliver the records to the Director at the conclusion of the retention period.
 - c. Monitoring data collected pursuant to R18-9-J665(2) through (9) shall be retained for 10 years after it is collected.
 - d. Well plugging reports, post-injection site care data, including, if appropriate, data and information used to develop the demonstration of the alternative post-injection site care timeframe, and the site closure report collected pursuant to requirements at R18-9-J668(F) and (H) shall be retained for 10 years following site closure.
 - e. The Director has authority to require the owner or operator to retain any records required in this Part for longer than 10 years after site closure.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J666. Class VI; Reporting Requirements

The owner or operator must provide at a minimum, the following reports to the Director, and as specified in subsection (5) to EPA, for each permitted Class VI well:

1. Semi-annual reports containing:
 - a. Any changes to the physical, chemical, and other relevant characteristics of the carbon dioxide stream from the proposed operating data;
 - b. Monthly average, maximum, and minimum values for injection pressure, flow rate and volume, and annular pressure;
 - c. A description of any event that exceeds operating parameters for annulus pressure or injection pressure specified in the permit;
 - d. A description of any event which triggers a shut-off device required pursuant to R18-9-J663(E) and the response taken;
 - e. The monthly volume and/or mass of the carbon dioxide stream injected over the reporting period and the volume injected cumulatively over the life of the project;
 - f. Monthly annulus fluid volume added; and
 - g. The results of monitoring prescribed under R18-9-J665.
2. Report, within 30 days, the results of:
 - a. Periodic tests of mechanical integrity;
 - b. Any well workover; and,

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J667. Class VI; Injection Well Plugging

- A. Prior to the well plugging, the owner or operator must flush each Class VI injection well with a buffer fluid, determine bottomhole reservoir pressure, and perform a final external mechanical integrity test.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- B.** The owner or operator of a Class VI well must prepare, maintain, and comply with a plan that is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The well plugging plan must be submitted as part of the permit application and must include the following information:
1. Appropriate tests or measures for determining bottom-hole reservoir pressure;
 2. Appropriate testing methods to ensure external mechanical integrity as specified in R18-9-J664;
 3. The type and number of plugs to be used;
 4. The placement of each plug, including the elevation of the top and bottom of each plug;
 5. The type, grade, and quantity of material to be used in plugging. The material must be compatible with the carbon dioxide stream; and
 6. The method of placement of the plugs.
- C.** The owner or operator must notify the Director in writing pursuant to R18-9-J666(5), at least 60 days before plugging of a well. At this time, if any changes have been made to the original well plugging plan, the owner or operator must also provide the revised well plugging plan. The Director may allow for a shorter notice period. Any amendments to the injection well plugging plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate.
- D.** Within 60 days after plugging, the owner or operator must submit, pursuant to R18-9-J666(5), a plugging report to the Director. The report must be certified as accurate by the owner or operator and by the person who performed the plugging operation, if other than the owner or operator. The owner or operator shall retain the well plugging report for 10 years following site closure.
- d. A proposed schedule for submitting post-injection site care monitoring results to the Director pursuant to R18-9-J666(5); and
 - e. The duration of the post-injection site care timeframe and, if approved by the Director, the demonstration of the alternative post-injection site care timeframe that ensures non-endangerment of USDWs.
3. Upon cessation of injection, owners or operators of Class VI wells must either submit an amended post-injection site care and site closure plan or demonstrate to the Director through monitoring data and modeling results that no amendment to the plan is needed. Any amendments to the post-injection site care and site closure plan must be approved by the Director, be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate.
 4. At any time during the life of the geologic sequestration project, the owner or operator may modify and resubmit the post-injection site care and site closure plan for the Director's approval within 30 days of such change.
- B.** The owner or operator shall monitor the site following the cessation of injection to show the position of the carbon dioxide plume and pressure front and demonstrate that USDWs are not being endangered.
1. Following the cessation of injection, the owner or operator shall continue to conduct monitoring as specified in the Director-approved post-injection site care and site closure plan for at least 50 years or for the duration of the alternative timeframe approved by the Director pursuant to requirements in subsection (C), unless they make a demonstration under subsection (B)(2). The monitoring must continue until the geologic sequestration project no longer poses an endangerment to USDWs and the demonstration under subsection (B)(2) is submitted and approved by the Director.
 2. If the owner or operator can demonstrate to the satisfaction of the Director before 50 years or prior to the end of the approved alternative timeframe based on monitoring and other site-specific data, that the geologic sequestration project no longer poses an endangerment to USDWs, the Director may approve an amendment to the post-injection site care and site closure plan to reduce the frequency of monitoring or may authorize site closure before the end of the 50-year period or prior to the end of the approved alternative timeframe, where they have substantial evidence that the geologic sequestration project no longer poses a risk of endangerment to USDWs.
 3. Prior to authorization for site closure, the owner or operator must submit to the Director for review and approval a demonstration, based on monitoring and other site-specific data, that no additional monitoring is needed to ensure that the geologic sequestration project does not pose an endangerment to USDWs.
 4. If the demonstration in subsection (B)(3) cannot be made at the end of the 50-year period or at the end of the approved alternative timeframe, or if the Director does not approve the demonstration, the owner or operator must submit to the Director a plan to continue post-injection site care until a demonstration can be made and approved by the Director.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J668. Class VI; Post-Injection Site Care and Site Closure

- A.** The owner or operator of a Class VI well must prepare, maintain, and comply with a plan for post-injection site care and site closure that meets the requirements of subsection (A)(2) and is acceptable to the Director. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit.
1. The owner or operator must submit the post-injection site care and site closure plan as a part of the permit application to be approved by the Director.
 2. The post-injection site care and site closure plan must include the following information:
 - a. The pressure differential between pre-injection and predicted post-injection pressures in the injection zone or zones;
 - b. The predicted position of the carbon dioxide plume and associated pressure front at site closure as demonstrated in the area of review evaluation required under R18-9-J659(C)(1);
 - c. A description of post-injection monitoring location, methods, and proposed frequency;
- C.** At the Director's discretion, the Director may approve, in consultation with EPA, an alternative post-injection site care timeframe other than the 50-year default, if an owner or operator

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

can demonstrate during the permitting process that an alternative post-injection site care timeframe is appropriate and ensures non-endangerment of USDWs. The demonstration must be based on significant, site-specific data and information including all data and information collected pursuant to R18-9-J657 or R18-9-J658, and must contain substantial evidence that the geologic sequestration project will no longer pose a risk of endangerment to USDWs at the end of the alternative post-injection site care timeframe.

1. A demonstration of an alternative post-injection site care timeframe must include consideration and documentation of:
 - a. The results of computational modeling performed pursuant to delineation of the area of review under R18-9-J659;
 - b. The predicted timeframe for pressure decline within the injection zone, and any other zones, such that formation fluids may not be forced into any USDWs; and/or the timeframe for pressure decline to pre-injection pressures;
 - c. The predicted rate of carbon dioxide plume migration within the injection zone, and the predicted timeframe for the cessation of migration;
 - d. A description of the site-specific processes that will result in carbon dioxide trapping including immobilization by capillary trapping, dissolution, and mineralization at the site;
 - e. The predicted rate of carbon dioxide trapping in the immobile capillary phase, dissolved phase, and/or mineral phase;
 - f. The results of laboratory analyses, research studies, and/or field or site-specific studies to verify the information required in subsection (C)(1)(d) and (C)(1)(e);
 - g. A characterization of the confining zone or zones including a demonstration that it is free of transmissive faults, fractures, and micro-fractures and of appropriate thickness, permeability, and integrity to impede fluid movement, such as carbon dioxide and formation fluids;
 - h. The presence of potential conduits for fluid movement including planned injection wells and project monitoring wells associated with the proposed geologic sequestration project or any other projects in proximity to the predicted/modeled, final extent of the carbon dioxide plume and area of elevated pressure;
 - i. A description of the well construction and an assessment of the quality of plugs of all abandoned wells within the area of review;
 - j. The distance between the injection zone and the nearest USDWs above and/or below the injection zone; and
 - k. Any additional site-specific factors required by the Director.
2. Information submitted to support the demonstration in subsection (C)(1) must meet the following criteria:
 - a. All analyses and tests performed to support the demonstration must be accurate, reproducible, and performed in accordance with the established quality assurance standards;
 - b. Estimation techniques must be appropriate and EPA-certified test protocols must be used where available;
 - c. Predictive models must be appropriate and tailored to the site conditions, composition of the carbon dioxide stream and injection and site conditions over the life of the geologic sequestration project;
 - d. Predictive models must be calibrated using existing information where sufficient data are available;
 - e. Reasonably conservative values and modeling assumptions must be used and disclosed to the Director whenever values are estimated on the basis of known, historical information instead of site-specific measurements;
 - f. An analysis must be performed to identify and assess aspects of the alternative post-injection site care timeframe demonstration that contribute significantly to uncertainty. The owner or operator must conduct sensitivity analyses to determine the effect that significant uncertainty may contribute to the modeling demonstration;
 - g. An approved quality assurance and quality control plan must address all aspects of the demonstration; and
 - h. Any additional criteria required by the Director.
- D. The owner or operator must notify the Director in writing at least 120 days before site closure. At this time, if any changes have been made to the original post-injection site care and site closure plan, the owner or operator must also provide the revised plan. The Director may allow for a shorter notice period.
- E. After the Director has authorized site closure, the owner or operator must plug all monitoring wells in a manner which will not allow movement of injection or formation fluids that endangers a USDW.
- F. The owner or operator must submit a site closure report to the Director within 90 days of site closure, which must thereafter be retained at a location designated by the Director for 10 years. The report must include:
 1. Documentation of appropriate injection and monitoring well plugging as specified in R18-9-J667 and subsection (E). The owner or operator must provide a copy of a survey plat which has been submitted to the local zoning authority designated by the Director. The plat must indicate the location of the injection well relative to permanently surveyed benchmarks. The owner or operator must also submit a copy of the plat to the Administrator of EPA Region 9;
 2. Documentation of appropriate notification and information to such State, local and Tribal authorities that have authority over drilling activities to enable such State, local, and Tribal authorities to impose appropriate conditions on subsequent drilling activities that may penetrate the injection and confining zone or zones; and
 3. Records reflecting the nature, composition, and volume of the carbon dioxide stream.
- G. Each owner or operator of a Class VI injection well must record a notation on the deed to the facility property or any other document that is normally examined during Title search that will in perpetuity provide any potential purchaser of the property the following information:
 1. The fact that land has been used to sequester carbon dioxide;
 2. The name of the State agency, local authority, and/or Tribe with which the survey plat was filed, as well as the address of the Environmental Protection Agency Regional Office to which it was submitted; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. The volume of fluid injected, the injection zone or zones into which it was injected, and the period over which injection occurred.
- H. The owner or operator must retain for 10 years following site closure, records collected during the post-injection site care period. The owner or operator must deliver the records to the Director at the conclusion of the retention period, and the records must thereafter be retained at a location designated by the Director for that purpose.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J669. Class VI; Emergency and Remedial Response

- A. As part of the permit application, the owner or operator must provide the Director with an emergency and remedial response plan that describes actions the owner or operator must take to address movement of the injection or formation fluids that may cause an endangerment to a USDW during construction, operation, and post-injection site care periods. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit.
- B. If the owner or operator obtains evidence that the injected carbon dioxide stream and associated pressure front may cause an endangerment to a USDW, the owner or operator must:
1. Immediately cease injection;
 2. Take all steps reasonably necessary to identify and characterize any release;
 3. Notify the Director within 24 hours; and
 4. Implement the emergency and remedial response plan approved by the Director.
- C. The Director may allow the operator to resume injection prior to remediation if the owner or operator demonstrates that the injection operation will not endanger USDWs.
- D. The owner or operator shall periodically review the emergency and remedial response plan developed under subsection (A). In no case shall the owner or operator review the emergency and remedial response plan less often than once every five years. Based on this review, the owner or operator shall submit an amended emergency and remedial response plan or demonstrate to the Director that no amendment to the emergency and remedial response plan is needed. Any amendments to the emergency and remedial response plan must be approved by the Director, must be incorporated into the permit, and are subject to the permit modification requirements at R18-9-C632 or R18-9-C633, as appropriate. Amended plans or demonstrations shall be submitted to the Director as follows:
1. Within one year of an area of review reevaluation;
 2. Following any significant changes to the facility, such as addition of injection or monitoring wells, on a schedule determined by the Director; or
 3. When required by the Director.

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

R18-9-J670. Class VI; Injection Depth Waiver Requirements

- A. This Section sets forth information which an owner or operator seeking a waiver of the Class VI injection depth requirements must submit to the Director; information the Director must

consider in consultation with all affected Public Water System Supervision Directors; the procedure for Director-- Administrator communication and waiver issuance; and the additional requirements that apply to owners or operators of Class VI wells granted a waiver of the injection depth requirements.

- B. In seeking a waiver of the requirement to inject below the lowermost USDW, the owner or operator must submit a supplemental report concurrent with permit application. The supplemental report must include the following:
1. A demonstration that the injection zone or zones is/are laterally continuous, is not a USDW, and is not hydraulically connected to USDWs; does not outcrop; has adequate injectivity, volume, and sufficient porosity to safely contain the injected carbon dioxide and formation fluids; and has appropriate geochemistry.
 2. A demonstration that the injection zone or zones is/are bounded by laterally continuous, impermeable confining units above and below the injection zone or zones adequate to prevent fluid movement and pressure buildup outside of the injection zone or zones; and that the confining unit or units is/are free of transmissive faults and fractures. The report shall further characterize the regional fracture properties and contain a demonstration that such fractures will not interfere with injection, serve as conduits, or endanger USDWs.
 3. A demonstration, using computational modeling, that USDWs above and below the injection zone will not be endangered as a result of fluid movement. This modeling should be conducted in conjunction with the area of review determination, as described in R18-9-J659, and is subject to requirements, as described in R18-9-J659(C), and periodic reevaluation, as described in R18-9-J659(E).
 4. A demonstration that well design and construction, in conjunction with the waiver, will ensure isolation of the injectate in lieu of requirements at R18-9-J661(A)(1) and will meet well construction requirements in subsection (G).
 5. A description of how the monitoring and testing and any additional plans will be tailored to the geologic sequestration project to ensure protection of USDWs above and below the injection zone or zones, if a waiver is granted.
 6. Information on the location of all the public water supplies affected, reasonably likely to be affected, or served by USDWs in the area of review.
 7. Any other information requested by the Director to inform the Administrator's decision to issue a waiver.
- C. To inform the Administrator's decision on whether to grant a waiver of the injection depth requirements at R18-9-A604 and R18-9-J661(A)(1), the Director must submit, to the Administrator, documentation of the following:
1. An evaluation of the following information as it relates to siting, construction, and operation of a geologic sequestration project with a waiver:
 - a. The integrity of the upper and lower confining units;
 - b. The suitability of the injection zone or zones, such as lateral continuity, lack of transmissive faults and fractures, knowledge of current or planned artificial penetrations into the injection zone or zones, or formations below the injection zone;
 - c. The potential capacity of the geologic formation or formations to sequester carbon dioxide, accounting for the availability of alternative injection sites;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- d. All other site characterization data, the proposed emergency and remedial response plan, and a demonstration of financial responsibility;
 - e. Community needs, demands, and supply from drinking water resources;
 - f. Planned needs, potential and/or future use of USDWs and non-USDWs in the area;
 - g. Planned or permitted water, hydrocarbon, or mineral resource exploitation potential of the proposed injection formation or formations and other formations both above and below the injection zone to determine if there are any plans to drill through the formation to access resources in or beneath the proposed injection zone or zones/formation or formations;
 - h. The proposed plan for securing alternative resources or treating USDW formation waters in the event of contamination related to the Class VI injection activity; and,
 - i. Any other applicable considerations or information requested by the Director.
2. Consultation with the Public Water System Supervision Directors of all States and Tribes having jurisdiction over lands within the area of review of a well for which a waiver is sought.
 3. Any written waiver-related information submitted by the Public Water System Supervision Director or Directors to the (UIC) Director.
- D.** Pursuant to requirements at R18-9-C620 and concurrent with the Class VI permit application notice process, the Director shall give public notice that a waiver application has been submitted. The notice shall clearly state:
1. The depth of the proposed injection zone or zones;
 2. The location of the injection well or wells;
 3. The name and depth of all USDWs within the area of review;
 4. A map of the area of review;
 5. The names of any public water supplies affected, reasonably likely to be affected, or served by USDWs in the area of review; and,
 6. The results of UIC-Public Water System Supervision consultation required under subsection (C)(2).
- E.** Following public notice, the Director shall provide all information received through the waiver application process to the Administrator. Based on the information provided, the Administrator shall provide written concurrence or non-concurrence regarding waiver issuance.
1. If the Administrator determines that additional information is required to support a decision, the Director shall provide the information. At the Administrator's discretion, they may require that public notice of the new information be initiated.
 2. In no case shall a Director of a State-approved program issue a waiver without receipt of written concurrence from the Administrator.
- F.** If a waiver is issued, within 30 days of waiver issuance, EPA shall post the following information on the Office of Water's Web site:
1. The depth of the proposed injection zone or zones;
 2. The location of the injection well or wells;
 3. The name and depth of all USDWs within the area of review;
 4. A map of the area of review;
5. The names of any public water supplies affected, reasonably likely to be affected, or served by USDWs in the area of review; and
 6. The date of waiver issuance.
- G.** Upon receipt of a waiver of the requirement to inject below the lowermost USDW for geologic sequestration, the owner or operator of the Class VI well must comply with:
1. All requirements at R18-9-J659, R18-9-J660, R18-9-J662, R18-9-J663, R18-9-J664, R18-9-J666, R18-9-J667, and R18-9-J669;
 2. All requirements at R18-9-J661 with the following modified requirements:
 - a. The owner or operator must ensure that Class VI wells with a waiver are constructed and completed to prevent movement of fluids into any unauthorized zones including USDWs, in lieu of requirements at R18-9-J661(A)(1).
 - b. The casing and cementing program must be designed to prevent the movement of fluids into any unauthorized zones including USDWs in lieu of requirements at R18-9-J661(B)(1).
 - c. The surface casing must extend through the base of the nearest USDW directly above the injection zone and be cemented to the surface; or, at the Director's discretion, another formation above the injection zone and below the nearest USDW above the injection zone.
 3. All requirements at R18-9-J665 with the following modified requirements:
 - a. The owner or operator shall monitor the groundwater quality, geochemical changes, and pressure in the first USDWs immediately above and below the injection zone or zones; and in any other formations at the discretion of the Director.
 - b. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of elevated pressure by using direct methods to monitor for pressure changes in the injection zone or zones; and, indirect methods (such as seismic, electrical, gravity, or electromagnetic surveys and/or down-hole carbon dioxide detection tools), unless the Director determines, based on site-specific geology, that such methods are not appropriate.
 4. All requirements at R18-9-J668 with the following, modified post-injection site care monitoring requirements:
 - a. The owner or operator shall monitor the groundwater quality, geochemical changes and pressure in the first USDWs immediately above and below the injection zone; and in any other formations at the discretion of the Director.
 - b. Testing and monitoring to track the extent of the carbon dioxide plume and the presence or absence of elevated pressure by using direct methods in the injection zone or zones; and indirect methods, unless the Director determines based on site-specific geology, that such methods are not appropriate.
 5. Any additional requirements requested by the Director designed to ensure protection of USDWs above and below the injection zone or zones.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

Table 1: Applicable Standards National Primary Drinking Water Regulations

| Contaminant | MCL ¹ (mg/L) ² |
|------------------------------------|--------------------------------------|
| Alachlor | 0.002 |
| Alpha/photon emitters | 15 picocuries per Liter (pCi/L) |
| Antimony | 0.006 |

| Vinyl chloride | 0.002 |
| Xylenes (total) | 10 |

NOTES

¹ Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology and taking cost into consideration. MCLs are enforceable standards.

² Units are in milligrams per liter (mg/L) unless otherwise noted. Milligrams per liter are equivalent to parts per million (ppm).

³ A routine sample that is fecal coliform-positive or E. coli-positive triggers repeat samples-if any repeat sample is total coliform-positive, the system has an acute MCL violation. A routine sample that is total coliform-positive, and fecal coliform-negative or E. coli-negative triggers repeat samples – if any repeat sample is fecal coliform-positive or E. coli-positive, the system has an acute MCL violation. See also Total Coliforms.

⁴ No more than 5.0 percent samples total coliform-positive in a month. (For water systems that collect fewer than 40 routine sam-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ples per month, no more than one sample can be total coliform-positive per month.) Every sample that has total coliform must be analyzed for either fecal coliforms or E. coli. If two consecutive TC-positive samples, and one is also positive for E. coli or fecal coliforms, system has an acute MCL violation.

Historical Note

New Table 1, under Article 6, Part J made by final rulemaking at 28 A.A.R. 1903 (August 5, 2022), effective September 6, 2022 (Supp. 22-3).

ARTICLE 7. USE OF RECYCLED WATER**R18-9-701. Renumbered****Historical Note**

Former Section R9-20-401 repealed, new Section R9-20-401 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-401 renumbered without change as Section R18-9-701 (Supp. 87-3). Amended by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-701 renumbered to R18-9-A701 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-702. Renumbered**Historical Note**

Former Section R9-20-402 repealed, new Section R9-20-402 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-402 renumbered without change as Section R18-9-702 (Supp. 87-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-702 renumbered to R18-9-A702 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-703. Renumbered**Historical Note**

Former Section R9-20-403 repealed, new Section R9-20-403 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-403 renumbered without change as Section R18-9-703 (Supp. 87-3). Editorial change to labels in subsection (c)(8) (Supp. 89-4). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-703 renumbered to R18-9-B701 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-704. Renumbered**Historical Note**

Former Section R9-20-404 repealed, new Section R9-20-404 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-404 renumbered without change as Section R18-9-704 (Supp. 87-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-704 amended by final rulemaking at 22 A.A.R. 1696, effective August 12, 2016 (Supp. 16-2). Section R18-9-704 and Table 1 renumbered to R18-9-B702 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-705. Renumbered**Historical Note**

Former Section R9-20-405 repealed, new Section R9-20-405 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-405 renumbered without change as Section R18-9-705 (Supp. 87-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-705 renumbered to R18-9-A703 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-706. Renumbered**Historical Note**

Former Section R9-20-406 repealed, new Section R9-20-406 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-406 renumbered without change as Section R18-9-706 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-706 renumbered to R18-9-B703 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-707. Renumbered**Historical Note**

Former Section R9-20-407 repealed, new Section R9-30-407 adopted effective May 24, 1985 (Supp. 85-3). Former Section R9-20-407 renumbered without change as Section R18-9-707 (Supp. 87-3). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-707 renumbered to R18-9-C701 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-708. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-708 renumbered to R18-9-A704 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-709. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-709 renumbered to R18-9-A705 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-710. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-710 renumbered to R18-9-A706 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-711. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-711 renumbered to R18-9-D701 by final rulemak-

ing at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-712. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-712 renumbered to R18-9-B704 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-713. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-713 renumbered to R18-9-B705 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-714. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-714 renumbered to R18-9-B706 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-715. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-715 renumbered to R18-9-B707 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-716. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-716 renumbered to R18-9-B708 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-717. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-717 renumbered to R18-9-B709 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-718. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-718 renumbered to R18-9-B710 by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-719. Renumbered**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section R18-9-719 renumbered to R18-9-D702 by final rulemak-

ing at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-720. Repealed**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 758, effective January 16, 2001 (Supp. 01-1). Section repealed by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

PART A. GENERAL PROVISIONS

R18-9-A701. Definitions

Unless provided otherwise, the definitions provided in A.R.S. § 49-201, A.A.C. R18-9-101, R18-9-601, R18-11-301, and the following terms apply to this Article:

1. "Advanced reclaimed water treatment facility" means a facility that treats and purifies Class A+ or Class B+ reclaimed water to produce potable water suitable for distribution for human consumption. R18-9-B702(B) does not apply to an advanced reclaimed water treatment facility. Potable water produced by an advanced reclaimed water treatment facility is not reclaimed water.
2. "Direct reuse" means the beneficial use of reclaimed water for a purpose allowed by this Article. The following is not a direct reuse of reclaimed water:
 - a. The use of water subsequent to its discharge under the conditions of a National or Arizona Pollutant Discharge Elimination System permit;
 - b. The use of water subsequent to discharge under the conditions of an Aquifer Protection Permit issued under 18 A.A.C. 9, Articles 1 through 3;
 - c. The use of industrial wastewater, reclaimed water, or both, in a workplace subject to a federal program that protects workers from workplace exposures; or
 - d. The use of potable water produced by an advanced reclaimed water treatment facility.
3. "Direct reuse site" means an area permitted for the application or impoundment of reclaimed water. An impoundment operated for disposal under an Aquifer Protection Permit is not a direct reuse site.
4. "End user" means a person who directly reuses reclaimed water meeting the standards for Classes A+, A, B+, B, and C, established under 18 A.A.C. 11, Article 3.
5. "*Gray water*" means wastewater that has been collected separately from a sewage flow and that originates from a clothes washer or a bathroom tub, shower or sink but that does not include wastewater from a kitchen sink, dishwasher or toilet. A.R.S. § 49-201(18).
6. "Industrial wastewater" means wastewater generated from an industrial process.
7. "Irrigation" means the beneficial use of water or reclaimed water, or both, for growing crops, turf, or silviculture, or for landscaping.
8. "Open access" means access to reclaimed water by the general public is uncontrolled.
9. "Open water conveyance" means any constructed open waterway, including canals and laterals, that transports reclaimed water from a sewage treatment facility to a reclaimed water blending facility or from a sewage treatment facility or reclaimed water blending facility to the point of land application or end use. An open water conveyance does not include waters of the United States.
10. "Pipeline conveyance" means any system of pipelines that transports reclaimed water from a sewage treatment

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

facility to a reclaimed water blending facility or from a sewage treatment facility or reclaimed water blending facility to the point of land application or end use.

11. "Reclaimed water" means water that has been treated or processed by a wastewater treatment plant or an on-site wastewater treatment facility. A.R.S. § 49-201(32).
12. "Reclaimed water agent" means a person who holds a permit to distribute reclaimed water to more than one end user.
13. "Reclaimed water blending facility" means an installation or method of operation that receives reclaimed water from a sewage treatment facility or other reclaimed water blending facility classified to produce Class C or better reclaimed water and blends it with other water so that the produced water may be used for a higher-class purpose listed in 18 A.A.C. 11, Article 3, Table A.
14. "Recycled water" means a processed water that originated as a waste or discarded water, including reclaimed water and gray water, for which the Department has designated water quality specifications to allow the water to be used as a supply.
15. "Restricted access" means that access to reclaimed water by the general public is controlled.
16. "Sewage Treatment Facility" means a sewage treatment facility as defined in 18 A.A.C. 9, Article 1.

Historical Note

New Section R18-9-A701 renumbered from R18-9-701 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A702. Applicability and Standards for Recycled Water

- A. This Article applies to:
 1. An owner or operator of a sewage treatment facility that generates reclaimed water for direct reuse,
 2. An owner or operator of a reclaimed water blending facility,
 3. A reclaimed water agent,
 4. An end user of reclaimed water,
 5. A person who uses recycled water regulated under this Article,
 6. A person who directly reuses reclaimed water from a sewage treatment facility combined with industrial wastewater or combined with water from an industrial wastewater treatment facility, and
 7. A person who directly reuses reclaimed water from an industrial wastewater treatment facility in the production or processing of a crop or substance that may be used as human or animal food.
- B. Reclaimed water classes A+, A, B+, B, and C specified in this Article shall meet the standards established in 18 A.A.C. 11, Article 3.
- C. Nothing in this Article exempts the disposal of reclaimed water from the Aquifer Protection Permit requirements under A.R.S. Title 49, Chapter 2, Articles 1, 2, and 3.

Historical Note

New Section R18-9-A702 renumbered from R18-9-702 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A703. Recycled Water Individual Permit Application

- A. To apply for a Recycled Water Individual Permit, a person shall provide the Department with:
 1. The applicable permit fee specified under 18 A.A.C. 14; and
 2. The following information on a form provided by the Department:
 - a. The name, e-mail address, telephone number, and mailing address of the owner or operator of the facility or, if applicable, the reclaimed water agent;
 - b. The latitude and longitude coordinates; township range, and section; site address, if applicable; and a map showing the facility or site location;
 - c. Any other federal or state environmental permits issued to the applicant;
 - d. Source of recycled water to be used;
 - e. The applicant may propose for approval, and the Department may issue, a single permit that includes more than one type of recycled water allowed by this article, including for multiple classes of reclaimed water, if the applicant demonstrates the waters will be treated appropriately for the end use;
 - f. The applicant may propose, and the Department may permit, the inclusion of kitchen sink and dishwasher wastewater with gray water under a Recycled Water Individual Permit, if the applicant demonstrates such waters will be treated appropriately for the end use;
 - g. Estimated volume of recycled water to be used on an annual basis;
 - h. Class of reclaimed water to be directly reused, if applicable;
 - i. Description of the use activity;
 - j. Any treatment measures utilized to meet or maintain reclaimed water quality standards or otherwise ensure the quality of the recycled water is fit for the intended use; and
 - k. The applicant's certification that the information submitted in the application is true and accurate to the best of the applicant's knowledge.

B. Public participation.

1. Notice of Preliminary Decision.
 - a. The Department shall publish the Notice of Preliminary Decision regarding the issuance or denial of a final permit determination on the Department's website.
 - b. The Department shall accept written comments from the public before a Recycled Water Individual Permit is issued or denied.
 - c. The written public comment period begins on the publication date of the Notice of Preliminary Decision and extends for 30 calendar days.
2. After publishing the notice specified in subsection (B)(1)(a), the Department shall hold a public hearing to address the Notice of Preliminary Decision if the Department determines that:
 - a. Significant public interest in a public hearing exists, or
 - b. Significant issues or information have been brought to the attention of the Department that are relevant to the permitting decision and have not been considered previously in the permitting process.
3. If the Department determines a public hearing is necessary and a public hearing has not already been noticed under subsection (B)(1)(a), the Department shall schedule a public hearing and republish the Notice of Preliminary Decision.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

nary Decision and notice of the public hearing on the Department's website.

4. The Department shall accept written public comment until the close of the hearing record as specified by the person presiding at the public hearing.
- C. Final permit issuance or denial.
1. The Department may deny a Recycled Water Individual Permit if the Department determines upon completion of the application process the applicant has:
 - a. Failed or refused to correct a deficiency in the permit application;
 - b. Failed to demonstrate the facility and the operation will protect public health and water quality. This determination shall be based on:
 - i. The information submitted in the permit application,
 - ii. Any information submitted to the Department as written public comment or following a public hearing; or
 - iii. Any information relevant to the demonstration developed or acquired by the Department, or
 - c. Provided false or misleading information.
 2. If the Department denies a Recycled Water Individual Permit the Department shall provide the applicant with written notification explaining the following:
 - a. The reasons for the denial with references to the statutes or rules on which the denial is based.
 - b. The applicant's right to appeal the denial, including the number of days the applicant has to file a notice of appeal, and the name and telephone number of the Department contact person who can answer questions regarding the appeals process.
 - c. The applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.

Historical Note

New Section R18-9-A703 renumbered from R18-9-705 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A704. Recycled Water General Permit

- A. Type 1 Recycled Water General Permit for Gray Water. A person may use recycled water without notice to the Department if the use:
1. Is specifically authorized by and meets the requirements of this Article, and
 2. Complies with the requirements of the Type 1 Recycled Water General Permit under this Article.
- B. Type 2 Recycled Water General Permit for Reclaimed Water.
1. A person may use recycled water under a Type 2 Recycled Water General Permit if:
 - a. The use is authorized by and meets the requirements of this Article;
 - b. The use meets all the conditions of the applicable Type 2 Recycled Water General Permit under this Article;
 - c. The person files a Notice of Intent to Use Recycled Water under subsection (B)(2); and
 - d. The person submits the applicable fee established in 18 A.A.C. 14.
 2. Notice of Intent to Use Recycled Water.
 - a. A person shall submit, by mail, in person, or by another method approved by the Department, the

Notice of Intent to Use Recycled Water on a form provided by the Department.

- b. The Notice of Intent to Use Recycled Water shall include:
 - i. The name, address, e-mail address, and telephone number of the applicant;
 - ii. The name, address, and telephone number of the contact person;
 - iii. The source, estimated volume, and, if applicable, class of recycled water to be used;
 - iv. The latitude and longitude coordinates of the approximate center point of the use site;
 - v. The description of the use activity; and
 - vi. The applicant's certification that the applicant agrees to comply with all requirements of this Article, including specific terms of the applicable Recycled Water General Permit.
 - c. For a Type 2 Recycled Water General Permit for Direct Reuse of Reclaimed Water, the Notice of Intent to Use Recycled Water must include the description of the direct reuse activity, including a description of acreage and the type of vegetation to be irrigated, if applicable to the type of direct reuse activity.
3. The Department shall notify the applicant that the Department received the Notice of Intent to Use Recycled Water and that the applicant is authorized to use the recycled water according to Type 2 permit conditions.
- C. Type 3 Recycled Water General Permit for Reclaimed Water and Type 3 Recycled Water General Permit for Gray Water. A person shall not operate under a Type 3 Recycled Water General Permit until the Department issues a written Recycled Water Authorization.
1. Application submittal. The applicant shall submit, either by mail, in person at the Department, or by another method approved by the Department:
 - a. The Notice of Intent to Use Recycled Water on a form provided by the Department containing the information specified in the applicable Type 3 Recycled Water General Permit under this Article, and
 - b. The applicable fee established in 18 A.A.C. 14.
 2. Issuance of Recycled Water Authorization. If, after reviewing the Notice of Intent to Use Recycled Water, the Department determines the direct reuse conforms with the conditions of a Type 3 Recycled Water General Permit and all other applicable requirements of this Article, the Department shall issue the Recycled Water Authorization.
 3. Denial of Recycled Water Authorization.
 - a. If the Department determines on the basis of its review or an inspection the use does not conform to the conditions of the applicable Type 3 Recycled Water General Permit or other applicable requirements of this Article, the Department shall notify the applicant of its decision not to issue the Recycled Water Authorization.
 - b. The applicant may appeal the decision not to issue a Recycled Water Authorization under A.R.S. §§ 41-1092 through 41-1092.12.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section R18-9-A704 renumbered from R18-9-708 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A705. Recycled Water Permit Term, Information Changes, and Renewal

- A.** A recycled water general permit is valid as follows:
1. A Type 1 Recycled Water General Permit is valid as long as the conditions of the general permit and the requirements of this Article are met. No renewal is required.
 2. A Type 2 Recycled Water General Permit is valid for five years from the date the Department receives the Notice of Intent to Use Recycled Water;
 3. A Type 3 Recycled Water General Permit is valid for five years from the date the Recycled Water Authorization is issued.
- B.** If any change in the following information occurs, a permittee operating under any individual, or Type 2 or Type 3 recycled water general permit shall update the Department with such changes at least once annually by January 31:
1. Permittee,
 2. Ownership,
 3. Contact person,
 4. Phone number, address, email address, or telephone number, or any combination of any of the above, for permittee or contact person,
 5. Name of the use site,
 6. For a Type 2 Recycled Water General Permit for Direct Reuse of Class A + or B + Reclaimed Water remaining under the same ownership:
 - a. Expansion of the reuse area,
 - b. Addition of another allowable use if it is located within the same property boundary as the boundary identified in the Notice of Intent to Use Recycled Water submitted to the Department.
 7. An increase in Class A, B, or C reclaimed water use of more than ten percent but less than twenty percent above the volume of reclaimed water currently permitted for use at the reuse site, if applicable.
- C.** To renew any Type 2 or Type 3 Recycled Water General Permit, a permittee must submit a Notice of Renewal at least 30 days before the permit expires and include the applicable fee established in 18 A.A.C. 14. A permittee may update or change any information as described in subsection (B) in a Notice of Renewal.
- D.** For changes not described in subsections (B) or (C), the permittee must submit a new Notice of Intent to Use Recycled Water or a Recycled Water Individual Permit application, as applicable.

Historical Note

New Section R18-9-A705 renumbered from R18-9-709 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A706. Recycled Water Permit Revocation

- A.** After notice and opportunity for a hearing, the Director may revoke coverage under a Recycled Water General Permit and require the permittee to obtain an individual permit in order to operate for any of the following:
1. The permittee failed to comply with any applicable provision of A.R.S. Title 49, Chapter 2; Article 7 of this Chapter; or any permit condition;
 2. The permittee misrepresented or omitted a fact, information, or data related to an application or permit condition;

3. The Director determines a permitted activity is causing or will cause a violation of a water quality standard established under A.R.S. § 49-221;
 4. A permitted activity is causing or will cause imminent and substantial endangerment to public health or the environment.
- B.** The Director may revoke coverage under a general permit for any or all facilities within a specific geographic area, if, due to geologic or hydrologic conditions, the cumulative effect of the facilities subject to the Recycled Water General Permit has violated or will violate a water quality standard established under A.R.S. § 49-221.
- C.** If an individual permit is issued to replace general permit coverage, the coverage under the general permit is automatically revoked upon issuance of the individual permit.
- D.** The Director may, after notice and opportunity for hearing, suspend or revoke a Recycled Water Individual Permit for any of the reasons listed in subsections (A)(1) through (A)(4) of this Section.

Historical Note

New Section R18-9-A706 renumbered from R18-9-710 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-A707. Recycled Water Permit Transition

The terms and conditions of Type 2, Type 3, and individual reclaimed water permits issued before January 1, 2018, including permits issued for gray water, shall remain in effect according to the language of this Article effective as of the date the permit was issued.

Historical Note

New Section R18-9-A707 made by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

PART B. RECLAIMED WATER**R18-9-B701. Transition of Aquifer Protection Permits and Permits for the Reuse of Reclaimed Wastewater**

- A.** A person may directly reuse reclaimed water under an individual Aquifer Protection Permit or a Permit for the Reuse of Reclaimed Wastewater issued by the Department before January 1, 2001 if the person meets the conditions of the permit and the permit does not expire.
- B.** A person meeting the requirements of subsection (A) may apply for a new reclaimed water permit under this Article.
1. To obtain a reclaimed water permit, a person shall submit a Recycled Water Individual Permit application, required under R18-9-A703(A), or a Notice of Intent to Use Recycled Water, required under R18-9-A704(B)(2) or R18-9-A704(B)(3), to the Department at least 120 days before the current permit expires.
 2. The Department shall continue the terms of the individual Aquifer Protection Permit or the Permit for the Reuse of Reclaimed Wastewater beyond the stated date of expiration if:
 - a. The permitted direct reuse is of a continuing nature; and
 - b. The permittee submits a timely and complete application for a new permit.
- C.** Sewage treatment facility generating reclaimed water.
1. At the request of a permittee holding an individual Aquifer Protection Permit, the Department shall amend an individual Aquifer Protection Permit if the permittee adequately demonstrates that the applicable quality of

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

reclaimed water produced for direct reuse is achieved. The Department shall review:

- a. The information in the individual Aquifer Protection Permit, any applicable supporting documentation, and the water quality test results from the previous two years to determine the classification of reclaimed water generated by the sewage treatment facility; and
 - b. The available water quality data if the sewage treatment facility has operated for less than two years.
2. The Department shall issue an amended individual Aquifer Protection Permit under procedures specified under 18 A.A.C. 9, Article 2 containing:
- a. Identification of the class of reclaimed water generated by the facility;
 - b. Requirements for monitoring reclaimed water quality and flow at a frequency appropriate to demonstrate compliance with this Article and 18 A.A.C. 11, Article 3;
 - c. Requirements for quarterly reporting of the following data to the Department, any reclaimed water agent who has contracted for delivery of reclaimed water from the facility, and any end user who has not waived interest in receiving this information:
 - i. Water quality test results demonstrating reclaimed water produced by the facility meets the applicable standards for the class of water identified in subsection (C)(2)(a), and
 - ii. The total volume of reclaimed water generated for direct reuse.
 - d. Provision for cessation of delivery, if necessary, and storage or disposal if reclaimed water cannot be delivered for direct reuse.

Historical Note

New Section R18-9-B701 renumbered from R18-9-703 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B702. General Requirements for Reclaimed Water

- A. Sewage treatment facility. A sewage treatment facility owner or operator shall provide reclaimed water for direct reuse only as authorized under an individual Aquifer Protection Permit.
- B. Additional treatment. If an owner or operator of a facility accepts reclaimed water and provides additional treatment for a higher quality direct reuse, the facility is considered a sewage treatment facility and shall provide reclaimed water for direct reuse only as authorized under an individual Aquifer Protection Permit.
- C. Reclaimed water blending facility. An owner or operator of a reclaimed water blending facility shall conduct blending operations only as authorized under a Recycled Water Individual Permit or a Type 3 Recycled Water General Permit for a Reclaimed Water Blending Facility.
- D. Reclaimed water agent. A person shall operate as a reclaimed water agent only as authorized under a Recycled Water Individual Permit or a Type 3 Recycled Water General Permit for a Reclaimed Water Agent.
- E. End user. A person shall not directly reuse reclaimed water unless permitted under this Article.
- F. Irrigating with reclaimed water. A permittee applying reclaimed water for an irrigation use allowed in 18 A.A.C. 11, Article 3, Table A shall:
 1. Use application methods that reasonably preclude human contact with reclaimed water;

2. Prevent reclaimed water from standing on open access areas during normal periods of use; and
 3. Prevent reclaimed water from coming into contact with drinking fountains, water coolers, or eating areas.
- G. Hose bibbs. A permittee directly reusing reclaimed water shall secure hose bibbs discharging reclaimed water to prevent use by the public.
- H. Prohibited activities.
1. Irrigating with untreated sewage;
 2. Providing water for human consumption from a reclaimed water source except as allowed in Part E of this Article.
 3. Providing or using reclaimed water for any of the following activities:
 - a. Direct reuse for swimming, wind surfing, water skiing, or other full-immersion water activity with a potential of ingestion; or
 - b. Direct reuse for evaporative cooling or misting.
 4. Misapplying reclaimed water for any of the following reasons:
 - a. Application of a stated class of reclaimed water of lesser quality than allowed by this Article for the type of direct reuse application;
 - b. Application of reclaimed water to any area other than a direct reuse site; or
 - c. Allowing runoff of reclaimed water or reclaimed water mixed with stormwater from a direct reuse site, except for:
 - i. agricultural return flow directed onto an adjacent field or returned to an open water conveyance; or
 - ii. a discharge authorized by an individual or general NPDES or AZPDES permit.
- I. Signage and Notification. A permittee shall place and maintain signage at locations and provide applicable notification as specified in Table 1 so the public is informed reclaimed water is in use and no one should drink from the system.
- J. Pipeline Conveyances of Reclaimed Water.
1. Applicability. Any person constructing a pipeline conveyance, whether new or a replacement of an existing pipeline, shall meet the requirements of this subsection.
 2. A person shall design and construct a pipeline conveyance system using good engineering judgment following standards of practice.
 3. A person shall construct a pipeline conveyance so that:
 - a. Reclaimed water does not find its way into, or otherwise contaminate, a potable water system;
 - b. System structural integrity is maintained; and
 - c. The capability for inspection, maintenance, and testing is maintained.
 4. A person shall construct a pipeline conveyance and all appurtenances conducting reclaimed water to withstand a static pressure of at least 50 pounds per square inch greater than the design working pressure without leakage as determined in R18-9-E301(D)(2)(j).
 5. A person shall provide a pipeline conveyance with thrust blocks or restrained joints where needed to prevent excessive movement of the pipeline.
 6. The following requirements for minimum separation distance apply. A person shall:
 - a. Locate a pipeline conveyance no closer than 50 feet from a drinking water well unless the pipeline conveyance is constructed as specified under subsection (J)(6)(c);

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- b. Locate a pipeline conveyance no closer than two feet vertically nor six feet horizontally from a potable water pipeline unless the pipeline conveyance is constructed as specified under subsection (J)(6)(c);
 - c. Construct a pipeline conveyance that does not meet the minimum separation distances specified in subsections (J)(6)(a) and (J)(6)(b) by encasing the pipeline conveyance in at least six inches of concrete or using mechanical joint ductile iron pipe or other materials of equivalent or greater tensile and compressive strength at least 10 feet beyond any point on the pipeline conveyance within the specified minimum separation distance; and
 - d. If a reclaimed water system is supplemented with water from a potable water system, separate the potable water system from the pipeline conveyance by an air gap.
7. A person shall:
- a. For a pipeline conveyance, eight inches in diameter or less, use pipe marked on opposite sides in English: "CAUTION: RECLAIMED WATER, DO NOT DRINK" in intervals of three feet or less and colored purple or wrapped with durable purple tape.
 - b. For a mechanical appurtenance to a pipeline conveyance, ensure the mechanical appurtenance is colored purple or legibly marked to identify it as part of the reclaimed water distribution system and distinguish it from systems for potable water distribution and sewage collection.
- K. Open Water Conveyances of Reclaimed Water.**
- 1. This subsection applies to an open water conveyance, regardless of the date of construction.
 - 2. A person shall maintain an open water conveyance to prevent release of reclaimed water except as allowed under federal and state regulations. The maintenance program shall include periodic inspections and follow-up corrective measures to ensure the integrity of conveyance banks and capacity of the conveyance to safely carry operational flows.
 - 3. Signage for Class B+, B, and C Reclaimed Water. A person shall:
 - a. Ensure signs state: "CAUTION: RECLAIMED WATER, DO NOT DRINK," and display the international "do not drink" symbol;
 - b. Place signs at all points of ingress and, if the open water conveyance is operated with open access, at least every 1/4-mile along the length of the open water conveyance or other interval as approved in writing by the Department; and
 - c. Ensure signs are visible and legible from both sides of the open water conveyance.

Historical Note

New Section R18-9-B702 renumbered from R18-9-704 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018; clerical error to subsections corrected at (J)(6)(a), (b), and (c) as published at 23 A.A.R. 3091 (Supp. 17-4).

Table 1. Signage and Notification Requirements for Direct Reuse Sites

| Reclaimed Water Class | Hose Bibbs | Residential Irrigation | Schoolground Irrigation | Other Open Access Irrigation | Restricted Access Irrigation | Mobile Reclaimed Water Dispersal |
|-----------------------|--------------------|--|---|------------------------------|---|--|
| A+, A | Each bibb at valve | Front yard, or all entrances to a subdivision if the signage is supplemented by written yearly notification to individual homeowners by the homeowner's association. | On premises visible to staff and students | None | None | On dispersal equipment and visible to the public |
| B+, B | Each bibb at valve | Direct Reuse Not Allowed | Direct Reuse Not Allowed | Direct Reuse Not Allowed | 1. Ingress points; 2. At reasonably spaced intervals of not more than 1/4 mile at the reuse site or along the open water conveyance, unless access to vehicular and pedestrian traffic is secured; and 3. If applicable, notice on golf score cards | On dispersal equipment and visible to the public |
| C | Each bibb at valve | Direct Reuse Not Allowed | Direct Reuse Not Allowed | Direct Reuse Not Allowed | 1. Ingress points; 2. At reasonably spaced intervals of not more than 1/4 mile at the reuse site or along the open water conveyance, unless access to vehicular and pedestrian traffic is secured; and 3. If applicable, notice on golf score cards | On dispersal equipment and visible to the public |

Note: All impoundments with open access including lakes, ponds, ornamental fountains, waterfalls, and other water features shall be posted with signs regardless of the class of reclaimed water.

Historical Note

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

New Section R18-9-B702, Table 1 renumbered from R18-9-704, Table 1 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B703. General Provisions for Recycled Water Individual Permit for Reclaimed Water

- A.** A Recycled Water Individual Permit for Reclaimed Water is obtained under R18-9-A703. A Recycled Water Individual Permit for Reclaimed Water:
1. Is valid for five years;
 2. Must be updated as prescribed by R18-9-A705; and
 3. Continues, pending the issuance of a new permit, with the same terms following its expiration if the following are met:
 - a. The permittee submits an application for a new permit at least 60 days before the expiration of the existing permit; and
 - b. The permitted activity is of a continuing nature.
- B.** A Recycled Water Individual Permit for Reclaimed Water shall contain, if applicable:
1. The class of reclaimed water to be applied for direct reuse or the alternative water quality criteria appropriate for a direct reuse type not listed in 18 A.A.C. 11, Article 3, Table A that ADEQ may allow under R18-11-309;
 2. Specific types of direct reuse and any limitations on reuse;
 3. Requirements for monitoring reclaimed water quality and flow to demonstrate compliance with this Article and 18 A.A.C. 11, Article 3;
 4. Requirements for reporting the following data to demonstrate compliance with this Article and 18 A.A.C. 11, Article 3:
 - a. Water quality test results demonstrating the reclaimed water meets the applicable standards for the class of water or the alternative water quality criteria identified in subsection (B)(1), and
 - b. The total volume of reclaimed water generated for direct reuse.
 5. Requirements for maintaining records of all monitoring information and monitoring activities include:
 - a. The date, description of sampling location, and time of sampling or measurement;
 - b. The name of the person who performed the sampling or measurement;
 - c. The date the analyses were performed;
 - d. The name of the person who performed the analyses;
 - e. The analytical techniques or methods used;
 - f. The results of the analyses; and
 - g. Documentation of sampling technique, sample preservation, and transportation, including chain-of-custody forms.
 6. Requirements to retain all monitoring activity records and results, including all data for continuous monitoring instrumentation, and calibration and maintenance records for five years from the date of sampling or analysis. The Director shall extend the five-year retention period:
 - a. During the course of an unresolved litigation regarding compliance with the permit conditions, or
 - b. For any other justifiable cause.
 7. A requirement to allow all end users access to the records of physical, chemical, and biological quality of the reclaimed water.
 8. Signage or other notification requirements appropriate to the use; and
 9. Closure requirements, if applicable.

Historical Note

New Section R18-9-B703 renumbered from R18-9-706 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B704. Type 2 Recycled Water General Permit for Direct Reuse of Class A+ Reclaimed Water

- A.** A Type 2 Recycled Water General Permit for Direct Reuse of Class A+ Reclaimed Water allows any direct reuse application of reclaimed water listed in 18 A.A.C. 11, Article 3, Table A, if the conditions in this Article are met.
- B.** Record maintenance. A permittee shall maintain records for five years describing the direct reuse site and the total amount of reclaimed water used annually for the permitted direct reuse activity. The records shall be made available to the Department upon request.
- C.** A permittee shall post signs or provide notification or both as specified in R18-9-B702(I).
- D.** No lining is required for an impoundment storing Class A+ reclaimed water.

Historical Note

New Section R18-9-B704 renumbered from R18-9-712 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B705. Type 2 Recycled Water General Permit for Direct Reuse of Class A Reclaimed Water

- A.** A Type 2 Recycled Water General Permit for the Direct Reuse of Class A Reclaimed Water allows any direct reuse application of reclaimed water listed in 18 A.A.C. 11, Article 3, Table A, if the conditions in this Article are met.
- B.** Records and reporting. A permittee shall:
1. Maintain records containing the following information for five years, and make them available to the Department upon request:
 - a. The direct reuse site,
 - b. The volume of reclaimed water applied monthly for each category of direct reuse activity listed in 18 A.A.C. 11, Article 3, Table A,
 - c. The total nitrogen concentration of the reclaimed water applied, and
 - d. The acreage and type of vegetation to which the reclaimed water is applied.
 2. Report annually to the Department on or before the anniversary date of the Notice of Intent to Use Recycled Water:
 - a. The volume of reclaimed water received,
 - b. The type of reclaimed water application, and
 - c. If used for irrigation, the vegetation and acreage irrigated.
- C.** Nitrogen management. A permittee shall ensure:
1. Impoundments storing reclaimed water allowed by the general permit are lined using a low-hydraulic conductivity artificial or site-specific liner material achieving a calculated discharge rate less than 550 gallons per acre per day; and
 2. The application rates of the reclaimed water are based on one of the following:
 - a. If assigned, the water allotment specified by the Arizona Department of Water Resources;
 - b. A water balance that considers consumptive use of water by the crop, turf, or landscape vegetation; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. An alternative method approved by the Department.
- D. In addition to the Notice of Intent to Use Recycled Water specified in R18-9-A704(B)(2), the applicant shall provide a list of impoundments, water depth, freeboard, and the liner characteristics and the method chosen from the list in subsection (C)(2).
- E. The permittee shall post signs or provide notification, or both, as specified in R18-9-B702(I).

Historical Note

New Section R18-9-B705 renumbered from R18-9-713 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B706. Type 2 Recycled Water General Permit for Direct Reuse of Class B+ Reclaimed Water

- A. A Type 2 Recycled Water General Permit for Direct Reuse of Class B+ Reclaimed Water allows any direct reuse application of Class B and Class C reclaimed water listed in 18 A.A.C. 11, Article 3, Table A, if the conditions in this Article are met.
- B. A permittee shall comply with the record maintenance and posting requirements established under R18-9-B704 and make records available to the Department upon request.
- C. No lining is required for an impoundment storing Class B+ reclaimed water.

Historical Note

New Section R18-9-B706 renumbered from R18-9-714 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B707. Type 2 Recycled Water General Permit for Direct Reuse of Class B Reclaimed Water

- A. A Type 2 Recycled Water General Permit for the Direct Reuse of Class B Reclaimed Water allows the direct reuse application of Class B and Class C reclaimed water listed in 18 A.A.C. 11, Article 3, Table A, if conditions in this Article are met.
- B. A permittee shall comply with the requirements established under R18-9-B705(B), (C), (D), and (E).

Historical Note

New Section R18-9-B707 renumbered from R18-9-715 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B708. Type 2 Recycled Water General Permit for Direct Reuse of Class C Reclaimed Water

- A. A Type 2 Recycled Water General Permit for the Direct Reuse of Class C Reclaimed Water allows the direct reuse application of Class C reclaimed water listed in 18 A.A.C. 11, Article 3, Table A, if conditions in this Article are met.
- B. A permittee shall comply with the requirements established under R18-9-B705(B), (C), (D), and (E).

Historical Note

New Section R18-9-B708 renumbered from R18-9-716 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B709. Type 3 Recycled Water General Permit for a Reclaimed Water Blending Facility

- A. Permit conditions.
1. A Type 3 Recycled Water General Permit for a Reclaimed Water Blending Facility allows the blending of reclaimed water with other water, if the conditions in this Article are met.

2. Blending reclaimed water with industrial wastewater or with reclaimed water from an industrial wastewater treatment plant is not authorized by this general permit.
- B. A person shall file with the Department a Notice of Intent to Operate a reclaimed water blending facility on a form provided by the Department. The Notice of Intent to Operate shall include:
1. The name, address, e-mail address, and telephone number of the applicant;
 2. The name, address, e-mail address, and telephone number of a contact person;
 3. The source and volume of reclaimed water to be blended;
 4. The class of reclaimed water to be blended;
 5. The source, volume, and quality of other water to be blended;
 6. The latitude and longitude coordinates of the blending facility;
 7. A description of the reclaimed water blending facility, including a demonstration the proposed blending methodology will meet the standards established in 18 A.A.C. 11, Article 3 for the class of reclaimed water the facility will produce;
 8. The applicant's certification that the applicant agrees to comply with the requirements of this Article, 18 A.A.C. 11, Article 3, and the terms of this recycled water general permit; and
 9. The applicable permit fee specified under 18 A.A.C. 14.
- C. A person shall not operate a reclaimed water blending facility until the Department issues a written Recycled Water Authorization under R18-9-A704(C).
- D. A permittee shall monitor:
1. The blended water quality for total nitrogen and fecal coliform at frequencies specified by the class of reclaimed water in 18 A.A.C. 11, Article 3.
 - a. If the concentration in the blended water of either total nitrogen or fecal coliform, as applicable, exceeds the limits for the applicable reclaimed water class established in 18 A.A.C. 11, Article 3, within 30 days of the exceedance, the permittee shall submit a plan to the Department to change the blending process or to otherwise correct the deficiency. The permittee shall also double the monitoring frequency for the next four months.
 - b. If another exceedance occurs within the interval of increased monitoring, the permittee shall submit an application within 45 days for a Recycled Water Individual Permit for Reclaimed Water.
 2. The volume of reclaimed water, the volume of the other water, and the total volume of blended water delivered for direct reuse on a monthly basis.
- E. The permittee shall report the results of the monitoring under subsection (D) to the Department by January 31, for the immediately preceding calendar year, and shall make this information available to the end users.

Historical Note

New Section R18-9-B709 renumbered from R18-9-717 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-B710. Type 3 Recycled Water General Permit for a Reclaimed Water Agent

- A. A Type 3 Recycled Water General Permit for a Reclaimed Water Agent allows a person to operate as a Reclaimed Water Agent if the conditions of this Article are met, and the follow-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

ing conditions are met for the class of reclaimed water delivered by the Reclaimed Water Agent:

1. Signage and notification requirements specified under R18-9-B702(I), as applicable;
 2. Impoundment liner requirements specified under R18-9-B704(D), R18-9-B705(C), R18-9-B706(C), R18-9-B707(B) or R18-9-B708(B), as applicable; and
 3. Nitrogen management requirements specified under R18-9-B705(C), R18-9-B707(B), and R18-9-B708(B), as applicable.
- B.** A person holding a Type 3 Recycled Water Permit for a Reclaimed Water Agent:
1. Is responsible for the direct reuse of reclaimed water by more than one end user instead of direct reuse by the end users under separate Type 2 Recycled Water General Permits, and
 2. Shall maintain a contractual agreement with each end user stipulating any end user responsibilities for the requirements specified under subsection (A).
- C.** A person shall file with the Department a Notice of Intent to Operate as a reclaimed water agent. The Notice of Intent to Operate shall include:
1. The name, address, e-mail address, and telephone number of the applicant;
 2. The name, address, e-mail address, and telephone number of a contact person;
 3. The following information for each end user to be supplied reclaimed water by the applicant:
 - a. The name, address, e-mail address, and telephone number of the end user;
 - b. A system map showing the locations of the direct reuse sites and the latitude and longitude coordinates of each site; and
 - c. A description of each direct reuse activity, including the type of vegetation, acreage, and annual volume of reclaimed water to be used, unless Class A+ or Class B+ reclaimed water is delivered.
 4. The source, class, and annual volume of reclaimed water to be delivered by the applicant;
 5. A description of the contractual arrangement between the applicant and each end user, including any end user responsibilities for the requirements specified under subsection (A); and
 6. The applicable permit fee specified under 18 A.A.C. 14.
- D.** A proposed reclaimed water agent shall not distribute reclaimed water to end users until the Department issues a written Recycled Water Authorization under R18-9-A704(C).
- E.** A reclaimed water agent shall record and annually report the following information to the Department by January 31, for the immediately preceding year:
1. The total volume of reclaimed water delivered by the reclaimed water agent;
 2. The volume of reclaimed water delivered to each end user for Class A, Class B, and Class C reclaimed water; and
 3. Any change in the information submitted under subsection (C).

Historical Note

New Section R18-9-B710 renumbered from R18-9-718 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

PART C. RECYCLED INDUSTRIAL WASTEWATER**R18-9-C701. Recycled Water Individual Permit for Industrial Wastewater That Is Reused**

- A.** The following activities are prohibited unless a Recycled Water Individual Permit is obtained under R18-9-A703:
1. Use of reclaimed water from a sewage treatment facility that is combined with industrial wastewater or water from an industrial wastewater treatment facility.
 2. Use of reclaimed water from an industrial wastewater treatment facility for production or processing of a crop or substance that may be used as human or animal food.
- B.** In addition to the requirements in R18-9-A703(A), an application for a Recycled Water Individual Permit shall include:
1. Each source of the industrial wastewater with Standard Industrial Code or North American Industry Classification System Code, and the projected rates and volumes from each source;
 2. The chemical, biological, and physical characteristics of the industrial wastewater from each source; and
 3. If reclaimed water will be used in the processing of any crop or substance that may be used as human or animal food, the information regarding food safety and any potential adverse health effects of this direct reuse.

Historical Note

New Section R18-9-C701 renumbered from R18-9-707 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

PART D. GRAY WATER**R18-9-D701. Type 1 Recycled Water General Permit for Gray Water**

- A.** A Type 1 Recycled Water General Permit for Gray Water allows private residential use of gray water for a flow of less than 400 gallons per day if all the following conditions are met:
1. Gray water originating from the residence is used and contained within the property boundary for household gardening, composting, or landscape watering;
 2. Human contact with gray water and soil watered by gray water is avoided;
 3. Surface application of gray water is not used for watering of food plants, except for trees and shrubs which have an edible portion that does not come into contact with the gray water;
 4. The gray water does not contain hazardous chemicals derived from activities such as cleaning car parts, washing greasy or oily rags, or disposing of waste solutions from hobbyist or home occupational activities;
 5. The gray water does not contain water used to wash diapers or similarly soiled or infectious garments;
 6. The application of gray water is managed to minimize standing water on the surface by using measures such as avoiding overwatering, distributing the gray water beneath a mulch or other cover, and using best practices to improve soil condition and increase filtration;
 7. If blockage, backup, or overload of the system occurs, gray water distribution shall cease until the deficiency is corrected. The gray water system may include components to reduce blockage and backup and be operated using best practices to extend system lifetime;
 8. Gray water surge tanks, if any, are covered to restrict access and to eliminate habitat for mosquitoes or other vectors, and holding time is minimized to avoid development of anaerobic conditions and odors;
 9. The gray water system is sited outside of a floodway;
 10. The gray water system is operated to maintain a minimum vertical separation distance of at least five feet from

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

the point of gray water application to the top of the seasonally high groundwater table;

11. For a residence using an on-site wastewater treatment facility for black water treatment and disposal, the use of a gray water system does not change the design, capacity, or reserve area requirements for the on-site wastewater treatment facility at the residence, and ensures the facility can handle the combined black water and gray water flow;
 12. Any pressure piping used in a gray water system that may be susceptible to cross connection with a potable water system clearly indicates the piping does not carry potable water; and
 13. Surface application of gray water is only by flood or drip distribution methods. Flood distribution methods may include containment by horticultural mulch basins and swales.
- B. Prohibitions.** The following are prohibited:
1. Gray water use for purposes other than watering and composting, and
 2. Application of gray water by a spray method.

Historical Note

New Section R18-9-D701 renumbered from R18-9-711 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

R18-9-D702. Type 3 Recycled Water General Permit for Gray Water

- A.** A Type 3 Recycled Water General Permit for Gray Water allows for the use of gray water for landscape irrigation and composting if:
1. The general permit described in R18-9-D701 does not apply,
 2. The flow is not more than 3000 gallons per day, and
 3. The gray water system satisfies the notification, design, and installation requirements specified in subsections (B) and (C).
- B.** A person shall file a Notice of Intent to Operate a Gray Water System with the Department on a form provided by the Department. The Notice of Intent to Operate shall include:
1. The name, address, e-mail address, and telephone number of the applicant;
 2. The latitude and longitude coordinates;
 3. A description of the sources of gray water and calculations demonstrating the flow is not more than 3000 gallons per day;
 4. Design plans for the gray water system;
 5. The applicant's certification that the applicant agrees to comply with the requirements of this Article and the terms of this Recycled Water General Permit for Gray Water; and
 6. The applicable permit fee specified under 18 A.A.C. 14.
- C.** The following requirements apply to the design, installation, and operation of a gray water system allowed under this Recycled Water General Permit for Gray Water:
1. Human contact with gray water and soil irrigated by gray water is avoided;
 2. Gray water is not applied to an exposed surface but into a bed or trench of permeable material, through piping installed below the soil surface, or by similar means. Spray irrigation of gray water is not allowed. The application of gray water shall not result in standing water on the surface.

3. The design shall ensure gray water is used and contained within the property boundary for landscape irrigation or composting;
 4. Gray water is not used for irrigation of food plants, except for trees and shrubs which have an edible portion that does not come into contact with the gray water;
 5. The gray water may contain water from drinking fountains but does not contain hazardous chemicals derived from industrial, hobbyist, or similar activities at the site;
 6. Gray water does not contain water used to wash diapers or similarly soiled or infectious garments;
 7. The gray water system is constructed so if blockage, plugging, or backup of the system occurs, gray water can be directed into the sewage collection system or on-site wastewater treatment and disposal system, as applicable;
 8. Gray water surge tanks, if any, are covered to restrict access and to eliminate habitat for mosquitoes or other vectors, and holding time is minimized to avoid development of anaerobic conditions and odors;
 9. The gray water system is sited outside of a floodway;
 10. The gray water system is operated to maintain a minimum vertical separation distance of at least five feet from the point of gray water application to the top of the seasonally high groundwater table;
 11. If an on-site wastewater treatment facility is used for black water treatment and disposal, the use of a gray water system does not change the design, capacity, or reserve area requirements for the on-site wastewater treatment facility so the facility may handle the combined black water and gray water flow; and
 12. Any piping used in a gray water system susceptible to cross connection with a potable water system clearly indicates the piping does not carry potable water.
- D.** The applicant shall not operate the gray water system until the Department issues a written Recycled Water Authorization under R18-9-A704(C).
- E.** The Department may issue a Recycled Water Authorization that differs from the requirements specified in subsection (C) if the system provides equivalent performance and protection of human health and water quality.
- F.** In the Recycled Water Authorization, the Department may require a permittee to report data or information for any of the conditions in this Section if the Department deems the reporting necessary to protect human health or water quality or both.

Historical Note

New Section R18-9-D702 renumbered from R18-9-719 and amended by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

PART E. PURIFIED WATER FOR POTABLE USE**R18-9-E701. Recycled Water Individual Permit for an Advanced Reclaimed Water Treatment Facility**

- A.** An application for a Recycled Water Individual Permit for an Advanced Reclaimed Water Treatment Facility must be submitted to the Department according to the requirements in R18-9-A703, as applicable.
- B.** Safe Drinking Water Act. For purposes of Safe Drinking Water Act requirements, water produced by an Advanced Reclaimed Water Treatment Facility shall be considered surface water for purposes of compliance with Title 18, Chapter 4 of the Arizona Administrative Code. Nothing in this Section exempts an applicable facility from Safe Drinking Water Act requirements.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

C. Design Report. In addition to the information required by subsection (A), the applicant shall submit a design report for the Advanced Reclaimed Water Treatment Facility according to a form prescribed by the Department and certified by an Arizona-registered professional engineer. The design report must include the following information:

1. Characterization of source water quantity and quality, including:
 - a. Average and anticipated minimum and maximum source water flows to the facility;
 - b. Concentrations of the source water's physical, microbiological, and chemical constituents regulated for drinking water Maximum Contaminant Levels under the Safe Drinking Water Act and which the Department determines are appropriate for the particular facility and source water;
 - c. Description and concentrations of constituents in the source water used for unit treatment process monitoring and assessment of unit treatment process efficacy, and
 - d. A list of unregulated microbial and chemical constituents and corresponding concentrations in the source water a facility proposes to monitor in order to assess the treatment effectiveness of the overall treatment train. The particular constituents will depend on consideration of factors, such as:
 - i. Occurrence of the constituent in source and local waters,
 - ii. Availability of standardized laboratory methods for quantification of the constituent,
 - iii. Usefulness as representatives of or surrogates for larger classes of constituents, and
 - iv. Availability of toxicity data for the constituent.
2. Description of, and results from, the pilot water treatment system for the facility or of analogous systems where comparable treatment components are demonstrated as appropriate for treating the particular characteristics of the applicant's proposed source water;
3. Identification and description of the technologies, processes, methodologies, and process control monitoring to be employed for microbial control;
4. Logarithmic reduction targets for microbial control, to ensure the product water is free of pathogens and suitable for potable use;
5. Identification and description of technologies, processes, methodologies and process control monitoring for chemical control;
6. Plan for monitoring the product water for public health protection;
7. Commissioning and startup plan, including preoperational and startup testing and monitoring, expected timeframe for meeting full operational performance, and any other special startup condition meriting consideration in the individual permit;
8. Operation and maintenance plan including corrective actions for out-of-range monitoring results and contingencies for non-compliant water;
9. Operator training plan; and
10. Documentation of technical, financial, and management capability.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 3091, effective January 1, 2018 (Supp. 17-4).

ARTICLE 8. REPEALED**R18-9-801. Repealed****Historical Note**

Corrected A.R.S. reference (Supp. 77-3). Former Section R9-8-311 renumbered without change as Section R18-9-801 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4).

R18-9-802. Repealed**Historical Note**

Amended by adding subsections (N) through (R) effective June 8, 1981 (Supp. 81-3). Former Section R9-8-312 renumbered without change as Section R18-9-802 (Supp. 87-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4).

R18-9-803. Repealed**Historical Note**

Amended effective April 18, 1979 (Supp. 79-2). Amended by adding subsection (E) effective October 2, 1986 (Supp. 86-5). Former Section R9-8-313 renumbered without change as Section R18-9-803 (Supp. 87-3). Section repealed by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4).

R18-9-819. Repealed**Historical Note**

Former Section R9-8-361 renumbered without change as Section R18-9-819 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed by final rulemaking at 7 A.A.R. 235, effective December 8, 2000 (Supp. 00-4).

ARTICLE 9. ARIZONA POLLUTANT DISCHARGE ELIMINATION SYSTEM

Editor's Note: The recodification at 7 A.A.R. 2522 described below erroneously moved Sections into 18 A.A.C. 9, Article 9. Those Sections were actually recodified to 18 A.A.C. 9, Article 10. See the Historical Notes for more information (Supp. 01-4).

Article 9, consisting of Sections R18-9-901 through R18-9-914 and Appendix A, recodified from 18 A.A.C. 13, Article 15 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2).

PART A. GENERAL REQUIREMENTS**R18-9-A901. Definitions**

In addition to the definitions in A.R.S. § 49-201 and 49-255, the following terms apply to this Article:

1. "Animal confinement area" means any part of an animal feeding operation where animals are restricted or confined including open lots, housed lots, feedlots, confinement houses, stall barns, free stall barns, milkrooms, milking centers, cowyards, barnyards, medication pens, walkers, animal walkways, and stables.
2. "Animal feeding operation" means a lot or facility (other than an aquatic animal production facility) where the following conditions are met:
 - a. Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and
 - b. Crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. "Aquaculture project" means a defined managed water area that uses discharges of pollutants into that designated project area for the maintenance or production of harvestable freshwater plants or animals. For purposes of this definition, "designated project area" means the portion or portions of the navigable waters within which the permittee or permit applicant plans to confine the cultivated species using a method or plan of operation, including physical confinement, that on the basis of reliable scientific evidence, is expected to ensure that specific individual organisms comprising an aquaculture crop will enjoy increased growth attributable to the discharge of pollutants, and be harvested within a defined geographic area.
4. "Border area" means 100 kilometers north and south of the Arizona-Sonora, Mexico border.
5. "Bypass" means the intentional diversion of waste streams from any portion of a treatment facility.
6. "CAFO" means any large concentrated animal feeding operation, medium concentrated animal feeding operation, or animal feeding operation designated under R18-9-D901.
7. "Concentrated aquatic animal production facility" means a hatchery, fish farm, or other facility that contains, grows, or holds aquatic animals in either of the following categories:
 - a. Cold-water aquatic animals. Cold-water fish species or other cold-water aquatic animals (including the Salmonidae family of fish) in a pond, raceway, or other similar structure that discharges at least 30 days per year, but does not include:
 - i. A facility that produces less than 9,090 harvest weight kilograms (approximately 20,000 pounds) of aquatic animals per year; and
 - ii. A facility that feeds the aquatic animals less than 2,272 kilograms (approximately 5,000 pounds) of food during the calendar month of maximum feeding.
 - b. Warm-water aquatic animals. Warm-water fish species or other warm-water aquatic animals (including the Ameiuridae, Centrarchidae, and Cyprinidae families of fish) in a pond, raceway, or other similar structure that discharges at least 30 days per year, but does not include:
 - i. A closed pond that discharges only during periods of excess runoff; or
 - ii. A facility that produces less than 45,454 harvest weight kilograms (approximately 100,000 pounds) of aquatic animals per year.
8. "Daily discharge" means the discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the daily discharge is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the daily discharge is calculated as the average measurement of the pollutant over the day.
9. "Discharge of a pollutant" means any addition of any pollutant or combination of pollutants to a navigable water from any point source.
 - a. The term includes the addition of any pollutant into a navigable water from:
 - i. A treatment works treating domestic sewage;
 - ii. Surface runoff that is collected or channeled by man;
 - iii. A discharge through a pipe, sewer, or other conveyance owned by a state, municipality, or other person that does not lead to a treatment works; and
 - iv. A discharge through a pipe, sewer, or other conveyance, leading into a privately owned treatment works.
 - b. The term does not include an addition of a pollutant by any industrial user as defined in A.R.S. § 49-255(4).
10. "Draft permit" means a document indicating the Director's tentative decision to issue, deny, modify, revoke and reissue, terminate, or reissue a permit.
 - a. A notice of intent to terminate a permit is a type of draft permit unless the entire discharge is permanently terminated by elimination of the flow or by connection to a POTW, but not by land application or disposal into a well.
 - b. A notice of intent to deny a permit is a type of draft permit.
 - c. A proposed permit or a denial of a request for modification, revocation and reissuance, or termination of a permit, are not draft permits.
11. "EPA" means the U.S. Environmental Protection Agency.
12. "General permit" means an AZPDES permit issued under 18 A.A.C. 9, Article 9, authorizing a category of discharges within a geographical area.
13. "Individual permit" means an AZPDES permit for a single point source, a single facility, or a municipal separate storm sewer system.
14. "Land application area," for purposes of Article 9, Part D, means land under the control of an animal feeding operation owner or operator, whether it is owned, rented, or leased, to which manure, litter, or process wastewater from the production area is or may be applied.
15. "Large concentrated animal feeding operation" means an animal feeding operation that stables or confines at least the number of animals specified in any of the following categories:
 - a. 700 mature dairy cows, whether milked or dry;
 - b. 1,000 veal calves;
 - c. 1,000 cattle other than mature dairy cows or veal calves. Cattle includes heifers, steers, bulls, and cow and calf pairs;
 - d. 2,500 swine each weighing 55 pounds or more;
 - e. 10,000 swine each weighing less than 55 pounds;
 - f. 500 horses;
 - g. 10,000 sheep or lambs;
 - h. 55,000 turkeys;
 - i. 30,000 laying hens or broilers, if the animal feeding operation uses a liquid manure handling system;
 - j. 125,000 chickens (other than laying hens), if the animal feeding operation uses other than a liquid manure handling system;
 - k. 82,000 laying hens, if the animal feeding operation uses other than a liquid manure handling system;
 - l. 30,000 ducks, if the animal feeding operation uses other than a liquid manure handling system; or
 - m. 5,000 ducks, if the animal feeding operation uses a liquid manure handling system.
16. "Large municipal separate storm sewer system" means a municipal separate storm sewer that is either:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. Located in an incorporated area with a population of 250,000 or more as determined by the 1990 Decennial Census by the Bureau of the Census;
 - b. Located in a county with an unincorporated urbanized area with a population of 250,000 or more, according to the 1990 Decennial Census by the Bureau of Census, but not a municipal separate storm sewer that is located in an incorporated place, township, or town within the county; or
 - c. Owned or operated by a municipality other than those described in subsections (16)(a) and (16)(b) and that are designated by the Director under R18-9-A902(D)(2) as part of the large municipal separate storm sewer system.
17. "Manure" means any waste or material mixed with waste from an animal including manure, bedding, compost and raw materials, or other materials commingled with manure or set aside for disposal.
18. "Manure storage area" means any part of an animal feeding operation where manure is stored or retained including lagoons, run-off ponds, storage sheds, stockpiles, under-house or pit storages, liquid impoundments, static piles, and composting piles.
19. "Medium concentrated animal feeding operation" means an animal feeding operation in which:
- a. The type and number of animals that it stables or confines falls within any of the following ranges:
 - i. 200 to 699 mature dairy cows, whether milked or dry;
 - ii. 300 to 999 veal calves;
 - iii. 300 to 999 cattle other than mature dairy cows or veal calves. Cattle includes heifers, steers, bulls, and cow and calf pairs;
 - iv. 750 to 2,499 swine each weighing 55 pounds or more;
 - v. 3,000 to 9,999 swine each weighing less than 55 pounds;
 - vi. 150 to 499 horses;
 - vii. 3,000 to 9,999 sheep or lambs;
 - viii. 16,500 to 54,999 turkeys;
 - ix. 9,000 to 29,999 laying hens or broilers, if the animal feeding operation uses a liquid manure handling system;
 - x. 37,500 to 124,999 chickens (other than laying hens), if the animal feeding operation uses other than a liquid manure handling system;
 - xi. 25,000 to 81,999 laying hens, if the animal feeding operation uses other than a liquid manure handling system;
 - xii. 10,000 to 29,999 ducks, if the animal feeding operation uses other than a liquid manure handling system; or
 - xiii. 1,500 to 4,999 ducks, if the animal feeding operation uses a liquid manure handling system; and
 - b. Either one of the following conditions are met:
 - i. Pollutants are discharged into a navigable water through a man-made ditch, flushing system, or other similar man-made device; or
 - ii. Pollutants are discharged directly into a navigable water that originates outside of and passes over, across, or through the animal feeding operation or otherwise comes into direct contact with the animals confined in the operation.
20. "Medium municipal separate storm sewer system" means a municipal separate storm sewer that is either:
- a. Located in an incorporated area with a population of 100,000 or more but less than 250,000, as determined by the 1990 Decennial Census by the Bureau of the Census; or
 - b. Located in a county with an unincorporated urbanized area with a population of 100,000 or more but less than 250,000 as determined by the 1990 Decennial Census by the Bureau of the Census; or
 - c. Owned or operated by a municipality other than those described in subsections (20)(a) and (20)(b) and that are designated by the Director under R18-9-A902(D)(2) as part of the medium municipal separate storm sewer system.
21. "MS4" means municipal separate storm sewer system.
22. "Municipal separate storm sewer" means a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, and storm drains):
- a. Owned or operated by a state, city, town county, district, association, or other public body (created by or pursuant to state law) having jurisdiction over disposal of sewage, industrial wastes, stormwater, or other wastes, including special districts under state law such as a sewer district, flood control district or drainage district, or similar entity, or a designated and approved management agency under section 208 of the Clean Water Act (33 U.S.C. 1288) that discharges to waters of the United States;
 - b. Designed or used for collecting or conveying stormwater;
 - c. That is not a combined sewer; and
 - d. That is not part of a POTW.
23. "Municipal separate storm sewer system" means all separate storm sewers defined as "large," "medium," or "small" municipal separate storm sewer systems or any municipal separate storm sewers on a system-wide or jurisdiction-wide basis as determined by the Director under R18-9-C902(A)(1)(g)(i) through (iv).
24. "New discharger" includes an industrial user and means any building, structure, facility, or installation:
- a. From which there is or may be a discharge of pollutants;
 - b. That did not commence the discharge of pollutants at a particular site before August 13, 1979;
 - c. That is not a new source; and
 - d. That has never received a finally effective NPDES or AZPDES permit for discharges at that site.
25. "New source" means any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced:
- a. After the promulgation of standards of performance under section 306 of the Clean Water Act (33 U.S.C. 1316) that are applicable to the source, or
 - b. After the proposal of standards of performance in accordance with section 306 of the Clean Water Act (33 U.S.C. 1316) that are applicable to the source, but only if the standards are promulgated under section 306 (33 U.S.C. 1316) within 120 days of their proposal.
26. "NPDES" means the National Pollutant Discharge Elimination System, which is the national program for issuing, modifying, revoking, reissuing, terminating, monitoring,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- and enforcing permits, and imposing and enforcing pretreatment and biosolids requirements under sections 307 (33 U.S.C. 1317), 318 (33 U.S.C. 1328), 402 (33 U.S.C. 1342), and 405 (33 U.S.C. 1345) of the Clean Water Act.
27. "Pollutant" means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials (except those regulated under the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014 et seq.)), heat, wrecked or discarded equipment, rock, sand, cellar dirt, and industrial, municipal, and agricultural waste discharged into water. It does not mean:
- Sewage from vessels; or
 - Water, gas, or other material that is injected into a well to facilitate production of oil or gas, or water derived in association with oil and gas production and disposed of in a well, if the well used either to facilitate production or for disposal purposes is approved by authority of this state, and if the state determines that the injection or disposal will not result in the degradation of ground or surface water resources. (40 CFR 122.2)
28. "POTW" means a publicly owned treatment works.
29. "Process wastewater," for purposes of Article 9, Part D, means any water that comes into contact with a raw material, product, or byproduct including manure, litter, feed, milk, eggs, or bedding and water directly or indirectly used in the operation of an animal feeding operation for any or all of the following:
- Spillage or overflow from animal or poultry watering systems;
 - Washing, cleaning, or flushing pens, barns, manure pits, or other animal feeding operation facilities;
 - Direct contact swimming, washing, or spray cooling of animals; or
 - Dust control.
30. "Proposed permit" means an AZPDES permit prepared after the close of the public comment period (including EPA review), and any applicable public hearing and administrative appeal, but before final issuance by the Director. A proposed permit is not a draft permit.
31. "Pretreatment" means the reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater before or instead of discharging or otherwise introducing the pollutants into a POTW.
32. "Production area," for purposes of Article 9, Part D, means the animal confinement area, manure storage area, raw materials storage area, and waste containment areas. Production area includes any egg washing or egg processing facility and any area used in the storage, handling, treatment, or disposal of animal mortalities.
33. "Raw materials storage area" means the part of an animal feeding operation where raw materials are stored including feed silos, silage bunkers, and bedding materials.
34. "Silviculture point source" means any discernible, confined, and discrete conveyance related to rock crushing, gravel washing, log sorting, or log storage facilities that are operated in connection with silvicultural activities and from which pollutants are discharged into navigable waters. The term does not include nonpoint source silvicultural activities such as nursery operations, site preparation, reforestation and subsequent cultural treatment, thinning, prescribed burning, pest and fire control, harvesting operations, surface drainage, or road construction and maintenance from which there is natural runoff. For purposes of this definition:
- "Log sorting and log storage facilities" means facilities whose discharge results from the holding of unprocessed wood, for example, logs or round wood with or without bark held in self-contained bodies of water or stored on land if water is applied intentionally on the logs.
 - "Rock crushing and gravel washing facilities" mean facilities that process crushed and broken stone, gravel, and riprap.
35. "Small municipal separate storm sewer system" means a separate storm sewer that is:
- Owned or operated by the United States, a state, city, town, county, district, association, or other public body (created by or pursuant to state law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under state law such as a sewer district, flood control district or drainage district, or similar entity, an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the Clean Water Act (33 U.S.C. 1288) that discharge to navigable waters.
 - Not defined as a "large" or "medium" municipal separate storm sewer system or designated under R18-9-A902(D)(2).
 - Similar to municipal separate storm sewer systems such as systems at military bases, large hospital or prison complexes, universities, and highways and other thoroughfares. The term does not include a separate storm sewer in a very discrete area such as an individual building.
36. "Stormwater" means stormwater runoff, snow melt runoff, and surface runoff and drainage.
37. "Treatment works treating domestic sewage" means a POTW or any other sewage sludge or waste water treatment device or system, regardless of ownership (including federal facilities), used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated for the disposal of sewage sludge. This definition does not include septic tanks or similar devices. For purposes of this definition, "domestic sewage" includes waste and wastewater from humans or household operations that are discharged to or otherwise enter a treatment works.
38. "Waste containment area" means any part of an animal feeding operation where waste is stored or contained including settling basins and areas within berms and diversions that separate uncontaminated stormwater.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-A902. AZPDES Permit Transition, Applicability, and Exclusions

- A. Upon the effective date of EPA approval of the AZPDES program, the Department shall, under A.R.S. Title 49, Chapter 2, Article 3.1 and Articles 9 and 10 of this Chapter, administer any permit authorized or issued under the NPDES program,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

including an expired permit that EPA has continued in effect under 40 CFR 122.6.

1. The Director shall give a notice to all Arizona NPDES permittees, except NPDES permittees located on and discharging in Indian Country, and shall publish a notice in one or more newspapers of general circulation in the state. The notice shall contain:
 - a. The effective date of EPA approval of the AZPDES program;
 - b. The name and address of the Department;
 - c. The name of each individual permitted facility and its permit number;
 - d. The title of each general permit administered by the Department;
 - e. The name and address of the contact person, to which the permittee will submit notification and monitoring reports;
 - f. Information specifying the state laws equivalent to the federal laws or regulations referenced in a NPDES permit; and
 - g. The name, address, and telephone number of a person from whom an interested person may obtain further information about the transition.
 2. The Department shall provide the following entities with a copy of the notice:
 - a. Each county department of health, environmental services, or comparable department;
 - b. Each Arizona council of government, tribal government, the states of Utah, Nevada, New Mexico, and California, and EPA Region 9;
 - c. Any person who requested, in writing, notification of the activity;
 - d. The Mexican Secretaria de Medio Ambiente y Recursos Naturales, and
 - e. The United States Section of the International Boundary and Water Commission.
 3. If a timely application for a NPDES permit is submitted to EPA before approval of the AZPDES program, the applicant may continue the process with EPA or request the Department to act on the application. In either case, the Department shall issue the permit.
 4. The terms and conditions under which the permit was issued remain the same until the permit is modified.
- B.** Article 9 of this Chapter applies to any “discharge of a pollutant.” Examples of categories that result in a “discharge of a pollutant” and may require an AZPDES permit include:
1. CAFOs;
 2. Concentrated aquatic animal production facilities;
 3. Case-by-case designation of concentrated aquatic animal production facilities;
 - a. The Director may designate any warm- or cold-water aquatic animal production facility as a concentrated aquatic animal production facility upon determining that it is a significant contributor of pollution to navigable waters. The Director shall consider the following factors when making this determination:
 - i. The location and quality of the receiving waters of the United States;
 - ii. The holding, feeding, and production capacities of the facility;
 - iii. The quantity and nature of the pollutants reaching navigable waters; and
 - iv. Any other relevant factor;
 - b. A permit application is not required from a concentrated aquatic animal production facility designated under subsection (B)(3)(a) until the Director conducts an onsite inspection of the facility and determines that the facility should and could be regulated under the AZPDES permit program;
4. Aquaculture projects;
 5. Manufacturing, commercial, mining, and silviculture point sources;
 6. POTWs;
 7. New sources and new dischargers;
 8. Stormwater discharges:
 - a. Associated with industrial activity as defined under 40 CFR 122.26(b)(14), incorporated by reference in R18-9-A905(A)(1)(d). The Department shall not consider a discharge to be a discharge associated with industrial activity if the discharge is composed entirely of stormwater and meets the conditions of no exposure as defined under 40 CFR 122.26(g), incorporated by reference in R18-9-A905(A)(1)(d);
 - b. From a large, medium, or small MS4;
 - c. From a construction activity, including clearing, grading, and excavation, that results in the disturbance of:
 - i. Equal to or greater than one acre or;
 - ii. Less than one acre of total land area that is part of a larger common plan of development or sale if the larger common plan will ultimately disturb equal to or greater than one acre; but
 - iii. Not including routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of the facility;
 - d. Any discharge that the Director determines contributes to a violation of a water quality standard or is a significant contributor of pollutants to a navigable water, which may include a discharge from a conveyance or system of conveyances (including roads with drainage systems and municipal streets) used for collecting and conveying stormwater runoff or a system of discharges from municipal separate storm sewers.
- C.** Articles 9 and 10 of this Chapter apply to the following biosolids categories and may require an AZPDES permit:
1. Treatment works treating domestic sewage that would not otherwise require an AZPDES permit; and
 2. Using, applying, generating, marketing, transporting, and disposing of biosolids.
- D.** Director designation of MS4s.
1. The Director may designate and require any small MS4 located outside of an urbanized area to obtain an AZPDES stormwater permit. The Director shall base this designation on whether a stormwater discharge results in or has the potential to result in an exceedance of a water quality standard, including impairment of a designated use, or another significant water quality impact, including a habitat or biological impact.
 - a. When deciding whether to designate a small MS4, the Director shall consider the following criteria:
 - i. Discharges to sensitive waters,
 - ii. Areas with high growth or growth potential,
 - iii. Areas with a high population density,
 - iv. Areas that are contiguous to an urbanized area,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- v. Small MS4s that cause a significant contribution of pollutants to a navigable water,
 - vi. Small MS4s that do not have effective programs to protect water quality, and
 - vii. Any other relevant criteria.
- b. The same requirements for small MS4s designated under 40 CFR 122.32(a)(1) apply to permits for designated MS4s not waived under R18-9-B901(A)(3).
2. The Director may designate an MS4 as part of a large or medium system due to the interrelationship between the discharges from a designated storm sewer and the discharges from a municipal separate storm sewer described under R18-9-A901(16)(a) and (b), or R18-9-A901(20)(a) or (b), as applicable. In making this determination, the Director shall consider the following factors:
 - a. Physical interconnections between the municipal separate storm sewers;
 - b. The location of discharges from the designated municipal separate storm sewer relative to discharges from municipal separate storm sewers described in R18-9-A901(16)(a) and R18-9-A901(20)(a);
 - c. The quantity and nature of pollutants discharged to a navigable water;
 - d. The nature of the receiving waters; and
 - e. Any other relevant factor.
 3. The Director shall designate a small MS4 that is physically interconnected with a MS4 that is regulated by the AZPDES program if the small MS4 substantially contributes to the pollutant loading of the regulated MS4.
- E.** Petitions. The Director may, upon a petition, designate as a large, medium or small MS4, a municipal separate storm sewer located within the boundaries of a region defined by a stormwater management regional authority based on a jurisdictional, watershed, or other appropriate basis that includes one or more of the systems described in R18-9-A901(16), R18-9-A901(20) or R18-9-A901(35), as applicable.
- F.** Phase-ins.
1. The Director may phase-in permit coverage for a small MS4 serving a jurisdiction with a population of less than 10,000 if a phasing schedule is developed and implemented for approximately 20 percent annually of all small MS4s that qualify for the phased-in coverage.
 - a. If the phasing schedule is not yet approved for permit coverage, the Director shall, by December 9, 2002, determine whether to issue an AZPDES permit or allow a waiver under R18-9-B901(A)(3) for each eligible MS4.
 - b. All regulated MS4s shall have coverage under an AZPDES permit no later than March 8, 2007.
 2. The Director may provide a waiver under R18-9-B901(A)(3) for any municipal separate storm sewage system operating under a phase-in plan.
- G.** Exclusions. The following discharges do not require an AZPDES permit:
1. Discharge of dredged or fill material into a navigable water that is regulated under section 404 of the Clean Water Act (33 U.S.C. 1344);
 2. The introduction of sewage, industrial wastes, or other pollutants into POTWs by indirect dischargers. Plans or agreements to switch to this method of disposal in the future do not relieve dischargers of the obligation to have and comply with a permit until all discharges of pollutants to a navigable water are eliminated. This exclusion does not apply to the introduction of pollutants to privately owned treatment works or to other discharges through a pipe, sewer, or other conveyance owned by the state, a municipality, or other party not leading to treatment works;
3. Any discharge in compliance with the instructions of an on-scene coordinator under 40 CFR 300, The National Oil and Hazardous Substances Pollution Contingency Plan; or 33 CFR 153.10(e), Control of Pollution by Oil and Hazardous Substances, Discharge Removal;
 4. Any introduction of pollutants from a nonpoint source agricultural or silvicultural activity, including stormwater runoff from an orchard, cultivated crop, pasture, rangeland, and forest land, but not discharges from a concentrated animal feeding operation, concentrated aquatic animal production facility, silvicultural point source, or to an aquaculture project;
 5. Return flows from irrigated agriculture;
 6. Discharges into a privately owned treatment works, except as the Director requires under 40 CFR 122.44(m), which is incorporated by reference in R18-9-A905(A)(3)(d);
 7. Discharges from conveyances for stormwater runoff from mining operations or oil and gas exploration, production, processing or treatment operations, or transmission facilities, composed entirely of flows from conveyances or systems of conveyances, including pipes, conduits, ditches, and channels, used for collecting and conveying precipitation runoff and that are not contaminated by contact with or that has not come into contact with, any overburden, raw material, intermediate products, finished product, byproduct, or waste product located on the site of the operations.
- H.** Conditional no exposure exclusion.
1. Discharges composed entirely of stormwater are not considered stormwater discharges associated with an industrial activity if there is no exposure, and the discharger satisfies the conditions under 40 CFR 122.26(g), which is incorporated by reference in R18-9-A905(A)(1)(d).
 2. For purposes of this subsection:
 - a. "No exposure" means that all industrial materials and activities are protected by a storm resistant shelter to prevent exposure to rain, snow, snowmelt, and runoff.
 - b. "Industrial materials or activities" include material handling equipment or activities, industrial machinery, raw materials, intermediate products, by-products, final products, or waste products.
 - c. "Material-handling activities" include storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, final product, or waste product.
- Historical Note**
- New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 2704, effective June 5, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).
- R18-9-A903. Prohibitions**
- A.** The Director shall not issue a permit for a discharge to a WOTUS:
1. If the conditions of the permit do not provide for compliance with the applicable requirements of A.R.S. Title 49,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Chapter 2, Article 3.1; 18 A.A.C. 9, Articles 9 and 10; and the Clean Water Act;

2. Before resolution of an EPA objection to a draft or proposed permit under R18-9-A908(C);
 3. If the imposition of conditions cannot ensure compliance with the applicable water quality requirements from Arizona or an affected state or tribe, or a federally promulgated water quality standard under 40 CFR 131.31;
 4. If in the judgment of the Secretary of the U.S. Army, acting through the Chief of Engineers, the discharge will substantially impair anchorage and navigation in or on any navigable water;
 5. For the discharge of any radiological, chemical, or biological warfare agent, or high-level radioactive waste;
 6. For any discharge inconsistent with a plan or plan amendment approved under section 208(b) of the Clean Water Act (33 U.S.C. 1288); and
 7. To a new source or a new discharger if the discharge from its construction or operation will cause or contribute to the violation of a water quality standard. The owner or operator of a new source or new discharger proposing to discharge into a water segment that does not meet water quality standards or is not expected to meet those standards even after the application of the effluent limitations required under R18-9-A905(A)(8), and for which the Department has performed a wasteload allocation for the proposed discharge, shall demonstrate before the close of the public comment period that:
 - a. There are sufficient remaining wasteload allocations to allow for the discharge, and
 - b. The existing dischargers into the segment are subject to schedules of compliance designed to bring the segment into compliance with water quality standards.
- B.** The Director shall not issue a permit for a discharge to a non-WOTUS protected surface water:
1. If the permit or the conditions of the permit violate the restrictions listed in A.R.S. § 49-255.04; and
 2. If the conditions of the permit do not provide for compliance with 18 A.A.C. 11, Article 2 and the applicable requirements of 18 A.A.C. 9, Article 9.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 2704, effective June 5, 2002 (Supp. 02-2). Amended by final rulemaking at 29 A.A.R. 296 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-9-A904. Effect of a Permit

- A.** Except for a standard or prohibition imposed under section 307 of the Clean Water Act (33 U.S.C. 1317) for a toxic pollutant that is injurious to human health and standards for sewage sludge use or disposal under Article 10 of this Chapter, compliance with an AZPDES permit during its term constitutes compliance, for purposes of enforcement, with Article 9 of this Chapter. However, the Director may modify, revoke and reissue, suspend, or terminate a permit during its term for cause under R18-9-B906.
- B.** The issuance of a permit does not convey any property rights of any sort, or any exclusive privilege.
- C.** The issuance of a permit does not authorize any injury to a person or property or invasion of other private rights, or any infringement of federal, state, or local law, or regulations.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-A905. AZPDES Program Standards

- A.** Except for subsection (A)(11), the following 40 CFR sections and appendices, amended as of April 15, 2023, as they apply to the NPDES program, are incorporated by reference, do not include any later amendments or editions of the incorporated matter, and are on file with the Department:
 1. General program requirements.
 - a. 40 CFR 122.7;
 - b. 40 CFR 122.21, except 40 CFR 122.21(a) through (e) and (l);
 - c. 40 CFR 122.22;
 - d. 40 CFR 122.26, except 40 CFR 122.26(c)(2), and 40 CFR 122.26(e)(2);
 - e. 40 CFR 122.29;
 - f. 40 CFR 122.32;
 - g. 40 CFR 122.33;
 - h. 40 CFR 122.34;
 - i. 40 CFR 122.35;
 - j. 40 CFR 122.62(a) and (b).
 2. Procedures for Decision making.
 - a. 40 CFR 124.8, except 40 CFR 124.8(b)(3); and
 - b. 40 CFR 124.56.
 3. Permit requirements and conditions.
 - a. 40 CFR 122.41, except 40 CFR 122.41(a)(2) and (a)(3);
 - b. 40 CFR 122.42;
 - c. 40 CFR 122.43;
 - d. 40 CFR 122.44;
 - e. 40 CFR 122.45;
 - f. 40 CFR 122.47;
 - g. 40 CFR 122.48; and
 - h. 40 CFR 122.50.
 4. Criteria and standards for the national pollutant discharge elimination system. 40 CFR 125, subparts A, B, D, H, and I.
 5. Toxic pollutant effluent standards. 40 CFR 129.
 6. Secondary treatment regulation. 40 CFR 133.
 7. Guidelines for establishing test procedures for the analysis of pollutants, 40 CFR 136.
 8. Effluent guidelines and standards.
 - a. General provisions, 40 CFR 401; and
 - b. General pretreatment regulations for existing and new sources of pollution, 40 CFR 403 and Appendices A, D, E, and G.
 9. Effluent limitations guidelines. 40 CFR 405 through 40 CFR 471.
 10. Standards for the use or disposal of sewage sludge. 40 CFR 503, Subpart C.
 11. The following substitutions apply to the material in subsections (A)(1) through (A)(10):
 - a. Substitute the term AZPDES for any reference to NPDES;
 - b. Except for 40 CFR 122.21(f) through (q), substitute R18-9-B901 (individual permit), and R18-9-C901 (general permit), for any reference to 40 CFR 122.21;
 - c. Substitute Articles 9 and 10 of this Chapter for any reference to 40 CFR 122;
 - d. Substitute R18-9-C901 for any reference to 40 CFR 122.28;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- e. Substitute R18-9-B901 (individual permit), and R18-9-C901 (general permit), for any reference to 40 CFR 122 subpart B;
- f. Substitute Articles 9 and 10 of this Chapter for any reference to 40 CFR 123;
- g. Substitute Articles 9 and 10 of this Chapter for any reference to 40 CFR 124;
- h. Substitute R18-9-1006 for any reference to 40 CFR 503.32; and
- i. Substitute R18-9-1010 for any reference to 40 CFR 503.33.

