BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS (R19-1201)

Title 4, Chapter 33, Article 2, Nursing Care Institution Administrator Licensing and Article 4, Assisted Living Facility Manager Certification

Amend: R4-33-202, R4-33-203, R4-33-204, R4-33-206, R4-33-401, R4-33-402,
R4-33-403, R4-33-405

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2019

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 7, 2019

**SUBJECT: BOARD OF EXAMINERS OF NURSING CARE INSTITUTION
ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS
(R19-1201)**

Title 4, Chapter 33, Article 2, Nursing Care Institution Administrator Licensing and Article 4, Assisted Living Facility Manager Certification

Amend: R4-33-202, R4-33-203, R4-33-204, R4-33-206, R4-33-401, R4-33-402, R4-33-403, R4-33-405

Summary:

This regular rulemaking from the Board of Examiners of Nursing Care Institution Administrators and Assisted Living Facility Managers (Board) seeks to amend rules in Title 4, Chapter 33, Articles 2 (Nursing Care Institution Administrator Licensing) and Article 4 (Assisted Living Facility Manager Certification).

The Board states that it is amending these rules to clarify that an applicant for licensure by reciprocity is required to have been licensed in another jurisdiction for at least two years and removing the requirement of two years of employment as a nursing care institution administrator; to remove the requirement for notarization of a signature in a renewal application; to add a requirement to submit a certificate of training completed with an initial application for certification; and correcting some typographical errors.

The Board received an exemption from the rulemaking moratorium to conduct this rulemaking on June 21, 2019.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

Yes. The Board cites to both general and specific authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

No. This rulemaking does not establish a new fee or contain a fee increase.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Board did not review or rely on any study in conducting this rulemaking.

4. Summary of the agency's economic impact analysis:

The Board states that the rulemaking will have a positive impact on stakeholders by effectively clarifying requirements and removing unnecessary burdens and administrative costs for compliance.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

Yes. The Board states that the benefits of clarifying requirements and deleting an unnecessary administrative burden outweigh any minimal costs. The Board further states that because the benefits of the rulemaking are positive for licensees and applicants, no less intrusive or less costly alternative method was considered.

6. What are the economic impacts on stakeholders?

The Board and businesses functioning as licensees or applicants will benefit from the rulemaking. The general public, private persons, consumers, or political subdivisions will not be directly affected by the rulemaking.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

No. The Board did not make any changes to these rules between the Notice of Proposed Rulemaking and the Notice of Final Rulemaking.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Board did not receive any comments in conducting this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

No. These rules do not require a permit.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

Not applicable. There is no corresponding federal law.

11. Conclusion

The Board is conducting this rulemaking to clarify requirements for applicants for licensure by reciprocity, to remove a regulatory burden of providing a notarized signature on a renewal application, to add a requirement that an applicant submit a certificate of training completed with an initial application for certification, and to correct some typographical errors. The amended rules will be more clear, concise, understandable, and effective. The Board accepts the usual 60-day delayed effective date for these rules. Council staff recommends approval of this rulemaking.

Allen Imig
Executive Director

October 9, 2019

Ms. Nicole Sornsin, Chair
The Governor's Regulatory Review Council
100 North 15th Avenue, Ste. 305
Phoenix, AZ 85007

**Re: A.A.C. Title 4. Professions and Occupations
Chapter 33. Board of Examiners for Nursing Care Institution Administrators and
Assisted Living Facility Managers**

Dear Ms. Sornsin:

The attached final rule package is submitted for review and approval by the Council. The following information is provided for Council's use in reviewing the rule package:

- A. Close of record date: The rulemaking record was closed on October 9, 2019, following a period for public comment and an oral proceeding. This rule package is being submitted within the 120 days provided by A.R.S. § 41-1024(B).
- B. Relation of the rulemaking to a five-year-review report: The rulemaking does not relate to a five-year-review report.
- C. New fee: The rulemaking does not establish a new fee.
- D. Fee increase: The rulemaking does not increase an existing fee.
- E. Immediate effective date: An immediate effective date is not requested.
- F. Certification regarding studies: I certify the preamble accurately discloses the Board did not review or rely on a study in its evaluation of or justification for any rule in this rulemaking.
- G. Certification that the preparer of the EIS notified the JLBC of the number of new full-time employees necessary to implement and enforce the rule: I certify none of the rules in this rulemaking will require a state agency to employ a new full-time employee. No notification was provided to JLBC.
- H. List of documents enclosed:
 1. Cover letter signed by the Executive Director;
 2. Notice of Final Rulemaking including the preamble, table of contents, and rule text;
 3. Economic, Small Business, and Consumer Impact Statement

Sincerely,

A handwritten signature in black ink, appearing to read "Allen Imig".

Allen Imig
Executive Director

| R4-33-204 | Amend |
| R4-33-206 | Amend |
| R4-33-401 | Amend |
| R4-33-402 | Amend |
| R4-33-403 | Amend |
| R4-33-405 | Amend |
- 2. Citations to the agency's statutory rulemaking authority to include both the authorizing statute (general) and the implementing statute (specific):**
- Authorizing statute: A.R.S. § 36-446.03(A)
- Implementing statute: A.R.S. §§ 36-446, 36-446.03, 36-446.04, 36-446.05, and 36-446.06
- 3. The effective date for the rules:**
- As specified under A.R.S. § 41-1032(A), the rule will be effective 60 days after the rule package is filed with the Office of the Secretary of State.
- a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):**
- Not applicable
- b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):**
- Not applicable
- 4. Citation to all related notices published in the *Register* to include the *Register* as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:**
- Notice of Rulemaking Docket Opening: 25 A.A.R. 2093, August 16, 2019

Notice of Proposed Rulemaking: 25 A.A.R. 2176, August 30, 2019

5. The agency's contact person who can answer questions about the rulemaking:

Name: Allen Imig, Executive Director

Address: Board of Examiners for Nursing Care Administrators and Assisted Living Facility Managers

1740 West Adams Street, Suite 2490
Phoenix, AZ 85007

Telephone: (602) 364-2273

Fax: (602) 542-8316

E-mail: allen.imig@nciabd.state.az.us

6. An agency's justification and reason why a rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:

The Board is clarifying that an applicant for licensure by reciprocity is required to have been licensed in another jurisdiction for at least two years and removing the requirement of two years of employment as a nursing care institution administrator; removing the requirement for notarization; adding a requirement to submit a certificate of training completed with an initial application for certification; and correcting some typographical errors. An exemption from Executive Order 2019-01 for this rulemaking was provided by Emily Rajakovich, of the Governor's Office, in an e-mail dated June 21, 2019.

7. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The Board did not review or rely on a study in its evaluation of or justification for any rule in this rulemaking.

8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

9. A summary of the economic, small business, and consumer impact:

The Board concluded the benefits of clarifying requirements and deleting an unnecessary administrative burden outweigh any minimal costs.

10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:

No changes were made between the proposed and final rulemakings.

11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to comments:

The Board received no comments regarding the rulemaking. No one attended the oral proceeding on October 7, 2019.

12. All agencies shall list any other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

None

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The Board does not issue general permits. Rather, the Board issues individual licenses as required by the Board's statutes to each person that is qualified by statute (See A.R.S. §§ 36-446.01 and 36-446.04) and rule.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

There is no federal law specifically applicable to this rulemaking. Federal law makes receipt of federal funding contingent on a state licensing and regulating nursing care institution administrators. The specifics of the licensure and regulation are matters of state law.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No analysis was submitted.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rule:

None

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

None of the rules in the rulemaking was previously made, amended, or repealed as an emergency rule.

15. The full text of the rules follows:

ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT1

TITLE 4. PROFESSIONS AND OCCUPATIONS

CHAPTER 33. BOARD OF EXAMINERS FOR NURSING CARE INSTITUTION

ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

1. Identification of the rulemaking:

The Board is clarifying that an applicant for licensure by reciprocity is required to have been licensed in another jurisdiction for at least two years and removing the requirement of two years of employment as a nursing care institution administrator; removing the requirement for notarization; adding a requirement to submit a certificate of training completed with an initial application for certification; and correcting some typographical errors. An exemption from Executive Order 2019-01 for this rulemaking was provided by Emily Rajakovich, of the Governor's Office, in an e-mail dated June 21, 2019.

a. The conduct and its frequency of occurrence that the rule is designed to change:

Until the rulemaking is completed, the Board will continue to have rules that are unclear or impose unnecessary administrative burdens on licensees and applicants.

b. The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed:

It reflects poorly on the Board and the state to have rules that are unclear or impose unnecessary administrative burdens on licensees and applicants.

c. The estimated change in frequency of the targeted conduct expected from the rule change:

When the rulemaking is completed, the Board's rules will be clear and no longer impose an unnecessary administrative burden on licensees and applicants.

2. A brief summary of the information included in the economic, small business, and consumer impact statement:

The Board concluded the benefits of clarifying requirements and deleting an unnecessary administrative burden outweigh any minimal costs.

3. The person to contact to submit or request additional data on the information included in the economic, small business, and consumer impact statement:

Name: Allen Imig, Executive Director

1 If adequate data are not reasonably available, the agency shall explain the limitations of the data, the methods used in an attempt to obtain the data, and characterize the probable impacts in qualitative terms. (A.R.S. § 41-1055(C)).

Address: Board of Examiners for Nursing Care Administrators and Assisted Living
Facility Managers
1740 West Adams Street, Suite 2490
Phoenix, AZ 85007

Telephone: (602) 364-2273

Fax: (602) 542-8316

E-mail: allen.imig@nciabd.state.az.us

4. Persons who will be directly affected by, bear the costs of, or directly benefit from the rulemaking:

Licensees, applicants, and the Board will be directly affected by, bear the costs of, or directly benefit from the rulemaking.

There are currently 358 licensed administrators of nursing care institutions. During the last year, 42 individuals applied for licensure. Fourteen of the 42 applicants for licensure were by reciprocity and would have benefitted from the clarification in this rulemaking.

There are currently 2,108 certified managers of assisted living facilities. During the last year, 317 individuals applied for certification and would have benefitted from the clarification in this rulemaking.

All applications to the Board are currently submitted electronically. However, removing the requirement for notarization will simplify the process for everyone.

The Board incurred the cost of completing this rulemaking and will incur the cost of implementing and enforcing it. However, the Board will have the benefit of rules that are clear and not burdensome. The Board currently has four FTEs and an appropriation of \$455,000.

5. Cost-benefit analysis:

- a. Costs and benefits to state agencies directly affected by the rulemaking including the number of new full-time employees at the implementing agency required to implement and enforce the proposed rule:

The Board is the only state agency directly affected by the rulemaking. The Board will not need additional FTEs to implement and enforce the rules.

- b. Costs and benefits to political subdivisions directly affected by the rulemaking:

No political subdivision is directly affected by the rulemaking.

c. Costs and benefits to businesses directly affected by the rulemaking:

Licensees and applicants are businesses directly affected by the rulemaking. Their costs and benefits are discussed in item 4.

6. Impact on private and public employment:

The Board believes the rulemaking will have no impact on private or public employment.

7. Impact on small businesses²:

a. Identification of the small business subject to the rulemaking:

Licensees and applicants are small businesses directly affected by the rulemaking.

b. Administrative and other costs required for compliance with the rulemaking:

The rulemaking removes rather than adds administrative and other costs for compliance.

c. Description of methods that may be used to reduce the impact on small businesses:

The rulemaking clarifies requirements and removes an unnecessary burden. There is no need to reduce the impact of these beneficial changes on businesses.

8. Cost and benefit to private persons and consumers who are directly affected by the rulemaking:

No private persons or consumers are directly affected by the rulemaking.

9. Probable effects on state revenues:

There will be no effect on state revenues.

10. Less intrusive or less costly alternative methods considered:

Because the benefits of the rulemaking are positive for licensees and applicants, no less intrusive or less costly alternative method was considered.

² Small business has the meaning specified in A.R.S. § 41-1001(21).

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-27 renumbered and amended as Section R4-33-127 (Supp. 82-1). Section R4-33-127 renumbered to R4-33-212 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Repealed effective August 6, 1991 (Supp. 91-3). Emergency expired. Section R4-33-127 renumbered to R4-33-213 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-127 renumbered to R4-33-213 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-127 renumbered to R4-33-213 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-127 renumbered to R4-33-213 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-127 renumbered to R4-33-213 effective November 25, 1992 (Supp. 92-4).

R4-33-128. Renumbered

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-28 renumbered as Section R4-33-128 (Supp. 82-1). Section R4-33-128 renumbered to R4-33-213 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-128 renumbered to R4-33-214 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-128 renumbered to R4-33-214 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-128 renumbered to R4-33-214 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-128 renumbered to R4-33-214 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-128 renumbered to R4-33-214 effective November 25, 1992 (Supp. 92-4).

R4-33-129. Renumbered

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-29 renumbered as Section R4-33-129 and repealed effective February 10, 1982 (Supp. 82-1). Section R4-33-129 renumbered to R4-33-214 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-129 renumbered to R4-33-215 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-129 renumbered to R4-33-215 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-129 renumbered to R4-33-215 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-129 renumbered to R4-33-215 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-4).

(Supp. 92-3). Section R4-33-129 renumbered to R4-33-215 effective November 25, 1992 (Supp. 92-4).

R4-33-130. Renumbered

Historical Note

Adopted effective July 24, 1989 (Supp. 78-4). Former Section R4-33-30 renumbered as Section R4-33-130 and repealed, new Section R4-33-130 adopted effective February 10, 1982 (Supp. 82-1). Amended effective August 6, 1991 (Supp. 91-3). Section R4-33-130 renumbered to R4-33-215 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Amended effective August 6, 1991 (Supp. 91-3). Emergency expired. Section R4-33-130 renumbered to R4-33-216 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-130 renumbered to R4-33-216 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-130 renumbered to R4-33-216 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-130 renumbered to R4-33-216 effective November 25, 1992 (Supp. 92-4).

ARTICLE 2. NURSING CARE INSTITUTION ADMINISTRATOR LICENSING

Article 2, consisting of Sections R4-33-201 through R4-33-207 and R4-33-209 through R4-33-215, renumbered from R4-33-115 through R4-33-124 and R4-33-127 through R4-33-130 effective November 25, 1992 (Supp. 92-3).

Article 2, consisting of Sections R4-33-201 through R4-33-207 and R4-33-209 through R4-33-215, renumbered by emergency action from R4-33-115 through R4-33-124 and R4-33-127 through R4-33-130 effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2).

Article 2, consisting of Sections R4-33-201 through R4-33-215, renumbered by emergency action from R4-33-114 through R4-33-124 and R4-33-127 through R4-33-130 effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2).

R4-33-201. Requirements for Initial License by Examination

To be eligible to receive an initial license by examination as a nursing care institution administrator, an individual shall:

1. Education and training.
 - a. Hold a minimum of a baccalaureate degree from an accredited college or university and successfully complete an AIT program;
 - b. Hold a minimum of a master's degree in either a health-related field or business administration from an accredited college or university; or
 - c. Hold a minimum of an associate of arts degree in nursing from an accredited college or university and:
 - i. Be currently licensed as a registered nurse under A.R.S. § 32-1632,
 - ii. Have worked as a registered nurse for five of the last seven years, and
 - iii. Successfully complete an AIT program.
2. Examination.
 - a. Obtain the scaled passing scores on both the NAB core of knowledge and line of service examinations

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

- or qualify with NAB as a Health Services Executive, and
- b. Obtain a score of at least 80 percent on the Arizona examination;
- 3. Fingerprint clearance card. Have a valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1; and
- 4. Application. Submit all applicable information required under R4-33-204.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-15 renumbered and amended as Section R4-33-115 (Supp. 82-1). Section R4-33-202 renumbered from R4-33-115 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Amended effective August 6, 1991 (Supp. 91-3). Emergency expired. New Section R4-33-201 renumbered from R4-33-115 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). New Section R4-33-201 renumbered from R4-33-115 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). New Section R4-33-201 renumbered from R4-33-115 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. New Section R4-33-201 renumbered from R4-33-115 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-201 renumbered from R4-33-115 effective November 25, 1992 (Supp. 92-4). Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-201 renumbered to R4-33-204; new R4-33-201 renumbered from R4-33-204 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 24 A.A.R. 2734, effective November 10, 2018 (Supp. 18-3).

R4-33-202. Requirements for Initial License by Reciprocity

To be eligible for an initial license by reciprocity as a nursing care institution administrator, an individual shall:

- 1. Substantially equivalent educational requirement.
 - a. Hold a minimum of a baccalaureate degree from an accredited college or university, or
 - b. Hold ACHCA certification;
- 2. Substantially equivalent examination requirement.
 - a. Hold a valid and current license as a nursing care institution administrator issued by a state or territory, which was obtained by passing the NAB examination; or
 - b. Have evidence of qualification by NAB as a Health Services Executive; and
 - c. Obtain a score of at least 80 percent on the Arizona examination;
- 3. Be employed full-time as a nursing care institution administrator of record for the last two years in a state or territory with a licensing authority;
- 4. Never have had a nursing care administrator license suspended, revoked, or otherwise restricted by any state or territory;

- 5. Fingerprint clearance card. Have a valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1; and
- 6. Application.
 - a. Submit all applicable information required under R4-33-204,
 - b. Submit evidence of being employed full-time as a nursing care institution administrator of record for the last two years in a state or territory with a licensing authority,
 - c. Have submitted directly to the Board a certified copy of the valid and current license issued by a state or territory, and
 - d. Have submitted directly to the Board by NAB:
 - i. The examination score referenced under subsection (2)(a), or
 - ii. Evidence of qualification as a Health Services Executive.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-16 renumbered as Section R4-33-116 (Supp. 82-1). Section R4-33-203 renumbered from R4-33-116 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Amended as Section R4-33-116 effective August 6, 1991 (Supp. 91-3). Section R4-33-202 renumbered from R4-33-116 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-202 renumbered from R4-33-116 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-202 renumbered from R4-33-116 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-202 renumbered from R4-33-116 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-202 renumbered from R4-33-116 effective November 25, 1992 (Supp. 92-4). Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-202 renumbered to R4-33-205; new R4-33-202 renumbered from R4-33-203 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 24 A.A.R. 2734, effective November 10, 2018 (Supp. 18-3).

R4-33-203. Requirements for Temporary License

- A. To be eligible for a temporary license as a nursing care institution administrator, an individual shall:
 - 1. Meet the requirements specified in R4-33-201 or R4-33-202 except for the requirement at R4-33-201(2) or R4-33-202(2)(b);
 - 2. Have the owner of a nursing care institution that intends to appoint the applicant as administrator if the applicant is successful in obtaining a temporary license submit to the Board a Letter of Intent to Appoint on a form that is available from the Board. The owner of the nursing care institution shall include the following in the Letter of Intent to Appoint:
 - a. Name of the owner of the nursing care institution,

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

- b. Name and address of the nursing care institution;
- c. Name of the applicant;
- d. An affirmation of intent to appoint the applicant;
- e. Reason for requesting a temporary license for the applicant;
- f. License number of the nursing care institution, and
- g. Notarized signature of the owner of the nursing care institution;
- 3. Not have held an Arizona temporary license as a nursing care institution administrator within the past three years; and
- 4. Not have failed the Arizona or NAB examination before applying for a temporary license.
- B. At the Board's request, an applicant for a temporary license shall appear or be available by telephone for an interview with the Board.
- C. A temporary license is valid for 150 days and is not renewable. Before expiration of the temporary license, the temporary licensee shall become licensed under A.R.S. § 36-446.04 and this Article or discontinue as administrator of the nursing care institution.
- D. If a temporary licensee fails the Arizona or NAB examination during the term of the temporary license, the temporary license is automatically revoked and the former licensee shall discontinue as administrator of the nursing care institution.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-17 renumbered and amended as Section R4-33-117 (Supp. 82-1). Section R4-33-204 renumbered from R4-33-117 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Amended as Section R4-33-117 effective August 6, 1991 (Supp. 91-3). Section R4-33-203 renumbered from R4-33-117 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-203 renumbered from R4-33-117 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-203 renumbered from R4-33-117 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-203 renumbered from R4-33-117 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-203 renumbered from R4-33-117 effective November 25, 1992 (Supp. 92-4). Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-203 renumbered to R4-33-202; new R4-33-203 renumbered from R4-33-212 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-204. Initial Application

- A. An individual who desires to be licensed as a nursing care institution administrator shall submit the following information to the Board on an application form, which is available from the Board:
 - 1. Full name of the applicant;
 - 2. Other names that the applicant has used;
 - 3. Mailing address of the applicant;
- 4. E-mail address of the applicant;
- 5. Home, work, and mobile telephone numbers of the applicant;
- 6. Applicant's date and place of birth;
- 7. Applicant's Social Security number;
- 8. Address of every residence at which the applicant has lived in the last five years;
- 9. Name and address of every accredited college or university attended, dates of attendance, date of graduation, and degree or certificate received;
- 10. Information regarding professional licenses or certifications currently or previously held by the applicant, including:
 - a. Name of issuing agency;
 - b. License or certificate number;
 - c. Issuing jurisdiction;
 - d. Date on which the license or certificate was first issued;
 - e. Whether the license or certificate is current; and
 - f. Whether the license or certificate is in good standing and if not, an explanation;
- 11. Information regarding the applicant's employment record for the last five years, including:
 - a. Name, address, and telephone number of each employer;
 - b. Title of position held by the applicant;
 - c. Name of applicant's supervisor;
 - d. Dates of employment; and
 - e. Reason for employment termination;
- 12. Whether the applicant was ever denied a professional license or certificate and if so, the kind of license or certificate denied, licensing authority making the denial, and date;
- 13. Whether the applicant ever voluntarily surrendered a professional license or certificate and if so, the kind of license or certificate surrendered, licensing authority, date, and reason for the surrender;
- 14. Whether the applicant ever allowed a professional license or certificate to lapse and if so, the kind of license or certificate that lapsed, licensing authority, date, reason for lapse, and whether the license or certificate was reinstated;
- 15. Whether the applicant ever had a limitation imposed on a professional license or certificate and if so, the kind of license or certificate limited, licensing authority, date, nature of limitation, reason for limitation, and whether the limitation was removed;
- 16. Whether the applicant ever had a professional license or certificate suspended or revoked and if so, the kind of license or certificate suspended or revoked, licensing authority, date, and reason for the suspension or revocation;
- 17. Whether the applicant ever was subject to disciplinary action with regard to a professional license or certificate and if so, the kind of license or certificate involved, licensing authority, date, and reason for and nature of the disciplinary action;
- 18. Whether any unresolved complaint against the applicant is pending with a licensing authority, professional association, health care facility, or nursing care institution and if so, the nature of and where the complaint is pending;
- 19. Whether the applicant ever was charged with or convicted of a felony or a misdemeanor, other than a minor traffic violation, in any court and if so, the nature of the offense, jurisdiction, and date of discharge; and

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

20. Whether the applicant ever was pardoned from or had expunged the record of a felony conviction and if so, the nature of the offense, jurisdiction, and date of pardon or expunging.
- B. In addition to the application form required under subsection (A), an applicant shall have the following submitted directly to the Board on the applicant's behalf:
 1. Official transcript submitted by each accredited college or university attended by the applicant;
 2. Verification of license that is signed, authenticated by seal or notarization, and submitted by each agency that ever issued a professional license to the applicant;
 3. "Character Certification" form submitted by two individuals who have known the applicant for at least three years and are not related to, employed by, or employing the applicant; and
 4. If the applicant is certified by ACHCA, verification of certification submitted by ACHCA;
- C. In addition to complying with subsections (A) and (B), an applicant shall submit:
 1. If the applicant completed an AIT program, a photocopy of the certificate issued upon completion;
 2. For every felony or misdemeanor charge listed under subsection (A)(19), a copy of documents from the appropriate court showing the disposition of each charge;
 3. For every felony or misdemeanor conviction listed under subsection (A)(19), a copy of documents from the appropriate court showing whether the applicant met all judicially imposed sentencing terms;
 4. Passport-size, color, full-face photograph of the applicant taken within the last 180 days and signed on the back by the applicant;
 5. Fingerprint clearance card.
 - a. Photocopy of the front and back of the applicant's fingerprint clearance card,
 - b. Proof of submission of an application for a fingerprint clearance card, or
 - c. If denied a fingerprint clearance card, proof the applicant qualifies for a good-cause exception hearing under A.R.S. § 41-619.55;
 6. Documentation, as described in A.R.S. § 41-1080(A), of U.S. citizenship or alien status indicating presence in the U.S. is authorized under federal law;
 7. Signed and notarized affidavit affirming the information provided in the application is true and complete and authorizing others to release information regarding the applicant to the Board; and
 8. Fees required under R4-33-104(A)(1) and (A)(2).
- D. If required by the Board under A.R.S. § 36-446.03(D), an applicant shall appear before the Board.
- E. When the information required under subsections (A) through (C) is received and following an appearance before the Board required under subsection (D), the Board shall provide notice regarding whether the applicant may take the licensing examinations required under R4-33-201 or R4-33-202.
- F. Because of the time required for the Board to perform an administrative completeness review under R4-33-103, an applicant shall ensure the information required under subsections (A) through (C) is submitted at least 30 days before the applicant expects to take the Arizona examination.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-18 renumbered as Section R4-33-118 and repealed effective February 10, 1982 (Supp. 82-1). Section R4-33-205 renumbered from R4-33-118 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-204 renumbered from R4-33-118 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-204 renumbered from R4-33-118 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-204 renumbered from R4-33-118 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-204 renumbered from R4-33-118 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-204 renumbered from R4-33-118 effective November 25, 1992 (Supp. 92-4). Final amendment at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-204 renumbered to R4-33-201; new R4-33-204 renumbered from R4-33-201 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 24 A.A.R. 2734, effective November 10, 2018 (Supp. 18-3).

R4-33-205. Administration of Examinations; License Issuance

- A. The Board shall administer the Arizona examination at least twice each year at times and places specified by the Board.
- B. An applicant shall make arrangements directly with NAB to take the NAB examination.
- C. The Board shall provide written notice to an applicant regarding whether the applicant passed a required examination.
- D. An applicant for licensure under R4-33-201 is not required to take or pass both examinations at the same time. An applicant who passes one of the examinations listed in R4-33-201(2) but fails the other is required to retake only the examination failed.
- E. When an applicant passes the examinations required under R4-33-201 or R4-33-202, the Board shall send the applicant a written notice that the Board will issue a license to the applicant when the applicant submits to the Board the fee required under R4-33-104(A)(4). If the applicant fails to submit the fee within six months of the Board's notice, the Board shall administratively close the applicant's file. An individual whose file is administratively closed may receive further consideration only by submitting a new application under R4-33-201 or R4-33-202.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Amended effective July 24, 1978 (Supp. 78-4). Former Section R4-33-19 renumbered as Section R4-33-119 and repealed, new Section R4-33-119 adopted effective February 10, 1982 (Supp. 82-1). Amended effective May 2, 1984 (Supp. 84-3). Amended as an emergency effective October 2, 1989, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 89-4). Emergency expired. Emergency amendments readopted without change effective January 3, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-1). Emergency amendments adopted again without change effective April 3, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days; amended effective June 14, 1990 (Supp. 90-2). Section R4-33-206 renumbered from R4-33-119 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

1026, valid for only 90 days (Supp. 91-2). Amended as R4-33-119 effective August 6, 1991 (Supp. 91-3). Emergency expired. Section R4-33-206 renumbered from R4-33-119 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-205 renumbered from R4-33-119 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-205 renumbered from R4-33-119 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-205 renumbered from R4-33-119 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-205 renumbered from R4-33-119 effective November 25, 1992 (Supp. 92-4). Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 10 A.A.R. 805, effective April 13, 2004 (Supp. 04-1). Section R4-33-205 renumbered from R4-33-202 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-206. Renewal Application

- A. The Board shall provide a licensee with notice of the need for license renewal. Failure to receive notice of the need for license renewal does not excuse a licensee's failure to renew timely.
- B. An administrator license expires at midnight on June 30 of each even-numbered year.
- C. To renew an administrator license, the licensee shall submit the following information to the Board, on or before June 30, on a renewal application, which is available from the Board:
 - 1. Current address;
 - 2. Current e-mail address;
 - 3. Current home and business telephone numbers;
 - 4. Whether within the last 24 months the licensee was convicted of or pled guilty or no contest to a criminal offense, other than a minor traffic violation, in any court and if so, attach a copy of the original arrest record and final court judgment;
 - 5. Whether within the last 24 months the licensee was denied a professional license or had a professional license revoked, suspended, placed on probation, limited, or restricted in any way by a state or federal regulatory authority and if so, the kind of license, license number, issuing authority, nature of the regulatory action, and date;
 - 6. An affirmation that the number of hours of continuing education required under R4-33-501 has been completed; and
 - 7. The licensee's dated and notarized signature affirming the information provided is true and complete.
- D. In addition to the renewal application required under subsection (C), a licensee shall submit:
 - 1. A photocopy of the front and back of the licensee's fingerprint clearance card;
 - 2. Documentation described in A.R.S. § 41-1080(A) unless the documentation previously submitted under R4-36-204(C)(6) established U.S. citizenship or was a non-expiring work authorization issued by the federal government; and
 - 3. The license renewal fee required under R4-33-104.

- E. An individual whose license expires because of failure to renew timely may apply for renewal by complying with subsections (C) and (D) if:
 - 1. The individual complies with subsections (C) and (D) on or before July 31,
 - 2. The individual pays the late renewal fee prescribed under R4-33-104, and
 - 3. The individual affirms the individual has not acted as a nursing care institution administrator since the license expired.
- F. An individual whose license expires because of failure to renew timely and who does not comply with subsection (E) may become licensed as a nursing care institution administrator only by complying with R4-33-201 or R4-33-202.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Amended effective July 24, 1978 (Supp. 78-4). Former Section R4-33-20 renumbered and amended as Section R4-33-120 (Supp. 82-1). Section R4-33-207 renumbered from R4-33-120 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Amended as R4-33-120 effective August 6, 1991 (Supp. 91-3). Section R4-33-207 renumbered from R4-33-120 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-207 renumbered from R4-33-120 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-207 renumbered from R4-33-120 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-207 renumbered from R4-33-120 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-206 renumbered from R4-33-120 effective November 25, 1992 (Supp. 92-4). Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 15 A.A.R. 1975, effective November 3, 2009 (Supp. 09-4). Amended by final rulemaking at 24 A.A.R. 2734, effective November 10, 2018 (Supp. 18-3).

R4-33-207. Inactive Status

- A. The Board shall place an administrator's license on inactive status if the administrator:
 - 1. Is in good standing in Arizona,
 - 2. Submits a written request to the Board to be placed on inactive status, and
 - 3. Submits evidence that complies with R4-33-501(D) showing that the administrator completed two hours of continuing education for each month in the current biennial period before the request to be placed on inactive status.
- B. Within seven days after receiving a request to be placed on inactive status, the Board shall provide the administrator written confirmation of inactive status.
- C. An administrator whose license is on inactive status is not required to comply with R4-33-501.

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

- D. An inactive license expires under R4-33-206 unless the administrator timely submits a renewal application and the fee required under R4-33-104(A)(7).
- E. To resume active licensure status, an administrator shall:
 - 1. Submit evidence that complies with R4-33-501(D) showing that the administrator completed 25 hours of continuing education within the six months before requesting to resume active licensure status, and
 - 2. Submit a written request to the Board to resume active licensure status.
- F. The Board shall grant a request to resume active licensure status if the requirements of subsection (E) are met. Within seven days after receiving the written request to resume active licensure status, the Board shall send written notice to the administrator granting or denying active status.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-21 renumbered and amended as Section R4-33-121 (Supp. 82-1). Section R4-33-208 renumbered from R4-33-121 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-208 renumbered from R4-33-121 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-208 renumbered from R4-33-121 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-208 renumbered from R4-33-121 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired.

Section R4-33-208 renumbered from R4-33-121 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-207 renumbered from R4-33-121 effective November 25, 1992 (Supp. 92-4). Section R4-33-207 renumbered to R4-33-208, new Section adopted by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-208. Standards of Conduct; Disciplinary Action

- A. An administrator shall know and comply with all federal and state laws applicable to operation of a nursing care institution.
- B. An administrator shall not:
 - 1. Engage in unprofessional conduct as defined at A.R.S. § 36-446;
 - 2. Be addicted to or dependent on the use of narcotics or other drugs, including alcohol;
 - 3. Directly or indirectly permit an owner, officer, or employee of a nursing care institution to solicit, offer, or receive any premium, rebate, or other valuable consideration in connection with furnishing goods or services to patients of the institution unless the resulting economic benefit is directly passed to the patients;
 - 4. Directly or indirectly permit an owner, officer, or employee of a nursing care institution to solicit, offer, or receive any premium, rebate, or other valuable consideration for referring a patient to another person or place unless the resulting economic benefit is directly passed to the patient;
 - 5. Willfully permit the unauthorized disclosure of information relating to a patient or a patient's records;
 - 6. Discriminate against a patient or employee on the basis of race, sex, age, religion, disability, or national origin;

- 7. Misrepresent the administrator's qualifications, education, or experience;
 - 8. Aid or abet another person to misrepresent that person's qualifications, education, or experience;
 - 9. Defend, support, or ignore unethical conduct of an employee, owner, or other administrator;
 - 10. Engage in any conduct or practice contrary to recognized community standards or ethics of a nursing care institution administrator;
 - 11. Engage in any conduct or practice that is or might constitute incompetence, gross negligence, repeated negligence, or negligence that might constitute a danger to the health, welfare, or safety of a patient or the public;
 - 12. Procure or attempt to procure by fraud or misrepresentation a license or renewal of a license as a nursing care institution administrator;
 - 13. Violate a formal order, condition of probation, or stipulation issued by the Board;
 - 14. Commit an act of sexual abuse, misconduct, harassment, or exploitation;
 - 15. Retaliate against any person who reports in good faith to the Board alleged incompetence or illegal or unethical conduct of any administrator; or
 - 16. Accept an appointment as administrator of a nursing care institution in violation of R4-33-212.
- C. The Board shall consider a final judgment or conviction for a felony, an offense involving moral turpitude, or direct or indirect elder abuse as grounds for disciplinary action under A.R.S. § 36-446.07 including denial of a license or license renewal.
 - D. An administrator who violates any provision of A.R.S. Title 36, Chapter 4, Article 6 or this Chapter is subject to discipline under A.R.S. § 36-446.07.

Historical Note

Adopted effective July 24, 1978 (Supp. 78-4). Former Section R4-33-22 renumbered as Section R4-33-122 (Supp. 82-1). Section R4-33-209 renumbered from R4-33-122 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-209 renumbered from R4-33-122 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-209 renumbered from R4-33-122 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-209 renumbered from R4-33-122 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-209 renumbered from R4-33-122 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-208 renumbered from R4-33-122 effective November 25, 1992 (Supp. 92-4). Section R4-33-208 renumbered to R4-33-209, new Section R4-33-208 renumbered from R4-33-207 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-209. Renumbered

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-23 renumbered as Section R4-33-123

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

(Supp. 82-1). Section R4-33-210 renumbered from R4-33-123 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-210 renumbered from R4-33-123 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-210 renumbered from R4-33-123 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-210 renumbered from R4-33-123 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-210 renumbered from R4-33-123 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-209 renumbered from R4-33-123 effective November 25, 1992 (Supp. 92-4). Section R4-33-209 renumbered to R4-33-210, new Section R4-33-209 renumbered from R4-33-208 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section R4-33-209 renumbered to R4-33-106 by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-210. Licensure Following Revocation

An individual who wishes to be licensed after the individual's license as a nursing care institution administrator is revoked shall:

1. Not apply for licensure until at least 12 months have passed since the revocation; and
2. Apply for licensure under R4-33-201 or R4-33-202.

Historical Note

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-24 renumbered as Section R4-33-124 (Supp. 82-1). Section R4-33-211 renumbered from R4-33-124 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-212 renumbered from R4-33-124 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-210 renumbered from R4-33-124 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-210 renumbered from R4-33-124 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-210 renumbered from R4-33-124 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-210 renumbered from R4-33-124 effective November 25, 1992 (Supp. 92-4). Section R4-33-210 renumbered to R4-33-211, new Section R4-33-210 renumbered from R4-33-209 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-211. Notice of Appointment

- A. An administrator shall provide written notice to the Board, within 30 days, of being appointed administrator of a nursing care institution or terminating an appointment.
- B. An administrator shall include the following, as applicable, in a notice regarding the administrator's appointment:
 1. Administrator's name,
 2. Administrator's license number,

3. Name and address of the nursing care institution to which the administrator is appointed,
4. Date of appointment,
5. Name and address of the nursing care institution at which the administrator's appointment is terminated, and
6. Date of termination.

Historical Note

Section R4-33-211 renumbered from R4-33-125 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1).

Section R4-33-211 renumbered from R4-33-125 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-211 renumbered from R4-33-125 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-211 renumbered from R4-33-125 effective November 25, 1992 (Supp. 92-4). New Section R4-33-211 renumbered from R4-33-210 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-212. Appointment as Administrator of Multiple Nursing Care Institutions

- A. Except as provided in subsection (B), an individual licensed under R4-33-201 or R4-33-202 shall not be appointed as administrator of more than one nursing care institution.
- B. An individual licensed under R4-33-201 or R4-33-202 may be appointed as administrator of a second nursing care institution if:
 1. Neither nursing care institution is operating under a provisional license;
 2. The two nursing care institutions are no more than 25 miles apart; and
 3. The appointment at the second institution is for no more than 90 days.
- C. A licensed administrator who is appointed as administrator of a second nursing care institution under subsection (B) shall:
 1. For both nursing care institutions, designate in writing an individual who is on the nursing care institution premises and accountable for the services provided at the nursing care institution when the licensed administrator is not on the nursing care institution premises. The designated individual shall:
 - a. Be at least 21 years old;
 - b. Be qualified through education and experience to fulfill the responsibilities of a nursing care institution administrator; and
 - c. Never have had licensure or certification suspended or revoked by the Board;
 2. Ensure that the name of the designated individual is conspicuously displayed at all times in a manner that informs those seeking assistance who is accountable for the services provided;
 3. Place the written notice of designation required under subsection (C)(1) in the personnel file of the individual designated; and
 4. Be available to the individual designated under subsection (C)(1) by telephone or electronically within 60 minutes.

Historical Note

Adopted effective August 6, 1991 (Supp. 91-3). Section R4-33-211 renumbered from R4-33-126 by emergency

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-212 renumbered from R4-33-126 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-212 renumbered from R4-33-126 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-212 renumbered from R4-33-126 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-212 renumbered from R4-33-126 effective November 25, 1992 (Supp. 92-4). Section R4-33-212 amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section R4-33-212 renumbered to R4-33-203 by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). New Section made by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-213. Repealed**Historical Note**

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-27 renumbered and amended as Section R4-33-127 (Supp. 82-1). Section R4-33-212 renumbered from R4-33-127 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Repealed as R4-33-127 effective August 6, 1991 (Supp. 91-3). Emergency expired. Section R4-33-213 renumbered from R4-33-127 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4).

Section R4-33-213 renumbered from R4-33-127 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1).

Section R4-33-213 renumbered from R4-33-127 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-213 renumbered from R4-33-127 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-213 renumbered from R4-33-127 effective November 25, 1992 (Supp. 92-4).

Section R4-33-213 renumbered from R4-33-214 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-214. Repealed**Historical Note**

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-28 renumbered as Section R4-33-128 (Supp. 82-1). Section R4-33-213 renumbered from R4-33-128 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-214 renumbered from R4-33-128 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-214 renumbered from R4-33-128 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-214 renumbered from R4-33-128 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2).

only 90 days (Supp. 92-2). Emergency expired. Section R4-33-214 renumbered from R4-33-128 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-214 renumbered from R4-33-128 effective November 25, 1992 (Supp. 92-4). Section R4-33-214 renumbered from R4-33-216 and amended by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-215. Renumbered**Historical Note**

Adopted effective October 12, 1976 (Supp. 76-5). Former Section R4-33-29 renumbered as Section R4-33-129 and repealed effective February 10, 1982 (Supp. 82-1). Section R4-33-214 renumbered from R4-33-129 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. Section R4-33-214 renumbered from R4-33-129 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Section R4-33-215 renumbered from R4-33-129 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1). Section R4-33-215 renumbered from R4-33-129 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-215 renumbered from R4-33-129 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3). Section R4-33-215 renumbered from R4-33-129 effective November 25, 1992 (Supp. 92-4).

R4-33-216. Renumbered**Historical Note**

Adopted effective July 24, 1989 (Supp. 78-4). Former Section R4-33-30 renumbered as Section R4-33-130 and repealed, new Section R4-33-130 adopted effective February 10, 1982 (Supp. 82-1). Section R4-33-215 renumbered from R4-33-130 by emergency action effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Amended as R4-33-130 effective August 6, 1991 (Supp. 91-3). Emergency expired.

Section R4-33-216 renumbered from R4-33-130 by emergency action effective November 29, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4).

Section R4-33-216 renumbered from R4-33-130 by emergency action effective February 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-1).

Section R4-33-216 renumbered from R4-33-130 by emergency action effective May 28, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-2). Emergency expired. Section R4-33-216 renumbered from R4-33-130 by emergency action effective September 10, 1992, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 92-3).

Section R4-33-216 renumbered from R4-33-130 by emergency action effective November 25, 1992 (Supp. 92-4).

Text corrected to include amendments adopted effective August 6, 1991, which were inadvertently omitted (Supp. 95-2). Section R4-33-216 renumbered to R4-33-214 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1).

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS**R4-33-312. Renumbered****Historical Note**

Emergency adoption effective June 19, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-2). Emergency expired. R4-33-312 renumbered from emergency rule R4-33-311 and adopted with changes effective November 25, 1992 (Supp. 92-4). Section R4-33-312 renumbered to R4-33-412 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1).

ARTICLE 4. ASSISTED LIVING FACILITY MANAGER CERTIFICATION**R4-33-401. Requirements for Initial Certification by Examination**

- A. Except as provided in subsection (B), an individual who wishes to receive an initial certificate by examination as an assisted living facility manager shall:
1. Education:
 - a. Earn a high school diploma or G.E.D., and
 - b. Complete an assisted living facility caregiver training program that is approved by the Board under A.A.C. R4-33-701, and
 - c. Complete an assisted living facility manager training program that is approved by the Board under A.A.C. R4-33-601, or
 - d. Hold a license in good standing issued under A.R.S. Title 32, Chapter 13, 15, or 17 or 4 A.A.C. 33, Article 2;
 2. Work experience. Complete at least 2,080 hours of paid work experience in a health-related field within the five years before application;
 3. Examination. Obtain a score of at least 75 percent on the Arizona examination;
 4. Training. Complete an adult cardiopulmonary resuscitation and basic first-aid training program;
 5. Fingerprint clearance card. Have a valid fingerprint clearance card issued under A.R.S. Title 41, Chapter 12, Article 3.1; and
 6. Submit all applicable information required under R4-33-403.
- B. An individual who holds a license in good standing issued under A.R.S. Title 32, Chapter 13, 15, or 17 or 4 A.A.C. 33, Article 2 is exempt from the requirements specified in subsections (A)(1)(b) and (4).

Historical Note

Section R4-33-401 renumbered from R4-33-301 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section expired under A.R.S. § 41-1056(E) at 10 A.A.R. 3897, effective July 31, 2004 (Supp. 04-3).

Section R4-33-401 renumbered from R4-33-402 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-402. Requirements for a Temporary Certificate

- A. To be eligible for a temporary certificate as an assisted living facility manager, an individual shall:
1. Meet the requirements under R4-33-401 except for the requirement at R4-33-401(3);
 2. Have the owner of an assisted living facility that intends to appoint the applicant as manager if the applicant is successful in obtaining a temporary certificate submit to the Board a Letter of Intent to Appoint on a form that is avail-

able from the Board. The owner of the assisted living facility shall include the following in the Letter of Intent to Appoint:

- a. Name of the owner of the assisted living facility;
 - b. Name and address of the assisted living facility;
 - c. Name of the applicant;
 - d. An affirmation of intent to appoint the applicant;
 - e. Reason for requesting a temporary certificate for the applicant;
 - f. License number of the assisted living facility; and
 - g. Notarized signature of the owner of the assisted living facility;
3. Not have held an Arizona temporary certificate as an assisted living facility manager within the past three years; and
 4. Not have failed the Arizona examination before applying for the temporary certificate.
- B. At the Board's request, an applicant for a temporary certificate shall appear or be available by telephone for an interview with the Board.
- C. A temporary certificate is valid for 150 days and is not renewable. Before expiration of the temporary certificate, the temporary certificate holder shall obtain a certificate under A.R.S. § 36-446.04 and this Article or discontinue as manager of the assisted living facility.
- D. If a temporary certificate holder fails the Arizona examination during the term of the temporary certificate, the temporary certificate is automatically revoked and the former temporary certificate holder shall discontinue as manager of the assisted living facility.

Historical Note

Section R4-33-402 renumbered from R4-33-302 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-402 renumbered to R4-33-401; new R4-33-402 renumbered from R4-33-410 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). R4-33-402(A)(1) citation to R4-33-401(A)(3) corrected to R4-33-401(3) at the request of the Department, see Office File No. M10-416 filed October 18, 2010 (Supp. 09-4). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-403. Initial Application

- A. An individual who desires to be certified as a manager of an assisted living facility shall submit the following information to the Board on an application form, which is available from the Board:
1. Full name of the applicant;
 2. Other names that the applicant has used;
 3. Mailing address of the applicant;
 4. Home, work, and mobile telephone numbers of the applicant;
 5. Applicant's date and place of birth;
 6. Applicant's Social Security number;
 7. Address of every residence at which the applicant has lived in the last five years;
 8. Education information regarding the applicant, including:
 - a. Name and location of last high school attended;
 - b. Date of high school graduation or date on which a G.E.D. was earned; and
 - c. Name and address of every accredited college or university attended, dates of attendance, date of graduation, and degree or certificate earned;

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

9. Information regarding professional licenses or certifications currently or previously held by the applicant, including:
 - a. Name of issuing agency;
 - b. License or certificate number;
 - c. Issuing jurisdiction;
 - d. Date on which the license or certificate was first issued;
 - e. Whether the license or certificate is current; and
 - f. Whether the license or certificate is in good standing and if not, an explanation;
 10. Information regarding the applicant's employment record for the last five years, including:
 - a. Name, address, and telephone number of each employer;
 - b. Title of position held by the applicant;
 - c. Name of applicant's supervisor;
 - d. Dates of employment;
 - e. Number of hours worked each week;
 - f. Whether the employment was full or part time; and
 - g. Reason for termination;
 11. Whether the applicant was ever denied a professional license or certificate and if so, the kind of license or certificate denied; licensing authority making the denial, and date;
 12. Whether the applicant ever voluntarily surrendered a professional license or certificate and if so, the kind of license or certificate surrendered, licensing authority, date, and reason for the surrender;
 13. Whether the applicant ever allowed a professional license or certificate to lapse and if so, the kind of license or certificate that lapsed, licensing authority, date, reason for lapse, and whether the license or certificate was reinstated;
 14. Whether the applicant ever had a limitation imposed on a professional license or certificate and if so, the kind of license or certificate limited, licensing authority, date, nature of limitation, reason for limitation, and whether the limitation was removed;
 15. Whether the applicant ever had a professional license or certificate suspended or revoked and if so, the kind of license or certificate suspended or revoked, licensing authority, date, and reason for suspension or revocation;
 16. Whether the applicant ever was subject to disciplinary action with regard to a professional license or certificate and if so, the kind of license or certificate involved, licensing authority, date, and reason for and nature of the disciplinary action;
 17. Whether any unresolved complaint against the applicant is pending with a licensing authority, professional association, health care facility, or assisted living facility and if so, the nature of and where the complaint is pending;
 18. Whether the applicant ever was charged with or convicted of a felony or a misdemeanor, other than a minor traffic violation, in any court and if so, the nature of the offense, jurisdiction, and date of discharge; and
 19. Whether the applicant ever was pardoned from or had the record expunged of a felony conviction and if so, the nature of the offense, jurisdiction, and date of pardon or expunging.
- B.** In addition to the application form required under subsection (A), an applicant shall submit or have submitted on the applicant's behalf:
1. Education:
- a. Copy of the applicant's high school diploma or G.E.D., and
 - b. Certificate of completion issued within a year before the date of application from the training course described under R4-33-401(1)(b), or
 - c. Copy of the applicant's license issued under A.R.S. Title 32, Chapter 13, 15, or 17 or 4 A.A.C. 33, Article 2;
 2. Documentation of 2,080 hours of paid work experience in a health-related field;
 3. Copy of current certification in adult cardiopulmonary resuscitation and first aid;
 4. Verification of license that is signed, authenticated by seal or notarization, and submitted directly to the Board by each agency that ever issued a professional license to the applicant;
 5. "Character Certification" form submitted directly to the Board by two individuals who have known the applicant for at least three years and are not related to, employed by, or employing the applicant;
 6. For every felony or misdemeanor charge listed under subsection (A)(18), a copy of documents from the appropriate court showing the disposition of each charge;
 7. For every felony or misdemeanor conviction listed under subsection (A)(18), a copy of documents from the appropriate court showing whether the applicant met all judicially imposed sentencing terms;
 8. Passport-size, color, full-face photograph of the applicant taken within the last 180 days and signed on the back by the applicant;
 9. Fingerprint clearance card.
 - a. Photocopy of the front and back of the applicant's fingerprint clearance card;
 - b. Proof of submission of an application for a fingerprint clearance card; or
 - c. If denied a fingerprint clearance card, proof that the applicant qualifies for a good-cause exception hearing under A.R.S. § 41-619.55;
 10. A completed Arizona Statement of Citizenship and Alien Status for State Public Benefits, which is a form available from the Board;
 11. Signed and notarized affidavit affirming that the information provided in the application is true and complete and authorizing others to release information regarding the applicant to the Board; and
 12. Fees required under R4-33-104(B)(1) and (B)(2).
- C. If required by the Board under A.R.S. § 36-446.03(D), an applicant shall appear before the Board.
- D. When the information required under subsections (A) and (B) is received and following an appearance before the Board required under subsection (C), the Board shall provide notice regarding whether the applicant may take the Arizona examination required under R4-33-401(3).
- E. Because of the time required for the Board to perform an administrative completeness review under R4-33-103, an applicant shall submit the information required under subsections (A) and (B) at least 30 days before the applicant expects to take the Arizona examination.

Historical Note

Section R4-33-403 renumbered from R4-33-303 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1).

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

R4-33-404. Administration of Examination; Certificate Issuance

- A. The Board shall administer the Arizona examination at least twice each year at times and places specified by the Board.
- B. The Board shall provide written notice to an applicant regarding whether the applicant passed the Arizona examination.
- C. When an applicant passes the Arizona examination, the Board shall send the applicant a written notice that the Board will issue a certificate to the applicant when the applicant submits to the Board the fee required under R4-33-104(B)(4). If the applicant fails to submit the fee within six months of the Board's notice, the Board shall administratively close the applicant's file. An individual whose file is administratively closed may receive further consideration only by submitting a new application under R4-33-401.

Historical Note

Section R4-33-404 renumbered from R4-33-304 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). R4-33-404 corrected by adding a subsection (C) at the request of the Department, Office File No. M10-416 filed October 18, 2010 (Supp. 09-4).

R4-33-405. Renewal Application

- A. The Board shall provide a certificate holder with notice of the need for certificate renewal. Failure to receive notice of the need for certificate renewal does not excuse a certificate holder's failure to renew timely.
- B. A manager certificate expires at midnight on June 30 of each odd-numbered year.
- C. To renew a manager certificate, the certificate holder shall submit the following information to the Board, on or before June 30, on a renewal application, which is available from the Board:
 1. Current address;
 2. Current home and business telephone numbers;
 3. Whether within the last 24 months the certificate holder was convicted of or pled guilty or no contest to a criminal offense, other than a minor traffic violation, in any court and if so, attach a copy of the original arrest record and final court judgment;
 4. Whether within the last 24 months the certificate holder was denied a professional license or had a professional license revoked, suspended, placed on probation, limited, or restricted in any way by a state or federal regulatory authority and if so, the kind of license, license number, issuing authority, nature of the regulatory action, and date;
 5. An affirmation that the number of hours of continuing education required under R4-33-501 has been completed;
 6. An affirmation that the certificate holder complies with the disclosure requirements under R4-33-408; and
 7. The certificate holder's dated and notarized signature affirming that the information provided is true and complete.
- D. In addition to the renewal application required under subsection (C), a certificate holder shall submit:
 1. A photocopy of the front and back of the certificate holder's fingerprint clearance card;
 2. A completed Arizona Statement of Citizenship and Alien Status for State Public Benefits, which is a form available from the Board; and
 3. The renewal fee required under R4-33-104.

- E. An individual whose certificate expires because of failure to renew timely may apply for renewal by complying with subsections (C) and (D) if:
 1. The individual complies with subsections (C) and (D) on or before July 31,
 2. The individual pays the late renewal fee prescribed under R4-33-104, and
 3. The individual affirms that the individual has not acted as an assisted living facility manager since the certificate expired.
- F. An individual whose certificate expires because of failure to renew timely and who does not comply with subsection (E) may obtain a manager certificate only by complying with R4-33-401.

Historical Note

Section R4-33-405 renumbered from R4-33-305 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 10 A.A.R. 805, effective April 13, 2004 (Supp. 04-1). Section R4-33-405 renumbered from R4-33-406 and amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1). Amended by final rulemaking at 15 A.A.R. 1975, effective November 3, 2009 (Supp. 09-4).

R4-33-406. Inactive Status

- A. The Board shall place a manager's certificate on inactive status if the manager:
 1. Is in good standing in Arizona,
 2. Submits a written request to the Board to be placed on inactive status, and
 3. Submits evidence that complies with R4-33-501(D) showing that the manager completed one hour of continuing education for each month in the current biennial period before the request to be placed on inactive status.
- B. Within seven days after receiving a request to be placed on inactive status, the Board shall provide the manager written confirmation of inactive status.
- C. A manager whose certificate is on inactive status is not required to comply with R4-33-501.
- D. An inactive certificate expires under R4-33-405 unless the manager timely submits a renewal application and the fee required under R4-33-104(B)(7).
- E. To resume active certificate status, a manager shall:
 1. Submit evidence that complies with R4-33-501(D) showing that the manager completed 12 hours of continuing education within the six months before requesting to resume active certificate status,
 2. Submit a written request to the Board to resume active certificate status, and
 3. Submit the fee required under R4-33-104(B)(4).
- F. The Board shall grant a request to resume active certificate status if the requirements of subsection (E) are met. Within seven days after receiving the written request to resume active certificate status, the Board shall send written notice to the manager granting or denying active status.

Historical Note

New Section R4-33-406 renumbered from R4-33-306 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Former R4-33-406 renumbered to R4-33-405; new R4-33-406 made by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

R4-33-407. Standards of Conduct; Disciplinary Action

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS

- A. A manager shall know and comply with all federal and state laws applicable to the operation of an assisted living facility.
- B. A manager shall not:
 - 1. Engage in unprofessional conduct as defined at A.R.S. § 36-446;
 - 2. Be addicted to or dependent on the use of narcotics or other drugs, including alcohol;
 - 3. Directly or indirectly permit an owner, officer, or employee of an assisted living facility to solicit, offer, or receive any premium, rebate, or other valuable consideration in connection with furnishing goods or services to residents unless the resulting economic benefit is directly passed to the residents;
 - 4. Directly or indirectly permit an owner, officer, or employee of an assisted living facility to solicit, offer, or receive any premium, rebate, or other valuable consideration for referring a resident to another person or place unless the resulting economic benefit is directly passed to the resident;
 - 5. Willfully permit the unauthorized disclosure of information relating to a resident or a resident's records;
 - 6. Discriminate against a resident or employee on the basis of race, sex, age, religion, disability, or national origin;
 - 7. Misrepresent the manager's qualifications, education, or experience;
 - 8. Aid or abet another person to misrepresent that person's qualifications, education, or experience;
 - 9. Defend, support, or ignore unethical conduct of an employee, owner, or other manager;
 - 10. Engage in any conduct or practice contrary to recognized community standards or ethics of an assisted living facility manager;
 - 11. Engage in any conduct or practice that is or might constitute incompetence, gross negligence, repeated negligence, or negligence that might constitute a danger to the health, welfare, or safety of a resident or the public;
 - 12. Procure or attempt to procure by fraud or misrepresentation a certificate or renewal of a certificate as an assisted living facility manager;
 - 13. Violate a formal order, condition of probation, or stipulation issued by the Board;
 - 14. Commit an act of sexual abuse, misconduct, harassment, or exploitation;
 - 15. Retaliate against any person who reports in good faith to the Board alleged incompetence or illegal or unethical conduct of any manager;
 - 16. Allow the manager's certificate to be displayed as required under R4-33-108(B) unless the manager has been appointed as specified in R4-33-410; or
 - 17. Manage an assisted living facility in violation of R4-33-411.
- C. The Board shall consider a final judgment or conviction for a felony, an offense involving moral turpitude, or direct or indirect elder abuse as grounds for disciplinary action under A.R.S. § 36-446.07, including denial of a certificate or certificate renewal.
- D. A manager who violates any provision of A.R.S. Title 36, Chapter 4, Article 6 or this Chapter is subject to discipline under A.R.S. § 36-446.07.

Historical Note

Section R4-33-407 renumbered from R4-33-307 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Amended by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

June 6, 2015 (Supp. 15-2).

R4-33-408. Referral Requirements

- A. A manager who is appointed by an assisted living facility that pays a fee to an individual or entity for referral of a resident to the assisted living facility shall ensure that the assisted living facility:
 - 1. Has on file a contract with the individual or entity making the referral;
 - 2. Maintains a file of the names of the residents referred by the individual or entity; and
 - 3. Obtains at the time of admission and maintains a statement, signed by the resident or the resident's representative or legal guardian, which discloses that:
 - a. A fee was paid for referring the resident to the assisted living facility;
 - b. The resident or the resident's representative or legal guardian was informed of the fee arrangement; and
 - c. The resident or the resident's representative or legal guardian was informed of any ownership interest between the assisted living facility and the individual or entity making the referral.
- B. A manager shall maintain the records required under subsection (A)(1) for five years and shall maintain the records required under subsections (A)(2) and (A)(3) for five years after the resident ceases to reside in the assisted living facility.
- C. A manager shall make the records required under this Section available for review upon request by the Board.

Historical Note

Section R4-33-408 renumbered from R4-33-308 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed; new Section made by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-409. Certification Following Revocation

An individual who wishes to be certified after the individual's certificate as an assisted living facility manager is revoked shall:

- 1. Not apply for certification until at least 12 months have passed since the revocation, and
- 2. Apply for certification under R4-33-401.

Historical Note

Section R4-33-409 renumbered from R4-33-309 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). New Section made by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1).

R4-33-410. Notice of Appointment

- A. A manager shall provide written notice to the Board, within 30 days, of being appointed manager of an assisted living facility or terminating an appointment.
- B. A manager shall include the following, as applicable, in a notice regarding the manager's appointment:
 - 1. Manager's name,
 - 2. Manager's certificate number,
 - 3. Name and address of the assisted living facility to which the manager is appointed,
 - 4. Date of appointment,
 - 5. Name and address of the assisted living facility at which the manager's appointment is terminated, and
 - 6. Date of termination.

CHAPTER 33. BOARD OF EXAMINERS OF NURSING CARE INSTITUTION ADMINISTRATORS AND ASSISTED LIVING FACILITY MANAGERS**Historical Note**

Section R4-33-410 renumbered from R4-33-310 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section R4-33-410 renumbered to R4-33-402 by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). New Section made by final rulemaking at 14 A.A.R. 516, effective April 5, 2008 (Supp. 08-1).

R4-33-411. Appointment as Manager of Multiple Assisted Living Facilities

- A. An individual certified under R4-33-401 shall not be appointed to manage more than two assisted living facilities at one time.
- B. A individual certified under R4-33-401 who is appointed to manage two assisted living facilities shall:
 1. Ensure that the two assisted living facilities are no more than 25 miles apart;
 2. Designate in writing one or more individuals who are on the assisted living facility premises and accountable for the services provided at the assisted living facility when the appointed certified manager is not on the assisted living facility premises. A designated individual shall:
 - a. Be at least 21 years old;
 - b. Be a caregiver with at least three years' experience as a caregiver or hold a temporary certificate issued under R4-33-402; and
 - c. Never have had licensure or certification suspended or revoked by the Board;
 3. Ensure that the name of the designated individual is conspicuously displayed at all times in a manner that informs those seeking assistance who is accountable for the services provided;
 4. Place the written notice of designation required under subsection (B)(2) in the personnel file of the individual designated; and
 5. Be available to the individual designated under subsection (B)(2) by telephone or electronically within 60 minutes.

Historical Note

Section R4-33-411 renumbered from R4-33-311 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4). New Section made by final rulemaking at 21 A.A.R. 543, effective June 6, 2015 (Supp. 15-2).

R4-33-412. Repealed**Historical Note**

Section R4-33-412 renumbered from R4-33-312 by final rulemaking at 5 A.A.R. 423, effective January 15, 1999 (Supp. 99-1). Section repealed by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

ARTICLE 5. CONTINUING EDUCATION**R4-33-501. Continuing Education Requirement**

- A. Continuing education is a prerequisite of license or certificate renewal.
 1. A licensed administrator shall obtain 50 credit hours of Board-approved continuing education during each biennial period. During the biennial period in which an administrator is initially licensed, the administrator shall obtain two credit hours of Board-approved continuing education for each month or part of a month remaining in the biennial period.

- 2. A certified manager shall obtain 24 credit hours of Board-approved continuing education during each biennial period. During the biennial period in which a manager is initially certified, the manager shall obtain one credit hour of Board-approved continuing education for each month or part of a month remaining in the biennial period.

- B. The Board shall award credit hours in an approved continuing education as follows:

1. Seminar or workshop. One credit hour of continuing education for each contact hour;
2. Course at an accredited educational institution. Fifteen credit hours of continuing education for each course hour;
3. Attendance at a business meeting of a national health care organization or of a state association affiliated with a national health care organization. One-half credit hour of continuing education for each business meeting attended;
4. Self-study, online, or correspondence course. Approved credit hours of continuing education requested by the course provider;
5. Serving as a preceptor. Two credit hours of continuing education for each month that an administrator serves as an AIT preceptor; and
6. Teaching a Board-approved continuing education. One credit hour of continuing education for each hour taught.

- C. The Board shall limit the number of credit hours of Board-approved continuing education awarded as follows:

1. No more than 40 percent of the required credit hours may be obtained using self-study, online, or correspondence courses;
2. No more than 50 percent of the required credit hours may be obtained from serving as an AIT preceptor;
3. Hours may be obtained for teaching a particular continuing education only once during each biennial period; and
4. Hours that exceed the minimum required for a biennial period may not be carried over to a subsequent biennial period.

- D. An administrator or manager shall obtain a certificate or other evidence of attendance from the provider of each continuing education attended that includes the following:

1. Name of the administrator or manager;
2. License or certificate number of the administrator or manager;
3. Name of the continuing education;
4. Name of the continuing education provider;
5. Date, time, and location of the continuing education; and
6. Number of credit hours in the continuing education.

- E. An administrator or manager shall maintain the evidence of attendance described in subsection (D) for three years and make the evidence available to the Board under R4-33-503 and as otherwise required under this Chapter.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 4075, effective December 4, 2006 (Supp. 06-4).

Amended by final rulemaking at 15 A.A.R. 1975, effective November 3, 2009 (Supp. 09-4).

R4-33-502. Approval of Continuing Education

- A. The Board shall approve any continuing education approved by NAB or the ACHCA.
- B. The Board shall approve a continuing education only if it is taught by a qualified instructor and addresses at least one of the following subject areas:
 1. Laws regarding environmental health and safety,
 2. Principles of management,

36-446. Definitions

In this article, unless the context otherwise requires:

1. "Administrator" or "nursing care institution administrator" means a person who is charged with the general administration of a nursing care institution, whether or not that person has an ownership interest in the institution and whether or not the person's functions and duties are shared with others.
2. "Assisted living facility" has the same meaning prescribed in section 36-401.
3. "Assisted living facility manager" means a person who has responsibility for the administration or management of an assisted living facility, whether or not that person has an ownership interest in the institution and whether or not the person's functions and duties are shared with others.
4. "Assisted living facility training program" includes:
 - (a) Training required for assisted living facility manager certification.
 - (b) Training required by the department for assisted living facility caregivers.
5. "Board" means the board of examiners of nursing care institution administrators and assisted living facility managers.
6. "Department" means the department of health services.
7. "Directed care services" has the same meaning prescribed in section 36-401.
8. "Director" means the director of the department of health services.
9. "Nursing care institution" means an institution or other place, however named, whether for profit or not, including facilities operated by the state or a subdivision of the state, that is advertised, offered, maintained or operated for the express or implied purpose of providing care to persons who need nursing services on a continuing basis but who do not require hospital care or care under the daily direction of a physician. Nursing care institution does not include an institution for the care and treatment of the sick that is operated only for those who rely solely on treatment by prayer or spiritual means in accordance with the tenets of a recognized religious denomination. Nursing care institution also does not include nursing care services that are an integral part of a hospital licensed pursuant to this chapter.
10. "Unprofessional conduct" includes:
 - (a) Dishonesty, fraud, incompetency or gross negligence in the performance of administrative duties.

As of July 13, 2018

(b) Gross immorality or proselytizing religious views on patients without their consent.

(c) Other abuses of official responsibilities, which may include intimidation or neglect of patients.

36-446.01. Licensure or certification requirements

A. A nursing care institution shall not operate in this state except under the supervision of an administrator licensed pursuant to this article.

B. An assisted living facility shall not operate in this state except under the supervision of a manager certified pursuant to this article.

C. It is unlawful for any person who does not have a license or certificate, or whose license or certificate has lapsed or has been suspended or revoked, to practice or offer to practice skilled nursing facility administration or assisted living facility management or use any title, sign, card or device indicating that such person is an administrator or manager.

36-446.02. Board of examiners; terms; meetings; quorum; effect of vacancies; compensation

A. The board of examiners of nursing care institution administrators and assisted living facility managers is established consisting of nine members appointed by the governor.

B. The board shall include:

1. One administrator who holds an active license issued pursuant to this article.

2. One manager who holds an active license issued pursuant to this article.

3. One administrator of a nonprofit or faith-based skilled nursing facility.

4. One administrator of a proprietary skilled nursing facility.

5. Two managers of an assisted living center as defined in section 36-401.

6. One manager of an assisted living home as defined in section 36-401.

7. Two public members who are not affiliated with a nursing care institution or an assisted living facility.

C. Board members who are not affiliated with a nursing care institution or an assisted living facility shall not have a direct financial interest in nursing care institutions or assisted living facilities.

D. A board member shall not serve on any other board relating to long-term care during the member's term with the board.

As of July 13, 2018

E. The term of a board member automatically ends when that member no longer meets the qualifications for appointment to the board. The board shall notify the governor of the board vacancy.

F. Board members who are not affiliated with a nursing care institution or an assisted living facility shall be appointed for two year terms. Board members who are the administrator of a nursing care institution or the manager of an assisted living facility shall be appointed for three year terms.

G. A board member shall not serve for more than two consecutive terms.

H. The board shall meet at least twice a year.

I. A majority of the board members constitutes a quorum.

J. Board members are eligible to receive compensation as determined pursuant to section 38-611 for each day actually spent performing their duties under this chapter.

K. A board member who is absent from three consecutive regular meetings or who fails to attend more than fifty per cent of board meetings over the course of one calendar year vacates the board member's position. The board shall notify the governor of the vacancy.

36-446.02. Board of examiners; terms; meetings; quorum; effect of vacancies; compensation

A. The board of examiners of nursing care institution administrators and assisted living facility managers is established consisting of nine members appointed by the governor.

B. The board shall include:

1. One administrator who holds an active license issued pursuant to this article.
2. One manager who holds an active license issued pursuant to this article.
3. One administrator of a nonprofit or faith-based skilled nursing facility.
4. One administrator of a proprietary skilled nursing facility.
5. Two managers of an assisted living center as defined in section 36-401.
6. One manager of an assisted living home as defined in section 36-401.
7. Two public members who are not affiliated with a nursing care institution or an assisted living facility.

As of July 13, 2018

- C. Board members who are not affiliated with a nursing care institution or an assisted living facility shall not have a direct financial interest in nursing care institutions or assisted living facilities.
- D. A board member shall not serve on any other board relating to long-term care during the member's term with the board.
- E. The term of a board member automatically ends when that member no longer meets the qualifications for appointment to the board. The board shall notify the governor of the board vacancy.
- F. Board members who are not affiliated with a nursing care institution or an assisted living facility shall be appointed for two year terms. Board members who are the administrator of a nursing care institution or the manager of an assisted living facility shall be appointed for three year terms.
- G. A board member shall not serve for more than two consecutive terms.

H. The board shall meet at least twice a year.

I. A majority of the board members constitutes a quorum.

J. Board members are eligible to receive compensation as determined pursuant to section 38-611 for each day actually spent performing their duties under this chapter.

K. A board member who is absent from three consecutive regular meetings or who fails to attend more than fifty per cent of board meetings over the course of one calendar year vacates the board member's position. The board shall notify the governor of the vacancy.

36-446.03. Powers and duties of the board; fees

- A. The board may adopt, amend or repeal reasonable and necessary rules and standards for the administration of this article in compliance with title XIX of the social security act, as amended.
- B. The board by rule may adopt nonrefundable fees for the following:
 1. Initial application for certification as an assisted living facility manager.
 2. Examination for certification as an assisted living facility manager.
 3. Issuance of a certificate as an assisted living facility manager, prorated monthly.
 4. Biennial renewal of a certificate as an assisted living facility manager.
 5. Issuance of a temporary certificate as an assisted living facility manager.

As of July 13, 2018

6. Readministering an examination for certification as an assisted living facility manager.
7. Issuance of a duplicate certificate as an assisted living facility manager.
8. Reviewing the sponsorship of continuing education programs, for each credit hour.
9. Late renewal of an assisted living facility manager certificate.

10. Reviewing an individual's request for continuing education credit hours, for each credit hour.
11. Reviewing initial applications for assisted living facility training programs.
12. Annual renewal of approved assisted living facility training programs.

C. The board may elect officers it deems necessary.

D. The board shall apply appropriate techniques, including examinations and investigations, to determine if a person meets the qualifications prescribed in section 36-446.04.

E. On its own motion or in response to any complaint against or report of a violation by an administrator of a nursing care institution, or a manager of an assisted living facility, the board may conduct investigations, hearings and other proceedings concerning any violation of this article or of rules adopted by the board or by the department.

F. In connection with an investigation or administrative hearing, the board may administer oaths and affirmations, subpoena witnesses, take evidence and require by subpoena the production of documents, records or other information in any form concerning matters the board deems relevant to the investigation or hearing. If any subpoena issued by the board is disobeyed, the board may invoke the aid of any court in this state in requiring the attendance and testimony of witnesses and the production of evidence.

G. Subject to title 41, chapter 4, article 4, the board may employ persons to provide investigative, professional and clerical assistance as required to perform its powers and duties under this article. Compensation for board employees shall be as determined pursuant to section 38-611. The board may contract with other state or federal agencies as required to carry out this article.

H. The board may appoint review committees to make recommendations concerning enforcement matters and the administration of this article.

I. The board by rule may establish a program to monitor licensees and certificate holders who are chemically dependent and who enroll in rehabilitation programs that meet board requirements. The board may take disciplinary action if a licensee or a certificate holder refuses to enter into an agreement to enroll in and complete a board approved rehabilitation program or fails to abide by that agreement.

J. The board shall adopt and use an official seal.

As of July 13, 2018

K. The board shall adopt rules for the examination and licensure of nursing care institution administrators and the examination and certification of assisted living facility managers.

L. The board shall adopt rules governing payment to a person for the direct or indirect solicitation or procurement of assisted living facility patronage.

M. The board must provide the senate and the house of representatives health committee chairmen with copies of all board minutes and executive decisions.

N. The board by rule shall limit by percentage the amount it may increase a fee above the amount of a fee previously prescribed by the board pursuant to this section.

O. The board by rule shall prescribe standards for assisted living facility training programs.

P. The board may:

1. Grant, deny, suspend or revoke approval of, or place on probation, an assisted living facility training program.

2. Impose a civil penalty on an assisted living facility training program that violates this chapter or rules adopted pursuant to this chapter.

36-446.04. Qualifications; period of validity; exemption

A. The board shall issue a license as a nursing care institution administrator pursuant to its rules to any person who meets the following qualifications:

1. Is of good character.

2. Has satisfactorily completed a course of instruction and training approved by the board that:

(a) Is designed and sufficiently administered to give the applicant knowledge of the proper needs to be served by nursing care institutions.

(b) Includes a thorough background in the laws and rules governing the operation of nursing care institutions and the protection of the interests of the patients in nursing care institutions.

(c) Includes thorough training in elements of good health care facilities administration.

3. Has passed an examination administered by the board designed to test for competency in the subject matter referred to in this subsection.

4. Has met one of the following fingerprinting requirements:

(a) Has a valid fingerprint clearance card issued pursuant to title 41, chapter 12, article 3.1.

(b) Has provided proof of the submission of an application for a fingerprint clearance card. An applicant who has been denied a fingerprint clearance card must also provide proof that the applicant qualifies for a good cause exception hearing pursuant to section 41-619.55.

B. A person who is licensed pursuant to this section must maintain a valid fingerprint clearance card during the valid period of the person's license.

C. The board shall issue a certificate as an assisted living facility manager pursuant to its rules to a person who meets the following qualifications:

1. Is of good character.
2. Has satisfactorily completed a course of instruction and training approved by the board that:

(a) Is designed and sufficiently administered to give the applicant knowledge of the proper needs to be served by an assisted living facility.

(b) Includes a thorough background in the laws governing the operation of assisted living facilities and the protection of the interests of the patients in assisted living facilities.

(c) Includes thorough training in elements of assisted living facility administration.

3. Has passed an examination administered by the board that is designed to test for competency in the subject matter prescribed in this subsection.

4. Provides documentation satisfactory to the board that the applicant has completed two thousand eighty hours of paid work experience in a health related field within the preceding five years as prescribed by board rule.

5. Has met one of the following fingerprinting requirements:

(a) Has a valid fingerprint clearance card issued pursuant to title 41, chapter 12, article 3.1.

(b) Has provided proof of the submission of an application for a fingerprint clearance card. An applicant who has been denied a fingerprint clearance card must also provide proof that the applicant qualifies for a good cause exception hearing pursuant to section 41-619.55.

D. A person who is certified pursuant to this section must maintain a valid fingerprint clearance card during the valid period of the person's certificate.

E. In lieu of the requirements contained in subsection A, paragraph 2 or subsection C, paragraph 2, an applicant may present satisfactory evidence to the board of sufficient education and training in the areas listed in that paragraph.

F. A license is nontransferable and remains in effect until the following June 30 of an even numbered year, at which time the license may be renewed if the licensee otherwise complies with this article and unless the license has been surrendered, suspended or revoked.

G. A certificate is nontransferable and remains in effect until the following June 30 of an odd numbered year, at which time the certificate may be renewed if the certificate holder otherwise complies with this article and the certificate has not been surrendered, suspended or revoked.

H. This section does not apply to managers of adult foster care homes as defined in section 36-401.

36-446.05. Reciprocity; present administrators

The board may issue a nursing care institution administrator's license, without examination or with partial examination, to any person who holds a current license from another state or territory of the United States provided the standards for licensure in such other state or territory of the United States are at least substantially equivalent to those prevailing in this state, and provided that the applicant is otherwise qualified.

36-446.06. Temporary licenses and certificates

A. The board may issue a temporary nursing care institution administrator's license or assisted living facility manager's certificate to individuals determined to meet standards established by the board and revoke or suspend temporary licenses or certificates previously issued by the board in any case where the individual holding a license or certificate is determined to have substantially failed to conform to the requirements of such standards during the term of the temporary license or certificate.

B. A temporary license or certificate is automatically revoked if the licensee or certificate holder fails either the state or national examination during the term of the license.

C. Temporary licenses or certificates may be issued without examination, for a single nonrenewable period of one hundred fifty days, to a qualified individual for the purpose of enabling the individual to fill a nursing care administrator or assisted living facility manager position. Qualifications for a temporary license or certificate shall include good character and the ability to meet such other standards as are established by the board.

D. An applicant for a temporary license or certificate shall not have failed a state or national examination either before or after applying for the temporary license or certificate.

36-446.07. Disciplinary actions; grounds for disciplinary action; renewal; continuing education; inactive status; hearings; settlement; judicial review; admission by default; military members

A. The board may suspend or revoke the license of any nursing care institution administrator, censure or place on probation any licensed nursing care institution administrator or deny a license as a nursing care institution administrator to any person for any of the following reasons:

As of July 13, 2018

1. Conviction of a felony or conviction of any misdemeanor involving moral turpitude.
 2. Obtaining or renewing a license by fraud or deceit.
 3. Unprofessional conduct.
 4. Practicing without biennial licensure.
 5. Addiction to or dependency on drugs or alcohol.
 6. Wrongful transfer of a license or falsely impersonating another licensee.
 7. Unauthorized disclosure of information relating to a patient or a patient's records.
 8. Payment to any person for solicitation or procurement, either directly or indirectly, of nursing home patronage.
 9. Violation of this article or a rule adopted pursuant to this article.
- B. The board may suspend or revoke the certificate of an assisted living facility manager, censure or place on probation an assisted living facility manager or deny a certificate as an assisted living facility manager to a person for any of the following reasons:
1. Conviction of a felony or conviction of a misdemeanor involving moral turpitude.
 2. Obtaining or renewing a certificate by fraud or deceit.
 3. Unprofessional conduct.
 4. Practicing without biennial certification.
 5. Addiction to or dependency on drugs or alcohol.
 6. Wrongful transfer of a certificate or falsely impersonating another certificate holder.
 7. Unauthorized disclosure of information relating to a resident or a resident's records.
 8. Violation of this article or a rule adopted pursuant to this article.
- C. The board may impose a civil penalty in an amount of not to exceed five hundred dollars on any nursing care institution administrator or assisted living facility manager who violates this article or any rule adopted pursuant to this article. Actions to enforce the collection of these penalties shall be brought in the name of this state by the attorney general or the county attorney in the justice court or the superior court in the county in which the violation occurred. Penalties imposed under this section are in addition to and not in limitation of other penalties imposed pursuant to this article.

D. The board may file a letter of concern if, in the opinion of the board, while there is insufficient evidence to support direct action against the license of the administrator or the certificate of the manager, there is sufficient evidence for the board to notify the administrator or manager of its concern.

E. Every holder of a nursing care institution administrator's license shall renew it biennially by making application to the board. The renewals shall be granted as a matter of course if the holder has successfully completed at least fifty hours of continuing education every two years as established by the board in its rules, unless the applicant has acted or failed to act in such a manner or under such circumstances as would constitute grounds for taking any of the disciplinary actions permitted by this section. The board shall maintain a log of each complaint substantiated by the board or deficiency report concerning an administrator and shall retain in the administrator's file a copy of each such complaint or report and the action taken on it, if any. The board shall review and consider the administrator's file in determining whether to renew the administrator's license.

F. Except as provided in subsection R of this section, every holder of an assisted living facility manager's certificate shall renew it biennially by making application to the board. The renewals shall be granted as a matter of course if the holder has successfully completed continuing education every two years as established by the board in its rules, unless the applicant has acted or failed to act in a manner or under circumstances that constitute grounds for taking disciplinary action permitted by this section. The board shall maintain a log of each complaint substantiated by the board or deficiency report concerning a manager and shall retain in the manager's file a copy of each complaint or report and the action taken on it, if any. The board shall review and consider the manager's file in determining whether to renew the manager's certificate.

G. Except as provided in subsection R of this section, failure on the part of any licensed nursing care institution administrator or certified assisted living facility manager to furnish evidence of having attended the required continuing education hours during the preceding two years shall preclude renewal of the license or certificate unless the continuing education requirement is fulfilled within one hundred twenty days.

H. On written request to the board, a nursing care institution administrator in good standing may cause the administrator's name and license to be transferred to an inactive list. Any nursing care institution administrator on inactive license status shall pay a license renewal fee. On written request to the board, and subsequent approval by the board, a nursing care institution administrator on inactive license status may resume active license status on meeting twenty-five hours of continuing education requirements within six months and payment of the current fee.

I. On written request to the board, the board shall transfer an assisted living facility manager in good standing to an inactive list. An assisted living facility manager on inactive certificate status shall pay a certificate renewal fee prescribed by the board of not more than one hundred dollars every two years. On written request to the board, and subsequent approval by the board, an assisted living facility manager on inactive certificate status may resume active certificate status on meeting requirements for six hours of continuing education within six months and payment of the current fee.

J. Suspension, revocation or denial of renewal of a license or certificate or censure or probation of a licensee or certificate holder by the board becomes effective only on the board's first giving the licensee or certificate holder prior written notice and affording the licensee or certificate holder the right to request a hearing within thirty-five days of the receipt of notice. A hearing is not required before the denial of an original application for a license or a certificate. All hearings shall be conducted pursuant to title 41, chapter 6, article 10.

K. Any person wishing to make a complaint against a licensee or certificate holder under this article shall file a written complaint with the board within one year from the date of the action causing the complaint. If the board determines that the charges made in the complaint are sufficient, if true, to warrant suspension or revocation of a license or certificate issued under this article or censure or probation of a licensee or certificate holder under this article, it shall issue an order fixing the time and place for a hearing and requiring the licensee or certificate holder complained against to appear and answer the complaint. The order shall have affixed to it a copy of the complaint, and both shall be served on the licensee or certificate holder either personally or by certified mail sent to the licensee's or the certificate holder's last known address at least thirty-five days before the date set for the hearing. All hearings shall be conducted pursuant to title 41, chapter 6, article 10.

L. The board and an administrator or manager may enter into a settlement of any matter under investigation either before or after a notice of the hearing has been issued if the board determines that the proposed settlement adequately protects the public safety, health and welfare. The board shall record the terms of each settlement entered into and shall make the record available for public inspection.

M. Except as provided in section 41-1092.08, subsection H, final decisions of the board are subject to judicial review pursuant to title 12, chapter 7, article 6.

N. If the board has initiated an investigation pursuant to this section, the board may continue the investigation and discipline the person under investigation even if that person resigns from practice after the board has initiated the investigation.

O. A licensee or certificate holder shall respond in writing to the board within thirty-five days after the board serves the complaint and notice of a formal hearing by certified mail. Service is complete on the date the board places the notice in the mail. The board shall consider a licensee's or certificate holder's failure to respond to the notice within thirty-five days as an admission by default to the allegations stated in the complaint. The board may then take disciplinary action against the licensee or certificate holder without conducting a formal hearing.

P. The board may set aside an admission by default if a licensee or certificate holder shows good cause. A licensee or certificate holder who applies to the board to set aside an admission by default shall demonstrate the following to the satisfaction of the board:

1. The failure to respond to the notice of the board was due to excusable neglect.
2. The licensee or certificate holder has a meritorious defense.

As of July 13, 2018

3. The licensee or certificate holder made prompt application to the board for relief.

Q. The board shall not consider an application to set aside an admission by default filed later than one hundred eighty days after the board's entry of the admission by default.

R. A license or certificate issued pursuant to this chapter to any member of the Arizona national guard or the United States armed forces reserves shall not expire while the member is serving on federal active duty and shall be extended one hundred eighty days after the member returns from federal active duty, provided that the member, or the legal representative of the member, notifies the board of the federal active duty status of the member. A license or certificate issued pursuant to this chapter to any member serving in the regular component of the United States armed forces shall be extended one hundred eighty days from the date of expiration, provided that the member, or the legal representative of the member, notifies the board of the federal active duty status of the member. If the license or certificate is renewed during the applicable extended time period, the member is responsible only for normal fees and activities relating to renewal of the license and shall not be charged any additional costs such as late fees or delinquency fees. The member, or the legal representative of the member, shall present to the board a copy of the member's official military orders, a redacted military identification card or a written verification from the member's commanding officer before the end of the applicable extended time period in order to qualify for the extension.

S. A license or certificate issued pursuant to this chapter to any member of the Arizona national guard, the United States armed forces reserves or the regular component of the United States armed forces shall not expire and shall be extended one hundred eighty days from the date the military member is able to perform activities necessary under the license or certificate if the member both:

1. Is released from active duty service.

2. Suffers an injury as a result of active duty service that temporarily prevents the member from being able to perform activities necessary under the license, certificate or registration.

36-446.08. Nursing care institution administrators' licensing and assisted living facility managers' certification fund; investment of fund monies

A. The nursing care institution administrators' licensing and assisted living facility managers' certification fund is established.

B. Pursuant to sections 35-146 and 35-147, the board shall deposit ten per cent of all monies collected pursuant to this article in the state general fund and deposit the remaining ninety per cent in the nursing care institution administrators' licensing and assisted living facility managers' certification fund. All monies derived from civil penalties collected pursuant to section 36-446.07, subsection C shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.

C. Monies deposited in the nursing care institution administrators' licensing and assisted living facility managers' certification fund are subject to the provisions of section 35-143.01.

D. On notice from the board, the state treasurer shall invest and divest monies in the fund as provided by section 35-313, and monies earned from investment shall be credited to the fund.

36-446.09. Violations; classification

A. Any person who manages, directs and controls the operation of a nursing care institution or an assisted living facility without a current and valid license or certificate as required by this article or who otherwise violates any provisions of this article is guilty of a class 2 misdemeanor. Each day of violation shall constitute a separate offense.

B. Action taken under subsection A shall not be a bar to enforcement of this article and the standards and rules issued and adopted pursuant to this article, by injunction or other appropriate remedy, and the board may institute and maintain in the name of this state any such enforcement proceeding.

36-446.10. Confidentiality of records; release of complainant's name and nature of complaint

A. Except as provided in subsection B, all records concerning a pending investigation, examination materials, records of examination grading and applicants' performance and transcripts of educational institutions concerning applicants are confidential and are not public records. "Records of applicants' performance" does not include records of whether an applicant passed or failed an examination.

B. During a pending investigation, the board shall inform the administrator or manager who is the subject of the complaint of the name of the complainant and the nature of the complaint if so requested.

36-446.11. Relief from civil liability

Members, employees and agents of the board and members of review committees shall not be held civilly liable for acts done or actions taken by any of these persons if such persons act in good faith following the requirements of this article. A person who in good faith reports or provides information to the board shall not be held civilly liable as a result of doing so.

36-446.12. Fees

A. The board by rule shall establish nonrefundable fees and penalties for the following for nursing care institution administrators:

1. Initial application.
2. Examination for licensure as a nursing care institution administrator.

As of July 13, 2018

3. A license as a nursing care institution administrator.
 4. Renewing an active biennial license.
 5. Renewing an inactive biennial license.
 6. A temporary license as a nursing care institution administrator.
 7. Readministering the state examination.
 8. Readministering the national examination.
 9. A duplicate license.
 10. Late renewal of a license.
 11. Certifying licensure status.
 12. Reviewing the sponsorship of continuing education programs, for each credit hour.
 13. Reviewing an individual's request for continuing education credit hours, for each credit hour.
- B. The board shall prorate on a monthly basis fees paid for an initial license as a nursing care institution administrator.
- C. The board by rule shall limit by percentage the amount it may increase a fee above the amount of a fee previously prescribed by the board pursuant to this section.

36-446.13. Unlawful act; unlicensed operation; injunction

- A. On application by the board, the superior court may issue an injunction to enjoin the activities of a person who purports to be licensed pursuant to this article or who is engaging in the activities of a nursing care institution administrator without a license.
- B. In a petition for injunction filed pursuant to this section, it is sufficient to charge that the respondent on a certain day in a named county engaged in the activities of a nursing care institution administrator without a license and without being exempt from the licensing requirements of this article.
- C. For the purposes of this section, damage or injury is presumed.
- D. A petition for an injunction to enjoin unlicensed activities shall be filed in the name of this state in the superior court in the county where the respondent resides or may be found or in Maricopa county. On request of the board, the attorney general shall file the injunction.

As of July 13, 2018

E. Issuance of an injunction does not relieve the respondent from being subject to other proceedings as provided in this article.

D-2

DEPARTMENT OF TRANSPORTATION (Expedited Rulemaking) (R19-1202)

Title 17, Chapter 8, Articles 4 and 5, Fuel Taxes

Amend: R17-8-401, R17-8-403, R17-8-404, R17-8-501, R17-8-502, R17-8-504

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - EXPEDITED RULEMAKING

MEETING DATE: December 3, 2019

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 5, 2019

SUBJECT: DEPARTMENT OF TRANSPORTATION (Expedited) (R19-1202)

Title 17, Chapter 8, Articles 4 and 5, Fuel Taxes

Amend: R17-8-401, R17-8-403, R17-8-404, R17-8-501, R17-8-502, R17-8-504

Summary:

This expedited rulemaking from the Department of Transportation (Department) seeks to amend Title 17, Chapter 8, Articles 4 and 5 relating to fuel taxes. Pursuant to A.R.S. § 41-1027(A)(7), the Department is conducting this expedited rulemaking to incorporate the changes proposed in the Department's Five Year Review Report (5YRR) on these rules which the Council approved on May 7, 2019. The Department determined that these rules should be updated and improved for clarity and for a better reflection of the Department's processes and needs.

This rulemaking includes updates and clarification to the definitions and removal of old and inconsistent information including:

- Removing the requirement in R17-8-502(D) (Applicability; General Provisions) that a licensee submit monthly fuel tax reports using paper forms because the Department no longer allows this;
- Clarifying the electronic funds declaration requirements by changing the “fee or tax” verbiage to “payment” to more accurately classify the data needed from the licensee;

- Requiring additional information from the contact person to ensure the Department has the appropriate information and method to contact the licensee; and
- Adding a requirement for a signature of a person authorized to sign for the licensee as the signature attests to the licensee's declaration of the use of either a credit or debit card to make fuel tax payments to the Department.

Additional changes include making minor technical changes to ensure conformity with the rulemaking format and style requirements of the Arizona Administrative Procedure Act and the Office of the Secretary of State.

1. Do the rules satisfy the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)?

Yes. This rulemaking satisfies the criteria for expedited rulemaking pursuant to A.R.S. § 41-1027(A)(7) because it implements, without material change, a course of action that is proposed in a five-year review report approved by the council pursuant to section 41-1056 within one hundred eighty days of the date that the agency files the proposed expedited rulemaking with the secretary of state.

2. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

Yes. The Department cites to both general and specific statutory authority for these rules.

3. Do the rules establish a new fee or contain a fee increase?

No. The rules do not establish a new fee or contain a fee increase.

4. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department did not receive any comments on this rulemaking.

5. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

No, the rules are not a substantial change from the proposed rules and any supplemental proposals. However, the Department made two changes to the rules between the Notice of Proposed Expedited Rulemaking and the Notice of Final Expedited Rulemaking:

- In R17-8-401 (Definitions), in the definition of "Cash Concentration or Disbursement," the Department replaced "CCD Plus" with "CCD +" in order to be more consistent with its usage in the industry; and

- In R17-8-404(B) (Procedures for Payment), the Department replaced the term “CCD Plus” with “CCD+” in order to be more consistent with its usage in the industry and to maintain consistency with its usage in R17-8-401.

These changes do not result in rules that are “substantially different” under A.R.S. § 41-1025.

6. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

Not applicable. There is no corresponding federal law.

7. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

These rules concern the requirements for filing electronic fuel tax reports and remitting payments by licensees and applicants for licensure under A.R.S. Title 28, Chapter 16, Article 1. The license for these entities would be considered a general permit since, for each license type, the facilities, activities, or practices in the class are substantially similar in nature. Therefore, the Department complies with A.R.S. § 41-1037.

8. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Department did not review or rely on any study in conducting this rulemaking.

9. Conclusion

The Department is conducting an expedited rulemaking pursuant to A.R.S. § 41-1027(A) (7) to amend Articles 4 and 5. This rulemaking will result in rules that are more clear, concise, understandable, and effective. If approved, these rules will be immediately effective upon filing with the Office of the Secretary of State pursuant to A.R.S. § 41-1027(H). Council staff recommends approval of this rulemaking.

October 15, 2019

Nicole Sornsin, Chair
Governor's Regulatory Review Council
100 N. 15th Ave., Suite 305
Phoenix, AZ 85007

Re: Department of Transportation, 17 A.A.C. 8, Articles 4 and 5, Expedited Rulemaking

Dear Chairperson Nicole Sornsin:

The Arizona Department of Transportation submits the accompanying final expedited rule package for consideration by the Governor's Regulatory Review Council. The following information is provided to comply with R1-6-202(A)(1):

- a. The rulemaking record closed on September 5, 2019, and no written public comments were received on these rules;
- b. The Department is engaged in this expedited rulemaking pursuant to A.R.S. § 41-1027(A)(7), in order to incorporate the changes proposed in the Department's recent five-year review report on 17 A.A.C. Chapter 8, Articles 4 and 5;
- c. The rulemaking activity does relate to a five-year review report, approved by the Governor's Regulatory Review Council on May 7, 2019;
- d. The preamble discloses that the Department did not review any studies relevant to the rules and did not rely on any studies in its evaluation of or justification for the rules;
- e. Documents included in this final expedited rule package are as follows:
 1. Signed cover letter;
 2. Notice of Final Expedited Rulemaking, including the preamble, table of contents, and text of each rule;
 3. General and specific statutes authorizing the rules, including relevant statutory definitions;
 4. Definitions of terms; and
 5. Request for, and approval of, the Department's exception from the rulemaking moratorium.

Sincerely,

John S. Halikowski
ADOT Director

NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 17. TRANSPORTATION
CHAPTER 8. DEPARTMENT OF TRANSPORTATION
FUEL TAXES
PREAMBLE

1. Article, Part, or Section Affected (as applicable) **Rulemaking Action**

R17-8-401	Amend
R17-8-403	Amend
R17-8-404	Amend
R17-8-501	Amend
R17-8-502	Amend
R17-8-504	Amend

2. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statutes: A.R.S. §§ 28-366, 28-374, and 28-5930

Implementing statutes: A.R.S. §§ 28-5618, 28-5619, 28-5620, and 28-5625

3. The effective date of the rule:

Month X, 2019 (To be completed by the *Register* Editor with an immediate effective date.) This rulemaking becomes effective immediately on filing with the Office of the Secretary of State.

4. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the record of the Notice of Final Expedited Rulemaking:

Notice of Rulemaking Docket Opening: 25 A.A.R. 2130, August 23, 2019

Notice of Proposed Expedited Rulemaking: 25 A.A.R. 2125, August 23, 2019

5. The agency's contact person who can answer questions about the rulemaking:

Name: Candace Olson, Rules Analyst
Address: Rules and Policy Development
Department of Transportation
206 S. 17th Ave., Mail Drop 180A
Phoenix, AZ 85007
Telephone: (602) 712-4534
E-mail: COlson2@azdot.gov
Web site: <https://azdot.gov/about/government-relations>

6. An agency's explanation why the expedited rule should be made, amended, repealed or renumbered under A.R.S. § 41-1027(A), and why expedited proceedings are justified under A.R.S. § 41-1001(16)(c):

Pursuant to A.R.S. § 41-1027(A)(7), the Department is engaged in this expedited rulemaking to incorporate the changes proposed in the Department's five-year review report on 17 A.A.C. Chapter 8, Articles 4 and 5,

which was approved by the Governor's Regulatory Review Council on May 7, 2019. The Department determined that these rules should be updated and improved for clarity and for a better reflection of the Department's process and needs. This rulemaking includes updates and clarification to the definitions and the removal of old and inconsistent information, including the allowance of a paper form in R17-8-502(D) since the Department no longer allows for this. Also, the Department is:

- Clarifying the electronic funds declaration requirements by changing the "fee or tax" verbiage to "payment" to more accurately classify the data needed from the licensee,
- Requiring additional information from the contact person to ensure the Department has the appropriate information and method of being able to contact the licensee, and
- Adding a requirement for a signature of a person authorized to sign for the licensee as the signature attests to the licensee's declaration of the use of either credit or debit to make fuel tax payments to the Department.

Additional changes include making minor technical changes to ensure conformity to the rulemaking format and style requirements of the Arizona Administrative Procedure Act and the Office of the Secretary of State.

7. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The Department did not review or rely on any study relevant to the rules.

8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

9. The agency is exempt from the requirements under A.R.S. § 41-1055(G) to prepare and file an economic, small business, and consumer impact statement under A.R.S. § 41-1055(D)(2)::

The Department is exempt from an economic, small business, and consumer impact statement for these rules.

10. A description of any changes between the proposed expedited rulemaking and the final expedited rulemaking:

In R17-8-401, to the definition of "Cash Concentration or Disbursement", replaced "CCD Plus" with "CCD+" in order to be more consistent with its usage in industry.

In R17-8-404 (B), replaced "CCD-Plus" with "CCD+" in order to be more consistent to its usage in industry and to maintain consistency with its usage in R17-8-401.

11. An agency's summary of the public or stakeholder comments or objections made about the rulemaking and the agency response to the comments:

The Department did not receive any public or stakeholder comments regarding this rulemaking.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no other matters prescribed by statute applicable to the Department or to any specific rule or class of rules.

a. Whether the rules require a permit, license, or agency authorization under A.R.S. § 41-1037(A), and whether a general permit is used and if not, the reasons why a general permit is not used:

These rules concern the requirements of filing electronic fuel tax reports and remitting payments by licensees and applicants for licensure under A.R.S. Title 28, Chapter 16, Article 1. The license for these entities would be considered a general permit since for each license type the facilities, activities, or practices in the class are substantially similar in nature.

b. Whether a federal law is applicable to the subject of the rules, whether the rules are more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

There are no federal laws directly applicable to these rules.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No analysis was submitted to the Department.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

This rulemaking incorporates no materials by reference.

14. The full text of the rules follows:

- R17-8-404. Procedures for Payment

ARTICLE 5. ELECTRONIC FUEL TAX REPORTING

Section

- R17-8-501. Definitions
- R17-8-502. Applicability; General Provisions
- R17-8-504. Data Elements and Format

ARTICLE 4. ELECTRONIC FUNDS TRANSFERS

R17-8-401. Definitions

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-5601, the following terms apply to this Article:

~~“Automated Clearing House,” or “ACH,” means a central distribution and settlement point for the electronic clearing of debits and credits between financial institutions.~~

“ACH credit” means an electronic funds transfer:

Generated by a licensee, and

Cleared through an ACH for deposit to the Department account.

“ACH debit” means an electronic funds transfer of funds from a licensee’s account:

Authorized by a licensee-signed authorization agreement,

Generated at a licensee’s instruction, and

Cleared through an ACH for deposit to the Department account.

“ADOT account number” means a confidential number assigned by the Department that identifies a licensee.

“Authorized representative” means the owner, officer, or managing person of the licensee.

~~“Automated Clearing House,” or “ACH,” means a central distribution and settlement point for the electronic clearing of debits and credits between financial institutions.~~

“Cash Concentration or Disbursement Plus,” or “CCD Plus CCD+,” means the standardized data format approved by NACHA Nacha for remitting tax payments electronically.

“Electronic Fuel Tax Program” means the Department program for the electronic filing of fuel tax reports and payment of fuel taxes.

“Electronic fuel tax report” means the monthly fuel tax report required under A.R.S. Title 28, Chapter 16, Article 1, filed pursuant to the Electronic Fuel Tax Program.

“Electronic funds transfer” means a transmission of funds by electronic means to order, instruct, or authorize a financial institution to debit or credit an account pursuant to the Electronic Fuel Tax Program.

“Financial institution” means a licensed bank, savings and loan association, mutual savings bank or credit union.

“Licensee” means a person licensed under A.R.S. Title 28, Chapter 16, Article 1.

~~“MVD account number” means a confidential number assigned by the Department that identifies a licensee.~~

~~“NACHA Nacha” means NACHA – The Electronic Payments Association, which is a not-for-profit association that oversees the Automated Clearing House ACH network.~~

“Payment information” means data the Department requires of a licensee when making an electronic funds transfer.

“State servicing bank” means the financial institution contracted to perform banking functions on behalf of the state.

R17-8-403. Electronic Funds Transfer Declaration

- A. Prior to remitting an initial payment by electronic funds transfer, and within 30 days prior to any change in the method of payment transfer, a licensee shall file with the Department an electronic funds transfer declaration.
- B. The electronic funds transfer declaration shall be made on a form approved by the Department and shall contain the following:
 1. Licensee name;
 2. Licensee Employer Identification Number (EIN);
 3. Business address;
 4. ~~MVD ADOT~~ account number;
 5. ~~Fee or tax~~ Payment type;
 6. Either ACH credit or ACH debit payment method;
 7. Name, title, email address, and phone number of contact person; and
 8. Signature of the authorized representative of the licensee; and
 - 8.9. Any other information required by the Director.

R17-8-404. Procedures for Payment

- A. All electronic funds transfers shall be in compliance with the ~~NACHA Nacha~~ Operating Rules and Guidelines.
- B. A licensee may remit payments by either ACH credit or ACH debit.
- C. A licensee using the ACH credit method shall ensure that all ACH credit transfers are in the ~~CCD Plus~~ CCD+ addenda format and contain all information required by the Department and the licensee's financial institution to process the transfer.
- D. A licensee using the ACH debit method shall electronically communicate the following payment information to the state servicing bank:
 1. ~~MVD ADOT~~ account number,
 2. Payment amount, and
 3. Any other information required by the Director.

ARTICLE 5. ELECTRONIC FUEL TAX REPORTING

R17-8-501. Definitions

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-5601, the following terms apply to this Article:

“Applicant” means a person applying for licensure under A.R.S. Title 28, Chapter 16, Article 1.

“Electronic Fuel Tax Program” ~~means the Department program for the electronic filing of fuel tax reports and payment of fuel taxes has the same meaning as defined in R17-8-401.~~

“~~Electronic Fuel Tax Reporting Agreement~~” means the contract between the Department and each licensee pertaining to filing electronic fuel tax reporting requirements in the form and containing such terms and conditions as established by the Director from time to time.

“~~Electronic funds transfer~~” has the same meaning as provided under R17-8-401.

“~~Electronic Fuel Tax Report fuel tax report~~” means the monthly fuel tax report required under A.R.S. Title 28, Chapter 16, Article 1, filed pursuant to the Electronic Fuel Tax Program ~~has the same meaning as defined in R17-8-401.~~

“~~Electronic Fuel Tax Reporting Agreement~~” means the contract between the Department and each licensee pertaining to filing electronic fuel tax reporting requirements in the form and containing such terms and conditions as established by the Director from time to time.

“~~Electronic funds transfer~~” has the same meaning as defined in R17-8-401.

“Fuel Tax Suite” means the secure ~~web site website~~ provided by the Department for filing fuel tax reports and accessing a licensee’s fuel tax account.

“Licensee” ~~means a person licensed under A.R.S. Title 28, Chapter 16, Article 1 has the same meaning as defined in R17-8-401.~~

“Secure Access Gateway” means the Department’s secure network application that allows a remote user to connect to the Fuel Tax Suite.

“~~ServiceArizona Access Request and Agreement~~” means the contract documenting terms and conditions for access to the Secure Access Gateway and Fuel Tax Suite established by the Director from time to time.

R17-8-502. Applicability; General Provisions

- A. For the purpose of administering the reporting requirements under A.R.S. Title 28, Chapter 16, Articles 1 and 5, a licensee shall participate in the Electronic Fuel Tax ~~Reporting~~ Program as provided under this Article.
- B. Each applicant and licensee shall apply for Department authorization to submit electronic fuel tax reports as required by the Department.
- C. Each applicant and licensee shall enter into an Electronic Fuel Tax Reporting Agreement as a condition of licensure.
- D. ~~A licensee shall submit monthly fuel tax reports required under A.R.S. Title 28, Chapter 16, Article 1, using paper forms provided by the Department until authorized by the Department to file electronic fuel tax reports.~~

E.D. A licensee authorized by the Department to file electronic fuel tax reports shall complete monthly fuel tax reports only by means of the Electronic Fuel Tax Program and shall not submit such reports in paper form.

F.E. A licensee authorized by the Department to file electronic fuel tax reports shall submit fuel tax payments by electronic funds transfer as provided under Article 4. The licensee shall ensure that the fuel tax payments are deposited to the Department account as prescribed under A.R.S. Title 28, Chapter 16, Articles 1 and 5.

R17-8-504. Data Elements and Format

Electronic ~~Fuel Tax Reports~~ fuel tax reports shall include the following:

1. Identification of the licensee,
2. Detailed load-by-load receipts information that establishes the amount of fuel received,
3. Detailed load-by-load disbursement information that establishes the amount of fuel delivered,
4. Diesel differential information that establishes the basis for the differential adjustment, and
5. Other information required by the Director.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule” means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2018 is cited as Supp. 18-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority

note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State’s website, under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, managing rules editor, assisted with the editing of this chapter.

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

ARTICLE 1. RESERVED**ARTICLE 2. RESERVED****ARTICLE 3. RESERVED****ARTICLE 4. ELECTRONIC FUNDS TRANSFERS****R17-8-401. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-5601, the following terms apply to this Article:

“Automated Clearing House,” or “ACH,” means a central distribution and settlement point for the electronic clearing of debits and credits between financial institutions.

“ACH credit” means an electronic funds transfer:

Generated by a licensee, and

Cleared through an ACH for deposit to the Department account.

“ACH debit” means an electronic transfer of funds from a licensee’s account:

Authorized by a licensee-signed authorization agreement,

Generated at a licensee’s instruction, and

Cleared through an ACH for deposit to the Department account.

“Cash Concentration or Disbursement Plus,” or “CCD Plus,” means the standardized data format approved by NACHA for remitting tax payments electronically.

“Electronic Fuel Tax Program” means the Department program for the electronic filing of fuel tax reports and payment of fuel taxes.

“Electronic funds transfer” means a transmission of funds by electronic means to order, instruct, or authorize a financial institution to debit or credit an account pursuant to the Electronic Fuel Tax Program.

“Financial institution” means a licensed bank, savings and loan association, mutual savings bank or credit union.

“Licensee” means a person licensed under A.R.S. Title 28, Chapter 16, Article 1.

“MVD account number” means a confidential number assigned by the Department that identifies a licensee.

“NACHA” means NACHA - The Electronic Payments Association, which is a not-for-profit association that oversees the Automated Clearing House network.

“Payment information” means data the Department requires of a licensee when making an electronic funds transfer.

“State servicing bank” means the financial institution contracted to perform banking functions on behalf of the state.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 225, effective March 7, 2009 (Supp. 09-1).

R17-8-402. Applicability

- A. A licensee authorized by the Department to file electronic fuel tax reports under A.R.S. Title 28, Chapter 16, shall remit payments to the Department by electronic funds transfer as provided under A.R.S. §§ 28-374, 28-5930, and this Article.
- B. Payments subject to this Article include any tax or fee associated with:
 - 1. Filing original or amended tax reports,
 - 2. Taxpayer billings associated with tax reports, or
 - 3. Audit assessments associated with tax reports.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 225,

effective March 7, 2009 (Supp. 09-1).

R17-8-403. Electronic Funds Transfer Declaration

- A. Prior to remitting an initial payment by electronic funds transfer, and within 30 days prior to any change in the method of payment transfer, a licensee shall file with the Department an electronic funds transfer declaration.
- B. The electronic funds transfer declaration shall be made on a form approved by the Department and shall contain the following:
 - 1. Licensee name,
 - 2. Licensee Employer Identification Number (EIN),
 - 3. Business address,
 - 4. MVD account number,
 - 5. Fee or tax type,
 - 6. Either ACH credit or ACH debit payment method,
 - 7. Name and phone number of contact person, and
 - 8. Any other information required by the Director.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 225, effective March 7, 2009 (Supp. 09-1).

R17-8-404. Procedures for Payment

- A. All electronic funds transfers shall be in compliance with the NACHA Operating Rules.
- B. A licensee may remit payments by either ACH credit or ACH debit.
- C. A licensee using the ACH credit method shall ensure that all ACH credit transfers are in the CCD-Plus addenda format and contain all information required by the Department and the licensee’s financial institution to process the transfer.
- D. A licensee using the ACH debit method shall electronically communicate the following payment information to the state servicing bank:
 - 1. MVD account number,
 - 2. Payment amount, and
 - 3. Any other information required by the Director.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 225, effective March 7, 2009 (Supp. 09-1).

R17-8-405. Remedies

- A. Violations of this Article shall result in the assessment of applicable penalties, interest, and late filing fees pursuant to A.R.S. Title 28, Chapter 16.
- B. Licensure shall be subject to cancellation by the Department upon a licensee’s failure to comply with this Chapter and A.R.S. Title 28, Chapter 16 or 25, for failing to file an electronic report as required under A.R.S. § 28-5930.
- C. Remedies are cumulative. A cancellation of licensure under this Chapter or A.R.S. Title 28, Chapters 16 and 25, shall not terminate any reporting requirement or fee, tax, penalty or interest obligation.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 225, effective March 7, 2009 (Supp. 09-1).

ARTICLE 5. ELECTRONIC FUEL TAX REPORTING**R17-8-501. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-5601, the following terms apply to this Article:

“Applicant” means a person applying for licensure under A.R.S. Title 28, Chapter 16, Article 1.

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

“Electronic Fuel Tax Program” means the Department program for the electronic filing of fuel tax reports and payment of fuel taxes.

“Electronic Fuel Tax Reporting Agreement” means the contract between the Department and each licensee pertaining to filing electronic fuel tax reporting requirements in the form and containing such terms and conditions as established by the Director from time to time.

“Electronic funds transfer” has the same meaning as provided under R17-8-401.

“Electronic Fuel Tax Report” means the monthly fuel tax report required under A.R.S. Title 28, Chapter 16, Article 1, filed pursuant to the Electronic Fuel Tax Program.

“Fuel Tax Suite” means the secure web site provided by the Department for filing fuel tax reports and accessing a licensee’s fuel tax account.

“Licensee” means a person licensed under A.R.S. Title 28, Chapter 16, Article 1.

“Secure Access Gateway” means the Department’s secure network application that allows a remote user to connect to the Fuel Tax Suite.

“ServiceArizona Access Request and Agreement” means the contract documenting terms and conditions for access to the Secure Access Gateway and Fuel Tax Suite established by the Director from time to time.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

R17-8-502. Applicability; General Provisions

- A. For the purpose of administering the reporting requirements under A.R.S. Title 28, Chapter 16, Articles 1 and 5, a licensee shall participate in the Electronic Fuel Tax Reporting Program as provided under this Article.
- B. Each applicant and licensee shall apply for Department authorization to submit electronic fuel tax reports as required by the Department.
- C. Each applicant and licensee shall enter into an Electronic Fuel Tax Reporting Agreement as a condition of licensure.
- D. A licensee shall submit monthly fuel tax reports required under A.R.S. Title 28, Chapter 16, Article 1, using paper forms provided by the Department until authorized by the Department to file electronic fuel tax reports.
- E. A licensee authorized by the Department to file electronic fuel tax reports shall complete monthly fuel tax reports only by means of the Electronic Fuel Tax Program and shall not submit such reports in paper form.
- F. A licensee authorized by the Department to file electronic fuel tax reports shall submit fuel tax payments by electronic funds transfer as provided under Article 4. The licensee shall ensure that the fuel tax payments are deposited to the Department account as prescribed under A.R.S. Title 28, Chapter 16, Articles 1 and 5.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

R17-8-503. Method and Medium of Transmission

- A. A licensee shall submit electronic fuel tax reports to the Department through the Fuel Tax Suite.
- B. The filing deadline is 5:00 p.m. (Arizona Mountain Standard Time) on the 27th day of each calendar month, or, if such day

is a Saturday, Sunday, or Arizona legal holiday, the next following business day.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

R17-8-504. Data Elements and Format

Electronic Fuel Tax Reports shall include the following:

1. Identification of the licensee,
2. Detailed load-by-load receipts information that establishes the amount of fuel received,
3. Detailed load-by-load disbursement information that establishes the amount of fuel delivered,
4. Diesel differential information that establishes the basis for the differential adjustment, and
5. Other information required by the Director.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

R17-8-505. Record Retention; Audit

- A. A licensee shall retain the following records as provided under this Section:
 1. A copy of each electronic fuel tax report,
 2. A record of all transactions subject to the Electronic Fuel Tax Program,
 3. A record of all other electronic transmissions under the Electronic Fuel Tax Program,
 4. Back-up files adequate to recreate all electronic records, and
 5. All other records required under A.R.S. § 28-5619.
- B. A licensee shall make available to the Department for inspection all hard copy records, electronic records, books, receipts, disbursements, and accounts used in support of an electronic report as prescribed under A.R.S. Title 28, Chapter 16. At the time of inspection, the licensee shall provide the Department with access to the electronic reporting method and medium in effect at the time of all electronic transmissions sufficient for the Department to effectively follow the audit trail.
- C. A licensee shall retain the records specified under this Section for a period of three years following the latter of the filing due date or the actual filing date of an original or amended electronic fuel tax report. However, if notified by the Department of an audit, the licensee shall retain the records referenced in the Department’s notice through the date the Department finalizes the audit.

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

R17-8-506. Remedies and Waiver

- A. Violations of this Article shall result in the assessment of applicable penalties, interest, and late filing fees pursuant to A.R.S. Title 28, Chapter 16, provided that, subject to statute, the Department may waive and extend compliance deadlines in order to advance the efficient administration of the Electronic Fuel Tax Program as it may, in its sole discretion, determine appropriate in particular cases.
- B. Licensure shall be subject to cancellation by the Department upon a licensee’s failure to comply with this Chapter and A.R.S. Title 28, Chapter 16 or 25, for failing to file an electronic report as required under A.R.S. § 28-5930.
- C. Remedies are cumulative. A cancellation of licensure under this Chapter and A.R.S. Title 28, Chapters 16 and 25, shall not terminate any reporting requirement or fee, tax, penalty or interest obligation.

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

Historical Note

New Section made by final rulemaking at 15 A.A.R. 278, effective March 7, 2009 (Supp. 09-1).

ARTICLE 6. MOTOR FUEL REFUNDS**R17-8-601. Definitions and General Provisions**

- A.** Definitions. The following definitions apply to this Article unless otherwise specified:

“Application” means a request for refund of motor fuel taxes, made on a form provided by the Department.

“Cardlock use fuel facility” has the same meaning as a card-lock facility as defined in A.R.S. § 28-5605.

“Claimant” means the taxpayer or a person who has the authority to file an application on behalf of the taxpayer, as authorized by a notarized power of attorney, also referred to as applicant.

“Complete application” means an application that includes all supporting documentation and schedules for the period of the refund claim, claimant signature, and provides all information required on the application.

“Contaminated Fuel” means motor fuel, which is accidentally tainted, and which is unsalable for highway use.

“Daily log” means notations made by a driver of a commercial motor vehicle which records a daily record of duty status as specified under 49 CFR 395.8.

“Declaration of Status” means a statement on a form provided by the Department that a light class or exempt use class vehicle qualifies for use fuel tax differential under A.R.S. § 28-5606(B)(2).

“Destination state” means a state in the United States, other than the state of Arizona.

“Diversion” means delivery of motor fuel to a destination state other than the intended destination as signified on a carrier bill of lading.

“Exempt use class motor vehicle” means a vehicle exempt from gross weight fees under A.R.S. § 28-5432.

“GPS” means the Global Positioning System, a navigation system of satellites and receiving devices used to compute vehicle position and time information.

“Highway” has the same meaning as defined in A.R.S. § 28-5601, and also includes a:

Port of entry,
Weigh station, or
Public rest area.

“Idle status” means a vehicle that is stationary, its engine continues to operate, and it is located in Arizona, but off-highway.

“Licensee” has the same meaning as defined in A.R.S. § 28-5613.

“Light class motor vehicle” has the same meaning as defined in A.R.S. § 28-5601.

“Mexican Pedimento” means an authorizing permit document issued by Mexico.

“Motor fuel” has the same meaning as defined in A.R.S. § 28-5601.

“Motor fuel tax” means any tax on motor fuel imposed under A.R.S. Title 28, Chapter 16, Article 1.

“Notification date” means the date on a notice sent by the Department.

“Off-highway” means any location that is not on a highway in this state.

“Person” has the same meaning as defined in A.R.S. § 28-5601.

“Power take-off” means the operation of vehicle-mounted, auxiliary equipment that is powered by energy supplied by the same engine that propels the motor vehicle, but does not include equipment related to the operation of a vehicle and powered by the vehicle’s engine, including air conditioning, alternator, automatic transmission, and power steering.

“Tribal agreement” means an agreement between the Department and a Native American tribe for the administration of motor fuel taxes.

“Trip” means travel within or through Arizona’s state borders with a designated beginning and ending location.

“Use class motor vehicle” has the same meaning as defined in A.R.S. § 28-5601.

“Use fuel” has the same meaning as defined in A.R.S. § 28-5601.

“Use fuel tax differential” means the difference between the use fuel tax rate applicable to light class motor vehicles or exempt use class motor vehicles, and the use fuel tax rate applicable to use class motor vehicles.

“Vendor” has the same meaning as defined in A.R.S. § 28-5601.

“VIN” means Vehicle Identification Number.

B. General Provisions.

1. Scope. For purposes of administering A.R.S. § 28-5612 this Article applies to a person or licensee under A.R.S. §§ 28-5612 and 28-5613.

2. Application.

- a. A complete application for refund of motor fuel tax shall be submitted to the Department.
 - i. A claimant may combine several months’ totals and submit to the Department one application for refund.
 - ii. A complete application shall be for the whole calendar month and not for a partial month.
 - iii. Supplemental applications for refunds covering the same period already paid are not permitted.
- b. An application for refund for an amount of \$10 or less shall be accepted only once within a consecutive six-month period.
- c. When the Department determines that an application is incomplete under these rules and A.R.S. Title 28, Chapter 16, Article 1, the Department shall suspend processing of the application for refund and,
 - i. Notify the claimant of the deficiencies, and
 - ii. Return the application to the claimant.
- d. A claimant whose application is returned as incomplete under A.R.S. Title 28, Chapter 16, Article 1 and these rules shall have 60 days from the notification date to remedy the deficiencies.
- e. If the claimant fails to remedy the deficiencies under subsection (B)(2)(c) within 60 days of the notification date and return a complete application, the Department shall deny the application for refund.
- f. If the Department denies an application because the claimant failed to remedy a deficiency, the deadline

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

- to submit a new application shall be governed by the time-frames established in subsection (B)(3).
3. Application filing. A complete application for refund shall be submitted to the Department as provided in Table 1.
4. Filing location and timely filing. A claimant shall submit an application under this Article to the Department as provided under A.R.S. § 1-218, and this subsection:
- a. Hand delivered or other delivery service requiring a street address:
 - i. Arizona Department of Transportation, Financial Management Services, Fuel Tax Refund Compliance Unit, 1801 W. Jefferson St., Rm. 201, Phoenix, AZ 85007.
 - ii. Hand delivered: the Department time and date stamp will be used to determine whether a complete application was received within the required time-frames established under subsection (B)(3).
 - iii. Other delivery service: the date of receipt by the designated delivery service shall be used to determine whether an application was received by the Department within the required time-frame established under subsection (B)(3).
 - b. United States Postal Service, including certified or registered mail:
 - i. Arizona Department of Transportation, Financial Management Services, Fuel Tax Refund Compliance Unit, P.O. Box 2100, Mail Drop 521M, Phoenix, AZ 85001.
 - ii. Regular mail: the postmark date will be used to determine whether an application was received by the Department within the required time-frames established under subsection (B)(3).
 - iii. Certified or registered mail: the date of receipt by the designated delivery service shall be used to determine whether an application was received by the Department within the required time-frame established under subsection (B)(3).
 - c. Other method as indicated on the Department's website at www.azdot.gov.
5. Supporting documentation.
- a. The Department shall accept any of the following forms of documentation to support a claim for refund, which may be admissible to the same extent as an original:
 - i. Photocopies;
 - ii. Duplicates (reprints);
 - iii. Document image; or
 - iv. Electronic copy, as indicated on the Department's website at www.azdot.gov.
 - b. The Department shall not return documentation submitted to support an application for refund once an application for refund has been accepted as complete.
 - c. If the Department determines that the supporting documentation required under these rules does not provide sufficient evidence of motor fuel tax paid,
- the Department may require the claimant to produce additional information.
- d. Failure to produce additional documentation as requested by the Department, within the time prescribed under subsection (B)(2)(d), shall result in a denial of refund request being issued by the Department.
6. Record retention and review.
- a. A licensee shall maintain the records relied upon to support the application for refund as specified under A.R.S. Title 28, Chapter 16, Article 1 and these rules, and produce those records to the Department when requested.
 - b. Unless required by A.R.S. Title 28, Chapter 16 to maintain records relied upon to substantiate an application for refund for a shorter or longer period of time, a licensee shall retain the records required to support an application for refund for three years from the issuance date of refund by the Department.
 - c. The Department reserves the right to review a claimant's records used to substantiate an application for refund under these rules.
7. If at any time, the Department discovers an overpayment of motor fuel tax refunded to a claimant under these rules, the Department shall recover payment under A.R.S. § 28-5612.
8. Notification; violation; suspension; administrative hearing.
- a. Denial of request for refund. If the Department denies an applicant's request for refund the Department shall send notification of denial to the claimant.
 - b. Administrative Hearings. Hearings, rehearings, and appeals shall be noticed and conducted in accordance with A.R.S. § 28-5924 and A.A.C Title 17, Chapter 1, Article 5.
 - c. Suspension due to violation of A.R.S. § 28-5612.
 - i. If the Department finds that a claimant is in violation of A.R.S. § 28-5612, the Department shall send notification to the claimant identifying the violation.
 - ii. A claimant determined by the Department to be in violation of state laws and regulations under A.R.S. § 28-5612 and these rules, may be suspended from filing motor tax fuel refunds for six consecutive months from the notification date of the Department for motor fuel tax paid during the suspension period.
 - iii. If a suspension is set aside under A.R.S. § 28-5612, a claimant may again apply to the Department for refund.
 - iv. The time-frame requirements under subsection (B)(3) shall not toll while pursuit of remedy by the claimant or the Department under this subsection.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

Historical Note

Table 1 made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Table 1 amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-602. Exports

- A. To qualify under this Article for a refund of Arizona fuel tax paid on motor fuel exported, a claimant shall provide the following documents to support a complete application for refund:
1. Export to another state within the United States:
 - a. Terminal, carrier, or bulk plant bill of lading or delivery ticket showing the point of origin and destination of the motor fuel;
 - b. Invoice or monthly supplier report schedule indicating that the Arizona tax was paid;
 - c. Motor fuel invoice or shipping document reflecting final destination and gallons exported;
 - d. Tax report establishing that the destination state's tax was reported;
 - e. Name and license number issued by the destination state of the licensee responsible for payment of motor fuel tax and tax reporting to the destination state; and
 - f. If the export of motor fuel is a diversion, the claimant shall provide the following documents to the Department:
 - i. A carrier bill of lading; and
 - ii. Other documentation which supports the delivery of motor fuel to a specific location, other than its intended destination.
 2. Exports to Mexico:
 - a. Documentation under subsection (A)(1),
 - b. U.S. Department of Commerce export documentation, and
 - c. Copy of Mexican Pedimento indicating authorization for import and verification of the motor fuel import.
 3. Exports to Navajo Nation:
 - a. Documentation under subsection (A)(1),
 - b. Name and license number of the Navajo Nation distributor,
 - c. Copy of Navajo Nation manifest or copy of the Navajo Nation monthly motor fuel distributor tax return, and
 - d. Invoice showing the Navajo Nation tax was included in total amount due.

- B. The description of the motor fuel exported shall be identical on all documentation submitted in support of a request for refund of motor fuel tax paid on export.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-603. Use Fuel Vendors

- A. To qualify for refund of the use fuel tax differential, a use fuel vendor shall submit to the Department:
1. A complete application as prescribed under R17-8-601;
 2. Supplier or restricted distributor invoice, documenting the use fuel taxes that the vendor paid for the fuel; and
 3. Supporting documentation:
 - a. For sales of use fuel dispensed from a pump which is labeled for use class into a light class or exempt use class vehicle, a fuel log of use fuel tax differential sales, submitted on a format approved by the Department that includes the following vendor information:
 - i. Vendor name;
 - ii. Department-issued retail branch number;
 - iii. Retail branch physical address;
 - iv. Department-issued vendor license number;
 - v. Date of sale to consumer;
 - vi. License plate number and name of jurisdiction that issued the license plate of the motor vehicle into which the fuel was dispensed;
 - vii. Number of gallons of use fuel that were purchased and dispensed into the fuel tank of a qualifying vehicle;
 - viii. Amount of fuel tax refunded to purchaser; and
 - ix. Purchaser's name and signature indicating receipt of the refund made by a vendor of use fuel, submitted on a vendor use fuel refund log, provided by the Department.
 - b. For use fuel vendors who have sales of use fuel dispensed from both a pump labeled for use class and from a pump labeled for light class or exempt use class, a report of the total pump sales for each type.
 - B. A licensed use fuel vendor shall maintain the following records under R17-8-601(B)(6):

 CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

1. Records of daily sales to light class or exempt use class motor vehicles which provides details for each use fuel sale to include the following:
 - a. Gallonage,
 - b. Transaction date,
 - c. Price per gallon, and
 - d. Product description;
 2. Purchase invoices of use fuel;
 3. Inventory records of use fuel; and
 4. Vendor use fuel refund log under subsection (A)(3)(a).
- C. Cardlock use fuel facility.**
1. Applicability. For purposes of receiving a refund from the Department for use fuel sold to a light class or exempt use class vehicle at a cardlock use fuel facility, the vendor shall:
 - a. Submit documentation under subsection (A)(3), except subsection (A)(3)(a)(ix), to the Department;
 - b. Have controlled access to the cardlock use fuel facility in compliance with A.R.S. § 28-5605;
 - c. Restrict use of a cardlock use fuel facility to those approved purchasers that have completed a Declaration of Status; and
 - d. Shall maintain records under subsection (B).
 2. Declaration of Status.
 - a. A vendor shall require that a purchaser of use fuel for use in light class or exempt use class vehicles complete and submit to the vendor a Declaration of Status for each vehicle that will have the ability to obtain fuel at a cardlock use fuel facility.
 - b. A Declaration of Status must be completed for each additional vehicle prior to purchase of motor fuel at a cardlock use fuel facility.
 - c. A Declaration of Status shall be made on a form provided by the Department and may be obtained at www.azdot.gov.
 - d. The original signature of the purchaser shall be included on the Declaration of Status.
 - e. A vendor who operates a cardlock use fuel facility must retain all original Declarations of Status received from a purchaser in the vendor's files under R17-8-601(B)(6), and shall make the Declarations of Status available for review by the Department.
 3. Labeling. A cardlock vendor shall comply with state law by placing a label with verbiage and specifications as required under A.R.S. § 28-5605.
 - a. Cardlock use fuel facilities shall post a use fuel tax rate label provided by the Department.
 - b. Vendors found in violation of labeling regulations shall be subject to penalties under A.R.S. § 28-5605.
- D. Mobile fueling vendor.**
1. Applicability. For purposes of receiving a refund from the Department for use fuel sold and delivered directly from a mobile vehicle into a light class or exempt use class vehicle fuel tank for other than the dispenser's own consumption, the vendor shall:
 - a. Submit documentation under subsection (A)(3), except subsection (A)(3)(a)(ix), to the Department; and
 - b. Shall maintain records under subsection (B).
 2. Declaration of Status.
 - a. A vendor shall require that a purchaser of dispensed use fuel complete and submit to the vendor a Declaration of Status for each light class or exempt use class vehicle that will have the ability to obtain fuel with a mobile fueling vendor.
- b. A Declaration of Status must be completed for each additional vehicle prior to delivery of motor fuel by a mobile fueling vendor.
 - c. A Declaration of Status shall be made on a form provided by the Department and may be obtained at www.azdot.gov.
 - d. The original signature of the purchaser shall be included on the Declaration of Status.
 - e. A vendor who operates a mobile fueling operation must retain all original Declarations of Status received from a purchaser in the vendor's files under R17-8-601(B)(6), and shall make the Declarations of Status available for review by the Department.
3. Labeling. A mobile fueling vendor shall comply with state law by placing a label with verbiage and specifications as required under A.R.S. § 28-5605.
 - a. Mobile fueling vendors shall post on their fueling dispenser a use fuel tax rate label provided by the Department.
 - b. Vendors found in violation of labeling regulations shall be subject to penalties under A.R.S. § 28-5605.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-604. Off-Highway

- A. The Department shall refund under this Article the Arizona motor fuel tax paid on the motor fuel consumed in Arizona while the vehicle is off-highway.
- B. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. System or manual motor fuel log summary by VIN which includes the following:
 - a. Items under subsection (C)(1)(a), and
 - b. Mileage consumed off-highway when applicable;
 2. Equipment and vehicle listing which includes year, make, equipment type, VIN or equipment serial number, and gross vehicle weight; and
 3. Proof of fuel purchase which may include:
 - a. Motor fuel invoices,
 - b. Motor fuel purchase receipts, and
 - c. Computerized fuel purchase statement.
- C. A claimant shall provide the following documentation to the Department for the identified refund types:
 1. Refrigeration unit:
 - a. Fuel log summary consisting of, at a minimum, the following information:
 - i. Fuel type,
 - ii. Date fuel dispensed,
 - iii. Number of gallons dispensed, and
 - iv. Identification number of equipment or vehicle into which the fuel was dispensed.
 - b. Equipment or vehicle listing which includes year, make, equipment type, VIN or equipment serial number, and gross vehicle weight.
 2. Power take-off: A motor fuel consumption study under this Section shall be conducted at the claimant's expense, and shall be approved by the Department prior to the initial application for refund, and shall include the following information:
 - a. A description of the methodology used to determine the percentage of exempt motor fuel consumed by the power take-off;
 - b. A list of all equipment using motor fuel;

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

- c. All operations where motor fuel is consumed;
 - d. Testing and study components shall be a true representation of the operation of business as follows:
 - i. Vehicles shall be grouped into similar categories based on similar power take-off units and similar gross vehicle weight.
 - ii. Vehicles selected shall be representative of the category as to age, make, model, and engine size.
 - iii. Each vehicle category shall be tested individually to determine the amount of motor fuel consumed by the power take-off unit.
 - iv. If a vehicle category contains:
 - (1) Less than four vehicles, all vehicles must be included in the test study.
 - (2) Thirty or fewer vehicles, then at least three vehicles must be included in the test sample.
 - (3) More than 30 and fewer than 151 vehicles, then at least 10 percent of the vehicles must be included in the test sample.
 - (4) More than 150 vehicles, then at least 15 vehicles must be included in the test sample.
 - e. Explanation of the measuring method used to determine fuel consumption by vehicles, equipment, and machinery, which shall include manufacturer specifications;
 - f. Results of a period of a study which shall include a period covering cyclical or seasonal impacts which captures low and high points of fuel usage for exempt or non-exempt purposes;
 - g. Results from a test or study shall be a duration of at least two weeks; and
 - h. The approved power take-off percentage may then be used for three years or shall be updated as requested by the Department.
3. Idle time as prescribed under R17-8-605.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-605. Idle Time

- A. Under the provisions of this Article, the Department shall refund the Arizona motor fuel tax imposed on the motor fuel consumed by a claimant's vehicle while in idle status.
- B. A complete application for refund, as prescribed under R17-8-601, shall include the following documentation to verify the quantity of motor fuel consumed by a vehicle while in idle status:
 - 1. Documentation that proves the total quantity of motor fuel purchased by the claimant in Arizona during refund period:
 - a. An invoice that contains the following information:
 - i. Date of purchase,
 - ii. Seller's name,
 - iii. Physical address where motor fuel was purchased,
 - iv. Number of gallons of motor fuel purchased,
 - v. Type of motor fuel purchased, and
 - vi. Price per gallon of motor fuel.
 - b. A fuel log shall be maintained that contains the following information:
 - 2. The date that the motor fuel was placed in the fuel tank of a motor vehicle,
 - 3. The identification number of the equipment or vehicle in which the motor fuel was placed, and
 - 4. The number of gallons of motor fuel placed in the fuel tank.
- c. In lieu of subsections (B)(1)(a) and (b), a licensee may submit a summary of the fuel purchases made by the claimant for the vehicle during the refund period. The summary shall contain the same information required to be on a fuel invoice under subsection (B)(1)(a).
- 2. Documentation that proves that the claimant's vehicle was located in Arizona, off-highway, at the time it was in idle status, and the length of time the vehicle was in idle status, using one or more of the following methods:
 - a. Nonscheduled route:
 - i. A logbook, approved by the Department, maintained for each vehicle that identifies the date and time when the idle status started, the date and time when the idle status ended, and a physical description of the location of the vehicle during the idle status that establishes that the vehicle was in Arizona, but located off-highway.
 - ii. The driver shall make an affirmative statement in the driver's daily log that the engine was operating during the idle status and shall prepare the logbook entries simultaneously with the idle status.
 - iii. The claimant shall retain trip schedules or bills of lading to support the logbook entries.
 - b. Scheduled route:
 - i. Published schedule which includes arrival at and departure from fixed locations at prescribed times; or
 - ii. A record of average wait times recorded in a daily log consisting of arrival at and departure from fixed locations at prescribed times, approved by the Department; and
 - iii. The claimant shall document that the engine remained running during the scheduled stops.
 - c. Global Positioning System:
 - i. A report from a GPS, approved pursuant to subsection (C).
 - ii. The claimant shall maintain trip schedules or bills of lading to support GPS reports.
- 3. Documentation that proves the quantity of motor fuel consumed by the claimant's vehicle while in idle status:
 - a. The claimant shall document the number of the gallons of motor fuel consumed per hour to maintain idle status by one or more of the following methods:
 - i. Engine manufacturer's standard specifications that establish the quantity of motor fuel consumed per hour while the vehicle is in idle status.
 - ii. Computerized system that computes the quantity of motor fuel consumed per hour while in idle status.
 - iii. A study or test that determines motor fuel consumption per hour while in idle status, prior to the period covered by the refund claim.
 - b. A study under this Section shall meet the following specifications:
 - i. The study shall be conducted at the claimant's expense,

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

- ii. The methodology shall be approved by the Department prior to conducting the study under subsection (C),
 - iii. The fuel consumption characteristics of the vehicles and their operation during the period of the refund shall not vary significantly from the conditions that existed during the study, and
 - iv. The results of the study shall be approved by the Department prior to the time period covered under the refund claim.
- C.** The Department shall review and approve the method used and the data captured by a GPS or manual report prior to the initial claim for refund and the report shall include the following components:
1. A description of the methodology used to determine the percentage of exempt use fuel consumption;
 2. A list of all equipment consuming use fuel;
 3. A description of all of the vehicle operations where use fuel is consumed;
 4. Whether vehicles are traveling scheduled routes, and whether seasonal or cyclical events affect use fuel;
 5. Testing and study components shall be a true representation of operation of business as follows:
 - a. Vehicles shall be grouped into similar categories based on similar units and similar gross vehicle weight.
 - b. Each vehicle category must be tested individually to determine the idle time fuel consumption.
 - c. Vehicles selected for testing shall be representative of the category as to age, make, model, and engine size.
 6. Study components under R17-8-604(C)(2)(d)(iv);
 7. Explanation of the measuring method used to determine fuel consumption by vehicles, equipment, and machinery, which shall include manufacturer specifications;
 8. Study results under this subsection shall include periods covering cyclical or seasonal impacts which captures low and high points of fuel usage for exempt or non-exempt purposes;
 9. Results from a test or study shall be of duration of at least two weeks; and
 10. The approved idle time study may then be used for three years or shall be updated as requested by the Department.
- D.** A claimant shall submit technical documentation that details the operating system of any system or manual study used including, but not limited to, the following:
1. Identification of the computer system, including the name of the manufacturer, name of the software, and software version number;
 2. Identification of vehicle engines on which the software will be used by the claimant, including makes, models, years, and fuel types;
 3. Description of the methodology used by computer system to determine idle status;
 4. Description of the methodology used to determine fuel consumption while in idle status;
 5. Description of the methodology used to determine the location of the vehicle during idle status; and
 6. Operating policies and procedures for the systems that are used in the claimant's business operations.
- E.** The claimant shall provide additional supporting documentation if there is any update to the system study for which documentation was initially submitted and approved.
1. A claimant shall submit to the Department an updated study under this Section three years from the date of Department approval or at the Department's request.
- 2. A study under this Section shall be conducted at the claimant's expense.
 - 3. The methodology used in support of a study under these rules shall be approved by the Department prior to conducting the study under subsection (C).
 - 4. If the Department rejects the results of a study, a claimant may request a hearing under A.R.S. § 28-5924.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-606. Tribal Government

- A. The Department shall refund the Arizona motor fuel tax imposed on the motor fuel consumed by a vehicle owned or leased to a tribal government under this Article.
- B. A complete application for refund, as prescribed under R17-8-601, shall include all of the following supporting documentation for each vehicle:
 1. Detailed fuel receipt statement which includes the following purchase information:
 - a. Date of fuel purchase,
 - b. Gallonage,
 - c. Location,
 - d. Fuel type, and
 - e. Seller's name and address;
 2. Fuel purchase summary by vehicle which includes documentation under subsection (B)(1);
 3. Bulk motor fuel purchase invoice which includes:
 - a. Gallonage,
 - b. Delivery location,
 - c. Fuel type, and
 - d. Tax rate paid; and
 4. If vehicle is leased, a copy of the lease agreement.
- C. A vehicle and equipment listing shall be maintained by the tribal government to include year, make, equipment type, VIN or equipment serial number, and gross vehicle weight.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-607. Tribal Member

- A. Enrolled members of a tribe may make application to the Department, as prescribed under R17-8-601, for a refund of the Arizona motor fuel taxes on fuel purchased on the reservation of the tribe in which the member is enrolled, provided the motor fuel was not used off the reservation for a commercial purpose.
- B. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. Copy of the vehicle registration,
 2. Copy of the Tribal member identification card,
 3. Receipt of motor fuel purchased on the reservation, and
 4. Signed statement certifying motor fuel was used for non-commercial purposes under A.R.S. § 28-5610(A).

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

CHAPTER 8. DEPARTMENT OF TRANSPORTATION - FUEL TAXES

R17-8-608. Transport of Forest Products; Healthy Forest Initiative

- A. A claim for refund, pursuant to A.R.S. § 28-5614(B), of the tax on motor fuel used to transport forest products on Arizona highways shall comply with the requirements of R17-8-601.
- B. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. An equipment and vehicle listing which includes year, make, equipment type, VIN or equipment serial number, and gross vehicle weight;
 2. Certification letter issued by the Arizona Commerce Authority pursuant to A.R.S. § 41-1516 for the same period of time as the refund claim;
 3. Memorandum of Understanding between the Arizona Commerce Authority and the claimant pursuant to A.R.S. § 41-1516;
 4. Individual Project Mileage and Fuel Reports for each project;
 5. Purchase invoices of use fuel; and
 6. Changes to the Arizona Commerce Authority Certification when applicable.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-609. Motor Vehicle Fuel Used in Aircraft

- A. A claim for the refund of the tax, pursuant to A.R.S. § 28-5611(A)(2) or non-agricultural purposes under A.R.S. § 28-5611(B), on motor vehicle fuel used to power aircraft shall comply with the requirements of R17-8-601 and subsections (B) and (C) of this Section.
- B. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. Motor fuel log summary by aircraft which includes:
 - a. Purchase date,
 - b. Name and location of vendor of fuel to show that Arizona motor fuel tax was included in the purchase price,
 - c. Gallons dispensed,
 - d. Fuel type, and
 - e. Manner consumed;
 2. List of aircraft to include, year, make model, and N-number assigned by the Federal Aviation Administration; and
 3. Purchase invoice indicating items under subsection (B)(1) and amount of tax paid.
- C. Motor vehicle fuel used to power aircraft for agricultural purposes shall, in addition to subsection (B), include a flight log detailing the purpose of use.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-610. Motor Fuel Losses Caused by Fire, Theft, Accident, or Contamination

- A. A claimant may apply to the Department for a refund of the tax on motor fuel lost due to fire, theft, accident, or contamination.

- B. A request for refund pursuant to A.R.S. §§ 28-5610 or 28-5611 of the tax on motor fuel that is lost due to fire, theft, accident, or contamination shall comply with the requirements of R17-8-601.

- C. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. Signed statements from persons with personal knowledge regarding the facts and circumstances of the loss, including:
 - a. Date of loss or contamination,
 - b. Location where the loss or contamination occurred,
 - c. Detailed explanation regarding the nature of the loss or contamination,
 - d. Name and contact information of persons who witnessed loss or contamination,
 - e. Quantity of fuel lost or contaminated, and
 - f. Disposition of the contaminated fuel.
 2. Copies of records that substantiate the date of acquisition and quantity acquired of the fuel lost as well as the fact the Arizona motor fuel tax was paid by the claimant when the fuel was acquired.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

R17-8-611. Bulk Purchase of Use Fuel

- A. A request for refund of taxes paid on the bulk purchase of use fuel dispensed into a light class, or exempt use class vehicle, shall be submitted to the Department, as prescribed under R17-8-601(B), on an application provided by the Department.
- B. Bulk use fuel shall be purchased and consumed in Arizona to qualify for refund.
- C. A complete application for refund, as prescribed under R17-8-601, shall include the following supporting documentation:
 1. Invoice that contains the following information:
 - a. Name and address of vendor,
 - b. Tax rate,
 - c. Product type,
 - d. Delivery date,
 - e. Quantity of fuel,
 - f. Invoiced amount, and
 - g. A statement from the seller of the use fuel that the use fuel is non-dyed use fuel.
 2. Fuel usage log which includes the following information:
 - a. Date fuel dispensed,
 - b. VIN of vehicle into which fuel was dispensed,
 - c. Gallons dispensed, and
 - d. Fuel type.
 3. Annual vehicle listing to include make, model, year, VIN, and gross vehicle weight.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 399, effective March 8, 2008 (Supp. 08-1). Amended by final expedited rulemaking at 24 A.A.R. 3501, effective December 4, 2018 (Supp. 18-4).

NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 17. TRANSPORTATION
CHAPTER 8. DEPARTMENT OF TRANSPORTATION
FUEL TAXES

Definitions of Terms

A.R.S. § 28-101. Definitions

(L19, Ch. 89, sec. 1 & Ch. 120, sec. 1)

In this title, unless the context otherwise requires:

1. “Alcohol” means any substance containing any form of alcohol, including ethanol, methanol, propynol and isopropynol.
2. “Alcohol concentration” if expressed as a percentage means either:
 - (a) The number of grams of alcohol per one hundred milliliters of blood.
 - (b) The number of grams of alcohol per two hundred ten liters of breath.
3. “All-terrain vehicle” means either of the following:
 - (a) A motor vehicle that satisfies all of the following:
 - (i) Is designed primarily for recreational nonhighway all-terrain travel.
 - (ii) Is fifty or fewer inches in width.
 - (iii) Has an unladen weight of one thousand two hundred pounds or less.
 - (iv) Travels on three or more nonhighway tires.
 - (v) Is operated on a public highway.
 - (b) A recreational off-highway vehicle that satisfies all of the following:
 - (i) Is designed primarily for recreational nonhighway all-terrain travel.
 - (ii) Is eighty or fewer inches in width.
 - (iii) Has an unladen weight of two thousand five hundred pounds or less.
 - (iv) Travels on four or more nonhighway tires.
 - (v) Has a steering wheel for steering control.
 - (vi) Has a rollover protective structure.
 - (vii) Has an occupant retention system.
4. “Authorized emergency vehicle” means any of the following:
 - (a) A fire department vehicle.
 - (b) A police vehicle.
 - (c) An ambulance or emergency vehicle of a municipal department or public service corporation that is designated or authorized by the department or a local authority.
 - (d) Any other ambulance, fire truck or rescue vehicle that is authorized by the department in its sole discretion and that meets liability insurance requirements prescribed by the department.

5. “Autocycle” means a three-wheeled motorcycle on which the driver and passengers ride in a fully or partially enclosed seating area that is equipped with a roll cage, safety belts for each occupant and antilock brakes and that is designed to be controlled with a steering wheel and pedals.
6. “Aviation fuel” means all flammable liquids composed of a mixture of selected hydrocarbons expressly manufactured and blended for the purpose of effectively and efficiently operating an internal combustion engine for use in an aircraft but does not include fuel for jet or turbine powered aircraft.
7. “Bicycle” means a device, including a racing wheelchair, that is propelled by human power and on which a person may ride and that has either:
 - (a) Two tandem wheels, either of which is more than sixteen inches in diameter.
 - (b) Three wheels in contact with the ground, any of which is more than sixteen inches in diameter.
8. “Board” means the transportation board.
9. “Bus” means a motor vehicle designed for carrying sixteen or more passengers, including the driver.
10. “Business district” means the territory contiguous to and including a highway if there are buildings in use for business or industrial purposes within any six hundred feet along the highway, including hotels, banks or office buildings, railroad stations and public buildings that occupy at least three hundred feet of frontage on one side or three hundred feet collectively on both sides of the highway.
11. “Certificate of ownership” means a paper or an electronic record that is issued in another state or a foreign jurisdiction and that indicates ownership of a vehicle.
12. “Certificate of title” means a paper document or an electronic record that is issued by the department and that indicates ownership of a vehicle.
13. “Combination of vehicles” means a truck or truck tractor and semitrailer and any trailer that it tows but does not include a forklift designed for the purpose of loading or unloading the truck, trailer or semitrailer.
14. “Controlled substance” means a substance so classified under section 102(6) of the controlled substances act (21 United States Code section 802(6)) and includes all substances listed in schedules I through V of 21 Code of Federal Regulations part 1308.
15. “Conviction” means:
 - (a) An unvacated adjudication of guilt or a determination that a person violated or failed to comply with the law in a court of original jurisdiction or by an authorized administrative tribunal.
 - (b) An unvacated forfeiture of bail or collateral deposited to secure the person’s appearance in court.
 - (c) A plea of guilty or no contest accepted by the court.
 - (d) The payment of a fine or court costs.
16. “County highway” means a public road that is constructed and maintained by a county.
17. “Dealer” means a person who is engaged in the business of buying, selling or exchanging motor vehicles, trailers or semitrailers and who has an established place of business and has paid fees pursuant to section 28-4302.
18. “Department” means the department of transportation acting directly or through its duly authorized officers and agents.

19. “Digital network or software application” has the same meaning prescribed in section 28-9551.
20. “Director” means the director of the department of transportation.
21. “Drive” means to operate or be in actual physical control of a motor vehicle.
22. “Driver” means a person who drives or is in actual physical control of a vehicle.
23. “Driver license” means a license that is issued by a state to an individual and that authorizes the individual to drive a motor vehicle.
24. “Electric bicycle” means a bicycle or tricycle that is equipped with fully operable pedals and an electric motor of less than seven hundred fifty watts and that meets the requirements of one of the following classes:
 - (a) “Class 1 electric bicycle” means a bicycle or tricycle that is equipped with an electric motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the bicycle or tricycle reaches the speed of twenty miles per hour.
 - (b) “Class 2 electric bicycle” means a bicycle or tricycle that is equipped with an electric motor that may be used exclusively to propel the bicycle or tricycle and that is not capable of providing assistance when the bicycle or tricycle reaches the speed of twenty miles per hour.
 - (c) “Class 3 electric bicycle” means a bicycle or tricycle that is equipped with an electric motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the bicycle or tricycle reaches the speed of twenty-eight miles per hour.
25. “Electric miniature scooter” means a device that:
 - (a) Weighs less than thirty pounds.
 - (b) Has two or three wheels.
 - (c) Has handlebars.
 - (d) Has a floorboard on which a person may stand while riding.
 - (e) Is powered by an electric motor or human power, or both.
 - (f) Has a maximum speed that does not exceed ten miles per hour, with or without human propulsion, on a paved level surface.
26. “Electric personal assistive mobility device” means a self-balancing device with one wheel or two nontandem wheels and an electric propulsion system that limits the maximum speed of the device to fifteen miles per hour or less and that is designed to transport only one person.
27. “Electric standup scooter”:
 - (a) Means a device that:
 - (i) Weighs less than seventy-five pounds.
 - (ii) Has two or three wheels.
 - (iii) Has handlebars.
 - (iv) Has a floorboard on which a person may stand while riding.
 - (v) Is powered by an electric motor or human power, or both.
 - (vi) Has a maximum speed that does not exceed twenty miles per hour, with or without human propulsion, on a paved level surface.

- (b) Does not include an electric miniature scooter.
28. "Evidence" includes both of the following:
- (a) A display on a wireless communication device of a department-generated driver license, nonoperating identification license, vehicle registration card or other official record of the department that is presented to a law enforcement officer or in a court or an administrative proceeding.
 - (b) An electronic or digital license plate authorized pursuant to section 28-364.
29. "Farm" means any lands primarily used for agriculture production.
30. "Farm tractor" means a motor vehicle designed and used primarily as a farm implement for drawing implements of husbandry.
31. "Foreign vehicle" means a motor vehicle, trailer or semitrailer that is brought into this state other than in the ordinary course of business by or through a manufacturer or dealer and that has not been registered in this state.
32. "Golf cart" means a motor vehicle that has not less than three wheels in contact with the ground, that has an unladen weight of less than one thousand eight hundred pounds, that is designed to be and is operated at not more than twenty-five miles per hour and that is designed to carry not more than four persons including the driver.
33. "Hazardous material" means a material, and its mixtures or solutions, that the United States department of transportation determines under 49 Code of Federal Regulations is, or any quantity of a material listed as a select agent or toxin under 42 Code of Federal Regulations part 73 that is, capable of posing an unreasonable risk to health, safety and property if transported in commerce and that is required to be placarded or marked as required by the department's safety rules prescribed pursuant to chapter 14 of this title.
34. "Implement of husbandry" means a vehicle that is designed primarily for agricultural purposes and that is used exclusively in the conduct of agricultural operations, including an implement or vehicle whether self-propelled or otherwise that meets both of the following conditions:
- (a) Is used solely for agricultural purposes including the preparation or harvesting of cotton, alfalfa, grains and other farm crops.
 - (b) Is only incidentally operated or moved on a highway whether as a trailer or self-propelled unit. For the purposes of this subdivision, "incidentally operated or moved on a highway" means travel between a farm and another part of the same farm, from one farm to another farm or between a farm and a place of repair, supply or storage.
35. "Limousine" means a motor vehicle providing prearranged ground transportation service for an individual passenger, or a group of passengers, that is arranged in advance or is operated on a regular route or between specified points and includes ground transportation under a contract or agreement for services that includes a fixed rate or time and is provided in a motor vehicle with a seating capacity not exceeding fifteen passengers including the driver.
36. "Livery vehicle" means a motor vehicle that:
- (a) Has a seating capacity not exceeding fifteen passengers including the driver.

- (b) Provides passenger services for a fare determined by a flat rate or flat hourly rate between geographic zones or within a geographic area.
 - (c) Is available for hire on an exclusive or shared ride basis.
 - (d) May do any of the following:
 - (i) Operate on a regular route or between specified places.
 - (ii) Offer prearranged ground transportation service as defined in section 28-141.
 - (iii) Offer on demand ground transportation service pursuant to a contract with a public airport, licensed business entity or organization.
37. "Local authority" means any county, municipal or other local board or body exercising jurisdiction over highways under the constitution and laws of this state.
38. "Manufacturer" means a person engaged in the business of manufacturing motor vehicles, trailers or semitrailers.
39. "Moped" means a bicycle, not including an electric bicycle, an electric miniature scooter or an electric standup scooter, that is equipped with a helper motor if the vehicle has a maximum piston displacement of fifty cubic centimeters or less, a brake horsepower of one and one-half or less and a maximum speed of twenty-five miles per hour or less on a flat surface with less than a one percent grade.
40. "Motorcycle" means a motor vehicle that has a seat or saddle for the use of the rider and that is designed to travel on not more than three wheels in contact with the ground but excludes a tractor, an electric bicycle, an electric miniature scooter, an electric standup scooter and a moped.
41. "Motor driven cycle" means a motorcycle, including every motor scooter, with a motor that produces not more than five horsepower but does not include an electric bicycle, an electric miniature scooter or an electric standup scooter.
42. "Motorized quadricycle" means a self-propelled motor vehicle to which all of the following apply:
- (a) The vehicle is self-propelled by an emission-free electric motor and may include pedals operated by the passengers.
 - (b) The vehicle has at least four wheels in contact with the ground.
 - (c) The vehicle seats at least eight passengers, including the driver.
 - (d) The vehicle is operable on a flat surface using solely the electric motor without assistance from the pedals or passengers.
 - (e) The vehicle is a commercial motor vehicle as defined in section 28-5201.
 - (f) The vehicle is a limousine operating under a vehicle for hire company permit issued pursuant to section 28-9503.
 - (g) The vehicle is manufactured by a motor vehicle manufacturer that is licensed pursuant to chapter 10 of this title.
 - (h) The vehicle complies with the definition and standards for low-speed vehicles set forth in federal motor vehicle safety standard 500 and 49 Code of Federal Regulations sections 571.3(b) and 571.500, respectively.

43. "Motor vehicle":

(a) Means either:

- (i) A self-propelled vehicle.
- (ii) For the purposes of the laws relating to the imposition of a tax on motor vehicle fuel, a vehicle that is operated on the highways of this state and that is propelled by the use of motor vehicle fuel.

(b) Does not include a personal delivery device, a personal mobile cargo carrying device, a motorized wheelchair, an electric personal assistive mobility device, an electric bicycle, an electric miniature scooter, an electric standup scooter or a motorized skateboard. For the purposes of this subdivision:

- (i) "Motorized skateboard" means a self-propelled device that does not have handlebars and that has a motor, a deck on which a person may ride and at least two tandem wheels in contact with the ground.
- (ii) "Motorized wheelchair" means a self-propelled wheelchair that is used by a person for mobility.

44. "Motor vehicle fuel" includes all products that are commonly or commercially known or sold as gasoline, including casinghead gasoline, natural gasoline and all flammable liquids, and that are composed of a mixture of selected hydrocarbons expressly manufactured and blended for the purpose of effectively and efficiently operating internal combustion engines. Motor vehicle fuel does not include inflammable liquids that are specifically manufactured for racing motor vehicles and that are distributed for and used by racing motor vehicles at a racetrack, use fuel as defined in section 28-5601, aviation fuel, fuel for jet or turbine powered aircraft or the mixture created at the interface of two different substances being transported through a pipeline, commonly known as transmix.

45. "Neighborhood electric vehicle" means a self-propelled electrically powered motor vehicle to which all of the following apply:

- (a) The vehicle is emission free.
- (b) The vehicle has at least four wheels in contact with the ground.
- (c) The vehicle complies with the definition and standards for low-speed vehicles set forth in federal motor vehicle safety standard 500 and 49 Code of Federal Regulations sections 571.3(b) and 571.500, respectively.

46. "Nonresident" means a person who is not a resident of this state as defined in section 28-2001.

47. "Off-road recreational motor vehicle" means a motor vehicle that is designed primarily for recreational nonhighway all-terrain travel and that is not operated on a public highway. Off-road recreational motor vehicle does not mean a motor vehicle used for construction, building trade, mining or agricultural purposes.

48. "Operator" means a person who drives a motor vehicle on a highway, who is in actual physical control of a motor vehicle on a highway or who is exercising control over or steering a vehicle being towed by a motor vehicle.

49. "Owner" means:

- (a) A person who holds the legal title of a vehicle.

- (b) If a vehicle is the subject of an agreement for the conditional sale or lease with the right of purchase on performance of the conditions stated in the agreement and with an immediate right of possession vested in the conditional vendee or lessee, the conditional vendee or lessee.
 - (c) If a mortgagor of a vehicle is entitled to possession of the vehicle, the mortgagor.
50. “Pedestrian” means any person afoot. A person who uses an electric personal assistive mobility device or a manual or motorized wheelchair is considered a pedestrian unless the manual wheelchair qualifies as a bicycle. For the purposes of this paragraph, “motorized wheelchair” means a self-propelled wheelchair that is used by a person for mobility.
51. “Personal delivery device”:
- (a) Means an electronically powered device that:
 - (i) Is operated primarily on sidewalks and within crosswalks and that is designed to transport property.
 - (ii) Weighs less than two hundred pounds, excluding cargo, unless otherwise authorized by a local authority pursuant to section 28-627.
 - (iii) Operates at a maximum speed of seven miles per hour, unless otherwise authorized by a local authority pursuant to section 28-627.
 - (iv) Is equipped with technology to allow for the operation of the device with or without the active control or monitoring of a natural person.
 - (v) Is equipped with a braking system that when active or engaged enables the personal delivery device to come to a controlled stop.
 - (b) Does not include a personal mobile cargo carrying device.
52. “Personal mobile cargo carrying device” means an electronically powered device that:
- (a) Is operated primarily on sidewalks and within crosswalks and that is designed to transport property.
 - (b) Weighs less than eighty pounds, excluding cargo.
 - (c) Operates at a maximum speed of twelve miles per hour.
 - (d) Is equipped with technology to transport personal property with the active monitoring of a property owner and that is primarily designed to remain within twenty-five feet of the property owner.
 - (e) Is equipped with a braking system that when active or engaged enables the personal mobile cargo carrying device to come to a controlled stop.
53. “Power sweeper” means an implement, with or without motive power, that is only incidentally operated or moved on a street or highway and that is designed for the removal of debris, dirt, gravel, litter or sand whether by broom, vacuum or regenerative air system from asphaltic concrete or cement concrete surfaces, including parking lots, highways, streets and warehouses, and a vehicle on which the implement is permanently mounted.
54. “Public transit” means the transportation of passengers on scheduled routes by means of a conveyance on an individual passenger fare-paying basis excluding transportation by a sightseeing bus, school bus or taxi or a vehicle not operated on a scheduled route basis.
55. “Reconstructed vehicle” means a vehicle that has been assembled or constructed largely by means of essential parts, new or used, derived from vehicles or makes of vehicles of various names, models and types or that, if

originally otherwise constructed, has been materially altered by the removal of essential parts or by the addition or substitution of essential parts, new or used, derived from other vehicles or makes of vehicles. For the purposes of this paragraph, “essential parts” means integral and body parts, the removal, alteration or substitution of which will tend to conceal the identity or substantially alter the appearance of the vehicle.

56. “Residence district” means the territory contiguous to and including a highway not comprising a business district if the property on the highway for a distance of three hundred feet or more is in the main improved with residences or residences and buildings in use for business.
57. “Right-of-way” when used within the context of the regulation of the movement of traffic on a highway means the privilege of the immediate use of the highway. Right-of-way when used within the context of the real property on which transportation facilities and appurtenances to the facilities are constructed or maintained means the lands or interest in lands within the right-of-way boundaries.
58. “School bus” means a motor vehicle that is designed for carrying more than ten passengers and that is either:
 - (a) Owned by any public or governmental agency or other institution and operated for the transportation of children to or from home or school on a regularly scheduled basis.
 - (b) Privately owned and operated for compensation for the transportation of children to or from home or school on a regularly scheduled basis.
59. “Semitrailer” means a vehicle that is with or without motive power, other than a pole trailer or single-axle tow dolly, that is designed for carrying persons or property and for being drawn by a motor vehicle and that is constructed so that some part of its weight and that of its load rests on or is carried by another vehicle. For the purposes of this paragraph, “pole trailer” has the same meaning prescribed in section 28-601.
60. “Single-axle tow dolly” means a nonvehicle device that is drawn by a motor vehicle, that is designed and used exclusively to transport another motor vehicle and on which the front or rear wheels of the drawn motor vehicle are mounted on the tow dolly while the other wheels of the drawn motor vehicle remain in contact with the ground.
61. “State” means a state of the United States and the District of Columbia.
62. “State highway” means a state route or portion of a state route that is accepted and designated by the board as a state highway and that is maintained by the state.
63. “State route” means a right-of-way whether actually used as a highway or not that is designated by the board as a location for the construction of a state highway.
64. “Street” or “highway” means the entire width between the boundary lines of every way if a part of the way is open to the use of the public for purposes of vehicular travel.
65. “Taxi” means a motor vehicle that has a seating capacity not exceeding fifteen passengers, including the driver, that provides passenger services and that:
 - (a) Does not primarily operate on a regular route or between specified places.
 - (b) Offers local transportation for a fare determined on the basis of the distance traveled or prearranged ground transportation service as defined in section 28-141 for a predetermined fare.

66. “Title transfer form” means a paper or an electronic form that is prescribed by the department for the purpose of transferring a certificate of title from one owner to another owner.
67. “Traffic survival school” means a school that offers educational sessions to drivers who are required to attend and successfully complete educational sessions pursuant to this title that are designed to improve the safety and habits of drivers and that are approved by the department.
68. “Trailer” means a vehicle that is with or without motive power, other than a pole trailer or single-axle tow dolly, that is designed for carrying persons or property and for being drawn by a motor vehicle and that is constructed so that no part of its weight rests on the towing vehicle. A semitrailer equipped with an auxiliary front axle commonly known as a dolly is deemed to be a trailer. For the purposes of this paragraph, “pole trailer” has the same meaning prescribed in section 28-601.
69. “Transportation network company” has the same meaning prescribed in section 28-9551.
70. “Transportation network company vehicle” has the same meaning prescribed in section 28-9551.
71. “Transportation network service” has the same meaning prescribed in section 28-9551.
72. “Truck” means a motor vehicle designed or used primarily for the carrying of property other than the effects of the driver or passengers and includes a motor vehicle to which has been added a box, a platform or other equipment for such carrying.
73. “Truck tractor” means a motor vehicle that is designed and used primarily for drawing other vehicles and that is not constructed to carry a load other than a part of the weight of the vehicle and load drawn.
74. “Vehicle”:
- (a) Means a device in, on or by which a person or property is or may be transported or drawn on a public highway.
 - (b) Does not include:
 - (i) Electric bicycles, electric miniature scooters, electric standup scooters and devices moved by human power.
 - (ii) Devices used exclusively on stationary rails or tracks.
 - (iii) Personal delivery devices.
 - (iv) Personal mobile cargo carrying devices.
75. “Vehicle transporter” means either:
- (a) A truck tractor capable of carrying a load and drawing a semitrailer.
 - (b) A truck tractor with a stinger-steered fifth wheel capable of carrying a load and drawing a semitrailer or a truck tractor with a dolly mounted fifth wheel that is securely fastened to the truck tractor at two or more points and that is capable of carrying a load and drawing a semitrailer.

A.R.S. § 28-5601. Definitions

In this article and articles 2 and 5 of this chapter, unless the context otherwise requires:

1. “Blending”:
 - (a) Means the mixing of one or more products, regardless of the original character of the product blended, if the product obtained by the blending is capable of use or otherwise sold for use in the generation of power for the propulsion of a motor vehicle, aircraft or watercraft.
 - (b) Does not include blending that occurs in the process of refining by the original refiner of crude petroleum or the blending of products known as lubricating oil and greases.
2. “Bulk end user” means a person who receives into the person’s own storage facilities in transport truck lots motor fuel for the person’s own consumption.
3. “Bulk plant” means a motor fuel storage and distribution facility that is not a terminal and from which motor fuel may be removed at a rack.
4. “Bulk transfer” means any transfer of motor fuel from one location to another by pipeline tender or marine delivery within the bulk transfer terminal system.
5. “Bulk transfer terminal system” means the motor fuel distribution system consisting of refineries, pipelines, marine vessels and terminals. Motor fuel in a refinery, pipeline, vessel or terminal is in the bulk transfer terminal system. Motor fuel in the fuel supply tank of any engine, or in any tank car, rail car, trailer, truck or other equipment suitable for ground transportation, is not in the bulk transfer terminal system.
6. “Consumer” means the end purchaser of motor vehicle fuel for use on the highways in this state, the end purchaser of motor vehicle fuel for use in watercraft on waterways of this state or the end purchaser of aviation fuel for use in aircraft.
7. “Destination state” means the state, territory or foreign country to which motor fuel is directed for delivery into a storage facility, a receptacle, a container or a type of transportation equipment for the purpose of resale or use.
8. “Distributor” means a person who acquires motor fuel from a supplier or another distributor for subsequent sale or use and who may blend or import into or export from this state motor fuel in the original package or container or otherwise but excluding a person who imports motor fuel in the fuel tank of a motor vehicle or aircraft.
9. “Dyed diesel fuel” means diesel fuel that is dyed pursuant to United States internal revenue service regulations or requirements, including any invisible marker requirements.
10. “Fuel tank” means a receptacle on a motor vehicle, watercraft or aircraft from which fuel is supplied for the propulsion of the motor vehicle, watercraft or aircraft, excluding a cargo tank but including a separate compartment of a cargo tank used as a fuel tank and an auxiliary tank or receptacle of any kind from which fuel is supplied for the propulsion of the motor vehicle, watercraft or aircraft, whether or not the tank or receptacle is directly connected to the fuel supply line of the motor vehicle, watercraft or aircraft.

11. "Highway" means any way or place in this state of whatever nature that is maintained by public monies and that is open to the use of the public for purposes of vehicular travel, including a highway under construction.
12. "In this state" means any way or place within the exterior limits of the state of Arizona that is maintained by public monies, including any such way or place that is owned by or ceded to the United States of America.
13. "Indian reservation" means all lands that are within the limits of areas set aside by the United States for the exclusive use and occupancy of Indian tribes by treaty, law or executive order and that are currently recognized as Indian reservations by the United States department of the interior.
14. "Indian tribe" means any organized nation, tribe, band or community recognized as an Indian tribe by the United States department of the interior.
15. "Interstate user" means a person registering a use class motor vehicle under chapter 7, article 7 or 8 of this title or section 28-2321 or 28-2324.
16. "Invoiced gallons" means the gallons actually billed on an invoice in payment to a supplier.
17. "Light class motor vehicle" means a motor vehicle that uses use fuel on the highways in this state but excludes a road tractor, truck tractor, truck or passenger carrying vehicle having a declared gross vehicle weight of more than twenty-six thousand pounds or having more than two axles.
18. "Motor fuel" means motor vehicle fuel, use fuel and aviation fuel.
19. "Motor vehicle" means a self-propelled vehicle required to be licensed or subject to licensing for operation on a highway.
20. "Permissive supplier" means an out-of-state supplier that elects, but is not required, to have a supplier's license pursuant to this article.
21. "Person" means an individual, firm, partnership, joint venture, association, corporation, estate, trust, business trust, receiver or syndicate, this state, any county, city, town, district or other subdivision of this state, an Indian tribe, or any other group or combination acting as a unit.
22. "Position holder":
 - (a) Means the person who holds the inventory position in motor fuel in a terminal, as reflected on the records of the terminal operator. For the purposes of this subdivision, "a person who holds the inventory position in motor fuel" means a person who has a contract with the terminal operator for the use of storage facilities and terminaling services for fuel at the terminal.
 - (b) Includes a terminal operator who owns fuel in the terminal.
23. "Public monies" means those monies that are received by this state and that are derived all or in part from tax revenues or other funding sources.
24. "Qualified terminal" means a terminal that is designated as a qualified terminal pursuant to the United States internal revenue code, regulation and practices and that has been assigned a terminal control number by the United States internal revenue service.

25. "Rack" means a mechanism for delivering motor fuel from a refinery, a terminal or a bulk plant into a railroad tank car, a transport truck or other means of transfer that is outside the bulk transfer terminal system.
26. "Refiner" means any person who owns, operates or otherwise controls a refinery within the United States.
27. "Refinery" means a facility that is used to produce motor fuel from crude oil, unfinished oils, natural gas liquids, transmix or other hydrocarbons or by blending and from which motor fuel may be removed by pipeline, by vessel or at a rack.
28. "Road tractor" means a motor vehicle that is designed and used for drawing other vehicles and that is not constructed to carry either a load independently or any part of the weight of a vehicle or load so drawn.
29. "Sell" includes a transfer of title or possession, exchange or barter in any manner or by any means.
30. "Supplier":
 - (a) Means a person who is registered pursuant to section 4101 of the United States internal revenue code for transactions in motor fuels in the bulk transfer terminal distribution system and who is one of the following:
 - (i) The position holder in a terminal or refinery in this state.
 - (ii) A person who imports motor fuel into this state from a foreign country.
 - (iii) A person who acquires motor fuel from a terminal or refinery in this state from a position holder pursuant to a two party exchange.
 - (iv) The position holder in a terminal or refinery outside this state with respect to motor fuel that that person imports into this state on the account of that person.
 - (b) Includes a permissive supplier unless specifically provided otherwise. Supplier does not include a terminal operator merely because the terminal operator handles motor fuel consigned to the terminal operator within a terminal.
31. "Terminal" means a storage and distribution facility for motor fuel, which is supplied by pipeline or marine vessel, that is registered as a qualified terminal by the United States internal revenue service and from which motor fuel may be removed at a rack.
32. "Terminal bulk transfer" includes the following:
 - (a) A marine barge movement of motor fuel from a refinery or terminal to a terminal.
 - (b) Pipeline movements of motor fuel from a refinery or terminal to a terminal.
33. "Terminal operator" means any person who owns, operates or otherwise controls a terminal and who does not use a substantial portion of the motor fuel that is transferred through or stored in the terminal for the person's own use or consumption or in the manufacture of products other than motor fuel. A terminal operator may own the motor fuel that is transferred through or stored in the terminal.
34. "Transmix" means the buffer or interface between two different products in a pipeline shipment or a mix of two different products within a refinery or terminal that results in an off-grade mixture that is not usable or salable as motor fuel.
35. "Two party exchange" means a transaction:

- (a) In which motor fuel is transferred from one licensed supplier or licensed permissive supplier to another licensed supplier or licensed permissive supplier.
 - (b) That includes a transfer from the person that holds the original inventory position for motor fuel in the terminal as reflected on the records of the terminal operator.
 - (c) That is simultaneous with removal from the terminal by the receiving exchange party.
 - (d) In which the terminal operator in the terminal operator's books and records treats the receiving exchange party as the supplier that removes the product across a terminal rack for purposes of reporting the events to the department.
36. "Use" includes the placing of fuel into any receptacle on a motor vehicle from which fuel is supplied for the propulsion of the vehicle unless the operator of the vehicle establishes to the satisfaction of the director that the fuel was consumed for a purpose other than to propel a motor vehicle on a highway in this state and, with respect to fuel brought into this state in any such receptacle on a use class motor vehicle, the consumption of the fuel in this state. A person who places fuel in a receptacle on a use class motor vehicle of another is not deemed to have used the fuel.
37. "Use class motor vehicle" means a motor vehicle that uses use fuel on a highway in this state and that is a road tractor, truck tractor, truck or passenger carrying vehicle having a declared gross vehicle weight of more than twenty-six thousand pounds or having more than two axles.
38. "Use fuel" includes all gases and liquids used or suitable for use to propel motor vehicles, except fuels that are subject to the motor vehicle fuel tax imposed by this article.
39. "User" includes a person who, within the meaning of the term use as defined in this section, uses fuel in a use class motor vehicle.
40. "Vendor" includes a person who sells use fuel in this state and who places the fuel or causes the fuel to be placed into any receptacle on a motor vehicle from which receptacle fuel is supplied for the propulsion, including a service station dealer, a broker and a user who sells use fuel to others.

NOTICE OF FINAL EXPEDITED RULEMAKING
TITLE 17. TRANSPORTATION
CHAPTER 8. DEPARTMENT OF TRANSPORTATION
FUEL TAXES

Statutory Authority Including Relevant Statutory Definitions

General Authority for Rulemaking

A.R.S. § 28-366. Director; rules

The director shall adopt rules pursuant to title 41, chapter 6 as the director deems necessary for:

1. Collection of taxes and license fees.
2. Public safety and convenience.
3. Enforcement of the provisions of the laws the director administers or enforces.
4. The use of state highways and routes to prevent the abuse and unauthorized use of state highways and routes.