B. A person shall analyze a pollutant using a test procedure for the pollutant specified by the Director in an AZPDES permit. If the Director does not specify a test procedure for a pollutant in an AZPDES permit, a person shall analyze the pollutant using:

1. A test procedure listed in 40 CFR 136, which is incorporated by reference in subsection (A)(7);
2. An alternate test procedure approved by the EPA as provided in 40 CFR 136;
3. A test procedure listed in 40 CFR 136, with modifications allowed by the EPA and approved as a method alteration by the Arizona Department of Health Services under A.A.C. R9-14-610(B); or
4. If a test procedure for a pollutant is not available under subsection (B)(1) through (B)(3), a test procedure listed in A.A.C. R9-14-612 or approved under A.A.C. R9-14-610(C).

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 2704, effective June 5, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4). Amended by final expedited rulemaking at 30 A.A.R. 28 (January 5, 2024), with an immediate effective date of December 15, 2023 (Supp. 23-4).

R18-9-A906. General Pretreatment Regulations for Existing and New Sources of Pollution

- A.** The reduction or alteration of a pollutant may be obtained by physical, chemical, or biological processes, process changes, or by other means, except as prohibited under 40 CFR 403.6(d), which is incorporated by reference in R18-9-A905(A)(8)(b). Appropriate pretreatment technology includes control equipment, such as equalization tanks or facilities, for protection against surges or slug loading that might interfere with or otherwise be incompatible with the POTW. However, if wastewater from a regulated process is mixed in an equalization facility with unregulated wastewater or with wastewater from another regulated process, the effluent from the equalization facility shall meet an adjusted pretreatment limit calculated under 40 CFR 403.6(e), which is incorporated by reference in R18-9-A905(A)(8)(b).
- B.** Pretreatment applies to:
1. Pollutants from non-domestic sources covered by pretreatment standards that are indirectly discharged, transported by truck or rail, or otherwise introduced into POTWs;
 2. POTWs that receive wastewater from sources subject to national pretreatment standards; and
 3. Any new or existing source subject to national pretreatment standards.

- C.** National pretreatment standards do not apply to sources that discharge to a sewer that is not connected to a POTW.
- D.** For purposes of this Section the terms “National Pretreatment Standard” and “Pretreatment Standard” mean any regulation containing pollutant discharge limits promulgated by EPA under section 307(b) and (c) of the Clean Water Act (33 U.S.C. 1317), which applies to Industrial Users. This term includes prohibitive discharge limits established under 40 CFR 403.5.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-A907. Public Notice

- A.** Individual permits.
1. The Director shall publish a notice that a draft individual permit has been prepared, or a permit application has been tentatively denied, in one or more newspapers of general circulation where the facility is located. The notice shall contain:
 - a. The name and address of the Department;
 - b. The name and address of the permittee or permit applicant and if different, the name of the facility or activity regulated by the permit;
 - c. A brief description of the business conducted at the facility or activity described in the permit application;
 - d. The name, address, and telephone number of a person from whom an interested person may obtain further information, including copies of the draft permit, fact sheet, and application;
 - e. A brief description of the comment procedures, the time and place of any hearing, including a statement of procedures to request a hearing (unless a hearing has already been scheduled), and any other procedure by which the public may participate in the final permit decision;
 - f. A general description of the location of each existing or proposed discharge point and the name of the receiving water;
 - g. For sources subject to section 316(a) of the Clean Water Act, a statement that the thermal component of the discharge is subject to effluent limitations under the Clean Water Act, section 301 (33 U.S.C. 1311) or 306 (33 U.S.C. 1316) and a brief description, including a quantitative statement, of the thermal effluent limitations proposed under section 301 (33 U.S.C. 1311) or 306 (33 U.S.C. 1316);
 - h. Requirements applicable to cooling water intake structures at new facilities subject to 40 CFR 125, subpart I; and
 - i. Any additional information considered necessary to the permit decision.
 2. The Department shall provide the applicant with a copy of the draft individual permit.
 3. Copy of the notice. The Department shall provide the following entities with a copy of the notice:
 - a. The applicant or permittee;
 - b. Any user identified in the permit application of a privately owned treatment works;
 - c. Any affected federal, state, tribal, or local agency, or council of government;
 - d. Federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources, the Arizona

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historic Preservation Office, and the U.S. Army Corps of Engineers;

- e. Each applicable county department of health, environmental services, or comparable department;
- f. Any person who requested, in writing, notification of the activity; and
- g. The Secretaria de Medio Ambiente y Recursos Naturales and the United States Section of the International Boundary and Water Commission, if the Department is aware the effluent discharge is expected to reach Sonora, Mexico, either through surface water or groundwater.

- B. General permits.** If the Director considers issuing a general permit applicable to a category of discharge under R18-9-C901, the Director shall publish a general notice of the draft permit in the *Arizona Administrative Register*. The notice shall contain:
1. The name and address of the Department,
 2. The name of the person to contact regarding the permit,
 3. The general permit category,
 4. A brief description of the proposed general permit,
 5. A map or description of the permit area,
 6. The web site or any other location where the proposed general permit may be obtained, and
 7. The ending date for public comment.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-A908. Public Participation, EPA Review, EPA Hearing

- A. Public comment period.**
1. The Director shall accept written comments from any interested person before a decision is made on any notice published under R18-9-A907(A) or (B).
 2. The public comment period begins on the publication date of the notice and extends for 30 calendar days.
 3. The Director may extend the comment period to provide commenters a reasonable opportunity to participate in the decision-making process.
 4. If any data, information, or arguments submitted during the public comment period appear to raise substantial new questions concerning a permit, the Director may reopen or extend the comment period to provide interested persons an opportunity to comment on the information or arguments submitted. Comments filed during a reopened comment period are limited to the substantial new questions that caused its reopening.
 - a. Corps of Engineers.
 - i. If the District Engineer advises the Director that denying the permit or imposing specified conditions upon a permit is necessary to avoid any substantial impairment of anchorage or navigation, then the Director shall deny the permit or include the specified conditions in the permit.
 - ii. A person shall use the applicable procedures of the Corps of Engineers Review and not the procedures under this Article to appeal the denial of a permit or conditions specified by the District Engineer.

iii. If the conditions are stayed by a court of competent jurisdiction or by applicable procedures of the Corps of Engineers, those conditions are considered stayed in the AZPDES permit for the duration of that stay.

- b. If an agency with jurisdiction over fish, wildlife, or public health advises the Director in writing that the imposition of specified conditions upon the permit is necessary to avoid substantial impairment of fish, shellfish, or wildlife resource, the Director may include the specified conditions in the permit to the extent they are determined necessary to carry out the provisions of the Clean Water Act.

B. Public hearing.

1. The Director shall provide notice and conduct a public hearing to address a draft permit or denial regarding a final decision if:
 - a. Significant public interest in a public hearing exists, or
 - b. Significant issues or information have been brought to the attention of the Director during the comment period that was not considered previously in the permitting process.
2. If, after publication of the notice under R18-9-A907, the Director determines that a public hearing is necessary, the Director shall schedule a public hearing and publish notice of the public hearing at least once, in one or more newspapers of general circulation where the facility is located. The notice for public hearing shall contain:
 - a. The date, time, and place of the hearing;
 - b. Reference to the date of a previous public notice relating to the proposed decision, if any; and
 - c. A brief description of the nature and purpose of the hearing, including reference to the applicable laws and rules.
3. The Department shall accept written public comment until the close of the hearing or until a later date specified by the person presiding at the public hearing.

C. EPA review of draft and proposed permits.

1. Individual permits.
 - a. The Department shall send a copy of the draft permit to EPA.
 - b. If EPA objects to the draft permit within 30 days from the date of receipt of the draft permit, the EPA comment period is extended to 90 days from the date of receipt of the draft permit and the substantive review time-frame is suspended until EPA makes a final determination.
 - c. If, based on public comments, the Department revises the draft permit, the Department shall send EPA a copy of the proposed permit. If EPA objects to the proposed permit within 30 days from the date of receipt of the proposed permit, the EPA comment period is extended to 90 days from the date of receipt of the proposed permit and the substantive review time-frame is suspended until EPA makes a final determination.
 - d. If EPA withdraws its objection to the draft or proposed permit or does not submit specific objections within 90 days, the Director shall issue the permit.
2. General permits. The Director shall send a copy of the draft permit to EPA and comply with the following review procedure for EPA comments:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- a. If EPA objects to the draft permit within 90 days from receipt of the draft permit, the Department shall not issue the permit until the objection is resolved;
 - b. If, based on public comments, the Department revises the draft permit, the Department shall send EPA a copy of the proposed permit. If EPA objects to the proposed permit within 90 days from receipt of the proposed permit, the Department shall not issue the permit until the objection is resolved;
 - c. If EPA withdraws its objection to the draft or proposed permit or does not submit specific objections within 90 days, the Director shall issue the permit.
- D. EPA hearing.** Within 90 days of receipt by the Director of a specific objection by EPA, the Director or any interested person may request that EPA hold a public hearing on the objection.
1. If following the public hearing EPA withdraws the objection, the Director shall issue the permit.
 2. If a public hearing is not held, and EPA reaffirms the original objection, or modifies the terms of the objection, and the Director does not resubmit a permit revised to meet the EPA objection within 90 days of receipt of the objection, EPA may issue the permit for one term. Following the completion of the permit term, authority to issue the permit reverts to the Department.
 3. If a public hearing is held and EPA does not withdraw an objection or modify the terms of the objection, and the Director does not resubmit a permit revised to meet the EPA objection within 30 days of notification of the EPA objection, EPA may issue the permit for one permit term. Following the completion of the permit term, authority to issue the permit reverts to the Department.
 4. If EPA issues the permit instead of the Director, the Department shall close the application file.
- E. Final permit determination.**
1. Individual permits. At the same time the Department notifies a permittee or an applicant of the final individual permit determination, the Department shall send, through regular mail, a notice of the determination to any person who submitted comments or attended a public hearing on the final individual permit determination. The Department shall:
 - a. Specify the provisions, if any, of the draft individual permit that have been changed in the final individual permit determination, and the reasons for the change; and
 - b. Briefly describe and respond to all significant comments on the draft individual permit or the permit application raised during the public comment period, or during any hearing.
 2. General permits. The Director shall publish a general notice of the final permit determination in the *Arizona Administrative Register*. The notice shall:
 - a. Specify the provisions, if any, of the draft general permit that have been changed in the final general permit determination, and the reasons for the change;
 - b. Briefly describe and respond to all significant comments on the draft general permit raised during the public comment period, or during any hearing; and
 - c. Specify where a copy of the final general permit may be obtained.
 3. The Department shall make the response to comments available to the public.
- Historical Note**
New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).
- R18-9-A909. Petitions**
- A.** Any person may submit a petition to the Director requesting:
 1. The issuance of a general permit;
 2. An individual permit covering any discharge into an MS4 under 40 CFR 122.26(f), which is incorporated by reference in R18-9-A905(A)(1)(d); or
 3. An individual permit under R18-9-C902(B)(1).
 - B.** The petition shall contain:
 1. The name, address, and telephone number of the petitioner;
 2. The location of the facility;
 3. The exact nature of the petition, and
 4. Evidence of the validity of the petition.
 - C.** The Department shall provide the permittee with a copy of the petition.
- Historical Note**
New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).
- PART B. INDIVIDUAL PERMITS**
- R18-9-B901. Individual Permit Application**
- A.** Time to apply.
 1. Any person who owns or operates a facility covered by R18-9-A902(B) or R18-9-A902(C), shall apply for an AZPDES individual permit at least 180 days before the date of the discharge or a later date if granted by the Director, unless the person:
 - a. Is exempt under R18-9-A902(G);
 - b. Is covered by a general permit under Article 9, Part C of this Chapter; or
 - c. Is a user of a privately owned treatment works, unless the Director requires a permit under 40 CFR 122.44(m).
 2. Construction. Any person who proposes a construction activity under R18-9-A902(B)(9)(c) or R18-9-A902(B)(9)(d) and wishes coverage under an individual permit, shall apply for the individual permit at least 90 days before the date on which construction is to commence.
 3. Waivers.
 - a. Unless the Director grants a waiver under 40 CFR 122.32, a person operating a small MS4 is regulated under the AZPDES program.
 - b. The Director shall review any waiver granted under subsection (A)(3)(a) at least every five years to determine whether any of the information required for granting the waiver has changed.
 - B.** Application. An individual permit applicant shall submit the following information on an application obtained from the Department. The Director may require more than one application from a facility depending on the number and types of discharges or outfalls.
 1. Discharges, other than stormwater.
 - a. The information required under 40 CFR 122.21(f) through (k);
 - b. The signature of the certifying official required under 40 CFR 122.22;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- c. The name and telephone number of the operator, if the operator is not the applicant; and
- d. Whether the facility is located in the border area, and, if so:
 - i. A description of the area into which the effluent discharges from the facility may flow, and
 - ii. A statement explaining whether the effluent discharged is expected to cross the Arizona-Sonora, Mexico border.
2. Stormwater. In addition to the information required in subsection (B)(1)(c) and (B)(1)(d):
 - a. For stormwater discharges associated with industrial activity, the application requirements under 40 CFR 122.26(c)(1);
 - b. For large and medium MS4s, the application requirements under 40 CFR 122.26(d);
 - c. For small MS4s:
 - i. A stormwater management program under 40 CFR 122.34, and
 - ii. The application requirements under 40 CFR 122.33.
- C. Consolidation of permit applications.
 1. The Director may consolidate two or more permit applications for any facility or activity that requires a permit under Articles 9 and 10 of this Chapter.
 2. Whenever a facility or activity requires an additional permit under Articles 9 and 10 of this Chapter, the Director may coordinate the expiration date of the new permit with the expiration date of an existing permit so that all permits expire simultaneously. The Department may then consolidate the processing of the subsequent applications for renewal permits.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 30 A.A.R. 28 (January 5, 2024), with an immediate effective date of December 15, 2023 (Supp. 23-4).

R18-9-B902. Requested Coverage Under a General Permit

An owner or operator may request that an individual permit be revoked, if a source is excluded from a general permit solely because it already has an individual permit.

1. The Director shall grant the request for revocation of an individual permit upon determining that the permittee otherwise qualifies for coverage under a general permit.
2. Upon revocation of the individual permit, the general permit applies to the source.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-B903. Individual Permit Issuance or Denial

- A. Once the application is complete, the Director shall tentatively decide whether to prepare a draft permit or to deny the application.
- B. Permit issuance. If, based upon the information obtained by or available to the Department under R18-9-A907, R18-9-A908, and R18-9-B901, the Director determines that an applicant complies with A.R.S. Title 49, Chapter 2, Article 3.1 and Articles 9 and 10 of this Chapter, the Director shall issue a permit that is effective as prescribed in A.R.S. 49-255.01(H).
- C. Permit denial.
 1. If the Director decides to deny the permit application, the Director shall provide the applicant with a written notice of intent to deny the permit application. The written notification shall include:
 - a. The reason for the denial with reference to the statute or rule on which the denial is based;
 - b. The applicant's right to appeal the denial with the Water Quality Appeals Board under A.R.S. § 49-323, the number of days the applicant has to file a protest challenging the denial, and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
 - c. The applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.
 2. The Director shall provide an opportunity for public comment under R18-9-A907 and R18-9-A908 on a denial.
 3. The decision of the Director to deny the permit application takes effect 30 days after the decision is served on the applicant, unless the applicant files an appeal under A.R.S. 49-255.01(H)(1).

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-B904. Individual Permit Duration, Reissuance, and Continuation

- A. Permit duration.
 1. An AZPDES individual permit is effective for a fixed term of not more than five years. The Director may issue a permit for a duration that is less than the full allowable term.
 2. If the Director does not reissue a permit within the period specified in the permit, the permit expires, unless it is continued under subsection (C).
 3. If a permittee of a large or medium MS4 allows a permit to expire by failing to reapply within the time period specified in subsection (B), the permittee shall submit a new application under R18-9-B901 and follow the application requirements under 40 CFR 122.26(d), which is incorporated by reference in R18-9-A905(A)(1)(d).
- B. Permit reissuance.
 1. A permittee shall reapply for an individual permit at least 180 days before the permit expiration date.
 2. Unless otherwise specified in the permit, an annual report submitted 180 days before the permit expiration date satisfies the reapplication requirement for an MS4 permit. The annual report shall contain:
 - a. The name, address, and telephone number of the MS4;
 - b. The name, address, and telephone number of the contact person;
 - c. The status of compliance with permit conditions, including an assessment of the appropriateness of the selected best management practices and progress toward achieving the selected measurable goals for each minimum measure;
 - d. The results of any information collected and analyzed, including monitoring data, if any;
 - e. A summary of the stormwater activities planned for the next reporting cycle;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- f. A change in any identified best management practices or measurable goals for any minimum measure; and
 - g. Notice of relying on another governmental entity to satisfy some of the permit obligations.
- C. Continuation. An AZPDES individual permit may continue beyond its expiration date if:
1. The permittee has submitted a complete application for an AZPDES individual permit at least 180 days before the expiration date of the existing permit and the permitted activity is of a continuing nature; and
 2. The Department is unable, through no fault of the permittee, to issue an AZPDES individual permit on or before the expiration date of the existing permit.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 30 A.A.R. 28 (January 5, 2024), with an immediate effective date of December 15, 2023 (Supp. 23-4).

R18-9-B905. Individual Permit Transfer

- A. A permittee may request the Director to transfer an individual permit to a new permittee. The Director may modify, or revoke and reissue the permit to identify the new permittee, or make a minor modification to identify the new permittee.
- B. Automatic transfer. The Director may automatically transfer an individual permit to a new permittee if:
1. The current permittee notifies the Director by certified mail at least 30 days in advance of the proposed transfer date and includes a written agreement between the existing and new permittee containing a specific date for transfer of permit responsibility, coverage, and liability between them; and
 2. The Director does not notify the existing permittee and the proposed new permittee of the Director's intent to modify, or revoke and reissue the permit. A modification under this subsection may include a minor modification specified in R18-9-B906(B).

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-B906. Modification, Revocation and Reissuance, and Termination of Individual Permits

- A. Permit modification, revocation and reissuance.
1. The Director may modify, or revoke and reissue an individual permit for any of the following reasons:
 - a. The Director receives a written request from an interested person;
 - b. The Director receives information, such as when inspecting a facility;
 - c. The Director receives a written request to modify, or revoke and reissue a permit from a permittee as required in the individual permit; or
 - d. After review of a permit file, the Director determines one or more of the causes listed under 40 CFR 122.62(a) or (b) exists.
 - i. If the Director decides a written request is not justified under 40 CFR 122.62 or subsection (B), the Director shall send the requester a brief written response giving a reason for the decision.
- B. Minor modifications.
1. Upon consent of the permittee, the Director may make any of the following modifications to an individual permit:
 - a. Correct typographical errors;
 - b. Update a permit condition that changed as a result of updating an Arizona water quality standard;
 - c. Require more frequent monitoring or reporting by the permittee;
 - d. Change an interim compliance date in a schedule of compliance, provided the new date is not more than 120 days after the date specified in the existing permit and does not interfere with attainment of the final compliance date requirement;
 - e. Allow for a change in ownership or operational control of a facility, if no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittees has been submitted to the Director;
 - f. Change the construction schedule for a new source discharger. The change shall not affect a discharger's obligation to have all pollution control equipment installed and in operation before the discharge;
 - g. Delete a point source outfall if the discharge from that outfall is terminated and does not result in a discharge of pollutants from other outfalls except under permit limits;
 - h. Incorporate conditions of a POTW pretreatment program approved under 40 CFR 403.11 and 40 CFR 403.18, which is incorporated by reference in R18-9-A905(A)(8) as enforceable conditions of the permit, and
 - i. Annex an area by a municipality.
 2. Any modification processed under subsection (B)(1) is not subject to the public notice provision under R18-9-A907 or public participation procedures under R18-9-A908.
- C. Permit termination.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. The Director may terminate an individual permit during its term or deny reissuance of a permit for any of the following causes:
 - a. The permittee's failure to comply with any condition of the permit;
 - b. The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant fact;
 - c. The Director determined that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or
 - d. A change occurs in any condition that requires either a temporary or permanent reduction or elimination of any discharge, sludge use, or disposal practice controlled by the permit, for example, a plant closure or termination of discharge by connection to a POTW.
2. If the Director terminates a permit during its term or denies a permit renewal application for any cause listed in subsection (C)(1), the Director shall issue a Notice of Intent to Terminate, except when the entire discharge is terminated.
 - a. Unless the permittee objects to the termination notice within 30 days after the notice is sent, the termination is final at the end of the 30 days.
 - b. If the permittee objects to the termination notice, the permittee shall respond in writing to the Director within 30 days after the notice is sent.
 - c. Expedited permit termination. If a permittee requests an expedited permit termination procedure, the permittee shall certify that the permittee is not subject to any pending state or federal enforcement actions, including citizen suits brought under state or federal law.
 - d. The denial of a request for termination is not subject to public notice, comment, or hearing under R18-9-A907 and R18-9-A908(A) and (B).

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final expedited rulemaking at 30 A.A.R. 28 (January 5, 2024), with an immediate effective date of December 15, 2023 (Supp. 23-4).

R18-9-B907. Individual Permit Variances

- A. The Director may grant or deny a request for any of the following variances:
 1. An extension under section 301(i) of the Clean Water Act (33 U.S.C. 1311) based on a delay in completion of a POTW;
 2. After consultation with EPA, an extension under section 301(k) of the Clean Water Act (33 U.S.C. 1311) based on the use of innovative technology;
 3. A variance under section 316(a) of the Clean Water Act (33 U.S.C. 1326) for thermal pollution, or
 4. A variance under R18-11-122 for a water quality standard.
- B. The Director may deny, forward to EPA with a written concurrence, or submit to EPA without recommendation a completed request for:
 1. A variance based on the economic capability of the applicant under section 301(c) of the Clean Water Act (33 U.S.C. 1311); or
 2. A variance based on water quality related effluent limitations under 302(b)(2) (33 U.S.C. 1312) of the Clean Water Act.

- C. The Director may deny or forward to EPA with a written concurrence a completed request for:
 1. A variance based on the presence of fundamentally different factors from those on which an effluent limitations guideline is based; and
 2. A variance based upon water quality factors under section 301(g) of the Clean Water Act (33 U.S.C. 1311).
- D. If the Department approves a variance under subsection (A) or if EPA approves a variance under subsection (B) or (C), the Director shall prepare a draft permit incorporating the variance. Any public notice of a draft permit for which a variance or modification has been approved or denied shall identify the applicable procedures for appealing the decision.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

PART C. GENERAL PERMITS**R18-9-C901. General Permit Issuance**

- A. The Director may issue a general permit to cover one or more categories of discharges, sludge use, or disposal practices, or facilities within a geographic area corresponding to existing geographic or political boundaries, if the sources within a covered category of discharges are either:
 1. Stormwater point sources; or
 2. One or more categories of point sources other than stormwater point sources, or one or more categories of treatment works treating domestic sewage, if the sources, or treatment works treating domestic sewage, within each category all:
 - a. Involve the same or substantially similar types of operations;
 - b. Discharge the same types of wastes or engage in the same types of sludge use or disposal practices;
 - c. Require the same effluent limitations, operating conditions, or standards for sludge use or disposal;
 - d. Require the same or similar monitoring; and
 - e. Are more appropriately controlled under a general permit than under an individual permit.
- B. Any person seeking coverage under a general permit issued under subsection (A) shall submit a Notice of Intent on a form provided by the Department within the time-frame specified in the general permit unless exempted under the general permit as provided in subsection (C)(2). The person shall not discharge before the time specified in the general permit unless the discharge is authorized by another permit.
- C. Exemption from filing a Notice of Intent.
 1. The following dischargers are not exempt from submitting a Notice of Intent:
 - a. A discharge from a POTW;
 - b. A combined sewer overflow;
 - c. A MS4;
 - d. A primary industrial facility;
 - e. A stormwater discharge associated with industrial activity;
 - f. A CAFO;
 - g. A treatment works treating domestic sewage; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- h. A stormwater discharge associated with construction activity.
2. For dischargers not listed in subsection (C)(1), the Director may consider a Notice of Intent inappropriate for the discharge and authorize the discharge under a general permit without a Notice of Intent. In making this finding, the Director shall consider:
- The type of discharge,
 - The expected nature of the discharge,
 - The potential for toxic and conventional pollutants in the discharge,
 - The expected volume of the discharge,
 - Other means of identifying the discharges covered by the permit, and
 - The estimated number of discharges covered by the permit.
3. The Director shall provide reasons for not requiring a Notice of Intent for a general permit in the public notice.
- D. Notice of Intent.** The Director shall specify the contents of the Notice of Intent in the general permit and the applicant shall submit information sufficient to establish coverage under the general permit, including, at a minimum:
- The name, position, address, and telephone number of the owner of the facility;
 - The name, position, address, and telephone number of the operator of the facility, if different from subsection (D)(1);
 - The name and address of the facility;
 - The type and location of the discharge;
 - The receiving streams;
 - The latitude and longitude of the facility;
 - For a CAFO, the information specified in 40 CFR 122.21(i)(1) and a topographic map;
 - The signature of the certifying official required under 40 CFR 122.22; and
 - Any other information necessary to determine eligibility for the AZPDES general permit.
- E. The general permit shall contain:**
- The expiration date; and
 - The appropriate permit requirements, permit conditions, and best management practices, and measurable goals for MS4 general permits, under R18-9-A905(A)(1), R18-9-A905(A)(2), and R18-9-A905(A)(3) and determined by the Director as necessary and appropriate for the protection of navigable waters.
- F. The Department shall inform a permittee if EPA requests the permittee's Notice of Intent, unless EPA requests that the permittee not be notified.**
- Historical Note**
- New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).
- R18-9-C902. Required and Requested Coverage Under an Individual Permit**
- A. Individual permit requirements.**
- The Director may require a person authorized by a general permit to apply for and obtain an individual permit for any of the following cases:
 - A discharger or treatment works treating domestic sewage is not in compliance with the conditions of the general permit;
 - A change occurs in the availability of demonstrated technology or practices for the control or abatement of pollutants applicable to the point source or treatment works treating domestic sewage;
 - Effluent limitation guidelines are promulgated for point sources covered by the general permit;
 - An Arizona Water Quality Management Plan containing requirements applicable to the point sources is approved;
 - Circumstances change after the time of the request to be covered so that the discharger is no longer appropriately controlled under the general permit, or either a temporary or permanent reduction or elimination of the authorized discharge is necessary;
 - Standards for sewage sludge use or disposal are promulgated for the sludge use and disposal practices covered by the general permit; or
 - If the Director determines that the discharge is a significant contributor of pollutants. When making this determination, the Director shall consider:
 - The location of the discharge with respect to navigable waters,
 - The size of the discharge,
 - The quantity and nature of the pollutants discharged to navigable waters, and
 - Any other relevant factor.
2. If an individual permit is required, the Director shall notify the discharger in writing of the decision. The notice shall include:
- A brief statement of the reasons for the decision,
 - An application form,
 - A statement setting a deadline to file the application,
 - A statement that on the effective date of issuance or denial of the individual permit, coverage under the general permit will automatically terminate,
 - The applicant's right to appeal the individual permit requirement with the Water Quality Appeals Board under A.R.S. § 49-323, the number of days the applicant has to file a protest challenging the individual permit requirement, and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and
 - The applicant's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.
3. The discharger shall apply for a permit within 90 days of receipt of the notice, unless the Director grants a later date. In no case shall the deadline be more than 180 days after the date of the notice.
4. If the permittee fails to submit the individual permit application within the time period established in subsection (A)(3), the applicability of the general permit to the permittee is automatically terminated at the end of the day specified by the Director for application submittal.
5. Coverage under the general permit shall continue until an individual permit is issued unless the permit coverage is terminated under subsection (A)(4).
- B. Individual permit request.**
- An owner or operator authorized by a general permit may request an exclusion from coverage of a general permit by applying for an individual permit.
 - The owner or operator shall submit an individual permit application under R18-9-B901(B) and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

include the reasons supporting the request no later than 90 days after publication of the general permit.

- b. The Director shall grant the request if the reasons cited by the owner or operator are adequate to support the request.
2. If an individual permit is issued to an owner or operator otherwise subject to a general permit, the applicability of the general permit to the discharge is automatically terminated on the effective date of the individual permit.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-C903. General Permit Duration, Reissuance, and Continuation

- A. General permit duration.
 1. An AZPDES general permit is effective for a fixed term of not more than five years. The Director may issue a permit for a duration that is less than the full allowable term.
 2. If the Director does not reissue a general permit before the expiration date, the current general permit will be administratively continued and remain in force and effect until the general permit is reissued.
- B. Continued coverage. Any permittee granted permit coverage before the expiration date automatically remains covered by the continued permit until the earlier of:
 1. Reissuance or replacement of the permit, at which time the permittee shall comply with the Notice of Intent conditions of the new permit to maintain authorization to discharge; or
 2. The date the permittee has submitted a Notice of Termination; or
 3. The date the Director has issued an individual permit for the discharge; or
 4. The date the Director has issued a formal permit decision not to reissue the general permit, at which time the permittee shall seek coverage under an alternative general permit or an individual permit.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-C904. Change of Ownership or Operator Under a General Permit

If a change of ownership or operator occurs for a facility operating under a general permit:

1. Permitted owner or operator. The permittee shall provide the Department with a Notice of Termination by certified mail within 30 days after the new owner or operator assumes responsibility for the facility.
 - a. The Notice of Termination shall include all requirements for termination specified in the general permit for which the Notice of Termination is submitted.
 - b. A permittee shall comply with the permit conditions specified in the general permit for which the Notice of Termination is submitted until the Notice of Termination is received by the Department.
2. New owner or operator.
 - a. The new owner or operator shall complete and file a Notice of Intent with the Department within the time period specified in the general permit before taking over operational control of, or initiation of activities at, the facility.

- b. If the previous permittee was required to implement a stormwater pollution prevention plan, the new owner shall develop a new stormwater pollution prevention plan, or may modify, certify, and implement the old stormwater pollution prevention plan if the old stormwater pollution prevention plan complies with the requirements of the current general permit.
- c. The permittee shall provide the Department with a Notice of Termination if a permitted facility ceases operation, ceases to discharge, or changes operator status. In the case of a construction site, the permittee shall submit a Notice of Termination to the Department when:
 - i. The facility ceases construction operations and the discharge is no longer associated with construction or construction-related activities,
 - ii. The construction is complete and final site stabilization is achieved, or
 - iii. The operator's status changes.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-C905. General Permit Modification and Revocation and Reissuance

- A. The Director may modify or revoke a general permit issued under R18-9-A907(B), R18-9-A908, and R18-9-C901 if one or more of the causes listed under 40 CFR 122.62(a) or (b) exists.
- B. The Director shall follow the procedures specified in R18-9-A907(B) and R18-9-A908 to modify or revoke and reissue a general permit.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

PART D. ANIMAL FEEDING OPERATIONS AND CONCENTRATED ANIMAL FEEDING OPERATIONS**R18-9-D901. CAFO Designations**

- A. Two or more animal feeding operations under common ownership are considered a single animal feeding operation if they adjoin each other or if they use a common area or system for the disposal of wastes.
- B. The Director shall designate an animal feeding operation as a CAFO if the animal feeding operation significantly contributes a pollutant to a navigable water. The Director shall consider the following factors when making this determination:
 1. The size of the animal feeding operation and the amount of wastes reaching a navigable water;
 2. The location of the animal feeding operation relative to a navigable water;
 3. The means of conveyance of animal wastes and process wastewaters into a navigable water;
 4. The slope, vegetation, rainfall, and any other factor affecting the likelihood or frequency of discharge of animal wastes and process wastewaters into a navigable water; and
 5. Any other relevant factor.
- C. The Director shall conduct an onsite inspection of the animal feeding operation before the making a designation under subsection (B).
- D. The Director shall not designate an animal feeding operation having less than the number of animals established in R18-9-A901(19)(a) as a CAFO unless a pollutant is discharged:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

1. Into a navigable water through a manmade ditch, flushing system, or other similar manmade device; or
 2. Directly into a navigable water that originates outside of and passes over, across, or through the animal feeding operation or otherwise comes into direct contact with the animals confined in the operation.
- E. If the Director makes a designation under subsection (B), the Director shall notify the owner or operator of the operation, in writing, of the designation.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-D902. AZPDES Permit Coverage Requirements

- A. Any person who owns or operates a CAFO, except as provided in subsections (B) and (C), shall submit an application for an individual permit under R18-9-B901(B) or seek coverage under a general permit under R18-9-C901(B) within the applicable deadline specified in R18-9-D904(A).
- B. If a person who owns or operates a large CAFO receives a no potential to discharge determination under R18-9-D903, coverage under an AZPDES permit described in this Part is not required.
- C. The discharge of manure, litter, or process wastewater to a navigable water from a CAFO as a result of the application of manure, litter, or process wastewater by the CAFO to land areas under its control is subject to AZPDES permit requirements, except where it is an agricultural stormwater discharge as provided in section 502(14) of the Clean Water Act (33 U.S.C. 1362(14)). For purposes of this Section, an "agricultural stormwater discharge" means a precipitation-related discharge of manure, litter, or process wastewater from land areas under the control of a CAFO when the person who owns or operates the CAFO has applied the manure, litter, or process wastewater according to site-specific nutrient management practices to ensure appropriate agricultural use of the nutrients in the manure, litter, or process wastewater, as specified under 40 CFR 122.42(e)(1)(vi) through (ix).

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-D903. No Potential To Discharge Determinations for Large CAFOs

- A. For purposes of this Section, "no potential to discharge" means that there is no potential for any CAFO manure, litter, or process wastewater to enter into a navigable water under any circumstance or climatic condition.
- B. Any person who owns or operates a large CAFO and has not had a discharge within the previous five years may request a no potential to discharge determination by submitting to the Department:
1. The information specified in 40 CFR 122.21(f) and 40 CFR 122.21(i)(1)(i) through (ix) on a form obtained from the Department, by the applicable date specified in R18-9-D904(A); and
 2. Any additional information requested by the Director to supplement the request or requested through an onsite inspection of the CAFO.
- C. Process for making a no potential to discharge determination.
1. Upon receiving a request under subsection (B), the Director shall consider:
 - a. The potential for discharges from both the production area and any land application area, and

- b. Any record of prior discharges by the CAFO.
2. The Director shall issue a public notice that includes:
- a. A statement that a no potential to discharge request has been received;
 - b. A fact sheet, when applicable;
 - c. A brief description of the type of facility or activity that is the subject of the no potential to discharge determination;
 - d. A brief summary of the factual basis, upon which the request is based, for granting the no potential to discharge determination; and
 - e. A description of the procedures for reaching a final decision on the no potential to discharge determination.
3. The Director shall base the decision to grant a no potential to discharge determination on the administrative record, which includes all information submitted in support of a no potential to discharge determination and any other supporting data gathered by the Director.
4. The Director shall notify the owner or operator of the large CAFO of the final determination within 90 days of receiving the request.
- D. If the Director determines that the operation has the potential to discharge, the person who owns or operates the CAFO shall seek coverage under an AZPDES permit within 30 days after the determination of potential to discharge.
- E. A no potential to discharge determination does not relieve the CAFO from the consequences of a discharge. An unpermitted CAFO discharging a pollutant into a navigable water is in violation of the Clean Water Act even if the Director issues a no potential to discharge determination for the facility. If the Director issues a determination of no potential to discharge to a CAFO facility but the owner or operator anticipates a change in circumstances that could create the potential for a discharge, the owner or operator shall contact the Director and apply for and obtain permit authorization before the change of circumstances.
- F. When the Director issues a determination of no potential to discharge, the Director retains the authority to subsequently require AZPDES permit coverage if:
1. Circumstances at the facility change;
 2. New information becomes available; or
 3. The Director determines, through other means, that the CAFO has a potential to discharge.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-D904. AZPDES Permit Coverage Deadlines

- A. Any person who owns or operates a CAFO shall apply for or seek coverage under an AZPDES permit and shall comply with all applicable AZPDES requirements, including the duty to maintain permit coverage under subsection (C).
1. Permit coverage deadline for an animal feeding operation operating before April 14, 2003.
 - a. An owner or operator of an animal feeding operation that operated before April 14, 2003 and was defined as a CAFO before February 2, 2004 shall apply for or seek permit coverage or maintain permit coverage and comply with the conditions of the applicable AZPDES permit;
 - b. An owner or operator of an animal feeding operation that operated before April 14, 2003 and was not defined as a CAFO until February 2, 2004 shall

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

apply for or seek permit coverage by a date specified by the Director, but no later than February 13, 2006;

- c. An owner or operator of an animal feeding operation that operated before April 14, 2003 who changes the operation on or after February 2, 2004, resulting in the operation being defined as a CAFO, shall apply for or seek permit coverage as soon as possible, but no later than 90 days after the operational change. If the operational change will not make the operation a CAFO as defined before February 2, 2004, the owner or operator may take until April 13, 2006 or 90 days after the operation is defined as a CAFO, whichever is later, to apply for or seek permit coverage;
- d. An owner or operator of an animal feeding operation that operated before April 14, 2003 who constructs additional facilities on or after February 2, 2004, resulting in the operation being defined as a CAFO that is a new source, shall apply for or seek permit coverage at least 180 days before the new source portion of the CAFO commences operation. If the calculated 180-day deadline occurs before February 2, 2004 and the operation is not subject to this Article before February 2, 2004, the owner or operator shall apply for or seek permit coverage no later than March 3, 2004.

2. Permit coverage deadline for an animal feeding operation operating on or after April 14, 2003. An owner or operator who started construction of a CAFO on or after April 14, 2003, including a CAFO subject to the effluent limitations guidelines in 40 CFR 412, shall apply for or seek permit coverage at least 180 days before the CAFO commences operation. If the calculated 180-day deadline occurs before February 2, 2004 and the operation is not subject to this Article before February 2, 2004, the owner or operator shall apply for or seek permit coverage no later than March 3, 2004.
3. Permit coverage deadline for a designated CAFO. Any person who owns or operates a CAFO designated under R18-9-D901(B) shall apply for or seek permit coverage no later than 90 days after receiving a designation notice.

B. Unless specified under R18-9-D903(E) and (F), the Director shall not require permit coverage for a CAFO that the Director determines under R18-9-D903 to have no potential to discharge. If circumstances change at a CAFO that has a no potential to discharge determination and the CAFO now has a potential to discharge, the person who owns or operates the CAFO shall notify the Director within 30 days after the change in circumstances and apply for or seek coverage under an AZPDES permit.

C. Duty to maintain permit coverage.

1. The permittee shall:
- If covered by an individual AZPDES permit, submit an application to renew the permit no later than 180 days before the expiration of the permit under R18-9-B904(B); or
 - If covered by a general AZPDES permit, comply with R18-9-C903(B).
2. Continued permit coverage or reapplication for a permit is not required if:
- The facility ceases operation or is no longer a CAFO; and
 - The permittee demonstrates to the Director that there is no potential for a discharge of remaining manure,

litter, or associated process wastewater (other than agricultural stormwater from land application areas) that was generated while the operation was a CAFO.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

R18-9-D905. Closure Requirements

A. Closure.

- A person who owns or operates a CAFO shall notify the Department of the person's intent to cease operations without resuming an activity for which the facility was designed or operated.
- A person who owns or operates a CAFO shall submit a closure plan to the Department for approval 90 days before ceasing operation. The closure plan shall describe:
 - For operations that met the "no potential to discharge" under R18-9-D903, facility-related information based on the Notice of Termination form for the applicable general permit;
 - The approximate quantity of manure, process wastewater, and other materials and contaminants to be removed from the facility;
 - The destination of the materials to be removed from the facility and documentation that the destination is approved to accept the materials;
 - The method to treat any material remaining at the facility;
 - The method to control the discharge of pollutants from the facility;
 - Any limitations on future land or water use created as a result of the facility's operations or closure activities;
 - A schedule for implementing the closure plan; and
 - Any other relevant information the Department determines necessary.

B. The owner or operator shall provide the Department with written notice that a closure plan has been fully implemented within 30 calendar days of completion and before redevelopment.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 5564, effective February 2, 2004 (Supp. 03-4).

ARTICLE 10. ARIZONA POLLUTANT DISCHARGE ELIMINATION SYSTEM - DISPOSAL, USE, AND TRANSPORTATION OF BIOSOLIDS**R18-9-1001. Definitions**

In addition to the definitions in A.R.S. § 49-255 and R18-9-A901, the following terms apply to this Article:

- "Aerobic digestion" means the biochemical decomposition of organic matter in biosolids into carbon dioxide and water by microorganisms in the presence of air.
- "Agronomic rate" means the whole biosolids application rate on a dry-weight basis that meets the following conditions:
 - The amount of nitrogen needed by existing vegetation or a planned or actual crop has been provided, and
 - The amount of nitrogen that passes below the root zone of the crop or vegetation is minimized.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. "Anaerobic digestion" means the biochemical decomposition of organic matter in biosolids into methane gas and carbon dioxide by microorganisms in the absence of air.
4. "Annual biosolids application rate" means the maximum amount of biosolids (dry-weight basis) that can be applied to an acre or hectare of land during a 365-day period.
5. "Annual pollutant loading rate" means the maximum amount of a pollutant that can be applied to an acre or hectare of land during a 365-day period.
6. "Applicator" means a person who arranges for and controls the site-specific land application of biosolids in Arizona.
7. "Biosolids" means sewage sludge, including exceptional quality biosolids, that is placed on, or applied to the land to use the beneficial properties of the material as a soil amendment, conditioner, or fertilizer. Biosolids do not include any of the following:
 - a. Sludge determined to be hazardous under A.R.S. Title 49, Chapter 5, Article 2 and 40 CFR 261;
 - b. Sludge with a concentration of polychlorinated biphenyls (PCBs) equal to or greater than 50 milligrams per kilogram of total solids (dry-weight basis);
 - c. Grit (for example, sand, gravel, cinders, or other materials with a high specific gravity) or screenings generated during preliminary treatment of domestic sewage by a treatment works;
 - d. Sludge generated during the treatment of either surface water or groundwater used for drinking water;
 - e. Sludge generated at an industrial facility during the treatment of industrial wastewater, including industrial wastewater combined with domestic sewage;
 - f. Commercial septage, industrial septage, or domestic septage combined with commercial or industrial septage; or
 - g. Special wastes as defined and controlled under A.R.S. Title 49, Chapter 4, Article 9.
8. "Bulk biosolids" means biosolids that are transported and land-applied in a manner other than in a bag or other container holding biosolids of 1.102 short tons or 1 metric ton or less.
9. "Class I sludge management facility" means any POTW identified under 40 CFR 403.8(a) as being required to have an approved pretreatment program (including a POTW for which the Department assumes local program responsibilities under 40 CFR 403.10(e)) and any other treatment works treating domestic sewage classified as a Class I sludge management facility by the regional administrator in conjunction with the Director or by the Director because of the potential for its sludge use or disposal practices to adversely affect public health or the environment.
10. "Clean water act" means the federal water pollution control act amendments of 1972, as amended (P.L. 92-500; 86 Stat. 816; 33 United States Code sections 1251 through 1376). A.R.S. 49-201(6).
11. "Coarse fragments" means rock particles in the gravel-size range or larger.
12. "Coarse or medium sands" means a soil mixture of which more than 50% of the sand fraction is retained on a No. 40 (0.425 mm) sieve.
13. "Cumulative pollutant loading rate" means the maximum amount of a pollutant applied to a land application site.
14. "Domestic septage" means the liquid or solid material removed from a septic tank, cesspool, portable toilet, marine sanitation device, or similar system or device that receives only domestic sewage. Domestic septage does not include commercial or industrial wastewater or restaurant grease-trap wastes.
15. "Domestic sewage" means waste or wastewater from humans or household operations that is discharged to a publicly or privately owned treatment works. Domestic sewage also includes commercial and industrial wastewaters that are discharged into a publicly-owned or privately-owned treatment works if the industrial or commercial wastewater combines with human excreta and other household and nonindustrial wastewaters before treatment.
16. "Dry-weight basis" means the weight of biosolids calculated after the material has been dried at 105° C until reaching a constant mass.
17. "Exceptional quality biosolids" means biosolids certified under R18-9-1013(A)(6) as meeting the pollutant concentrations in R18-9-1005 Table 2, Class A pathogen reduction in R18-9-1006, and one of the vector attraction reduction requirements in subsections R18-9-1010(A)(1) through R18-9-1010(A)(8).
18. "Feed crops" means crops produced for animal consumption.
19. "Fiber crops" means crops grown for their physical characteristics. Fiber crops, including flax and cotton, are not produced for human or animal consumption.
20. "Food crops" means crops produced for human consumption.
21. "Gravel" means soil predominantly composed of rock particles that will pass through a 3-inch (75 mm) sieve and be retained on a No. 4 (4.75 mm) sieve.
22. "Industrial wastewater" means wastewater that is generated in a commercial or industrial process.
23. "Land application," "apply biosolids," or "biosolids applied to the land" means spraying or spreading biosolids on the surface of the land, injecting biosolids below the land's surface, or incorporating biosolids into the soil to amend, condition, or fertilize the soil.
24. "Monthly average" means the arithmetic mean of all measurements taken during a calendar month.
25. "Municipality" means a city, town, county, district, association, or other public body, including an intergovernmental agency of two or more of the foregoing entities created by or under state law. The term includes special districts such as a water district, sewer district, sanitary district, utility district, drainage district, or similar entity that has as one of its principal responsibilities, the treatment, transport, use, or disposal of biosolids.
26. "Navigable waters" means the waters of the United States as defined by section 502(7) of the clean water act (33 United States Code section 1362(7)). A.R.S. § 49-201(21).
27. "Other container" means a bucket, bin, box, carton, trailer, pickup truck bed, or a tanker vehicle or an open or closed receptacle with a load capacity of 1.102 short tons or one metric ton or less.
28. "Pathogen" means a disease-causing organism.
29. "Person" means an individual, employee, officer, managing body, trust, firm, joint stock company, consortium, public or private corporation, including a government corporation, partnership, association or state, a political

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

subdivision of this state, a commission, the United States government or a federal facility, interstate body or other entity. A.R.S. § 49-201(26).

30. "Person who prepares biosolids" means a person who generates biosolids during the treatment of domestic sewage in a treatment works, packages biosolids, or derives a new product from biosolids either through processing or by combining it with another material, including blending several biosolids together.
31. "pH" means the logarithm of the reciprocal of the hydrogen ion concentration.
32. "Pollutant" means an organic substance, an inorganic substance, a combination of organic and inorganic substances, or a pathogenic organism that, after release into the environment and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through the food chain, could cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunction in reproduction), or physical deformities in either organisms or reproduced offspring.
33. "Pollutant limit" means:
 - a. A numerical value that describes the quantity of a pollutant allowed in a unit of biosolids such as milligrams per kilogram of total solids,
 - b. The quantity of a pollutant that can be applied to a unit area of land such as kilograms per hectare, or
 - c. The volume of biosolids that can be applied to a unit area of land such as gallons per acre.
34. "Privately owned treatment works" means a device or system owned by a non-governmental entity used to treat, recycle, or reclaim, either domestic sewage or a combination of domestic sewage and industrial waste that is generated off-site.
35. "Public contact site" means a park, sports field, cemetery, golf course, plant nursery, or other land with a high potential for public exposure to biosolids.
36. "Reclamation" means the use of biosolids to restore or repair construction sites, active or closed mining sites, landfill caps, or other drastically disturbed land.
37. "Responsible official" means a principal corporate officer, general partner, proprietor, or, in the case of a municipality, a principal executive official or any duly authorized agent.
38. "Runoff" means rainwater, leachate, or other liquid that drains over any part of a land surface and runs off of the land surface.
39. "Sand" means soil that contains more than 85% grains in the size range that will pass through a No. 4 (4.75 mm) sieve and be retained on a No. 200 (0.075 mm) sieve.
40. "Sewage sludge":
 - (a) Means solid, semisolid or liquid residue that is generated during the treatment of domestic sewage in a treatment works.
 - (b) Includes domestic septage, scum or solids that are removed in primary, secondary or advanced wastewater treatment processes, and any material derived from sewage sludge.
 - (c) Does not include ash that is generated during the firing of sewage sludge in a sewage sludge incinerator or grit and screenings that are generated during preliminary treatment of domestic sewage in a treatment works. A.R.S. § 49-255(6)
41. "Sewage sludge unit" means land on which only sewage sludge is placed for final disposal. This does not include land on which sewage sludge is either stored or treated. Land does not include navigable waters.
42. "Specific oxygen uptake rate (SOUR)" means the mass of oxygen consumed per unit time per unit mass of total solids (dry-weight basis) in biosolids.
43. "Store biosolids" or "storage of biosolids" means the temporary holding or placement of biosolids on land before land application.
44. "Surface disposal site" means an area of land that contains one or more active sewage sludge units.
45. "Ton" means a net weight of 2000 pounds and is known as a short ton.
46. "Total solids" means the biosolids material that remains when sewage sludge is dried at 103° C to 105° C.
47. "Treatment of biosolids" means the thickening, stabilization, dewatering, and other preparation of biosolids for land application. Storage is not a treatment of biosolids.
48. "Unstabilized solids" means the organic matter in biosolids that has not been treated or reduced through an aerobic or anaerobic process.
49. "Vectors" means rodents, flies, mosquitoes, or other organisms capable of transporting pathogens.
50. "Volatile solids" means the amount of total solids lost when biosolids are combusted at 550° C in the presence of excess air.
51. "Wetlands" means those areas that are inundated or saturated by surface water or groundwater at a frequency and duration to support, and do under normal circumstances support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, cienegas, tinajas, and similar areas.

Historical Note

New Section recodified from R18-13-1502 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1002. Applicability and Prohibitions

- A. This Article applies to:
 1. Any person who:
 - a. Prepares biosolids for land application or disposal in a sewage sludge unit or in an incinerator,
 - b. Transports biosolids for land application or incineration, or disposal in a sewage sludge unit,
 - c. Applies biosolids to the land,
 - d. Owns or operates a sewage sludge unit,
 - e. Owns or leases land to which biosolids are applied, or
 - f. Owns or operates an incinerator that fires sewage sludge,
 2. Biosolids applied to the land or placed on a surface disposal site,
 3. Land where biosolids are applied, and
 4. A surface disposal site.
- B. The land application of biosolids in a manner consistent with this Article is exempt from the requirements of the aquifer protection program established under A.R.S. Title 49, Chapter 2, Article 3 and 18 A.A.C. 9, Articles 1, 2, and 3.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

- C. Except as provided in subsection (D), the land application of biosolids in a manner that is not consistent with Articles 9 and 10 of this Chapter is prohibited.
- D. The Department may permit the land application of biosolids in a manner that differs from the requirements in R18-9-1007 and R18-9-1008 if the land application is permitted under the aquifer protection permit program established under A.R.S. Title 49, Chapter 2, Article 3, and 18 A.A.C. 9, Articles 1, 2, and 3.
- E. Surface disposal site.
1. Any person who prepares biosolids that are placed in a sewage sludge unit, or places biosolids in a sewage sludge unit, or who owns or operates a biosolids surface disposal site shall comply with 40 CFR 503, Subpart C, which is incorporated by reference in R18-9-A905(A)(9), and
 - a. The pathogen reduction requirements in R18-9-1006, and
 - b. The vector attraction reduction requirements in R18-9-1010.
 2. In addition to the requirements under subsection (E)(1), any person who owns or operates a biosolids surface disposal site shall apply for, and obtain, a permit under 18 A.A.C. 9, Articles 1 and 2.
- F. A person shall not apply bulk biosolids to the land or place bulk biosolids in a surface disposal site or fire sewage sludge in a sewage sludge incinerator if the biosolids are likely to adversely affect a threatened or endangered species as listed under section 4 of the Endangered Species Act (16 U.S.C. 1533), or its designated critical habitat as defined in 16 U.S.C. 1532.
- G. A person incinerating biosolids shall comply with the requirements set out in 40 CFR Part 503, Subpart E, July 1, 2013 edition, which is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the U.S. General Printing office at <http://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR>.

Historical Note

New Section recodified from R18-13-1501 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 21 A.A.R. 751, effective July 4, 2015 (Supp. 15-2).

R18-9-1003. General Requirements

- A. A person shall not use or transport biosolids, apply biosolids to land, or place biosolids on a surface disposal site in Arizona, except as established in this Article.
- B. The management practices in R18-9-1007 and R18-9-1008 do not apply if biosolids are exceptional quality biosolids.
- C. The applicator shall obtain, submit to the Department, and maintain the information required to comply with the requirements of this Article.
- D. The applicator shall not receive bulk biosolids without prior written confirmation of the filing of a "Request for Registration" under R18-9-1004.
- E. The land owner or lessee of land on which bulk biosolids, that are not exceptional quality biosolids, have been applied shall notify any subsequent land owner and lessee of all previous land applications of biosolids and shall disclose any site restrictions listed in R18-9-1009 that are in effect at the time the property is transferred.
- F. A person who prepares biosolids shall ensure that the applicable requirements in this Article are met when the biosolids are applied to the land or placed on a surface disposal site.
- G. If necessary to protect public health and the environment from any adverse effect of a pollutant in the biosolids, the Department may impose, on a case-by-case basis, requirements for the use or disposal of biosolids, including exceptional quality biosolids, in addition to, or more stringent than, the requirements in this Article. The Department shall notify the preparer, applicator, or land owner of these requirements by letter and include the justification for the requirements and the length of time or applicability for the requirements.

Historical Note

New Section recodified from R18-13-1503 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1004. Applicator Registration, Bulk Biosolids

- A. Any person intending to land-apply bulk biosolids in Arizona shall submit, on a form provided by the Department, a completed "Request for Registration."
- B. An applicator shall not engage in land application of bulk biosolids, unless the applicator has obtained a prior written acknowledgment of the Request for Registration or a supplemental request from the Department.
- C. The Request for Registration for all biosolids, except exceptional quality biosolids, shall include:
 1. The name, address, and telephone number of the applicator and any agent of the applicator;
 2. The name and telephone number of a primary contact person who has specific knowledge of the land application activities of the applicator;
 3. Whether the applicator holds a NPDES or AZPDES permit, and, if so, the permit number;
 4. The identity of the person, if different from the applicator, including the NPDES or AZPDES permit number, who will prepare the biosolids for land application; and
 5. The following information, unless the information is already on file at the Department as part of an approved land application plan, for each site on which application is anticipated to take place:
 - a. The name, mailing address, and telephone number of the land owner and lessee, if any;
 - b. The physical location of the site by county;
 - c. The legal description of the site, including township, range, and section, or latitude and longitude at the center of each site;
 - d. The number of acres or hectares at each site to be used;
 - e. Except for sites described in R18-9-1005(D)(2)(c), background concentrations of the pollutants listed in Table 4 of R18-9-1005 from representative soil samples;
 - f. The location of any portion of the site having a slope greater than 6%; and
 - g. Public notice. Proof of placement of a public notice announcing the potential use of the site for the application of biosolids when a site has not previously

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

received biosolids, or when a site has not been used for land application for at least three consecutive years.

- i. The notice shall appear at least once each week for at least two consecutive weeks in the largest newspaper in general circulation in the area in which the site is located.
- ii. If a site is not used for land application for at least three consecutive years, the applicator shall renotice the site following the process described in subsection (C)(5)(g)(i) before its reuse.

- D. The Request for Registration for exceptional quality biosolids shall include the information in subsections (C)(1) through (C)(4).
- E. A responsible official of the applicator shall sign the Request for Registration.
- F. The Department shall mail a written acknowledgment of a Request for Registration or supplemental request, within 15 business days of receipt of the request.
- G. An applicator wishing to use a site that has not been identified in a Request for Registration shall file a supplemental request with the Department before using the new site. Public notice requirements under R18-9-1004(C)(5)(g) apply.

Historical Note

New Section recodified from R18-13-1504 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1005. Pollutant Concentrations

- A. A person shall not apply biosolids with pollutant concentrations that exceed any of the ceiling concentrations established in Table 1.
- B. A person shall not apply biosolids sold or given away in a bag or other container that are not exceptional quality biosolids to a site if any annual pollutant loading rate in Table 3 will be exceeded. A person shall determine annual application rates using the methodology established in Appendix A.
- C. A person shall not apply bulk biosolids to a lawn or garden unless the biosolids are exceptional quality biosolids.
- D. Unless using exceptional quality biosolids, a person shall not apply bulk biosolids to a site when:
 - 1. The pollutant concentrations exceed the levels in Table 2, or
 - 2. Any cumulative pollutant loading rate in Table 4 will be exceeded. A person shall determine compliance with the site cumulative pollutant loading rates using the following:
 - a. By identifying all known biosolids application events and information relevant to a site since September 13, 1979.
 - b. By calculating the existing cumulative level of the pollutants established in Table 4 using actual analytical data from the application events or if actual analytical data from application events before April 1996 are not available, background concentrations determined by taking representative soil samples of the site, if it is known that the site received biosolids before April 1996.

- c. Background soil tests are not required for those sites that have not received biosolids before April 23, 1996.

Table 1. Ceiling Concentrations

| Pollutant | Ceiling concentrations (milligrams per kilogram) ⁽¹⁾ |
|------------|---|
| Arsenic | 75.0 |
| Cadmium | 85.0 |
| Chromium | 3000.0 |
| Copper | 4300.0 |
| Lead | 840.0 |
| Mercury | 57.0 |
| Molybdenum | 75.0 |
| Nickel | 420.0 |
| Selenium | 100.0 |
| Zinc | 7500.0 |

⁽¹⁾ Dry-weight basis.

Table 2. Monthly Average Pollutant Concentrations

| Pollutant | Concentration limits (milligrams per kilogram) ⁽¹⁾ |
|-----------|---|
| Arsenic | 41.0 |
| Cadmium | 39.0 |
| Copper | 1500.0 |
| Lead | 300.0 |
| Mercury | 17.0 |
| Nickel | 420.0 |
| Selenium | 100.0 |
| Zinc | 2800.0 |

⁽¹⁾ Dry-weight basis.

Table 3. Annual Pollutant Loading Rates

| Pollutant | Annual pollutant loading rates (in kilograms per hectare) |
|-----------|---|
| Arsenic | 2.0 |
| Cadmium | 1.9 |
| Copper | 75.0 |

New Section recodified from R18-13-1505 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1006. Class A and Class B Pathogen Reduction Requirements

A. An applicator shall ensure that all biosolids applied to land meet Class A or Class B pathogen reduction requirements at the time the biosolids are:

1. Placed on an active sewage sludge unit unless the biosolids are covered with soil or other material at the end of each operating day, or
2. Land applied.

B. Biosolids that are sold or given away in a bag or other container for land application, or that are applied on a lawn or home garden, shall meet the Class A pathogen reduction requirements established in subsection (D).

C. Land on which biosolids with Class B pathogen reduction requirements are applied is subject to the use restrictions established in R18-9-1009.

D. Biosolids satisfy the Class A pathogen reduction requirements when the density of fecal coliform is less than 1000 Most Probable Number per gram of total solids (dry-weight basis), or the density of *Salmonella sp.* bacteria is less than three Most Probable Number per four grams of total solids (dry-weight basis), and any one of the following alternative pathogen treatment options is used:

1. Alternative 1. The pathogen treatment process meets one of the following time and temperature requirements:
 - a. When the percent solids of the biosolids are seven percent or greater, the temperature of the biosolids shall be held at 50° C or higher for at least 20 minutes. The temperature and time period is determined using the equation in subsection (D)(1)(b), except when small particles of the biosolids are heated by either warmed gases or an immiscible liquid;
 - b. When the percent solids of the biosolids are seven percent or greater, and small particles of the biosolids are heated by either warmed gases or an immiscible liquid, a temperature of 50° C or higher shall be held for 15 seconds or longer. The temperature and time period is determined using the following equation:

$$D = \frac{131,700,000}{10^{[0.1400t]}}$$

D = time in days, and
t = temperature in degrees Celsius;

- c. When the percent solids of the biosolids are less than seven percent, the temperature of the biosolids is 50° C or higher and the time period is 30 minutes or lon-

ger. The temperature and time period shall be determined using the following equation:

$$D = \frac{50,070,000}{10^{[0.1400t]}}$$

D = time in days, and
t = temperature in degrees Celsius; or

- d. When the percent solids of the biosolids are less than seven percent, and the time of heating is at least 15 seconds, but less than 30 minutes, the time and temperature is determined using the following equation:

$$D = \frac{131,700,000}{10^{[0.1400t]}}$$

D = time in days, and
t = temperature in degrees Celsius.

2. Alternative 2. The pathogen treatment process meets all the following parameters:
 - a. The pH of the quantity of biosolids treated is raised to 12 or higher and held at least 72 hours;
 - b. During the period that the pH is above 12, the temperature of the biosolids is held above 52° C for at least 12 hours; and
 - c. At the end of the 72-hour period during which the pH is above 12, the biosolids are air dried to achieve a percent solids in the biosolids greater than 50%.
3. Alternative 3. The following conditions are met:
 - a. The biosolids, before pathogen treatment and until the next monitoring event, have an enteric virus density less than one plaque-forming unit for four grams of total solids (dry-weight basis);
 - b. The biosolids, before pathogen treatment and until the next monitoring event, have a viable helminth ova density less than one for four grams of total solids (dry-weight basis); and
 - c. Once the density requirements in subsections (D)(3)(a) and (D)(3)(b) are consistently met after pathogen treatment and the values and ranges of the pathogen treatment process used are documented, the biosolids continue to be Class A with respect to enteric viruses and viable helminth ova when the values for the pathogen treatment process operating parameters are consistent with the previously documented values or ranges of values.
4. Alternative 4. The following requirements are met at the time the biosolids are used or disposed or at the time the biosolids are prepared for sale or given away in a bag or other container for application to the land:
 - a. The biosolids have an enteric virus density less than one plaque-forming unit for four grams of total solids (dry-weight basis), and
 - b. The biosolids have a viable helminth ova density less than one for four grams of total solids (dry-weight basis).
5. Alternative 5. Composting.
 - a. Use either the within-vessel or the static-aerated-pile composting method, maintaining the temperature of the biosolids at 55° C or higher for three days; or
 - b. Use the windrow composting method, maintaining the temperature of the biosolids at 55° C or higher for at least 15 days. The windrow shall be turned at

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

least five times when the compost is maintained at 55° C or higher.

6. Alternative 6. Heat drying. The biosolids are dried by direct or indirect contact with hot gases to reduce the moisture content to 10% or lower by weight. During the process:
 - a. The temperature of the sewage sludge particles shall exceed 80° C, or
 - b. The wet bulb temperature of the gas as the biosolids leave the dryer shall exceed 80° C.
 7. Alternative 7. Heat treatment. The quantity of liquid biosolids treated are heated to a temperature of 180° C or higher for at least 30 minutes.
 8. Alternative 8. Thermophilic aerobic digestion. Liquid biosolids are agitated with air or oxygen to maintain aerobic conditions and the mean cell residence time of the biosolids is 10 days at 55 ° to 60° C.
 9. Alternative 9. Beta ray irradiation. Biosolids are irradiated with beta rays from an accelerator at dosages of at least 1.0 megarad at room temperature (approximately 20° C).
 10. Alternative 10. Gamma ray irradiation. Biosolids are irradiated with gamma rays from certain isotopes, such as ⁶⁰Cobalt and ¹³⁷Cesium at dosages of at least 1.0 megarad at room temperature (approximately 20° C).
 11. Alternative 11. Pasteurization. The temperature of the biosolids is maintained at 70° C or higher for at least 30 minutes.
 12. Alternative 12. The Director shall approve another process if the process is equivalent to a Process to Further Reduce Pathogens specified in subsections (D)(5) through (D)(11), as determined by the EPA Pathogen Equivalency Committee.
- E. Biosolids satisfy the Class B pathogen reduction requirements when the biosolids meet any one of the following options:
1. Alternative 1. The geometric mean of the density of fecal coliform in seven representative samples is less than either 2,000,000 Most Probable Number per gram of total solids (dry-weight basis), or 2,000,000 colony forming units per gram of total solids (dry-weight basis);
 2. Alternative 2. Air drying. The biosolids are dried on sand beds or paved or unpaved basins for at least three months. During at least two of the three months, the ambient average daily temperature is above 0° C;
 3. Alternative 3. Lime stabilization. Sufficient lime is added to the biosolids to raise the pH of the biosolids to 12 after at least two hours of contact;
 4. Alternative 4. Aerobic digestion. The biosolids are agitated with air or oxygen to maintain aerobic conditions for a specific mean cell residence time at a specific temperature between 40 days at 20° C and 60 days at 15° C;
 5. Alternative 5. Anaerobic digestion. The biosolids are treated in the absence of air for a specific mean cell residence time at a specific temperature between 15 days at 35° C to 55° C and 60 days at 20° C;
 6. Alternative 6. Composting. Using the within-vessel, static-aerated-pile or windrow composting methods, the temperature of the biosolids is raised to 40° C or higher for five consecutive days. For at least four hours during the five days, the temperature in the compost pile exceeds 55° C; or
 7. Alternative 7. The Director shall approve another process if it is equivalent to a Process to Significantly Reduce Pathogens specified in subsections (E)(2) through (E)(6),

as determined by the EPA Pathogen Equivalency Committee.

Historical Note

New Section recodified from R18-13-1506 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1007. Management Practices and General Requirements

- A. An applicator of bulk biosolids that are not exceptional quality biosolids shall comply with the following management practices at each land application site, except a site where bulk biosolids are applied for reclamation. The applicator shall not:
1. Apply bulk biosolids to soil with a pH less than 6.5 at the time of the application, unless the biosolids are treated under one of the procedures in subsections R18-9-1006(D)(2), R18-9-1006(E)(3), or R18-9-1010(A)(6), or the soil and biosolids mixture has a pH of 6.5 or higher immediately after land application;
 2. Apply bulk biosolids to land with slopes greater than 6%, unless the site is operating under an AZPDES permit or a permit issued under section 402 of the Clean Water Act (33 U.S.C. 1342);
 3. Apply bulk biosolids to land under the following conditions:
 - a. Bulk biosolids with Class A pathogen reduction. If the depth to groundwater is five feet (1.52 meters) or less;
 - b. Bulk biosolids with Class B pathogen reduction.
 - i. If the depth to groundwater is 10 feet (3.04 meters) or less; or
 - ii. To gravel, coarse or medium sands, or sands with less than 15% coarse fragments, if the depth to groundwater is 40 feet (12.2 meters) or less from the point of application of biosolids;
 4. Apply bulk biosolids to land that is 32.8 feet (10 meters) or less from navigable waters;
 5. Store or apply bulk biosolids closer than 1000 feet (305 meters) from a public or semi-public drinking water supply well or no closer than 250 feet (76.2 meters) from any other water well;
 6. Store or apply bulk biosolids within 25 feet (7.62 meters) of a public right-of-way or private property line unless the applicator receives permission to apply bulk biosolids from the land owner or lessee of the adjoining property;
 7. Apply bulk biosolids at an application rate greater than the agronomic rate of the vegetation or crop grown on the site;
 8. Apply domestic septage or any other bulk biosolids with less than 10% solids at a rate that exceeds the annual application rate, calculated in gallons per acre for a 365-day period by dividing the amount of nitrogen needed by the crop or vegetation grown on the land, in pounds per acre per 365-day period, by 0.0026;
 9. Apply bulk biosolids to land that is flooded, frozen, or snow-covered, so that the bulk biosolids enter a wetland or other navigable waters, except as provided in an AZPDES permit or a permit issued under section 402 of the Clean Water Act (33 U.S.C. 1342);
 10. Apply any additional bulk biosolids before a crop is grown on the site if the site has received biosolids con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

taining nitrogen at the equivalent of the agronomic rate appropriate for that crop;

11. Exceed the irrigation needs of the crop of an application site;
12. To minimize odors, apply bulk biosolids within 1000 feet (305 meters) of a dwelling unless the biosolids are injected or incorporated into the soil within 10 hours of being applied; or
13. Store bulk biosolids within 1000 feet (305 meters) of a dwelling unless the applicator obtains permission from the dwelling owner or lessee to store the biosolids at a shorter distance from the dwelling. If the dwelling owner or lessee changes, the applicator shall obtain permission from the new dwelling owner or lessee to continue to store the bulk biosolids within 1000 feet of the dwelling or move the biosolids to a location at least 1000 feet from the dwelling.

B. If biosolids are placed in a bag or other container, the person who prepares the biosolids shall distribute a label or information sheet to the person receiving the material. This label or information sheet shall, at a minimum, contain the following information:

1. The identity and address of the person who prepared the biosolids;
2. Instructions on the proper use of the material, including agronomic rates and an annual application rate that ensures that the annual pollutant rates established in R18-9-1005 are not exceeded; and
3. A statement that application of biosolids to the land shall not exceed application rates described in the instructions on the label or information sheet.

Historical Note

New Section recodified from R18-13-1507 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1008. Management Practices, Application of Biosolids to Reclamation Sites

A. An applicator of bulk biosolids that are not exceptional quality biosolids shall comply with the following management practices at each land application site where the bulk biosolids are applied for reclamation. The applicator shall not:

1. Apply bulk biosolids unless the soil and biosolids mixture has a pH of 5.0 or higher immediately after land application;
2. Apply bulk biosolids to land with slopes greater than 6% unless:
 - a. The site is operating under an AZPDES permit or a permit issued under section 402 (33 U.S.C. 1342) or 404 (33 U.S.C. 1344) of the Clean Water Act;
 - b. The site is reclaimed as specified under A.R.S. Title 27, Chapter 5, and controls are in place to prevent runoff from leaving the application area; or
 - c. Runoff from the site does not reach navigable waters;
3. Apply bulk biosolids to land under the following conditions:
 - a. Bulk biosolids with Class A pathogen reduction. To land if the depth to groundwater is 5 feet (1.52 meters) or less;
 - b. Bulk biosolids with Class B pathogen reduction.

i. To land if the depth to groundwater is 10 feet (3.04 meters) or less; and

ii. To gravel, coarse or medium sands, or sands with less than 15% coarse fragments if the depth to groundwater is 40 feet (12.2 meters) or less from the point of application of biosolids;

4. Apply bulk biosolids to land that is 32.8 feet (10 meters) or less from navigable waters;
 5. Store or apply bulk biosolids closer than 1000 feet (305 meters) from a public or semi-public drinking water supply well, unless the applicator justifies and the Department approves a shorter distance, or apply bulk biosolids closer than 250 feet (76.2 meters) from any other water well;
 6. Store or apply bulk biosolids within 1000 feet (305 meters) of a public right-of-way or private property line unless the applicator receives permission to apply bulk biosolids from the land owner or lessee of the adjoining property;
 7. Exceed a total of 150 dry tons per acre to any portion of a reclamation site if bulk biosolids are applied;
 8. Apply bulk biosolids with less than 10% solids;
 9. Apply bulk biosolids to land that is flooded, frozen, or snow-covered so that the bulk biosolids enter a wetland or other navigable waters, except as provided in an AZPDES permit or a permit issued under section 402 (33 U.S.C. 1342) or 404 (33 U.S.C. 1344) of the Clean Water Act;
 10. Apply more water than necessary to control dust and establish vegetation; and
 11. Apply bulk biosolids within 1000 feet (305 meters) of a dwelling unless the biosolids are injected or incorporated into the soil within 10 hours of being applied.
 12. Store bulk biosolids within 1000 feet (305 meters) of a dwelling unless the applicator obtains permission from the dwelling owner or lessee to store the biosolids at a shorter distance from the dwelling. If the dwelling owner or lessee changes, the applicator shall obtain permission from the new dwelling owner or lessee to continue to store the bulk biosolids within 1000 feet of the dwelling or move the biosolids to a location at least 1000 feet from the dwelling.
- B.** The requirements of R18-9-1007(B) apply if biosolids placed in a bag or other container are used to reclaim a site.

Historical Note

New Section recodified from R18-13-1508 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1008 renumbered to R18-9-1009; new Section R18-9-1008 made by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1009. Site Restrictions

A. The following site restrictions apply to land where biosolids, which do not meet the Class A pathogen reduction requirements established in R18-9-1006, are land-applied.

1. A person shall not:
 - a. Harvest food crop parts that touch the biosolids, or biosolids and soil mixture, but otherwise grow above the land's surface for 14 months following application;
 - b. Harvest food crop parts growing in or below the land's surface for 20 months following application if

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

the biosolids remain unincorporated on the land's surface for four months or more;

- c. Harvest food crop parts growing in or below the land's surface for 38 months following application if the biosolids remain on the land's surface for less than four months before incorporation;
 - d. Harvest food, feed, and fiber crops for 30 days after application;
 - e. Graze animals on the land for 30 days after application; or
 - f. Harvest turf to be used at a public contact site or private residence for one year after application.
2. A person shall restrict public access to:
 - a. Public contact sites for one year after application, and
 - b. Land with a low potential for public exposure for 30 days after application.
- B.** If the vector attraction reduction requirement is met using the method:
1. In R18-9-1010(C)(1) or R18-9-1010(C)(2), the requirements of subsection (A) apply to domestic septage applied to agricultural land, forests, or reclamation sites; or
 2. In R18-9-1010(C)(3), the requirements of subsection (A)(1)(a) through (A)(1)(d) apply to domestic septage applied to agricultural land, forests, or reclamation sites.
- C.** Once application is completed at a site, the applicator shall, in writing, provide the land owner and lessee with the following information:
1. The cumulative pollutant loading at the site if it is greater than or equal to 90% of the available site capacity established in Table 4 of R18-9-1005;
 2. Any restriction established in this Section that applies to the property and the nature of the restriction; and
 3. The signature of a responsible official of the applicator on this document that includes the following statement:
"I certify under penalty of law, that the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for false representations, including fines and imprisonment."
- D.** The land owner or lessee shall provide each applicator with a signature indicating receipt of the site restriction statement.
- Historical Note**
- New Section recodified from R18-13-1509 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1009 renumbered to R18-9-1010; new Section R18-9-1009 renumbered from R18-9-1008 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).
- R18-9-1010. Vector Attraction Reduction**
- A.** Except as provided in subsection (B), an applicator or person who prepares biosolids shall use one of the following vector attraction reduction procedures if biosolids are land-applied:
1. Reducing the mass of volatile solids by a minimum of 38% using the calculation procedures established in "Environmental Regulations and Technology -- Control of Pathogens and Vector Attraction in Sewage Sludge," EPA/625/R-92-013, published by the U.S. Environmental Protection Agency, Cincinnati, Ohio 45268, 1999 edition. This material is incorporated by reference, does not include any later amendments or editions of the incorporated matter, and is on file with the Department and the Office of the Secretary of State;
 2. If the 38% volatile solids reduction cannot be met for anaerobically digested biosolids the reduction can be met by digesting a portion of the previously digested material anaerobically in a laboratory in a bench-scale unit for 40 additional days at a temperature between 30° C and 37° C. Vector attraction reduction is achieved if, at the end of the 40 days, the volatile solids in the material at the beginning of the period are reduced by less than 17%;
 3. If the 38% volatile solids reduction cannot be met for aerobically digested biosolids, the reduction can be met by digesting a portion of the previously digested material, which has a percent solids of 2% or less, aerobically in a laboratory in a bench-scale unit for 30 additional days at 20° C. Vector attraction reduction is achieved if, at the end of the 30 days, the volatile solids in the material at the beginning of the period are reduced by less than 15%;
 4. Treat the biosolids in an aerobic process during which the specific oxygen uptake rate (SOUR) is equal to or less than 1.5 milligrams of oxygen per hour per gram of total solids (dry-weight basis) at 20° C;
 5. Treat the biosolids in an aerobic process for 14 days or longer, during which the temperature of the biosolids is higher than 40° C and the average temperature of the biosolids is higher than 45° C;
 6. Raising the pH of the biosolids to 12 or higher by alkali addition and, without the addition of more alkali, remain at 12 or higher for two hours and at 11.5 or higher for an additional 22 hours;
 7. The percent solids of the biosolids that do not contain unstabilized solids generated in a primary wastewater treatment process is equal to or greater than 75% based on the moisture content and total solids before mixing with other materials;
 8. The percent solids of the biosolids containing unstabilized solids generated in a primary wastewater treatment process are equal to or greater than 90% based on the moisture content and total solids before mixing with other materials;
 9. Injecting the biosolids below the surface of the land so that no significant amount of biosolids is present on the land surface one hour after injection. If the biosolids meet Class A pathogen reduction, injection shall occur within eight hours after being discharged from a Class A pathogen treatment process; or
 10. Incorporating the biosolids into the soil within six hours after application. If the biosolids meet Class A pathogen reduction, application shall occur within eight hours after being discharged from a Class A pathogen treatment process.
- B.** Biosolids that are sold or given away in a bag or other container, or are applied to a lawn or home garden, shall meet one of the vector attraction reduction alternatives established in subsections (A)(1) through (A)(8).
- C.** For domestic septage, vector attraction reduction is met by one of the following methods:
1. By injecting as specified in subsection (A)(9);
 2. By incorporating as specified in subsection (A)(10); or
 3. By raising the pH of the domestic septage to 12 or higher through the addition of alkali and, without the addition of more alkali, holding the pH at 12 or higher for at least 30 minutes.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

Historical Note

New Section recodified from R18-13-1510 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1010 renumbered to R18-9-1011; new Section R18-9-1010 renumbered from R18-9-1009 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-1011. Transportation

- A. A transporter of bulk biosolids into and within Arizona shall use covered trucks, trailers, rail-cars, or other vehicles that are leakproof.
- B. A transporter of bulk biosolids in liquid or semisolid form, including domestic septage, into and within Arizona shall comply with the requirements in A.A.C. R18-13-310. A transporter of bulk biosolids in solid form into and within Arizona shall comply with the requirements in A.A.C. R18-13-310.
- C. A transporter of biosolids shall clean any truck, trailer, rail-car, or other vehicle used to transport biosolids to prevent odors or insect breeding. A transporter shall clean any tank vessel used to transport commercial or industrial septage or restaurant grease-trap wastes, that is also used to haul domestic septage, before loading the domestic septage to ensure that mixing of wastes does not occur.
- D. If bulk biosolids are spilled while being transported, the transporter shall:
 1. Immediately pick up any spillage, including any visibly discolored soil, unless otherwise determined by the Department on a case-by-case basis;
 2. Within 24 hours after the spill, notify the Department of the spill and submit written notification of the spill within seven days. The written notification shall include the location of the spill, the reason it occurred, the amount of biosolids spilled, and the steps taken to clean up the spill.

Historical Note

New Section recodified from R18-13-1511 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1011 renumbered to R18-9-1012; new Section R18-9-1011 renumbered from R18-9-1010 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4). A.C.C. citation corrected in subsection (B) at the request of the Department; Office file number M16-185 (Supp. 16-3).

R18-9-1012. Self-monitoring

- A. Except as provided in subsection (B) the person who prepares the biosolids shall conduct self-monitoring events at the frequency listed in Table 5 for the pollutants listed in R18-9-1005, the pathogen reduction in R18-9-1006 and the vector attraction reduction requirements in R18-9-1010.

Table 5. Frequency of Self-monitoring

| Amount of biosolids prepared (tons/metric tons per 365-day period ⁽¹⁾) | Frequency |
|--|--|
| Greater than zero but less than 319.6/290 | Once per year |
| Equal to or greater than 319.6/290 but less than 1,653/1,500 | Once per quarter (Four times per year) |
| Equal to or greater than 1,653/1,500 but less than 16,530/15,000 | Once per 60 days (Six times per year) |
| Equal to or greater than 16,530/15,000 | Once per month (12 times per year) |

- (1) The amount of biosolids prepared in a calendar year (dry-weight basis).
- B. If biosolids are stockpiled or lagooned, the person shall sample the biosolids for pathogen and vector attraction reduction before land application. A person shall sample in a manner that is representative of the entire stockpile or lagoon.
- C. A person who prepares biosolids shall submit additional or more frequent biosolids samples, collected and analyzed during the reporting period, to the Department with the regularly-scheduled data required in subsection (A).
- D. The Department may order the person who prepares biosolids or the applicator to collect and analyze additional samples to measure pollutants of concern other than those established in Table 1 of R18-9-1005.
- E. The applicator, person who prepares biosolids, or a person collecting samples for the applicator or preparer for analysis shall obtain the samples in a manner that does not compromise the integrity of the sample, sample method, or sampling instrument and shall be representative of the quality of the biosolids being applied during the reporting period.
- F. A person responsible for sampling the biosolids shall track biosolids samples using a chain-of-custody procedure that documents each person in control of the sample from the time it was collected through the time of analysis.
- G. The person who prepares biosolids or the applicator shall ensure that the biosolids samples are analyzed as specified by the analytical methods established in 40 CFR 503.8, July 1, 2001 edition, or by the wastewater sample methods and solid, liquid, and hazardous waste sample methods established in A.A.C. R9-14-612 and R9-14-613. The person who prepares the biosolids or the applicator shall ensure that the biosolids analyses are performed at a laboratory operating in compliance with A.R.S. § 36-495 et seq. The information in 40 CFR 503.8 is incorporated by reference, does not include any later amendments or editions of the incorporated matter and is on file with the Department and the Office of the Secretary of State.
- H. The person who prepares the biosolids or the applicator shall monitor pathogen and vector attraction reduction treatment operating parameters, such as time and temperature, shall be monitored on a continual basis.
- I. An applicator shall conduct and record monitoring of each site for the management practices established in R18-9-1007 and R18-9-1008.
- J. A person shall maintain, as specified in R18-9-1013, and report to the Department as specified in R18-9-1014, all compliance measurements, including the analysis of pollutant concentrations.

Historical Note

New Section recodified from R18-13-1512 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1012 renumbered to R18-9-1013; new Section R18-9-1012 renumbered from R18-9-1011 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

R18-9-1013. Recordkeeping

- A. A person who prepares biosolids shall collect and retain the following information for at least five years:
 1. The date, time, and method used for each sampling activity and the identity of the person collecting the sample;
 2. The date, time, and method used for each sample analysis and the identity of the person conducting the analysis;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

3. The results of all analyses of pollutants regulated under R18-9-1005 and organic and ammonium nitrogen to comply with R18-9-1007(A)(7);
4. The results of all pathogen density analyses and applicable descriptions of the methods used for pathogen treatment in R18-9-1006;
5. A description of the methods used, if any, and the operating values and ranges observed in any pre-land application, vector attraction reduction activities required in R18-9-1010(A); and
6. For the records described in subsections (A)(1) through (A)(5), the following certification statement signed by a responsible official of the person who prepares the biosolids:

“I certify, under penalty of law, that the pollutant analyses and the description of pathogen treatment and vector attraction reduction activities have been made under my direction and supervision and under a system designed to ensure that qualified personnel properly gather and evaluate the information used to determine whether the applicable biosolids requirements have been met. I am aware that there are significant penalties for false certification including the possibility of fine and imprisonment.”

- B.** An applicator of bulk biosolids, except exceptional quality biosolids, shall collect the following information for each land application site, and, except as indicated in subsection (B)(6), shall retain this information for at least five years:

1. The location of each site, by either street address or latitude and longitude;
2. The number of acres or hectares;
3. The date and time the biosolids were applied;
4. The amount of biosolids (in dry metric tons);
5. The biosolids loading rates for domestic septage and other biosolids with less than 10 percent solids in tons or kilograms of biosolids per acre or hectare and in gallons per acre and the biosolids loading rates for other biosolids in tons or kilograms of biosolids per acre or hectare;
6. The cumulative pollutant levels of each regulated pollutant (in tons or kilograms per acre or hectare). The applicator shall retain these records permanently;
7. The results of all pathogen density analyses and applicable descriptions of the methods used for pathogen treatment in R18-9-1006;
8. A description of the activities and measures used to ensure compliance with the management practices in R18-9-1007 and R18-9-1008, including information regarding the amount of nitrogen required for the crop grown on each site;
9. If vector attraction reduction was not met by the person who prepares the biosolids, a description of the vector attraction reduction activities used by the applicator to ensure compliance with the requirements in R18-9-1010;
10. A description of any applicable site restriction imposed by in R18-9-1009 if biosolids with Class B pathogen reduction have been applied and documentation that the applicator has notified the land owner and lessee of these restrictions;
11. For the records described in subsections (B)(1) through (B)(8), the following certification statement signed by a responsible official of the applicator of the biosolids:

“I certify, under penalty of law, that the information and descriptions, have been made under my direction and supervision and under a system designed to

ensure that qualified personnel properly gather and evaluate the information used to determine whether the applicable biosolids requirements have been met. I am aware that there are significant penalties for false certification including the possibility of fine and imprisonment.”

12. The information in subsections (A)(1) through (A)(6) if the person who prepares the biosolids is not located in this state.

- C.** All records required for retention under this Section are subject to periodic inspection and copying by the Department.
- D.** If there is unresolved litigation, including enforcement, concerning the activities documented by the records required in this Section, the period of record retention shall be extended pending final resolution of the litigation.

Historical Note

New Section recodified from R18-13-1513 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1013 renumbered to R18-9-1014; new Section R18-9-1013 renumbered from R18-9-1012 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1014. Reporting

- A.** A person who prepares biosolids for application shall provide the applicator with the necessary information to comply with this Article including the concentration of pollutants listed in R18-9-1005 and the concentration of nitrogen in the biosolids.
- B.** A transporter shall report spills to the Department under R18-9-1011(D).
- C.** A bulk applicator of biosolids other than exceptional quality biosolids shall provide the land owner and lessee of land application sites with information on the concentrations of the pollutants listed in R18-9-1005 and loading rates of biosolids applied to that site, and any applicable site restrictions under R18-9-1009.
- D.** A bulk applicator of biosolids other than exceptional quality biosolids shall report to the Department if 90% or more of any cumulative pollutant loading rate has been used at a site.
- E.** On or before February 19 of each year, any person land-applying bulk biosolids that are not exceptional quality biosolids shall, by letter or on a form provided by the Department, report to the Department the following applicable information for the previous calendar year:
1. The actual sites used; and
 2. For each site used, the following information:
 - a. The amount of biosolids applied (in tons or kilograms per acre or hectare);
 - b. The application loading rates (in tons or kilograms per acre or hectare, and gallons per acre for domestic septage);
 - c. The concentrations of the pollutants listed in R18-9-1005 (in milligrams per kilogram of biosolids on a dry-weight basis);
 - d. The pathogen treatment methodologies used during the year and the results; and
 - e. The vector attraction reduction methodologies used during the year and the results.
- F.** On or before February 19 of each year, a person preparing biosolids in a Class I Sludge Management Facility, POTW with a design flow rate equal to or greater than one million gallons per day, or POTW that serves 10,000 people or more, that are

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 9. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER POLLUTION CONTROL

applied to land, shall, by letter or on a form provided by the Department, report to the Department all the following applicable information regarding their activities during the previous calendar year:

1. The amount of biosolids received if the preparer purchased or received the biosolids from another preparer or source;
2. The amount of biosolids produced (tons or kilograms);
3. The amount of biosolids distributed;
4. The concentrations of the pollutants listed in R18-9-1005 (in milligrams per kilogram of biosolids on a dry-weight basis);
5. The pathogen treatment methodologies used during the year, including the results; and
6. The vector attraction reduction methodologies used during the year, including the results.

G. All annual self-monitoring reports shall contain the following certification statement signed by a responsible official:

"I certify, under penalty of law, that the information and descriptions, have been made under my direction and supervision and under a system designed to ensure that qualified personnel properly gather and evaluate the information used to determine whether the applicable biosolids requirements have been met. I am aware that there are significant penalties for false certification including the possibility of fine and imprisonment."

Historical Note

New Section recodified from R18-13-1514 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Former Section R18-9-1014 renumbered to R18-9-1015; new Section R18-9-1014 renumbered from R18-9-1013 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 4923, effective January 5, 2003 (Supp. 02-4).

R18-9-1015. Inspection

A person subject to this Article shall allow, during reasonable times, a representative of the Department to enter property subject to this Article, to:

1. Inspect all biosolids pathogen and vector treatment facilities, transportation vehicles, incinerators that fire sewage sludge, and land application sites to determine compliance with this Article;
2. Inspect and copy records prepared in accordance with this Article; and

3. Sample biosolids quality.

Historical Note

Renumbered from R18-9-1014 and amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4). Amended by final rulemaking at 21 A.A.R. 751, effective July 4, 2015 (Supp. 15-2).

Appendix A. Procedures to Determine Annual Biosolids Application Rates

The following procedure determines the annual biosolids application rate (ABAR) that ensures that the annual pollutant loading rates in Table 3 of R18-9-1005 are not exceeded.

1. The relationship between the annual pollutant loading rate (APLR) for a pollutant and the ABAR is shown in the following equation.

$$APLR = C \times ABAR \times 0.001$$

APLR = Annual pollutant loading rate in kilograms of biosolids, per hectare, per 365-day period;

C = Pollutant concentration in milligrams, per kilogram of total solids (dry-weight basis);

ABAR = Annual biosolids application rate in metric tons, per hectare, per 365-day period (dry-weight basis); and

0.001 = A conversion factor.
metric ton = 1.102 short tons
hectare = 2.471 acres

2. The ABAR is calculated using the following procedure:
 - a. Analyze a biosolids sample to determine a concentration for each of the pollutants listed in Table 3 of R18-9-1005; and
 - b. Using each of the pollutant concentrations from subsection (2)(a) and the APLRs from Table 3 of R18-9-1005, calculate a separate ABAR for each pollutant using the following equation:

$$ABAR = \frac{APLR}{C \times 0.001}$$

- c. The ABAR for biosolids is the lowest value calculated in under subsection (2)(b) for any pollutant.

Historical Note

New Appendix recodified from 18 A.A.C. 13, Article 15 at 7 A.A.R. 2522, effective May 24, 2001 (Supp. 01-2). Amended by final rulemaking at 7 A.A.R. 5879, effective December 7, 2001 (Supp. 01-4).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.
16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.
2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.
3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.
4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.
5. Contract with other agencies, including laboratories, in furthering any department program.
6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.
7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.
8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.
9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
 - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 - (c) Maintenance but not construction of drainage ditches.
 - (d) Construction and maintenance of irrigation ditches.
 - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.
7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.
12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.
13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.
2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

[49-221. Water quality standards in general; protected surface waters list](#)

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-WOTUS protected surface waters, the director shall apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to paragraph 2 of this subsection. Rules regarding the following shall not be adopted or applied as water quality standards for non-WOTUS protected surface waters:

- (a) Antidegradation.
- (b) Antidegradation criteria.
- (c) Outstanding Arizona waters.

2. Adopt, by rule, water quality standards for non-WOTUS protected surface waters, by December 31, 2022, consistent with paragraph 1 of this subsection and as determined necessary in the rulemaking process. In adopting those standards, the director shall consider the unique characteristics of this state's surface waters and the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

- 1. The protection of the public health and the environment.
- 2. The uses that have been made, are being made or with reasonable probability may be made of these waters.
- 3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
- 4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
- 5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
- 6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

- 1. The protection of public health and the environment.
- 2. The uses that are being made or may be made of the reclaimed water.
- 3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

- (i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.
- (ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected surface waters list. The department shall publish the initial list on the department's website and in the Arizona administrative register within thirty days after September 29, 2021. Not later than December 31, 2022, the department shall adopt by rule the protected surface waters list, including procedures for determining economic, social and environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action pursuant to title 41, chapter 6, article 10 and may be appealed by any party that provides evidence of an actual adverse effect that the party appealing the decision would suffer as a result of the director's decision. All of the following apply to the protected surface water list:

1. The protected surface waters list shall include:

(a) All WOTUS.

(b) Any perennial, intermittent and ephemeral reaches and any impoundments of the following rivers, not including tributaries or reaches of waters wholly within tribal jurisdiction or reaches of waters outside of the United States:

(i) The Bill Williams river, from the confluence of the Big Sandy and Santa Maria rivers at 113°31'38.617"w, 34°18'22.373"n, to its confluence with the Colorado river at 114°8'9.854"w, 34°18'9.33"n.

(ii) The Colorado river, from the Arizona-Utah border at 111°32'35.741"w, 36°58'51.698"n, to the Arizona-Mexico border at 114°43'12.564"w, 32°43'6.218"n.

(iii) The Gila river, from the Arizona-New Mexico border at 109°2'52.8"w, 32°41'11.2015"n, to the confluence with the Colorado river at 114°33'28.145"w, 32°43'14.408"n.

(iv) The Little Colorado river, from the confluence of the east and west forks of the Little Colorado river at 109°28'7.131"w, 33°59'39.852"n, to its confluence with the Colorado river at 111°49'4.693"w, 36°12'10.243"n.

(v) The Salt river, from the confluence of the Black and White rivers at 110°13'39.5"w, 33°44'6.082"n, to the confluence with the Gila river at 112°18'5.704"w, 33°22'42.978"n.

(vi) The San Pedro river, from the Arizona-Mexico border at 110°9'1.704"w, 31°20'2.387"n, to the confluence with the Gila river at 110°47'0.905"w, 32°59'5.671"n.

(vii) The Santa Cruz river, from its origins in the Canelo Hills of southeastern Arizona at 110°37'3.968"w, 31°27'39.21"n, to its confluence with the Gila river at 111°33'26.02"w, 32°41'39.058"n.

(viii) The Verde river, from Sullivan lake at 112°28'10.588"w, 34°52'11.136"n, to its confluence with the Salt river at 111°39'48.32"w, 33°33'20.538"n.

(c) Any non-WOTUS waters of the state that are added under paragraphs 3 and 4 of this subsection.

2. Notwithstanding paragraph 1 of this subsection, the protected surface waters list shall not contain any of the following non-WOTUS waters:

(a) Canals in the Yuma project and ditches, canals, pipes, impoundments and other facilities that are operated by districts organized under title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for human consumption, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner and operator of the ditch or canal until the owner and operator withdraws its request.

(b) Irrigated areas, including fields flooded for agricultural production.

(c) Ornamental and urban ponds and lakes such as those owned by homeowners' associations and golf courses, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the ornamental or urban pond or lake until the owner withdraws its request.

(d) Swimming pools and other bodies of water that are regulated pursuant to section 49-104, subsection B.

(e) Livestock and wildlife water tanks and aquaculture tanks that are not constructed within a protected surface water.

(f) Stormwater control features.

(g) Groundwater recharge, water reuse and wastewater recycling structures, including underground storage facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the groundwater recharge, water reuse or wastewater recycling structure until the owner withdraws its request.

(h) Water-filled depressions created as part of mining or construction activities or pits excavated to obtain fill, sand or gravel.

(i) All waste treatment systems components, including constructed wetlands, lagoons and treatment ponds, such as settling or cooling ponds, designed to either convey or retain, concentrate, settle, reduce or remove pollutants, either actively or passively, from wastewater before discharge or to eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those prescribed in paragraph 1, subdivision (b) of this subsection.

(l) Lakes and ponds owned and managed by the United States department of defense and other surface waters located on and that do not leave United States department of defense property, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the United States department of defense until it withdraws its request.

3. Unless listed in paragraph 2 of this subsection, the director shall add the following non-WOTUS surface waters to the protected surface waters list:

(a) All lakes, ponds and reservoirs that are public waters used as a drinking source, for recreational or commercial fish consumption or for water-based recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent tributaries to the Bill Williams river, the Colorado river, the Gila river, the Little Colorado river, the Salt river, the San Pedro river, the Santa Cruz river and the Verde river.

- (d) Perennial or intermittent public waters used for recreational or commercial fish consumption.
 - (e) Perennial or intermittent public waters used for water-based recreation such as swimming, wading, boating and other types of recreation in and on the water.
 - (f) Perennial or intermittent wetlands adjacent to waters on the protected surface waters list.
 - (g) Perennial or intermittent waters of the state that cross into another state, the Republic of Mexico or the reservation of a federally recognized tribe.
4. The director may add additional non-WOTUS surface waters to the protected surface waters list if all of the following apply:
- (a) The water is not required to be listed under paragraph 1 or 3 of this subsection.
 - (b) The water is not excluded under paragraph 2 of this subsection.
 - (c) The economic, environmental and social benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list.
5. The director shall remove any erroneously listed, non-WOTUS waters from the protected surface waters list when the water is excluded under paragraph 2 of this subsection and shall not regulate discharges to those waters in the interim.
6. The director shall remove non-WOTUS waters from the protected surface waters list when the water is not required to be listed under paragraph 3 of this subsection and the economic, environmental and social benefits of removing the water outweigh the economic, environmental and social costs of retaining the water on the list.
7. The director, on an emergency basis, may add a water to the protected surface waters list if the director discovers an imminent and substantial danger to public health or welfare or the environment, if the water would otherwise qualify to be added under paragraph 3 of this subsection. Notwithstanding any other law, the emergency addition shall take effect immediately on the director's determination that describes the imminent and substantial danger in writing. Within thirty days after the director's determination, the department shall publish a notice of that determination in the Arizona administrative register and on the department's website. Waters added under this subsection shall be incorporated into the protected surface waters list during the next rulemaking that follows the addition.

[49-223. Aquifer water quality standards](#)

- A. Primary drinking water maximum contaminant levels established by the administrator before August 13, 1986 are adopted as drinking water aquifer water quality standards. The director may only adopt additional aquifer water quality standards by rule. Within one year after the administrator establishes additional primary drinking water maximum contaminant levels, the director shall open a rule making docket pursuant to section 41-1021 for adoption of those maximum contaminant levels as drinking water aquifer water quality standards. If substantial opposition is demonstrated in the rule making docket regarding a particular constituent, the director may adopt for that constituent the maximum contaminant level as a drinking water aquifer water quality standard upon making a finding that this level is appropriate for adoption in Arizona as an aquifer water quality standard. In making this finding, the director shall consider whether the assumptions about technologies, costs, sampling and analytical methodologies and public health risk reduction used by the administrator in developing and implementing the maximum contaminant level are appropriate for establishing a drinking water aquifer water quality standard. For purposes of this subsection "substantial opposition" means information submitted to the director that explains with reasonable specificity why the maximum contaminant level is not appropriate as an aquifer water quality standard.
- B. The director may adopt by rule numeric drinking water aquifer water quality standards for pollutants for which the administrator has not established primary drinking water maximum contaminant levels or for which a maximum contaminant level has been established but the director has determined it to be inappropriate as an aquifer water quality standard pursuant to subsection A of this section. These standards shall be based on the protection of human health. In establishing numeric drinking water aquifer water quality standards, the director shall rely on technical protocols appropriate for the development of aquifer water quality standards and shall base the standards on credible medical and toxicological evidence that has been subjected to peer review.
- C. Any person may petition the director to adopt a numeric drinking water aquifer quality standard for any pollutant for which no drinking water aquifer quality standard exists. The director shall grant the petition and institute rule making proceedings adopting a numeric standard as provided under subsection B of this section within one hundred eighty days if the petition shows that the pollutant is a toxic pollutant, that the pollutant has been, or may in the future be, detected in any of the state's drinking water aquifers, and that there exists technical information on which a numeric standard might reasonably be based. Within one year of the commencement of the rule making proceeding, the director shall either adopt a numeric standard or make and publish a finding that, pursuant to subsection B of this section, the development of a numeric standard is not possible. The decision to not adopt a numeric standard shall, for purposes of judicial review, be treated in the same manner as a rule adopted pursuant to title 41, chapter 6.
- D. For purposes of assessing compliance with each aquifer water quality standard adopted pursuant to this section, the director shall for purposes of articles 3 and 4 of this chapter, and may for purposes of other provisions of this title, identify sampling and analytical protocols appropriate for detecting and measuring the pollutant in the aquifers in the state.
- E. Within one year from the reclassification of an aquifer to a non-drinking water status, pursuant to section 49-224, the director shall adopt water quality standards for that aquifer. For any pollutants which were not the basis for the reclassification, the applicable standard shall be identical with the standard for those pollutants adopted pursuant to subsections A and B of this section. For any pollutants which were the basis for reclassification, the standard shall be sufficient to achieve the purpose for which the aquifer was reclassified but shall minimize unnecessary degradation of the aquifer by taking into consideration the potential long-term uses of the aquifer and the short-term and long-term benefits of the activities resulting in discharges into the aquifer.
- F. The director shall adopt water quality standards for an aquifer for which a petition has been submitted pursuant to section 49-224, subsection D sufficient to achieve the non-drinking water use for which that aquifer was classified, taking into consideration the potential long-term uses of that aquifer and the short-term and long-term benefits of the discharging activities creating that aquifer.
- G. In any action pursuant to this title, aquifer water quality protection provisions, including monitoring requirements, may be imposed only for pollutants for which aquifer water quality standards have been established that are likely to be present in a discharge. Indicator parameters and quality assurance parameters appropriate for such pollutants also may be specified.

49-224. Aquifer identification, classification and reclassification

A. Not later than June 30, 1987 the director shall, by rule, identify and define the boundaries of all aquifers in this state utilizing, to the maximum extent possible, data available from the department of water resources.

B. All aquifers in this state identified and defined under subsection A of this section and any other aquifers subsequently discovered, identified and defined shall be classified for drinking water protected use unless the classification is changed in the manner provided in subsection C of this section.

C. The director, after consulting with the appropriate groundwater users advisory council established pursuant to title 45, chapter 2, article 2 if the aquifer is in an active management area, and a public hearing held pursuant to section 49-208, may change the classification of an aquifer or part of an aquifer for a protected use other than drinking water on making all of the following findings:

1. The identified aquifer or part of an aquifer is or will be so hydrologically isolated from other aquifers or other parts of the same aquifer that there is no reasonable probability that poorer quality water from the identified aquifer or part of an aquifer will cause or contribute to a violation of aquifer water quality standards in other aquifers or parts of the same aquifer.

2. Water from the identified aquifer or part of an aquifer is not being used as drinking water.

3. The short-term and long-term benefits to the public that would result from the degradation of the quality of the water in the identified aquifer or part of an aquifer below standards established pursuant to section 49-223, subsections A and B would significantly outweigh the short-term and long-term costs to the public of such degradation. Benefits and costs to be considered include economic, social and environmental.

D. Owners or operators of facilities whose discharges are solely responsible for creating an aquifer may petition the director for a classification of the aquifer for a non-drinking water use. The director may, by rule, classify that aquifer for a non-drinking water use upon making the findings prescribed in subsection C, paragraphs 1 and 2 of this section.

E. The director shall provide for public participation in proceedings under this section pursuant to section 49-208 and shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification.

D-13.

DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 11 (Microbiological Contaminants)

Amend: R18-11-406

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 22, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 9

Amend: R18-11-406

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend one (1) rule in Title 18, Chapter 11, regarding aquifer water quality standards.

The Department is proposing to make amendments and additions to Chapter 11 as part of a four part rulemaking package. The Department is required by A.R.S. § 49-223(A) to adopt Aquifer Water Quality Standards (AWQS) with these standards being based on maximum contaminant levels (MCLs). These MCLs are prescribed by the Environmental Protection Agency (EPA) and the Department is required to adopt the same MCLs unless there is a showing of substantial opposition, which allows the Department to prescribe different standards if the Department or stakeholder can show that the EPA levels are not appropriate for Arizona. The Department has indicated to Department staff that this substantial opposition language is unique to Arizona and the Department believes Arizona to be the only state to have this type of language.

For this part of the rulemaking package, the Department has indicated that they received substantial opposition to the EPA regulations concerning microbiological contaminants. The

Department currently uses Total coliform test for microbiological contaminants, which the Department has indicated causes a high number of false positives and requires retestings. The Department believes these false positive retestings result in tens of thousands of dollars spent in unnecessary testing. The Department is proposing to change the testing perimeters to Fecal Coliform or E.Coli. The Department has indicated that Total Coliforms is too general of a term and many are naturally occurring. The Department believes the change will better identify those contaminants that actually pose a risk to human health.

The Department is proposing to amend the rule to reflect this substantial opposition to EPA guidance by stating that a permit holder shall test for microbiological contaminants based on either fecal coliform or E.coli, with the test being determined by the requirements of the Aquifer Protection Permit (APP). The rule is also being amended to decrease the amount of time a permit holder has to conduct a repeat sample if microbiological contaminants are detected.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates it did review three studies relevant to this rulemaking.

- MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support: The Department indicates that this report was used to review Microbiological Contaminants at 78 Federal Register 10270 in order to inform the Department on the subject matter and its applicability in the AWQS setting, which included looking at technologies, costs, sampling, and analytical methodologies for public health risks reduction.
- Draft Economic Impact Statement for Arsenic Proposed AWQS: The Department indicates that this report informed DEQ on the economic impact of the subject matter of the rulemaking.
- State-Based AWQS Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support: The Department indicates that this study was used to review EPA assumptions regarding the MCL for Microbiological Contaminants and potential alternatives based on medical and toxicological evidence.

4. **Summary of the agency's economic impact analysis:**

The Department states that this rulemaking is being taken by the Arizona Department of

Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Microbiological Contaminants as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. The Department indicates that the AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (see A.R.S. § 49-224(B)). The Department states the AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the voluntary Remediation Program (VRP), and elsewhere.

The Department states that the full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. The Department indicates that while not all costs and benefits are borne evenly, these are the identified groups generally impacted from this Microbiological Contaminants AWQS rulemaking. The Department states that whereas permittees will continue to incur costs (primarily for routine and repeat sampling) to comply with the new/proposed AWQS, these costs are expected to decrease in comparison to the costs of complying with the current AWQS. The Department states that these potential cost savings are attributable to the expectation that the routine sampling and repeat sampling requirements under the new AWQS would result in fewer "false positive" samples, thereby reducing the need for follow-up sampling and unwarranted corrective actions for facilities falsely deemed to be non-compliant. The Department indicates that benefits in the form of cost saving could also accrue to community water system and their clientele due to a reduction of Microbiological Contaminants in the groundwater systems and their clientele due to a reduction in Microbiological Contaminants in the groundwater, under the proposed AWQS. The Department states that as many as 1.8 million Arizonans could be potentially affected in this way.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states that the controlling statute A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. The Department indicates that it simply requires ADEQ to open a rulemaking docket pursuant to A.R.S. § 41-1021 for adoption of new or adjusted MCL as an AWQS within one year of the MCLs establishment or adjustment.

6. What are the economic impacts on stakeholders?

The Department says that compared to the current AWQS, the indicated changes to the AWQS are intended to maintain the same (or better) levels of protection with respect to

human health, while potentially resulting in significant costs saving to impacted permittees (due to the expectations that the modified sampling requirements would substantially reduce the incident of “false positive” results). The Department indicates that, as such, many of the stakeholder categories that would typically be impacted by the costs of the new regulation would actually benefit from the reduced cost burdens under the proposed new AWQS. The Department indicates that from a total of 434 Aquifer Protection permittees in Arizona, it is estimated that 153 to 300 permittees are required to sample for Microbiological Contaminants. This subset of 153 to 300 permittees would be the impacted stakeholder group that would potentially experience cost savings under the proposed AWQS.

The Department believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. The Department anticipates that hundreds of permits may need to be amended to update monitoring tables that include Microbiological Contaminant indicator parameters. The Department indicates that any additional costs would generally be covered by increased fees paid by permittees.

The Department believes, generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resources as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. The Department states that savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstances} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike. In addition, the Department states that following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. Additionally, the Department states that reduced sampling requirements of permittees would potentially result in some loss of business (and associated reductions in employment) for firms engaged in sample analysis. The Department goes on to say the potential loss of direct jobs would in turn (in theory at least) generate additional employment losses through reductions in indirect and induced (secondary) economic activity, and subsequent tax revenues.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates that there were changes between the proposed draft and final rules before the Council. The changes are summarized below and can be found in full at pg. 25 of the NFR preamble. Council Staff believes the changes are non-substantive and meets the requirements of A.R.S. § 41-1025.

- R18-406(F):
 - Replacing the term “presence or absence” with “detection or non-detection”, this was in response to a public comments in which the Department agreed with stakeholders that detection was a better description of the process.

- R18-11-406(F)(1):
 - Replaced “exceedance” with “detection”, to align with changes made above.
 - Replaced “of” with “for”, for semantic purposes.
- R18-11-406(F)(2)
 - Replaced “exceedance” with “detection”, to align with changes made above.
 - Replaced “of” with “for”, for semantic purposes.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it received 9 public comments as it relates to this rulemaking. The Department indicates that they conducted stakeholder meetings on 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, and 2/20/25. The Department has also indicated to Department staff that stakeholders were given an opportunity to review and comment on the rules after changes were made in response to the public comments. The comments will be summarized below, and the full comments can be found in the materials and on pages 25-32 in the preamble.

Of the 8 comments, 5 came from utilities, 1 came from a citizen, and 2 came from interest groups. 1 comment was in support, 4 comments were seeking clarification on the presence language and what constitutes presence, in which the Department changed to detection, 1 comment was seeking clarification on the steps for substantial opposition, and 2 comments were opposed to not following the EPA standards. Both opposing comments came from interest groups.

The first opposition comment (Comment #5, pg. 27-28) states that they felt the EPA standards were protective and increases the risk to Arizona Communities. The Department responded by saying that while the Department is proposing to use a different standard (total coliform vs. fecal coliform and E.coli), the level of protection will not drop and the non-EPA method will result in cost savings. The Department has indicated that the EPA standard results in high numbers of false positives and additional costs/labor related to retesting. The Department indicated that they used the following [standard work](#) to determine that the EPA guidance was not the best choice for Arizona. Additionally, the Department has indicated to Department staff that Fecal Coliform and E.Coli testing will result in the same amount of correct positive tests but will not have the same number of false positives.

The second opposition comment (Comment #6, pg, 29-30) states that the Department should not deviate from EPA standards and states that the deviation increases the risk of exposure and damaging the water system. The Departments replied by stating that they considered the requirements found at 40 CFR 141.63(c) related to total coliform, but ultimately decided against because fecal coliform and E.colu are more appropriate for exacting a threat to human health.

Council staff believes that the department adequately addressed the comments in accordance with A.R.S. § 41-1052(D)(7).

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

This specific rulemaking does not create a permit or a license. The Department's other proposed rulemakings before the Council do require a permit or license and are addressed in those particular rulemakings. As a summary of those permitting requirements, they are specific to AWP programs and it would not be technically feasible to issue a general permit under A.R.S. § 41-1037(A)(3).

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates that these rules are not more stringent than corresponding federal laws.

11. **Conclusion**

This regular rulemaking by the Department seeks to amend one rule regarding aquifer purification standards. The Department specifically seeks to amend the rule by changing the current standard for microbiological contaminant testing for Aquifer Protect Permit holders. The Department currently follows the EPA standard for microbiological contaminants by using total coliforms. The Department is normally required to follow EPA standards unless there is substantial opposition. The Department indicated that there has been substantial opposition because of the number of false positives generated by the current testing of total coliforms. The Department has proposed an alternative testing method of fecal coliform and e.coli because this will result in fewer false positives and will not increase the risks for public health. The Department believes this will reduce costs for stakeholders because there will be fewer retestings.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

March 13, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Aquifer Water Quality Standards Update Regular Rulemaking: Title 18,
Environmental Quality, Chapters 9 and 11

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for May 6th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. §§ 41-1039, 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

- (A)(1)(a) The public record closed for all rules on December 16th, 2024 at 11:59 p.m.
- (A)(1)(b) The rulemaking activity does relate to a five-year review report. The report on 18 AAC 11, Articles 4 and 5 was approved on November 3rd, 2020.
- (A)(1)(c) The rulemaking activity does not establish a new fee.
- (A)(1)(d) The rulemaking does not contain a fee increase.
- (A)(1)(e) An immediate effective date is not requested.
- (A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- (A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3) (a) (see subheading IV, below).
- (A)(1)(h) A list of documents is enclosed (see subheading IV, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

- (A)(2) Five (5) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (*see* subheading IV, below);
- (A)(3) The preambles contain economic, small business, and consumer impact statements that contain the information required by A.R.S. § 41-1055 (*see* subheading IV, below);
- (A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (*see* subheading IV, below);
- (A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
- (A)(6) No materials were incorporated by reference in this rulemaking;
- (A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (*see* subheading IV, below);
- (A)(8) All statutes referred to in the definitions are represented in the general and specific statutes authorizing the rule.

III. Governor's office approvals pursuant to A.R.S. § 41-1039:

- (A) ADEQ received prior written approval from the Governor's Office twice. Once for Title 18, Chapter 11, Article 4 on August 24, 2022 and then again for Title 18, Chapter 9, Articles 1 and 2 on February 5th, 2024 (*see* subheading IV, below);
- (B) ADEQ received written final approval from the Governor's Office for this rulemaking on March 11th, 2025 (*see* subheading IV, below).

IV. List of documents enclosed (25 documents total):

- One (1) Cover Letter (R1-6-201(A)(1));
 - AWQS_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));
 - AWQS_JLBC.pdf
- Five (5) NFRMs (R1-6-201(A)(2));
 - AWQS_NFRM_18_AAC_9_Impl.pdf
 - AWQS_NFRM_18_AAC_11_As.pdf
 - AWQS_NFRM_18_AAC_11_U.pdf
 - AWQS_NFRM_18_AAC_11_DBP.pdf
 - AWQS_NFRM_18_AAC_11_MBC.pdf
- Five (5) EISs (R1-6-201(A)(3));
 - AWQS_EIS_18_AAC_9_Impl.pdf
 - AWQS_EIS_18_AAC_11_As.pdf
 - AWQS_EIS_18_AAC_11_U.pdf
 - AWQS_EIS_18_AAC_11_DBP.pdf
 - AWQS_EIS_18_AAC_11_MBC.pdf
- Five (5) Public Comments Received Documents (R1-6-201(A)(4));

- AWQS_Cmts_18_AAC_9_Impl.pdf
- AWQS_Cmts_18_AAC_11_As.pdf
- AWQS_Cmts_18_AAC_11_U.pdf
- AWQS_Cmts_18_AAC_11_DBP.pdf
- AWQS_Cmts_18_AAC_11_MBC.pdf
- Five (5) General and Specific Authorizing Statutes (R1-6-201(A)(7));
 - 49-104 - Powers and duties of the department and director.pdf
 - 49-203 - Powers and duties of the director and department.pdf
 - 49-221 - Water quality standards in general; protected surface waters list.pdf
 - 49-223 - Aquifer water quality standards.pdf
 - 49-224 - Aquifer identification, classification and reclassification.pdf
- Three (3) A.R.S. § 41-1039 Governor's Approvals
 - 8_24_22_Gov_Approval.pdf
 - 2_5_24_Gov_Approval.pdf
 - 25_3_11_Gov_Approval.pdf

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov if you have any questions.

Sincerely,

Karen Peters, Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING
TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER QUALITY STANDARDS

PREAMBLE

1. Permission to proceed with this proposed rulemaking was granted under A.R.S. § 41-1039 by the governor on:

August 24, 2022, &

February 5, 2024

2. Article, Part, or Section Affected (as applicable) Rulemaking Action

R18-11-406

Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-221, and 49-223.

Implementing statute: A.R.S. §§ 49-221, and 49-223.

4. The effective date of the rule:

July 7, 2025

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3421, Issue Date: November 15, 2024, Issue Number: 46, File Number: R24-232.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2136, Issue Date: June 28, 2024, Issue Number: 26, File Number: R24-114.

6. The agency's contact person who can answer questions about the rulemaking:

Name: Jon Rezabek

Website: <https://www.azdeq.gov/awp-rulemaking>

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Introduction:

General Explanation of the Collective Rulemaking: The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. § 49-223(A) to open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency's (EPA's) establishment of new or adjusted MCLs. AWQSs for Arsenic, Bromate, Chlorite, Haloacetic Acids, Microbiological Contaminants, Total Trihalomethanes and Uranium with corresponding MCLs are either unestablished as AWQSs or are established but currently have a misaligned value as the standard. MCLs for the seven (7) pollutants can be viewed at 40 *Code of Federal Regulations* (C.F.R.) 141.60 *et seq.* A.R.S. § 49-223(A) requires ADEQ to move forward with the adoption of MCLs as AWQSs through the rulemaking process unless substantial opposition to the adoption is received from stakeholders. Upon receipt of substantial opposition, ADEQ may adopt for that pollutant the verbatim MCL as an AWQS, but only upon a finding that the MCL is appropriate for adoption in Arizona as an AWQS. In making this finding, ADEQ must consider whether the assumptions used by the EPA in developing and implementing the MCLs are appropriate for establishing an Arizona state AWQSs. The listed assumptions for consideration are technology, cost, sampling and analytical methodologies and public health risk reduction. If ADEQ determines the MCL is inappropriate as an AWQS, the Department may establish an alternative AWQS for the pollutant with an MCL. The alternative AWQS must be:

- (1) Based on the protection of human health and shall rely on technical protocols appropriate for the development of AWQSs,
and

(2) Based on credible medical and toxicological evidence that has been subjected to peer review.

Subject Matter of this NFRM: This *Notice of Final Rulemaking* (NFRM) proposes an alternate AWQS for Microbiological Contaminants from the MCL for Microbiological Contaminants. The original MCL for Microbiological Contaminants was established through Final Rule by the Environmental Protection Agency (EPA), published in the *Federal Register* at 78 *Federal Register* 10270.

Standard Work Development: In approaching and preparing for the execution of the requirements in A.R.S. § 49-223, ADEQ developed a guidance document or “standard work” as the language of the statute leaves a number of determinations to the discretion of the Department. An example of this is whether an MCL is “appropriate” as an AWQS or relying on “technical protocols” appropriate for the development of an alternative AWQS. These statutorily-based and reasoned procedures were developed and released to the public for comment in the summer of 2023. They can be viewed at the following webpage: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

Substantial Opposition: ADEQ has received substantial opposition from stakeholders on the proposal to adopt the Microbiological Contaminants MCL as an AWQS. “Substantial opposition” is defined in A.R.S. § 49-223(A) as “information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Its functionality in the procedure laid out in A.R.S. § 49-223 is explained above in the subsection entitled, *General Explanation of the Collective Rulemaking*. The submitted opposition includes current permittees voicing concerns about the high numbers of false positive samples of Total Coliform that would have tested negative had Fecal Coliform or *E.coli* been the indicator parameter used in the standard instead. Details of the hardships encountered by the regulated community include hundreds of hours of labor in verification or repeat sampling. This, along with shipping and laboratory testing costs, amount to tens of thousands of dollars in unnecessary spending. With this series of AWQS rulemakings, ADEQ proposes to establish or align AWQSs for Arsenic, Bromate, Chlorite, Haloacetic Acids, Total Trihalomethanes and Uranium verbatim with the MCL. However, given the substantial opposition received on the Microbiological Contaminants MCL, ADEQ was prompted to follow the procedure in A.R.S. § 49-223(A) for determining whether the Microbiological Contaminants MCL is appropriate as an Arizona state AWQS. ADEQ used its newly developed “standard work” as explained above in executing this requirement. The conclusion is that the MCL is inappropriate (*See* “‘Inappropriate’ Determination for the Microbiological Contaminants MCL (A.R.S. § 49-223(A))” for detail below). Thereafter, ADEQ followed the procedure for establishing an alternative AWQS for Microbiological Contaminants, pursuant to A.R.S. § 49-223(B), also using the newly developed “standard work”. The conclusion is that an alternative AWQS should be established, which is proposed via this NFRM (*See* “Alternative AWQS Development and Setting for Microbiological Contaminants (A.R.S. § 49-223(B))” for detail below).

What is the MCL for Microbiological Contaminants? The MCL for Microbiological Contaminants involves a sampling

procedure that can be found at 40 C.F.R. 141.63(c). The essential part of the MCL is that a system must sample for Total Coliform and *E.coli* routinely. Upon a positive result of Total Coliform, the system must sample for *E.coli*. A positive result from the *E.coli* repeat sample (following a positive Total Coliform routine sample) constitutes a violation of the standard. Furthermore, upon a positive result of a routine *E.coli* sample, the system must repeat the sample for *E.coli*. A positive result from the *E.coli* repeat sample (following a positive *E.coli* routine sample) constitutes a violation of the standard. Additionally, a system violates the standard when:

- (1) it fails to take a repeat sample following an *E.coli*-positive routine sample, or
- (2) it fails to test for *E.coli* when any repeat sample tests positive for Total Coliform.

What is the current AWQS for Microbiological Contaminants?

The current AWQS for Microbiological Contaminants involves a similar sampling procedure to that of the corresponding MCL. The standard can be found at A.A.C. R18-11-406(F). The essential part of the current AWQS is that a facility must sample for Total Coliform routinely. Upon a positive Total Coliform routine sample, a Total Coliform repeat sample shall be taken within two weeks of the time the sample results are reported. A positive Total Coliform repeat sample following a positive Total Coliform routine sample constitutes a violation of the standard.

Associated Rulemakings ADEQ proposes a total of five (5) NFRMs in the collective AWQS Update rulemaking. Three (3) of the five (5) NFRMs propose to establish or align the AWQSs with the MCLs in *Arizona Administrative Code*, (A.A.C.) Title 18, Chapter 11, Article 4 for pollutants Arsenic, Bromate, Chlorite, Haloacetic Acids, Total Trihalomethanes and Uranium. This NFRM's scope is limited to Microbiological Contaminants and proposes an alternative AWQS to the corresponding MCL under the procedure described in A.R.S. § 49-223 and above. A second NFRM's scope includes Arsenic. A third NFRM's scope includes Uranium. A fourth NFRM's scope includes the four (4) disinfection byproducts, which are Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes. A fifth and final NFRM includes in its scope a proposed new section and some amendments to A.A.C., Title 18, Chapter 9, Articles 1 and 2. With the fifth NFRM, ADEQ proposes a rule detailing implementation of new or adjusted AWQSs into existing Individual Aquifer Protection Program permits (APPs), along with adjacent amendments to existing rule to make way for this purpose.

What are Aquifer Water Quality Standards and what is their purpose? Aquifer Water Quality Standards or "AWQSs" are protective groundwater standards that were put in place and designated by the Arizona Legislature to preserve Arizona's aquifer quality for drinking water-protected use (See A.R.S. § 49-224(B)).

How are Aquifer Water Quality Standards Used? The AWQSs are used in ADEQ's Aquifer Protection Program (APP), and, to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

“Inappropriate” Determination for the Microbiological Contaminants MCL (A.R.S. § 49-223(A)) ADEQ developed a “standard work” procedure for conducting an “appropriateness” determination pursuant to A.R.S. § 49-223(A). The “standard work” can be reviewed on ADEQ’s website at <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ’s review of EPA’s assumptions on technology, costs, sampling and analytical methodologies and public health risk reduction resulted in significant concern for the costs, analytical methods and public health risk reduction assumptions in particular. ADEQ found that the MCL at 40 C.F.R. 141.63(c) is simply inappropriate as is for verbatim adoption as an AWQS and applicability upon the facilities regulated by the APP program, such as Wastewater Treatment Plants, Mines and Industrial facilities. One of the main reasons is that the MCL is designed for Public Water Systems, not APP type facilities. Specifically, this is because the Microbiological Contaminants MCL requires routine sampling of both Total Coliform and *E.coli* parameters. Thereafter, upon a positive result of either Total Coliform or *E.coli*, a repeat sample is required for both parameters. Violation occurs when a positive result is obtained from an *E. coli* repeat sample that occurs after a total coliform-positive routine sample. Violation also occurs when a positive result is obtained from a Total Coliform repeat sample that occurs after an *E. coli*-positive routine sample. ADEQ has found that the Total Coliform parameter is a very general indicator of coliforms in a sampling well, many of which occur naturally and are not indicative of a threat to human health. In particular, Total Coliform is too broad of an indicator parameter to signal fecal coliform health concerns. On the contrary, ADEQ has found that Fecal Coliform and *E.coli* are more exacting indicators or surrogates of fecal coliforms, which are dangerous to human health. Additionally, when a permittee samples for Total Coliform and receives a positive result, more often than not, the result is what is known as a “false positive”, signaling non-health threatening coliforms in a sample. ADEQ notes that false positives have led to a number of permittees having to perform accelerated or more frequent monitoring intervals pursuant to the permits unnecessarily, which have associated costs.

Alternative AWQS Development and Proposal for Microbiological Contaminants (A.R.S. § 49-223(B)) After determining that the MCL for Microbiological Contaminants is inappropriate as an AWQS, ADEQ followed the “standard work” procedure for alternative AWQS development and establishment. ADEQ is proposing an appropriate alternative Microbiological Contaminants AWQS based upon the detection or non-detection of either Fecal Coliform or *E.coli* in a 100-milliliter sample (depending on the requirement of the permit). Upon detection during a routine Fecal Coliform sample, a repeat sample of either Fecal Coliform or *E.coli* with a detect result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Upon a detect result of a routine *E.coli* sample, a repeat sample of *E.coli* with a detect result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Through research and consultation, ADEQ determined that *E. coli* is a better indicator of fecal contamination than total or fecal coliforms and that total coliform positive samples are known to result in a “false positive”. A “false positive” in a Total Coliform context is when a sample result is positive, but the cause of the positive result indicates a type of total coliform that does not originate in fecal contamination and is not dangerous to human health and occurs

naturally. A common “false positive” is when a positive Total Coliform sample is actually indicating rust in a well. Additionally, ADEQ considered the language of 40 C.F.R. 141.63(c), the state of existing Individual APP and Reclaimed Water permits, the Department’s mission to protect human health and the environment, as well as costs to permittees, analytical methodologies and public health risk reduction. Ultimately, ADEQ determined that shifting away from Total Coliform as an indicator parameter for an alternative Microbiological Contaminants AWQS and moving towards Fecal Coliform and *E.coli* is appropriate. Specifically, Fecal Coliform and *E.coli* are more exacting at indicating a threat to human health. The decision to configure the AWQS proposal to allow permittees to utilize Fecal Coliform or *E.coli* was due to the fact that protecting human health is not diminished under any of the possible orientations and existing permittees are sampling for both parameters already in some cases. Allowing permittees to keep those sampling traditions and optimize a sampling orientation from a cost effective perspective are all factors that led to ADEQ’s proposal.

Sampling and Analytical Methodologies. In the Baseline Monitoring Requirement subsection of the final rule at R18-9-A215(E)(4), the following is provided,

“[s]ampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.”

At the time this NFRM was compiled, wastewater methods for some of the pollutants with new or adjusted AWQSs were not ADHS-Approved (*see* A.A.C. Title 9, Chapter 14, Article 6, Tables 6.2.A and 6.2.B). In March 2025, ADEQ formally requested that the following sampling methods be reviewed and considered for addition to ADHS’s “Director Approved” list of sampling methods pursuant to A.A.C. R9-14-610, found published outside of the rule on ADHS’s website, here: <https://www.azdhs.gov/documents/preparedness/state-laboratory/lab-licensure-certification/environmental-laboratory/application/application-part-e.pdf>

Table 1. Analytical Methods for Baseline Monitoring

| Analyte | Analytical Method |
|-----------------------|--|
| Arsenic | EPA 200.8, SM 3113B, SM 3114B |
| Bromate | EPA 300.1, EPA 317.0 Rev 2.0, EPA 321.8, EPA 326.0 |
| Chlorite | EPA 300.0, EPA 300.1, EPA 317.0 Rev 2.0, EPA 326.0 |
| Haloacetic Acids | EPA 552.1, EPA 552.2, EPA 552.3, SM 6251B |
| Fecal coliform | SM 9223B |
| <i>E. coli</i> | SM 9223B |
| Total Trihalomethanes | EPA 502.2, EPA 524.2, EPA 551.1, SM 6251B |
| Uranium (Total) | EPA 200.8 |

* “EPA” - Environmental Protection Agency; “SM” - Standard Methods

Applicability of Microbiological Contaminants AWQS Indicator Parameters to Baseline Monitoring. The associated NFRM for Title 18, Chapter 9, Articles 1 and 2 specifies in Final Rule R18-9-A215(C) that all persons with issued individual permits as of a new or adjusted AWQS effective date shall begin Baseline Monitoring, pursuant to R18-9-A215(E), for a new or adjusted AWQS within three months. Additionally, the Final Rule or AWQS for Microbiological Contaminants in this NFRM specifies that either Fecal Coliform or *E. coli* may be used in routine monitoring as indicator parameters. ADEQ understands that for various reasons, issued APP permits may be sampling for one or both or none of these indicator parameters already. In accordance with the rule, ADEQ's expectation is that an applicable permittee may choose one or both indicator parameters for the purpose of Baseline Monitoring under Final Rule R18-9-A215.

Who are the stakeholders to this rulemaking? The stakeholders for this rulemaking are predominantly the permittees of the APP, and to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP). Other stakeholders include private well owners, community water systems and the constituents they serve, as well as all Arizonans who benefit from the state's aquifers being protected for drinking water use.

What has been the stakeholder process thus far for this rulemaking? ADEQ has conducted a number of general and specific stakeholder meetings, as well as tribal listening sessions, concerning this rulemaking. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

State-Based AWQS Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support:

Summary: This report provides information to the Department for the purpose of “standard work” guidance in determining an appropriate alternative AWQS for microbiological contaminants per A.R.S. § 49-223(B).

Study Resource: Provided recommendations on the establishment of an alternative AWQS to the Microbiological Contaminants MCL based on credible medical and toxicological evidence that has been subjected to peer review, as well as technical protocols appropriate in the development of an AWQS.

Public Review: The public may review this study or may obtain copies from the Department by request. Requests can be submitted to the Department by email at awqs@azdeq.gov or by mail to Arizona Department of Environmental Quality, 1110 W. Washington Ave. Phoenix, AZ 85007.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. The summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(F) in Title 18, Chapter 11, Article 4 of the
Revision: 6/14/2024

Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Microbiological Contaminants as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting an alternative AWQS to the corresponding MCL. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Microbiological Contaminants AWQS rulemaking.

Costs to permittees to meet the new AWQS for Microbiological Contaminants are None to Minimal. In fact, ADEQ expects cost savings in many cases. The proposed AWQS for microbiological contaminants does not propose a numeric change in water quality standards, but instead proposes to implement more efficient/effective monitoring protocols. In this regard, the EIS generally follows a key premise of the Matrix Report: that the primary cost impact of the proposed AWQS would be a *reduction* in permittee sampling costs due to the reduced incidence of false-positive routine testing, repeat tests and accelerated monitoring thereafter. Consistent with the Matrix Report, the EIS estimates the cost *savings* related to more efficient sampling protocols. The EIS follows the format of the cost analysis in the Matrix Report, which evaluates *incremental* changes (reductions) in permittee costs compared to baseline conditions (i.e., costs under the current AWQS compared to costs under the proposed AWQS).

In addition to creating cost savings for permittees, the proposed AWQS would potentially generate economic benefits in terms of a reduction in cases of illness and death associated with microbiological contamination. In particular, the improved sampling protocols are expected to allow for quicker identification of incidents of contamination, allowing for more timely implementation

of corrective measures (according to ADEQ staff, the higher incidence of false-positive test results under the existing protocols – and the associated need for retesting – can result in delays in identifying actual cases of contamination, potentially resulting in disease outbreaks that could otherwise be contained sooner). These potentially significant health benefits are not quantified in the EIS, as ADEQ and their consultant do not have sufficient information to develop such estimates. However, following the methodology of the Matrix Report, the EIS provides *general* estimates of the annual economic benefits attributable to regulation of Microbiological Contaminants. These general estimates of economic benefits are provided for contextual purposes (i.e., they quantify the existing benefits of regulating Microbiological Contaminants irrespective of proposed adjustments to the AWQS and therefore are not represented to be *incremental* benefits associated with the proposed AWQS).

Costs. Whereas permittees will continue to incur costs (primarily for routine and repeat sampling) to comply with the new/proposed AWQS, these costs are expected to *decrease* in comparison to the costs of complying with the current AWQS. These potential cost savings are attributable to the expectation that the routine sampling and repeat sampling requirements under the new AWQS would result in fewer “false positive” samples, thereby reducing the need for follow-up sampling and unwarranted corrective actions for facilities falsely deemed to be non-compliant. Statewide, the cost savings to permittees are estimated to range from \$882,000 to \$1.7 million annually (in 2023 dollars).

Benefits. Based on available time series data from ADHS and CDC, the Matrix Report estimates that regulation of Microbiological Contaminants results in 80 fewer cases of illness and 0.3 fewer deaths per year (statewide). In monetary terms, these prevented illnesses and deaths represent annual statewide benefits of \$3.5 million per year (in 2023 dollars).

Specific impacts

From a total 434 Aquifer Protection permittees in Arizona, it is estimated (based on the Matrix Report) that 153 to 300 permittees annually are required to sample for Microbiological Contaminants. This subset of 153 to 300 permittees would be the impacted stakeholder group that would potentially experience cost savings under the proposed AWQS. In Arizona, the potentially affected benefiting population consists primarily of private well users throughout the state (estimated at 350,000 persons in total), although some of these will be effectively excluded from the additional benefits of the higher AWQS because existing Microbiological Contaminant levels in some wells are already zero. Benefits in the form of cost savings could also accrue to community water systems and their clientele due to a reduction of Microbiological Contaminants in the groundwater, under the proposed AWQS. As many as 1.8 million Arizonans could be potentially affected in this way.

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening

sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: "permittees") will be the primary bearers of costs associated with this rulemaking.

Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees' fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultant have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Microbiological Contaminants in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost impacts in this EIS relate primarily to potential cost *savings* to permittees due to the more efficient (and more effective) sampling protocols under the proposed AWQS. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| | |
| *Small Businesses as a segmented category | 135 |

Approach to the EIS for Microbiological Contaminants. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (see Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA), which takes into account multiple factors affecting potential costs and benefits.

Health Risk Reduction (Benefits)

The EIS measures the economic benefits of the AWQS in terms of the monetized value of illnesses and deaths that would be prevented by compliance with the State’s AWQS for Microbiological Contaminants. These calculations are based on the following steps:

- Estimate the annual number of cases of enteric disease that would occur in Arizona in the absence of effective AWQS for microbiological contaminants;
- Estimate the annual number of deaths that would result from outbreaks transmitted by water in Arizona in the absence of effective AWQS;
- Calculate the costs associated with treatment of estimated cases of enteric disease; and
- Calculate the monetary value of lives lost due to disease outbreaks transmitted by water (using “Value of Statistical Life” data).

Based on available time series data from ADHS and CDC, the Matrix Report estimates that the AWQS would create the following benefits in terms of prevented illnesses and deaths:

- Prevention of 80 cases of illness per year
- Prevention of 0.3 deaths per year
- Avoided costs of \$2,397.76 per case of illness prevented

- Value of Statistical Life (VSL) of \$11.1 million

Using the above factors, the Matrix Report calculates total benefits from the AWQS of \$3.5 million per year. For purposes of the EIS, health-related benefits are understood to be the same for both the existing AWQS and the proposed AWQS. These general estimates of economic benefits are provided for contextual purposes (i.e., they quantify the existing benefits of regulating Microbiological Contaminants irrespective of proposed adjustments to the AWQS and therefore are not represented to be *incremental* benefits associated with the proposed AWQS).

The proposed AWQS would potentially generate economic benefits in terms of a reduction in cases of illness and death associated with microbiological contamination. In particular, the improved sampling protocols are expected to allow for quicker identification of incidents of contamination, allowing for more timely implementation of corrective measures (according to ADEQ staff, the higher incidence of false-positive test results under the existing protocols – and the associated need for retesting – can result in delays in identifying actual cases of contamination, potentially resulting in disease outbreaks that could otherwise be contained sooner). These potentially significant health benefits are not quantified in the EIS, as the consulting team does not have sufficient information to develop such estimates.

Cost Analysis

Consistent with the Matrix Report, the cost analysis provided in this EIS is based on the premise that the proposed AWQS would result in cost *reductions* (to permittees and the State) compared to the existing AWQS. The cost savings would result from revised sampling protocols intended to significantly reduce the occurrence of false-positive test results (while more quickly identifying contaminants that are of actual concern from a public health perspective). Within the framework provided in the Matrix Report, these cost savings are calculated in terms of the avoided costs of follow-up sampling compared to estimated costs under the existing AWQS protocols. As such, the calculated “costs” are negative (compared to baseline levels) and therefore can actually be interpreted as benefits rather than costs.

The Matrix report evaluates two alternatives for a new AWQS:

1. ADEQ would adopt the EPA’s MCL as the AWQS; or
2. ADEQ would develop and establish an appropriate alternative AWQS (for which Matrix assumed that the routine and repeat samples would both be Fecal Coliform).

The EIS considers a proposed AWQS that would require testing *E. coli* for the routine sample, with all required repeat samples testing for *E. coli*. Where appropriate, the Matrix Report factors have been applied to the AWQS proposal considered in the EIS.

Cost factors/assumptions derived from the Matrix report are summarized below.

Costs of Sample Analysis. The Matrix Report estimated ranges of costs for the sample analysis by contacting four ADHS certified laboratories. If the contacted laboratories offered more than one analysis method, the least expensive method was used. The following are the range of costs used for the Matrix analysis (and also in the EIS):

- Total coliform: \$25 - \$50

- *E. coli*: \$25 - \$50

Costs for labor, reporting, and administrative work were assumed in the Matrix Report based on the author's knowledge and previous experience with APPs. These assumptions are outlined on the tables below.

Work Costs per False-Positive Sample

| Work Category | Hours | Rate | Cost |
|----------------|-----------|-----------|----------------|
| Labor | 8 | \$95 | \$760 |
| Data analysis | 4 | \$125 | \$500 |
| Reporting | 20 | \$100 | \$2,000 |
| Administrative | 4 | \$100 | \$400 |
| TOTAL: | 36 | -- | \$3,660 |

Breakdown of Work Costs based Coliform Type per False-Positive Sample

| Category | Total Coliform | <i>E. Coli</i> |
|--|--------------------------|--------------------------|
| Sampling Cost (labor, analysis, consumables) | \$795 - \$820 | \$795 - \$820 |
| Reporting Costs | \$2,500 | \$2,500 |
| Administrative Costs | \$400 | \$400 |
| TOTAL: | \$3,695 - \$3,720 | \$3,695 - \$3,720 |

Note: Consumables include ice, gloves, etc. for collecting samples. Assumed to be approximately \$10 per sample.

In the EIS, the factors summarized above have been applied to the proposed AWQS. The costs of sampling under the current AWQS and the proposed AWQS are calculated on the table on the next page.

Total and Incremental Sampling Costs Per Year Statewide (in 2023 dollars)

| Factor | Current AWQS (Baseline) | | Proposed AWQS | |
|---|-------------------------|-------------|----------------|----------------|
| | Low | High | Low | High |
| Total APP's | 434 | 434 | 434 | 434 |
| Facilities required to sample for coliforms | 153 | 300 | 153 | 300 |
| Sampling frequency (times per year) | 4 | 4 | 4 | 4 |
| Routine coliform samples per year | 612 | 1,200 | 612 | 1,200 |
| Coliform type sampled (routine) | Total | Total | <i>E. Coli</i> | <i>E. Coli</i> |
| False-positive percentage | 43% | 43% | 4% | 4% |
| Repeat samples triggered by false positives | 263 | 516 | 24 | 48 |
| Coliform type sampled (repeat) | Total | Total | <i>E. Coli</i> | <i>E. Coli</i> |
| Total cost per sample (by type): | | | | |
| Total coliform | \$3,695 | \$3,720 | \$3,695 | \$3,720 |
| <i>E. Coli</i> | \$3,695 | \$3,720 | \$3,695 | \$3,720 |
| Aggregate (statewide) sampling costs/year: | | | | |
| Routine samples | \$2,261,340 | \$4,464,000 | \$2,261,340 | \$4,464,000 |

| | | | | |
|---|--------------------|--------------------|--------------------|----------------------|
| Repeat samples | \$972,375 | \$1,919,520 | \$90,454 | \$178,560 |
| <i>Total</i> | <i>\$3,233,716</i> | <i>\$6,383,520</i> | <i>\$2,351,794</i> | <i>\$4,642,560</i> |
| Cost Increase (Reduction) Compared to Baseline | <i>N/A</i> | <i>N/A</i> | <i>(\$881,923)</i> | <i>(\$1,740,960)</i> |

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|----------------------------------|--|----------------------------------|---|
| Costs to Stakeholders | | | |
| Cost stakeholders | General: The EIS follows the format of the cost analysis in the Matrix Report, which essentially looks at <i>incremental</i> changes in permittee costs compared to baseline conditions (i.e., costs under the current AWQS compared to costs under the proposed AWQS). An underlying premise of the Matrix Report analysis (and therefore the EIS) is that more efficient sampling requirements under the proposed AWQS would result in a significantly lower occurrence of false-positive test results and would therefore <i>reduce</i> compliance costs without compromising (while potentially improving) water quality standards | | Significant |
| Permittees, generally | In general, microbiological contaminants are more likely to be generated within Wastewater Treatment Facilities, and also in treated wastewater. Microbiological Contaminants also can enter groundwater under certain conditions | | Moderate: AWQS would potentially reduce costs for routine and repeat sampling (by \$882,000 to \$1.7 million per year statewide) |
| Mines | Microbiological Contaminants are least likely to be found in mine-related water being treated, compared to other permittee types | | |
| Industrial activities | Microbiological Contaminants would not be particularly likely to be occurring in industrial-related water being treated, compared to other permittee types | | |
| Wastewater Treatment Plants | This category of permittee type is most likely to be dealing with Microbiological Contaminants, because of the urban-use connection | | |
| Rate payers in municipal systems | Private citizens and businesses could potentially benefit from reduced user fees for wastewater processing, based on reduced costs to permittees under the revised AWQS. However, these benefits are likely to be minimal (given the relatively small cost savings on a per-system basis) | | Proposed AWQS is expected to reduce compliance costs to permittees, which could potentially be passed on to rate payers in the form of lower rates; in practice, rate |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|---|----------------------------------|--|
| | | | <p>reductions are likely to be minimal</p> <p>Minimal. Aggregate revenues would potentially decrease in proportion to the cost savings from reduced sampling requirements. Given state-wide cost savings of \$882,000 to \$1.7 million per year, cost savings on a per-system basis are likely to be minimal</p> |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | | Moderate. Overall, the AWQS would potentially create moderate cost savings to permittees compared to the existing AWQS |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Microbiological Contaminant indicator parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Minimal | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduced loss of life and illness and costs associated with treatment for disease. | | <p>Moderate: Potential health benefits attributable to existing AWQS are estimated at \$3.5 million per year; this benefit would not change by virtue of the proposed new AWQS</p> <p>Significant: Potential reduction in the impacts of disease outbreaks (by virtue of more rapid identification and mitigation of contamination</p> |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|--|-------------------------------------|
| Community water systems (CWSs) and their clientele | Savings could potentially accrue to CWSs due to reduced microbiological contaminants in the ground water. Any savings would presumably be passed on to customers. | | Significant |
| State costs | Some state-supported medical costs would decrease (this benefit already exists under existing AWQS and would continue under new AWQS) | | Significant |
| State revenue effects | Reduced sampling requirements of permittees would potentially result in some loss of business (and associated reductions in employment) for firms engaged in sample analysis. The potential loss of direct jobs would in turn (in theory at least) generate additional employment losses through reductions in indirect and induced (secondary) economic activity, and subsequent tax revenues | Minimal. Lost State income taxes are estimated to be \$6,700 per year due to direct and secondary losses of employment | |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

Compared to the current AWQS, the indicated changes to the AWQS are intended to maintain the same (or better) levels of protection with respect to human health, while potentially resulting in significant cost savings to impacted permittees (due to the expectation that the modified sampling requirements would substantially reduce the incidence of “false positive” results). As such, many of the stakeholder categories that would typically be impacted by the costs of new regulation would actually benefit from *reduced* cost burdens under the proposed new AWQS.

Estimated cost savings to permittees are based on factors in the Matrix report, applied to the proposed AWQS (as defined by ADEQ staff). Consistent with the Matrix report, the EIS focuses strictly on potential cost savings related to the issue of reducing false-positive test results (due to more efficient requirements for contaminant sampling under the new AWQS); the analysis does not quantify other potential costs savings such as reduced costs for assessments and correction actions (reductions in false-positive test results would presumably reduce the incidence of unwarranted assessments).

Mines

Because mines are not necessarily associated, locationally or otherwise, with water treated for household consumption, Microbiological Contaminants are likely to be minimal compared with discharge systems that have an urban connection.

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive.

Industrial Facilities

This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity. For some industrial processes, water use will involve treatments similar to those for households, therefore microbiological contamination would potentially be an issue; but other industrial processes will have minimal or no connection to microbiological contamination. The estimated number of industrial wastewater processing permittees is 56.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources, and so will typically have significant potential for microbiological contamination. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could potentially benefit from reduced user fees for wastewater processing, based on reduced costs to permittees under the revised AWQS. However, these benefits are likely to be minimal (given the relatively small cost savings on a per-system basis).

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because

treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains.

There are two segments to the benefiting stakeholders:

1. Some Community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced sampling requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQS.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group benefits from diseases forgone due to water quality standards related to Microbiological Contaminants.

The first segment is addressed below under the section *Community water systems (CWSs) and their clientele*.

Segment 2. As more fully documented in the Matrix Report, one major purpose of fecal pollution detection is to identify the presence of pathogens related to fecal waste sources and potential health risks (from the many bacterial, protozoan, and viral enteric pathogens that can cause diseases). Water quality monitoring to detect fecal pollution usually applies microbial fecal indicators to represent numerous potential pathogens.

Based on available time series data from ADHS and CDC, the Matrix report estimates that the AWQS would create the following benefits in terms of prevented illnesses and deaths:

- Prevention of 80 cases of illness per year
- Prevention of 0.3 deaths per year

Community water systems (CWSs) and their clientele

This affected group (segment 1 as noted above) includes a portion of customers of municipal or water utility water systems.

Estimates of this segment of the population, served by water sources that included groundwater, were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater, along with populations served by various categories of providers. An estimated 2.04 million Arizonans would be affected in this way (by both existing and proposed AWQS).

State cost savings

The proposed AWQS would potentially create incremental health benefits compared to existing policy by allowing for more rapid identification of contamination (and therefore more proactive containment of potential disease outbreaks). Related to these potential health benefits, the proposed AWQS would potentially result in some reduction in state-supported medical costs.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees would be subject to more efficient sampling requirements under the proposed AWQS, the need for employment related to sampling and sample analysis would potentially decrease somewhat. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems). In the summary of the model as tabulated below for the contaminant of Microbiological Contaminants, direct employment and earnings resulting from permittees’ investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|-------------|
| Annualized Costs (with financing etc.)/Increased "Output" | (\$881,923) |
| <i>Jobs Per Million Dollars in Output</i> | 1.80 |
| <i>Earnings Per Dollar of Output</i> | \$0.17 |
| New Wastewater Treatment Direct Jobs Created | (1.59) |
| New Annual Earnings for Direct Jobs Created | (\$148,229) |
| Total New Jobs (Direct + Secondary) | (4.87) |
| <i>Effective Income Tax Rate</i> | 2.1% |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | (\$6,732) |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided

for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee’s particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in

A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|---|
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced Microbiological Contaminants in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary employment generated by investments in Microbiological Contaminants technology (using the low end of costs where ranges are given) are approximately \$6,700.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing

specific contaminants referenced extensively by the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

R18-11-406(F) - Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- Replaced “presence or absence” with “detection or non-detection” as the latter terms reference the minimum detection level (MDL) of the sampling instrument or method which is more apt, more appropriate than the previous terms.

R18-11-406(F)(1) - Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- Replaced “of” with “for” three times for non-substantive, semantic purposes.
- Replaced “exceedance” with “detection” in order to align with the change to subsection (F) explained above.

R18-11-406(F)(2) - Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- Replaced “of” with “for” three times for non-substantive, semantic purposes.
- Replaced “exceedance” with “detection” in order to align with the change to subsection (F) explained above.

12. An agency’s summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Utility

Concerning the proposed alternative AWQS for Microbiological Contaminants, our current APP monitoring table utilizes the unit Most Probable Number (MPN) with a limit of (< 2.2) for *E. coli* monitoring. Will the units stay the same with this change in standard? Will Presence / Absence (P/A) be installed instead?

ADEQ Response 1:

ADEQ appreciates the comment. No, P/A will not be used for the *E. coli* indicator parameter utilized in the proposed AWQS for microbiological contaminants. Rather, detection or non-detection of either Fecal Coliform or *E. coli* is used. This means, for *E. coli*, “detect / non-detect” is likely to appear in the applicable APP monitoring tables along with a footnote stating that “non-detect” means a result of < 2.2 MPN or < 1 CFU, depending on the unit used in the permit.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in

A.R.S. § 49-223(A) as, "... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS]." Upon receipt of "substantial opposition", the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is "appropriate" as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ has received substantial opposition from stakeholders on the proposal to adopt the Microbiological Contaminants MCL as an AWQS (see heading No. 7, subsection "Substantial Opposition" for more information).

Comment 3: Concerned Citizen

If there are any lab people on the call, can they answer if there are sampling methods associated with the proposed Microbiological Contaminants AWQS that will provide a presence/absence (P/A) result for fecal coliforms? I know P/A exists for Total Coliforms and *E. coli*. I found this statement in a Google search, "[t]he P/A tests for the presence/absence of indicator organisms in a water sample. This is usually observed in the form of a color change after an incubation period. Two common P/A tests are: H2S-producing bacteria P/A test Total Coliform and *E. coli* P/A Test." I am not sure P/A exists for fecal coliform.

ADEQ Response 3:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed Microbiological Contaminants AWQS, ADEQ has revised the rule language, essentially swapping the "absence / presence" binary with "detection / non-detection". Under the new language, any *E. coli* detection result from routine sampling would need to be followed by a repeat *E. coli* sample within 5 days of becoming aware of the result. A repeat sample that results in a detection of *E. coli* would constitute a violation of the Microbiological Contaminants AWQS. Additionally, ADEQ conducted some research which shows that Eurofins Scientific laboratory testing services offers a Fecal Coliform testing method (SM 9222D) separately from the EPA Total Coliform method (EPA 1604). Both methods have an 8-hour holding time. Source:

https://www.eurofinsus.com/media/447768/appendix-d-section-5-attachment-holdtime-container-list_2016-july.pdf.

Also, Standard Method 9222D is a membrane filtration test for fecal coliforms and is offered by local labs in Arizona.

This method can detect fecal coliforms from 20 - 60 CFU/100 mL. Source:

https://www.nemi.gov/methods/method_summary/5587/. Also, please find a table in Heading No. 7, subheading "Sampling and Analytical Methodologies" explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 4: Utility

We support the proposed alternate AWQS for microbiological contaminants with the following minor edits to the language:

1. If a routine sample of ~~Fecal Coliform~~ is positive for Fecal Coliform, a 100-milliter repeat sample of ~~either Fecal Coliform or *E. coli*~~ shall be taken within five days of becoming aware of the exceedance for analysis of Fecal Coliform or *E. coli*.

2. If a routine sample ~~of *E. coli*~~ is positive for *E. coli*, a 100-milliter repeat sample ~~of *E. coli*~~ shall be taken within five days of becoming aware of the exceedance for analysis of *E. coli*...

ADEQ Response 4:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed Microbiological Contaminants AWQS, ADEQ has revised the rule language, essentially swapping the "absence / presence" binary with "detection / non-detection". Under the new language, any Fecal Coliform detection result from routine sampling would need to be followed by a repeat Fecal Coliform or *E. coli* sample within 5 days of becoming aware of the detection result. A repeat sample that results in a detection of either parameter would constitute a violation of the Microbiological Contaminants AWQS. The Fecal Coliform indicator parameter is understood by ADEQ to encompass many species of fecal-derived, potentially harmful species therein; whereas, the *E. coli* parameter is a single, potentially harmful species. *E. coli* is used in this setting as an indicator; meaning that if it is detected in a sample, other potentially harmful species are likely to be present as well. Because the Fecal Coliform parameter encompasses within its scope *E. coli* and a number of other fecal-derived species, ADEQ believes an *E. coli* repeat sample is appropriate if either Fecal Coliform or *E. coli* were sampled routinely. Please note that for the *E. coli* indicator parameter, "detect / non-detect" is likely to appear in the applicable APP monitoring tables along with a footnote stating that "non-detect" means a result of <2.2 MPN or <1 CFU, depending on the unit used in the permit. Additionally, ADEQ conducted some research which shows that Eurofins Scientific laboratory testing services offers a Fecal Coliform testing method (SM 9222D) separately from the EPA Total Coliform method (EPA 1604). Both methods have an 8-hour holding time. Source:

https://www.eurofinsus.com/media/447768/appendix-d-section-5-attachment-holdtime-container-list_2016-july.pdf.

Also, Standard Method 9222D is a membrane filtration test for fecal coliforms and is offered by local labs in Arizona.

This method can detect fecal coliforms from 20 - 60 CFU/100 mL. Source:

https://www.nemi.gov/methods/method_summary/5587/. Also, please find a table in Heading No. 7, subheading "Sampling and Analytical Methodologies" explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 5: Interest Group

We are deeply concerned about the proposed deviations from U.S. Environmental Protection Agency (EPA) standards for uranium, *E. coli*, and other pollutants. Arizona's aquifers are invaluable resources that sustain drinking water supplies, ecological systems, and cultural heritage. Protecting these resources with robust, science-based standards is essential to ensure public health and environmental sustainability. We urge ADEQ to adopt the most protective standards possible by aligning AWQS with EPA's maximum contaminant levels (MCLs) and guidelines for all pollutants under consideration, including arsenic, uranium, and *E. coli*. Prolonged delays in adopting federal standards leave Arizona communities vulnerable to contamination and illness.

ADEQ Response 5:

ADEQ appreciates the comment. There are seven (7) MCLs proposed for adoption as AWQSs within the scope of the collective “AWQS Update” rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQSs verbatim. This includes uranium cited by the commenter.

For the alternative Microbiological Contaminants AWQS, ADEQ believes the proposed AWQS is equally effective as the corresponding MCL, but deviates from the MCL’s employment of “Total Coliform” as an indicator parameter, utilizing the more precise “Fecal Coliform” and “*E. coli*” indicator parameters instead. Pursuant to A.R.S. § 49-223, ADEQ received “substantial opposition” to adoption of the Microbiological Contaminants MCL, mostly concerning the high numbers of “false positive” samples of Total Coliform that would have tested negative had Fecal Coliform or *E. coli* been the indicator parameter used in the standard instead. Details of the hardships encountered by the regulated community include hundreds of hours of labor in verification or repeat sampling. This, along with shipping and laboratory testing costs, amount to tens of thousands of dollars in unnecessary spending.

Given the substantial opposition received on the Microbiological Contaminants MCL, ADEQ was prompted to follow the procedure in A.R.S. § 49-223(A) for determining whether the Microbiological Contaminants MCL is appropriate as an Arizona state AWQS. ADEQ used its newly developed “standard work” as explained in Heading No. 7 above. ADEQ developed this “standard work” procedure for conducting an “appropriateness” determination pursuant to A.R.S. § 49-223(A). The “standard work” can be reviewed on ADEQ’s website at <https://www.azdeq.gov/rulemaking/awqs-update/resources>. Concerning the Microbiological Contaminants MCL, ADEQ’s review of EPA’s assumptions on technology, costs, sampling and analytical methodologies and public health risk reduction resulted in significant concern for the costs, analytical methods and public health risk reduction assumptions in particular. ADEQ found that the MCL at 40 C.F.R. 141.63(c) is simply inappropriate as-is for verbatim adoption as an AWQS and applicability upon the facilities regulated by Arizona’s APP program, such as Wastewater Treatment Plants, Mines and Industrial facilities. One of the main reasons is that the MCL is designed for Public Water Systems, not APP type facilities. Specifically, this is because the Microbiological Contaminants MCL requires routine sampling of both Total Coliform and *E. coli* parameters. Thereafter, upon a positive result of either Total Coliform or *E. coli*, a repeat sample is required for both parameters. Violation occurs when a positive result is obtained from an *E. coli* repeat sample that occurs after a total coliform-positive routine sample. Violation also occurs when a positive result is obtained from a Total Coliform repeat sample that occurs after an *E. coli*-positive routine sample. ADEQ found that the Total Coliform parameter is a very general indicator of coliforms in a sampling well, many of which occur naturally and are not indicative of a threat to human health. In particular, Total Coliform is too broad of an indicator parameter to signal fecal coliform health concerns in an APP regulatory program setting. On the contrary, ADEQ has found that Fecal Coliform and *E. coli* are more exacting indicators or surrogates of fecal coliforms, which are dangerous to human health. Additionally, when a permittee samples for Total Coliform and receives a

positive result, more often than not, the result is what is known as a “false positive”, signaling non-health threatening coliforms in a sample. ADEQ notes that false positives have led to a number of permittees having to perform accelerated or more frequent monitoring intervals pursuant to the permits unnecessarily, which have associated costs.

After determining that the MCL for Microbiological Contaminants was inappropriate as an AWQS, ADEQ followed the “standard work” procedure for alternative AWQS development and establishment. ADEQ is proposing with this final rule an appropriate alternative Microbiological Contaminants AWQS based upon the detection or non-detection of either Fecal Coliform or *E. coli* in a 100-milliliter sample (depending on the requirement of the permit). Upon a detection result for a routine Fecal Coliform sample, a repeat sample of either Fecal Coliform or *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Upon a detection result for a routine *E. coli* sample, a repeat sample for *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Through research and consultation, ADEQ determined that *E. coli* is a better indicator of fecal contamination than total or fecal coliforms and that Total Coliform positive samples are known to result in a “false positive”. A “false positive” in a Total Coliform sampling context is when a sample result is positive, but the cause of the positive result indicates a type of total coliform that does not originate in fecal contamination, is not dangerous to human health and occurs naturally. A common “false positive” is when a positive Total Coliform sample is actually indicating rust in a well. Additionally, ADEQ considered the language of 40 C.F.R. 141.63(c), the state of existing Individual APP and Reclaimed Water permits, the Department’s mission to protect human health and the environment, as well as costs to permittees, analytical methodologies and public health risk reduction. Ultimately, ADEQ determined that shifting away from Total Coliform as an indicator parameter for an alternative Microbiological Contaminants AWQS and moving towards Fecal Coliform and *E. coli* is appropriate. Specifically, Fecal Coliform and *E. coli* are more exacting at indicating a threat to human health. The decision to configure the AWQS proposal to allow permittees to utilize Fecal Coliform or *E. coli* was due to the fact that protecting human health is not diminished under any of the possible orientations and existing permittees are sampling for both parameters already in some cases. Allowing permittees to keep those sampling traditions and optimize a sampling orientation from a cost effective perspective are all factors that led to ADEQ’s proposal.

Comment 6: Interest Group

E. coli and Fecal Coliform Standards. *E. coli* and fecal coliform serve as critical indicators of fecal contamination and pathogen presence in groundwater. EPA’s guidelines for these indicators are based on decades of rigorous research and are designed to minimize risks of gastrointestinal illness and waterborne disease outbreaks. We strongly oppose ADEQ’s proposal to adopt alternative standards for *E. coli* and fecal coliform that deviate from EPA guidelines. Such deviations are highly problematic for the following reasons:

1. **Inadequate Public Health Protection:** ADEQ's proposed alternative standards would allow higher concentrations of *E. coli* and fecal coliform in groundwater than EPA's established limits for recreational and potable water. This could significantly increase the risk of pathogen exposure, particularly for communities relying on groundwater for drinking and recreation.
2. **Contradiction of Established Science:** EPA's standards are grounded in decades of epidemiological studies that demonstrate the link between elevated *E. coli* levels and disease outbreaks. Any deviation undermines the credibility and effectiveness of Arizona's water quality protections.
3. **Environmental and Ecological Risks:** Groundwater contamination often affects interconnected surface water systems. Weakening *E. coli* standards could exacerbate contamination in rivers, streams, and reservoirs, threatening aquatic ecosystems and biodiversity. As Arizona's aquifers often discharge into surface waters, contaminants like fecal coliform can migrate from groundwater to surface water, compounding the public health risks and damaging ecosystems. This connectivity between groundwater and surface water underscores the importance of robust water quality standards that address all potential pathways for contamination.
4. **Economic and Social Costs:** Relaxed standards could result in increased public health expenses, decreased trust in water quality management, and greater costs associated with contamination events.

We strongly urge ADEQ to align *E. coli* and fecal coliform standards with EPA's protective guidelines. Ensuring consistency with federal standards will bolster public confidence in Arizona's water quality management and safeguard both human and ecological health.

ADEQ Response 6:

ADEQ appreciates the comment. Generally, please reference the response to Comment No. 5 above. It is important to understand that ADEQ's adoption of an alternative AWQS from the Microbiological Contaminants MCL deviates only slightly from the MCL and remains equally as protective. The MCL requires routine sampling of both Total Coliform and *E. coli* parameters. Thereafter, upon a positive result of either Total Coliform or *E. coli*, a repeat sample is required for both parameters. Violation occurs when a positive result is obtained from an *E. coli* repeat sample that occurs after a total coliform-positive routine sample. Violation also occurs when a positive result is obtained from a Total Coliform repeat sample that occurs after an *E. coli*-positive routine sample. ADEQ found that the Total Coliform parameter is a very general indicator of coliforms in a sampling well, many of which occur naturally and are not indicative of a threat to human health. In particular, Total Coliform is too broad of an indicator parameter to signal Fecal Coliform health concerns in the APP regulatory program setting. On the contrary, ADEQ has found that Fecal Coliform and *E. coli* are more exacting indicators or surrogates of fecal coliforms, which are dangerous to human health. Additionally, when a permittee samples for Total Coliform and receives a positive result, more often than not, the result is what is known as a "false positive", signaling non-health threatening coliforms in a sample. ADEQ notes that false positives have led to a

number of permittees having to perform accelerated or more frequent monitoring intervals pursuant to the permits unnecessarily, which have associated costs.

With this final rule, ADEQ is establishing an appropriate alternative Microbiological Contaminants AWQS based upon the detection or non-detection of either Fecal Coliform or *E. coli* in a 100-milliliter sample (depending on the requirement of the permit). Upon a detection result for a routine Fecal Coliform sample, a repeat sample of either Fecal Coliform or *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Upon a detection result for a routine *E. coli* sample, a repeat sample for *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants.

1. ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective of public health and is oriented more appropriately for the AWQS setting. Again, the MCL utilized indicator parameters Total Coliform and *E. coli* to be routinely sampled; then, upon a positive result, both repeat sampled. Upon a repeat positive, the MCL has been formally violated. Compare with the alternative AWQS, which utilizes indicator parameters Fecal Coliform and *E. coli* to be routinely sampled; then, upon a detect result, a repeat sample of one or the other parameter is required, depending on the permit. Upon a repeat “detect” result, the AWQS has been formally violated. ADEQ notes that the Fecal Coliform parameter is *more* exacting than Total Coliform when it comes to identifying a risk to public health.
2. ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective of public health and is oriented more appropriately for the AWQS setting as is demonstrated in the previous paragraph. Additionally, ADEQ engaged experts composed of epidemiologists and toxicologists, among other professionals to assist in the process of reviewing EPA’s MCL development assumptions. Following statutory mandate and careful consideration of the totality of the appropriate considerations, ADEQ determined that a slight deviation from the MCL was appropriate given the statutory mandate. In making this determination, ADEQ considered the language of the MCL at 40 C.F.R. 141.63(c), the state of existing Individual APP and Reclaimed Water permits, the Department’s mission to protect human health and the environment, as well as costs to permittees, analytical methodologies and public health risk reduction. Ultimately, ADEQ determined that shifting away from Total Coliform as an indicator parameter for an alternative Microbiological Contaminants AWQS and moving towards Fecal Coliform and *E. coli* is appropriate, pursuant to A.R.S. § 49-223. Specifically, indicator parameters Fecal Coliform and *E. coli* are more exacting at indicating a threat to human health. The decision to configure the AWQS proposal to allow permittees to utilize Fecal Coliform or *E. coli* was due to the fact that protecting human health is not diminished under any of the possible orientations and existing permittees are sampling for both parameters already in some cases. Allowing permittees to keep those sampling traditions and optimize a sampling orientation from a cost effective perspective are all factors that led to ADEQ’s proposal.

3. As is stated and explained above, ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective as the corresponding MCL and is oriented more appropriately for the AWQS setting.

4. As is stated and explained above, ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective as the corresponding MCL and is oriented more appropriately for the AWQS setting.

In summary, ADEQ's alternative Microbiological Contaminants AWQS is oriented in a similar and equally protective manner as the corresponding MCL. Also, the alternative Microbiological Contaminants AWQS is oriented more appropriately for the AWQS setting. ADEQ believes the alternative Microbiological Contaminants AWQS is appropriately protective of public health and the environment and conforms to the mandate at A.R.S. § 49-223.

Comment 8: Utility

Overall, we commend and agree with ADEQ's approach, and anticipate efficiencies with the microbiological contaminants AWQS replacing indicator parameter Total Coliform with *E. coli*.

ADEQ Response 8:

ADEQ appreciates the comment.

Comment 9: Utility

A non-detection of *E. coli* should be specified as < 2.2 Most Probable Number (MPN)/100 ml sample. This threshold is specified on all permits.

ADEQ Response 9:

ADEQ appreciates the comment. For *E. coli*, "detect / non-detect" will appear in the applicable APP monitoring tables along with a footnote stating that "non-detect" means a result of < 2.2 MPN or < 1 CFU, depending on the unit used in the permit.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rulemaking does not create a requirement for a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is not applicable to the subject matter of the rule.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the

competitiveness of business in this state to the impact on business in other states:

Not applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the Register as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

Revision: 6/14/2024

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 11 - Microbiological Contaminants

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(F) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Microbiological Contaminants as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting an alternative AWQS to the corresponding MCL. The AWQSS are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSS are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Microbiological Contaminants AWQS rulemaking.

Costs to permittees to meet the new AWQS for Microbiological Contaminants are None to Minimal. In fact, ADEQ expects cost savings in many cases. The proposed AWQS for microbiological contaminants does not propose a numeric change in water quality standards, but instead proposes to implement more efficient/effective monitoring protocols. In this regard, the EIS generally follows a key premise of the Matrix Report: that the primary cost impact of the proposed AWQS would be a *reduction* in permittee sampling costs due to the reduced incidence of false-positive routine testing, repeat tests and accelerated monitoring thereafter. Consistent with the Matrix Report, the EIS estimates the cost *savings* related to more efficient sampling protocols. The EIS follows the format of the cost analysis in the Matrix Report, which evaluates *incremental* changes (reductions) in permittee costs compared to baseline conditions (i.e., costs under the current AWQS compared to costs under the proposed AWQS).

In addition to creating cost savings for permittees, the proposed AWQS would potentially generate economic benefits in terms of a reduction in cases of illness and death associated with microbiological contamination. In particular, the improved sampling protocols are expected to allow for quicker identification of incidents of contamination, allowing for more timely implementation of corrective measures (according to ADEQ staff, the higher incidence of false-positive test results under the existing protocols – and the associated need for retesting – can result in delays in identifying actual cases of contamination, potentially resulting in disease outbreaks that could otherwise be contained sooner). These potentially significant health benefits are not quantified in the EIS, as ADEQ and their consultant do not have sufficient information to develop such estimates. However, following the methodology of the Matrix Report, the EIS provides *general* estimates of the annual economic benefits attributable to regulation of Microbiological Contaminants. These general estimates of economic benefits are provided for contextual purposes (i.e., they quantify the existing benefits of regulating Microbiological Contaminants irrespective of proposed adjustments to the AWQS and therefore are not represented to be *incremental* benefits associated with the proposed AWQS).

Costs. Whereas permittees will continue to incur costs (primarily for routine and repeat sampling) to comply with the new/proposed AWQS, these costs are expected to *decrease* in comparison to the costs of complying with the current AWQS. These potential cost savings are attributable to the expectation that the routine sampling and repeat sampling requirements under the new AWQS would result in fewer “false positive” samples, thereby reducing the need for follow-up sampling and unwarranted corrective actions for facilities falsely deemed to be non-compliant. Statewide, the cost savings to permittees are estimated to range from \$882,000 to \$1.7 million annually (in 2023 dollars).

Benefits. Based on available time series data from ADHS and CDC, the Matrix Report estimates that regulation of Microbiological Contaminants results in 80 fewer cases of illness and 0.3 fewer deaths per year (statewide). In monetary terms, these prevented illnesses and deaths represent annual statewide benefits of \$3.5 million per year (in 2023 dollars).

Specific impacts

From a total 434 Aquifer Protection permittees in Arizona, it is estimated (based on the Matrix Report) that 153 to 300 permittees annually are required to sample for Microbiological Contaminants. This subset of 153 to 300 permittees would be the impacted stakeholder group that would potentially experience cost savings under the proposed AWQS. In Arizona, the potentially affected benefiting population consists primarily of private well users throughout the state (estimated at 350,000 persons in total), although some of these will be effectively excluded from the additional benefits of the higher AWQS because existing Microbiological Contaminant levels in some wells are already zero. Benefits in the form of cost savings could also accrue to community water systems and their clientele due to a reduction of Microbiological Contaminants in the groundwater, under the proposed AWQS. As many as 1.8 million Arizonans could be potentially affected in this way.

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ’s dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: “permittees”) will be the primary bearers of costs associated with this rulemaking. Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultant have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Microbiological Contaminants in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost impacts in this EIS relate primarily to potential cost *savings* to permittees due to the more efficient (and more effective) sampling protocols under the proposed AWQS. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|-----------------------------|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |

| Category | # Permittees |
|---|--------------|
| *Small Businesses as a segmented category | 135 |

Approach to the EIS for Microbiological Contaminants. ADEQ and its consultant rely on estimates prepared by the authors of the "MCL Assumptions Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support", prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 ("Matrix Report") (see Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report's source material (primarily from the EPA), which takes into account multiple factors affecting potential costs and benefits.

Health Risk Reduction (Benefits)

The EIS measures the economic benefits of the AWQS in terms of the monetized value of illnesses and deaths that would be prevented by compliance with the State's AWQS for Microbiological Contaminants. These calculations are based on the following steps:

- Estimate the annual number of cases of enteric disease that would occur in Arizona in the absence of effective AWQS for microbiological contaminants;
- Estimate the annual number of deaths that would result from outbreaks transmitted by water in Arizona in the absence of effective AWQS;
- Calculate the costs associated with treatment of estimated cases of enteric disease; and

- Calculate the monetary value of lives lost due to disease outbreaks transmitted by water (using “Value of Statistical Life” data).

Based on available time series data from ADHS and CDC, the Matrix Report estimates that the AWQS would create the following benefits in terms of prevented illnesses and deaths:

- Prevention of 80 cases of illness per year
- Prevention of 0.3 deaths per year
- Avoided costs of \$2,397.76 per case of illness prevented
- Value of Statistical Life (VSL) of \$11.1 million

Using the above factors, the Matrix Report calculates total benefits from the AWQS of \$3.5 million per year. For purposes of the EIS, health-related benefits are understood to be the same for both the existing AWQS and the proposed AWQS. These general estimates of economic benefits are provided for contextual purposes (i.e., they quantify the existing benefits of regulating Microbiological Contaminants irrespective of proposed adjustments to the AWQS and therefore are not represented to be *incremental* benefits associated with the proposed AWQS).

The proposed AWQS would potentially generate economic benefits in terms of a reduction in cases of illness and death associated with microbiological contamination. In particular, the improved sampling protocols are expected to allow for quicker identification of incidents of contamination, allowing for more timely implementation of corrective measures (according to ADEQ staff, the higher incidence of false-positive test results under the existing protocols – and the associated need for retesting – can result in delays in identifying actual cases of contamination, potentially resulting in disease outbreaks that could otherwise be contained sooner). These potentially significant health benefits are not quantified in the EIS, as the consulting team does not have sufficient information to develop such estimates.

Cost Analysis

Consistent with the Matrix Report, the cost analysis provided in this EIS is based on the premise that the proposed AWQS would result in cost *reductions* (to permittees and the State) compared to the existing AWQS. The cost savings would result from revised sampling protocols intended to significantly reduce the occurrence of false-positive test results (while more quickly identifying contaminants that are of actual concern from a public health perspective). Within the framework provided in the Matrix Report, these cost savings are calculated in terms of the avoided costs of follow-up sampling compared to estimated costs under the existing AWQS protocols. As such, the calculated “costs” are negative (compared to baseline levels) and therefore can actually be interpreted as benefits rather than costs.

The Matrix report evaluates two alternatives for a new AWQS:

1. ADEQ would adopt the EPA’s MCL as the AWQS; or
2. ADEQ would develop and establish an appropriate alternative AWQS (for which Matrix assumed that the routine and repeat samples would both be Fecal Coliform).

The EIS considers a proposed AWQS that would require testing *E. coli* for the routine sample, with all required repeat samples testing for *E. coli*. Where appropriate, the Matrix Report factors have been applied to the AWQS proposal considered in the EIS. Cost factors/assumptions derived from the Matrix report are summarized below.

Costs of Sample Analysis. The Matrix Report estimated ranges of costs for the sample analysis by contacting four ADHS certified laboratories. If the contacted laboratories offered more than one analysis method, the least expensive method was used. The following are the range of costs used for the Matrix analysis (and also in the EIS):

- Total coliform: \$25 - \$50
- *E. coli*: \$25 - \$50

Costs for labor, reporting, and administrative work were assumed in the Matrix Report based on the author's knowledge and previous experience with APPs. These assumptions are outlined on the tables below.

Work Costs per False-Positive Sample

| Work Category | Hours | Rate | Cost |
|----------------|-----------|-----------|----------------|
| Labor | 8 | \$95 | \$760 |
| Data analysis | 4 | \$125 | \$500 |
| Reporting | 20 | \$100 | \$2,000 |
| Administrative | 4 | \$100 | \$400 |
| TOTAL: | 36 | -- | \$3,660 |

Breakdown of Work Costs based Coliform Type per False-Positive Sample

| Category | Total Coliform | <i>E. Coli</i> |
|----------|----------------|----------------|
| | | |

| | | |
|--|--------------------------|--------------------------|
| Sampling Cost (labor, analysis, consumables) | \$795 - \$820 | \$795 - \$820 |
| Reporting Costs | \$2,500 | \$2,500 |
| Administrative Costs | \$400 | \$400 |
| TOTAL: | \$3,695 - \$3,720 | \$3,695 - \$3,720 |

Note: Consumables include ice, gloves, etc. for collecting samples. Assumed to be approximately \$10 per sample.

In the EIS, the factors summarized above have been applied to the proposed AWQS. The costs of sampling under the current AWQS and the proposed AWQS are calculated on the table on the next page.

Total and Incremental Sampling Costs Per Year Statewide (in 2023 dollars)

| Factor | Current AWQS (Baseline) | | Proposed AWQS | |
|---|-------------------------|--------------------|--------------------|----------------------|
| | Low | High | Low | High |
| Total APP's | 434 | 434 | 434 | 434 |
| Facilities required to sample for coliforms | 153 | 300 | 153 | 300 |
| Sampling frequency (times per year) | 4 | 4 | 4 | 4 |
| Routine coliform samples per year | 612 | 1,200 | 612 | 1,200 |
| Coliform type sampled (routine) | Total | Total | <i>E. Coli</i> | <i>E. Coli</i> |
| False-positive percentage | 43% | 43% | 4% | 4% |
| Repeat samples triggered by false positives | 263 | 516 | 24 | 48 |
| Coliform type sampled (repeat) | Total | Total | <i>E. Coli</i> | <i>E. Coli</i> |
| Total cost per sample (by type): | | | | |
| Total coliform | \$3,695 | \$3,720 | \$3,695 | \$3,720 |
| <i>E. Coli</i> | \$3,695 | \$3,720 | \$3,695 | \$3,720 |
| Aggregate (statewide) sampling costs/year: | | | | |
| Routine samples | \$2,261,340 | \$4,464,000 | \$2,261,340 | \$4,464,000 |
| Repeat samples | \$972,375 | \$1,919,520 | \$90,454 | \$178,560 |
| <i>Total</i> | <i>\$3,233,716</i> | <i>\$6,383,520</i> | <i>\$2,351,794</i> | <i>\$4,642,560</i> |
| Cost Increase (Reduction) Compared to Baseline | <i>N/A</i> | <i>N/A</i> | (\$881,923) | (\$1,740,960) |

Source: ADEQ and consultant.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--------------------------------|--|----------------------------------|-------------------------------------|
| Costs to Stakeholders | | | |
| Cost stakeholders | General: The EIS follows the format of the cost analysis in the Matrix Report, which essentially looks at <i>incremental</i> changes in permittee costs compared to baseline conditions (i.e., costs under the current AWQS compared to costs under the proposed AWQS). An underlying premise of the Matrix Report analysis (and therefore the EIS) is that more efficient sampling requirements under the proposed AWQS would result in a significantly lower occurrence of false-positive test | | Significant |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|---|----------------------------------|---|
| | results and would therefore <i>reduce</i> compliance costs without compromising (while potentially improving) water quality standards | | |
| Permittees, generally | In general, microbiological contaminants are more likely to be generated within Wastewater Treatment Facilities, and also in treated wastewater. Microbiological Contaminants also can enter groundwater under certain conditions | | Moderate: AWQS would potentially reduce costs for routine and repeat sampling (by \$882,000 to \$1.7 million per year statewide) |
| Mines | Microbiological Contaminants are least likely to be found in mine-related water being treated, compared to other permittee types | | |
| Industrial activities | Microbiological Contaminants would not be particularly likely to be occurring in industrial-related water being treated, compared to other permittee types | | |
| Wastewater Treatment Plants | This category of permittee type is most likely to be dealing with Microbiological Contaminants, because of the urban-use connection | | |
| Rate payers in municipal systems | Private citizens and businesses could potentially benefit from reduced user fees for wastewater processing, based on reduced costs to permittees under the revised AWQS. However, these benefits are likely to be minimal (given the relatively small cost savings on a per-system basis) | | Proposed AWQS is expected to reduce compliance costs to permittees, which could potentially be passed on to rate payers in the form of lower rates; in practice, rate reductions are likely to be minimal Minimal. Aggregate revenues would potentially decrease in proportion to the cost savings from reduced sampling requirements. Given state-wide cost savings of \$882,000 to \$1.7 million per year, cost savings on a per-system basis are likely to be minimal |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | | Moderate. Overall, the AWQS would potentially create moderate cost savings to permittees compared to the existing AWQS |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Microbiological Contaminant indicator parameters. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Minimal | |
| Benefits to Stakeholders | | | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|--|--|
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduced loss of life and illness and costs associated with treatment for disease. | | Moderate: Potential health benefits attributable to existing AWQS are estimated at \$3.5 million per year; this benefit would not change by virtue of the proposed new AWQS Significant: Potential reduction in the impacts of disease outbreaks (by virtue of more rapid identification and mitigation of contamination) |
| Community water systems (CWSs) and their clientele | Savings could potentially accrue to CWSs due to reduced microbiological contaminants in the ground water. Any savings would presumably be passed on to customers. | | Significant |
| State costs | Some state-supported medical costs would decrease (this benefit already exists under existing AWQS and would continue under new AWQS) | | Significant |
| State revenue effects | Reduced sampling requirements of permittees would potentially result in some loss of business (and associated reductions in employment) for firms engaged in sample analysis. The potential loss of direct jobs would in turn (in theory at least) generate additional employment losses through reductions in indirect and induced (secondary) economic activity, and subsequent tax revenues | Minimal. Lost State income taxes are estimated to be \$6,700 per year due to direct and secondary losses of employment | |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

Compared to the current AWQS, the indicated changes to the AWQS are intended to maintain the same (or better) levels of protection with respect to human health, while potentially resulting in significant cost savings to impacted permittees (due to the expectation that the modified sampling requirements would substantially reduce the incidence of “false positive” results). As such, many of the stakeholder categories that would typically be impacted by the costs of new regulation would actually benefit from *reduced* cost burdens under the proposed new AWQS.