A.R.S. § 28-374. Fees and taxes; alternative payment methods; penalties

- A. Subject to the limitations of sections 35-142 and 41-2544, the director may enter into agreements for the purpose of accepting payment for fees and taxes imposed under this title by alternative payment methods, including credit cards, debit cards and electronic funds transfers.
- B. Before the revenues are transferred to the director as provided in sections 28-2005 and 28-6533, the collecting officer shall deduct any fee charged or withheld by a company providing the alternative payment method under an agreement with the director or the director may reimburse the collecting officer pursuant to an agreement.
- C. For a tax year or reporting period that begins on or after January 1, 1998, the department may require by rule that a person who owed twenty thousand dollars or more for the preceding tax year in taxes imposed by chapter 16, article 1 of this title pay taxes on or before the prescribed payment date in monies that are immediately available to this state on the date of transfer as provided in subsection D of this section. The rule shall be consistent with the cash management policies of the state treasurer.
- D. A payment in monies that are immediately available shall be made by electronic funds transfer or any other means that is required by the department, that is approved by the state treasurer and that ensures the availability of the monies to this state on the date of payment.
- E. A person who pays taxes as prescribed in subsection C of this section shall furnish to the department evidence as prescribed by the department that shows that payment was remitted on or before the prescribed payment date.
- F. A person who fails to make a timely payment in monies that are immediately available is subject to penalties as prescribed in chapter 16 of this title.

A.R.S. § 28-5930. Electronic report filing; rules; payment availability

- A. The director may require by rule that persons who are required to file reports pursuant to this chapter file those reports by electronic means.
- B. The rules shall include at least the following:
 - 1. Data elements.
 - 2. The format for the data elements.
 - 3. The method and medium of transmission.
 - 4. Provisions for waiver.
- C. All monies that accompany electronic reports shall be immediately available to this state on the date of transfer as provided in section 28-374.

Specific Statutes

A.R.S. § 28-5618. Report requirements

- A.** On or before the twenty-seventh day of each month, a supplier shall file with the director a true and verified statement in a form prescribed by the director showing:
 1. The total number of gallons of motor vehicle fuel or aviation fuel, blended, imported, exported or acquired during the preceding calendar month.
 2. The number of gallons of motor vehicle fuel or aviation fuel sold or otherwise disposed of by the supplier for use in each of the several counties of this state.
 3. The total number of gallons of motor vehicle fuel that is included in this subsection and that is intended for use in aircraft.
 4. Other information the director requires.
- B.** In addition to making the statement required in subsection A and if the supplier received an interstate shipment of motor vehicle fuel during the preceding month, the supplier shall report on or before the twenty-seventh day of each month to the director in a form prescribed by the director:
 1. The quantity and particular description of the fuel received by interstate shipment and delivered intercounty.
 2. The name of the consignor and consignee.
 3. The date shipped.
 4. The date received.
 5. How it was shipped.
 6. Other information the director requires.
- C.** A supplier may amend a report filed pursuant to this section within three years after the date the original tax report was filed unless the report for the period is final due to an audit.
- D.** If an amended report results in a reduction in taxes paid, the department shall credit the licensee's account unless the licensee files a written request for a refund.

A.R.S. § 28-5619. Records required; violation; classification

- A.** Suppliers and restricted distributors shall maintain and keep records of motor vehicle fuel or aviation fuel received, acquired, used, sold and delivered in this state by the supplier or restricted distributor, the amount of tax paid as part of the purchase price, invoices, bills of lading and other pertinent records and papers required by the director for the reasonable administration of this article at least until the later of the following:
 1. Three years after a report is required to be filed pursuant to this article.
 2. Three years after a report is filed.
- B.** Any person, other than a restricted distributor, purchasing motor vehicle fuel taxable under this article or aviation fuel taxable under section 28-8344 from a supplier for the purpose of resale shall maintain and keep for

one year a record of motor vehicle fuel or aviation fuel received, the amount of tax paid to the supplier as part of the purchase price, delivery tickets, invoices, bills of lading and other records the director requires.

- C. Each distributor and vendor shall maintain and keep for three years the following:
 - 1. Records of use fuel received, sold or delivered in this state by the distributor or vendor.
 - 2. Invoices, bills of lading and other pertinent records and papers required by the director for the reasonable administration of this article.
- D. The director may require distributors to file information as to sales or deliveries to vendors or users of use fuel at the times and in the form as the director requires.
- E. A person who violates this section is guilty of a class 1 misdemeanor.

A.R.S. § 28-5620. Records and equipment inspections; hearings; use restrictions; violation; costs

- A. The director or a deputy, employee or agent authorized by the director may examine during usual business hours records, books, papers, storage tanks and any other equipment of a person pertaining to motor fuel imported, received, sold, shipped, delivered or used to either:
 - 1. Verify the truth and accuracy of a statement, report, return or claim.
 - 2. Ascertain whether the tax imposed by this article or section 28-8344 has been paid.
 - 3. Determine the financial responsibility of the supplier for the payment of the taxes imposed by this article or section 28-8344.
 - 4. Determine the validity of a refund.
- B. In the enforcement of this article, the director may hold hearings, take testimony of persons, issue subpoenas for the purpose of taking testimony, compel attendance of witnesses and conduct investigations the director deems necessary.
- C. The director may prescribe forms for required reports or claims for refund or forms of record to be used by suppliers, distributors, restricted distributors, vendors or refund claimants.
- D. Records required by this article may be maintained in this state. If the records are maintained outside this state and on request of the director, the records shall be made available at a location in this state designated by the director. If the records are maintained outside this state and will not be made available at the location designated by the director, the director may require the person to whom a records request has been made to pay in advance costs reimbursable for subsistence and travel expenses for the director or an agent of the director to conduct the examination of the records.

A.R.S. § 28-5625. Restricted distributor licenses; reports; violation; classification

- A. A person shall obtain a license and report pursuant to subsection D of this section as a restricted distributor of motor vehicle fuel from the director if all of the following apply:
 - 1. The person transports for sale motor vehicle fuel to another county from the county that was originally reported by the supplier.
 - 2. The person purchases or otherwise acquires motor vehicle fuel in tank car or cargo lots.

3. The person sells the motor vehicle fuel for delivery in this state or export from this state.
 4. The person is not required by this article to be licensed as a supplier.
- B.** To obtain a restricted distributor license, a person shall file with the director an application that contains the following:
1. The name under which the person is transacting business in this state.
 2. The address of the person's principal office or place of business in this state.
 3. The name and address of the owner, the names and addresses of the partners if the restricted distributor is a partnership or the names and addresses of the principal officer if the restricted distributor is a corporation or association.
 4. Other information the director requires.
- C.** If the application is in proper form and is accepted for filing, the director shall issue to the applicant a license to transact business as a restricted distributor in this state subject to cancellation as provided by law.
- D.** A restricted distributor shall report on or before the twenty-seventh day of each month to the director in a form prescribed by the director:
1. The quantity of motor vehicle fuel acquired during the preceding calendar month.
 2. The disposition of the motor vehicle fuel for use in each of the several counties.
 3. The name of the consignor and consignee.
 4. The date shipped.
 5. The date received.
 6. How it was shipped.
 7. Other information the director requires.
- E.** A restricted distributor may amend a report filed pursuant to this section within three years after the date the original tax report was filed unless the report for the period is final due to an audit.
- F.** If a restricted distributor files a false report or fails, refuses or neglects to file a report pursuant to subsection D of this section, the director may cancel the restricted distributor's license and notify the restricted distributor of the cancellation by regular mail at the last known address of the restricted distributor appearing in the department's records.
- G.** If a restricted distributor ceases to engage in business as a restricted distributor in this state by reason of discontinuance, sale or transfer of the business, the restricted distributor shall notify the director in writing at least ten days before the discontinuance, sale or transfer takes effect. If the restricted distributor sells or transfers the business, the restricted distributor shall include the name and address of the purchaser or transferee in the notice to the director.
- H.** A person who is required to be licensed as a restricted distributor of motor vehicle fuel pursuant to this section and who fails to obtain a license is guilty of a class 1 misdemeanor.

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2019

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 8, 2019

SUBJECT: **STATE BOARD OF PHARMACY (R19-1203)**

Title 4, Chapter 23, Board of Pharmacy, Articles 1, 2, 4, 6, 8, and 11

Amend: R4-23-110, R4-23-204, R4-23-205, R4-23-407, R4-23-408, R4-23-411,
R4-23-607, R4-23-1103, R4-23-1106

Repeal: R4-23-801

Summary:

This regular rulemaking from the State Board of Pharmacy (“Board”) seeks to amend multiple rules in Title 4, Chapter 23, Articles 1, 2, 4, 6, and 11 and repeal one rule in Article 8. The Board indicates the rulemaking is an effort to comply with Executive Order 2019-01 by making minor changes to remove unnecessary or burdensome regulatory requirements and comply with statutory changes.

Specifically, in a rulemaking approved by Council on April 2, 2019 (See 25 A.A.R. 1015 (April 26, 2019)), a definition of virtual wholesaler was removed to provide time for the Board to consider public comment. The revised definition of virtual wholesaler, as required under A.R.S. § 32-1901, is included in this rulemaking. Under Laws 2018, Chapter 228, the legislature amended A.R.S. § 32-1901 to remove reference to “graduate intern” so the term is removed from Sections included in this rulemaking. R4-23-205 is amended to add fees for temporary licenses as specifically authorized under A.R.S. § 32-3124(H); R4-23-204 is amended to comply with A.R.S. § 32-3248.02, which requires health professionals to obtain continuing education

regarding opioids; and R4-23-1103 is amended to comply with A.R.S. § 32-1924(F), which establishes a 36-month license for a pharmacy technician trainee. R4-23-607 is amended to clarify that a nonresident permittee is required to be licensed in both Arizona and the jurisdiction of residence.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

Yes. The Board cites to both general and specific statutory authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

Yes. R4-23-205 is being amended to add fees for temporary licenses. Pursuant to A.R.S. § 41-1008(A)(1), “an agency shall not charge or receive a fee or make a rule establishing a fee unless the fee for the specific activity is expressly authorized by statute....” Here, A.R.S. § 32-3124(H) states, “[a] health profession regulatory board may establish an application and fee in rule for temporary licensure under this section.” As such, the new fee for temporary licensure is in compliance with A.R.S. § 41-1008(A)(1).

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

The Board did not review or rely on any study in conducting this rulemaking.

4. Summary of the agency's economic impact analysis:

The Board is making minor changes to remove unnecessary or burdensome regulatory requirements to comply with statute. As a result, the Board believes the rulemaking will have minimal economic impact on stakeholders. Stakeholders include the Board, licensees who prescribe opioids, applicants wishing to obtain a temporary license, and virtual wholesalers.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Board indicates that because the costs associated with the rulemaking are minimal and reasonable and they did not consider less costly or less intrusive alternative methods.

6. What are the economic impacts on stakeholders?

The Board is the only state agency directly affected by the rulemaking and will incur the cost of implementing the rule making. No political subdivisions are directly affected. The Board believes that the changes and requirements in the rulemaking impose minimal economic burdens on stakeholders. The Board believes it is not possible to reduce the impact on small business and achieve the goal of protecting public safety. No private persons or consumers are directly affected by the rule making.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

No. The Board made two non-substantive changes between the Notice of Proposed Rulemaking and Notice of Final Rulemaking before the Council. First, the Board changed R4-23-408(H)(1)(e) to clarify that a hard-copy record is required if a prescription order is for any controlled substance to make the rule consistent with federal law. Second, the Board changed R4-23-1103(C)(5) to clarify there are two Board-approved certification examinations for pharmacy technicians.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Board received three comments on this proposed rulemaking.

First, one commenter expressed concern regarding R4-23-1103 and that the 36-month expiration of a pharmacy technician license with no opportunity for renewal would cause hardship for some individuals. The Board responded that A.R.S. § 32-1924(F) specifies the 36-month expiration and no opportunity for renewal. Therefore, the only way to address this concern would be through statutory change.

The other two comments from the Consumer Healthcare Products Association and the Council for Responsible Nutrition both supported repeal of R4-23-801.

Council staff finds that the Board adequately addressed comments on this rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

The Board indicates that it does not issue general permits, but individual licenses as specifically authorized by the Board's statutes. *See* A.R.S. §§ 32-1904(A)(5) and 32-1922. As such, the Board is in compliance with A.R.S. § 41-1037.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

The Board indicates that no rule is more stringent than federal law.

11. Conclusion

The Board is conducting this rulemaking to remove unnecessary or burdensome regulatory requirements and comply with statutory changes. While the rulemaking establishes a new fee, the Board has cited specific statutory authority for establishing a new fee related to temporary licensure. The Board has adequately responded to the three public comments on this

rulemaking. The Board is requesting the standard 60-day delayed effective date pursuant to A.R.S. § 41-1032(A). Council staff recommends approval of this rulemaking.

October 16, 2019

Ms. Nicole Sornsin, Chair
The Governor's Regulatory Review Council
100 North 15th Avenue, Ste. 305
Phoenix, AZ 85007

**Re: A.A.C. Title 4. Professions and Occupations
Chapter 23. Board of Pharmacy**

Dear Ms. Sornsin:

The attached final rule package is submitted for review and approval by the Council. The following information is provided for Council's use in reviewing the rule package:

- A. Close of record date: The rulemaking record was closed on October 11, 2019, following a period for public comment and an oral proceeding. This rule package is being submitted within the 120 days provided by A.R.S. § 41-1024(B).
- B. Relation of the rulemaking to a five-year-review report: The rulemaking does not relate to the five-year-review report.
- C. New fee: As specifically authorized under A.R.S. § 32-3124(H), a new fee is added for a temporary license.
- D. Fee increase: The rulemaking does not increase an existing fee.
- E. Immediate effective date: An immediate effective date is not requested.
- F. Certification regarding studies: I certify that the preamble accurately discloses the Board did not review or rely on a study in its evaluation of or justification for any rule in this rulemaking.
- G. Certification that the preparer of the EIS notified the JLBC of the number of new full-time employees necessary to implement and enforce the rule: I certify that none of the rules in this rulemaking will require a state agency to employ a new full-time employee. No notification was provided to JLBC.
- H. List of documents enclosed:
 1. Cover letter signed by the Executive Director;
 2. Notice of Final Rulemaking including the preamble, table of contents, and rule text;
 3. Economic, Small Business, and Consumer Impact Statement
 4. Public comments

Sincerely,

A handwritten signature in blue ink that reads "Kam Gandhi".

Kamlesh Gandhi
Executive Director

NOTICE OF FINAL RULEMAKING
TITLE 4. PROFESSIONS AND OCCUPATIONS
CHAPTER 23. BOARD OF PHARMACY

PREAMBLE

<u>1. Articles, Parts, and Sections Affected</u>	<u>Rulemaking Action</u>
R4-23-110	Amend
R4-23-204	Amend
R4-23-205	Amend
R4-23-407	Amend
R4-23-408	Amend
R4-23-411	Amend
R4-23-607	Amend
R4-23-801	Repeal
R4-23-1103	Amend
R4-23-1106	Amend
<u>2. Citations to the agency's statutory rulemaking authority to include both the authorizing statute (general) and the implementing statute (specific):</u>	
Authorizing statute: A.R.S. § 32-1904(A)(1)	
Implementing statute: A.R.S. §§ 32-1923.01, 32-1924(F), 32-1925, 32-1936, 32-1964, 32-1968, and 32-1974	
<u>3. The effective date for the rules:</u>	
As specified under A.R.S. § 41-1032(A), the rule will be effective 60 days after the rule package is filed with the Office of the Secretary of State.	
<u>a. If the agency selected a date earlier than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):</u>	
Not applicable	
<u>b. If the agency selected a date later than the 60-day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):</u>	
Not applicable	

4. Citation to all related notices published in the *Register* to include the *Register* as specified in R1-1-409(A) that pertain to the record of the final rulemaking package:

Notice of Rulemaking Docket Opening: 25 A.A.R. 2092, August 16, 2019

Notice of Proposed Rulemaking: 25 A.A.R. 2159, August 30, 2019

5. The agency's contact person who can answer questions about the rulemaking:

Name: Kamlesh Gandhi

Address: 1616 W Adams Street, Suite 120

Phoenix, AZ 85007

Telephone: (602) 771-2740

Fax: (602) 771-2749

E-mail: kgandhi@azpharmacy.gov

Website: www.azpharmacy.gov

6. An agency's justification and reason why a rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:

The Board is complying with Executive Order 2019-01 by making minor changes to remove unnecessary or burdensome regulatory requirements and comply with statute. In a rulemaking approved by Council on April 2, 2019 (See 25 A.A.R. 1015 (April 26, 2019)), a definition of virtual wholesaler was removed to provide time for the Board to consider public comment. The revised definition of virtual wholesaler, as required under A.R.S. § 32-1901, is included in this rulemaking. Under Laws 2018, Chapter 228, the legislature amended A.R.S. § 32-1901 to remove reference to “graduate intern” so the term is removed from Sections included in this rulemaking. R4-23-205 is amended to add fees for temporary licenses as specifically authorized under A.R.S. § 32-3124(H); R4-23-204 is amended to comply with A.R.S. § 32-3248.02, which requires health professionals to obtain continuing education regarding opioids; and R4-23-1103 is amended to comply with A.R.S. § 32-1924(F), which establishes a 36-month license for a pharmacy technician trainee. R4-23-607 is amended to clarify that a nonresident permittee is required to be licensed in both Arizona and the jurisdiction of residence. Exemptions from EO2019-01 were provided by Emily Rajakovich, in the Governor’s Office, by e-mails dated April 1, 2019, and July 12, 2019.

7. A reference to any study relevant to the rule that the agency reviewed and either relied on or did not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

The Board did not review or rely on any study in its evaluation of or justification for any rule in this rulemaking.

8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable

9. A summary of the economic, small business, and consumer impact:

The rulemaking will have minimal economic impact because it simply removes unnecessary or burdensome requirements or makes rule consistent with statute. An individual who chooses to obtain a temporary license will incur the cost of the fee for the temporary license but will have the benefit of being able to be employed while an application for licensure is processed. A person that chooses to operate as a virtual wholesaler is required to obtain either a full-service or non-prescription wholesalers permit and pay the applicable fee.

10. A description of any changes between the proposed rulemaking, including supplemental notices, and the final rulemaking:

Between the proposed and final rulemakings, the Board made the following non-substantive changes:

R4-23-408(H)(1)(e) to clarify that a hard-copy record is required if a prescription order is for any controlled substance. This change makes the rule consistent with federal law.

R4-23-1103(C)(5) to clarify there are two Board-approved certification examinations for pharmacy technicians.

11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to comments:

The Board received comments from three individuals. The comments, the Board's analysis, and the Board's response follow:

COMMENT	ANALYSIS	RESPONSE
R4-23-1103: Concern was expressed that the 36-month expiration of a pharmacy technician license with no opportunity for renewal would cause hardship for some individuals.	A.R.S. § 32-1924(F) specifies the 36-month expiration and no opportunity for renewal. The only way to address the comment is through statutory change.	No change
R4-23-801: Letters from both the Consumer Healthcare Products Association and the Council for Responsible	The Board appreciates the support.	No change

Nutrition supported the repeal of this Section.		
---	--	--

12. All agencies shall list any other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

None

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

The Board does not issue general permits. Rather, the Board issues individual licenses as required by the Board's statutes to each person that is qualified by statute and rule.

b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:

No rule in this rulemaking is more stringent than federal law. There is federal law governing medications and those requiring a prescription order. R4-23-408(H) is consistent with 21 CFR 1304.04 relating to maintenance of records and inventories.

c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:

No analysis was submitted.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rule:

None

14. Whether the rule was previously made, amended, or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and the final rulemaking packages:

None of the rules in this rulemaking was previously made, amended, or repealed as an emergency rule.

15. The full text of the rules follows:

R4-23-110. Definitions

In addition to definitions in A.R.S. § 32-1901, the following definitions apply to this Chapter:

“Active ingredient” means any component that furnishes pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease or that affects the structure or any function of the body of man or other animals. The term includes those components that may undergo chemical change in the manufacture of the drug, that are present in the finished drug product in a modified form, and that furnish the specified activity or effect.

“AHCCCS” means the Arizona Health Care Cost Containment System.

“Annual family income” means the combined yearly gross earned income and unearned income of all adult individuals within a family unit.

“Approved course in pharmacy law” means a continuing education activity that addresses practice issues related to state or federal pharmacy statutes, rules, or regulations.

“Approved Provider” means an individual, institution, organization, association, corporation, or agency that is approved by the Accreditation Council for Pharmacy Education (ACPE) in accordance with ACPE’s policy and procedures or by the Board as meeting criteria indicative of the ability to provide quality continuing education.

“Assisted living facility” means a residential care institution as defined in A.R.S. § 36-401.

“Authentication of product history” means identifying the purchasing source, the ultimate fate, and any intermediate handling of any component of a radiopharmaceutical or other drug.

“Automated dispensing system” means a mechanical system in a long-term care facility that performs operations or activities, other than compounding or administration, relative to the storage, packaging, counting, labeling, and dispensing of medications, and which collects, controls, and maintains all transaction information.

“Automated storage and distribution system” means a mechanical system that performs operations or activities other than counting, compounding, or administration, relative to the storage, packaging, or distributing of drugs or devices and that collects, controls, and maintains all transaction information.

“Batch” means a specific quantity of drug that has uniform character and quality, within specified limits, and is produced according to a single manufacturing order during the same cycle of manufacture.

“Beyond-use date” means:

A date determined by a pharmacist and placed on a prescription label at the time of dispensing to indicate a time beyond which the contents of the prescription are not recommended to be used; or

A date determined by a pharmacist and placed on a compounded pharmaceutical product's label at the time of preparation as specified in R4-23-410(B)(3)(d), R4-23-410(I)(6)(e), or R4-23-410(J)(1)(d) to indicate a time beyond which the compounded pharmaceutical product is not recommended to be used.

“Biological safety cabinet” means a containment unit suitable for the preparation of low to moderate risk agents when there is a need for protection of the product, personnel, and environment, consistent with National Sanitation Foundation (NSF) standards, published in the National Sanitation Foundation Standard 49, Class II (Laminar Flow) Biohazard Cabinetry, NSF International P. O. Box 130140, Ann Arbor, MI, revised June 1987 edition, (and no future amendments or editions), incorporated by reference and on file with the Board.

“Care-giver” means a person who cares for someone who is sick or disabled or an adult who cares for an infant or child and includes a patient’s husband, wife, son, daughter, mother, father, sister, brother, legal guardian, nurse, or medical practitioner.

“Change of ownership,” as used in A.R.S. § 32-1901.01(A), means a change of at least 30 percent in voting stock or vested interest that has direct operational oversight.

“Community pharmacy” means any place under the direct supervision of a pharmacist where the practice of pharmacy occurs or where prescription orders are compounded and dispensed other than a hospital pharmacy or a limited service pharmacy.

“Component” means any ingredient used in compounding or manufacturing drugs in dosage form, including an ingredient that may not appear in the finished product.

“Compounding and dispensing counter” means a pharmacy counter working area defined in this Section where a pharmacist ~~or a graduate intern, pharmacy~~ intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist compounds, mixes, combines, counts, pours, or prepares and packages a prescription medication to dispense an individual prescription order or prepackages a drug for future dispensing.

“Computer system” means an automated data-processing system that uses a programmable electronic device to store, retrieve, and process data.

“Computer system audit” means an accounting method, involving multiple single-drug usage reports and audits, used to determine a computer system’s ability to store, retrieve, and process original and refill prescription dispensing information.

“Contact hour” means 50 minutes of participation in a continuing education activity sponsored by an Approved Provider.

“Container” means:

A receptacle, as described in the official compendium or the federal act, that is used in manufacturing or compounding a drug or in distributing, supplying, or dispensing the finished dosage form of a drug; or

A metal receptacle designed to contain liquefied or vaporized compressed medical gas and used in manufacturing, transfilling, distributing, supplying, or dispensing a compressed medical gas.

“Continuing education” means a structured learning process required of a licensee to maintain licensure that includes study in the general areas of socio-economic and legal aspects of health care; the properties and actions of drugs and dosage forms; etiology, characteristics and therapeutics of disease status; or pharmacy practice.

“Continuing education activity” means continuing education obtained through an institute, seminar, lecture, conference, workshop, mediated instruction, programmed learning course, or postgraduate study in an accredited college or school of pharmacy.

“Continuing education unit” or “CEU” means 10 contact hours of participation in a continuing education activity sponsored by an Approved Provider.

“Continuous quality assurance program” or “CQA program” means a planned process designed by a pharmacy permittee to identify, evaluate, and prevent medication errors.

“Correctional facility” has the same meaning as in A.R.S. §§ 13-2501 and 31-341.

“CRT” means a cathode ray tube or other mechanism used to view information produced or stored by a computer system.

“CSPMP” means the Controlled Substances Prescription Monitoring Program established under A.R.S. Title 36, Chapter 28.

“Current good compounding practices” means the minimum standards for methods used in, and facilities or controls used for, compounding a drug to ensure that the drug has the identity and strength and meets the quality and purity characteristics it is represented to possess.

“Current good manufacturing practice” means the minimum standard for methods used in, and facilities or controls used for manufacturing, processing, packing, or holding a drug to ensure that the drug meets the requirements of the federal act as to safety, and has the identity and strength and meets the quality and purity characteristics it is represented to possess.

“Cytotoxic” means a pharmaceutical that is capable of killing living cells.

“Day” means a calendar day unless otherwise specified.

“DEA” means the Drug Enforcement Administration as defined in A.R.S. § 32-1901.

“Declared disaster areas” means areas designated by the governor or by a county, city, or town under A.R.S. § 32-1910 as those areas that have been adversely affected by a natural disaster or terrorist attack and require extraordinary measures to provide adequate, safe, and effective health care for the affected population.

“Delinquent license” means a pharmacist, ~~pharmacy~~ intern, ~~graduate intern~~, or pharmacy technician license the Board suspends for failure to renew or pay all required fees on or before the date the renewal is due.

“Dietary supplement or food supplement,” as used in A.R.S. § 32-1904(B), means a product (other than tobacco) that:

Is intended to supplement the diet that contains one or more of the following dietary ingredients: a vitamin, a mineral, ~~a~~ herb or other botanical, ~~a~~ amino acid, a dietary substance for use by humans to supplement the diet by increasing the total daily intake, or a concentrate, metabolite, constituent, extract, or combinations of these ingredients;

Is intended for ingestion in pill, capsule, tablet, or liquid form;

Is not represented for use as a conventional food or as the sole item of a meal or diet; and

Is labeled as a “dietary supplement” or “food supplement.”

“Digital signature” has the same meaning as in A.R.S. § 41-132(E).

“Dispensing pharmacist” means a pharmacist who, in the process of dispensing a prescription medication after the complete preparation of the prescription medication and before delivery of the prescription medication to a patient or patient’s agent, verifies, checks, and initials the prescription medication label, as required in R4-23-402(A).

“Drug sample” means a unit of a prescription drug that a manufacturer provides free of charge to promote the sale of the drug.

“Durable medical equipment” or “DME” means technologically sophisticated medical equipment that may be used by a patient or consumer in a home or residence. DME may be prescription-only devices as defined in A.R.S. § 32-1901. DME includes:

Air-fluidized beds,

Apnea monitors,
Blood glucose monitors and diabetic testing strips,
Continuous Positive Airway Pressure (CPAP) machines,
Electronic and computerized wheelchairs and seating systems,
Feeding pumps,
Home phototherapy devices,
Hospital beds,
Infusion pumps,
Medical oxygen and oxygen delivery systems excluding compressed medical gases,
Nebulizers,
Respiratory disease management devices,
Sequential compression devices,
Transcutaneous electrical nerve stimulation (TENS) unit, and
Ventilators.

“Earned income” means monetary payments received by an individual as a result of work performed or rental property owned or leased by the individual, including:

Wages,
Commissions and fees,
Salaries and tips,
Profit from self-employment,
Profit from rent received from a tenant or boarder, and
Any other monetary payments received by an individual for work performed or rental of property.

“Electronic signature” has the same meaning as in A.R.S. § 44-7002.

“Eligible patient” means a patient who a pharmacist determines is eligible to receive an immunization using professional judgment after consulting with the patient regarding the patient’s current health condition, recent health condition, and allergies.

“Emergency drug supply unit” means those drugs that may be required to meet the immediate and emergency therapeutic needs of long-term care facility residents and hospice inpatient facility

patients, and which are not available from any other authorized source in sufficient time to prevent risk of harm to residents or patients.

“Extreme emergency” means the occurrence of a fire, water leak, electrical failure, public disaster, or other catastrophe constituting an imminent threat of physical harm to pharmacy personnel or patrons.

“Family unit” means:

A group of individuals residing together who are related by birth, marriage, or adoption; or

An individual who:

Does not reside with another individual; or

Resides only with another individual or group of individuals to whom the individual is unrelated by birth, marriage, or adoption.

“FDA” means the Food and Drug Administration, a federal agency within the United States Department of Health and Human Services, established to set safety and quality standards for foods, drugs, cosmetics, and other consumer products.

“Health care decision maker” has the same meaning as in A.R.S. § 12-2291.

“Health care institution” has the same meaning as in A.R.S. § 36-401.

“Hospice inpatient facility” means a health care institution licensed under A.R.S. § 36-401 and Article 8 that provides hospice services to a patient requiring inpatient services.

“Immediate notice” means a required notice sent by mail, fax, or electronic mail to the Board Office within 24 hours.

“Immunizations training program” means an immunization training program for pharmacists, and ~~pharmacy interns, and graduate interns~~ that meets the requirements of R4-23-411(E).

“Inactive ingredient” means any component other than an “active ingredient” present in a drug.

“Internal test assessment” means performing quality assurance or other procedures necessary to ensure the integrity of a test.

“ISO Class 5 environment” means an atmospheric environment that complies with the ISO/TC209 International Cleanroom Standards, specifically ANSI/IEST/ISO-14644-1:1999: Cleanrooms and associated controlled environments--Part 1: Classification of air cleanliness, first edition dated May 1, 1999, (and no future amendments or editions), incorporated by reference and on file in the Board office.

“ISO Class 7 environment” means an atmospheric environment that complies with the ISO/TC209 International Cleanroom Standards, specifically ANSI/IEST/ISO-14644-1:1999: Cleanrooms and associated controlled environments--Part 1: Classification of air cleanliness, first edition dated May 1, 1999, (and no future amendments or editions), incorporated by reference and on file in the Board office.

“Licensed health care professional” means an individual who is licensed and regulated under A.R.S. Title 32, Chapter 7, 11, 13, 14, 15, 16, 17, 18, 25, 29, or 35.

“Limited-service correctional pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that:

Holds a current Board permit under A.R.S. § 32-1931;

Is located in a correctional facility; and

Uses pharmacists, interns, and support personnel to compound, produce, dispense, and distribute drugs.

“Limited-service long-term care pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board-issued permit and dispenses prescription medication or prescription-only devices to patients in long-term care facilities.

“Limited-service mail-order pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and dispenses a majority of its prescription medication or prescription-only devices by mailing or delivering the prescription medication or prescription-only device to an individual by the United States mail, a common or contract carrier, or a delivery service.

“Limited-service nuclear pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and provides radiopharmaceutical services.

“Limited-service pharmacy permittee” means a person who holds a current limited-service pharmacy permit in compliance with A.R.S. §§ 32-1929, 32-1930, 32-1931, and A.A.C. R4-23-606.

“Limited-service sterile pharmaceutical products pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and dispenses a majority of its prescription medication or prescription-only devices as sterile pharmaceutical products.

“Long-term care consultant pharmacist” means a pharmacist providing consulting services to a long-term care facility.

“Long-term care facility” or “LTCF” means a nursing care institution as defined in A.R.S. § 36-401.

“Lot” means a batch or any portion of a batch of a drug, or if a drug produced by a continuous process, an amount of drug produced in a unit of time or quantity in a manner that assures its uniformity. In either case, a lot is identified by a distinctive lot number and has uniform character and quality with specified limits.

“Lot number” or “control number” means any distinctive combination of letters or numbers, or both, from which the complete history of the compounding or manufacturing, control, packaging, and distribution of a batch or lot of a drug can be determined.

“Low-income subsidy” means Medicare-provided assistance that may partially or fully cover the costs of drugs and is based on the income of an individual and, if applicable, the individual’s spouse.

“Materials approval unit” means any organizational element having the authority and responsibility to approve or reject components, in-process materials, packaging components, and final products.

“Mechanical counting device for a drug in solid, oral dosage form” means a mechanical device that counts drugs in solid, oral dosage forms for dispensing and includes an electronic balance when used to count drugs.

“Mechanical storage and counting device for a drug in solid, oral dosage form” means a mechanical device that stores and counts and may package or label drugs in solid, oral dosage forms for dispensing.

“Mediated instruction” means information transmitted via intermediate mechanisms such as audio or video tape or telephone transmission.

“Medical practitioner-patient relationship” means that before prescribing, dispensing, or administering a prescription-only drug, prescription-only device, or controlled substance to a person, a medical practitioner, as defined in A.R.S. § 32-1901, shall first conduct a physical examination of that person or have previously conducted a physical examination. This subdivision does not apply to:

A medical practitioner who provides temporary patient supervision on behalf of the patient’s regular treating medical practitioner;

Emergency medical situations as defined in A.R.S. § 41-1831;

Prescriptions written to prepare a patient for a medical examination; or

Prescriptions written, prescription-only drugs, prescription-only devices, or controlled substances issued for use by a county or tribal public health department for immunization programs, emergency treatment, in response to an infectious disease investigation, public health emergency, infectious disease outbreak or act of bioterrorism. For purposes of this subsection, “bioterrorism” has the same meaning as in A.R.S. § 36-781.

“Medicare” means a federal health insurance program established under Title XVIII of the Social Security Act.

“Medication error” means any unintended variation from a prescription or medication order. Medication error does not include any variation that is corrected before the medication is dispensed to the patient or patient’s care-giver, or any variation allowed by law.

“Mobile pharmacy” means a pharmacy that is self-propelled or movable by another vehicle that is self-propelled.

“MPJE” means Multistate Pharmacy Jurisprudence Examination, a Board-approved national pharmacy law examination written and administered in cooperation with NABP.

“NABP” means National Association of Boards of Pharmacy.

“NABPLEX” means National Association of Boards of Pharmacy Licensure Examination.

“NAPLEX” means North American Pharmacist Licensure Examination.

“Order” means either of the following:

A prescription order as defined in A.R.S. § 32-1901; or

A medication order as defined in A.A.C. R4-23-651.

“Other designated personnel” means a non-pharmacist individual who is permitted in the pharmacy area, for a limited time, under the direct supervision of a pharmacist, to perform non-pharmacy related duties, such as trash removal, floor maintenance, and telephone or computer repair.

“Outpatient” means an individual who is not a residential patient in a health care institution.

“Outpatient setting” means a location that provides medical treatment to an outpatient.

“Patient profile” means a readily retrievable, centrally located information record that contains patient demographics, allergies, and medication profile.

“Pharmaceutical patient care services” means the provision of drug selection, drug utilization review, drug administration, drug therapy monitoring, and other drug-related patient care services intended to achieve outcomes related to curing or preventing a disease, eliminating or reducing a patient’s

symptoms, or arresting or slowing a disease process, by identifying and resolving or preventing potential and actual drug-related problems.

“Pharmaceutical product” means a medicinal drug.

“Pharmacy counter working area” means a clear and continuous working area that contains no major obstacles such as a desktop computer, computer monitor, computer keyboard, external computer drive device, printer, fax machine, pharmacy balance, typewriter, or pill-counting machine, but may contain individual documents or prescription labels, pens, prescription blanks, refill log, pill-counting tray, spatula, stapler, or other similar items necessary for the prescription-filling process.

“Pharmacy law continuing education” means a continuing education activity that addresses practice issues related to state or federal pharmacy statutes, rules, or regulations, offered by an Approved Provider.

“Pharmacy permittee” means a person who holds a current pharmacy permit that complies with A.R.S. §§ 32-1929, 32-1930, 32-1931, 32-1934, and R4-23-606 and R4-23-652.

“Physician” means a medical practitioner licensed under A.R.S. Title 32, Chapter 13 or 17.

“Physician-in-charge” means a physician who is responsible to the Board for all aspects of a prescription medication donation program required in A.R.S. § 32-1909 and operated in the physician’s office or in a health care institution.

“Poverty level” means the annual family income for a family unit of a particular size, as specified in the poverty guidelines updated annually in the *Federal Register* by the U.S. Department of Health and Human Services.

“Precursor chemical” means a precursor chemical I as defined in A.R.S. § 13-3401(26) and a precursor chemical II as defined in A.R.S. § 13-3401(27).

“Prepackaged drug” means a drug that is packaged in a frequently prescribed quantity, labeled in compliance with A.R.S. §§ 32-1967 and 32-1968, stored, and subsequently dispensed by a pharmacist ~~or a graduate intern or pharmacy~~ intern under the supervision of a pharmacist, who verifies at the time of dispensing that the drug container is properly labeled, in compliance with A.R.S. § 32-1968, for the patient.

“Prep area” means a specified area either within an ISO class 7 environment or adjacent to but outside an ISO class 7 environment that:

Allows the assembling of necessary drugs, supplies, and equipment for compounding sterile pharmaceutical products, but does not allow the use of paper products such as boxes or bulk drug storage;

Allows personnel to don personnel protective clothing, such as gown, gloves, head cover, and booties before entering the clean compounding area; and

Is a room or a specified area within a room, such as an area specified by a line on the floor.

“Primary care provider” means the medical practitioner who is treating an individual for a disease or medical condition.

“Proprietor” means the owner of a business permitted by the Board under A.R.S. §§ 32-1929, 32-1930, 32-1931, and 32-1934.

“Provider pharmacy” means a pharmacy that contracts with a long-term care facility to supply prescription medication or other services for residents of a long-term care facility.

“Radiopharmaceutical” means any drug that emits ionizing radiation and includes:

Any nonradioactive reagent kit, nuclide generator, or ancillary drug intended to be used in the preparation of a radiopharmaceutical, but does not include drugs such as carbon-containing compounds or potassium-containing salts, that contain trace quantities of naturally occurring radionuclides; and

Any biological product that is labeled with a radionuclide or intended to be labeled with a radionuclide.

“Radiopharmaceutical quality assurance” means performing and interpreting appropriate chemical, biological, and physical tests on radiopharmaceuticals to determine the suitability of the radiopharmaceutical for use in humans and animals. Radiopharmaceutical quality assurance includes internal test assessment, authentication of product history, and appropriate record retention.

“Radiopharmaceutical services” means procuring, storing, handling, compounding, preparing, labeling, quality assurance testing, dispensing, distributing, transferring, recordkeeping, and disposing of radiochemicals, radiopharmaceuticals, and ancillary drugs. Radiopharmaceutical services include quality assurance procedures, radiological health and safety procedures, consulting activities associated with the use of radiopharmaceuticals, and any other activities required for the provision of pharmaceutical care.

“Red C stamp” means a device used with red ink to imprint an invoice with a red letter C at least one inch high, to make an invoice of a Schedule III through IV controlled substance, as defined in A.R.S. § 36-2501, readily retrievable, as required by state and federal rules.

“Refill” means other than the original dispensing of the prescription order, dispensing a prescription order in the same quantity originally ordered or in multiples of the originally ordered quantity when specifically authorized by the prescriber, if the refill is authorized by the prescriber:

In the original prescription order;

By an electronically transmitted refill order that the pharmacist promptly documents and files; or

By an oral refill order that the pharmacist promptly documents and files.

“Regulated chemical” means the same as in A.R.S. § 13-3401(30).

“Remodel” means to alter structurally the pharmacy area or location.

“Remote drug storage area” means an area that is outside the premises of the pharmacy, used for the storage of drugs, locked to deny access by unauthorized persons, and secured against the use of force.

“Resident” means:

An individual admitted to and living in a long-term care facility or an assisted living facility,

An individual who has a place of habitation in Arizona and lives in Arizona as other than a tourist, or

A person who that owns or operates a place of business in Arizona.

“Responsible person” means the owner, manager, or other employee who is responsible to the Board for a permitted establishment’s compliance with the laws and administrative rules of this state and of the federal government pertaining to distribution of drugs, devices, precursor chemicals, and regulated chemicals. Nothing in this definition relieves other individuals from the responsibility to comply with state and federal laws and administrative rules.

“Score transfer” means the process that enables an applicant to take the NAPLEX in a jurisdiction and be eligible for licensure by examination in other jurisdictions.

“Security features” means attributes incorporated into the paper of a prescription order, referenced in A.R.S. § 32-1968(A)(4), that are approved by the Board or its staff and include one or more of the following designed to prevent duplication or aid the authentication of a paper document: laid lines, enhanced laid lines, thermochromic ink, artificial watermark, fluorescent ink, chemical void, persistent void, penetrating numbers, high-resolution border, high-resolution latent images, micro-printing, prismatic printing, embossed images, abrasion ink, holograms, and foil stamping.

“Shared order filling” means the following:

Preparing, packaging, compounding, or labeling an order, or any combination of these functions, that are performed by:

A person with a current Arizona Board license, located at an Arizona pharmacy, on behalf of and at the request of another resident or nonresident pharmacy; or

A person, located at a nonresident pharmacy, on behalf of and at the request of an Arizona pharmacy; and

Returning the filled order to the requesting pharmacy for delivery to the patient or patient’s care-giver or, at the request of this pharmacy, directly delivering the filled order to the patient.

“Shared order processing” means the following:

Interpreting the order, performing order entry verification, drug utilization review, drug compatibility and drug allergy review, final order verification, and when necessary, therapeutic intervention, or any combination of these order processing functions, that are performed by:

A pharmacist or intern, under pharmacist supervision, with a current Arizona Board license, located at an Arizona pharmacy, on behalf of and at the request of another resident or nonresident pharmacy; or

A pharmacist or intern, under pharmacist supervision, located at a nonresident pharmacy, on behalf of and at the request of an Arizona pharmacy; and

After order processing is completed, returning the processed order to the requesting pharmacy for order filling and delivery to the patient or patient’s care-giver or, at the request of this pharmacy, returning the processed order to another pharmacy for order filling and delivery to the patient or patient’s care-giver.

“Shared services” means shared order filling or shared order processing, or both.

“Sight-readable” means that an authorized individual is able to examine a record and read its information from a CRT, microfiche, microfilm, printout, or other method acceptable to the Board or its designee.

“Single-drug audit” means an accounting method that determines the numerical and percentage difference between a drug’s beginning inventory plus purchases and ending inventory plus sales.

“Single-drug usage report” means a computer system printout of original and refill prescription order usage information for a single drug.

“Standard-risk sterile pharmaceutical product” means a sterile pharmaceutical product compounded from sterile commercial drugs using sterile commercial devices or a sterile pharmaceutical optic or ophthalmic product compounded from non-sterile ingredients.

“State of emergency” means a governmental declaration issued under A.R.S. § 32-1910 as a result of a natural disaster or terrorist attack that results in individuals being unable to refill existing prescriptions.

“Sterile pharmaceutical product” means a medicinal drug free from living biological organisms.

“Strength” means:

The concentration of the drug substance (for example, weight/weight, weight/volume, or unit dose/volume basis); or

The potency, that is, the therapeutic activity of a drug substance as indicated by bioavailability tests or by controlled clinical data (expressed, for example, in terms of unity by reference to a standard).

“Substantial-risk sterile pharmaceutical product” means a sterile pharmaceutical product compounded as a parenteral or injectable dosage form from non-sterile ingredients.

“Supervision” means a pharmacist is present, assumes legal responsibility, and has direct oversight of activities relating to acquiring, preparing, distributing, administering, and selling prescription medications by ~~pharmacy~~ interns, ~~graduate interns~~, pharmacy technicians, or pharmacy technician trainees and when used in connection with the intern training requirements means that, in a pharmacy where intern training occurs, ~~a~~ ~~pharmacy~~ an intern preceptor assumes the primary responsibility of teaching the intern during the entire period of the training.

“Supplying” means selling, transferring, or delivering to a patient or a patient’s agent one or more doses of:

A nonprescription drug in the manufacturer’s original container for subsequent use by the patient,
or

A compressed medical gas in the manufacturer’s or compressed medical gas distributor’s original container for subsequent use by the patient.

“Support personnel” means an individual, working under the supervision of a pharmacist, trained to perform clerical duties associated with the practice of pharmacy, including cashiering, bookkeeping, pricing, stocking, delivering, answering non-professional telephone inquiries, and documenting third-party reimbursement. Support personnel shall not perform the tasks of a pharmacist, ~~pharmacy~~ intern, ~~graduate intern~~, pharmacy technician, or pharmacy technician trainee.

“Temporary pharmacy facility” means a facility established as a result of a declared state of emergency to temporarily provide pharmacy services within or adjacent to declared disaster areas.

“Tourist” means an individual who is living in Arizona but maintains a place of habitation outside of Arizona and lives outside of Arizona for more than six months during a calendar year.

“Transfill” means a manufacturing process by which one or more compressed medical gases are transferred from a bulk container to a properly labeled container for subsequent distribution or supply.

“Unearned income” means monetary payment received by an individual that is not compensation for work performed or rental of property owned or leased by the individual, including:

 Unemployment insurance,

 Workers’ compensation,

 Disability payments,

 Payments from the Social Security Administration,

 Payments from public assistance,

 Periodic insurance or annuity payments,

 Retirement or pension payments,

 Strike benefits from union funds,

 Training stipends,

 Child support payments,

 Alimony payments,

 Military family allotments,

 Regular support payments from a relative or other individual not residing in the household,

 Investment income,

 Royalty payments,

 Periodic payments from estates or trusts, and

Any other monetary payments received by an individual that are not:

 As a result of work performed or rental of property owned by the individual,

 Gifts,

 Lump-sum capital gains payments,

Lump-sum inheritance payments,
Lump-sum insurance payments, or
Payments made to compensate for personal injury.

“Verified signature” or “signature verifying” means in relation to a Board license or permit application or report, form, or agreement, the hand-written or electronic signature of an individual who, by placing a hand-written or electronic signature on a hard-copy or electronic license or permit application or report, form, or agreement agrees with and verifies that the statements and information within or attached to the license or permit application or report, form, or agreement are true in every respect and that inaccurate reporting can result in denial or loss of a license or permit or report, form, or agreement.

“Veteran” means an individual who has served in the United States Armed Forces.

“Virtual manufacturer” means an entity that contracts for the manufacture of a drug or device for which the entity:

Owns the New Drug Application or Abbreviated New Drug Application number, as defined by the FDA, for a drug;

Owns the Unique Device Identification number, as defined by the FDA, for a prescription device;

Is not involved in the physical manufacture of the drug or device; and

Contracts with an Arizona-permitted manufacturing entity for the physical manufacture of the drug or device; or

If the contracted manufacturing entity is in a location not included in the definition at A.R.S. 32-1901 of other jurisdiction, the virtual manufacturer ensures the facility is inspected every time the virtual manufacturer submits an initial or renewal application and determined to comply with current good manufacturing practices as defined by the federal act and the official compendium.

Virtual manufacturer includes an entity that may be identified as an own-label distributor, which contracts with a manufacturer to produce a drug or device and with another entity to package and label the drug or device, which is then sold under the distributor’s name or another name.

“Virtual wholesaler” means an entity that engages in the wholesale distribution of a drug or device in, into, or out of Arizona but does not take physical possession of the drug or device. A virtual wholesaler distributes a drug or device only from a Board-permitted facility to:

A Board-permitted pharmacy, drug manufacturer, full-service drug wholesaler, or non-prescription drug wholesaler; or

A medical practitioner licensed under A.R.S. Title 32; and

Virtual wholesaler includes an entity that may be identified as a broker that buys and sells goods for others or a person that facilitates distribution of a drug, chemical, or device regulated by the Board.

“Wholesale distribution” means distribution of a drug to a person other than a consumer or patient, but does not include:

Selling, purchasing, or trading a drug or offering to sell, purchase, or trade a drug for emergency medical reasons. For purposes of this Section, “emergency medical reasons” includes transferring a prescription drug by a community or hospital pharmacy to another community or hospital pharmacy to alleviate a temporary shortage;

Selling, purchasing, or trading a drug, offering to sell, purchase, or trade a drug, or dispensing a drug as specified in a prescription;

Distributing a drug sample by a manufacturers’ or distributors’ representative; or

Selling, purchasing, or trading blood or blood components intended for transfusion.

“Wholesale distributor” means any person engaged in wholesale distribution of drugs, including: manufacturers; repackers; own-label distributors; private-label distributors; jobbers; brokers; warehouses, including manufacturers’ and distributors’ warehouses, chain drug warehouses, and wholesale drug warehouses; independent wholesale drug traders; and retail pharmacies that conduct wholesale distributions in the amount of at least 5% of gross sales.

ARTICLE 2. PHARMACIST LICENSURE

R4-23-204. Continuing Education Requirements

A. General. Under A.R.S. § 32-1936, continuing professional pharmacy education is mandatory for all licensees.

1. General continuing education requirement. In accordance with A.R.S. § 32-1925(G) 32-1925(F), the Board shall not renew a license unless the ~~applicant~~ licensee has, during the two years preceding the application for renewal, participated in 30 contact hours (3.0 CEU's CEUs) of continuing education activity sponsored by an Approved Provider as defined in R4-23-110, of which at least three contact hours (0.3 CEU's) are approved courses in pharmacy law. Subject to A.R.S. § 32-1937, a pharmacist licensed for less than 24 months shall obtain continuing education-

~~units in an amount determined by multiplying 1.25 hours times the number of months between the date of initial licensure and the next license renewal date.~~

2. Special continuing education requirement. The Board shall not renew a license unless:
 - a. A licensee certified under R4-23-411 to administer immunizations, vaccines, and emergency medications has participated in at least two contact hours of continuing education activity related to administering immunizations, vaccines, and emergency medications; and
 - b. A licensee authorized to dispense controlled substances has participated in at least three contact hours of opioid-related, substance use disorder-related, or addiction-related continuing education activity.
 3. A pharmacist is exempt from the continuing education requirement in subsections (A)(1) and (2) between the time of initial licensure and first renewal.
- B.** Acceptance of continuing education units (~~CEU's~~) CEUs. The Board shall:
1. ~~Only accept CEU's~~ Accept CEUs for continuing education activities sponsored only by an Approved Provider;
 2. ~~Only accept CEU's~~ Accept CEUs accrued only during the two-year period immediately before licensure renewal;
 3. Not allow ~~CEU's~~ CEUs accrued in a biennial renewal period ~~in excess of the 3.0 CEU's required~~ to be carried forward to the succeeding biennial renewal period;
 4. Allow a pharmacist who leads, instructs, or lectures to a group of health professionals on pharmacy-related topics in ~~a~~ a continuing education ~~activities~~ activity sponsored by an Approved Provider to receive ~~CEU's~~ CEUs for a presentation by following the same attendance procedures as any other attender of the continuing education activity; and
 5. Not accept as ~~CEU's~~ CEUs the performance of normal teaching duties within a learning institution by a pharmacist whose primary responsibility is the education of health professionals.
- C.** Continuing education records and reporting ~~CEU's~~ CEUs. A pharmacist shall:
1. No change
 - a. No change
 - b. No change
 2. At the time of licensure renewal, attest to the number of ~~CEU's~~ CEUs the pharmacist participated in during the renewal period on the biennial renewal form; and

ARTICLE 4. PROFESSIONAL PRACTICES

R4-23-407. Prescription Requirements

A. Prescription orders. A pharmacist shall ensure that:

1. A prescription order the pharmacist uses to dispense a drug or device includes the following information:
 - a. Date of issuance;
 - b. Name and address of the patient for whom or the owner of the animal for which the drug or device is dispensed;
 - c. Drug name, strength, and dosage form or device name;
 - d. Name of the manufacturer or distributor of the drug or device if the prescription order is written generically or a substitution is made;
 - e. Prescribing medical practitioner's directions for use;
 - f. Date of dispensing;
 - g. Quantity prescribed and if different, quantity dispensed;
 - h. For a prescription order for a controlled substance, the medical practitioner's address and DEA number;

- i. For a written prescription order, the medical practitioner's signature;
 - j. For an electronically transmitted prescription order, the medical practitioner's digital or electronic signature;
 - k. For an oral prescription order, the medical practitioner's name and telephone number; and
 - l. Name or initials of the dispensing pharmacist;
 2. A prescription order is kept by the pharmacist or pharmacy permittee as a record of the dispensing of a drug or device for seven years from the date the drug or device is dispensed,
~~except for a drug or device personally administered by a medical practitioner to the medical practitioner's patient~~; and
 3. The dispensing of a drug or device complies with the packaging requirements of the official compendium and state and federal law.
 4. If the drug dispensed is a schedule II controlled substance that is an opioid, the drug is placed in a container that has a red cap and a warning label stating "CAUTION: OPIOID, Risk of Overdose and Addiction" or other similarly clear language indicating the possibility of overdose and addiction. Under delegation from the Board, the Executive Director may waive the red-cap requirement if implementing the requirement is not feasible because of the specific dosage form or packaging type.
- B.** Prescription refills. A pharmacist shall ensure that the following information is recorded on the back of a prescription order when it is refilled:
1. Date refilled,
 2. Quantity dispensed,
 3. Name or approved abbreviation of the manufacturer or distributor if the prescription order is written generically or a substitution is made, and
 4. The name or initials of the dispensing pharmacist.
- C.** Prescription order adaptation. Except for a prescription order for a controlled substance, a pharmacist, using professional judgment, may make the following adaptations to a prescription order if the pharmacist documents the adaptation in the patient's record:
1. Change the prescribed quantity if the prescribed quantity is not a package size commercially available from the manufacturer;
 2. Change the prescribed dosage form or directions for use if the change achieves the intent of the prescribing medical practitioner;
 3. Complete missing information on the prescription order if there is sufficient evidence to support the change; and

4. Extend the quantity of a maintenance drug for the limited quantity necessary to achieve medication refill synchronization for the patient.

C.D. A pharmacist may furnish a copy of a prescription order to the patient for whom it is prescribed or to the authorized representative of the patient if the copy is clearly marked “COPY FOR REFERENCE PURPOSES ONLY” or other similar statement. A copy of a prescription order is not a valid prescription order and a pharmacist shall not dispense a drug or device from the information on a copy.

D.E. Transfer of prescription order information. For a transfer of prescription order information to be valid, a pharmacy permittee or pharmacist-in-charge shall ensure that:

1. Both the original and the transferred prescription order are maintained for seven years after the last dispensing date;
2. The original prescription order information for a Schedule III, IV, or V controlled substance is transferred only as specified in 21 CFR 1306.25, ~~published April 1, 2008, and no future amendments or editions, incorporated by reference, and on file with the Board, and available from the U.S. Government Printing Office, U.S. Superintendent of Documents, Washington, DC 20402-0001;~~
3. The original prescription order information for a non-controlled substance drug is transferred without limitation only up to the number of originally authorized refills;
4. For a transfer within Arizona:
 - a. The transfer of original prescription order information for a non-controlled substance drug meets the following conditions:
 - i. The transfer of information is communicated electronically, verbally, or by fax directly between:
 - (1) Two licensed pharmacists,
 - (2) A licensed pharmacist and a licensed ~~pharmacy or graduate~~ intern, or
 - (3) Two licensed ~~pharmacy or graduate~~ interns;
 - ii. The following information is recorded by the transferring pharmacist or ~~pharmacy or graduate~~ intern:
 - (1) The word “void” is written on the face of the invalidated original prescription unless it is an electronic or oral transfer and the transferred prescription order information is invalidated in the transferring pharmacy’s computer system; and
 - (2) The name and identification code, number, or address and telephone number of the pharmacy to which the prescription is transferred, the name of the receiving pharmacist or ~~pharmacy or graduate~~ intern, the date of transfer, and the name of the

- transferring pharmacist or ~~pharmacy or graduate~~-intern is written on the back of the prescription or entered into the transferring pharmacy's computer system; and
- iii. The following information is recorded by the receiving pharmacist or ~~pharmacy or graduate~~ intern on the transferred prescription order:
- (1) The word "transfer;"
- (2) Date of issuance of the original prescription order;
- (3) Original number of refills authorized on the original prescription order;
- (4) Date of original dispensing;
- (5) Number of valid refills remaining and the date of the last refill;
- (6) Name and identification code, number, or address, telephone number, and original prescription number of the pharmacy from which the prescription is transferred;
- (7) Name of the transferring pharmacist or ~~pharmacy or graduate~~-intern; and
- (8) Name of the receiving pharmacist or ~~pharmacy or graduate~~-intern;
- b. The transfer of original prescription order information for a Schedule III, IV, or controlled substance meets the following conditions:
- i. The transfer of information is communicated directly between two licensed pharmacists or interns electronically, or verbally, or by fax;
- ii. The following information is recorded by the transferring pharmacist or intern:
- (1) The word "void" is written on the face of the invalidated original prescription order unless it is an electronic or oral transfer and the transferred prescription order information is invalidated in the transferring pharmacy's computer system; and
- (2) The name, address, and DEA number of the pharmacy to which the prescription is transferred, the name of the receiving pharmacist, the date of transfer, and the name of the transferring pharmacist is written on the back of the prescription order or entered into the transferring pharmacy's computer system; and
- iii. The following information is recorded by the receiving pharmacist on the transferred prescription order:
- (1) The word "transfer;"
- (2) Date of issuance of original prescription order;
- (3) Original number of refills authorized on the original prescription order;
- (4) Date of original dispensing;
- (5) Number of valid refills remaining and the date of the last refill;
- (6) Name, address, DEA number, and original prescription number of the pharmacy from which the prescription is transferred;

- (7) Name of the transferring pharmacist; and
 - (8) Name of the receiving pharmacist;
5. For a transfer from out-of-state:
- a. The transfer of original prescription order information for a non-controlled substance drug meets the conditions in subsections ~~(D)(4)(a)(i)~~ (E)(4)(a)(i) and ~~(D)(4)(a)(iii)~~ (E)(4)(a)(iii); and
 - b. The transfer of original prescription order information for a Schedule III, IV, or V controlled substance meets the conditions in subsections ~~(D)(4)(b)(i)~~ (E)(4)(b)(i) and ~~(D)(4)(b)(iii)~~ (E)(4)(b)(iii); and
6. For an electronic transfer, the electronic transfer of original prescription order information meets the following conditions:
- a. The electronic transfer is between pharmacies owned by the same company using a common or shared database;
 - b. The electronic transfer of original prescription order information for a non-controlled substance drug is performed by a pharmacist or ~~a pharmacy or graduate~~ intern, pharmacy technician trainee, or pharmacy technician under the supervision of a pharmacist;
 - c. The electronic transfer of original prescription order information for a controlled substance is performed between two licensed pharmacists;
 - d. The electronic transfer of original prescription order information for a non-controlled substance drug meets the following conditions:
 - i. The transferring pharmacy's computer system:
 - (1) Invalidates the transferred original prescription order information;
 - (2) Records the identification code, number, or address of the pharmacy to which the prescription order information is transferred;
 - (3) Records the name or identification code of the receiving pharmacist, ~~pharmacy or graduate~~ intern, pharmacy technician trainee, or pharmacy technician; and
 - (4) Records the date of transfer; and
 - ii. The receiving pharmacy's computer system:
 - (1) Records that a prescription transfer occurred;
 - (2) Records the date of issuance of the original prescription order;
 - (3) Records the original number of refills authorized on the original prescription order;
 - (4) Records the date of original dispensing;
 - (5) Records the number of valid refills remaining and the date of the last refill;
 - (6) Records the identification code, number, or address and original prescription number

- of the pharmacy from which the prescription is transferred;
- (7) Records the name or identification code of the receiving pharmacist or ~~pharmacy or graduate~~ intern, pharmacy technician trainee, or pharmacy technician; and
 - (8) Records the date of transfer;
- e. The electronic transfer of original prescription order information for a controlled substance meets the following conditions:
 - i. The transferring pharmacy's computer system:
 - (1) Invalidates the transferred original prescription order information;
 - (2) Records the identification code, number, or address, and DEA number of the pharmacy to which the prescription order information is transferred;
 - (3) Records the name or identification code of the receiving pharmacist;
 - (4) Records the date of transfer; and
 - (5) Records the name or identification code of the transferring pharmacist; and
 - ii. The electronic prescription order information received by the computer system of the receiving pharmacy includes the information required in subsection (D)(4)(b)(iii) (E)(4)(b)(iii); and
 - f. In addition to electronic documentation of a transferred prescription order in the computer system, an original prescription order containing the requirements of this Section is filed in compliance with A.R.S. § 32-1964.

E.F. Transmission of a prescription order from a medical practitioner to a pharmacy by fax.

- 1. A medical practitioner or medical practitioner's agent may transmit a prescription order for a Schedule III, IV, or V controlled substance, prescription-only drug, or nonprescription drug to a pharmacy by fax under the following conditions:
 - a. The prescription order is faxed only to the pharmacy of the patient's choice;
 - b. The faxed prescription order:
 - i. Contains all the information required for a prescription order in A.R.S. §§ 32-1968 and 36-2525; and
 - ii. Is only faxed from the medical practitioner's practice location, except that a nurse in a hospital, long-term care facility, or inpatient hospice may send a fax of a prescription order for a patient of the facility; and
 - c. The faxed prescription order shall contain the following additional information:
 - i. The date the prescription order is faxed;
 - ii. The fax number of the prescribing medical practitioner or the facility from which the prescription order is faxed, and the telephone number of the facility; and

- iii. The name of the person who transmits the fax, if other than the medical practitioner.
 - 2. A medical practitioner or medical practitioner's agent may fax a prescription order for a Schedule II controlled substance for information purposes only, unless the faxed prescription order meets the requirements of A.R.S. § 36-2525(F) and (G).
 - 3. A pharmacy may receive a faxed prescription order for a Schedule II controlled substance for information purposes only, except a faxed prescription order for a Schedule II controlled substance that meets the requirements of A.R.S. § 36-2525(F) and (G) may serve as the original written prescription order.
 - 4. To meet the seven-year record retention requirement of A.R.S. § 32-1964, a pharmacy shall receive a faxed prescription order on a plain paper ~~fax machine~~, ~~except a pharmacy that does not have a plain paper fax machine or~~ ~~may make a copy photocopy of a~~ the faxed prescription order ~~received on a non-plain paper fax machine~~.
 - 5. A medical practitioner or the medical practitioner's agent may fax refill authorizations to a pharmacy if the faxed authorization includes the medical practitioner's telephone ~~number~~ and fax ~~number numbers~~, the medical practitioner's signature or medical practitioner's agent's name, and date of authorization.
- F.G.** Electronic transmission of a prescription order from a medical practitioner to a pharmacy.
- 1. Unless otherwise prohibited by law, a medical practitioner or medical practitioner's agent may transmit a prescription order by electronic means, directly or through an intermediary, including an E-prescribing network, to the dispensing pharmacy as specified in A.R.S. § 32-1968.
 - 2. For electronic transmission of a Schedule II, III, IV, or V controlled substance prescription order, the medical practitioner and pharmacy shall ensure that the transmission complies with any security or other requirements of federal law.
 - 3. The medical practitioner and pharmacy shall ensure that all electronic transmissions comply with all the security requirements of state or federal law related to the privacy of protected health information.
 - 4. In addition to the information required to be included on a prescription order as specified in A.R.S. § 32-1968, an electronically transmitted prescription order shall include:
 - a. The date of transmission; and
 - b. If the individual transmitting the prescription is not the medical practitioner, the name of the medical practitioner's authorized agent who transmits the prescription order.
 - 5. A pharmacy receiving an electronically transmitted prescription order shall maintain the prescription order as specified in A.R.S. § 32-1964 or R4-23-408(H)(2).

6. A medical practitioner or medical practitioner's agent shall transmit an electronic prescription order only to the pharmacy of the patient's choice.

R4-23-408. Computer Records

A. Systems manual. A pharmacy permittee or pharmacist-in-charge shall:

1. Develop, implement, and comply with policies and procedures for the following operational aspects of a computer system:
 - a. Examples of all output documentation provided by the computer system that contains original or refill prescription order or patient profile information;
 - b. Steps a pharmacy employee follows when the computer system is not operational due to scheduled or unscheduled system interruption;
 - c. Regular and routine backup file procedure and file maintenance, including secure storage of backup files;
 - d. Audit procedures, personnel code assignments, and personnel responsibilities; and
 - e. Quality assurance mechanism for data entry validation;
2. Review biennially and, if necessary, revise the policies and procedures required under this Section;
3. Document the review required under subsection (A)(2);
4. Assemble the policies and procedures as a written manual or by another method approved by the Board or its designee; and
5. Make the policies and procedures available within the pharmacy for reference by pharmacy personnel and inspection by the Board or its designee.

B. Computer system data storage and retrieval. A pharmacy permittee or pharmacist-in-charge shall ensure that the computer system is capable of:

1. Producing sight-readable information on all original and refill prescription orders and patient profiles;
2. Providing online retrieval (via CRT display or hard-copy printout) of original prescription order information required in A.R.S. § 32-1968(C), R4-23-402(A), and R4-23-407(A);
3. Providing online retrieval (via CRT display or hard-copy printout) of patient profile information required in R4-23-402(A);
4. Providing documentation identifying the pharmacist responsible for dispensing each original or refill prescription order, except a pharmacy permittee with a computer system that is in use before the effective date of this Section that cannot provide documentation identifying the dispensing

pharmacist may continue to use the computer system by providing manual documentation identifying the dispensing pharmacist;

5. Producing a printout of all prescription order information, including a single-drug usage report that contains:
 - a. The name of the prescribing medical practitioner;
 - b. The name and address of the patient;
 - c. The quantity dispensed on each original or refill prescription order;
 - d. The date of dispensing for each original or refill prescription order;
 - e. The name or identification code of the dispensing pharmacist; and
 - f. The serial number of each prescription order; and
6. Providing a printout of requested prescription order information to an individual pharmacy within 72 hours of the request if prescription order information is maintained in a centralized computer record system.

C. A pharmacy permittee or pharmacist-in-charge of a pharmacy that uses a pharmacy computer system:

1. Shall notify the D.E.A. and the Board in writing that original and refill prescription order information and patient profiles are stored in a pharmacy computer system;
2. Shall comply with this Section if the pharmacy computer system's refill records are used as an alternative to the manual refill records required in R4-23-407(B);
3. Is exempt from the manual refill recordkeeping requirements of R4-23-407(B), if the pharmacy computer system complies with the requirements of this Section; and
4. Shall ensure that documentation of the accuracy of original and refill prescription order information entered into a computer system is provided by each pharmacist using the computer system and kept on file in the pharmacy for seven years from the date of the last refill. Documentation includes one of the following:
 - a. A hard-copy printout of each day's original and refill prescription order data that:
 - i. States original and refill data for prescriptions dispensed by each pharmacist is reviewed for accuracy;
 - ii. Includes the printed name of each dispensing pharmacist; and
 - iii. Is signed and initialed by each dispensing pharmacist; or
 - b. A log book or separate file of daily statements that:
 - i. States original and refill data for prescriptions dispensed by each pharmacist is reviewed for accuracy;
 - ii. Includes the printed name of each dispensing pharmacist; and
 - iii. Is signed and initialed by each dispensing pharmacist.

- D. If a pharmacy computer system does not comply with the requirements of subsections (A), (B), and (F), the pharmacy permittee or pharmacist-in-charge shall bring the computer system into compliance within three months of a notice of noncompliance or violation letter. If the computer system is still noncompliant with subsection (A), (B), or (F) after three months, the pharmacy permittee or pharmacist-in-charge shall immediately comply with the manual recordkeeping requirements of R4-23-402 and R4-23-407.
- E. If a pharmacy's personnel perform manual recordkeeping under subsection (D), the pharmacy's personnel shall continue manual recordkeeping until the pharmacist-in-charge sends proof, verified by a Board compliance officer, that the computer system complies with subsections (A), (B), and (F).
- F. Security. To maintain the confidentiality of patient records, a pharmacy permittee or pharmacist-in-charge shall ensure that:
1. The computer system has security and systems safeguards designed to prevent and detect unauthorized access, modification, or manipulation of prescription order information and patient profiles; and
 2. After a prescription order is dispensed, any alteration of prescription order information is documented, including the identification of the pharmacist responsible for the alteration.
- G. A computer system that does not comply with all the requirements of subsections (A), (B), and (F) may be used in a pharmacy if:
1. The computer system was in use in the pharmacy before July 11, 2001, and
 2. The pharmacy complies with the manual recordkeeping requirements of R4-23-402 and R4-23-407.
- H. Prescription records and retention.
1. Instead of filing the original hard-copy prescription order as required in A.R.S. § 32-1964, a pharmacy permittee or pharmacist-in-charge may use an electronic imaging recordkeeping system, if:
 - a. The system is capable of capturing, storing, and reproducing the exact image of a prescription order, including the reverse side of the prescription order if necessary;
 - b. Any notes of clarification of and or alterations to a prescription order are directly associated with the electronic image of the prescription order;
 - c. The A prescription order image and any associated notes of clarification to of or alterations to a the prescription order are retained for a period not less no fewer than seven years from the date the prescription order is last dispensed;
 - d. The original hard-copy prescription is maintained for no less than 30 days after the date dispensed;

e.d. Policies and procedures for the use of an electronic imaging recordkeeping system are developed, implemented, reviewed, and revised in the same manner described in subsection (A) and complied with; and

f.e. The prescription is not for a ~~schedule H~~ controlled substance.

2. If a pharmacy's computer system fields are automatically populated by an electronically transmitted prescription order, the automated record constitutes the original prescription order and a hard-copy or electronic image is not required if the computer system is capable of maintaining, printing, and providing all the prescription order information required in A.R.S. §§ 32-1968 and 36-2525 and R4-23-407(A) within 72 hours of a request by the Board, the Board's compliance officers, other authorized regulatory board agents, or authorized officers of the law.

- I. A pharmacy permittee or pharmacist-in-charge shall make all prescription records available within 72 hours after a Board request.

R4-23-411. Pharmacist-administered or Pharmacy or Graduate Intern-administered Immunizations

A. ~~Certification Authorization~~ to administer immunizations, vaccines, and emergency medications, as defined at A.R.S. § 32-1974(N), to an eligible adult patient or eligible minor patient. As used in this Section, "eligible adult patient" means an eligible patient 13 years of age or older and "eligible minor patient" means an eligible patient at least three years of age but less than 13 years of age. A pharmacist or ~~a pharmacy or graduate~~ an intern in the presence of and under the immediate personal supervision of a pharmacist, may administer, without a prescription, immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient, if:

1. Both the pharmacist and ~~pharmacy or graduate~~ intern meet the qualifications and standards specified by A.R.S. § 32-1974 and this Section;
2. The Board ~~certifies authorizes~~ both the pharmacist and ~~pharmacy or graduate~~ intern as specified in subsection (D);
3. No change
 - a. No change
 - b. No change
4. No change
5. No change
6. No change

- B.** A pharmacist or ~~a pharmacy or graduate~~ an intern in the presence of and under the immediate personal supervision of a pharmacist, may administer, with a prescription, any immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient, if:
1. Both the pharmacist and ~~pharmacy or graduate~~ intern meet the qualifications and standards specified by A.R.S. § 32-1974 and this Section; and
 2. The Board certifies authorizes both the pharmacist and ~~pharmacy or graduate~~ intern as specified in subsection (D).
- C.** A pharmacist or ~~pharmacy or graduate~~ intern who is ~~certified~~ authorized to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient shall:
1. Not delegate the authority to any other pharmacist, ~~pharmacy or graduate~~ intern, or employee; and
 2. No change
- D.** Qualifications ~~for certification~~ to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient. After receipt of a completed application form, the Board shall issue a certificate authorizing authorize the administration of immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient to ~~by~~ a pharmacist or ~~pharmacy or graduate~~ intern who meets the following qualifications:
1. No change
 2. No change
 3. No change
- E.** Immunizations training program requirements. A training program for pharmacists or ~~pharmacy or graduate~~ interns to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient shall include the following courses of study:
1. No change
 2. No change
 3. No change
 4. No change
 5. No change
 6. No change
- F.** No change
1. A pharmacist or ~~pharmacy or graduate~~ intern ~~certified~~ authorized under this Section to administer immunizations, vaccines, and emergency medications to an eligible patient shall provide to the pharmacy the following information and documentation regarding each immunization, vaccine, or emergency medication administered:

- a. No change
 - b. No change
 - c. No change
 - d. No change
 - e. The name of the pharmacist or ~~pharmacy or graduate~~ intern administering the immunization, vaccine, or emergency medication;
 - f. A record of the pharmacist's or ~~pharmacy or graduate~~ intern's consultation with the patient determining that the patient is an eligible patient as defined in R4-23-110;
 - g. ~~The date and time that the written report specified in subsection (F)(2) was sent to the patient's primary care provider or physician;~~
 - h. Consultation or other professional information provided to the patient by the pharmacist or ~~pharmacy or graduate~~ intern;
 - i. No change
 - j. No change
2. ~~The As required under A.R.S. § 32-1974(F)(1), the~~ pharmacist or ~~pharmacy or graduate~~ intern shall provide a written or electronic report to the patient's primary-care provider or physician containing the documentation required in subsection (F)(1)(a) through (d) ~~within 48 hours after the immunization or vaccination~~. The pharmacy shall document the time and date the report is sent and make the required records specified in subsection (F)(1) and a record of compliance with this subsection available in the pharmacy or on request, within 72 hours, for inspection by the Board or its designee.
3. A pharmacy's pharmacist-in-charge or permittee shall maintain the records required in subsection (F)(1) in the pharmacy or database for a minimum of seven years from the administration date.
- G. Confidentiality of records. A pharmacist, ~~pharmacy or graduate~~ intern, pharmacy permittee, or pharmacist-in-charge shall comply with applicable state and federal privacy statutes and rules when releasing patient health information.
- H. ~~Renewal of a certificate for pharmacist administered immunizations. A pharmacist remains in good standing to administer immunizations, vaccines, and emergency medications if, at the time of license renewal under R4-23-202, the pharmacist attests the following to the Board:~~
- 1. ~~Current certification in basic cardiopulmonary resuscitation, and~~
 - 2. ~~Completion of a minimum of two contact hours (0.2 CEU) of continuing education related to immunizations during the biennial license renewal period. A pharmacist may use the continuing education hours required in this subsection as part of the total continuing education hours required for pharmacist license renewal.~~

I.H. Pharmacist-administered or ~~pharmacy or graduate~~ intern-administered adult immunizations that require a prescription order. A pharmacist or ~~pharmacy or graduate~~ intern certified authorized by the Board to administer adult immunizations or vaccines shall not administer any immunization or vaccine listed in A.A.C. R9-6-1301 without a prescription order. In addition to filing a prescription order as required in A.R.S. § 32-1964, a pharmacist or ~~pharmacy or graduate~~ intern who administers an immunization or vaccine listed in A.A.C. R9-6-1301 shall comply with the recordkeeping requirements of subsection (F)(1).

ARTICLE 6. PERMITS AND DISTRIBUTION OF DRUGS

R4-23-607. Nonresident Permits

- A.** Permit. A person that is not a resident of Arizona shall not sell or distribute any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical into Arizona without possessing both:
 - 1. A current Board-issued nonresident pharmacy permit, nonresident manufacturer permit, nonresident full-service or nonprescription drug wholesale permit, or nonresident nonprescription drug permit; and
 - 2. A current equivalent license or permit issued by the licensing authority in the jurisdiction where the person resides.
- B.** No change

ARTICLE 8. DRUG CLASSIFICATION

R4-23-801. Dietary Supplements Repealed

A person who sells, distributes, or provides a product that is labeled as a dietary supplement and is labeled or marketed as a treatment for any deficiency disease, for the correction of any symptom of disease, or for the prevention, mitigation, or cure of any disease, either by direct statement or by inference, is selling, distributing, or providing a drug and is subject to the requirements of A.R.S. Title 32, Chapter 18 and 4 A.A.C. 23.

ARTICLE 11. PHARMACY TECHNICIANS

R4-23-1103. Pharmacy Technician Trainee Licensure

- A. No change**
- B. No change**
 - 1. No change
 - a. No change
 - b. No change
 - i. No change
 - ii. No change
 - iii. No change
 - 2. No change
- C. No change**
 - 1. No change
 - 2. No change
 - 3. No change
 - 4. No change
 - 5. A pharmacy technician trainee license is valid for 24 36 months from the date issued. A pharmacy technician trainee who does not complete the prescribed training program and pass the Pharmacy Technician Certification Board (PTCB) examination or another a Board-approved-pharmacy technician examination before the pharmacy technician trainee's license expires is not eligible for licensure as a pharmacy technician and shall not practice as a pharmacy technician or pharmacy technician trainee. The Board has approved the following pharmacy technician examinations:
 - a. Pharmacy Technician Certification Board (PTCB) Exam, and
 - b. Exam for the Certification of Pharmacy Technicians (ExCPT).
- D. Re-application for licensure.**

1. The Board may allow a pharmacy technician trainee whose license expires before the pharmacy technician trainee completes the prescribed training program and passes the Pharmacy Technician Certification Board (PTCB) examination or another Board approved pharmacy technician examination to reapply for licensure not more than one time. A pharmacy technician trainee whose license has expired may make a special request to the Board under R4-23-401 for approval to reapply for licensure.
2. The Board shall base its decision to grant or deny a special request to reapply for licensure on an assessment of:

 - a. The reasons the pharmacy technician trainee did not complete a pharmacy technician training program and the likelihood that the pharmacy technician trainee will complete a pharmacy technician training program within the next 24 months;
 - b. The reasons the pharmacy technician trainee failed the pharmacy technician examination and the likelihood that the pharmacy technician trainee will pass the pharmacy technician examination within the next 24 months; and
 - c. Other extenuating circumstances.
3. A pharmacy technician trainee that receives Board approval to reapply for licensure shall submit a completed application manually on a form furnished by the Board and pay the licensure fee specified in R4-23-205(A)(4).

E.D. Time frames Time frames for pharmacy technician trainee licensure. The Board office shall follow the time frames time frames established in R4-23-202(F).

F.E. Verification of license. A pharmacy permittee or pharmacist-in-charge shall not permit a person to practice as a pharmacy technician trainee until the pharmacy permittee or pharmacist-in-charge verifies that the person is currently licensed by the Board as a pharmacy technician trainee.

R4-23-1106. Continuing Education Requirements

- A. General. According to A.R.S. § 32-1925(H), the Board shall not renew a pharmacy technician license unless the applicant licensee has during the two years preceding the application for renewal:
1. Participated in 20 contact hours or two CEUs of continuing education activity sponsored by an Approved Provider, as defined in R4-23-110, and
 2. At least two of the contact hours or 0.2 of the CEUs are approved courses in pharmacy law. For a pharmacy technician licensed less than 24 months the continuing education contact hours are calculated by multiplying 0.83 hours times the number of months between the date of initial licensure and the licensee's next license renewal date. A pharmacy technician licensee is exempt

from the continuing education requirement in subsection (A)(1) between the time of initial licensure and first renewal.

B. Valid CEUs. The Board shall:

1. Only accept Accept CEUs for continuing education activities sponsored only by an Approved Provider;
2. Only accept Accept CEUs accrued during only the two-year period immediately before licensure renewal;
3. Not allow CEUs accrued in a biennial renewal period ~~in excess of the required two CEUs~~ to be carried forward to the succeeding biennial renewal period;
4. Allow a pharmacy technician who leads, instructs, or lectures to a group of health professionals on pharmacy-related topics in a continuing education activities activity sponsored by an Approved Provider to receive CEUs for a presentation by following the same attendance procedures as any other attendee of the continuing education activity; and
5. Not accept as a CEU a pharmacy technician's normal teaching duties within a learning institution if the pharmacy technician's primary responsibility is the education of health professionals.

C. Continuing education records and reporting CEUs. A pharmacy technician shall:

1. Maintain continuing education records that:
 - a. Verify the continuing education activities the pharmacy technician participated in during the preceding five years; and
 - b. Consist of a statement of credit or a certificate issued by an Approved Provider at the conclusion of a continuing education activity;
 2. At the time of licensure renewal, attest to the number of CEUs the pharmacy technician participated in during the renewal period on the biennial renewal form; and
 3. When requested by the Board office, submit proof of continuing education participation within 20 days of the request.
- D.** The Board shall deem a pharmacy technician's failure to comply with the continuing education participation, recording, or reporting requirements of this Section as unprofessional conduct and grounds for disciplinary action by the Board under A.R.S. § 32-1927.01.
- E.** A pharmacy technician who is aggrieved by any decision of the Board concerning continuing education units may request a hearing before the Board.

ECONOMIC, SMALL BUSINESS, AND CONSUMER IMPACT STATEMENT1

TITLE 4. PROFESSIONS AND OCCUPATIONS

CHAPTER 23. BOARD OF PHARMACY

1. Identification of the rulemaking:

The Board is complying with Executive Order 2019-01 by making minor changes to remove unnecessary or burdensome regulatory requirements and comply with statute. In a rulemaking approved by Council on April 2, 2019 (See 25 A.A.R. 1015 (April 26, 2019)), a definition of virtual wholesaler was removed to provide time for the Board to consider public comment. The revised definition of virtual wholesaler, as required under A.R.S. § 32-1901, is included in this rulemaking. Under Laws 2018, Chapter 228, the legislature amended A.R.S. § 32-1901 to remove reference to “graduate intern” so the term is removed from Sections included in this rulemaking. R4-23-205 is amended to add fees for temporary licenses as specifically authorized under A.R.S. § 32-3124(H); R4-23-204 is amended to comply with A.R.S. § 32-3248.02, which requires health professionals to obtain continuing education regarding opioids; and R4-23-1103 is amended to comply with A.R.S. § 32-1924(F), which establishes a 36-month license for a pharmacy technician trainee. R4-23-607 is amended to clarify that a nonresident permittee is required to be licensed in both Arizona and the jurisdiction of residence. Exemptions from EO2019-01 were provided by Emily Rajakovich, in the Governor’s Office, by e-mails dated April 1, 2019, and July 12, 2019.

a. The conduct and its frequency of occurrence that the rule is designed to change:

Until the rulemaking is completed, the Board’s rules will contain unnecessary or burdensome requirements and not be consistent with statute.

b. The harm resulting from the conduct the rule is designed to change and the likelihood it will continue to occur if the rule is not changed:

It is not good government for a regulatory board to have rules that contain unnecessary or burdensome requirements or are inconsistent with statute.

c. The estimated change in frequency of the targeted conduct expected from the rule change:

When the rulemaking is completed, the Board’s rules will not contain unnecessary or burdensome requirements and will be consistent with statute.

1 If adequate data are not reasonably available, the agency shall explain the limitations of the data, the methods used in an attempt to obtain the data, and characterize the probable impacts in qualitative terms. (A.R.S. § 41-1055(C)).

2. A brief summary of the information included in the economic, small business, and consumer impact statement:

The Board believes the rulemaking will have minimal economic impact because it simply removes unnecessary or burdensome requirements or makes rule consistent with statute. An individual who chooses to obtain a temporary license will incur the cost of the fee for the temporary license but will have the benefit of being able to be employed while an application for licensure is processed. A person that chooses to operate as a virtual wholesaler is required to obtain either a full-service or non-prescription wholesalers permit and pay the applicable fee.

3. The person to contact to submit or request additional data on the information included in the economic, small business, and consumer impact statement:

Name: Kamlesh Gandhi

Address: 1616 W Adams Street, Suite 120
Phoenix, AZ 85007

Telephone: (602) 771-2740

Fax: (602) 771-2749

E-mail: kgandhi@azpharmacy.gov

Website: www.azpharmacy.gov

4. Persons who will be directly affected by, bear the costs of, or directly benefit from the rulemaking:

Licensees who prescribe opioids, applicants wishing to obtain a temporary license, virtual wholesalers, and the Board will be directly affected by, bear the costs of, or directly benefit from the rulemaking. The rulemaking will indirectly affect all licensees and applicants by removing unnecessary or burdensome requirements and making the rules consistent with statute.

The Board has not started tracking the number of virtual wholesalers but expects to do so in the near future. To date, the Board has received no applications for a temporary license.

There are currently 5,157 pharmacists and interns authorized by the Board to administer immunizations, vaccines, and emergency medications. As a condition of continuing the authorization, each will be required to obtain two contact hours of continuing education relevant to administering immunizations, vaccines, and emergency medications. These two hours of continuing education are part of rather than in addition to the 30-hour biennial

continuing education requirement applicable to all pharmacists and interns. Pharmacists and interns authorized to administer immunizations, vaccines, and emergency medications have the benefit of being able to provide an additional service to members of the public. The continuing education requirement is minimal and necessary to protect the health and safety of those who choose to obtain immunizations or vaccines at a pharmacy.

The requirement that a licensee authorized to dispense controlled substances participate in at least three contact hours of opioid-related, substance use disorder-related, or addiction-related continuing education during each license-renewal cycle is established in statute (See A.R.S. § 32-3248.02). The legislature enacted this statutory provision to address the current epidemic opioid-related abuse. This rulemaking simply makes the Board's rule regarding continuing education consistent with statute. These three hours of continuing education are part of rather than in addition to the 30-hour biennial continuing education requirement applicable to all pharmacists and interns.

The legislature amended A.R.S. § 32-1924(F) to allow a pharmacy technician trainee to receive a 36- month, non-renewable license. Previously, a pharmacy technician trainee could obtain a 24-month license and could reapply once for another 24-month license. In the past, approximately 33 percent of pharmacy technician trainees reapplied because they had not completed the training or passed the examination required for licensure as a pharmacy technician. The Board does not have data yet but believes approximately 25 percent of pharmacy technician trainees will not complete training or pass the required examination during the 36 months provided.

The Board incurred the cost of doing this rulemaking and will incur the cost of implementing it. The Board will have the benefit of rules that are consistent with statute and minimize regulatory burdens on licensees and applicants. The Board has 23 FTES, 6 of whom are dedicated to the Controlled Substances Prescription Monitoring Program. The Board's current appropriation is \$2,642,200.