Estimated cost savings to permittees are based on factors in the Matrix report, applied to the proposed AWQS (as defined by ADEQ staff). Consistent with the Matrix report, the EIS focuses strictly on potential cost savings related to the issue of reducing false-positive test results (due to more efficient requirements for contaminant sampling under the new AWQS); the analysis does not quantify other potential costs savings such as reduced costs for assessments and correction actions (reductions in false-positive test results would presumably reduce the incidence of unwarranted assessments).

Mines

Because mines are not necessarily associated, locationally or otherwise, with water treated for household consumption, Microbiological Contaminants are likely to be minimal compared with discharge systems that have an urban connection.

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive.

Industrial Facilities

This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity. For some industrial processes, water use will involve treatments similar to those for households, therefore microbiological contamination would potentially be an issue; but other industrial processes will have minimal or no connection to microbiological contamination. The estimated number of industrial wastewater processing permittees is 56.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources, and so will typically have significant potential for microbiological contamination. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could potentially benefit from reduced user fees for wastewater processing, based on reduced costs to permittees under the revised AWQS. However, these benefits are likely to be minimal (given the relatively small cost savings on a per-system basis).

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains. There are two segments to the benefiting stakeholders:

1. Some Community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced sampling requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQS.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group benefits from diseases forgone due to water quality standards related to Microbiological Contaminants.

The first segment is addressed below under the section *Community water systems (CWSs) and their clientele*.

Segment 2. As more fully documented in the Matrix Report, one major purpose of fecal pollution detection is to identify the presence of pathogens related to fecal waste sources and potential health risks (from the many bacterial, protozoan, and viral enteric pathogens that can cause diseases). Water quality monitoring to detect fecal pollution usually applies microbial fecal indicators to represent numerous potential pathogens.

Based on available time series data from ADHS and CDC, the Matrix report estimates that the AWQS would create the following benefits in terms of prevented illnesses and deaths:

- Prevention of 80 cases of illness per year
- Prevention of 0.3 deaths per year

Community water systems (CWSs) and their clientele

This affected group (segment 1 as noted above) includes a portion of customers of municipal or water utility water systems. Estimates of this segment of the population, served by water sources that included groundwater, were derived

from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater, along with populations served by various categories of providers. An estimated 2.04 million Arizonans would be affected in this way (by both existing and proposed AWQS).

State cost savings

The proposed AWQS would potentially create incremental health benefits compared to existing policy by allowing for more rapid identification of contamination (and therefore more proactive containment of potential disease outbreaks). Related to these potential health benefits, the proposed AWQS would potentially result in some reduction in state-supported medical costs.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees would be subject to more efficient sampling requirements under the proposed AWQS, the need for employment related to sampling and sample analysis would potentially decrease somewhat. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems). In the summary of the model as tabulated below for the contaminant of Microbiological Contaminants, direct employment and earnings resulting from permittees’ investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|-------------|
| Annualized Costs (with financing etc.)/Increased "Output" | (\$881,923) |
| <i>Jobs Per Million Dollars in Output</i> | 1.80 |
| <i>Earnings Per Dollar of Output</i> | \$0.17 |
| New Wastewater Treatment Direct Jobs Created | (1.59) |
| New Annual Earnings for Direct Jobs Created | (\$148,229) |
| Total New Jobs (Direct + Secondary) | (4.87) |
| <i>Effective Income Tax Rate</i> | 2.1% |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | (\$6,732) |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings

generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee’s particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility’s employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|---|
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (<i>see</i> A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced Microbiological Contaminants in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect.

Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary employment generated by investments in Microbiological Contaminants technology (using the low end of costs where ranges are given) are approximately \$6,700.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Microbiological Contaminants Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing specific contaminants referenced extensively by the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

AWP NFRM Public Comments - 18 AAC 11 - Microbiological Contaminants

Comment 1: Utility

Concerning the proposed alternative AWQS for Microbiological Contaminants, our current APP monitoring table utilizes the unit Most Probable Number (MPN) with a limit of (< 2.2) for *E. coli* monitoring. Will the units stay the same with this change in standard? Will Presence / Absence (P/A) be installed instead?

ADEQ Response 1:

ADEQ appreciates the comment. No, P/A will not be used for the *E. coli* indicator parameter utilized in the proposed AWQS for microbiological contaminants. Rather, detection or non-detection of either Fecal Coliform or *E. coli* is used. This means, for *E. coli*, "detect / non-detect" is likely to appear in the applicable APP monitoring tables along with a footnote stating that "non-detect" means a result of < 2.2 MPN or < 1 CFU, depending on the unit used in the permit.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. "Substantial Opposition" is a term defined in A.R.S. § 49-223(A) as, "... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS]." Upon receipt of "substantial opposition", the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is "appropriate" as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ has received substantial opposition from stakeholders on the proposal to adopt the Microbiological Contaminants MCL as an AWQS (see heading No. 7, subsection "Substantial Opposition" for more information).

Comment 3: Concerned Citizen

If there are any lab people on the call, can they answer if there are sampling methods associated with the proposed Microbiological Contaminants AWQS that will provide a presence/absence (P/A) result for fecal coliforms? I know P/A exists for Total Coliforms and *E. coli*. I found this statement in a Google search, "[t]he P/A tests for the presence/absence of indicator organisms in a water sample. This is usually observed in the form of a color change after an incubation period. Two common P/A tests are: H2S-producing bacteria P/A test Total Coliform and *E. coli* P/A Test." I am not sure P/A exists for fecal coliform.

ADEQ Response 3:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed Microbiological Contaminants AWQS, ADEQ has revised the rule language, essentially swapping the "absence / presence" binary with "detection / non-detection". Under the new language, any *E. coli* detection result from routine sampling would need to be followed by a repeat *E. coli* sample within 5 days of becoming aware of the result. A repeat sample that results in a detection of *E. coli* would constitute a violation of the Microbiological Contaminants AWQS. Additionally, ADEQ conducted some research which shows that Eurofins Scientific laboratory testing services offers a Fecal Coliform testing method (SM 9222D) separately from the EPA Total Coliform method (EPA 1604). Both methods have an 8-hour holding time. Source:

https://www.eurofinsus.com/media/447768/appendix-d-section-5-attachment-holdtime-container-list_2016-july.pdf

Also, Standard Method 9222D is a membrane filtration test for fecal coliforms and is offered by local labs in Arizona. This method can detect fecal coliforms from 20 - 60 CFU/100 mL. Source:

https://www.nemi.gov/methods/method_summary/5587/. Also, please find a table in Heading No. 7, subheading "Sampling and Analytical Methodologies" explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 4: Utility

We support the proposed alternate AWQS for microbiological contaminants with the following minor edits to the language:

1. If a routine sample of ~~Fecal Coliform~~ is positive for Fecal Coliform, a 100-milliter repeat sample of ~~either Fecal Coliform or *E. coli*~~ shall be taken within five days of becoming aware of the exceedance for analysis of Fecal Coliform or *E. coli*.
2. If a routine sample of ~~*E. coli*~~ is positive for *E. coli*, a 100-milliter repeat sample of ~~*E. coli*~~ shall be taken within five days of becoming aware of the exceedance for analysis of *E. coli*...

ADEQ Response 4:

ADEQ appreciates the comment. Due to this comment and others submitted on the proposed Microbiological Contaminants AWQS, ADEQ has revised the rule language, essentially swapping the "absence / presence" binary with "detection / non-detection". Under the new language, any Fecal Coliform detection result from routine sampling would need to be followed by a repeat Fecal Coliform or *E. coli* sample within 5 days of becoming aware of the detection result. A repeat sample that results in a detection of either parameter would constitute a violation of the Microbiological Contaminants AWQS. The Fecal Coliform indicator parameter is understood by ADEQ to encompass many species of fecal-derived, potentially harmful species therein; whereas, the *E. coli* parameter is a single, potentially harmful species. *E. coli* is used in this setting as an indicator; meaning that if it is detected in a sample, other potentially harmful species are likely to be present as well. Because the Fecal Coliform parameter encompasses within its scope *E. coli* and a number

of other fecal-derived species, ADEQ believes an *E. coli* repeat sample is appropriate if either Fecal Coliform or *E. coli* were sampled routinely. Please note that for the *E. coli* indicator parameter, “detect / non-detect” is likely to appear in the applicable APP monitoring tables along with a footnote stating that “non-detect” means a result of <2.2 MPN or <1 CFU, depending on the unit used in the permit. Additionally, ADEQ conducted some research which shows that Eurofins Scientific laboratory testing services offers a Fecal Coliform testing method (SM 9222D) separately from the EPA Total Coliform method (EPA 1604). Both methods have an 8-hour holding time. Source:

https://www.eurofinsus.com/media/447768/appendix-d-section-5-attachment-holdtime-container-list_2016-july.pdf.

Also, Standard Method 9222D is a membrane filtration test for fecal coliforms and is offered by local labs in Arizona.

This method can detect fecal coliforms from 20 - 60 CFU/100 mL. Source:

https://www.nemi.gov/methods/method_summary/5587/. Also, please find a table in Heading No. 7, subheading

“Sampling and Analytical Methodologies” explaining the preliminarily appropriate analytical methods for each new or adjusted AWQS.

Comment 5: Interest Group

We are deeply concerned about the proposed deviations from U.S. Environmental Protection Agency (EPA) standards for uranium, *E. coli*, and other pollutants. Arizona’s aquifers are invaluable resources that sustain drinking water supplies, ecological systems, and cultural heritage. Protecting these resources with robust, science-based standards is essential to ensure public health and environmental sustainability. We urge ADEQ to adopt the most protective standards possible by aligning AWQS with EPA’s maximum contaminant levels (MCLs) and guidelines for all pollutants under consideration, including arsenic, uranium, and *E. coli*. Prolonged delays in adopting federal standards leave Arizona communities vulnerable to contamination and illness.

ADEQ Response 5:

ADEQ appreciates the comment. There are seven (7) MCLs proposed for adoption as AWQSs within the scope of the collective “AWQS Update” rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQSs verbatim. This includes uranium cited by the commenter.

For the alternative Microbiological Contaminants AWQS, ADEQ believes the proposed AWQS is equally effective as the corresponding MCL, but deviates from the MCL’s employment of “Total Coliform” as an indicator parameter, utilizing the more precise “Fecal Coliform” and “*E. coli*” indicator parameters instead. Pursuant to A.R.S. § 49-223, ADEQ received “substantial opposition” to adoption of the Microbiological Contaminants MCL, mostly concerning the high numbers of “false positive” samples of Total Coliform that would have tested negative had Fecal Coliform or *E. coli* been the indicator parameter used in the standard instead. Details of the hardships encountered by the regulated community include hundreds of hours of labor in verification or repeat sampling. This, along with shipping and laboratory testing costs, amount to tens of thousands of dollars in unnecessary spending.

Given the substantial opposition received on the Microbiological Contaminants MCL, ADEQ was prompted to follow the procedure in A.R.S. § 49-223(A) for determining whether the Microbiological Contaminants MCL is appropriate as an Arizona state AWQS. ADEQ used its newly developed “standard work” as explained in Heading No. 7 above. ADEQ developed this “standard work” procedure for conducting an “appropriateness” determination pursuant to A.R.S. § 49-223(A). The “standard work” can be reviewed on ADEQ’s website at

<https://www.azdeq.gov/rulemaking/awqs-update/resources>. Concerning the Microbiological Contaminants MCL,

ADEQ’s review of EPA’s assumptions on technology, costs, sampling and analytical methodologies and public health risk reduction resulted in significant concern for the costs, analytical methods and public health risk reduction assumptions in particular. ADEQ found that the MCL at 40 C.F.R. 141.63(c) is simply inappropriate as-is for verbatim adoption as an AWQS and applicability upon the facilities regulated by Arizona’s APP program, such as Wastewater Treatment Plants, Mines and Industrial facilities. One of the main reasons is that the MCL is designed for Public Water Systems, not APP type facilities. Specifically, this is because the Microbiological Contaminants MCL requires routine sampling of both Total Coliform and *E. coli* parameters. Thereafter, upon a positive result of either Total Coliform or *E. coli*, a repeat sample is required for both parameters. Violation occurs when a positive result is obtained from an *E. coli* repeat sample that occurs after a total coliform-positive routine sample. Violation also occurs when a positive result is obtained from a Total Coliform repeat sample that occurs after an *E. coli*-positive routine sample. ADEQ found that the Total Coliform parameter is a very general indicator of coliforms in a sampling well, many of which occur naturally and are not indicative of a threat to human health. In particular, Total Coliform is too broad of an indicator parameter to signal fecal coliform health concerns in an APP regulatory program setting. On the contrary, ADEQ has found that Fecal Coliform and *E. coli* are more exacting indicators or surrogates of fecal coliforms, which are dangerous to human health.

Additionally, when a permittee samples for Total Coliform and receives a positive result, more often than not, the result is what is known as a “false positive”, signaling non-health threatening coliforms in a sample. ADEQ notes that false positives have led to a number of permittees having to perform accelerated or more frequent monitoring intervals pursuant to the permits unnecessarily, which have associated costs.

After determining that the MCL for Microbiological Contaminants was inappropriate as an AWQS, ADEQ followed the “standard work” procedure for alternative AWQS development and establishment. ADEQ is proposing with this final rule an appropriate alternative Microbiological Contaminants AWQS based upon the detection or non-detection of either Fecal Coliform or *E. coli* in a 100-milliliter sample (depending on the requirement of the permit). Upon a detection result for a routine Fecal Coliform sample, a repeat sample of either Fecal Coliform or *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Upon a detection result for a routine *E.*

coli sample, a repeat sample for *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Through research and consultation, ADEQ determined that *E. coli* is a better indicator of fecal contamination than total or fecal coliforms and that Total Coliform positive samples are known to result in a “false positive”. A “false positive” in a Total Coliform sampling context is when a sample result is positive, but the cause of the positive result indicates a type of total coliform that does not originate in fecal contamination, is not dangerous to human health and occurs naturally. A common “false positive” is when a positive Total Coliform sample is actually indicating rust in a well. Additionally, ADEQ considered the language of 40 C.F.R. 141.63(c), the state of existing Individual APP and Reclaimed Water permits, the Department’s mission to protect human health and the environment, as well as costs to permittees, analytical methodologies and public health risk reduction. Ultimately, ADEQ determined that shifting away from Total Coliform as an indicator parameter for an alternative Microbiological Contaminants AWQS and moving towards Fecal Coliform and *E. coli* is appropriate. Specifically, Fecal Coliform and *E. coli* are more exacting at indicating a threat to human health. The decision to configure the AWQS proposal to allow permittees to utilize Fecal Coliform or *E. coli* was due to the fact that protecting human health is not diminished under any of the possible orientations and existing permittees are sampling for both parameters already in some cases. Allowing permittees to keep those sampling traditions and optimize a sampling orientation from a cost effective perspective are all factors that led to ADEQ’s proposal.

Comment 6: Interest Group

E. coli and Fecal Coliform Standards. *E. coli* and fecal coliform serve as critical indicators of fecal contamination and pathogen presence in groundwater. EPA’s guidelines for these indicators are based on decades of rigorous research and are designed to minimize risks of gastrointestinal illness and waterborne disease outbreaks. We strongly oppose ADEQ’s proposal to adopt alternative standards for *E. coli* and fecal coliform that deviate from EPA guidelines. Such deviations are highly problematic for the following reasons:

1. Inadequate Public Health Protection: ADEQ’s proposed alternative standards would allow higher concentrations of *E. coli* and fecal coliform in groundwater than EPA’s established limits for recreational and potable water. This could significantly increase the risk of pathogen exposure, particularly for communities relying on groundwater for drinking and recreation.
2. Contradiction of Established Science: EPA’s standards are grounded in decades of epidemiological studies that demonstrate the link between elevated *E. coli* levels and disease outbreaks. Any deviation undermines the credibility and effectiveness of Arizona’s water quality protections.
3. Environmental and Ecological Risks: Groundwater contamination often affects interconnected surface water systems. Weakening *E. coli* standards could exacerbate contamination in rivers, streams, and reservoirs, threatening aquatic ecosystems and biodiversity. As Arizona’s aquifers often discharge into surface waters, contaminants like fecal coliform can migrate from groundwater to surface water, compounding the public health risks and damaging ecosystems. This connectivity between groundwater and surface water underscores the importance of robust water quality standards that address all potential pathways for contamination.
4. Economic and Social Costs: Relaxed standards could result in increased public health expenses, decreased trust in water quality management, and greater costs associated with contamination events.

We strongly urge ADEQ to align *E. coli* and fecal coliform standards with EPA’s protective guidelines. Ensuring consistency with federal standards will bolster public confidence in Arizona’s water quality management and safeguard both human and ecological health.

ADEQ Response 6:

ADEQ appreciates the comment. Generally, please reference the response to Comment No. 5 above. It is important to understand that ADEQ’s adoption of an alternative AWQS from the Microbiological Contaminants MCL deviates only slightly from the MCL and remains equally as protective. The MCL requires routine sampling of both Total Coliform and *E. coli* parameters. Thereafter, upon a positive result of either Total Coliform or *E. coli*, a repeat sample is required for both parameters. Violation occurs when a positive result is obtained from an *E. coli* repeat sample that occurs after a total coliform-positive routine sample. Violation also occurs when a positive result is obtained from a Total Coliform repeat sample that occurs after an *E. coli*-positive routine sample. ADEQ found that the Total Coliform parameter is a very general indicator of coliforms in a sampling well, many of which occur naturally and are not indicative of a threat to human health. In particular, Total Coliform is too broad of an indicator parameter to signal Fecal Coliform health concerns in the APP regulatory program setting. On the contrary, ADEQ has found that Fecal Coliform and *E. coli* are more exacting indicators or surrogates of fecal coliforms, which are dangerous to human health. Additionally, when a permittee samples for Total Coliform and receives a positive result, more often than not, the result is what is known as a “false positive”, signaling non-health threatening coliforms in a sample. ADEQ notes that false positives have led to a number of permittees having to perform accelerated or more frequent monitoring intervals pursuant to the permits unnecessarily, which have associated costs.

With this final rule, ADEQ is establishing an appropriate alternative Microbiological Contaminants AWQS based upon the detection or non-detection of either Fecal Coliform or *E. coli* in a 100-milliliter sample (depending on the requirement of the permit). Upon a detection result for a routine Fecal Coliform sample, a repeat sample of either Fecal Coliform or *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants. Upon a detection result for a routine *E. coli* sample, a repeat sample for *E. coli* with a “detect” result constitutes a violation of the aquifer water quality standard for microbiological contaminants.

1. ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective of public health and is oriented more appropriately for the AWQS setting. Again, the MCL utilized indicator parameters Total Coliform and *E. coli* to be routinely sampled; then, upon a positive result, both repeat sampled. Upon a repeat positive, the MCL has been formally violated. Compare with the alternative AWQS, which utilizes indicator parameters Fecal Coliform and *E. coli* to be routinely sampled; then, upon a detect result, a repeat sample of one or the other parameter is required, depending on the permit. Upon a repeat “detect” result, the AWQS has been formally violated. ADEQ notes that the Fecal Coliform parameter is *more* exacting than Total Coliform when it comes to identifying a risk to public health.
2. ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective of public health and is oriented more appropriately for the AWQS setting as is demonstrated in the previous paragraph. Additionally, ADEQ engaged experts composed of epidemiologists and toxicologists, among other professionals to assist in the process of reviewing EPA’s MCL development assumptions. Following statutory mandate and careful consideration of the totality of the appropriate considerations, ADEQ determined that a slight deviation from the MCL was appropriate given the statutory mandate. In making this determination, ADEQ considered the language of the MCL at 40 C.F.R. 141.63(c), the state of existing Individual APP and Reclaimed Water permits, the Department’s mission to protect human health and the environment, as well as costs to permittees, analytical methodologies and public health risk reduction. Ultimately, ADEQ determined that shifting away from Total Coliform as an indicator parameter for an alternative Microbiological Contaminants AWQS and moving towards Fecal Coliform and *E. coli* is appropriate, pursuant to A.R.S. § 49-223. Specifically, indicator parameters Fecal Coliform and *E. coli* are more exacting at indicating a threat to human health. The decision to configure the AWQS proposal to allow permittees to utilize Fecal Coliform or *E. coli* was due to the fact that protecting human health is not diminished under any of the possible orientations and existing permittees are sampling for both parameters already in some cases. Allowing permittees to keep those sampling traditions and optimize a sampling orientation from a cost effective perspective are all factors that led to ADEQ’s proposal.
3. As is stated and explained above, ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective as the corresponding MCL and is oriented more appropriately for the AWQS setting.
4. As is stated and explained above, ADEQ has determined the alternative Microbiological Contaminants AWQS is equally protective as the corresponding MCL and is oriented more appropriately for the AWQS setting.

In summary, ADEQ’s alternative Microbiological Contaminants AWQS is oriented in a similar and equally protective manner as the corresponding MCL. Also, the alternative Microbiological Contaminants AWQS is oriented more appropriately for the AWQS setting. ADEQ believes the alternative Microbiological Contaminants AWQS is appropriately protective of public health and the environment and conforms to the mandate at A.R.S. § 49-223.

Comment 8: Utility

Overall, we commend and agree with ADEQ’s approach, and anticipate efficiencies with the microbiological contaminants AWQS replacing indicator parameter Total Coliform with *E. coli*.

ADEQ Response 8:

ADEQ appreciates the comment.

Comment 9: Utility

A non-detection of *E. coli* should be specified as < 2.2 Most Probable Number (MPN)/100 ml sample. This threshold is specified on all permits.

ADEQ Response 9:

ADEQ appreciates the comment. For *E. coli*, “detect / non-detect” will appear in the applicable APP monitoring tables along with a footnote stating that “non-detect” means a result of < 2.2 MPN or < 1 CFU, depending on the unit used in the permit.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

The table of contents on page one contains links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of July 1, 2023 through September 30, 2023

| | | | | | |
|-----------------------------|---|--------------------|-----------------------------|--|--------------------|
| R18-11-403. | Analytical Methods | 83 | R18-11-502. | Aquifer Boundaries | 86 |
| R18-11-407. | Aquifer Water Quality Standards in Reclassified | | R18-11-504. | Agency Action on Petition | 87 |
| | Aquifers | 85 | R18-11-506. | Rescission of Reclassification | 87 |

Questions about these rules? Contact:

Department: Arizona Department of Environmental Quality
Address: 1110 W. Washington St.
Phoenix, AZ 85007
Website: www.azdeq.gov
Name: Jon Rezabek
Telephone: (602) 771-8219
Email: rezabek.jon@azdeq.gov

The release of this Chapter in Supp. 23-3 replaces Supp. 22-4, 1-99 pages.

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Authority: A.R.S. §§49-202(A), 49-203(A)(1)

Supp. 23-3

CHAPTER TABLE OF CONTENTS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

Tables in Article 1, Appendix A have been updated and now include historical notes (Supp. 16-4).

Article 1, consisting of Appendices A through C, repealed April 24, 1996 (Supp. 96-2).

Article 1, consisting of Section R18-11-103, reserved effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-105 and R18-11-106, and Appendices A and B, adopted April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 and R18-11-102, R18-11-104, R18-11-107 through R18-11-109, R18-11-111 through R18-11-113, R18-11-115, R18-11-117 and R18-11-118, R18-11-120 and R18-11-121, amended effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 through R18-11-121 and Appendices A through C, adopted effective February 18, 1992 (Supp. 92-1).

Article 1, consisting of Section R18-11-101, repealed effective February 18, 1992 (Supp. 92-1).

Article 1 consisting of Section R9-21-101 renumbered as Article 1, Section R18-11-101 (Supp. 87-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS**R18-11-101. Definitions**

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation (AgI)" means the use of a surface water for crop irrigation.
3. "Agricultural livestock watering (AgL)" means the use of a surface water as a water supply for consumption by livestock.
4. "Annual mean" is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. "Aquatic and wildlife (cold water) (A&Wc)" means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. "Aquatic and wildlife (effluent-dependent water) (A&Wedw)" means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. "Aquatic and wildlife (ephemeral) (A&We)" means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. "Aquatic and wildlife (warm water) (A&Ww)" means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. "Arizona Pollutant Discharge Elimination System (AZPDES)" means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. "Clean Water Act" means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. "Criteria" means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.
17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water or portion of a surface water, that consists of a point source discharge without which the surface water would be ephemeral. An effluent-dependent water may be perennial or intermittent depending on the volume and frequency of the point source discharge of treated wastewater.
20. "Ephemeral water" means a surface water or portion of surface water that flows or pools only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_Y = \sqrt[n]{(Y_1)(Y_2)(Y_3)\dots(Y_n)}$$
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO3) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

27. "Intermittent water" means a surface water or portion of surface water that flows continuously during certain times of the year and more than in direct response to precipitation, such as when it receives water from a spring, elevated groundwater table or another surface source, such as melting snowpack.
28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water or portion of surface water that flows continuously throughout the year.
33. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S. § 49-201(29)
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macroinvertebrates and algae are collected from these reference condition streams for calculating the Arizona Indexes of Biological Integrity thresholds.
37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
 - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
 - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means "WOTUS" as defined in A.R.S. § 49-201(53).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH₃), ammonium ion (NH₄⁺), nitrite (NO₂), and nitrate (NO₃), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
48. "Urban lake" means a manmade lake within an urban landscape.
49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.
51. "Wadable" means a surface water can be safely crossed on foot and sampled without a boat.
52. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Amended effective January 7, 1985 (Supp. 85-1). Amended by adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) "Navigable Water", previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-102. Applicability

- A.** The water quality standards prescribed in this Article apply to surface waters.
- B.** The water quality standards prescribed in this Article do not apply to the following:
1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is a part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores that is not a surface water or is located in an area that once was a surface water but is no longer a surface water because it has been and remains legally converted, including:
 - a. A pit,
 - b. Pregnant leach solution pond,
 - c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond or a sump in a mine pit associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product and that is being held for recycling,
 - h. Spill or upset catchment pond, or
 - i. A pond used for onsite remediation;
 3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-103. Repealed**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1). Repealed effective April 24, 1996 (Supp. 96-2).

R18-11-104. Designated Uses

- A.** The Director shall adopt or remove a designated use or subcategory of a designated use by rule.
- B.** Designated uses of a surface water may include full-body contact, partial-body contact, domestic water source, fish consumption, aquatic and wildlife (cold water), aquatic and wildlife (warm water), aquatic and wildlife (ephemeral), aquatic and wildlife (effluent-dependent water), agricultural irrigation, and agricultural livestock watering. The designated uses for specific surface waters are listed in Appendix B of this Article.
- C.** Numeric water quality criteria to maintain and protect water quality for the designated uses are prescribed in Appendix A, R18-11-109, R18-11-110, and R18-11-112. Narrative water quality standards to protect all surface waters are prescribed in R18-11-108.
- D.** If a surface water has more than one designated use listed in Appendix B, the most stringent water quality criterion applies.
- E.** The Director shall revise the designated uses of a surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in Appendix B.
- F.** In designating uses of a surface water and in establishing water quality criteria to protect the designated uses, the Director shall take into consideration the applicable water quality standards for downstream surface waters and shall ensure that the water quality standards that are established for an upstream surface water also provide for the attainment and maintenance of the water quality standards of downstream surface waters.
- G.** A use attainability analysis shall be conducted prior to removal of a designated use or adoption of a subcategory of a designated use that requires less stringent water quality criteria.
- H.** The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria, provided the designated use is not an existing use and it is demonstrated through a use attainability analysis that attaining the designated use is not feasible for any of the following reasons:
1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A natural, ephemeral, intermittent, or low-flow condition or water level prevents the attainment of the use;
 3. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
 4. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
 5. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use; or
 6. Controls more stringent than those required by § 301 (b) and § 306 of the Clean Water Act [33 U.S.C. § 1311 and § 1316] are necessary to attain the use and implementation

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

of the controls would result in substantial and widespread economic and social impact.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-105. Tributaries; Designated Uses

The following water quality standards apply to a surface water that is not listed in Appendix B but that is a tributary to a listed surface water.

1. The aquatic and wildlife (ephemeral) and partial-body contact standards apply to an unlisted tributary that is an ephemeral water.
2. The aquatic and wildlife (cold water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is above 5000 feet in elevation.
3. The aquatic and wildlife (warm water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is below 5000 feet in elevation.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Section heading amended per instructions of the Department of Environmental Quality, August 9, 1996 (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-106. Net Ecological Benefit

- A. The Director may, by rule, modify a water quality standard on the ground that there is a net ecological benefit associated with the discharge of effluent to support or create a riparian and aquatic habitat in an area where water resources are limited. The Director may modify a water quality standard for a pollutant if it is demonstrated that:
 1. The discharge of effluent creates or supports an ecologically valuable aquatic, wetland, or riparian ecosystem in an area where these resources are limited;
 2. The ecological benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with the elimination of the discharge of effluent;
 3. The cost of treatment to achieve compliance with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent to the surface water. The discharger shall demonstrate that it is feasible to eliminate the discharge of effluent that creates or supports the ecologically valuable aquatic, wetland, or riparian ecosystem;
 4. The discharge of effluent to the surface water will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water;
 5. All practicable point source discharge control programs, including local pretreatment, waste minimization, and source reduction programs are implemented; and
 6. The discharge of effluent does not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.
- B. The Director shall not modify a water quality criterion for a pollutant to be less stringent than a technology-based effluent

limitation that applies to the discharge of that effluent. The discharge of effluent shall, at a minimum, comply with applicable technology-based effluent limitations.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-107. Antidegradation

- A. The Director shall, using R18-11-107.01 and this Section, determine whether there is degradation of water quality in a surface water on a pollutant-by-pollutant basis.
- B. Tier 1: The level of water quality necessary to support an existing use shall be maintained and protected. No degradation of existing water quality is permitted in a surface water where the existing water quality does not meet the applicable water quality standards.
- C. Tier 2: Where existing water quality in a surface water is better than the applicable water quality standard the existing water quality shall be maintained and protected. The Director may allow degradation of existing water quality in the surface water, if the Director makes all of the following findings:
 1. The water quality necessary for existing uses is fully protected and water quality is not lowered to a level that does not comply with applicable water quality standards,
 2. The highest statutory and regulatory requirements for new and existing point sources are achieved,
 3. All cost-effective and reasonable best management practices for nonpoint source pollution control are implemented, and
 4. Allowing lower water quality is necessary to accommodate important economic or social development in the area where the surface water is located.
- D. Tier 3: Existing water quality shall be maintained and protected in a surface water that is classified as an OAW under R18-11-112. Degradation of an OAW under subsection (C) is prohibited.
- E. The Director shall implement this Section in a manner consistent with § 316 of the Clean Water Act [33 U.S.C. 1326] if a potential water quality impairment associated with a thermal discharge is involved.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-107.01. Antidegradation Criteria

- A. Tier 1 antidegradation protection.
 1. Tier 1 antidegradation protection applies to the following surface waters:
 - a. A surface water listed on the 303(d) list for the pollutant that resulted in the listing,
 - b. An effluent dependent water,
 - c. An ephemeral water,
 - d. An intermittent water, and
 - e. A canal listed in Appendix B.
 2. A regulated discharge shall not cause a violation of a surface water quality standard or a wasteload allocation in a total maximum daily load approved by EPA.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. Except as provided in subsections (E) and (F), Tier 1 antidegradation review requirements are satisfied for a point-source discharge regulated under an individual AZPDES permit to an ephemeral water, effluent dependent water, intermittent water, or a canal listed in Appendix B, if water quality-based effluent limitations designed to achieve compliance with applicable surface water quality standards are established in the permit and technology-based requirements of the Clean Water Act for the point source discharge are met.
- B. Tier 2 antidegradation protection.**
1. Tier 2 antidegradation protection applies to a perennial water with existing water quality that is better than applicable water quality standards. A perennial water that is not listed in subsection (A)(1) nor classified as an OAW under A.A.C. R18-9-112(G) has Tier 2 antidegradation protection for all pollutants of concern.
 2. A regulated discharge that meets the following criteria, at critical flow conditions, does not cause significant degradation:
 - a. The regulated discharge consumes less than 20 percent of the available assimilative capacity for each pollutant of concern, and
 - b. At least 50 percent of the assimilative capacity for each pollutant of concern remains available in the surface water for each pollutant of concern.
 3. Antidegradation review. Any person proposing a new or expanded regulated discharge under an individual AZPDES permit that may cause significant degradation shall provide ADEQ with the following information:
 - a. Baseline characterization. A person seeking authorization to discharge under an individual AZPDES permit to a perennial water shall provide baseline water quality data on pollutants of concern where no data exists or there are insufficient data to characterize baseline water quality and to determine available assimilative capacity. A discharger shall characterize baseline water quality at a location upstream of the proposed discharge location;
 - b. Alternative analysis.
 - i. The person seeking authorization for the discharge shall prepare and submit a written analysis of alternatives to the discharge. The analysis shall provide information on all reasonable, cost-effective, less-degrading or non-degrading discharge alternatives. Alternatives may include wastewater treatment process changes or upgrades, pollution prevention measures, source reduction, water reclamation, alternative discharge locations, groundwater recharge, land application or treatment, local pretreatment programs, improved operation and maintenance of existing systems, seasonal or controlled discharge to avoid critical flow conditions, and zero discharge;
 - ii. The alternatives analysis shall include cost information on base pollution control measures associated with the regulated discharge and cost information for each alternative;
 - iii. The person shall implement the alternative that is cost-effective and reasonable, results in the least degradation, and is approved by the Director. An alternative is cost-effective and reasonable if treatment costs associated with the alternative are less than a 10 percent increase above the cost of base pollution control measures;
- iv. For purposes of this subsection, "base pollution control measures" are water pollution control measures required to meet technology-based requirements of the Clean Water Act and water quality-based effluent limits designed to achieve compliance with applicable water quality standards; and
- c. Social and economic justification. The person shall demonstrate to the Director that significant degradation is necessary to accommodate important economic or social development in the local area. The person seeking authorization for the discharge shall prepare a written social and economic justification that includes a description of the following:
 - i. The geographic area where significant degradation of existing water quality will occur;
 - ii. The current baseline social and economic conditions in the local area;
 - iii. The net positive social and economic effects of development associated with the regulated discharge and allowing significant degradation;
 - iv. The negative social, environmental, and economic effects of allowing significant degradation of existing water quality; and
 - v. Alternatives to the regulated discharge that do not significantly degrade water quality yet may yield comparable social and economic benefits.
4. For purposes of this Section, the term "pollutant of concern" means a pollutant with either a numeric or narrative water quality standard.
 5. Public participation. The Director shall provide public notice and an opportunity to comment on an antidegradation review under subsection (B)(3) and shall provide an opportunity for a public hearing under A.A.C. R18-9-A908(B).
- C. Tier 3 antidegradation protection.**
1. Tier 3 antidegradation protection applies only to an OAW listed in R18-11-112(G).
 2. A new or expanded point-source discharge directly to an OAW is prohibited.
 3. A person seeking authorization for a regulated discharge to a tributary to, or upstream of, an OAW shall demonstrate in a permit application or in other documentation submitted to ADEQ that the regulated discharge will not degrade existing water quality in the downstream OAW.
 4. A discharge regulated under a § 404 permit that may affect existing water quality of an OAW requires a determination by the Director to ensure that existing water quality is maintained and protected and any water quality impacts are temporary. Temporary water quality impacts are those impacts that occur for a period of six months or less and are not regularly occurring. The form of such a determination shall be as follows:
 - a. For Corps-issued § 404 permits, an individual § 401 water quality certification.
 - b. For Director-issued § 404 permits, a § 404 permit action, wherein the Director shall conduct a water quality evaluation as a part of the state's requirements for issuing § 404 permits and in accordance with this Section.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. Antidegradation review of a § 404 permit shall be conducted as follows:
 1. For a Corps-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a nationwide or regional § 404 permit as part of the § 401 water quality certification prior to issuance of the nationwide or regional permit. The Director shall conduct the antidegradation review of an individual § 404 permit if the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters. For regulated discharges that may degrade water quality in an OAW or a water that is on the 303(d) List of impaired waters, the Director shall conduct the antidegradation review as part of the § 401 water quality certification process.
 2. For a Director-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a general § 404 permit as a part of its determination whether to issue a general permit in accordance with state requirements for issuing a § 404 general permit and with this Section. The Director shall conduct the antidegradation review of an individual § 404 permit as part of the § 404 permit action in accordance with state requirements for issuing a § 404 permit and in accordance with this Section.
- E. Antidegradation review of an AZPDES stormwater permit. An individual stormwater permit for a municipal separate storm sewer system (MS4) meets antidegradation requirements if the permittee complies with the permit, including developing a stormwater management plan containing controls that reduce the level of pollutants in stormwater discharges to the maximum extent practicable.
- F. Antidegradation review of a general permit. The Director shall conduct the antidegradation review of a regulated discharge authorized by a general permit at the time the general permit is issued or renewed. A person seeking authorization to discharge under a general permit is not required to undergo an individual antidegradation review at the time the Notice of Intent is submitted unless the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-108. Narrative Water Quality Standards

- A. A surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or

- 8. Change the color of the surface water from natural background levels of color.
- B. A surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard.
- C. A surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.
- D. A surface water shall not contain solid waste such as refuse, rubbish, demolition or construction debris, trash, garbage, motor vehicles, appliances, or tires.
- E. A Wadeable, perennial stream shall support and maintain a community of organisms having a taxa richness, species composition, tolerance, and functional organization comparable to that of a stream with reference conditions in Arizona.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.01. Narrative Biological Criteria for Wadeable, Perennial Streams

- A. The narrative biological criteria in this Section apply to a wadeable, perennial stream with either an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The biological standard in R18-11-108(E) is met when a bioassessment result, as measured by the Arizona Index of Biological Integrity (IBI), for cold or warm water is:
 1. Greater than or equal to the 25th percentile of reference condition, or
 2. Greater than the 10th percentile of reference condition and less than the 25th percentile of reference condition and a verification bioassessment result is greater than or equal to the 25th percentile of reference condition.
- C. Arizona Index of Biological Integrity (IBI) scores:

| Bioassessment Result | Index of Biological Integrity Scores | |
|--|--------------------------------------|---------|
| | A&Wc | A&Ww |
| Greater than or equal to the 25th percentile of reference condition | ≥52 | ≥50 |
| Greater than the 10th and less than the 25th percentile of reference condition | 46 - 51 | 40 - 49 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.02. Narrative Bottom Deposit Criteria for Wadeable, Perennial Streams

- A. The narrative bottom deposit criteria in this Section apply to wadeable, perennial streams with an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- B. The narrative water quality standard for bottom deposits at R18-11-108(A)(1) is met when:
 1. The percentage of fine sediments in the riffle habitats of a wadeable, perennial stream with an A&Wc designated use, as determined by a riffle pebble count, is less than or equal to 30 percent.
 2. The percentage of fine sediments in all stream habitats of a wadeable, perennial stream with an A&Ww designated use, as determined by a reach level pebble count, is equal to or less than 50 percent.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.03. Narrative Nutrient Criteria for Lakes and Reservoirs

- A. The narrative nutrient criteria in this Section apply to those lakes and reservoirs categorized in Appendix B.
- B. The narrative water quality standard for nutrients at R18-11-108(A)(6) is met when, based on a minimum of two lake sample events conducted during the peak season based on lake productivity, the results show an average chlorophyll-*a* value below the applicable threshold for designated use and lake and reservoir category in subsection (D).
 1. The mean chlorophyll-*a* concentration is less than the lower value in the target range chlorophyll-*a* for the lake and reservoir category, or
 2. The mean chlorophyll-*a* concentration is within the target range for the lake and reservoir category and:
 - a. The mean blue green algae count is at or below 20,000 per milliliter, and

- b. The blue green algae count is less than 50 percent of the total algae count, and
- c. There is no evidence of nutrient-related impairments such as:
 - i. An exceedance of dissolved oxygen or pH standards;
 - ii. A fish kill coincident with a dissolved oxygen or pH exceedance;
 - iii. A fish kill or other aquatic organism mortality coincident with algal toxicity;
 - iv. Secchi depth is less than the lower value prescribed for the lake and reservoir category;
 - v. A nuisance algal bloom is present in the limnetic portion of the lake or reservoir; or
 - vi. The concentration of total phosphorous, total nitrogen, or total Kjehldal nitrogen (TKN) is greater than the upper value in the range prescribed for the lake and reservoir category; or

- 3. For a shallow lake. In addition to meeting the mean chlorophyll-*a* concentrations in subsections (B)(1) or (2), submerged aquatic vegetation covers 50 percent or less of the lake bottom and there is less than a 5 mg/L swing in diel-dissolved oxygen concentration measured within the photic zone.

- C. The following threshold ranges apply during the peak season for lake productivity:
 1. Warm water lakes peak season, April – October;
 2. Cold water lakes peak season, May – September.
- D. The following table lists the numeric targets for lakes and reservoirs.

| NUMERIC TARGETS FOR LAKES AND RESERVOIRS | | | | | | | | | | |
|--|--------------------------|----------------------|------------------|-------------------------|-----------------------|--------------------------------------|---------------------------|-------------------------------------|-------------------------|---------|
| Designated Use | Lake Category | Chl- <i>a</i> (µg/L) | Secchi Depth (m) | Total Phosphorus (µg/L) | Total Nitrogen (mg/L) | Total Kjehldal Nitrogen (TKN) (mg/L) | Blue-Green Algae (per ml) | Blue-Green Algae (% of total count) | Dissolved Oxygen (mg/L) | pH (SU) |
| FBC and PBC | Deep | 10-15 | 1.5-2.5 | 70-90 | 1.2-1.4 | 1.0-1.1 | 20,000 | | | 6.5-9.0 |
| | Shallow | 10-15 | 1.5-2.0 | 70-90 | 1.2-1.4 | 1.0-1.1 | | | | |
| | Igneous | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Sedimentary | 20-30 | 1.5-2.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Urban | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| A&Wc | All | 5-15 | 1.5-2.0 | 50-90 | 1.0-1.4 | 0.7-1.1 | | <50 | 7 (top m) | 6.5-9.0 |
| A&Ww | All (except urban lakes) | 25-40 | 0.8-1.0 | 115-140 | 1.6-1.8 | 1.3-1.6 | | | 6 (top m) | |
| | Urban | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | |
| A&Wedw | All | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | 6.5-9.0 |
| DWS | All | 10-20 | 0.5-1.5 | 70-100 | 1.2-1.5 | 1.0-1.2 | 20,000 | | | 5.0-9.0 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-109. Numeric Water Quality Standards

- A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC | PBC |
|---|-----|-----|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

- B. pH. The following water quality standards for pH are expressed in standard units:

| pH | DWS | FBC, PBC, A&W ¹ | AgI | AgL |
|---------|-----|----------------------------|-----|-----|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

Footnotes:

- 1. "1" Includes A&Wc, A&Ww, A&Wedw, and A&We.

- C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww | A&Wedw | A&Wc |
|------|--------|------|
| | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|--------|--------|--------|
| 3.0° C | 3.0° C | 1.0° C |
|--------|--------|--------|

- D. Suspended sediment concentration.
- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:

| A&Wc | A&Ww |
|------|------|
| 25 | 80 |

- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

- E. Dissolved oxygen. A surface water meets the water quality standard for dissolved oxygen when either:

- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
- The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|---|---|
| A&Ww | 6.0 |
| A&Wc | 7.0 |
| A&W edw for a sample taken from three hours after sunrise to sunset | 3.0 |
| A&W edw for a sample taken from sunset to three hours after sunrise | 1.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

- F. Nutrient criteria. The following are water quality standards for total phosphorus and total nitrogen (expressed in milligrams per liter (mg/L)) that apply to the surface waters listed below. A minimum of 10 samples, each taken at least 10 days apart in a consecutive 12-month period, are required to determine a 90th percentile. Not more than 10 percent of the samples may exceed the 90th percentile value listed below. The Director will apply these water quality standards for total phosphorus and total nitrogen to the surface waters listed below, and to their perennial tributaries, if listed. The Director may also apply these total phosphorus and total nitrogen standards to any source discharging to any tributary (ephemeral, intermittent, effluent dependent water, or perennial) of the surface waters listed below, if necessary to protect nutrient water quality in the listed surface water, based on the volume, frequency, magnitude and duration of the discharge, and distance to the downstream surface water listed below:

- Verde River and its perennial tributaries from the Verde headwaters to Bartlett Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.30 | 1.00 |
| Total nitrogen | 1.00 | 1.50 | 3.00 |

- Black River, Tonto Creek and their perennial tributaries for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.20 | 0.80 |
| Total nitrogen | 0.50 | 1.00 | 2.00 |

- Salt River and its perennial tributaries above Roosevelt Lake for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.12 | 0.30 | 1.00 |
| Total nitrogen | 0.60 | 1.20 | 2.00 |

- Salt River below Stewart Mountain Dam to its confluence with the Verde River:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.05 | – | 0.20 |
| Total nitrogen | 0.60 | – | 3.00 |

- Little Colorado River and its perennial tributaries upstream from:

- The headwaters to River Reservoir,
- South Fork of Little Colorado River at 34°00'49"/109°24'18" to above South Fork Campground at 34°04'49"/109°24'18", and
- The headwaters of Water Canyon Creek to the Apache-Sitgreaves National Forest boundary:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.08 | 0.10 | 0.75 |
| Total nitrogen | 0.60 | 0.75 | 1.10 |

- From the Little Colorado River and State Route 260 at 34°06'39"/109°18'55" to Lyman Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.20 | 0.30 | 0.75 |
| Total nitrogen | 0.70 | 1.20 | 1.50 |

- Colorado River at the Northern International Boundary near Morelos Dam:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | – | 0.33 | – |
| Total nitrogen | – | 2.50 | – |

- Oak Creek from its headwaters at 35°01'30"/111°44'12" to its confluence with the Verde River and the West Fork of Oak Creek from its headwaters at 35°02'44"/111°54'48" to its confluence with Oak Creek.

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.1 | 0.25 | 0.30 |
| Total nitrogen | 1.00 | 1.50 | 2.50 |

- No discharge of wastewater to Show Low Creek or its perennial tributaries upstream of and including Fools Hollow Lake shall exceed 0.16 mg/L total phosphates as P.
- No discharge of wastewater to the San Francisco River or its perennial tributaries upstream of Luna Lake Dam shall exceed 1.0 mg/L total phosphates as P.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-110. Salinity Standards for the Colorado River

- A. The flow-weighted average annual salinity in the lower main stem of the Colorado River shall not exceed the following criteria:

| Location | Total Dissolved Solids |
|------------------|------------------------|
| Below Hoover Dam | 723 mg/L |
| Below Parker Dam | 747 mg/L |
| At Imperial Dam | 879 mg/L |

- B. The plan of implementation contained in the “2014 Review, Water Quality Standards for Salinity, Colorado River System,” approved October 2014, is incorporated by reference to preserve the basin-wide approach to salinity control developed by the Colorado River Basin Salinity Control Forum and to ensure compliance with the numeric criteria for salinity in subsection (A). This material does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the Colorado River Basin Salinity Control Forum, 106 West 500 South, Suite 101, Bountiful, Utah 84010-6232 or at <http://www.coloradoriversalinity.org/>.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-111. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610, 40 CFR 136.3, or an alternative analytical method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-112. Outstanding Arizona Waters

- A. The Director shall classify a surface water as an outstanding Arizona water (OAW) by rule.
- B. The Director may adopt, under R18-11-115, a site-specific standard to maintain and protect existing water quality in an OAW.
- C. Any person may nominate a surface water for classification as an OAW by filing a nomination with the Director. The nomination shall include:
1. A map and a description of the surface water;

2. A written statement in support of the nomination, including specific reference to the applicable criteria for an OAW classification prescribed in subsection (D);
 3. Supporting evidence demonstrating that the criteria prescribed in subsection (D) are met; and
 4. Available water quality data relevant to establishing the baseline water quality of the proposed OAW.
- D. The Director may classify a surface water as an OAW based upon the following criteria:
1. The surface water is a perennial or intermittent water;
 2. The surface water is in a free-flowing condition. For purposes of this subsection, “in a free-flowing condition” means that a surface water does not have an impoundment, diversion, channelization, rip-rapping or other bank armor, or another hydrological modification within the reach nominated for an OAW classification;
 3. The surface water has good water quality. For purposes of this subsection, “good water quality” means that the surface water has water quality that meets or is better than applicable surface water quality standards. A surface water that is listed as impaired under R18-11-604(E) is ineligible for OAW classification; and
 4. The surface water meets one or both of the following conditions:
 - a. The surface water is of exceptional recreational or ecological significance because of its unique attributes, such as the geology, flora and fauna, water quality, aesthetic value, or the wilderness characteristic of the surface water;
 - b. An endangered or threatened species is associated with the surface water and the existing water quality is essential to the species' maintenance and propagation or the surface water provides critical habitat for the threatened or endangered species. An endangered or threatened species is identified in “Endangered and Threatened Wildlife,” 50 CFR 17.11 (revised 2005), and “Endangered and Threatened Plants,” 50 CFR 17.12 (revised 2005). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the National Archives and Records Administration at <http://www.access.gpo.gov/nara/cfr/cfr-table-search.html#page1>.
- E. The Director shall hold at least one public meeting in the local area of a surface water that is nominated for classification as an OAW to solicit public comment on the nomination.
- F. The Director shall consider the following factors when deciding whether to classify a surface water as an OAW:
1. Whether there is the ability to manage the surface water and its watershed to maintain and protect existing water quality;
 2. The social and economic impact of Tier 3 antidegradation protection;
 3. The public comments in support of, or in opposition to, an OAW classification;
 4. The timing of the nomination relative to the triennial review of surface water quality standards;
 5. The consistency of an OAW classification with applicable water quality management plans; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

6. Whether the nominated surface water is located within a national or state park, national monument, national recreation area, wilderness area, riparian conservation area, area of critical environmental concern, or it has another special use designation (for example, Wild and Scenic River).
- G.** The following surface waters are classified as OAWs:
1. The West Fork of the Little Colorado River, from its headwaters to Government Springs (approximately 9.1 river miles);
 2. Oak Creek, from its headwaters to its confluence with the Verde River (approximately 50.3 river miles);
 3. West Fork of Oak Creek, from its headwaters to its confluence with Oak Creek (approximately 15.8 river miles);
 4. Peeples Canyon Creek, from its headwaters to its confluence with the Santa Maria River (approximately 8.1 river miles);
 5. Burro Creek, from its headwaters to its confluence with Boulder Creek (approximately 29.5 miles);
 6. Francis Creek, from its headwaters to its confluence with Burro Creek (approximately 22.9 river miles);
 7. Bonita Creek, from its boundary of the San Carlos Indian Reservation to its confluence with the Gila River (approximately 14.7 river miles);
 8. Cienega Creek, from its confluence with Gardner Canyon to the USGS gaging station (#09484600) (approximately 28.3 river miles);
 9. Aravaipa Creek, from its confluence with Stowe Gulch to the downstream boundary of the Aravaipa Canyon Wilderness Area (approximately 15.5 river miles);
 10. Cave Creek, from its headwaters to the Coronado National Forest boundary (approximately 10.4 river miles);
 11. South Fork of Cave Creek, from its headwaters to its confluence with Cave Creek (approximately 8.6 river miles);
 12. Buehman Canyon Creek, from its headwaters to its confluence with unnamed tributary at 32°24'31"/110°32'08" (approximately 9.8 river miles);
 13. Lee Valley Creek, from its headwaters to Lee Valley Reservoir (approximately 1.6 river miles);
 14. Bear Wallow Creek, from its headwaters to the boundary of the San Carlos Indian Reservation (approximately 4.25 river miles);
 15. North Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 16. South Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 17. Snake Creek, from its headwaters to its confluence with the Black River (approximately 6.2 river miles);
 18. Hay Creek, from its headwaters to its confluence with the West Fork of the Black River (approximately 5.5 river miles);
 19. Stinky Creek, from the White Mountain Apache Indian Reservation boundary to its confluence with the West Fork of the Black River (approximately 3.0 river miles);
 20. KP Creek, from its headwaters to its confluence with the Blue River (approximately 12.7 river miles);
 21. Davidson Canyon, from the unnamed spring at 31°59'00"/110°38'49" to its confluence with Cienega Creek; and
22. Fossil Creek, from its headwaters at the confluence of Sandrock and Calf Pen Canyons above Fossil Springs to its confluence with the Verde River (approximately 17.2 river miles).
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Added "water quality standards" to R18-11-112, previously omitted in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).
- R18-11-113. Effluent-Dependent Waters**
- A.** The Director shall classify a surface water as an effluent-dependent water by rule.
- B.** The Director may adopt, under R18-11-115, a site-specific water quality standard for an effluent-dependent water.
- C.** Any person may submit a petition for rule adoption requesting that the Director classify a surface water as an effluent-dependent water. The petition shall include:
1. A map and a description of the surface water;
 2. Information that demonstrates that the surface water consists of a point source discharge of wastewater; and
 3. Information that demonstrates that, without a point source discharge of a wastewater, the receiving water is an ephemeral water.
- D.** The Director shall use the water quality standards that apply to an effluent-dependent water to derive water quality-based effluent limits for a point source discharge of wastewater to an ephemeral water.
- E.** The Director may use aquatic and wildlife (edw) acute standards only to derive water quality based effluent limits for a sporadic, infrequent, or emergency point source discharge to an ephemeral water or to an effluent-dependent water. The Director shall consider the following factors when deciding whether to apply A&Wedw (acute) standards:
1. The amount, frequency, and duration of the discharge;
 2. The length of time water may be present in the receiving water;
 3. The distance to a downstream water with aquatic and wildlife chronic standards; and
 4. The likelihood of chronic exposure to pollutants.
- F.** The Director may establish alternative water quality-based effluent limits in an AZPDES permit based on seasonal differences in the discharge.
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective December 18, 1992 (Supp. 92-4). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).
- R18-11-114. Mixing Zones**
- A.** The Director may establish a mixing zone for a point source discharge to a surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited in an ephemeral water or where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B.** The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

for a mixing zone as part of an application for an AZPDES permit. The request shall include:

1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C.** The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D.** Director determination.
1. The Director shall deny a request to establish a mixing zone if a water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E.** Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F.** The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- G.** Mixing zone requirements.
1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
 2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
 3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
 4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
 5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.
- H.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:
1. Chlordane,
 2. DDT and its metabolites (DDD and DDE),
 3. Dieldrin,
 4. Dioxin,
 5. Endrin,
 6. Endrin aldehyde,
 7. Heptachlor,
 8. Heptachlor epoxide,
 9. Lindane,
 10. Mercury,
 11. Polychlorinated biphenyls (PCBs), and
 12. Toxaphene.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-115. Site-Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in Appendix A;
 3. Resident aquatic organisms that occur in a surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in Appendix A;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A. "Natural background" means the concentration of a pollutant in a surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically-defensible procedure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Uses one of the following procedures, as defined by the most recent EPA guidance documents:
 - i. The recalculation procedure,
 - ii. The water effects ratio for metals,
 - iii. The streamlined water effects ratio, or
 - iv. The Biotic ligand model.
 - d. Demonstrates that all designated uses are protected.
2. Alternatively, a study outline submitted for the Director's approval must contain the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Describes the hydrologic regime of the waterbody;
 - d. Describes the scientifically-defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 - e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 - f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 - g. Demonstrates that all designated uses are protected; and
 - h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration. Modeling approaches include Better Assessment Science Integrating Source and Nonpoint Sources (Basins), Hydrologic Simulation Program-Fortran (HSPF), and Hydrologic Engineering Center (HEC) programs developed by the U.S. Army Corps of Engineers.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Section repealed by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-116. Resource Management Agencies

Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-117. Canals and Urban Park Lakes

A. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified in Appendix B. Physical or mechanical maintenance

includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified in Appendix B.

B. The discharge of lubricating oil associated with the start-up of well pumps that discharge to canals is not a violation of R18-11-108(B).

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-118. Dams and Flood Control Structures

Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-119. Natural background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is not caused by human activity but is due solely to naturally-occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

R18-11-120. Enforcement of Non-permitted Discharges

A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.

B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-121. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve com-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

pliance. The permittee shall demonstrate that all requirements under § 301(b) and § 306 of the Clean Water Act [33 U.S.C. 1311(b) and 1316] are achieved and that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-122. Variances

- A. Upon request, the Director may establish, by rule, a discharger-specific or water segment(s)-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B. A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.
 4. A detailed discussion of the discharge control technologies that are available for achieving compliance with the water quality standard for which a variance is sought.
 5. Documentation that more advanced treatment technology than applicable technology-based effluent limitations is necessary to achieve compliance with the water quality standard for which a variance is sought.
 6. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
 7. Documentation that the proposed term is only as long as necessary to achieve the highest attainable condition.
 8. Documentation that is appropriate to the type of use to which the variance would apply as follows:
 - a. For a water quality standard variance to a use specified in Clean Water Act § 101(a)(2), documentation must include demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - i. Naturally occurring pollutant concentrations prevent attainment of the use;
 - ii. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - iii. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - iv. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - v. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - vi. That installation and operation of each of the available discharge technologies more advanced than those required to comply with technology-based effluent limitations to achieve compliance with the water quality standard would result in substantial and widespread economic and social impact; or
 - vii. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
 - b. For a water quality standard variance to a use other than those uses specified in Clean Water Act § 101(a)(2), documentation must justify how consideration and value of the water subject to the use appropriately supports the variance and term. A demonstration consistent with (B)(8)(a) of this Section may be used to satisfy this requirement.
 9. For a waterbody segment(s)-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant(s) or water quality parameter(s) and water body or waterbody segment(s) specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(9)(a) previously applied to the water body or waterbody seg-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ment(s), documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant(s) or water quality parameter(s) subject to the water quality variance and the water quality progress achieved.

10. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification of the permittee subject to the variance;
 - b. For an existing point source discharge, a detailed description of the existing discharge control technologies that are used to achieve compliance with applicable water quality standards. For a new point source discharge, a detailed description of the proposed discharge control technologies that will be used to achieve compliance with applicable water quality standards; and
 - c. Documentation that the existing or proposed discharge control technologies will comply with applicable technology-based effluent limitations.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(8)(a)(vii). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable; or
 3. If no additional feasible pollutant control technology can be identified, the interim criterion or interim effluent condition that reflects the greatest pollutant reduction achievable with the pollutant control technologies installed at the time of the issuance of the variance, and the adoption and implementation of a Pollutant Minimization Program.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The Director may not grant a variance for a point source discharge to an OAW listed in R18-11-112(G).
 - I. Each variance established by the Director is subject to review and approval by the Regional Administrator.
 - J. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E). The variance term runs from the approval of the variance by the Regional Administrator.
 - K. The Director shall reevaluate, in its triennial review, whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance in its triennial review rulemaking.
 - L. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - M. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.
 - N. The following are discharger-specific variances adopted by the Director:
 - O. The following are water body and waterbody segment-specific variances adopted by the Director:

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).
- R18-11-123. Discharge Prohibitions**
- A. The discharge of wastewater to the following surface waters is prohibited:
 1. Sabino Canyon Creek;
 2. Vekol Wash, upstream of the Ak-Chin Indian Reservation; and
 3. Smith Wash, upstream of the Ak-Chin Indian Reservation.
 - B. The discharge to Lake Powell of human body wastes and the wastes from toilets and other receptacles intended to receive or retain wastes from a vessel is prohibited.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO₃, is determined according to the following criteria:
 - i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- e. pH is determined according to the following criteria:
 - i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- f. Table 1 abbreviations.
 - i. µg/L = micrograms per liter,
 - ii. mg/kg = milligrams per kilogram,
 - iii. pCi/L = picocuries per liter,
 - iv. D = dissolved,
 - v. T = total recoverable,
 - vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
 e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
 LN = is the natural logarithm
 CMC = Criterion Maximum Concentration (acute)
 CCC= Criterion Continuous Concentration (chronic)

Historical Note

Appendix A repealed; new Appendix A, Table 1 adopted effective April 24, 1996 (Supp. 96-2). Appendix A, Table 1 amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 1 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 1 repealed; new Appendix A, Table 1 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 1 amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 17. Chronic Criteria for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife coldwater, Unionid Mussels Absent
 For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

Table 23. Repealed**Historical Note**

Appendix A, Table 23 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 23 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 23 renumbered to Table 24; new Table 23 renumbered from Table 22 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 23 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 24. Repealed**Historical Note**

Appendix A, Table 24 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 24 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 24 renumbered to Table 25; new Table 24 renumbered from Table 23 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 24 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 25. Renumbered**Historical Note**

Appendix A, Table 25 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 25 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 25 renumbered to Table 26; new Table 25 renumbered from Table 24 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 25 renumbered to Table 11 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 26. Renumbered**Historical Note**

Appendix A, Table 26 renumbered from Table 25 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 26 renumbered to Table 12 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Appendix B. Surface Waters and Designated Uses

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Waters | Segment Description and Location (Latitude and Longitudes are in NAD 83) | Lake Category | Aquatic and Wildlife | | | | Human Health | | | | Agricultural | | |
|-----------|-------------------------|---|---------------|----------------------|------|------|--------|--------------|-----|-----|----|--------------|-----|-----|
| | | | | A&Wc | A&Ww | A&We | A&Wedw | FBC | PBC | DWS | FC | AgI | AgL | |
| BW | Alamo Lake | 34°14'06"/113°35'00" | Deep | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Big Sandy River | Headwaters to Alamo Lake | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Bill Williams River | Alamo Lake to confluence with Colorado River | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Blue Tank | 34°40'14"/112°58'17" | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Boulder Creek | Headwaters to confluence with unnamed tributary at 34°41'13"/113°03'37" | | A&Wc | | | | FBC | | | | FC | | AgL |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Carter Tank | 34°52'27"/112°57'31" | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Conger Creek | Headwaters to confluence with unnamed tributary at 34°45'15"/113°05'46" | | A&Wc | | | | FBC | | | | FC | | AgL |
| BW | Conger Creek | Below confluence with unnamed tributary to confluence with Burro Creek | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Copper Basin Wash | Headwaters to confluence with unnamed tributary at 34°28'12"/112°35'33" | | A&Wc | | | | FBC | | | | FC | | AgL |
| BW | Copper Basin Wash | Below confluence with unnamed tributary to confluence with Skull Valley Wash | | | | A&We | | | PBC | | | | | AgL |

Adopted effective February 18, 1992 (Supp. 92-1). Appendix B repealed, new Appendix B adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix B amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Appendix B amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix C. Site-Specific Standards

| Watershed | Surface Water | Surface Water Description & Location | Parameter | Site-Specific Criterion |
|-----------|--------------------|--|-------------------------|---|
| LC | Rio de Flag (EDW) | Flagstaff WWTP outfall to the confluence with San Francisco Wash | Copper (D) | 36 µg/L (A&Wedw) |
| CL | Yuma East Wetlands | From inlet culvert from Colorado River into restored channel to Ocean Bridge | Selenium (T) | 2.2 µg/L (A&Ww chronic) |
| | | | Total residual chlorine | 33 µg/L (A&Ww acute) |
| | | | | 20 µg/L (A&Ww chronic) |
| SR | Pinto Creek | From confluence of Ellis Ranch tributary at 33°19'26.7"/110°54'57.5" to the confluence of West Fork of Pinto Creek at 33°27'32.3"/111°00'19.7" | Copper (D) | 34 µg/L (A&Ww acute for hardness values below 268 mg/L) |
| | | | | 34 µg/L (A&Ww chronic) |

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix C repealed effective April 24, 1996 (Supp. 96-2). New Appendix C made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix C amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

ARTICLE 2. WATER QUALITY STANDARDS FOR NON-WOTUS PROTECTED SURFACE WATERS

R18-11-201. Definitions

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation AZ (AgI AZ)" means the use of a non-WOTUS protected surface water for crop irrigation.
3. "Agricultural livestock watering AZ (AgL AZ)" means the use of a non-WOTUS protected surface water as a water supply for consumption by livestock.
4. "Aquatic and wildlife AZ (cold water) (A&Wc AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
5. "Aquatic and wildlife AZ (warm water) (A&Ww AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
6. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
7. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
8. "Criteria" means elements of water quality standards expressed as pollutant concentrations, levels, or narrative

statements representing a water quality that supports a designated use.

9. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health-based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
10. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health-based water quality standard criteria, in order to simulate long-term exposure, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

receiving water critical flow condition is the harmonic mean flow.

11. "Designated use" means a use specified on the Protected Surface Waters List for a non-WOTUS protected surface water.
12. "Domestic water source AZ (DWS AZ)" means the use of a non-WOTUS protected surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
13. "Fish consumption AZ (FC AZ)" means the use of a non-WOTUS protected surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
14. "Full-body contact AZ (FBC AZ)" means the use of a non-WOTUS protected surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely, and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
15. "Geometric mean" means the n th root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$

16. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
17. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
18. "Non-WOTUS protected surface water" means a protected surface water designated in Table A of R18-11-216 or added to the PSWL by an emergency action authorized by A.R.S. § 49-221(G)(7) that is not a WOTUS.
19. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
20. "Partial-body contact AZ (PBC AZ)" means the recreational use of a non-WOTUS protected surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and, sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
21. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance.
22. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
23. "Recharge Project" means a facility necessary or convenient to obtain, divert, withdraw, transport, exchange,

deliver, treat, or store water to infiltrate or reintroduce that water into the ground.

24. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
25. "Urban lake" means a manmade lake within an urban landscape.
26. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
27. "Wetland" means, for the purposes of non-WOTUS protected surface waters, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.
28. "WOTUS" means waters of the state that are also navigable waters as defined by Section 502(7) of the Clean Water Act.
29. "WOTUS protected surface water" means a protected surface water that is a WOTUS.
30. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1).
Amended subsection A. effective April 17, 1984 (Supp. 84-2). Former Section R9-21-201 repealed, former Section R9-21-203 renumbered as Section R9-21-201 and amended effective January 7, 1985 (Supp. 85-1).
Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-201 renumbered without change as Section R18-11-201 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-202. Applicability

- A. The water quality standards prescribed in this Article apply to non-WOTUS protected surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
 1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores including:
 - a. A pit,
 - b. Pregnant leach solution pond

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond of sump in a mine put associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product that is being held for recycling,
 - h. Spill or catchment pond, or
 - i. A pond used for onsite remediation
3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.
 5. WOTUS Protected Surface Waters.

Historical Note

Former Section R9-21-202 repealed, former Section R9-21-102 renumbered as Section R9-21-202 and amended effective January 7, 1985 (Supp. 85-1). Amended subsections (B), (D), and (E) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-202 renumbered without change as Section R18-11-202 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-203. Designated Uses for Non-WOTUS Protected Surface Waters

- A. The designated uses for specific non-WOTUS protected surface waters are listed in the Protected Surface Waters List in this article. The designated uses that may be assigned to a non-WOTUS protected surface water are:
 1. Full-body contact AZ,
 2. Partial-body contact AZ,
 3. Domestic water source AZ,
 4. Fish consumption AZ,
 5. Aquatic and wildlife AZ (cold water),
 6. Aquatic and wildlife AZ (warm water),
 7. Agricultural irrigation AZ, and
 8. Agricultural livestock watering AZ.
- B. Numeric water quality criteria to maintain and protect water quality for the designated uses assigned to non-WOTUS protected surface waters are prescribed in R18-11-215. Narrative water quality standards to protect non-WOTUS protected surface waters are prescribed in R18-11-214.
- C. If a non-WOTUS protected surface water has more than one designated use listed in the Protected Surface Waters List, the most stringent water quality criterion applies.
- D. The Director shall revise the designated uses of a non-WOTUS protected surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in the Protected Surface Waters List.
- E. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria through a rulemaking action for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;

3. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the non-WOTUS protected surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
4. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1). Amended subsection (B) by adding paragraphs (27) and (28) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-203 renumbered as Section R9-21-201, former Section R9-21-204 renumbered as Section R9-21-203 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-203 renumbered and amended as Section R9-21-204, new Section R9-21-203 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-203 renumbered without change as Section R18-11-203 (Supp. 87-3). Amended subsection (B) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-204. Interim, Presumptive Designated Uses

The following water quality standards apply to a non-WOTUS protected surface water that is not listed on the Protected Surface Waters List but is added on an emergency basis pursuant to A.R.S. § 49-221(G)(7):

1. The aquatic and wildlife AZ (cold water use applies to a non-WOTUS protected surface water above 5000 feet in elevation;
2. The aquatic and wildlife AZ (warm water) applies to a non-WOTUS protected surface water below 5000 feet in elevation;
3. The full-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
4. The partial-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans in a way that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
5. The fish consumption AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for harvesting aquatic organisms for con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

sumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.

6. The domestic water source AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans as a source of potable water.
7. The agricultural irrigation AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used for crop irrigation.
8. The agricultural livestock watering AZ use applies to any non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used as a water supply for consumption by livestock.

Historical Note

Former Section R9-21-204 renumbered and amended as Section R9-21-207, former Section R9-21-206 renumbered and amended as Section R9-21-204 effective January 29, 1980 (Supp. 80-1). Former Section

R9-21-204 renumbered as Section R9-21-203, former Section R9-21-205 renumbered as Section R9-21-204 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-204 renumbered and amended as Section R9-21-205, former Section R9-21-203 renumbered and amended as Section R9-21-204 effective August 12, 1986 (Supp. 86-4). Former Section

R9-21-204 renumbered without change as Section R18-11-204 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-205. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610 or an alternative method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Former Section R9-21-205 repealed, new Section R9-21-205 adopted effective January 29, 1980 (Supp. 80-1).

Former Section R9-21-205 renumbered as Section R9-21-204, former Section R9-21-206 renumbered as Section R9-21-205 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-205 renumbered and amended as Section R9-21-206, former Section R9-21-204 renumbered and amended as Section R9-21-205 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-205 renumbered without change as Section R18-11-205 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992

(Supp. 92-1). Section repealed April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-206. Mixing Zones

- A. The Director may establish a mixing zone for a point source discharge to a non-WOTUS protected surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B. The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:
 1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C. The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
 1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D. Director determination.
 1. The Director shall deny a request to establish a mixing zone if an applicable water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E. Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F. The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

G. Mixing zone requirements.

1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.

H. The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:

1. Chlordane,
2. DDT and its metabolites (DDD and DDE),
3. Dieldrin,
4. Dioxin,
5. Endrin,
6. Endrin aldehyde,
7. Heptachlor,
8. Heptachlor epoxide,
9. Lindane,
10. Mercury,
11. Polychlorinated biphenyls (PCBs), and
12. Toxaphene.

Historical Note

Former Section R9-21-206 renumbered and amended as Section R9-21-204, new Section R9-21-206 adopted effective January 29, 1980 (Supp. 80-1). Amended by adding subsection (B) effective October 14, 1981 (Supp. 81-5). Amended subsection (B) and Table 1 effective January 29, 1982 (Supp. 82-1). Amended subsection (B) and Table 1 effective August 13, 1982 (Supp. 82-4). Former Section R9-21-206 renumbered as Section R9-21-205, former Section R9-21-207 renumbered as Section R9-21-206 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-206 renumbered and amended as Section R9-21-207, former Section R9-21-205 renumbered and amended as R9-21-206 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-206 renumbered without change as Section R18-11-206 (Supp. 87-3). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-207. Natural Background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is caused solely by naturally occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Former Section R9-21-207 repealed, former Section R9-21-204 renumbered and amended as Section R9-21-207 effective January 29, 1980 (Supp. 80-1). Former Section R9-21-207 renumbered as Section R9-21-206, former Section R9-21-208 renumbered as Section R9-21-207

and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-207 renumbered without change as Section R9-21-208, former Section R9-21-206 renumbered and amended as Section R9-21-207 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-207 renumbered without change as Section R18-11-207 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-208. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Former Section R9-21-208 repealed, new Section R9-21-208 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-208 renumbered as Section R9-21-207, Appendices 1 through 9 amended as Appendix A (now shown following R9-21-213), former Section R9-21-209 renumbered as R9-21-208 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-208 renumbered and amended as Section R9-21-209, former Section R9-21-207 renumbered without change as Section R9-21-208 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-208 renumbered without change as Section R18-11-208 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-209. Variances

- A.** Upon request, the Director may establish, by rule, a discharger-specific or water segment-specific or water segments-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B.** A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.

4. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
5. Documentation that the proposed term is only as long as necessary to achieve compliance with applicable water quality standards.
6. Documentation that is appropriate to the type of designated use to which the variance would apply as follows. For a water quality standard variance documentation must include a demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - a. Naturally occurring pollutant concentrations prevent attainment of the use;
 - b. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - c. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - d. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - e. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - f. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
7. For a waterbody segment-specific or segments-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant or pollutants or water quality parameter or parameters and water body or waterbody segment or segments specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(7)(a) previously applied to the water body or waterbody segment or segments, documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant or pollutants or water quality parameter or parameters subject to the water quality variance and the water quality progress achieved.
8. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section: Identification of the permittee subject to the variance.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(6)(a)(vi). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E).
 - I. The Director shall periodically, but not more than every five years, reevaluate whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition during each rulemaking for this Article. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance during the rulemaking.
 - J. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - K. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.

Historical Note

Former Section R9-21-209 renumbered and amended as Section R9-21-210, new Section R9-21-209 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-209 renumbered as Section R9-21-208, Tables I and II amended as Appendix B (now shown following R9-21-213 and Appendix A), former Section R9-21-210 renumbered as Section R9-21-209 and amended effective

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

January 7, 1985 (Supp. 85-1). Former Section R9-21-209 renumbered and amended as Section R9-21-210, former Section R9-21-208 renumbered and amended as Section R9-21-209 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-209 renumbered without change as Section R18-11-209 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-210. Site Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a non-WOTUS protected surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a non-WOTUS protected surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in R18-11-215;
 3. Resident aquatic organisms that occur in a non-WOTUS protected surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in R18-11-215;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in R18-11-215. "Natural background" means the concentration of a pollutant in a non-WOTUS protected surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a non-WOTUS protected surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically defensible procedure. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
1. Identifies the pollutant;
 2. Describes the reach's boundaries;
 3. Describes the hydrologic regime of the waterbody;
 4. Describes the scientifically defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 5. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 6. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 7. Demonstrates that all designated uses are protected; and
 8. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective January 29, 1980 (Supp. 80-1). Amended subsection (A) effective April 17, 1984 (Supp. 84-2). Former Section R9-21-210 renumbered as Section R9-21-209, former Section R9-21-211 renumbered as Section R9-21-210 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-210 renumbered without change as Section R18-11-210 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-211. Enforcement of Non-permitted Discharges to Non-WOTUS Protected Surface Waters

- A.** The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B.** Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211 effective January 29, 1980 (Supp. 80-1). Amended subsections (D), (G) three (I), and added (J) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-211 renumbered as Section R9-21-210, former Section R9-21-212 renumbered as Section R9-21-211 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-211 renumbered and amended as Section R9-21-212, former Section R9-21-210 renumbered and amended as Section R9-21-211 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-211 renumbered without change as Section R18-11-211 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-212. Statements of Intent and Limitations on the Reach of Article 2

- A.** Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.
- B.** Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified as non-WOTUS protected surface waters on the Protected Surface Waters List. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified on the Protected Surface Waters List.

- C. Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article.
- D. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-212 renumbered as Section R9-21-211, former Section R9-21-213 renumbered as Section R9-21-212 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-212 repealed, former Section R9-21-211 renumbered and amended as Section R9-21-212 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-212 renumbered without change as Section R18-11-212 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-213. Procedures for Determining Economic, Social, and Environmental Cost and Benefits

- A. The Director shall perform an economic, social, and environmental cost and benefits analysis that shows the benefits outweigh the costs before conducting any of the following rulemaking actions:
 1. Adopting a water quality standard that applies to non-WOTUS protected surface waters at a particular level or for a particular water category of non-WOTUS protected surface waters;
 2. Adding a non-WOTUS protected surface water to the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(4) apply; or
 3. Removing a non-WOTUS protected surface water from the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(6) apply.
- B. The economic, social, and environmental cost and benefit analysis must include:
 1. A justification of the valuation methodology used to quantify the costs or benefits of the rulemaking action;
 2. A reference to any study relevant to the economic, social, and environmental cost and benefit analysis that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of the costs and benefits of the rulemaking action;
 3. A description of any data on which an economic, social, and environmental cost and benefits analysis is based and an explanation of how the data was obtained and why the data is acceptable data.
 4. A description of the probable impact of the rulemaking on any existing AZPDES permits that are impacted by the rulemaking action;
 5. A description of the probable amount of additional AZPDES permits that will be required for known and ongoing point-source discharges after the rulemaking is completed that otherwise would not have been required if the Director did not undertake the rulemaking action; and
 6. The administrative and other costs to ADEQ associated with the proposed rulemaking.
- C. The Director shall publish a copy of the economic, social, and environmental cost and benefits analysis to the agency website

prior to filing any rulemaking materials during any of the rulemaking actions listed in subsection (A) of this rule.

- D. If for any reason enough data is not reasonably available to comply with the requirements of subsection (B) of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms.
- E. The Director is not required to prepare the economic, social, and environmental cost and benefits analysis required by this rule when:
 1. Adding or removing a WOTUS-protected surface water from the Protected Surface Waters List; or
 2. Adding a water to the Protected Surface Waters List on an emergency basis pursuant to A.R.S. § 49-221(G)(7).

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Former Section R9-21-213 renumbered as Section R9-21-212, former Section R9-21-103 renumbered as Section R9-21-213 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-213 renumbered without change as Section R9-21-214, new Section R9-21-213 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-213 renumbered without change as Section R18-11-213 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-214. Narrative Water Quality Standards for Non-WOTUS Protected Surface Waters

- A. A non-WOTUS protected surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the non-WOTUS protected surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or
 8. Change the color of the non-WOTUS protected surface water from natural background levels of color.
- B. A non-WOTUS protected surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard
- C. A non-WOTUS protected surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Former Section R9-21-213 renumbered without change as Section R9-21-214 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-214 renumbered without change as Section R18-11-214 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-215. Numeric Water Quality Standards for Non-WOTUS Protected Surface Waters

A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony-forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC AZ | PBC AZ |
|---|--------|--------|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

B. pH. The following water quality standards for non-WOTUS protected surface waters pH are expressed in standard units:

| pH | DWS AZ | FBC AZ, PBC AZ, A&Ww AZ, A&Wc AZ | AgI AZ | AgL AZ |
|---------|--------|----------------------------------|--------|--------|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww AZ | A&Wc AZ |
|---------|---------|
| 3.0° C | 1.0° C |

D. Suspended sediment concentration.

- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:
- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

| A&Wc AZ | A&Ww AZ |
|---------|---------|
| 25 | 80 |

E. Dissolved oxygen. A non-WOTUS protected surface water meets the water quality standard for dissolved oxygen when either:

- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
- The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|----------------|---|
| A&Ww AZ | 6.0 |
| A&Wc AZ | 7.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

F. Tables 1 through 17 prescribe water quality criteria for individual pollutants by designated use.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Table 1. Water Quality Criteria by Designated Use (see footnote)

| Parameter | CAS NUMBER | DWS AZ (µg/L) | FC AZ (µg/L) | FBC AZ (µg/L) | PBC AZ (µg/L) | A&Wc AZ Acute (µg/L) | A&Wc AZ Chronic (µg/L) | A&Ww AZ Acute (µg/L) | A&Ww AZ Chronic (µg/L) | AgI AZ (µg/L) | AgL AZ (µg/L) |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 15. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Warmwater AZ Uses, Unionid Mussels Absent

For the Aquatic and Wildlife Warmwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment. For the aquatic and wildlife effluent dependent uses, unionids will be assumed to be absent.

 For the Aquatic and Wildlife Coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

Table A made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table B. WOTUS Protected Surface Waters

The waters listed in this table have been tentatively identified by ADEQ as WOTUS, under the law governing on 8/26/2022. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table B will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the WOTUS Protected Surface Waters Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|--|
| BW | Big Sandy River | Headwaters to Alamo Lake |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Francis Creek (OAW) | Headwaters to confluence with Burro Creek |
| BW | Kirkland Creek | Headwaters to confluence with Santa Maria River |
| BW | Trout Creek | Below confluence with unnamed tributary to confluence with Knight Creek |
| CG | Beaver Dam Wash | Headwaters to confluence with the Virgin River |
| CG | Bright Angel Creek | Headwaters to confluence with Roaring Springs Creek |
| CG | Bright Angel Creek | Below Roaring Spring Springs Creek to confluence with Colorado River |
| CG | Colorado River | Lake Powell to Lake Mead |
| CG | Crystal Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Deer Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Garden Creek | Headwaters to confluence with Pipe Creek |
| CG | Havasupai Creek | From the Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Hermit Creek | Below Hermit Pack Trail crossing to confluence with the Colorado River |
| CG | Kanab Creek | Headwaters to confluence with the Colorado River |
| CG | Lake Mead | 36°06'18"/114°26'33" |
| CG | Lake Powell | 36°59'53"/111°08'17" |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Paria River | Utah border to confluence with the Colorado River |
| CG | Phantom Creek | Below confluence with unnamed tributary to confluence with Bright Angel Creek |
| CG | Pipe Creek | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Short Creek | Headwaters to confluence with Fort Pearce Wash |
| CG | Tapeats Creek | Headwaters to confluence with the Colorado River |
| CG | Thunder River | Headwaters to confluence with Tapeats Creek |
| CG | Vasey's Paradise | A spring at 36°29'52"/111°51'26" |
| CG | Virgin River | Headwaters to confluence with the Colorado River |
| CG | White Creek | Headwaters to confluence with unnamed tributary at 36°18'45"/112°21'03" |
| CG | White Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CL | A10 Backwater | 33°31'45"/114°33'19" |
| CL | A7 Backwater | 33°34'27"/114°32'04" |
| CL | Adobe Lake | 33°02'36"/114°39'26" |
| CL | Cibola Lake | 33°14'01"/114°40'31" |
| CL | Clear Lake | 33°01'59"/114°31'19" |
| CL | Colorado River | Lake Mead to Topock Marsh |
| CL | Colorado River | Topock Marsh to Morelos Dam |
| CL | Gila River | Painted Rock Dam to confluence with the Colorado River |
| CL | Hunter's Hole Backwater | 32°31'13"/114°48'07" |
| CL | Imperial Reservoir | 32°53'02"/114°27'54" |
| CL | Island Lake | 33°01'44"/114°36'42" |
| CL | Laguna Reservoir | 32°51'35"/114°28'29" |
| CL | Lake Havasu | 34°35'18"/114°25'47" |
| CL | Lake Mohave | 35°26'58"/114°38'30" |
| CL | Martinez Lake | 32°58'49"/114°28'09" |
| CL | Mittry Lake | 32°49'17"/114°27'54" |
| CL | Nortons Lake | 33°02'30"/114°37'59" |
| CL | Pretty Water Lake | 33°19'51"/114°42'19" |
| CL | Topock Marsh | 34°43'27"/114°28'59" |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|----|--|---|
| LC | Auger Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Chevelon Canyon | Headwaters to confluence with the Little Colorado River |
| LC | Chevelon Canyon Lake | 34°29'18"/110°49'30" |
| LC | Clear Creek | Headwaters to confluence with the Little Colorado River |
| LC | Clear Creek Reservoir | 34°57'09"/110°39'14" |
| LC | Colter Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Colter Reservoir | 33°56'39"/109°28'53" |
| LC | Coyote Creek | Headwaters to confluence with the Little Colorado River |
| LC | Cragin Reservoir (formerly Blue Ridge Reservoir) | 34°32'40"/111°11'33" |
| LC | East Clear Creek | Headwaters to confluence with Clear Creek |
| LC | Ellis Wiltbank Reservoir | 34°05'25"/109°28'25" |
| LC | Fool's Hollow Lake | 34°16'30"/110°03'43" |
| LC | Lee Valley Creek | From Lee Valley Reservoir to confluence with the East Fork of the Little Colorado River |
| LC | Lily Creek | Headwaters to confluence with Coyote Creek |
| LC | Little Colorado River | Headwaters to Lyman Reservoir |
| LC | Little Colorado River | Below Lyman Reservoir to confluence with the Puerco River |
| LC | Little Colorado River | Below Puerco River confluence to the Colorado River, excluding segments on Native American Lands |
| LC | Little Colorado River, East Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, South Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, West Fork | Below Government Springs to confluence with the Little Colorado River |
| LC | Lyman Reservoir | 34°21'21"/109°21'35" |
| LC | Mamie Creek | Headwaters to confluence with Coyote Creek |
| LC | Morrison Creek | Headwaters to Mamie Creek @ 33°59'24.45"/109°03'51.94 |
| LC | Nutrioso Creek | Headwaters to confluence with the Little Colorado River |
| LC | Porter Creek | Headwaters to confluence with Show Low Creek |
| LC | Riggs Creek | Headwaters to Nutrioso Creek |
| LC | Rio de Flag | Headwaters to City of Flagstaff WWTP outfall at 35°12'21"/111°39'17" |
| LC | Rudd Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Rosey Creek | Headwaters to 34°02'28.72"/109°27'24.3" |
| LC | Scott Reservoir | 34°10'31"/109°57'31" |
| LC | Show Low Creek | Headwaters to confluence with Silver Creek |
| LC | Show Low Lake | 34°11'36"/110°00'12" |
| LC | Silver Creek | Headwaters to confluence with the Little Colorado River |
| LC | White Mountain Lake | 34°21'57"/109°59'21" |
| LC | Willow Creek | Headwaters to confluence with Clear Creek |
| LC | Zuni River | Headwaters to confluence with the Little Colorado River |
| MG | Agua Fria River | From State Route 169 to Lake Pleasant |
| MG | Ash Creek | Headwaters to confluence with Tex Canyon |
| MG | East Maricopa Floodway | From Brown and Greenfield Rds to the Gila River Indian Reservation Boundary |
| MG | Fain Lake | Town of Prescott Valley Park Lake 34°34'29"/112°21'06" |
| MG | Gila River | San Carlos Indian Reservation boundary to the Ashurst-Hayden Dam |
| MG | Gila River (EDW) | From the confluence with the Salt River to Gillespie Dam |
| MG | Hassayampa Lake | 34°25'45"/112°25'33" |
| MG | Hassayampa River | Below unnamed tributary to the Buckeye Irrigation Company Canal |
| MG | Hassayampa River | Headwaters to confluence with unnamed tributary at 34°26'09"/112°30'32" |
| MG | Lake Pleasant | 33°53'46"/112°16'29" |
| MG | Little Ash Creek | Headwaters to confluence with Ash Creek at 34°20'45.74"/112°4'17.26" |
| MG | Little Sycamore Creek | Headwaters to Sycamore Creek @ 34°21'39.13"/111°58'49.98" |
| MG | Mineral Creek (diversion tunnel and lined channel) | 33°12'24"/110°59'58" to 33°07'56"/110°58'34" |
| MG | Papago Park South Pond | Curry Road, Tempe 33°26'22"/111°55'55" |
| MG | Salt River | Verde River to 2 km below Granite Reef Dam |
| MG | Seven Springs Wash | Headwaters to Unnamed trib @ 33°57'58.66"/111°51'52.07" |
| MG | Tempe Town Lake | At Mill Avenue Bridge at 33°26'00"/111°56'26" |
| MG | Turkey Creek | Headwaters to confluence with unnamed tributary at 34°19'28"/112°21'33" |
| SC | Alum Gulch | Below 31°29'17"/110°44'25" to confluence with Sonoita Creek |
| SC | California Gulch | Headwaters To U.S./Mexico border |
| SC | Cienega Creek (OAW) | From confluence with Gardner Canyon to USGS gaging station (#09484600) |
| SC | Cox Gulch | Headwaters to Three R Canyons @ 31°28'28.03"/110°47'14.65" |
| SC | Holden Canyon Creek | Headwaters to U.S./Mexico border |
| SC | Julian Wash | Headwaters to confluence with the Santa Cruz River |
| SC | Nogales Wash | Headwaters to confluence with Potrero Creek |
| SC | Parker Canyon Creek | Below unnamed tributary to U.S./Mexico border |
| SC | Rillito Creek | Headwaters to confluence with the Santa Cruz River |
| SC | Romero Canyon Creek | Below unnamed tributary to confluence with Sutherland Wash |
| SC | Santa Cruz River | Headwaters to the at U.S./Mexico border |
| SC | Santa Cruz River | U.S./Mexico border to the Nogales International WWTP outfall at 31°27'25"/110°58'04" |
| SC | Santa Cruz River | Tubac Bridge to Agua Nueva WRF outfall at 32°17'04"/111°01'45" |
| SC | Santa Cruz River (EDW) | Agua Nueva WRF outfall to Baumgartner Road |
| SC | Sonoita Creek | Headwaters to the Town of Patagonia WWTP outfall at 31°32'25"/110°45'31" |
| SC | Sonoita Creek (EDW) | Town of Patagonia WWTP outfall to permanent groundwater upwelling point approximately 1600 feet downstream of outfall |
| SC | Sycamore Canyon | Headwaters to the U.S./Mexico border |

| VR | West Clear Creek | Below confluence with Meadow Canyon to confluence with the Verde River |
| VR | Wet Beaver Creek | Below unnamed springs to confluence with Dry Beaver Creek |
| VR | Willow Creek Reservoir | 34°36'17"/112°26'19" |

Historical Note

Table B made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table C. Historically Regulated as WOTUS and in Need of Confirmation

The waters listed in this table have historically been and will continue to be regulated as WOTUS unless ADEQ makes a determination that they are non-WOTUS. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Confirmation Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|---|
| BW | Alamo Lake | 34°14'06"/113°35'00" |
| BW | Bill Williams River | Alamo Lake to confluence with Colorado River |
| BW | Blue Tank | 34°40'14"/112°58'17" |
| BW | Boulder Creek | Headwaters to confluence with unnamed tributary at 34°41'13"/113°03'37" |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Carter Tank | 34°52'27"/112°57'31" |
| BW | Conger Creek | Headwaters to confluence with unnamed tributary at 34°45'15"/113°05'46" |
| BW | Conger Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Copper Basin Wash | Headwaters to confluence with unnamed tributary at 34°28'12"/112°35'33" |
| BW | Copper Basin Wash | Below confluence with unnamed tributary to confluence with Skull Valley Wash |
| BW | Cottonwood Canyon | Headwaters to Bear Trap Spring |
| BW | Cottonwood Canyon | Below Bear Trap Spring to confluence at Sycamore Creek |
| BW | Date Creek | Headwaters to confluence with Santa Maria River |
| BW | Knight Creek | Headwaters to confluence with Big Sandy River |
| BW | Peoples Canyon (OAW) | Headwaters to confluence with Santa Maria River |
| BW | Red Lake | 35°12'18"/113°03'57" |
| BW | Santa Maria River | Headwaters to Alamo Lake |
| BW | Trout Creek | Headwaters to confluence with unnamed tributary at 35°06'47"/113°13'01" |
| CG | Agate Canyon | Headwaters to confluence with the Colorado River |
| CG | Big Springs Tank | 36°36'08"/112°21'01" |
| CG | Boucher Creek | Headwaters to confluence with the Colorado River |
| CG | Bright Angel Wash | Headwaters to Grand Canyon National Park South Rim WWTP outfall at 36°02'59"/112°09'02" |
| CG | Bright Angel Wash (EDW) | Grand Canyon National Park South Rim WWTP outfall to Coconino Wash |
| CG | Bulrush Canyon Wash | Headwaters to confluence with Kanab Creek |
| CG | Cataract Creek | Headwaters to Santa Fe Reservoir |
| CG | Cataract Creek | Santa Fe Reservoir to City of Williams WWTP outfall at 35°14'40"/112°11'18" |
| CG | Cataract Creek | Red Lake Wash to Havasupai Indian Reservation boundary |
| CG | Cataract Creek (EDW) | City of Williams WWTP outfall to 1 km downstream |
| CG | Cataract Lake | 35°15'04"/112°12'58" |
| CG | Chuar Creek | Headwaters to confluence with unnamed tributary at 36°11'35"/111°52'20" |
| CG | Chuar Creek | Below unnamed tributary to confluence with the Colorado River |
| CG | City Reservoir | 35°13'57"/112°11'25" |
| CG | Clear Creek | Headwaters to confluence with unnamed tributary at 36°07'33"/112°00'03" |
| CG | Clear Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Coconino Wash (EDW) | South Grand Canyon Sanitary District Tusayan WRF outfall at 35°58'39"/112°08'25" to 1 km downstream |
| CG | Crystal Creek | Headwaters to confluence with unnamed tributary at 36°13'41"/112°11'49" |
| CG | Deer Creek | Headwaters to confluence with unnamed tributary at 36°26'15"/112°28'20" |
| CG | Detrital Wash | Headwaters to Lake Mead |
| CG | Dogtown Reservoir | 35°12'40"/112°07'54" |
| CG | Dragon Creek | Headwaters to confluence with Milk Creek |
| CG | Dragon Creek | Below confluence with Milk Creek to confluence with Crystal Creek |
| CG | Gonzalez Lake | 35°15'26"/112°12'09" |
| CG | Grand Wash | Headwaters to Colorado River |
| CG | Grapevine Creek | Headwaters to confluence with the Colorado River |
| CG | Grapevine Wash | Headwaters to Colorado River |
| CG | Hakatai Canyon | Headwaters to confluence with the Colorado River |
| CG | Hance Creek | Headwaters to confluence with the Colorado River |
| CG | Hermit Creek | Headwaters to Hermit Pack Trail crossing at 36°03'38"/112°14'00" |
| CG | Horn Creek | Headwaters to confluence with the Colorado River |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|----|--|---|
| CG | Hualapai Wash | Headwaters to Lake Mead |

| CG | Kwagunt Creek | Headwaters to confluence with unnamed tributary at 36°13'37"/111°54'50" |
| CG | Kwagunt Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Lonetree Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Matkatamiba Creek | Below Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Monument Creek | Headwaters to confluence with the Colorado River |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | National Canyon Creek | Headwaters to Hualapai Indian Reservation boundary at 36°15'15"/112°52'34" |
| CG | North Canyon Creek | Headwaters to confluence with unnamed tributary at 36°33'58"/111°55'41" |
| CG | North Canyon Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Olo Canyon | Headwaters to confluence with the Colorado River |
| CG | Parashant Canyon | Headwaters to confluence with unnamed tributary at 36°21'02"/113°27'56" |
| CG | Parashant Canyon | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Phantom Creek | Headwaters to confluence with unnamed tributary at 36°09'29"/112°08'13" |
| CG | Red Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Roaring Springs | 36°11'45"/112°02'06" |
| CG | Roaring Springs Creek | Headwaters to confluence with Bright Angel Creek |
| CG | Royal Arch Creek | Headwaters to confluence with the Colorado River |
| CG | Ruby Canyon | Headwaters to confluence with the Colorado River |
| CG | Russell Tank | 35°52'21"/111°52'45" |
| CG | Saddle Canyon Creek | Headwaters to confluence with unnamed tributary at 36°21'36"/112°22'43" |
| CG | Saddle Canyon Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Santa Fe Reservoir | 35°14'31"/112°11'10" |
| CG | Sapphire Canyon | Headwaters to confluence with the Colorado River |
| CG | Serpentine Canyon | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Headwaters to confluence with unnamed tributary at 36°18'18"/112°18'07" |
| CG | Slate Creek | Headwaters to confluence with the Colorado River |
| CG | Spring Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Trail Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Transept Canyon | Headwaters to Grand Canyon National Park North Rim WWTP outfall at 36°12'20"/112°03'35" |
| CG | Transept Canyon | From 1 km downstream of the Grand Canyon National Park North Rim WWTP outfall to confluence with Bright Angel Creek |
| CG | Transept Canyon (EDW) | Grand Canyon National Park North Rim WWTP outfall to 1 km downstream |
| CG | Travertine Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Turquoise Canyon | Headwaters to confluence with the Colorado River |
| CG | Unkar Creek | Below confluence with unnamed tributary at 36°07'54"/111°54'06" to confluence with Colorado River |
| CG | Unnamed Wash to Cedar Canyon (EDW) | Grand Canyon National Park Desert View WWTP outfall at 36°02'06"/111°49'13" to confluence with Cedar Canyon |
| CG | Unnamed Wash to Spring Valley Wash (EDW) | Valle Airpark WRF outfall at 35°38'34"/112°09'22" to confluence with Spring Valley Wash |
| CG | Vishnu Creek | Headwaters to confluence with the Colorado River |
| CG | Warm Springs Creek | Headwaters to confluence with the Colorado River |
| CG | West Cataract Creek | Headwaters to confluence with Cataract Creek |
| CL | Columbus Wash | Headwaters to confluence with the Gila River |
| CL | Holy Moses Wash | Headwaters to City of Kingman Downtown WWTP outfall at 35°10'33"/114°03'46" |
| CL | Holy Moses Wash | From 3 km downstream of City of Kingman Downtown WWTP outfall to confluence with Sawmill Wash |
| CL | Holy Moses Wash (EDW) | City of Kingman Downtown WWTP outfall to 3 km downstream |
| CL | Mohave Wash | Headwaters to Lower Colorado River |
| CL | Painted Rock (Borrow Pit) Lake | 33°04'55"/113°01'17" |
| CL | Quigley Pond | 32°43'40"/113°57'44" |
| CL | Redondo Lake | 32°44'32"/114°29'03" |
| CL | Sacramento Wash | Headwaters to Topock Marsh |
| CL | Sawmill Canyon | Headwaters to abandoned gaging station at 35°09'45"/113°57'56" |
| CL | Sawmill Canyon | Below abandoned gaging station to confluence with Holy Moses Wash |
| CL | Tyson Wash (EDW) | Town of Quartzsite WWTP outfall at 33°42'39"/114°13'10" to 1 km downstream |
| CL | Wellton Canal | Wellton-Mohawk Irrigation District |
| CL | Yuma Area Canals | Above municipal water treatment plant intakes |
| CL | Yuma Area Canals | Below municipal water treatment plant intakes and all drains |
| LC | Als Lake | 35°02'10"/111°25'17" |

Historical Note

Table C made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-217. Best Management Practices for non-WOTUS Protected Surface Waters

- A.** The BMPs described in this rule are intended to ensure that activities within the ordinary high-water mark of perennial or intermittent non-WOTUS protected surface waters, or within the bed and bank of other waters that materially impact (i.e., are within 1/4 mile upstream of) non-WOTUS protected surface waters, do not violate applicable surface water quality standards in the non-WOTUS protected surface waters. For purposes of this Section, the activities described in the prior sentence will be referred to as “regulated activities.” Depending on the regulated activities conducted, not all of the BMPs described below may be applicable to a particular project. The owner or operator is responsible to consider the BMPs outlined below and to implement those necessary to ensure that the regulated activities will not violate applicable surface water quality standards in the non-WOTUS protected surface water.
- B.** The BMPs described below are not applicable to any activities that are addressed under an individual or general AZPDES permit that are otherwise regulated under A.R.S. Title 49.
- C.** Erosion and sedimentation control BMPs:
 - 1. When flow is present in any non-WOTUS protected surface waters within a project area, flow shall not be altered except to prevent erosion or pollution of any non-WOTUS protected surface waters.
 - 2. Any disturbance within the ordinary high-water mark of non-WOTUS protected surface waters or within the bed and banks of other waters, that is not intended to be permanently altered, shall be stabilized as soon as practicable to prevent erosion and sedimentation.
 - 3. When flow in any non-WOTUS protected surface water is sufficient to erode, carry, or deposit material, regulated activities shall cease until:
 - a. The flow decreases below the point where sediment movement ceases; or
 - b. Control measures have been undertaken, i.e., equipment and material easily transported by flow are protected within non-erodible barriers or moved outside the flow area.
 - 4. Silt laden or turbid water resulting from regulated activities should be managed in a manner to reduce sediment load prior to discharging.
 - 5. No washing or dewatering of fill material should occur within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters. Other than the replacement of native fill or material used to support vegetation rooting or growth, fill placed within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water must resist washout whether such resistance is derived via particle size limits, presence of a binder, vegetation, or other armoring.

D. Pollutant management BMPs:

- 1. If regulated activities are likely to violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water, operations shall cease until the problem is resolved or until control measures have been implemented.
- 2. Construction material and/or fill (other than native fill or that necessary to support revegetation) placed within surface waters as a result of regulated activities shall not include pollutants in concentrations that will violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water.

E. Construction phase BMPs:

- 1. Equipment staging and storage areas or fuel, oil, and other petroleum products storage and solid waste containment should not be located within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water.
- 2. Any equipment maintenance, washing, or fueling shall not be done within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters with the following exception: Equipment too large or unwieldy to be readily moved, such as large cranes, may be fueled and serviced in non-WOTUS protected surface waters (but outside of standing or flowing water) provided material specifically manufactured and sold as spill containment is in place during fueling/servicing.
- 3. All equipment shall be inspected for leaks, all leaks shall be repaired, and all repaired equipment shall be cleaned to remove any fuel or other fluid residue prior to use within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
- 4. Washout of concrete handling equipment shall not take place within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.

F. Post-construction BMPs:

- 1. Upon completion of regulated activities, areas within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters shall be promptly cleared of all forms, piling, construction residues, equipment, debris, or other obstructions.
- 2. If fully, partially, or occasionally submerged structures are constructed of cast-in-place concrete instead of pre-cast concrete, steps will be taken using sheet piling or temporary dams to prevent contact between water (instream and runoff) and the concrete until it cures and until any curing agents have evaporated or are no longer a pollutant threat.
- 3. Any permanent water crossings within the ordinary high-water mark of any perennial or intermittent in a non-WOTUS protected surface water (other than fords) shall

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

not be equipped with gutters, drains, scuppers, or other conveyances that allow untreated runoff (due to events equal to or lesser in magnitude than the design event for the crossing structure) to directly enter a non-WOTUS protected surface water if such runoff can be directed to a local stormwater drainage, containment, and/or treatment system.

4. Debris shall be cleared as needed from culverts, ditches, dips, and other drainage structures within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water to prevent clogging or conditions that may lead to a washout.
 5. Temporary structures constructed or imported materials shall be removed no later than upon completion of the regulated activities.
 6. Temporary structures constructed of native materials, if they provide an obstacle to flow or can contribute to or cause erosion, or cause changes in sediment load, shall be removed no later than upon completion of the regulated activities.
- G. Design consideration BMPs:**
1. All temporary structures constructed of imported materials and all permanent structures, including but not limited to, access roadways, culvert crossings, staging areas, material stockpiles, berms, dikes, and pads, shall be constructed so as to accommodate overtopping and resist washout by streamflow.
 2. Any temporary crossing, other than fords on native material, shall be constructed in such a manner so as to provide armoring of the stream channel. Materials used to provide this armoring shall not include anything easily transportable by flow. Examples of acceptable materials include steel plates, untreated wooden planks, pre-cast concrete planks or blocks. Examples of unacceptable materials include clay, silt, sand, and gravel finer than cobble (roughly fist-sized). The armoring shall, via mass, anchoring systems, or a combination of the two, resist washout.
- H. Notification.** The owner or operator of any regulated activities shall, five days prior to initiation of the regulated activities, submit a notice to ADEQ on a form that includes basic information including the GPS location, the waterbody ID of the nearest non-WOTUS protected surface water, general description of planned activities, types of BMPs to be employed during the project, and phone number and email for a contact person. Work may proceed after five calendar days have passed since the owner/operator provided notification to ADEQ unless ADEQ responds in writing to the contact person for the owner/operator.
- I. Exclusions:** The BMPs and notification requirements in this Section shall not apply to:
1. Activities that are already regulated under A.R.S. Title 49.
 2. Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 3. Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 4. Maintenance but not construction of drainage ditches.
 5. Construction and maintenance of irrigation ditches.
 6. Maintenance of structures as dams, dikes, and levees.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix A. Repealed**Historical Note**

Former Section R9-21-208, Appendices 1 through 9 renumbered and amended as new Appendix A adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

Appendix B. Repealed**Historical Note**

Former R9-21-209, Table 1 and Table 2 renumbered and amended as Appendix B adopted effective January 7, 1985 (Supp.85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

ARTICLE 3. RECLAIMED WATER QUALITY STANDARDS**R18-11-301. Definitions**

The terms in this Article have the following meanings:

“Direct reuse” has the meaning prescribed in R18-9-701(1).

“Disinfection” means a treatment process that uses oxidants, ultraviolet light, or other agents to kill or inactivate pathogenic organisms in wastewater.

“Filtration” means a treatment process that removes particulate matter from wastewater by passage through porous media.

“Gray water” means wastewater, collected separately from a sewage flow, that originates from a clothes washer, bathtub, shower, or sink, but it does not include wastewater from a kitchen sink, dishwasher, or a toilet.

“Industrial wastewater” means wastewater generated from an industrial process.

“Landscape impoundment” means a manmade lake, pond, or impoundment of reclaimed water where swimming, wading, boating, fishing, and other water-based recreational activities are prohibited. A landscape impoundment is created for storage, landscaping, or for aesthetic purposes only.

“NTU” means nephelometric turbidity unit.

“On-site wastewater treatment facility” has the meaning prescribed in A.R.S. § 49-201(24).

“Open access” means that access to reclaimed water by the general public is uncontrolled.

“Reclaimed water” has the meaning prescribed in A.R.S. § 49-201(31).

“Recreational impoundment” means a manmade lake, pond, or impoundment of reclaimed water where boating or fishing is an intended use of the impoundment. Swimming and other full-body recreation activities (for example, water-skiing) are prohibited in a recreational impoundment.

“Restricted access” means that access to reclaimed water by the general public is controlled.

“Secondary treatment” means a biological treatment process that achieves the minimum level of effluent quality defined by the federal secondary treatment regulation at 40 CFR § 133.102.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

“Sewage” means untreated wastes from toilets, baths, sinks, lavatories, laundries, and other plumbing fixtures in places of human habitation, employment, or recreation.

Historical Note

Adopted effective July 9, 1981 (Supp. 81-4). Former Section R9-21-301 renumbered without change as Section R18-11-301 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-302. Applicability

This Article applies to the direct reuse of reclaimed water, except for:

1. The direct reuse of gray water, or
2. The direct reuse of reclaimed water from an onsite wastewater treatment facility regulated by a general Aquifer Protection Permit under 18 A.A.C. 9, Article 3.

Historical Note

Adopted effective June 8, 1981 (Supp. 81-3). Amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-302 renumbered without change as Section R18-11-302 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-303. Class A+ Reclaimed Water

- A. Class A+ reclaimed water is wastewater that has undergone secondary treatment, filtration, nitrogen removal treatment, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A+ reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A+ reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
 3. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.

- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A+ reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.
- D. Class A+ reclaimed water is not required for any type of direct reuse. A person may use Class A+ reclaimed water for any type of direct reuse listed in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-303 renumbered without change as Section R18-11-303 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-304. Class A Reclaimed Water

- A. Class A reclaimed water is wastewater that has undergone secondary treatment, filtration, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in subsection (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tion (B)(2) before discharge to a reclaimed water distribution system.

- D. A person shall use Class A reclaimed water for a type of direct reuse listed as Class A in Table A. A person may use Class A reclaimed water for a type of direct reuse listed as Class B or Class C in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-304 renumbered without change as Section R18-11-304 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-305. Class B+ Reclaimed Water

- A. Class B+ reclaimed water is wastewater that has undergone secondary treatment, nitrogen removal treatment, and disinfection.
- B. An owner of a facility shall ensure that:
1. Class B+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
 2. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.
- C. Class B+ reclaimed water is not required for a type of direct reuse. A person may use Class B+ reclaimed water for a type of direct reuse listed as Class B or Class C in Table A. A person shall not use Class B+ reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-306. Class B Reclaimed Water

- A. Class B reclaimed water is wastewater that has undergone secondary treatment and disinfection.
- B. An owner of a facility shall ensure that Class B reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
1. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 2. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
- C. A person shall use a minimum of Class B reclaimed water for a type of direct reuse listed as Class B in Table A. A person may use Class B reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class B reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-307. Class C Reclaimed Water

- A. Class C reclaimed water is wastewater that has undergone secondary treatment in a series of wastewater stabilization ponds, including aeration, with or without disinfection.
- B. The owner of a facility shall ensure that:
1. The total retention time of Class C reclaimed water in wastewater stabilization ponds is at least 20 days.
 2. Class C reclaimed water meets the following criteria after treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven reclaimed water samples taken is less than 1000 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 4000 / 100 ml.
- C. A person shall use a minimum of Class C reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class C reclaimed water for a type of direct reuse listed as Class A or Class B in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-308. Industrial Reuse

- A. The reclaimed water quality requirements for the following direct reuse applications are industry-specific and shall be determined by the Department on a case-by-case basis in a reclaimed water permit issued by the Department under 18 A.A.C. 9, Article 7:
1. Direct reuse of industrial wastewater containing sewage.
 2. Direct reuse of industrial wastewater for the production or processing of any crop used as human or animal food.
- B. The Department shall use best professional judgment to determine the reclaimed water quality requirements needed to protect public health and the environment for a type of direct reuse specified in subsection (A).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-309. Reclaimed Water Quality Standards for an Unlisted Type of Direct Reuse

- A. The Department may prescribe in an individual reclaimed water permit issued under 18 A.A.C. 9, Article 7, reclaimed water quality requirements for a type of direct reuse not listed in Table A. Before permitting a direct reuse of reclaimed water not listed in Table A, the Department shall, using its best professional judgment, determine and require compliance with reclaimed water quality requirements needed to protect public health and the environment.
- B. Department may determine that Class A+, A, B+, B, or C reclaimed water is appropriate for a new type of direct reuse.
- C. The Department shall consider the following factors when prescribing reclaimed water quality requirements for a new type of direct reuse:
1. The risk to public health;
 2. The degree of public access to the site where the reclaimed water is reused and human exposure to the reclaimed water;
 3. The level of treatment necessary to ensure that the reclaimed water is aesthetically acceptable;
 4. The level of treatment necessary to prevent nuisance conditions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

5. Specific water quality requirements for the intended type of direct reuse;
6. The means of application of the reclaimed water;
7. The degree of treatment necessary to avoid a violation of surface water quality standards or aquifer water quality standards;
8. The potential for improper or unintended use of the reclaimed water;
9. The reuse guidelines, criteria, or standards adopted or recommended by the U.S. Environmental Protection Agency or other federal or state agencies that apply to the new type of direct reuse; and
10. Similar wastewater reclamation experience of reclaimed water providers in the United States.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

Table A. Minimum Reclaimed Water Quality Requirements for Direct Reuse

| Type of Direct Reuse | Minimum Class of Reclaimed Water Required |
|--|---|
| Irrigation of food crops | A |
| Recreational impoundments | A |
| Residential landscape irrigation | A |
| Schoolground landscape irrigation | A |
| Open access landscape irrigation | A |
| Toilet and urinal flushing | A |
| Fire protection systems | A |
| Spray irrigation of an orchard or vineyard | A |
| Commercial closed loop air conditioning systems | A |
| Vehicle and equipment washing (does not include self-service vehicle washes) | A |
| Snowmaking | A |
| Surface irrigation of an orchard or vineyard | B |
| Golf course irrigation | B |
| Restricted access landscape irrigation | B |
| Landscape impoundment | B |
| Dust control | B |
| Soil compaction and similar construction activities | B |
| Pasture for milking animals | B |
| Livestock watering (dairy animals) | B |
| Concrete and cement mixing | B |
| Materials washing and sieving | B |
| Street cleaning | B |
| Pasture for non-dairy animals | C |
| Livestock watering (non-dairy animals) | C |
| Irrigation of sod farms | C |
| Irrigation of fiber, seed, forage, and similar crops | C |
| Silviculture | C |

Note: Nothing in this Article prevents a wastewater treatment plant from using a higher quality reclaimed water for a type of direct reuse than the minimum class of reclaimed water listed in Table A. For example, a wastewater treatment plant may provide Class A reclaimed water for a type of direct reuse where Class B or Class C reclaimed water is acceptable.

Historical Note

New Table adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

ARTICLE 4. AQUIFER WATER QUALITY STANDARDS

R18-11-401. Definitions

In addition to the definitions contained in A.R.S. §§ 49-101 and 49-201, the terms of this Article shall have the following meanings:

1. "Beta particle and photon radioactivity from man-made radionuclides" means all radionuclides emitting beta particles or photons, except Thorium-232, Uranium-235, Uranium-238 and their progeny.
2. "Dose equivalent" means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements.
3. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
4. "Gross alpha particle activity" means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.
5. "Mg/l" means milligrams per liter.
6. "Millirem" means 1/1000 of a rem. A rem means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system.
7. "Non-drinking water protected use" means the protection and maintenance of aquifer water quality for a use other than for human consumption.
8. "pCi" means picocurie, or the quantity of radioactive material producing 2.22 nuclear transformations per minute.
9. "Total trihalomethanes" means the sum of the concentrations of the following trihalomethane compounds: trichloromethane (chloroform), dibromo-chloromethane, bromodichloromethane and tribromo-methane (bromoform).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3).

R18-11-402. Repealed

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Repealed effective August 14, 1992 (Supp. 92-3).

R18-11-403. Analytical Methods

Analysis of a sample to determine compliance with an aquifer water quality standard shall be in accordance with an analytical method specified in A.A.C. Title 9, Chapter 14, Article 6 or an alternative analytical method that is approved by the Director of the Arizona Department of Health Services pursuant to A.A.C. R9-14-610(C).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3). Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-404. Laboratories

A test result from a sample taken to determine compliance with an aquifer water quality standard shall be valid only if the sample has

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

been analyzed by a laboratory that is licensed by the Arizona Department of Health Services for the analysis performed.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-405. Narrative Aquifer Water Quality Standards

- A. A discharge shall not cause a pollutant to be present in an aquifer classified for a drinking water protected use in a concentration which endangers human health.
- B. A discharge shall not cause or contribute to a violation of a water quality standard established for a navigable water of the state.
- C. A discharge shall not cause a pollutant to be present in an aquifer which impairs existing or reasonably foreseeable uses of water in an aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-406. Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- A. The aquifer water quality standards in this Section apply to aquifers that are classified for drinking water protected use.
- B. The following are the aquifer water quality standards for inorganic chemicals:

| Pollutant | mg/L |
|----------------------------|--|
| Antimony | 0.006 |
| Arsenic | 0.05 |
| Asbestos | 7 million fibers/liter (longer than 10 mm) |
| Barium | 2 |
| Beryllium | 0.004 |
| Cadmium | 0.005 |
| Chromium | 0.1 |
| Cyanide (As Free Cyanide) | 0.2 |
| Fluoride | 4.0 |
| Lead | 0.05 |
| Mercury | 0.002 |
| Nickel | 0.1 |
| Nitrate (as N) | 10 |
| Nitrite (as N) | 1 |
| Nitrate and nitrite (as N) | 10 |
| Selenium | 0.05 |
| Thallium | 0.002 |

- C. The following are the aquifer water quality standards for organic chemicals:

| Pollutant | (mg/L) |
|----------------------------|--------|
| Benzene | 0.005 |
| Benzo (a) pyrene | 0.0002 |
| Carbon Tetrachloride | 0.005 |
| o-Dichlorobenzene | 0.6 |
| para-Dichlorobenzene | 0.075 |
| 1,2-Dichloroethane | 0.005 |
| 1,1-Dichloroethylene | 0.007 |
| cis-1,2-Dichloroethylene | 0.07 |
| trans-1,2-Dichloroethylene | 0.1 |
| 1,2-Dichloropropane | 0.005 |
| Dichloromethane | 0.005 |
| Di (2-ethylhexyl) adipate | 0.4 |
| Di (2-ethylhexyl) pthalate | 0.006 |

| | |
|---------------------------|------------|
| Ethylbenzene | 0.7 |
| Hexachlorobenzene | 0.001 |
| Hexachlorocyclopentadiene | 0.05 |
| Monochlorobenzene | 0.1 |
| Pentachlorophenol | 0.001 |
| Styrene | 0.1 |
| 2,3,7,8-TCDD (Dioxin) | 0.00000003 |
| Tetrachloroethylene | 0.005 |
| Toluene | 1 |
| Trihalomethanes (Total) | 0.10 |
| 1,2,4-Trichlorobenzene | 0.07 |
| 1,1,1-Trichloroethane | 0.20 |
| 1,1,2-Trichloroethane | 0.005 |
| Trichloroethylene | 0.005 |
| Vinyl Chloride | 0.002 |
| Xylenes (Total) | 10 |

- D. The following are the aquifer water quality standards for pesticides and polychlorinated biphenyls (PCBs):

| Pollutant | (mg/L) |
|---|---------|
| Alachlor | 0.002 |
| Atrazine | 0.003 |
| Carbofuran | 0.04 |
| Chlordane | 0.002 |
| Dalapon | 0.2 |
| 1,2-Dibromo-3-Chloropropane (DBCP) | 0.0002 |
| 2,4,-Dichlorophenoxyacetic Acid(2,4-D) | 0.07 |
| Dinoseb | 0.007 |
| Diquat | 0.02 |
| Endothall | 0.1 |
| Endrin | 0.002 |
| Ethylene Dibromide (EDB) | 0.00005 |
| Glyphosate | 0.7 |
| Heptachlor | 0.0004 |
| Heptachlor Epoxide | 0.0002 |
| Lindane | 0.0002 |
| Methoxychlor | 0.04 |
| Oxamyl | 0.2 |
| Picloram | 0.5 |
| Polychlorinated Biphenols (PCBs) | 0.0005 |
| Simazine | 0.004 |
| Toxaphene | 0.003 |
| 2,4,5-Trichlorophenoxypropionic Acid (2,4,5-TP or Silvex) | 0.05 |

- E. The following are the aquifer water quality standards for radionuclides:

1. The maximum concentration for gross alpha particle activity, including Radium-226 but excluding radon and uranium, shall not exceed 15 pCi/l.
2. The maximum concentration for combined Radium-226 and Radium-228 shall not exceed 5 pCi/l.
3. The average annual concentration of beta particle and photon radioactivity from man-made radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem/year.
4. Except for the radionuclides listed in this subsection, the concentration of man-made radionuclides causing 4 millirem total body or organ dose equivalents shall be calculated on the basis of a 2-liter-per-day drinking water intake using the 168-hour data listed in "Maximum Permissible Body Burdens and Maximum Permissible Con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

centration of Radionuclides in Air or Water for Occupational Exposure,” National Bureau of Standards Handbook 69, National Bureau of Commerce, as amended August 1963 (and no future editions), incorporated herein by reference and on file with the Office of the Secretary of State and with the Department. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirem/year. The following average annual concentrations are assumed to produce a total body or organ dose of 4 millirem/year:

| Radionuclide | Critical Organ | pCi/l |
|--------------|----------------|--------|
| Tritium | Total body | 20,000 |
| Strontium-90 | Bone Marrow | 8 |

- F. The aquifer water quality standard for microbiological contaminants is based upon the presence or absence of total coliforms in a 100-milliliter sample. If a sample is total coliform-positive, a 100-milliliter repeat sample shall be taken within two weeks of the time the sample results are reported. Any total coliform-positive repeat sample following a total coliform-positive sample constitutes a violation of the aquifer water quality standard for microbiological contaminants.
- G. The following are the aquifer water quality standards for turbidity:
- One nephelometric turbidity unit as determined by a monthly average except that five or fewer nephelometric turbidity units may be allowed if it can be determined that the higher turbidity does not interfere with disinfection, prevent maintenance of effective disinfectant agents in water supply distribution systems, or interfere with microbiological determinations.
 - Five nephelometric turbidity units based on an average of two consecutive days.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended effective May 26, 1994 (Supp. 94-2).

R18-11-407. Aquifer Water Quality Standards in Reclassified Aquifers

- A. All aquifers in the state are classified for drinking water protected use except for aquifers which are reclassified to a non-drinking water protected use pursuant to A.R.S. § 49-224 and A.A.C. R18-11-503.
- B. Aquifer water quality standards for drinking water protected use apply to reclassified aquifers except where expressly superseded by aquifer water quality standards adopted pursuant to subsection (C).
- C. The Director shall adopt, by rule, aquifer water quality standards for reclassified aquifers within one year of the date of the order reclassifying the aquifer to a nondrinking water protected use. The Director shall adopt aquifer water quality standards for reclassified aquifers only for pollutants that are specifically identified in a petition for reclassification as prescribed by A.R.S. § 49-223(E) and A.A.C. R18-11-503(B). Aquifer water quality standards for reclassified aquifers shall be sufficient to protect the use of the reclassified aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-408. Petition for Adoption of a Numeric Aquifer Water Quality Standard

- A. Any person may petition the Director to adopt, by rule, a numeric aquifer water quality standard for a pollutant for which no numeric aquifer water quality standard exists.
- B. Petitions for adoption of a numeric aquifer water quality standard shall be filed with the Department and shall comply with the requirements applicable to petitions for rule adoption as provided by A.R.S. § 41-1033 and A.A.C. R18-1-302, except as otherwise provided by A.R.S. § 49-223 or this Section.
- C. In addition to the requirements of A.A.C. R18-1-302, a petition for rule adoption to establish a numeric aquifer water quality standard shall include specific reference to:
- Technical information that the pollutant is a toxic pollutant.
 - Technical information upon which the Director reasonably may base the establishment of a numeric aquifer water quality standard.
 - Evidence that the pollutant that is the subject of the petition is or may in the future be present in an aquifer or part of an aquifer that is classified for drinking water protected use. Evidence may include, but is not limited to, any of the following:
 - A laboratory analysis of a water sample by a laboratory licensed by the Arizona Department of Health Services which indicates the presence of the pollutant in the aquifer.
 - A hydrogeological study which demonstrates that the pollutant that is the subject of the petition may be present in an aquifer in the future. The hydrogeological study shall include the following:
 - A description of the use that results in a discharge of the pollutant that is the subject of the petition.
 - A description of the mobility of the pollutant in the vadose zone and in the aquifer.
 - A description of the persistence of the pollutant in the vadose zone and in the aquifer.
- D. Within 180 calendar days of the receipt of a complete petition for rule adoption to establish a numeric aquifer water quality standard, the Director shall make a written determination of whether the petition should be granted or denied. The Director shall give written notice by regular mail of the determination to the petitioner.
- E. If the petition for rule adoption is granted, the Director shall initiate rulemaking proceedings to adopt a numeric aquifer water quality standard. The Director shall, within one year of the date that the petition for adoption of a numeric aquifer water quality standard is granted, either adopt a rule establishing a numeric aquifer water quality standard or publish a notice of termination of rulemaking in the Arizona Administrative Register.
- F. If the petition for rule adoption is denied, the Director shall issue a denial letter to the petitioner which explains the reasons for the denial. The denial of a petition for rule adoption to establish a numeric aquifer water quality standard is not subject to judicial review.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).

ARTICLE 5. AQUIFER BOUNDARY AND PROTECTED USE CLASSIFICATION**R18-11-501. Definitions**

In addition to the definitions contained in A.R.S. § 49-201, the words and phrases of this Article shall have the following meaning:

1. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
2. "Hardrock areas containing little or no water" means areas of igneous or metamorphic rock which do not yield usable quantities of water.
3. "Nondrinking water protected use" means the protection and maintenance of aquifer water quality for a use other than human consumption.
4. "Usable quantities" means five gallons of water per day.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-502. Aquifer Boundaries

- A. Except as provided in subsection (B), aquifer boundaries for the aquifers in this state are identified and defined as being identical to the hydrologic basin and subbasin boundaries, as found by the Director of the Department of Water Resources, Findings and Order In the Matter of The Designation of Groundwater Basins and Subbasins In The State of Arizona (dated June 21, 1984), pursuant to A.R.S. §§ 45-403 and 45-404, which is incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.
- B. Excluded from the boundaries of the aquifers are hard rock areas which contain little or no water, as identified in Plate 1 of the Department of Water Resources, Water Resource Hydro-

logic Map Series Report Number 2 (dated January 1981) and as further identified in the Bureau of Mines, University of Arizona County Geologic Map Series (individual county maps dated 1957 through 1960), which are incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.

- C. The Director may, by rule, modify or add an aquifer boundary provided that one or more of the following applies:
 1. The Department of Water Resources modifies the boundaries of its basins or subbasins.
 2. The Director is made aware of new technical information or data which supports refinement of an aquifer boundary.
- D. Facilities located outside of the boundaries defined in these rules shall be subject to A.R.S. § 49-241 except as provided therein.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-503. Petition for reclassification

- A. Any person may petition the Director to reclassify an aquifer from a drinking water protected use to a nondrinking water protected use pursuant to A.R.S. § 49-224(C).
- B. A written petition for reclassification pursuant to A.R.S. § 49-224(C) or A.R.S. § 49-224(D) shall be filed with the Department and shall include the following categories of information:
 1. The proposed protected use for which the reclassification is being requested.
 2. The pollutant and affected aquifer water quality standards for which the reclassification is being requested.
 3. A hydrogeologic report which demonstrates that the aquifer proposed for reclassification is or will be hydrologically isolated, to the extent described in A.R.S. § 49-224(C)(1). This report and demonstration of hydrologic isolation for the area containing such aquifer, and immediate adjacent geologic units, shall include at least the following:
 - a. Hydrogeologic area maps and cross sections.
 - b. An analysis of subsurface geology, including geologic and hydrologic separation.
 - c. Water level elevation or piezometric level contour maps.
 - d. Analysis of hydrologic characteristics of the aquifer and the immediate adjacent geologic units.
 - e. Description of existing water quality and analysis of water chemistry.
 - f. Projected annual quantity of water to be withdrawn.
 - g. Identification of pumping centers, cones of depression and areas of recharge.
 - h. A water balance.
 - i. Existing flow direction and evaluation of the effects of seasonal and future pumping on flow.
 - j. An evaluation as to whether the reclassification will contribute to or cause a violation of aquifer water quality standards in other aquifers, or in parts of the aquifer not being proposed for reclassification.
 4. Documentation demonstrating that water from the aquifer or part of the aquifer for which reclassification is pro-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

posed is not being used as drinking water. This documentation shall include at least the following:

- a. A list of all wells or springs including their location, ownership and use within the aquifer or part of the aquifer being proposed for reclassification.
 - b. Identification of groundwater withdrawal rights, on file with the Department of Water Resources, within the aquifer or part of the aquifer being proposed for reclassification.
 - c. A comprehensive list of agencies, persons and other information sources consulted for aquifer use documentation.
5. A cost-benefit analysis developed pursuant to the requirements of A.R.S. § 49-224(C)(3), except for petitions submitted pursuant to A.R.S. § 49-224(D). This analysis shall identify potential future uses of the aquifer being proposed for reclassification, as well as other opportunity costs associated with reclassification, and shall contain a description of the cost-benefit methodology used, including all assumptions, data, data sources and criteria considered and all supporting statistical analyses.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-504. Agency Action on Petition

- A. Upon receipt of a petition for reclassification, the Director shall review the petition for compliance with the requirements of R18-11-503. If additional information is necessary, the petitioner shall be notified of specific deficiencies in writing within 30 calendar days of receipt of the petition.
- B. Within 120 calendar days after receipt of a complete petition, and after consultation with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C), the Director shall make a final decision to grant or deny the petition and shall notify the petitioner of such decision and the reason for such determination in writing.
- C. Upon a decision to grant a petition for aquifer reclassification, the Director shall initiate proceedings for promulgation of aquifer water quality standards and, if applicable, for aquifer boundary designation for the reclassified aquifers.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-505. Public participation

- A. Within 30 days of receipt of a complete petition for reclassification filed pursuant to A.R.S. § 49-224(D), or if the Director deems it necessary to consider a reclassification under A.R.S. § 49-224(C), the Director shall give public notice of the proposed reclassification pursuant to A.A.C. R18-1-401.
- B. The Director shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification. The Director shall give notice of each public hearing and conduct the public hearing in accordance with the provisions of A.A.C. R18-1-402.

Historical Note

Adopted effective June 29, 1989 (Supp. 89-2).

R18-11-506. Rescission of Reclassification

The Director may, by rule, rescind an aquifer reclassification and return an aquifer to a drinking water protected use if he determines that any of the conditions under which the reclassification was

granted are no longer valid. If the Director initiates a change under this Section, he shall consult with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C).

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

ARTICLE 6. IMPAIRED WATER IDENTIFICATION

Article 6, consisting of Sections R18-11-601 through R18-11-606, made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-601. Definitions

In addition to the definitions established in A.R.S. §§ 49-201 and 49-231, and A.A.C. R18-11-101, the following terms apply to this Article:

1. "303(d) List" means the list of surface waters or segments required under section 303(d) of the Clean Water Act and A.R.S. Title 49, Chapter 2, Article 2.1, for which TMDLs are developed and submitted to EPA for approval.
2. "Attaining" means there is sufficient, credible, and scientifically defensible data to assess a surface water or segment and the surface water or segment does not meet the definition of impaired or not attaining.
3. "AZPDES" means the Arizona Pollutant Elimination Discharge System.
4. "Credible and scientifically defensible data" means data submitted, collected, or analyzed using:
 - a. Quality assurance and quality control procedures under A.A.C. R18-11-602;
 - b. Samples or analyses representative of water quality conditions at the time the data were collected;
 - c. Data consisting of an adequate number of samples based on the nature of the water in question and the parameters being analyzed; and
 - d. Methods of sampling and analysis, including analytical, statistical, and modeling methods that are generally accepted and validated by the scientific community as appropriate for use in assessing the condition of the water.
5. "Designated use" means those uses specified in 18 A.A.C. 11, Article 1 for each surface water or segment whether or not they are facing.
6. "EPA" means the U.S. Environmental Protection Agency.
7. "Impaired water" means a Navigable water for which credible scientific data exists that satisfies the requirements of A.R.S. § 49-232 and that demonstrates that the water should be identified pursuant to 33 United States Code § 1313(d) and the regulations implementing that statute. A.R.S. § 49-231(1).
8. "Laboratory detection limit" means a "Method Reporting Limit" (MRL) or "Reporting Limit" (RL). These analogous terms describe the laboratory reported value, which is the lowest concentration level included on the calibration curve from the analysis of a pollutant that can be quantified in terms of precision and accuracy.
9. "Monitoring entity" means the Department or any person who collects physical, chemical, or biological data used for an impaired water identification or a TMDL decision.
10. "Naturally occurring condition" means the condition of a surface water or segment that would have occurred in the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- absence of pollutant loadings as a result of human activity.
11. "Not attaining" means a surface water is assessed as impaired, but is not placed on the 303(d) List because:
 - a. A TMDL is prepared and implemented for the surface water;
 - b. An action, which meets the requirements of R18-11-604(D)(2)(h), is occurring and is expected to bring the surface water to attaining before the next 303(d) List submission; or
 - c. The impairment of the surface water is due to pollution but not a pollutant, for which a TMDL load allocation cannot be developed.
 12. "NPDES" means National Pollutant Discharge Elimination System.
 13. "Planning List" means a list of surface waters and segments that the Department will review and evaluate to determine if the surface water or segment is impaired and whether a TMDL is necessary.
 14. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. 33 U.S.C. 1362(6). Characteristics of water, such as dissolved oxygen, pH, temperature, turbidity, and suspended sediment are considered pollutants if they result or may result in the non-attainment of a water quality standard.
 15. "Pollution" means "the man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water." 33 U.S.C. 1362(19).
 16. "QAP" means a quality assurance plan detailing how environmental data operations are planned, implemented, and assessed for quality during the duration of a project.
 17. "Sampling event" means one or more samples taken under consistent conditions on one or more days at a distinct station or location.
 18. "SAP" means a site specific sampling and analysis plan that describes the specifics of sample collection to ensure that data quality objectives are met and that samples collected and analyzed are representative of surface water conditions at the time of sampling.
 19. "Spatially independent sample" means a sample that is collected at a distinct station or location. The sample is independent if the sample was collected:
 - a. More than 200 meters apart from other samples, or
 - b. Less than 200 meters apart, and collected to characterize the effect of an intervening tributary, outfall or other pollution source, or significant hydrographic or hydrologic change.
 20. "Temporally independent sample" means a sample that is collected at the same station or location more than seven days apart from other samples.
 21. "Threatened" means that a surface water or segment is currently attaining its designated use, however, trend analysis, based on credible and scientifically defensible data, indicates that the surface water or segment is likely to be impaired before the next listing cycle.
 22. "TMDL" means total maximum daily load.
 23. "TMDL decision" means a decision by the Department to:
 - a. Prioritize an impaired water for TMDL development,
 - b. Develop a TMDL for an impaired water, or
 - c. Develop a TMDL implementation plan.
 24. "Total maximum daily load" means an estimation of the total amount of a pollutant from all sources that may be added to a water while still allowing the water to achieve and maintain applicable surface water quality standards. Each total maximum daily load shall include allocations for sources that contribute the pollutant to the water, as required by section 303(d) of the clean water act (33 United States Code section 1313(d)) and regulations implementing that statute to achieve applicable surface water quality standards. A.R.S. § 49-231(4).
 25. "Water quality standard" means a standard composed of designated uses (classification of waters), the numerical and narrative criteria applied to the specific water uses or classification, the antidegradation policy, and moderating provisions, for example, mixing zones, site-specific alternative criteria, and exemptions, in A.A.C. Title 18, Chapter 11, Article 1.
 26. "WQARF" means the water quality assurance revolving fund established under A.R.S. § 49-282.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-602. Credible Data

- A. Data are credible and relevant to an impaired water identification or a TMDL decision when:
 1. Quality Assurance Plan. A monitoring entity, which contribute data for an impaired water identification or a TMDL decision, provides the Department with a QAP that contains, at a minimum, the elements listed in subsections (A)(1)(a) through (A)(1)(f). The Department may accept a QAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 - a. An approval page that includes the date of approval and the signatures of the approving officials, including the project manager and project quality assurance manager;
 - b. A project organization outline that identifies all key personnel, organizations, and laboratories involved in monitoring, including the specific roles and responsibilities of key personnel in carrying out the procedures identified in the QAP and SAP, if applicable;
 - c. Sampling design and monitoring data quality objectives or a SAP that meets the requirements of subsection (A)(2) to ensure that:
 - i. Samples are spatially and temporally representative of the surface water,
 - ii. Samples are representative of water quality conditions at the time of sampling, and
 - iii. The monitoring is reproducible;
 - d. The following field sampling information to assure that samples meet data quality objectives:
 - i. Sampling and field protocols for each parameter or parametric group, including the sampling methods, equipment and containers, sample preservation, holding times, and any analysis

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- proposed for completion in the field or outside of a laboratory;
- ii. Field and laboratory methods approved under subsection (A)(5);
 - iii. Handling procedures to identify samples and custody protocols used when samples are brought from the field to the laboratory for analysis;
 - iv. Quality control protocols that describe the number and type of field quality control samples for the project that includes, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - v. Procedures for testing, inspecting, and maintaining field equipment;
 - vi. Field instrument calibration procedures that describe how and when field sampling and analytical instruments will be calibrated;
 - vii. Field notes and records that describe the conditions that require documentation in the field, such as weather, stream flow, transect information, distance from water edge, water and sample depth, equipment calibration measurements, field observations of watershed activities, and bank conditions. Indicate the procedures implemented for maintaining field notes and records and the process used for attaching pertinent information to monitoring results to assist in data interpretation;
 - viii. Minimum training and any specialized training necessary to do the monitoring, that includes the proper use and calibration of field equipment used to collect data, sampling protocols, quality assurance/quality control procedures, and how training will be achieved;
- e. Laboratory analysis methods and quality assurance/quality control procedures that assure that samples meet data quality objectives, including:
 - i. Analytical methods and equipment necessary for analysis of each parameter, including identification of approved laboratory methods described in subsection (A)(5), and laboratory detection limits for each parameter;
 - ii. The name of the designated laboratory, its license number, if licensed by the Arizona Department of Health Services, and the name of a laboratory contact person to assist the Department with quality assurance questions;
 - iii. Quality controls that describe the number and type of laboratory quality control samples for the project, including, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - iv. Procedures for testing, inspecting, and maintaining laboratory equipment and facilities;
 - v. A schedule for calibrating laboratory instruments, a description of calibration methods, and a description of how calibration records are maintained; and
 - vi. Sample equipment decontamination procedures that outline specific methods for sample collection and preparation of equipment, identify the frequency of decontamination, and describe the procedures used to verify decontamination;
 - f. Data review, management, and use that includes the following:
 - i. A description of the data handling process from field to laboratory, from laboratory to data review and validation, and from validation to data storage and use. Include the role and responsibility of each person for each step of the process, type of database or other storage used, and how laboratory and field data qualifiers are related to the laboratory result;
 - ii. Reports that describe the intended frequency, content, and distribution of final analysis reports and project status reports;
 - iii. Data review, validation, and verification that describes the procedure used to validate and verify data, the procedures used if errors are detected, and how data are accepted, rejected, or qualified; and
 - iv. Reconciliation with data quality objectives that describes the process used to determine whether the data collected meets the project objectives, which may include discarding data, setting limits on data use, or revising data quality objectives.
2. Sampling and analysis plan.
 - a. A monitoring entity shall develop a SAP that contains, at a minimum, the following elements:
 - i. The experimental design of the project, the project goals and objectives, and evaluation criteria for data results;
 - ii. The background or historical perspective of the project;
 - iii. Identification of target conditions, including a discussion of whether any weather, seasonal variations, stream flow, lake level, or site access may affect the project and the consideration of these factors;
 - iv. The data quality objectives for measurement of data that describe in quantitative and qualitative terms how the data meet the project objectives of precision, accuracy, completeness, comparability, and representativeness;
 - v. The types of samples scheduled for collection;
 - vi. The sampling frequency;
 - vii. The sampling periods;
 - viii. The sampling locations and rationale for the site selection, how site locations are benchmarked, including scaled maps indicating approximate location of sites; and
 - ix. A list of the field equipment, including tolerance range and any other manufacturer's specifications relating to accuracy and precision.
 - b. The Department may accept a SAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 3. The monitoring entity may include any of the following in the QAP or SAP:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- a. The name, title, and role of each person and organization involved in the project, identifying specific roles and responsibilities for carrying out the procedures identified in the QAP and SAP;
 - b. A distribution list of each individual and organization receiving a copy of the approved QAP and SAP;
 - c. A table of contents;
 - d. A health and safety plan;
 - e. The inspection and acceptance requirements for supplies;
 - f. The data acquisition that describes types of data not obtained through this monitoring activity, but used in the project;
 - g. The audits and response actions that describe how field, laboratory, and data management activities and sampling personnel are evaluated to ensure data quality, including a description of how the project will correct any problems identified during these assessments; and
 - h. The waste disposal methods that identify wastes generated in sampling and methods for disposal of those wastes.
4. Exceptions. The Department may determine that the following data are also credible and relevant to an impaired water identification or TMDL decision when data were collected, provided the conditions in subsections (A)(5), (A)(6), and (B) are met, and where the data were collected in the surface water or segment being evaluated for impairment:
 - a. The data were collected before July 12, 2002 and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2);
 - b. The data were collected after July 12, 2002 as part of an ongoing monitoring effort by a governmental agency and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2); or
 - c. The instream water quality data were or are collected under the terms of a NPDES or AZPDES permit or a compliance order issued by the Department or EPA, a consent decree signed by the Department or EPA, or a sampling program approved by the Department or EPA under WQARF or CERCLA, and the Department determines that the data yield results of comparable reliability to data collected under subsections (A)(1) and (A)(2).
 5. Data collection, preservation, and analytical procedures. The monitoring entity shall collect, preserve, and analyze data using methods of sample collection, preservation, and analysis established under A.A.C. R9-14-610.
 6. Laboratory. The monitoring entity shall ensure that chemical and toxicological samples are analyzed in a state-licensed laboratory, a laboratory exempted by the Arizona Department of Health Services for specific analyses, or a federal or academic laboratory that can demonstrate proper quality assurance/quality control procedures substantially equal to those required by the Arizona Department of Health Services, and shall ensure that the laboratory uses approved methods identified in A.A.C. R9-14-610.
- B. Documentation for data submission. The monitoring entity shall provide the Department with the following information either before or with data submission:
 1. A copy of the QAP or SAP, or both, revisions to a previously submitted QAP or SAP, and any other information necessary for the Department to evaluate the data under subsection (A)(4);
 2. The applicable dates of the QAP and SAP, including any revisions;
 3. Written assurance that the methods and procedures specified in the QAP and SAP were followed;
 4. The name of the laboratory used for sample analyses and its certification number, if the laboratory is licensed by the Arizona Department of Health Services;
 5. The quality assurance/quality control documentation, including the analytical methods used by the laboratory, method number, detection limits, and any blank, duplicate, and spike sample information necessary to properly interpret the data, if different from that stated in the QAP or SAP;
 6. The data reporting unit of measure;
 7. Any field notes, laboratory comments, or laboratory notations concerning a deviation from standard procedures, quality control, or quality assurance that affects data reliability, data interpretation, or data validity; and
 8. Any other information, such as complete field notes, photographs, climate, or other information related to flow, field conditions, or documented sources of pollutants in the watershed, if requested by the Department for interpreting or validating data.
 - C. Recordkeeping. The monitoring entity shall maintain all records, including sample results, for the duration of the listing cycle. If a surface water or segment is added to the Planning List or to the 303(d) List, the Department shall coordinate with the monitoring entity to ensure that records are kept for the duration of the listing.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-603. General Data Interpretation Requirements

- A. The Department shall use the following data conventions to interpret data for impaired water identifications and TMDL decisions:
 1. Data reported below laboratory detection limits.
 - a. When the analytical result is reported as $<X$, where X is the laboratory detection limit for the analyte and the laboratory detection limit is less than or equal to the surface water quality standard, consider the result as meeting the water quality standard:
 - i. Use these statistically derived values in trend analysis, descriptive statistics or modeling if there is sufficient data to support the statistical estimation of values reported as less than the laboratory detection limit; or
 - ii. Use one-half of the value of the laboratory detection limit in trend analysis, descriptive statistics, or modeling, if there is insufficient data to support the statistical estimation of values reported as less than the laboratory detection limit.
 - b. When the sample value is less than or equal to the laboratory detection limit but the laboratory detection limit is greater than the surface water quality standard, shall not use the result for impaired water identifications or TMDL decisions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

2. Identify the field equipment specifications used for each listing cycle or TMDL developed. A field sample measurement within the manufacturer's specification for accuracy meets surface water quality standards;
 3. Resolve a data conflict by considering the factors identified under the weight-of-evidence determination in R18-11-605(B);
 4. When multiple samples from a surface water or segment are not spatially or temporally independent, or when lake samples are from multiple depths, use the following resultant value to represent the specific dataset:
 - a. The appropriate measure of central tendency for the dataset for:
 - i. A pollutant listed in the surface water quality standards 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - ii. A chronic water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2;
 - iii. A surface water quality standard for a pollutant that is expressed as an annual or geometric mean;
 - iv. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - v. The surface water quality standard for radiocarbon in R18-11-109(G); or
 - vi. Except for chromium, all single sample maximum water quality standards in R18-11-112.
 - b. The maximum value of the dataset for:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and acute water quality standard in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1;
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A); or
 - iv. The 90th percentile water quality standard for nitrogen and phosphorus in R18-11-109(F) and R18-11-112.
 - c. The worst case measurement of the dataset for:
 - i. Surface water quality standard for dissolved oxygen under R18-11-109(E). For purposes of this subsection, worst case measurement means the minimum value for dissolved oxygen;
 - ii. Surface water quality standard for pH under R18-11-109(B). For purposes of this subsection, "worst case measurement" means both the minimum and maximum value for pH.
- B.** The Department shall not use the following data for placing a surface water or segment on the Planning List, the 303(d) List, or in making a TMDL decision.
1. Any measurement outside the range of possible physical or chemical measurements for the pollutant or measurement equipment,
 2. Uncorrected data transcription errors or laboratory errors, and
 3. An outlier identified through statistical procedures, where further evaluation determines that the outlier represents a valid measure of water quality but should be excluded from the dataset.
- C.** The Department may employ fundamental statistical tests if appropriate for the collected data and type of surface water when evaluating a surface water or segment for impairment or in making a TMDL decision. The statistical tests include descriptive statistics, frequency distribution, analysis of variance, correlation analysis, regression analysis, significance testing, and time series analysis.
- D.** The Department may employ modeling when evaluating a surface water or segment for impairment or in making a TMDL decision, if the method is appropriate for the type of waterbody and the quantity and quality of available data meet the requirements of R18-11-602. Modeling methods include:
1. Better Assessment Science Integrating Source and Non-point Sources (BASINS),
 2. Fundamental statistics, including regression analysis,
 3. Hydrologic Simulation Program-Fortran (HSPF),
 4. Spreadsheet modeling, and
 5. Hydrologic Engineering Center (HEC) programs developed by the Army Corps of Engineers.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-604. Types of Surface Waters Placed on the Planning List and 303(d) List

- A.** The Department shall evaluate, at least every five years, Arizona's surface waters by considering all readily available data.
1. The Department shall place a surface water or segment on:
 - a. The Planning List if it meets any of the criteria described in subsection (D), or
 - b. The 303(d) List if it meets the criteria for listing described in subsection (E).
 2. The Department shall remove a surface water or segment from the Planning List based on the requirements in R18-11-605(E)(1) or from the 303(d) List, based on the requirements in R18-11-605(E)(2).
 3. The Department may move surface waters or segments between the Planning List and the 303(d) List based on the criteria established in R18-11-604 and R18-11-605.
- B.** When placing a surface water or segment on the Planning List or the 303(d) List, the Department shall list the stream reach, derived from EPA's Reach File System or National Hydrography Dataset, or the entire lake, unless the data indicate that only a segment of the stream reach or lake is impaired or not attaining its designated use, in which case, the Department shall describe only that segment for listing.
- C.** Exceptions. The Department shall not place a surface water or segment on either the Planning List or the 303(d) List if the non-attainment of a surface water quality standard is due to one of the following:
1. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 2. The data were collected within a mixing zone or under a variance or nutrient waiver established in a NPDES or AZPDES permit for the specific parameter and the result does not exceed the alternate discharge limitation established in the permit. The Department may use data collected within these areas for modeling or allocating loads in a TMDL decision; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. An activity exempted under R18-11-117, R18-11-118, or a condition exempted under R18-11-119.
- D. Planning List.**
1. The Department shall:
 - a. Use the Planning List to prioritize surface waters for monitoring and evaluation as part of the Department's watershed management approach;
 - b. Provide the Planning List to EPA; and
 - c. Evaluate each surface water and segment on the Planning List for impairment based on the criteria in R18-11-605(D) to determine the source of the impairment.
 2. The Department shall place a surface water or segment on the Planning List based the criteria in R18-11-605(C). The Department may also include a surface water or segment on the Planning List when:
 - a. A TMDL is completed for the pollutant and approved by EPA;
 - b. The surface water or segment is on the 1998 303(d) List but the dataset used for the listing:
 - i. Does not meet the credible data requirements of R18-11-602, or
 - ii. Contains insufficient samples to meet the data requirements under R18-11-605(D);
 - c. Some monitoring data exist but there are insufficient data to determine whether the surface water or segment is impaired or not attaining, including:
 - i. A numeric surface water quality standard is exceeded, but there are not enough samples or sampling events to fulfill the requirements of R18-11-605(D);
 - ii. Evidence exists of a narrative standard violation, but the amount of evidence is insufficient, based on narrative implementation procedures and the requirements of R18-11-605(D)(3);
 - iii. Existing monitoring data do not meet credible data requirements in R18-11-602; or
 - iv. A numeric surface water quality standard is exceeded, but there are not enough sample results above the laboratory detection limit to support statistical analysis as established in R18-11-603(A)(1).
 - d. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act, but insufficient current or original monitoring data exist to determine whether the surface water or segment will meet current surface water quality standards;
 - e. Trend analysis using credible and scientifically defensible data indicate that surface water quality standards may be exceeded by the next assessment cycle;
 - f. The exceedance of surface water quality standards is due to pollution, but not a pollutant;
 - g. Existing data were analyzed using methods with laboratory detection limits above the numeric surface water quality standard but analytical methods with lower laboratory detection limits are available;
 - h. The surface water or segment is expected to attain its designated use by the next assessment as a result of existing or proposed technology-based effluent limitations or other pollution control requirements under local, state, or federal authority. The appropriate entity shall provide the Department with the following documentation to support placement on the Planning List:
 - i. Verification that discharge controls are required and enforceable;
 - ii. Controls are specific to the surface water or segment, and pollutant of concern;
 - iii. Controls are in place or scheduled for implementation; and
 - iv. There are assurances that the controls are sufficient to bring about attainment of water quality standards by the next 303(d) List submission; or
- E. 303(d) List.** The Department shall:
1. Place a surface water or segment on the 303(d) List if the Department determines:
 - a. Based on R18-11-605(D), that the surface water or segment is impaired due to a pollutant and that a TMDL decision is necessary; or
 - b. That the surface water or segment is threatened due to a pollutant and, at the time the Department submits a final 303(d) List to EPA, there are federal regulations implementing section 303(d) of the Clean Water Act that require threatened waters be included on the list.
 2. Provide public notice of the 303(d) List according to the requirements of A.R.S. § 49-232 and submit the 303(d) List according to section 303(d) of the Clean Water Act.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-605. Evaluating A Surface Water or Segment For Listing and Delisting

- A.** The Department shall compile and evaluate all reasonably current, credible, and scientifically defensible data to determine whether a surface water or segment is impaired or not attaining.
- B. Weight-of-evidence approach.**
1. The Department shall consider the following concepts when evaluating data:
 - a. Data or information collected during critical conditions may be considered separately from the complete dataset, when the data show that the surface water or segment is impaired or not attaining its designated use during those critical conditions, but attaining its uses during other periods. Critical conditions may include stream flow, seasonal periods, weather conditions, or anthropogenic activities;
 - b. Whether the data indicate that the impairment is due to persistent, seasonal, or recurring conditions. If the data do not represent persistent, recurring, or seasonal conditions, the Department may place the surface water or segment on the Planning List;
 - c. Higher quality data over lower quality data when making a listing decision. Data quality is established by the reliability, precision, accuracy, and represen-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tativeness of the data, based on factors identified in R18-11-602(A) and (B), including monitoring methods, analytical methods, quality control procedures, and the documented field and laboratory quality control information submitted with the data. The Department shall consider the following factors when determining higher quality data:

- i. The age of the measurements. Newer measurements are weighted heavier than older measurements, unless the older measurements are more representative of critical flow conditions;
 - ii. Whether the data provide a direct measure of an impact on a designated use. Direct measurements are weighted heavier than measurements of an indicator or surrogate parameter; or
 - iii. The amount or frequency of the measurements. More frequent data collection are weighted heavier than nominal datasets.
2. The Department shall evaluate the following factors to determine if the water quality evidence supports a finding that the surface water or segment is impaired or not attaining:
- a. An exceedance of a numeric surface water quality standard based on the criteria in subsections (C)(1), (C)(2), (D)(1), and (D)(2);
 - b. An exceedance of a narrative surface water quality standard based on the criteria in subsections (C)(3) and (D)(3);
 - c. Additional information that determines whether a water quality standard is exceeded due to a pollutant, suspected pollutant, or naturally occurring condition:
 - i. Soil type, geology, hydrology, flow regime, biological community, geomorphology, climate, natural process, and anthropogenic influence in the watershed;
 - ii. The characteristics of the pollutant, such as its solubility in water, bioaccumulation potential, sediment sorption potential, or degradation characteristics, to assist in determining which data more accurately indicate the pollutant's presence and potential for causing impairment; and
 - iii. Available evidence of direct or toxic impacts on aquatic life, wildlife, or human health, such as fish kills and beach closures, where there is sufficient evidence that these impacts occurred due to water quality conditions in the surface water.
 - d. Other available water quality information, such as NPDES or AZPDES water quality discharge data, as applicable.
 - e. If the Department determines that a surface water or segment does not merit listing under numeric water

quality standards based on criteria in subsections (C)(1), (C)(2), (D)(1), or (D)(2) for a pollutant, but there is evidence of a narrative standard exceedance in that surface water or segment under subsection (D)(3) as a result of the presence of the same pollutant, the Department shall list the surface water or segment as impaired only when the evidence indicates that the numeric water quality standard is insufficient to protect the designated use of the surface water or segment and the Department justifies the listing based on any of the following:

- i. The narrative standard data provide a more direct indication of impairment as supported by professionally prepared and peer-reviewed publications;
 - ii. Sufficient evidence of impairment exists due to synergistic effects of pollutant combinations or site-specific environmental factors; or
 - iii. The pollutant is bioaccumulative, relatively insoluble in water, or has other characteristics that indicate it is occurring in the specific surface water or segment at levels below the laboratory detection limits, but at levels sufficient to result in an impairment.
3. The Department may consider a single line of water quality evidence when the evidence is sufficient to demonstrate that the surface water or segment is impaired or not attaining.

C. Planning List.

- 1. When evaluating a surface water or segment for placement on the Planning List.
 - a. Consider at least ten spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the Planning List following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 1, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 80 percent confidence level using a binomial distribution for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 1, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 80 percent.

Table 1. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |

| 66 | 73 | 10 | 237 | 245 | 29 | 415 | 423 | 48 |
| 74 | 82 | 11 | 246 | 255 | 30 | 424 | 432 | 49 |
| 83 | 91 | 12 | 256 | 264 | 31 | 433 | 442 | 50 |
| 92 | 100 | 13 | 265 | 273 | 32 | 443 | 451 | 51 |
| 101 | 109 | 14 | 274 | 282 | 33 | 452 | 461 | 52 |
| 110 | 118 | 15 | 283 | 292 | 34 | 462 | 470 | 53 |
| 119 | 126 | 16 | 293 | 301 | 35 | 471 | 480 | 54 |
| 127 | 136 | 17 | 302 | 310 | 36 | 481 | 489 | 55 |
| 137 | 145 | 18 | 311 | 320 | 37 | 490 | 499 | 56 |
| 146 | 154 | 19 | 321 | 329 | 38 | 500 | | 57 |
| 155 | 163 | 20 | 330 | 338 | 39 | | | |
| 164 | 172 | 21 | 339 | 348 | 40 | | | |

2. When there are less than ten samples, the Department shall place a surface water or segment on the Planning List following subsection (B), if three or more temporally independent samples exceed the following surface water quality standards:
 - a. The surface water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - b. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - c. The surface water quality standard for radiochemicals in R18-11-109(G);
 - d. The surface water quality standard for dissolved oxygen under R18-11-109(E);
 - e. The surface water quality standard for pH under R18-11-109(B); or
 - f. The following surface water quality standards in R18-11-112:
 - i. Single sample maximum standards for nitrogen and phosphorus,
 - ii. All metals except chromium, or
 - iii. Turbidity.
3. The Department shall place a surface water or segment on the Planning List if information in subsections (B)(2)(c), (B)(2)(d), and (B)(2)(e) indicates that a narrative water

quality standard violation exists, but no narrative implementation procedure required under A.R.S. § 49-232(F) exists to support use of the information for listing.

- D. 303(d) List.
 1. When evaluating a surface water or segment for placement on the 303(d) List.
 - a. Consider at least 20 spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the 303(d) List, following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 2, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 90 percent confidence level using a binomial distribution, for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 2, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 90 percent.

Table 2. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|

| 131 | 138 | 19 | 298 | 306 | 38 | 471 | 479 | 57 |
| 139 | 147 | 20 | 307 | 315 | 39 | 480 | 489 | 58 |
| 148 | 156 | 21 | 316 | 324 | 40 | 490 | 498 | 59 |
| 157 | 164 | 22 | 325 | 333 | 41 | 499 | 500 | 60 |
| 165 | 173 | 23 | 334 | 343 | 42 | | | |

2. The Department shall place a surface water or segment on the 303(d) List, following subsection (B) without the required number of samples or numeric water quality standard exceedances under subsection (D)(1), if either the following conditions occur:
 - a. More than one temporally independent sample in any consecutive three-year period exceeds the surface water quality standard in:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and the acute water quality standards in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1; or
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A).
 - b. More than one exceedance of an annual mean, 90th percentile, aquatic and wildlife chronic water quality standard, or a bacteria 30-day geometric mean water quality standard occurs, as specified in R18-11-109, R18-11-110, R18-11-112, or 18 A.A.C. 11, Article 1, Appendix A, Table 2.
 3. Narrative water quality standards exceedances. The Department shall place a surface water or segment on the Planning List if the listing requirements are met under A.R.S. § 49-232(F).
- E. Removing a surface water, segment, or pollutant from the Planning List or the 303(d) List.**
1. Planning List. The Department shall remove a surface water, segment, or pollutant from the Planning List when:
 - a. Monitoring activities indicate that:
 - i. There is sufficient credible data to determine that the surface water or segment is impaired under subsection (D), in which case the Department shall place the surface water or segment on the 303(d) List. This includes surface waters with an EPA approved TMDL when the Department determines that the TMDL strategy is insufficient for the surface water or segment to attain water quality standards; or
 - ii. There is sufficient credible data to determine that the surface water or segment is attaining all designated uses and standards.
 - b. All pollutants for the surface water or segment are delisted.
 2. 303(d) List. The Department shall:
 - a. Remove a pollutant from a surface water or segment from the 303(d) List based on one or more of the following criteria:
 - i. The Department developed, and EPA approved, a TMDL for the pollutant;
 - ii. The data used for previously listing the surface water or segment under R18-11-605(D) is superseded by more recent credible and scientifically defensible data meeting the requirements of R18-11-602, showing that the surface water or segment meets the applicable numeric or narrative surface water quality standard. When evaluating data to remove a pollutant from the 303(d) List, the monitoring entity shall collect the more recent data under similar hydrologic or climatic conditions as occurred when the samples were taken that indicated impairment, if those conditions still exist;
 - iii. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act;
 - iv. The surface water or segment no longer meets the criteria for impairment for the specific narrative water quality standard based on a change in narrative water quality standard implementation procedures;
 - v. A re-evaluation of the data indicate that the surface water or segment does not meet the criteria for impairment because of a deficiency in the original analysis; or
 - vi. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 - b. Remove a surface water, segment, or pollutant from the 303(d) List, based on criteria that are no more stringent than the listing criteria under subsection (D);
 - c. Remove a surface water or segment from the 303(d) List if all pollutants for the surface water or segment are removed from the list;
 - d. Remove a surface water, segment, or pollutant, from the 303(d) List and place it on the Planning List, if:
 - i. The surface water, segment or pollutant was on the 1998 303(d) List and the dataset used in the original listing does not meet the credible data requirements under R18-11-602, or contains insufficient samples to meet the data requirements under subsection (D); or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- ii. The monitoring data indicate that the impairment is due to pollution, but not a pollutant.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-606. TMDL Priority Criteria for 303(d) Listed Surface Waters or Segments

- A. In addition to the factors specified in A.R.S. § 49-233(C), the Department shall consider the following when prioritizing an impaired water for development of TMDLs:
 - 1. A change in a water quality standard;
 - 2. The date the surface water or segment was added to the 303(d) List;
 - 3. The presence in a surface water or segment of species listed as threatened or endangered under section 4 of the Endangered Species Act;
 - 4. The complexity of the TMDL;
 - 5. State, federal, and tribal policies and priorities; and
 - 6. The efficiencies of coordinating TMDL development with the Department's surface water monitoring program, the watershed monitoring rotation, or with remedial programs.
- B. The Department shall prioritize an impaired surface water or segment for TMDL development based on the factors specified in A.R.S. § 49-233(C) and subsection (A) as follows:
 - 1. Consider an impaired surface water or segment a high priority if:
 - a. The listed pollutant poses a substantial threat to the health and safety of humans, aquatic life, or wildlife based on:
 - i. The number and type of designated uses impaired;
 - ii. The type and extent of risk from the impairment to human health, aquatic life, or wildlife;
 - iii. The pollutant causing the impairment, or
 - iv. The severity, magnitude, and duration the surface water quality standard was exceeded;
 - b. A new or modified individual NPDES or AZPDES permit is sought for a new or modified discharge to the impaired water;
 - c. The listed surface water or segment is listed as a unique water in A.A.C. R18-11-112 or is part of an area classified as a "wilderness area," "wild and scenic river," or other federal or state special protection of the water resource;
 - d. The listed surface water or segment contains a species listed as threatened or endangered under the federal Endangered Species Act and the presence of the pollutant in the surface water or segment is likely to jeopardize the listed species;
 - e. A delay in conducting the TMDL could jeopardize the Department's ability to gather sufficient credible data necessary to develop the TMDL;
 - f. There is significant public interest and support for the development of a TMDL;
 - g. The surface water or segment has important recreational and economic significance to the public; or
 - h. The pollutant is listed for eight years or more.
 - 2. Consider an impaired surface water or segment a medium priority if:
 - a. The surface water or segment fails to meet more than one designated use;
 - b. The pollutant exceeds more than one surface water quality standard;
 - c. A surface water quality standard exceedance is correlated to seasonal conditions caused by natural events, such as storms, weather patterns, or lake turnover;
 - d. It will take more than two years for proposed actions in the watershed to result in the surface water attaining applicable water quality standards;
 - e. The type of pollutant and other factors relating to the surface water or segment make the TMDL complex; or
 - f. The administrative needs of the Department, including TMDL schedule commitments with EPA, permitting requirements, or basin priorities that require completion of the TMDL.
 - 3. Consider an impaired surface water or segment a low priority if:
 - a. The Department has formally submitted a proposal to delist the surface water, segment, or pollutant to EPA based on R18-11-605(E)(2). If the Department makes the submission outside the listing process cycle, the change in priority ranking will not be effective until EPA approves the submittal;
 - b. The Department has modified, or formally proposed for modification, the designated use or applicable surface water quality standard, resulting in an impaired water no longer being impaired, but the modification has not been approved by EPA;
 - c. The surface water or segment is expected to attain surface water quality standards due to any of the following:
 - i. Recently instituted treatment levels or best management practices in the drainage area,
 - ii. Discharges or activities related to the impairment have ceased, or
 - iii. Actions have been taken and controls are in place or scheduled for implementation that will likely to bring the surface water back into compliance;
 - d. The surface water or segment is ephemeral or intermittent. The Department shall re-prioritize the surface water or segment if the presence of the pollutant in the listed water poses a threat to the health and safety of humans, aquatic life, or wildlife using the water, or the pollutant is contributing to the impairment of a downstream perennial surface water or segment;
 - e. The pollutant poses a low ecological and human health risk;
 - f. Insufficient data exist to determine the source of the pollutant load;
 - g. The uncertainty of timely coordination with national and international entities concerning international waters;
 - h. Naturally occurring conditions are a major contributor to the impairment; and
 - i. No documentation or effective analytical tools exist to develop a TMDL for the surface water or segment with reasonable accuracy.
- C. The Department will target surface waters with high priority factors in subsections (B)(1)(a) through (B)(1)(d) for initiation of TMDLs within two years following EPA approval of the 303(d) List.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. The Department may shift priority ranking of a surface water or segment for any of the following reasons:
1. A change in federal, state, or tribal policies or priorities that affect resources to complete a TMDL;
 2. Resource efficiencies for coordinating TMDL development with other monitoring activities, including the Department's ambient monitoring program that monitors watersheds on a five-year rotational basis;
 3. Resource efficiencies for coordinating TMDL development with Department remedial or compliance programs;
 4. New information is obtained that will revise whether the surface water or segment is a high priority based on factors in subsection (B); and
 5. Reduction or increase in staff or budget involved in the TMDL development.
- E. The Department may complete a TMDL initiated before July 12, 2002 for a surface water or segment that was listed as impaired on the 1998 303(d) List but does not qualify for listing under the criteria in R18-11-605, if:
1. The TMDL investigation establishes that the water quality standard is not being met and the allocation of loads is expected to bring the surface water into compliance with standards,
 2. The Department estimates that more than 50 percent of the cost of completing the TMDL has been spent,
 3. There is community involvement and interest in completing the TMDL, or
 4. The TMDL is included within an EPA-approved state workplan initiated before July 12, 2002.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.
16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.
2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.
3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.
4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.
5. Contract with other agencies, including laboratories, in furthering any department program.
6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.
7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.
8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.
9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
 - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 - (c) Maintenance but not construction of drainage ditches.
 - (d) Construction and maintenance of irrigation ditches.
 - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.
7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.
12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.
13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.
2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

[49-221. Water quality standards in general; protected surface waters list](#)

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-WOTUS protected surface waters, the director shall apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to paragraph 2 of this subsection. Rules regarding the following shall not be adopted or applied as water quality standards for non-WOTUS protected surface waters:

- (a) Antidegradation.
- (b) Antidegradation criteria.
- (c) Outstanding Arizona waters.

2. Adopt, by rule, water quality standards for non-WOTUS protected surface waters, by December 31, 2022, consistent with paragraph 1 of this subsection and as determined necessary in the rulemaking process. In adopting those standards, the director shall consider the unique characteristics of this state's surface waters and the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

- 1. The protection of the public health and the environment.
- 2. The uses that have been made, are being made or with reasonable probability may be made of these waters.
- 3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
- 4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
- 5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
- 6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

- 1. The protection of public health and the environment.
- 2. The uses that are being made or may be made of the reclaimed water.
- 3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

- (i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.
- (ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected surface waters list. The department shall publish the initial list on the department's website and in the Arizona administrative register within thirty days after September 29, 2021. Not later than December 31, 2022, the department shall adopt by rule the protected surface waters list, including procedures for determining economic, social and environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action pursuant to title 41, chapter 6, article 10 and may be appealed by any party that provides evidence of an actual adverse effect that the party appealing the decision would suffer as a result of the director's decision. All of the following apply to the protected surface water list:

1. The protected surface waters list shall include:

(a) All WOTUS.

(b) Any perennial, intermittent and ephemeral reaches and any impoundments of the following rivers, not including tributaries or reaches of waters wholly within tribal jurisdiction or reaches of waters outside of the United States:

(i) The Bill Williams river, from the confluence of the Big Sandy and Santa Maria rivers at 113°31'38.617"w, 34°18'22.373"n, to its confluence with the Colorado river at 114°8'9.854"w, 34°18'9.33"n.

(ii) The Colorado river, from the Arizona-Utah border at 111°32'35.741"w, 36°58'51.698"n, to the Arizona-Mexico border at 114°43'12.564"w, 32°43'6.218"n.

(iii) The Gila river, from the Arizona-New Mexico border at 109°2'52.8"w, 32°41'11.2015"n, to the confluence with the Colorado river at 114°33'28.145"w, 32°43'14.408"n.

(iv) The Little Colorado river, from the confluence of the east and west forks of the Little Colorado river at 109°28'7.131"w, 33°59'39.852"n, to its confluence with the Colorado river at 111°49'4.693"w, 36°12'10.243"n.

(v) The Salt river, from the confluence of the Black and White rivers at 110°13'39.5"w, 33°44'6.082"n, to the confluence with the Gila river at 112°18'5.704"w, 33°22'42.978"n.

(vi) The San Pedro river, from the Arizona-Mexico border at 110°9'1.704"w, 31°20'2.387"n, to the confluence with the Gila river at 110°47'0.905"w, 32°59'5.671"n.

(vii) The Santa Cruz river, from its origins in the Canelo Hills of southeastern Arizona at 110°37'3.968"w, 31°27'39.21"n, to its confluence with the Gila river at 111°33'26.02"w, 32°41'39.058"n.

(viii) The Verde river, from Sullivan lake at 112°28'10.588"w, 34°52'11.136"n, to its confluence with the Salt river at 111°39'48.32"w, 33°33'20.538"n.

(c) Any non-WOTUS waters of the state that are added under paragraphs 3 and 4 of this subsection.

2. Notwithstanding paragraph 1 of this subsection, the protected surface waters list shall not contain any of the following non-WOTUS waters:

(a) Canals in the Yuma project and ditches, canals, pipes, impoundments and other facilities that are operated by districts organized under title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for human consumption, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner and operator of the ditch or canal until the owner and operator withdraws its request.

(b) Irrigated areas, including fields flooded for agricultural production.

(c) Ornamental and urban ponds and lakes such as those owned by homeowners' associations and golf courses, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the ornamental or urban pond or lake until the owner withdraws its request.

(d) Swimming pools and other bodies of water that are regulated pursuant to section 49-104, subsection B.

(e) Livestock and wildlife water tanks and aquaculture tanks that are not constructed within a protected surface water.

(f) Stormwater control features.

(g) Groundwater recharge, water reuse and wastewater recycling structures, including underground storage facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the groundwater recharge, water reuse or wastewater recycling structure until the owner withdraws its request.

(h) Water-filled depressions created as part of mining or construction activities or pits excavated to obtain fill, sand or gravel.

(i) All waste treatment systems components, including constructed wetlands, lagoons and treatment ponds, such as settling or cooling ponds, designed to either convey or retain, concentrate, settle, reduce or remove pollutants, either actively or passively, from wastewater before discharge or to eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those prescribed in paragraph 1, subdivision (b) of this subsection.

(l) Lakes and ponds owned and managed by the United States department of defense and other surface waters located on and that do not leave United States department of defense property, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the United States department of defense until it withdraws its request.

3. Unless listed in paragraph 2 of this subsection, the director shall add the following non-WOTUS surface waters to the protected surface waters list:

(a) All lakes, ponds and reservoirs that are public waters used as a drinking source, for recreational or commercial fish consumption or for water-based recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent tributaries to the Bill Williams river, the Colorado river, the Gila river, the Little Colorado river, the Salt river, the San Pedro river, the Santa Cruz river and the Verde river.

- (d) Perennial or intermittent public waters used for recreational or commercial fish consumption.
 - (e) Perennial or intermittent public waters used for water-based recreation such as swimming, wading, boating and other types of recreation in and on the water.
 - (f) Perennial or intermittent wetlands adjacent to waters on the protected surface waters list.
 - (g) Perennial or intermittent waters of the state that cross into another state, the Republic of Mexico or the reservation of a federally recognized tribe.
4. The director may add additional non-WOTUS surface waters to the protected surface waters list if all of the following apply:
- (a) The water is not required to be listed under paragraph 1 or 3 of this subsection.
 - (b) The water is not excluded under paragraph 2 of this subsection.
 - (c) The economic, environmental and social benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list.
5. The director shall remove any erroneously listed, non-WOTUS waters from the protected surface waters list when the water is excluded under paragraph 2 of this subsection and shall not regulate discharges to those waters in the interim.
6. The director shall remove non-WOTUS waters from the protected surface waters list when the water is not required to be listed under paragraph 3 of this subsection and the economic, environmental and social benefits of removing the water outweigh the economic, environmental and social costs of retaining the water on the list.
7. The director, on an emergency basis, may add a water to the protected surface waters list if the director discovers an imminent and substantial danger to public health or welfare or the environment, if the water would otherwise qualify to be added under paragraph 3 of this subsection. Notwithstanding any other law, the emergency addition shall take effect immediately on the director's determination that describes the imminent and substantial danger in writing. Within thirty days after the director's determination, the department shall publish a notice of that determination in the Arizona administrative register and on the department's website. Waters added under this subsection shall be incorporated into the protected surface waters list during the next rulemaking that follows the addition.

[49-223. Aquifer water quality standards](#)

- A. Primary drinking water maximum contaminant levels established by the administrator before August 13, 1986 are adopted as drinking water aquifer water quality standards. The director may only adopt additional aquifer water quality standards by rule. Within one year after the administrator establishes additional primary drinking water maximum contaminant levels, the director shall open a rule making docket pursuant to section 41-1021 for adoption of those maximum contaminant levels as drinking water aquifer water quality standards. If substantial opposition is demonstrated in the rule making docket regarding a particular constituent, the director may adopt for that constituent the maximum contaminant level as a drinking water aquifer water quality standard upon making a finding that this level is appropriate for adoption in Arizona as an aquifer water quality standard. In making this finding, the director shall consider whether the assumptions about technologies, costs, sampling and analytical methodologies and public health risk reduction used by the administrator in developing and implementing the maximum contaminant level are appropriate for establishing a drinking water aquifer water quality standard. For purposes of this subsection "substantial opposition" means information submitted to the director that explains with reasonable specificity why the maximum contaminant level is not appropriate as an aquifer water quality standard.
- B. The director may adopt by rule numeric drinking water aquifer water quality standards for pollutants for which the administrator has not established primary drinking water maximum contaminant levels or for which a maximum contaminant level has been established but the director has determined it to be inappropriate as an aquifer water quality standard pursuant to subsection A of this section. These standards shall be based on the protection of human health. In establishing numeric drinking water aquifer water quality standards, the director shall rely on technical protocols appropriate for the development of aquifer water quality standards and shall base the standards on credible medical and toxicological evidence that has been subjected to peer review.
- C. Any person may petition the director to adopt a numeric drinking water aquifer quality standard for any pollutant for which no drinking water aquifer quality standard exists. The director shall grant the petition and institute rule making proceedings adopting a numeric standard as provided under subsection B of this section within one hundred eighty days if the petition shows that the pollutant is a toxic pollutant, that the pollutant has been, or may in the future be, detected in any of the state's drinking water aquifers, and that there exists technical information on which a numeric standard might reasonably be based. Within one year of the commencement of the rule making proceeding, the director shall either adopt a numeric standard or make and publish a finding that, pursuant to subsection B of this section, the development of a numeric standard is not possible. The decision to not adopt a numeric standard shall, for purposes of judicial review, be treated in the same manner as a rule adopted pursuant to title 41, chapter 6.
- D. For purposes of assessing compliance with each aquifer water quality standard adopted pursuant to this section, the director shall for purposes of articles 3 and 4 of this chapter, and may for purposes of other provisions of this title, identify sampling and analytical protocols appropriate for detecting and measuring the pollutant in the aquifers in the state.
- E. Within one year from the reclassification of an aquifer to a non-drinking water status, pursuant to section 49-224, the director shall adopt water quality standards for that aquifer. For any pollutants which were not the basis for the reclassification, the applicable standard shall be identical with the standard for those pollutants adopted pursuant to subsections A and B of this section. For any pollutants which were the basis for reclassification, the standard shall be sufficient to achieve the purpose for which the aquifer was reclassified but shall minimize unnecessary degradation of the aquifer by taking into consideration the potential long-term uses of the aquifer and the short-term and long-term benefits of the activities resulting in discharges into the aquifer.
- F. The director shall adopt water quality standards for an aquifer for which a petition has been submitted pursuant to section 49-224, subsection D sufficient to achieve the non-drinking water use for which that aquifer was classified, taking into consideration the potential long-term uses of that aquifer and the short-term and long-term benefits of the discharging activities creating that aquifer.
- G. In any action pursuant to this title, aquifer water quality protection provisions, including monitoring requirements, may be imposed only for pollutants for which aquifer water quality standards have been established that are likely to be present in a discharge. Indicator parameters and quality assurance parameters appropriate for such pollutants also may be specified.

49-224. Aquifer identification, classification and reclassification

A. Not later than June 30, 1987 the director shall, by rule, identify and define the boundaries of all aquifers in this state utilizing, to the maximum extent possible, data available from the department of water resources.

B. All aquifers in this state identified and defined under subsection A of this section and any other aquifers subsequently discovered, identified and defined shall be classified for drinking water protected use unless the classification is changed in the manner provided in subsection C of this section.

C. The director, after consulting with the appropriate groundwater users advisory council established pursuant to title 45, chapter 2, article 2 if the aquifer is in an active management area, and a public hearing held pursuant to section 49-208, may change the classification of an aquifer or part of an aquifer for a protected use other than drinking water on making all of the following findings:

1. The identified aquifer or part of an aquifer is or will be so hydrologically isolated from other aquifers or other parts of the same aquifer that there is no reasonable probability that poorer quality water from the identified aquifer or part of an aquifer will cause or contribute to a violation of aquifer water quality standards in other aquifers or parts of the same aquifer.

2. Water from the identified aquifer or part of an aquifer is not being used as drinking water.

3. The short-term and long-term benefits to the public that would result from the degradation of the quality of the water in the identified aquifer or part of an aquifer below standards established pursuant to section 49-223, subsections A and B would significantly outweigh the short-term and long-term costs to the public of such degradation. Benefits and costs to be considered include economic, social and environmental.

D. Owners or operators of facilities whose discharges are solely responsible for creating an aquifer may petition the director for a classification of the aquifer for a non-drinking water use. The director may, by rule, classify that aquifer for a non-drinking water use upon making the findings prescribed in subsection C, paragraphs 1 and 2 of this section.

E. The director shall provide for public participation in proceedings under this section pursuant to section 49-208 and shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification.

D-14.

**DEPARTMENT OF ENVIRONMENTAL
QUALITY Title 18, Chapter 11 (Arsenic)**

Amend: R18-11-406

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 22, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 11

Amend: R18-11-406

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend one (1) rule in Title 18, Chapter 11, regarding Aquifer Water Quality Standards.

The Department is proposing to make amendments and additions to Chapter 11 as part of a four part rulemaking package. The Department is required by A.R.S. § 49-223(A) to adopt Aquifer Water Quality Standards (AWQS) with these standards being based on maximum contaminant levels (MCLs). These MCLs are prescribed by the Environmental Protection Agency (EPA) and the Department is required to adopt the same MCLs unless there is a showing of substantial opposition, which allows the Department to prescribe different standards if the Department or stakeholder can show that the EPA levels are not appropriate for Arizona. The Department has indicated to Department staff that this substantial opposition language is unique to Arizona and the Department believes Arizona to be the only state to have this type of language.

For this part of the rulemaking package, the Department will be adopting the MCL level prescribed by the EPA for arsenic. The rule currently allows for .050 mg/L, the Department is

proposing to adopt the EPA standard of .010 mg/L. The Department has indicated that there has not been any substantial opposition as defined in A.R.S. § 49-223, to the proposed amendment.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates that they reviewed two studies relevant to the rules and that these materials are available to the public upon request.

- MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support: The Department indicates that this report was used to review EPA assumptions regarding the MCL for arsenic and included looking at technologies, costs, sampling, and analytical methodologies for public health risks reduction.
- Draft Economic Impact Statement for Arsenic Proposed AWQS: The Department indicates that this report informed DEQ on the economic impact of the subject matter of the rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Department states that this rulemaking is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Arsenic as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. The Department indicates that the AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (see A.R.S. § 49-224(B)). The Department states the AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the voluntary Remediation Program (VRP), and elsewhere.

The Department states that the full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. The Department indicates that while not all costs and benefits are borne evenly, these are the identified groups

generally impacted from this Arsenic AWQS rulemaking. The Department states that the costs to permittees to meet the adjusted AWQS are significant and indeterminate at this time. The Department states that permittees must determine appropriate treatment technology for the specific conditions applicable to them, then upgrade or install technology and train personnel as needed to operate. Benefits to stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual users alike.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states that the controlling statute A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. The Department indicates that it simply requires ADEQ to open a rulemaking docket pursuant to A.R.S. § 41-1021 for adoption of new or adjusted MCL as an AWQS within one year of the MCLs establishment or adjustment.

6. What are the economic impacts on stakeholders?

The Department says individual APP Permittees will be the primary bearers of costs associated with this rulemaking. The Department states that other costs to stakeholders could occur, such as rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment. The Department believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. The Department anticipates that hundreds of permits may need to be amended to update monitoring tables that include Arsenic as a parameter. The Department indicates that any additional costs would generally be covered by increased fees paid by Permittees.

The Department believes, generally, that the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resources as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. The Department states that savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstances} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike. In addition, the Department states that following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. Additionally, the Department states that investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenue.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department indicates that there were no changes between the proposed draft and final rules before the Council.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department indicates it received 2 public comments as it relates to this rulemaking. The Department indicates that they conducted stakeholder outreach

Comment 1 was from an interest group and stated the following:

- Arsenic contamination in Arizona groundwater remains a persistent threat to public health. Chronic exposure to arsenic, even at low levels, is linked to cancers, cardiovascular disease, and developmental issues. The EPA updated its arsenic standard to 10 ppb in 2002, yet ADEQ has not incorporated this standard into state aquifer regulations. Adopting the EPA’s MCL for arsenic without delay is critical to ensuring public safety. ADEQ must also prioritize monitoring and remediation efforts in rural and underserved communities disproportionately impacted by arsenic contamination.”

The Department responded with the following:

- ADEQ appreciates the comment. The Arsenic MCL is one of the seven (7) MCLs proposed for adoption as AWQs within the scope of the collective “AWQS Update” rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQs verbatim. As is detailed in this rulemaking, the Arsenic MCL is 0.010 milligrams per Liter (mg/L) which is equivalent to 10 parts per billion or (ppb). 0.010 mg/L is the AWQS for Arsenic established through this rulemaking.

The second comment came from a utility and stated the following:

- If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

The Department responded with the following:

- ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Arsenic MCL as AWQS.

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

This specific rulemaking does not create a permit or a license.

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates that the rules are not more stringent than federal law.

11. **Conclusion**

This regular rulemaking by the Department seeks to amend one rule regarding aquifer purification standards. The Department specifically seeks to amend the rule to bring the allowable amount of arsenic in aquifers in line with the standards set by the EPA.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

March 13, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Aquifer Water Quality Standards Update Regular Rulemaking: Title 18,
Environmental Quality, Chapters 9 and 11

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for May 6th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. §§ 41-1039, 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

- (A)(1)(a) The public record closed for all rules on December 16th, 2024 at 11:59 p.m.
- (A)(1)(b) The rulemaking activity does relate to a five-year review report. The report on 18 AAC 11, Articles 4 and 5 was approved on November 3rd, 2020.
- (A)(1)(c) The rulemaking activity does not establish a new fee.
- (A)(1)(d) The rulemaking does not contain a fee increase.
- (A)(1)(e) An immediate effective date is not requested.
- (A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- (A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3) (a) (see subheading IV, below).
- (A)(1)(h) A list of documents is enclosed (see subheading IV, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

- (A)(2) Five (5) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (see subheading IV, below);
- (A)(3) The preambles contain economic, small business, and consumer impact statements that contain the information required by A.R.S. § 41-1055 (see subheading IV, below);
- (A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (see subheading IV, below);
- (A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
- (A)(6) No materials were incorporated by reference in this rulemaking;
- (A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (see subheading IV, below);
- (A)(8) All statutes referred to in the definitions are represented in the general and specific statutes authorizing the rule.