5. Cost-benefit analysis:

- a. Costs and benefits to state agencies directly affected by the rulemaking including the number of new full-time employees at the implementing agency required to implement and enforce the proposed rule:

The Board is the only state agency directly affected by this rulemaking. The Board will not need a new full-time employee to implement or enforce the rules.

- b. Costs and benefits to political subdivisions directly affected by the rulemaking:
No political subdivision is directly affected by the rulemaking.
- c. Costs and benefits to businesses directly affected by the rulemaking:
Licensees are businesses directly affected by the rulemaking. Their costs and benefits are described in item 4.

6. Impact on private and public employment:

The Board believes the rulemaking will have no impact private or public employment.

7. Impact on small businesses²:

- a. Identification of the small business subject to the rulemaking:
Licensees are small businesses subject to the rulemaking.
- b. Administrative and other costs required for compliance with the rulemaking:
Licensees to whom R4-23-204(A)(2) is applicable will have to maintain records showing compliance with the continuing education requirement. An applicant applying for a temporary license will incur the cost of making application and paying the required fee. A person choosing to operate as a virtual wholesaler will incur the cost of making application for either a full-service or non-prescription wholesalers' permit and paying the applicable fee. Under R4-23-607, a person who is not a resident of Arizona is required to be licensed in both Arizona and the person's residential jurisdiction before selling or distributing drugs into Arizona.
- c. Description of methods that may be used to reduce the impact on small businesses:
Many of the changes in this rulemaking remove regulatory requirements or make the rules consistent with statute. The Board determined the fees established are reasonable and necessary to enable the Board to perform the licensing and regulatory activities required to fulfill its responsibility to protect public health and safety. Making application for a license and maintaining records of compliance with requirements impose minimal economic burdens. The Board believes it is not possible to reduce the impact of the rules on small businesses and achieve the goal of protecting public health and safety.

8. Cost and benefit to private persons and consumers who are directly affected by the rulemaking:

No private persons or consumers are directly affected by the rulemaking.

² Small business has the meaning specified in A.R.S. § 41-1001(21).

9. Probable effects on state revenues:

If there are applications for a temporary license or to operate as a virtual wholesaler, 10 percent of the amount collected will be contributed to the state's general fund.

10. Less intrusive or less costly alternative methods considered:

Because the costs associated with the rulemaking are minimal and reasonable, the Board did not consider less intrusive or less costly alternative methods.

Arizona Administrative CODE

www.azsos.gov

This Chapter contains a correction to a historical note published in Supp. 13-3. No other changes have been made to it since Supp. 17-4.

The table of contents on the first page contains quick links to the referenced page numbers in this Chapter. Refer to the notes at the end of a Section to learn about the history of a rule as it was published in the *Arizona Administrative Register*.

Sections, Parts, Exhibits, Tables or Appendices codified in this supplement. The list provided contains quick links to the updated rules.

Due to a clerical error the historical note has been removed in R4-23-675 referencing an amendment in Supp. 13-3.

Questions about these rules? Contact:

Name:	Kamlesh Gandhi
Address:	Board of Pharmacy 1616 W. Adams St., Suite 120 Phoenix, AZ 85007

E-mail:	kgandhi@azpharmacy.gov

The correction in this Chapter in supplement 18-2 replaces supplement 17-4, 85 pages

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule” means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2018 is cited as Supp. 18-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority

note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State’s website, under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

ARTICLE 1. ADMINISTRATION

R4-23-101. General

- A. 4 A.A.C. 23 applies to all actions and proceedings of the Board and shall be deemed a part of the record in any Board action or proceeding without formal introduction of, or reference to the rules. A party to a Board action is deemed to have knowledge of the rules. The Board office shall provide a copy of the rules:
 - 1. To each license applicant who submits a completed application packet; and
 - 2. To each permit applicant during the final compliance inspection after the Board approves the permit application.
- B. The Board, within its jurisdiction, may, in the interest of justice, excuse the failure of any person to comply with the rules.
- C. The Board, within its jurisdiction, may grant an extension of time within which to comply with any rule when it deems the extension to be in the interest of justice.

Historical Note

Former Rules 1.1000, 1.1200, and 1.1300; Amended effective August 23, 1978 (Supp. 78-4). Amended by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-102. Meetings

- A. The Board shall hold not less than four meetings per fiscal year to conduct general business and interview permit and license applicants.
- B. A special meeting of the Board may be held at any time subject to the call of the President or a majority of the Board members and in compliance with the notification requirements of A.R.S. § 38-431.02.

Historical Note

Former Rules 1.2100, 1.2200, 1.2300, and 1.2400. Amended by final rulemaking at 7 A.A.R. 2143, effective May 1, 2001 (Supp. 01-2).

R4-23-103. Repealed

Historical Note

Former Rules 1.3100, 1.3200, 1.3300, and 1.3400; Amended subsection (C) effective August 9, 1983 (Supp. 83-4). Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-104. Repealed

Historical Note

Former Rules 1.4011, 1.4110, 1.4120, 1.4200, 1.4210, 1.4220, 1.4300, 1.4400, 1.5500, 1.5600, 1.5700, and 1.4500; Amended effective August 23, 1978 (Supp. 78-5); Amended by deleting subsection (B) and renumbering subsections (C) through (J) as subsections (B) through (I) effective August 9, 1983 (Supp. 83-4). Amended effective February 8, 1991 (Supp. 91-1). Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-105. Repealed

Historical Note

Former Rules 1.5100, 1.5200, 1.5300, and 1.5400; Amended subsection (B) effective August 9, 1983 (Supp. 83-4). Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

ical Note updated (Supp. 06-2).

R4-23-106. Repealed

Historical Note

Former Rules 1.5800 and 1.5900. Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-107. Repealed

Historical Note

Former Rules 1.5910, 1.5920, 1.5921, and 1.5922. Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-108. Repealed

Historical Note

Former Rule 1.5930. Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-109. Repealed

Historical Note

Former Rules 1.7100, 1.7200, and 1.7300. Amended effective July 14, 1977 (Supp. 77-4). Amended effective February 8, 1991 (Supp. 91-1). Section repealed by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1); Historical Note updated (Supp. 06-2).

R4-23-110. Definitions

In addition to definitions in A.R.S. § 32-1901, the following definitions apply to this Chapter:

“Active ingredient” means any component that furnishes pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease or that affects the structure or any function of the body of man or other animals. The term includes those components that may undergo chemical change in the manufacture of the drug, that are present in the finished drug product in a modified form, and that furnish the specified activity or effect.

“AHCCCS” means the Arizona Health Care Cost Containment System.

“Annual family income” means the combined yearly gross earned income and unearned income of all adult individuals within a family unit.

“Approved course in pharmacy law” means a continuing education activity that addresses practice issues related to state or federal pharmacy statutes, rules, or regulations.

“Approved Provider” means an individual, institution, organization, association, corporation, or agency that is approved by the Accreditation Council for Pharmacy Education (ACPE) in accordance with ACPE’s policy and procedures or by the Board as meeting criteria indicative of the ability to provide quality continuing education.

“Assisted living facility” means a residential care institution as defined in A.R.S. § 36-401.

“Authentication of product history” means identifying the purchasing source, the ultimate fate, and any intermediate handling of any component of a radiopharmaceutical or other drug.

“Automated dispensing system” means a mechanical system in a long-term care facility that performs operations or activities, other than compounding or administration, relative to the

Board of Pharmacy

storage, packaging, counting, labeling, and dispensing of medications, and which collects, controls, and maintains all transaction information.

“Automated storage and distribution system” means a mechanical system that performs operations or activities other than counting, compounding, or administration, relative to the storage, packaging, or distributing of drugs or devices and that collects, controls, and maintains all transaction information.

“Batch” means a specific quantity of drug that has uniform character and quality, within specified limits, and is produced according to a single manufacturing order during the same cycle of manufacture.

“Beyond-use date” means:

A date determined by a pharmacist and placed on a prescription label at the time of dispensing to indicate a time beyond which the contents of the prescription are not recommended to be used; or

A date determined by a pharmacist and placed on a compounded pharmaceutical product’s label at the time of preparation as specified in R4-23-410(B)(3)(d), R4-23-410(I)(6)(e), or R4-23-410(J)(1)(d) to indicate a time beyond which the compounded pharmaceutical product is not recommended to be used.

“Biological safety cabinet” means a containment unit suitable for the preparation of low to moderate risk agents when there is a need for protection of the product, personnel, and environment, consistent with National Sanitation Foundation (NSF) standards, published in the National Sanitation Foundation Standard 49, Class II (Laminar Flow) Biohazard Cabinetry, NSF International P. O. Box 130140, Ann Arbor, MI, revised June 1987 edition, (and no future amendments or editions), incorporated by reference and on file with the Board.

“Care-giver” means a person who cares for someone who is sick or disabled or an adult who cares for an infant or child and includes a patient’s husband, wife, son, daughter, mother, father, sister, brother, legal guardian, nurse, or medical practitioner.

“Community pharmacy” means any place under the direct supervision of a pharmacist where the practice of pharmacy occurs or where prescription orders are compounded and dispensed other than a hospital pharmacy or a limited service pharmacy.

“Component” means any ingredient used in compounding or manufacturing drugs in dosage form, including an ingredient that may not appear in the finished product.

“Compounding and dispensing counter” means a pharmacy counter working area defined in this Section where a pharmacist or a graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist compounds, mixes, combines, counts, pours, or prepares and packages a prescription medication to dispense an individual prescription order or prepackages a drug for future dispensing.

“Computer system” means an automated data-processing system that uses a programmable electronic device to store, retrieve, and process data.

“Computer system audit” means an accounting method, involving multiple single-drug usage reports and audits, used to determine a computer system’s ability to store, retrieve, and process original and refill prescription dispensing information.

“Contact hour” means 50 minutes of participation in a continuing education activity sponsored by an Approved Provider.

“Container” means:

A receptacle, as described in the official compendium or the federal act, that is used in manufacturing or compounding a drug or in distributing, supplying, or dispensing the finished dosage form of a drug; or

A metal receptacle designed to contain liquefied or vaporized compressed medical gas and used in manufacturing, transfilling, distributing, supplying, or dispensing a compressed medical gas.

“Continuing education” means a structured learning process required of a licensee to maintain licensure that includes study in the general areas of socio-economic and legal aspects of health care; the properties and actions of drugs and dosage forms; etiology, characteristics and therapeutics of disease status; or pharmacy practice.

“Continuing education activity” means continuing education obtained through an institute, seminar, lecture, conference, workshop, mediated instruction, programmed learning course, or postgraduate study in an accredited college or school of pharmacy.

“Continuing education unit” or “CEU” means 10 contact hours of participation in a continuing education activity sponsored by an Approved Provider.

“Continuous quality assurance program” or “CQA program” means a planned process designed by a pharmacy permittee to identify, evaluate, and prevent medication errors.

“Correctional facility” has the same meaning as in A.R.S. §§ 13-2501 and 31-341.

“CRT” means a cathode ray tube or other mechanism used to view information produced or stored by a computer system.

“CSPMP” means the Controlled Substances Prescription Monitoring Program established under A.R.S. Title 36, Chapter 28.

“Current good compounding practices” means the minimum standards for methods used in, and facilities or controls used for, compounding a drug to ensure that the drug has the identity and strength and meets the quality and purity characteristics it is represented to possess.

“Current good manufacturing practice” means the minimum standard for methods used in, and facilities or controls used for manufacturing, processing, packing, or holding a drug to ensure that the drug meets the requirements of the federal act as to safety, and has the identity and strength and meets the quality and purity characteristics it is represented to possess.

“Cytotoxic” means a pharmaceutical that is capable of killing living cells.

“Day” means a calendar day unless otherwise specified.

“DEA” means the Drug Enforcement Administration as defined in A.R.S. § 32-1901.

“Declared disaster areas” means areas designated by the governor or by a county, city, or town under A.R.S. § 32-1910 as those areas that have been adversely affected by a natural disaster or terrorist attack and require extraordinary measures to provide adequate, safe, and effective health care for the affected population.

“Delinquent license” means a pharmacist, pharmacy intern, graduate intern, or pharmacy technician license the Board sus-

Board of Pharmacy

pends for failure to renew or pay all required fees on or before the date the renewal is due.

“Dietary supplement or food supplement” means a product (other than tobacco) that:

Is intended to supplement the diet that contains one or more of the following dietary ingredients: a vitamin, a mineral, an herb or other botanical, an amino acid, a dietary substance for use by humans to supplement the diet by increasing the total daily intake, or a concentrate, metabolite, constituent, extract, or combinations of these ingredients;

Is intended for ingestion in pill, capsule, tablet, or liquid form;

Is not represented for use as a conventional food or as the sole item of a meal or diet; and

Is labeled as a “dietary supplement” or “food supplement.”

“Digital signature” has the same meaning as in A.R.S. § 41-132(E).

“Dispensing pharmacist” means a pharmacist who, in the process of dispensing a prescription medication after the complete preparation of the prescription medication and before delivery of the prescription medication to a patient or patient’s agent, verifies, checks, and initials the prescription medication label, as required in R4-23-402(A).

“Drug sample” means a unit of a prescription drug that a manufacturer provides free of charge to promote the sale of the drug.

“Durable medical equipment” or “DME” means technologically sophisticated medical equipment that may be used by a patient or consumer in a home or residence. DME may be prescription-only devices as defined in A.R.S. § 32-1901(75). DME includes:

Air-fluidized beds,

Apnea monitors,

Blood glucose monitors and diabetic testing strips,

Continuous Positive Airway Pressure (CPAP) machines,

Electronic and computerized wheelchairs and seating systems,

Feeding pumps,

Home phototherapy devices,

Hospital beds,

Infusion pumps,

Medical oxygen and oxygen delivery systems excluding compressed medical gases,

Nebulizers,

Respiratory disease management devices,

Sequential compression devices,

Transcutaneous electrical nerve stimulation (TENS) unit, and

Ventilators.

“Earned income” means monetary payments received by an individual as a result of work performed or rental property owned or leased by the individual, including:

Wages,

Commissions and fees,

Salaries and tips,

Profit from self-employment,

Profit from rent received from a tenant or boarder, and

Any other monetary payments received by an individual for work performed or rental of property.

“Electronic signature” has the same meaning as in A.R.S. § 44-7002.

“Eligible patient” means a patient who a pharmacist determines is eligible to receive an immunization using professional judgment after consulting with the patient regarding the patient’s current health condition, recent health condition, and allergies.

“Emergency drug supply unit” means those drugs that may be required to meet the immediate and emergency therapeutic needs of long-term care facility residents and hospice inpatient facility patients, and which are not available from any other authorized source in sufficient time to prevent risk of harm to residents or patients.

“Extreme emergency” means the occurrence of a fire, water leak, electrical failure, public disaster, or other catastrophe constituting an imminent threat of physical harm to pharmacy personnel or patrons.

“Family unit” means:

A group of individuals residing together who are related by birth, marriage, or adoption; or

An individual who:

Does not reside with another individual; or

Resides only with another individual or group of individuals to whom the individual is unrelated by birth, marriage, or adoption.

“FDA” means the Food and Drug Administration, a federal agency within the United States Department of Health and Human Services, established to set safety and quality standards for foods, drugs, cosmetics, and other consumer products.

“Health care decision maker” has the same meaning as in A.R.S. § 12-2291.

“Health care institution” has the same meaning as in A.R.S. § 36-401.

“Hospice inpatient facility” means a health care institution licensed under A.R.S. § 36-401 and Article 8 that provides hospice services to a patient requiring inpatient services.

“Immediate notice” means a required notice sent by mail, facsimile, or electronic mail to the Board Office within 24 hours.

“Immunizations training program” means an immunization training program for pharmacists, pharmacy interns, and graduate interns that meets the requirements of R4-23-411(E).

“Inactive ingredient” means any component other than an “active ingredient” present in a drug.

“Internal test assessment” means performing quality assurance or other procedures necessary to ensure the integrity of a test.

“ISO Class 5 environment” means an atmospheric environment that complies with the ISO/TC209 International Clean-

 Board of Pharmacy

room Standards, specifically ANSI/IES/T/ISO-14644-1:1999: Cleanrooms and associated controlled environments--Part 1: Classification of air cleanliness, first edition dated May 1, 1999, (and no future amendments or editions), incorporated by reference and on file in the Board office.

“ISO Class 7 environment” means an atmospheric environment that complies with the ISO/TC209 International Cleanroom Standards, specifically ANSI/IES/T/ISO-14644-1:1999: Cleanrooms and associated controlled environments--Part 1: Classification of air cleanliness, first edition dated May 1, 1999, (and no future amendments or editions), incorporated by reference and on file in the Board office.

“Licensed health care professional” means an individual who is licensed and regulated under A.R.S. Title 32, Chapter 7, 11, 13, 14, 15, 16, 17, 18, 25, 29, or 35.

“Limited-service correctional pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that:

Holds a current Board permit under A.R.S. § 32-1931;

Is located in a correctional facility; and

Uses pharmacists, interns, and support personnel to compound, produce, dispense, and distribute drugs.

“Limited-service long-term care pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board-issued permit and dispenses prescription medication or prescription-only devices to patients in long-term care facilities.

“Limited-service mail-order pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and dispenses a majority of its prescription medication or prescription-only devices by mailing or delivering the prescription medication or prescription-only device to an individual by the United States mail, a common or contract carrier, or a delivery service.

“Limited-service nuclear pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and provides radiopharmaceutical services.

“Limited-service pharmacy permittee” means a person who holds a current limited-service pharmacy permit in compliance with A.R.S. §§ 32-1929, 32-1930, 32-1931, and A.A.C. R4-23-606.

“Limited-service sterile pharmaceutical products pharmacy” means a limited-service pharmacy, as defined in A.R.S. § 32-1901, that holds a current Board permit under A.R.S. § 32-1931 and dispenses a majority of its prescription medication or prescription-only devices as sterile pharmaceutical products.

“Long-term care consultant pharmacist” means a pharmacist providing consulting services to a long-term care facility.

“Long-term care facility” or “LTCF” means a nursing care institution as defined in A.R.S. § 36-401.

“Lot” means a batch or any portion of a batch of a drug, or if a drug produced by a continuous process, an amount of drug produced in a unit of time or quantity in a manner that assures its uniformity. In either case, a lot is identified by a distinctive lot number and has uniform character and quality with specified limits.

“Lot number” or “control number” means any distinctive combination of letters or numbers, or both, from which the complete history of the compounding or manufacturing, control,

packaging, and distribution of a batch or lot of a drug can be determined.

“Low-income subsidy” means Medicare-provided assistance that may partially or fully cover the costs of drugs and is based on the income of an individual and, if applicable, the individual's spouse.

“Materials approval unit” means any organizational element having the authority and responsibility to approve or reject components, in-process materials, packaging components, and final products.

“Mechanical counting device for a drug in solid, oral dosage form” means a mechanical device that counts drugs in solid, oral dosage forms for dispensing and includes an electronic balance when used to count drugs.

“Mechanical storage and counting device for a drug in solid, oral dosage form” means a mechanical device that stores and counts and may package or label drugs in solid, oral dosage forms for dispensing.

“Mediated instruction” means information transmitted via intermediate mechanisms such as audio or video tape or telephone transmission.

“Medical practitioner-patient relationship” means that before prescribing, dispensing, or administering a prescription-only drug, prescription-only device, or controlled substance to a person, a medical practitioner, as defined in A.R.S. § 32-1901, shall first conduct a physical examination of that person or have previously conducted a physical examination. This subdivision does not apply to:

A medical practitioner who provides temporary patient supervision on behalf of the patient's regular treating medical practitioner;

Emergency medical situations as defined in A.R.S. § 41-1831;

Prescriptions written to prepare a patient for a medical examination; or

Prescriptions written, prescription-only drugs, prescription-only devices, or controlled substances issued for use by a county or tribal public health department for immunization programs, emergency treatment, in response to an infectious disease investigation, public health emergency, infectious disease outbreak or act of bioterrorism. For purposes of this subsection, “bioterrorism” has the same meaning as in A.R.S. § 36-781.

“Medicare” means a federal health insurance program established under Title XVIII of the Social Security Act.

“Medication error” means any unintended variation from a prescription or medication order. Medication error does not include any variation that is corrected before the medication is dispensed to the patient or patient's care-giver, or any variation allowed by law.

“Mobile pharmacy” means a pharmacy that is self-propelled or movable by another vehicle that is self-propelled.

“MPJE” means Multistate Pharmacy Jurisprudence Examination, a Board-approved national pharmacy law examination written and administered in cooperation with NABP.

“NABP” means National Association of Boards of Pharmacy.

“NABPLEX” means National Association of Boards of Pharmacy Licensure Examination.

Board of Pharmacy

"NAPLEX" means North American Pharmacist Licensure Examination.

"Order" means either of the following:

A prescription order as defined in A.R.S. § 32-1901; or

A medication order as defined in A.A.C. R4-23-651.

"Other designated personnel" means a non-pharmacist individual who is permitted in the pharmacy area, for a limited time, under the direct supervision of a pharmacist, to perform non-pharmacy related duties, such as trash removal, floor maintenance, and telephone or computer repair.

"Outpatient" means an individual who is not a residential patient in a health care institution.

"Outpatient setting" means a location that provides medical treatment to an outpatient.

"Patient profile" means a readily retrievable, centrally located information record that contains patient demographics, allergies, and medication profile.

"Pharmaceutical patient care services" means the provision of drug selection, drug utilization review, drug administration, drug therapy monitoring, and other drug-related patient care services intended to achieve outcomes related to curing or preventing a disease, eliminating or reducing a patient's symptoms, or arresting or slowing a disease process, by identifying and resolving or preventing potential and actual drug-related problems.

"Pharmaceutical product" means a medicinal drug.

"Pharmacy counter working area" means a clear and continuous working area that contains no major obstacles such as a desktop computer, computer monitor, computer keyboard, external computer drive device, printer, facsimile machine, pharmacy balance, typewriter, or pill-counting machine, but may contain individual documents or prescription labels, pens, prescription blanks, refill log, pill-counting tray, spatula, stapler, or other similar items necessary for the prescription-filling process.

"Pharmacy law continuing education" means a continuing education activity that addresses practice issues related to state or federal pharmacy statutes, rules, or regulations, offered by an Approved Provider.

"Pharmacy permittee" means a person who holds a current pharmacy permit that complies with A.R.S. §§ 32-1929, 32-1930, 32-1931, 32-1934, and R4-23-606 and R4-23-652.

"Physician" means a medical practitioner licensed under A.R.S. Title 32, Chapter 13 or 17.

"Physician-in-charge" means a physician who is responsible to the Board for all aspects of a prescription medication donation program required in A.R.S. § 32-1909 and operated in the physician's office or in a health care institution.

"Poverty level" means the annual family income for a family unit of a particular size, as specified in the poverty guidelines updated annually in the *Federal Register* by the U.S. Department of Health and Human Services.

"Precursor chemical" means a precursor chemical I as defined in A.R.S. § 13-3401(26) and a precursor chemical II as defined in A.R.S. § 13-3401(27).

"Prepackaged drug" means a drug that is packaged in a frequently prescribed quantity, labeled in compliance with A.R.S. §§ 32-1967 and 32-1968, stored, and subsequently dispensed

by a pharmacist or a graduate intern or pharmacy intern under the supervision of a pharmacist, who verifies at the time of dispensing that the drug container is properly labeled, in compliance with A.R.S. § 32-1968, for the patient.

"Prep area" means a specified area either within an ISO class 7 environment or adjacent to but outside an ISO class 7 environment that:

Allows the assembling of necessary drugs, supplies, and equipment for compounding sterile pharmaceutical products, but does not allow the use of paper products such as boxes or bulk drug storage;

Allows personnel to don personnel protective clothing, such as gown, gloves, head cover, and booties before entering the clean compounding area; and

Is a room or a specified area within a room, such as an area specified by a line on the floor.

"Primary care provider" means the medical practitioner who is treating an individual for a disease or medical condition.

"Proprietor" means the owner of a business permitted by the Board under A.R.S. §§ 32-1929, 32-1930, 32-1931, and 32-1934.

"Provider pharmacy" means a pharmacy that contracts with a long-term care facility to supply prescription medication or other services for residents of a long-term care facility.

"Radiopharmaceutical" means any drug that emits ionizing radiation and includes:

Any nonradioactive reagent kit, nuclide generator, or ancillary drug intended to be used in the preparation of a radiopharmaceutical, but does not include drugs such as carbon-containing compounds or potassium-containing salts, that contain trace quantities of naturally occurring radionuclides; and

Any biological product that is labeled with a radionuclide or intended to be labeled with a radionuclide.

"Radiopharmaceutical quality assurance" means performing and interpreting appropriate chemical, biological, and physical tests on radiopharmaceuticals to determine the suitability of the radiopharmaceutical for use in humans and animals. Radiopharmaceutical quality assurance includes internal test assessment, authentication of product history, and appropriate record retention.

"Radiopharmaceutical services" means procuring, storing, handling, compounding, preparing, labeling, quality assurance testing, dispensing, distributing, transferring, recordkeeping, and disposing of radiochemicals, radiopharmaceuticals, and ancillary drugs. Radiopharmaceutical services include quality assurance procedures, radiological health and safety procedures, consulting activities associated with the use of radiopharmaceuticals, and any other activities required for the provision of pharmaceutical care.

"Red C stamp" means a device used with red ink to imprint an invoice with a red letter C at least one inch high, to make an invoice of a Schedule III through IV controlled substance, as defined in A.R.S. § 36-2501, readily retrievable, as required by state and federal rules.

"Refill" means other than the original dispensing of the prescription order, dispensing a prescription order in the same quantity originally ordered or in multiples of the originally ordered quantity when specifically authorized by the prescriber, if the refill is authorized by the prescriber:

Board of Pharmacy

In the original prescription order;

By an electronically transmitted refill order that the pharmacist promptly documents and files; or

By an oral refill order that the pharmacist promptly documents and files.

"Regulated chemical" means the same as in A.R.S. § 13-3401(30).

"Remodel" means to alter structurally the pharmacy area or location.

"Remote drug storage area" means an area that is outside the premises of the pharmacy, used for the storage of drugs, locked to deny access by unauthorized persons, and secured against the use of force.

"Resident" means:

An individual admitted to and living in a long-term care facility or an assisted living facility;

An individual who has a place of habitation in Arizona and lives in Arizona as other than a tourist, or

A person who owns or operates a place of business in Arizona.

"Responsible person" means the owner, manager, or other employee who is responsible to the Board for a permitted establishment's compliance with the laws and administrative rules of this state and of the federal government pertaining to distribution of drugs, devices, precursor chemicals, and regulated chemicals. Nothing in this definition relieves other individuals from the responsibility to comply with state and federal laws and administrative rules.

"Score transfer" means the process that enables an applicant to take the NAPLEX in a jurisdiction and be eligible for licensure by examination in other jurisdictions.

"Security features" means attributes incorporated into the paper of a prescription order, referenced in A.R.S. § 32-1968(A)(4), that are approved by the Board or its staff and include one or more of the following designed to prevent duplication or aid the authentication of a paper document: laid lines, enhanced laid lines, thermochromic ink, artificial watermark, fluorescent ink, chemical void, persistent void, penetrating numbers, high-resolution border, high-resolution latent images, micro-printing, prismatic printing, embossed images, abrasion ink, holograms, and foil stamping.

"Shared order filling" means the following:

Preparing, packaging, compounding, or labeling an order, or any combination of these functions, that are performed by:

A person with a current Arizona Board license, located at an Arizona pharmacy, on behalf of and at the request of another resident or nonresident pharmacy; or

A person, located at a nonresident pharmacy, on behalf of and at the request of an Arizona pharmacy; and

Returning the filled order to the requesting pharmacy for delivery to the patient or patient's care-giver or, at the request of this pharmacy, directly delivering the filled order to the patient.

"Shared order processing" means the following:

Interpreting the order, performing order entry verification, drug utilization review, drug compatibility and drug allergy review, final order verification, and when neces-

sary, therapeutic intervention, or any combination of these order processing functions, that are performed by:

A pharmacist or intern, under pharmacist supervision, with a current Arizona Board license, located at an Arizona pharmacy, on behalf of and at the request of another resident or nonresident pharmacy; or

A pharmacist or intern, under pharmacist supervision, located at a nonresident pharmacy, on behalf of and at the request of an Arizona pharmacy; and

After order processing is completed, returning the processed order to the requesting pharmacy for order filling and delivery to the patient or patient's care-giver or, at the request of this pharmacy, returning the processed order to another pharmacy for order filling and delivery to the patient or patient's care-giver.

"Shared services" means shared order filling or shared order processing, or both.

"Sight-readable" means that an authorized individual is able to examine a record and read its information from a CRT, microfiche, microfilm, printout, or other method acceptable to the Board or its designee.

"Single-drug audit" means an accounting method that determines the numerical and percentage difference between a drug's beginning inventory plus purchases and ending inventory plus sales.

"Single-drug usage report" means a computer system printout of original and refill prescription order usage information for a single drug.

"Standard-risk sterile pharmaceutical product" means a sterile pharmaceutical product compounded from sterile commercial drugs using sterile commercial devices or a sterile pharmaceutical optic or ophthalmic product compounded from non-sterile ingredients.

"State of emergency" means a governmental declaration issued under A.R.S. § 32-1910 as a result of a natural disaster or terrorist attack that results in individuals being unable to refill existing prescriptions.

"Sterile pharmaceutical product" means a medicinal drug free from living biological organisms.

"Strength" means:

The concentration of the drug substance (for example, weight/weight, weight/volume, or unit dose/volume basis); or

The potency, that is, the therapeutic activity of a drug substance as indicated by bioavailability tests or by controlled clinical data (expressed, for example, in terms of unity by reference to a standard).

"Substantial-risk sterile pharmaceutical product" means a sterile pharmaceutical product compounded as a parenteral or injectable dosage form from non-sterile ingredients.

"Supervision" means a pharmacist is present, assumes legal responsibility, and has direct oversight of activities relating to acquiring, preparing, distributing, administering, and selling prescription medications by pharmacy interns, graduate interns, pharmacy technicians, or pharmacy technician trainees and when used in connection with the intern training requirements means that, in a pharmacy where intern training occurs, a pharmacy intern preceptor assumes the primary responsibil-

Board of Pharmacy

ity of teaching the intern during the entire period of the training.

“Supplying” means selling, transferring, or delivering to a patient or a patient’s agent one or more doses of:

A nonprescription drug in the manufacturer’s original container for subsequent use by the patient, or

A compressed medical gas in the manufacturer’s or compressed medical gas distributor’s original container for subsequent use by the patient.

“Support personnel” means an individual, working under the supervision of a pharmacist, trained to perform clerical duties associated with the practice of pharmacy, including cashiering, bookkeeping, pricing, stocking, delivering, answering non-professional telephone inquiries, and documenting third-party reimbursement. Support personnel shall not perform the tasks of a pharmacist, pharmacy intern, graduate intern, pharmacy technician, or pharmacy technician trainee.

“Temporary pharmacy facility” means a facility established as a result of a declared state of emergency to temporarily provide pharmacy services within or adjacent to declared disaster areas.

“Tourist” means an individual who is living in Arizona but maintains a place of habitation outside of Arizona and lives outside of Arizona for more than six months during a calendar year.

“Transfill” means a manufacturing process by which one or more compressed medical gases are transferred from a bulk container to a properly labeled container for subsequent distribution or supply.

“Unearned income” means monetary payment received by an individual that is not compensation for work performed or rental of property owned or leased by the individual, including:

Unemployment insurance,

Workers’ compensation,

Disability payments,

Payments from the Social Security Administration,

Payments from public assistance,

Periodic insurance or annuity payments,

Retirement or pension payments,

Strike benefits from union funds,

Training stipends,

Child support payments,

Alimony payments,

Military family allotments,

Regular support payments from a relative or other individual not residing in the household,

Investment income,

Royalty payments,

Periodic payments from estates or trusts, and

Any other monetary payments received by an individual that are not:

As a result of work performed or rental of property owned by the individual,

Gifts,

Lump-sum capital gains payments,

Lump-sum inheritance payments,

Lump-sum insurance payments, or

Payments made to compensate for personal injury.

“Verified signature” or “signature verifying” means in relation to a Board license or permit application or report, form, or agreement, the hand-written or electronic signature of an individual who, by placing a hand-written or electronic signature on a hard-copy or electronic license or permit application or report, form, or agreement agrees with and verifies that the statements and information within or attached to the license or permit application or report, form, or agreement are true in every respect and that inaccurate reporting can result in denial or loss of a license or permit or report, form, or agreement.

“Veteran” means an individual who has served in the United States Armed Forces.

“Wholesale distribution” means distribution of a drug to a person other than a consumer or patient, but does not include:

Selling, purchasing, or trading a drug or offering to sell, purchase, or trade a drug for emergency medical reasons. For purposes of this Section, “emergency medical reasons” includes transferring a prescription drug by a community or hospital pharmacy to another community or hospital pharmacy to alleviate a temporary shortage;

Selling, purchasing, or trading a drug, offering to sell, purchase, or trade a drug, or dispensing a drug as specified in a prescription;

Distributing a drug sample by a manufacturers’ or distributors’ representative; or

Selling, purchasing, or trading blood or blood components intended for transfusion.

“Wholesale distributor” means any person engaged in wholesale distribution of drugs, including: manufacturers; repackers; own-label distributors; private-label distributors; jobbers; brokers; warehouses, including manufacturers’ and distributors’ warehouses, chain drug warehouses, and wholesale drug warehouses; independent wholesale drug traders; and retail pharmacies that conduct wholesale distributions in the amount of at least 5% of gross sales.

Amended by exempt rulemaking under Laws 2016, Ch. 284, § 3 at 22 A.A.R. 2606, effective August 31, 2016 (Supp. 16-3).

R4-23-111. Notice of Hearing

- A. Except as provided in A.R.S. § 32-1928(B), the Board shall revoke, suspend, place on probation, or fine a licensee or permittee only after:
 - 1. Notice is served under this Section, and
 - 2. A hearing is conducted under R4-23-122.
- B. The Board shall give notice of hearing to a party at least 30 days before the date set for the hearing in the manner described in R4-23-115(E) and (F). The notice shall include:
 - 1. A statement of the date, time, place, and nature of the hearing;
 - 2. A statement of the legal authority and jurisdiction for the hearing;
 - 3. A reference to the particular section or sections of statute and rule involved; and
 - 4. A statement of the violation or issue asserted by the Board.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1).

R4-23-112. Ex Parte Communications

A party shall not communicate, either directly or indirectly, with a Board member about any substantive issue in a pending matter unless:

1. All parties are present;
2. It is during a scheduled proceeding, where an absent party fails to appear after proper notice; or
3. It is by written motion with copies to all parties.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1).

R4-23-113. Motions

- A. Purpose. A party requesting a ruling from the Board shall file a motion. Motions may be made for rulings such as:
 1. Continuing or expediting a hearing under R4-23-116;
 2. Vacating a hearing under R4-23-117;
 3. Scheduling a prehearing conference under R4-23-118;
 4. Quashing a subpoena under R4-23-119;
 5. Requesting telephonic testimony under R4-23-120; and
 6. Reconsidering a previous order under R4-23-121.
- B. Form. Unless made during a prehearing conference or hearing, motions shall be made in writing and shall conform to the requirements of R4-23-115. All motions, whether written or oral, shall state the factual and legal grounds supporting the motion, and the requested action.
- C. Time limits. Absent good cause, or unless otherwise provided by law or these rules, written motions shall be filed with the Board office at least 15 days before the hearing. A party demonstrates good cause by showing that the grounds for the motion could not have been known in time, using reasonable diligence and:
 1. A ruling on the motion will further administrative convenience, expedition or economy; or
 2. A ruling on the motion will avoid undue prejudice to any party.
- D. Response to motion. A party shall file a written response stating any objection to the motion within five days of service, or as directed by the Board.
- E. Oral argument. A party may request oral argument when filing a motion or response. If necessary to develop a complete record, the Board shall grant oral argument.
- F. Rulings. Rulings on motions, other than those made during a prehearing conference or the hearing, shall be in writing and served on all parties.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1).

R4-23-114. Computing Time

In computing any time period, the Board shall exclude the day from which the designated time period begins to run. The Board shall include the last day of the period unless it falls on a Saturday, Sunday, or legal holiday. When the time period is 10 days or less, the Board shall exclude Saturdays, Sundays, and legal holidays.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1132, effective May 1, 2004 (Supp. 04-1).

R4-23-115. Filing Documents

- A. Docket. The Board shall open a docket for each hearing. All documents filed in a matter with the Board shall be date stamped on the day received by the Board office and entered in the docket.
- B. Definition. "Documents" include papers such as complaints, answers, motions, responses, notices, and briefs.
- C. Form. A party shall state on the document the name and address of each party served and how service was made under subsection (E). A document shall contain the Board caption and the Board's docket number.

- D. Signature. A document filed with the Board shall be signed by the party or the party's attorney. A signature constitutes a certification that the signer has read the document, has a good faith basis for submission of the document, and that it is not filed for the purpose of delay or harassment.
- E. Filing and service. A copy of a document filed with the Board shall be served on all parties. Filing with the Board office and service shall be completed by personal delivery; first-class, certified, or express mail; or facsimile.
- F. Date of filing and service. A document is filed with the Board on the date it is received by the Board office, as established by the Board office's date stamp on the face of the document. A copy of a document is served on a party as follows:
 1. On the date it is personally served,
 2. Five days after it is mailed by first-class or express mail,
 3. On the date of the return receipt if it is mailed by certified mail, or
 4. On the date indicated on the facsimile transmission.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-116. Continuing or Expediting a Hearing; Reconvening a Hearing

- A. Continuing or expediting a hearing. When ruling on a motion to continue or expedite, the Board shall consider such factors as:
 1. The time remaining between the filing of the motion and the hearing date;
 2. The position of other parties;
 3. The reasons for expediting the hearing or for the unavailability of the party, representative, or counsel on the date of the scheduled hearing;
 4. Whether testimony of an unavailable witness can be taken telephonically or by deposition; and
 5. The status of settlement negotiations.
- B. Reconvening a hearing. The Board may recess a hearing and reconvene at a future date by a verbal ruling.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-117. Vacating a Hearing

The Board shall vacate a calendared hearing and return the matter to the Board office for further action, if:

1. The parties agree to vacate the hearing;
2. The Board dismisses the matter;
3. The non-Board party withdraws the appeal; or
4. Facts demonstrate to the Board that it is appropriate to vacate the hearing for the purpose of informal disposition, or if the action will further administrative convenience, expedition, and economy and does not conflict with law or cause undue prejudice to any party.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-118. Prehearing Conference

- A. Procedure. The Board may hold a prehearing conference. The conference may be held telephonically. The Board may issue a prehearing order outlining the issues to be discussed.
- B. Record. The Board may record any agreements reached during a prehearing conference by electronic or mechanical means, or memorialize them in an order.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-119. Subpoenas

- A. Form. A party shall request a subpoena in writing from the Board and shall include:
 1. The caption and docket number of the matter;
 2. A list or description of any documents sought;
 3. The full name and home or business address of the custodian of the documents sought or all persons to be subpoenaed;
 4. The date, time, and place to appear or to produce documents pursuant to the subpoena; and
 5. The name, address, and telephone number of the party, or the party's attorney, requesting the subpoena.
- B. The Board may require a brief statement of the relevance of testimony or documents.
- C. Service of subpoena. Any person who is not a party and is at least 18 years of age may serve a subpoena. The person shall serve the subpoena by delivering a copy to the person to be served. The person serving the subpoena shall provide proof of service by filing with the Board office a certified statement of the date and manner of service and the names of the persons served.
- D. Objection to subpoena. A party, or the person served with a subpoena who objects to the subpoena, or any portion of it, may file an objection with the Board. The objection shall be filed within five days after service of the subpoena, or at the outset of the hearing if the subpoena is served fewer than five days before the hearing.
- E. Quashing, modifying subpoenas. The Board shall quash or modify a subpoena if:
 1. It is unreasonable or oppressive, or
 2. The desired testimony or evidence may be obtained by an alternative method.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-120. Telephonic Testimony

The Board may grant a motion for telephonic testimony if:

1. Personal attendance by a party or witness at the hearing will present an undue hardship for the party or witness;
2. Telephonic testimony will not cause undue prejudice to any party; and
3. The proponent of the telephonic testimony pays for any cost of obtaining the testimony telephonically.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-121. Rights and Responsibilities of Parties

- A. Generally. A party may present testimony and documentary evidence and argument with respect to the contested issue and may examine and cross-examine witnesses.
- B. Preparation. A party shall have all witnesses, documents, and exhibits available on the date of the hearing.
- C. Exhibits. A party shall provide a copy of each exhibit to all other parties at the time the exhibit is offered to the Board, unless the exhibit was previously provided to all other parties.
- D. Responding to orders. A party shall comply with an order issued by the Board concerning the conduct of a hearing. Unless an objection is made orally during a pre-hearing conference or hearing, a party shall file a motion requesting the Board to reconsider the order.

Board of Pharmacy

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-122. Conduct of Hearing

- A. Public access. Unless otherwise provided by law, all hearings are open to the public and may be conducted in an informal manner as prescribed in A.R.S. § 41-1092 et seq.
- B. Opening. The Board shall begin the hearing by reading the caption, stating the nature and scope of the hearing, and identifying the parties, counsel, and witnesses for the record.
- C. Stipulations. The Board shall enter into the record any stipulation, settlement agreement, or consent order entered into by any of the parties before or during the hearing.
- D. Opening statements. The party with the burden of proof may make an opening statement at the beginning of a hearing. All other parties may make statements in a sequence determined by the Board.
- E. Order of presentation. After opening statements, the party with the burden of proof shall begin the presentation of evidence, unless the parties agree otherwise or the Board determines that requiring another party to proceed first would be more expeditious or appropriate, and would not prejudice any other party. Copies of documentary evidence may be received in the discretion of the Board. Upon request, parties shall be given an opportunity to compare the copy with the original.
- F. Examination. A party shall conduct direct and cross examination of witnesses in the order and manner determined by the Board to expedite and ensure a fair hearing. The Board shall make rulings necessary to prevent argumentative, repetitive, or irrelevant questioning and to expedite the examination to the extent consistent with the disclosure of all relevant testimony and information. The Board may take notice of judicially cognizable facts. In addition, the Board may take notice of generally recognized technical or scientific facts within the Board's or its staff's specialized knowledge. A party shall be notified either before or during the hearing or by reference in preliminary reports of the material the Board notices. The Board may use the Board's or its staff's experience, technical competence, and specialized knowledge in the evaluation of the evidence.
- G. Closing argument. When all evidence has been received, parties shall have the opportunity to present closing oral argument, in a sequence determined by the Board. The Board may permit or require closing oral argument to be supplemented by written memoranda. The Board may permit or require written memoranda to be submitted simultaneously or sequentially, within time periods the Board may prescribe.
- H. Conclusion of hearing. Unless otherwise provided by the Board, the hearing is concluded upon the submission of all evidence, the making of final argument, and the issuing of a final decision or order of the Board.
- I. Decisions and orders. Unless otherwise provided by law, any final decisions or order adverse to a party in a hearing shall be in writing or stated in the record. Any final decision shall include findings of fact and conclusions of law, separately stated. Findings of fact shall be accompanied by a concise and explicit statement of the underlying facts supporting the findings. Unless otherwise provided by law, each party shall be notified either personally or by mail to the party's last known address of record of any decision or order. Upon request, a copy of the decision or order shall be delivered or mailed to each party and to each party's attorney of record.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-123. Failure of Party to Appear for Hearing

If a party fails to appear at a hearing, the Board may proceed with the presentation of the evidence of the appearing party, or vacate the hearing and return the matter to the Board office for any further action.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-124. Witnesses; Exclusion from Hearing

All witnesses at the hearing shall testify under oath or affirmation. At the request of a party, or at the discretion of the Board, the Board may exclude witnesses who are not parties from the hearing room so that they cannot hear the testimony of other witnesses.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-125. Proof

- A. Standard of proof. Unless otherwise provided by law, the standard of proof is a preponderance of the evidence.
- B. Burden of proof. Unless otherwise provided by law:
 - 1. The party asserting a claim, right, or entitlement has the burden of proof;
 - 2. A party asserting an affirmative defense has the burden of establishing the affirmative defense; and
 - 3. The proponent of a motion shall establish the grounds to support the motion.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-126. Disruptions

A person shall not interfere with access to or from the hearing room, or interfere, or threaten interference with the hearing. If a person interferes, threatens interference, or disrupts the hearing, the Board may order the disruptive person to leave or be removed.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-127. Hearing Record

- A. Maintenance. The Board shall maintain the official administrative record of a matter.
- B. Transfer of record. Any party requesting a copy of the administrative record or any portion of the administrative record shall make a request to the Board office and shall pay the reasonable costs of duplication.
- C. Release of exhibits. Exhibits shall be released:
 - 1. Upon the order of a court of competent jurisdiction; or
 - 2. Upon motion of the party who submitted the exhibits if the time for judicial appeal has expired and no appeal is pending.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-128. Rehearing or Review and Appeal of Decision

- A. The Board shall provide for a rehearing and review of it decisions under A.R.S. Title 41, Chapter 6, Article 10, and this Section. For purposes of these rules, the terms "contested case" and "party" are defined in A.R.S. § 41-1001.
- B. A party to a contested case shall exhaust the party's administrative remedies by filing a motion for rehearing or review within 30 days after the service of the Board decision that is subject to rehearing or review in order to be eligible for judicial review under A.R.S. Title 12, Chapter 7, Article 6. The

Board of Pharmacy

- Board shall notify a party in its decision, that is subject to rehearing or review, that the party may file a motion for rehearing or review, and that failure to file a motion for rehearing or review within 30 days after service of the decision has the effect of prohibiting the party from seeking judicial review of the Board's decision.
- C. A party may amend a motion for rehearing or review at any time before the Board rules on the motion.
- D. The Board may grant a rehearing or review for any of the following reasons materially affecting a party's rights:
1. Irregularity in the proceedings of the Board, or any order or abuse of discretion, that deprived the moving party of a fair hearing;
 2. Misconduct of the Board, its staff, its hearing officer, or the prevailing party;
 3. Accident or surprise that could not have been prevented by ordinary prudence;
 4. Newly discovered material evidence that could not, with reasonable diligence, have been discovered and produced at the hearing;
 5. Excessive or insufficient penalty;
 6. Error in the admission or rejection of evidence or other errors of law occurring at the hearing or during the progress of the proceedings;
 7. That the Board's decision is a result of passion or prejudice; or
 8. That the findings of fact or decision is not justified by the evidence or is contrary to law.
- E. The Board may affirm or modify a decision or grant a rehearing to all or any of the parties on all or part of the issues for any of the reasons in subsection (D). An order modifying a decision or granting a rehearing shall specify with particularity the grounds for the order.
- F. If a motion for rehearing or review is based upon affidavits, they shall be served with the motion. An opposing party may, within 15 days after service, serve opposing affidavits. The Board may extend this period for a maximum of 20 days, for good cause as described in subsection (I).
- G. Not later than 10 days after the date of a decision, after giving parties notice and an opportunity to be heard, the Board may grant a rehearing or review on its own initiative for any reason for which it might have granted relief on the motion of a party. The Board may grant a motion for rehearing or review, timely served, for a reason not stated in the motion.
- H. If a rehearing is granted, the Board shall hold the rehearing within 60 days after the order granting the rehearing is issued.
- I. The Board may extend all time limits listed in this Section upon a showing of good cause. A party demonstrates good cause by showing that the grounds for the party's motion or other action could not have been known in time, using reasonable diligence, and a ruling on the motion will:
1. Further administrative convenience, expedition, or economy; or
 2. Avoid undue prejudice to any party.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

R4-23-129. Notice of Judicial Appeal; Transmitting the Transcript

- A. Notification to the Board office. Within 10 days of filing a complaint for judicial review of a final administrative decision of the Board, the party shall file a copy of the complaint with the Board office. The Board office shall then transmit the administrative record to the Superior Court.

- B. Transcript. A party requesting a transcript shall arrange for transcription at the party's expense. The Board office shall make a copy of the audio taped record available to the transcriber. The party arranging for transcription shall deliver the transcript, certified by the transcriber under oath to be a true and accurate transcription of the audio taped record, to the Board office, together with one unbound copy.

Historical Note

New Section made by final rulemaking at 10 A.A.R.
1132, effective May 1, 2004 (Supp. 04-1).

ARTICLE 2. PHARMACIST LICENSURE**R4-23-201. General**

- A. License required. Before practicing as a pharmacist in Arizona, a person shall possess a valid pharmacist license issued by the Board. There is no temporary licensure.
- B. Methods of licensure. Licensure as a pharmacist shall be either:
1. By practical examination, using paper and pencil written testing, computer adaptive testing, or other Board-approved testing method; or
 2. By reciprocity.
- C. Practicing pharmacist holding a delinquent license. Before the Board reinstates an Arizona pharmacist license, a pharmacist, whose Arizona pharmacist license is delinquent for five or more years and who is practicing pharmacy outside the Board's jurisdiction with a pharmacist license issued by another jurisdiction, shall:
1. Pass the MPJE or other Board-approved jurisprudence examination,
 2. Pay all delinquent annual renewal fees, and
 3. Pay penalty fees.
- D. Non-practicing pharmacist holding a delinquent license. Before the Board reinstates an Arizona pharmacist license, a pharmacist, whose Arizona pharmacist license is delinquent for five or more years and who did not practice pharmacy within the last 12 months before seeking reinstatement, shall:
1. Complete the requirements in subsection (C), and
 2. Appear before the Board to furnish satisfactory proof of fitness to be licensed as a pharmacist.
- E. Verification of license. A pharmacy permittee or pharmacist-in-charge shall not permit a person to practice as a pharmacist until the pharmacy permittee or pharmacist-in-charge verifies that the person is currently licensed by the Board as a pharmacist.

Historical Note

Former Rules 2.1100, 2.1310, 2.1320, and 2.1400.

Amended effective August 23, 1978 (Supp. 78-4).

Amended by deleting subsection (E) effective April 20, 1982 (Supp. 82-2). Amended subsections (C) and (D) effective August 12, 1988 (Supp. 88-3). Amended effective February 8, 1991 (Supp. 91-1). Amended effective

January 12, 1998 (Supp. 98-1). Amended by final rulemaking at 10 A.A.R. 4356, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-202. Licensure by Examination

- A. Eligibility. To be eligible for licensure as a pharmacist by examination, a person shall:
1. Have a degree in pharmacy from a school or college of pharmacy approved by the Board as specified in A.R.S. § 32-1935, and whose professional degree program, at the time the person graduates, is accredited by the Accreditation Council for Pharmacy Education; or

Board of Pharmacy

2. Qualify under the requirements of A.R.S. § 32-1922(D); and
3. Complete not less than 1500 hours of intern training as specified in R4-23-303.
- B. Application.**
1. An applicant for licensure by examination shall:
 - a. Submit a completed application for licensure by examination electronically or manually on a form furnished by the Board, and
 - b. Submit with the application form:
 - i. The documents specified in the application form, and
 - ii. The application fee specified in R4-23-205(C).
 2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
 3. An applicant for licensure by examination shall register for NAPLEX and MPJE through NABP's registration process.
 4. The Board shall deem an application for licensure by examination invalid after 12 months from the date the application is received. An applicant whose application form is invalid and who wishes to continue licensure procedures, shall submit a new application form and fee as specified in R4-23-205(C).
- C. Passing grade; notification; re-examination.**
1. To pass the required examinations, an applicant shall obtain a score of at least 75 on both the NAPLEX and MPJE.
 2. The Board office shall:
 - a. Retrieve an applicant's NAPLEX and MPJE score from the NABP database no later than two weeks after the applicant's examination date, and
 - b. Provide written notice by mail to an applicant who fails the NAPLEX or MPJE no later than seven days after the Board office retrieves the applicant's score from NABP.
 3. An applicant who fails the NAPLEX or MPJE may register with the NABP to retake the examination within the 12-month period defined in subsection (B)(4). An applicant who fails the NAPLEX or MPJE three times shall petition the Board as specified in R4-23-401 for Board approval before retaking the examination.
 4. For the purpose of licensure by examination, the Board office shall deem a passing score on the NAPLEX or MPJE invalid after 24 months from the applicant's examination date. An applicant who fails to complete the licensure process within the 24-month period, and who wishes to continue licensure procedures, shall retake the examination(s).
- D. NAPLEX score transfer.**
1. The Board office shall deem a score transfer received on the date the NABP transmits the applicant's official score transfer report to the Board office.
 2. An applicant who receives a passing score on the NAPLEX taken in another jurisdiction shall, within 12 months from the date the Board office receives the applicant's official NABP score transfer report from the NABP, make application for licensure according to subsection (B). After 12 months, an applicant may reapply for licensure in this state under the provisions of subsection (B) or R4-23-203(B).
 3. An applicant who takes the NAPLEX in another jurisdiction and fails the examination may apply for licensure in this state under the provisions of subsection (B).
- E. Licensure.**
1. The Board office shall issue a certificate of licensure and a wall license to a successful applicant upon receipt of:
 - a. The initial licensure fee specified in R4-23-205(A)(1)(a), and
 - b. The wall license fee specified in R4-23-205(E)(1)(a).
 2. A licensee shall maintain the certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
- F. Time-frames for licensure by examination.**
1. The Board office shall complete an administrative completeness review within 60 days from the date the application form is received.
 - a. The Board office shall issue a written notice of administrative completeness to the applicant if no deficiencies are found in the application form.
 - b. If the application form is incomplete, the Board office shall provide the applicant with a written notice that includes a comprehensive list of the missing information. The 60-day time-frame for the Board office to finish the administrative completeness review is suspended from the date the notice of incompleteness is served until the applicant provides the Board office with all missing information.
 - c. If the Board office does not provide the applicant with written notice regarding administrative completeness, the application form shall be deemed complete 60 days after receipt by the Board office.
 2. An applicant with an incomplete application form shall submit all of the missing information within 90 days of service of the notice of incompleteness.
 - a. If an applicant cannot submit all missing information within 90 days of service of the notice of incompleteness, the applicant may send a written request for an extension to the Board office postmarked or delivered no later than 90 days from service of the notice of incompleteness.
 - b. The written request for an extension shall document the reasons the applicant is unable to meet the 90-day deadline.
 - c. The Board office shall review the request for an extension of the 90-day deadline and grant the request if the Board office determines that an extension of the deadline will enable the applicant to assemble and submit the missing information. An extension shall be for no more than 30 days. The Board office shall notify the applicant in writing of its decision to grant or deny the request for an extension.
 3. If an applicant fails to submit a complete application form within the time allowed, the Board office shall close the applicant's file. An applicant whose file is closed and who later wishes to obtain a license shall apply again according to subsection (B).
 4. The Board office shall complete a substantive review of the applicant's qualifications in no more than 120 days from the date on which the administrative completeness review of an application form is complete.
 - a. If an applicant is found to be ineligible for licensure by examination, the Board office shall issue a written notice of denial to the applicant.
 - b. If an applicant is found to be eligible to take the NAPLEX, the Board office shall notify the NABP that the applicant is eligible to test. The NABP shall issue the applicant an authorization to test letter.

Board of Pharmacy

- c. If an applicant is found to be eligible to take the MPJE, the Board office shall notify the NABP that the applicant is eligible to test. The NABP shall issue the applicant an authorization to test letter.
 - d. The Board office shall deem an applicant's eligibility to test invalid after 12 months from the date the application for licensure by examination is received.
 - e. If the Board office finds deficiencies during the substantive review of an application form, the Board office shall issue a written request to the applicant for additional documentation.
 - f. The 120-day time-frame for a substantive review of eligibility to take the NAPLEX or MPJE is suspended from the date of a written request for additional documentation until the date that all documentation is received. The applicant shall submit the additional documentation according to subsection (F)(2).
 - g. If the applicant and the Board office mutually agree in writing, the 120-day substantive review time-frame may be extended once for no more than 45 days.
 - 5. For the purpose of A.R.S. § 41-1072 et seq., the Board establishes the following time-frames for licensure by examination.
 - a. Administrative completeness review time-frame: 60 days.
 - b. Substantive review time-frame: 120 days.
 - c. Overall time-frame: 180 days.
- G. License renewal.**
1. To renew a license, a pharmacist shall submit a completed license renewal application electronically or manually on a form furnished by the Board with the biennial renewal fee specified in R4-23-205(A)(1)(b).
 2. If the biennial renewal fee is not paid by November 1 of the renewal year specified in A.R.S. § 32-1925, the pharmacist license is suspended and the licensee shall not practice as a pharmacist. The licensee shall pay a penalty as provided in A.R.S. § 32-1925 and R4-23-205(G)(1) to vacate the suspension.
 3. A licensee shall maintain the renewal certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
 4. Time-frames for license renewals. The Board office shall follow the time-frames established in subsection (F).

Historical Note

Former Rules 2.2100, 2.2200, 2.2300, 2.2400, 2.2500, 2.2600, 2.2700, 2.2800, 2.2910, 2.2920, 2.2930, 2.3000, 2.3010, 2.3100; Amended effective August 23, 1978 (Supp. 78-5). Amended effective June 10, 1981 (Supp. 81-3). Former Section R4-23-202 repealed, new Section R4-23-202 adopted effective July 24, 1985 (Supp. 85-4). Amended effective March 13, 1991 (Supp. 91-1). Amended effective January 12, 1998 (Supp. 98-1). Amended by final rulemaking at 8 A.A.R. 409 and 8 A.A.R. 646, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 4356, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 12 A.A.R. 4689, effective February 3, 2007 (Supp. 06-4). Amended by final rulemaking at 14 A.A.R. 3605, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-203. Licensure by Reciprocity

- A. Eligibility.** A person is eligible for licensure by reciprocity who:
 - 1. Is licensed as a pharmacist in a jurisdiction that provides reciprocity to Arizona licensees,
 - 2. Has passed the NABPLEX or NAPLEX with a score of 75 or better or was licensed by examination in another jurisdiction having essentially the same standards for licensure as this state at the time the pharmacist was licensed,
 - 3. Provides evidence to the Board of having completed the required secondary and professional education and training specified in R4-23-202(A),
 - 4. Has engaged in the practice of pharmacy for at least one year or has met the internship requirements of Article 3 within the year immediately before the date of application, and
 - 5. Has actively practiced as a pharmacist for 400 or more hours within the last calendar year or has an Arizona graduate intern license and has completed 400 hours of internship training in a Board-approved internship training site.
- B. Application.**
 - 1. An applicant for licensure by reciprocity shall:
 - a. Submit a completed application for licensure by reciprocity electronically or manually on a form furnished by the Board, and
 - b. Submit with the application form:
 - i. The documents specified in the application form, and
 - ii. The reciprocity fee specified in R4-23-205(B).
 - 2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
 - 3. An applicant for licensure by reciprocity shall register for MPJE through NABP's registration process.
 - 4. The Board office shall deem an application for licensure by reciprocity invalid after 12 months from the date the application is received. An applicant whose application form is invalid and who wishes to continue licensure procedures, shall submit a new application form and fee as specified in R4-23-205(B).
- C. Passing grade; notification; re-examination.**
 - 1. To pass the required examination, an applicant shall obtain a score of at least 75 on the MPJE.
 - 2. The Board office shall:
 - a. Retrieve an applicant's MPJE score from the NABP database no later than two weeks after the applicant's examination date, and
 - b. Provide written notice by mail to an applicant who fails the MPJE no later than seven days after the Board office retrieves the applicant's score from NABP.
 - 3. An applicant who fails the MPJE may register with the NABP to retake the examination within the 12-month period specified in subsection (B)(4). An applicant who fails the MPJE three times shall petition the Board as specified in R4-23-401 for Board approval before retaking the examination.
 - 4. For the purpose of licensure by reciprocity, the Board office shall deem a passing score on the MPJE invalid after 24 months from the applicant's examination date. An applicant who fails to complete the licensure process within the 24-month period, and who wishes to continue licensure procedures, shall retake the examination.
- D. Licensure.**

Board of Pharmacy

1. The Board office shall issue a certificate of licensure and a wall license to a successful applicant upon receipt of:
 - a. The initial licensure fee specified in R4-23-205(A)(1)(a), and
 - b. The wall license fee specified in R4-23-205(E)(1)(a).
 2. A licensee shall maintain the certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
- E.** Time-frames for licensure by reciprocity. The Board office shall follow the time-frames established for licensure by examination in R4-23-202(F).
- F.** License renewal. License renewal shall be the same as specified in R4-23-202(G).

Historical Note

Former Rules 2.4100, 2.4200, 2.4310, 2.4320, 2.4330, 2.4340, 2.4350, 2.4360, 2.4400, 2.4510, 2.4520, 2.4522, 2.4523, 2.4530, 2.4540, 2.4550, 2.4560, 2.4610, 2.4620, and 2.4700; Amended effective August 23, 1978 (Supp. 78-4). Amended subsections (H), (L), (O) through (Q) effective June 10, 1981 (Supp. 81-3). Former Section R4-23-203 repealed, new Section R4-23-203 adopted effective July 24, 1985 (Supp. 85-4). Amended effective March 13, 1991 (Supp. 91-1). Amended effective January 12, 1998 (Supp. 98-1). Amended effective January 12, 1998 (Supp. 98-1). Amended by final rulemaking at 8 A.A.R. 409 and 8 A.A.R. 646, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 4356, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 14 A.A.R. 3605, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-204. Continuing Education Requirements

- A.** General. In accordance with A.R.S. § 32-1925(G), the Board shall not renew a license unless the applicant has, during the two years preceding the application for renewal, participated in 30 contact hours (3.0 CEU's) of continuing education activity sponsored by an Approved Provider as defined in R4-23-110, of which at least three contact hours (0.3 CEU's) are approved courses in pharmacy law. Subject to A.R.S. § 32-1937, a pharmacist licensed for less than 24 months shall obtain continuing education units in an amount determined by multiplying 1.25 hours times the number of months between the date of initial licensure and the next license renewal date.
- B.** Acceptance of continuing education units (CEU's). The Board shall:
1. Only accept CEU's for continuing education activities sponsored by an Approved Provider;
 2. Only accept CEU's accrued during the two-year period immediately before licensure renewal;
 3. Not allow CEU's accrued in a biennial renewal period in excess of the 3.0 CEU's required to be carried forward to the succeeding biennial renewal period;
 4. Allow a pharmacist who leads, instructs, or lectures to a group of health professionals on pharmacy-related topics in continuing education activities sponsored by an Approved Provider to receive CEU's for a presentation by following the same attendance procedures as any other attendee of the continuing education activity; and
 5. Not accept as CEU's the performance of normal teaching duties within a learning institution by a pharmacist whose primary responsibility is the education of health professionals.

- C. Continuing education records and reporting CEU's. A pharmacist shall:
 1. Maintain continuing education records that:
 - a. Verify the continuing education activities the pharmacist participated in during the preceding five years; and
 - b. Consist of a statement of credit or a certificate issued by an Approved Provider at the conclusion of a continuing education activity;
 2. At the time of licensure renewal, attest to the number of CEU's the pharmacist participated in during the renewal period on the biennial renewal form; and
 3. When requested by the Board office, submit proof of continuing education participation within 20 days of the request.
- D. The Board may revoke, suspend, or place on probation the license of a pharmacist who fails to comply with continuing education participation, recording, or reporting requirements of this Section.
- E. A pharmacist who is aggrieved by any decision of the Board or its administrative staff concerning continuing education units may request a hearing before the Board.

Historical Note

Adopted effective September 1, 1981 (Supp. 81-5).

Amended effective March 13, 1991 (Supp. 91-1).

Amended by final rulemaking at 8 A.A.R. 409 and 8 A.A.R. 646, effective January 10, 2002 (Supp. 02-1).

R4-23-205. Fees

- A.** The Board shall collect the full biennial fee for all initial and renewal license and permit applications listed in subsections (B) and (C).
1. If a license or permit is issued from November of an odd-numbered year through October of an even-numbered year, the licensee or permittee shall renew on or before November 1 of the next odd-numbered year.
 2. If a license or permit is issued from November of an even-numbered year through October of an odd-numbered year, the licensee or permittee shall renew on or before November 1 of the next even-numbered year.
- B.** Licensure fees:
1. Pharmacist:
 - a. Initial licensure: \$180.
 - b. Licensure renewal: \$180.
 2. Pharmacy or graduate intern. Initial licensure: \$50.
 3. Pharmacy technician:
 - a. Initial licensure: \$72.
 - b. Licensure renewal: \$72.
- C.** Vendor permit fees (Resident and nonresident):
1. Pharmacy: \$480 biennially (Including hospital, and limited service).
 2. Drug wholesaler or manufacturer:
 - a. Manufacturer: \$1000 biennially.
 - b. Full-service drug wholesaler: \$1000 biennially.
 - c. Nonprescription drug wholesaler: \$500 biennially.
 3. Drug packager or repackager: \$1000 biennially.
 4. Nonprescription drug, retail:
 - a. Category I (30 or fewer items): \$120 biennially.
 - b. Category II (more than 30 items): \$200 biennially.
 5. Compressed medical gas distributor: \$200 biennially.
 6. Durable medical equipment and compressed medical gas supplier: \$100 biennially.
- D.** Pharmacy technician trainee 36-month, non-renewable, license: \$50.
1. If an individual obtained an initial pharmacy technician trainee license before August 9, 2017, the Board shall

Board of Pharmacy

- allow the individual to reapply once for a pharmacy technician trainee license if the individual reapplies before the initial license expires and pays a reapplication fee of \$36; and
2. If a pharmacy technician trainee's initial license expires before August 9, 2017, and the pharmacy technician trainee does not reapply before August 9, 2017, the Board shall not allow the former pharmacy technician trainee to reapply.
- E. Reciprocity fee:** \$300.
- F. Application fee:** \$50.
- G. Certificate fees:**
1. Certificate of free sale: \$200 per certificate.
 2. Certificate of good manufacturing practice: \$200 per certificate.
 3. Annual inspection fee calculated at the average hourly rate of a pharmacy inspector multiplied by the duration of the inspection measured in 10-minute increments or portion of a 10-minute increment.
- H. Other fees:**
1. Wall license.
 - a. Pharmacist: \$20.
 - b. Pharmacy or graduate intern: \$10.
 - c. Pharmacy technician: \$10.
 - d. Pharmacy technician trainee: \$10.
 2. Duplicate of any Board-issued license, registration, certificate, or permit: \$10.
 3. Duplicate current renewal license: \$10.
 4. License, permit, or certificate verification: \$15.
- I. Fees** are not refunded under any circumstances except for the Board's failure to comply with its established licensure or permit time frames under R4-23-202 or R4-23-602.
- J. Penalty.** Renewal applications submitted after the expiration date are subject to a penalty as provided in A.R.S. §§ 32-1925 and 32-1931.
1. Licensees: A penalty equal to half the licensee's biennial licensure renewal fee under subsection (B) and not to exceed \$350.
 2. Permittees: A penalty equal to half the permittee's biennial permit fee under subsection (C) and not to exceed \$350.

Historical Note

Adopted effective July 24, 1985 (Supp. 84-5). Amended subsection (A) paragraph (1) effective May 20, 1988 (Supp. 88-2). Amended effective August 12, 1988 (Supp. 88-3). Amended effective February 8, 1991 (Supp. 91-1). Amended effective April 1, 1995; filed with the Secretary of State January 31, 1995 (Supp. 95-1). Amended effective January 12, 1998 (Supp. 98-1). Amended by final rulemaking at 6 A.A.R. 4589, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 409 and 8 A.A.R. 646, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 15 A.A.R. 173, effective March 7, 2009 (Supp. 09-1). Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2). Amended by exempt rulemaking under Laws 2016, Ch. 284, § 3 at 22 A.A.R. 2606, effective August 31, 2016 (Supp. 16-3). Amended by final exempt rulemaking at 23 A.A.R. 2058, effective August 9, 2017; amended by final exempt rulemaking with amendments to subsection (D), at 23 A.A.R. 2383 (Supp. 17-3).

ARTICLE 3. INTERN TRAINING AND PHARMACY INTERN PRECEPTORS**R4-23-301. Intern Licensure**

- A. Licensure as a pharmacy intern or graduate intern is for the purpose of complementing the individual's academic or experiential education in preparation for licensure as a pharmacist. An applicant may request a waiver of intern licensure requirements by submitting a written request as specified in R4-23-401 and appearing in person at a Board meeting.
- B. The prerequisites for licensure as a pharmacy intern are:
1. Current enrollment, in good standing, in a Board-approved college or school of pharmacy; or
 2. Graduation from a college or school of pharmacy that is not approved by the Board; and
 3. Proof that the applicant is certified by the Foreign Pharmacy Graduate Examination Committee (FPGEC); or
 4. By order of the Board if the Board determines the applicant needs intern training.
- C. If a pharmacy intern licensee stops attending pharmacy school classes before completing the pharmacy school's requirements for graduation, the licensee shall immediately stop practicing as a pharmacy intern and surrender the pharmacy intern license to the Board or the Board's designee no later than 30 days after the date of the last attended class, unless the licensee petitions the Board as specified in R4-23-401 and receives Board approval to continue working as a pharmacy intern. A student re-entering a pharmacy program who wishes to continue internship training shall reapply for pharmacy intern licensure.
- D. The prerequisites for licensure as a graduate intern are:
1. Graduation from a Board-approved college or school of pharmacy, and
 2. Application for licensure as a pharmacist by examination or reciprocity, or
 3. By order of the Board if the Board determines that the applicant needs intern training.
- E. Experiential training. Intern training shall include the activities and services encompassed by the term "practice of pharmacy" as defined in A.R.S. § 32-1901.
- F. Out-of-state experiential training. An intern shall receive credit for intern training received outside this state if the Board determines that the intern training requirements of the jurisdiction in which the training was received are equal to the minimum requirements for intern training in this state. An applicant seeking credit for intern training received outside this state shall furnish a certified copy of the records of intern training from:
1. The Board of Pharmacy or the intern licensing agency of the other jurisdiction where the training was received; or
 2. In a jurisdiction without an intern licensing agency, the director of the applicant's Board-approved college or school of pharmacy's experiential training program.
- G. Verification of license. A pharmacy permittee or pharmacist-in-charge shall not permit a person to practice as a pharmacy or graduate intern until the pharmacy permittee or pharmacist-in-charge verifies that the person is currently licensed by the Board as a pharmacy or graduate intern.
- H. Intern application.
1. An applicant for licensure as a pharmacy intern or graduate intern shall:
 - a. Submit a completed application electronically or manually on a form furnished by the Board, and
 - b. Submit with the application form:
 - i. The documents specified in the application form,

Board of Pharmacy

- ii. The initial licensure fee specified in R4-23-205(A)(2), and
 - iii. The wall license fee specified in R4-23-205(E)(1)(b).
2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
- I. Licensure.**
1. If an applicant is found to be ineligible for intern licensure under statute and rule, the Board office shall issue a written notice of denial to the applicant.
 2. If an applicant is found to be eligible for intern licensure under statute and rule, the Board office shall issue a certificate of licensure and a wall license. An applicant who is assigned a license number and who has been granted "open" status on the Board's license verification site may begin practice as a pharmacy intern or graduate intern prior to receiving the certificate of licensure.
 3. An applicant who is assigned a license number and who has a "pending" status on the Board's license verification site shall not practice as a pharmacy intern or graduate intern until the Board office issues a certificate of licensure as specified in subsection (2).
 4. A licensee shall maintain the certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
- J. Time-frames for intern licensure.** The Board office shall follow the time-frames established in R4-23-202(F).
- K. License renewal.**
1. A pharmacy intern whose license expires before the intern completes the education or training required for licensure as a pharmacist but less than six years after the issuance of the initial pharmacy intern license may renew the intern license for a period equal to the difference between the expiration date of the initial intern license and six years from the issue date of the initial intern license by payment of a prorated renewal fee based on the initial license fee specified in R4-23-205(A)(2).
 2. If a pharmacy intern fails to graduate from a Board-approved college or school of pharmacy within six years from the date the Board issues the initial intern license, the intern is not eligible for relicensure as an intern unless the intern obtains Board approval as specified in A.R.S. § 32-1923(E) and R4-23-401. To remain in good standing, an intern who receives Board approval for relicensure shall pay a prorated renewal fee for the number of months of licensure approved by the Board based on the initial license fee specified in R4-23-205(A)(2) before the license expiration date.
 3. If an intern receives Board approval for relicensure and does not pay the renewal fee specified in subsection (2) before the license expiration date, the intern license is suspended and the licensee shall not practice as an intern. The licensee shall pay a penalty as provided in A.R.S. § 32-1925 and R4-23-205(G)(1) to vacate the suspension.
- L. Notification of training.**
1. A pharmacy intern who is employed as an intern outside the experiential training program of a Board-approved college or school of pharmacy or a graduate intern shall notify the Board within ten days of starting or terminating training, or changing training site.
 2. The director of a Board-approved college or school of pharmacy's experiential training program shall provide the Board an intern training report as specified in R4-23-304(B)(3).

Historical Note

Former Rules 3.1000, 3.1100, 3.1200, 3.2000, 3.2100, and 3.2200; Amended effective August 23, 1978 (Supp. 78-4). Amended effective April 20, 1982 (Supp. 82-2). Amended subsections (A), (F) and (G) effective August 12, 1988 (Supp. 88-3). Amended effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 4356, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 11 A.A.R. 3565, effective November 12, 2005 (Supp. 05-3). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 14 A.A.R. 3670, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-302. Training Site and Pharmacy Intern Preceptors

- A.** To receive credit for intern training hours, a pharmacy or graduate intern shall train in a site that:
 1. Holds a valid Arizona pharmacy permit and employs a pharmacy intern preceptor who supervises the intern; or
 2. Is an alternative training site. For purposes of this Section, the term alternative training site is a non-pharmacy training site established and monitored by a Board-approved college or school of pharmacy or other non-pharmacy site where pharmacy related activities are performed and where an intern gains experience as specified in R4-23-301(E).
- B.** The Board shall inform a pharmacy or alternative training site that an intern will not get credit for training received at the site if the Board determines that a pharmacy or alternative training site fails to provide experiential training as specified in R4-23-301(E) or violates A.R.S. Chapter 18 Title 32 or Chapter 27 Title 36 or the federal act.
- C. Pharmacy intern preceptor.** To be a pharmacy intern preceptor, a pharmacist shall:
 1. Hold a current unrestricted pharmacist license;
 2. Have a minimum of one year of experience as an actively practicing pharmacist before acting as a pharmacy intern preceptor;
 3. If a pharmacist has been found guilty of violating any federal or state law relating to the practice of pharmacy, drug or device distribution or recordkeeping, or unprofessional conduct, enter into an agreement satisfactory to the Board that places restrictions on the pharmacist's license; and
 4. Hold a faculty position in the experiential training program of a Board-approved college or school of pharmacy; or
 5. Be approved by the Board as being otherwise qualified as a pharmacy intern preceptor.
- D. Revocation of preceptorship privileges.** The Board shall revoke a pharmacy intern preceptor's privilege to train pharmacy or graduate interns if the Board determines that a pharmacy intern preceptor fails to provide experiential training as specified in R4-23-301(E) or violates A.R.S. Title 32, Chapter 18 or Title 36, Chapter 27 or the federal act. R4-23-111 applies to revocation of preceptor privileges.
- E. Pharmacist-to-intern ratio.** A pharmacy intern preceptor may supervise the training of more than one pharmacy or graduate intern during a calendar quarter. The ratio of pharmacist to intern shall not exceed one pharmacist to two interns in a community pharmacy or limited-service pharmacy setting unless approved by the Board. In considering a request to exceed the ratio, the Board will consider pharmacy space limitations and

Board of Pharmacy

whether exceeding the ratio poses a safety risk to the public health. Subject to R4-23-609 and the safety of public health, there is no pharmacist-to-intern ratio in a practice setting directed by a Board-approved college or school of pharmacy experiential training program.

- F.** Preceptor responsibilities. A pharmacy intern preceptor assumes the responsibilities of a teacher and mentor in addition to those of a pharmacist. A preceptor shall thoroughly review pharmacy policy and procedure with each intern. A preceptor is responsible for the pharmacy-related actions of an intern during the specific training period. A preceptor shall give an intern the opportunity for skill development and provide an intern with timely and realistic feedback regarding their progress.

Historical Note

Former Rules 3.3000, 3.3100, 3.3200, 3.3300, 3.3310, 3.3320, 3.3330, 3.3340, 3.3400, 3.4000, 3.4100, 3.4200, 3.4300, and 3.4400; Amended effective August 9, 1983 (Supp. 83-4). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 3605, effective November 8, 2008 (Supp. 08-3).

R4-23-303. Training Time

- A.** Training. The minimum hours of internship training required for licensure by examination shall be 1,500.
1. After enrolling in a Board-approved college or school of pharmacy as prescribed in R4-23-301(B) and receiving a Board-issued pharmacy intern license, a pharmacy intern shall complete all required internship training as part of the pharmacy intern's Board-approved college or school of pharmacy experiential training program.
 2. After receiving a Board-issued pharmacy intern license, an individual who is a graduate of a college or school of pharmacy that is not approved by the Board shall complete a minimum of 1,500 hours of internship training in a training site or sites as defined in R4-23-302(A).
 3. After receiving a Board-issued graduate intern license, a graduate intern shall complete the number of internship training hours required by the Board in a training site or sites as defined in R4-23-302(A).
- B.** Start of training and limitation of credit. To receive credit as internship training, the practical experience shall take place in a pharmacy or an alternative training site as specified in R4-23-302(A) and under the supervision of a pharmacy intern preceptor, except for a non-pharmacy site either as part of a Board-approved college or school of pharmacy experiential training program or as approved by the Board or its designee. The Board shall credit no more than 500 hours internship training as a pharmacy or graduate intern in an alternative training site specified in R4-23-302(A)(2).

Historical Note

Former Rules 3.5000 and 3.5200; Amended effective August 23, 1978 (Supp. 78-4). Amended effective August 9, 1983 (Supp. 83-4). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 18 A.A.R. 2619, effective December 2, 2012 (Supp. 12-4).

R4-23-304. Reports

- A.** Change of employment or mailing address. A pharmacy intern or graduate intern shall notify the Board within ten days of change of employment or mailing address.
- B.** Annual reports.
1. A pharmacy intern who is a graduate of a college or school of pharmacy that is not approved by the Board or

is a graduate intern shall provide the Board annual intern training reports for the duration of training. The pharmacy intern shall file an annual intern training report on a report form provided by the Board by calendar year (January 1st through December 31st). An annual intern training report shall be received at the Board's office no later than 30 days after the end of the calendar year. Any intern training hours reported to the Board office more than 30 days after the end of the calendar year in which the training hours were performed shall not be credited toward the total intern training hours required for licensure.

2. After graduation and before sitting for the NAPLEX or MPJE, a pharmacy intern who is a graduate of a Board-approved college or school of pharmacy shall ensure that the director of the Board-approved college or school of pharmacy's experiential training program provides the Board an intern training report that includes:
 - a. The dates and number of training hours experienced, by training site and total; and
 - b. The date signed and experiential training program director's signature verifying that the pharmacy intern successfully completed the experiential training program.

Historical Note

Former Rules 3.6100, 3.6200, 3.6300, and 3.6400; Amended effective August 23, 1978 (Supp. 78-4). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 4356, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 18 A.A.R. 2619, effective December 2, 2012 (Supp. 12-4). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-305. Miscellaneous Intern Training Provisions

To prevent a loss of intern hour credit and before beginning training, an intern may ask the Board if a training site meets the requirements specified in R4-23-301(E) and R4-23-302(A).

Historical Note

Former Rule 3.7000; Amended effective August 23, 1978 (Supp. 78-4). Amended by final rulemaking at 8 A.A.R. 416, effective January 10, 2002 (Supp. 02-1).

ARTICLE 4. PROFESSIONAL PRACTICES**R4-23-401. Time-frames for Board Approvals and Special Requests**

- A.** To request a Board approval required by this Chapter or a special request to deviate from or waive compliance with a requirement of this Chapter, a person shall send a letter by regular mail, e-mail, or facsimile to the Board office, detailing the nature of the approval or special request, including the applicable Arizona Revised Statute or administrative code citation. This Section does not apply to a request from a person regarding the probation, suspension, or revocation of a license or permit.
- B.** The Board office shall complete an administrative completeness review within 15 days from the date of receipt of a written request and immediately open a request file for the applicant.
1. The Board office shall issue a written notice of administrative completeness to the applicant if no deficiencies are found in the request.
 2. If the request is incomplete, the Board office shall provide the applicant with a written notice that includes a comprehensive list of the missing information. The 15-day time-frame for the Board office to finish the adminis-

Board of Pharmacy

- trative completeness review is suspended from the date the notice of incompleteness is served until the applicant provides the Board office with all missing information.
3. If the Board office does not provide the applicant with notice regarding administrative completeness, the request is deemed complete 15 days after receipt by the Board office.
- C. An applicant with an incomplete request shall submit all of the missing information within 30 days of service of the notice of incompleteness.
1. If an applicant cannot submit all missing information within 30 days of service of the notice of incompleteness, the applicant may send a written request for an extension to the Board office post-marked or delivered no later than 30 days from service of the notice of incompleteness.
 2. The written request for an extension shall document the reasons the applicant cannot meet the 30-day deadline.
 3. The Board office shall review the request for an extension of the 30-day deadline and grant the request if the Board office determines that an extension of the deadline will enable the applicant to assemble and submit the missing information. An extension shall be for no more than 30 days. The Board office shall notify the applicant in writing of its decision to grant or deny the request for an extension. An applicant who requires an additional extension shall submit an additional written request according to subsections (C)(1) and (C)(2).
- D. If an applicant fails to submit a complete request within the time allowed, the Board office shall close the applicant's request file. An applicant whose request file is closed and who later wishes to obtain an approval or special request shall apply again according to subsection (A).
- E. From the date on which the administrative completeness review of a request is finished, the Board shall complete a substantive review of the applicant's request in no more than 120 days.
1. The Board shall:
 - a. Approve the request,
 - b. Deny the request, or
 - c. If the Board determines deficiencies exist, request that the applicant produce additional documentation.
 2. If the Board approves or denies, the Board office shall issue a written approval or denial.
 3. If the Board finds deficiencies during the substantive review of a request, the Board office shall issue a written request to the applicant for additional documentation.
 4. The 120-day time-frame for a substantive review of a request for approval or special request is suspended from the date of a written request for additional documentation until the date of the next Board meeting after all documentation is received. The applicant shall submit the additional documentation according to subsection (C).
 5. If the applicant and the Board office mutually agree in writing, the 120-day substantive review time-frame may be extended once for no more than 30 days.
- F. If the applicant fails to submit the additional information requested within the time allowed, the Board office shall close the applicant's request file. An applicant whose request file is closed and who later wishes to obtain an approval or special request shall apply again according to subsection (A).
- G. For the purpose of A.R.S. § 41-1072 et seq., the Board establishes the following time-frames for a Board approval required by this Chapter or a special request to deviate from or waive compliance with a requirement of this Chapter:
1. Administrative completeness review time-frame: 15 days;

2. Substantive review time-frame: 120 days; and
3. Overall time-frame: 135 days.

Historical Note

Former Rule 4.1000; Former Section R4-23-401 repealed, new Section R4-23-401 adopted effective August 9, 1983 (Supp. 83-4). Amended effective May 16, 1990 (Supp. 90-2). Repealed effective August 24, 1992 (Supp. 92-3). New Section made by final rulemaking at 9 A.A.R. 3184, effective August 30, 2003 (Supp. 03-3).