III. Governor's office approvals pursuant to A.R.S. § 41-1039:

- (A) ADEQ received prior written approval from the Governor's Office twice. Once for Title 18, Chapter 11, Article 4 on August 24, 2022 and then again for Title 18, Chapter 9, Articles 1 and 2 on February 5th, 2024 (see subheading IV, below);
- (B) ADEQ received written final approval from the Governor's Office for this rulemaking on March 11th, 2025 (see subheading IV, below).

IV. List of documents enclosed (25 documents total):

- One (1) Cover Letter (R1-6-201(A)(1));
 - AWQS_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));
 - AWQS_JLBC.pdf
- Five (5) NFRMs (R1-6-201(A)(2));
 - AWQS_NFRM_18_AAC_9_Impl.pdf
 - AWQS_NFRM_18_AAC_11_As.pdf
 - AWQS_NFRM_18_AAC_11_U.pdf
 - AWQS_NFRM_18_AAC_11_DBP.pdf
 - AWQS_NFRM_18_AAC_11_MBC.pdf
- Five (5) EISs (R1-6-201(A)(3));
 - AWQS_EIS_18_AAC_9_Impl.pdf
 - AWQS_EIS_18_AAC_11_As.pdf
 - AWQS_EIS_18_AAC_11_U.pdf
 - AWQS_EIS_18_AAC_11_DBP.pdf
 - AWQS_EIS_18_AAC_11_MBC.pdf
- Five (5) Public Comments Received Documents (R1-6-201(A)(4));

- AWQS_Cmts_18_AAC_9_Impl.pdf
- AWQS_Cmts_18_AAC_11_As.pdf
- AWQS_Cmts_18_AAC_11_U.pdf
- AWQS_Cmts_18_AAC_11_DBP.pdf
- AWQS_Cmts_18_AAC_11_MBC.pdf
- Five (5) General and Specific Authorizing Statutes (R1-6-201(A)(7));
 - 49-104 - Powers and duties of the department and director.pdf
 - 49-203 - Powers and duties of the director and department.pdf
 - 49-221 - Water quality standards in general; protected surface waters list.pdf
 - 49-223 - Aquifer water quality standards.pdf
 - 49-224 - Aquifer identification, classification and reclassification.pdf
- Three (3) A.R.S. § 41-1039 Governor's Approvals
 - 8_24_22_Gov_Approval.pdf
 - 2_5_24_Gov_Approval.pdf
 - 25_3_11_Gov_Approval.pdf

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov if you have any questions.

Sincerely,

Karen Peters, Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING
TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER QUALITY STANDARDS

PREAMBLE

1. Permission to proceed with this proposed rulemaking was granted under A.R.S. § 41-1039 by the governor on:

August 24, 2022, &

February 5, 2024

2. Article, Part, or Section Affected (as applicable) Rulemaking Action

R18-11-406

Amend

3. Citations to the agency’s statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-221, and 49-223.

Implementing statute: A.R.S. §§ 49-221, and 49-223.

4. The effective date of the rule:

July 7, 2025

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3408, Issue Date: November 15, 2024, Issue Number: 46, File Number: R24-229.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2136, Issue Date: June 28, 2024, Issue Number: 26, File Number: R24-114.

6. The agency's contact person who can answer questions about the rulemaking:

Name: Jon Rezabek
Title: Legal Specialist
Division: Water Quality
Address: Arizona Department of Environmental Quality
1110 W. Washington Ave.

Fax: (602) 771-2366
Email: awqs@azdeq.gov
Website: <https://www.azdeq.gov/awp-rulemaking>

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Introduction:

General Explanation of the Collective Rulemaking: The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. § 49-223(A) to open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency's (EPA's) establishment of new or adjusted MCLs. AWQSs for Arsenic, Bromate, Chlorite, Haloacetic Acids, Microbiological Contaminants, Total Trihalomethanes and Uranium with corresponding MCLs are either unestablished as AWQSs or are established but currently have a misaligned value as the standard. MCLs for the seven (7) pollutants can be viewed at 40 *Code of Federal Regulations* (C.F.R.) 141.60 *et seq.* A.R.S. § 49-223(A) requires ADEQ to move forward with the adoption of MCLs as AWQSs through the rulemaking process unless substantial opposition to the adoption is received from stakeholders. Upon receipt of substantial opposition, ADEQ may adopt for that pollutant the verbatim MCL as an AWQS, but only upon a finding that the MCL is appropriate for adoption in Arizona as an AWQS. In making this finding, ADEQ must consider whether the assumptions used by the EPA in developing and implementing the MCLs are appropriate for establishing an Arizona state AWQSs. The listed assumptions for consideration are technology, cost, sampling and analytical methodologies and public health risk reduction. If ADEQ determines the MCL is inappropriate as an AWQS, the Department may establish an alternative AWQS for the pollutant with an MCL. The alternative AWQS must be:

- (1) Based on the protection of human health and shall rely on technical protocols appropriate for the development of AWQSs,
and

(2) Based on credible medical and toxicological evidence that has been subjected to peer review.

Subject Matter of this NFRM: This *Notice of Final Rulemaking* (NFRM) proposes to align the AWQS for Arsenic with the MCL for Arsenic. The original MCL for Arsenic was established through Final Rule by EPA, published in the *Federal Register* at 66 *Federal Register* 6979.

What is the MCL for Arsenic that is proposed to be the new AWQS and what is the current AWQS for Arsenic?

| Pollutant | Current MCL / New or Adjusted AWQS | Previous AWQS |
|-----------|---------------------------------------|---------------|
| Arsenic | 0.010 mg/L | 0.05 mg/L |

Substantial Opposition: ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the MCL for Arsenic as an AWQS.

Associated Rulemakings: ADEQ proposes a total of five (5) NFRMs in the collective AWQS Update rulemaking. Three (3) of the five (5) NFRMs, including this NFRM, propose to establish or align the AWQSs with the MCLs in *Arizona Administrative Code*, (A.A.C.) Title 18, Chapter 11, Article 4 for pollutants Arsenic, Bromate, Chlorite, Haloacetic Acids, Total Trihalomethanes and Uranium. This NFRM’s scope is limited to Arsenic. A second NFRM’s scope includes Uranium. A third NFRM’s scope includes four (4) disinfection byproducts: Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes. A fourth NFRM’s scope includes microbiological contaminants. A fifth and final NFRM proposes to add a new rule to A.A.C., Title 18, Chapter 9, Articles 1 and 2, detailing implementation of new or adjusted AWQSs into existing Individual Aquifer Protection Program permits (APPs), along with adjacent amendments to existing rule to make way for this purpose.

What are Aquifer Water Quality Standards and what is their purpose? Aquifer Water Quality Standards or “AWQSs” are protective groundwater standards that were put in place and designated by the Arizona Legislature to preserve Arizona’s aquifer quality for drinking water-protected use (*See* A.R.S. § 49-224(B)).

How are Aquifer Water Quality Standards Used? The AWQSs are used in ADEQ’s Aquifer Protection Program (APP), and, to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

Sampling and Analytical Methodologies. In the Baseline Monitoring Requirement subsection of the final rule at R18-9-A215(E)(4), the following is provided,

“[s]ampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.”

At the time this NFRM was compiled, wastewater methods for some of the pollutants with new or adjusted AWQSS were not ADHS-Approved (see A.A.C. Title 9, Chapter 14, Article 6, Tables 6.2.A and 6.2.B). In March 2025, ADEQ formally requested that the following sampling methods be reviewed and considered for addition to ADHS’s “Director Approved” list of sampling methods pursuant to A.A.C. R9-14-610, found published outside of the rule on ADHS’s website, here: <https://www.azdhs.gov/documents/preparedness/state-laboratory/lab-licensure-certification/environmental-laboratory/application/application-part-e.pdf>

Table 1. Analytical Methods for Baseline Monitoring

| Analyte | Analytical Method |
|-----------------------|--|
| Arsenic | EPA 200.8, SM 3113B, SM 3114B |
| Bromate | EPA 300.1, EPA 317.0 Rev 2.0, EPA 321.8, EPA 326.0 |
| Chlorite | EPA 300.0, EPA 300.1, EPA 317.0 Rev 2.0, EPA 326.0 |
| Haloacetic Acids | EPA 552.1, EPA 552.2, EPA 552.3, SM 6251B |
| Fecal coliform | SM 9223B |
| <i>E. coli</i> | SM 9223B |
| Total Trihalomethanes | EPA 502.2, EPA 524.2, EPA 551.1, SM 6251B |
| Uranium (Total) | EPA 200.8 |

* “EPA” - Environmental Protection Agency; “SM” - Standard Methods

Who are the stakeholders to this rulemaking? The stakeholders for this rulemaking are predominantly the permittees of the APP, and to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP). Other stakeholders include private well owners, community water systems and the constituents they serve, as well as all Arizonans who benefit from the state’s aquifers being protected for drinking water use.

What has been the stakeholder process thus far for this rulemaking? ADEQ has conducted a number of general and specific stakeholder meetings, as well as tribal listening sessions, concerning this rulemaking. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ’s website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support:

Summary: This report provides a review of the EPA assumptions used to establish the MCL for Arsenic at 66 *Federal Register* 6976. The assumptions reviewed are listed in A.R.S. § 49-223(A) and include technologies, costs, sampling and analytical methodologies and public health risk reduction.

Study Resource: Provided review of the EPA assumptions used to establish the MCL for Arsenic at 66 *Federal Register* 6976

in order to inform ADEQ further on the subject matter and its applicability in the AWQS setting.

Public Review: The public may review this study or may obtain copies from the Department by request. Requests can be submitted to the Department by email at awqs@azdeq.gov or by mail to Arizona Department of Environmental Quality, 1110 W. Washington Ave. Phoenix, AZ 85007.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. The summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Arsenic as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final

Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S.

Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the adjusted Arsenic MCL as an AWQS. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Arsenic AWQS rulemaking.

Costs to permittees to meet the adjusted AWQS for Arsenic are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to hundreds of millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the "fee-for-service" model requirements ADEQ must operate under (*see* A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Arsenic AWQS, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Arsenic as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including the reduction in loss of life due to reduced Arsenic consumption, as well as the avoidance or reduction of cases involving at least 17 ailments and loss of income and additional financial hardships associated with the

quantified and non-quantified diseases. Arizona’s many community water systems (CWSs) and their clientele could see savings due to reduced Arsenic in the groundwater under the proposed AWQS. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ’s dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: “permittees”) will be the primary bearers of costs associated with this rulemaking.

Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultants have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health

benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|---|---|
| <i>Costs and Benefits</i> | | |
| Treatment cost and benefit estimates | Matrix Report - Charts 8 & 9 | |
| <i>General</i> | | |
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/cpicalc.pl | |

Approach to the EIS for Arsenic. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (*see* Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA), which takes into account multiple factors affecting

potential costs and benefits. Cost ranges generated by the Matrix Report and used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP) program. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|------------------|-------------------------|---------------------|--|
| \$10,000 or less | \$10,001 to \$1,000,000 | \$1,000,001 or more | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|---|---|---|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees: Mines, Industrial Facilities, Wastewater Treatment Plants | Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to hundreds of millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | Significant Significant | |
| Clientele for Other Programs (UST, VRP, etc.) | Coming into compliance with new standards. | Minimal | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below. | Minimal, and spread broadly through the customer base, on a monthly basis | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|----------------------------------|-------------------------------------|
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Arsenic as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. | | Significant |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. As many as 1.8 million Arizonans could be potentially affected in this way | | Significant |
| State costs | Some state-supported medical costs would decrease | | Significant |
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range) | | Minimal |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

In the Matrix Report, costs for treatment are given within a wide range. The complexity driving the variation in costs results primarily from: 1) permittees’ need to consider/analyze multiple treatment technologies that have varying applicability according to specific water conditions; 2) operational costs that vary by influent Arsenic concentration and water quality, and 3) the scale of

permittee operations, plus other factors. The Matrix Report recognized that the number of permittees-affected needed to be adjusted downward because some facilities have ambient Arsenic concentrations exceeding the proposed AWQS, and in recognition of facilities that analyzed for total Arsenic and had a quantified Arsenic discharge limit, plus other technicalities. For the purposes of this EIS, the Matrix Report's statewide cost range estimates (from nothing to hundreds or millions) can be viewed as a theoretical total range, reflecting treatment options available, but within which permittees would tend to be minimizing costs where possible. Consequently the actual cost range is likely to be considerably narrower than the theoretical total range. The group of permittees that undertake treatment to reduce Arsenic must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate.

Mines

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive, and constitutes an additional complicating factor in selecting and using technology for dealing with changes in the AWQS for individual contaminants, including Arsenic.

Industrial Facilities

The estimated number of industrial wastewater processing permittees is 56. This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQSs, except where ambient water levels that exceed proposed AWQSs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQSs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele.

For segment 2, according to the Matrix Report, the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This estimate was further reduced for this analysis based on data in the Matrix Report that indicated that private wells in which ambient levels exceeded 3 µg/L, in other words where a benefit could begin to be realized, constituted 90% of the total.

Some of the water wells used by this group, as is true for wells generally throughout Arizona, will have ambient Arsenic levels above the proposed AWQS. The Matrix Report noted that an assessment of Arizona wellwater quality data indicated that 24% of tested wells had Arsenic levels exceeding 10 micrograms per liter. Regardless of ambient contaminant levels, to receive maximum benefit from lowered Arsenic levels by way of the revised AWQS, well users would have to be drawing from aquifers that are recharged from facilities using that proposed AWQS.

For the analysis in this EIS, ADEQ and its consultant applied updated (from the Matrix Report) estimates of savings resulting from bladder and lung cancer cases avoided at the national level. The Matrix Report faced certain limitations in estimating benefits from reductions in disease due to the improved AWQS for Arsenic, essentially having to follow the guidance provided by EPA in this regard. EPA, in turn, made use of two proxy cancer ailments to represent diseases that could lead to loss of life and an extended illness, with the benefits representing the forgone effects of those representative ailments. There are several dimensions to the conservative estimates that result from this approach:

- According to the Matrix Report, benefit estimates may underestimate the cost forgone for avoiding the non-fatal cancers [the costs of which are used as a proxy for one component of benefits], as these costs do not take into account the loss of income and additional financial hardships or intangible factors, such as the psychological impact associated with the cancer.
- The Matrix Report lists the following diseases, which when avoided become part of the non-quantified benefits associated with the proposed AWQS (data for quantification being unavailable):
 - Pulmonary Disorders
 - Cardiovascular disease
 - Stroke Risk
 - Prostate cancer
 - Neurological dysfunction
 - Skin cancer and disorders
 - Liver cancer
 - Endocrine disruption
 - Kidney cancer
 - Gastrointestinal disease
 - Diabetes
 - Pregnancy outcomes such as fetal and infant morbidity, fetal loss, stillbirth, and neonatal mortality
 - Renal cancer and disease
 - Nonmalignant respiratory disease
 - Neurodevelopmental toxicity
 - Immune [disorder] effects
 - Pancreatic cancer

Community water systems (CWSs) and their clientele

Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. Estimates of the population served by municipal or other systems with water sources that included groundwater were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater. As many as 2.04 million Arizonans, as estimated, could be affected in this way. Data in the Matrix Report indicated that private wells in which ambient Arsenic levels exceeded 3 µg/L constituted 90% of the total. The same factor applied to the estimate of groundwater-served customers would yield an estimate of 1.8 million Arizonans potentially affected. Dollar estimates of this effect have not been attempted.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems). In the summary of the model as tabulated below for the contaminant of Arsenic, direct employment and earnings resulting from permittees’ investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|---|-------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$5,917,887 |

| | |
|--|---------------|
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 10.65 |
| New Annual Earnings for Direct Jobs Created | \$994,647 |
| Total New Jobs (Direct + Secondary) | 32.67 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$45,174 |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultants further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultants to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultants derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was

prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee's particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultants used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultants also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultants estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQs.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in

A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (see A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced Arsenic in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultants have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary

employment generated by investments in Arsenic technology (using the low end of costs where ranges are given) are just over \$45,000.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). The Matrix Report on the Arsenic-standard assumptions relied upon by EPA to develop their MCL was, itself, based on a review of the *Final Rule* in the *Federal Register*, 66 FR 6976, and is meant to further inform ADEQ on the subject matter and its applicability in the AWQS setting. ADEQ and its consultants also made selective use of EPA documents addressing specific contaminants referenced extensively by the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultants reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Not applicable

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Interest Group

Arsenic contamination in Arizona groundwater remains a persistent threat to public health. Chronic exposure to arsenic, even at low levels, is linked to cancers, cardiovascular disease, and developmental issues. The EPA updated its arsenic standard to 10 ppb in 2002, yet ADEQ has not incorporated this standard into state aquifer regulations. Adopting the EPA's MCL for arsenic without delay is critical to ensuring public safety. ADEQ must also prioritize monitoring and remediation efforts in rural and underserved communities disproportionately impacted by arsenic contamination.

ADEQ Response 1:

ADEQ appreciates the comment. The Arsenic MCL is one of the seven (7) MCLs proposed for adoption as AWQSS within the scope of the collective “AWQS Update” rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQSS verbatim. As is detailed in this rulemaking, the Arsenic MCL is 0.010 milligrams per Liter (mg/L) which is equivalent to 10 parts per billion or (ppb). 0.010 mg/L is the AWQS for Arsenic established through this rulemaking.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Arsenic MCL as AWQS.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rulemaking does not create a requirement for a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is not applicable to the subject matter of the rule.

c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:

Not applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 11 - Arsenic

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Arsenic as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the adjusted Arsenic MCL as an AWQS. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Arsenic AWQS rulemaking.

Costs to permittees to meet the adjusted AWQS for Arsenic are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to hundreds of millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the "fee-for-service" model requirements ADEQ must operate under (*see* A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Arsenic AWQS, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Arsenic as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including the reduction in loss of life due to reduced Arsenic consumption, as well as the avoidance or reduction of cases involving at least 17 ailments and loss of income and additional financial hardships associated with the quantified and non-quantified diseases. Arizona's many community water systems (CWSs) and their clientele could see savings due to reduced Arsenic in the groundwater under the proposed AWQS. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: “permittees”) will be the primary bearers of costs associated with this rulemaking. Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees’ fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultants have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (see A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|---|---|
| Costs and Benefits | | |
| Treatment cost and benefit estimates | Matrix Report - Charts 8 & 9 | |
| General | | |
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/epicalc.pl | |

Approach to the EIS for Arsenic. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (see Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA), which takes into account multiple factors affecting potential costs and benefits. Cost ranges generated by the Matrix Report and used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP) program. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|-----------------------------|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |

| Category | # Permittees |
|---|--------------|
| Total | 434 |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|------------------|-------------------------|---------------------|--|
| \$10,000 or less | \$10,001 to \$1,000,000 | \$1,000,001 or more | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|---|---|---|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees: Mines, Industrial Facilities, Wastewater Treatment Plants | Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs from nothing to hundreds of millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | Significant Significant | |
| Clientele for Other Programs (UST, VRP, etc.) | Coming into compliance with new standards. | Minimal | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below. | Minimal, and spread broadly through the customer base, on a monthly basis | |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Arsenic as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|--|----------------------------------|-------------------------------------|
| Private well users, health benefits: In Arizona, the more immediately affected population consists primarily of private well users throughout the state. | Following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. | | Significant |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. As many as 1.8 million Arizonans could be potentially affected in this way | | Significant |
| State costs | Some state-supported medical costs would decrease | | Significant |
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$45,000 for the direct and secondary hires (at the low end of the estimated cost range) | | Minimal |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

In the Matrix Report, costs for treatment are given within a wide range. The complexity driving the variation in costs results primarily from: 1) permittees’ need to consider/analyze multiple treatment technologies that have varying applicability according to specific water conditions; 2) operational costs that vary by influent Arsenic concentration and water quality, and 3) the scale of permittee operations, plus other factors. The Matrix Report recognized that the number of permittees-affected needed to be adjusted downward because some facilities have ambient Arsenic concentrations exceeding the proposed AWQS, and in recognition of facilities that analyzed for total Arsenic and had a quantified Arsenic discharge limit, plus other technicalities.

For the purposes of this EIS, the Matrix Report’s statewide cost range estimates (from nothing to hundreds or millions) can be viewed as a theoretical total range, reflecting treatment options available, but within which permittees would tend to be minimizing costs where possible. Consequently the actual cost range is likely to be considerably narrower than the theoretical total range. The group of permittees that undertake treatment to reduce Arsenic must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate.

Mines

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive, and constitutes an additional complicating factor in selecting and using technology for dealing with changes in the AWQS for individual contaminants, including Arsenic.

Industrial Facilities

The estimated number of industrial wastewater processing permittees is 56. This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail

- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQSs, except where ambient water levels that exceed proposed AWQSs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQSs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele. For segment 2, according to the Matrix Report, the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This estimate was further reduced for this analysis based on data in the Matrix Report that indicated that private wells in which ambient levels exceeded 3 µg/L, in other words where a benefit could begin to be realized, constituted 90% of the total. Some of the water wells used by this group, as is true for wells generally throughout Arizona, will have ambient Arsenic levels above the proposed AWQS. The Matrix Report noted that an assessment of Arizona wellwater quality data indicated that 24% of tested wells had Arsenic levels exceeding 10 micrograms per liter. Regardless of ambient contaminant levels, to receive maximum benefit from lowered Arsenic levels by way of the revised AWQS, well users would have to be drawing from aquifers that are recharged from facilities using that proposed AWQS. For the analysis in this EIS, ADEQ and its consultant applied updated (from the Matrix Report) estimates of savings resulting from bladder and lung cancer cases avoided at the national level. The Matrix Report faced certain limitations in estimating benefits from reductions in disease due to the improved AWQS for Arsenic, essentially having to follow the guidance provided by EPA in this regard. EPA, in turn, made use of two proxy cancer ailments to represent diseases that could lead to loss of life and an extended illness, with the benefits representing the forgone effects of those representative ailments. There are several dimensions to the conservative estimates that result from this approach:

- According to the Matrix Report, benefit estimates may underestimate the cost forgone for avoiding the non-fatal cancers [the costs of which are used as a proxy for one component of benefits], as these costs do not take into account the loss of income and additional financial hardships or intangible factors, such as the psychological impact associated with the cancer.
- The Matrix Report lists the following diseases, which when avoided become part of the non-quantified benefits associated with the proposed AWQS (data for quantification being unavailable):
 - o Pulmonary Disorders
 - o Cardiovascular disease
 - o Stroke Risk
 - o Prostate cancer
 - o Neurological dysfunction
 - o Skin cancer and disorders
 - o Liver cancer
 - o Endocrine disruption
 - o Kidney cancer
 - o Gastrointestinal disease
 - o Diabetes
 - o Pregnancy outcomes such as fetal and infant morbidity, fetal loss, stillbirth, and neonatal mortality
 - o Renal cancer and disease

- o Nonmalignant respiratory disease
- o Neurodevelopmental toxicity
- o Immune [disorder] effects
- o Pancreatic cancer

Community water systems (CWSs) and their clientele

Savings could accrue to CWSs due to reduced Arsenic in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. Estimates of the population served by municipal or other systems with water sources that included groundwater were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater. As many as 2.04 million Arizonans, as estimated, could be affected in this way. Data in the Matrix Report indicated that private wells in which ambient Arsenic levels exceeded 3 µg/L constituted 90% of the total. The same factor applied to the estimate of groundwater-served customers would yield an estimate of 1.8 million Arizonans potentially affected. Dollar estimates of this effect have not been attempted.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems).

In the summary of the model as tabulated below for the contaminant of Arsenic, direct employment and earnings resulting from permittees’ investment in equipment are shown separately from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|---------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$5,917,887 |
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 10.65 |
| New Annual Earnings for Direct Jobs Created | \$994,647 |
| Total New Jobs (Direct + Secondary) | 32.67 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$45,174 |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown

in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultants further assumed that wastewater treatment plants' revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue ("Output") allows ADEQ and its consultants to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultants derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee's particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, "Small business' means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year."
- ADEQ and its consultants used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultants also screened permittees to identify "businesses" as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultants estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order |

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| | to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (<i>see A.R.S. §§ 49-223, 224, 241, 243</i>). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (<i>see A.R.S. §§ 49-223, 224, 241, 243</i>). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (<i>see A.R.S. §§ 49-223, 224, 241, 243</i>). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced Arsenic in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultants have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary employment generated by investments in Arsenic technology (using the low end of costs where ranges are given) are just over \$45,000.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). The Matrix Report on the Arsenic-standard assumptions relied upon by EPA to develop their MCL was, itself, based on a review of the *Final Rule* in the *Federal Register*, 66 FR 6976, and is meant to further inform ADEQ on the subject matter and its applicability in the AWQS setting. ADEQ and its consultants also made selective use of EPA documents addressing specific contaminants referenced extensively by the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultants reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

AWP NFRM Public Comments - 18 AAC 11 - Arsenic

Comment 1: Interest Group

Arsenic contamination in Arizona groundwater remains a persistent threat to public health. Chronic exposure to arsenic, even at low levels, is linked to cancers, cardiovascular disease, and developmental issues. The EPA updated its arsenic standard to 10 ppb in 2002, yet ADEQ has not incorporated this standard into state aquifer regulations. Adopting the EPA's MCL for arsenic without delay is critical to ensuring public safety. ADEQ must also prioritize monitoring and remediation efforts in rural and underserved communities disproportionately impacted by arsenic contamination.

ADEQ Response 1:

ADEQ appreciates the comment. The Arsenic MCL is one of the seven (7) MCLs proposed for adoption as AWQs within the scope of the collective "AWQS Update" rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQs verbatim. As is detailed in this rulemaking, the Arsenic MCL is 0.010 milligrams per Liter (mg/L) which is equivalent to 10 parts per billion or (ppb). 0.010 mg/L is the AWQS for Arsenic established through this rulemaking.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. "Substantial Opposition" is a term defined in A.R.S. § 49-223(A) as, "... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS]." Upon receipt of "substantial opposition", the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is "appropriate" as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Arsenic MCL as AWQS.

Supp. 23-3

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

The table of contents on page one contains links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

This Chapter contains rules that were filed to be codified in the *Arizona Administrative Code* between the dates of July 1, 2023 through September 30, 2023

| | | | | | |
|-----------------------------|---|--------------------|-----------------------------|--|--------------------|
| R18-11-403. | Analytical Methods | 83 | R18-11-502. | Aquifer Boundaries | 86 |
| R18-11-407. | Aquifer Water Quality Standards in Reclassified | | R18-11-504. | Agency Action on Petition | 87 |
| | Aquifers | 85 | R18-11-506. | Rescission of Reclassification | 87 |

Questions about these rules? Contact:

Department: Arizona Department of Environmental Quality
 Address: 1110 W. Washington St.
 Phoenix, AZ 85007
 Website: www.azdeq.gov
 Name: Jon Rezabek
 Telephone: (602) 771-8219
 Email: rezabek.jon@azdeq.gov

The release of this Chapter in Supp. 23-3 replaces Supp. 22-4, 1-99 pages.

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, www.azsos.gov under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, rules managing editor, assisted with the editing of this Chapter.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Authority: A.R.S. §§49-202(A), 49-203(A)(1)

Supp. 23-3

CHAPTER TABLE OF CONTENTS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

Tables in Article 1, Appendix A have been updated and now include historical notes (Supp. 16-4).

Article 1, consisting of Appendices A through C, repealed April 24, 1996 (Supp. 96-2).

Article 1, consisting of Section R18-11-103, reserved effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-105 and R18-11-106, and Appendices A and B, adopted April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 and R18-11-102, R18-11-104, R18-11-107 through R18-11-109, R18-11-111 through R18-11-113, R18-11-115, R18-11-117 and R18-11-118, R18-11-120 and R18-11-121, amended effective April 24, 1996 (Supp. 96-2).

Article 1, consisting of Sections R18-11-101 through R18-11-121 and Appendices A through C, adopted effective February 18, 1992 (Supp. 92-1).

Article 1, consisting of Section R18-11-101, repealed effective February 18, 1992 (Supp. 92-1).

Article 1 consisting of Section R9-21-101 renumbered as Article 1, Section R18-11-101 (Supp. 87-3).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS**R18-11-101. Definitions**

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation (AgI)" means the use of a surface water for crop irrigation.
3. "Agricultural livestock watering (AgL)" means the use of a surface water as a water supply for consumption by livestock.
4. "Annual mean" is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. "Aquatic and wildlife (cold water) (A&Wc)" means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. "Aquatic and wildlife (effluent-dependent water) (A&Wedw)" means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. "Aquatic and wildlife (ephemeral) (A&We)" means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. "Aquatic and wildlife (warm water) (A&Ww)" means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. "Arizona Pollutant Discharge Elimination System (AZPDES)" means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. "Clean Water Act" means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
13. "Criteria" means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
14. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
15. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health based water quality standard criteria, in order to simulate long-term exposure, the receiving water critical flow condition is the harmonic mean flow.
16. "Deep lake" means a lake or reservoir with an average depth of more than 6 meters.
17. "Designated use" means a use specified in Appendix B of this Article for a surface water.
18. "Domestic water source (DWS)" means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
19. "Effluent-dependent water (EDW)" means a surface water or portion of a surface water, that consists of a point source discharge without which the surface water would be ephemeral. An effluent-dependent water may be perennial or intermittent depending on the volume and frequency of the point source discharge of treated wastewater.
20. "Ephemeral water" means a surface water or portion of surface water that flows or pools only in direct response to precipitation.
21. "Existing use" means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
22. "Fish consumption (FC)" means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
23. "Full-body contact (FBC)" means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
24. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_Y = \sqrt[n]{(Y_1)(Y_2)(Y_3)\dots(Y_n)}$$
25. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
26. "Igneous lake" means a lake located in volcanic, basaltic, or granite geology and soils.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

27. "Intermittent water" means a surface water or portion of surface water that flows continuously during certain times of the year and more than in direct response to precipitation, such as when it receives water from a spring, elevated groundwater table or another surface source, such as melting snowpack.
28. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
29. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
30. "Outstanding Arizona water (OAW)" means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
31. "Partial-body contact (PBC)" means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
32. "Perennial water" means a surface water or portion of surface water that flows continuously throughout the year.
33. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S. § 49-201(29)
34. "Pollutant Minimization Program" means a structured set of activities to improve processes and pollutant controls that will prevent and reduce pollutant loadings.
35. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
36. "Reference condition" means a set of abiotic physical stream habitat, water quality, and site selection criteria established by the Director that describe the typical characteristics of stream sites in a region that are least disturbed by environmental stressors. Reference biological assemblages of macroinvertebrates and algae are collected from these reference condition streams for calculating the Arizona Indexes of Biological Integrity thresholds.
37. "Regional Administrator" means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
38. "Regulated discharge" means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
39. "Riffle habitat" means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
40. "Run habitat" means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
41. "Sedimentary lake" means a lake or reservoir in sedimentary or karst geology and soils.
42. "Shallow lake" means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
43. "Significant degradation" means:
 - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
 - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
44. "Surface water" means "WOTUS" as defined in A.R.S. § 49-201(53).
45. "Total nitrogen" means the sum of the concentrations of ammonia (NH₃), ammonium ion (NH₄⁺), nitrite (NO₂), and nitrate (NO₃), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
46. "Total phosphorus" means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
47. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
48. "Urban lake" means a manmade lake within an urban landscape.
49. "Use attainability analysis" means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
50. "Variance" means a time-limited designated use and criterion for a specific pollutant(s) or water quality parameter(s) that reflect the highest attainable condition during the term of the variance.
51. "Wadable" means a surface water can be safely crossed on foot and sampled without a boat.
52. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
53. "Wetland" means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

54. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Amended effective January 7, 1985 (Supp. 85-1). Amended by adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) "Navigable Water", previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-102. Applicability

- A. The water quality standards prescribed in this Article apply to surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is a part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores that is not a surface water or is located in an area that once was a surface water but is no longer a surface water because it has been and remains legally converted, including:
 - a. A pit,
 - b. Pregnant leach solution pond,
 - c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond or a sump in a mine pit associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product and that is being held for recycling,
 - h. Spill or upset catchment pond, or
 - i. A pond used for onsite remediation;
 3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-103. Repealed**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1). Repealed effective April 24, 1996 (Supp. 96-2).

R18-11-104. Designated Uses

- A. The Director shall adopt or remove a designated use or subcategory of a designated use by rule.
- B. Designated uses of a surface water may include full-body contact, partial-body contact, domestic water source, fish consumption, aquatic and wildlife (cold water), aquatic and wildlife (warm water), aquatic and wildlife (ephemeral), aquatic and wildlife (effluent-dependent water), agricultural irrigation, and agricultural livestock watering. The designated uses for specific surface waters are listed in Appendix B of this Article.
- C. Numeric water quality criteria to maintain and protect water quality for the designated uses are prescribed in Appendix A, R18-11-109, R18-11-110, and R18-11-112. Narrative water quality standards to protect all surface waters are prescribed in R18-11-108.
- D. If a surface water has more than one designated use listed in Appendix B, the most stringent water quality criterion applies.
- E. The Director shall revise the designated uses of a surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in Appendix B.
- F. In designating uses of a surface water and in establishing water quality criteria to protect the designated uses, the Director shall take into consideration the applicable water quality standards for downstream surface waters and shall ensure that the water quality standards that are established for an upstream surface water also provide for the attainment and maintenance of the water quality standards of downstream surface waters.
- G. A use attainability analysis shall be conducted prior to removal of a designated use or adoption of a subcategory of a designated use that requires less stringent water quality criteria.
- H. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria, provided the designated use is not an existing use and it is demonstrated through a use attainability analysis that attaining the designated use is not feasible for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A natural, ephemeral, intermittent, or low-flow condition or water level prevents the attainment of the use;
 3. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
 4. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
 5. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use; or
 6. Controls more stringent than those required by § 301 (b) and § 306 of the Clean Water Act [33 U.S.C. § 1311 and § 1316] are necessary to attain the use and implementation

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

of the controls would result in substantial and widespread economic and social impact.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-105. Tributaries; Designated Uses

The following water quality standards apply to a surface water that is not listed in Appendix B but that is a tributary to a listed surface water.

1. The aquatic and wildlife (ephemeral) and partial-body contact standards apply to an unlisted tributary that is an ephemeral water.
2. The aquatic and wildlife (cold water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is above 5000 feet in elevation.
3. The aquatic and wildlife (warm water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is below 5000 feet in elevation.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Section heading amended per instructions of the Department of Environmental Quality, August 9, 1996 (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

R18-11-106. Net Ecological Benefit

- A. The Director may, by rule, modify a water quality standard on the ground that there is a net ecological benefit associated with the discharge of effluent to support or create a riparian and aquatic habitat in an area where water resources are limited. The Director may modify a water quality standard for a pollutant if it is demonstrated that:
 1. The discharge of effluent creates or supports an ecologically valuable aquatic, wetland, or riparian ecosystem in an area where these resources are limited;
 2. The ecological benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with the elimination of the discharge of effluent;
 3. The cost of treatment to achieve compliance with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent to the surface water. The discharger shall demonstrate that it is feasible to eliminate the discharge of effluent that creates or supports the ecologically valuable aquatic, wetland, or riparian ecosystem;
 4. The discharge of effluent to the surface water will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water;
 5. All practicable point source discharge control programs, including local pretreatment, waste minimization, and source reduction programs are implemented; and
 6. The discharge of effluent does not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.
- B. The Director shall not modify a water quality criterion for a pollutant to be less stringent than a technology-based effluent

limitation that applies to the discharge of that effluent. The discharge of effluent shall, at a minimum, comply with applicable technology-based effluent limitations.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-107. Antidegradation

- A. The Director shall, using R18-11-107.01 and this Section, determine whether there is degradation of water quality in a surface water on a pollutant-by-pollutant basis.
- B. Tier 1: The level of water quality necessary to support an existing use shall be maintained and protected. No degradation of existing water quality is permitted in a surface water where the existing water quality does not meet the applicable water quality standards.
- C. Tier 2: Where existing water quality in a surface water is better than the applicable water quality standard the existing water quality shall be maintained and protected. The Director may allow degradation of existing water quality in the surface water, if the Director makes all of the following findings:
 1. The water quality necessary for existing uses is fully protected and water quality is not lowered to a level that does not comply with applicable water quality standards,
 2. The highest statutory and regulatory requirements for new and existing point sources are achieved,
 3. All cost-effective and reasonable best management practices for nonpoint source pollution control are implemented, and
 4. Allowing lower water quality is necessary to accommodate important economic or social development in the area where the surface water is located.
- D. Tier 3: Existing water quality shall be maintained and protected in a surface water that is classified as an OAW under R18-11-112. Degradation of an OAW under subsection (C) is prohibited.
- E. The Director shall implement this Section in a manner consistent with § 316 of the Clean Water Act [33 U.S.C. 1326] if a potential water quality impairment associated with a thermal discharge is involved.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-107.01. Antidegradation Criteria

- A. Tier 1 antidegradation protection.
 1. Tier 1 antidegradation protection applies to the following surface waters:
 - a. A surface water listed on the 303(d) list for the pollutant that resulted in the listing,
 - b. An effluent dependent water,
 - c. An ephemeral water,
 - d. An intermittent water, and
 - e. A canal listed in Appendix B.
 2. A regulated discharge shall not cause a violation of a surface water quality standard or a wasteload allocation in a total maximum daily load approved by EPA.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. Except as provided in subsections (E) and (F), Tier 1 antidegradation review requirements are satisfied for a point-source discharge regulated under an individual AZPDES permit to an ephemeral water, effluent dependent water, intermittent water, or a canal listed in Appendix B, if water quality-based effluent limitations designed to achieve compliance with applicable surface water quality standards are established in the permit and technology-based requirements of the Clean Water Act for the point source discharge are met.
- B. Tier 2 antidegradation protection.**
1. Tier 2 antidegradation protection applies to a perennial water with existing water quality that is better than applicable water quality standards. A perennial water that is not listed in subsection (A)(1) nor classified as an OAW under A.A.C. R18-9-112(G) has Tier 2 antidegradation protection for all pollutants of concern.
 2. A regulated discharge that meets the following criteria, at critical flow conditions, does not cause significant degradation:
 - a. The regulated discharge consumes less than 20 percent of the available assimilative capacity for each pollutant of concern, and
 - b. At least 50 percent of the assimilative capacity for each pollutant of concern remains available in the surface water for each pollutant of concern.
 3. Antidegradation review. Any person proposing a new or expanded regulated discharge under an individual AZPDES permit that may cause significant degradation shall provide ADEQ with the following information:
 - a. Baseline characterization. A person seeking authorization to discharge under an individual AZPDES permit to a perennial water shall provide baseline water quality data on pollutants of concern where no data exists or there are insufficient data to characterize baseline water quality and to determine available assimilative capacity. A discharger shall characterize baseline water quality at a location upstream of the proposed discharge location;
 - b. Alternative analysis.
 - i. The person seeking authorization for the discharge shall prepare and submit a written analysis of alternatives to the discharge. The analysis shall provide information on all reasonable, cost-effective, less-degrading or non-degrading discharge alternatives. Alternatives may include wastewater treatment process changes or upgrades, pollution prevention measures, source reduction, water reclamation, alternative discharge locations, groundwater recharge, land application or treatment, local pretreatment programs, improved operation and maintenance of existing systems, seasonal or controlled discharge to avoid critical flow conditions, and zero discharge;
 - ii. The alternatives analysis shall include cost information on base pollution control measures associated with the regulated discharge and cost information for each alternative;
 - iii. The person shall implement the alternative that is cost-effective and reasonable, results in the least degradation, and is approved by the Director. An alternative is cost-effective and reasonable if treatment costs associated with the alternative are less than a 10 percent increase above the cost of base pollution control measures;
- iv. For purposes of this subsection, “base pollution control measures” are water pollution control measures required to meet technology-based requirements of the Clean Water Act and water quality-based effluent limits designed to achieve compliance with applicable water quality standards; and
- c. Social and economic justification. The person shall demonstrate to the Director that significant degradation is necessary to accommodate important economic or social development in the local area. The person seeking authorization for the discharge shall prepare a written social and economic justification that includes a description of the following:
 - i. The geographic area where significant degradation of existing water quality will occur;
 - ii. The current baseline social and economic conditions in the local area;
 - iii. The net positive social and economic effects of development associated with the regulated discharge and allowing significant degradation;
 - iv. The negative social, environmental, and economic effects of allowing significant degradation of existing water quality; and
 - v. Alternatives to the regulated discharge that do not significantly degrade water quality yet may yield comparable social and economic benefits.
4. For purposes of this Section, the term “pollutant of concern” means a pollutant with either a numeric or narrative water quality standard.
 5. Public participation. The Director shall provide public notice and an opportunity to comment on an antidegradation review under subsection (B)(3) and shall provide an opportunity for a public hearing under A.A.C. R18-9-A908(B).
- C. Tier 3 antidegradation protection.**
1. Tier 3 antidegradation protection applies only to an OAW listed in R18-11-112(G).
 2. A new or expanded point-source discharge directly to an OAW is prohibited.
 3. A person seeking authorization for a regulated discharge to a tributary to, or upstream of, an OAW shall demonstrate in a permit application or in other documentation submitted to ADEQ that the regulated discharge will not degrade existing water quality in the downstream OAW.
 4. A discharge regulated under a § 404 permit that may affect existing water quality of an OAW requires a determination by the Director to ensure that existing water quality is maintained and protected and any water quality impacts are temporary. Temporary water quality impacts are those impacts that occur for a period of six months or less and are not regularly occurring. The form of such a determination shall be as follows:
 - a. For Corps-issued § 404 permits, an individual § 401 water quality certification.
 - b. For Director-issued § 404 permits, a § 404 permit action, wherein the Director shall conduct a water quality evaluation as a part of the state’s requirements for issuing § 404 permits and in accordance with this Section.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. Antidegradation review of a § 404 permit shall be conducted as follows:
 1. For a Corps-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a nationwide or regional § 404 permit as part of the § 401 water quality certification prior to issuance of the nationwide or regional permit. The Director shall conduct the antidegradation review of an individual § 404 permit if the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters. For regulated discharges that may degrade water quality in an OAW or a water that is on the 303(d) List of impaired waters, the Director shall conduct the antidegradation review as part of the § 401 water quality certification process.
 2. For a Director-issued § 404 permit. The Director shall conduct the antidegradation review of any discharge authorized under a general § 404 permit as a part of its determination whether to issue a general permit in accordance with state requirements for issuing a § 404 general permit and with this Section. The Director shall conduct the antidegradation review of an individual § 404 permit as part of the § 404 permit action in accordance with state requirements for issuing a § 404 permit and in accordance with this Section.
- E. Antidegradation review of an AZPDES stormwater permit. An individual stormwater permit for a municipal separate storm sewer system (MS4) meets antidegradation requirements if the permittee complies with the permit, including developing a stormwater management plan containing controls that reduce the level of pollutants in stormwater discharges to the maximum extent practicable.
- F. Antidegradation review of a general permit. The Director shall conduct the antidegradation review of a regulated discharge authorized by a general permit at the time the general permit is issued or renewed. A person seeking authorization to discharge under a general permit is not required to undergo an individual antidegradation review at the time the Notice of Intent is submitted unless the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-108. Narrative Water Quality Standards

- A. A surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or

- 8. Change the color of the surface water from natural background levels of color.
- B. A surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard.
- C. A surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.
- D. A surface water shall not contain solid waste such as refuse, rubbish, demolition or construction debris, trash, garbage, motor vehicles, appliances, or tires.
- E. A Wadeable, perennial stream shall support and maintain a community of organisms having a taxa richness, species composition, tolerance, and functional organization comparable to that of a stream with reference conditions in Arizona.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.01. Narrative Biological Criteria for Wadeable, Perennial Streams

- A. The narrative biological criteria in this Section apply to a wadeable, perennial stream with either an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The biological standard in R18-11-108(E) is met when a bioassessment result, as measured by the Arizona Index of Biological Integrity (IBI), for cold or warm water is:
 1. Greater than or equal to the 25th percentile of reference condition, or
 2. Greater than the 10th percentile of reference condition and less than the 25th percentile of reference condition and a verification bioassessment result is greater than or equal to the 25th percentile of reference condition.
- C. Arizona Index of Biological Integrity (IBI) scores:

| Bioassessment Result | Index of Biological Integrity Scores | |
|--|--------------------------------------|---------|
| | A&Wc | A&Ww |
| Greater than or equal to the 25th percentile of reference condition | ≥52 | ≥50 |
| Greater than the 10th and less than the 25th percentile of reference condition | 46 - 51 | 40 - 49 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.02. Narrative Bottom Deposit Criteria for Wadeable, Perennial Streams

- A. The narrative bottom deposit criteria in this Section apply to wadeable, perennial streams with an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- B. The narrative water quality standard for bottom deposits at R18-11-108(A)(1) is met when:
 1. The percentage of fine sediments in the riffle habitats of a wadeable, perennial stream with an A&Wc designated use, as determined by a riffle pebble count, is less than or equal to 30 percent.
 2. The percentage of fine sediments in all stream habitats of a wadeable, perennial stream with an A&Ww designated use, as determined by a reach level pebble count, is equal to or less than 50 percent.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-108.03. Narrative Nutrient Criteria for Lakes and Reservoirs

- A. The narrative nutrient criteria in this Section apply to those lakes and reservoirs categorized in Appendix B.
- B. The narrative water quality standard for nutrients at R18-11-108(A)(6) is met when, based on a minimum of two lake sample events conducted during the peak season based on lake productivity, the results show an average chlorophyll-*a* value below the applicable threshold for designated use and lake and reservoir category in subsection (D).
 1. The mean chlorophyll-*a* concentration is less than the lower value in the target range chlorophyll-*a* for the lake and reservoir category, or
 2. The mean chlorophyll-*a* concentration is within the target range for the lake and reservoir category and:
 - a. The mean blue green algae count is at or below 20,000 per milliliter, and

- b. The blue green algae count is less than 50 percent of the total algae count, and
- c. There is no evidence of nutrient-related impairments such as:
 - i. An exceedance of dissolved oxygen or pH standards;
 - ii. A fish kill coincident with a dissolved oxygen or pH exceedance;
 - iii. A fish kill or other aquatic organism mortality coincident with algal toxicity;
 - iv. Secchi depth is less than the lower value prescribed for the lake and reservoir category;
 - v. A nuisance algal bloom is present in the limnetic portion of the lake or reservoir; or
 - vi. The concentration of total phosphorous, total nitrogen, or total Kjehldal nitrogen (TKN) is greater than the upper value in the range prescribed for the lake and reservoir category; or

- 3. For a shallow lake. In addition to meeting the mean chlorophyll-*a* concentrations in subsections (B)(1) or (2), submerged aquatic vegetation covers 50 percent or less of the lake bottom and there is less than a 5 mg/L swing in diel-dissolved oxygen concentration measured within the photic zone.

- C. The following threshold ranges apply during the peak season for lake productivity:
 1. Warm water lakes peak season, April – October;
 2. Cold water lakes peak season, May – September.
- D. The following table lists the numeric targets for lakes and reservoirs.

| NUMERIC TARGETS FOR LAKES AND RESERVOIRS | | | | | | | | | | |
|--|--------------------------|----------------------|------------------|-------------------------|-----------------------|--------------------------------------|---------------------------|-------------------------------------|-------------------------|---------|
| Designated Use | Lake Category | Chl- <i>a</i> (µg/L) | Secchi Depth (m) | Total Phosphorus (µg/L) | Total Nitrogen (mg/L) | Total Kjehldal Nitrogen (TKN) (mg/L) | Blue-Green Algae (per ml) | Blue-Green Algae (% of total count) | Dissolved Oxygen (mg/L) | pH (SU) |
| FBC and PBC | Deep | 10-15 | 1.5-2.5 | 70-90 | 1.2-1.4 | 1.0-1.1 | 20,000 | | | 6.5-9.0 |
| | Shallow | 10-15 | 1.5-2.0 | 70-90 | 1.2-1.4 | 1.0-1.1 | | | | |
| | Igneous | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Sedimentary | 20-30 | 1.5-2.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| | Urban | 20-30 | 0.5-1.0 | 100-125 | 1.5-1.7 | 1.2-1.4 | | | | |
| A&Wc | All | 5-15 | 1.5-2.0 | 50-90 | 1.0-1.4 | 0.7-1.1 | | <50 | 7 (top m) | 6.5-9.0 |
| A&Ww | All (except urban lakes) | 25-40 | 0.8-1.0 | 115-140 | 1.6-1.8 | 1.3-1.6 | | | 6 (top m) | |
| | Urban | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | |
| A&Wedw | All | 30-50 | 0.7-1.0 | 125-160 | 1.7-1.9 | 1.4-1.7 | | | | 6.5-9.0 |
| DWS | All | 10-20 | 0.5-1.5 | 70-100 | 1.2-1.5 | 1.0-1.2 | 20,000 | | | 5.0-9.0 |

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-109. Numeric Water Quality Standards

- A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC | PBC |
|---|-----|-----|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

- B. pH. The following water quality standards for pH are expressed in standard units:

| pH | DWS | FBC, PBC, A&W ¹ | AgI | AgL |
|---------|-----|----------------------------|-----|-----|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

Footnotes:

- 1. "1" Includes A&Wc, A&Ww, A&Wedw, and A&We.

- C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww | A&Wedw | A&Wc |
|------|--------|------|
| | | |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|--------|--------|--------|
| 3.0° C | 3.0° C | 1.0° C |
|--------|--------|--------|

- D. Suspended sediment concentration.
- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:

| A&Wc | A&Ww |
|------|------|
| 25 | 80 |

- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

- E. Dissolved oxygen. A surface water meets the water quality standard for dissolved oxygen when either:
- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
 - The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|---|---|
| A&Ww | 6.0 |
| A&Wc | 7.0 |
| A&W edw for a sample taken from three hours after sunrise to sunset | 3.0 |
| A&W edw for a sample taken from sunset to three hours after sunrise | 1.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

- F. Nutrient criteria. The following are water quality standards for total phosphorus and total nitrogen (expressed in milligrams per liter (mg/L)) that apply to the surface waters listed below. A minimum of 10 samples, each taken at least 10 days apart in a consecutive 12-month period, are required to determine a 90th percentile. Not more than 10 percent of the samples may exceed the 90th percentile value listed below. The Director will apply these water quality standards for total phosphorus and total nitrogen to the surface waters listed below, and to their perennial tributaries, if listed. The Director may also apply these total phosphorus and total nitrogen standards to any source discharging to any tributary (ephemeral, intermittent, effluent dependent water, or perennial) of the surface waters listed below, if necessary to protect nutrient water quality in the listed surface water, based on the volume, frequency, magnitude and duration of the discharge, and distance to the downstream surface water listed below:

- Verde River and its perennial tributaries from the Verde headwaters to Bartlett Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.30 | 1.00 |
| Total nitrogen | 1.00 | 1.50 | 3.00 |

- Black River, Tonto Creek and their perennial tributaries for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.10 | 0.20 | 0.80 |
| Total nitrogen | 0.50 | 1.00 | 2.00 |

- Salt River and its perennial tributaries above Roosevelt Lake for any segments that are not located on tribal lands:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.12 | 0.30 | 1.00 |
| Total nitrogen | 0.60 | 1.20 | 2.00 |

- Salt River below Stewart Mountain Dam to its confluence with the Verde River:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.05 | – | 0.20 |
| Total nitrogen | 0.60 | – | 3.00 |

- Little Colorado River and its perennial tributaries upstream from:
 - The headwaters to River Reservoir,
 - South Fork of Little Colorado River at 34°00'49"/109°24'18" to above South Fork Campground at 34°04'49"/109°24'18", and
 - The headwaters of Water Canyon Creek to the Apache-Sitgreaves National Forest boundary:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.08 | 0.10 | 0.75 |
| Total nitrogen | 0.60 | 0.75 | 1.10 |

- From the Little Colorado River and State Route 260 at 34°06'39"/109°18'55" to Lyman Lake:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.20 | 0.30 | 0.75 |
| Total nitrogen | 0.70 | 1.20 | 1.50 |

- Colorado River at the Northern International Boundary near Morelos Dam:

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | – | 0.33 | – |
| Total nitrogen | – | 2.50 | – |

- Oak Creek from its headwaters at 35°01'30"/111°44'12" to its confluence with the Verde River and the West Fork of Oak Creek from its headwaters at 35°02'44"/111°54'48" to its confluence with Oak Creek.

| Surface Water | Annual Mean | 90th Percentile | Single Sample Maximum |
|------------------|-------------|-----------------|-----------------------|
| Total phosphorus | 0.1 | 0.25 | 0.30 |
| Total nitrogen | 1.00 | 1.50 | 2.50 |

- No discharge of wastewater to Show Low Creek or its perennial tributaries upstream of and including Fools Hollow Lake shall exceed 0.16 mg/L total phosphates as P.
- No discharge of wastewater to the San Francisco River or its perennial tributaries upstream of Luna Lake Dam shall exceed 1.0 mg/L total phosphates as P.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).
 Amended effective April 24, 1996 (Supp. 96-2).
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-110. Salinity Standards for the Colorado River

- A. The flow-weighted average annual salinity in the lower main stem of the Colorado River shall not exceed the following criteria:

| Location | Total Dissolved Solids |
|------------------|------------------------|
| Below Hoover Dam | 723 mg/L |
| Below Parker Dam | 747 mg/L |
| At Imperial Dam | 879 mg/L |

- B. The plan of implementation contained in the “2014 Review, Water Quality Standards for Salinity, Colorado River System,” approved October 2014, is incorporated by reference to preserve the basin-wide approach to salinity control developed by the Colorado River Basin Salinity Control Forum and to ensure compliance with the numeric criteria for salinity in subsection (A). This material does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the Colorado River Basin Salinity Control Forum, 106 West 500 South, Suite 101, Bountiful, Utah 84010-6232 or at <http://www.coloradoriversalinity.org/>.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-111. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610, 40 CFR 136.3, or an alternative analytical method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-112. Outstanding Arizona Waters

- A. The Director shall classify a surface water as an outstanding Arizona water (OAW) by rule.
- B. The Director may adopt, under R18-11-115, a site-specific standard to maintain and protect existing water quality in an OAW.
- C. Any person may nominate a surface water for classification as an OAW by filing a nomination with the Director. The nomination shall include:
1. A map and a description of the surface water;

2. A written statement in support of the nomination, including specific reference to the applicable criteria for an OAW classification prescribed in subsection (D);
 3. Supporting evidence demonstrating that the criteria prescribed in subsection (D) are met; and
 4. Available water quality data relevant to establishing the baseline water quality of the proposed OAW.
- D. The Director may classify a surface water as an OAW based upon the following criteria:
1. The surface water is a perennial or intermittent water;
 2. The surface water is in a free-flowing condition. For purposes of this subsection, “in a free-flowing condition” means that a surface water does not have an impoundment, diversion, channelization, rip-rapping or other bank armor, or another hydrological modification within the reach nominated for an OAW classification;
 3. The surface water has good water quality. For purposes of this subsection, “good water quality” means that the surface water has water quality that meets or is better than applicable surface water quality standards. A surface water that is listed as impaired under R18-11-604(E) is ineligible for OAW classification; and
 4. The surface water meets one or both of the following conditions:
 - a. The surface water is of exceptional recreational or ecological significance because of its unique attributes, such as the geology, flora and fauna, water quality, aesthetic value, or the wilderness characteristic of the surface water;
 - b. An endangered or threatened species is associated with the surface water and the existing water quality is essential to the species' maintenance and propagation or the surface water provides critical habitat for the threatened or endangered species. An endangered or threatened species is identified in “Endangered and Threatened Wildlife,” 50 CFR 17.11 (revised 2005), and “Endangered and Threatened Plants,” 50 CFR 17.12 (revised 2005). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the National Archives and Records Administration at <http://www.access.gpo.gov/nara/cfr/cfr-table-search.html#page1>.
- E. The Director shall hold at least one public meeting in the local area of a surface water that is nominated for classification as an OAW to solicit public comment on the nomination.
- F. The Director shall consider the following factors when deciding whether to classify a surface water as an OAW:
1. Whether there is the ability to manage the surface water and its watershed to maintain and protect existing water quality;
 2. The social and economic impact of Tier 3 antidegradation protection;
 3. The public comments in support of, or in opposition to, an OAW classification;
 4. The timing of the nomination relative to the triennial review of surface water quality standards;
 5. The consistency of an OAW classification with applicable water quality management plans; and

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

6. Whether the nominated surface water is located within a national or state park, national monument, national recreation area, wilderness area, riparian conservation area, area of critical environmental concern, or it has another special use designation (for example, Wild and Scenic River).
- G.** The following surface waters are classified as OAWs:
1. The West Fork of the Little Colorado River, from its headwaters to Government Springs (approximately 9.1 river miles);
 2. Oak Creek, from its headwaters to its confluence with the Verde River (approximately 50.3 river miles);
 3. West Fork of Oak Creek, from its headwaters to its confluence with Oak Creek (approximately 15.8 river miles);
 4. Peeples Canyon Creek, from its headwaters to its confluence with the Santa Maria River (approximately 8.1 river miles);
 5. Burro Creek, from its headwaters to its confluence with Boulder Creek (approximately 29.5 miles);
 6. Francis Creek, from its headwaters to its confluence with Burro Creek (approximately 22.9 river miles);
 7. Bonita Creek, from its boundary of the San Carlos Indian Reservation to its confluence with the Gila River (approximately 14.7 river miles);
 8. Cienega Creek, from its confluence with Gardner Canyon to the USGS gaging station (#09484600) (approximately 28.3 river miles);
 9. Aravaipa Creek, from its confluence with Stowe Gulch to the downstream boundary of the Aravaipa Canyon Wilderness Area (approximately 15.5 river miles);
 10. Cave Creek, from its headwaters to the Coronado National Forest boundary (approximately 10.4 river miles);
 11. South Fork of Cave Creek, from its headwaters to its confluence with Cave Creek (approximately 8.6 river miles);
 12. Buehman Canyon Creek, from its headwaters to its confluence with unnamed tributary at 32°24'31"/110°32'08" (approximately 9.8 river miles);
 13. Lee Valley Creek, from its headwaters to Lee Valley Reservoir (approximately 1.6 river miles);
 14. Bear Wallow Creek, from its headwaters to the boundary of the San Carlos Indian Reservation (approximately 4.25 river miles);
 15. North Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 16. South Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
 17. Snake Creek, from its headwaters to its confluence with the Black River (approximately 6.2 river miles);
 18. Hay Creek, from its headwaters to its confluence with the West Fork of the Black River (approximately 5.5 river miles);
 19. Stinky Creek, from the White Mountain Apache Indian Reservation boundary to its confluence with the West Fork of the Black River (approximately 3.0 river miles);
 20. KP Creek, from its headwaters to its confluence with the Blue River (approximately 12.7 river miles);
 21. Davidson Canyon, from the unnamed spring at 31°59'00"/110°38'49" to its confluence with Cienega Creek; and
22. Fossil Creek, from its headwaters at the confluence of Sandrock and Calf Pen Canyons above Fossil Springs to its confluence with the Verde River (approximately 17.2 river miles).
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Added "water quality standards" to R18-11-112, previously omitted in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).
- R18-11-113. Effluent-Dependent Waters**
- A.** The Director shall classify a surface water as an effluent-dependent water by rule.
- B.** The Director may adopt, under R18-11-115, a site-specific water quality standard for an effluent-dependent water.
- C.** Any person may submit a petition for rule adoption requesting that the Director classify a surface water as an effluent-dependent water. The petition shall include:
1. A map and a description of the surface water;
 2. Information that demonstrates that the surface water consists of a point source discharge of wastewater; and
 3. Information that demonstrates that, without a point source discharge of a wastewater, the receiving water is an ephemeral water.
- D.** The Director shall use the water quality standards that apply to an effluent-dependent water to derive water quality-based effluent limits for a point source discharge of wastewater to an ephemeral water.
- E.** The Director may use aquatic and wildlife (edw) acute standards only to derive water quality based effluent limits for a sporadic, infrequent, or emergency point source discharge to an ephemeral water or to an effluent-dependent water. The Director shall consider the following factors when deciding whether to apply A&Wedw (acute) standards:
1. The amount, frequency, and duration of the discharge;
 2. The length of time water may be present in the receiving water;
 3. The distance to a downstream water with aquatic and wildlife chronic standards; and
 4. The likelihood of chronic exposure to pollutants.
- F.** The Director may establish alternative water quality-based effluent limits in an AZPDES permit based on seasonal differences in the discharge.
- Historical Note**
- Adopted effective February 18, 1992 (Supp. 92-1). Amended effective December 18, 1992 (Supp. 92-4). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).
- R18-11-114. Mixing Zones**
- A.** The Director may establish a mixing zone for a point source discharge to a surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited in an ephemeral water or where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B.** The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

for a mixing zone as part of an application for an AZPDES permit. The request shall include:

1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C.** The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D.** Director determination.
1. The Director shall deny a request to establish a mixing zone if a water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E.** Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F.** The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- G.** Mixing zone requirements.
1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
 2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
 3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
 4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
 5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.
- H.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:
1. Chlordane,
 2. DDT and its metabolites (DDD and DDE),
 3. Dieldrin,
 4. Dioxin,
 5. Endrin,
 6. Endrin aldehyde,
 7. Heptachlor,
 8. Heptachlor epoxide,
 9. Lindane,
 10. Mercury,
 11. Polychlorinated biphenyls (PCBs), and
 12. Toxaphene.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-115. Site-Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in Appendix A;
 3. Resident aquatic organisms that occur in a surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in Appendix A;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A. "Natural background" means the concentration of a pollutant in a surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically-defensible procedure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Uses one of the following procedures, as defined by the most recent EPA guidance documents:
 - i. The recalculation procedure,
 - ii. The water effects ratio for metals,
 - iii. The streamlined water effects ratio, or
 - iv. The Biotic ligand model.
 - d. Demonstrates that all designated uses are protected.
2. Alternatively, a study outline submitted for the Director's approval must contain the following elements:
 - a. Identifies the pollutant;
 - b. Describes the reach's boundaries;
 - c. Describes the hydrologic regime of the waterbody;
 - d. Describes the scientifically-defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 - e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 - f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 - g. Demonstrates that all designated uses are protected; and
 - h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration. Modeling approaches include Better Assessment Science Integrating Source and Nonpoint Sources (Basins), Hydrologic Simulation Program-Fortran (HSPF), and Hydrologic Engineering Center (HEC) programs developed by the U.S. Army Corps of Engineers.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Section repealed by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-116. Resource Management Agencies

Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-117. Canals and Urban Park Lakes

A. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified in Appendix B. Physical or mechanical maintenance

includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified in Appendix B.

B. The discharge of lubricating oil associated with the start-up of well pumps that discharge to canals is not a violation of R18-11-108(B).

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-118. Dams and Flood Control Structures

Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

R18-11-119. Natural background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is not caused by human activity but is due solely to naturally-occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

R18-11-120. Enforcement of Non-permitted Discharges

A. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.

B. Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

R18-11-121. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve com-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

pliance. The permittee shall demonstrate that all requirements under § 301(b) and § 306 of the Clean Water Act [33 U.S.C. 1311(b) and 1316] are achieved and that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

R18-11-122. Variances

- A. Upon request, the Director may establish, by rule, a discharger-specific or water segment(s)-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B. A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.
 4. A detailed discussion of the discharge control technologies that are available for achieving compliance with the water quality standard for which a variance is sought.
 5. Documentation that more advanced treatment technology than applicable technology-based effluent limitations is necessary to achieve compliance with the water quality standard for which a variance is sought.
 6. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
 7. Documentation that the proposed term is only as long as necessary to achieve the highest attainable condition.
 8. Documentation that is appropriate to the type of use to which the variance would apply as follows:
 - a. For a water quality standard variance to a use specified in Clean Water Act § 101(a)(2), documentation must include demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - i. Naturally occurring pollutant concentrations prevent attainment of the use;
 - ii. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - iii. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - iv. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - v. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - vi. That installation and operation of each of the available discharge technologies more advanced than those required to comply with technology-based effluent limitations to achieve compliance with the water quality standard would result in substantial and widespread economic and social impact; or
 - vii. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
 - b. For a water quality standard variance to a use other than those uses specified in Clean Water Act § 101(a)(2), documentation must justify how consideration and value of the water subject to the use appropriately supports the variance and term. A demonstration consistent with (B)(8)(a) of this Section may be used to satisfy this requirement.
 9. For a waterbody segment(s)-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant(s) or water quality parameter(s) and water body or waterbody segment(s) specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(9)(a) previously applied to the water body or waterbody seg-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

ment(s), documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant(s) or water quality parameter(s) subject to the water quality variance and the water quality progress achieved.

10. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification of the permittee subject to the variance;
 - b. For an existing point source discharge, a detailed description of the existing discharge control technologies that are used to achieve compliance with applicable water quality standards. For a new point source discharge, a detailed description of the proposed discharge control technologies that will be used to achieve compliance with applicable water quality standards; and
 - c. Documentation that the existing or proposed discharge control technologies will comply with applicable technology-based effluent limitations.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(8)(a)(vii). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable; or
 3. If no additional feasible pollutant control technology can be identified, the interim criterion or interim effluent condition that reflects the greatest pollutant reduction achievable with the pollutant control technologies installed at the time of the issuance of the variance, and the adoption and implementation of a Pollutant Minimization Program.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The Director may not grant a variance for a point source discharge to an OAW listed in R18-11-112(G).
 - I. Each variance established by the Director is subject to review and approval by the Regional Administrator.
 - J. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E). The variance term runs from the approval of the variance by the Regional Administrator.
 - K. The Director shall reevaluate, in its triennial review, whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance in its triennial review rulemaking.
 - L. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - M. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.
 - N. The following are discharger-specific variances adopted by the Director:
 - O. The following are water body and waterbody segment-specific variances adopted by the Director:

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).
- R18-11-123. Discharge Prohibitions**
- A. The discharge of wastewater to the following surface waters is prohibited:
 1. Sabino Canyon Creek;
 2. Vekol Wash, upstream of the Ak-Chin Indian Reservation; and
 3. Smith Wash, upstream of the Ak-Chin Indian Reservation.
 - B. The discharge to Lake Powell of human body wastes and the wastes from toilets and other receptacles intended to receive or retain wastes from a vessel is prohibited.

Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

Footnotes

- a. The asbestos standard is 7 million fibers (longer than 10 micrometers) per liter.
- b. The aldrin/dieldrin standard is exceeded when the sum of the two compounds exceeds 0.003 µg/L.
- c. In lakes, the acute criteria for hydrogen sulfide apply only to water samples taken from the epilimnion, or the upper layer of a lake or reservoir.
- d. Hardness, expressed as mg/L CaCO₃, is determined according to the following criteria:
 - i. If the receiving water body has an A&Wc or A&Ww designated use, then hardness is based on the hardness of the receiving water body from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - ii. If the receiving water has an A&Wedw or A&We designated use, then the hardness is based on the hardness of the effluent from a sample taken at the same time that the sample for the metal is taken, except that the hardness may not exceed 400 mg/L CaCO₃.
 - iii. The mathematical equations for the hardness-dependent parameter represent the water quality standards. Examples of criteria for the hardness-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- e. pH is determined according to the following criteria:
 - i. If the receiving water has an A&Wc or A&Ww designated use, then pH is based on the pH of the receiving water body from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - ii. If the receiving water body has an A&Wedw or A&We designated use, then the pH is based on the pH of the effluent from a sample taken at the same time that the sample for pentachlorophenol or ammonia is taken.
 - iii. The mathematical equations for ammonia represent the water quality standards. Examples of criteria for ammonia have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- f. Table 1 abbreviations.
 - i. µg/L = micrograms per liter,
 - ii. mg/kg = milligrams per kilogram,
 - iii. pCi/L = picocuries per liter,
 - iv. D = dissolved,
 - v. T = total recoverable,
 - vi. TTHM indicates that the chemical is a trihalomethane.
- g. The total trihalomethane (TTHM) standard is exceeded when the sum of these four compounds exceeds 80 µg/L, as a rolling annual average.
- h. The concentration of gross alpha particle activity includes radium-226, but excludes radon and uranium.
- i. The average annual concentration of beta particle activity and photon emitters from manmade radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirems per year.
- j. The mathematical equations for the pH-dependent parameters represent the water quality standards. Examples of criteria for the pH-dependent parameters have been calculated and are presented in separate tables at the end of Appendix A for the convenience of the user.
- k. Abbreviations for the mathematical equations are as follows:
 e = the base of the natural logarithm and is a mathematical constant equal to 2.71828
 LN = is the natural logarithm
 CMC = Criterion Maximum Concentration (acute)
 CCC= Criterion Continuous Concentration (chronic)

Historical Note

Appendix A repealed; new Appendix A, Table 1 adopted effective April 24, 1996 (Supp. 96-2). Appendix A, Table 1 amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 1 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 1 repealed; new Appendix A, Table 1 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 1 amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 14. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Coldwater, Unionid Mussels Absent

For the aquatic and wildlife coldwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 16. Chronic Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Warmwater and Effluent Dependent, Unionid Mussels Absent

For the aquatic and wildlife warmwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment. For the aquatic and wildlife effluent dependent uses, unionids will be assumed to be absent.

Appendix A, Table 18 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 18 repealed; new Table 18 renumbered from Table 12 and amended by final rulemaking at 14 A.A.R.

4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 18 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 19. Repealed

Historical Note

Appendix A, Table 19 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Appendix A, Table 19 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 19 renumbered to Table 21; new Table 19 made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 19 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 20. Repealed**Historical Note**

Appendix A, Table 20 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 20 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 20 amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 20 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 21. Repealed**Historical Note**

Appendix A, Table 21 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 21 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 21 renumbered to Table 22; new Table 21 renumbered from Table 19 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 21 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 22. Repealed**Historical Note**

Appendix A, Table 22 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 22 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 22 renumbered to Table 23; new Table 22 renumbered from Table 21 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 22 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 23. Repealed**Historical Note**

Appendix A, Table 23 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 23 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 23 renumbered to Table 24; new Table 23 renumbered from Table 22 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 23 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 24. Repealed**Historical Note**

Appendix A, Table 24 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 24 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 24 renumbered to Table 25; new Table 24 renumbered from Table 23 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 24 repealed by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 25. Renumbered**Historical Note**

Appendix A, Table 25 adopted by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Appendix A, Table 25 amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Appendix A, Table 25 renumbered to Table 26; new Table 25 renumbered from Table 24 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 25 renumbered to Table 11 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

Table 26. Renumbered**Historical Note**

Appendix A, Table 26 renumbered from Table 25 and amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Appendix A, Table 26 renumbered to Table 12 by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Appendix B. Surface Waters and Designated Uses

(Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Appendix B table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.)

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Waters | Segment Description and Location (Latitude and Longitudes are in NAD 83) | Lake Category | Aquatic and Wildlife | | | | Human Health | | | | Agricultural | | |
|-----------|-------------------------|---|---------------|----------------------|------|------|--------|--------------|-----|-----|----|--------------|-----|-----|
| | | | | A&Wc | A&Ww | A&We | A&Wedw | FBC | PBC | DWS | FC | AgI | AgL | |
| BW | Alamo Lake | 34°14'06"/113°35'00" | Deep | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Big Sandy River | Headwaters to Alamo Lake | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Bill Williams River | Alamo Lake to confluence with Colorado River | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Blue Tank | 34°40'14"/112°58'17" | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Boulder Creek | Headwaters to confluence with unnamed tributary at 34°41'13"/113°03'37" | | A&Wc | | | | FBC | | | | FC | | AgL |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River | | | A&Ww | | | FBC | | | | FC | | AgL |
| BW | Carter Tank | 34°52'27"/112°57'31" | | | A&Ww | | | FBC | | | | FC | | AgL |

Adopted effective February 18, 1992 (Supp. 92-1). Appendix B repealed, new Appendix B adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix B amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3). Appendix B amended by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix C. Site-Specific Standards

| Watershed | Surface Water | Surface Water Description & Location | Parameter | Site-Specific Criterion |
|-----------|--------------------|--|-------------------------|---|
| LC | Rio de Flag (EDW) | Flagstaff WWTP outfall to the confluence with San Francisco Wash | Copper (D) | 36 µg/L (A&Wedw) |
| CL | Yuma East Wetlands | From inlet culvert from Colorado River into restored channel to Ocean Bridge | Selenium (T) | 2.2 µg/L (A&Ww chronic) |
| | | | Total residual chlorine | 33 µg/L (A&Ww acute) |
| | | | | 20 µg/L (A&Ww chronic) |
| SR | Pinto Creek | From confluence of Ellis Ranch tributary at 33°19'26.7"/110°54'57.5" to the confluence of West Fork of Pinto Creek at 33°27'32.3"/111°00'19.7" | Copper (D) | 34 µg/L (A&Ww acute for hardness values below 268 mg/L) |
| | | | | 34 µg/L (A&Ww chronic) |

Historical Note

Adopted effective February 18, 1992 (Supp. 92-1). Appendix C repealed effective April 24, 1996 (Supp. 96-2). New Appendix C made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4). Appendix C amended by final rulemaking at 25 A.A.R. 2515, effective November 9, 2019 (Supp. 19-3).

ARTICLE 2. WATER QUALITY STANDARDS FOR NON-WOTUS PROTECTED SURFACE WATERS

R18-11-201. Definitions

The following terms apply to this Article:

1. "Acute toxicity" means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. "Agricultural irrigation AZ (AgI AZ)" means the use of a non-WOTUS protected surface water for crop irrigation.
3. "Agricultural livestock watering AZ (AgL AZ)" means the use of a non-WOTUS protected surface water as a water supply for consumption by livestock.
4. "Aquatic and wildlife AZ (cold water) (A&Wc AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
5. "Aquatic and wildlife AZ (warm water) (A&Ww AZ)" means the use of a non-WOTUS protected surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
6. "Assimilative capacity" means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
7. "Complete Mixing" means the location at which concentration of a pollutant across a transect of a surface water differs by less than five percent.
8. "Criteria" means elements of water quality standards expressed as pollutant concentrations, levels, or narrative

statements representing a water quality that supports a designated use.

9. "Critical flow conditions of the discharge" means the hydrologically based discharge flow averages that the director uses to calculate and implement applicable water quality criteria to a mixing zone's receiving water as follows:
 - a. For acute aquatic water quality standard criteria, the discharge flow critical condition is represented by the maximum one-day average flow analyzed over a reasonably representative timeframe.
 - b. For chronic aquatic water quality standard criteria, the discharge flow critical flow condition is represented by the maximum monthly average flow analyzed over a reasonably representative timeframe.
 - c. For human health-based water quality standard criteria, the discharge flow critical condition is the long-term arithmetic mean flow, averaged over several years so as to simulate long-term exposure.
10. "Critical flow conditions of the receiving water" means the hydrologically based receiving water low flow averages that the director uses to calculate and implement applicable water quality criteria:
 - a. For acute aquatic water quality standard criteria, the receiving water critical condition is represented as the lowest one-day average flow event expected to occur once every ten years, on average (1Q10).
 - b. For chronic aquatic water quality standard criteria, the receiving water critical flow condition is represented as the lowest seven-consecutive-day average flow expected to occur once every 10 years, on average (7Q10), or
 - c. For human health-based water quality standard criteria, in order to simulate long-term exposure, the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

receiving water critical flow condition is the harmonic mean flow.

11. "Designated use" means a use specified on the Protected Surface Waters List for a non-WOTUS protected surface water.
12. "Domestic water source AZ (DWS AZ)" means the use of a non-WOTUS protected surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
13. "Fish consumption AZ (FC AZ)" means the use of a non-WOTUS protected surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
14. "Full-body contact AZ (FBC AZ)" means the use of a non-WOTUS protected surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely, and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
15. "Geometric mean" means the nth root of the product of n items or values. The geometric mean is calculated using the following formula:

$$GM_y = \sqrt[n]{(Y_1)(Y_2)(Y_3)(Y_n)}$$

16. "Hardness" means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate (CaCO₃) in milligrams per liter.
17. "Mixing zone" means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
18. "Non-WOTUS protected surface water" means a protected surface water designated in Table A of R18-11-216 or added to the PSWL by an emergency action authorized by A.R.S. § 49-221(G)(7) that is not a WOTUS.
19. "Oil" means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
20. "Partial-body contact AZ (PBC AZ)" means the recreational use of a non-WOTUS protected surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and, sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
21. "Pollutant" means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance.
22. "Practical quantitation limit" means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
23. "Recharge Project" means a facility necessary or convenient to obtain, divert, withdraw, transport, exchange,

deliver, treat, or store water to infiltrate or reintroduce that water into the ground.

24. "Toxic" means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
25. "Urban lake" means a manmade lake within an urban landscape.
26. "Wastewater" does not mean:
 - a. Stormwater,
 - b. Discharges authorized under the De Minimus General Permit,
 - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
 - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
27. "Wetland" means, for the purposes of non-WOTUS protected surface waters, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.
28. "WOTUS" means waters of the state that are also navigable waters as defined by Section 502(7) of the Clean Water Act.
29. "WOTUS protected surface water" means a protected surface water that is a WOTUS.
30. "Zone of initial dilution" means a small area in the immediate vicinity of an outfall structure in which turbulence is high and causes rapid mixing with the surrounding water.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1).
Amended subsection A. effective April 17, 1984 (Supp. 84-2). Former Section R9-21-201 repealed, former Section R9-21-203 renumbered as Section R9-21-201 and amended effective January 7, 1985 (Supp. 85-1).
Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-201 renumbered without change as Section R18-11-201 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-202. Applicability

- A. The water quality standards prescribed in this Article apply to non-WOTUS protected surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
 1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is part of the waste treatment system;
 2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores including:
 - a. A pit,
 - b. Pregnant leach solution pond

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- c. Raffinate pond,
 - d. Tailing impoundment,
 - e. Decant pond,
 - f. Pond of sump in a mine put associated with dewatering activity,
 - g. Pond holding water that has come into contact with a process or product that is being held for recycling,
 - h. Spill or catchment pond, or
 - i. A pond used for onsite remediation
3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
 4. A surface water located on tribal lands.
 5. WOTUS Protected Surface Waters.

Historical Note

Former Section R9-21-202 repealed, former Section R9-21-102 renumbered as Section R9-21-202 and amended effective January 7, 1985 (Supp. 85-1). Amended subsections (B), (D), and (E) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-202 renumbered without change as Section R18-11-202 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-203. Designated Uses for Non-WOTUS Protected Surface Waters

- A. The designated uses for specific non-WOTUS protected surface waters are listed in the Protected Surface Waters List in this article. The designated uses that may be assigned to a non-WOTUS protected surface water are:
 1. Full-body contact AZ,
 2. Partial-body contact AZ,
 3. Domestic water source AZ,
 4. Fish consumption AZ,
 5. Aquatic and wildlife AZ (cold water),
 6. Aquatic and wildlife AZ (warm water),
 7. Agricultural irrigation AZ, and
 8. Agricultural livestock watering AZ.
- B. Numeric water quality criteria to maintain and protect water quality for the designated uses assigned to non-WOTUS protected surface waters are prescribed in R18-11-215. Narrative water quality standards to protect non-WOTUS protected surface waters are prescribed in R18-11-214.
- C. If a non-WOTUS protected surface water has more than one designated use listed in the Protected Surface Waters List, the most stringent water quality criterion applies.
- D. The Director shall revise the designated uses of a non-WOTUS protected surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in the Protected Surface Waters List.
- E. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria through a rulemaking action for any of the following reasons:
 1. A naturally-occurring pollutant concentration prevents the attainment of the use;
 2. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;

3. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the non-WOTUS protected surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
4. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use.

Historical Note

Amended effective January 29, 1980 (Supp. 80-1). Amended subsection (B) by adding paragraphs (27) and (28) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-203 renumbered as Section R9-21-201, former Section R9-21-204 renumbered as Section R9-21-203 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-203 renumbered and amended as Section R9-21-204, new Section R9-21-203 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-203 renumbered without change as Section R18-11-203 (Supp. 87-3). Amended subsection (B) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective February 18, 1992 (Supp. 92-1). Section repealed effective April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-204. Interim, Presumptive Designated Uses

The following water quality standards apply to a non-WOTUS protected surface water that is not listed on the Protected Surface Waters List but is added on an emergency basis pursuant to A.R.S. § 49-221(G)(7):

1. The aquatic and wildlife AZ (cold water use applies to a non-WOTUS protected surface water above 5000 feet in elevation;
2. The aquatic and wildlife AZ (warm water) applies to a non-WOTUS protected surface water below 5000 feet in elevation;
3. The full-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
4. The partial-body contact AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans in a way that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
5. The fish consumption AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans for harvesting aquatic organisms for con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

sumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.

6. The domestic water source AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used by humans as a source of potable water.
7. The agricultural irrigation AZ use applies to a non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used for crop irrigation.
8. The agricultural livestock watering AZ use applies to any non-WOTUS protected surface water if the Director makes a determination that the non-WOTUS protected surface water is used as a water supply for consumption by livestock.

Historical Note

Former Section R9-21-204 renumbered and amended as Section R9-21-207, former Section R9-21-206 renumbered and amended as Section R9-21-204 effective January 29, 1980 (Supp. 80-1). Former Section

R9-21-204 renumbered as Section R9-21-203, former Section R9-21-205 renumbered as Section R9-21-204 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-204 renumbered and amended as Section R9-21-205, former Section R9-21-203 renumbered and amended as Section R9-21-204 effective August 12, 1986 (Supp. 86-4). Former Section

R9-21-204 renumbered without change as Section R18-11-204 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-205. Analytical Methods

- A. A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610 or an alternative method approved under A.A.C. R9-14-610(C).
- B. A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

Historical Note

Former Section R9-21-205 repealed, new Section R9-21-205 adopted effective January 29, 1980 (Supp. 80-1).

Former Section R9-21-205 renumbered as Section R9-21-204, former Section R9-21-206 renumbered as Section R9-21-205 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-205 renumbered and amended as Section R9-21-206, former Section R9-21-204 renumbered and amended as Section R9-21-205 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-205 renumbered without change as Section R18-11-205 (Supp. 87-3). Section repealed, new Section adopted effective February 18, 1992

(Supp. 92-1). Section repealed April 24, 1996 (Supp. 96-2). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-206. Mixing Zones

- A. The Director may establish a mixing zone for a point source discharge to a non-WOTUS protected surface water as a condition of an individual AZPDES permit on a pollutant-by-pollutant basis. A mixing zone is prohibited where there is no water for dilution, or as prohibited pursuant to subsection (H).
- B. The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:
 1. An identification of the pollutant for which the mixing zone is requested;
 2. A proposed outfall design;
 3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone is where complete mixing occurs; and
 4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions. The description shall also address the factors listed in subsection (D) that the Director must consider when deciding to grant or deny a request and shall address the mixing zone requirements in subsection (H).
- C. The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
 1. The assimilative capacity of the receiving water;
 2. The likelihood of adverse human health effects;
 3. The location of drinking water plant intakes and public swimming areas;
 4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
 5. Bioaccumulation;
 6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
 7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
 8. The size of the mixing zone;
 9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
 10. The concentration gradient of the pollutant within the mixing zone;
 11. Sediment deposition;
 12. The potential for attracting aquatic life to the mixing zone; and
 13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- D. Director determination.
 1. The Director shall deny a request to establish a mixing zone if an applicable water quality standard will be violated outside the boundaries of the proposed mixing zone.
 2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- E. Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- F. The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

G. Mixing zone requirements.

1. A mixing zone shall be as small as practicable in that it shall not extend beyond the point in the waterbody at which complete mixing occurs under the critical flow conditions of the discharge and of the receiving water.
2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
4. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
5. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution. The mixing zone shall prevent acute toxicity and lethality to organisms passing through the mixing zone.

H. The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:

1. Chlordane,
2. DDT and its metabolites (DDD and DDE),
3. Dieldrin,
4. Dioxin,
5. Endrin,
6. Endrin aldehyde,
7. Heptachlor,
8. Heptachlor epoxide,
9. Lindane,
10. Mercury,
11. Polychlorinated biphenyls (PCBs), and
12. Toxaphene.

Historical Note

Former Section R9-21-206 renumbered and amended as Section R9-21-204, new Section R9-21-206 adopted effective January 29, 1980 (Supp. 80-1). Amended by adding subsection (B) effective October 14, 1981 (Supp. 81-5). Amended subsection (B) and Table 1 effective January 29, 1982 (Supp. 82-1). Amended subsection (B) and Table 1 effective August 13, 1982 (Supp. 82-4). Former Section R9-21-206 renumbered as Section R9-21-205, former Section R9-21-207 renumbered as Section R9-21-206 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-206 renumbered and amended as Section R9-21-207, former Section R9-21-205 renumbered and amended as R9-21-206 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-206 renumbered without change as Section R18-11-206 (Supp. 87-3). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-207. Natural Background

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is caused solely by naturally occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

Historical Note

Former Section R9-21-207 repealed, former Section R9-21-204 renumbered and amended as Section R9-21-207 effective January 29, 1980 (Supp. 80-1). Former Section R9-21-207 renumbered as Section R9-21-206, former Section R9-21-208 renumbered as Section R9-21-207

and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-207 renumbered without change as Section R9-21-208, former Section R9-21-206 renumbered and amended as Section R9-21-207 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-207 renumbered without change as Section R18-11-207 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-208. Schedules of Compliance

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that the point source cannot comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

Historical Note

Former Section R9-21-208 repealed, new Section R9-21-208 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-208 renumbered as Section R9-21-207, Appendices 1 through 9 amended as Appendix A (now shown following R9-21-213), former Section R9-21-209 renumbered as R9-21-208 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-208 renumbered and amended as Section R9-21-209, former Section R9-21-207 renumbered without change as Section R9-21-208 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-208 renumbered without change as Section R18-11-208 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-209. Variances

- A.** Upon request, the Director may establish, by rule, a discharger-specific or water segment-specific or water segments-specific variance from a water quality standard if requirements pursuant to this Section are met.
- B.** A person who requests a variance must demonstrate all of the following information:
 1. Identification of the specific pollutant and water quality standard for which a variance is sought.
 2. Identification of the receiving surface water segment or segments to which the variance would apply.
 3. A detailed discussion of the need for the variance, including the reasons why compliance with the water quality

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

standard cannot be achieved over the term of the proposed variance, and any other useful information or analysis to evaluate attainability.

4. A detailed description of proposed interim discharge limitations and pollutant control activities that represent the highest level of treatment achievable by a point source discharger or dischargers during the term of the variance.
5. Documentation that the proposed term is only as long as necessary to achieve compliance with applicable water quality standards.
6. Documentation that is appropriate to the type of designated use to which the variance would apply as follows. For a water quality standard variance documentation must include a demonstration of at least one of the following factors that preclude attainment of the use during the term of the variance:
 - a. Naturally occurring pollutant concentrations prevent attainment of the use;
 - b. Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating state water conservation requirements to enable uses to be met;
 - c. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and either (1) it is not possible to remedy the conditions or sources of pollution or (2) remedying the human-caused conditions would cause more environmental damage to correct than to leave in place;
 - d. Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or to operate such modification in a way that would result in the attainment of the use;
 - e. Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses;
 - f. Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.
7. For a waterbody segment-specific or segments-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section:
 - a. Identification and documentation of any cost-effective and reasonable best management practices for nonpoint source controls related to the pollutant or pollutants or water quality parameter or parameters and water body or waterbody segment or segments specified in the variance that could be implemented to make progress towards attaining the underlying designated use and criterion; and
 - b. If any variance pursuant to subsection (B)(7)(a) previously applied to the water body or waterbody segment or segments, documentation must also demonstrate whether and to what extent best management practices for nonpoint source controls were implemented to address the pollutant or pollutants or water quality parameter or parameters subject to the water quality variance and the water quality progress achieved.
8. For a discharger-specific variance, the following information is required before the Director may issue a variance, in addition to all other required documentation pursuant to this Section: Identification of the permittee subject to the variance.
 - C. The Director shall consider the following factors when deciding whether to grant or deny a variance request:
 1. Bioaccumulation,
 2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
 3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
 4. The likelihood of adverse human health effects.
 - D. The variance shall represent the highest attainable condition of the water body or water body segment applicable throughout the term of the variance.
 - E. A variance shall not result in any lowering of the currently attained ambient water quality, unless the variance is necessary for restoration activities, consistent with subsection (B)(6)(a)(vi). The Director must specify the highest attainable condition of the water body or waterbody segment as a quantifiable expression of one of the following:
 1. The highest attainable interim criterion,
 2. The interim effluent condition that reflects the greatest pollutant reduction achievable.
 - F. A variance shall not modify the underlying designated use and criterion. A variance is only a time limited exception to the underlying standard. For discharge-specific variances, other point source dischargers to the surface water that are not granted a variance shall still meet all applicable water quality standards.
 - G. Point source discharges shall meet all other applicable water quality standards for which a variance is not granted.
 - H. The term of the water quality variance may only be as long as necessary to achieve the highest attainable condition and must be consistent with the supporting documentation in subsection (E).
 - I. The Director shall periodically, but not more than every five years, reevaluate whether each variance continues to represent the highest attainable condition. Comment on the variance shall be considered regarding whether the variance continues to represent the highest attainable condition during each rulemaking for this Article. If the Director determines that the requirements of the variance do not represent the highest attainable condition, then the Director shall modify or repeal the variance during the rulemaking.
 - J. If the variance is modified by rulemaking, the requirements of the variance shall represent the highest attainable condition at the time of initial adoption of the variance, or the highest attainable condition identified during the current reevaluation, whichever is more stringent.
 - K. Upon expiration of a variance, point source dischargers shall comply with the water quality standard.

Historical Note

Former Section R9-21-209 renumbered and amended as Section R9-21-210, new Section R9-21-209 adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-209 renumbered as Section R9-21-208, Tables I and II amended as Appendix B (now shown following R9-21-213 and Appendix A), former Section R9-21-210 renumbered as Section R9-21-209 and amended effective

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

January 7, 1985 (Supp. 85-1). Former Section R9-21-209 renumbered and amended as Section R9-21-210, former Section R9-21-208 renumbered and amended as Section R9-21-209 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-209 renumbered without change as Section R18-11-209 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-210. Site Specific Standards

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a non-WOTUS protected surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
 2. The sensitivity of resident aquatic organisms that occur in a non-WOTUS protected surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in R18-11-215;
 3. Resident aquatic organisms that occur in a non-WOTUS protected surface water represent a narrower mix of species than those in the dataset used by ADEQ to derive numeric water quality standards to protect aquatic life in R18-11-215;
 4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in R18-11-215. "Natural background" means the concentration of a pollutant in a non-WOTUS protected surface water due only to non-anthropogenic sources; or
 5. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a non-WOTUS protected surface water.
- C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically defensible procedure. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
1. Identifies the pollutant;
 2. Describes the reach's boundaries;
 3. Describes the hydrologic regime of the waterbody;
 4. Describes the scientifically defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
 5. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
 6. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
 7. Demonstrates that all designated uses are protected; and
 8. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective January 29, 1980 (Supp. 80-1). Amended subsection (A) effective April 17, 1984 (Supp. 84-2). Former Section R9-21-210 renumbered as Section R9-21-209, former Section R9-21-211 renumbered as Section R9-21-210 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-210 renumbered and amended as Section R9-21-211, former Section R9-21-209 renumbered and amended as Section R9-21-210 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-210 renumbered without change as Section R18-11-210 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-211. Enforcement of Non-permitted Discharges to Non-WOTUS Protected Surface Waters

- A.** The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. Therefore, in enforcement actions pursuant to subsection (B), the water quality standard is enforceable at the practical quantitation limit.
- B.** Except for chronic aquatic and wildlife criteria, for non-permitted discharge violations, the Department shall determine compliance with numeric water quality standard criteria from the analytical result of a single sample, unless additional samples are required under this article. For chronic aquatic and wildlife criteria, compliance for non-permitted discharge violations shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart. For the purposes of this Section, a "non-permitted discharge violation" does not include a discharge regulated under an AZPDES permit.