R4-23-402. Pharmacist, Graduate Intern, and Pharmacy Intern

- A. A pharmacist or a graduate intern or pharmacy intern under the supervision of a pharmacist shall perform the following professional practices in dispensing a prescription medication from a prescription order:
1. Receive, reduce to written form, and manually initial oral prescription orders;
 2. Obtain and record the name of the individual who communicates an oral prescription order;
 3. Obtain, or assume responsibility to obtain, from the patient, patient's agent, or medical practitioner and record, or assume responsibility to record, in the patient's profile, the following information:
 - a. Name, address, telephone number, date of birth (or age), and gender;
 - b. Individual history including known diseases and medical conditions, known drug allergies or drug reactions, and if available a comprehensive list of medications currently taken and medical devices currently used;
 4. Record, or assume responsibility to record, in the patient's profile, a pharmacist's, graduate intern's, or pharmacy intern's comments relevant to the patient's drug therapy, including other information specific to the patient or drug;
 5. Verify the legality and pharmaceutical feasibility of dispensing a drug based upon:
 - a. The patient's allergies,
 - b. Incompatibilities with medications the patient currently takes,
 - c. The patient's use of unusual quantities of dangerous drugs or narcotics,
 - d. A medical practitioner's signature, and
 - e. The frequency of refills;
 6. Verify that a dosage is within proper limits;
 7. Interpret the prescription order, which includes exercising professional judgment in determining whether to dispense a particular prescription;
 8. Compound, mix, combine, or otherwise prepare and package the prescription medication needed to dispense individual prescription orders;
 9. Prepackage or supervise the prepackaging of drugs by a pharmacy technician or pharmacy technician trainee under R4-23-1104. For drugs prepackaged by a pharmacy technician or pharmacy technician trainee, a pharmacist shall:
 - a. Verify the drug to be prepackaged;
 - b. Verify that the label meets the official compendium's standards;
 - c. Check the completed prepackaging procedure and product; and
 - d. Manually initial the completed label; or
 - e. For automated packaging systems, manually initial the completed label or a written log or initial a computer-stored log;

Board of Pharmacy

10. Check prescription order data entry to ensure that the data input:
 - a. Is for the correct patient by verifying the patient's name, address, telephone number, gender, and date of birth or age;
 - b. Is for the correct drug by verifying the drug name, strength, and dosage form;
 - c. Communicates the prescriber's directions precisely by verifying dose, dosage form, route of administration, dosing frequency, and quantity; and
 - d. Is for the correct medical practitioner by verifying the medical practitioner's name, address, and telephone number;
 11. Except as provided in subsection (A)(12), make a final accuracy check of the completed prescription label including verification of medication, accuracy of patient's name, consistency with prescription order, and drug utilization review and initial in handwriting or by another method approved by the Board or its designee the finished label;
 12. If a technology-assisted verification of product program is used, make a final accuracy check of the completed prescription label including accuracy of patient's name, consistency with prescription order, and drug utilization review and initial in handwriting or by another method approved by the Board or its designee the finished label. If a technology-assisted verification of product program is used, verification of product is not required.
 13. Record, or assume responsibility to record, a prescription serial number and date dispensed on the original prescription order;
 14. Obtain, or assume responsibility to obtain, permission to refill a prescription order and record, or assume responsibility to record on the original prescription order:
 - a. Date dispensed,
 - b. Quantity dispensed, and
 - c. Name of medical practitioner or medical practitioner's agent who communicates permission to refill the prescription order;
 15. Reduce to written or printed form, or assume responsibility to reduce to written or printed form, a new prescription order received by:
 - a. Fax,
 - b. E-mail, or
 - c. Other means of communication;
 16. Verify, or assume responsibility to verify, that a completed prescription medication is sold only to the correct patient, patient's care-giver, or authorized agent;
 17. Record on the original prescription order the name or initials of the pharmacist, graduate intern, or pharmacy intern who originally dispenses the prescription order; and
 18. Record on the original prescription order the name or initials of the pharmacist, graduate intern, or pharmacy intern who dispenses each refill.
- B.** Only a pharmacist, graduate intern, or pharmacy intern shall provide oral consultation about a prescription medication to a patient or patient's care-giver in an outpatient setting, including a patient discharged from a hospital. The oral consultation is required whenever the following occurs:
1. The prescription medication has not been previously dispensed to the patient in the same strength or dosage form or with the same directions;
 2. The pharmacist, through the exercise of professional judgment, determines that oral consultation is warranted; or
3. The patient or patient's care-giver requests oral consultation.
- C.** Oral consultation shall include:
1. Reviewing the name and strength of a prescription medication or name of a prescription-only device and the labeled indication of use for the prescription medication or prescription-only device;
 2. Reviewing the prescription's directions for use;
 3. Reviewing the route of administration; and
 4. Providing oral information regarding special instructions and written information regarding side effects, procedure for missed doses, or storage requirements.
- D.** When, in the professional judgment of the pharmacist or graduate intern or pharmacy intern under the supervision of a pharmacist, or when circumstance precludes it, oral consultation may be omitted if the pharmacist, graduate intern, or pharmacy intern:
1. Personally provides written information to the patient or patient's care-giver that summarizes the information that would normally be orally communicated;
 2. Documents, or assumes responsibility to document, both the circumstance and reason for not providing oral consultation by a method approved by the Board or its designee; and
 3. Offers the patient or patient's care-giver the opportunity to communicate with a pharmacist, graduate intern, or pharmacy intern at a later time and provides a method for the patient or patient's care-giver to contact a pharmacist, graduate intern, or pharmacy intern at the pharmacy.
- E.** The pharmacist or graduate intern or pharmacy intern under the supervision of a pharmacist, through the exercise of professional judgment, may provide oral consultation that includes:
1. Common severe adverse effects, interactions, or therapeutic contraindications, and the action required if they occur;
 2. Techniques of self-monitoring drug therapy;
 3. The duration of the drug therapy; and
 4. Prescription refill information.
- F.** Nothing in subsection (B) requires a pharmacist, graduate intern, or pharmacy intern to provide oral consultation if a patient or patient's care-giver refuses the consultation.
- G.** Using a method approved by the Board or its designee, a pharmacist, graduate intern, or pharmacy intern shall document, or assume responsibility to document, that oral consultation is or is not provided.
- H.** Oral consultation documentation. When oral consultation is required as specified in subsection (B), a pharmacist, graduate intern, or pharmacy intern shall:
1. Document, or assume responsibility to document, that oral consultation is provided; or
 2. When a patient refuses oral consultation or a person other than the patient or patient's care-giver picks up a prescription and oral consultation is not provided, document, or assume responsibility to document, that oral consultation is not provided; or
 3. When a pharmacist, graduate intern, or pharmacy intern determines to omit oral consultation under subsection (D) and oral consultation is not provided, document, or assume responsibility to document, both the circumstance and reason that oral consultation is not provided; and
 4. Document, or assume responsibility to document, the name, initials, or identification code of the pharmacist, graduate intern, or pharmacy intern who did or did not provide oral consultation.

Board of Pharmacy

- I.** When a prescription is delivered to the patient or patient's care-giver outside the immediate area of a pharmacy and a pharmacist is not present, the prescription shall be accompanied by written or printed patient medication information that, in addition to the requirements in subsection (C), includes:
 - 1. Approved use for the prescription medication;
 - 2. Possible adverse reactions;
 - 3. Drug-drug, food-drug, or disease-drug interactions;
 - 4. Missed dose information; and
 - 5. Telephone number of the dispensing pharmacy or another method approved by the Board or its designee that allows a patient or patient's care-giver to consult with a pharmacist.
- J.** A prescription medication or prescription-only device, delivered to a patient at a location where a licensed health care professional is responsible for administering the prescription medication to the patient, is exempt from the requirement of subsection (C).
- K.** A pharmacist, graduate intern, or pharmacy intern shall wear a badge indicating name and title while on duty.
- L.** Nothing in this Section prevents a hospital pharmacist from accepting a prescription order according to rules pertaining specifically to hospital pharmacies.

Historical Note

R4-23-403. Repealed**Historical Note**

Former Rule 4.1200; Amended effective August 10, 1978 (Supp. 78-4). Amended effective March 28, 1980 (Supp. 80-2). Amended effective August 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective May 16, 1990 (Supp. 90-2). Amended effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4441, effective November 2, 1999 (Supp. 99-4). Section repealed by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1).

R4-23-404. Unethical Practices

- A.** Rebates prohibited. A pharmacist or pharmacy permittee shall not offer, deliver, receive, or accept any unearned rebate, refund, commission, preference, patronage dividend, discount, or other unearned consideration, whether in the form of money or otherwise, as compensation or inducement to refer a patient, client, or customer to any person, except for a rebate or premium paid completely and directly to a patient. A pharmacist or pharmacy permittee shall not:
 - 1. Make payment to a medical practitioner in money or other consideration for a prescription order prescribed by the medical practitioner; or
 - 2. Make payment to a long-term care or assisted living facility or other health care institution in money, discount,

rental, or other consideration in an amount above the prevailing rate for:

- a. Prescription medication or devices dispensed or sold for a patient or resident of the facility or institution; or
- b. Drug selection or drug utilization review services, drug therapy management services, or other pharmacy consultation services provided for a patient or resident of the facility or institution.

- B.** Prescription order-blank advertising prohibited. A pharmacist or pharmacy permittee shall not:
 - 1. Directly or indirectly furnish to a medical practitioner a prescription order-blank that refers to a specific pharmacist or pharmacy in any manner; or
 - 2. Actively or passively participate in any arrangement or agreement where a prescription order-blank is prepared, written, or issued in a manner that refers to a specific pharmacist or pharmacy.
- C.** Fraudulent claim for service. A pharmacist or pharmacy permittee shall not claim the performance of a service that the pharmacist or pharmacy permittee knows or should know was not performed, such as, claiming to dispense a prescription medication that is not dispensed.
- D.** Fraudulent claim for a fee. A pharmacist or pharmacy permittee:
 - 1. Shall not claim a fee for a service that is not performed or earned;
 - 2. May divide a prescription order into two or more portions of prescription medication at the request of a patient, or for some other ethical reason, and charge a dispensing fee for the additional service; and
 - 3. Shall not divide a prescription order merely to obtain an additional fee.
- E.** Prohibiting a prescription-only drug or device from being dispensed over the counter. A pharmacist shall ensure that:
 - 1. A prescription-only drug or device is dispensed only after receipt of a valid prescription order from a licensed medical practitioner;
 - 2. The dispensed prescription-only drug or device is properly prepared, packaged, and labeled according to this Chapter; and
 - 3. The prescription order is filed according to this Chapter.
- F.** Drugs dispensed in the course of the conduct of a business of dispensing drugs through diagnosis by mail or the internet.
 - 1. A pharmacist shall not dispense a drug from a prescription order if the pharmacist has knowledge, or reasonably should know under the circumstances, that the prescription order was issued on the basis of an internet-based questionnaire or an internet-based consultation without a medical practitioner-patient relationship as defined in R4-23-110.
 - 2. A pharmacist who dispenses a prescription-only drug, prescription-only device, or controlled substance in violation of this Section is engaging in unethical conduct in violation of A.R.S. § 32-1901.01.

Historical Note

Board of Pharmacy

08-3).

R4-23-405. Change of Responsibility

A pharmacist designated as the pharmacist-in-charge for a pharmacy, manufacturer, or other establishment shall give immediate notice, as defined in R4-23-110, when:

1. The pharmacist's responsibility as a pharmacist-in-charge is terminated; or
2. The pharmacist knows of a pending termination of the pharmacist's responsibility as the pharmacist-in-charge.

Historical Note

R4-23-406. Repealed**Historical Note**

Adopted as an emergency effective January 10, 1979, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 79-1). Amended as an emergency effective April 2, 1979, pursuant to A.R.S. § 41-1003, valid for only 90 days. Adopted effective April 10, 1979 (Supp. 79-1). Former Section R4-23-406 repealed, new Section R4-23-406 adopted effective August 9, 1983 (Supp. 83-4). Amended effective April 1, 1995; filed with the Secretary of State January 31, 1995 (Supp. 95-1). Amended by final rulemaking at 8 A.A.R. 1256, effective March 7, 2002 (Supp. 02-1). Section repealed by final rulemaking at 10 A.A.R. 230, effective March 6, 2004 (Supp. 04-1).

R4-23-407. Prescription Requirements

A. Prescription orders. A pharmacist shall ensure that:

1. A prescription order dispensed by the pharmacist includes the following information:
 - a. Date of issuance;
 - b. Name and address of the patient for whom or the owner of the animal for which the drug or device is dispensed;
 - c. Drug name, strength, and dosage form or device name;
 - d. Name of the drug's or device's manufacturer or distributor if the prescription order is written generically or a substitution is made;
 - e. Prescribing medical practitioner's directions for use;
 - f. Date of dispensing;
 - g. Quantity prescribed and if different, quantity dispensed;
 - h. For a prescription order for a controlled substance, the medical practitioner's address and DEA number;
 - i. For a written prescription order, the medical practitioner's signature;
 - j. For an electronically transmitted prescription order, the medical practitioner's digital or electronic signature;
 - k. For an oral prescription order, the medical practitioner's name and telephone number; and
 - l. Name or initials of the dispensing pharmacist;
2. A prescription order is kept by the pharmacist or pharmacy permittee as a record of the dispensing of a drug or device for seven years from the date the drug or device is dispensed, except for a drug or device personally administered by a medical practitioner to the medical practitioner's patient; and

3. The dispensing of a drug or device complies with the packaging requirements of the official compendium and state and federal law.

B. Prescription refills. A pharmacist shall ensure that the following information is recorded on the back of a prescription order when it is refilled:

1. Date refilled,
2. Quantity dispensed,
3. Name or approved abbreviation of the manufacturer or distributor if the prescription order is written generically or a substitution is made, and
4. The name or initials of the dispensing pharmacist.

C. A pharmacist may furnish a copy of a prescription order to the patient for whom it is prescribed or to the authorized representative of the patient if the copy is clearly marked "COPY FOR REFERENCE PURPOSES ONLY" or other similar statement. A copy of a prescription order is not a valid prescription order and a pharmacist shall not dispense a drug or device from the information on a copy.

D. Transfer of prescription order information. For a transfer of prescription order information to be valid, a pharmacy permittee or pharmacist-in-charge shall ensure that:

1. Both the original and the transferred prescription order are maintained for seven years after the last dispensing date;
2. The original prescription order information for a Schedule III, IV, or V controlled substance is transferred only as specified in 21 CFR 1306.25, published April 1, 2008, and no future amendments or editions, incorporated by reference, and on file with the Board, and available from the U.S. Government Printing Office, U.S. Superintendent of Documents, Washington, DC 20402-0001;
3. The original prescription order information for a non-controlled substance drug is transferred without limitation only up to the number of originally authorized refills; For a transfer within Arizona:
 - a. The transfer of original prescription order information for a non-controlled substance drug meets the following conditions:
 - i. The transfer of information is communicated directly between:
 - (1) Two licensed pharmacists,
 - (2) A licensed pharmacist and a licensed pharmacy or graduate intern, or
 - (3) Two licensed pharmacy or graduate interns;
 - ii. The following information is recorded by the transferring pharmacist or pharmacy or graduate intern:
 - (1) The word "void" is written on the face of the invalidated original prescription unless it is an electronic or oral transfer and the transferred prescription order information is invalidated in the transferring pharmacy's computer system; and
 - (2) The name and identification code, number, or address and telephone number of the pharmacy to which the prescription is transferred, the name of the receiving pharmacist or pharmacy or graduate intern, the date of transfer, and the name of the transferring pharmacist or pharmacy or graduate intern is written on the back of the prescription or entered into the transferring pharmacy's computer system; and

Board of Pharmacy

- iii. The following information is recorded by the receiving pharmacist or pharmacy or graduate intern on the transferred prescription order:
- (1) The word "transfer;"
 - (2) Date of issuance of the original prescription order;
 - (3) Original number of refills authorized on the original prescription order;
 - (4) Date of original dispensing;
 - (5) Number of valid refills remaining and the date of the last refill;
 - (6) Name and identification code, number, or address, telephone number, and original prescription number of the pharmacy from which the prescription is transferred;
 - (7) Name of the transferring pharmacist or pharmacy or graduate intern; and
 - (8) Name of the receiving pharmacist or pharmacy or graduate intern;
- b. The transfer of original prescription order information for a Schedule III, IV, or controlled substance meets the following conditions:
- i. The transfer of information is communicated directly between two licensed pharmacists;
 - ii. The following information is recorded by the transferring pharmacist:
 - (1) The word "void" is written on the face of the invalidated original prescription order unless it is an electronic or oral transfer and the transferred prescription order information is invalidated in the transferring pharmacy's computer system; and
 - (2) The name, address, and DEA number of the pharmacy to which the prescription is transferred, the name of the receiving pharmacist, the date of transfer, and the name of the transferring pharmacist is written on the back of the prescription order or entered into the transferring pharmacy's computer system; and
 - iii. The following information is recorded by the receiving pharmacist on the transferred prescription order:
 - (1) The word "transfer;"
 - (2) Date of issuance of original prescription order;
 - (3) Original number of refills authorized on the original prescription order;
 - (4) Date of original dispensing;
 - (5) Number of valid refills remaining and the date of the last refill;
 - (6) Name, address, DEA number, and original prescription number of the pharmacy from which the prescription is transferred;
 - (7) Name of the transferring pharmacist; and
 - (8) Name of the receiving pharmacist;
5. For a transfer from out-of-state:
- a. The transfer of original prescription order information for a non-controlled substance drug meets the conditions in subsections (D)(4)(a)(i) and (D)(4)(a)(iii); and
 - b. The transfer of original prescription order information for a Schedule III, IV, or V controlled substance meets the conditions in subsections (D)(4)(b)(i) and (D)(4)(b)(iii); and
6. For an electronic transfer, the electronic transfer of original prescription order information meets the following conditions:
- a. The electronic transfer is between pharmacies owned by the same company using a common or shared database;
 - b. The electronic transfer of original prescription order information for a non-controlled substance drug is performed by a pharmacist or a pharmacy or graduate intern, pharmacy technician trainee, or pharmacy technician under the supervision of a pharmacist;
 - c. The electronic transfer of original prescription order information for a controlled substance is performed between two licensed pharmacists;
 - d. The electronic transfer of original prescription order information for a non-controlled substance drug meets the following conditions:
 - i. The transferring pharmacy's computer system:
 - (1) Invalidates the transferred original prescription order information;
 - (2) Records the identification code, number, or address of the pharmacy to which the prescription order information is transferred;
 - (3) Records the name or identification code of the receiving pharmacist, pharmacy or graduate intern, pharmacy technician trainee, or pharmacy technician; and
 - (4) Records the date of transfer; and
 - ii. The receiving pharmacy's computer system:
 - (1) Records that a prescription transfer occurred;
 - (2) Records the date of issuance of the original prescription order;
 - (3) Records the original number of refills authorized on the original prescription order;
 - (4) Records the date of original dispensing;
 - (5) Records the number of valid refills remaining and the date of the last refill;
 - (6) Records the identification code, number, or address and original prescription number of the pharmacy from which the prescription is transferred;
 - (7) Records the name or identification code of the receiving pharmacist or pharmacy or graduate intern, pharmacy technician trainee, or pharmacy technician; and
 - (8) Records the date of transfer;
 - e. The electronic transfer of original prescription order information for a controlled substance meets the following conditions:
 - i. The transferring pharmacy's computer system:
 - (1) Invalidates the transferred original prescription order information;
 - (2) Records the identification code, number, or address, and DEA number of the pharmacy to which the prescription order information is transferred;
 - (3) Records the name or identification code of the receiving pharmacist;
 - (4) Records the date of transfer; and
 - (5) Records the name or identification code of the transferring pharmacist; and
 - ii. The electronic prescription order information received by the computer system of the receiv-

Board of Pharmacy

- ing pharmacy includes the information required in subsection (D)(4)(b)(iii); and
- f. In addition to electronic documentation of a transferred prescription order in the computer system, an original prescription order containing the requirements of this Section is filed in compliance with A.R.S. § 32-1964.
- E. Transmission of a prescription order from a medical practitioner to a pharmacy by facsimile machine.**
1. A medical practitioner or medical practitioner's agent may transmit a prescription order for a Schedule III, IV, or V controlled substance, prescription-only drug, or non-prescription drug to a pharmacy by facsimile under the following conditions:
 - a. The prescription order is faxed only to the pharmacy of the patient's choice;
 - b. The faxed prescription order:
 - i. Contains all the information required for a prescription order in A.R.S. §§ 32-1968 and 36-2525; and
 - ii. Is only faxed from the medical practitioner's practice location, except that a nurse in a hospital, long-term care facility, or inpatient hospice may send a facsimile of a prescription order for a patient of the facility; and
 - c. The faxed prescription order shall contain the following additional information:
 - i. The date the prescription order is faxed;
 - ii. The facsimile number of the prescribing medical practitioner or the facility from which the prescription order is faxed, and the telephone number of the facility; and
 - iii. The name of the person who transmits the facsimile, if other than the medical practitioner.
 2. A medical practitioner or medical practitioner's agent may fax a prescription order for a Schedule II controlled substance for information purposes only, unless the faxed prescription order meets the requirements of A.R.S. § 36-2525(F) and (G).
 3. A pharmacy may receive a faxed prescription order for a Schedule II controlled substance for information purposes only, except a faxed prescription order for a Schedule II controlled substance that meets the requirements of A.R.S. § 36-2525(F) and (G) may serve as the original written prescription order.
 4. To meet the seven-year record retention requirement of A.R.S. § 32-1964, a pharmacy shall receive a faxed prescription order on a plain paper facsimile machine, except a pharmacy that does not have a plain paper facsimile machine may make a Xerox copy of a faxed prescription order received on a non-plain paper facsimile machine.
 5. A medical practitioner or the medical practitioner's agent may fax refill authorizations to a pharmacy if the faxed authorization includes the medical practitioner's telephone number and facsimile number, the medical practitioner's signature or medical practitioner's agent's name, and date of authorization.
- F. Electronic transmission of a prescription order from a medical practitioner to a pharmacy.**
1. Unless otherwise prohibited by law, a medical practitioner or medical practitioner's agent may transmit a prescription order by electronic means, directly or through an intermediary, including an E-prescribing network, to the dispensing pharmacy as specified in A.R.S. § 32-1968.
2. For electronic transmission of a Schedule II, III, IV, or V controlled substance prescription order, the medical practitioner and pharmacy shall ensure that the transmission complies with any security or other requirements of federal law.
3. The medical practitioner and pharmacy shall ensure that all electronic transmissions comply with all the security requirements of state or federal law related to the privacy of protected health information.
4. In addition to the information required to be included on a prescription order as specified in A.R.S. § 32-1968, an electronically transmitted prescription order shall include:
 - a. The date of transmission; and
 - b. If the individual transmitting the prescription is not the medical practitioner, the name of the medical practitioner's authorized agent who transmits the prescription order.
5. A pharmacy receiving an electronically transmitted prescription order shall maintain the prescription order as specified in A.R.S. § 32-1964.
6. A medical practitioner or medical practitioner's agent shall transmit an electronic prescription order only to the pharmacy of the patient's choice.

Historical Note

Adopted effective November 18, 1983 (Supp. 83-6). Amended by final rulemaking at 8 A.A.R. 1256, effective March 7, 2002 (Supp. 02-1). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 13 A.A.R. 440, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 3605, effective November 8, 2008 (Supp. 08-3).

R4-23-407.1. Dispensing an Opioid Antagonist

- A. As used in this Section:**
1. "Community member" means any person in position to assist an individual at risk of experiencing an opioid-related overdose. This includes emergency first responders, peace officers or other law enforcement personnel, fire department personnel, school district employees, and personnel of a facility or center that provides services to individuals at risk of experiencing an opioid-related overdose.
 2. "Opioid antagonist" means any drug approved by the U.S. Food and Drug Administration that binds to opioid receptors, effectively blocking or inhibiting the receptor and preventing the body from responding to the opioid. Naloxone hydrochloride is an opioid antagonist.
 3. "Opioid-related overdose" means an acute condition caused by excessive opioids. An opioid-related overdose can be identified by a triad of symptoms: decreased level of consciousness, pinpoint pupils, and respiratory depression. Other symptoms may include seizures, muscle spasms, and coma or death. An opioid-related overdose requires medical assistance.
- B. Before allowing an opioid antagonist to be dispensed under A.R.S. § 32-1979, a pharmacy permit holder shall have written policies and procedures regarding:**
1. Documentation of opioid antagonists dispensed under A.R.S. § 32-1979. The documentation shall:
 - a. Be maintained in a manner consistent with R4-23-407(A)(2);
 - b. Include the information required under R4-23-407(A)(1)(c), (d), (f), and (l); and
 - c. Include the following:

Board of Pharmacy

- i. Quantity dispensed;
 - ii. Directions for use; and
 - iii. The patient's name, address, telephone number, and birth date; or
 - iv. Name, address, telephone number, and birth date of a family member in position to assist the individual at risk of an opioid-related overdose; or
 - v. Name, address, telephone number, and employer of a community member in position to assist an individual at risk of an opioid-related overdose; and
 - vi. Name of the individual providing the education required under subsection (B)(2);
2. Education to be provided to the individual to whom the opioid antagonist is dispensed. The education shall include:
- a. How to prevent an opioid-related overdose;
 - b. How to recognize an opioid-related overdose;
 - c. How to administer an opioid antagonist safely to an individual experiencing an opioid-related overdose;
 - d. Precautions regarding:
 - i. Potential side effects, and
 - ii. Possible adverse events associated with administration of the opioid antagonist; and
 - e. Importance of seeking emergency medical assistance for the individual experiencing an opioid-related overdose before or after administering the opioid antagonist; and
3. Confidentiality, security, and privileged nature of documentation of opioid antagonists dispensed under A.R.S. § 32-1979.
- C. Before dispensing an opioid antagonist under A.R.S. § 32-1979(A), a licensed pharmacist shall:
1. Complete an opioid prevention and treatment training program that includes the following information:
 - a. How to recognize the symptoms of an opioid-related overdose,
 - b. How to respond to a suspected opioid-related overdose,
 - c. How to administer all preparations of an opioid antagonist, and
 - d. The information needed by an individual to whom an opioid antagonist is dispensed, and
 2. Comply fully with the policies and procedures developed under subsection (B).
- D. A pharmacist who has completed an opioid prevention and treatment training program described in subsection (C):
1. May administer an opioid antagonist to an individual the pharmacist believes is experiencing an opioid-related overdose, and
 2. Is exempt from civil liability under the terms of A.R.S. § 36-2267(B).
- E. Dispensing an opioid antagonist under A.R.S. § 32-1979 by invoice to a community member is not wholesale distribution as defined at A.R.S. § 32-1981.

Historical Note

New Section made by emergency rulemaking at 23 A.A.R. 31, effective December 15, 2016 for 180 days (Supp. 16-4). New Section made by final rulemaking before emergency expired at 23 A.A.R. 967, effective June 3, 2017 (Supp. 17-2).

R4-23-408. Computer Records

- A. Systems manual. A pharmacy permittee or pharmacist-in-charge shall:

- 1. Develop, implement, and comply with policies and procedures for the following operational aspects of a computer system:
 - a. Examples of all output documentation provided by the computer system that contains original or refill prescription order or patient profile information;
 - b. Steps a pharmacy employee follows when the computer system is not operational due to scheduled or unscheduled system interruption;
 - c. Regular and routine backup file procedure and file maintenance, including secure storage of backup files;
 - d. Audit procedures, personnel code assignments, and personnel responsibilities; and
 - e. Quality assurance mechanism for data entry validation;
 - 2. Review biennially and, if necessary, revise the policies and procedures required under this Section;
 - 3. Document the review required under subsection (A)(2);
 - 4. Assemble the policies and procedures as a written manual or by another method approved by the Board or its designee; and
 - 5. Make the policies and procedures available within the pharmacy for reference by pharmacy personnel and inspection by the Board or its designee.
- B. Computer system data storage and retrieval. A pharmacy permittee or pharmacist-in-charge shall ensure that the computer system is capable of:
1. Producing sight-readable information on all original and refill prescription orders and patient profiles;
 2. Providing online retrieval (via CRT display or hard-copy printout) of original prescription order information required in A.R.S. § 32-1968(C), R4-23-402(A), and R4-23-407(A);
 3. Providing online retrieval (via CRT display or hard-copy printout) of patient profile information required in R4-23-402(A);
 4. Providing documentation identifying the pharmacist responsible for dispensing each original or refill prescription order, except a pharmacy permittee with a computer system that is in use before the effective date of this Section that cannot provide documentation identifying the dispensing pharmacist may continue to use the computer system by providing manual documentation identifying the dispensing pharmacist;
 5. Producing a printout of all prescription order information, including a single-drug usage report that contains:
 - a. The name of the prescribing medical practitioner;
 - b. The name and address of the patient;
 - c. The quantity dispensed on each original or refill prescription order;
 - d. The date of dispensing for each original or refill prescription order;
 - e. The name or identification code of the dispensing pharmacist; and
 - f. The serial number of each prescription order; and
 6. Providing a printout of requested prescription order information to an individual pharmacy within 72 hours of the request if prescription order information is maintained in a centralized computer record system.
- C. A pharmacy permittee or pharmacist-in-charge of a pharmacy that uses a pharmacy computer system:
1. Shall notify the D.E.A. and the Board in writing that original and refill prescription information and patient profiles are stored in a pharmacy computer system;

Board of Pharmacy

2. Shall comply with this Section if the pharmacy computer system's refill records are used as an alternative to the manual refill records required in R4-23-407(B);
3. Is exempt from the manual refill recordkeeping requirements of R4-23-407(B), if the pharmacy computer system complies with the requirements of this Section; and
4. Shall ensure that documentation of the accuracy of original and refill information entered into a computer system is provided by each pharmacist using the computer system and kept on file in the pharmacy for seven years from the date of the last refill. Documentation includes one of the following:
- a. A hard-copy printout of each day's original and refill data that:
 - i. States original and refill data for prescriptions dispensed by each pharmacist is reviewed for accuracy;
 - ii. Includes the printed name of each dispensing pharmacist; and
 - iii. Is signed and initialed by each dispensing pharmacist; or
 - b. A log book or separate file of daily statements that:
 - i. States original and refill data for prescriptions dispensed by each pharmacist is reviewed for accuracy;
 - ii. Includes the printed name of each dispensing pharmacist; and
 - iii. Is signed and initialed by each dispensing pharmacist.
- D. If a pharmacy computer system does not comply with the requirements of subsections (A), (B), and (F), the pharmacy permittee or pharmacist-in-charge shall bring the computer system into compliance within three months of a notice of noncompliance or violation letter. If the computer system is still noncompliant with subsection (A), (B), or (F) after three months, the pharmacy permittee or pharmacist-in-charge shall immediately comply with the manual recordkeeping requirements of R4-23-402 and R4-23-407.
- E. If a pharmacy's personnel perform manual recordkeeping under subsection (D), the pharmacy's personnel shall continue manual recordkeeping until the pharmacist-in-charge sends proof, verified by a Board compliance officer, that the computer system complies with subsections (A), (B), and (F).
- F. Security. To maintain the confidentiality of patient records, a pharmacy permittee or pharmacist-in-charge shall ensure that:
1. The computer system has security and systems safeguards designed to prevent and detect unauthorized access, modification, or manipulation of prescription order information and patient profiles; and
 2. After a prescription order is dispensed, any alteration of prescription order information is documented, including the identification of the pharmacist responsible for the alteration.
- G. A computer system that does not comply with all the requirements of subsections (A), (B), and (F) may be used in a pharmacy if:
1. The computer system was in use in the pharmacy before July 11, 2001, and
 2. The pharmacy complies with the manual recordkeeping requirements of R4-23-402 and R4-23-407.
- H. Prescription records and retention.
1. Instead of filing the original hard-copy prescription as required in A.R.S. § 32-1964, a pharmacy permittee or pharmacist-in-charge may use an electronic imaging recordkeeping system, if:
 - a. The system is capable of capturing, storing, and reproducing the exact image of a prescription, including the reverse side of the prescription if necessary;
 - b. Any notes of clarification of and alterations to a prescription are directly associated with the electronic image of the prescription;
 - c. The prescription image and any associated notes of clarification to or alterations to a prescription are retained for a period not less than seven years from the date the prescription is last dispensed;
 - d. The original hard-copy prescription is maintained for no less than 30 days after the date dispensed;
 - e. Policies and procedures for the use of an electronic imaging recordkeeping system are developed, implemented, reviewed, and revised in the same manner described in subsection (A) and complied with; and
 - f. The prescription is not for a schedule II controlled substance.
2. If a pharmacy's computer system fields are automatically populated by an electronically transmitted prescription order, the automated record constitutes the original prescription and a hard-copy or electronic image is not required if the computer system is capable of maintaining, printing, and providing all the prescription information required in A.R.S. §§ 32-1968 and 36-2525 and R4-23-407(A) within 72 hours of a request by the Board, the Board's compliance officers, other authorized regulatory board agents, or authorized officers of the law.

Historical Note

Adopted effective November 18, 1983 (Supp. 83-6).

Amended by final rulemaking at 7 A.A.R. 646, effective

January 11, 2001 (Supp. 01-1). Amended by final rulemaking at 9 A.A.R. 5030, effective January 3, 2004 (Supp. 03-4). Amended by final rulemaking at 11 A.A.R. 4270, effective December 6, 2005 (Supp. 05-4).

Amended by final rulemaking at 12 A.A.R. 274, effective March 11, 2006 (Supp. 06-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 13 A.A.R. 440, effective April 7, 2007 (Supp. 07-1).

R4-23-409. Returning Drugs and Devices

- A. After a person for whom a drug is prescribed or the person's agent takes the drug from the premises where sold, distributed, or dispensed, a pharmacist or pharmacy permittee shall not accept the drug for return or exchange for the purpose of resale unless the pharmacist determines that:
1. The drug is in its original, manufacturer's, unopened container; and
 2. The drug or its container has not been subjected to contamination or deterioration.
- B. The provisions of subsection (A) of this Section do not apply to a drug dispensed to:
1. A hospital inpatient as defined in R4-23-651; or
 2. A resident of a long-term care facility where a licensed health care professional administers the drug, and the pharmacist ensures and documents that the drug:
 - a. Has been stored in compliance with the requirements of the official compendium; and
 - b. Is not obviously contaminated or deteriorated.
- C. After a person for whom a device is prescribed or the person's agent takes the device from the premises where sold, distributed, or dispensed, a pharmacist or pharmacy permittee shall

Board of Pharmacy

not accept the device for return or exchange for the purpose of resale or reuse unless the pharmacist determines that:

1. The device is inspected and is free of defects;
2. The device is rendered incapable of transferring disease; and
3. The device, if resold or reused, is not claimed to be new or unused.

Historical Note

Adopted effective November 18, 1983 (Supp. 83-6). Amended by final rulemaking at 8 A.A.R. 1256, effective March 7, 2002 (Supp. 02-1).

R4-23-410. Current Good Compounding Practices

- A. This Section establishes the current good compounding practices to be used by a pharmacist licensed by the Board, in a pharmacy permitted by the Board, and in compliance with applicable federal and state law governing the practice of pharmacy.
- B. A pharmacy permittee shall ensure compliance with the provisions in this subsection.
 1. All substances for compounding that are received, stored, or used by the pharmacy permittee:
 - a. Meet official compendium requirements;
 - b. Are of high quality, such as Chemically Pure (CP), Analytical Reagent (AR), certified American Chemical Society (ACS), or Food Chemical Codex (FCC) grade; or
 - c. Are obtained from a source that, in the professional judgment of the pharmacist, is acceptable and reliable.
 2. Before compounding a pharmaceutical product in excess of the quantity dispensed in anticipation of receiving valid prescriptions for the pharmaceutical product, a pharmacist, employed by the pharmacy permittee, shall establish a history of compounding valid prescriptions for the pharmaceutical product.
 3. Neither the pharmacy permittee nor a pharmacist employed by the pharmacy permittee provides a compounded pharmaceutical product to a pharmacy, medical practitioner, or other person for dispensing or distributing except that a compounded pharmaceutical product may be provided to a medical practitioner to administer to a patient of the medical practitioner if each container is accompanied by the written list required in subsection (I)(5) and has a label that includes the following:
 - a. The pharmacy's name, address, and telephone number;
 - b. The pharmaceutical product's name and the information required in subsection (I)(4);
 - c. A lot or control number;
 - d. A beyond-use-date based upon the pharmacist's professional judgment, but not more than the maximum guidelines recommended in the Pharmacy Compounding Practices chapter of the official compendium unless there is published or unpublished stability test data that shows a longer period is appropriate;
 - e. The statement "Not For Dispensing;" and
 - f. The statement "For Office or Hospital Administration Only."
 4. A pharmacy or pharmacist may advertise or otherwise promote the fact that the pharmacy or pharmacist provides prescription compounding services.
- C. A pharmacy permittee shall ensure compliance with the organization, training, and personnel issues in this subsection.

1. Before dispensing a compounded pharmaceutical product, a pharmacist:

- a. Inspects and approves or rejects, or assumes responsibility for inspecting and approving or rejecting, components, pharmaceutical product containers and closures, in-process materials, and labeling;
 - b. Prepares or assumes responsibility for preparing all compounding records;
 - c. Reviews all compounding records to ensure that no errors occur in the compounding process;
 - d. Ensures the proper use, cleanliness, and maintenance of all compounding equipment; and
 - e. Documents by hand-written initials or signature in the compounding record the completion of the requirements of subsections (C)(1)(a), (b), (c), and (d).
2. A pharmacist engaged in compounding:
 - a. Complies with the current good compounding practices and applicable state pharmacy laws;
 - b. Maintains compounding proficiency through current awareness, training, and continuing education; and
 - c. Ensures that personnel engaged in compounding wear:
 - i. Clean clothing appropriate to the work performed; and
 - ii. Protective apparel, such as coats, aprons, gowns, gloves or masks to protect the personnel from chemical exposure and prevent pharmaceutical product contamination.

- D. A pharmacy permittee shall ensure the security, safety, and quality of a compounded pharmaceutical product by conforming with the following standards:

1. Implement procedures to exclude from direct contact with components, pharmaceutical product containers and closures, in-process materials, labeling, and pharmaceutical products, any person with an apparent illness or open lesion that may adversely affect the safety or quality of a compounded pharmaceutical product, until the illness or lesion, as determined by competent medical personnel, does not jeopardize the safety or quality of a compounded pharmaceutical product; and
2. Require all personnel to inform a pharmacist of any health condition that may adversely affect a compounded pharmaceutical product.

- E. A pharmacy permittee shall provide compounding facilities that conform with the standards in this subsection.

1. In addition to the minimum area requirements of R4-23-609, R4-23-655, or R4-23-673, the compounding area:
 - a. Complies with the requirements in R4-23-611; and
 - b. Has sufficient space to permit efficient pharmacy practice, free movement of personnel, and visual surveillance by a pharmacist.
2. If sterile pharmaceutical product or radiopharmaceutical product compounding is performed, the compounding area complies with the requirements of R4-23-670, R4-23-681, and R4-23-682.
3. A clean, dry, and temperature-controlled area and, if required, a refrigerated area, in which to store properly labeled containers of bulk drugs, chemicals, and materials used in compounding, that complies with state statutes and rules.

- F. To protect pharmaceutical product safety, identity, strength, quality, and purity, a pharmacy permittee shall ensure that equipment and utensils used in pharmaceutical product compounding are:

Board of Pharmacy

1. Of appropriate design, adequate size, and suitably located for proper operation, cleaning, and maintenance;
 2. Made of material that is not reactive, additive, or absorptive when exposed to components, in-process materials, or pharmaceutical products;
 3. Cleaned and protected from contamination before use;
 4. Inspected and determined suitable for use before initiation of compounding operations; and
 5. Routinely inspected, calibrated, or checked to make proper performance certain.
- G.** A pharmacy permittee shall ensure that the pharmacist-in-charge establishes, implements, and complies with procedures to prevent cross-contamination when pharmaceutical products that require special precautions to prevent cross-contamination, such as penicillin, are used in a compounding procedure. The procedures shall include either the dedication of equipment or the meticulous cleaning of contaminated equipment before its use in compounding other pharmaceutical products.
- H.** A pharmacy permittee shall ensure that the pharmacist-in-charge establishes, implements, and complies with control procedures for components and pharmaceutical product containers and closures, either written or electronically stored with printable documentation, that conform with the standards in this subsection.
1. Components and pharmaceutical product containers and closures are:
 - a. Stored off the floor,
 - b. Handled and stored to prevent contamination, and
 - c. Rotated so the oldest approved stock is used first.
 2. Container closure systems comply with official compendium standards.
 3. Pharmaceutical product containers and closures are clean and made of material that is not reactive, additive, or absorptive.
- I.** A pharmacy permittee shall ensure that the pharmacist-in-charge establishes, implements, and complies with pharmaceutical product compounding controls that conform with the standards in this subsection.
1. Pharmaceutical product compounding procedures are available in either written form or electronically stored with printable documentation:
 - a. To ensure that a finished pharmaceutical product has the identity, strength, quality, and purity it is purported or represented to possess, the procedures include, for each pharmaceutical product compounded, a description of:
 - i. The components, their manufacturer, lot number, expiration date, and amounts, the order of component addition, if applicable, and the compounding process;
 - ii. The equipment and utensils used; and
 - iii. The pharmaceutical product container and closure system proper for the sterility and stability of the pharmaceutical product as it is intended to be used.
 - b. To test the pharmaceutical product being compounded, the procedures monitor the output and validate the performance of compounding processes that may cause variability in the final pharmaceutical product, including assessing:
 - i. Dosage form weight variation;
 - ii. Adequacy of mixing to ensure uniformity and homogeneity; and
 - iii. Clarity, completeness, and pH of solutions, if applicable.
2. Components for pharmaceutical product compounding are accurately weighed, measured, or subdivided. To ensure that each weight, measure, or subdivision is correct as stated in the compounding procedures, a pharmacist:
 - a. Checks and rechecks, or assumes responsibility for checking and re-checking, the operations at each stage of the compounding process; and
 - b. Documents by hand-written initials or signature the completion and accuracy of the compounding process.
 3. Compounding equipment and utensils are properly cleaned and maintained.
 4. In addition to the labeling requirements of A.R.S. § 32-1968(D), the label contains:
 - a. A statement, symbol, designation, or abbreviation that the pharmaceutical product is a compounded pharmaceutical product, and
 - b. A beyond-use-date as specified in subsection (B)(3)(d).
 5. A written list of the compounded pharmaceutical product's active ingredients is given to the patient at the time of dispensing.
 6. When a component is removed from its original container and transferred to another container, the new container label contains, in full text or an abbreviated code system, the following:
 - a. The component name,
 - b. The manufacturer's or supplier's name,
 - c. The lot or control number,
 - d. The weight or measure,
 - e. The beyond-use-date as specified in subsection (B)(3)(d), and
 - f. The transfer date.
- J.** A pharmacy permittee shall ensure that the pharmacist-in-charge stores any quantity of compounded pharmaceutical product produced in excess of the quantity dispensed in accordance with subsection (B):
1. In an appropriate container with a label that contains:
 - a. A complete list of components or the pharmaceutical product's name;
 - b. The preparation date;
 - c. The assigned lot or control number; and
 - d. A beyond-use-date as specified in subsection (B)(3)(d); and
 2. Under conditions, dictated by the pharmaceutical product's composition and stability characteristics, that ensure its strength, quality, and purity.
- K.** A pharmacy permittee shall ensure that the pharmacist-in-charge establishes, implements, and complies with record-keeping procedures that comply with this subsection:
1. Pharmaceutical product compounding procedures and other records required by this Section are maintained by the pharmacy for not less than seven years, and
 2. Pharmaceutical product compounding procedures and other records required by this Section are readily available for inspection by the Board or its designee.

Historical Note

Adopted effective August 5, 1997 (Supp. 97-3). Amended by final rulemaking at 10 A.A.R. 3391, effective October 2, 2004 (Supp. 04-3). Amended by final rulemaking at 12 A.A.R. 3981, effective December 4, 2006 (Supp. 06-4).

R4-23-411. Pharmacist-administered or Pharmacy or Graduate Intern-administered Immunizations

Board of Pharmacy

- A.** Certification to administer immunizations, vaccines, and emergency medications, as defined at A.R.S. § 32-1974(N), to an eligible adult patient or eligible minor patient. As used in this Section, “eligible adult patient” means an eligible patient 13 years of age or older and “eligible minor patient” means an eligible patient at least three years of age but less than 13 years of age. A pharmacist or a pharmacy or graduate intern in the presence of and under the immediate personal supervision of a pharmacist, may administer, without a prescription, immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient, if:
1. Both the pharmacist and pharmacy or graduate intern meet the qualifications and standards specified by A.R.S. § 32-1974 and this Section;
 2. The Board certifies both the pharmacist and pharmacy or graduate intern as specified in subsection (D);
 3. For an eligible adult patient, the immunization or vaccine is:
 - a. Recommended for adults by the United States Centers for Disease Control and Prevention; or
 - b. Recommended by the United States Centers for Disease Control and Prevention’s Health Information for International Travel;
 4. For an eligible adult patient, the immunization or vaccine is not on the Arizona Department of Health Services list specified in A.A.C. R9-6-1301 as required under A.R.S. § 32-1974(I);
 5. For an eligible minor patient, the immunization or vaccine is for influenza or a booster dose as described under A.R.S. § 32-1974(B)(2); and
 6. For an eligible minor patient, any immunizations or vaccines other than influenza or a booster dose as described under A.R.S. § 32-1974(B)(2) are administered in response to a public health emergency declared by the Governor under A.R.S. § 36-787.
- B.** A pharmacist or a pharmacy or graduate intern in the presence of and under the immediate personal supervision of a pharmacist, may administer, with a prescription, any immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient, if:
1. Both the pharmacist and pharmacy or graduate intern meet the qualifications and standards specified by A.R.S. § 32-1974 and this Section; and
 2. The Board certifies both the pharmacist and pharmacy or graduate intern as specified in subsection (D).
- C.** A pharmacist or pharmacy or graduate intern who is certified to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient shall:
1. Not delegate the authority to any other pharmacist, pharmacy or graduate intern, or employee; and
 2. Maintain their current certificate for inspection by the Board or its designee or review by the public.
- D.** Qualifications for certification to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient. After receipt of a completed application form, the Board shall issue a certificate authorizing the administration of immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient to a pharmacist or pharmacy or graduate intern who meets the following qualifications:
1. Has a current license to practice pharmacy in this state,
 2. Successfully completes a training program specified in subsection (E), and
 3. Has a current certificate in basic cardiopulmonary resuscitation.
- E.** Immunizations training program requirements. A training program for pharmacists or pharmacy or graduate interns to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient shall include the following courses of study:
1. Basic immunology and the human immune response;
 2. Mechanics of immunity, adverse effects, dose, and administration schedule of available vaccines;
 3. Response to an emergency situation as a result of the administration of an immunization, vaccine, or medication including administering an emergency medication to counteract the adverse effects of the immunization, vaccine, or medication given;
 4. Administration of intramuscular injections;
 5. Other immunization administration methods; and
 6. Recordkeeping and reporting requirements specified in subsection (F).
- F.** Recordkeeping and reporting requirements.
1. A pharmacist or pharmacy or graduate intern certified under this Section to administer immunizations, vaccines, and emergency medications to an eligible patient shall provide to the pharmacy the following information and documentation regarding each immunization, vaccine, or emergency medication administered:
 - a. The name, address, and date of birth of the patient;
 - b. The date of administration and site of injection;
 - c. The name, dose, manufacturer’s lot number, and expiration date of the vaccine, immunization, or emergency medication;
 - d. The name and address of the patient’s identified primary-care provider or physician;
 - e. The name of the pharmacist or pharmacy or graduate intern administering the immunization, vaccine, or emergency medication;
 - f. A record of the pharmacist’s or pharmacy or graduate intern’s consultation with the patient determining that the patient is an eligible patient as defined in R4-23-110;
 - g. The date and time that the written report specified in subsection (F)(2) was sent to the patient’s primary-care provider or physician;
 - h. Consultation or other professional information provided to the patient by the pharmacist or pharmacy or graduate intern;
 - i. The name and date of the immunization or vaccine information sheet provided to the patient; and
 - j. For an immunization or vaccine given to an eligible minor patient, a consent form signed by the minor’s parent or guardian.
 2. The pharmacist or pharmacy or graduate intern shall provide a written report to the patient’s primary-care provider or physician containing the documentation required in subsection (F)(1)(a) through (d) within 48 hours after the immunization or vaccination. The pharmacy shall make the required records specified in subsection (F)(1) and a record of compliance with this subsection available in the pharmacy for inspection by the Board or its designee.
 3. A pharmacy’s pharmacist-in-charge shall maintain the records required in subsection (F)(1) in the pharmacy for a minimum of seven years from the administration date.

G. Confidentiality of records. A pharmacist, pharmacy or graduate intern, pharmacy permittee, or pharmacist-in-charge shall comply with applicable state and federal privacy statutes and rules when releasing patient health information.

- H.** Renewal of a certificate for pharmacist-administered immunizations. A certificate authorizing a pharmacist to administer immunizations, vaccines, and emergency medications to an eligible adult patient or eligible minor patient expires after five years. A pharmacist who wishes to continue administering immunizations, vaccines, and emergency medications shall renew the certification by submitting a renewal request to the Board within the 30 days before the certificate's expiration date and provide to the Board proof of the following:

1. Current certification in basic cardiopulmonary resuscitation, and
2. Completion of a minimum of five contact hours (0.5 CEU) of continuing education related to immunizations during the five-year renewal period. A pharmacist may use the continuing education hours required in this subsection as part of the total continuing education hours required for pharmacist license renewal.

- I.** Pharmacist-administered or pharmacy or graduate intern-administered adult immunizations that require a prescription order. A pharmacist or pharmacy or graduate intern certified by the Board to administer adult immunizations or vaccines shall not administer any immunization or vaccine listed in A.A.C. R9-6-1301 without a prescription order. In addition to filing a prescription order as required in A.R.S. § 32-1964, a pharmacist or pharmacy or graduate intern who administers an immunization or vaccine listed in A.A.C. R9-6-1301 shall comply with the recordkeeping requirements of subsection (F)(1).

Historical Note

New Section made by final rulemaking at 10 A.A.R. 3967, effective November 13, 2004 (Supp. 04-3).

Amended by final rulemaking at 12 A.A.R. 279, effective March 11, 2006 (Supp. 06-1). Amended by final rulemaking at 14 A.A.R. 3674, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 15 A.A.R. 1930, effective November 3, 2009 (Supp. 09-4).

Amended by final rulemaking at 17 A.A.R. 2596, effective February 4, 2012 (Supp. 11-4). Amended by final rulemaking at 23 A.A.R. 211, effective March 5, 2017 (Supp. 17-1).

R4-23-412. Emergency Refill Prescription Dispensing

- A.** When a state of emergency is declared under A.R.S. § 32-1910(A) or (B) and the state of emergency results in individuals being unable to refill existing prescriptions, a pharmacist may work in the affected county, city, or town and may dispense a one-time emergency refill prescription of up to a 30-day supply of a prescribed medication to an affected individual if both of the following apply:
1. In the pharmacist's professional opinion the medication is essential to the maintenance of life or to the continuation of therapy, and
 2. The pharmacist makes a good faith effort to reduce the information to a written prescription marked "emergency prescription" and files and maintains the prescription as required by law.
- B.** If the state of emergency declared under A.R.S. § 32-1910(A) or (B) continues for at least 21-days after the pharmacist dispenses an emergency prescription under subsection (A), the pharmacist may dispense one additional emergency refill prescription of up to a 30-day supply of the prescribed medication if the pharmacist complies with subsection (A)(2).
- C.** A pharmacist's authority to dispense emergency prescriptions under this Section ends when the declared state of emergency is terminated.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4400, effective January 3, 2009 (Supp. 08-4).

R4-23-413. Temporary Recognition of Nonresident Licensure

- A.** When a state of emergency is declared under A.R.S. § 32-1910(A) or (B):
1. A pharmacist who is not licensed in this state, but who is currently licensed in another state, may dispense prescription medications in those affected counties, cities, or towns in this state during the time that a declared state of emergency exists under A.R.S. § 32-1910(A) or (B) if both of the following apply:
 - a. The pharmacist provides proof of current licensure in another state, and
 - b. The pharmacist is engaged in a relief effort during a state of emergency.
 2. Acting under the direct supervision of a pharmacist, a pharmacy technician or pharmacy intern not licensed in this state, but currently licensed or registered in another state, may assist a pharmacist in dispensing prescription medications in affected counties, cities, or towns in this state during the time that a declared state of emergency exists under A.R.S. § 32-1910(A) or (B) if both of the following apply:
 - a. The pharmacy technician or pharmacy intern provides proof of current licensure or registration in another state, and
 - b. The pharmacy technician or pharmacy intern is engaged in a relief effort during a state of emergency.
- B.** The recognition of nonresident licensure or registration shall end with the termination of the declared state of emergency.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4400, effective January 3, 2009 (Supp. 08-4).

R4-23-414. Reserved

R4-23-415. Impaired Licensees – Treatment and Rehabilitation

- A.** The Board may contract with qualified organizations to operate a program for the treatment and rehabilitation of licensees impaired as the result of alcohol or other drug abuse, pursuant to A.R.S. § 32-1932.01.
- B.** Participants in the program are either "confidential" or "known." Confidential participants are self-referred and may remain unidentified to the Board, subject to maintaining compliance with their program contract. Known participants are under Board order to complete a minimum tenure in the program. After a known participant completes the minimum tenure, the Board may terminate the Board order and reinstate the participant's license to practice pharmacy.
- C.** The program contract with a qualified organization shall include as a minimum the following:
1. Duties and responsibilities of each party.
 2. Duration, not to exceed two years, of contract and terms of compensation.
 3. Quarterly reports from the program administrator to the Board indicating:
 - a. Identity of participants;
 - i. By name, if a known participant; or
 - ii. By case number, if a confidential participant;
 - b. Status of each participant, including;
 - i. Clinical findings;
 - ii. Diagnosis and treatment recommendations;
 - iii. Program activities; and

Board of Pharmacy

- iv. General recovery and rehabilitation program information.
- 4. The program administrator shall report immediately to the Board the name of any impaired licensee who poses a danger to self or others.
- 5. The program administrator shall report to the Board, as soon as possible, the name of any impaired licensee:
 - a. Who refuses to submit to treatment,
 - b. Whose impairment is not substantially alleviated through treatment, or
 - c. Who violates the terms of their contract.
- 6. The program administrator shall periodically provide informational programs to the profession, including approved continuing education programs on the topic of drug and chemical impairment, treatment, and rehabilitation.
- D.** Under A.R.S. § 32-1903(F), the Board may publish the names of participants under current Board orders.
- E.** The Board or its executive director may request the treatment records for any participant. The program administrator shall provide treatment records within 10 working days of receiving a written request from the Board or its executive director for such records. Upon request of the program administrator or the Board or its executive director, a program participant shall authorize a drug and alcohol treatment facility or program or a private practitioner or treatment program to release the participant's records to the program administrator or the Board or its executive director.
- F.** On the recommendation of the program administrator or a Board member and by mutual consent, the program administrator, Board member, Board staff, and program participant may meet informally to discuss program compliance.

Article 5, consisting of Sections R4-23-501 and R4-23-502, recodified to Article 8 at 9 A.A.R. 4011, effective August 18, 2003 (Supp. 03-3).

New Article 5, consisting of Sections R4-23-501 through R4-23-505, made by final rulemaking at 14 A.A.R. 3410, effective October 4, 2008 (Supp. 08-3).

R4-23-501. Controlled Substances Prescription Monitoring (CSPMP) Program Registration and Database Access

- A. Under A.R.S. § 36-2606, a medical practitioner who is issued a license under A.R.S. Title 32, Chapter 7, 11, 13, 14, 15, 16, 17, 21, 25, or 29 and possesses a current DEA registration under the Federal Controlled Substances Act shall have a current CSPMP registration issued by the Board.
- B. Application.
 1. An applicant for CSPMP registration shall:

Board of Pharmacy

- a. Submit a completed application for CSPMP registration electronically or manually on a form furnished by the Board, and
- b. Submit with the application form the documents specified in the application form.
- 2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
- C. Registration. Within seven business days of receipt of a completed application specified in subsection (B), the Board office shall determine whether an application is complete. If the application is complete, the Board office shall issue a registration number and provide a current registration certificate to the applicant by mail or electronic transmission. If the application is incomplete, the Board office shall issue a written notice of incompleteness. An applicant with an incomplete application shall comply with the requirements of R4-23-202(F).
- D. Registration renewal. As specified in A.R.S. § 36-2606(C), the Board shall automatically suspend the registration of any registrant that fails to renew the registration on or before May 1 of the year in which the renewal is due. The Board shall vacate a suspension if the registrant submits a renewal application. A suspended registrant with CSPMP database access credentials is prohibited from accessing information in the prescription monitoring program database.
- E. CSPMP database access.
 - 1. A medical practitioner that chooses to use the CSPMP database shall request access from the CSPMP Director by completing an access user registration form electronically. Upon receipt of the access user registration form, the CSPMP Director or designee shall issue access credentials provided the medical practitioner is in compliance with the registration requirements of this Section.
 - 2. A pharmacist that chooses to use the CSPMP database shall request access from the CSPMP Director by completing an access user registration form electronically. Upon receipt of the access user registration form, the CSPMP Director or designee shall issue access credentials provided the pharmacist has a current active pharmacist license.
 - 3. A medical practitioner or pharmacist who is not licensed in Arizona may request access from the CSPMP Director by:
 - a. Completing an access user registration form electronically;
 - b. Printing the access user registration form;
 - c. Having the access user registration form signed and notarized; and
 - d. Mailing the notarized access user form along with a current copy of the applicant's nonresident state license and driver's license. Upon receipt of the notarized access user registration form and other required documents, the CSPMP Director or designee shall issue access credentials provided the nonresident licensed medical practitioner or pharmacist credentials show an current active license in another state.

Historical Note

Former Rule 5.2110; Amended effective August 9, 1983 (Supp. 83-4). Amended by final rulemaking at 8 A.A.R. 4898, effective January 5, 2003 (Supp. 02-4). Recodified to R4-23-801 at 9 A.A.R. 4011, effective August 18, 2003 (Supp. 03-3). New Section made by final rulemaking at 14 A.A.R. 3410, effective October 4, 2008 (Supp. 08-3). Amended by final rulemaking at 19 A.A.R. 94, effective March 10, 2013 (Supp. 13-1). Section expired

under A.R.S. § 41-1056(J) at 20 A.A.R. 133, effective August 30, 2013 (Supp. 14-1). New Section made by final rulemaking at 20 A.A.R. 1359, effective August 2, 2014 (Supp. 14-2).

R4-23-502. Requirements for Data Format and Transmission

- A. Each dispenser shall submit to the Board or its designee by electronic means information regarding each prescription dispensed for a controlled substance listed in Schedules II, III, and IV of A.R.S. Title 36, Chapter 27, the Arizona Uniform Controlled Substances Act. The information reported shall conform to the August 31, 2005 Version 003, Release 000 ASAP Rules-based Standard Implementation Guide for Prescription Monitoring Programs published by the American Society for Automation in Pharmacy as specified in A.R.S. § 36-2608(B). The information submitted for each prescription shall include:
 - 1. The name, address, telephone number, prescription number, and DEA registration number of the dispenser;
 - 2. The name, address, gender, date of birth, and telephone number of the person or, if for an animal, the owner of the animal for whom the prescription is written;
 - 3. The name, address, telephone number, and DEA registration number of the prescribing medical practitioner;
 - 4. The quantity and National Drug Code (NDC) number of the Schedule II, III, or IV controlled substance dispensed;
 - 5. The date the prescription was dispensed;
 - 6. The number of refills, if any, authorized by the medical practitioner;
 - 7. The date the prescription was issued;
 - 8. The method of payment identified as cash or third party; and
 - 9. Whether the prescription is new or a refill.
- B. A dispenser shall submit the required information electronically unless the Board or its designee approves a waiver as specified in subsection (D).
- C. A dispenser's electronic data transfer equipment including hardware, software, and internet connections shall meet the privacy and security standards of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, as amended, and A.R.S. § 12-2292, in addition to common internet industry standards for privacy and security. A dispenser shall ensure that each electronic transmission meets the following data protection requirements:
 - 1. Data shall be at least 128-bit encryption in transmission and at rest; and
 - 2. Data shall be transmitted via secure e-mail, telephone modem, diskette, CD-ROM, tape, secure File Transfer Protocol(FTP), Virtual Private Network (VPN), or other Board-approved media.
- D. A dispenser who does not have an automated recordkeeping system capable of producing an electronic report in the Board established format may request a waiver from electronic reporting by submitting a written request to the Board or its designee. The Board or its designee shall grant the request if the dispenser agrees in writing to report the data by submitting a completed universal claim form supplied by the Board or its designee.
- E. Unless otherwise approved by the Board, a dispenser shall report by the close of business on each Friday the required information for the previous week, Sunday through Saturday. If a Friday falls on a state holiday, the dispenser shall report the information on the following business day. The Board or its designee may approve a less frequent reporting period if a dispenser makes a showing that a less frequent reporting period will not reduce the effectiveness of the system or jeopardize the public health.

Former Rule 5.2510. Amended by final rulemaking at 8 A.R. 4898, effective January 5, 2003 (Supp. 02-4). Recodified to R4-23-802 at 9 A.A.R. 4011, effective August 18, 2003 (Supp. 03-3). New Section made by final rulemaking at 14 A.A.R. 3410, effective October 4, 2008 (Supp. 08-3). Section expired under A.R.S. § 41-1056(J) at 20 A.A.R. 133, effective August 30, 2013 (Supp. 14-1). New Section made by final rulemaking at 20 A.A.R. 1359, effective August 2, 2014 (Supp. 14-2).

R4-23-503. Access to Controlled Substances Prescription Monitoring Program Data

- A. Except as provided in A.R.S. § 36-2604(B) and (C) and this Section, prescription information submitted to the Board or its designee is confidential and is not subject to public inspection.
- B. The Board or its designee shall review the prescription information collected under A.R.S. Title 36, Chapter 28 and R4-23-502. If the Board or its designee has reason to believe an act of unprofessional or illegal conduct has occurred, the Board or its designee shall notify the appropriate professional licensing board or law enforcement or criminal justice agency and provide the prescription information required for an investigation.
- C. The Board or its designee is authorized to release data collected by the program to the following:
 - 1. A person who is authorized to prescribe or dispense a controlled substance to assist that person to provide medical or pharmaceutical care to a patient or to evaluate a patient;
 - 2. An individual who requests the individual's own controlled substance prescription information under A.R.S. § 12-2293;
 - 3. A professional licensing board established under A.R.S. Title 32, Chapter 7, 11, 13, 14, 15, 16, 17, 18, 21, 25, or 29. Except as required under subsection (B), the Board or its designee shall provide this information only if the requesting board states in writing that the information is necessary for an open investigation or complaint;
 - 4. A local, state, or federal law enforcement or criminal justice agency. Except as required under subsection (B), the Board or its designee shall provide this information only if the requesting agency states in writing that the information is necessary for an open investigation or complaint;
 - 5. The Arizona Health Care Cost Containment System Administration regarding individuals who are receiving services under A.R.S. Title 36, Chapter 29. Except as required under subsection (B), the Board or its designee shall provide this information only if the Administration states in writing that the information is necessary for an open investigation or complaint;
 - 6. A person serving a lawful order of a court of competent jurisdiction;
 - 7. A person who is authorized to prescribe or dispense a controlled substance and who performs an evaluation on an individual under A.R.S. § 23-1026; and
 - 8. The Board staff for purposes of administration and enforcement of A.R.S. Title 36, Chapter 28 and this Article.
- D. The Board or its designee may provide data to public or private entities for statistical, research, or educational purposes after removing information that could be used to identify individual patients or persons who received prescriptions from dispensers.

Historical Note

Former Rules 5.3500, 5.3520, 5.3540, 5.3550, 5.3560, 5.3570, 5.3580, 5.3590, 5.4110, and 5.6110; Repealed

effective August 2, 1982 (Supp. 82-4). New Section made by final rulemaking at 14 A.A.R. 3410, effective October 4, 2008 (Supp. 08-3). Section expired under A.R.S. § 41-1056(J) at 20 A.A.R. 133, effective August 30, 2013 (Supp. 14-1). New Section made by final rulemaking at 20 A.A.R. 1359, effective August 2, 2014 (Supp. 14-2).

R4-23-504. Computerized Central Database Tracking System Task Force

- A. The Board shall appoint a task force to help it administer the computerized central database tracking system as specified in A.R.S. § 36-2603.
- B. The Task Force shall meet at least once each year and at the call of the chairperson to establish the procedures and conditions relating to the release of prescription information specified in A.R.S. § 36-2604 and R4-23-503.
- C. The Task Force shall determine:
 - 1. The information to be screened;
 - 2. The frequency and thresholds for screening; and
 - 3. The parameters for using the information to notify medical practitioners, patients, and pharmacies to educate and provide for patient management and treatment options.
- D. The Board shall review and approve the procedures and conditions established by the Task Force as needed but at least once every calendar year.

Historical Note

Former Rule 5.7010; Amended effective August 10, 1978 (Supp. 78-4). Repealed effective August 2, 1982 (Supp. 82-4). New Section made by final rulemaking at 14 A.A.R. 3410, effective October 4, 2008 (Supp. 08-3). Section expired under A.R.S. § 41-1056(J) at 20 A.A.R. 133, effective August 30, 2013 (Supp. 14-1). New Section made by final rulemaking at 20 A.A.R. 1359, effective August 2, 2014 (Supp. 14-2).

R4-23-505. Reports

- A. Before releasing prescription monitoring program data, the Board or its designee shall receive a written or electronic request for controlled substance prescription information.
- B. A person authorized to access CSPMP data under R4-23-503(C)(1) through (7) shall submit a written or electronic request that:
 - 1. Specifies the information requested for the report;
 - 2. For a medical practitioner, provides a statement that the report's purpose is to provide medical or pharmaceutical care to a patient or to evaluate a patient;
 - 3. For an individual obtaining the individual's own controlled substance prescription information, provides a form of non-expired government-issued photo identification;
 - 4. For a professional licensing board, states that the information is necessary for an open investigation or complaint;
 - 5. For a local, state, or federal law enforcement or criminal justice agency, states that the information is necessary for an open investigation or complaint;
 - 6. For the AHCCCS Administration, states that the information is necessary for an open investigation or complaint; and
 - 7. For a person serving a lawful order of a court of competent jurisdiction, provides a copy of the court order.
- C. The Board or its designee may provide reports through U.S. mail, other common carrier, facsimile, or secured electronic media or may allow reports to be picked up in-person at the Board office.

R4-23-506. Repealed**Historical Note**

Adopted effective December 3, 1974 (Supp. 75-1). Repealed effective August 24, 1992 (Supp. 92-3).

ARTICLE 6. PERMITS AND DISTRIBUTION OF DRUGS**R4-23-601. General Provisions**

- A. Permit required to sell a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical. A person shall have a current Board permit to:
 - 1. Sell a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical in Arizona; or
 - 2. Sell a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical from outside Arizona and ship the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical into Arizona.
- B. A medical practitioner is exempt from subsection (A) to administer a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical for the emergency needs of a patient.
- C. Permit fee. Permits are issued biennially on an odd- and even-year expiration based on the assigned permit number. The fee, specified in R4-23-205, is not refundable under any circumstances except the Board's failure to comply with the permit time-frames established in R4-23-602.
- D. Record of receipt and disposal of narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals.
 - 1. Every person manufacturing a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical, including repackaging or relabeling, shall prepare and retain for not less than three years the manufacturing, repackaging, or relabeling date for each narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical.
 - 2. Every person receiving, selling, delivering, or disposing of a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical shall record and retain for not less than three years the following information:
 - a. The name, strength, dosage form, and quantity of each narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical received, sold, delivered, or disposed;
 - b. The name, address, and license or permit number, if applicable, of the person from whom each narcotic or other controlled substance, prescription-only drug

- or device, nonprescription drug, precursor chemical, or regulated chemical is received;
- c. The name, address, and license or permit number, if applicable, of the person to whom each narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is sold or delivered, or of the person who disposes of each narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
- d. The receipt, sale, deliver, or disposal date of each narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical.
- 3. The record required in this subsection shall be available for inspection by the Board or its compliance officer during regular business hours.
- 4. If the record required in this subsection is stored in a centralized recordkeeping system and not immediately available for inspection, a permittee, manager, or pharmacist-in-charge shall provide the record within four working days of the Board's or its compliance officer's request.
- E. Narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals damaged by water, fire, or from human or animal consumption or use. No person shall sell or offer to sell any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical damaged by water, fire, or from human or animal consumption or use.

Historical Note

Former Rules 6.1100, 6.1200, 6.1300, 6.1400, and 6.1500. Amended effective August 10, 1978 (Supp. 78-4). Amended subsection (C) effective August 9, 1983 (Supp. 83-4). Amended subsection (C) effective August 12, 1988 (Supp. 88-3). Amended by final rulemaking at 6 A.A.R. 4656, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 12 A.A.R. 1912, effective July 1, 2006 (Supp. 06-2). Amended by final rulemaking at 14 A.A.R. 3670, effective November 8, 2008 (Supp. 08-3).

R4-23-602. Permit Application Process and Time-frames

- A. A person applying for a permit shall:
 - 1. Submit a completed application for the desired permit electronically or manually on a form furnished by the Board, and
 - 2. Submit with the application form:
 - a. The documents specified in the application form, and
 - b. The permit fee specified in R4-23-205(D).
- B. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
- C. Time-frames for permits.
 - 1. The Board office shall finish an administrative completeness review within 60 days from the date the application form is received.
 - a. The Board office shall issue a written notice of administrative completeness to the applicant if no deficiencies are found in the application form.
 - b. If the application form is incomplete, the Board office shall provide the applicant with a written notice that includes a comprehensive list of the missing information. The 60-day time-frame for the

Board of Pharmacy

- Board office to finish the administrative completeness review is suspended from the date the notice of incompleteness is served until the applicant provides the Board office with all missing information.
- c. If the Board office does not provide the applicant with written notice regarding administrative completeness, the application form shall be deemed complete 60 days after receipt by the Board office.
 2. An applicant with an incomplete application form shall submit to the Board office all of the missing information within 90 days of service of the notice of incompleteness.
 - a. If an applicant cannot submit all missing information within 90 days of service of the notice of incompleteness, the applicant may send a written request for an extension to the Board office postmarked or delivered no later than 90 days from service of the notice of incompleteness;
 - b. The written request for an extension shall document the reasons the applicant is unable to meet the 90-day deadline; and
 - c. The Board office shall review the request for an extension of the 90-day deadline and grant the request if the Board office determines that an extension of the 90-day deadline will enable the applicant to assemble and submit the missing information. An extension shall be for no more than 30 days. The Board office shall notify the applicant in writing of its decision to grant or deny the request for an extension.
 3. If an applicant fails to submit a complete application form within the time allowed, the Board office shall close the applicant's file. An applicant whose file is closed and who later wishes to obtain a permit shall submit a new application and fee as specified in subsection (A).
 4. For a nonprescription drug permit applicant, a compressed medical gas distributor permit applicant, and a durable medical equipment and compressed medical gas supplier permit applicant, the Board office shall issue a permit on the day that the Board office determines an administratively complete application form is received.
 5. Except as described in subsection (C)(4), from the date on which the administrative completeness review of an application form is finished, the Board office shall complete a substantive review of the applicant's qualifications in no more than 120 days.
 - a. If an applicant is found to be ineligible, the Board office shall issue a written notice of denial to the applicant.
 - b. If an applicant is found to be eligible, the Board office shall recommend to the Board that the applicant be issued a permit. Upon receipt of the Board office's recommendation, the Board shall either issue a permit to the applicant or if the Board determines the applicant does not meet eligibility requirements, return the matter to the Board office.
 - c. If the Board office finds deficiencies during the substantive review of the application form, the Board office shall issue a written request to the applicant for additional documentation.
 - d. The 120-day time-frame for a substantive review for the issuance or denial of a permit is suspended from the date of the written request for additional documentation until the date that all documentation is received. The applicant shall submit the additional documentation according to subsection (C)(2).
- e. If the applicant and the Board office mutually agree in writing, the 120-day substantive review time-frame may be extended once for no more than 45 days.
 6. For the purpose of A.R.S. § 41-1072 et seq., the Board establishes the following time-frames for permits:
 - a. Administrative completeness review time-frame: 60 days.
 - b. Substantive review time-frame:
 - i. Nonprescription drug permit, compressed medical gas distributor permit, and durable medical equipment and compressed medical gas supplier permit: none.
 - ii. Except as described in subsection (C)(6)(b)(i): 120 days.
 - c. Overall time-frame:
 - i. Nonprescription drug permit, compressed medical gas distributor permit, and durable medical equipment and compressed medical gas supplier permit: 60 days.
 - ii. Except as described in subsection (C)(6)(c)(i): 180 days.
- D. Permit renewal.**
1. To renew a permit, a permittee shall submit a completed application for permit renewal electronically or manually on a form furnished by the Board with the biennial renewal fee specified in R4-23-205(D).
 2. If the biennial renewal fee is not paid by November 1 of the renewal year specified in A.R.S. § 32-1931, the permit is suspended. The permittee shall pay a penalty fee as provided in A.R.S. § 32-1931 and R4-23-205(G)(2) to vacate the suspension.
 3. Time-frames for permit renewals. The Board office shall follow the time-frames established in subsection (C).
- E. Display of permit.** A permittee shall conspicuously display the permit in the location to which it applies.

Historical Note

Former Rules 6.2100, 6.2200, 6.2300, 6.2400, 6.2500, 6.2600, 6.2610, 6.2620, 6.2630, 6.2640, and 6.2650.

Amended effective August 10, 1978 (Supp. 78-4).

Amended effective August 9, 1983 (Supp. 83-4).

Repealed effective August 12, 1988 (Supp. 88-3). New Section adopted effective August 5, 1997 (Supp. 97-3).

Amended by final rulemaking at 6 A.A.R. 4589, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2).

R4-23-603. Resident-Nonprescription Drugs, Retail

- A. Permit. A person, including the following, shall not sell or distribute a nonprescription drug without a current Board-issued permit:
 1. A grocer;
 2. Other non-pharmacy retail outlet; or
 3. Mobile or non-fixed location retailer, such as a swap-meet vendor.
- B. A medical practitioner licensed under A.R.S. Title 32 is exempt from the requirements of subsection (A).
- C. Application. To obtain a permit to sell a nonprescription drug, a person shall submit:
 1. A completed application form and fee as specified in R4-23-602; and
 2. Documentation of compliance with local zoning laws, if required by the Board.
- D. Drug sales. A nonprescription drug permittee:

Board of Pharmacy

1. Shall sell a drug only in the original container packaged and labeled by the manufacturer; and
2. Shall not package, repackage, label, or relabel any drug.
- E. Inspection.** A nonprescription drug permittee shall consent to inspection during business hours by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
- F. Quality control.** A nonprescription drug permittee shall:
1. Ensure that all drugs stocked, sold, or offered for sale are:
 - a. Kept clean;
 - b. Protected from contamination, excessive heat, cold, sunlight, and other deteriorating factors;
 - c. In compliance with federal law; and
 - d. Received from a supplier with a current Board-issued permit as specified in R4-23-601(A).
 2. Develop and implement a program to ensure that:
 - a. Any expiration-dated drug is reviewed regularly;
 - b. Any drug, that exceeds its expiration date, is deteriorated or damaged, or does not comply with federal law, is moved to a quarantine area and not sold or distributed; and
 - c. Any quarantined drug is destroyed or returned to its source of supply.
- G. Notification.** A nonprescription drug permittee shall provide written notice by mail, facsimile, or e-mail to the Board office within ten days of changes involving the telephone number, facsimile number, e-mail address, mailing address, or name of business.
- H. Change of ownership.** No less than 14 days before a change of ownership occurs that involves changes of stock ownership of 30% or more of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit a completed application form and fee as specified in subsection (C).
- I. Relocation.** No less than 30 days before an existing nonprescription drug permittee relocates, the permittee shall submit a completed application for relocation electronically or manually on a form furnished by the Board, and the documentation required in subsection (C).
- J. Records.** A nonprescription drug permittee shall:
1. Retain records of the receipt and disposal of nonprescription drugs as required in R4-23-601(D), and
 2. Comply with the requirements of A.R.S. § 32-1977 and federal law for the retail sale of methamphetamine precursors.
- K. Permit renewal.** Permit renewal shall be as specified in R4-23-602(D).
- L. Nonprescription drug vending machine outlet.** In addition to the requirements of R4-23-601, R4-23-602, and subsections (A) through (K), a person selling or distributing a nonprescription drug in a vending machine shall comply with the following requirements:
1. Each individual vending machine is considered an outlet and shall have a Board-issued nonprescription drug permit;
 2. Each nonprescription-drug-permitted vending machine shall display in public view an identification seal, furnished by the Board, containing the permit number, vending machine's serial number, owner's name, and telephone contact number;
 3. Each nonprescription-drug-permitted vending machine is assigned a specific location that is within a weather-tight structure, protected from direct sunlight, and maintained at a temperature not less than 59° F and not greater than 86° F;
4. Each nonprescription drug sold in a vending machine is packaged and labeled in the manufacturer's original FDA-approved container;
 5. A nonprescription-drug-permitted vending machine is subject to inspection by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5) as follows:
 - a. The owner, manager, or other staff of the nonprescription drug permittee shall provide access to the contents of the vending machine within 24 hours of a request from a Board compliance officer or other authorized officer of the law; or
 - b. The Board compliance staff shall have independent access to the vending machine;
 6. Before relocating or retiring a nonprescription-drug-permitted vending machine, the owner or manager shall notify the Board in writing. The notice shall include:
 - a. Permit number;
 - b. Vending machine's serial number;
 - c. Action planned (relocate or retire); and
 - d. If retiring a vending machine, the disposition of the nonprescription drug contents of the vending machine;
 7. The sale or distribution of a precursor chemical or regulated chemical in a vending machine is prohibited; and
 8. Under no circumstance may expired drugs be sold or distributed.

Historical Note

Adopted effective August 10, 1978 (Supp. 78-4).
 Amended subsection (D) paragraph (1) and added subsection (G) effective April 20, 1982 (Supp. 82-2).
 Amended effective August 12, 1988 (Supp. 88-3).
 Amended effective February 8, 1991 (Supp. 91-1).
 Amended effective August 5, 1997 (Supp. 97-3).
 Amended by final rulemaking at 6 A.A.R. 4589, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2).

R4-23-604. Resident Drug Manufacturer

- A. Permit.** A person shall not manufacture, package, repack, label, or relabel any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical without a current Board-issued drug manufacturer permit.
- B. Application.** To obtain a permit to operate a drug manufacturing firm in Arizona, a person shall submit a completed application, on a form furnished by the Board, that includes:
1. Business name, address, mailing address, if different, telephone number, and facsimile number;
 2. Owner's name, if corporation or partnership, officers or partners, including address and title, and any other trade or business names used;
 3. Whether the owner, corporation, or partnership has conducted a similar business in any other jurisdiction and if so, indicate under what name and location;
 4. Whether the owner, any officer, or active partner has ever been convicted of an offense involving moral turpitude, a felony offense, or any drug-related offense or has any currently pending felony or drug-related charges, and if so, indicate charge, conviction date, jurisdiction, and location;
 5. Whether the owner, any officer, or active partner has ever been denied a drug manufacturer permit in this state or any other jurisdiction, and if so, indicate where and when;
 6. A copy of the drug list required by the FDA;

Board of Pharmacy

7. Plans or construction drawings showing facility size and security for the proposed business;
8. Applicant's and manager's name, address, emergency telephone number, and resumé indicating educational or experiential qualifications related to drug manufacturer operation;
9. The applicant's current FDA drug manufacturer or repackager registration number and expiration date;
10. Documentation of compliance with local zoning laws;
11. For an application submitted because of ownership change, the former owner's name and business name, if different;
12. Date signed, and applicant's, corporate officer's, partner's, or manager's verified signature and title; and
13. Fee specified in R4-23-205.
- C.** Before issuing a drug manufacturer permit, the Board shall:
1. Receive and approve a completed permit application;
 2. Interview the applicant and manager, if different from the applicant, at a Board meeting; and
 3. Receive a satisfactory compliance inspection report on the facility from a Board compliance officer.
- D.** Notification. A resident drug manufacturer permittee shall notify the Board of changes involving the drug list, ownership, address, telephone number, name of business, or manager, including manager's telephone number. The resident drug manufacturer permittee shall submit a written notice via mail, fax, or e-mail to the Executive Director within 24 hours of the change, except any change of ownership requires that the resident drug manufacturer permittee comply with subsection (E).
- E.** Change of ownership. Before a change of ownership occurs that involves changes of stock ownership of more than 30% of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit the application packet described under subsection R4-23-604(B).
- F.** Before an existing resident drug manufacturer permittee relocates, the drug manufacturer permittee shall submit the application packet described in subsection R4-23-604(B), excluding the fee. The facility at the new location shall pass a final inspection by a Board compliance officer before operations begin.
- G.** A resident drug manufacturer permittee shall submit the application packet described under subsection R4-23-604(B) for any change of officers in a corporation, excluding the fee and final inspection.
- H.** Manufacturing and distribution.
1. A drug manufacturer permittee shall manufacture and distribute a drug only:
 - a. To a pharmacy, drug manufacturer, or full-service or nonprescription drug wholesaler currently permitted by the Board;
 - b. To a medical practitioner currently licensed as a medical practitioner as defined in A.R.S. § 32-1901; or
 - c. To a properly permitted, registered, licensed, or certified person or firm of another jurisdiction.
 2. Before manufacturing and distributing a drug that is not listed on a drug manufacturer's permit application, the drug manufacturer permittee shall send to the Board office a written request to amend the permit application, including documentation of FDA approval to manufacture the drug not listed on the original permit application. If a request to amend a permit application includes the documentation required in this subsection, the Board or its designee shall approve the request to amend within 30 days of receipt.
- I.** A drug manufacturer permit is subject to denial, suspension, probation, or revocation under A.R.S. § 32-1927.02.
- J.** Current Good Manufacturing Practice. A drug manufacturer permittee shall comply with the current good manufacturing practice requirements of 21 CFR 210 through 211, (Revised April 1, 2011, incorporated by reference and on file with the Board and available at www.gpo.gov. This incorporated material includes no future editions or amendments.)
- K.** Records. A drug manufacturer permittee shall:
1. Establish and implement written procedures for maintaining records pertaining to production, process control, labeling, packaging, quality control, distribution, complaints, and any information required by federal or state law;
 2. Retain the records required by this Article and 21 CFR 210 through 211 as incorporated in subsection (J) for at least two years after distribution of a drug or one year after the expiration date of a drug, whichever is longer; and
 3. Make the records required by this Article and 21 CFR 210 through 211 as incorporated in subsection (J) available within 48 hours for review by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
- L.** Inspections. A drug manufacturer permittee shall make the drug manufacturer's facility available for inspection by the Board or its compliance officer under A.R.S. § 32-1904.
- M.** Nonresident drug manufacturer. A nonresident drug manufacturer shall comply with the requirements of R4-23-607.
- N.** Manufacturing radiopharmaceuticals. Before manufacturing a radiopharmaceutical, a drug manufacturer permittee shall:
1. Comply with the regulatory requirements of the Arizona Radiation Regulatory Agency, the U.S. Nuclear Regulatory Commission, the FDA, and this Section; and
 2. Hold a current Arizona Radiation Regulatory Agency Radioactive Materials License. If a drug manufacturer permittee who manufactures radiopharmaceuticals fails to maintain a current Arizona Radiation Regulatory Agency Radioactive Materials License, the permittee's drug manufacturer permit shall be immediately suspended pending a hearing by the Board.

Historical Note

R4-23-605. Resident Drug Wholesaler Permit

- A.** Permit. A person shall not operate a business or firm for the wholesale distribution of any drug, device, precursor chemi-

Board of Pharmacy

cal, or regulated chemical without a current Board-issued full-service or nonprescription drug wholesale permit.

B. Application.

1. To obtain a permit to operate a full-service or nonprescription drug wholesale firm in Arizona, a person shall submit a completed application on a form furnished by the Board that includes:
 - a. Whether the application is for a full-service or nonprescription drug wholesale permit;
 - b. Business name, address, mailing address, if different, telephone number, and facsimile number;
 - c. Owner's name, if corporation or partnership, officers or partners, including address and title, and any other trade or business names used;
 - d. Whether the owner, corporation, or partnership has conducted a similar business in any other jurisdiction and if so, indicate under what name and location;
 - e. Whether the owner, any officer or active partner has ever been convicted of an offense involving moral turpitude, a felony offense, or any drug-related offense or has any currently pending felony or drug-related charges, and if so, indicate charge, conviction date, jurisdiction, and location;
 - f. Whether the owner or any officer or active partner has ever been denied a drug wholesale permit in this state or any other jurisdiction, and if so, indicate where and when;
 - g. For a full-service drug wholesale firm:
 - i. The designated representative's name, address, and emergency telephone number;
 - ii. Documentation that the designated representative meets the requirements of A.R.S. § 32-1982(B) and the following as specified in A.R.S. § 32-1982(C):
 - (1) A full set of fingerprints from the designated representative; and
 - (2) The state and federal criminal history record check fee specified by and made payable to the Arizona State Department of Public Safety by money order, certified check, or bank draft; and
 - iii. A \$100,000 bond as specified in A.R.S. § 32-1982(D) submitted on a form supplied by the Board;
 - h. The type of drugs, whether nonprescription, prescription-only, controlled substances, human, or veterinary, the applicant will distribute;
 - i. Plans or construction drawings showing facility size and security for the proposed business;
 - j. Documentation of compliance with local zoning laws;
 - k. For a nonprescription drug wholesale firm, the manager's or designated representative's name, address, emergency telephone number, and resumé indicating educational or experiential qualifications related to drug wholesale operation;
 - l. For an application submitted because of ownership change, the former owner's name and business name, if different;
 - m. Date signed, and applicant's, corporate officer's, partner's, manager's, or designated representative's verified signature and title; and
 - n. Fee specified in R4-23-205.
2. Before issuing a full-service or nonprescription drug wholesale permit, the Board shall:

- a. Receive and approve a completed permit application;
- b. Interview the applicant and the designated representative, if different from the applicant, at a Board meeting;
- c. Receive a satisfactory compliance inspection report on the facility from a Board compliance officer; and
- d. For a full-service drug wholesale permit, issue a fingerprint clearance to a qualified designated representative, as specified in subsection (L). If the fingerprint clearance of a designated representative for a full-service drug wholesale permit applicant is denied, the full-service drug wholesale permit applicant shall appoint another designated representative and submit the documentation, fingerprints, and fee required in subsection (B)(1)(g)(ii).

C. Notification. A resident full-service or nonprescription drug wholesale permittee shall notify the Board of changes involving the type of drugs sold or distributed, ownership, address, telephone number, name of business, or manager or designated representative, including the manager's or designated representative's telephone number.

1. The resident full-service or nonprescription drug wholesale permittee shall submit a written notice via mail, fax, or e-mail to the Executive Director within 10 days of the change, except any change of ownership requires that the resident full-service or nonprescription drug wholesale permittee comply with subsection (D).
2. For a change of designated representative, a resident full-service drug wholesale permittee shall submit the documentation, fingerprints, and fee required in subsection (B)(1)(g)(ii). If the fingerprint clearance of a designated representative for a full-service drug wholesale permit applicant is denied, the full-service drug wholesale permit applicant shall appoint another designated representative and submit the documentation, fingerprints, and fee required in subsection (B)(1)(g)(ii).

D. Change of ownership. Before a change of ownership occurs that involves changes of stock ownership of more than 30% of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit the application packet described under subsection (B).**E.** Before an existing resident full-service or nonprescription drug wholesaler permittee relocates, the resident full-service or nonprescription drug wholesale permittee shall submit the application packet described under subsection (B), excluding the fee. The facility at the new location shall pass a final inspection by a Board compliance officer before operations begin.**F.** A resident full-service or nonprescription drug wholesale permittee shall submit the application packet described under subsection (B) for any change of officers in a corporation, excluding the fee and final inspection.**G. Distribution restrictions.** In addition to the requirements of this subsection, a resident full-service wholesale permittee shall comply with the distribution restrictions specified in A.R.S. § 32-1983.

1. **Records.**
 - a. A full-service drug wholesale permittee shall:
 - i. Maintain records to ensure full accountability of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical including dates of receipt and sales, names, addresses, and DEA registration num-

Board of Pharmacy

- bers, if required, of suppliers or sources of merchandise, and customer names, addresses, and DEA registration numbers, if required;
- ii. File the records required in subsection (G)(1)(a)(i) in a readily retrievable manner for a minimum of three years;
 - iii. Make the records required in subsection (G)(1)(a)(i) available upon request during regular business hours for inspection by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5). Records kept at a central location apart from the business location and not electronically retrievable shall be made available within two business days; and
 - iv. In addition to the records requirements of subsection (G)(1)(a)(i), provide a pedigree as specified in A.R.S. § 32-1984(E) for all prescription-only drugs that leave the normal distribution channel as defined in A.R.S. § 32-1981.
- b. A nonprescription drug wholesale permittee shall:
- i. Maintain records to ensure full accountability of any nonprescription drug, precursor chemical, or regulated chemical including dates of receipt and sales, names, addresses, and DEA registration numbers, if required, of suppliers or sources of merchandise, and customer names, addresses, and DEA registration numbers, if required;
 - ii. File the records required in subsection (G)(1)(b)(i) in a readily retrievable manner for a minimum of three years; and
 - iii. Make the records required in subsection (G)(1)(b)(i) available upon request during regular business hours for inspection by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5). Records kept at a central location apart from the business location and not electronically retrievable shall be made available within two business days.
2. Drug sales.
- a. A full-service drug wholesale permittee shall:
 - i. Not sell, distribute, give away, or dispose of, any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical, except in the original container packaged and labeled by the manufacturer or repackager;
 - ii. Not package, repackage, label, or relabel any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical;
 - iii. Not sell, distribute, give away, or dispose of, any narcotic or other controlled substance, or prescription-only drug or device, to anyone except a pharmacy, drug manufacturer, or full-service drug wholesaler currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - iv. Not sell, distribute, give away, or dispose of, any nonprescription drug, precursor chemical, or regulated chemical, to anyone except a pharmacy, drug manufacturer, full-service or non-prescription drug wholesaler, or
 - v. Provide pedigree records upon request, if immediately available, or within two business days from the date of a request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5);
 - vi. Maintain a copy of the current permit or license of each person or firm who buys, receives, or disposes of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
 - vii. Provide permit and license records upon request, if immediately available, or within two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
- b. A nonprescription drug wholesale permittee shall:
- i. Not sell, distribute, give away, or dispose of any nonprescription drug, precursor chemical, or regulated chemical, except in the original container packaged and labeled by the manufacturer or repackager;
 - ii. Not package, repackage, label, or relabel any nonprescription drug, precursor chemical, or regulated chemical;
 - iii. Not sell or distribute any nonprescription drug, precursor chemical, or regulated chemical, to anyone except a pharmacy, drug manufacturer, full-service or nonprescription drug wholesaler, or nonprescription drug retailer currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - iv. Maintain a record of the current permit or license of each person or firm who buys, receives, or disposes of any nonprescription drug, precursor chemical, or regulated chemical; and
 - v. Provide permit and license records upon request, if immediately available, or within two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
- c. Nothing in this subsection shall be construed to prevent the return of a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical to the original source of supply.
3. Out-of-state drug sales.
- a. A full-service drug wholesale permittee shall:
 - i. Not sell, distribute, give away, or dispose of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical, except in the original container packaged and labeled by the manufacturer or repackager;
 - ii. Not package, repackage, label, or relabel any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical;
 - iii. Not sell, distribute, give away, or dispose of any narcotic or other controlled substance, pre-

Board of Pharmacy

- scription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical, to anyone except a person or firm that is properly permitted, registered, licensed, or certified in another jurisdiction;
- iv. Provide pedigree records upon request, if immediately available, or within two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5);
 - v. Maintain a copy of the current permit, registration, license, or certificate of each person or firm who buys, receives, or disposes of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
 - vi. Provide permit, registration, license, and certificate records upon request, if immediately available, or within two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5); and
- b. A nonprescription drug wholesale permittee shall:
- i. Not sell, distribute, give away, or dispose of any nonprescription drug, precursor chemical, or regulated chemical, except in the original container packaged and labeled by the manufacturer or repackager;
 - ii. Not package, repackage, label, or relabel any nonprescription drug, precursor chemical, or regulated chemical;
 - iii. Not sell or distribute any nonprescription drug, precursor chemical, or regulated chemical, to anyone except a person or firm that is properly permitted, registered, licensed, or certified in another jurisdiction;
 - iv. Maintain a record of the current permit, registration, license, or certificate of each person or firm who buys, receives, or disposes of any nonprescription drug, precursor chemical, or regulated chemical; and
 - v. Provide permit, registration, license, or certificate records upon request, if immediately available, or within two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
4. Cash-and-carry sales.
- a. A full-service drug wholesale permittee shall complete a cash-and-carry sale or distribution of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical, only after:
 - i. Verifying the validity of the order;
 - ii. Verifying the identity of the pick-up person for each transaction by confirming that the person or firm represented placed the cash-and-carry order; and
 - iii. For a prescription-only drug order, verifying that the cash-and-carry sale or distribution is used only to meet the immediate needs of a particular patient of the person or firm who placed the cash-and-carry order; and
 - b. A nonprescription drug wholesale permittee shall complete a cash-and-carry sale or distribution of any nonprescription drug, precursor chemical, or regulated chemical, only after:
 - i. Verifying the validity of the order; and
 - ii. Verifying the identity of the pick-up person for each transaction by confirming that the person or firm represented placed the cash-and-carry order.
- H. Prescription-only drug returns or exchanges. A full-service drug wholesale permittee shall ensure that any prescription-only drug returned or exchanged by a pharmacy or chain pharmacy warehouse under A.R.S. § 32-1983(A) meets the following criteria:
1. The prescription-only drug is not adulterated or counterfeited, except an adulterated or counterfeited prescription-only drug that is the subject of an FDA or manufacturer recall may be returned for destruction or subsequent return to the manufacturer;
 2. The quantity of prescription-only drug returned or exchanged does not exceed the quantity of prescription-only drug that the full-service drug wholesale permittee or a full-service drug wholesale permittee under common ownership sold to the pharmacy or chain pharmacy warehouse; and
 3. The pharmacy or chain pharmacy warehouse provides documentation that:
 - a. Lists the name, strength, and manufacturer of the prescription-only drug being returned or exchanged; and
 - b. States that the prescription-only drug was maintained in compliance with storage conditions prescribed on the drug label or manufacturer's package insert.
- I. Returned, outdated, damaged, deteriorated, adulterated, misbranded, counterfeited, and contraband drugs.
1. Except as specified in subsection (H)(1) for a prescription-only drug, a full-service drug wholesale permittee shall ensure that the return of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical meets the following criteria.
 - a. Any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical that is outdated, damaged, deteriorated, adulterated, misbranded, counterfeited, or contraband or suspected of being adulterated, misbranded, counterfeited, or contraband, or otherwise deemed unfit for human or animal consumption shall be quarantined and physically separated from other narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals until the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA.
 - b. Any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical whose immediate or sealed outer or secondary containers or product labeling are misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband shall be quarantined and physically separated from other narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals until the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA.

Board of Pharmacy

- controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals until the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA. When the immediate or sealed outer or secondary containers or product labeling are determined to be misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband, the full-service drug wholesale permittee shall provide notice of the misbranding, counterfeiting, or contrabandage or suspected misbranding, counterfeiting, or contrabandage within three business days of the determination to the Board, FDA, and manufacturer or wholesale distributor from which the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical was acquired.
- c. Any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical that has been opened or used, but is not adulterated, misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband, shall be identified as opened or used, or both, and quarantined and physically separated from other narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals until the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA.
- d. If the conditions under which a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical has been returned cast doubt on the narcotic's or other controlled substance's, prescription-only drug's or device's, nonprescription drug's, precursor chemical's, or regulated chemical's safety, identity, strength, quality, or purity, the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical shall be quarantined and physically separated from other narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals until the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA, except as provided in subsection (I)(1)(d)(i).
- i. If examination, testing, or other investigation proves that the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical meets appropriate standards of safety, identity, strength, quality, and purity, it does not have to be destroyed or returned to the manufacturer or wholesale distributor.
- ii. In determining whether the conditions under which a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical has been returned cast doubt on the narcotic's or other controlled substance's, prescription-only drug's or device's, nonprescription drug's, precursor chemical's, or regulated chemical's safety, identity, strength, quality, or purity, the full-service drug wholesale permittee shall consider, among other things, the conditions under which the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical has been held, stored, or shipped before or during its return and the condition of the narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical and the condition of its container, carton, or product labeling as a result of storage or shipping.
- e. For any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical identified under subsections (I)(1)(a) or (b), the full-service drug wholesale permittee shall ensure that the identified item or items and other evidence of criminal activity, and accompanying documentation is retained and not destroyed until its disposition is authorized by the Board and the FDA.
2. A nonprescription drug wholesale permittee shall ensure that the return of any nonprescription drug, precursor chemical, or regulated chemical meets the following criteria.
- a. Any nonprescription drug, precursor chemical, or regulated chemical that is outdated, damaged, deteriorated, adulterated, misbranded, counterfeited, or contraband or suspected of being adulterated, misbranded, counterfeited, or contraband, or otherwise deemed unfit for human or animal consumption shall be quarantined and physically separated from other nonprescription drugs, precursor chemicals, or regulated chemicals until the nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA.
- b. Any nonprescription drug, precursor chemical, or regulated chemical whose immediate or sealed outer or secondary containers or product labeling are misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband shall be quarantined and physically separated from other nonprescription drugs, precursor chemicals, or regulated chemicals until the nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA. When the immediate or sealed outer or secondary containers or product labeling are determined to be misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband, the non-

Board of Pharmacy

prescription drug wholesale permittee shall provide notice of the misbranding, counterfeiting, or contrabandage or suspected misbranding, counterfeiting, or contrabandage within three business days of the determination to the Board, FDA, and manufacturer or wholesale distributor from which the nonprescription drug, precursor chemical, or regulated chemical was acquired.

- c. Any nonprescription drug, precursor chemical, or regulated chemical that has been opened or used, but is not adulterated, misbranded, counterfeited, or contraband or suspected of being misbranded, counterfeited, or contraband, shall be identified as opened or used, or both, and quarantined and physically separated from other nonprescription drugs, precursor chemicals, or regulated chemicals until the nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA.
- d. If the conditions under which a nonprescription drug, precursor chemical, or regulated chemical has been returned cast doubt on the nonprescription drug's, precursor chemical's, or regulated chemical's safety, identity, strength, quality, or purity, the nonprescription drug, precursor chemical, or regulated chemical shall be quarantined and physically separated from other nonprescription drugs, precursor chemicals, or regulated chemicals until the nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired as authorized by the Board and the FDA, except as provided in subsection (I)(2)(d)(i).
 - i. If examination, testing, or other investigation proves that the nonprescription drug, precursor chemical, or regulated chemical meets appropriate standards of safety, identity, strength, quality, and purity, it does not need to be destroyed or returned to the manufacturer or wholesale distributor.
 - ii. In determining whether the conditions under which a nonprescription drug, precursor chemical, or regulated chemical has been returned cast doubt on the nonprescription drug's, precursor chemical's, or regulated chemical's safety, identity, strength, quality, or purity, the nonprescription drug wholesale permittee shall consider, among other things, the conditions under which the nonprescription drug, precursor chemical, or regulated chemical has been held, stored, or shipped before or during its return and the condition of the nonprescription drug, precursor chemical, or regulated chemical and the condition of its container, carton, or product labeling as a result of storage or shipping.
- e. For any nonprescription drug, precursor chemical, or regulated chemical identified under subsections (I)(2)(a) or (b), the nonprescription drug wholesale permittee shall ensure that the identified item or items and other evidence of criminal activity, and accompanying documentation is retained and not destroyed until its disposition is authorized by the Board and the FDA.

3. A full-service drug wholesale permittee and nonprescription drug wholesale permittee shall comply with the recordkeeping requirements of subsection (G) for all outdated, damaged, deteriorated, adulterated, misbranded, counterfeited and contraband narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals.

J. Facility. A full-service or nonprescription drug wholesale permittee shall:

- 1. Ensure that the facility occupied by the full-service or nonprescription drug wholesale permittee is of adequate size and construction, well-lighted inside and outside, adequately ventilated, and kept clean, uncluttered, and sanitary;
- 2. Ensure that the permittee's warehouse facility:
 - a. Is secure from unauthorized entry; and
 - b. Has an operational security system designed to provide protection against theft;
- 3. In a full-service drug wholesale facility, ensure that only authorized personnel may enter areas where any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is kept;
- 4. In a nonprescription drug wholesale facility, ensure that only authorized personnel may enter areas where any nonprescription drug, precursor chemical, or regulated chemical is kept;
- 5. In a full-service drug wholesale facility, ensure that any thermolabile narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is stored in an area where room temperature is maintained in compliance with storage conditions prescribed on the product label;
- 6. In a nonprescription drug wholesale facility, ensure that any thermolabile nonprescription drug, precursor chemical, or regulated chemical is stored in an area where room temperature is maintained in compliance with storage conditions prescribed on the product label;
- 7. Make the facility available for inspection by a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5) during regular business hours;
- 8. In a full-service drug wholesale facility, provide a quarantine area for storage of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical that is outdated, damaged, deteriorated, adulterated, misbranded, counterfeited, or contraband or suspected of being adulterated, misbranded, counterfeited, or contraband, otherwise deemed unfit for human or animal consumption, or that is in an open container; and
- 9. In a nonprescription drug wholesale facility, provide a quarantine area for storage of any nonprescription drug, precursor chemical, or regulated chemical that is outdated, damaged, deteriorated, adulterated, misbranded, counterfeited, or contraband or suspected of being adulterated, misbranded, counterfeited, or contraband, otherwise deemed unfit for human or animal consumption, or that is in an open container.

K. Quality controls.

- 1. A full-service drug wholesale permittee shall:
 - a. Ensure that any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated

Board of Pharmacy

- chemical that meets the criteria specified in subsection (I)(1) is not sold, distributed, or delivered to any person for human or animal consumption;
- b. Ensure that a narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is not manufactured, packaged, repackaged, labeled, or relabeled by any of its employees;
 - c. Ensure that any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical stocked, sold, offered for sale, or delivered is:
 - i. Kept clean,
 - ii. Protected from contamination and other deteriorating environmental factors, and
 - iii. Stored in a manner that complies with applicable federal and state law and official compendium storage requirements;
 - d. Maintain manual or automatic temperature and humidity recording devices or logs to document conditions in areas where any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is stored; and
 - e. Develop and implement a program to ensure that:
 - i. Any expiration-dated narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is reviewed regularly;
 - ii. Any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical that has less than 120 days remaining on the expiration date, or is deteriorated, damaged, or does not comply with federal law, is moved to a quarantine area and not sold or distributed; and
 - iii. Any quarantined narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired.
2. A nonprescription drug wholesale permittee shall:
- a. Ensure that any nonprescription drug, precursor chemical, or regulated chemical that meets the criteria specified in subsection (I)(2) is not sold, distributed, or delivered to any person for human or animal consumption;
 - b. Ensure that a nonprescription drug, precursor chemical, or regulated chemical is not manufactured, packaged, repackaged, labeled, or relabeled by any of its employees;
 - c. Ensure that any nonprescription drug, precursor chemical, or regulated chemical stocked, sold, offered for sale, or delivered is:
 - i. Kept clean,
 - ii. Protected from contamination and other deteriorating environmental factors, and
 - iii. Stored in a manner that complies with applicable federal and state law and official compendium storage requirements;
 - d. Maintain manual or automatic temperature and humidity recording devices or logs to document con-
- ditions in areas where any nonprescription drug, precursor chemical, or regulated chemical is stored; and
- e. Develop and implement a program to ensure that:
 - i. Any expiration-dated nonprescription drug, precursor chemical, or regulated chemical is reviewed regularly;
 - ii. Any nonprescription drug, precursor chemical, or regulated chemical that has less than 120 days remaining on the expiration date, or is deteriorated, damaged, or does not comply with federal law, is moved to a quarantine area and not sold or distributed; and
 - iii. Any quarantined nonprescription drug, precursor chemical, or regulated chemical is destroyed or returned to the manufacturer or wholesale distributor from which it was acquired.
- L. Fingerprint clearance.
1. After receiving the state and federal criminal history record of a designated representative, the Board shall compare the record with the list of criminal offenses that preclude a designated representative from receiving a fingerprint clearance. If the designated representative's criminal history record does not contain any of the offenses listed in subsection (L)(2), the Board shall issue the designated representative a fingerprint clearance.
 2. The Board shall not issue a fingerprint clearance to a designated representative who is awaiting trial for or who has been convicted of committing or attempting or conspiring to commit one or more of the following offenses in this state or the same or similar offenses in another state or jurisdiction:
 - a. Unlawfully administering intoxicating liquors, controlled substances, dangerous drugs, or prescription-only drugs;
 - b. Sale of peyote;
 - c. Possession, use, or sale of marijuana, dangerous drugs, prescription-only drugs, or controlled substances;
 - d. Manufacture or distribution of an imitation controlled substance;
 - e. Manufacture or distribution of an imitation prescription-only drug;
 - f. Possession or possession with intent to use an imitation controlled substance;
 - g. Possession or possession with intent to use an imitation prescription-only drug; or
 - h. A felony offense involving sale, distribution, or transportation of, offer to sell, transport, or distribute marijuana, dangerous drugs, prescription-only drugs, or controlled substances.
 3. If after conducting a state and federal criminal history record check the Board determines that it is not authorized to issue a fingerprint clearance, the Board shall notify the full-service drug wholesale applicant or permittee that employs the designated representative that the Board is not authorized to issue a fingerprint clearance. This notice shall include the criminal history information on which the denial was based. This criminal history information is subject to dissemination restrictions under A.R.S. § 41-1750 and federal law.
 4. The issuance of a fingerprint clearance does not entitle a person to employment.

R4-23-606. Resident-Pharmacy Permit: Community, Hospital, and Limited Service

- A.** Permit. A person shall not operate a pharmacy in Arizona without a current Board-issued pharmacy permit.
- B.** Application.
 - 1. To obtain a permit to operate a pharmacy in Arizona, a person shall submit a completed application form and fee as specified in R4-23-602 that includes:
 - a. Documentation of compliance with local zoning laws, if required by the Board;
 - b. A detailed floor plan showing proposed pharmacy area including size and security;
 - c. A copy of the lease agreement, if applicable; and
 - d. A disclosure statement indicating whether a medical practitioner will receive compensation, either directly or indirectly, from the pharmacy.
 - 2. Before issuing a pharmacy permit, the Board shall:
 - a. Receive and approve a completed permit application; and
 - b. Receive a satisfactory compliance inspection report on the facility from a Board compliance officer.
 - 3. Before issuing a pharmacy permit, the Board may interview the applicant and the pharmacist-in-charge, if different from the applicant, at a Board meeting based on the need for additional information.
- C.** Notification. A pharmacy permittee shall notify the Board office within ten days of changes involving the type of pharmacy operated, telephone number, facsimile number, e-mail address, mailing address, name of business, or staff pharmacist. A pharmacy permittee shall provide the Board office immediate notice of a change of the pharmacist-in-charge.
- D.** If any nonprescription drugs are sold outside the pharmacy area when the pharmacy area is closed, the pharmacy permittee shall ensure that the business has a current, Board-issued nonprescription drug permit as required in Section R4-23-603.
- E.** Change of ownership. No less than 14 days before a change of ownership occurs that involves changes of stock ownership of 30% or more of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit a completed application form and fee as specified in subsection (B).
- F.** Relocation or remodel.
 - 1. No less than 30 days before the relocation or remodel of an existing pharmacy, the pharmacy permittee shall submit a completed application for remodel or relocation electronically or manually on a form furnished by the Board.
 - a. An application for relocation shall include the documents required by subsections (B)(1)(a) through (d).

- b. An application for remodel shall include the document required by subsection (B)(1)(b).
- 2. The new or remodeled facility shall pass a final inspection by a Board compliance officer before operations begin.

- G.** Permit renewal. Permit renewal shall be as specified in R4-23-602(D).

Historical Note

Former Rules 6.6010, 6.6020, 6.6030, 6.6040, 6.6050, 6.6060, 6.6071, 6.6072, 6.6073, 6.6074, 6.6075, and 6.6076. Amended effective August 10, 1978 (Supp. 78-4). Amended subsections (G) and (H) effective August 12, 1988 (Supp. 88-3). Amended effective November 1, 1993 (Supp. 93-4). Section heading amended effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 7 A.A.R. 3825, effective August 9, 2001 (Supp. 01-3). Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2).

R4-23-607. Nonresident Permits

- A.** Permit. A person who is not a resident of Arizona shall not sell or distribute any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical into Arizona without:
 - 1. Processing a current Board-issued nonresident pharmacy permit, nonresident manufacturer permit, nonresident full-service or nonprescription drug wholesale permit, or nonresident nonprescription drug permit;
 - 2. Possessing a current equivalent license or permit issued by the licensing authority in the jurisdiction where the person or firm resides;
 - 3. For a nonresident pharmacy, employing a pharmacist who is designated as the pharmacist-in-charge and who possesses a current Arizona Board-issued pharmacist license; and
 - 4. For a nonresident pharmacy permit issued before April 7, 2007, complying with subsection (A)(3) and submitting to the Board the pharmacist-in-charge's name, current Arizona Board-issued pharmacist license number, and telephone number by November 1, 2007.
- B.** Application. To obtain a nonresident pharmacy, nonresident manufacturer, nonresident full-service or nonprescription drug wholesale, or nonprescription drug permit, a person shall submit a completed application, on a form furnished by the Board, that includes:
 - 1. Business name, address, mailing address, if different, telephone number, and facsimile number;
 - 2. Owner's name, if corporation or partnership, officers or partners, including address and title, and any other trade or business names used;
 - 3. Whether the owner, corporation, or partnership has conducted a similar business in any other jurisdiction and if so, indicate under what name and location;
 - 4. Whether the owner, any officer, or active partner has ever been convicted of an offense involving moral turpitude, a felony offense, or any drug-related offense or has any currently pending felony or drug-related charges, and if so, indicate charge, conviction date, jurisdiction, and location;
 - 5. A copy of the applicant's current equivalent license or permit, issued by the licensing authority in the jurisdiction where the person or firm resides and required by subsection (A)(2);

Board of Pharmacy

6. For an application submitted because of ownership change, the former owner's name and business name, if different;
7. Date signed, and applicant's, corporate officer's, partner's, manager's, administrator's, pharmacist-in-charge's, or designated representative's verified signature and title; and
8. Fee specified in R4-23-205.
- C.** In addition to the requirements of subsection (B), the following information is required on the application:
1. Nonresident pharmacy.
 - a. The type of pharmacy;
 - b. Whether the owner, any officer, or active partner has ever been denied a pharmacy permit in this state or any other jurisdiction, and if so, indicate where and when;
 - c. If applying for a hospital pharmacy permit, the number of beds, manager's or administrator's name, and a copy of the hospital's current equivalent license or permit issued by the licensing authority in the jurisdiction where the person or firm resides;
 - d. Pharmacist-in-charge's name, current Arizona Board-issued pharmacist license number, and telephone number; and
 - e. For an application submitted because of ownership change, the former pharmacy's name, address, and permit number; and
 2. Nonresident manufacturer.
 - a. Whether the owner, any officer, or active partner has ever been denied a drug manufacturer permit in this state or any other jurisdiction, and if so, indicate where and when;
 - b. A copy of the drug list required by the FDA;
 - c. Manager's or responsible person's name, address, and emergency telephone number; and
 - d. The firm's current FDA drug manufacturer or repackager registration number and expiration date; and
 3. Nonresident full-service drug wholesaler.
 - a. The designated representative's name, address, and emergency telephone number;
 - b. Documentation that the designated representative meets the requirements of A.R.S. § 32-1982(B) and the following as specified in A.R.S. § 32-1982(C):
 - i. A full set of fingerprints from the designated representative; and
 - ii. The state and federal criminal history record check fee specified by and made payable to the Arizona State Department of Public Safety by money order, certified check, or bank draft; and
 - c. A \$100,000 bond as specified in A.R.S. § 32-1982(D) submitted on a form supplied by the Board; and
 4. Nonresident full-service or nonprescription drug wholesaler.
 - a. The type of drug wholesale permit;
 - b. Whether the owner, any officer, or active partner has ever been denied a drug wholesale permit in this state or any other jurisdiction, and if so, indicate where and when;
 - c. The types of drugs, nonprescription, prescription-only, controlled substances, human, or veterinary, the applicant will distribute;
 - d. Manager's or designated representative's name, address, emergency telephone number, and résumé indicating educational or experiential qualifications related to drug wholesale operation; and
- D.** Before issuing a nonresident full-service drug wholesale permit, the Board shall:
1. Receive and approve a completed permit application; and
 2. Issue a fingerprint clearance to a qualified designated representative, as specified in R4-23-605(L). If a nonresident full-service drug wholesale permit applicant's designated representative's fingerprint clearance is denied, the nonresident full-service drug wholesale permit applicant shall appoint another designated representative and submit the documentation, fingerprints, and fee required in subsection (C)(3)(b).
- E.** Notification. A permittee shall submit any notification of change required in this subsection as a written notice via mail, fax, or e-mail to the Executive Director within 10 days of the change, except any change of ownership requires that the nonresident permittee comply with subsection (F).
1. Nonresident pharmacy. A nonresident pharmacy permittee shall notify the Board of changes involving the type of pharmacy operated, ownership, address, telephone number, name of business, or pharmacist-in-charge.
 2. Nonresident manufacturer. A nonresident manufacturer permittee shall notify the Board of changes involving listed drugs, ownership, address, telephone number, name of business, or manager, including manager's telephone number.
 3. Nonresident drug wholesaler. A nonresident full-service or nonprescription drug wholesale permittee shall notify the Board of changes involving the types of drugs sold or distributed, ownership, address, telephone number, name of business, or manager or designated representative, including the manager's or designated representative's telephone number. For a change of designated representative, a nonresident full-service drug wholesale permittee shall submit the documentation, fingerprints, and fee required in subsection (C)(3)(b). If a nonresident full-service drug wholesale permit applicant's designated representative's fingerprint clearance is denied, the nonresident full-service drug wholesale permittee shall appoint another designated representative and submit the documentation, fingerprints, and fee required in subsection (C)(3)(b).
 4. Nonresident nonprescription drug retailer. A nonresident nonprescription drug permittee shall notify the Board of changes involving permit category, ownership, address, telephone number, name of business, or manager, including manager's telephone number.
- F.** Change of ownership. Before a change of ownership occurs that involves changes of stock ownership of more than 30% of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit the appropriate application packet described under subsections (B) and (C).
- G.** Drug sales.
1. Nonresident pharmacy. A nonresident pharmacy permittee shall:

Board of Pharmacy

- a. Not sell, distribute, give away, or dispose of any narcotic or other controlled substance or prescription-only drug or device, to anyone in Arizona except:
- i. A pharmacy, drug manufacturer, or full-service drug wholesaler currently permitted by the Board;
 - ii. A medical practitioner currently licensed under A.R.S. Title 32; or
 - iii. An Arizona resident upon receipt of a valid prescription order for the resident;
- b. Not sell, distribute, give away, or dispose of any nonprescription drug, precursor chemical, or regulated chemical, to anyone in Arizona except:
- i. A pharmacy, drug manufacturer, full-service or nonprescription drug wholesaler, or nonprescription drug retailer currently permitted by the Board;
 - ii. A medical practitioner currently licensed under A.R.S. Title 32; or
 - iii. An Arizona resident either upon receipt of a valid prescription order for the resident or in the original container packaged and labeled by the manufacturer;
- c. Except for a drug sale that results from the receipt and dispensing of a valid prescription order for an Arizona resident, maintain a copy of the current permit or license of each person or firm in Arizona who buys, receives, or disposes of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
- d. Provide permit and license records upon request, if immediately available, or in no less than two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
2. Nonresident manufacturer. A nonresident manufacturer permittee shall:
- a. Not sell, distribute, give away, or dispose of any narcotic or other controlled substance or prescription-only drug or device, to anyone in Arizona except, a pharmacy, drug manufacturer, or full-service drug wholesaler currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - b. Not sell, distribute, give away, or dispose of any nonprescription drug, precursor chemical, or regulated chemical, to anyone in Arizona except, a pharmacy, drug manufacturer, full-service or nonprescription drug wholesaler, or nonprescription drug retailer currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - c. Maintain a copy of the current permit or license of each person or firm in Arizona who buys, receives, or disposes of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
 - d. Provide permit and license records upon request, if immediately available, or in no less than two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
3. Nonresident full-service drug wholesaler. In addition to complying with the distributions restrictions specified in A.R.S. § 32-1983, a nonresident full-service drug wholesale permittee shall:
- a. Not sell, distribute, give away, or dispose of, any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical to anyone in Arizona, except in the original container, packaged and labeled by the manufacturer or repackager;
 - b. Not package, repackage, label, or relabel any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical for shipment or delivery to anyone in Arizona;
 - c. Provide pedigree records upon request, if immediately available, or in no less than two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5);
 - d. Not sell, distribute, give away, or dispose of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical to anyone in Arizona except a pharmacy, drug manufacturer, or full-service drug wholesaler currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - e. Not sell, distribute, give away, or dispose of, any nonprescription drug, precursor chemical, or regulated chemical, to anyone in Arizona except, a pharmacy, drug manufacturer, full-service or nonprescription drug wholesaler, or nonprescription drug retailer currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - f. Maintain a copy of the current permit or license of each person or firm in Arizona who buys, receives, or disposes of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical; and
 - g. Provide permit and license records upon request, if immediately available, or in no less than two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
4. Nonresident nonprescription drug wholesaler. A nonresident nonprescription drug wholesale permittee shall:
- a. Not sell, distribute, give away, or dispose of any nonprescription drug, precursor chemical, or regulated chemical to anyone in Arizona, except in the original container, packaged and labeled by the manufacturer or repackager;
 - b. Not package, repackage, label, or relabel any nonprescription drug, precursor chemical, or regulated chemical for shipment or delivery to anyone in Arizona;
 - c. Not sell, distribute, give away, or dispose of, any nonprescription drug, precursor chemical, or regulated chemical, to anyone in Arizona except, a pharmacy, drug manufacturer, full-service or nonprescription drug wholesaler, or nonprescription drug retailer currently permitted by the Board or a medical practitioner currently licensed under A.R.S. Title 32;
 - d. Maintain a copy of the current permit or license of each person or firm in Arizona who buys, receives,

Board of Pharmacy

- or disposes of any nonprescription drug, precursor chemical, or regulated chemical; and
- e. Provide permit and license records upon request, if immediately available, or in no less than two business days from the date of the request of a Board compliance officer or other authorized officer of the law as defined in A.R.S. § 32-1901(5).
5. Nonresident nonprescription drug retailer. A nonresident nonprescription drug permittee shall not:
- a. Sell, distribute, give away, or dispose of a nonprescription drug, precursor chemical, or regulated chemical to anyone in Arizona except in the original container packaged and labeled by the manufacturer;
 - b. Package, repackage, label, or relabel any drug, precursor chemical, or regulated chemical for shipment or delivery to anyone in Arizona; or
 - c. Sell, distribute, give away, or dispose of any drug, precursor chemical, or regulated chemical to anyone in Arizona that exceeds its expiration date, is contaminated or deteriorated from excessive heat, cold, sunlight, moisture, or other factors, or does not comply with federal law.
- H. When selling or distributing any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical into Arizona, a nonresident pharmacy, nonresident manufacturer, nonresident full-service or nonprescription drug wholesale, or nonprescription drug permittee shall comply with federal law, the permittee's resident state drug law, and this Section.

Historical Note

Former Rules 6.6110, 6.6120, and 6.6130; Amended effective August 10, 1978 (Supp. 78-4). Repealed effective July 24, 1985 (Supp. 85-4). New Section adopted by final rulemaking at 6 A.A.R. 4589, effective November 14, 2000 (Supp. 00-4). Amended by final rulemaking at 7 A.A.R. 3825, effective August 9, 2001 (Supp. 01-3). Amended by final rulemaking at 10 A.A.R. 232, effective March 6, 2004 (Supp. 04-1). Amended by final rulemaking at 13 A.A.R. 520, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 13 A.A.R. 3477, effective December 1, 2007 (Supp. 07-4).

R4-23-608. Change of Personnel and Responsibility

- A. A community, hospital, or limited-service pharmacy permittee shall give the Board:
 - 1. Notice by mail, facsimile, or electronic mail within ten days of employing or terminating a pharmacist; and
 - 2. Immediate notice of designating or terminating a pharmacist-in-charge.
- B. Responsibility of ownership and management. The owner and management of a pharmacy shall:
 - 1. Ensure that pharmacists, interns, and other pharmacy employees comply with state and federal laws and administrative rules; and
 - 2. Not overrule a pharmacist in matters of pharmacy ethics and interpreting laws pertaining to the practice of pharmacy or the distribution of drugs and devices.
- C. The Board may suspend or revoke a pharmacy permit if the owner or management of a pharmacy violates subsection (B).

Historical Note

Former Rules 6.6140 and 6.6150; Amended subsection (A) effective August 9, 1983 (Supp. 83-4). Amended effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 4253, effective September

11, 2001 (Supp. 01-3).

R4-23-609. Pharmacy Area of Community Pharmacy

- A. Minimum area of community pharmacy. The minimum area of a community pharmacy, the actual area primarily devoted to stocking drugs restricted to pharmacists, and to the compounding and dispensing of prescription medication, exclusive of office area or other support function area, shall not be less than 300 square feet. A maximum of three pharmacy personnel may practice or work simultaneously in the minimum area. The pharmacy permittee shall provide an additional 60 square feet of floor area for each additional pharmacist, graduate intern, pharmacy intern, pharmacy technician, pharmacy technician trainee, or support personnel who may practice or work simultaneously. All of the allotted square footage area, including adequate shelving, shall lend itself to efficient pharmaceutical practice and permit free movement and visual surveillance of personnel by the pharmacist.
- B. Compounding and dispensing counter. On or after January 6, 2004, a pharmacy permit applicant or remodel or relocation applicant shall provide a compounding and dispensing counter that provides a minimum of three square feet of pharmacy counter working area of not less than 16 inches in depth and 24 inches in length for the practice of one pharmacist, graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee. For each additional pharmacist, graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee practicing simultaneously, there shall be an additional three square feet of pharmacy counter working area of not less than 16 inches in depth and 24 inches in length. The Board shall determine a pharmacy's total required compounding and dispensing counter area by multiplying the maximum number of personnel allowed in the pharmacy area using the requirements specified in subsection (A) by three square feet per person. A pharmacy permittee or pharmacist-in-charge may operate the pharmacy with a total pharmacy counter working area specified in subsection (A) that is equal to the actual maximum number of pharmacists, graduate interns, pharmacy interns, pharmacy technicians, and pharmacy technician trainees, working simultaneously in the pharmacy area times three square feet per person.
- C. Working area for compounding and dispensing counter. The aisle floor area used by the pharmacist, graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee at the compounding and dispensing counter shall extend the full length of the counter and be clear and continuous for a minimum of 36 inches from any counter, fixture, or structure.
- D. Area for patient counseling. On or after April 1, 1995, a pharmacy permit applicant or remodel or relocation applicant shall provide a separate and distinct patient counseling area that provides patient privacy. This subsection does not apply to a pharmacy exempt from the requirements of R4-23-402(B).
- E. Narcotic cabinet or safe. To prevent diversion, narcotics and other controlled substances may be:
 - 1. Kept in a separate locked cabinet or safe, or
 - 2. Dispersed throughout the pharmacy's prescription-only drug stock.
- F. Building security standard of community pharmacy area. The pharmacy area shall be enclosed by a permanent barrier or partition from floor or counter to structural ceiling or roof, with entry doors that can be securely locked. The barrier shall be designed so that only a pharmacist can access the area where prescription-only drugs, narcotics, and other controlled substances are stored, compounded and dispensed. The permanent barrier may be constructed of other than a solid material. If constructed of a material other than a solid, the openings or

Board of Pharmacy

interstices of the material shall not be large enough to permit removal of items in the pharmacy area through the barrier. Any material used in the construction of the permanent barrier must be of sufficient strength and thickness that it cannot be readily or easily removed, penetrated, or bent. The pharmacy permittee shall submit plans and specifications of the permanent barrier to the Board for approval.

G. Drug storage and security.

1. The pharmacy permittee shall ensure that drugs and devices are stored in a dry, well-lit, ventilated, and clean and orderly area. The pharmacy permittee shall maintain the drug storage area at temperatures that ensure the integrity of the drugs before dispensing as stated in the official compendium defined in A.R.S. § 32-1901(55) or the manufacturer's or distributor's labeling.
 2. If the pharmacy permittee needs additional storage area for drugs that are restricted to sale by a pharmacist, the pharmacy permittee shall ensure that the area is contained by a permanent barrier from floor or counter to structural ceiling or roof. The pharmacy permittee shall lock all doors and gates to the drug storage area. Only a pharmacist with a key is permitted to enter the storage area, except in an extreme emergency.
- H.** A pharmacy permittee or pharmacist-in-charge shall ensure that the pharmacy working counter area is protected from unauthorized access while the pharmacy is open for business by a barrier not less than 66 inches in height or another method approved by the Board or its designee.

Historical Note

Former Rules 6.6210, 6.6220, 6.6230, 6.6240, 6.6250, 6.6310, 6.6320, and 6.6330; Amended effective August 10, 1978 (Supp. 78-4). Amended effective August 9, 1983 (Supp. 83-4). Amended effective November 1, 1993 (Supp. 93-4). Amended effective April 1, 1995; filed with the Secretary of State January 31, 1995 (Supp. 95-1). Amended by final rulemaking at 9 A.A.R. 5030, effective January 3, 2004 (Supp. 03-4). Amended by final rulemaking at 19 A.A.R. 97, effective March 10, 2013 (Supp. 13-1).

R4-23-610. Community Pharmacy Personnel and Security Procedures

- A.** Every pharmacy shall have a pharmacist designated as the "pharmacist-in-charge."
1. The pharmacist-in-charge shall ensure the communication and compliance of Board directives to the management, other pharmacists, interns, and technicians of the pharmacy.
 2. The pharmacist-in-charge shall:
 - a. Ensure that all pharmacy policies and procedures required under 4 A.A.C. 23 are prepared, implemented, and complied with;
 - b. Review biennially and, if necessary, revise all pharmacy policies and procedures required under 4 A.A.C. 23;
 - c. Document the review required under subsection (A)(2)(b);
 - d. Ensure that all pharmacy policies and procedures required under 4 A.A.C. 23 are assembled as a written or electronic manual; and
 - e. Make all pharmacy policies and procedures required under 4 A.A.C. 23 available in the pharmacy for employee reference and inspection by the Board or its staff.
- B.** Personnel permitted in the pharmacy area of a community pharmacy include pharmacists, graduate interns, pharmacy

interns, compliance officers, drug inspectors, peace officers acting in their official capacity, other persons authorized by law, pharmacy technicians, pharmacy technician trainees, support personnel, and other designated personnel. Pharmacy interns, graduate interns, pharmacy technicians, pharmacy technician trainees, support personnel, and other designated personnel shall be permitted in the pharmacy area only when a pharmacist is on duty, except in an extreme emergency as defined in R4-23-110.

1. The pharmacist-in-charge shall comply with the minimum area requirements as described in R4-23-609 for a community pharmacy and for compounding and dispensing counter area.
 2. A pharmacist employed by a pharmacy shall ensure that the pharmacy is physically secure while the pharmacist is on duty.
- C.** In a community pharmacy, a pharmacist shall ensure that the pharmacy area, and any additional storage area for drugs that is restricted to access only by a pharmacist is locked when a pharmacist is not present, except in an extreme emergency.
- D.** A pharmacist is the only person permitted by the Board to unlock the pharmacy area or any additional storage area for drugs restricted to access only by a pharmacist, except in an extreme emergency.
- E.** A pharmacy permittee or pharmacist-in-charge shall ensure that any prescription-only drugs and controlled substances received in an area outside the pharmacy area are immediately transferred unopened to the pharmacy area. The pharmacist-in-charge shall ensure that any prescription-only drug and controlled substance shipments are opened and marked by pharmacy personnel in the pharmacy area under the supervision of a pharmacist, graduate intern, or pharmacy intern.
- F.** A pharmacy permittee or pharmacist-in-charge may provide a small opening or slot through which a written prescription order or prescription medication container to be refilled may be left in the prescription area when the pharmacist is not present.
- G.** A pharmacist shall ensure that prescription medication is not left outside the prescription area or picked up by the patient when the pharmacist is not present by either:
 1. Delivering the prescription medication to the patient, or
 2. Securing the prescription medication inside the locked pharmacy, except when using an automated storage and distribution system that complies with the requirements of R4-23-614.

Historical Note

Former Rules 6.6410, 6.6420, 6.6430, 6.6440, 6.6450, 6.6460, 6.6470, 6.6480, and 6.6490; Amended subsection (F), deleted subsection (I) effective August 9, 1983 (Supp. 83-4). Amended effective May 16, 1990 (Supp. 90-2). Amended effective November 1, 1993 (Supp. 93-4). Amended effective April 1, 1995; filed with the Secretary of State January 31, 1995 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 4441, effective November 2, 1999 (Supp. 99-4). Amended by final rulemaking at 10 A.A.R. 4453, effective December 4, 2004 (Supp. 04-4). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 13 A.A.R. 2631, effective September 8, 2007 (Supp. 07-3).

R4-23-611. Pharmacy Facilities

- A.** Facilities. A pharmacy permittee or pharmacist-in-charge shall ensure that:
1. A pharmacy's facilities are constructed according to state and local laws and ordinances;

Board of Pharmacy

2. A pharmacy facility's:
 - a. Walls, ceilings, windows, floors, shelves, and equipment are clean and in good repair and order; and
 - b. Counters, shelves, aisles, and open spaces are not cluttered;
 3. Adequate trash receptacles are provided and emptied periodically during the day;
 4. A pharmacy facility of any pharmacy permit issued or pharmacy remodeled after February 1, 2014 provides access to toilet facilities either:
 - a. Within the pharmacy area, or
 - b. No further than a walking distance of 100 feet from the pharmacy area or an alternative distance approved by the Board or its designee;
 5. The toilet facilities are maintained in a sanitary condition and in good repair;
 6. All professional personnel and staff of the pharmacy keep themselves and their apparel clean while in the pharmacy area;
 7. No animals, except licensed assistant animals and guard animals, are allowed in the pharmacy;
 8. The pharmacy facility is kept free of insects and rodents; and
 9. There is a sink with hot and cold running water, other than a sink in a toilet facility, within the pharmacy area for use in preparing drug products.
- B.** Supply of drugs and chemicals. A pharmacy permittee or pharmacist-in-charge shall ensure that:
1. A pharmacy maintains a stock of drugs and chemicals that:
 - a. Are sufficient to meet the normal demands of the trading area or patient base the pharmacy serves; and
 - b. Meet all standards of strength and purity as established by the official compendiums;
 2. All stock, materials, drugs, and chemicals held for ultimate sale or supply to the consumer are not contaminated;
 3. Policies and procedures are developed, implemented, and complied with to prevent the sale or use of a drug or chemical:
 - a. That exceeds its expiration date;
 - b. That is deteriorated or damaged by reason of age, heat, light, cold, moisture, crystallization, chemical reaction, rupture of coating, disintegration, solidification, separation, discoloration, change of odor, precipitation, or other change as determined by organoleptic examination or by other means;
 - c. That is improperly labeled;
 - d. Whose container is defective; or
 - e. That does not comply with federal law; and
 4. The policies and procedures described in subsection (B)(3):
 - a. Are made available in the pharmacy for employee reference and inspection by the Board or its designee; and
 - b. Provide the following:
 - i. Any expiration-dated drug or chemical is reviewed regularly;
 - ii. Any drug or chemical that exceeds its expiration date, is deteriorated or damaged, improperly labeled, has a defective container, or does not comply with federal law, is moved to a quarantine area and not sold or distributed; and
 - iii. Any quarantined drug or chemical is properly destroyed or returned to its source of supply.

Historical Note

Former Rules 6.6510, 6.6520, 6.6530, 6.6540, 6.6550, 6.6560, 6.6570, 6.6580, 6.6600, 6.6610, 6.6620, 6.6630, 6.6640, 6.6650, and 6.6660; Amended subsection (B) effective August 9, 1983 (Supp. 83-4). Amended effective April 1, 1995; filed with the Secretary of State January 31, 1995 (Supp. 95-1). Amended by final rulemaking at 7 A.A.R. 4253, effective September 11, 2001 (Supp. 01-3). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 19 A.A.R. 4165, effective February 1, 2014 (Supp. 13-4).

R4-23-612. Equipment

A pharmacy permittee or pharmacist-in-charge shall ensure that a pharmacy has the necessary equipment to allow a pharmacist to practice the profession of pharmacy, including the following:

1. Adequate refrigeration equipment dedicated to the storage of drugs and biologicals;
2. A C-V controlled substance register, if C-V controlled substances are sold without an order of a medical practitioner;
3. Graduates in assorted sizes;
4. One mortar and pestle, not required if the pharmacy permittee states in the application that compounding will not be performed in the pharmacy;
5. Spatulas of assorted sizes including one nonmetallic;
6. Prescription balance, Class A with weights or an electronic balance of equal or greater accuracy, not required if the pharmacy permittee states in the application that compounding will not be performed in the pharmacy;
7. One ointment tile or equivalent, not required if the pharmacy permittee states in the application that compounding will not be performed in the pharmacy
8. A current hard-copy or access to a current electronic-copy of the Arizona Pharmacy Act and administrative rules and Arizona Controlled Substance Act;
9. A professional reference library consisting of a minimum of one current reference or text, in hard-copy or electronic media, addressing the following subject areas:
 - a. Pharmacology or toxicology,
 - b. Therapeutics,
 - c. Drug compatibility, and
 - d. Drug product equivalency;
10. An assortment of labels, including prescription labels, transfer labels for controlled substances, and cautionary and warning labels;
11. A red C stamp as defined in R4-23-110, if C-III, C-IV, and C-V controlled substance invoices are not filed separately from other invoices;
12. Current antidote and drug interaction information; and
13. Regional poison control phone number prominently displayed in the pharmacy area.

Historical Note

Former Rule 6.6670; Former Section R4-23-612 repealed, new Section R4-23-612 adopted effective August 10, 1978 (Supp. 78-4). Amended effective August 9, 1983 (Supp. 83-4). Amended effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 7 A.A.R. 4253, effective September 11, 2001 (Supp. 01-3). Amended by final rulemaking at 19 A.A.R. 4165, effective February 1, 2014 (Supp. 13-4).

R4-23-613. Procedure for Discontinuing a Pharmacy

- A. A pharmacy permittee or pharmacist-in-charge shall provide written notice to the Board and the Drug Enforcement Administration (D.E.A.) at least 14 days before discontinuing opera-

Board of Pharmacy

- tion of the pharmacy. The notice shall contain the following information:
1. Name, address, pharmacy permit number, and D.E.A. registration number of the pharmacy discontinuing business;
 2. Name, address, pharmacy permit number (if applicable), and D.E.A. registration number (if applicable) of the licensee, permittee, or registrant to whom any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical will be sold or transferred;
 3. Name and address of the location where the discontinuing pharmacy's records of purchase and disbursement of any narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical will be kept and the person responsible for the records. These records shall be kept for a minimum of three years from the date the pharmacy is discontinued;
 4. Name and address of the location where the discontinuing pharmacy's prescription files and patient profiles will be kept and the person responsible for the files and profiles. These records shall be kept for a minimum of seven years from the date the last original or refill prescription was dispensed; and
 5. The proposed date of discontinuing business operations.
- B.** The pharmacy permittee shall ensure that all pharmacy signs and symbols are removed from both the inside and outside of the premises.
- C.** The pharmacy permittee or pharmacist-in-charge shall ensure that all state permits and certificates of registration are returned to the Board office and that D.E.A. registration certificates and unused D.E.A. Schedule II order forms are returned to the D.E.A. Regional Office in Phoenix.
- D.** The pharmacist-in-charge of the pharmacy discontinuing business shall ensure that:
1. Only a pharmacist has access to the prescription-only drugs and controlled substances until they are transferred to the licensee, permittee, or registrant listed in subsection (A)(2);
 2. All narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals are removed from the premises on or before the date the pharmacy is discontinued; and
 3. All controlled substances are transferred as follows:
 - a. Take an inventory of all controlled substances that are transferred using the procedures in R4-23-1003;
 - b. Include a copy of the inventory with the controlled substances that are transferred;
 - c. Keep the original of the inventory with the discontinued pharmacy's records of narcotic or other controlled substance, prescription-only drug or device, nonprescription drug, precursor chemical, or regulated chemical purchase and disbursement for a minimum of three years from the date the pharmacy is discontinued;
 - d. Use a D.E.A. form 222 to transfer any Schedule II controlled substances; and
 - e. Transfer controlled substances that need destruction in the same manner as all other controlled substances.
- E.** Upon receipt of outdated or damaged controlled substances from a discontinued pharmacy, the licensee, permittee, or registrant described in subsection (A)(2) shall contact a D.E.A. registered reverse distributor for proper destruction of out-

dated or damaged controlled substances. If there are controlled substances a reverse distributor will not accept, the licensee, permittee, or registrant shall then contact the Board office and request an inspection for the purpose of drug destruction.

- F.** During the three-year record retention period specified in subsection (A)(3), the person described in subsection (A)(3) shall provide to the Board upon its request a discontinued pharmacy's records of the purchase and disbursement of narcotics or other controlled substances, prescription-only drugs or devices, nonprescription drugs, precursor chemicals, or regulated chemicals.
- G.** During the seven-year record retention period specified in subsection (A)(4), the person described in subsection (A)(4) shall provide to the Board upon its request a discontinued pharmacy's records of prescription files and patient profiles.

Historical Note

New Section made by final rulemaking at 7 A.A.R. 3825, effective August 9, 2001 (Supp. 01-3). Amended by final rulemaking at 11 A.A.R. 1105, effective April 30, 2005 (Supp. 05-1). Amended by final rulemaking at 12 A.A.R. 1912, effective July 1, 2006 (Supp. 06-2). Amended by final rulemaking at 14 A.A.R. 3670, effective November 8, 2008 (Supp. 08-3).

R4-23-614. Automated Storage and Distribution System

- A.** Before using an automated storage and distribution system, a pharmacy permittee or pharmacist-in-charge shall:
 1. Ensure that the automated storage and distribution system and the policies and procedures comply with subsection (B); and
 2. Notify the Board in writing of the intent to use an automated storage and distribution system, including the type or name of the system.
- B.** A pharmacy permittee or pharmacist-in-charge shall establish policies and procedures for appropriate performance and use of the automated storage and distribution system that:
 1. Ensure that the automated storage and distribution system is in good working order while maintaining appropriate recordkeeping and security safeguards;
 2. Ensure that an automated storage and distribution system used by the pharmacy that allows access to drugs or devices by a patient:
 - a. Only contains prescriptions that:
 - i. Do not require oral consultation as specified in R4-23-402(B); and
 - ii. Are properly labeled and verified by a pharmacist before placement into the automated storage and distribution system and subsequent release to patients;
 - b. Allows a patient to choose whether or not to use the system;
 - c. Is located either in a wall of a properly permitted pharmacy or within 20 feet of a properly permitted pharmacy if the automated storage and distribution system is secured against the wall or floor in such a manner that prevents the automated storage and distribution system's unauthorized removal;
 - d. Provides a method to identify the patient and only release that patient's prescriptions;
 - e. Is secure from access and removal of drugs or devices by unauthorized individuals;
 - f. Provides a method for a patient to obtain a consultation with a pharmacist if requested by the patient; and
 - g. Does not allow the system to dispense refilled prescriptions if a pharmacist determines that the patient

Board of Pharmacy

- requires oral counseling as specified in R4-23-402(B);
3. Ensure that an automated storage and distribution system used by the pharmacy that allows access to drugs or devices only by authorized licensed personnel for the purposes of administration based on a valid prescription order or medication order:
 - a. Provides for adequate security to prevent unauthorized individuals from accessing or obtaining drugs or devices; and
 - b. Provides for the filling, stocking, or restocking of all drugs or devices in the system only by a Board licensee or other authorized licensed personnel; and
 4. Implement an ongoing quality assurance program that monitors compliance with the established policies and procedures of the automated storage and distribution system and federal and state law.
- C.** A pharmacy permittee or pharmacist-in-charge shall:
1. Ensure that the policies and procedures required under subsection (B) are prepared, implemented, and complied with;
 2. Review biennially and, if necessary, revise the policies and procedures required under subsection (B);
 3. Document the review required under subsection (C)(2);
 4. Assemble the policies and procedures as a written or electronic manual; and
 5. Make the policies and procedures available for employee reference and inspection by the Board or its staff within the pharmacy and at any location outside the pharmacy where the automated storage and distribution system is used.
- D.** The Board may prohibit a pharmacy permittee or pharmacist-in-charge from using an automated storage and distribution system if the pharmacy permittee or the pharmacy permittee's employees do not comply with the requirements of subsections (A), (B), or (C).

Historical Note

New Section made by final rulemaking at 13 A.A.R. 616, effective April 7, 2007 (Supp. 07-1).

R4-23-615. Mechanical Storage and Counting Device for a Drug in Solid, Oral Dosage Form

- A.** A pharmacy permittee or pharmacist-in-charge shall ensure that a mechanical storage and counting device for a drug in a solid, oral dosage form that is used by a pharmacist or a pharmacy intern, graduate intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist complies with the following method to identify the contents of the device:
1. The drug name and strength are affixed to the front of each cell or cassette of the device;
 2. A paper or electronic log is kept for each cell or cassette that contains:
 - a. An identification of the cell or cassette by the drug name and strength or the number of the cell or cassette;
 - b. The drug's manufacturer or National Drug Code (NDC) number;
 - c. The expiration date and lot number from the manufacturer's stock bottle that is used to fill the cell or cassette. If multiple lot numbers of the same drug are added to a cell or cassette, each lot number and expiration date shall be documented, and the earliest expiration date shall become the expiration date of the mixed lot of drug in the cell or cassette;
 - d. The date the cell or cassette is filled;
- B.** Documentation of the identity of the licensee who placed the drug into the cell or cassette; and
- C.** If the licensee who filled the cell or cassette is not a pharmacist, documentation of the identity of the pharmacist who supervised the non-pharmacist licensee who filled the cell or cassette; and
- D.** The paper or electronic log is available in the pharmacy for inspection by the Board or its designee for not less than two years.
- E.** A pharmacy permittee or pharmacist-in-charge shall ensure that any drug previously counted by a mechanical storage and counting device for a drug in a solid, oral dosage form that has not left the pharmacy is not returned to the drug's cell, cassette, or stock bottle, unless the drug return method is approved by the Board or its designee as specified in subsection (G). This subsection does not prevent a pharmacy permittee or pharmacist-in-charge from using a manual or mechanical counting device to count and dispense a previously counted drug that has not left the pharmacy if the previously counted drug is dispensed before its beyond-use-date.
- F.** A pharmacy permittee or pharmacist-in-charge shall ensure the accuracy of any mechanical storage and counting device for a drug in a solid, oral dosage form that is used by a pharmacist or a pharmacy intern, graduate intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist by documenting completion of the following:
1. Training in the maintenance, calibration, and use of the mechanical storage and counting device for each employee who uses the mechanical storage and counting device;
 2. Maintenance and calibration of the mechanical storage and counting device as recommended by the device's manufacturer; and
 3. Routine quality assurance and accuracy validation testing for each mechanical storage and counting device.
- G.** A pharmacy permittee or pharmacist-in-charge shall ensure that the documentation required in subsection (C) is available for inspection by the Board or its designee.
- H.** A pharmacy permittee or pharmacist-in-charge shall:
1. Ensure that policies and procedures for the performance and use of a mechanical storage and counting device for a drug in a solid, oral dosage form are prepared, implemented, and complied with;
 2. Review biennially and, if necessary, revise the policies and procedures required under subsection (E)(1);
 3. Document the review required under subsection (E)(2);
 4. Assemble the policies and procedures as a written or electronic manual; and
 5. Make the policies and procedures available within the pharmacy for employee reference and inspection by the Board or its staff.
- I.** The Board may prohibit a pharmacy permittee or pharmacist-in-charge from using a mechanical storage and counting device for a drug in a solid, oral dosage form if the pharmacy permittee or the pharmacy permittee's employees do not comply with the requirements of subsections (A), (B), (C), (D), or (E).
- J.** Returning a drug previously counted by a mechanical storage and counting device for a drug in a solid, oral dosage form that has not left the pharmacy to the drug's cell or cassette.
1. Before returning a drug previously counted by a mechanical storage and counting device that has not left the pharmacy to the drug's cell or cassette, a pharmacy permittee or pharmacist-in-charge shall:

Board of Pharmacy

- a. Apply for approval from the Board or its designee for the drug return method to be used in returning the drug;
 - b. Develop a drug return method that uses technology, such as bar coding, to prevent drug return errors;
 - c. Provide documentation depicting the drug return method;
 - d. Demonstrate the drug return method for a Board Compliance Officer; and
 - e. Receive approval from the Board or its designee for the drug return method to be used in returning the drug.
2. Before approving a request to waive the drug return prohibition in subsection (B), the Board or its designee shall:
 - a. Receive a request in writing from the pharmacy permittee or pharmacist-in-charge;
 - b. Review the documentation of the drug return method; and
 - c. Receive a satisfactory inspection report from a Board Compliance Officer that the drug return method uses technology to prevent drug return errors.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 616, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 3677, effective November 8, 2008 (Supp. 08-3).

R4-23-616. Mechanical Counting Device for a Drug in Solid, Oral Dosage Form

- A. A pharmacy permittee or pharmacist-in-charge shall ensure the accuracy of any mechanical counting device for a drug in a solid, oral dosage form that is used by a pharmacist or a pharmacy intern, graduate intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist by documenting completion of the following:
 1. Training in the maintenance, calibration, and use of the mechanical counting device for each employee who uses the mechanical counting device;
 2. Maintenance and calibration of the mechanical counting device as recommended by the device's manufacturer; and
 3. Routine quality assurance and accuracy validation testing for each mechanical counting device.
- B. A pharmacy permittee or pharmacist-in-charge shall ensure that the documentation required in subsection (A) is available for inspection by the Board or its designee.
- C. A pharmacy permittee or pharmacist-in-charge shall:
 1. Ensure that policies and procedures for the performance and use of a mechanical counting device for a drug in a solid, oral dosage form are prepared, implemented, and complied with;
 2. Review biennially and, if necessary, revise the policies and procedures required under subsection (C)(1);
 3. Document the review required under subsection (C)(2);
 4. Assemble the policies and procedures as a written or electronic manual; and
 5. Make the policies and procedures available within the pharmacy for employee reference and inspection by the Board or its staff.
- D. The Board may prohibit a pharmacy permittee or pharmacist-in-charge from using a mechanical counting device for a drug in a solid, oral dosage form if the pharmacy permittee or the pharmacy permittee's employees do not comply with the requirements of subsections (A), (B), or (C).

Historical Note

New Section made by final rulemaking at 13 A.A.R. 616, effective April 7, 2007 (Supp. 07-1).

R4-23-617. Temporary Pharmacy Facilities or Mobile Pharmacies

- A. Pharmacies located in declared disaster areas, nonresident pharmacies, and pharmacies licensed or permitted in another state but not licensed or permitted in this state, if necessary to provide pharmacy services during a declared state of emergency, may arrange to temporarily locate to a temporary pharmacy facility or mobile pharmacy or relocate to a temporary pharmacy facility or mobile pharmacy if the pharmacist-in-charge of the temporary pharmacy facility or mobile pharmacy ensures that:
 1. The pharmacy is under the control and management of the pharmacist-in-charge or a supervising pharmacist designated by the pharmacist-in-charge;
 2. The pharmacy is located within or adjacent to the declared disaster area;
 3. The Board is notified of the pharmacy's location;
 4. The pharmacy is properly secured to prevent theft and diversion of drugs;
 5. The pharmacy's records are maintained in accordance with Arizona statutes and rules; and
 6. The pharmacy stops providing pharmacy services when the declared state of emergency ends, unless it possesses a current resident pharmacy permit issued by the Board under A.R.S. §§ 32-1929, 32-1930, and 32-1931.
- B. The Board shall have the authority to approve or deny temporary pharmacy facilities, mobile pharmacies, and shall make arrangements for appropriate monitoring and inspection of the temporary pharmacy facilities and mobile pharmacies on a case-by-case basis.
- C. A temporary pharmacy facility wishing to permanently operate at its temporary site shall apply for and have received a permit issued under A.R.S. §§ 32-1929, 32-1930, and 32-1931 by following the application process under R4-23-606.
- D. A mobile pharmacy, placed in operation during a declared state of emergency, shall not operate permanently.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4400, effective January 3, 2009 (Supp. 08-4).

R4-23-618. Reserved**R4-23-619. Reserved****R4-23-620. Continuous Quality Assurance Program**

- A. Each pharmacy permittee shall implement or participate in a continuous quality assurance (CQA) program. A pharmacy permittee meets the requirements of this Section if it holds a current general, special or rural general hospital license from the Arizona Department of Health Services and is any of the following:
 1. Certified by the Centers for Medicare and Medicaid Services to participate in the Medicare or Medicaid programs;
 2. Accredited by the Joint Commission on the Accreditation of Healthcare Organizations; or
 3. Accredited by the American Osteopathic Association.
- B. A pharmacy permittee or the pharmacist-in-charge shall ensure that:
 1. The pharmacy develops, implements, and utilizes a CQ program consistent with the requirements of this Section and A.R.S. § 32-1973;

Board of Pharmacy

- 2. The medication error data generated by the CQA program is utilized and reviewed on a regular basis, as required by subsection (D); and
- 3. Training records, policies and procedures, and other program records or documents, other than medication error data, are maintained for a minimum of two years in the pharmacy or in a readily retrievable manner.
- C. A pharmacy permittee or pharmacist-in-charge shall:
 - 1. Ensure that policies and procedures for the operation and management of the pharmacy's CQA program are prepared, implemented, and complied with;
 - 2. Review biennially and, if necessary, revise the policies and procedures required under subsection (C)(1);
 - 3. Document the review required under subsection (C)(2);
 - 4. Assemble the policies and procedures as a written or electronic manual; and
 - 5. Make the policies and procedures available within the pharmacy for employee reference and inspection by the Board or its staff.
- D. The policies and procedures shall address a planned process to:
 - 1. Train all pharmacy personnel in relevant phases of the CQA program;
 - 2. Identify and document medication errors;
 - 3. Record, measure, and analyze data collected to:
 - a. Assess the causes and any contributing factors relating to medication errors, and
 - b. Improve the quality of patient care;
 - 4. Utilize the findings from subsections (D)(2) and (3) to develop pharmacy systems and workflow processes designed to prevent or reduce medication errors; and
 - 5. Communicate periodically, and at least annually, with pharmacy personnel to review CQA program findings and inform pharmacy personnel of any changes made to pharmacy policies, procedures, systems, or processes as a result of CQA program findings.
- E. The Board's regulatory oversight activities regarding a pharmacy's CQA program are limited to inspection of the pharmacy's CQA policies and procedures and enforcing the pharmacy's compliance with those policies and procedures.
- F. A pharmacy's compliance with this Section shall be considered by the Board as a mitigating factor in the investigation and evaluation of a medication error.

Historical Note

New Section made by final rulemaking at 18 A.A.R.
2603, effective December 2, 2012 (Supp. 12-4).

R4-23-621. Shared Services

- A. Before participating in shared services, a pharmacy shall have either a current resident or non-resident pharmacy permit issued by the Board.
- B. A pharmacy may provide or utilize shared services functions only if the pharmacies involved:
 - 1. Have the same owner, or
 - 2. Have a written contract or agreement that outlines the services provided and the shared responsibilities of each party in complying with federal and state pharmacy statutes and rules, and
 - 3. Share a common electronic file or technology that allows access to information necessary or required to perform shared services in conformance with the pharmacy act and the Board's rules.
- C. Notifications to patients.
 - 1. Before using shared services provided by another pharmacy, a pharmacy permittee shall:
 - a. Notify patients that their orders may be processed or filled by another pharmacy; and
 - b. Provide the name of that pharmacy or, if the pharmacy is part of a network of pharmacies under common ownership and any of the network pharmacies may process or fill the order, notify the patient of this fact. The notification may be provided through a one-time written notice to the patient or through use of a sign in the pharmacy.
 - 2. If an order is delivered directly to the patient by a filling pharmacy and not returned to the requesting pharmacy, the filling pharmacy permittee shall ensure that the following is placed on the prescription container or on a separate sheet delivered with the prescription container:
 - a. The local, and if applicable, the toll-free telephone number of the pharmacy utilizing shared services that has access to the patient's records; and
 - b. A statement that conveys to the patient or patient's care-giver the following information: "Written information about this prescription has been provided for you. Please read this information before you take the medication. If you have questions concerning this prescription, a pharmacist is available during normal business hours to answer these questions at (insert the local and toll-free telephone numbers of the pharmacy utilizing shared services that has access to the patient's records)."
 - 3. The provisions of subsection (C) do not apply to orders delivered to patients in facilities where a licensed health care professional is responsible for administering the prescription medication to the patient.
- D. A pharmacy permittee engaged in shared services shall:
 - 1. Maintain manual or electronic records that identify, individually for each order processed, the name, initials, or identification code of each pharmacist, graduate intern, pharmacy intern, pharmacy technician, and pharmacy technician trainee who took part in the order interpretation, order entry verification, drug utilization review, drug compatibility and drug allergy review, final order verification, therapeutic intervention, or refill authorization functions performed at that pharmacy;
 - 2. Maintain manual or electronic records that identify, individually for each order filled or dispensed, the name, initials, or identification code of each pharmacist, graduate intern, pharmacy intern, pharmacy technician, and pharmacy technician trainee who took part in the filling, dispensing, and counseling functions performed at that pharmacy;
 - 3. Report to the Board as soon as practical the results of any disciplinary action taken by another state's pharmacy regulatory agency involving shared services;
 - 4. Maintain a mechanism for tracking the order during each step of the processing and filling procedures performed at the pharmacy;
 - 5. Provide for adequate security to protect the confidentiality and integrity of patient information; and
 - 6. Provide for inspection of any required record or information within 72 hours of any request by the Board or its designee.
- E. Each pharmacy permittee that provides or utilizes shared services shall develop, implement, review, revise, and comply with joint policies and procedures for shared services in the manner described in R4-23-610(A)(2). Each pharmacy permittee is required to maintain only those portions of the joint policies and procedures that relate to that pharmacy's operations. The policies and procedures shall:

Board of Pharmacy

1. Outline the responsibilities of each of the pharmacies;
 2. Include a list of the name, address, telephone numbers, and all license and permit numbers of the pharmacies involved in shared services; and
 3. Include policies and procedures for:
 - a. Notifying patients that their orders may be processed or filled by another pharmacy and providing the name of that pharmacy;
 - b. Protecting the confidentiality and integrity of patient information;
 - c. Dispensing orders when the filled order is not received or the patient comes in before the order is received;
 - d. Maintaining required manual or electronic records to identify the name, initials, or identification code and specific activity or activities of each pharmacist, graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee who performed any shared services;
 - e. Complying with federal and state laws; and
 - f. Operating a continuous quality improvement program for shared services, designed to objectively and systematically monitor and evaluate the quality and appropriateness of patient care, pursue opportunities to improve patient care, and resolve identified problems.
- F.** Nothing in this Section shall prohibit an individual pharmacist licensed in Arizona, who is an employee of or under contract with a pharmacy, or an Arizona-licensed graduate intern, pharmacy intern, pharmacy technician, or pharmacy technician trainee, working under the supervision of the pharmacist, from accessing that pharmacy's electronic database from inside or outside the pharmacy and performing the order processing functions permitted by the pharmacy act, if both of the following conditions are met:
1. The pharmacy establishes controls to protect the confidentiality and integrity of patient information; and
 2. None of the database is duplicated, downloaded, or removed from the pharmacy's electronic database.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 520, effective April 7, 2007 (Supp. 07-1). Amended by final rulemaking at 19 A.A.R. 97, effective March 10, 2013 (Supp. 13-1).

R4-23-650. Reserved**R4-23-651. Definitions**

The following definitions apply to R4-23-651 through R4-23-659:

“Administration” means the giving of a dose of medication to a patient as a result of an order of a medical practitioner.

“Direct copy” means an electronic, facsimile or carbonized copy.

“Dispensing for hospital inpatients” means the interpreting, evaluating, and implementing a medication order including preparing for delivery a drug or device to an inpatient or inpatient’s agent in a suitable container appropriately labeled for subsequent administration to, or use by, an inpatient (hereafter referred to as “dispensing”).

“Drug distribution” means the delivery of drugs other than “administering” or “dispensing.”

“Emergency medical situation” means a condition of emergency in which immediate drug therapy is required for the preservation of health, life, or limb of a person or persons.

“Floor stock” means a supply of essential drugs not labeled for a specific patient and maintained and controlled by the pharmacy at a patient care area for the purpose of timely administration to a patient of the hospital.

“Formulary” means a continually revised compilation of pharmaceuticals (including ancillary information) that reflects the current clinical judgment of the medical staff.

“Hospital pharmacy” means a pharmacy, as defined in A.R.S. § 32-1901, that holds a current permit issued by the Board pursuant to A.R.S. § 32-1931, and is located in a hospital as defined in A.R.S. § 32-1901.

“Inpatient” means any patient who receives non-self-administered drugs from a hospital pharmacy for use while within a facility owned by the hospital.

“Intravenous admixture” means a sterile parenteral solution to which one or more additional drug products have been added.

“Medication order” means a written, electronic, or verbal order from a medical practitioner or a medical practitioner’s authorized agent for administration of a drug or device.

“On-call” means a pharmacist is available to:

Consult or provide drug information regarding drug therapy or related issues; or

Dispense a medication order and review a patient’s medication order for pharmaceutical and therapeutic feasibility under R4-23-653(E)(2) before any drug is administered to a patient, except as specified in R4-23-653(E)(1).

“Patient care area” means any area for the primary purpose of providing a physical environment that is owned by or operated in conjunction with a hospital, for a patient to obtain health care services, except those areas where a physician, dentist, veterinarian, osteopath, or other medical practitioner engages primarily in private practice.

“Repackaged drug” means a drug product that is transferred by pharmacy personnel from an original manufacturer’s container to another container properly labeled for subsequent dispensing.

“Satellite pharmacy” means a work area in a hospital setting under the direction of a pharmacist that is a remote extension of a centrally licensed hospital pharmacy and owned by and dependent upon the centrally licensed hospital pharmacy for administrative control, staffing, and drug procurement.

“Single unit” means a package of medication that contains one discrete pharmaceutical dosage form.

“Supervision” means the process by which a pharmacist directs the activities of hospital pharmacy personnel to a sufficient degree to ensure that all activities are performed accurately, safely, and without risk of harm to patients.

Historical Note

Former Rules 6.7110, 6.7120, and 6.7130; Amended effective August 10, 1978 (Supp. 78-4). Amended subsection (B) effective April 20, 1982 (Supp. 82-2). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended effective November 1, 1993 (Supp. 93-4). Amended effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 4902,

Board of Pharmacy

effective January 5, 2003 (Supp. 02-4).

R4-23-652. Hospital Pharmacy Permit

- A. The following rules are applicable to all hospitals as defined by A.R.S. § 32-1901 and hospital pharmacies as defined by R4-23-651.
- B. Before opening a hospital pharmacy, a person shall obtain a pharmacy permit as specified in R4-23-602 and R4-23-606.
- C. Discontinued hospitals. If a hospital license is discontinued by the state Department of Health Services, the pharmacy permittee or pharmacist-in-charge shall follow the procedures described in R4-23-613 for discontinuing a pharmacy.

Historical Note

Former Rules 6.7210, 6.7220, 6.7230, 6.7231, 6.7232, and 6.7233. Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4).

R4-23-653. Personnel: Professional or Technician

- A. Each hospital pharmacy shall be directed by a pharmacist who is licensed to engage in the practice of pharmacy in Arizona and is referred to as the Director of Pharmacy. The Director of Pharmacy shall be the pharmacist-in-charge, as defined in A.R.S. § 32-1901 or shall appoint a pharmacist-in-charge. The Director of Pharmacy and the pharmacist-in-charge, if a different individual, shall:
 - 1. Be responsible for all the activities of the hospital pharmacy and for meeting the requirements of the Arizona Pharmacy Act and these rules;
 - 2. Ensure that the policies and procedures required by these rules are prepared, implemented, and complied with;
 - 3. Review biennially and, if necessary, revise the policies and procedures required under these rules;
 - 4. Document the review required under subsection (A)(3);
 - 5. Assemble the policies and procedures as a written manual or by another method approved by the Board or its designee; and
 - 6. Make the policies and procedures available within the pharmacy for employee reference and inspection by the Board or its designee.
- B. In all hospitals, a pharmacist shall be in the hospital during the time the pharmacy is open for pharmacy services, except for an extreme emergency as defined in R4-23-110. Pharmacy services shall be provided for a minimum of 40 hours per week, unless an exception for less than the minimum hours is made upon written request by the hospital and with express permission of the Board or its designee.
- C. In a hospital where the pharmacy is not open 24 hours per day for pharmacy services, a pharmacist shall be "on-call" as defined in R4-23-651 when the pharmacy is closed.
- D. The Director of Pharmacy may be assisted by other personnel approved by the Director of Pharmacy in order to operate the pharmacy competently, safely, and adequately to meet the needs of the hospital's patients.
- E. Pharmacists. A pharmacist or a pharmacy intern or graduate intern under the supervision of a pharmacist shall perform the following professional practices:
 - 1. Verify a patient's medication order before administration of a drug to the patient, except:
 - a. In an emergency medical situation; or
 - b. In a hospital where the pharmacy is open less than 24 hours a day for pharmacy services, a pharmacist shall verify a patient's medication order within four hours of the time the pharmacy opens for pharmacy services;
 - 2. Verify a medication order's pharmaceutical and therapeutic feasibility based upon:
 - a. The patient's medical condition,
 - b. The patient's allergies,
 - c. The pharmaceutical and therapeutic incompatibilities, and
 - d. The recommended dosage limits;
 - 3. Measure, count, pour, or otherwise prepare and package a drug needed for dispensing, except a pharmacy technician or pharmacy technician trainee may measure, count, pour, or otherwise prepare and package a drug needed for dispensing under the supervision of a pharmacist according to written policies and procedures approved by the Board or its designee;
 - 4. Compound, admix, combine, or otherwise prepare and package a drug needed for dispensing, except a pharmacy technician may compound, admix, combine, or otherwise prepare and package a drug needed for dispensing under the supervision of a pharmacist according to written policies and procedures approved by the Board or its designee;
 - 5. Verify the accuracy, correct procedure, compounding, admixing, combining, measuring, counting, pouring, preparing, packaging, and safety of a drug prepared and packaged by a pharmacy technician or pharmacy technician trainee according to subsections (E)(3) and (4) and according to the policies and procedures in subsection (G);
 - 6. Supervise drug repackaging and check the completed repackaged product as specified in R4-23-402(A);
 - 7. Supervise training and education in aseptic technique and drug incompatibilities for all personnel involved in the admixture of parenteral products within the hospital pharmacy;
 - 8. Consult with the medical practitioner regarding the patient's drug therapy or medical condition;
 - 9. When requested by a medical practitioner, patient, patient's agent, or when the pharmacist deems it necessary, provide consultation with a patient regarding the medication order, patient's profile, or overall drug therapy;
 - 10. Monitor a patient's drug therapy for safety and effectiveness;
 - 11. Provide drug information to patients and health care professionals;
 - 12. Manage the activities of pharmacy technicians, pharmacy technician trainees, other personnel, and systems to ensure that all activities are performed accurately, safely, and without risk of harm to patients;
 - 13. Verify the accuracy of all aspects of the original, completed medication order; and
 - 14. Ensure compliance by pharmacy personnel with a quality assurance program developed by the hospital.
- F. Pharmacy technicians and pharmacy technician trainees. Before working as a pharmacy technician or pharmacy technician trainee, an individual shall meet the eligibility and licensure requirements prescribed in 4 A.A.C. 23, Article 11.
- G. Pharmacy technician policies and procedures. Before employing a pharmacy technician or pharmacy technician trainee, a Director of Pharmacy or pharmacist-in-charge shall develop the policies and procedures required under R4-23-1104.
- H. Pharmacy technician training program.
 - 1. A Director of Pharmacy or pharmacist-in-charge shall comply with the training program requirements of R4-23-1105 based on the needs of the hospital pharmacy;

Board of Pharmacy

2. A pharmacy technician or pharmacy technician trainee shall:
 - a. Perform only those tasks for which training and competency have been demonstrated; and
 - b. Not perform professional practices reserved for a pharmacist, graduate intern, or pharmacy intern in subsection (E), except as specified in subsections (E)(3) and (4).
- I. Supervision. A hospital pharmacy's Director of Pharmacy and the pharmacist-in-charge, if a different individual, shall supervise all of the activities and operations of a hospital pharmacy. A pharmacist shall supervise all functions and activities of pharmacy technicians, pharmacy technician trainees, and other hospital pharmacy personnel to ensure that all functions and activities are performed competently, safely, and without risk of harm to patients.

Historical Note

Former Rules 6.7310 and 6.7320; Amended effective August 10, 1978 (Supp. 78-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-654. Absence of Pharmacist

- A. If a pharmacist will not be on duty in the hospital, the Director of Pharmacy or pharmacist-in-charge shall arrange, before the pharmacist's absence, for the medical staff and other authorized personnel of the hospital to have access to drugs in the remote drug storage area defined in R4-23-110 or in the hospital pharmacy if a drug is not available in a remote drug storage area and is required to treat the immediate needs of a patient. A pharmacist shall be on-call during all absences.
- B. If a pharmacist will not be on duty in the hospital pharmacy, the Director of Pharmacy or pharmacist-in-charge shall arrange, before the pharmacist's absence, for the medical staff and other authorized personnel of the hospital to have telephone access to an on-call pharmacist.
- C. The hospital pharmacy permittee shall ensure that the hospital pharmacy is not without a pharmacist on duty in the hospital for more than 72 consecutive hours.
- D. Remote drug storage area. The Director of Pharmacy or pharmacist-in-charge shall, in consultation with the appropriate committee of the hospital:
 1. Develop and maintain an inventory listing of the drugs to be included in a remote drug storage area; and
 2. Develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with policies and procedures that ensure proper storage, access, and accountability for drugs in a remote drug storage area.
- E. Access to hospital pharmacy. If a drug is not available from a remote drug storage area and the drug is required to treat the immediate needs of a patient whose health may be compromised, the drug may be obtained from the hospital pharmacy according to the requirements of this subsection.
 1. The Director of Pharmacy or pharmacist-in-charge shall, in consultation with the appropriate committee of the hospital, develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with policies and procedures to ensure that access to the hospital pharmacy during the pharmacist's absence conforms to the following requirements:

- a. Access is delegated to only one supervisory nurse in each shift;
- b. The policy and name of supervisory nurse is communicated in writing to the medical staff of the hospital;
- c. Access is delegated only to a nurse who has received training from the Director of Pharmacy, pharmacist-in-charge, or Director's designee in the procedures required for proper access, drug removal, and recordkeeping; and
- d. Access is delegated by the supervisory nurse to another nurse only in an emergency.
2. If a nurse to whom authority is delegated to access the hospital pharmacy removes a drug from the hospital pharmacy, the nurse shall:
 - a. Record the following information on a form or by another method approved by the Board or its designee:
 - i. Patient's name;
 - ii. Drug name, strength, and dosage form;
 - iii. Quantity of drug removed; and
 - iv. Date and time of removal;
 - b. Sign or initial, if a corresponding signature is on file in the hospital pharmacy, the form recording the drug removal;
 - c. Attach the original or a direct copy of the medication order for the drug to the form recording the drug removal; and
 - d. Place the form recording the drug removal conspicuously in the hospital pharmacy.
3. Within four hours after a pharmacist returns from an absence, the pharmacist shall verify all records of drug removal that occurred during the pharmacist's absence according to R4-23-653(E).

Historical Note

Former Rules 6.7410, 6.7420, 6.7430, 6.7440, 6.7450, and 6.7460; Amended subsection (A) effective Aug. 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-655. Physical Facility

- A. General. A hospital pharmacy permittee shall ensure that the hospital pharmacy has sufficient equipment and physical facilities for proper compounding, dispensing, and storage of drugs, including parenteral preparations.
- B. Minimum area of hospital pharmacy. The minimum area of a hospital pharmacy depends on the type of hospital, the number of beds, and the pharmaceutical services provided. Any hospital pharmacy permit issued or hospital pharmacy remodeled after January 31, 2003 shall provide a minimum hospital pharmacy area, the actual area primarily devoted to drug dispensing and preparation functions, exclusive of bulk drug storage, satellite pharmacy, and office areas that is not less than 500 square feet. The minimum area requirement, not including unusable area, may be varied upon approval by the Board for out-of-the-ordinary conditions or for systems that require less space.
- C. The Board may also require that a hospital pharmacy permittee or applicant provide:

Board of Pharmacy

1. More than the minimum area if equipment, inventory, personnel, or other factors cause crowding to a degree that interferes with safe pharmacy practice;
 2. Additional dispensing, preparation, or storage areas because of the increased number of specific drugs prescribed per day, the increased use of intravenous and irrigating solutions, and the increased use of disposable and prepackaged products;
 3. Additional dispensing, preparation, or storage areas to handle investigational drugs, emergency drug kits, chemotherapeutics, alcohol and other flammables, poisons, external preparations, and radioisotopes, and to accommodate quality control procedures; and
 4. Additional office space to provide for an increased number of personnel, a drug information library, a poison information library, research support, teaching and conferences, and a waiting area.
- D.** Hospital pharmacy area. A hospital pharmacy permittee shall ensure that the hospital pharmacy area is enclosed by a permanent barrier or partition from floor to ceiling with entry doors that can be securely locked, constructed according to R4-23-609(F).
- E.** Hospital pharmacy storage areas. The hospital pharmacy permittee, Director of Pharmacy, or pharmacist-in-charge shall ensure that all undispensed or undistributed drugs are stored in designated areas within the hospital pharmacy or other locked areas under the control of a pharmacist that ensure proper sanitation, temperature, light, ventilation, moisture control, segregation, and security.

Historical Note

Former Rules 6.7471, 6.7472, 6.7473, 6.7474, and 6.7490; Amended effective Aug. 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Correction to Table 1 ("spare feet" changed to "square feet") (Supp. 91-1). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 11 A.A.R. 462, effective March 5, 2005 (Supp. 05-1).

R4-23-656. Sanitation and Equipment

A hospital pharmacy permittee or Director of Pharmacy shall ensure that a hospital pharmacy:

1. Has a professional reference library consisting of hard-copy or electronic media appropriate for the scope of pharmacy services provided by the hospital;
2. Has a sink, other than a sink in a toilet facility, that:
 - a. Has hot and cold running water;
 - b. Is within the hospital pharmacy area for use in preparing drug products; and
 - c. Is maintained in a sanitary condition and in good repair;
3. Maintains a room temperature within a range compatible with the proper storage of drugs;
4. Has a refrigerator and freezer with a temperature maintained within a range compatible with the proper storage of drugs requiring refrigeration or freezing; and
5. Has a designated area for a laminar air flow hood and other supplies required for the preparation of sterile products as specified in R4-23-670.

Historical Note

Former Rule 6.7480. Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4).

R4-23-657. Security

- A.** Personnel security standards. A Director of Pharmacy shall ensure that:
 1. No one is permitted in the pharmacy unless a pharmacist is present except as provided in this Section and R4-23-654. If only one pharmacist is on duty in the pharmacy and that pharmacist must leave the pharmacy for an emergency or patient care duties, nonpharmacist personnel may remain in the pharmacy to perform duties as outlined in R4-23-653, provided that all C-II controlled substances are secured to prohibit access by other than a pharmacist, and that the pharmacist remains available in the hospital;
 2. All hospital pharmacy areas are kept locked by key or programmable lock to prevent access by unauthorized personnel; and
 3. Pharmacists, pharmacy or graduate interns, pharmacy technicians, pharmacy technician trainees, and other personnel working in the pharmacy wear identification badges, including name and position, whenever on duty.
- B.** Prescription blank security. The Director of Pharmacy shall develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with policies and procedures for the safe distribution and control of prescription blanks bearing identification of the hospital.