Historical Note

Former Section R9-21-210 renumbered and amended as Section R9-21-211 effective January 29, 1980 (Supp. 80-1). Amended subsections (D), (G) three (I), and added (J) effective October 14, 1981 (Supp. 81-5). Former Section R9-21-211 renumbered as Section R9-21-210, former Section R9-21-212 renumbered as Section R9-21-211 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-211 renumbered and amended as Section R9-21-212, former Section R9-21-210 renumbered and amended as Section R9-21-211 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-211 renumbered without change as Section R18-11-211 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-212. Statements of Intent and Limitations on the Reach of Article 2

- A.** Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.
- B.** Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified as non-WOTUS protected surface waters on the Protected Surface Waters List. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical,

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified on the Protected Surface Waters List.

- C. Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article.
- D. Nothing in this Article requires the release of water from a dam or a flood control structure.

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Former Section R9-21-212 renumbered as Section R9-21-211, former Section R9-21-213 renumbered as Section R9-21-212 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-212 repealed, former Section R9-21-211 renumbered and amended as Section R9-21-212 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-212 renumbered without change as Section R18-11-212 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-213. Procedures for Determining Economic, Social, and Environmental Cost and Benefits

- A. The Director shall perform an economic, social, and environmental cost and benefits analysis that shows the benefits outweigh the costs before conducting any of the following rulemaking actions:
 1. Adopting a water quality standard that applies to non-WOTUS protected surface waters at a particular level or for a particular water category of non-WOTUS protected surface waters;
 2. Adding a non-WOTUS protected surface water to the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(4) apply; or
 3. Removing a non-WOTUS protected surface water from the Protected Surface Waters List when the conditions of A.R.S. § 49-221(G)(6) apply.
- B. The economic, social, and environmental cost and benefit analysis must include:
 1. A justification of the valuation methodology used to quantify the costs or benefits of the rulemaking action;
 2. A reference to any study relevant to the economic, social, and environmental cost and benefit analysis that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of the costs and benefits of the rulemaking action;
 3. A description of any data on which an economic, social, and environmental cost and benefits analysis is based and an explanation of how the data was obtained and why the data is acceptable data.
 4. A description of the probable impact of the rulemaking on any existing AZPDES permits that are impacted by the rulemaking action;
 5. A description of the probable amount of additional AZPDES permits that will be required for known and ongoing point-source discharges after the rulemaking is completed that otherwise would not have been required if the Director did not undertake the rulemaking action; and
 6. The administrative and other costs to ADEQ associated with the proposed rulemaking.
- C. The Director shall publish a copy of the economic, social, and environmental cost and benefits analysis to the agency website

prior to filing any rulemaking materials during any of the rulemaking actions listed in subsection (A) of this rule.

- D. If for any reason enough data is not reasonably available to comply with the requirements of subsection (B) of this section, the agency shall explain the limitations of the data and the methods that were employed in the attempt to obtain the data and shall characterize the probable impacts in qualitative terms.
- E. The Director is not required to prepare the economic, social, and environmental cost and benefits analysis required by this rule when:
 1. Adding or removing a WOTUS-protected surface water from the Protected Surface Waters List; or
 2. Adding a water to the Protected Surface Waters List on an emergency basis pursuant to A.R.S. § 49-221(G)(7).

Historical Note

Adopted effective January 29, 1980 (Supp. 80-1). Amended effective April 17, 1984 (Supp. 84-2). Former Section R9-21-213 renumbered as Section R9-21-212, former Section R9-21-103 renumbered as Section R9-21-213 and amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-213 renumbered without change as Section R9-21-214, new Section R9-21-213 adopted effective August 12, 1986 (Supp. 86-4). Former Section R9-21-213 renumbered without change as Section R18-11-213 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-214. Narrative Water Quality Standards for Non-WOTUS Protected Surface Waters

- A. A non-WOTUS protected surface water shall not contain pollutants in amounts or combinations that:
 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
 2. Cause objectionable odor in the area in which the non-WOTUS protected surface water is located;
 3. Cause off-taste or odor in drinking water;
 4. Cause off-flavor in aquatic organisms;
 5. Are toxic to humans, animals, plants, or other organisms;
 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or
 8. Change the color of the non-WOTUS protected surface water from natural background levels of color.
- B. A non-WOTUS protected surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard
- C. A non-WOTUS protected surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Historical Note

Former Section R9-21-213 renumbered without change as Section R9-21-214 effective August 12, 1986 (Supp. 86-4). Former Section R9-21-214 renumbered without change as Section R18-11-214 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-215. Numeric Water Quality Standards for Non-WOTUS Protected Surface Waters

A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony-forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

| <i>E. coli</i> | FBC AZ | PBC AZ |
|---|--------|--------|
| Geometric mean (minimum of four samples in 30 days) | 126 | 126 |
| Statistical threshold value | 410 | 576 |

B. pH. The following water quality standards for non-WOTUS protected surface waters pH are expressed in standard units:

| pH | DWS AZ | FBC AZ, PBC AZ, A&Ww AZ, A&Wc AZ | AgI AZ | AgL AZ |
|---------|--------|----------------------------------|--------|--------|
| Maximum | 9.0 | 9.0 | 9.0 | 9.0 |
| Minimum | 5.0 | 6.5 | 4.5 | 6.5 |

C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

| A&Ww AZ | A&Wc AZ |
|---------|---------|
| 3.0° C | 1.0° C |

D. Suspended sediment concentration.

- The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:
- The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

| A&Wc AZ | A&Ww AZ |
|---------|---------|
| 25 | 80 |

E. Dissolved oxygen. A non-WOTUS protected surface water meets the water quality standard for dissolved oxygen when either:

- The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
- The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

| Designated Use | Single sample minimum concentration in mg/L |
|----------------|---|
| A&Ww AZ | 6.0 |
| A&Wc AZ | 7.0 |

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

F. Tables 1 through 17 prescribe water quality criteria for individual pollutants by designated use.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Table 1. Water Quality Criteria by Designated Use (see footnote)

| Parameter | CAS NUMBER | DWS AZ (µg/L) | FC AZ (µg/L) | FBC AZ (µg/L) | PBC AZ (µg/L) | A&Wc AZ Acute (µg/L) | A&Wc AZ Chronic (µg/L) | A&Ww AZ Acute (µg/L) | A&Ww AZ Chronic (µg/L) | AgI AZ (µg/L) | AgL AZ (µg/L) |
|---------------------------------------|------------|----------------------------|--------------|---------------|---------------|---|---|---|---|---------------|---------------|

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table 15. Acute Standards for Total Ammonia (in mg/L, as N) for Aquatic and Wildlife Warmwater AZ Uses, Unionid Mussels Absent

For the Aquatic and Wildlife Warmwater uses, unionids will be assumed to be present unless a study is performed demonstrating that they are absent and there is no historic evidence of their presence, or hydrologic modification has altered the flow regime in a way that would prevent their reestablishment. For the aquatic and wildlife effluent dependent uses, unionids will be assumed to be absent.

Table A made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table B. WOTUS Protected Surface Waters

The waters listed in this table have been tentatively identified by ADEQ as WOTUS, under the law governing on 8/26/2022. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table B will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the WOTUS Protected Surface Waters Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|--|
| BW | Big Sandy River | Headwaters to Alamo Lake |
| BW | Boulder Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Francis Creek (OAW) | Headwaters to confluence with Burro Creek |
| BW | Kirkland Creek | Headwaters to confluence with Santa Maria River |
| BW | Trout Creek | Below confluence with unnamed tributary to confluence with Knight Creek |
| CG | Beaver Dam Wash | Headwaters to confluence with the Virgin River |
| CG | Bright Angel Creek | Headwaters to confluence with Roaring Springs Creek |
| CG | Bright Angel Creek | Below Roaring Spring Springs Creek to confluence with Colorado River |
| CG | Colorado River | Lake Powell to Lake Mead |
| CG | Crystal Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Deer Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Garden Creek | Headwaters to confluence with Pipe Creek |
| CG | Havasus Creek | From the Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Hermit Creek | Below Hermit Pack Trail crossing to confluence with the Colorado River |
| CG | Kanab Creek | Headwaters to confluence with the Colorado River |
| CG | Lake Mead | 36°06'18"/114°26'33" |
| CG | Lake Powell | 36°59'53"/111°08'17" |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Paria River | Utah border to confluence with the Colorado River |
| CG | Phantom Creek | Below confluence with unnamed tributary to confluence with Bright Angel Creek |
| CG | Pipe Creek | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Short Creek | Headwaters to confluence with Fort Pearce Wash |
| CG | Tapeats Creek | Headwaters to confluence with the Colorado River |
| CG | Thunder River | Headwaters to confluence with Tapeats Creek |
| CG | Vasey's Paradise | A spring at 36°29'52"/111°51'26" |
| CG | Virgin River | Headwaters to confluence with the Colorado River |
| CG | White Creek | Headwaters to confluence with unnamed tributary at 36°18'45"/112°21'03" |
| CG | White Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CL | A10 Backwater | 33°31'45"/114°33'19" |
| CL | A7 Backwater | 33°34'27"/114°32'04" |
| CL | Adobe Lake | 33°02'36"/114°39'26" |
| CL | Cibola Lake | 33°14'01"/114°40'31" |
| CL | Clear Lake | 33°01'59"/114°31'19" |
| CL | Colorado River | Lake Mead to Topock Marsh |
| CL | Colorado River | Topock Marsh to Morelos Dam |
| CL | Gila River | Painted Rock Dam to confluence with the Colorado River |
| CL | Hunter's Hole Backwater | 32°31'13"/114°48'07" |
| CL | Imperial Reservoir | 32°53'02"/114°27'54" |
| CL | Island Lake | 33°01'44"/114°36'42" |
| CL | Laguna Reservoir | 32°51'35"/114°28'29" |
| CL | Lake Havasu | 34°35'18"/114°25'47" |
| CL | Lake Mohave | 35°26'58"/114°38'30" |
| CL | Martinez Lake | 32°58'49"/114°28'09" |
| CL | Mittry Lake | 32°49'17"/114°27'54" |
| CL | Nortons Lake | 33°02'30"/114°37'59" |
| CL | Pretty Water Lake | 33°19'51"/114°42'19" |
| CL | Topock Marsh | 34°43'27"/114°28'59" |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|----|--|---|
| LC | Auger Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Chevelon Canyon | Headwaters to confluence with the Little Colorado River |
| LC | Chevelon Canyon Lake | 34°29'18"/110°49'30" |
| LC | Clear Creek | Headwaters to confluence with the Little Colorado River |
| LC | Clear Creek Reservoir | 34°57'09"/110°39'14" |
| LC | Colter Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Colter Reservoir | 33°56'39"/109°28'53" |
| LC | Coyote Creek | Headwaters to confluence with the Little Colorado River |
| LC | Cragin Reservoir (formerly Blue Ridge Reservoir) | 34°32'40"/111°11'33" |
| LC | East Clear Creek | Headwaters to confluence with Clear Creek |
| LC | Ellis Wiltbank Reservoir | 34°05'25"/109°28'25" |
| LC | Fool's Hollow Lake | 34°16'30"/110°03'43" |
| LC | Lee Valley Creek | From Lee Valley Reservoir to confluence with the East Fork of the Little Colorado River |
| LC | Lily Creek | Headwaters to confluence with Coyote Creek |
| LC | Little Colorado River | Headwaters to Lyman Reservoir |
| LC | Little Colorado River | Below Lyman Reservoir to confluence with the Puerco River |
| LC | Little Colorado River | Below Puerco River confluence to the Colorado River, excluding segments on Native American Lands |
| LC | Little Colorado River, East Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, South Fork | Headwaters to confluence with the Little Colorado River |
| LC | Little Colorado River, West Fork | Below Government Springs to confluence with the Little Colorado River |
| LC | Lyman Reservoir | 34°21'21"/109°21'35" |
| LC | Mamie Creek | Headwaters to confluence with Coyote Creek |
| LC | Morrison Creek | Headwaters to Mamie Creek @ 33°59'24.45"/109°03'51.94 |
| LC | Nutrioso Creek | Headwaters to confluence with the Little Colorado River |
| LC | Porter Creek | Headwaters to confluence with Show Low Creek |
| LC | Riggs Creek | Headwaters to Nutrioso Creek |
| LC | Rio de Flag | Headwaters to City of Flagstaff WWTP outfall at 35°12'21"/111°39'17" |
| LC | Rudd Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Rosey Creek | Headwaters to 34°02'28.72"/109°27'24.3" |
| LC | Scott Reservoir | 34°10'31"/109°57'31" |
| LC | Show Low Creek | Headwaters to confluence with Silver Creek |
| LC | Show Low Lake | 34°11'36"/110°00'12" |
| LC | Silver Creek | Headwaters to confluence with the Little Colorado River |
| LC | White Mountain Lake | 34°21'57"/109°59'21" |
| LC | Willow Creek | Headwaters to confluence with Clear Creek |
| LC | Zuni River | Headwaters to confluence with the Little Colorado River |
| MG | Agua Fria River | From State Route 169 to Lake Pleasant |
| MG | Ash Creek | Headwaters to confluence with Tex Canyon |
| MG | East Maricopa Floodway | From Brown and Greenfield Rds to the Gila River Indian Reservation Boundary |
| MG | Fain Lake | Town of Prescott Valley Park Lake 34°34'29"/112°21'06" |
| MG | Gila River | San Carlos Indian Reservation boundary to the Ashurst-Hayden Dam |
| MG | Gila River (EDW) | From the confluence with the Salt River to Gillespie Dam |
| MG | Hassayampa Lake | 34°25'45"/112°25'33" |
| MG | Hassayampa River | Below unnamed tributary to the Buckeye Irrigation Company Canal |
| MG | Hassayampa River | Headwaters to confluence with unnamed tributary at 34°26'09"/112°30'32" |
| MG | Lake Pleasant | 33°53'46"/112°16'29" |
| MG | Little Ash Creek | Headwaters to confluence with Ash Creek at 34°20'45.74"/112°4'17.26" |
| MG | Little Sycamore Creek | Headwaters to Sycamore Creek @ 34°21'39.13"/111°58'49.98" |
| MG | Mineral Creek (diversion tunnel and lined channel) | 33°12'24"/110°59'58" to 33°07'56"/110°58'34" |
| MG | Papago Park South Pond | Curry Road, Tempe 33°26'22"/111°55'55" |
| MG | Salt River | Verde River to 2 km below Granite Reef Dam |
| MG | Seven Springs Wash | Headwaters to Unnamed trib @ 33°57'58.66"/111°51'52.07" |
| MG | Tempe Town Lake | At Mill Avenue Bridge at 33°26'00"/111°56'26" |
| MG | Turkey Creek | Headwaters to confluence with unnamed tributary at 34°19'28"/112°21'33" |
| SC | Alum Gulch | Below 31°29'17"/110°44'25" to confluence with Sonoita Creek |
| SC | California Gulch | Headwaters To U.S./Mexico border |
| SC | Cienega Creek (OAW) | From confluence with Gardner Canyon to USGS gaging station (#09484600) |
| SC | Cox Gulch | Headwaters to Three R Canyons @ 31°28'28.03"/110°47'14.65" |
| SC | Holden Canyon Creek | Headwaters to U.S./Mexico border |
| SC | Julian Wash | Headwaters to confluence with the Santa Cruz River |
| SC | Nogales Wash | Headwaters to confluence with Potrero Creek |
| SC | Parker Canyon Creek | Below unnamed tributary to U.S./Mexico border |
| SC | Rillito Creek | Headwaters to confluence with the Santa Cruz River |
| SC | Romero Canyon Creek | Below unnamed tributary to confluence with Sutherland Wash |
| SC | Santa Cruz River | Headwaters to the at U.S./Mexico border |
| SC | Santa Cruz River | U.S./Mexico border to the Nogales International WWTP outfall at 31°27'25"/110°58'04" |
| SC | Santa Cruz River | Tubac Bridge to Agua Nueva WRF outfall at 32°17'04"/111°01'45" |
| SC | Santa Cruz River (EDW) | Agua Nueva WRF outfall to Baumgartner Road |
| SC | Sonoita Creek | Headwaters to the Town of Patagonia WWTP outfall at 31°32'25"/110°45'31" |
| SC | Sonoita Creek (EDW) | Town of Patagonia WWTP outfall to permanent groundwater upwelling point approximately 1600 feet downstream of outfall |
| SC | Sycamore Canyon | Headwaters to the U.S./Mexico border |
| SP | Aravaipa Creek | Below downstream boundary of Aravaipa Canyon Wilderness Area to confluence with the San Pedro River |
| SP | Aravaipa Creek (OAW) | Stowe Gulch to downstream boundary of Aravaipa Canyon Wilderness Area |
| SP | Bass Canyon Creek | Below confluence with unnamed tributary to confluence with Hot Springs Canyon Creek |
| SP | Bear Creek | Headwaters to U.S./Mexico border |
| SP | Black Draw | Headwaters to the U.S./Mexico border |
| SP | Carr Canyon Creek | Headwaters to confluence with unnamed tributary at 31°27'01"/110°15'48" |
| SP | Gold Gulch | Headwaters to U.S./Mexico border |
| SP | Ramsey Canyon Creek | Below Forest Service Road #110 to confluence with Carr Wash |
| SP | San Pedro River | U.S./ Mexico Border to Buehman Canyon |

TITLE 18. ENVIRONMENTAL QUALITY

| | | |
|----|------------------------|--|
| VR | Sycamore Creek | Headwaters to confluence with Verde River at 33°37'55"/111°39'58" |
| VR | Verde River | From headwaters at confluence of Chino Wash and Granite Creek to Bartlett Lake Dam |
| VR | Verde River | Below Bartlett Lake Dam to Salt River |
| VR | West Clear Creek | Headwaters to confluence with Meadow Canyon |
| VR | West Clear Creek | Below confluence with Meadow Canyon to confluence with the Verde River |
| VR | Wet Beaver Creek | Below unnamed springs to confluence with Dry Beaver Creek |
| VR | Willow Creek Reservoir | 34°36'17"/112°26'19" |

Historical Note

Table B made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

Table C. Historically Regulated as WOTUS and in Need of Confirmation

The waters listed in this table have historically been and will continue to be regulated as WOTUS unless ADEQ makes a determination that they are non-WOTUS. Notwithstanding its inclusion on the list below, the status of a particular water in this table can be contested by a person in an enforcement or permit proceeding, a challenge to an identification as an impaired water, or a challenge to a proposed TMDL for an impaired water. Any changes to Table C will be made through formal rulemaking.

The waters on this list have their designated uses assigned by Title 18, Chapter 11, Article 1. Coordinates are from the North American Datum of 1983 (NAD83). All latitudes in Arizona are north and all longitudes are west, but the negative signs are not included in the Historically Regulated as WOTUS and in Need of Confirmation Table. Some web-based mapping systems require a negative sign before the longitude values to indicate it is a west longitude.

Watersheds:

- BW = Bill Williams
- CG = Colorado – Grand Canyon
- CL = Colorado – Lower Gila
- LC = Little Colorado
- MG = Middle Gila
- SC = Santa Cruz – Rio Magdalena – Rio Sonoyta
- SP = San Pedro – Willcox Playa – Rio Yaqui
- SR = Salt River
- UG = Upper Gila
- VR = Verde River

Other Abbreviations:

- WWTP = Wastewater Treatment Plant
- Km = kilometers

| Watershed | Surface Water | Segment Description and Location (Latitude and Longitudes are in NAD 83) |
|-----------|-------------------------|---|
| BW | Alamo Lake | 34°14'06"/113°35'00" |
| BW | Bill Williams River | Alamo Lake to confluence with Colorado River |
| BW | Blue Tank | 34°40'14"/112°58'17" |
| BW | Boulder Creek | Headwaters to confluence with unnamed tributary at 34°41'13"/113°03'37" |
| BW | Burro Creek | Below confluence with Boulder Creek to confluence with Big Sandy River |
| BW | Burro Creek (OAW) | Headwaters to confluence with Boulder Creek |
| BW | Carter Tank | 34°52'27"/112°57'31" |
| BW | Conger Creek | Headwaters to confluence with unnamed tributary at 34°45'15"/113°05'46" |
| BW | Conger Creek | Below confluence with unnamed tributary to confluence with Burro Creek |
| BW | Copper Basin Wash | Headwaters to confluence with unnamed tributary at 34°28'12"/112°35'33" |
| BW | Copper Basin Wash | Below confluence with unnamed tributary to confluence with Skull Valley Wash |
| BW | Cottonwood Canyon | Headwaters to Bear Trap Spring |
| BW | Cottonwood Canyon | Below Bear Trap Spring to confluence at Sycamore Creek |
| BW | Date Creek | Headwaters to confluence with Santa Maria River |
| BW | Knight Creek | Headwaters to confluence with Big Sandy River |
| BW | Peoples Canyon (OAW) | Headwaters to confluence with Santa Maria River |
| BW | Red Lake | 35°12'18"/113°03'57" |
| BW | Santa Maria River | Headwaters to Alamo Lake |
| BW | Trout Creek | Headwaters to confluence with unnamed tributary at 35°06'47"/113°13'01" |
| CG | Agate Canyon | Headwaters to confluence with the Colorado River |
| CG | Big Springs Tank | 36°36'08"/112°21'01" |
| CG | Boucher Creek | Headwaters to confluence with the Colorado River |
| CG | Bright Angel Wash | Headwaters to Grand Canyon National Park South Rim WWTP outfall at 36°02'59"/112°09'02" |
| CG | Bright Angel Wash (EDW) | Grand Canyon National Park South Rim WWTP outfall to Coconino Wash |
| CG | Bulrush Canyon Wash | Headwaters to confluence with Kanab Creek |
| CG | Cataract Creek | Headwaters to Santa Fe Reservoir |
| CG | Cataract Creek | Santa Fe Reservoir to City of Williams WWTP outfall at 35°14'40"/112°11'18" |
| CG | Cataract Creek | Red Lake Wash to Havasupai Indian Reservation boundary |
| CG | Cataract Creek (EDW) | City of Williams WWTP outfall to 1 km downstream |
| CG | Cataract Lake | 35°15'04"/112°12'58" |
| CG | Chuar Creek | Headwaters to confluence with unnamed tributary at 36°11'35"/111°52'20" |
| CG | Chuar Creek | Below unnamed tributary to confluence with the Colorado River |
| CG | City Reservoir | 35°13'57"/112°11'25" |
| CG | Clear Creek | Headwaters to confluence with unnamed tributary at 36°07'33"/112°00'03" |
| CG | Clear Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Coconino Wash (EDW) | South Grand Canyon Sanitary District Tusayan WRF outfall at 35°58'39"/112°08'25" to 1 km downstream |
| CG | Crystal Creek | Headwaters to confluence with unnamed tributary at 36°13'41"/112°11'49" |
| CG | Deer Creek | Headwaters to confluence with unnamed tributary at 36°26'15"/112°28'20" |
| CG | Detrital Wash | Headwaters to Lake Mead |
| CG | Dogtown Reservoir | 35°12'40"/112°07'54" |
| CG | Dragon Creek | Headwaters to confluence with Milk Creek |
| CG | Dragon Creek | Below confluence with Milk Creek to confluence with Crystal Creek |
| CG | Gonzalez Lake | 35°15'26"/112°12'09" |
| CG | Grand Wash | Headwaters to Colorado River |
| CG | Grapevine Creek | Headwaters to confluence with the Colorado River |
| CG | Grapevine Wash | Headwaters to Colorado River |
| CG | Hakatai Canyon | Headwaters to confluence with the Colorado River |
| CG | Hance Creek | Headwaters to confluence with the Colorado River |
| CG | Hermit Creek | Headwaters to Hermit Pack Trail crossing at 36°03'38"/112°14'00" |
| CG | Horn Creek | Headwaters to confluence with the Colorado River |

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

| | | |
|----|--|---|
| CG | Hualapai Wash | Headwaters to Lake Mead |
| CG | Jacob Lake | 36°42'27"/112°13'50" |
| CG | Kaibab Lake | 35°17'04"/112°09'32" |
| CG | Kwagunt Creek | Headwaters to confluence with unnamed tributary at 36°13'37"/111°54'50" |
| CG | Kwagunt Creek | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Lonetree Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Matkatamiba Creek | Below Havasupai Indian Reservation boundary to confluence with the Colorado River |
| CG | Monument Creek | Headwaters to confluence with the Colorado River |
| CG | Nankoweap Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | National Canyon Creek | Headwaters to Hualapai Indian Reservation boundary at 36°15'15"/112°52'34" |
| CG | North Canyon Creek | Headwaters to confluence with unnamed tributary at 36°33'58"/111°55'41" |
| CG | North Canyon Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Olo Canyon | Headwaters to confluence with the Colorado River |
| CG | Parashant Canyon | Headwaters to confluence with unnamed tributary at 36°21'02"/113°27'56" |
| CG | Parashant Canyon | Below confluence with unnamed tributary to confluence with the Colorado River |
| CG | Phantom Creek | Headwaters to confluence with unnamed tributary at 36°09'29"/112°08'13" |
| CG | Red Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Roaring Springs | 36°11'45"/112°02'06" |
| CG | Roaring Springs Creek | Headwaters to confluence with Bright Angel Creek |
| CG | Royal Arch Creek | Headwaters to confluence with the Colorado River |
| CG | Ruby Canyon | Headwaters to confluence with the Colorado River |
| CG | Russell Tank | 35°52'21"/111°52'45" |
| CG | Saddle Canyon Creek | Headwaters to confluence with unnamed tributary at 36°21'36"/112°22'43" |
| CG | Saddle Canyon Creek | Below confluence with unnamed tributary to confluence with Colorado River |
| CG | Santa Fe Reservoir | 35°14'31"/112°11'10" |
| CG | Sapphire Canyon | Headwaters to confluence with the Colorado River |
| CG | Serpentine Canyon | Headwaters to confluence with the Colorado River |
| CG | Shinumo Creek | Headwaters to confluence with unnamed tributary at 36°18'18"/112°18'07" |
| CG | Slate Creek | Headwaters to confluence with the Colorado River |
| CG | Spring Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Trail Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Transept Canyon | Headwaters to Grand Canyon National Park North Rim WWTP outfall at 36°12'20"/112°03'35" |
| CG | Transept Canyon | From 1 km downstream of the Grand Canyon National Park North Rim WWTP outfall to confluence with Bright Angel Creek |
| CG | Transept Canyon (EDW) | Grand Canyon National Park North Rim WWTP outfall to 1 km downstream |
| CG | Travertine Canyon Creek | Headwaters to confluence with the Colorado River |
| CG | Turquoise Canyon | Headwaters to confluence with the Colorado River |
| CG | Unkar Creek | Below confluence with unnamed tributary at 36°07'54"/111°54'06" to confluence with Colorado River |
| CG | Unnamed Wash to Cedar Canyon (EDW) | Grand Canyon National Park Desert View WWTP outfall at 36°02'06"/111°49'13" to confluence with Cedar Canyon |
| CG | Unnamed Wash to Spring Valley Wash (EDW) | Valle Airpark WRF outfall at 35°38'34"/112°09'22" to confluence with Spring Valley Wash |
| CG | Vishnu Creek | Headwaters to confluence with the Colorado River |
| CG | Warm Springs Creek | Headwaters to confluence with the Colorado River |
| CG | West Cataract Creek | Headwaters to confluence with Cataract Creek |
| CL | Columbus Wash | Headwaters to confluence with the Gila River |
| CL | Holy Moses Wash | Headwaters to City of Kingman Downtown WWTP outfall at 35°10'33"/114°03'46" |
| CL | Holy Moses Wash | From 3 km downstream of City of Kingman Downtown WWTP outfall to confluence with Sawmill Wash |
| CL | Holy Moses Wash (EDW) | City of Kingman Downtown WWTP outfall to 3 km downstream |
| CL | Mohave Wash | Headwaters to Lower Colorado River |
| CL | Painted Rock (Borrow Pit) Lake | 33°04'55"/113°01'17" |
| CL | Quigley Pond | 32°43'40"/113°57'44" |
| CL | Redondo Lake | 32°44'32"/114°29'03" |
| CL | Sacramento Wash | Headwaters to Topock Marsh |
| CL | Sawmill Canyon | Headwaters to abandoned gaging station at 35°09'45"/113°57'56" |
| CL | Sawmill Canyon | Below abandoned gaging station to confluence with Holy Moses Wash |
| CL | Tyson Wash (EDW) | Town of Quartzsite WWTP outfall at 33°42'39"/114°13'10" to 1 km downstream |
| CL | Wellton Canal | Wellton-Mohawk Irrigation District |
| CL | Yuma Area Canals | Above municipal water treatment plant intakes |
| CL | Yuma Area Canals | Below municipal water treatment plant intakes and all drains |
| LC | Als Lake | 35°02'10"/111°25'17" |
| LC | Ashurst Lake | 35°01'06"/111°24'18" |
| LC | Atcheson Reservoir | 33°59'59"/109°20'43" |
| LC | Barbershop Canyon Creek | Headwaters to confluence with East Clear Creek |
| LC | Bear Canyon Creek | Headwaters to confluence with General Springs Canyon |
| LC | Bear Canyon Creek | Headwaters to confluence with Willow Creek |
| LC | Bear Canyon Lake | 34°24'00"/111°00'06" |
| LC | Becker Lake | 34°09'11"/109°18'23" |
| LC | Billy Creek | Headwaters to confluence with Show Low Creek |
| LC | Black Canyon | Headwaters to confluence with Chevelon Creek |
| LC | Bow and Arrow Wash | Headwaters to confluence with Rio de Flag |
| LC | Buck Springs Canyon Creek | Headwaters to confluence with Leonard Canyon Creek |
| LC | Bunch Reservoir | 34°02'20"/109°26'48" |
| LC | Carrero Lake | 34°06'57"/109°31'42" |
| LC | Chevelon Creek, West Fork | Headwaters to confluence with Chevelon Creek |
| LC | Chilson Tank | 34°51'43"/111°22'54" |
| LC | Coconino Reservoir | 35°00'05"/111°24'10" |
| LC | Colter Creek | Headwaters to confluence with Nutrioso Creek |
| LC | Concho Creek | Headwaters to confluence with Carrizo Wash |
| LC | Concho Lake | 34°26'37"/109°37'40" |
| LC | Cow Lake | 34°53'14"/111°18'51" |
| LC | Crisis Lake (Snake Tank #2) | 34°47'51"/111°17'32" |
| LC | Dane Canyon Creek | Headwaters to confluence with Barbershop Canyon Creek |

Historical Note

Table C made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

R18-11-217. Best Management Practices for non-WOTUS Protected Surface Waters

- A.** The BMPs described in this rule are intended to ensure that activities within the ordinary high-water mark of perennial or intermittent non-WOTUS protected surface waters, or within the bed and bank of other waters that materially impact (i.e., are within 1/4 mile upstream of) non-WOTUS protected surface waters, do not violate applicable surface water quality standards in the non-WOTUS protected surface waters. For purposes of this Section, the activities described in the prior sentence will be referred to as “regulated activities.” Depending on the regulated activities conducted, not all of the BMPs described below may be applicable to a particular project. The owner or operator is responsible to consider the BMPs outlined below and to implement those necessary to ensure that the regulated activities will not violate applicable surface water quality standards in the non-WOTUS protected surface water.
- B.** The BMPs described below are not applicable to any activities that are addressed under an individual or general AZPDES permit that are otherwise regulated under A.R.S. Title 49.
- C.** Erosion and sedimentation control BMPs:
 - 1. When flow is present in any non-WOTUS protected surface waters within a project area, flow shall not be altered except to prevent erosion or pollution of any non-WOTUS protected surface waters.
 - 2. Any disturbance within the ordinary high-water mark of non-WOTUS protected surface waters or within the bed and banks of other waters, that is not intended to be permanently altered, shall be stabilized as soon as practicable to prevent erosion and sedimentation.
 - 3. When flow in any non-WOTUS protected surface water is sufficient to erode, carry, or deposit material, regulated activities shall cease until:
 - a. The flow decreases below the point where sediment movement ceases; or
 - b. Control measures have been undertaken, i.e., equipment and material easily transported by flow are protected within non-erodible barriers or moved outside the flow area.
 - 4. Silt laden or turbid water resulting from regulated activities should be managed in a manner to reduce sediment load prior to discharging.
 - 5. No washing or dewatering of fill material should occur within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters. Other than the replacement of native fill or material used to support vegetation rooting or growth, fill placed within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water must resist washout whether such resistance is derived via particle size limits, presence of a binder, vegetation, or other armoring.

D. Pollutant management BMPs:

- 1. If regulated activities are likely to violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water, operations shall cease until the problem is resolved or until control measures have been implemented.
- 2. Construction material and/or fill (other than native fill or that necessary to support revegetation) placed within surface waters as a result of regulated activities shall not include pollutants in concentrations that will violate applicable surface water quality standards in a perennial or intermittent non-WOTUS protected surface water.

E. Construction phase BMPs:

- 1. Equipment staging and storage areas or fuel, oil, and other petroleum products storage and solid waste containment should not be located within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water.
- 2. Any equipment maintenance, washing, or fueling shall not be done within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters with the following exception: Equipment too large or unwieldy to be readily moved, such as large cranes, may be fueled and serviced in non-WOTUS protected surface waters (but outside of standing or flowing water) provided material specifically manufactured and sold as spill containment is in place during fueling/servicing.
- 3. All equipment shall be inspected for leaks, all leaks shall be repaired, and all repaired equipment shall be cleaned to remove any fuel or other fluid residue prior to use within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.
- 4. Washout of concrete handling equipment shall not take place within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters.

F. Post-construction BMPs:

- 1. Upon completion of regulated activities, areas within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface waters shall be promptly cleared of all forms, piling, construction residues, equipment, debris, or other obstructions.
- 2. If fully, partially, or occasionally submerged structures are constructed of cast-in-place concrete instead of pre-cast concrete, steps will be taken using sheet piling or temporary dams to prevent contact between water (instream and runoff) and the concrete until it cures and until any curing agents have evaporated or are no longer a pollutant threat.
- 3. Any permanent water crossings within the ordinary high-water mark of any perennial or intermittent in a non-WOTUS protected surface water (other than fords) shall

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

not be equipped with gutters, drains, scuppers, or other conveyances that allow untreated runoff (due to events equal to or lesser in magnitude than the design event for the crossing structure) to directly enter a non-WOTUS protected surface water if such runoff can be directed to a local stormwater drainage, containment, and/or treatment system.

4. Debris shall be cleared as needed from culverts, ditches, dips, and other drainage structures within the ordinary high-water mark of any perennial or intermittent non-WOTUS protected surface water to prevent clogging or conditions that may lead to a washout.
 5. Temporary structures constructed or imported materials shall be removed no later than upon completion of the regulated activities.
 6. Temporary structures constructed of native materials, if they provide an obstacle to flow or can contribute to or cause erosion, or cause changes in sediment load, shall be removed no later than upon completion of the regulated activities.
- G. Design consideration BMPs:**
1. All temporary structures constructed of imported materials and all permanent structures, including but not limited to, access roadways, culvert crossings, staging areas, material stockpiles, berms, dikes, and pads, shall be constructed so as to accommodate overtopping and resist washout by streamflow.
 2. Any temporary crossing, other than fords on native material, shall be constructed in such a manner so as to provide armoring of the stream channel. Materials used to provide this armoring shall not include anything easily transportable by flow. Examples of acceptable materials include steel plates, untreated wooden planks, pre-cast concrete planks or blocks. Examples of unacceptable materials include clay, silt, sand, and gravel finer than cobble (roughly fist-sized). The armoring shall, via mass, anchoring systems, or a combination of the two, resist washout.
- H. Notification.** The owner or operator of any regulated activities shall, five days prior to initiation of the regulated activities, submit a notice to ADEQ on a form that includes basic information including the GPS location, the waterbody ID of the nearest non-WOTUS protected surface water, general description of planned activities, types of BMPs to be employed during the project, and phone number and email for a contact person. Work may proceed after five calendar days have passed since the owner/operator provided notification to ADEQ unless ADEQ responds in writing to the contact person for the owner/operator.
- I. Exclusions:** The BMPs and notification requirements in this Section shall not apply to:
1. Activities that are already regulated under A.R.S. Title 49.
 2. Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 3. Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 4. Maintenance but not construction of drainage ditches.
 5. Construction and maintenance of irrigation ditches.
 6. Maintenance of structures as dams, dikes, and levees.

Historical Note

New Section made by final rulemaking at 29 A.A.R. 302 (January 27, 2023), effective February 20, 2023 (Supp. 22-4).

Appendix A. Repealed**Historical Note**

Former Section R9-21-208, Appendices 1 through 9 renumbered and amended as new Appendix A adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

Appendix B. Repealed**Historical Note**

Former R9-21-209, Table 1 and Table 2 renumbered and amended as Appendix B adopted effective January 7, 1985 (Supp.85-1). Amended effective August 12, 1986 (Supp. 86-4). Appendix repealed effective February 18, 1992 (Supp. 92-1).

ARTICLE 3. RECLAIMED WATER QUALITY STANDARDS**R18-11-301. Definitions**

The terms in this Article have the following meanings:

“Direct reuse” has the meaning prescribed in R18-9-701(1).

“Disinfection” means a treatment process that uses oxidants, ultraviolet light, or other agents to kill or inactivate pathogenic organisms in wastewater.

“Filtration” means a treatment process that removes particulate matter from wastewater by passage through porous media.

“Gray water” means wastewater, collected separately from a sewage flow, that originates from a clothes washer, bathtub, shower, or sink, but it does not include wastewater from a kitchen sink, dishwasher, or a toilet.

“Industrial wastewater” means wastewater generated from an industrial process.

“Landscape impoundment” means a manmade lake, pond, or impoundment of reclaimed water where swimming, wading, boating, fishing, and other water-based recreational activities are prohibited. A landscape impoundment is created for storage, landscaping, or for aesthetic purposes only.

“NTU” means nephelometric turbidity unit.

“On-site wastewater treatment facility” has the meaning prescribed in A.R.S. § 49-201(24).

“Open access” means that access to reclaimed water by the general public is uncontrolled.

“Reclaimed water” has the meaning prescribed in A.R.S. § 49-201(31).

“Recreational impoundment” means a manmade lake, pond, or impoundment of reclaimed water where boating or fishing is an intended use of the impoundment. Swimming and other full-body recreation activities (for example, water-skiing) are prohibited in a recreational impoundment.

“Restricted access” means that access to reclaimed water by the general public is controlled.

“Secondary treatment” means a biological treatment process that achieves the minimum level of effluent quality defined by the federal secondary treatment regulation at 40 CFR § 133.102.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

“Sewage” means untreated wastes from toilets, baths, sinks, lavatories, laundries, and other plumbing fixtures in places of human habitation, employment, or recreation.

Historical Note

Adopted effective July 9, 1981 (Supp. 81-4). Former Section R9-21-301 renumbered without change as Section R18-11-301 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-302. Applicability

This Article applies to the direct reuse of reclaimed water, except for:

1. The direct reuse of gray water, or
2. The direct reuse of reclaimed water from an onsite wastewater treatment facility regulated by a general Aquifer Protection Permit under 18 A.A.C. 9, Article 3.

Historical Note

Adopted effective June 8, 1981 (Supp. 81-3). Amended effective January 7, 1985 (Supp. 85-1). Former Section R9-21-302 renumbered without change as Section R18-11-302 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-303. Class A+ Reclaimed Water

- A. Class A+ reclaimed water is wastewater that has undergone secondary treatment, filtration, nitrogen removal treatment, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A+ reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A+ reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
 3. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.

- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A+ reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsection (B)(2) and the total nitrogen criteria in subsection (B)(3) before discharge to a reclaimed water distribution system.
- D. Class A+ reclaimed water is not required for any type of direct reuse. A person may use Class A+ reclaimed water for any type of direct reuse listed in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-303 renumbered without change as Section R18-11-303 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-304. Class A Reclaimed Water

- A. Class A reclaimed water is wastewater that has undergone secondary treatment, filtration, and disinfection. Chemical feed facilities to add coagulants or polymers are required to ensure that filtered effluent before disinfection complies with the 24-hour average turbidity criterion prescribed in subsection (B)(1). Chemical feed facilities may remain idle if the 24-hour average turbidity criterion in subsection (B)(1) is achieved without chemical addition.
- B. An owner of a facility shall ensure that:
 1. The turbidity of Class A reclaimed water at a point in the wastewater treatment process after filtration and immediately before disinfection complies with the following:
 - a. The 24-hour average turbidity of filtered effluent is two NTUs or less, and
 - b. The turbidity of filtered effluent does not exceed five NTUs at any time.
 2. Class A reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. There are no detectable fecal coliform organisms in four of the last seven daily reclaimed water samples taken, and
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 23 / 100 ml.
 - c. If alternative treatment processes or alternative turbidity criteria are used, or reclaimed water is blended with other water to produce Class A reclaimed water under subsection (C), there are no detectable enteric virus in four of the last seven monthly reclaimed water samples taken.
- C. An owner of a facility may use alternative treatment methods other than those required by subsection (A), or comply with alternative turbidity criteria other than those required by subsection (B)(1), or blend reclaimed water with other water to produce Class A reclaimed water provided the owner demonstrates through pilot plant testing, existing water quality data, or other means that the alternative treatment methods, alternative turbidity criteria, or blending reliably produces a reclaimed water that meets the disinfection criteria in subsec-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tion (B)(2) before discharge to a reclaimed water distribution system.

- D. A person shall use Class A reclaimed water for a type of direct reuse listed as Class A in Table A. A person may use Class A reclaimed water for a type of direct reuse listed as Class B or Class C in Table A.

Historical Note

Adopted effective January 7, 1985 (Supp. 85-1). Amended effective August 12, 1986 (Supp. 86-4). Former Section R9-21-304 renumbered without change as Section R18-11-304 (Supp. 87-3). Section repealed effective February 18, 1992 (Supp. 92-1). New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-305. Class B+ Reclaimed Water

- A. Class B+ reclaimed water is wastewater that has undergone secondary treatment, nitrogen removal treatment, and disinfection.
- B. An owner of a facility shall ensure that:
1. Class B+ reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
 2. The 5-sample geometric mean concentration of total nitrogen in a reclaimed water sample is less than 10 mg / L.
- C. Class B+ reclaimed water is not required for a type of direct reuse. A person may use Class B+ reclaimed water for a type of direct reuse listed as Class B or Class C in Table A. A person shall not use Class B+ reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-306. Class B Reclaimed Water

- A. Class B reclaimed water is wastewater that has undergone secondary treatment and disinfection.
- B. An owner of a facility shall ensure that Class B reclaimed water meets the following criteria after disinfection treatment and before discharge to a reclaimed water distribution system:
1. The concentration of fecal coliform organisms in four of the last seven daily reclaimed water samples is less than 200 / 100 ml.
 2. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 800 / 100 ml.
- C. A person shall use a minimum of Class B reclaimed water for a type of direct reuse listed as Class B in Table A. A person may use Class B reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class B reclaimed water for a type of direct reuse listed as Class A in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-307. Class C Reclaimed Water

- A. Class C reclaimed water is wastewater that has undergone secondary treatment in a series of wastewater stabilization ponds, including aeration, with or without disinfection.
- B. The owner of a facility shall ensure that:
1. The total retention time of Class C reclaimed water in wastewater stabilization ponds is at least 20 days.
 2. Class C reclaimed water meets the following criteria after treatment and before discharge to a reclaimed water distribution system:
 - a. The concentration of fecal coliform organisms in four of the last seven reclaimed water samples taken is less than 1000 / 100 ml.
 - b. The single sample maximum concentration of fecal coliform organisms in a reclaimed water sample is less than 4000 / 100 ml.
- C. A person shall use a minimum of Class C reclaimed water for a type of direct reuse listed as Class C in Table A. A person shall not use Class C reclaimed water for a type of direct reuse listed as Class A or Class B in Table A.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-308. Industrial Reuse

- A. The reclaimed water quality requirements for the following direct reuse applications are industry-specific and shall be determined by the Department on a case-by-case basis in a reclaimed water permit issued by the Department under 18 A.A.C. 9, Article 7:
1. Direct reuse of industrial wastewater containing sewage.
 2. Direct reuse of industrial wastewater for the production or processing of any crop used as human or animal food.
- B. The Department shall use best professional judgment to determine the reclaimed water quality requirements needed to protect public health and the environment for a type of direct reuse specified in subsection (A).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

R18-11-309. Reclaimed Water Quality Standards for an Unlisted Type of Direct Reuse

- A. The Department may prescribe in an individual reclaimed water permit issued under 18 A.A.C. 9, Article 7, reclaimed water quality requirements for a type of direct reuse not listed in Table A. Before permitting a direct reuse of reclaimed water not listed in Table A, the Department shall, using its best professional judgment, determine and require compliance with reclaimed water quality requirements needed to protect public health and the environment.
- B. Department may determine that Class A+, A, B+, B, or C reclaimed water is appropriate for a new type of direct reuse.
- C. The Department shall consider the following factors when prescribing reclaimed water quality requirements for a new type of direct reuse:
1. The risk to public health;
 2. The degree of public access to the site where the reclaimed water is reused and human exposure to the reclaimed water;
 3. The level of treatment necessary to ensure that the reclaimed water is aesthetically acceptable;
 4. The level of treatment necessary to prevent nuisance conditions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

5. Specific water quality requirements for the intended type of direct reuse;
6. The means of application of the reclaimed water;
7. The degree of treatment necessary to avoid a violation of surface water quality standards or aquifer water quality standards;
8. The potential for improper or unintended use of the reclaimed water;
9. The reuse guidelines, criteria, or standards adopted or recommended by the U.S. Environmental Protection Agency or other federal or state agencies that apply to the new type of direct reuse; and
10. Similar wastewater reclamation experience of reclaimed water providers in the United States.

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

Table A. Minimum Reclaimed Water Quality Requirements for Direct Reuse

| Type of Direct Reuse | Minimum Class of Reclaimed Water Required |
|--|---|
| Irrigation of food crops | A |
| Recreational impoundments | A |
| Residential landscape irrigation | A |
| Schoolground landscape irrigation | A |
| Open access landscape irrigation | A |
| Toilet and urinal flushing | A |
| Fire protection systems | A |
| Spray irrigation of an orchard or vineyard | A |
| Commercial closed loop air conditioning systems | A |
| Vehicle and equipment washing (does not include self-service vehicle washes) | A |
| Snowmaking | A |
| Surface irrigation of an orchard or vineyard | B |
| Golf course irrigation | B |
| Restricted access landscape irrigation | B |
| Landscape impoundment | B |
| Dust control | B |
| Soil compaction and similar construction activities | B |
| Pasture for milking animals | B |
| Livestock watering (dairy animals) | B |
| Concrete and cement mixing | B |
| Materials washing and sieving | B |
| Street cleaning | B |
| Pasture for non-dairy animals | C |
| Livestock watering (non-dairy animals) | C |
| Irrigation of sod farms | C |
| Irrigation of fiber, seed, forage, and similar crops | C |
| Silviculture | C |

Note: Nothing in this Article prevents a wastewater treatment plant from using a higher quality reclaimed water for a type of direct reuse than the minimum class of reclaimed water listed in Table A. For example, a wastewater treatment plant may provide Class A reclaimed water for a type of direct reuse where Class B or Class C reclaimed water is acceptable.

Historical Note

New Table adopted by final rulemaking at 7 A.A.R. 870, effective January 22, 2001 (Supp. 01-1).

ARTICLE 4. AQUIFER WATER QUALITY STANDARDS

R18-11-401. Definitions

In addition to the definitions contained in A.R.S. §§ 49-101 and 49-201, the terms of this Article shall have the following meanings:

1. "Beta particle and photon radioactivity from man-made radionuclides" means all radionuclides emitting beta particles or photons, except Thorium-232, Uranium-235, Uranium-238 and their progeny.
2. "Dose equivalent" means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements.
3. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
4. "Gross alpha particle activity" means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.
5. "Mg/l" means milligrams per liter.
6. "Millirem" means 1/1000 of a rem. A rem means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system.
7. "Non-drinking water protected use" means the protection and maintenance of aquifer water quality for a use other than for human consumption.
8. "pCi" means picocurie, or the quantity of radioactive material producing 2.22 nuclear transformations per minute.
9. "Total trihalomethanes" means the sum of the concentrations of the following trihalomethane compounds: trichloromethane (chloroform), dibromo-chloromethane, bromodichloromethane and tribromo-methane (bromoform).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3).

R18-11-402. Repealed

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Repealed effective August 14, 1992 (Supp. 92-3).

R18-11-403. Analytical Methods

Analysis of a sample to determine compliance with an aquifer water quality standard shall be in accordance with an analytical method specified in A.A.C. Title 9, Chapter 14, Article 6 or an alternative analytical method that is approved by the Director of the Arizona Department of Health Services pursuant to A.A.C. R9-14-610(C).

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1). Amended effective August 14, 1992 (Supp. 92-3). Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-404. Laboratories

A test result from a sample taken to determine compliance with an aquifer water quality standard shall be valid only if the sample has

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

been analyzed by a laboratory that is licensed by the Arizona Department of Health Services for the analysis performed.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-405. Narrative Aquifer Water Quality Standards

- A. A discharge shall not cause a pollutant to be present in an aquifer classified for a drinking water protected use in a concentration which endangers human health.
- B. A discharge shall not cause or contribute to a violation of a water quality standard established for a navigable water of the state.
- C. A discharge shall not cause a pollutant to be present in an aquifer which impairs existing or reasonably foreseeable uses of water in an aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).

R18-11-406. Numeric Aquifer Water Quality Standards: Drinking Water Protected Use

- A. The aquifer water quality standards in this Section apply to aquifers that are classified for drinking water protected use.
- B. The following are the aquifer water quality standards for inorganic chemicals:

| Pollutant | mg/L |
|----------------------------|--|
| Antimony | 0.006 |
| Arsenic | 0.05 |
| Asbestos | 7 million fibers/liter (longer than 10 mm) |
| Barium | 2 |
| Beryllium | 0.004 |
| Cadmium | 0.005 |
| Chromium | 0.1 |
| Cyanide (As Free Cyanide) | 0.2 |
| Fluoride | 4.0 |
| Lead | 0.05 |
| Mercury | 0.002 |
| Nickel | 0.1 |
| Nitrate (as N) | 10 |
| Nitrite (as N) | 1 |
| Nitrate and nitrite (as N) | 10 |
| Selenium | 0.05 |
| Thallium | 0.002 |

- C. The following are the aquifer water quality standards for organic chemicals:

| Pollutant | (mg/L) |
|----------------------------|--------|
| Benzene | 0.005 |
| Benzo (a) pyrene | 0.0002 |
| Carbon Tetrachloride | 0.005 |
| o-Dichlorobenzene | 0.6 |
| para-Dichlorobenzene | 0.075 |
| 1,2-Dichloroethane | 0.005 |
| 1,1-Dichloroethylene | 0.007 |
| cis-1,2-Dichloroethylene | 0.07 |
| trans-1,2-Dichloroethylene | 0.1 |
| 1,2-Dichloropropane | 0.005 |
| Dichloromethane | 0.005 |
| Di (2-ethylhexyl) adipate | 0.4 |
| Di (2-ethylhexyl) pthalate | 0.006 |

| | |
|---------------------------|------------|
| Ethylbenzene | 0.7 |
| Hexachlorobenzene | 0.001 |
| Hexachlorocyclopentadiene | 0.05 |
| Monochlorobenzene | 0.1 |
| Pentachlorophenol | 0.001 |
| Styrene | 0.1 |
| 2,3,7,8-TCDD (Dioxin) | 0.00000003 |
| Tetrachloroethylene | 0.005 |
| Toluene | 1 |
| Trihalomethanes (Total) | 0.10 |
| 1,2,4-Trichlorobenzene | 0.07 |
| 1,1,1-Trichloroethane | 0.20 |
| 1,1,2-Trichloroethane | 0.005 |
| Trichloroethylene | 0.005 |
| Vinyl Chloride | 0.002 |
| Xylenes (Total) | 10 |

- D. The following are the aquifer water quality standards for pesticides and polychlorinated biphenyls (PCBs):

| Pollutant | (mg/L) |
|---|---------|
| Alachlor | 0.002 |
| Atrazine | 0.003 |
| Carbofuran | 0.04 |
| Chlordane | 0.002 |
| Dalapon | 0.2 |
| 1,2-Dibromo-3-Chloropropane (DBCP) | 0.0002 |
| 2,4,-Dichlorophenoxyacetic Acid(2,4-D) | 0.07 |
| Dinoseb | 0.007 |
| Diquat | 0.02 |
| Endothall | 0.1 |
| Endrin | 0.002 |
| Ethylene Dibromide (EDB) | 0.00005 |
| Glyphosate | 0.7 |
| Heptachlor | 0.0004 |
| Heptachlor Epoxide | 0.0002 |
| Lindane | 0.0002 |
| Methoxychlor | 0.04 |
| Oxamyl | 0.2 |
| Picloram | 0.5 |
| Polychlorinated Biphenols (PCBs) | 0.0005 |
| Simazine | 0.004 |
| Toxaphene | 0.003 |
| 2,4,5-Trichlorophenoxypropionic Acid (2,4,5-TP or Silvex) | 0.05 |

- E. The following are the aquifer water quality standards for radionuclides:

1. The maximum concentration for gross alpha particle activity, including Radium-226 but excluding radon and uranium, shall not exceed 15 pCi/l.
2. The maximum concentration for combined Radium-226 and Radium-228 shall not exceed 5 pCi/l.
3. The average annual concentration of beta particle and photon radioactivity from man-made radionuclides shall not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem/year.
4. Except for the radionuclides listed in this subsection, the concentration of man-made radionuclides causing 4 millirem total body or organ dose equivalents shall be calculated on the basis of a 2-liter-per-day drinking water intake using the 168-hour data listed in "Maximum Permissible Body Burdens and Maximum Permissible Con-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

centration of Radionuclides in Air or Water for Occupational Exposure,” National Bureau of Standards Handbook 69, National Bureau of Commerce, as amended August 1963 (and no future editions), incorporated herein by reference and on file with the Office of the Secretary of State and with the Department. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirem/year. The following average annual concentrations are assumed to produce a total body or organ dose of 4 millirem/year:

| Radionuclide | Critical Organ | pCi/l |
|--------------|----------------|--------|
| Tritium | Total body | 20,000 |
| Strontium-90 | Bone Marrow | 8 |

- F. The aquifer water quality standard for microbiological contaminants is based upon the presence or absence of total coliforms in a 100-milliliter sample. If a sample is total coliform-positive, a 100-milliliter repeat sample shall be taken within two weeks of the time the sample results are reported. Any total coliform-positive repeat sample following a total coliform-positive sample constitutes a violation of the aquifer water quality standard for microbiological contaminants.
- G. The following are the aquifer water quality standards for turbidity:
- One nephelometric turbidity unit as determined by a monthly average except that five or fewer nephelometric turbidity units may be allowed if it can be determined that the higher turbidity does not interfere with disinfection, prevent maintenance of effective disinfectant agents in water supply distribution systems, or interfere with microbiological determinations.
 - Five nephelometric turbidity units based on an average of two consecutive days.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended effective May 26, 1994 (Supp. 94-2).

R18-11-407. Aquifer Water Quality Standards in Reclassified Aquifers

- A. All aquifers in the state are classified for drinking water protected use except for aquifers which are reclassified to a non-drinking water protected use pursuant to A.R.S. § 49-224 and A.A.C. R18-11-503.
- B. Aquifer water quality standards for drinking water protected use apply to reclassified aquifers except where expressly superseded by aquifer water quality standards adopted pursuant to subsection (C).
- C. The Director shall adopt, by rule, aquifer water quality standards for reclassified aquifers within one year of the date of the order reclassifying the aquifer to a nondrinking water protected use. The Director shall adopt aquifer water quality standards for reclassified aquifers only for pollutants that are specifically identified in a petition for reclassification as prescribed by A.R.S. § 49-223(E) and A.A.C. R18-11-503(B). Aquifer water quality standards for reclassified aquifers shall be sufficient to protect the use of the reclassified aquifer.

Historical Note

Adopted effective January 4, 1990 (Supp. 90-1).
Amended effective August 14, 1992 (Supp. 92-3).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-408. Petition for Adoption of a Numeric Aquifer Water Quality Standard

- A. Any person may petition the Director to adopt, by rule, a numeric aquifer water quality standard for a pollutant for which no numeric aquifer water quality standard exists.
- B. Petitions for adoption of a numeric aquifer water quality standard shall be filed with the Department and shall comply with the requirements applicable to petitions for rule adoption as provided by A.R.S. § 41-1033 and A.A.C. R18-1-302, except as otherwise provided by A.R.S. § 49-223 or this Section.
- C. In addition to the requirements of A.A.C. R18-1-302, a petition for rule adoption to establish a numeric aquifer water quality standard shall include specific reference to:
- Technical information that the pollutant is a toxic pollutant.
 - Technical information upon which the Director reasonably may base the establishment of a numeric aquifer water quality standard.
 - Evidence that the pollutant that is the subject of the petition is or may in the future be present in an aquifer or part of an aquifer that is classified for drinking water protected use. Evidence may include, but is not limited to, any of the following:
 - A laboratory analysis of a water sample by a laboratory licensed by the Arizona Department of Health Services which indicates the presence of the pollutant in the aquifer.
 - A hydrogeological study which demonstrates that the pollutant that is the subject of the petition may be present in an aquifer in the future. The hydrogeological study shall include the following:
 - A description of the use that results in a discharge of the pollutant that is the subject of the petition.
 - A description of the mobility of the pollutant in the vadose zone and in the aquifer.
 - A description of the persistence of the pollutant in the vadose zone and in the aquifer.
- D. Within 180 calendar days of the receipt of a complete petition for rule adoption to establish a numeric aquifer water quality standard, the Director shall make a written determination of whether the petition should be granted or denied. The Director shall give written notice by regular mail of the determination to the petitioner.
- E. If the petition for rule adoption is granted, the Director shall initiate rulemaking proceedings to adopt a numeric aquifer water quality standard. The Director shall, within one year of the date that the petition for adoption of a numeric aquifer water quality standard is granted, either adopt a rule establishing a numeric aquifer water quality standard or publish a notice of termination of rulemaking in the Arizona Administrative Register.
- F. If the petition for rule adoption is denied, the Director shall issue a denial letter to the petitioner which explains the reasons for the denial. The denial of a petition for rule adoption to establish a numeric aquifer water quality standard is not subject to judicial review.

ARTICLE 5. AQUIFER BOUNDARY AND PROTECTED USE CLASSIFICATION**R18-11-501. Definitions**

In addition to the definitions contained in A.R.S. § 49-201, the words and phrases of this Article shall have the following meaning:

1. "Drinking water protected use" means the protection and maintenance of aquifer water quality for human consumption.
2. "Hardrock areas containing little or no water" means areas of igneous or metamorphic rock which do not yield usable quantities of water.
3. "Nondrinking water protected use" means the protection and maintenance of aquifer water quality for a use other than human consumption.
4. "Usable quantities" means five gallons of water per day.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-502. Aquifer Boundaries

- A. Except as provided in subsection (B), aquifer boundaries for the aquifers in this state are identified and defined as being identical to the hydrologic basin and subbasin boundaries, as found by the Director of the Department of Water Resources, Findings and Order In the Matter of The Designation of Groundwater Basins and Subbasins In The State of Arizona (dated June 21, 1984), pursuant to A.R.S. §§ 45-403 and 45-404, which is incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.
- B. Excluded from the boundaries of the aquifers are hard rock areas which contain little or no water, as identified in Plate 1 of the Department of Water Resources, Water Resource Hydro-

logic Map Series Report Number 2 (dated January 1981) and as further identified in the Bureau of Mines, University of Arizona County Geologic Map Series (individual county maps dated 1957 through 1960), which are incorporated herein by reference, on file and available for public inspection at the Department of Environmental Quality. No later amendments or editions are incorporated by reference.

- C. The Director may, by rule, modify or add an aquifer boundary provided that one or more of the following applies:
 1. The Department of Water Resources modifies the boundaries of its basins or subbasins.
 2. The Director is made aware of new technical information or data which supports refinement of an aquifer boundary.
- D. Facilities located outside of the boundaries defined in these rules shall be subject to A.R.S. § 49-241 except as provided therein.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).
Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-503. Petition for reclassification

- A. Any person may petition the Director to reclassify an aquifer from a drinking water protected use to a nondrinking water protected use pursuant to A.R.S. § 49-224(C).
- B. A written petition for reclassification pursuant to A.R.S. § 49-224(C) or A.R.S. § 49-224(D) shall be filed with the Department and shall include the following categories of information:
 1. The proposed protected use for which the reclassification is being requested.
 2. The pollutant and affected aquifer water quality standards for which the reclassification is being requested.
 3. A hydrogeologic report which demonstrates that the aquifer proposed for reclassification is or will be hydrologically isolated, to the extent described in A.R.S. § 49-224(C)(1). This report and demonstration of hydrologic isolation for the area containing such aquifer, and immediate adjacent geologic units, shall include at least the following:
 - a. Hydrogeologic area maps and cross sections.
 - b. An analysis of subsurface geology, including geologic and hydrologic separation.
 - c. Water level elevation or piezometric level contour maps.
 - d. Analysis of hydrologic characteristics of the aquifer and the immediate adjacent geologic units.
 - e. Description of existing water quality and analysis of water chemistry.
 - f. Projected annual quantity of water to be withdrawn.
 - g. Identification of pumping centers, cones of depression and areas of recharge.
 - h. A water balance.
 - i. Existing flow direction and evaluation of the effects of seasonal and future pumping on flow.
 - j. An evaluation as to whether the reclassification will contribute to or cause a violation of aquifer water quality standards in other aquifers, or in parts of the aquifer not being proposed for reclassification.
 4. Documentation demonstrating that water from the aquifer or part of the aquifer for which reclassification is pro-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

posed is not being used as drinking water. This documentation shall include at least the following:

- a. A list of all wells or springs including their location, ownership and use within the aquifer or part of the aquifer being proposed for reclassification.
 - b. Identification of groundwater withdrawal rights, on file with the Department of Water Resources, within the aquifer or part of the aquifer being proposed for reclassification.
 - c. A comprehensive list of agencies, persons and other information sources consulted for aquifer use documentation.
5. A cost-benefit analysis developed pursuant to the requirements of A.R.S. § 49-224(C)(3), except for petitions submitted pursuant to A.R.S. § 49-224(D). This analysis shall identify potential future uses of the aquifer being proposed for reclassification, as well as other opportunity costs associated with reclassification, and shall contain a description of the cost-benefit methodology used, including all assumptions, data, data sources and criteria considered and all supporting statistical analyses.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

R18-11-504. Agency Action on Petition

- A. Upon receipt of a petition for reclassification, the Director shall review the petition for compliance with the requirements of R18-11-503. If additional information is necessary, the petitioner shall be notified of specific deficiencies in writing within 30 calendar days of receipt of the petition.
- B. Within 120 calendar days after receipt of a complete petition, and after consultation with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C), the Director shall make a final decision to grant or deny the petition and shall notify the petitioner of such decision and the reason for such determination in writing.
- C. Upon a decision to grant a petition for aquifer reclassification, the Director shall initiate proceedings for promulgation of aquifer water quality standards and, if applicable, for aquifer boundary designation for the reclassified aquifers.

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

R18-11-505. Public participation

- A. Within 30 days of receipt of a complete petition for reclassification filed pursuant to A.R.S. § 49-224(D), or if the Director deems it necessary to consider a reclassification under A.R.S. § 49-224(C), the Director shall give public notice of the proposed reclassification pursuant to A.A.C. R18-1-401.
- B. The Director shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification. The Director shall give notice of each public hearing and conduct the public hearing in accordance with the provisions of A.A.C. R18-1-402.

Historical Note

Adopted effective June 29, 1989 (Supp. 89-2).

R18-11-506. Rescission of Reclassification

The Director may, by rule, rescind an aquifer reclassification and return an aquifer to a drinking water protected use if he determines that any of the conditions under which the reclassification was

granted are no longer valid. If the Director initiates a change under this Section, he shall consult with the appropriate advisory council pursuant to A.R.S. §§ 49-224(C).

Historical Note

Adopted effective October 22, 1987 (Supp. 87-4).

Amended by final expedited rulemaking at 29 A.A.R. 2344 (October 6, 2023), with an immediate effective date of September 22, 2023 (Supp. 23-3).

ARTICLE 6. IMPAIRED WATER IDENTIFICATION

Article 6, consisting of Sections R18-11-601 through R18-11-606, made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-601. Definitions

In addition to the definitions established in A.R.S. §§ 49-201 and 49-231, and A.A.C. R18-11-101, the following terms apply to this Article:

1. "303(d) List" means the list of surface waters or segments required under section 303(d) of the Clean Water Act and A.R.S. Title 49, Chapter 2, Article 2.1, for which TMDLs are developed and submitted to EPA for approval.
2. "Attaining" means there is sufficient, credible, and scientifically defensible data to assess a surface water or segment and the surface water or segment does not meet the definition of impaired or not attaining.
3. "AZPDES" means the Arizona Pollutant Elimination Discharge System.
4. "Credible and scientifically defensible data" means data submitted, collected, or analyzed using:
 - a. Quality assurance and quality control procedures under A.A.C. R18-11-602;
 - b. Samples or analyses representative of water quality conditions at the time the data were collected;
 - c. Data consisting of an adequate number of samples based on the nature of the water in question and the parameters being analyzed; and
 - d. Methods of sampling and analysis, including analytical, statistical, and modeling methods that are generally accepted and validated by the scientific community as appropriate for use in assessing the condition of the water.
5. "Designated use" means those uses specified in 18 A.A.C. 11, Article 1 for each surface water or segment whether or not they are facing.
6. "EPA" means the U.S. Environmental Protection Agency.
7. "Impaired water" means a Navigable water for which credible scientific data exists that satisfies the requirements of A.R.S. § 49-232 and that demonstrates that the water should be identified pursuant to 33 United States Code § 1313(d) and the regulations implementing that statute. A.R.S. § 49-231(1).
8. "Laboratory detection limit" means a "Method Reporting Limit" (MRL) or "Reporting Limit" (RL). These analogous terms describe the laboratory reported value, which is the lowest concentration level included on the calibration curve from the analysis of a pollutant that can be quantified in terms of precision and accuracy.
9. "Monitoring entity" means the Department or any person who collects physical, chemical, or biological data used for an impaired water identification or a TMDL decision.
10. "Naturally occurring condition" means the condition of a surface water or segment that would have occurred in the

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- absence of pollutant loadings as a result of human activity.
11. "Not attaining" means a surface water is assessed as impaired, but is not placed on the 303(d) List because:
 - a. A TMDL is prepared and implemented for the surface water;
 - b. An action, which meets the requirements of R18-11-604(D)(2)(h), is occurring and is expected to bring the surface water to attaining before the next 303(d) List submission; or
 - c. The impairment of the surface water is due to pollution but not a pollutant, for which a TMDL load allocation cannot be developed.
 12. "NPDES" means National Pollutant Discharge Elimination System.
 13. "Planning List" means a list of surface waters and segments that the Department will review and evaluate to determine if the surface water or segment is impaired and whether a TMDL is necessary.
 14. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. 33 U.S.C. 1362(6). Characteristics of water, such as dissolved oxygen, pH, temperature, turbidity, and suspended sediment are considered pollutants if they result or may result in the non-attainment of a water quality standard.
 15. "Pollution" means "the man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water." 33 U.S.C. 1362(19).
 16. "QAP" means a quality assurance plan detailing how environmental data operations are planned, implemented, and assessed for quality during the duration of a project.
 17. "Sampling event" means one or more samples taken under consistent conditions on one or more days at a distinct station or location.
 18. "SAP" means a site specific sampling and analysis plan that describes the specifics of sample collection to ensure that data quality objectives are met and that samples collected and analyzed are representative of surface water conditions at the time of sampling.
 19. "Spatially independent sample" means a sample that is collected at a distinct station or location. The sample is independent if the sample was collected:
 - a. More than 200 meters apart from other samples, or
 - b. Less than 200 meters apart, and collected to characterize the effect of an intervening tributary, outfall or other pollution source, or significant hydrographic or hydrologic change.
 20. "Temporally independent sample" means a sample that is collected at the same station or location more than seven days apart from other samples.
 21. "Threatened" means that a surface water or segment is currently attaining its designated use, however, trend analysis, based on credible and scientifically defensible data, indicates that the surface water or segment is likely to be impaired before the next listing cycle.
 22. "TMDL" means total maximum daily load.
 23. "TMDL decision" means a decision by the Department to:
 - a. Prioritize an impaired water for TMDL development,
 - b. Develop a TMDL for an impaired water, or
 - c. Develop a TMDL implementation plan.
 24. "Total maximum daily load" means an estimation of the total amount of a pollutant from all sources that may be added to a water while still allowing the water to achieve and maintain applicable surface water quality standards. Each total maximum daily load shall include allocations for sources that contribute the pollutant to the water, as required by section 303(d) of the clean water act (33 United States Code section 1313(d)) and regulations implementing that statute to achieve applicable surface water quality standards. A.R.S. § 49-231(4).
 25. "Water quality standard" means a standard composed of designated uses (classification of waters), the numerical and narrative criteria applied to the specific water uses or classification, the antidegradation policy, and moderating provisions, for example, mixing zones, site-specific alternative criteria, and exemptions, in A.A.C. Title 18, Chapter 11, Article 1.
 26. "WQARF" means the water quality assurance revolving fund established under A.R.S. § 49-282.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-602. Credible Data

- A. Data are credible and relevant to an impaired water identification or a TMDL decision when:
 1. Quality Assurance Plan. A monitoring entity, which contribute data for an impaired water identification or a TMDL decision, provides the Department with a QAP that contains, at a minimum, the elements listed in subsections (A)(1)(a) through (A)(1)(f). The Department may accept a QAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 - a. An approval page that includes the date of approval and the signatures of the approving officials, including the project manager and project quality assurance manager;
 - b. A project organization outline that identifies all key personnel, organizations, and laboratories involved in monitoring, including the specific roles and responsibilities of key personnel in carrying out the procedures identified in the QAP and SAP, if applicable;
 - c. Sampling design and monitoring data quality objectives or a SAP that meets the requirements of subsection (A)(2) to ensure that:
 - i. Samples are spatially and temporally representative of the surface water,
 - ii. Samples are representative of water quality conditions at the time of sampling, and
 - iii. The monitoring is reproducible;
 - d. The following field sampling information to assure that samples meet data quality objectives:
 - i. Sampling and field protocols for each parameter or parametric group, including the sampling methods, equipment and containers, sample preservation, holding times, and any analysis

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- proposed for completion in the field or outside of a laboratory;
- ii. Field and laboratory methods approved under subsection (A)(5);
 - iii. Handling procedures to identify samples and custody protocols used when samples are brought from the field to the laboratory for analysis;
 - iv. Quality control protocols that describe the number and type of field quality control samples for the project that includes, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - v. Procedures for testing, inspecting, and maintaining field equipment;
 - vi. Field instrument calibration procedures that describe how and when field sampling and analytical instruments will be calibrated;
 - vii. Field notes and records that describe the conditions that require documentation in the field, such as weather, stream flow, transect information, distance from water edge, water and sample depth, equipment calibration measurements, field observations of watershed activities, and bank conditions. Indicate the procedures implemented for maintaining field notes and records and the process used for attaching pertinent information to monitoring results to assist in data interpretation;
 - viii. Minimum training and any specialized training necessary to do the monitoring, that includes the proper use and calibration of field equipment used to collect data, sampling protocols, quality assurance/quality control procedures, and how training will be achieved;
- e. Laboratory analysis methods and quality assurance/quality control procedures that assure that samples meet data quality objectives, including:
 - i. Analytical methods and equipment necessary for analysis of each parameter, including identification of approved laboratory methods described in subsection (A)(5), and laboratory detection limits for each parameter;
 - ii. The name of the designated laboratory, its license number, if licensed by the Arizona Department of Health Services, and the name of a laboratory contact person to assist the Department with quality assurance questions;
 - iii. Quality controls that describe the number and type of laboratory quality control samples for the project, including, if appropriate for the type of sampling being conducted, field blanks, travel blanks, equipment blanks, method blanks, split samples, and duplicate samples;
 - iv. Procedures for testing, inspecting, and maintaining laboratory equipment and facilities;
 - v. A schedule for calibrating laboratory instruments, a description of calibration methods, and a description of how calibration records are maintained; and
 - vi. Sample equipment decontamination procedures that outline specific methods for sample collection and preparation of equipment, identify the frequency of decontamination, and describe the procedures used to verify decontamination;
 - f. Data review, management, and use that includes the following:
 - i. A description of the data handling process from field to laboratory, from laboratory to data review and validation, and from validation to data storage and use. Include the role and responsibility of each person for each step of the process, type of database or other storage used, and how laboratory and field data qualifiers are related to the laboratory result;
 - ii. Reports that describe the intended frequency, content, and distribution of final analysis reports and project status reports;
 - iii. Data review, validation, and verification that describes the procedure used to validate and verify data, the procedures used if errors are detected, and how data are accepted, rejected, or qualified; and
 - iv. Reconciliation with data quality objectives that describes the process used to determine whether the data collected meets the project objectives, which may include discarding data, setting limits on data use, or revising data quality objectives.
2. Sampling and analysis plan.
 - a. A monitoring entity shall develop a SAP that contains, at a minimum, the following elements:
 - i. The experimental design of the project, the project goals and objectives, and evaluation criteria for data results;
 - ii. The background or historical perspective of the project;
 - iii. Identification of target conditions, including a discussion of whether any weather, seasonal variations, stream flow, lake level, or site access may affect the project and the consideration of these factors;
 - iv. The data quality objectives for measurement of data that describe in quantitative and qualitative terms how the data meet the project objectives of precision, accuracy, completeness, comparability, and representativeness;
 - v. The types of samples scheduled for collection;
 - vi. The sampling frequency;
 - vii. The sampling periods;
 - viii. The sampling locations and rationale for the site selection, how site locations are benchmarked, including scaled maps indicating approximate location of sites; and
 - ix. A list of the field equipment, including tolerance range and any other manufacturer's specifications relating to accuracy and precision.
 - b. The Department may accept a SAP containing less than the required elements if the Department determines that an element is not relevant to the sampling activity and that its omission will not impact the quality of the results based upon the type of pollutants to be sampled, the type of surface water, and the purpose of the sampling.
 3. The monitoring entity may include any of the following in the QAP or SAP:

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- a. The name, title, and role of each person and organization involved in the project, identifying specific roles and responsibilities for carrying out the procedures identified in the QAP and SAP;
 - b. A distribution list of each individual and organization receiving a copy of the approved QAP and SAP;
 - c. A table of contents;
 - d. A health and safety plan;
 - e. The inspection and acceptance requirements for supplies;
 - f. The data acquisition that describes types of data not obtained through this monitoring activity, but used in the project;
 - g. The audits and response actions that describe how field, laboratory, and data management activities and sampling personnel are evaluated to ensure data quality, including a description of how the project will correct any problems identified during these assessments; and
 - h. The waste disposal methods that identify wastes generated in sampling and methods for disposal of those wastes.
4. Exceptions. The Department may determine that the following data are also credible and relevant to an impaired water identification or TMDL decision when data were collected, provided the conditions in subsections (A)(5), (A)(6), and (B) are met, and where the data were collected in the surface water or segment being evaluated for impairment:
 - a. The data were collected before July 12, 2002 and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2);
 - b. The data were collected after July 12, 2002 as part of an ongoing monitoring effort by a governmental agency and the Department determines that the data yield results of comparable reliability to the data collected under subsections (A)(1) and (A)(2); or
 - c. The instream water quality data were or are collected under the terms of a NPDES or AZPDES permit or a compliance order issued by the Department or EPA, a consent decree signed by the Department or EPA, or a sampling program approved by the Department or EPA under WQARF or CERCLA, and the Department determines that the data yield results of comparable reliability to data collected under subsections (A)(1) and (A)(2).
 5. Data collection, preservation, and analytical procedures. The monitoring entity shall collect, preserve, and analyze data using methods of sample collection, preservation, and analysis established under A.A.C. R9-14-610.
 6. Laboratory. The monitoring entity shall ensure that chemical and toxicological samples are analyzed in a state-licensed laboratory, a laboratory exempted by the Arizona Department of Health Services for specific analyses, or a federal or academic laboratory that can demonstrate proper quality assurance/quality control procedures substantially equal to those required by the Arizona Department of Health Services, and shall ensure that the laboratory uses approved methods identified in A.A.C. R9-14-610.
- B.** Documentation for data submission. The monitoring entity shall provide the Department with the following information either before or with data submission:
1. A copy of the QAP or SAP, or both, revisions to a previously submitted QAP or SAP, and any other information necessary for the Department to evaluate the data under subsection (A)(4);
 2. The applicable dates of the QAP and SAP, including any revisions;
 3. Written assurance that the methods and procedures specified in the QAP and SAP were followed;
 4. The name of the laboratory used for sample analyses and its certification number, if the laboratory is licensed by the Arizona Department of Health Services;
 5. The quality assurance/quality control documentation, including the analytical methods used by the laboratory, method number, detection limits, and any blank, duplicate, and spike sample information necessary to properly interpret the data, if different from that stated in the QAP or SAP;
 6. The data reporting unit of measure;
 7. Any field notes, laboratory comments, or laboratory notations concerning a deviation from standard procedures, quality control, or quality assurance that affects data reliability, data interpretation, or data validity; and
 8. Any other information, such as complete field notes, photographs, climate, or other information related to flow, field conditions, or documented sources of pollutants in the watershed, if requested by the Department for interpreting or validating data.
- C.** Recordkeeping. The monitoring entity shall maintain all records, including sample results, for the duration of the listing cycle. If a surface water or segment is added to the Planning List or to the 303(d) List, the Department shall coordinate with the monitoring entity to ensure that records are kept for the duration of the listing.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-603. General Data Interpretation Requirements

- A.** The Department shall use the following data conventions to interpret data for impaired water identifications and TMDL decisions:
1. Data reported below laboratory detection limits.
 - a. When the analytical result is reported as $<X$, where X is the laboratory detection limit for the analyte and the laboratory detection limit is less than or equal to the surface water quality standard, consider the result as meeting the water quality standard:
 - i. Use these statistically derived values in trend analysis, descriptive statistics or modeling if there is sufficient data to support the statistical estimation of values reported as less than the laboratory detection limit; or
 - ii. Use one-half of the value of the laboratory detection limit in trend analysis, descriptive statistics, or modeling, if there is insufficient data to support the statistical estimation of values reported as less than the laboratory detection limit.
 - b. When the sample value is less than or equal to the laboratory detection limit but the laboratory detection limit is greater than the surface water quality standard, shall not use the result for impaired water identifications or TMDL decisions;

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

2. Identify the field equipment specifications used for each listing cycle or TMDL developed. A field sample measurement within the manufacturer's specification for accuracy meets surface water quality standards;
 3. Resolve a data conflict by considering the factors identified under the weight-of-evidence determination in R18-11-605(B);
 4. When multiple samples from a surface water or segment are not spatially or temporally independent, or when lake samples are from multiple depths, use the following resultant value to represent the specific dataset:
 - a. The appropriate measure of central tendency for the dataset for:
 - i. A pollutant listed in the surface water quality standards 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - ii. A chronic water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2;
 - iii. A surface water quality standard for a pollutant that is expressed as an annual or geometric mean;
 - iv. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - v. The surface water quality standard for radioc chemicals in R18-11-109(G); or
 - vi. Except for chromium, all single sample maximum water quality standards in R18-11-112.
 - b. The maximum value of the dataset for:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and acute water quality standard in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1;
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A); or
 - iv. The 90th percentile water quality standard for nitrogen and phosphorus in R18-11-109(F) and R18-11-112.
 - c. The worst case measurement of the dataset for:
 - i. Surface water quality standard for dissolved oxygen under R18-11-109(E). For purposes of this subsection, worst case measurement means the minimum value for dissolved oxygen;
 - ii. Surface water quality standard for pH under R18-11-109(B). For purposes of this subsection, "worst case measurement" means both the minimum and maximum value for pH.
- B.** The Department shall not use the following data for placing a surface water or segment on the Planning List, the 303(d) List, or in making a TMDL decision.
1. Any measurement outside the range of possible physical or chemical measurements for the pollutant or measurement equipment,
 2. Uncorrected data transcription errors or laboratory errors, and
 3. An outlier identified through statistical procedures, where further evaluation determines that the outlier represents a valid measure of water quality but should be excluded from the dataset.
- C.** The Department may employ fundamental statistical tests if appropriate for the collected data and type of surface water when evaluating a surface water or segment for impairment or in making a TMDL decision. The statistical tests include descriptive statistics, frequency distribution, analysis of variance, correlation analysis, regression analysis, significance testing, and time series analysis.
- D.** The Department may employ modeling when evaluating a surface water or segment for impairment or in making a TMDL decision, if the method is appropriate for the type of waterbody and the quantity and quality of available data meet the requirements of R18-11-602. Modeling methods include:
1. Better Assessment Science Integrating Source and Non-point Sources (BASINS),
 2. Fundamental statistics, including regression analysis,
 3. Hydrologic Simulation Program-Fortran (HSPF),
 4. Spreadsheet modeling, and
 5. Hydrologic Engineering Center (HEC) programs developed by the Army Corps of Engineers.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-604. Types of Surface Waters Placed on the Planning List and 303(d) List

- A.** The Department shall evaluate, at least every five years, Arizona's surface waters by considering all readily available data.
1. The Department shall place a surface water or segment on:
 - a. The Planning List if it meets any of the criteria described in subsection (D), or
 - b. The 303(d) List if it meets the criteria for listing described in subsection (E).
 2. The Department shall remove a surface water or segment from the Planning List based on the requirements in R18-11-605(E)(1) or from the 303(d) List, based on the requirements in R18-11-605(E)(2).
 3. The Department may move surface waters or segments between the Planning List and the 303(d) List based on the criteria established in R18-11-604 and R18-11-605.
- B.** When placing a surface water or segment on the Planning List or the 303(d) List, the Department shall list the stream reach, derived from EPA's Reach File System or National Hydrography Dataset, or the entire lake, unless the data indicate that only a segment of the stream reach or lake is impaired or not attaining its designated use, in which case, the Department shall describe only that segment for listing.
- C.** Exceptions. The Department shall not place a surface water or segment on either the Planning List or the 303(d) List if the non-attainment of a surface water quality standard is due to one of the following:
1. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 2. The data were collected within a mixing zone or under a variance or nutrient waiver established in a NPDES or AZPDES permit for the specific parameter and the result does not exceed the alternate discharge limitation established in the permit. The Department may use data collected within these areas for modeling or allocating loads in a TMDL decision; or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

3. An activity exempted under R18-11-117, R18-11-118, or a condition exempted under R18-11-119.
- D. Planning List.**
1. The Department shall:
 - a. Use the Planning List to prioritize surface waters for monitoring and evaluation as part of the Department's watershed management approach;
 - b. Provide the Planning List to EPA; and
 - c. Evaluate each surface water and segment on the Planning List for impairment based on the criteria in R18-11-605(D) to determine the source of the impairment.
 2. The Department shall place a surface water or segment on the Planning List based the criteria in R18-11-605(C). The Department may also include a surface water or segment on the Planning List when:
 - a. A TMDL is completed for the pollutant and approved by EPA;
 - b. The surface water or segment is on the 1998 303(d) List but the dataset used for the listing:
 - i. Does not meet the credible data requirements of R18-11-602, or
 - ii. Contains insufficient samples to meet the data requirements under R18-11-605(D);
 - c. Some monitoring data exist but there are insufficient data to determine whether the surface water or segment is impaired or not attaining, including:
 - i. A numeric surface water quality standard is exceeded, but there are not enough samples or sampling events to fulfill the requirements of R18-11-605(D);
 - ii. Evidence exists of a narrative standard violation, but the amount of evidence is insufficient, based on narrative implementation procedures and the requirements of R18-11-605(D)(3);
 - iii. Existing monitoring data do not meet credible data requirements in R18-11-602; or
 - iv. A numeric surface water quality standard is exceeded, but there are not enough sample results above the laboratory detection limit to support statistical analysis as established in R18-11-603(A)(1).
 - d. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act, but insufficient current or original monitoring data exist to determine whether the surface water or segment will meet current surface water quality standards;
 - e. Trend analysis using credible and scientifically defensible data indicate that surface water quality standards may be exceeded by the next assessment cycle;
 - f. The exceedance of surface water quality standards is due to pollution, but not a pollutant;
 - g. Existing data were analyzed using methods with laboratory detection limits above the numeric surface water quality standard but analytical methods with lower laboratory detection limits are available;
 - h. The surface water or segment is expected to attain its designated use by the next assessment as a result of existing or proposed technology-based effluent limitations or other pollution control requirements under local, state, or federal authority. The appropriate entity shall provide the Department with the following documentation to support placement on the Planning List:
 - i. Verification that discharge controls are required and enforceable;
 - ii. Controls are specific to the surface water or segment, and pollutant of concern;
 - iii. Controls are in place or scheduled for implementation; and
 - iv. There are assurances that the controls are sufficient to bring about attainment of water quality standards by the next 303(d) List submission; or
- E. 303(d) List.** The Department shall:
1. Place a surface water or segment on the 303(d) List if the Department determines:
 - a. Based on R18-11-605(D), that the surface water or segment is impaired due to a pollutant and that a TMDL decision is necessary; or
 - b. That the surface water or segment is threatened due to a pollutant and, at the time the Department submits a final 303(d) List to EPA, there are federal regulations implementing section 303(d) of the Clean Water Act that require threatened waters be included on the list.
 2. Provide public notice of the 303(d) List according to the requirements of A.R.S. § 49-232 and submit the 303(d) List according to section 303(d) of the Clean Water Act.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-605. Evaluating A Surface Water or Segment For Listing and Delisting

- A.** The Department shall compile and evaluate all reasonably current, credible, and scientifically defensible data to determine whether a surface water or segment is impaired or not attaining.
- B. Weight-of-evidence approach.**
1. The Department shall consider the following concepts when evaluating data:
 - a. Data or information collected during critical conditions may be considered separately from the complete dataset, when the data show that the surface water or segment is impaired or not attaining its designated use during those critical conditions, but attaining its uses during other periods. Critical conditions may include stream flow, seasonal periods, weather conditions, or anthropogenic activities;
 - b. Whether the data indicate that the impairment is due to persistent, seasonal, or recurring conditions. If the data do not represent persistent, recurring, or seasonal conditions, the Department may place the surface water or segment on the Planning List;
 - c. Higher quality data over lower quality data when making a listing decision. Data quality is established by the reliability, precision, accuracy, and represen-

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

tativeness of the data, based on factors identified in R18-11-602(A) and (B), including monitoring methods, analytical methods, quality control procedures, and the documented field and laboratory quality control information submitted with the data. The Department shall consider the following factors when determining higher quality data:

- i. The age of the measurements. Newer measurements are weighted heavier than older measurements, unless the older measurements are more representative of critical flow conditions;
 - ii. Whether the data provide a direct measure of an impact on a designated use. Direct measurements are weighted heavier than measurements of an indicator or surrogate parameter; or
 - iii. The amount or frequency of the measurements. More frequent data collection are weighted heavier than nominal datasets.
2. The Department shall evaluate the following factors to determine if the water quality evidence supports a finding that the surface water or segment is impaired or not attaining:
- a. An exceedance of a numeric surface water quality standard based on the criteria in subsections (C)(1), (C)(2), (D)(1), and (D)(2);
 - b. An exceedance of a narrative surface water quality standard based on the criteria in subsections (C)(3) and (D)(3);
 - c. Additional information that determines whether a water quality standard is exceeded due to a pollutant, suspected pollutant, or naturally occurring condition:
 - i. Soil type, geology, hydrology, flow regime, biological community, geomorphology, climate, natural process, and anthropogenic influence in the watershed;
 - ii. The characteristics of the pollutant, such as its solubility in water, bioaccumulation potential, sediment sorption potential, or degradation characteristics, to assist in determining which data more accurately indicate the pollutant's presence and potential for causing impairment; and
 - iii. Available evidence of direct or toxic impacts on aquatic life, wildlife, or human health, such as fish kills and beach closures, where there is sufficient evidence that these impacts occurred due to water quality conditions in the surface water.
 - d. Other available water quality information, such as NPDES or AZPDES water quality discharge data, as applicable.
 - e. If the Department determines that a surface water or segment does not merit listing under numeric water

quality standards based on criteria in subsections (C)(1), (C)(2), (D)(1), or (D)(2) for a pollutant, but there is evidence of a narrative standard exceedance in that surface water or segment under subsection (D)(3) as a result of the presence of the same pollutant, the Department shall list the surface water or segment as impaired only when the evidence indicates that the numeric water quality standard is insufficient to protect the designated use of the surface water or segment and the Department justifies the listing based on any of the following:

- i. The narrative standard data provide a more direct indication of impairment as supported by professionally prepared and peer-reviewed publications;
 - ii. Sufficient evidence of impairment exists due to synergistic effects of pollutant combinations or site-specific environmental factors; or
 - iii. The pollutant is bioaccumulative, relatively insoluble in water, or has other characteristics that indicate it is occurring in the specific surface water or segment at levels below the laboratory detection limits, but at levels sufficient to result in an impairment.
3. The Department may consider a single line of water quality evidence when the evidence is sufficient to demonstrate that the surface water or segment is impaired or not attaining.

C. Planning List.

- 1. When evaluating a surface water or segment for placement on the Planning List.
 - a. Consider at least ten spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the Planning List following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 1, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 80 percent confidence level using a binomial distribution for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 1, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 80 percent.

Table 1. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |
| From | To | | From | To | | From | To | |

| 92 | 100 | 13 | 265 | 273 | 32 | 443 | 451 | 51 |
| 101 | 109 | 14 | 274 | 282 | 33 | 452 | 461 | 52 |
| 110 | 118 | 15 | 283 | 292 | 34 | 462 | 470 | 53 |
| 119 | 126 | 16 | 293 | 301 | 35 | 471 | 480 | 54 |
| 127 | 136 | 17 | 302 | 310 | 36 | 481 | 489 | 55 |
| 137 | 145 | 18 | 311 | 320 | 37 | 490 | 499 | 56 |
| 146 | 154 | 19 | 321 | 329 | 38 | 500 | | 57 |
| 155 | 163 | 20 | 330 | 338 | 39 | | | |
| 164 | 172 | 21 | 339 | 348 | 40 | | | |

2. When there are less than ten samples, the Department shall place a surface water or segment on the Planning List following subsection (B), if three or more temporally independent samples exceed the following surface water quality standards:
 - a. The surface water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 1, except for nitrate or nitrate/nitrite;
 - b. The surface water quality standard for temperature or the single sample maximum water quality standard for suspended sediment concentration, nitrogen, and phosphorus in R18-11-109;
 - c. The surface water quality standard for radiochemicals in R18-11-109(G);
 - d. The surface water quality standard for dissolved oxygen under R18-11-109(E);
 - e. The surface water quality standard for pH under R18-11-109(B); or
 - f. The following surface water quality standards in R18-11-112:
 - i. Single sample maximum standards for nitrogen and phosphorus,
 - ii. All metals except chromium, or
 - iii. Turbidity.
3. The Department shall place a surface water or segment on the Planning List if information in subsections (B)(2)(c), (B)(2)(d), and (B)(2)(e) indicates that a narrative water

quality standard violation exists, but no narrative implementation procedure required under A.R.S. § 49-232(F) exists to support use of the information for listing.