Historical Note

Former Rule 6.7500; Amended effective Aug. 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-658. Drug Distribution and Control

- A.** General. The Director of Pharmacy or pharmacist-in-charge shall in consultation with the medical staff, develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with written policies and procedures for the effective operation of a drug distribution system that optimizes patient safety.
- B.** Responsibility. The Director of Pharmacy is responsible for the safe and efficient procurement, dispensing, distribution, administration, and control of drugs, including the following:
 1. In consultation with the appropriate department personnel and medical staff committee, develop a medication formulary for the hospital;
 2. Proper handling, distribution, and recordkeeping of investigational drugs; and
 3. Regular inspections of drug storage and preparation areas within the hospital.
- C.** Physician orders. A Director of Pharmacy or pharmacist-in-charge shall ensure that:
 1. Drugs are dispensed from the hospital pharmacy only upon a written order, direct copy or facsimile of a written order, or verbal order of an authorized medical practitioner; and
 2. A pharmacist reviews the original, direct or facsimile copy, or verbal order before an initial dose of medication is administered, except as specified in R4-23-653(E)(1).
- D.** Labeling. A Director of Pharmacy or pharmacist-in-charge shall ensure that all drugs distributed or dispensed by a hospital pharmacy are packaged in appropriate containers and labeled as follows:
 1. For use inside the hospital.
 - a. Labels for all single unit packages contain at a minimum, the following information:

Board of Pharmacy

- i. Drug name, strength, and dosage form;
- ii. Lot number and beyond-use-date; and
- iii. Appropriate auxiliary labels;
- b. Labels for repackaged preparations contain at a minimum the following information:
- i. Drug name, strength, and dosage form;
- ii. Lot number and beyond-use-date;
- iii. Appropriate auxiliary labels; and
- iv. Mechanism to identify pharmacist accountable for repackaging;
- c. Labels for all intravenous admixture preparations contain at a minimum the following information:
- i. Patient's name and location;
- ii. Name and quantity of the basic parenteral solution;
- iii. Name and amount of drug added;
- iv. Date of preparation;
- v. Beyond-use-date and time;
- vi. Guidelines for administration;
- vii. Appropriate auxiliary label or precautionary statement; and
- viii. Initials of pharmacist responsible for admixture preparation; and
2. For use outside the hospital. Any drug dispensed to a patient by a hospital pharmacy that is intended for self-administration outside of the hospital is labeled as specified in A.R.S. §§ 32-1963.01(C) and 32-1968(D) and A.A.C. R4-23-402.
- E. Controlled substance accountability.** A Director of Pharmacy or pharmacist-in-charge shall ensure that effective policies and procedures are developed, implemented, reviewed, and revised in the same manner described in R4-23-653(A) and complied with regarding the use, accountability, and record-keeping of controlled substances in the hospital, including the use of locked storage areas when controlled substances are stored in patient care areas.
- F. Emergency services dispensing.** If a hospital permits dispensing of drugs from the emergency services department when the pharmacy is unable to provide this service, the Director of Pharmacy, in consultation with the appropriate department personnel and medical staff committee shall develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with written policies and procedures for dispensing drugs for outpatient use from the hospital's emergency services department. The policies and procedures shall include the following requirements:
1. Drugs are dispensed only to patients who have been admitted to the emergency services department;
 2. Drugs are dispensed only by an authorized medical practitioner, not a designee or agent;
 3. The nature and type of drugs available for dispensing are designed to meet the immediate needs of the patients treated within the hospital;
 4. Drugs are dispensed only in quantities sufficient to meet patient needs until outpatient pharmacy services are available;
 5. Drugs are prepackaged by a pharmacist or a pharmacy intern, graduate intern, pharmacy technician, or pharmacy technician trainee under the supervision of a pharmacist in suitable containers and appropriately prelabeled with the drug name, strength, dosage form, quantity, manufacturer, lot number, beyond-use-date, and any appropriate auxiliary labels;
 6. Upon dispensing, the authorized medical practitioner completes the label on the prescription container that complies with the requirements of R4-23-658(D); and
7. The hospital pharmacy maintains a dispensing log, hard-copy prescription, or electronic record, approved by the Board or its designee and includes the patient name and address, drug name, strength, dosage form, quantity, directions for use, medical practitioner's signature or identification code, and DEA registration number, if applicable.

Historical Note

Former Rules 6.7610, 6.7620, and 6.7710; Amended effective Aug. 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Correction to subsection (I)(5) ("unnecessary" changed to "necessary") (Supp. 91-1). Amended effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-659. Administration of Drugs

- A. Self-administration.** A hospital shall not allow self-administration of medications by a patient unless the Director of Pharmacy or pharmacist-in-charge, in consultation with the appropriate department personnel and medical staff committee, develops, implements, reviews, and revises in the same manner described in R4-23-653(A) and complies with policies and procedures for self-administration of medications by a patient. The policies and procedures shall specify that self-administration of medications, if allowed, occurs only when:
1. Specifically ordered by a medical practitioner, and
 2. The patient is educated and trained in the proper manner of self-administration.
- B. Drugs brought in by a patient.** If a hospital allows a patient to bring a drug into the hospital and before a patient brings a drug into the hospital, the Director of Pharmacy or pharmacist-in-charge shall, in consultation with the appropriate department personnel and medical staff committee, develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with policies and procedures for a patient-owned drug brought into the hospital. The policies and procedures shall specify the following criteria for a patient-owned drug brought into the hospital:
1. When policy allows the administration of a patient-owned drug, the drug is not administered to the patient unless:
 - a. A pharmacist or medical practitioner identifies the drug, and
 - b. A medical practitioner writes a medication order specifying administration of the identified patient-owned drug; and
 2. If a patient-owned drug will not be used during the patient's hospitalization, the hospital pharmacy's personnel shall:
 - a. Package, seal, and give the drug to the patient's agent for removal from the hospital; or
 - b. Package, seal, and store the drug for return to the patient at the time of discharge from the hospital.
- C. Drug samples.** The Director of Pharmacy or pharmacist-in-charge is responsible for the receipt, storage, distribution, and accountability of drug samples within the hospital, including developing, implementing, reviewing, and revising in the same manner described in R4-23-653(A) and complying with specific policies and procedures regarding drug samples.

Historical Note

Former Rules 6.7720, 6.7730, 6.7740, 6.7760, 6.7770,

Board of Pharmacy

6.7780, 6.7800, 6.7810, 6.7820, 6.7830, 6.7840, 6.7850, 6.7871, 6.7872, and 6.7873; Amended effective Aug. 9, 1983 (Supp. 83-4). Section repealed, new Section adopted effective February 7, 1990 (Supp. 90-1). Correction to Section heading ("rules" changed to "roles") (Supp. 91-1). Section repealed; new Section made by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-660. Investigational Drugs

The Director of Pharmacy or pharmacist-in-charge shall ensure that:

1. The following information concerning an investigational drug is available for use by hospital personnel:
 - a. Composition,
 - b. Pharmacology,
 - c. Adverse reactions,
 - d. Administration guidelines, and
 - e. All other available information concerning the drug, and
2. An investigational drug is:
 - a. Properly stored in, labeled, and dispensed from the pharmacy, and
 - b. Not dispensed before the drug is approved by the appropriate medical staff committee of the hospital.

Adopted effective February 7, 1990 (Supp. 90-1). Section repealed by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4).

R4-23-663. Repealed**Historical Note**

Adopted effective February 7, 1990 (Supp. 90-1). Amended effective November 1, 1993 (Supp. 93-4). Section repealed by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4).

R4-23-664. Repealed**Historical Note**

Adopted effective February 7, 1990 (Supp. 90-1). Sub-section label removed (Supp. 91-1). Section repealed by final rulemaking at 8 A.A.R. 4902, effective January 5, 2003 (Supp. 02-4).

R4-23-665. Reserved

through

R4-23-669. Reserved**R4-23-670. Sterile Pharmaceutical Products**

- A. In addition to the minimum area requirement of R4-23-609(A) and R4-23-655(B) and before compounding a sterile pharmaceutical product, a pharmacy permittee, limited-service pharmacy permittee, or applicant shall provide a minimum sterile pharmaceutical product compounding area that is not less than 100 square feet of contiguous floor area, except any pharmacy permit issued or pharmacy remodeled before November 1, 2006 may continue to use a sterile pharmaceutical product compounding area that is not less than 60 square feet of contiguous floor area, until a pharmacy ownership change occurs that requires issuance of a new permit or the pharmacy is remodeled. The pharmacy permittee or the pharmacist-in-charge shall ensure that the sterile pharmaceutical product compounding area:
 1. Is dedicated to the purpose of preparing and compounding sterile pharmaceutical products;
 2. Is isolated from other pharmacy functions;
 3. Restricts entry or access;
 4. Is free from unnecessary disturbances in air flow;
 5. Is made of non-porous and cleanable floor, wall, and ceiling material; and
 6. Meets the minimum air cleanliness standards of an ISO Class 7 environment as defined in R4-23-110, except an ISO class 7 environment is not required if all sterile pharmaceutical product compounding occurs within an ISO class 5 environment isolator, such as a glove box, pharmaceutical isolator, barrier isolator, pharmacy isolator, or hospital pharmacy isolator.
- B. In addition to the equipment requirements in R4-23-611 and R4-23-612 or R4-23-656 and before compounding a sterile pharmaceutical product, a pharmacy permittee, limited-service pharmacy permittee, or applicant shall ensure that a pharmacist who compounds a sterile pharmaceutical product has the following equipment:
 1. Environmental control devices capable of maintaining a compounding area environment equivalent to an "ISO class 5 environment" as defined in R4-23-110. Devices capable of meeting these standards include: laminar airflow hoods, hepa filtered zonal airflow devices, glove boxes, pharmaceutical isolators, barrier isolators, pharmacy isolators, hospital pharmacy isolators, and biological safety cabinets;
 2. Disposal containers designed for needles, syringes, and other material used in compounding sterile pharmaceutical products and if applicable, separate containers to dispose of cytotoxic, chemotherapeutic, and infectious waste products;
 3. Freezer storage units with thermostatic control and thermometer, if applicable;
 4. Packaging or delivery containers capable of maintaining official compendial drug storage conditions;
 5. Infusion devices and accessories, if applicable; and
 6. In addition to the reference library requirements of R4-23-612, a current reference pertinent to the preparation of sterile pharmaceutical products.
- C. Before compounding a sterile pharmaceutical product, the pharmacy permittee, limited-service pharmacy permittee, or pharmacist-in-charge shall:
 1. Prepare, implement, and comply with policies and procedures for compounding and dispensing sterile pharmaceutical products,
 2. Review biennially and if necessary revise the policies and procedures required under subsection (C)(1),
 3. Document the review required under subsection (C)(2),

Board of Pharmacy

4. Assemble the policies and procedures as a written manual or by another method approved by the Board or its designee, and
5. Make the policies and procedures available in the pharmacy for employee reference and inspection by the Board or its designee.
- D.** The assembled policies and procedures shall include, where applicable, the following subjects:
1. Supervisory controls and verification procedures to ensure the quality and safety of sterile pharmaceutical products;
 2. Clinical services and drug monitoring procedures for:
 - a. Patient drug utilization reviews;
 - b. Inventory audits;
 - c. Patient outcome monitoring;
 - d. Drug information; and
 - e. Education of pharmacy and other health professionals;
 3. Controlled substances;
 4. Supervisory controls and verification procedures for:
 - a. Cytotoxics handling, storage, and disposal;
 - b. Disposal of unused supplies and pharmaceutical products; and
 - c. Handling and disposal of infectious wastes;
 5. Pharmaceutical product administration, including guidelines for the first dosing of a pharmaceutical product;
 6. Drug and component procurement;
 7. Pharmaceutical product compounding, dispensing, and storage;
 8. Duties and qualifications of professional and support staff;
 9. Equipment maintenance;
 10. Infusion devices and pharmaceutical product delivery systems;
 11. Investigational drugs and their protocols;
 12. Patient profiles;
 13. Patient education and safety;
 14. Quality management procedures for:
 - a. Adverse drug reactions;
 - b. Drug recalls;
 - c. Expired pharmaceutical products;
 - d. Beyond-use-dating for both standard-risk and substantial-risk sterile pharmaceutical products consistent with the requirements of R4-23-410(B)(3)(d);
 - e. Temperature and other environmental controls;
 - f. Documented process and product validation testing; and
 - g. Semi-annual certification of the laminar air flow hood or other ISO class 5 environment, other equipment, and the ISO class 7 environment, including documentation of routine cleaning and maintenance for each laminar air flow hood or other ISO class 5 environment, other equipment, and the ISO class 7 environment; and
 15. Sterile pharmaceutical product delivery requirements for:
 - a. Shipment to the patient;
 - b. Security; and
 - c. Maintaining official compendial storage conditions.
- E.** Standard-risk sterile pharmaceutical product compounding. Before compounding a standard-risk sterile pharmaceutical product, a pharmacy permittee or pharmacist-in-charge shall ensure compliance with the following minimum standards:
1. Compounding occurs only in an ISO class 5 environment within an ISO class 7 environment, and the ISO class 7 environment may have a specified prep area inside the environment;
 2. Compounding sterile pharmaceutical products from sterile commercial drugs or sterile pharmaceutical otic or ophthalmic products from non-sterile ingredients occurs using procedures that involve only a few closed-system, basic, simple aseptic transfers and manipulations;
 3. Each person who compounds wears adequate personnel protective clothing for sterile preparation that includes gown, gloves, head cover, and booties. Each person who compounds is not required to wear personnel protective clothing when all sterile pharmaceutical compounding occurs within an ISO class 5 environment isolator, and the ISO Class 5 environment isolator is not inside an ISO Class 7 environment; and
 4. Each person who compounds completes an annual media-fill test to validate proper aseptic technique.
- F.** Substantial-risk sterile pharmaceutical product compounding. Before compounding a substantial-risk sterile pharmaceutical product, a pharmacy permittee or pharmacist-in-charge shall ensure compliance with the following minimum standards:
1. Compounding parenteral or injectable sterile pharmaceutical products from non-sterile ingredients occurs only in an ISO class 5 environment within an ISO class 7 environment and the ISO class 7 environment shall not have a prep area inside the environment;
 2. Each person who compounds wears adequate personnel protective clothing for sterile preparation that includes gown, gloves, head cover, and booties. Each person who compounds is not required to wear personnel protective clothing when all sterile pharmaceutical compounding occurs within an ISO class 5 environment isolator, and the ISO Class 5 environment isolator is not inside an ISO Class 7 environment; and
 3. Each person who compounds completes a semi-annual media-fill test that simulates the most challenging or stressful conditions for compounding using dry non-sterile media to validate proper aseptic technique.

Historical Note

Adopted effective November 1, 1993 (Supp. 93-4). Amended by final rulemaking at 10 A.A.R. 3391, effective October 2, 2004 (Supp. 04-3). Amended by final rulemaking at 12 A.A.R. 3981, effective December 4, 2006 (Supp. 06-4).

R4-23-671. General Requirements for Limited-service Pharmacy

- A.** Before opening a limited-service pharmacy, a person shall obtain a permit in compliance with A.R.S. §§ 32-1929, 32-1930, 32-1931, and R4-23-606.
- B.** The limited-service pharmacy permittee shall secure the limited-service pharmacy by conforming with the following standards:
1. Permit no one to be in the limited-service pharmacy unless the pharmacist-in-charge or a pharmacist authorized by the pharmacist-in-charge is present;
 2. Require the pharmacist-in-charge to designate in writing, by name, title, and specific area, those persons who will have access to particular areas of the limited-service pharmacy;
 3. Implement procedures to guard against theft or diversion of drugs, including controlled substances; and
 4. Require all persons working in the limited-service pharmacy to wear badges, with their names and titles, while on duty.
- C.** To obtain permission to deviate from the minimum area requirement set forth in R4-23-609, R4-23-673, or R4-23-682, a limited-service pharmacy permittee shall submit a written

Board of Pharmacy

- request to the Board and include documentation that the deviation will facilitate experimentation or technological advances in the practice of pharmacy as defined in A.R.S. § 32-1901. If the Board determines the requested deviation from the minimum area requirement will enhance the practice of pharmacy and benefit the public, the Board shall grant the requested deviation.
- D.** The Board shall require more than the minimum area in a limited-service pharmacy when the Board determines that equipment, personnel, or other factors in the limited-service pharmacy cause crowding that interferes with safe pharmacy practice.
- E.** Before dispensing from a limited-service pharmacy, the limited-service pharmacy permittee or pharmacist-in-charge shall:
1. Prepare, implement, and comply with written policies and procedures for pharmacy operations and drug dispensing and distribution;
 2. Review biennially and if necessary revise the policies and procedures required under subsection (E)(1);
 3. Document the review required under subsection (E)(2);
 4. Assemble the policies and procedures as a written manual or by another method approved by the Board or its designee, and
 5. Make the policies and procedures available in the pharmacy for employee reference and inspection by the Board or its designee.

Historical Note

Adopted effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1). Amended by final rulemaking at 10 A.A.R. 3391, effective October 2, 2004 (Supp. 04-3). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

R4-23-672. Limited-service Correctional Pharmacy

- A.** The limited-service pharmacy permittee shall ensure that the limited-service correctional pharmacy complies with the standards for area, personnel, security, sanitation, equipment, drug distribution and control, administration of drugs, drug source, quality assurance, investigational drugs, and inspections as set forth in R4-23-608, R4-23-609(A) through (D) and (F) through (H), R4-23-610(A), R4-23-611, R4-23-612, R4-23-653(E), R4-23-658(B) through (E), R4-23-659, and R4-23-660.
- B.** The pharmacist-in-charge of a limited-service correctional pharmacy shall authorize only pharmacists, interns, pharmacy technicians, pharmacy technician trainees, compliance officers, drug inspectors, peace officers, and correctional officers acting in their official capacities, other persons authorized by law, support personnel, and other designated personnel to be in the limited-service correctional pharmacy.
- C.** When no pharmacist will be on duty in the correctional facility, the pharmacist-in-charge shall arrange, before there is no pharmacist on duty, for the medical staff and other authorized personnel of the correctional facility to have access to drugs in remote drug storage areas or, if a drug is not available in a remote drug storage area and is required to treat the immediate needs of a patient, in the limited-service correctional pharmacy.
1. The pharmacist-in-charge shall, in consultation with the appropriate committee of the correctional facility, develop and implement procedures to ensure that remote drug storage areas:
- a. Contain only properly labeled drugs that might reasonably be needed and can be administered safely during the pharmacist's absence,
- b. Contain drugs packaged only in amounts sufficient for immediate therapeutic requirements;
 - c. Are accessible only with a physician's written order;
 - d. Provide a written record of each drug withdrawn;
 - e. Are inventoried at least once each week, and
 - f. Are audited for compliance with the requirements of this rule at least once each month.
- 2.** The pharmacist-in-charge shall, in consultation with the appropriate committee of the correctional facility, develop and implement procedures to ensure that access to the limited-service correctional pharmacy when no pharmacist is on duty conforms to the following requirements:
- a. Is delegated to only one nurse, who is in a supervisory position;
 - b. Is communicated in writing to medical staff of the correctional facility;
 - c. Is delegated only to a nurse who has received training from the pharmacist-in-charge in proper methods of access, removal of drugs, and recordkeeping procedures; and
 - d. Is delegated by the supervisory nurse to another nurse only in an emergency.
- 3.** When a nurse to whom authority to access the limited-service correctional pharmacy is delegated removes a drug from the limited-service correctional pharmacy, the nurse shall:
- a. Record the following information on a form:
 - i. Patient's name,
 - ii. Name of the drug and its strength and dosage form,
 - iii. Dose prescribed,
 - iv. Amount of drug removed, and
 - v. Date and time of removal;
 - b. Sign the form recording the drug removal;
 - c. Attach the original or a direct copy of a physician's written order for the drug to the form recording the drug removal; and
 - d. Place the form recording the drug removal conspicuously in the limited-service correctional pharmacy.
- 4.** Within four hours after a pharmacist in the limited-service correctional pharmacy returns to duty following an absence in which the limited-service correctional pharmacy was accessed by a nurse to whom authority had been delegated, the pharmacist shall verify all records of drug removal according to R4-23-402.
- D.** When no pharmacist will be on duty in the correctional facility, the pharmacist-in-charge shall arrange, before there is no pharmacist on duty, for the medical staff and other authorized personnel of the correctional facility to have telephone access to a pharmacist.
- E.** The limited-service pharmacy permittee shall ensure that the limited-service correctional pharmacy is not without a pharmacist on duty for more than 96 consecutive hours.
- F.** In addition to the requirements of R4-23-671, the limited-service pharmacy permittee shall secure the limited-service correctional pharmacy as follows:
1. Permit no one to be in the limited-service correctional pharmacy unless a pharmacist is on duty except:
 - a. As provided in subsection (C)(3) when a pharmacist is not on duty; or
 - b. A pharmacy technician or pharmacy technician trainee may remain to perform duties in R4-23-1104(A), when a pharmacist is on duty and available in the correctional facility but temporarily absent from the pharmacy, provided:

Board of Pharmacy

- i. All controlled substances are secured in a manner that prohibits access by persons other than a pharmacist;
 - ii. Activities performed by a pharmacy technician or pharmacy technician trainee while the pharmacist is temporarily absent are verified by the pharmacist immediately upon returning to the pharmacy;
 - iii. Any drug measured, counted, poured, or otherwise prepared and packaged by a pharmacy technician or pharmacy technician trainee while the pharmacist is temporarily absent is verified by the pharmacist immediately upon returning to the pharmacy; and
 - iv. Any drug that has not been verified by a pharmacist for accuracy is not dispensed, supplied, or distributed while the pharmacist is temporarily absent from the pharmacy; and
2. Provide keyed or programmable locks to all areas of the limited-service correctional pharmacy.
- G.** The pharmacist-in-charge of a limited-service correctional pharmacy shall ensure that the written policies and procedures for pharmacy operations and drug distribution within the correctional facility include the following:
1. Physicians' orders, prescription orders, or both;
 2. Authorized abbreviations;
 3. Formulary system;
 4. Clinical services and drug utilization management including:
 - a. Participation in drug selection,
 - b. Drug utilization reviews,
 - c. Inventory audits,
 - d. Patient outcome monitoring,
 - e. Committee participation,
 - f. Drug information, and
 - g. Education of pharmacy and other health professionals;
 5. Duties and qualifications of professional and support staff;
 6. Products of abuse and contraband medications;
 7. Controlled substances;
 8. Drug administration;
 9. Drug product procurement;
 10. Drug compounding, dispensing, and storage;
 11. Stop orders;
 12. Pass or discharge medications;
 13. Investigational drugs and their protocols;
 14. Patient profiles;
 15. Quality management procedures for:
 - a. Adverse drug reactions;
 - b. Drug recalls;
 - c. Expired and beyond-use-date drugs;
 - d. Medication or dispensing errors;
 - e. Drug storage; and
 - f. Education of professional staff, support staff, and patients;
 16. Recordkeeping;
 17. Sanitation;
 18. Security;
 19. Access to remote drug storage areas by non-pharmacists; and
 20. Access to limited-service correctional pharmacy by non-pharmacists.

Historical Note

Adopted effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 10 A.A.R. 4453, effective Decem-

ber 4, 2004 (Supp. 04-4).

R4-23-673. Limited-service Mail-order Pharmacy

- A. The limited-service pharmacy permittee shall design and construct the limited-service mail-order pharmacy to conform with the following requirements:
 1. A dispensing area devoted to stocking, compounding, and dispensing prescription medications, which is physically separate from a non-dispensing area devoted to non-dispensing pharmacy services;
 2. A dispensing area of at least 300 square feet if three or fewer persons work in the dispensing area simultaneously;
 3. A dispensing area that provides 300 square feet plus 60 square feet for each person in excess of three persons if more than three persons work in the dispensing area simultaneously;
 4. Space in the dispensing area permits efficient pharmaceutical practice, free movement of personnel, and visual surveillance by the pharmacist;
 5. A non-dispensing area of at least 30 square feet for each person working simultaneously in the non-dispensing area; and
 6. Space in the non-dispensing area permits free movement of personnel and visual surveillance by the pharmacist;
- B. The limited-service pharmacy permittee shall design and construct the limited-service mail-order pharmacy to conform with the following requirements:
 1. A contiguous area in which both dispensing and non-dispensing pharmacy services are provided;
 2. A contiguous area of at least 300 square feet if three or fewer persons work in the area simultaneously;
 3. A contiguous area that provides 300 square feet plus 60 square feet for each person in excess of three persons if more than three persons work in the area simultaneously; and
 4. Space in the contiguous area permits efficient pharmaceutical practice, free movement of personnel, and visual surveillance by the pharmacist.
- C. The limited-service pharmacy permittee shall ensure that the limited-service mail-order pharmacy complies with the standards for area, personnel, security, sanitation, and equipment set forth in R4-23-608, R4-23-609(B) through (H), R4-23-610 (A) and (C) through (F), R4-23-611, and R4-23-612.
- D. The pharmacist-in-charge of a limited-service mail-order pharmacy shall authorize only pharmacists, interns, pharmacy technicians, pharmacy technician trainees, compliance officers, drug inspectors, peace officers acting in their official capacities, support personnel, other persons authorized by law, and other designated personnel to be in the limited-service mail-order pharmacy.
- E. The pharmacist-in-charge of a limited-service mail-order pharmacy shall ensure that prescription medication is delivered to the patient or locked in the dispensing area when a pharmacist is not present in the pharmacy.
- F. In addition to the delivery requirements of R4-23-402, the limited-service pharmacy permittee shall, during regular hours of operation but not less than five days and a minimum 40 hours per week, provide toll-free telephone service to facilitate communication between patients and a pharmacist who has access to patient records at the limited-service mail-order pharmacy. The limited-service pharmacy permittee shall disclose this toll-free number on a label affixed to each container of drugs dispensed from the limited-service mail-order pharmacy.
- G. The pharmacist-in-charge of a limited-service mail-order pharmacy shall ensure that the written policies and procedures for

Board of Pharmacy

- pharmacy operations and drug distribution include the following:
1. Prescription orders;
 2. Clinical services and drug utilization management for:
 - a. Drug utilization reviews,
 - b. Inventory audits,
 - c. Patient outcome monitoring,
 - d. Drug information, and
 - e. Education of pharmacy and other health professionals;
 3. Duties and qualifications of professional and support staff;
 4. Controlled substances;
 5. Drug product procurement;
 6. Drug compounding, dispensing, and storage;
 7. Patient profiles;
 8. Quality management procedures for:
 - a. Adverse drug reactions,
 - b. Drug recalls,
 - c. Expired and beyond-use-date drugs,
 - d. Medication or dispensing errors, and
 - e. Education of professional and support staff;
 9. Recordkeeping;
 10. Sanitation;
 11. Security;
 12. Drug delivery requirements for:
 - a. Transportation,
 - b. Security,
 - c. Temperature and other environmental controls,
 - d. Emergency provisions, and
 13. Patient education.

Historical Note

Adopted effective April 5, 1996 (Supp. 96-2). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 10 A.A.R. 4453, effective December 4, 2004 (Supp. 04-4).

R4-23-674. Limited-service Long-term Care Pharmacy

- A. A limited-service pharmacy permittee shall ensure that the limited-service long-term care pharmacy complies with:
 1. The general requirements of R4-23-671;
 2. The professional practice standards of Article 4 and Article 11; and
 3. The permits and drug distribution standards of R4-23-606 through R4-23-612, R4-23-670, and this Section.
- B. If a limited-service long-term care pharmacy permittee contracts with a long-term care facility as a Provider Pharmacy, as defined in R4-23-110, the limited-service long-term care pharmacy permittee shall ensure that the long-term care consultant pharmacist and the pharmacist-in-charge of the limited-service long-term care pharmacy comply with R4-23-701, R4-23-701.01, R4-23-701.02, R4-23-701.03, R4-23-701.04, and this Section.
- C. The limited-service long-term care pharmacy permittee or pharmacist-in-charge shall ensure that prescription medication is delivered to the patient's long-term care facility or locked in the dispensing area of the pharmacy when a pharmacist is not present in the pharmacy.
- D. The pharmacist-in-charge of a limited-service long-term care pharmacy shall authorize only those individuals listed in R4-23-610(B) to be in the limited-service long-term care pharmacy.
- E. In consultation with the long-term care facility's medical director and director of nursing, the long-term care consultant pharmacist and pharmacist-in-charge of the long-term care facility's provider pharmacy may develop, if necessary, a med-

ication formulary for the long-term care facility that ensures the safe and efficient procurement, dispensing, distribution, administration, and control of drugs in the long-term care facility.

- F. The limited-service long-term care pharmacy permittee or pharmacist-in-charge shall ensure that the written policies and procedures required in R4-23-671(E) include the following:
 1. Clinical services and drug utilization management for:
 - a. Drug utilization reviews,
 - b. Inventory audits,
 - c. Patient outcome monitoring,
 - d. Drug information, and
 - e. Education of pharmacy and other health professionals;
 2. Controlled substances;
 3. Drug compounding, dispensing, and storage;
 4. Drug delivery requirements for:
 - a. Transportation,
 - b. Security,
 - c. Temperature and other environmental controls, and
 - d. Emergency provisions;
 5. Drug product procurement;
 6. Duties and qualifications of professional and support staff;
 7. Emergency drug supply unit procedures;
 8. Formulary, including development, review, modification, use, and documentation, if applicable;
 9. Patient profiles;
 10. Patient education;
 11. Prescription orders, including:
 - a. Approved abbreviations,
 - b. Stop-order procedures, and
 - c. Leave-of-absence and discharge prescription order procedures;
 12. Quality management procedures for:
 - a. Adverse drug reactions,
 - b. Drug recalls,
 - c. Expired and beyond-use-date drugs,
 - d. Medication or dispensing errors, and
 - e. Education of professional and support staff;
 13. Recordkeeping;
 14. Sanitation; and
 15. Security.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1). Amended by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-675. Limited-service Sterile Pharmaceutical Products Pharmacy

- A. The limited-service pharmacy permittee or the pharmacist-in-charge shall ensure that the limited-service sterile pharmaceutical products pharmacy complies with the standards for area, personnel, sanitation, equipment, sterile pharmaceutical products, and limited-service pharmacies established in R4-23-608, R4-23-609, R4-23-610, R4-23-611, R4-23-612, R4-23-670, and R4-23-671.
- B. The pharmacist-in-charge of a limited-service sterile pharmaceutical products pharmacy shall authorize only pharmacists, interns, compliance officers, peace officers acting in their official capacities, pharmacy technicians, pharmacy technician trainees, support personnel, and other designated personnel to be in the limited-service sterile pharmaceutical products pharmacy.

Board of Pharmacy

- C. The pharmacist-in-charge of a limited-service sterile pharmaceutical products pharmacy shall ensure that prescription medication is delivered to the patient or locked in the dispensing area when a pharmacist is not present in the pharmacy.
- D. In addition to the delivery requirements of R4-23-402, the limited-service pharmacy permittee shall, during regular hours of operation, but not less than a minimum 40 hours per week, provide toll-free telephone service to facilitate communication between patients and a pharmacist who has access to patient records at the limited-service sterile pharmaceutical products pharmacy. The limited-service pharmacy permittee shall disclose this toll-free number on a label affixed to each container dispensed from the limited-service sterile pharmaceutical products pharmacy.
- E. The limited-service pharmacy permittee or the pharmacist-in-charge shall ensure development, implementation, review and revision in the same manner described in R4-23-671(E) and compliance with policies and procedures for pharmacy operations, including pharmaceutical product compounding, dispensing, and distribution, that comply with the requirements of R4-23-402, R4-23-410, R4-23-670, and R4-23-671.
- F. The non-dispensing roles of the pharmacist may include chart reviews, audits, drug therapy monitoring, committee participation, drug information, and in-service training of pharmacy and other health professionals.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 3391, effective October 2, 2004 (Supp. 04-3). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). This Section was not amended as originally stated in the historical note published in Supp. 13-3; therefore the reference to the amendment has been removed (Supp. 18-2).

R4-23-676. Reserved

through

R4-23-680. Reserved**R4-23-681. General Requirements for Limited-service Nuclear Pharmacy**

- A. To be an authorized nuclear pharmacist, a pharmacist shall:
 - 1. Hold a current pharmacist license issued by the Board; and
 - 2. Be certified as a nuclear pharmacist by:
 - a. The Board of Pharmaceutical Specialties, or
 - b. A similar group recognized by the Arizona State Board of Pharmacy; or
 - 3. Satisfy each of the following requirements:
 - a. Meet minimal standards of training for status as an authorized user of radioactive material, as specified by the Arizona Radiation Regulatory Agency and the United States Nuclear Regulatory Commission;
 - b. Submit certification of completion of a Board-approved nuclear pharmacy training program or other training program recognized by the Arizona Radiation Regulatory Agency, with 200 hours of didactic training in the following areas:
 - i. Radiation physics and instrumentation,
 - ii. Radiation protection,
 - iii. Mathematics pertaining to the use and measurement of radioactivity,
 - iv. Radiation biology, and
 - v. Radiopharmaceutical chemistry;
 - c. Submit evidence of a minimum of 500 hours of clinical/practical nuclear pharmacy training under the

supervision of an authorized nuclear pharmacist in the following areas:

- i. Procuring radioactive materials;
 - ii. Compounding radiopharmaceuticals;
 - iii. Performing routine quality control procedures;
 - iv. Dispensing radiopharmaceuticals;
 - v. Distributing radiopharmaceuticals;
 - vi. Implementing basic radiation protection procedures; and
 - vii. Consulting and educating the nuclear medicine community, patients, pharmacists, other health professionals, and the general public; and
- d. Submit written certification, signed by a preceptor who is an authorized nuclear pharmacist, that the above training was satisfactorily completed.

B. Radiopharmaceuticals are prescription-only drugs that require specialized techniques in their handling and testing, to obtain optimum results and minimize hazards.

- 1. A person shall not sell, barter, or otherwise dispose of, or be in possession of any radiopharmaceutical except under the conditions detailed in A.R.S. § 32-1929.
- 2. A person shall not manufacture, compound, sell, or dispense any radiopharmaceutical unless the person is a pharmacist or a pharmacy intern acting under the direct supervision of a pharmacist in accordance with A.R.S. § 32-1961 and these rules, with the exception of the following, if the following are licensed by the Arizona Radiation Regulatory Agency to use radiopharmaceuticals in compliance with A.R.S. § 30-673;
 - a. A medical practitioner who administers a radiopharmaceutical to the medical practitioner's patient as provided in A.R.S. § 32-1921(A),
 - b. A hospital nuclear medicine department, and
 - c. A medical practitioner's office.
- 3. The Board shall cooperate with the Arizona Radiation Regulatory Agency and other interested state and federal agencies, in the enforcement of these rules for the protection of the public. This cooperation may include exchange of licensing and other information, joint inspections, and other activities where indicated.
- C. In addition to compliance with all the applicable federal and state laws and rules governing drugs, whether radioactive or not, a limited-service nuclear pharmacy permittee shall comply with all laws and rules of the Arizona Radiation Regulatory Agency and the U.S. Nuclear Regulatory Commission, including emergency and safety provisions.
- D. A limited-service nuclear pharmacy permittee shall comply with the education, experience, and licensing requirements of the Arizona Radiation Regulatory Agency.
- E. A limited-service nuclear pharmacy permittee shall ensure that radiopharmaceuticals are transferred only to a person or firm that holds a current Radioactive Materials License issued by the Arizona Radiation Regulatory Agency.

Historical Note

Adopted effective December 3, 1974 (Supp. 75-1). Amended subsections (A), (C) and (D) effective Aug. 12, 1988 (Supp. 88-3). Amended effective July 8, 1997 (Supp. 97-3).

R4-23-682. Limited-service Nuclear Pharmacy

- A. Before operating a limited-service nuclear pharmacy, a person shall obtain a permit in compliance with A.R.S. §§ 32-1929, 32-1930, and 32-1931, and R4-23-606.
- B. A permit to operate a limited-service nuclear pharmacy shall be issued only to a person who is or employs an authorized nuclear pharmacist and holds a current Arizona Radiation

Board of Pharmacy

Regulatory Agency Radioactive Materials License. A limited-service nuclear pharmacy permittee that fails to maintain a current Arizona Radiation Regulatory Agency Radioactive Materials License shall be immediately suspended pending revocation by the Board. A limited-service nuclear pharmacy permittee shall have copies of Arizona Radiation Regulatory Agency inspection reports available upon request for Board inspection.

1. A limited-service nuclear pharmacy permittee shall designate an authorized nuclear pharmacist as the pharmacist-in-charge. The pharmacist-in-charge shall be responsible to the Board:
 - a. For the operations of the pharmacy related to the practice of pharmacy and distribution of drugs and devices;
 - b. For communicating Board directives to the management, pharmacists, interns, and other personnel of the pharmacy; and
 - c. For the pharmacy's compliance with all federal and state pharmacy laws and rules.
 2. An authorized nuclear pharmacist shall directly supervise all personnel performing tasks in the preparation and distribution of radiopharmaceuticals and ancillary drugs.
 3. An authorized nuclear pharmacist shall be present whenever the limited-service nuclear pharmacy is open for business.
- C. A limited-service nuclear pharmacy permittee shall ensure that the limited-service nuclear pharmacy complies with the standards for personnel, area, security, sanitation, and general requirements in R4-23-608, R4-23-609, R4-23-610, R4-23-611, and R4-23-671.
1. A limited-service nuclear pharmacy shall contain separate areas for:
 - a. Preparing and dispensing radiopharmaceuticals,
 - b. Receiving and shipping radiopharmaceuticals,
 - c. Storing radiopharmaceuticals, and
 - d. Decaying radioactive waste.
 2. The Board may require more than the minimum area in instances where equipment, inventory, personnel, or other factors cause crowding to a degree that interferes with safe pharmacy practice.
- D. The pharmacist-in-charge shall designate in writing, by title and specific area, the persons who may have access to particular pharmacy areas.
- E. A limited-service nuclear pharmacy permittee shall maintain records of acquisition, inventory, and disposition of radiopharmaceuticals, other radioactive substances, and other drugs in accordance with federal and state statutes and rules.
1. A prescription order, in addition to the requirements in A.R.S. § 32-1968(C) and R4-23-407(A), shall contain:
 - a. The date and time of calibration of the radiopharmaceutical,
 - b. The name of the procedure for which the radiopharmaceutical is prescribed, and
 - c. The words "Physician's Use Only" instead of the name of the patient if the radiopharmaceutical is nontherapeutic or for a nonblood product.
 2. The lead container used to store and transport a radiopharmaceutical shall have a label that, in addition to the requirements in A.R.S. § 32-1968(D), includes:
 - a. The date and time of calibration of the radiopharmaceutical,
 - b. The name of the radiopharmaceutical,
 - c. The molybdenum 99 content to USP limits,
 - d. The name of the procedure for which the radiopharmaceutical is prescribed,

- e. The words "Physician's Use Only" instead of the name of the patient if the radiopharmaceutical is nontherapeutic or for a nonblood product;
 - f. The words "Caution: Radioactive Material," and
 - g. The standard radiation symbol.
3. The radiopharmaceutical container shall have a label that includes:
- a. The date and time of calibration of the radiopharmaceutical;
 - b. The name of the patient, recorded before dispensing, if the radiopharmaceutical is therapeutic or for a blood product;
 - c. The words "Physician's Use Only" instead of the name of the patient if the radiopharmaceutical is nontherapeutic or for a nonblood product;
 - d. The name of the radiopharmaceutical;
 - e. The dose of radiopharmaceutical;
 - f. The serial number;
 - g. The words "Caution: Radioactive Material"; and
 - h. The standard radiation symbol.

F. The following minimum requirements are in addition to the requirements of the Arizona Radiation Regulatory Agency, the applicable U.S. Nuclear Regulatory Commission regulations, and the applicable regulations of the federal Food and Drug Administration. A limited-service nuclear pharmacy permittee shall provide:

1. In addition to the minimum pharmacy area requirements in R4-23-609:
 - a. An area for the storing, compounding, and dispensing of radiopharmaceuticals completely separate from pharmacy areas for nonradioactive drugs;
 - b. A minimum of 80 sq. ft. for a hot lab and storage area; and
 - c. A minimum of 300 sq. ft. of compounding and dispensing area;
2. The following equipment:
 - a. Fume hood, approved by the Arizona Radiation Regulatory Agency;
 - b. Laminar flow hood;
 - c. Dose calibrator;
 - d. Refrigerator;
 - e. Prescription balance, Class A, and weights or an electronic balance of equal or greater accuracy;
 - f. Well scintillation counter;
 - g. Incubator oven;
 - h. Microscope;
 - i. An assortment of labels, including prescription labels and cautionary and warning labels;
 - j. Glassware necessary for compounding and dispensing radiopharmaceuticals as required by the Arizona Radiation Regulatory Agency;
 - k. Other equipment necessary for radiopharmaceutical quality control for products compounded or dispensed as required by the Arizona Radiation Regulatory Agency;
 - l. Current antidote and drug interaction information; and
 - m. Regional poison control phone number prominently displayed in the pharmacy area;
3. Supplies necessary for compounding and dispensing radiopharmaceuticals as required by the Arizona Radiation Regulatory Agency;
4. A professional reference library consisting of a minimum of one current reference or text addressing each of the following subject areas:
 - a. Therapeutics,

Board of Pharmacy

- b. Nuclear pharmacy practice, and
- c. Imaging;
- 5. Current editions and supplements of:
 - a. A.R.S. §§ 30-651 through 30-696 pertaining to the Arizona Radiation Regulatory Agency,
 - b. Rules of the Arizona Radiation Regulatory Agency,
 - c. Regulations of the federal Food and Drug Administration pertaining to radioactive drugs,
 - d. Arizona Pharmacy Act and rules,
 - e. Arizona Uniform Controlled Substances Act, and
 - f. Radiological Health Handbook.
- G. The pharmacist-in-charge of a limited-service nuclear pharmacy shall prepare, implement, review, and revise in the same manner described in R4-23-671(E) and comply with written policies and procedures for pharmacy operations and drug distribution.
- H. The written policies and procedures of a limited-service nuclear pharmacy shall include the following:
 1. Prescription orders;
 2. Clinical services and drug utilization management including:
 - a. Drug utilization reviews,
 - b. Inventory audits,
 - c. Patient outcome monitoring,
 - d. Drug information, and
 - e. Education of pharmacy and other health professionals;
 3. Duties and qualifications of professional and support staff;
 4. Radioactive material handling, storage, and disposal;
 5. Drug product procurement;
 6. Drug compounding, dispensing, and storage;
 7. Investigational drugs and their protocols;
 8. Patient profiles;
 9. Quality management procedures for:
 - a. Adverse drug reaction reports;
 - b. Drug recall;
 - c. Expired and beyond-use-date drugs;
 - d. Medication or dispensing errors;
 - e. Radiopharmaceutical quality assurance;
 - f. Radiological health and safety;
 - g. Drug storage and disposition; and
 - h. Education of professional staff, support staff, and patients;
 10. Recordkeeping;
 11. Sanitation;
 12. Security;
 13. Drug delivery requirements for:
 - a. Transportation,
 - b. Security,
 - c. Radiological health and safety procedures,
 - d. Temperature and other environmental controls, and
 - e. Emergency provisions; and
 14. Patient education.

Historical note

Adopted effective July 8, 1997 (Supp. 97-3). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3).

Adopted effective Dec. 3, 1974 (Supp. 75-1). Amended effective Aug. 12, 1988 (Supp. 88-3). Amended effective November 1, 1993 (Supp. 93-4). Repealed effective July 8, 1997 (Supp. 97-3).

R4-23-692. Compressed Medical Gas (CMG) Distributor-Resident or Nonresident

- A. Permit.
 1. A person shall not manufacture, process, transfill, package, or label a compressed medical gas in Arizona, or manufacture, process, transfill, package, or label a compressed medical gas outside Arizona and ship into Arizona without a current Board-issued resident or nonresident compressed medical gas distributor permit.
 2. Before operating as a compressed medical gas distributor, a person shall register with the FDA as a medical gas manufacturer and comply with the drug listing requirements of the federal act.
- B. Application. To obtain a resident or nonresident CMG distributor permit, a person shall submit a completed application form and fee as specified in R4-23-602.
 1. A resident CMG distributor permit applicant shall include documentation of compliance with local zoning laws, if required by the Board.
 2. A nonresident CMG distributor permit applicant that resides in a jurisdiction that issues an equivalent license or permit shall include a copy of the equivalent license or permit.
- C. Notification. A resident or nonresident CMG distributor permittee shall provide written notice by mail, facsimile, or e-mail to the Board office within ten days of changes involving the telephone number, facsimile number, e-mail address, mailing address, or name of business.
- D. Change of ownership. No less than 14 days before a change of ownership occurs that involves changes of stock ownership of 30% or more of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit a completed application form and fee as specified in subsection (B).
- E. Relocation.
 1. No less than 30 days before an existing resident CMG distributor permittee relocates, the permittee shall submit a completed application for relocation electronically or manually on a form furnished by the Board, and the documentation required in subsection (B).
 2. A nonresident CMG distributor permittee shall provide written notice by mail, facsimile, or e-mail to the Board office no less than ten days before relocating.
- F. A resident or nonresident CMG distributor permittee shall sell or distribute a compressed medical gas pursuant to a compressed medical gas order only to durable medical equipment and compressed medical gas suppliers and other entities that are registered, licensed, or permitted to use, administer, or distribute compressed medical gases.
- G. Facility. A resident or nonresident CMG distributor permittee shall ensure the facility is clean, uncluttered, sanitary, temperature controlled, and secure from unauthorized access.
- H. Current Good Manufacturing Practice: A resident or nonresident CMG distributor permittee shall comply with the current good manufacturing practice requirements of 21 CFR parts 210 and 211, (Revised April 1, 2013, incorporated by reference and on file with the Board and available at www.gpo.gov. This incorporated material includes no future editions or amendments).

Board of Pharmacy

- I.** Records: A resident or nonresident CMG distributor permittee shall establish and implement written procedures for maintaining records pertaining to production, transfilling, process control, labeling, packaging, quality control, distribution, returns, recalls, training of personnel, complaints, and any information required by federal or state law.
 - 1. A permittee shall retain the records required by Section R4-23-601, this Section, and 21 CFR parts 210 and 211 for not less than three years or one year after the expiration date of the compressed medical gas, whichever is longer.
 - 2. A permittee shall make the records required by Section R4-23-601, this Section, and 21 CFR parts 210 and 211 available on inspection by the Board or its compliance officer, or if stored in a centralized recordkeeping system apart from the inspection location and not electronically retrievable, shall provide the records within four working days of a request by the Board or its compliance officer.
- J.** Inspection.
 - 1. A resident CMG distributor permittee shall make the CMG distributor's facility available for inspection by the Board or its compliance officers under A.R.S. § 32-1904.
 - 2. Within ten days from the date of a request by the Board or its staff, a nonresident CMG distributor permittee shall provide a copy of the most recent inspection report completed by the permittee's resident licensing authority or the FDA, or a copy of the most recent inspection report completed by a third-party auditor approved by the permittee's resident licensing authority or the Board or its designee. The Board may inspect, or may employ a third-party auditor to inspect, a nonresident permittee as specified in A.R.S. § 32-1904.
- K.** Permit renewal. Permit renewal shall be as specified in R4-23-602(D).
- L.** Nothing in this Section shall be construed to prohibit the emergency administration of oxygen by licensed health care personnel, emergency medical technicians, first responders, fire fighters, law enforcement officers, and other emergency personnel trained in the proper use of emergency oxygen.

Historical Note

Adopted effective January 12, 1998 (Supp. 98-1).

Amended by final rulemaking at 19 A.A.R. 97, effective March 10, 2013 (Supp. 13-1). Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2).

R4-23-693. Durable Medical Equipment (DME) and Compressed Medical Gas (CMG) Supplier-Resident or Nonresident

- A.** Permit. A person shall not sell, lease, or supply durable medical equipment or a compressed medical gas to a patient or consumer in Arizona for use in a home or residence without a current Board-issued resident or nonresident durable medical equipment and compressed medical gas supplier permit.
 - 1. The permit requirements of this Section shall not apply to the following unless there is a separate business entity engaged in the business of providing durable medical equipment or a compressed medical gas to a patient or consumer for use in a home or residence:
 - a. A medical practitioner licensed under A.R.S. Title 32;
 - b. A hospital, long-term care facility, hospice, or other health care facility using durable medical equipment or a compressed medical gas in the normal course of treating a patient; and
 - c. A pharmacy.
- B.** Application. To obtain a resident or nonresident DME and CMG supplier permit, a person shall submit a completed application form and fee as specified in R4-23-602.
 - 1. A resident DME and CMG supplier permit applicant shall include documentation of compliance with local zoning laws, if required by the Board.
 - 2. A nonresident DME and CMG supplier permit applicant that resides in a jurisdiction that issues an equivalent license or permit shall include a copy of the equivalent license or permit.
- C.** Notification. A resident or nonresident DME and CMG supplier permittee shall provide written notice by mail, facsimile, or e-mail to the Board office within ten days of changes involving the telephone number, facsimile number, email address, mailing address, or name of business.
- D.** Change of ownership. No less than 14 days before a change of ownership occurs that involves changes of stock ownership of 30% or more of the voting stock of a corporation or an existing and continuing corporation that is not actively traded on any securities market or over-the-counter market, the prospective owner shall submit a completed application form and fee as specified in subsection (B).
- E.** Relocation.
 - 1. No less than 30 days before an existing resident DME and CMG supplier permittee relocates, the permittee shall submit a completed application for relocation electronically or manually on a form furnished by the Board, and the documentation required in subsection (B).
 - 2. A nonresident DME and CMG supplier permittee shall provide written notice by mail, facsimile, or e-mail to the Board office no less than ten days before relocating.
- F.** Orders. A resident or nonresident DME and CMG supplier shall sell, lease, or provide:
 - 1. Durable medical equipment that is a prescription-only device as defined in A.R.S. § 32-1901(75) only pursuant to a prescription order or medication order from a medical practitioner; and
 - 2. A compressed medical gas only pursuant to a compressed medical gas order from a medical practitioner.
- G.** Restriction. A DME and CMG supplier permit shall authorize the permittee to procure, possess, and provide a prescription-only device or compressed medical gas to a patient or consumer as specified in subsection (F). A DME and CMG supplier permit does not authorize the permittee to procure, possess, or provide narcotics or other controlled substances, prescription-only drugs other than compressed medical gases, precursor chemicals, or regulated chemicals.
- H.** Facility. A resident or nonresident DME and CMG supplier permittee shall ensure the facility is clean, uncluttered, sanitary, temperature controlled, and secure from unauthorized access. A permittee shall maintain separate and identified storage areas in the facility and in the delivery vehicles for clean, dirty, contaminated, or damaged durable medical equipment or compressed medical gases.
- I.** A resident or nonresident DME and CMG supplier permittee shall not manufacture, process, transfill, package, or label a compressed medical gas, except as set forth in subsection (J).
- J.** Records. A resident or nonresident DME and CMG supplier permittee shall establish and implement written procedures for maintaining records pertaining to acquisition, distribution, returns, recalls, training of personnel, maintenance, cleaning, and complaints. A permittee shall:

Board of Pharmacy

1. Ensure that a prescription order, medication order, or compressed medical gas order is obtained as specified in subsection (F);
 2. Ensure that each compressed medical gas container supplied by the permittee contains a label bearing the name and address of the permittee;
 3. Ensure that all appropriate warning labels are present on the durable medical equipment or compressed medical gas;
 4. Retain the records required by Section R4-23-601 and this Section for not less than three years, or if supplying a compressed medical gas, one year after the expiration date of the compressed medical gas, whichever is longer; and
 5. Make the records required by Section R4-23-601 and this Section available on inspection by the Board or its compliance officer, or if stored in a centralized recordkeeping system apart from the inspection location and not electronically retrievable for inspection, shall provide the records within four working days of a request by the Board or its staff.
- K. Inspection.**
1. A resident DME and CMG supplier permittee shall make the DME and CMG supplier's facility available for inspection by the Board or its compliance officers under A.R.S. § 32-1904.
 2. Within ten days from the date of a request by the Board or its staff, a nonresident DME and CMG supplier permittee shall provide a copy of the most recent inspection report completed by the permittee's resident licensing authority, or a copy of the most recent inspection report completed by a third-party auditor approved by the permittee's resident licensing authority or the Board or its designee. The Board may inspect, or may employ a third-party auditor to inspect, a nonresident permittee as specified in A.R.S. § 32-1904.
- L. Permit renewal.** Permit renewal shall be as specified in R4-23-602(D).
- M.** Nothing in this Section shall be construed to prohibit the emergency administration of oxygen by licensed health care personnel, emergency medical technicians, first responders, fire fighters, law enforcement officers, and other emergency personnel trained in the proper use of emergency oxygen.

Historical Note

Adopted effective January 12, 1998 (Supp. 98-1).

Amended by final rulemaking at 20 A.A.R. 1364, effective August 2, 2014 (Supp. 14-2).

ARTICLE 7. NON-PHARMACY LICENSED OUTLETS – GENERAL PROVISIONS

R4-23-701. Long-term Care Facilities Pharmacy Services: Consultant Pharmacist

- A.** The long-term care consultant pharmacist as defined in R4-23-110 shall:
1. Possess a valid Arizona pharmacist license issued by the Board;
 2. Ensure the provision of pharmaceutical patient care services as defined in R4-23-110;
 3. Review the distribution and storage of drugs and devices and assist the facility in establishing policies and procedures for the distribution and storage of drugs and devices;
 4. Provide resident evaluation programs that relate to monitoring the therapeutic response and utilization of all drugs and devices prescribed or administered to residents, using as guidelines the most current indicators established by the Centers for Medicare and Medicaid Services, United States Department of Health and Human Services as required in 42 CFR 483.60 (revised October 1, 2010, incorporated by reference and on file with the Board. This incorporated material contains no future editions or amendments.).
 5. Serve as a resource for pharmacy-related education services within the facility;
 6. Participate in quality management of resident care in the facility; and
 7. Communicate with the provider pharmacy regarding areas of mutual concern and resolution.
- B.** A long-term care consultant pharmacist shall ensure that:
1. When a provider pharmacy is not open for business, arrangements are made in advance by the long-term care consultant pharmacist, in cooperation with the pharmacist-in-charge of the provider pharmacy and the director of nursing and medical staff of the long-term care facility, for providing emergency drugs for the licensed nursing staff to administer to the residents of the facility using an emergency drug supply unit located at the facility;
 2. The label and packaging of prescription-only and nonprescription drugs intended for use within a long-term care facility complies with state and federal law; and
 3. The long-term care facility:
 - a. Stores controlled substances listed in A.R.S. § 36-2513 in a separately locked and permanently affixed compartment, unless the facility uses a single-unit package medication distribution system; and
 - b. Maintains accurate records of controlled substance administration or ultimate disposition.
- C.** The long-term care consultant pharmacist shall:
1. Ensure availability of records and reports designed to provide the data necessary to evaluate the drug use of each long-term care facility resident that include the following:
 - a. Provider pharmacy patient profiles and long-term care facility medication administration records;
 - b. Reports of suspected adverse drug reactions;
 - c. Inspection reports of drug storage areas with emphasis on detecting outdated drugs; and
 - d. Accountability reports, that include:
 - i. Date and time of administration,
 - ii. Name of the person who administered the drug,
 - iii. Documentation and verification of any wasted or partial doses,
 - iv. Exception reports for refused doses, and
 - v. All drug destruction forms; and
 2. Identify and report drug irregularities and dispensing errors to the prescriber, the director of nursing of the facility, and the provider pharmacy.
- D.** A long-term care consultant pharmacist or pharmacist-in-charge of a provider pharmacy shall ensure that:
1. Discontinued or outdated drugs, including controlled substances, are destroyed or disposed of in a timely manner using methods consistent with federal, state, and local requirements and subject to review by the Board or its staff; and
 2. Drug containers with illegible or missing labels are:
 - a. Identified; and
 - b. Replaced or relabeled by a pharmacist employed by the pharmacy that dispensed the prescription medication.

Historical Note

Former Rules 6.8110, 6.8120, 6.8130, 6.8140, 6.8150, 6.8160, and 6.8170; Amended effective Aug. 10, 1978

Board of Pharmacy

(Supp. 78-4). Section repealed, new Section adopted effective December 18, 1992 (Supp. 92-4). Amended by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-701.01. Long-term Care Facilities Pharmacy Services: Provider Pharmacy

The limited-service pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure that:

1. A prescription medication is provided only by a valid prescription order for an individual long-term care facility resident, properly labeled for that resident, as specified in this subsection. Nothing in this Section shall prevent a provider pharmacy from supplying nonprescription drugs in a manufacturer's unopened container or emergency drugs using an emergency drug supply unit as specified in R4-23-701.02;
2. A prescription medication label for a long-term care facility resident complies with A.R.S. §§ 32-1968 and 36-2525 and contains:
 - a. The drug name, strength, dosage form, and quantity; and
 - b. The beyond-use-date;
3. Only a pharmacist employed by the pharmacy that dispensed the prescription medication may, through the exercise of professional judgment, relabel or alter a prescription medication label that is illegible or missing;
4. The provider pharmacy develops and implements drug recall policies and procedures that protect the health and safety of facility residents. The drug recall procedures shall include immediate discontinuation of any patient level recalled drug and notification of the prescriber and director of nursing of the facility; and
5. Drugs previously dispensed to a resident of the long-term care facility by another pharmacy, and drugs previously dispensed by the provider pharmacy, are not repackaged.

Historical Note

Adopted effective December 18, 1992 (Supp. 92-4). Amended by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1). Amended by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-701.02. Long-term Care Facilities Pharmacy Services: Emergency Drugs

- A. The limited-service pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure that:
 1. An emergency drug supply unit is available within the long-term care facility;
 2. Drugs contained in an emergency drug supply unit remain the property of the provider pharmacy, and
 3. Controlled substance drugs contained in an emergency drug supply unit are included in all inventories required under A.R.S. § 36-2523(B) and R4-23-1003(A).
- B. An emergency drug supply unit shall meet the following criteria:
 1. The drugs are necessary to meet the immediate and emergency therapeutic needs of long-term care facility residents as determined by the provider pharmacy's pharmacist-in-charge in consultation with the long-term care facility's medical director and nursing director;
 2. The purpose of the emergency drug supply unit in a long-term care facility is not to relieve a provider pharmacy of the responsibility for timely provision of the resident's

routine drug needs, but to ensure that an emergency drug supply unit is available for facility residents in need of immediate and emergency therapeutic drugs; and

3. The drugs are provided in a manufacturer's unit of use package or are prepackaged and labeled to include the drug name, strength, dosage form, manufacturer, lot number, and expiration date and provider pharmacy's name, address, telephone number, and pharmacist's initials.
- C. The limited-service pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure that an emergency drug supply unit:
 1. Is stored in an area that:
 - a. Is temperature controlled; and
 - b. Prevents unauthorized access;
 2. Contains on the exterior of the emergency drug supply unit a label to indicate that the contents are for emergency use only;
 3. Contains on the exterior of the emergency drug supply unit a complete list of the contents of the unit by drug name, strength, dosage form, and quantity and the provider pharmacy's name, address, and telephone number;
 4. Contains on the exterior of the emergency drug supply unit a label that indicates the date of the earliest drug expiration date;
 5. Contains on the exterior of the emergency drug supply unit a label that indicates the date of and pharmacist responsible for the last inspection of the emergency drug supply unit; and
 6. Is secured with a tamper-evident seal, or is locked and sealed in a manner that obviously reveals when the unit has been opened or tampered with.
- D. The limited-service pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall:
 1. Prepare, implement, review, and revise in the same manner described in R4-23-671(E) and comply with written policies and procedures for the storage and use of an emergency drug supply unit in a long-term care facility;
 2. Make the policies and procedures available in the provider pharmacy and long-term care facility for employee reference and inspection by the Board or its staff;
 3. Ensure that the written policies and procedures include the following:
 - a. Drug removal procedures that require:
 - i. The long-term care facility's personnel receive a valid prescription order for each drug removed from the emergency drug supply unit,
 - ii. The long-term care facility's personnel notify the provider pharmacy when a drug is removed from the emergency drug supply unit,
 - b. Outdated drug replacement procedures, and
 - c. Security and inspection procedures;
 4. Exchange or restock the emergency drug supply unit weekly, or more often as necessary, to ensure the availability of an adequate supply of emergency drugs within the long-term care facility. Restocking of the emergency drug supply unit at the facility shall be completed by an Arizona licensed pharmacist employed by the provider pharmacy, or by an Arizona licensed intern, graduate intern, technician or technician trainee under the direct onsite supervision of an Arizona licensed pharmacist; and
 5. Educate pharmacy and long-term care facility personnel in the storage and use of an emergency drug supply unit.
- E. In addition to the requirements of subsections (A) through (D), an automated emergency drug supply unit may be used provided:

Board of Pharmacy

1. The pharmacy permittee or pharmacist-in-charge of the provider pharmacy notifies the Board or its staff in writing of the intent to use an automated emergency drug supply unit, including the name and type of unit;
 2. The provider pharmacy is notified electronically when the automated emergency drug supply unit has been accessed;
 3. All events involving the access of the automated emergency drug supply unit are recorded electronically and maintained for not less than two years;
 4. The provider pharmacy is capable of producing a report of all transactions of the automated emergency drug supply unit including a single drug usage report as required in R4-23-408(B)(5) on inspection by the Board or its staff;
 5. The provider pharmacy develops written policies and procedures for:
 - a. Accessing the automated emergency drug supply unit in the event of a system malfunction or downtime,
 - b. Authorizing and modifying user access,
 - c. An ongoing quality assurance program that includes:
 - i. Training in the use of the automated emergency drug supply unit for all authorized users,
 - ii. Maintenance and calibration of the automated emergency drug supply unit as recommended by the device manufacturer; and
 6. Documentation of the requirements of subsection (E)(5)(c)(ii) is maintained for inspection by the Board or its staff for not less than two years.
- F.** The Board may prohibit a pharmacy permittee or pharmacist-in-charge of a provider pharmacy from using an automated emergency drug supply unit if the pharmacy permittee or pharmacy permittee's employees do not comply with the requirements of subsections (A) through (E).

Historical Note

Adopted effective December 18, 1992 (Supp. 92-4). Amended by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-701.03. Long-term Care Facilities Pharmacy Services: Emergency Drug Prescription Order

The limited-service pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure that every emergency drug prescription order is evaluated according to the requirements of R4-23-402(A) by a pharmacist within 72 hours of the first dose of drug administered by long-term care facility personnel under the emergency drug prescription order.

Historical Note

Adopted effective December 18, 1992 (Supp. 92-4). Amended by final rulemaking at 9 A.A.R. 1064, effective May 4, 2003 (Supp. 03-1).

R4-23-701.04. Long-term Care Facilities Pharmacy Services: Automated Dispensing Systems

- A.** Before using an automated dispensing system as defined in R4-23-110, a pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall:
1. Notify the Board or its staff in writing of the intent to use an automated dispensing system, including the name and type of system;
 2. Obtain a separate controlled substances registration at the location of each long-term care facility at which an auto-

mated dispensing system containing controlled substances will be located as required by federal law; and

3. Maintain copies of the registrations required under subsection (A)(2) at the provider pharmacy for inspection by the Board or its staff.

- B.** A pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure:

1. Drugs contained in an automated dispensing system remain the property of the provider pharmacy,
2. Controlled substance drugs contained in an automated dispensing system are included in all inventories required under A.R.S. § 36-2523(B) and R4-23-1003(A),
3. Schedule II drugs are not stocked in an automated dispensing system, and
4. A separate emergency drug supply unit is available in the long-term care facility to meet the requirements of R4-23-701.02.

- C.** A pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall:

1. Ensure that policies and procedures as required in subsection (D) for the use of an automated dispensing system in a long-term care facility are prepared, implemented, and complied with;
2. Review biennially and, if necessary, revise the policies and procedures required under subsection (D);
3. Document the review required under subsection (C)(2);
4. Assemble the policies and procedures as a written or electronic manual; and
5. Make the policies and procedures available for employee reference and inspection by the Board or its staff within the pharmacy and at any location outside of the pharmacy where the automated dispensing system is used.

- D.** A pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall ensure the written policies and procedures include:

1. Drug removal procedures that include the following:
 - a. A drug is provided only by a valid prescription order for an individual long-term care facility resident;
 - b. A drug is dispensed from an automated dispensing system only after a pharmacist has:
 - i. Reviewed and verified the resident's prescription order as required by R4-23-402(A), and
 - ii. Electronically authorized the access for that drug for that particular resident, and
 - c. The automated dispensing system labels each individual drug packet with a resident specific label that complies with R4-23-701.01(2) and contains the resident's room number or facility identification number; and
2. Security procedures that include the following:
 - a. The pharmacy permittee or pharmacist-in-charge of the provider pharmacy is responsible for authorizing user access, including adding and removing users and modifying user access;
 - b. Each authorized user is a licensee of the Board or authorized licensed personnel of the long-term care facility; and
 - c. The automated dispensing system is secured at the long-term care facility by electronic or mechanical means or a combination thereof designed to prevent unauthorized access;
3. Drug stocking procedures that include the following:
 - a. Automated dispensing systems that use non-removable containers that do not allow repackaging of the container as set out in subsection (D)(3)(b);

Board of Pharmacy

- i. Are stocked at the long-term care facility by an Arizona licensed pharmacist employed by the provider pharmacy, or by an Arizona licensed intern, graduate intern, technician or technician trainee under the direct onsite supervision of an Arizona licensed pharmacist; and
- ii. Utilize bar code or other technologies to ensure the correct drug is placed in the correct canister or container; and
- b. Automated dispensing systems that use removable containers may be stocked at the long-term care facility by an authorized user provided:
 - i. The prepackaging of the container occurs at the provider pharmacy;
 - ii. A pharmacist verifies the container has been properly filled and labeled, and the container is secured with a tamper-evident seal;
 - iii. The individual containers are transported to the long-term care facility in a secure, tamper-evident shipping container; and
 - iv. The automated dispensing system uses microchip, bar-coding, or other technologies to ensure the containers are accurately loaded in the automated dispensing system; and
- 4. Recordkeeping and report procedures that include the following:
 - a. All events involving the access of the automated dispensing system are recorded electronically and maintained for not less than two years;
 - b. The provider pharmacy is capable of producing a report of all transactions of the automated dispensing system including:
 - i. A single drug usage report that complies with R4-23-408(B)(5); and
 - ii. An authorized user history including date and time of access and type of transaction; and
 - c. The provider pharmacy has procedures to safeguard the storage, packaging, and distribution of drugs by monitoring:
 - i. Current inventory;
 - ii. Expiration dates;
 - iii. Controlled substance dispensing;
 - iv. Re-dispense requests; and
 - v. Wastage.
- E. A pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall:
 1. Ensure that an electronic log is kept for each container fill that includes:
 - a. An identification of the container by drug name and strength, and container number;
 - b. The drug's manufacturer or National Drug Code (NDC) number;
 - c. The expiration date and lot number from the manufacturer's stock bottle that is used to fill the container. If multiple lot numbers of the same drug are added to a container, each lot number and expiration date shall be documented;
 - d. The date the container is filled;
 - e. Documentation of the identity of the licensee who placed the drug into the container; and
 - f. If the licensee who filled the container is not a pharmacist, documentation of the identity of the pharmacist who supervised the non-pharmacist licensee; and
 2. Maintain the electronic log for inspection by the Board or its staff for not less than two years.
- F. A pharmacy permittee or pharmacist-in-charge of a provider pharmacy shall:
 1. Implement an ongoing quality assurance program that monitors performance of the automated dispensing system and compliance with the established policies and procedures that includes:
 - a. Training in the use of the automated dispensing system for all authorized users,
 - b. Maintenance and calibration of the automated dispensing system as recommended by the device manufacturer,
 - c. Routine accuracy validation testing no less than every three months, and
 - d. Downtime and malfunction procedures to ensure the timely provision of medication to the long-term care facility resident, and
 2. Maintain documentation of the requirements of subsections (F)(1)(b) and (F)(1)(c) for inspection by the Board or its staff for not less than two years.
- G. The Board may prohibit a pharmacy permittee or pharmacist-in-charge from using an automated dispensing system in a long-term care facility if the pharmacy permittee or the pharmacy permittee's employees do not comply with the requirements of subsections (A) through (F).

Historical Note

New Section made by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-702. Hospice Inpatient Facilities

- A. If a pharmacy permittee contracts to provide pharmacy services to the patients of a hospice inpatient facility as defined in R4-23-110, the pharmacy permittee shall ensure that:
 1. A prescription medication is provided only by a valid prescription order for an individual hospice inpatient facility patient, properly labeled for that patient, as specified in this subsection. Nothing in this section shall prevent a provider pharmacy from supplying non-prescription drugs in a manufacturer's unopened container;
 2. A prescription medication label for a hospice inpatient facility patient complies with A.R.S. §§ 32-1968 and 36-2525 and contains:
 - a. The drug name, strength, dosage form, and quantity; and
 - b. The beyond-use date; and
 3. If the label on the hospice inpatient facility patient's drug container becomes damaged or soiled, a pharmacist employed by the pharmacy that dispensed the drug container, through the exercise of professional judgment, may relabel the drug container. Only a pharmacist is permitted to label a drug container or alter the label of a drug container.
- B. A pharmacist may help hospice inpatient facility personnel develop written policies and procedures for the procurement, administration, storage, control, recordkeeping, and disposal of drugs in the facility.
- C. The provider pharmacy may contract with the hospice inpatient facility to provide pharmacist services at the facility that include evaluation of the patient's response to medication therapy, identification of potential adverse drug reactions, and recommended appropriate corrective action.
- D. A provider pharmacy that places an emergency drug supply unit at a hospice inpatient facility shall comply with the requirements of R4-23-701.02.
- E. A pharmacy shall not place an automated dispensing system as defined in R4-23-701.04 in a hospice inpatient facility.

Board of Pharmacy

- F. Drugs previously dispensed to a patient of the hospice inpatient facility by another pharmacy, and drugs previously dispensed by the provider pharmacy, shall not be repackaged.

Historical Note

Former Rules 6.8210, 6.8211, 6.8212, 6.8213, 6.8214, 6.8221, 6.8222, 6.8223, 6.8824, 6.8231, 6.8232, 6.8233, 6.8241, 6.8242, and 6.8243; Amended effective August 10, 1978 (Supp. 78-4). Repealed effective December 18, 1992 (Supp. 92-4). New Section made by final rulemaking at 19 A.A.R. 2894, effective November 10, 2013 (Supp. 13-3).

R4-23-703. Assisted Living Facilities

- A. Before dispensing, selling, or delivering a prescription or non-prescription drug to an assisted living facility resident, a pharmacy permittee shall verify the assisted living facility has a current and active license issued by the Arizona Department of Health Services.
- B. A pharmacy permittee shall ensure that, except as provided under subsection (C):
1. A controlled substance prescription drug is dispensed, sold, or delivered to an assisted living facility resident only after receiving a valid prescription order for the controlled substance prescription drug from the resident's medical practitioner; and
 2. The controlled substance prescription drug is labeled in accordance with A.R.S. §§ 32-1963.01, 32-1968, and 36-2525 and includes the beyond-use date on the label.
- C. A pharmacy permittee may dispense, sell, or deliver to an assisted living facility resident a Schedule III, IV, or V controlled substance prescription if the pharmacy permittee:
1. Receives a written or oral prescription order for the Schedule III, IV, or V controlled substance from:
 - a. The resident's medical practitioner,
 - b. An individual licensed by the Arizona Board of Nursing who is acting within the scope of practice of the individual's license, or
 - c. The manager or a caregiver of the assisted living facility if the resident's medical practitioner has a written agreement with the assisted living facility designating a representative of the assisted living facility as an agent of the medical practitioner and a licensed medical practitioner provided the prescription order;
 2. Complies with subsection (D)(2); and
 3. Labels the Schedule III, IV, or V controlled substance as specified under subsection (B)(2).
- D. A pharmacy permittee may dispense, sell, or deliver to an assisted living facility resident a non-controlled substance prescription or non-prescription drug if the pharmacy permittee:
1. Receives a written or oral prescription order for the non-controlled substance prescription or non-prescription drug from:
 - a. The resident's medical practitioner,
 - b. An individual licensed by the Arizona Board of Nursing who is acting within the scope of practice of the individual's license, or
 - c. An assisted living facility manager or caregiver acting under the authority of a licensed medical practitioner;
 2. Determines the written or oral prescription order:
 - a. Meets the requirements of R4-23-407, and
 - b. Includes the name and title of the individual transmitting the prescription order; and

3. Labels the non-narcotic prescription or non-prescription drug in accordance with A.R.S. §§ 32-1963.01 and 32-1968 and includes the beyond-use date on the label.
- E. If the label on an assisted living facility resident's drug container becomes damaged or soiled, a pharmacist employed by the pharmacy permittee that dispensed the drug container, through the exercise of professional judgment, may relabel the drug container. Only a pharmacist is permitted to label a drug container or alter the label of a drug container.
- F. A pharmacist may help assisted living facility personnel develop written policies and procedures regarding procuring, administering, storing, controlling, keeping records, and disposing of drugs in the facility and provide information concerning safe and effective supervision of drug self-administration.
- G. A pharmacy permittee shall not place an emergency drug supply unit as described in R4-23-701.02 or an automated dispensing system as described in R4-23-701.04 in an assisted living facility.
- H. A pharmacist shall not repackage a drug previously dispensed to an assisted living facility resident.

Former Rules 7.2100, 7.2200, 7.2300, 7.2410, 7.2420, and 7.2430. Repealed effective November 4, 1998 (Supp. 98-4).

ARTICLE 9. PENALTIES AND MISCELLANEOUS**R4-23-901. Penalty for Violations**

Any person, firm, or corporation violating any provision of 4 A.A.C. 23 is subject to the penalties in A.R.S. § 32-1996. In addition, a license or permit issued under the provisions of A.R.S. Title 32, Chapter 18 is subject to suspension or revocation for violation of 4 A.A.C. 23.

Historical Note

Former Rule 9.0000. Amended by final rulemaking at 6 A.A.R. 3177, effective August 3, 2000 (Supp. 00-3).

ARTICLE 10. UNIFORM CONTROLLED SUBSTANCES AND DRUG OFFENSES**R4-23-1001. Repealed****Historical Note**

Adopted effective August 2, 1982 (Supp. 82-4). Section repealed by final rulemaking at 6 A.A.R. 3177, effective August 3, 2000 (Supp. 00-3).

R4-23-1002. Repealed**Historical Note**

Adopted effective August 2, 1982 (Supp. 82-4). Repealed effective November 4, 1998 (Supp. 98-4).

R4-23-1003. Records and Order Forms**A. Records.**

1. If the pharmacist-in-charge of a pharmacy is replaced by another pharmacist-in-charge, the new pharmacist-in-charge shall complete an inventory of all controlled substances in the pharmacy within 10 days of assuming the responsibility. This inventory and any other required controlled substance inventory shall:
 - a. Include an exact count of all Schedule II controlled substances;
 - b. Include an exact count of all Schedule III through Schedule V controlled substances or an estimated count if the stock container contains fewer than 1001 units;
 - c. Indicate the date the inventory is taken and whether the inventory is taken before opening of business or after close of business for the pharmacy;
 - d. Be signed by:
 - i. The pharmacist-in-charge; or
 - ii. For other required inventories, the pharmacist who does the inventory;
 - e. Be kept separately from all other records; and
 - f. Be available in the pharmacy for inspection by the Board or its designee for not less than three years.
2. A loss of a controlled substance shall be reported:
 - a. Within 10 days of discovery;
 - b. On a DEA form 106;
 - c. By the pharmacist-in-charge of a pharmacy or a manufacturer;
 - d. By the permittee or designated representative of a full-service wholesaler; and
 - e. To the federal Drug Enforcement Administration (DEA), the Narcotic Division of the Department of Public Safety (DPS), and the Board of Pharmacy. A

Board of Pharmacy

- copy of the DEA form 106 shall be kept on file by the pharmacy permittee. The DEA form 106 shall state whether the police investigated the loss.
3. Every person manufacturing any controlled substance, including repackaging or relabeling, shall record and retain for not less than three years the manufacturing, repackaging, or relabeling date for each controlled substance.
 4. Every person receiving, selling, delivering, or disposing of any controlled substance shall record and retain for not less than three years the following information:
 - a. The name, strength, dosage form, and quantity of each controlled substance received, sold, delivered, or disposed;
 - b. The name, address, and DEA registration number of the person from whom each controlled substance is received;
 - c. The name, address, and DEA registration number of the person to whom each controlled substance is sold or delivered or who disposes of each controlled substance; and
 - d. The date of each transaction.
 5. A full-service drug wholesale permittee or the designated representative shall complete an inventory of all controlled substances in the manner prescribed in subsection (A)(1). The permittee or designated representative shall conduct this inventory:
 - a. On May 1 of each year or as directed by the Board; and
 - b. If there is a change of ownership, or discontinuance of business, or within 10 days of a change of a designated representative.
 6. A drug manufacturer permittee or the pharmacist-in-charge shall complete an inventory of all controlled substances in the manner prescribed in subsection (A)(1). The permittee or pharmacist-in-charge shall conduct this inventory:
 - a. On May 1 of each year or as directed by the Board; and
 - b. If there is a change of ownership, or discontinuance of business, or within 10 days of a change of a pharmacist-in-charge.
- B.** Order form. For purposes of A.R.S. § 36-2524, "Order Form" means DEA Form 222c.

Historical Note

Adopted effective August 2, 1982 (Supp. 82-4).

Amended effective November 1, 1993 (Supp. 93-4).

Amended effective April 1, 1995; filed January 31, 1995 (Supp. 95-1). Amended by final rulemaking at 6 A.A.R. 3177, effective August 3, 2000 (Supp. 00-3). Amended by final rulemaking at 12 A.A.R. 1912, effective July 1, 2006 (Supp. 06-2). Amended by final rulemaking at 14 A.A.R. 3670, effective November 8, 2008 (Supp. 08-3).

R4-23-1004. Repealed**Historical Note**

Adopted effective August 2, 1982 (Supp. 82-4). Repealed effective November 4, 1998 (Supp. 98-4).

R4-23-1005. Substances Excepted from the Schedules of Controlled Substances

- A.** All over-the-counter non-narcotic substances containing limited amounts of controlled substances that are excluded from all controlled substance schedules by 21 CFR 1308.22 (Revised April 1, 2012, incorporated by reference and on file with the Board. This incorporated material contains no future

editions or amendments.), are excluded from all controlled substance schedules in Arizona.

- B.** All chemical preparations or mixtures containing one or more controlled substances listed in any schedule that are exempted from all controlled substance schedules by 21 CFR 1308.24 (Revised April 1, 2012, incorporated by reference and on file with the Board. This incorporated material contains no future editions or amendments.), are excluded from all controlled substance schedules in Arizona.
- C.** All prescription-only drugs that are exempted by 21 CFR 1308.32 (Revised April 1, 2012, incorporated by reference and on file with the Board. This incorporated material contains no future editions or amendments.), are excluded from all controlled substance schedules in Arizona.

Historical Note

Adopted effective August 2, 1982 (Supp. 82-4).

Amended by final rulemaking at 6 A.A.R. 3177, effective August 3, 2000 (Supp. 00-3). Amended by final rulemaking at 18 A.A.R. 2609, effective December 2, 2012 (Supp. 12-4).

R4-23-1006. Substances Excepted from Drug Offenses

The following materials, compounds, mixtures, or preparations containing any stimulant or depressant substance included in A.R.S. §§ 13-3401(6)(b) or 13-3401(6)(c) are excepted from the definition of dangerous drugs under the authority of A.R.S. § 32-1904(B)(14):

1. Over-the-counter drugs excepted in R4-23-1005(A).
2. Chemical preparations excepted in R4-23-1005(B).
3. Prescription-only drugs excepted in R4-23-1005(C).

Historical Note

Adopted effective August 2, 1982 (Supp. 82-4).

Amended by final rulemaking at 6 A.A.R. 3177, effective August 3, 2000 (Supp. 00-3).

ARTICLE 11. PHARMACY TECHNICIANS

Article 11, consisting of R4-23-1101 through R4-23-1105, made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1).

R4-23-1101. Licensure and Eligibility

- A.** License required. A person shall not work as a pharmacy technician or pharmacy technician trainee in Arizona, unless the person possesses a pharmacy technician or pharmacy technician trainee license issued by the Board.
- B.** Eligibility.
1. To be eligible for licensure as a pharmacy technician trainee, a person shall:
 - a. Be of good moral character,
 - b. Be at least 18 years of age, and
 - c. Have a high school diploma or the equivalent of a high school diploma.
 2. To be eligible for licensure as a pharmacy technician, a person shall:
 - a. Meet the requirements of subsection (B)(1),
 - b. Complete a pharmacy technician training program that meets the standards prescribed in R4-23-1105, and
 - c. Pass the Pharmacy Technician Certification Board (PTCB) examination or another Board-approved pharmacy technician examination.
- C.** A pharmacy technician delinquent license. Before an Arizona pharmacy technician license will be reinstated, a pharmacy technician whose Arizona pharmacy technician license is delinquent for five or more consecutive years shall furnish to the Board satisfactory proof of fitness to be licensed as a phar-

Board of Pharmacy

macy technician and pay all past due biennial renewal fees and penalty fees. Satisfactory proof includes:

1. For a person with a delinquent license who is practicing as a pharmacy technician out-of-state with a pharmacy technician license issued by another jurisdiction:
 - a. Proof of current, unrestricted pharmacy technician licensure in another jurisdiction; and
 - b. Proof of employment as a pharmacy technician during the last 12 months; or
2. For a person with a delinquent license who did not practice as a pharmacy technician within the last 12 months:
 - a. Take and pass a Board-approved pharmacy technician examination, and
 - b. Complete 20 contact hours or two CEUs of continuing education activity sponsored by an approved provider, including at least two contact hours or 0.2 CEUs of continuing education activity in pharmacy law.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 19 A.A.R. 102, effective March 10, 2013 (Supp. 13-1).

R4-23-1102. Pharmacy Technician Licensure

- A. Eligibility. An applicant for licensure as a pharmacy technician shall provide the Board proof that the applicant is eligible under R4-23-1101(B)(2), including documentation that the applicant:
 1. Completed a pharmacy technician training program that meets the standards prescribed in R4-23-1105(B)(2); and
 2. Passed the Pharmacy Technician Certification Board (PTCB) examination or another Board-approved pharmacy technician examination; or
 3. Meets the requirements of R4-23-1105(D)(1) or (2).
- B. Application.
 1. An applicant for licensure as a pharmacy technician shall:
 - a. Submit a completed application electronically or manually on a form furnished by the Board, and
 - b. Submit with the application form:
 - i. The documents specified in the application form,
 - ii. The initial licensure fee specified in R4-23-205(A)(3)(a), and
 - iii. The wall license fee specified in R4-23-205(E)(1)(c).
 2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
- C. Licensure.
 1. If an applicant is found to be ineligible for pharmacy technician licensure under statute and rule, the Board office shall issue a written notice of denial to the applicant.
 2. If an applicant is found to be eligible for pharmacy technician licensure under statute and rule, the Board office shall issue a certificate of licensure and a wall license. An applicant who is assigned a license number and who has been granted "open" status on the Board's license verification site may begin practice as a pharmacy technician prior to receiving the certificate of licensure.
 3. An applicant who is assigned a license number and who has a "pending" status on the Board's license verification site shall not practice as a pharmacy technician until the Board office issues a certificate of licensure as specified in subsection (2).

4. A licensee shall maintain the certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.

D. License renewal.

1. To renew a license, a pharmacy technician shall submit a completed license renewal application electronically or manually on a form furnished by the Board with the biennial renewal fee specified in R4-23-205(A)(3)(b).
 2. If the biennial renewal fee is not paid by November 1 of the renewal year specified in A.R.S. § 32-1925, the pharmacy technician license is suspended and the licensee shall not practice as a pharmacy technician. The licensee shall pay a penalty as provided in A.R.S. § 32-1925 and R4-23-205(G)(1) to vacate the suspension.
 3. A licensee shall maintain the renewal certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
- E. Time-frames for pharmacy technician licensure and license renewal. The Board office shall follow the time-frames established in R4-23-202(F).
- F. Verification of license. A pharmacy permittee or pharmacist-in-charge shall not permit a person to practice as a pharmacy technician until the pharmacy permittee or pharmacist-in-charge verifies that the person is currently licensed by the Board as a pharmacy technician.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 19 A.A.R. 102, effective March 10, 2013 (Supp. 13-1). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-1103. Pharmacy Technician Trainee Licensure

- A. Eligibility. An applicant for licensure as a pharmacy technician trainee shall provide the Board proof that the applicant is eligible under R4-23-1101(B)(1).
- B. Application.
 1. An applicant for licensure as a pharmacy technician trainee shall:
 - a. Submit a completed application electronically or manually on a form furnished by the Board, and
 - b. Submit with the application form:
 - i. The documents specified in the application form,
 - ii. The licensure fee specified in R4-23-205(A)(4), and
 - iii. The wall license fee specified in R4-23-205(E)(1)(d).
 2. The Board office shall deem an application form received on the date the Board office electronically or manually date-stamps the form.
- C. Licensure.
 1. If an applicant is found to be ineligible for pharmacy technician trainee licensure under statute and rule, the Board office shall issue a written notice of denial to the applicant.
 2. If an applicant is found to be eligible for pharmacy technician trainee licensure under statute and rule, the Board office shall issue a certificate of licensure and a wall license. An applicant who is assigned a license number and who has been granted "open" status on the Board's license verification site may begin practice as a pharmacy technician trainee prior to receiving the certificate of licensure.
 3. An applicant who is assigned a license number and who has a "pending" status on the Board's license verification

Board of Pharmacy

- site shall not practice as a pharmacy technician trainee until the Board office issues a certificate of licensure as specified in subsection (2).
4. A licensee shall maintain the certificate of licensure in the practice site for inspection by the Board or its designee or review by the public.
5. A pharmacy technician trainee license is valid for 24 months from the date issued. A pharmacy technician trainee who does not complete the prescribed training program and pass the Pharmacy Technician Certification Board (PTCB) examination or another Board-approved pharmacy technician examination before the pharmacy technician trainee's license expires is not eligible for licensure as a pharmacy technician and shall not practice as a pharmacy technician or pharmacy technician trainee.
- D. Re-application for licensure.**
1. The Board may allow a pharmacy technician trainee whose license expires before the pharmacy technician trainee completes the prescribed training program and passes the Pharmacy Technician Certification Board (PTCB) examination or another Board-approved pharmacy technician examination to reapply for licensure not more than one time. A pharmacy technician trainee whose license has expired may make a special request to the Board under R4-23-401 for approval to reapply for licensure.
 2. The Board shall base its decision to grant or deny a special request to reapply for licensure on an assessment of:
 - a. The reasons the pharmacy technician trainee did not complete a pharmacy technician training program and the likelihood that the pharmacy technician trainee will complete a pharmacy technician training program within the next 24 months,
 - b. The reasons the pharmacy technician trainee failed the pharmacy technician examination and the likelihood that the pharmacy technician trainee will pass the pharmacy technician examination within the next 24 months, and
 - c. Other extenuating circumstances.
 3. A pharmacy technician trainee that receives Board approval to reapply for licensure shall submit a completed application manually on a form furnished by the Board and pay the licensure fee specified in R4-23-205(A)(4).
- E. Time-frames for pharmacy technician trainee licensure.** The Board office shall follow the time-frames established in R4-23-202(F).
- F. Verification of license.** A pharmacy permittee or pharmacist-in-charge shall not permit a person to practice as a pharmacy technician trainee until the pharmacy permittee or pharmacist-in-charge verifies that the person is currently licensed by the Board as a pharmacy technician trainee.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 19 A.A.R. 2911, effective November 10, 2013 (Supp. 13-3).