- D. 303(d) List.
 1. When evaluating a surface water or segment for placement on the 303(d) List.
 - a. Consider at least 20 spatially or temporally independent samples collected over three or more temporally independent sampling events; and
 - b. Determine numeric water quality standards exceedances. The Department shall:
 - i. Place a surface water or segment on the 303(d) List, following subsection (B), if the number of exceedances of a surface water quality standard is greater than or equal to the number listed in Table 2, which provides the number of exceedances that indicate a minimum of a 10 percent exceedance frequency with a minimum of a 90 percent confidence level using a binomial distribution, for a given sample size; or
 - ii. For sample datasets exceeding those shown in Table 2, calculate the number of exceedances using the following equation: $(X \geq x | n, p)$ where n = number of samples; p = exceedance probability of 0.1; x = smallest number of exceedances required for listing with “ n ” samples; and confidence level \geq 90 percent.

Table 2. Minimum Number of Samples Exceeding the Numeric Standard

| MINIMUM NUMBER OF SAMPLES EXCEEDING THE NUMERIC STANDARD | | | | | | | | |
|--|----|--------------------------------------|-------------------|-----|--------------------------------------|-------------------|-----|--------------------------------------|
| Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard | Number of Samples | | Number of Samples Exceeding Standard |

| 122 | 130 | 18 | 289 | 297 | 37 | 462 | 470 | 56 |
| 131 | 138 | 19 | 298 | 306 | 38 | 471 | 479 | 57 |
| 139 | 147 | 20 | 307 | 315 | 39 | 480 | 489 | 58 |
| 148 | 156 | 21 | 316 | 324 | 40 | 490 | 498 | 59 |
| 157 | 164 | 22 | 325 | 333 | 41 | 499 | 500 | 60 |
| 165 | 173 | 23 | 334 | 343 | 42 | | | |

2. The Department shall place a surface water or segment on the 303(d) List, following subsection (B) without the required number of samples or numeric water quality standard exceedances under subsection (D)(1), if either the following conditions occur:
 - a. More than one temporally independent sample in any consecutive three-year period exceeds the surface water quality standard in:
 - i. The acute water quality standard for a pollutant listed in 18 A.A.C. 11, Article 1, Appendix A, Table 2 and the acute water quality standards in R18-11-112;
 - ii. The surface water quality standard for nitrate or nitrate/nitrite in 18 A.A.C. 11, Article 1, Appendix A, Table 1; or
 - iii. The single sample maximum water quality standard for bacteria in subsections R18-11-109(A).
 - b. More than one exceedance of an annual mean, 90th percentile, aquatic and wildlife chronic water quality standard, or a bacteria 30-day geometric mean water quality standard occurs, as specified in R18-11-109, R18-11-110, R18-11-112, or 18 A.A.C. 11, Article 1, Appendix A, Table 2.
 3. Narrative water quality standards exceedances. The Department shall place a surface water or segment on the Planning List if the listing requirements are met under A.R.S. § 49-232(F).
- E. Removing a surface water, segment, or pollutant from the Planning List or the 303(d) List.**
1. Planning List. The Department shall remove a surface water, segment, or pollutant from the Planning List when:
 - a. Monitoring activities indicate that:
 - i. There is sufficient credible data to determine that the surface water or segment is impaired under subsection (D), in which case the Department shall place the surface water or segment on the 303(d) List. This includes surface waters with an EPA approved TMDL when the Department determines that the TMDL strategy is insufficient for the surface water or segment to attain water quality standards; or
 - ii. There is sufficient credible data to determine that the surface water or segment is attaining all designated uses and standards.
 - b. All pollutants for the surface water or segment are delisted.
 2. 303(d) List. The Department shall:
 - a. Remove a pollutant from a surface water or segment from the 303(d) List based on one or more of the following criteria:
 - i. The Department developed, and EPA approved, a TMDL for the pollutant;
 - ii. The data used for previously listing the surface water or segment under R18-11-605(D) is superseded by more recent credible and scientifically defensible data meeting the requirements of R18-11-602, showing that the surface water or segment meets the applicable numeric or narrative surface water quality standard. When evaluating data to remove a pollutant from the 303(d) List, the monitoring entity shall collect the more recent data under similar hydrologic or climatic conditions as occurred when the samples were taken that indicated impairment, if those conditions still exist;
 - iii. The surface water or segment no longer meets the criteria for impairment based on a change in the applicable surface water quality standard or a designated use approved by EPA under section 303(c)(1) of the Clean Water Act;
 - iv. The surface water or segment no longer meets the criteria for impairment for the specific narrative water quality standard based on a change in narrative water quality standard implementation procedures;
 - v. A re-evaluation of the data indicate that the surface water or segment does not meet the criteria for impairment because of a deficiency in the original analysis; or
 - vi. Pollutant loadings from naturally occurring conditions alone are sufficient to cause a violation of applicable water quality standards;
 - b. Remove a surface water, segment, or pollutant from the 303(d) List, based on criteria that are no more stringent than the listing criteria under subsection (D);
 - c. Remove a surface water or segment from the 303(d) List if all pollutants for the surface water or segment are removed from the list;
 - d. Remove a surface water, segment, or pollutant, from the 303(d) List and place it on the Planning List, if:
 - i. The surface water, segment or pollutant was on the 1998 303(d) List and the dataset used in the original listing does not meet the credible data requirements under R18-11-602, or contains insufficient samples to meet the data requirements under subsection (D); or

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- ii. The monitoring data indicate that the impairment is due to pollution, but not a pollutant.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

R18-11-606. TMDL Priority Criteria for 303(d) Listed Surface Waters or Segments

- A. In addition to the factors specified in A.R.S. § 49-233(C), the Department shall consider the following when prioritizing an impaired water for development of TMDLs:
 - 1. A change in a water quality standard;
 - 2. The date the surface water or segment was added to the 303(d) List;
 - 3. The presence in a surface water or segment of species listed as threatened or endangered under section 4 of the Endangered Species Act;
 - 4. The complexity of the TMDL;
 - 5. State, federal, and tribal policies and priorities; and
 - 6. The efficiencies of coordinating TMDL development with the Department's surface water monitoring program, the watershed monitoring rotation, or with remedial programs.
- B. The Department shall prioritize an impaired surface water or segment for TMDL development based on the factors specified in A.R.S. § 49-233(C) and subsection (A) as follows:
 - 1. Consider an impaired surface water or segment a high priority if:
 - a. The listed pollutant poses a substantial threat to the health and safety of humans, aquatic life, or wildlife based on:
 - i. The number and type of designated uses impaired;
 - ii. The type and extent of risk from the impairment to human health, aquatic life, or wildlife;
 - iii. The pollutant causing the impairment, or
 - iv. The severity, magnitude, and duration the surface water quality standard was exceeded;
 - b. A new or modified individual NPDES or AZPDES permit is sought for a new or modified discharge to the impaired water;
 - c. The listed surface water or segment is listed as a unique water in A.A.C. R18-11-112 or is part of an area classified as a "wilderness area," "wild and scenic river," or other federal or state special protection of the water resource;
 - d. The listed surface water or segment contains a species listed as threatened or endangered under the federal Endangered Species Act and the presence of the pollutant in the surface water or segment is likely to jeopardize the listed species;
 - e. A delay in conducting the TMDL could jeopardize the Department's ability to gather sufficient credible data necessary to develop the TMDL;
 - f. There is significant public interest and support for the development of a TMDL;
 - g. The surface water or segment has important recreational and economic significance to the public; or
 - h. The pollutant is listed for eight years or more.
 - 2. Consider an impaired surface water or segment a medium priority if:
 - a. The surface water or segment fails to meet more than one designated use;
 - b. The pollutant exceeds more than one surface water quality standard;
 - c. A surface water quality standard exceedance is correlated to seasonal conditions caused by natural events, such as storms, weather patterns, or lake turnover;
 - d. It will take more than two years for proposed actions in the watershed to result in the surface water attaining applicable water quality standards;
 - e. The type of pollutant and other factors relating to the surface water or segment make the TMDL complex; or
 - f. The administrative needs of the Department, including TMDL schedule commitments with EPA, permitting requirements, or basin priorities that require completion of the TMDL.
 - 3. Consider an impaired surface water or segment a low priority if:
 - a. The Department has formally submitted a proposal to delist the surface water, segment, or pollutant to EPA based on R18-11-605(E)(2). If the Department makes the submission outside the listing process cycle, the change in priority ranking will not be effective until EPA approves the submittal;
 - b. The Department has modified, or formally proposed for modification, the designated use or applicable surface water quality standard, resulting in an impaired water no longer being impaired, but the modification has not been approved by EPA;
 - c. The surface water or segment is expected to attain surface water quality standards due to any of the following:
 - i. Recently instituted treatment levels or best management practices in the drainage area,
 - ii. Discharges or activities related to the impairment have ceased, or
 - iii. Actions have been taken and controls are in place or scheduled for implementation that will likely to bring the surface water back into compliance;
 - d. The surface water or segment is ephemeral or intermittent. The Department shall re-prioritize the surface water or segment if the presence of the pollutant in the listed water poses a threat to the health and safety of humans, aquatic life, or wildlife using the water, or the pollutant is contributing to the impairment of a downstream perennial surface water or segment;
 - e. The pollutant poses a low ecological and human health risk;
 - f. Insufficient data exist to determine the source of the pollutant load;
 - g. The uncertainty of timely coordination with national and international entities concerning international waters;
 - h. Naturally occurring conditions are a major contributor to the impairment; and
 - i. No documentation or effective analytical tools exist to develop a TMDL for the surface water or segment with reasonable accuracy.
- C. The Department will target surface waters with high priority factors in subsections (B)(1)(a) through (B)(1)(d) for initiation of TMDLs within two years following EPA approval of the 303(d) List.

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS

- D. The Department may shift priority ranking of a surface water or segment for any of the following reasons:
1. A change in federal, state, or tribal policies or priorities that affect resources to complete a TMDL;
 2. Resource efficiencies for coordinating TMDL development with other monitoring activities, including the Department's ambient monitoring program that monitors watersheds on a five-year rotational basis;
 3. Resource efficiencies for coordinating TMDL development with Department remedial or compliance programs;
 4. New information is obtained that will revise whether the surface water or segment is a high priority based on factors in subsection (B); and
 5. Reduction or increase in staff or budget involved in the TMDL development.
- E. The Department may complete a TMDL initiated before July 12, 2002 for a surface water or segment that was listed as impaired on the 1998 303(d) List but does not qualify for listing under the criteria in R18-11-605, if:
1. The TMDL investigation establishes that the water quality standard is not being met and the allocation of loads is expected to bring the surface water into compliance with standards,
 2. The Department estimates that more than 50 percent of the cost of completing the TMDL has been spent,
 3. There is community involvement and interest in completing the TMDL, or
 4. The TMDL is included within an EPA-approved state workplan initiated before July 12, 2002.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3380, effective July 12, 2002 (Supp. 02-3).

49-104. Powers and duties of the department and director

A. The department shall:

1. Formulate policies, plans and programs to implement this title to protect the environment.
2. Stimulate and encourage all local, state, regional and federal governmental agencies and all private persons and enterprises that have similar and related objectives and purposes, cooperate with those agencies, persons and enterprises and correlate department plans, programs and operations with those of the agencies, persons and enterprises.
3. Conduct research on its own initiative or at the request of the governor, the legislature or state or local agencies pertaining to any department objectives.
4. Provide information and advice on request of any local, state or federal agencies and private persons and business enterprises on matters within the scope of the department.
5. Consult with and make recommendations to the governor and the legislature on all matters concerning department objectives.
6. Promote and coordinate the management of air resources to ensure their protection, enhancement and balanced utilization consistent with the environmental policy of this state.
7. Promote and coordinate the protection and enhancement of the quality of water resources consistent with the environmental policy of this state.
8. Encourage industrial, commercial, residential and community development that maximizes environmental benefits and minimizes the effects of less desirable environmental conditions.
9. Ensure the preservation and enhancement of natural beauty and man-made scenic qualities.
10. Provide for the prevention and abatement of all water and air pollution including that related to particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids in accordance with article 3 of this chapter and chapters 2 and 3 of this title.
11. Promote and recommend methods for the recovery, recycling and reuse or, if recycling is not possible, the disposal of solid wastes consistent with sound health, scenic and environmental quality policies. The department shall report annually on its revenues and expenditures relating to the solid and hazardous waste programs overseen or administered by the department.
12. Prevent pollution through regulating the storage, handling and transportation of solids, liquids and gases that may cause or contribute to pollution.
13. Promote the restoration and reclamation of degraded or despoiled areas and natural resources.
14. Participate in the state civil defense program and develop the necessary organization and facilities to meet wartime or other disasters.
15. Cooperate with the Arizona-Mexico commission in the governor's office and with researchers at universities in this state to collect data and conduct projects in the United States and Mexico on issues that are within the scope of the department's duties and that relate to quality of life, trade and economic development in this state in a manner that will help the Arizona-Mexico commission to assess and enhance the economic competitiveness of this state and of the Arizona-Mexico region.
16. Unless specifically authorized by the legislature, ensure that state laws, rules, standards, permits, variances and orders are adopted and construed to be consistent with and not more stringent than the corresponding federal law that addresses the same subject matter. This paragraph does not adversely affect standards adopted by an Indian tribe under federal law.
17. Provide administrative and staff support for the oil and gas conservation commission.

B. The department, through the director, shall:

1. Contract for the services of outside advisers, consultants and aides reasonably necessary or desirable to enable the department to adequately perform its duties.
2. Contract and incur obligations reasonably necessary or desirable within the general scope of department activities and operations to enable the department to adequately perform its duties.
3. Use any medium of communication, publication and exhibition when disseminating information, advertising and publicity in any field of its purposes, objectives or duties.
4. Adopt procedural rules that are necessary to implement the authority granted under this title but that are not inconsistent with other provisions of this title.
5. Contract with other agencies, including laboratories, in furthering any department program.
6. Use monies, facilities or services to provide matching contributions under federal or other programs that further the objectives and programs of the department.
7. Accept gifts, grants, matching monies or direct payments from public or private agencies or private persons and enterprises for department services and publications and to conduct programs that are consistent with the general purposes and objectives of this chapter. Monies received pursuant to this paragraph shall be deposited in the department fund corresponding to the service, publication or program provided.
8. Provide for the examination of any premises if the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed on the premises. The director shall give the owner or operator the opportunity for its representative to accompany the director on an examination of those premises. Within forty-five days after the date of the examination, the department shall provide to the owner or operator a copy of any report produced as a result of any examination of the premises.
9. Supervise sanitary engineering facilities and projects in this state, authority for which is vested in the department, and own or lease land on which sanitary engineering facilities are located, and operate the facilities, if the director determines that owning, leasing or operating is necessary for the public health, safety or welfare.

10. Adopt and enforce rules relating to approving design documents for constructing, improving and operating sanitary engineering and other facilities for disposing of solid, liquid or gaseous deleterious matter.

11. Define and prescribe reasonably necessary rules regarding the water supply, sewage disposal and garbage collection and disposal for subdivisions. The rules shall:

(a) Provide for minimum sanitary facilities to be installed in the subdivision and may require that water systems plan for future needs and be of adequate size and capacity to deliver specified minimum quantities of drinking water and to treat all sewage.

(b) Provide that the design documents showing or describing the water supply, sewage disposal and garbage collection facilities be submitted with a fee to the department for review and that no lots in any subdivision be offered for sale before compliance with the standards and rules has been demonstrated by approval of the design documents by the department.

12. Prescribe reasonably necessary measures to prevent pollution of water used in public or semipublic swimming pools and bathing places and to prevent deleterious conditions at those places. The rules shall prescribe minimum standards for the design of and for sanitary conditions at any public or semipublic swimming pool or bathing place and provide for abatement as public nuisances of premises and facilities that do not comply with the minimum standards. The rules shall be developed in cooperation with the director of the department of health services and shall be consistent with the rules adopted by the director of the department of health services pursuant to section 36-136, subsection I, paragraph 10.

13. Prescribe reasonable rules regarding sewage collection, treatment, disposal and reclamation systems to prevent the transmission of sewage borne or insect borne diseases. The rules shall:

(a) Prescribe minimum standards for the design of sewage collection systems and treatment, disposal and reclamation systems and for operating the systems.

(b) Provide for inspecting the premises, systems and installations and for abating as a public nuisance any collection system, process, treatment plant, disposal system or reclamation system that does not comply with the minimum standards.

(c) Require that design documents for all sewage collection systems, sewage collection system extensions, treatment plants, processes, devices, equipment, disposal systems, on-site wastewater treatment facilities and reclamation systems be submitted with a fee for review to the department and may require that the design documents anticipate and provide for future sewage treatment needs.

(d) Require that construction, reconstruction, installation or initiation of any sewage collection system, sewage collection system extension, treatment plant, process, device, equipment, disposal system, on-site wastewater treatment facility or reclamation system conform with applicable requirements.

14. Prescribe reasonably necessary rules regarding excreta storage, handling, treatment, transportation and disposal. The rules may:

(a) Prescribe minimum standards for human excreta storage, handling, treatment, transportation and disposal and shall provide for inspection of premises, processes and vehicles and for abating as public nuisances any premises, processes or vehicles that do not comply with the minimum standards.

(b) Provide that vehicles transporting human excreta from privies, septic tanks, cesspools and other treatment processes be licensed by the department subject to compliance with the rules. The department may require payment of a fee as a condition of licensure. The department shall establish by rule a fee as a condition of licensure, including a maximum fee. The fees shall be deposited, pursuant to sections 35-146 and 35-147, in the solid waste fee fund established by section 49-881.

15. Perform the responsibilities of implementing and maintaining a data automation management system to support the reporting requirements of title III of the superfund amendments and reauthorization act of 1986 (P.L. 99-499) and article 2 of this chapter.

16. Approve remediation levels pursuant to article 4 of this chapter.

17. Establish or revise fees by rule pursuant to the authority granted under title 44, chapter 9, articles 8 and 9 and chapters 4 and 5 of this title for the department to adequately perform its duties. All fees shall be fairly assessed and impose the least burden and cost to the parties subject to the fees. In establishing or revising fees, the department shall base the fees on the direct and indirect costs of the department's relevant duties, including employee salaries and benefits, professional and outside services, equipment, in-state travel and other necessary operational expenses directly related to issuing licenses as defined in title 41, chapter 6 and enforcing the requirements of the applicable regulatory program.

18. Appoint a person with a background in oil and gas conservation to act on behalf of the oil and gas conservation commission and administer and enforce the applicable provisions of title 27, chapter 4 relating to the oil and gas conservation commission.

C. The department may:

1. Charge fees to cover the costs of all permits and inspections it performs to ensure compliance with rules adopted under section 49-203 except that state agencies are exempt from paying the fees.

2. Monies collected pursuant to this subsection shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210.

3. Contract with private consultants for the purposes of assisting the department in reviewing applications for licenses, permits or other authorizations to determine whether an applicant meets the criteria for issuance of the license, permit or other authorization. If the department contracts with a consultant under this paragraph, an applicant may request that the department expedite the application review by requesting that the department use the services of the consultant and by agreeing to pay the department the costs of the consultant's services. Notwithstanding any other law, monies paid by applicants for expedited reviews pursuant to this paragraph are appropriated to the department for use in paying consultants for services.

D. The director may:

1. If the director has reasonable cause to believe that a violation of any environmental law or rule exists or is being committed, inspect any person or property in transit through this state and any vehicle in which the person or property is being transported and detain or disinfect the person, property or vehicle as reasonably necessary to protect the environment if a violation exists.

2. Authorize in writing any qualified officer or employee in the department to perform any act that the director is authorized or required to do by law.

49-203. Powers and duties of the director and department

A. The director shall:

1. Adopt, by rule, water quality standards in the form and subject to the considerations prescribed by article 2 of this chapter.
2. Adopt, by rule, a permit program for WOTUS that is consistent with but not more stringent than the requirements of the clean water act for the point source discharge of any pollutant or combination of pollutants into WOTUS. The program and the rules shall be sufficient to enable this state to administer the permit program identified in section 402(b) of the clean water act, including the sewage sludge requirements of section 405 of the clean water act and as prescribed by article 3.1 of this chapter.
3. Apply the program and rules authorized under paragraph 2 of this subsection to point source discharges to non-WOTUS protected surface waters, consistent with section 49-255.04, which establishes the program components and rules that do not apply to non-WOTUS protected surface waters. The following are exempt from the non-WOTUS protected surface waters point source discharge program:
 - (a) Discharges to a non-WOTUS protected surface water incidental to a recharge project.
 - (b) Established or ongoing farming, ranching and silviculture activities such as plowing, seeding, cultivating, minor drainage or harvesting for the production of food, fiber or forest products or upland soil and water conservation practices.
 - (c) Maintenance but not construction of drainage ditches.
 - (d) Construction and maintenance of irrigation ditches.
 - (e) Maintenance of structures such as dams, dikes and levees.
4. Adopt, by rule, a program to control nonpoint source discharges of any pollutant or combination of pollutants into WOTUS.
5. Adopt, by rule, an aquifer protection permit program to control discharges of any pollutant or combination of pollutants that are reaching or may with a reasonable probability reach an aquifer. The permit program shall be as prescribed by article 3 of this chapter.
6. Adopt, by rule, the permit program for underground injection control described in the safe drinking water act.
7. Adopt, by rule, technical standards for conveyances of reclaimed water and a permit program for the direct reuse of reclaimed water.
8. Adopt, by rule or as permit conditions, discharge limitations, best management practice standards, new source performance standards, toxic and pretreatment standards and other standards and conditions as reasonable and necessary to carry out the permit programs and regulatory duties described in paragraphs 2 through 6 of this subsection.
9. Assess and collect fees to revoke, issue, deny, modify or suspend permits issued pursuant to this chapter and to process permit applications. The director may also assess and collect costs reasonably necessary if the director must conduct sampling or monitoring relating to a facility because the owner or operator of the facility has refused or failed to do so on order by the director. The director shall set fees that are reasonably related to the department's costs of providing the service for which the fee is charged. Monies collected from aquifer protection permit fees and from Arizona pollutant discharge elimination system permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. Monies from other permit fees shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund unless otherwise provided by law. Monies paid by an applicant for review by consultants for the department pursuant to section 49-241.02, subsection B shall be deposited, pursuant to sections 35-146 and 35-147, in the water quality fee fund established by section 49-210. State agencies are exempt from all fees imposed pursuant to this chapter.
10. Adopt, modify, repeal and enforce other rules that are reasonably necessary to carry out the director's functions under this chapter.
11. Require monitoring at an appropriate point of compliance for any organic or inorganic pollutant listed under section 49-243, subsection I if the director has reason to suspect the presence of the pollutant in a discharge.
12. Adopt rules establishing what constitutes a significant increase or adverse alteration in the characteristics or volume of pollutants discharged for purposes of determining what constitutes a major modification to an existing facility under the definition of new facility pursuant to section 49-201. Before adopting these rules, the director shall determine whether a change at a particular facility results in a significant increase or adverse alteration in the characteristics or volume of pollutants discharged on a case-by-case basis, taking into account site conditions and operational factors.
13. Consider evidence gathered by the Arizona navigable stream adjudication commission established by section 37-1121 when deciding whether a permit is required to discharge pursuant to article 3.1 of this chapter.

B. The director may:

1. On presentation of credentials, enter into, on or through any public or private property from which a discharge has occurred, is occurring or may occur or on which any disposal, land application of sludge or treatment regulated by this chapter has occurred, is occurring or may be occurring and any public or private property where records relating to a discharge or records that are otherwise required to be maintained as prescribed by this chapter are kept, as reasonably necessary to ensure compliance with this chapter. The director or a department employee may take samples, inspect and copy records required to be maintained pursuant to this chapter, inspect equipment, activities, facilities and monitoring equipment or methods of monitoring, take photographs and take other action reasonably necessary to determine the application of, or compliance with, this chapter. The owner or managing agent of the property shall be afforded the opportunity to accompany the director or department employee during inspections and investigations, but prior notice of entry to the owner or managing agent is not required if reasonable grounds exist to believe that notice would frustrate the enforcement of this chapter. If the director or department employee obtains any samples before leaving the premises, the director or department employee shall give the owner or managing agent a receipt describing the samples obtained and a portion of each sample equal in volume or weight to the portion retained. If an analysis is made of samples, or monitoring and testing are performed, a copy of the results shall be furnished promptly to the owner or managing agent.
2. Require any person who has discharged, is discharging or may discharge into the waters of the state under article 3, 3.1 or 3.3 of this chapter and any person who is subject to pretreatment standards and requirements or sewage sludge use or disposal requirements under article 3.1 of this chapter to collect samples, to establish and maintain records, including photographs, and to install, use and maintain sampling and monitoring equipment to determine the absence or presence and nature of the discharge or indirect discharge or sewage sludge use or disposal.

3. Administer state or federal grants, including grants to political subdivisions of this state, for the construction and installation of publicly and privately owned pollutant treatment works and pollutant control devices and establish grant application priorities.

4. Develop, implement and administer a water quality planning process, including a ranking system for applicant eligibility, wherein appropriated state monies and available federal monies are awarded to political subdivisions of this state to support or assist regional water quality planning programs and activities.

5. Enter into contracts and agreements with the federal government to implement federal environmental statutes and programs.

6. Enter into intergovernmental agreements pursuant to title 11, chapter 7, article 3 if the agreement is necessary to more effectively administer the powers and duties described in this chapter.

7. Participate in, conduct and contract for studies, investigations, research and demonstrations relating to the causes, minimization, prevention, correction, abatement, mitigation, elimination, control and remedy of discharges and collect and disseminate information relating to discharges.

8. File bonds or other security as required by a court in any enforcement actions under article 4 of this chapter.

C. Subject to section 38-503 and other applicable statutes and rules, the department may contract with a private consultant to assist the department in reviewing aquifer protection permit applications and on-site wastewater treatment facilities to determine whether a facility meets the criteria and requirements of this chapter and the rules adopted by the director. Except as provided in section 49-241.02, subsection B, the department shall not use a private consultant if the fee charged for that service would be greater than the fee the department would charge to provide that service. The department shall pay the consultant for the services rendered by the consultant from fees paid by the applicant or facility to the department pursuant to subsection A, paragraph 9 of this section.

D. The director shall integrate all of the programs authorized in this section and other programs affording water quality protection that are administered by the department for purposes of administration and enforcement and shall avoid duplication and dual permitting to the maximum extent practicable.

[49-221. Water quality standards in general; protected surface waters list](#)

A. The director shall:

1. Adopt, by rule, water quality standards for all WOTUS and for all waters in all aquifers to preserve and protect the quality of those waters for all present and reasonably foreseeable future uses. For non-WOTUS protected surface waters, the director shall apply surface water quality standards established as of January 1, 2021, until specifically changed by the director pursuant to paragraph 2 of this subsection. Rules regarding the following shall not be adopted or applied as water quality standards for non-WOTUS protected surface waters:

- (a) Antidegradation.
- (b) Antidegradation criteria.
- (c) Outstanding Arizona waters.

2. Adopt, by rule, water quality standards for non-WOTUS protected surface waters, by December 31, 2022, consistent with paragraph 1 of this subsection and as determined necessary in the rulemaking process. In adopting those standards, the director shall consider the unique characteristics of this state's surface waters and the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

B. The director may adopt, by rule, water quality standards for waters of the state other than those described in subsection A of this section, including standards for the use of water pumped from an aquifer that does not meet the standards adopted pursuant to section 49-223, subsections A and B and that is put to a beneficial use other than drinking water. These standards may include standards for the use of water pumped as part of a remedial action. In adopting such standards, the director shall consider the economic, social and environmental costs and benefits that would result from the adoption of a water quality standard at a particular level or for a particular water category.

C. In setting standards pursuant to subsection A or B of this section, the director shall consider the following:

- 1. The protection of the public health and the environment.
- 2. The uses that have been made, are being made or with reasonable probability may be made of these waters.
- 3. The provisions and requirements of the clean water act and safe drinking water act and the regulations adopted pursuant to those acts.
- 4. The degree to which standards for one category of waters could cause violations of standards for other, hydrologically connected, water categories.
- 5. Guidelines, action levels or numerical criteria adopted or recommended by the United States environmental protection agency or any other federal agency.
- 6. Any unique physical, biological or chemical properties of the waters.

D. Water quality standards shall be expressed in terms of the uses to be protected and, if adequate information exists to do so, numerical limitations or parameters, in addition to any narrative standards that the director deems appropriate.

E. The director may adopt by rule water quality standards for the direct reuse of reclaimed water. In establishing these standards, the director shall consider the following:

- 1. The protection of public health and the environment.
- 2. The uses that are being made or may be made of the reclaimed water.
- 3. The degree to which standards for the direct reuse of reclaimed water may cause violations of water quality standards for other hydrologically connected water categories.

F. If the director proposes to adopt water quality standards for agricultural water, the director shall consult, cooperate, collaborate and, if necessary, enter into interagency agreements and memoranda of understanding with the Arizona department of agriculture relating to its administration pursuant to title 3, chapter 3, article 4.1 of this state's authority relating to agricultural water under the United States food and drug administration produce safety rule (21 Code of Federal Regulations part 112, subpart E) and any other federal produce safety regulation, order or guideline or other requirement adopted pursuant to the FDA food safety modernization act (P.L. 111-353; 21 United States Code sections 2201 through 2252). For the purposes of this subsection:

1. "Agricultural water":

(a) Means water that is used in a covered activity on produce where water is intended to, or is likely to, contact produce or food contact surfaces.

(b) Includes all of the following:

- (i) Water used in growing activities, including irrigation water, water used for preparing crop sprays and water used for growing sprouts.
- (ii) Water used in harvesting, packing and holding activities, including water used for washing or cooling harvested produce and water used for preventing dehydration of produce.

2. "Covered activity" means growing, harvesting, packing or holding produce. Covered activity includes processing produce to the extent that the activity is within the meaning of farm as defined in section 3-525.

3. "Harvesting" has the same meaning prescribed in section 3-525.

4. "Holding" has the same meaning prescribed in section 3-525.

5. "Packing" has the same meaning prescribed in section 3-525.

6. "Produce" has the same meaning prescribed in section 3-525.

G. The director shall maintain and publish a protected surface waters list. The department shall publish the initial list on the department's website and in the Arizona administrative register within thirty days after September 29, 2021. Not later than December 31, 2022, the department shall adopt by rule the protected surface waters list, including procedures for determining economic, social and environmental costs and benefits. Publication of the list in the Arizona administrative register is an appealable agency action pursuant to title 41, chapter 6, article 10 and may be appealed by any party that provides evidence of an actual adverse effect that the party appealing the decision would suffer as a result of the director's decision. All of the following apply to the protected surface water list:

1. The protected surface waters list shall include:

(a) All WOTUS.

(b) Any perennial, intermittent and ephemeral reaches and any impoundments of the following rivers, not including tributaries or reaches of waters wholly within tribal jurisdiction or reaches of waters outside of the United States:

(i) The Bill Williams river, from the confluence of the Big Sandy and Santa Maria rivers at 113°31'38.617"w, 34°18'22.373"n, to its confluence with the Colorado river at 114°8'9.854"w, 34°18'9.33"n.

(ii) The Colorado river, from the Arizona-Utah border at 111°32'35.741"w, 36°58'51.698"n, to the Arizona-Mexico border at 114°43'12.564"w, 32°43'6.218"n.

(iii) The Gila river, from the Arizona-New Mexico border at 109°2'52.8"w, 32°41'11.2015"n, to the confluence with the Colorado river at 114°33'28.145"w, 32°43'14.408"n.

(iv) The Little Colorado river, from the confluence of the east and west forks of the Little Colorado river at 109°28'7.131"w, 33°59'39.852"n, to its confluence with the Colorado river at 111°49'4.693"w, 36°12'10.243"n.

(v) The Salt river, from the confluence of the Black and White rivers at 110°13'39.5"w, 33°44'6.082"n, to the confluence with the Gila river at 112°18'5.704"w, 33°22'42.978"n.

(vi) The San Pedro river, from the Arizona-Mexico border at 110°9'1.704"w, 31°20'2.387"n, to the confluence with the Gila river at 110°47'0.905"w, 32°59'5.671"n.

(vii) The Santa Cruz river, from its origins in the Canelo Hills of southeastern Arizona at 110°37'3.968"w, 31°27'39.21"n, to its confluence with the Gila river at 111°33'26.02"w, 32°41'39.058"n.

(viii) The Verde river, from Sullivan lake at 112°28'10.588"w, 34°52'11.136"n, to its confluence with the Salt river at 111°39'48.32"w, 33°33'20.538"n.

(c) Any non-WOTUS waters of the state that are added under paragraphs 3 and 4 of this subsection.

2. Notwithstanding paragraph 1 of this subsection, the protected surface waters list shall not contain any of the following non-WOTUS waters:

(a) Canals in the Yuma project and ditches, canals, pipes, impoundments and other facilities that are operated by districts organized under title 48, chapters 18, 19, 20, 21 and 22 and that are not used to directly deliver water for human consumption, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner and operator of the ditch or canal until the owner and operator withdraws its request.

(b) Irrigated areas, including fields flooded for agricultural production.

(c) Ornamental and urban ponds and lakes such as those owned by homeowners' associations and golf courses, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the ornamental or urban pond or lake until the owner withdraws its request.

(d) Swimming pools and other bodies of water that are regulated pursuant to section 49-104, subsection B.

(e) Livestock and wildlife water tanks and aquaculture tanks that are not constructed within a protected surface water.

(f) Stormwater control features.

(g) Groundwater recharge, water reuse and wastewater recycling structures, including underground storage facilities and groundwater savings facilities permitted under title 45, chapter 3.1 and detention and infiltration basins, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the owner of the groundwater recharge, water reuse or wastewater recycling structure until the owner withdraws its request.

(h) Water-filled depressions created as part of mining or construction activities or pits excavated to obtain fill, sand or gravel.

(i) All waste treatment systems components, including constructed wetlands, lagoons and treatment ponds, such as settling or cooling ponds, designed to either convey or retain, concentrate, settle, reduce or remove pollutants, either actively or passively, from wastewater before discharge or to eliminate discharge.

(j) Groundwater.

(k) Ephemeral waters except for those prescribed in paragraph 1, subdivision (b) of this subsection.

(l) Lakes and ponds owned and managed by the United States department of defense and other surface waters located on and that do not leave United States department of defense property, except when added pursuant to paragraph 4 of this subsection and in response to a written request from the United States department of defense until it withdraws its request.

3. Unless listed in paragraph 2 of this subsection, the director shall add the following non-WOTUS surface waters to the protected surface waters list:

(a) All lakes, ponds and reservoirs that are public waters used as a drinking source, for recreational or commercial fish consumption or for water-based recreation such as swimming, wading and boating and other types of recreation in and on the water.

(b) Perennial waters or intermittent waters of the state that are used as a drinking water source, including ditches and canals.

(c) Perennial or intermittent tributaries to the Bill Williams river, the Colorado river, the Gila river, the Little Colorado river, the Salt river, the San Pedro river, the Santa Cruz river and the Verde river.

- (d) Perennial or intermittent public waters used for recreational or commercial fish consumption.
 - (e) Perennial or intermittent public waters used for water-based recreation such as swimming, wading, boating and other types of recreation in and on the water.
 - (f) Perennial or intermittent wetlands adjacent to waters on the protected surface waters list.
 - (g) Perennial or intermittent waters of the state that cross into another state, the Republic of Mexico or the reservation of a federally recognized tribe.
4. The director may add additional non-WOTUS surface waters to the protected surface waters list if all of the following apply:
- (a) The water is not required to be listed under paragraph 1 or 3 of this subsection.
 - (b) The water is not excluded under paragraph 2 of this subsection.
 - (c) The economic, environmental and social benefits of adding the water outweigh the economic, environmental and social costs of excluding the water from the list.
5. The director shall remove any erroneously listed, non-WOTUS waters from the protected surface waters list when the water is excluded under paragraph 2 of this subsection and shall not regulate discharges to those waters in the interim.
6. The director shall remove non-WOTUS waters from the protected surface waters list when the water is not required to be listed under paragraph 3 of this subsection and the economic, environmental and social benefits of removing the water outweigh the economic, environmental and social costs of retaining the water on the list.
7. The director, on an emergency basis, may add a water to the protected surface waters list if the director discovers an imminent and substantial danger to public health or welfare or the environment, if the water would otherwise qualify to be added under paragraph 3 of this subsection. Notwithstanding any other law, the emergency addition shall take effect immediately on the director's determination that describes the imminent and substantial danger in writing. Within thirty days after the director's determination, the department shall publish a notice of that determination in the Arizona administrative register and on the department's website. Waters added under this subsection shall be incorporated into the protected surface waters list during the next rulemaking that follows the addition.

[49-223. Aquifer water quality standards](#)

- A. Primary drinking water maximum contaminant levels established by the administrator before August 13, 1986 are adopted as drinking water aquifer water quality standards. The director may only adopt additional aquifer water quality standards by rule. Within one year after the administrator establishes additional primary drinking water maximum contaminant levels, the director shall open a rule making docket pursuant to section 41-1021 for adoption of those maximum contaminant levels as drinking water aquifer water quality standards. If substantial opposition is demonstrated in the rule making docket regarding a particular constituent, the director may adopt for that constituent the maximum contaminant level as a drinking water aquifer water quality standard upon making a finding that this level is appropriate for adoption in Arizona as an aquifer water quality standard. In making this finding, the director shall consider whether the assumptions about technologies, costs, sampling and analytical methodologies and public health risk reduction used by the administrator in developing and implementing the maximum contaminant level are appropriate for establishing a drinking water aquifer water quality standard. For purposes of this subsection "substantial opposition" means information submitted to the director that explains with reasonable specificity why the maximum contaminant level is not appropriate as an aquifer water quality standard.
- B. The director may adopt by rule numeric drinking water aquifer water quality standards for pollutants for which the administrator has not established primary drinking water maximum contaminant levels or for which a maximum contaminant level has been established but the director has determined it to be inappropriate as an aquifer water quality standard pursuant to subsection A of this section. These standards shall be based on the protection of human health. In establishing numeric drinking water aquifer water quality standards, the director shall rely on technical protocols appropriate for the development of aquifer water quality standards and shall base the standards on credible medical and toxicological evidence that has been subjected to peer review.
- C. Any person may petition the director to adopt a numeric drinking water aquifer quality standard for any pollutant for which no drinking water aquifer quality standard exists. The director shall grant the petition and institute rule making proceedings adopting a numeric standard as provided under subsection B of this section within one hundred eighty days if the petition shows that the pollutant is a toxic pollutant, that the pollutant has been, or may in the future be, detected in any of the state's drinking water aquifers, and that there exists technical information on which a numeric standard might reasonably be based. Within one year of the commencement of the rule making proceeding, the director shall either adopt a numeric standard or make and publish a finding that, pursuant to subsection B of this section, the development of a numeric standard is not possible. The decision to not adopt a numeric standard shall, for purposes of judicial review, be treated in the same manner as a rule adopted pursuant to title 41, chapter 6.
- D. For purposes of assessing compliance with each aquifer water quality standard adopted pursuant to this section, the director shall for purposes of articles 3 and 4 of this chapter, and may for purposes of other provisions of this title, identify sampling and analytical protocols appropriate for detecting and measuring the pollutant in the aquifers in the state.
- E. Within one year from the reclassification of an aquifer to a non-drinking water status, pursuant to section 49-224, the director shall adopt water quality standards for that aquifer. For any pollutants which were not the basis for the reclassification, the applicable standard shall be identical with the standard for those pollutants adopted pursuant to subsections A and B of this section. For any pollutants which were the basis for reclassification, the standard shall be sufficient to achieve the purpose for which the aquifer was reclassified but shall minimize unnecessary degradation of the aquifer by taking into consideration the potential long-term uses of the aquifer and the short-term and long-term benefits of the activities resulting in discharges into the aquifer.
- F. The director shall adopt water quality standards for an aquifer for which a petition has been submitted pursuant to section 49-224, subsection D sufficient to achieve the non-drinking water use for which that aquifer was classified, taking into consideration the potential long-term uses of that aquifer and the short-term and long-term benefits of the discharging activities creating that aquifer.
- G. In any action pursuant to this title, aquifer water quality protection provisions, including monitoring requirements, may be imposed only for pollutants for which aquifer water quality standards have been established that are likely to be present in a discharge. Indicator parameters and quality assurance parameters appropriate for such pollutants also may be specified.

49-224. Aquifer identification, classification and reclassification

A. Not later than June 30, 1987 the director shall, by rule, identify and define the boundaries of all aquifers in this state utilizing, to the maximum extent possible, data available from the department of water resources.

B. All aquifers in this state identified and defined under subsection A of this section and any other aquifers subsequently discovered, identified and defined shall be classified for drinking water protected use unless the classification is changed in the manner provided in subsection C of this section.

C. The director, after consulting with the appropriate groundwater users advisory council established pursuant to title 45, chapter 2, article 2 if the aquifer is in an active management area, and a public hearing held pursuant to section 49-208, may change the classification of an aquifer or part of an aquifer for a protected use other than drinking water on making all of the following findings:

1. The identified aquifer or part of an aquifer is or will be so hydrologically isolated from other aquifers or other parts of the same aquifer that there is no reasonable probability that poorer quality water from the identified aquifer or part of an aquifer will cause or contribute to a violation of aquifer water quality standards in other aquifers or parts of the same aquifer.

2. Water from the identified aquifer or part of an aquifer is not being used as drinking water.

3. The short-term and long-term benefits to the public that would result from the degradation of the quality of the water in the identified aquifer or part of an aquifer below standards established pursuant to section 49-223, subsections A and B would significantly outweigh the short-term and long-term costs to the public of such degradation. Benefits and costs to be considered include economic, social and environmental.

D. Owners or operators of facilities whose discharges are solely responsible for creating an aquifer may petition the director for a classification of the aquifer for a non-drinking water use. The director may, by rule, classify that aquifer for a non-drinking water use upon making the findings prescribed in subsection C, paragraphs 1 and 2 of this section.

E. The director shall provide for public participation in proceedings under this section pursuant to section 49-208 and shall hold at least one public hearing at a location as near as practicable to the aquifer proposed for reclassification.

D-15.

DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 11 (Uranium)

Amend: R18-11-406

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: May 6, 2025

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: April 22, 2025

SUBJECT: DEPARTMENT OF ENVIRONMENTAL QUALITY
Title 18, Chapter 11

Amend: R18-11-406

Summary:

This regular rulemaking from the Department of Environmental Quality (Department) seeks to amend one (1) rule in Title 18, Chapter 11, regarding Aquifer Water Quality Standards.

The Department is proposing to make amendments and additions to Chapter 11 as part of a four part rulemaking package. The Department is required by A.R.S. § 49-223(A) to adopt Aquifer Water Quality Standards (AWQS) with these standards being based on maximum contaminant levels (MCLs). These MCLs are prescribed by the Environmental Protection Agency (EPA) and the Department is required to adopt the same MCLs unless there is a showing of substantial opposition, which allows the Department to prescribe different standards if the Department or stakeholder can show that the EPA levels are not appropriate for Arizona. The Department has indicated to Department staff that this substantial opposition language is unique to Arizona and the Department believes Arizona to be the only state to have this type of language.

For this part of the rulemaking package, the Department will be adopting the MCL level prescribed by the EPA for uranium. The rule does not currently state what is an acceptable amount of uranium. The Department is proposing to adopt the EPA standard which is .030 mg/L. The Department has indicated that there has not been any substantial opposition as defined in A.R.S. § 49-223, to the proposed amendment.

1. **Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?**

The Department cites both general and specific statutory authority for these rules.

2. **Do the rules establish a new fee or contain a fee increase?**

This rulemaking does not establish a new fee or contain a fee increase.

3. **Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?**

The Department indicates that they reviewed two studies relevant to the rules and that these materials are available to the public upon request.

- MCL Assumptions Report – Arsenic Aquifer Water Quality Standards Technical Support: The Department indicates that this report was used to review EPA assumptions regarding the MCL for uranium and included looking at technologies, costs, sampling, and analytical methodologies for public health risks reduction.
- Draft Economic Impact Statement for Arsenic Proposed AWQS: The Department indicates that this report informed DEQ on the economic impact of the subject matter of the rulemaking.

4. **Summary of the agency's economic impact analysis:**

The Department states that this rulemaking is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt an adjustment to the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Uranium as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. The Department indicates that the AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (see A.R.S. § 49-224(B)). The Department states the AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the voluntary Remediation Program (VRP), and elsewhere.

The Department states that the full scope of stakeholders who may incur direct impacts from this rulemaking include individual APP Permittees, such as Mines, Industrial

Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. The Department indicates that while not all costs and benefits are borne evenly, these are the identified groups generally impacted from this Uranium AWQS rulemaking. The Department states that the costs to permittees to meet the adjusted AWQS are significant and indeterminate at this time. The Department states that permittees must determine appropriate treatment technology for the specific conditions applicable to them, then upgrade or install technology and train personnel as needed to operate. Benefits to stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual users alike.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department states that the controlling statute A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. The Department indicates that it simply requires ADEQ to open a rulemaking docket pursuant to A.R.S. § 41-1021 for adoption of new or adjusted MCL as an AWQS within one year of the MCLs establishment or adjustment.

6. What are the economic impacts on stakeholders?

The Department says individual APP Permittees will be the primary bearers of costs associated with this rulemaking. The Department states that other costs to stakeholders could occur, such as rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment. The Department believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. The Department anticipates that hundreds of permits may need to be amended to update monitoring tables that include Uranium as a parameter. The Department indicates that any additional costs would generally be covered by increased fees paid by permittees.

The Department believes, generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resources as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. The Department states that savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstances} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike. In addition, the Department states that following EPA, quantified benefits are measured in terms of reduced loss of life and costs associated with treatment for disease. Additionally, the Department states that investments in treatment technology and processes by permittees would result in additional hires to

operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenue.

7. **Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?**

The Department indicates that there were no changes between the proposed draft and final rules before the Council.

8. **Does the agency adequately address the comments on the proposed rules and any supplemental proposals?**

The Department indicates it received 2 public comments as it relates to this rulemaking. The Department indicates that they conducted

Comment 1 was from a utility organization and stated the following:

- Uranium. The EPA established an MCL of 30 parts per billion (ppb) for uranium in drinking water in 2000. However, ADEQ has not yet adopted this standard as an AWQS, leaving Arizona's aquifers—and the communities that depend on them—unprotected from the risks of uranium contamination. Facilities like the Pinyon Plain uranium mine exemplify the threats posed by inadequate regulation. Monitoring data from the mine has shown uranium levels as high as 130 ppb, far exceeding EPA's MCL. Such contamination poses serious health risks, including kidney damage, bone toxicity, and increased cancer risks, and jeopardizes hydrologically connected water sources like the springs on the Grand Canyon's South Rim. Recent studies from Crossey et al. and a report from EPA all indicate an increased risk from the mine for the Grand Canyon's waters and the drinking water of the Havasupai Tribe. We urge ADEQ to adopt the EPA's MCL of 30 ppb as an AWQS immediately and implement stricter

The Department responded with the following:

- ADEQ appreciates the comment. The Uranium MCL is one of the seven (7) MCLs proposed for adoption as AWQSs within the scope of the collective "AWQS Update" rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQSs verbatim. As is detailed in this rulemaking, the Uranium MCL is in micrograms per liter ($\mu\text{g/L}$) which is equivalent to parts per billion or (ppb). 1000 micrograms is equivalent to 1 milligram. Therefore, the Uranium MCL of 30 $\mu\text{g/L}$ is equivalent to 0.030 mg/L. In order to align with the existing unit selection in the tables in R18-11-406, 0.030 mg/L is the final AWQS for Uranium.

The second comment came from a local government and stated the following:

- If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

The Department responded with the following:

- ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>. ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Uranium MCL as AWQS.

Council staff believes that the department adequately addressed the comments in accordance with A.R.S. § 41-1052(D)(7).

9. **Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?**

This rulemaking does not require a permit or a license.

10. **Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?**

The Department indicates that the rules are not more stringent than federal law.

11. **Conclusion**

This regular rulemaking by the Department seeks to amend one rule regarding aquifer water quality standards. The Department specifically seeks to amend the rule to add the EPA standards for the amount of allowable uranium for aquifer water quality standards. There was no substantial opposition to the EPA standards.

The Department is seeking a standard 60-day delayed effective date.

Council staff recommends approval of this rulemaking.

March 13, 2025

Jessica Klein, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Ste. 302
Phoenix, AZ 85007

Re: Aquifer Water Quality Standards Update Regular Rulemaking: Title 18,
Environmental Quality, Chapters 9 and 11

Dear Chair Klein:

The Arizona Department of Environmental Quality (ADEQ) hereby submits this final rulemaking package to the Governor's Regulatory Review Council (GRRC) for consideration and approval at the Council Meeting scheduled for May 6th, 2025.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. §§ 41-1039, 41-1052 and A.A.C. R1-6-201:

I. Information required under A.A.C. R1-6-201(A)(1):

- (A)(1)(a) The public record closed for all rules on December 16th, 2024 at 11:59 p.m.
- (A)(1)(b) The rulemaking activity does relate to a five-year review report. The report on 18 AAC 11, Articles 4 and 5 was approved on November 3rd, 2020.
- (A)(1)(c) The rulemaking activity does not establish a new fee.
- (A)(1)(d) The rulemaking does not contain a fee increase.
- (A)(1)(e) An immediate effective date is not requested.
- (A)(1)(f) The Department certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- (A)(1)(g) The Department's preparer of the economic, small business, and consumer impact statement has notified the Joint Legislative Budget Committee (JLBC) of the number of new full-time employees necessary to implement and enforce the rule before the rule is approved by the council, pursuant to A.R.S. § 41-1055(B)(3) (a) (see subheading IV, below).
- (A)(1)(h) A list of documents is enclosed (see subheading IV, below).

II. Information required under A.A.C. R1-6-201(A)(2) through (8):

- (A)(2) Five (5) Notices of Final Rulemaking (NFRMs), including the preamble, table of contents, and text of each rule (*see* subheading IV, below);
- (A)(3) The preambles contain economic, small business, and consumer impact statements that contain the information required by A.R.S. § 41-1055 (*see* subheading IV, below);
- (A)(4) The preambles contain comments received by the agency, both written and oral, concerning the proposed rule (*see* subheading IV, below);
- (A)(5) No analyses were submitted to the agency regarding the rule's impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states;
- (A)(6) No materials were incorporated by reference in this rulemaking;
- (A)(7) The general and specific statutes authorizing the rule, including relevant statutory definitions (*see* subheading IV, below);
- (A)(8) All statutes referred to in the definitions are represented in the general and specific statutes authorizing the rule.

III. Governor's office approvals pursuant to A.R.S. § 41-1039:

- (A) ADEQ received prior written approval from the Governor's Office twice. Once for Title 18, Chapter 11, Article 4 on August 24, 2022 and then again for Title 18, Chapter 9, Articles 1 and 2 on February 5th, 2024 (*see* subheading IV, below);
- (B) ADEQ received written final approval from the Governor's Office for this rulemaking on March 11th, 2025 (*see* subheading IV, below).

IV. List of documents enclosed (25 documents total):

- One (1) Cover Letter (R1-6-201(A)(1));
 - AWQS_CL.pdf
- One (1) JLBC email (R1-6-201(A)(1)(g));
 - AWQS_JLBC.pdf
- Five (5) NFRMs (R1-6-201(A)(2));
 - AWQS_NFRM_18_AAC_9_Impl.pdf
 - AWQS_NFRM_18_AAC_11_As.pdf
 - AWQS_NFRM_18_AAC_11_U.pdf
 - AWQS_NFRM_18_AAC_11_DBP.pdf
 - AWQS_NFRM_18_AAC_11_MBC.pdf
- Five (5) EISs (R1-6-201(A)(3));
 - AWQS_EIS_18_AAC_9_Impl.pdf
 - AWQS_EIS_18_AAC_11_As.pdf
 - AWQS_EIS_18_AAC_11_U.pdf
 - AWQS_EIS_18_AAC_11_DBP.pdf
 - AWQS_EIS_18_AAC_11_MBC.pdf
- Five (5) Public Comments Received Documents (R1-6-201(A)(4));

- AWQS_Cmts_18_AAC_9_Impl.pdf
- AWQS_Cmts_18_AAC_11_As.pdf
- AWQS_Cmts_18_AAC_11_U.pdf
- AWQS_Cmts_18_AAC_11_DBP.pdf
- AWQS_Cmts_18_AAC_11_MBC.pdf
- Five (5) General and Specific Authorizing Statutes (R1-6-201(A)(7));
 - 49-104 - Powers and duties of the department and director.pdf
 - 49-203 - Powers and duties of the director and department.pdf
 - 49-221 - Water quality standards in general; protected surface waters list.pdf
 - 49-223 - Aquifer water quality standards.pdf
 - 49-224 - Aquifer identification, classification and reclassification.pdf
- Three (3) A.R.S. § 41-1039 Governor's Approvals
 - 8_24_22_Gov_Approval.pdf
 - 2_5_24_Gov_Approval.pdf
 - 25_3_11_Gov_Approval.pdf

Thank you for your timely review and approval. Please contact Jon Rezabek, Legal Specialist, Water Quality Division, 602-771-8219 or rezabek.jon@azdeq.gov if you have any questions.

Sincerely,

Karen Peters, Director
Arizona Department of Environmental Quality

Enclosures

NOTICE OF FINAL RULEMAKING
TITLE 18. ENVIRONMENTAL QUALITY
CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER QUALITY STANDARDS

PREAMBLE

1. Permission to proceed with this proposed rulemaking was granted under A.R.S. § 41-1039 by the governor on:

August 24, 2022, &
February 5, 2024

2. Article, Part, or Section Affected (as applicable)

R18-11-406

Rulemaking Action

Amend

3. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-221, and 49-223.

Implementing statute: A.R.S. §§ 49-221, and 49-223.

4. The effective date of the rule:

July 7, 2025

a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

5. Citations to all related notices published in the Register as specified in R1-1-409(A) that pertain to the current record of the final rule:

Notice of Proposed Rulemaking: 30 A.A.R. 3412, Issue Date: November 15, 2024, Issue Number: 46, File Number: R24-230.

Notice of Rulemaking Docket Opening: 30 A.A.R. 2136, Issue Date: June 28, 2024, Issue Number: 26, File Number: R24-114.

6. The agency's contact person who can answer questions about the rulemaking:

Name: Jon Rezabek
Title: Legal Specialist
Division: Water Quality
Address: Arizona Department of Environmental Quality

Fax: (602) 771-2366
Email: awqs@azdeq.gov
Website: <https://www.azdeq.gov/awp-rulemaking>

7. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

General Explanation of the Collective Rulemaking: The Arizona Department of Environmental Quality (ADEQ) is required under A.R.S. § 49-223(A) to open a rulemaking docket for the adoption of federal drinking water maximum contaminant levels (MCLs) as state aquifer water quality standards (AWQSs) within one year of the Environmental Protection Agency's (EPA's) establishment of new or adjusted MCLs. AWQSs for Arsenic, Bromate, Chlorite, Haloacetic Acids, Microbiological Contaminants, Total Trihalomethanes and Uranium with corresponding MCLs are either unestablished as AWQSs or are established but currently have a misaligned value as the standard. MCLs for the seven (7) pollutants can be viewed at 40 *Code of Federal Regulations* (C.F.R.) 141.60 *et seq.* A.R.S. § 49-223(A) requires ADEQ to move forward with the adoption of MCLs as AWQSs through the rulemaking process unless substantial opposition to the adoption is received from stakeholders. Upon receipt of substantial opposition, ADEQ may adopt for that pollutant the verbatim MCL as an AWQS, but only upon a finding that the MCL is appropriate for adoption in Arizona as an AWQS. In making this finding, ADEQ must consider whether the assumptions used by the EPA in developing and implementing the MCLs are appropriate for establishing an Arizona state AWQSs. The listed assumptions for consideration are technology, cost, sampling and analytical methodologies and public health risk reduction. If ADEQ determines the MCL is inappropriate as an AWQS, the Department may establish an alternative AWQS for the pollutant with an MCL. The alternative AWQS must be:

- (1) Based on the protection of human health and shall rely on technical protocols appropriate for the development of AWQSs,
and
- (2) Based on credible medical and toxicological evidence that has been subjected to peer review.

Subject Matter of this NFRM: This *Notice of Final Rulemaking* (NFRM) proposes to establish an AWQS for uranium that aligns with the MCL for Uranium. The original MCL for Uranium was established through Final Rule by the Environmental Protection Agency (EPA), published in the *Federal Register* at 65 *Federal Register* 76708.

What is the MCL for Uranium that is proposed to be the new AWQS and what is the current AWQS for Uranium?

| Pollutant | Current MCL / New or Adjusted AWQS | Previous AWQS |
|-----------|---------------------------------------|---------------|
| Uranium | 30 µg/L or 0.030 mg/L | None |

Uranium MCL Unit Conversion - µg/L to mg/L: The Uranium MCL is in micrograms per Liter (µg/L) which is equivalent to parts per billion or (ppb). 1000 micrograms is equivalent to 1 milligram. Therefore, the Uranium MCL of 30 µg/L is equivalent to 0.030 mg/L. In order to align with the existing unit selection in the tables in R18-11-406, 0.030 mg/L is the final AWQS for Uranium.

Substantial Opposition: ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the MCL for Uranium as an AWQS.

Associated Rulemakings: ADEQ proposes a total of five (5) NFRMs in the collective AWQS Update rulemaking. Three (3) of the five (5) NFRMs, including this NFRM, propose to establish or align the AWQSs with the MCLs in *Arizona Administrative Code*, (A.A.C.) Title 18, Chapter 11, Article 4 for pollutants Arsenic, Bromate, Chlorite, Haloacetic Acids, Total Trihalomethanes and Uranium. This NFRM’s scope is limited to Uranium. A second NFRM’s scope includes Arsenic. A third NFRM’s scope includes four (4) disinfection byproducts: Bromate, Chlorite, Haloacetic Acids and Total Trihalomethanes. A fourth NFRM’s scope includes microbiological contaminants. A fifth and final NFRM includes in its scope a proposed new section and some amendments to A.A.C., Title 18, Chapter 9, Articles 1 and 2. With the fifth NFRM, ADEQ proposes a rule detailing implementation of new or adjusted AWQSs into existing Individual Aquifer Protection Program permits (APPs), along with adjacent amendments to existing rule to make way for this purpose.

What are Aquifer Water Quality Standards and what is their purpose? Aquifer Water Quality Standards or “AWQSs” are protective groundwater standards that were put in place and designated by the Arizona Legislature to preserve Arizona’s aquifer quality for drinking water-protected use (*See* A.R.S. § 49-224(B)).

How are Aquifer Water Quality Standards Used? The AWQSs are used in ADEQ’s Aquifer Protection Program (APP), and, to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

Sampling and Analytical Methodologies. In the Baseline Monitoring Requirement subsection of the final rule at R18-9-A215(E)(4), the following is provided,

“[s]ampling for each pollutant with a new or adjusted AWQS shall be conducted using Arizona Department of Health Services-approved (ADHS) methods under A.A.C. R9-14-610, including methods on the ADHS Director Approved List, if available. If an ADHS-approved method does not exist, sampling shall be conducted using an appropriate EPA-approved method or a method specified by the ADEQ Director.”

At the time this NFRM was compiled, wastewater methods for some of the pollutants with new or adjusted AWQSs were not ADHS-Approved (*see* A.A.C. Title 9, Chapter 14, Article 6, Tables 6.2.A and 6.2.B). In March 2025, ADEQ formally requested that the following sampling methods be reviewed and considered for addition to ADHS’s “Director Approved” list of sampling methods pursuant to A.A.C. R9-14-610, found published outside of the rule on ADHS’s website, here: <https://www.azdhs.gov/documents/preparedness/state-laboratory/lab-licensure-certification/environmental-laboratory/application/application-part-e.pdf>

| Analyte | Analytical Method |
|-----------------------|--|
| Arsenic | EPA 200.8, SM 3113B, SM 3114B |
| Bromate | EPA 300.1, EPA 317.0 Rev 2.0, EPA 321.8, EPA 326.0 |
| Chlorite | EPA 300.0, EPA 300.1, EPA 317.0 Rev 2.0, EPA 326.0 |
| Haloacetic Acids | EPA 552.1, EPA 552.2, EPA 552.3, SM 6251B |
| Fecal coliform | SM 9223B |
| <i>E. coli</i> | SM 9223B |
| Total Trihalomethanes | EPA 502.2, EPA 524.2, EPA 551.1, SM 6251B |
| Uranium (Total) | EPA 200.8 |

* “EPA” - Environmental Protection Agency; “SM” - Standard Methods

Who are the stakeholders to this rulemaking? The stakeholders for this rulemaking are predominantly the permittees of the APP, and to a lesser extent, remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP). Other stakeholders include private well owners, community water systems and the constituents they serve, as well as all Arizonans who benefit from the state’s aquifers being protected for drinking water use.

What has been the stakeholder process thus far for this rulemaking? ADEQ has conducted a number of general and specific stakeholder meetings, as well as tribal listening sessions, concerning this rulemaking. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11/23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ’s website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

8. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

MCL Assumptions Report – Uranium Aquifer Water Quality Standards Technical Support:

Summary: This report provides a review of the EPA assumptions used to establish the MCL for Uranium at 65 *Federal Register* 76708. The assumptions reviewed are listed in A.R.S. § 49-223(A) and include technologies, costs, sampling and analytical methodologies and public health risk reduction.

Study Resource: Provided review of the EPA assumptions used to establish the MCL for Uranium at 65 *Federal Register* 76708 in order to inform ADEQ further on the subject matter and its applicability in the AWQS setting.

Public Review: The public may review this study or may obtain copies from the Department by request. Requests can be submitted to the Department by email at awqs@azdeq.gov or by mail to Arizona Department of Environmental Quality, 1110 W. Washington Ave. Phoenix, AZ 85007.

9. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

10. The summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Uranium as an Aquifer

Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the Uranium MCL as an AWQS. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Uranium AWQS rulemaking.

Costs to permittees to meet the new AWQS for Uranium are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the "fee-for-service" model requirements ADEQ must operate under (*see* A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Uranium AWQS, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Uranium as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including the reduction in loss of life due to reduced Uranium consumption, as well as the avoidance or reduction of uranium-related ailments and loss of income and additional financial hardships associated with the quantified and non-quantified diseases. Arizona's many community water systems (CWSs) and their clientele could see savings due to reduced UraniumF in the groundwater under the proposed AWQS. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$24,000 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process

ADEQ has conducted a number of general and specific stakeholder meetings concerning this rulemaking, including tribal listening sessions and rule language sessions with major industry associations and their counsel, representing a majority of the individual APP regulated parties. The dates of those events are as follows: 9/29/22, 6/8/23, 9/11//23, 12/12/23, 12/13/23, 4/29/24, 8/8/24, 1/8/25, 2/20/25 and others. A repository of stakeholder materials can be found published on ADEQ's dedicated AWQS Rulemaking website here: <https://www.azdeq.gov/rulemaking/awqs-update/resources>.

C. Identification of the persons who will be directly affected, bear the costs of, or directly benefit from the rules:

Costs to Stakeholders

Individual APP Permittees (hereinafter: "permittees") will be the primary bearers of costs associated with this rulemaking.

Permittees are discussed under the following three categories:

- Mines, where treatment conditions can vary noticeably from typical urban waste processing.
- Industrial facilities, with treatment conditions that can vary according to the industrial processes involved.
- Wastewater Treatment Plants, including mostly those treating urban-related wastewater.

Other potential costs to stakeholders addressed include the following:

- Rate payers in municipal systems, where rates could conceivably increase to cover increased costs for expanded treatment.
- Some permittees are assumed to be small businesses, and are additionally addressed as a segmented category.
- ADEQ, although any additional staff efforts and other expenses associated with monitoring proposed expanded treatment requirements will generally be covered through permittees' fee increases.

Benefits to Stakeholders

Generally, the state and the constituents of the state benefit from this rulemaking through the protection of the aquifer resource as an asset for drinking water use both now and in the future, pursuant to statutory mandate at A.R.S. § 49-224. More specifically, ADEQ and its consultant have attempted to quantify the benefit of the rulemaking to the extent possible in terms of health benefits related to forgone diseases. In Arizona, the immediate health-affected population consists primarily of private well users throughout the state, under certain qualifying conditions. Private well water consumers are generally limited to areas where discharged water treatment contaminant levels would improve based on the proposed AWQSs.

Other benefit categories include the following:

- Community water systems (CWSs) and their clientele. Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers.
- Regulated parties under ADEQ remediation programs such as WQARF and VRP (minimal impact).
- State costs, where some state-supported medical costs would decrease, with diseases forgone.
- Beneficial State revenue effects could result from the following: Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

D. Benefit/Cost Analysis:

Not all permittees will be burdened with the requirement to alter their facility in order to come into compliance with the proposed AWQSs and thereby incur the related costs, for any one of the following reasons or combinations of reasons:

- Permittees’ existing treatment methods/technologies are already adequate to meet the target standard;
- The contaminant in wastewater subject to treatment exists at a level below the proposed AWQS; and
- Ambient levels of the contaminant in groundwater exceed the proposed AWQS, in which case the permittee need only be held to a “no further degradation” standard (*see* A.A.C. R18-9-A205(C), A.R.S. § 49-243(B)(2) and (3)).

Cost estimate figures in this EIS relate primarily to expected equipment purchases, and do not include consideration of new structures, vehicles, furniture, and the like.

Key modeling factors used in this analysis are the following:

| Factors | Key source references | Notes |
|---|--|---|
| <i>Costs</i> | | |
| Cost estimates for mining reclamation/remediation | Matrix Report Chart 17 | Included for illustrative purposes |
| <i>Costs and Benefits</i> | | |
| National estimates of # of systems impacted, cancer risk from uranium/radionuclides, and estimated compliance costs | Matrix Report Chart 9 and related EPA documentation in 65 FR 76733 ff. | National numbers adjusted to potential Arizona cases and populations, based on greater presence of Uranium in groundwater and a lower proportion of affected population than nation |

| <i>General</i> | | |
|---|---|---|
| Information about permittees by type of activity served, including size | APP Permittee Database | Categorizations of permittees and also the total number are as interpreted by ADEQ and consultant |
| Amounts in October 2023 \$ | https://data.bls.gov/cgi-bin/cpicalc.pl | |

Approach to the EIS for Uranium. ADEQ and its consultant rely on estimates prepared by the authors of the “MCL Assumptions Report – Uranium Aquifer Water Quality Standards Technical Support”, prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC. in 2023 (“Matrix Report”) (see Heading No. 8 of this NFRM). This information was supplemented by the Matrix Report’s source material (primarily from the EPA), which takes into account multiple factors affecting potential costs and benefits. Cost ranges generated by the Matrix Report and used in this EIS are broad, reflecting the complexity of the treatment options, water conditions, etcetera that were considered. Dollar figures in the EIS are in October 2023-equivalent dollars unless noted otherwise. The primary regulatory program affected by this rulemaking is the individual Aquifer Protection Permit (APP) program. According to ADEQ’s database of permittees, an estimated total of 434 permits are divided among the categories shown below:

| Category | # Permittees |
|---|--------------|
| Mines | 35 |
| Industrial Facilities | 56 |
| Wastewater Treatment Plants | 343 |
| Total | 434 |
| *Small Businesses as a segmented category | 135 |

The three categories in the table above are addressed separately in the benefit/cost analysis within this subsection where it is possible and meaningful to do so.

1. Part I – Benefit / Cost Stakeholder Matrix:

| Minimal | Moderate | Substantial | Significant |
|-------------------|--------------------------|--------------------------|--|
| \$500,000 or less | \$500,000 to \$5 million | Greater than \$5 million | Cost/Burden cannot be calculated, but the Department expects it to be significant. |

Note: all benefits and cost figures in this document are in annualized amounts.

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--------------------------------|--|----------------------------------|-------------------------------------|
| Costs to Stakeholders | | | |
| Permittees | Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential | Significant | |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|--|---|--|-------------------------------------|
| | costs from nothing to hundreds of millions. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the “fee-for-service” model requirements ADEQ must operate under (<i>see</i> A.R.S. § 49-104(B)(17)). | | |
| Industrial Facilities | Industrial operations are assumed to have a disproportionately higher representation among permittees treating for uranium, in relation to those treating urban wastewater | Significant | |
| Wastewater Treatment Plants | Most permittees in this category will not be treating for uranium, except for those where ambient levels are high | Significant | |
| Mines | Mining operations are assumed to represent a fairly high proportion of those permittees treating for uranium. | Significant | |
| Rate payers in municipal systems | Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted below | Assumed to be minimal and spread broadly through the customer base, on a monthly basis | |
| Small businesses as a segmented category | Coming into compliance with new standards. Small businesses are generally cost-disadvantaged when compared to larger businesses because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. | Significant | |
| ADEQ | ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that many permits may need to be amended to update monitoring tables that include Uranium as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees. | Significant | |
| Benefits to Stakeholders | | | |
| State of Arizona and its Constituents, generally | Savings could accrue to the people of the State of Arizona, generally, through aquifers (as a local, convenient and {in the right circumstance} inexpensive sources for drinking water) remaining a viable asset to community water portfolios and individual well users alike | | Significant |
| Private well users, health benefits: In Arizona, the | Following EPA, quantified benefits are measured in terms of reduced loss of | | Significant |

| Description of Affected Groups | Description of Effect | Increased Cost/Decreased Revenue | Decreased Cost/Increases in Revenue |
|---|--|----------------------------------|-------------------------------------|
| more immediately affected population consists primarily of private well users throughout the state. | life and costs associated with treatment for disease. | | |
| Community water systems (CWSs) and their clientele | Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. | | Significant |
| State costs | Some state-supported medical costs would decrease. | Minimal | Significant |
| State revenue effects | Investments in treatment technology and processes by permittees would result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be about \$24,000 for the direct and secondary hires. | | Minimal |

2. Part II – Individual Stakeholder Summaries / Calculations:

The following subsection provides an explanatory discussion of expected stakeholder costs and benefits. The subsection outlines the key factors and analysis used to determine the impact findings reported in Part 1 of subsection D, above.

Costs to Stakeholders:

Permittees in General

In the Matrix Report, costs for treatment are given within a wide range. The complexity driving the variation in costs results primarily from: 1) permittees’ need to consider/analyze multiple treatment technologies that have varying applicability according to specific water conditions; 2) operational costs that vary by influent Uranium concentration and water quality, and 3) the scale of permittee operations, plus other factors. The Matrix Report recognized that the number of permittees-affected needed to be adjusted downward because some facilities may have ambient Uranium concentrations exceeding the proposed AWQS, and in recognition of facilities that analyzed for total Uranium and had a quantified Uranium discharge limit, plus other technicalities. For the purposes of this EIS, the Matrix Report’s statewide cost range estimates (from nothing to millions) can be viewed as a theoretical total range, reflecting treatment options available, but within which permittees would tend to be minimizing costs where possible. Consequently the actual cost range is likely to be considerably narrower than the theoretical total range. The group of permittees that undertake treatment to reduce Uranium must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate.

Mines

The 35 permittees operating mining facilities can be quite complex, potentially involving multiple water control structures (dams, retention areas, etc.) in conjunction with treatment processes. Reclamation and remediation are additional requirements and costs related to uranium treatments associated with mining. Extensive mining activity in Arizona adds to the significance of this factor. The concentrate leach process for extracting copper, a common practice in Arizona, is also water-intensive, and constitutes an additional complicating factor in selecting and using technology for dealing with changes in AWQSs for individual contaminants, including uranium.

Industrial Facilities

The estimated number of industrial wastewater processing permittees is 56. This category of permittee is generally processing wastewater generated from an industrial process. Consequently, water treatment technology options are partially dictated by the particular type of waste created through the industrial activity.

Wastewater Treatment Plants

The 343 permittees in this category are generally treating wastewater from typical municipal/urban-type sources. Most of these will not be treating for uranium, except for those where ambient levels are high. Key subcategories in this group are listed below and provide a sense of the range of activities to which treatments are being applied. Some of these are tied to municipalities, and some are treating waste streams from planned communities, RV parks, correctional institutions, military installations, or similar developments that may be remote from or otherwise not connected to a central wastewater treatment collection and processing system.

- City/Town; Other Urban (subdivisions, single-purpose facilities such as schools)
- Hospitality/Travel/Recreation
- Military Base
- Prison/Jail
- Water Recharge, Other Processing

Rate payers in municipal systems (community water systems (CWSs))

Private citizens and businesses could face increased user fees for wastewater processing, to cover costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele, as noted in the Benefit Stakeholders subsection below. Ratepayer costs are expected to be minimal and spread broadly through the customer base, and would be incurred on a monthly basis.

Small businesses as a segmented category

(See also subsection F below, addressing the probable effects of the proposed rulemaking on small businesses.) Cost burdens on small businesses will tend to be proportionately greater than for large businesses. Not only are they less likely to have specific

expertise needed to meet proposed modified standards in-house, but also small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases, so larger processing facilities can process wastes at a smaller unit cost.

ADEQ

ADEQ may need additional staff or staff time to address advanced treatment processes and related testing, etc. However, any such costs should be covered by fees paid by permittees for ADEQ services.

Benefits to Stakeholders:

Private well users (and CWSs users)

The relevant affected group for this benefit consists of consumers of permittee-treated water that ends up in water supply chains, under certain qualifying conditions: benefiting water consumers are limited to where treatment levels would change according to proposed AWQs, except where ambient water levels that exceed proposed AWQs have been invoked so that proposed standards are bypassed.

There are two segments to this group of benefiting stakeholders:

1. Some community water systems (CWSs, or municipal water treatment utility operators), for systems in which groundwater is a water source, along with customers of those water utilities. These stakeholders are likely to jointly benefit from reduced treatment requirements and costs, with cost savings presumably passed on to customers, because groundwater quality has improved due to permittees' actions in meeting revised AWQs.
2. The population served by private wells, where there is no intermediary utility processing their water for consumption. This affected group would benefit from diseases forgone with the more stringent standards.

The first segment is addressed below under the subsection entitled, Community water systems (CWSs) and their clientele. For segment 2, according to the Matrix MCL Report the estimated population in Arizona that obtains groundwater for domestic use is 350,000. This estimate was further reduced for this analysis based on the estimated number of facilities treating for uranium and their distribution. Applying these two factors results in a relatively small estimated affected population of approximately 19,300. Estimates of benefits related to uranium reduction are based on the Matrix Report Chart 9 (p. 19) and the EPA backup. These factors, which include the relatively low estimate by EPA of cancer incidence associated with uranium exposure, yields a modest estimate of benefits of \$176,000. According to the Matrix Report, benefit estimates may underestimate the cost forgone for avoiding the cancer cases, as these medical-related costs do not take into account the loss of income and additional financial hardships or intangible factors, such as the psychological impact associated with the cancer. The uranium cancer risk reduction benefit estimates in EPA are based on a combination of cancers avoided but do not include the non-quantified kidney toxicity risk-reduction benefits. Other non-quantified benefits, according to EPA in 65 FR 76734, "include those related to the technologies

used to remove radium and uranium from ground water (e.g., water softening technologies like ion exchange, lime softening, and membrane softening and iron removal technologies like green sand filtration and oxidation/filtration). EPA does not have enough information to estimate these benefits, but believes that they could be significant. Examples of benefits related to water softening include reductions in excessive calcium and manganese carbonate scaling in distribution systems, water heaters, and boilers and reductions in soap and detergent use. Examples of benefits related to iron removal include improvements in color and taste and reduction in staining of clothes, sinks, and basins.”

Community water systems (CWSs) and their clientele

Savings could accrue to CWSs due to reduced Uranium in the groundwater under the proposed AWQS. Any savings would presumably be passed on to customers. Estimates of the population served by municipal or other systems with water sources that included groundwater were derived from data at the Arizona Department of Water Resources website (<https://www.azwater.gov/ama/ama-data>) which gave quantities of water use by municipal and other user types, by source, including groundwater. As many as 2.04 million Arizonans, as estimated, could be affected in this way. Because relatively few permittees will be treating for Uranium, the potentially affected population will likewise be reduced.

State cost savings

Some state-supported medical costs would decrease. Dollar estimates of this effect have not been attempted.

State revenue effects

State tax revenues could increase as a result of added sales taxes on potential additional user fees, and state income taxes from new hires accompanying the investments in treatment facilities. These latter effects are discussed in subsection E, below.

E. A general description of the probable impact on private and public employment in businesses, agencies, and political subdivisions of this state directly affected by the rulemaking:

General:

As permittees determine appropriate treatment technology for the specific conditions applicable to them, they must also then upgrade or install the technology and train or hire personnel as needed to operate it. In this EIS, this effect is simulated through the RIMS II modeling system described, as applied to this analysis (see next subsection below entitled “Regional Input-Output Modeling System (RIMS) Model Explanation”). Summarized results of the modeling process are tabulated below. Unless noted otherwise, results represent the low end of estimates where a range of potential annualized costs has been given in subsection D, above, to avoid potential confusion and overstatement related to this impact measure. The model translates expected annualized costs to employment and earnings based on relationships of those elements within the industry category that most closely matches that of the permittees (and is documented within the RIMS II system – NAICS code 2213: Water, sewage, and other systems).

Direct employment and earnings resulting from permittees’ investment in equipment are shown separately in the table below from the total multiplier (direct plus secondary) job-generating effects of this investment.

| RIMS II modeling outputs and key input factors | |
|--|---------------|
| Annualized Costs (with financing etc.)/Increased "Output" | \$3,148,517 |
| <i>Jobs Per Million Dollars in Output</i> | <i>1.80</i> |
| <i>Earnings Per Dollar of Output</i> | <i>\$0.17</i> |
| New Wastewater Treatment Direct Jobs Created | 5.67 |
| New Annual Earnings for Direct Jobs Created | \$529,186 |
| Total New Jobs (Direct + Secondary) | 17.38 |
| <i>Effective Income Tax Rate</i> | <i>2.1%</i> |
| Estimated Total Annual State Income Taxes (Direct and Secondary) | \$24,034 |

Source: RIMS II model for Arizona; ADEQ & consultant.

Regional Input-Output Modeling System (RIMS) Model Explanation:

This subsection discusses the Regional Input-Output Modeling System (RIMS II - As provided by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce) modeling analysis supporting the jobs-related economic impact of the proposed wastewater treatment investments / expansions in the State of Arizona. All impacts estimated through this analysis are provided for the statewide level of geography and are not intended to estimate impacts for sub-state geographic areas (e.g., metropolitan statistical area [MSA], county, etc.). Results of these analyses are shown in Parts E (employment) and G (state taxes) of the document.

The analysis assumes the investments to upgrade the wastewater facilities will include installing new wastewater-specific equipment (which may also include expanding the size of the facility, although that is not addressed in this analysis), which will increase the productive capacity of these wastewater facilities. For the purposes of this analysis, the “productive capacity” is assumed to be the annualized equivalent of capital investments (and additional operating costs would also be part of this, and such costs are included in the analysis where available). Cost (and benefit) figures shown in this document are annualized, having been calculated as such by the original data providers, generally from EPA and the Matrix Report.

The annualizations generally were based on assumptions of the payback of proposed investments having a 20-year lifespan (and an installation period was sometimes included) and an annual interest rate of 7.0%. ADEQ and its consultant further assumed that wastewater treatment plants’ revenues (such as user fee increases) would increase by commensurate amounts to cover the annualized costs of the proposed improvements. This increase in revenue (“Output”) allows ADEQ and its consultant to apply final-demand multipliers to estimate the number of new jobs and earnings (associated with these jobs) in the state that would result from the proposed investments. The RIMS II model generates economic multipliers for jobs, earnings, and output, based on the industry NAICS code 2213: Water, sewage, and other systems, for direct, indirect, and household (induced) effects. Along with

the increases in employment and earnings generated by the proposed investments, the new earnings would also generate state income tax revenue for the State. Based on data from the BEA and the Arizona Department of Revenue (ADOR), ADEQ and its consultant derived an estimated effective state income rate of 2.1% (The State flat income tax rate, at the time this EIS was prepared, is 2.5%. The net income tax rate of 2.1% reflects deductions for the average wage and salary worker and other adjustments).

F. A statement on the probable impact of the rules on small business:

Economic costs to comply with AWQSs that are borne by small businesses may be considerable. Small businesses tend to be disadvantaged because treatment costs generally decline as the scale (processing capacity) of a processing facility increases. Besides the potential need for additional personnel or additional training, permittees may need to hire technical expertise on a consulting basis to determine the most appropriate and cost-effective treatment technologies that apply to any one permittee's particular conditions.

1. An identification of the small businesses subject to the rules:

Small businesses constitute a distinct category for which the impacts of rulemaking need to be considered. For this EIS and those addressing the other contaminants, impacted small businesses will be wastewater facility permittees meeting the following criteria:

- According to A.R.S. 41-1001 and as applied in this EIS, “‘Small business’ means a concern, including its affiliates, which is independently owned and operated, which is not dominant in its field and which employs fewer than one hundred full-time employees or which had gross annual receipts of less than \$4 million in its last fiscal year.”
- ADEQ and its consultant used a database of permittees, which had partial flow data, to screen permittees for this measure. Lacking further operational-level data for permittees, ADEQ and its consultant also screened permittees to identify “businesses” as opposed to governmental entities, and small businesses, constituting those that did not appear to be associated with a larger entity.

Based on the screening processes described above, in which the number of permittees that are also small businesses is estimated with limited precision, ADEQ and its consultant estimated that small businesses make up just over 30% of permittees, or 135 entities in total. As noted previously in this EIS, not all of these facilities will necessarily need to incur costs to meet the proposed AWQS.

2. The administrative and other costs required for compliance with the rules:

Permittees small and large have systems already in place for the basic administrative and other managerial duties related to compliance to existing AWQSs. To the extent that is the case, any additional duties would constitute an expansion of existing processes rather than new systems. Also, there is a possibility that permittees would need to hire a consultant for technical expertise to select and integrate new technology into existing treatment processes.

3. A description of the methods that the agency may use to reduce the impact on small businesses, as required in

A.R.S. § 41-1035:

| A.R.S. § 41-1035 Methods | ADEQ Decision to use or not use and reason |
|---|--|
| 1. Establishing less stringent compliance or reporting requirements in the rule for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 2. Establishing less stringent schedules or deadlines in the rule for compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). ADEQ does allow permittees a reasonable amount of time to conduct Baseline Monitoring and to apply for permit amendment to come into compliance with new or adjusted AWQS (see Chapter 9 NFRM). |
| 3. Consolidating or simplifying the rule's compliance or reporting requirements for small businesses | Not used. In administering the APP program, compliance and reporting requirements are delineated in rule and statute in order to properly protect human health and the environment. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 4. Establishing performance standards for small businesses to replace design or operational standards in the rule | Not used. In administering the APP program, performance, design and operational standards are all built into a review of a facility's employment of the best available demonstrated control technologies, processes, operating methods or other alternatives. ADEQ believes these requirements are no more stringent than necessary (see A.R.S. §§ 49-223, 224, 241, 243). |
| 5. Exempting small businesses from any or all requirements of the law | Not used. In administering the APP program, all persons discharging a pollutant into the environment must obtain an APP permit under A.R.S. § 49-241, unless exempted through A.R.S. § 49-250. Eliminating small business from the scope of the APP program is not supported by statute and would undermine the purpose of the program, to protect the state's aquifers to a drinking water standard (see A.R.S. §§ 49-223, 224, 241, 243). |

4. The probable costs and benefits to private persons and consumers who are directly affected by the rules:

Potential savings could accrue to community water systems due to reduced Uranium in the groundwater under the proposed AWQS, and such savings could be substantial and would presumably be passed on to customers. As many as 1.8 million Arizonans could potentially be affected.

G. A statement of the probable effect on state revenues:

To the extent that costs to upgrade treatment facilities result in higher user fees, additional fees could be taxable within the state's transaction privilege tax system. ADEQ and its consultant have not attempted to quantify any such effect. Investments in treatment technology and processes by permittees could result in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues.

Employment effects are addressed in subsection D, above. As noted therein, estimated state taxes for direct and secondary

employment generated by investments in Uranium technology (using the low end of costs where ranges are given) are just over \$24,000.

H. A description of any less intrusive or less costly methods of achieving the purpose of the rulemaking:

The controlling statute at A.R.S. § 49-223 does not allow ADEQ to conduct any less intrusive or less costly alternative methods of achieving the purpose of the proposed rulemaking. It simply requires ADEQ to open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of a new or adjusted MCL as an AWQS within one year of the MCL's establishment or adjustment.

I. A description of any data on which the rule is based with a detailed explanation of how the data was obtained and why the data is acceptable data:

Reference material used in this EIS comes mainly from the *MCL Assumptions Report – Uranium Aquifer Water Quality Standards Technical Support* prepared by Matrix New World Engineering, Land Surveying and Landscape Architecture, PC (Matrix Report) for ADEQ in 2023 (*see* Heading No. 8 above for citation). Other reference material was used to a lesser extent (*see* Heading No. 8 above). ADEQ and its consultant also made selective use of EPA documents addressing specific contaminants referenced extensively in the Matrix Report. EPA documentation is the typical standard for assumed legitimacy with respect to actions assessed and implemented by ADEQ. ADEQ and its consultant reviewed the Matrix Report and engaged with Matrix principals in direct consultation regarding aspects of their documentation in the preparation of this EIS. EPA documentation was generally available online.

11. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

Not applicable.

12. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1: Interest Group

Uranium. The EPA established an MCL of 30 parts per billion (ppb) for uranium in drinking water in 2000. However, ADEQ has not yet adopted this standard as an AWQS, leaving Arizona's aquifers—and the communities that depend on them—unprotected from the risks of uranium contamination. Facilities like the Pinyon Plain uranium mine exemplify the threats posed by inadequate regulation. Monitoring data from the mine has shown uranium levels as high as 130 ppb, far exceeding EPA's MCL. Such contamination poses serious health risks, including kidney damage, bone toxicity, and increased cancer risks, and jeopardizes hydrologically connected water sources like the springs on the Grand Canyon's South Rim. Recent studies from Crossey et al. and a report from EPA all indicate an increased risk from the mine for the Grand Canyon's waters and the drinking water of the Havasupai Tribe. We urge ADEQ to adopt the EPA's MCL of 30 ppb as an AWQS immediately and implement stricter

compliance timelines for facilities already exceeding this standard.

ADEQ Response 1:

ADEQ appreciates the comment. The Uranium MCL is one of the seven (7) MCLs proposed for adoption as AWQs within the scope of the collective “AWQS Update” rulemaking. All MCLs except for Microbiological Contaminants are being adopted as AWQs verbatim. As is detailed in this rulemaking, the Uranium MCL is in micrograms per liter (µg/L) which is equivalent to parts per billion or (ppb). 1000 micrograms is equivalent to 1 milligram. Therefore, the Uranium MCL of 30 µg/L is equivalent to 0.030 mg/L. In order to align with the existing unit selection in the tables in R18-11-406, 0.030 mg/L is the final AWQS for Uranium.

Comment 2: Utility

If there is significant opposition to any of the parameters does ADEQ then not proceed with that particular parameter?

ADEQ Response 2:

ADEQ appreciates the comment. The answer to that question is – not necessarily. “Substantial Opposition” is a term defined in A.R.S. § 49-223(A) as, “... information submitted to the director that explains with reasonable specificity why the [MCL] is not appropriate as an [AWQS].” Upon receipt of “substantial opposition”, the Department must conduct a statutorily delineated procedure that leads to a determination of whether the MCL is “appropriate” as an AWQS. More information on that process can be found here: <https://www.azdeq.gov/rulemaking/awqs-update/resources> . ADEQ did not receive substantial opposition from stakeholders on the proposal to adopt the Uranium MCL as AWQS.

13. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

This rulemaking does not create a requirement for a permit.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

Federal law is not applicable to the subject matter of the rule.

c. Whether a person submitted an analysis to the agency that compares the rule’s impact of the competitiveness of business in this state to the impact on business in other states:

Not applicable.

14. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Not applicable.

15. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

Not applicable.

16. The full text of the rule follows:

Rule text begins on the next page.

AWP NFRM Economic Impact Statement (EIS) - 18 AAC 11 - Uranium

A summary of the economic, small business, and consumer impact:

This Economic, Small Business, and Consumer Impact Statement (EIS) has been prepared to meet the requirements of A.R.S. § 41-1055.

A. An Identification of the Rulemaking:

The rulemaking addressed by this EIS has the scope of an amendment to R18-11-406(B) in Title 18, Chapter 11, Article 4 of the Arizona Administrative Code (A.A.C.) This rulemaking action is being taken by the Arizona Department of Environmental Quality (ADEQ) in order to adopt the Safe Drinking Water Act Maximum Contaminant Level (MCL) for Uranium as an Aquifer Water Quality Standard (AWQS) pursuant to Arizona Revised Statutes (A.R.S.) § 49-223. A.R.S. § 49-223 mandates that within one year after the EPA establishes or adjusts an MCL, the ADEQ Director shall open a rule making docket pursuant to A.R.S. § 41-1021 for adoption of the MCL as an AWQS. As is detailed in Section 7 of this Notice of Final Rulemaking (NFRM), ADEQ conducted the rulemaking in conformance with the statutory administrative procedure in A.R.S. Title 41, Chapter 6, and is hereby submitting this EIS, in conformance with the requirements of A.R.S. §§ 41-1055 and 41-1035. ADEQ has determined that this rulemaking will impact the regulated community, ADEQ customers, the environment, and may impact human health. This EIS was developed to evaluate the rulemaking's impacts and compare the benefits and detriments of adopting the Uranium MCL as an AWQS. The AWQSs are designed to protect the State's aquifers, all of which have been designated for drinking water-protected use (*see* A.R.S. § 49-224(B)). The AWQSs are primarily used in ADEQ's Aquifer Protection Permit program (APP), and (to a lesser extent) in some remediation projects under the Water Quality Assurance Revolving Fund (WQARF), the Voluntary Remediation Program (VRP), and elsewhere.

B. A summary of the EIS:

General & Specific Impacts

The full scope of stakeholders who may incur direct impacts from this rulemaking include APP permittees, such as Mines, Industrial Facilities and Wastewater Treatment Plants, as well as rate payers to municipal drinking water systems, ADEQ, the general public and the environment. While not all costs and benefits are borne evenly, these are the identified groups generally impacted from the Uranium AWQS rulemaking.

Costs to permittees to meet the new AWQS for Uranium are significant and indeterminate at this time. Permittees must determine appropriate treatment technology for the specific conditions applicable to them; then upgrade or install technology and train or hire personnel as needed to operate. The Matrix Report showed potential costs to permittees could range from nothing to millions, depending on a number of factors. Within this range, permittees would tend to be minimizing costs where possible, and the actual cost range is likely to be considerably narrower. Permittees will also need to cover any costs incurred by ADEQ in addressing revised AWQSs, as part of the "fee-for-service" model requirements ADEQ must operate under (*see* A.R.S. § 49-104(B)(17)). Regulated parties for other programs that utilize the AWQS, such as remediation programs such as WQARF and VRP will be minimally affected by the update to the Uranium AWQS, likely through coming into compliance with new standards. Private citizens and businesses could face increased user fees for wastewater processing, to cover the costs of implementing the revised AWQS. However, there could be offsetting effects for community water system clientele. ADEQ believes some new costs will be incurred, despite the fact that some infrastructure for processing permits is already in place. ADEQ anticipates that hundreds of permits may need to be amended to update monitoring tables that include Uranium as a parameter. Any additional costs incurred would generally be covered by increased fees paid by permittees.

Benefits to Stakeholders include the State of Arizona and its constituents, generally, due to savings that could accrue through aquifers remaining a viable asset to community water portfolios and individual well users alike. Also, private well users could see significant health benefits, including the reduction in loss of life due to reduced Uranium consumption, as well as the avoidance or reduction of uranium-related ailments and loss of income and additional financial hardships associated with the quantified and non-quantified diseases. Arizona's many community water systems (CWSs) and their clientele could see savings due to reduced UraniumF in the groundwater under the proposed AWQS. Also, some state-supported medical costs will decrease and state revenue would be affected through the investments in treatment technologies and processes to be made by permittees resulting in additional hires to operate equipment, which in turn would generate additional employment through indirect and induced (secondary) economic activity, and subsequent tax revenues. State income taxes are estimated to be just over \$24,000 for the direct and secondary hires (at the low end of the estimated cost range).

Stakeholder Process