R4-23-1104. Pharmacy Technicians and Pharmacy Technician Trainees

- A. Permissible tasks of a pharmacy technician trainee.** Acting in compliance with all applicable statutes and rules and under the supervision of a pharmacist, a pharmacy technician trainee licensed under R4-23-1103 may assist a graduate intern, pharmacy intern, or pharmacist with the following when applicable to the pharmacy practice site:
1. Record on the original prescription order the serial number of the prescription medication and date dispensed;
 2. Initiate or accept verbal or electronic refill authorization from a medical practitioner or medical practitioner's agent and record, on the original prescription order or by an alternative method approved by the Board or its designee, the medical practitioner's name, patient name, name and quantity of prescription medication, specific refill information, and name of medical practitioner's agent, if any;
 3. Record information in the refill record or patient profile;
 4. Enter information for a new or refill prescription medication as required under A.R.S. § 32-1964;
 5. Type and affix a label for the prescription medication. A pharmacist or graduate or pharmacy intern working under the supervision of a pharmacist shall verify the accuracy of the label as described under R4-23-402(A)(11);
 6. Reconstitute a prescription medication, if a pharmacist checks the ingredients and procedure before reconstitution and verifies the final product after reconstitution;
 7. Retrieve, count, or pour a prescription medication, if a pharmacist verifies the contents of the prescription medication against the original prescription medication container or by an alternative drug identification method approved by the Board or its designee;
 8. Prepackage drugs in accordance with R4-23-402(A); and
 9. Measure, count, pour, or otherwise prepare and package a drug needed for hospital inpatient dispensing, if a pharmacist verifies the accuracy, measuring, counting, pouring, preparing, packaging, and safety of the drug before the drug is delivered to a patient care area.
- B. Permissible tasks of a pharmacy technician.** Acting in compliance with all applicable statutes and rules and under the supervision of a pharmacist, a pharmacy technician licensed under R4-23-1102 may:
1. Perform the tasks listed in subsection (A);
 2. After completing a pharmacy technician drug compounding training program developed by the pharmacy permittee or pharmacist-in-charge under R4-23-1105(C), assist a pharmacist, graduate intern, or pharmacy intern in compounding prescription medications and sterile or non-sterile pharmaceuticals in accordance with written policies and procedures, if the preparation, accuracy, and safety of the final product is verified by a pharmacist before dispensing;
 3. Perform a final technology-assisted verification of product if the pharmacy technician is qualified under R4-23-1104.01(D); and
 4. If technology-assisted verification is performed, type and affix a label for the prescription medication. A pharmacist or graduate or pharmacy intern shall verify the accuracy of the label as described under R4-23-402(A)(12).
- C. A trained and licensed pharmacy technician or pharmacy technician trainee who performs a task as authorized under subsections (A) and (B) shall ensure the task is performed accurately.**
- D. Prohibited activities.** A pharmacy technician or pharmacy technician trainee shall not perform a professional practice reserved for a pharmacist, graduate intern, or pharmacy intern in accordance with R4-23-402 or R4-23-653.
- E. A pharmacy technician or pharmacy technician trainee shall wear a badge indicating name and title while on duty.**
- F. Before employing a pharmacy technician or pharmacy technician trainee, a pharmacy permittee or pharmacist-in-charge shall develop, implement, review, and revise in the manner described in R4-23-653(A) and comply with policies and pro-**

Board of Pharmacy

- cedures outlined in subsection (G) for pharmacy technician and pharmacy technician trainee tasks.
- G.** A pharmacy permittee or pharmacist-in-charge shall ensure policies and procedures required under subsection (F) include the following:
1. For all practice sites:
 - a. Supervisory controls and verification procedures to ensure the quality and safety of pharmaceutical service;
 - b. Employment performance expectations for a pharmacy technician and pharmacy technician trainee;
 - c. The tasks a pharmacy technician or pharmacy technician trainee may perform as specified under subsections (A) and (B);
 - d. Pharmacist and patient communication;
 - e. Reporting, correcting, and avoiding medication and dispensing errors;
 - f. Security procedures for:
 - i. Confidentiality of patient prescription records, and
 - ii. The pharmacy area;
 - g. Automated medication distribution system;
 - h. Compounding procedures for pharmacy technicians; and
 - i. Brief overview of state and federal pharmacy statutes and rules;
 2. For community and limited-service pharmacy practice sites:
 - a. Prescription dispensing procedures for:
 - i. Accepting a new written prescription order,
 - ii. Accepting a refill request,
 - iii. Selecting a drug product,
 - iv. Counting and pouring,
 - v. Labeling, and
 - vi. Obtaining refill authorization; and
 - b. Computer data-entry procedures for:
 - i. New and refill prescriptions,
 - ii. Patient's drug allergies,
 - iii. Drug-drug interactions,
 - iv. Drug-food interactions,
 - v. Drug-disease state contraindications,
 - vi. Refill frequency,
 - vii. Patient's disease and medical condition,
 - viii. Patient's age or date of birth and gender, and
 - ix. Patient profile maintenance; and
 3. For hospital pharmacy practice sites:
 - a. Medication order procurement and data entry,
 - b. Drug preparation and packaging,
 - c. Outpatient and inpatient drug delivery, and
 - d. Inspection of drug storage and preparation areas and patient care areas.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 19 A.A.R. 102, effective March 10, 2013 (Supp. 13-1). Amended by final rulemaking at 23 A.A.R. 3257, effective January 8, 2018 (Supp. 17-4).

R4-23-1104.01 Technology-assisted Verification of Product

- A.** By complying with this Section, the permittee of a retail, institutional, or limited-service pharmacy may implement a technology-assisted verification of product program that allows a pharmacy technician licensed under R4-23-1102 and qualified under subsection (D) to perform final product verification.
- B.** Written program description required. Before implementing a technology-assisted verification of product program the permittee of a retail, institutional, or limited-service pharmacy shall prepare a written program description that includes the following:
1. Responsibility of both the pharmacist in charge and permittee to ensure compliance with this Section;
 2. Responsibility of the permittee to design, implement, and monitor a process that ensures the accuracy and safety of the product dispensed;
 3. Duties of a verification technician;
 4. The training necessary to qualify and remain qualified as a verification technician;
 5. The monitoring and evaluation procedures to be used to ensure competency of the verification technician; and
 6. Prohibition of a verification technician performing a final accuracy check of a completed prescription label.
- C.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall:
1. Post the written program description required under subsection (B) in the pharmacy area;
 2. Provide a copy of the written program description to the pharmacist in charge and verification technician;
 3. Obtain the signature of the pharmacist in charge and verification technician on a copy of the written program description and place the signed copy in the personnel file of the pharmacist in charge and verification technician;
 4. Ensure scanning technology used in the technology-assisted verification program captures both product and patient information; and
 5. Update the written program description as needed and repeat subsections (C)(1) through (4) after each update.
- D.** Verification technician training: The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall ensure a pharmacy technician does not perform the duties of a verification technician unless the pharmacy technician has the following qualifications:
1. Is licensed under R4-23-1102;
 2. Has at least 1,000 hours of pharmacy technician work experience in the same kind of pharmacy practice site in which the technology-assisted verification of product will be performed;
 3. Completes a training program that includes at least the following:
 - a. Role of a verification technician in the dispensing process,
 - b. Legal requirements of a verification technician,
 - c. How to use the technology-assisted verification system,
 - d. Primary causes of medication errors, and
 - e. Identifying and resolving dispensing errors; and
 4. Completes at least four hours of the continuing education required under R4-23-1106 on patient safety.
- E.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall ensure the pharmacy practice site has a computer data storage and retrieval system that meets the standards in R4-23-408(B).
- F.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall ensure a verification technician verifies only the following:
1. A product with scanning technology that identifies product, or

Board of Pharmacy

2. A robotically prepared unit-dose product.
- G.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall ensure a verification technician does not verify the following:
1. A product that involves a combination of drugs resulting from compounding or mixing two or more ingredients or products,
 2. A product that involves or results from an alteration of a drug, or
 3. A DEA schedule II controlled substance.
- H.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall perform an unannounced evaluation of the competency of a verification technician at least twice a year and take steps to remediate any deficiencies identified including removing verification duties from the technician.
- I.** The permittee of a retail, institutional, or limited-service pharmacy implementing a technology-assisted verification of product program shall maintain the following records:
1. Date the pharmacy technician was designated as a verification technician,
 2. Date the pharmacy technician completed the training required under subsection (D)(3),
 3. Dates and results of the evaluations conducted under subsection (H), and
 4. Date and reason for any disciplinary action against the verification technician arising from performing the duties of a verification technician.
- J.** A verification technician shall wear identification that includes the title "Verification Technician" while on duty.
- K.** As used in this Section, the term "verification technician" means an individual who:
1. Is qualified under subsection (D),
 2. Uses a combination of scanning technology and visual confirmation to verify a product prepared to be dispensed is the product prescribed and indicated on the prescription label, and
 3. Performs verification of work performed by other pharmacy technicians before a pharmacist or graduate or pharmacy intern working under the supervision of a pharmacist performs the final accuracy check required under R4-23-402(A).

Historical Note

New Section made by final rulemaking at 23 A.A.R.
3257, effective January 8, 2018 (Supp. 17-4).

R4-23-1105. Pharmacy Technician Trainee Training Program, Pharmacy Technician Drug Compounding Training Program, and Alternative Pharmacy Technician Training

- A.** Nothing in this Section prevents additional offsite training of a pharmacy technician.
- B.** Pharmacy technician trainee training program.
1. A pharmacy permittee or pharmacist-in-charge shall develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with a pharmacy technician trainee training program based on the needs of the individual pharmacy.
 2. A pharmacy permittee or pharmacist-in-charge shall ensure that the pharmacy technician trainee training program includes training guidelines that:
 - a. Define the specific tasks a pharmacy technician trainee is expected to perform,
 - b. Specify how and when the pharmacist-in-charge will assess the pharmacy technician trainee's competency, and
- c. Address the policies and procedures specified in R4-23-1104(G) and the permissible activities specified in R4-23-1104(A).
3. A pharmacist-in-charge shall:
 - a. Document the date that a pharmacy technician trainee has successfully completed the training program, and
 - b. Maintain the documentation required in this subsection for inspection by the Board or its designee.
4. A pharmacy technician trainee shall perform only those tasks, listed in R4-23-1104(A), for which training and competency has been demonstrated.
- C.** Pharmacy technician drug compounding training program.
1. A pharmacy permittee or pharmacist-in-charge shall develop, implement, review, and revise in the same manner described in R4-23-653(A) and comply with a pharmacy technician drug compounding training program based on the needs of the individual pharmacy;
 2. A pharmacy permittee or pharmacist-in-charge shall ensure that the pharmacy technician drug compounding training program includes training guidelines that:
 - a. Define the specific tasks a pharmacy technician is expected to perform,
 - b. Specify how and when the pharmacist-in-charge will assess the pharmacy technician's competency, and
 - c. Address the following procedures and tasks:
 - i. Area preparation,
 - ii. Component preparation,
 - iii. Aseptic technique and product preparation,
 - iv. Packaging and labeling, and
 - v. Area clean up;
 3. A pharmacist-in-charge shall:
 - a. Document the date that a pharmacy technician has successfully completed the pharmacy technician drug compounding training program, and
 - b. Maintain the documentation required in this subsection for inspection by the Board or its designee.
- D.** Alternative pharmacy technician training.
1. An individual who has passed the required Board-approved pharmacy technician examination, but has not followed the normal path to pharmacy technician licensure by obtaining a pharmacy technician trainee license and working while completing a pharmacy technician trainee training program as specified in subsection (B), may obtain a pharmacy technician license, if the individual has employment in pharmacy and completes an on-the-job training program as part of the individual's employment orientation that includes: reading and discussing with the pharmacist-in-charge of the pharmacy where employed, the Board rules concerning pharmacy technicians and pharmacy technician trainees, the pharmacy technician and pharmacy technician trainee job description, and the policies and procedures manual of that pharmacy.
 2. An individual who has completed a pharmacy technician certificate program and has passed the required Board-approved pharmacy technician examination, but has not followed the normal path to pharmacy technician licensure by obtaining a pharmacy technician trainee license and working while completing a pharmacy technician trainee training program as specified in subsection (B), may obtain a pharmacy technician license, if the individual has employment in pharmacy and completes an on-the-job training program as part of the individual's employment orientation that includes: reading and discussing with the pharmacist-in-charge of the pharmacy

Board of Pharmacy

- where employed, the Board rules concerning pharmacy technicians and pharmacy technician trainees, the pharmacy technician and pharmacy technician trainee job description, and the policies and procedures manual of that pharmacy.
3. A pharmacist-in-charge shall:
 - a. Document the date that an individual licensed under subsection (D)(1) or (2) has successfully completed the on-the-job training program as part of the individual's employment orientation as required under subsection (D)(1) or (2), and
 - b. Maintain the documentation required in this subsection for inspection by the Board or its designee.
 - E. A pharmacy technician shall perform only those tasks, listed in R4-23-1104(B), for which training and competency has been demonstrated.

Historical Note

New Section made by final rulemaking at 10 A.A.R. 1192, effective May 1, 2004 (Supp. 04-1). Amended by final rulemaking at 12 A.A.R. 3032, effective October 1, 2006 (Supp. 06-3). Amended by final rulemaking at 19 A.A.R. 102, effective March 10, 2013 (Supp. 13-1).

R4-23-1106. Continuing Education Requirements

- A. General. According to A.R.S. § 32-1925(I), the Board shall not renew a pharmacy technician license unless the applicant has during the two years preceding the application for renewal:
 1. Participated in 20 contact hours or two CEUs of continuing education activity sponsored by an Approved Provider defined in R4-23-110, and
 2. At least two of the contact hours or 0.2 of the CEUs are approved courses in pharmacy law. For a pharmacy technician licensed less than 24 months the continuing education contact hours are calculated by multiplying 0.83 hours times the number of months between the date of initial licensure and the licensee's next license renewal date.
- B. Valid CEUs. The Board shall:
 1. Only accept CEUs for continuing education activities sponsored by an Approved Provider;
 2. Only accept CEUs accrued during the two-year period immediately before licensure renewal;
 3. Not allow CEUs accrued in a biennial renewal period in excess of the required two CEUs to be carried forward to the succeeding biennial renewal period;
 4. Allow a pharmacy technician who leads, instructs, or lectures to a group of health professionals on pharmacy-related topics in continuing education activities sponsored by an Approved Provider to receive CEUs for a presentation by following the same attendance procedures as any other attendee of the continuing education activity; and
 5. Not accept as a CEU a pharmacy technician's normal teaching duties within a learning institution if the pharmacy technician's primary responsibility is the education of health professionals.
- C. Continuing education records and reporting CEUs. A pharmacy technician shall:
 1. Maintain continuing education records that:
 - a. Verify the continuing education activities the pharmacy technician participated in during the preceding five years; and
 - b. Consist of a statement of credit or a certificate issued by an Approved Provider at the conclusion of a continuing education activity;

2. At the time of licensure renewal, attest to the number of CEUs the pharmacy technician participated in during the renewal period on the biennial renewal form; and
3. When requested by the Board office, submit proof of continuing education participation within 20 days of the request.
- D. The Board shall deem a pharmacy technician's failure to comply with the continuing education participation, recording, or reporting requirements of this Section as unprofessional conduct and grounds for disciplinary action by the Board under A.R.S. § 32-1927.01.
- E. A pharmacy technician who is aggrieved by any decision of the Board concerning continuing education units may request a hearing before the Board.

Historical Note

New Section made by final rulemaking at 11 A.A.R. 1105, effective April 30, 2005 (Supp. 05-1).

ARTICLE 12. PRESCRIPTION MEDICATION DONATION PROGRAM**R4-23-1201. Eligibility Requirements for Participation in the Program**

A physician's office, a pharmacy, or a health care institution may participate in the prescription medication donation program, under A.R.S. § 32-1909, if all of the following requirements, as applicable, are met:

1. The physician-in-charge of the participating physician's office has a current license issued under A.R.S. Title 32, Chapter 13 or 17;
2. The pharmacy has a current permit issued under A.R.S. Title 32, Chapter 18;
3. The health care institution has a current license issued under A.R.S. Title 36, Chapter 4 and has a physician-in-charge or pharmacist-in-charge of dispensing; and
4. The physician's office, the pharmacy, or the health care institution complies with all federal and state drug laws, rules, and regulations.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1202. Donating Medications

- A. The following may donate an eligible prescription medication, as specified in R4-23-1203, to a physician's office, a pharmacy, or a health care institution that participates in the prescription medication donation program:
 1. An individual for whom the prescription medication was prescribed on a patient-specific prescription order or that individual's health care decision maker;
 2. A manufacturer that has a current permit issued under A.R.S. Title 32, Chapter 18; or
 3. A health care institution that has a current license issued under A.R.S. Title 36, Chapter 4.
- B. An individual or health care decision maker electing to donate an eligible prescription medication shall not have taken possession of the prescription medication before the donation and shall make the donation through a medical practitioner, pharmacy, or health care institution.

Historical Note

New Section made by final rulemaking at 14 A.A.R. 4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1203. Eligible Prescription Medications

A prescription medication may be donated to a physician's office, a pharmacy, or a health care institution that participates in the pre-

Board of Pharmacy

scription medication donation program if the prescription medication:

1. Is not a:
 - a. Controlled substance;
 - b. Drug sample; or
 - c. Drug that can only be dispensed to a patient registered with the drug's manufacturer, because donation could prevent the manufacturer from maintaining required patient registration data;
2. Is in its original sealed and tamper-evident unit dose packaging that is unopened or has only its outside packaging opened and its single unit dose packaging undisturbed;
3. Has been in the possession of a licensed health care professional, manufacturer, pharmacy, or health care institution and not in the possession of the individual specified in R4-23-1202(A)(1);
4. Has been stored according to federal and state drug law and the requirements of the manufacturer's package insert;
5. Has an expiration date or beyond-use-date later than six months after the date of donation;
6. Is in packaging that shows the lot number and expiration date or beyond-use-date of the prescription medication;
7. Does not have any physical signs of tampering or adulteration; and
8. Is in packaging that does not have any physical signs of tampering, except for the outside packaging as specified in subsection (2).

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1204. Eligibility Requirements to Receive Donated Prescription Medications

An individual is eligible to receive donated prescription medications from the prescription medication donation program if the individual:

1. Is a resident of Arizona;
2. Has an annual family income that is less than or equal to 300% of the poverty level;
3. Satisfies one of the following:
 - a. Has no health insurance coverage;
 - b. Has health insurance coverage that does not pay for the prescription medication prescribed;
 - c. Is an American or Alaska Native who:
 - i. Is eligible for, but chooses not to use, the Indian Health Service to receive prescription medications; and
 - ii. Either has no other health insurance coverage or has health insurance coverage that does not pay for the prescription medication prescribed; or
 - d. Is a veteran who:
 - i. Is eligible for, but chooses not to use, Veterans Health Administration benefits to receive prescription medications; and
 - ii. Either has no other health insurance coverage or has health insurance coverage that does not pay for the prescription medication prescribed;
4. Is ineligible for enrollment in AHCCCS; and
5. If eligible for Medicare, is ineligible for a full low-income subsidy.

Historical Note

New Section made by final rulemaking at 14 A.A.R.

4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1205. Donor Form

- A. Before donating a prescription medication, a donor shall sign a form that includes:
 1. A statement attesting that the donor is one of the entities identified in R4-23-1202(A) and intends to voluntarily donate the prescription medication to the prescription medication donation program;
 2. If the donor is the individual named on the prescription or the individual's health care decision maker:
 - a. The individual's name and address;
 - b. The name of the individual's health care decision maker, if applicable;
 - c. The name of the medical practitioner, pharmacy, or health care institution through which the donation is being made;
 - d. The following information about the donated prescription medication:
 - i. The brand name or generic name of the prescription medication donated;
 - ii. If a generic medication, the name of the manufacturer or the national drug code number of the prescription medication donated;
 - iii. The strength of the prescription medication donated;
 - iv. The quantity of the prescription medication donated;
 - v. The lot number of the prescription medication donated; and
 - vi. The expiration date or beyond-use-date of the prescription medication donated;
 - e. A statement attesting that the individual or the individual's health care decision maker has not had possession of the donated prescription medication;
 - f. The dated signature of the individual or the individual's health care decision maker;
 - g. If the donation is an ongoing donation as authorized under subsection (B), a statement that conforms to subsection (B);
 - h. A statement by the medical practitioner, pharmacy, or health care institution attesting that the medical practitioner, pharmacy, or health care institution through which the donation is being made has stored the donated prescription medication as required in R4-23-1203(4);
 - i. A statement by the medical practitioner, pharmacy, or health care institution attesting that the drugs being donated meet the specific requirements of R4-23-1203(1); and
 - j. The dated signature of the medical practitioner or of an authorized agent for the pharmacy or health care institution through which the donation is being made;
 3. If the donor is a manufacturer:
 - a. The name and address of the manufacturer;
 - b. The information about the donated prescription medication specified in subsection (A)(2)(d);
 - c. A statement by the manufacturer that the manufacturer has stored the donated prescription medication as required in R4-23-1203(4); and
 - d. The dated signature of the manufacturer's authorized agent; and
 4. If the donor is a health care institution:
 - a. The name and address of the health care institution;
 - b. The information about the donated prescription medication specified in subsection (A)(2)(d);

Board of Pharmacy

- c. A statement attesting that the health care institution has stored the donated prescription medication as required in R4-23-1203(4);
 - d. A statement by the health care institution attesting that the drugs being donated meet the specific requirements of R4-23-1203(1); and
 - e. The dated signature of the health care institution's authorized agent.
- B.** An individual who resides in a health care institution, or the individual's health care decision maker, may elect to make an ongoing donation of future unused eligible prescription medication:
1. When future unused eligible prescription medication is a result of the individual's prescription medication being changed or discontinued by the individual's primary care provider; and
 2. By indicating the following on a donor form that complies with subsection (A): "From this day forward, I wish to donate all my remaining unused prescription medications that are eligible, under R4-23-1203, to the prescription medication donation program."
- C.** To stop an ongoing donation, an individual who resides in a health care institution, or the individual's health care decision maker, shall submit written notice to the receiving physician's office, pharmacy, or health care institution indicating the individual's, or the health care decision maker's, desire to stop the ongoing donation.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1206. Recipient Form

Before receiving a donated prescription medication from the prescription medication donation program, a recipient of a donated prescription medication shall sign a form:

1. Identifying the physician's office, pharmacy, or health care institution that is dispensing the donated prescription medication;
2. Stating that the recipient has been advised of and understands the immunity provisions of the program under A.R.S. § 32-1909(E) and (F);
3. Attesting that the recipient meets the eligibility requirements specified in R4-23-1204; and
4. Including the following:
 - a. The brand name or generic name of the prescription medication received;
 - b. If a generic medication, the name of the manufacturer or the national drug code number of the prescription medication received;
 - c. The strength of the prescription medication received;
 - d. The quantity of the prescription medication received;
 - e. The recipient's name and address; and
 - f. The dated signature of the recipient.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1207. Recordkeeping

- A.** Before transferring possession of a prescription medication donated by an individual or an individual's health care decision maker, a medical practitioner, pharmacy, or health care institution that has possession of the donated prescription medication and through which the donation is being made shall create an invoice that includes the following:

1. The name and address of the medical practitioner, pharmacy, or health care institution that has possession of the donated prescription medication;
 2. The name of the individual who made the donation;
 3. The brand name or generic name of the prescription medication transferred;
 4. If a generic medication, the name of the manufacturer or the national drug code number of the prescription medication transferred;
 5. The strength of the prescription medication transferred;
 6. The quantity of the prescription medication transferred;
 7. The lot number of the prescription medication transferred;
 8. The expiration date or beyond-use-date of the prescription medication transferred;
 9. The date the prescription medication is transferred to a participating physician's office, pharmacy, or health care institution; and
 10. The name and address of the participating physician's office, pharmacy, or health care institution to which the donated prescription medication is transferred.
- B.** Before transferring possession of a prescription medication donated by a manufacturer, the manufacturer shall create an invoice that includes the manufacturer's name and address and the information described in subsections (A)(3) through (10).
- C.** Before transferring possession of a prescription medication donated by a health care institution, the health care institution shall create an invoice that includes the health care institution's name and address and the information described in subsections (A)(3) through (10).
- D.** A medical practitioner, pharmacy, health care institution, or manufacturer required to create an invoice under subsection (A), (B), or (C) shall:
1. Transmit a copy of the invoice and the donor form required under R4-23-1205 to the participating physician's office, pharmacy, or health care institution to which a donated prescription medication is transferred;
 2. Maintain a copy of the invoice for a minimum of three years from the date of the invoice;
 3. Maintain a copy of the donor form for a minimum of three years from the date signed; and
 4. Make a copy of the invoice or donor form available upon request for inspection by the Board, its designee, or other authorized officers of the law.
- E.** A physician's office, a pharmacy, or a health care institution that participates in the prescription medication donation program shall:
1. Maintain:
 - a. The documents required under R4-23-1206 for a minimum of three years from the date signed; and
 - b. Each invoice and donor form received under subsection (D)(1) for a minimum of three years from the date received; and
 2. Make the documents required under R4-23-1206 and subsection (D)(1) available upon request for inspection by the Board, its designee, or other authorized officers of the law.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1208. Handling Fee

A physician's office, a pharmacy, or a health care institution that dispenses a donated prescription medication may charge a recipient of a donated prescription medication a handling fee of no more than

Board of Pharmacy

\$4.50 per prescription to cover inspection, stocking, and dispensing costs.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1209. Policies and Procedures

A physician's office, a pharmacy, or a health care institution that participates in the prescription medication donation program shall:

1. Develop, implement, and comply with policies and procedures for the receipt, storage, and distribution of prescription medications donated to the physician's office, the pharmacy, or the health care institution;
2. Review biennially and, if necessary, revise the policies and procedures required under this Section;
3. Document the review required under subsection (2);
4. Assemble the policies and procedures as a written manual or in a readily accessible electronic format;
5. Make the policies and procedures available for reference by a physician's office, pharmacy, or health care institution personnel and, upon request, for inspection by the Board or its designee; and
6. Ensure that the written or electronic policies and procedures required under subsection (1) include provisions to ensure:
 - a. That each transferred prescription medication meets the eligibility requirements of Sections R4-23-1202 and R4-23-1203;
 - b. That each individual who receives a donated prescription medication under the prescription medication donation program signs the recipient form specified in R4-23-1206;
 - c. Compliance with the applicable requirements for recordkeeping in Section R4-23-1207;
 - d. Compliance with the requirements of Section R4-23-1210; and
 - e. Compliance with the requirements of Section R4-23-1211.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1210. Dispensing Donated Prescription Medications

- A.** Before dispensing a donated prescription medication under the program, a participating physician's office, pharmacy, or health care institution shall:
1. Obtain and maintain a current drug identification reference or text in hard-copy or electronic media format;
 2. Inspect the donated prescription medication to ensure that the prescription medication has not been adulterated;
 3. Certify that the donated prescription medication has been stored in compliance with the requirements of the manufacturer's package insert;
 4. Comply with all federal and state laws regarding storage and distribution of a donated prescription medication;
 5. Obtain a prescription order of a licensed medical practitioner for the recipient to receive the donated prescription medication; and
 6. Properly label the donated prescription medication to be dispensed.
- B.** As specified in subsection (C) a participating physician's office, pharmacy, or health care institution may transfer a prescription medication donated under this Article to another participating physician's office, pharmacy, or health care institution, but the donated prescription medication shall not be resold.

C. A participating physician's office, pharmacy, or health care institution may transfer a donated prescription medication to another participating physician's office, pharmacy, or health care institution, if:

1. The transferring physician's office, pharmacy, or health care institution has available a prescription medication that the receiving physician's office, pharmacy, or health care institution needs;
2. The transferring physician's office, pharmacy, or health care institution prepares an invoice that includes its name and address and the information described in R4-23-1207(B)(3) through (10);
3. A copy of the invoice required in subsection (C)(2) is sent to the receiving physician's office, pharmacy, or health care institution with the transferred prescription medication; and
4. The transferring physician's office, pharmacy, or health care institution and the receiving physician's office, pharmacy, or health care institution each:
 - a. Keep a copy of the invoice required in subsection (C)(2) on file for three years from the date of transfer; and
 - b. Make the invoice records available, upon request, for inspection by the Board or its designee.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

R4-23-1211. Responsibilities of the Physician-in-charge or Pharmacist-in-charge of a Participating Physician's Office, Pharmacy, or Health Care Institution

The physician-in-charge of a participating physician's office; the pharmacist-in-charge of a participating pharmacy; or the physician-in-charge or pharmacist-in-charge of dispensing for a participating health care institution shall, either personally or through a designee:

1. Coordinate the receipt of prescription medications donated by manufacturers or health care institutions or through medical practitioners, pharmacies, or health care institutions from eligible donors;
2. Check each donated prescription medication against the invoice and any additional alternate record and resolve any discrepancies;
3. Store and secure donated prescription medications as required by federal and state law;
4. Inspect each donated prescription medication for adulteration;
5. Certify that each donated prescription medication has been stored in compliance with the manufacturer's package insert;
6. Ensure that expired, adulterated, or unidentifiable donated prescription medication is not dispensed;
7. Ensure that prescription medications identified under subsection (6) are destroyed within 30 days of identification as specified in subsection (9);
8. Ensure safety in drug recalls by destroying any donated prescription medication that may be subject to recall if its lot number cannot exclude it from recall;
9. Ensure destruction of expired, adulterated, unidentifiable, and recalled donated prescription medication by:
 - a. Following federal, state, and local guidelines for drug destruction;
 - b. Creating a list of expired, adulterated, unidentifiable, or recalled donated prescription medications to be destroyed;

Board of Pharmacy

- c. Following the destruction, signing the list described in subsection (9)(b) and having the list signed by a witness verifying the destruction; and
- d. Keeping the list described in subsection (9)(b) on file for three years from the date of destruction;
10. Redact or remove all previous patient or pharmacy labeling on a donated prescription medication before dispensing the donated prescription medication;
11. Ensure that all dispensed donated prescription medications comply with the labeling requirements of A.R.S. § 32-1968(D);
12. Place on the label of each dispensed donated prescription medication a beyond-use-date that does not exceed the beyond-use-date or expiration date from the original label of the donated prescription medication or, if the dispensed donated prescription medication comes from multiple packages, the earliest beyond-use-date or expiration date from the donated prescription medication packages; and
13. Maintain the records required in this Article.

Historical Note

New Section made by final rulemaking at 14 A.A.R.
4320, effective January 3, 2009 (Supp. 08-4).

As of October 21, 2019

32-1901. Definitions

In this chapter, unless the context otherwise requires:

1. "Administer" means the direct application of a controlled substance, prescription-only drug, dangerous drug or narcotic drug, whether by injection, inhalation, ingestion or any other means, to the body of a patient or research subject by a practitioner or by the practitioner's authorized agent or the patient or research subject at the direction of the practitioner.
2. "Advertisement" means all representations disseminated in any manner or by any means, other than by labeling, for the purpose of inducing, or that are likely to induce, directly or indirectly, the purchase of drugs, devices, poisons or hazardous substances.
3. "Advisory letter" means a nondisciplinary letter to notify a licensee or permittee that either:
 - (a) While there is insufficient evidence to support disciplinary action, the board believes that continuation of the activities that led to the investigation may result in further board action against the licensee or permittee.
 - (b) The violation is a minor or technical violation that is not of sufficient merit to warrant disciplinary action.
 - (c) While the licensee or permittee has demonstrated substantial compliance through rehabilitation, remediation or reeducation that has mitigated the need for disciplinary action, the board believes that repetition of the activities that led to the investigation may result in further board action against the licensee or permittee.
4. "Antiseptic", if a drug is represented as such on its label, means a representation that it is a germicide, except in the case of a drug purporting to be, or represented as, an antiseptic for inhibitory use as a wet dressing, ointment or dusting powder or other use that involves prolonged contact with the body.
5. "Authorized officers of the law" means legally empowered peace officers, compliance officers of the board of pharmacy and agents of the division of narcotics enforcement and criminal intelligence of the department of public safety.
6. "Automated prescription-dispensing kiosk" means a mechanical system that is operated as an extension of a pharmacy, that maintains all transaction information within the pharmacy operating system, that is separately permitted from the pharmacy and that performs operations that either:
 - (a) Accept a prescription or refill order, store prepackaged or repackaged medications, label and dispense patient-specific prescriptions and provide counseling on new or refilled prescriptions.
 - (b) Dispense or deliver a prescription or refill that has been prepared by or on behalf of the pharmacy that oversees the automated prescription-dispensing kiosk.
7. "Board" or "board of pharmacy" means the Arizona state board of pharmacy.

8. "Certificate of composition" means a list of a product's ingredients.

9. "Certificate of free sale" means a document that authenticates a product that is generally and freely sold in domestic or international channels of trade.

10. "Color additive" means a material that either:

(a) Is any dye, pigment or other substance made by a process of synthesis or similar artifice, or extracted, isolated or otherwise derived, with or without intermediate or final change of identity, from any vegetable, animal, mineral or other source.

(b) If added or applied to a drug, or to the human body or any part of the human body, is capable of imparting color, except that color additive does not include any material that has been or may be exempted under the federal act. Color includes black, white and intermediate grays.

11. "Compounding" means the preparation, mixing, assembling, packaging or labeling of a drug by a pharmacist or an intern or pharmacy technician under the pharmacist's supervision, for the purpose of dispensing to a patient based on a valid prescription order. Compounding includes the preparation of drugs in anticipation of prescription orders prepared on routine, regularly observed prescribing patterns and the preparation of drugs as an incident to research, teaching or chemical analysis or for administration by a medical practitioner to the medical practitioner's patient and not for sale or dispensing.

Compounding does not include the preparation of commercially available products from bulk compounds or the preparation of drugs for sale to pharmacies, practitioners or entities for the purpose of dispensing or distribution.

12. "Compressed medical gas distributor" means a person who holds a current permit issued by the board to distribute compressed medical gases pursuant to a compressed medical gas order to compressed medical gas suppliers and other entities that are registered, licensed or permitted to use, administer or distribute compressed medical gases.

13. "Compressed medical gases" means gases and liquid oxygen that a compressed medical gas distributor or manufacturer has labeled in compliance with federal law.

14. "Compressed medical gas order" means an order for compressed medical gases that is issued by a medical practitioner.

15. "Compressed medical gas supplier" means a person who holds a current permit issued by the board to supply compressed medical gases pursuant to a compressed medical gas order and only to the consumer or the patient.

16. "Controlled substance" means a drug, substance or immediate precursor that is identified, defined or listed in title 36, chapter 27, article 2.

17. "Corrosive" means any substance that when it comes in contact with living tissue will cause destruction of tissue by chemical action.

18. "Counterfeit drug" means a drug that, or the container or labeling of which, without authorization, bears the trademark, trade name or other identifying mark, imprint, number or device, or any likeness of

these, of a manufacturer, distributor or dispenser other than the person who in fact manufactured, distributed or dispensed that drug.

19. "Dangerous drug" has the same meaning prescribed in section 13-3401.

20. "Day" means a business day.

21. "Decree of censure" means an official action that is taken by the board and that may include a requirement for restitution of fees to a patient or consumer.

22. "Deliver" or "delivery" means the actual, constructive or attempted transfer from one person to another whether or not there is an agency relationship.

23. "Deputy director" means a pharmacist who is employed by the board and selected by the executive director to perform duties as prescribed by the executive director.

24. "Device", except as used in paragraph 18 of this section, section 32-1965, paragraph 4 and section 32-1967, subsection A, paragraph 15 and subsection C, means instruments, apparatuses and contrivances, including their components, parts and accessories, including all such items under the federal act, intended either:

(a) For use in the diagnosis, cure, mitigation, treatment or prevention of disease in the human body or other animals.

(b) To affect the structure or any function of the human body or other animals.

25. "Director" means the director of the division of narcotics enforcement and criminal investigation of the department of public safety.

26. "Direct supervision of a pharmacist" means the pharmacist is present. If relating to the sale of certain items, direct supervision of a pharmacist means that a pharmacist determines the legitimacy or advisability of a proposed purchase of those items.

27. "Dispense" means to deliver to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling or compounding necessary to prepare for that delivery.

28. "Dispenser" means a practitioner who dispenses.

29. "Distribute" means to deliver, other than by administering or dispensing.

30. "Distributor" means a person who distributes.

31. "Drug" means:

(a) Articles recognized, or for which standards or specifications are prescribed, in the official compendium.

(b) Articles intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in the human body or other animals.

(c) Articles other than food intended to affect the structure or any function of the human body or other animals.

(d) Articles intended for use as a component of any articles specified in subdivision (a), (b) or (c) of this paragraph but does not include devices or their components, parts or accessories.

32. "Drug enforcement administration" means the drug enforcement administration of the United States department of justice or its successor agency.

33. "Drug or device manufacturing" means the production, preparation, propagation or processing of a drug or device, either directly or indirectly, by extraction from substances of natural origin or independently by means of chemical synthesis and includes any packaging or repackaging of substances or labeling or relabeling of its container and the promotion and marketing of the same. Drug or device manufacturing does not include compounding.

34. "Economic poison" means any substance that alone, in chemical combination with or in formulation with one or more other substances is a pesticide within the meaning of the laws of this state or the federal insecticide, fungicide and rodenticide act and that is used in the production, storage or transportation of raw agricultural commodities.

35. "Enteral feeding" means nourishment provided by means of a tube inserted into the stomach or intestine.

36. "Established name", with respect to a drug or ingredient of a drug, means any of the following:

(a) The applicable official name.

(b) If there is no such name and the drug or ingredient is an article recognized in an official compendium, the official title in an official compendium.

(c) If neither subdivision (a) nor (b) of this paragraph applies, the common or usual name of the drug.

37. "Executive director" means the executive director of the board of pharmacy.

38. "Federal act" means the federal laws and regulations that pertain to drugs, devices, poisons and hazardous substances and that are official at the time any drug, device, poison or hazardous substance is affected by this chapter.

39. "Full service wholesale permittee":

(a) Means a permittee who may distribute prescription-only drugs and devices, controlled substances and over-the-counter drugs and devices to pharmacies or other legal outlets from a place devoted in whole or in part to wholesaling these items.

(b) Includes a virtual wholesaler as defined in rule by the board.

40. "Good manufacturing practice" means a system for ensuring that products are consistently produced and controlled according to quality standards and covering all aspects of design, monitoring and control of manufacturing processes and facilities to ensure that products do not pose any risk to the consumer or public.

41. "Highly toxic" means any substance that falls within any of the following categories:

- (a) Produces death within fourteen days in half or more than half of a group of ten or more laboratory white rats each weighing between two hundred and three hundred grams, at a single dose of fifty milligrams or less per kilogram of body weight, when orally administered.
- (b) Produces death within fourteen days in half or more than half of a group of ten or more laboratory white rats each weighing between two hundred and three hundred grams, if inhaled continuously for a period of one hour or less at an atmospheric concentration of two hundred parts per million by volume or less of gas or vapor or two milligrams per liter by volume or less of mist or dust, provided the concentration is likely to be encountered by humans if the substance is used in any reasonably foreseeable manner.
- (c) Produces death within fourteen days in half or more than half of a group of ten or more rabbits tested in a dosage of two hundred milligrams or less per kilogram of body weight, if administered by continuous contact with the bare skin for twenty-four hours or less.

If the board finds that available data on human experience with any substance indicate results different from those obtained on animals in the dosages or concentrations prescribed in this paragraph, the human data shall take precedence.

42. "Hospital" means any institution for the care and treatment of the sick and injured that is approved and licensed as a hospital by the department of health services.

43. "Intern" means a pharmacy intern.

44. "Internship" means the practical, experiential, hands-on training of a pharmacy intern under the supervision of a preceptor.

45. "Irritant" means any substance, other than a corrosive, that on immediate, prolonged or repeated contact with normal living tissue will induce a local inflammatory reaction.

46. "Jurisprudence examination" means a board-approved pharmacy law examination that is written and administered in cooperation with the national association of boards of pharmacy or another board-approved pharmacy law examination.

47. "Label" means a display of written, printed or graphic matter on the immediate container of any article that, unless easily legible through the outside wrapper or container, also appears on the outside wrapper or container of the article's retail package. For the purposes of this paragraph, the immediate container does not include package liners.

48. "Labeling" means all labels and other written, printed or graphic matter either:

- (a) On any article or any of its containers or wrappers.

(b) Accompanying that article.

49. "Letter of reprimand" means a disciplinary letter that is a public document issued by the board and that informs a licensee or permittee that the licensee's or permittee's conduct violates state or federal law and may require the board to monitor the licensee or permittee.

50. "Limited service pharmacy" means a pharmacy that is approved by the board to practice a limited segment of pharmacy as indicated by the permit issued by the board.

51. "Manufacture" or "manufacturer":

(a) Means every person who prepares, derives, produces, compounds, processes, packages or repackages or labels any drug in a place, other than a pharmacy, that is devoted to manufacturing the drug.

(b) Includes a virtual manufacturer as defined in rule by the board.

52. "Marijuana" has the same meaning prescribed in section 13-3401.

53. "Medical practitioner" means any medical doctor, doctor of osteopathic medicine, dentist, podiatrist, veterinarian or other person who is licensed and authorized by law to use and prescribe drugs and devices for the treatment of sick and injured human beings or animals or for the diagnosis or prevention of sickness in human beings or animals in this state or any state, territory or district of the United States.

54. "Medication order" means a written or verbal order from a medical practitioner or that person's authorized agent to administer a drug or device.

55. "Narcotic drug" has the same meaning prescribed in section 13-3401.

56. "New drug" means either:

(a) Any drug the composition of which is such that the drug is not generally recognized among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs as safe and effective for use under the conditions prescribed, recommended or suggested in the labeling.

(b) Any drug the composition of which is such that the drug, as a result of investigations to determine its safety and effectiveness for use under such conditions, has become so recognized, but that has not, other than in the investigations, been used to a material extent or for a material time under those conditions.

57. "Nonprescription drug" or "over-the-counter drug" means any nonnarcotic medicine or drug that may be sold without a prescription and that is prepackaged and labeled for use by the consumer in accordance with the requirements of the laws of this state and federal law. Nonprescription drug does not include:

(a) A drug that is primarily advertised and promoted professionally to medical practitioners and pharmacists by manufacturers or primary distributors.

(b) A controlled substance.

(c) A drug that is required to bear a label that states "Rx only".

(d) A drug that is intended for human use by hypodermic injection.

58. "Nonprescription drug wholesale permittee":

(a) Means a permittee who may distribute only over-the-counter drugs and devices to pharmacies or other lawful outlets from a place devoted in whole or in part to wholesaling these items.

(b) Includes a virtual wholesaler as defined in rule by the board.

59. "Notice" means personal service or the mailing of a copy of the notice by certified mail addressed either to the person at the person's latest address of record in the board office or to the person's attorney.

60. "Nutritional supplementation" means vitamins, minerals and caloric supplementation. Nutritional supplementation does not include medication or drugs.

61. "Official compendium" means the latest revision of the United States pharmacopeia and the national formulary or any current supplement.

62. "Other jurisdiction" means one of the other forty-nine states, the District of Columbia, the Commonwealth of Puerto Rico or a territory of the United States of America.

63. "Package" means a receptacle defined or described in the United States pharmacopeia and the national formulary as adopted by the board.

64. "Packaging" means the act or process of placing a drug item or device in a container for the purpose or intent of dispensing or distributing the item or device to another.

65. "Parenteral nutrition" means intravenous feeding that provides a person with fluids and essential nutrients the person needs while the person is unable to receive adequate fluids or feedings by mouth or by enteral feeding.

66. "Person" means an individual, partnership, corporation and association, and their duly authorized agents.

67. "Pharmaceutical care" means the provision of drug therapy and other pharmaceutical patient care services.

68. "Pharmacist" means an individual who is currently licensed by the board to practice the profession of pharmacy in this state.

69. "Pharmacist in charge" means the pharmacist who is responsible to the board for a licensed establishment's compliance with the laws and administrative rules of this state and of the federal government pertaining to the practice of pharmacy, the manufacturing of drugs and the distribution of drugs and devices.

70. "Pharmacist licensure examination" means a board-approved examination that is written and administered in cooperation with the national association of boards of pharmacy or any other board-approved pharmacist licensure examination.

71. "Pharmacy":

(a) Means:

- (i) Any place where drugs, devices, poisons or related hazardous substances are offered for sale at retail.
- (ii) Any place in which the profession of pharmacy is practiced or where prescription orders are compounded and dispensed.
- (iii) Any place that has displayed on it or in it the words "pharmacist", "pharmaceutical chemist", "apothecary", "druggist", "pharmacy", "drugstore", "drugs" or "drug sundries" or any of these words or combinations of these words, or words of similar import either in English or any other language, or that is advertised by any sign containing any of these words.
- (iv) Any place where the characteristic symbols of pharmacy or the characteristic prescription sign "Rx" is exhibited.
- (v) Any place or a portion of any building or structure that is leased, used or controlled by the permittee to conduct the business authorized by the board at the address for which the permit was issued and that is enclosed and secured when a pharmacist is not in attendance.
- (vi) A remote dispensing site pharmacy where a pharmacy technician or pharmacy intern prepares, compounds or dispenses prescription medications under remote supervision by a pharmacist.

(b) Includes a satellite pharmacy.

72. "Pharmacy intern" means a person who has all of the qualifications and experience prescribed in section 32-1923.

73. "Pharmacy technician" means a person who is licensed pursuant to this chapter.

74. "Pharmacy technician trainee" means a person who is licensed pursuant to this chapter.

75. "Poison" or "hazardous substance" includes, but is not limited to, any of the following if intended and suitable for household use or use by children:

- (a) Any substance that, according to standard works on medicine, pharmacology, pharmacognosy or toxicology, if applied to, introduced into or developed within the body in relatively small quantities by its inherent action uniformly produces serious bodily injury, disease or death.
- (b) A toxic substance.
- (c) A highly toxic substance.
- (d) A corrosive substance.
- (e) An irritant.
- (f) A strong sensitizer.

(g) A mixture of any of the substances described in this paragraph, if the substance or mixture of substances may cause substantial personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children.

(h) A substance that is designated by the board to be a poison or hazardous substance. This subdivision does not apply to radioactive substances, economic poisons subject to the federal insecticide, fungicide and rodenticide act or the state pesticide act, foods, drugs and cosmetics subject to state laws or the federal act or substances intended for use as fuels when stored in containers and used in the heating, cooking or refrigeration system of a house. This subdivision applies to any substance or article that is not itself an economic poison within the meaning of the federal insecticide, fungicide and rodenticide act or the state pesticide act, but that is a poison or hazardous substance within the meaning of this paragraph by reason of bearing or containing an economic poison or hazardous substance.

76. "Practice of pharmacy":

(a) Means furnishing the following health care services as a medical professional:

(i) Interpreting, evaluating and dispensing prescription orders in the patient's best interests.

(ii) Compounding drugs pursuant to or in anticipation of a prescription order.

(iii) Labeling drugs and devices in compliance with state and federal requirements.

(iv) Participating in drug selection and drug utilization reviews, drug administration, drug or drug-related research and drug therapy monitoring or management.

(v) Providing patient counseling necessary to provide pharmaceutical care.

(vi) Properly and safely storing drugs and devices in anticipation of dispensing.

(vii) Maintaining required records of drugs and devices.

(viii) Offering or performing acts, services, operations or transactions necessary in the conduct, operation, management and control of a pharmacy.

(ix) Initiating, monitoring and modifying drug therapy pursuant to a protocol-based drug therapy agreement with a provider as outlined in section 32-1970.

(x) Initiating and administering immunizations or vaccines pursuant to section 32-1974.

(b) Does not include initiating a prescription order for any medication, drug or other substance used to induce or cause a medication abortion as defined in section 36-2151.

77. "Practitioner" means any physician, dentist, veterinarian, scientific investigator or other person who is licensed, registered or otherwise permitted to distribute, dispense, conduct research with respect to or administer a controlled substance in the course of professional practice or research in this state, or any pharmacy, hospital or other institution that is licensed, registered or otherwise permitted to distribute,

dispense, conduct research with respect to or administer a controlled substance in the course of professional practice or research in this state.

78. "Preceptor" means a pharmacist who is serving as the practical instructor of an intern and complies with section 32-1923.

79. "Precursor chemical" means a substance that is:

(a) The principal compound that is commonly used or that is produced primarily for use and that is an immediate chemical intermediary used or likely to be used in the manufacture of a controlled substance, the control of which is necessary to prevent, curtail or limit manufacture.

(b) Listed in section 13-3401, paragraph 26 or 27.

80. "Prescription" means either a prescription order or a prescription medication.

81. "Prescription medication" means any drug, including label and container according to context, that is dispensed pursuant to a prescription order.

82. "Prescription-only device" includes:

(a) Any device that is limited by the federal act to use under the supervision of a medical practitioner.

(b) Any device required by the federal act to bear on its label essentially the legend "Rx only".

83. "Prescription-only drug" does not include a controlled substance but does include:

(a) Any drug that because of its toxicity or other potentiality for harmful effect, the method of its use, or the collateral measures necessary to its use is not generally recognized among experts, qualified by scientific training and experience to evaluate its safety and efficacy, as safe for use except by or under the supervision of a medical practitioner.

(b) Any drug that is limited by an approved new drug application under the federal act or section 32-1962 to use under the supervision of a medical practitioner.

(c) Every potentially harmful drug, the labeling of which does not bear or contain full and adequate directions for use by the consumer.

(d) Any drug, other than a controlled substance, required by the federal act to bear on its label the legend "Rx only".

84. "Prescription order" means any of the following:

(a) An order to a pharmacist for drugs or devices issued and signed by a duly licensed medical practitioner in the authorized course of the practitioner's professional practice.

(b) An order transmitted to a pharmacist through word of mouth, telephone or other means of communication directed by that medical practitioner. Prescription orders received by word of mouth, telephone or other means of communication shall be maintained by the pharmacist pursuant to section 32-

1964, and the record so made by the pharmacist constitutes the original prescription order to be dispensed by the pharmacist. This paragraph does not alter or affect laws of this state or any federal act requiring a written prescription order.

(c) An order initiated by a pharmacist pursuant to a protocol-based drug therapy agreement with a provider as outlined in section 32-1970, or immunizations or vaccines administered by a pharmacist pursuant to section 32-1974.

(d) A diet order or an order for enteral feeding, nutritional supplementation or parenteral nutrition that is initiated by a registered dietitian or other qualified nutrition professional in a hospital pursuant to section 36-416.

85. "Professionally incompetent" means:

(a) Incompetence based on a variety of factors, including a lack of sufficient pharmaceutical knowledge or skills or experience to a degree likely to endanger the health of patients.

(b) When considered with other indications of professional incompetence, a pharmacist or pharmacy intern who fails to obtain a passing score on a board-approved pharmacist licensure examination or a pharmacy technician or pharmacy technician trainee who fails to obtain a passing score on a board-approved pharmacy technician licensure examination.

86. "Radioactive substance" means a substance that emits ionizing radiation.

87. "Remote dispensing site pharmacy" means a pharmacy where a pharmacy technician or pharmacy intern prepares, compounds or dispenses prescription medications under remote supervision by a pharmacist.

88. "Remote supervision by a pharmacist" means that a pharmacist directs and controls the actions of pharmacy technicians and pharmacy interns through the use of audio and visual technology.

89. "Revocation" or "revoke" means the official cancellation of a license, permit, registration or other approval authorized by the board for a period of two years unless otherwise specified by the board. A request or new application for reinstatement may be presented to the board for review before the conclusion of the specified revocation period upon review of the executive director.

90. "Safely engage in employment duties" means that a permittee or the permittee's employee is able to safely engage in employment duties related to the manufacture, sale, distribution or dispensing of drugs, devices, poisons, hazardous substances, controlled substances or precursor chemicals.

91. "Satellite pharmacy" means a work area located within a hospital or on a hospital campus that is not separated by other commercial property or residential property, that is under the direction of a pharmacist, that is a remote extension of a centrally licensed hospital pharmacy and that is owned by and dependent on the centrally licensed hospital pharmacy for administrative control, staffing and drug procurement and that is not required to be separately permitted.

92. "Symbol" means the characteristic symbols that have historically identified pharmacy, including show globes and mortar and pestle, and the sign "Rx".

93. "Third-party logistics provider" means an entity that provides or coordinates warehousing or other logistics services for a prescription or over-the-counter dangerous drug or dangerous device in intrastate or interstate commerce on behalf of a manufacturer, wholesaler or dispenser of the prescription or over-the-counter dangerous drug or dangerous device but that does not take ownership of the prescription or over-the-counter dangerous drug or dangerous device or have responsibility to direct its sale or disposition.

94. "Toxic substance" means a substance, other than a radioactive substance, that has the capacity to produce injury or illness in humans through ingestion, inhalation or absorption through any body surface.

95. "Ultimate user" means a person who lawfully possesses a drug or controlled substance for that person's own use, for the use of a member of that person's household or for administering to an animal owned by that person or by a member of that person's household.

32-1901.01. Definition of unethical and unprofessional conduct; permittees; licensees

A. In this chapter, unless the context otherwise requires, for the purposes of disciplining a permittee, "unethical conduct" means the following, whether occurring in this state or elsewhere:

1. Committing a felony, whether or not involving moral turpitude, or a misdemeanor involving moral turpitude or any drug-related offense. In either case, conviction by a court of competent jurisdiction or a plea of no contest is conclusive evidence of the commission.
2. Committing an act that is substantially related to the qualifications, functions or duties of a permittee and that demonstrates either a lack of good moral character or an actual or potential unfitness to hold a permit in light of the public's safety.
3. Working under the influence of alcohol or other drugs.
4. Being addicted to the use of alcohol or other drugs to such a degree as to render the permittee unfit to perform the permittee's employment duties.
5. Violating a federal or state law or administrative rule relating to the manufacture, sale or distribution of drugs, devices, poisons, hazardous substances or precursor chemicals.
6. Violating a federal or state law or administrative rule relating to marijuana, prescription-only drugs, narcotics, dangerous drugs, controlled substances or precursor chemicals.
7. Violating state or federal reporting or recordkeeping requirements on transactions relating to precursor chemicals.
8. Failing to report in writing to the board any evidence that a pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the practice of pharmacy.
9. Failing to report in writing to the board any evidence that a pharmacy technician or pharmacy technician trainee is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the permissible activities of a pharmacy technician or pharmacy technician trainee.

10. Failing to report in writing to the board any evidence that appears to show that a permittee or permittee's employee is or may be guilty of unethical conduct, is or may be mentally or physically unable safely to engage in employment duties related to manufacturing, selling, distributing or dispensing of drugs, devices, poisons, hazardous substances, controlled substances or precursor chemicals or is or may be in violation of this chapter or a rule adopted under this chapter.
11. Intending to sell, transfer or distribute, or to offer for sale, transfer or distribution, or selling, transferring, distributing or dispensing or offering for sale, transfer or distribution an imitation controlled substance, imitation over-the-counter drug or imitation prescription-only drug as defined in section 13-3451.
12. Having the permittee's permit to manufacture, sell, distribute or dispense drugs, devices, poisons, hazardous substances or precursor chemicals denied or disciplined in another jurisdiction.
13. Committing an offense in another jurisdiction that if committed in this state would be grounds for discipline.
14. Obtaining or attempting to obtain a permit or a permit renewal by fraud, by misrepresentation or by knowingly taking advantage of the mistake of another person or an agency.
15. Wilfully making a false report or record required by this chapter, required by federal or state laws pertaining to drugs, devices, poisons, hazardous substances or precursor chemicals or required for the payment for drugs, devices, poisons or hazardous substances or precursor chemicals or for services pertaining to such drugs or substances.
16. Knowingly filing with the board any application, renewal or other document that contains false or misleading information.
17. Providing false or misleading information or omitting material information in any communication to the board or the board's employees or agents.
18. Violating or attempting to violate, directly or indirectly, or assisting in or abetting the violation of, or conspiring to violate, this chapter.
19. Violating a formal order, terms of probation, a consent agreement or a stipulation issued or entered into by the board or its executive director pursuant to this chapter.
20. Failing to comply with a board subpoena or failing to comply in a timely manner with a board subpoena without providing any explanation to the board for not complying with the subpoena.
21. Failing to provide the board or its employees or agents or an authorized federal or state official conducting a site investigation, inspection or audit with access to any place for which a permit has been issued or for which an application for a permit has been submitted.
22. Failing to notify the board of a change of ownership, management or pharmacist in charge.
23. Failing to promptly produce on the request of the official conducting a site investigation, inspection or audit any book, record or document.

24. Overruling or attempting to overrule a pharmacist in matters of pharmacy ethics or interpreting laws pertaining to the practice of pharmacy or the distribution of drugs or devices.
25. Distributing premiums or rebates of any kind in connection with the sale of prescription medication, other than to the prescription medication recipient.
26. Failing to maintain effective controls against the diversion of controlled substances or precursor chemicals to unauthorized persons or entities.
27. Fraudulently claiming to have performed a service.
28. Fraudulently charging a fee for a service.

29. Advertising drugs or devices, or services pertaining to drugs or devices, in a manner that is untrue or misleading in any particular, and that is known, or that by the exercise of reasonable care should be known, to be untrue or misleading.

B. In this chapter, unless the context otherwise requires, for the purposes of disciplining a pharmacist or pharmacy intern, "unprofessional conduct" means the following, whether occurring in this state or elsewhere:

1. Being addicted to the use of alcohol or other drugs to such a degree as to render the licensee unfit to practice the profession of pharmacy.
2. Violating any federal or state law, rule or regulation relating to the manufacture or distribution of drugs and devices or the practice of pharmacy.
3. Dispensing a different drug or brand of drug in place of the drug or brand of drug ordered or prescribed without the express permission in each case of the orderer, or in the case of a prescription order, the medical practitioner. The conduct prohibited by this paragraph does not apply to substitutions authorized pursuant to section 32-1963.01.
4. Obtaining or attempting to obtain a license to practice pharmacy or a license renewal by fraud, by misrepresentation or by knowingly taking advantage of the mistake of another person or an agency.
5. Having the licensee's license to practice pharmacy denied or disciplined in another jurisdiction.
6. Claiming professional superiority in compounding or dispensing prescription orders.
7. Failing to comply with the mandatory continuing professional pharmacy education requirements of sections 32-1936 and 32-1937 and rules adopted by the board.
8. Committing a felony, whether or not involving moral turpitude, or a misdemeanor involving moral turpitude or any drug-related offense. In either case, conviction by a court of competent jurisdiction or a plea of no contest is conclusive evidence of the commission.
9. Working under the influence of alcohol or other drugs.

10. Violating a federal or state law or administrative rule relating to marijuana, prescription-only drugs, narcotics, dangerous drugs, controlled substances or precursor chemicals when determined by the board or by conviction in a federal or state court.
11. Knowingly dispensing a drug without a valid prescription order as required pursuant to section 32-1968, subsection A.
12. Knowingly dispensing a drug on a prescription order that was issued in the course of the conduct of business of dispensing drugs pursuant to diagnosis by mail or the internet, unless the order was any of the following:
 - (a) Made by a physician who provides temporary patient supervision on behalf of the patient's regular treating licensed health care professional or provides a consultation requested by the patient's regular treating licensed health care professional.
 - (b) Made in an emergency medical situation as defined in section 41-1831.
 - (c) Written to prepare a patient for a medical examination.
 - (d) Written or the prescription medications were issued for use by a county or tribal public health department for immunization programs or emergency treatment or in response to an infectious disease investigation, a public health emergency, an infectious disease outbreak or an act of bioterrorism. For the purposes of this subdivision, "bioterrorism" has the same meaning prescribed in section 36-781.
 - (e) Written or antimicrobials were dispensed by the prescribing or dispensing physician to a contact as defined in section 36-661 who is believed to have had significant exposure risk as defined in section 36-661 with another person who has been diagnosed with a communicable disease as defined in section 36-661.
 - (f) Written or the prescription medications were issued for administration of immunizations or vaccines listed in the United States centers for disease control and prevention's recommended immunization schedule to a household member of a patient.
 - (g) For epinephrine auto-injectors that are written or dispensed for a school district or charter school and that are to be stocked for emergency use pursuant to section 15-157 or for an authorized entity to be stocked pursuant to section 36-2226.01.
 - (h) Written by a licensee through a telemedicine program that is covered by the policies and procedures adopted by the administrator of a hospital or outpatient treatment center.
 - (i) Written pursuant to a physical or mental health status examination that was conducted during a real-time telemedicine encounter with audio and video capability.
 - (j) For naloxone hydrochloride or any other opioid antagonist approved by the United States food and drug administration and written or dispensed for use pursuant to section 36-2228 or 36-2266.

13. Failing to report in writing to the board any evidence that a pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable to safely engage in the practice of pharmacy.
14. Failing to report in writing to the board any evidence that a pharmacy technician or pharmacy technician trainee is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable to safely engage in the permissible activities of a pharmacy technician or pharmacy technician trainee.
15. Failing to report in writing to the board any evidence that a permittee or a permittee's employee is or may be guilty of unethical conduct or is or may be in violation of this chapter or a rule adopted under this chapter.
16. Committing an offense in another jurisdiction that if committed in this state would be grounds for discipline.
17. Knowingly filing with the board any application, renewal or other document that contains false or misleading information.
18. Providing false or misleading information or omitting material information in any communication to the board or the board's employees or agents.
19. Violating or attempting to violate, directly or indirectly, or assisting in or abetting in the violation of, or conspiring to violate, this chapter.
20. Violating a formal order, terms of probation, a consent agreement or a stipulation issued or entered into by the board or its executive director pursuant to this chapter.
21. Failing to comply with a board subpoena or failing to comply in a timely manner with a board subpoena without providing any explanation to the board for not complying with the subpoena.
22. Refusing without just cause to allow authorized agents of the board to examine documents that are required to be kept pursuant to this chapter or title 36.
23. Participating in an arrangement or agreement to allow a prescription order or a prescription medication to be left at, picked up from, accepted by or delivered to a place that is not licensed as a pharmacy. This paragraph does not prohibit a pharmacist or a pharmacy from using an employee or a common carrier to pick up prescription orders at or deliver prescription medications to the office or home of a medical practitioner, the residence of a patient or a patient's hospital.
24. Paying rebates or entering into an agreement for the payment of rebates to a medical practitioner or any other person in the health care field.
25. Providing or causing to be provided to a medical practitioner prescription order blanks or forms bearing the pharmacist's or pharmacy's name, address or other means of identification.
26. Fraudulently claiming to have performed a professional service.

27. Fraudulently charging a fee for a professional service.
 28. Failing to report a change of the licensee's home address, contact information, employer or employer's address as required by section 32-1926.
 29. Failing to report a change in the licensee's residency status as required by section 32-1926.01.
 30. Failing to maintain effective controls against the diversion of controlled substances or precursor chemicals to unauthorized persons or entities.
- C. In this chapter, unless the context otherwise requires, for the purposes of disciplining a pharmacy technician or pharmacy technician trainee, "unprofessional conduct" means the following, whether occurring in this state or elsewhere:
1. Being addicted to the use of alcohol or other drugs to such a degree as to render the licensee unfit to perform the licensee's employment duties.
 2. Violating a federal or state law or administrative rule relating to the manufacture or distribution of drugs or devices.
 3. Obtaining or attempting to obtain a pharmacy technician or pharmacy technician trainee license or a pharmacy technician license renewal by fraud, by misrepresentation or by knowingly taking advantage of the mistake of another person or an agency.
 4. Having the licensee's license to practice as a pharmacy technician denied or disciplined in another jurisdiction.
 5. Failing to comply with the mandatory continuing professional education requirements of section 32-1925, subsection H and rules adopted by the board.
 6. Committing a felony, whether or not involving moral turpitude, or a misdemeanor involving moral turpitude or any drug-related offense. In either case, conviction by a court of competent jurisdiction or a plea of no contest is conclusive evidence of the commission.
 7. Working under the influence of alcohol or other drugs.
 8. Violating a federal or state law or administrative rule relating to marijuana, prescription-only drugs, narcotics, dangerous drugs, controlled substances or precursor chemicals when determined by the board or by conviction in a federal or state court.
 9. Failing to report in writing to the board any evidence that a pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable to safely engage in the practice of pharmacy.
 10. Failing to report in writing to the board any evidence that a pharmacy technician or pharmacy technician trainee is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable to safely engage in the permissible activities of a pharmacy technician or pharmacy technician trainee.

11. Failing to report in writing to the board any evidence that a permittee or a permittee's employee is or may be guilty of unethical conduct or is or may be in violation of this chapter or a rule adopted under this chapter.
12. Committing an offense in another jurisdiction that if committed in this state would be grounds for discipline.
13. Knowingly filing with the board any application, renewal or other document that contains false or misleading information.
14. Providing false or misleading information or omitting material information in any communication to the board or the board's employees or agents.
15. Violating or attempting to violate, directly or indirectly, or assisting in or abetting in the violation of, or conspiring to violate, this chapter.
16. Violating a formal order, terms of probation, a consent agreement or a stipulation issued or entered into by the board or its executive director pursuant to this chapter.
17. Failing to comply with a board subpoena or failing to comply in a timely manner with a board subpoena without providing any explanation to the board for not complying with the subpoena.
18. Failing to report a change of the licensee's home address, contact information, employer or employer's address as required by section 32-1926.
19. Failing to report a change in the licensee's residency status as required by section 32-1926.01.

32-1902. Arizona state board of pharmacy; immunity

A. The Arizona state board of pharmacy is established consisting of the following members who are appointed by the governor:

1. Six pharmacists at least one of whom is a pharmacist employed by a licensed hospital and at least one of whom is employed by a community pharmacy and engaged in the day-to-day practice of pharmacy.
2. One pharmacy technician.
3. Two public members.

B. To be qualified for appointment:

1. A pharmacist must be licensed as a pharmacist in this state or any other jurisdiction for a period of at least ten years and licensed as a pharmacist and a resident in this state for a period of at least five years immediately before the date of appointment.
2. Each public member must be a resident of this state for a period of at least five years immediately before the date of appointment.

3. A pharmacy technician must be a practicing pharmacy technician in this state or any other jurisdiction for at least five years and be licensed as a pharmacy technician and a resident of this state for at least five years immediately before the date of appointment. A pharmacy technician appointed before July 1, 2009 does not have to meet the minimum five year licensure requirement of this paragraph.

C. Each pharmacist and pharmacy technician member shall serve for a term of five years. Public members may serve for a term of five years unless removed by the governor. The public members shall after the first of every year present a written report to the governor. Vacancies occurring on the board other than by expiration of term of office shall be filled for the unexpired portion of the term only.

D. On or before January 15 of each year in which a pharmacist or a pharmacy technician is to be appointed, the executive director of the pharmacy association of Arizona may submit to the governor a list of the names of at least seven of its members who have been nominated by the association, and who meet the requirements as provided in this section for the next occurring vacancy on the board. The governor may make appointments of licensed pharmacists and pharmacy technicians to the board from the nominees on the list or from others having the necessary qualifications.

E. Appointees to the board within thirty days after their appointment shall take and subscribe to an oath or affirmation, before a properly qualified officer, that they will faithfully and impartially perform the duties of their office. The executive director shall file the oath or affirmation with the secretary of state.

F. Members of the board are personally exempt from suit with respect to all acts done and actions taken in good faith and in furtherance of this chapter.

32-1903. Organization; meetings; quorum; compensation of board; executive director; compensation; powers and duties

A. The board shall annually elect a president and a vice-president from among its membership and, subject to title 41, chapter 4, article 4, select an executive director who may or may not be a member of the board. The executive director shall serve at the pleasure of the board.

B. The president of the board shall preside at all of its meetings. The vice-president shall act if the president is absent. A majority of the membership of the board constitutes a quorum.

C. The executive director is the executive officer in charge of the board's office and shall administer this chapter under the direction of the board. The executive director shall make, keep and be in charge of all records and record books required to be kept by the board, including a register of all licensees and registered businesses under this chapter. The executive director shall attend to the correspondence of the board and perform other duties the board requires. The executive director is eligible to receive compensation as determined pursuant to section 38-611.

D. Any member of the board or the executive director may administer oaths in connection with the duties of the board. The books, registers and records of the board as made and kept by the executive director or under the executive director's supervision are *prima facie* evidence of the matter therein recorded in any court of law. Members of the board are eligible to receive compensation in the amount of two hundred dollars for each day of actual service in the business of the board and reimbursement for all expenses necessarily and properly incurred in attending meetings of or for the board.

E. The executive director may designate the deputy director to sign claims and other documents in the executive director's absence. If the executive director dies, becomes incapacitated or resigns, the deputy director shall serve as the executive director until the board selects a new executive director.

F. The executive director may cause to be published reports summarizing judgments, decrees, court orders and board action that may have been rendered under this chapter, including the nature of charges and the disposition of the charges. The executive director may disseminate information regarding drugs, devices, poisons or hazardous substances in situations the executive director believes involve imminent danger to health or gross deception of the consumer and report the results of investigations carried out under this chapter.

32-1904. Powers and duties of board; immunity

A. The board shall:

1. Make bylaws and adopt rules that are necessary to protect the public and that pertain to the practice of pharmacy, the manufacturing, wholesaling or supplying of drugs, devices, poisons or hazardous substances, the use of pharmacy technicians and support personnel and the lawful performance of its duties.

2. Fix standards and requirements to register and reregister pharmacies, except as otherwise specified.

3. Investigate compliance as to the quality, label and labeling of all drugs, devices, poisons or hazardous substances and take action necessary to prevent the sale of these if they do not conform to the standards prescribed in this chapter, the official compendium or the federal act.

4. Enforce its rules. In so doing, the board or its agents have free access, during the hours reported with the board or the posted hours at the facility, to any pharmacy, manufacturer, wholesaler, third-party logistics provider, nonprescription drug permittee or other establishment in which drugs, devices, poisons or hazardous substances are manufactured, processed, packed or held, or to enter any vehicle being used to transport or hold such drugs, devices, poisons or hazardous substances for the purpose of:

(a) Inspecting the establishment or vehicle to determine whether any provisions of this chapter or the federal act are being violated.

(b) Securing samples or specimens of any drug, device, poison or hazardous substance after paying or offering to pay for the sample.

(c) Detaining or embargoing a drug, device, poison or hazardous substance in accordance with section 32-1994.

5. Examine and license as pharmacists and pharmacy interns all qualified applicants as provided by this chapter.

6. Require each applicant for an initial license to apply for a fingerprint clearance card pursuant to section 41-1758.03. If an applicant is issued a valid fingerprint clearance card, the applicant shall submit the valid fingerprint clearance card to the board with the completed application. If an applicant applies for a fingerprint clearance card and is denied, the applicant may request that the board consider the application for licensure notwithstanding the absence of a valid fingerprint clearance card. The board, in its

discretion, may approve an application for licensure despite the denial of a valid fingerprint clearance card if the board determines that the applicant's criminal history information on which the denial was based does not alone disqualify the applicant from licensure.

7. Issue duplicates of lost or destroyed permits on the payment of a fee as prescribed by the board.
 8. Adopt rules to rehabilitate pharmacists and pharmacy interns as provided by this chapter.
 9. At least once every three months, notify pharmacies regulated pursuant to this chapter of any modifications on prescription writing privileges of podiatrists, dentists, doctors of medicine, registered nurse practitioners, osteopathic physicians, veterinarians, physician assistants, optometrists and homeopathic physicians of which it receives notification from the state board of podiatry examiners, state board of dental examiners, Arizona medical board, Arizona state board of nursing, Arizona board of osteopathic examiners in medicine and surgery, Arizona state veterinary medical examining board, Arizona regulatory board of physician assistants, state board of optometry or board of homeopathic and integrated medicine examiners.
 10. Charge a permittee a fee, as determined by the board, for an inspection if the permittee requests the inspection.
 11. Issue only one active or open license per individual.
 12. Allow a licensee to regress to a lower level license on written explanation and review by the board for discussion, determination and possible action.
- B. The board may:
1. Employ chemists, compliance officers, clerical help and other employees subject to title 41, chapter 4, article 4 and provide laboratory facilities for the proper conduct of its business.
 2. Provide, by educating and informing the licensees and the public, assistance in curtailing abuse in the use of drugs, devices, poisons and hazardous substances.
 3. Approve or reject the manner of storage and security of drugs, devices, poisons and hazardous substances.
 4. Accept monies and services to assist in enforcing this chapter from other than licensees:
 - (a) For performing inspections and other board functions.
 - (b) For the cost of copies of the pharmacy and controlled substances laws, the annual report of the board and other information from the board.
 5. Adopt rules for professional conduct appropriate to the establishment and maintenance of a high standard of integrity and dignity in the profession of pharmacy.
 6. Grant permission to deviate from a state requirement for experimentation and technological advances.

7. Adopt rules for the training and practice of pharmacy interns, pharmacy technicians and support personnel.
8. Investigate alleged violations of this chapter, conduct hearings in respect to violations, subpoena witnesses and take such action as it deems necessary to revoke or suspend a license or a permit, place a licensee or permittee on probation or warn a licensee or permittee under this chapter or to bring notice of violations to the county attorney of the county in which a violation took place or to the attorney general.
9. By rule, approve colleges or schools of pharmacy.
10. By rule, approve programs of practical experience, clinical programs, internship training programs, programs of remedial academic work and preliminary equivalency examinations as provided by this chapter.
11. Assist in the continuing education of pharmacists and pharmacy interns.
12. Issue inactive status licenses as provided by this chapter.
13. Accept monies and services from the federal government or others for educational, research or other purposes pertaining to the enforcement of this chapter.
14. By rule, except from the application of all or any part of this chapter any material, compound, mixture or preparation containing any stimulant or depressant substance included in section 13-3401, paragraph 6, subdivision (c) or (d) from the definition of dangerous drug if the material, compound, mixture or preparation contains one or more active medicinal ingredients not having a stimulant or depressant effect on the central nervous system, provided that such admixtures are included in such combinations, quantity, proportion or concentration as to vitiate the potential for abuse of the substances that do have a stimulant or depressant effect on the central nervous system.
15. Adopt rules for the revocation, suspension or reinstatement of licenses or permits or the probation of licensees or permittees as provided by this chapter.
16. Issue a certificate of free sale to any person that is licensed by the board as a manufacturer for the purpose of manufacturing or distributing food supplements or dietary supplements as defined in rule by the board and that wants to sell food supplements or dietary supplements domestically or internationally. The application shall contain all of the following:
 - (a) The applicant's name, address, e-mail address, telephone and fax number.
 - (b) The product's full, common or usual name.
 - (c) A copy of the label for each product listed. If the product is to be exported in bulk and a label is not available, the applicant shall include a certificate of composition.
 - (d) The country of export, if applicable.
 - (e) The number of certificates of free sale requested.

17. Establish an inspection process to issue certificates of free sale or good manufacturing practice certifications. The board shall establish in rule:

- (a) A fee to issue certificates of free sale.
- (b) A fee to issue good manufacturing practice certifications.
- (c) An annual inspection fee.

18. Delegate to the executive director the authority to:

- (a) Void a license or permit application and deem all fees forfeited by the applicant if the applicant provided inaccurate information on the application. The applicant shall have the opportunity to correct the inaccurate information within thirty days after the initial application was reviewed by board staff and the applicant was informed of the inaccuracy.
 - (b) If the president or vice president of the board concurs after reviewing the case, enter into an interim consent agreement with a licensee or permittee if there is evidence that a restriction against the license or permit is needed to mitigate danger to the public health and safety. The board may subsequently formally adopt the interim consent agreement with any modifications the board deems necessary.
 - (c) Take no action or dismiss a complaint that has insufficient evidence that a violation of statute or rule governing the practice of pharmacy occurred.
 - (d) Request an applicant or licensee to provide court documents and police reports if the applicant or licensee has been charged with or convicted of a criminal offense. The executive director may do either of the following if the applicant or licensee fails to provide the requested documents to the board within thirty business days after the request:
 - (i) Close the application, deem the application fee forfeited and not consider a new application complete unless the requested documents are submitted with the application.
 - (ii) Notify the licensee of an opportunity for a hearing in accordance with section 41-1061 to consider suspension of the licensee.
 - (e) Pursuant to section 36-2604, subsection B, review prescription information collected pursuant to title 36, chapter 28, article 1.
- C. At each regularly scheduled board meeting the executive director shall provide to the board a list of the executive director's actions taken pursuant to subsection B, paragraph 18, subdivisions (a), (c) and (d) of this section since the last board meeting.
- D. The board shall develop substantive policy statements pursuant to section 41-1091 for each specific licensing and regulatory authority the board delegates to the executive director.
- E. The executive director and other personnel or agents of the board are not subject to civil liability for any act done or proceeding undertaken or performed in good faith and in furtherance of the purposes of this chapter.

32-1905. Meetings; time and place; annual report

- A. The board of pharmacy shall hold meetings to consider license and permit applications and to transact other business legally coming before it. The board must hold at least four meetings in each fiscal year.
- B. The board shall designate the time and place of its meetings at least thirty days before each meeting.
- C. The board shall submit an annual written report to the governor and to the Arizona pharmacy association that includes the names of all pharmacists, interns, pharmacy technicians, pharmacy technician trainees, pharmacies, wholesalers, third-party logistics providers and manufacturers authorized to practice under this chapter and a record of licenses, permits and renewals.

32-1906. Membership in national associations; official attendance at professional meetings

- A. The board may join and subscribe to state, district, regional or national organizations or publications relating to and dealing with pharmacy and manufacturing, wholesaling, and distribution of drugs, devices, poisons, and hazardous substances.
- B. Members of the board, the executive director and compliance officers, if authorized by the board, and subject to legislative appropriation therefor, may attend the state, district, regional and national meetings and other educational meetings relating to any of the subjects as provided in subsection A that, in the discretion of the board, are necessary and for its best interests.

32-1907. Arizona state board of pharmacy fund

- A. Except as provided in section 32-1939, the executive director shall receive and receipt for all fees and other monies provided for in this chapter and shall deposit, pursuant to sections 35-146 and 35-147, ten percent of such monies in the state general fund and ninety percent in the Arizona state board of pharmacy fund. All monies derived from civil penalties collected pursuant to this chapter shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.
- B. Except as provided in subsection C of this section, monies deposited in the Arizona state board of pharmacy fund shall be subject to section 35-143.01.
- C. From monies deposited in the Arizona state board of pharmacy fund pursuant to subsection A of this section, the executive director may transfer up to five hundred thousand dollars annually to the controlled substances prescription monitoring program fund established by section 36-2605 for expenses related to the controlled substances prescription monitoring program as required by title 36, chapter 28.
- D. From monies deposited in the Arizona state board of pharmacy fund pursuant to subsection A of this section, the executive director may transfer up to one million dollars annually to the Arizona poison and drug information center for the purposes specified in section 36-1161 to supplement, and not supplant, any state general fund appropriation for those purposes.

32-1908. Scope of chapter

- A. The provisions of this chapter regarding the selling of drugs, poisons, or hazardous substances shall be considered to include the sale, dispensing, furnishing or giving of any such article, or the supplying or applying of any such articles in the conduct of any drug, poison, or hazardous substance establishment.

B. Nothing in this chapter shall be construed to confer authority to license or regulate the collection, processing or distribution of whole human blood or its plasma, fractionations, products, derivatives or other human tissue procured, processed or distributed by federally licensed or regulated blood banks or tissue banks.

32-1909. Prescription medication donation program; distribution; immunity; rules

A. Pursuant to board rules and this section, the board shall establish a prescription medication donation program to accept and dispense prescription medications. Prescription medications may be donated at a physician's office, a pharmacy or a health care institution as defined in section 36-401 that elects to participate in the program and that meets the requirements of this section and board rules. Prescription medications shall be accepted or dispensed under the prescription medication donation program only in their original sealed and tamper-evident unit dose packaging. Prescription medication that is packaged in single unit doses may be accepted and dispensed even if the outside packaging is opened if the single unit dose packaging is undisturbed. The program shall not accept a donation of a prescription medication that either:

1. Expires within six months after the donation.
2. Is deemed adulterated pursuant to section 32-1966.

B. A person, manufacturer or health care institution may donate prescription medication to a physician's office, pharmacy, hospital or health care institution that volunteers to participate in the program and that meets the requirements prescribed by the board.

C. A physician's office, pharmacy, hospital or health care institution that participates in the program shall dispense donated prescription medication:

1. Either directly or through participating governmental or nonprofit private entities.
2. Only pursuant to a prescription order.
3. Only to a recipient who is a resident of this state and who meets the eligibility standards prescribed by the board by rule.

D. Before dispensing donated prescription medication, the physician's office, pharmacy, hospital or health care institutions participating in the program:

1. Shall comply with all applicable federal laws and the laws of this state dealing with the storage and distribution of dangerous drugs.
2. Shall examine the donated prescription medication to determine that it has not been adulterated and certify that the medication has been stored in compliance with the requirements of the product label.
3. May charge persons receiving donated prescription medication pursuant to this section a handling fee as prescribed by the board by rule to cover the costs of inspection, stocking and dispensing the prescription medication.

E. A pharmaceutical manufacturer is not liable for any claim or injury arising from the transfer of any prescription medication pursuant to this section including liability for failure to transfer or communicate product or consumer information regarding the transferred prescription medication, including the expiration date of the transferred prescription medication.

F. Persons and entities participating in the program as prescribed by this section and board rules are not subject to civil liability or professional disciplinary action.

G. In consultation with the director of the department of health services, the board shall adopt rules prescribing the following:

1. Eligibility criteria for physicians' offices, pharmacies, hospitals and health care institutions to receive and dispense donated prescription medication.
2. Standards and procedures for accepting, storing and dispensing donated prescription medication.
3. Standards and procedures for inspecting donated prescription medication to determine that the original unit dose packaging is sealed and tamper-evident and that the donated prescription medication is unadulterated, safe and suitable for dispensing.
4. Eligibility standards, based on economic need, for persons receiving donated prescription medication.
5. A means, such as an identification card, by which persons prove that they are eligible to receive donated prescription medication.
6. A form that each recipient shall sign before the recipient may receive donated prescription medication to confirm that the recipient understands the immunity provisions of the program.
7. A formula to determine the amount of the handling fee that a physician's office, pharmacy, hospital or health care institution may charge recipients.
8. A list of prescription medication, arranged either by category or by individual drug, that the program may accept from individuals.
9. A list of prescription medication, arranged either by category or by individual drug, that the program shall not accept from individuals.
10. A form each individual shall sign stating that the donor is the owner of the prescription medication and wishes to voluntarily donate the prescription medication to the program.
11. A list of prescription medication, arranged either by category or by individual drug, that the program may accept from a health care institution.
12. A list of prescription medication, arranged either by category or by individual drug, that the program shall not accept from a health care institution. The list shall include a statement as to why the prescription medication is ineligible for donation.
13. Any other standards the board determines are necessary and appropriate.

H. Notwithstanding any other law, a dispenser of donated prescription medication pursuant to this section shall not submit a claim or otherwise seek reimbursement from a public or private third party payor for the donation and a public or private third party payor shall not provide reimbursement for donations made pursuant to this section.

32-1910. Emergencies; continued provision of services

A. If a natural disaster or terrorist attack occurs and, as a consequence of the natural disaster or terrorist attack, a state of emergency is declared by the governor or by a county, city or town pursuant to its authority and the declared state of emergency results in individuals being unable to refill existing prescriptions, the board shall cooperate with this state and the county, city or town to ensure the provision of drugs, devices and professional services to the public.

B. If a natural disaster or terrorist attack occurs in another state and, as a consequence of the natural disaster or terrorist attack, a state of emergency is declared by the governor of that state and the declared state of emergency results in individuals being temporarily relocated to Arizona and unable to refill existing prescriptions, the board shall cooperate with this state to ensure the provision of drugs, devices and professional services to the relocated individuals.

C. When a state of emergency has been declared pursuant to this section, a pharmacist may work in the affected county, city or town and may dispense a one-time emergency refill prescription of up to a thirty-day supply of a prescribed medication if both of the following apply:

1. In the pharmacist's professional opinion the medication is essential to the maintenance of life or to the continuation of therapy.
2. The pharmacist makes a good faith effort to reduce the information to a written prescription marked "emergency prescription" and then files and maintains the prescription as required by law.

D. If the state of emergency declared pursuant to this section continues for at least twenty-one days after the pharmacist dispenses an emergency prescription pursuant to subsection C, the pharmacist may dispense one additional emergency refill prescription of up to a thirty day supply of the prescribed medication.

E. A pharmacist who is not licensed in this state, but who is currently licensed in another state, may dispense prescription medications in those affected counties, cities or towns in this state during the time that a declared state of emergency exists pursuant to this section if both of the following apply:

1. The pharmacist has proof of licensure in another state.
2. The pharmacist is engaged in a legitimate relief effort during the period of time an emergency has been declared pursuant to this section.

F. The board may adopt rules for the provision of pharmaceutical care and drug and device delivery during a declared emergency that is the consequence of a natural disaster or terrorist attack, including the use of temporary or mobile pharmacy facilities and nonresident licensed pharmacy professionals.

G. A pharmacist's authority to dispense prescriptions pursuant to this section ends when the declared state of emergency is terminated.

32-1921. Exempted acts; exemption from registration fees; definition

A. This chapter does not prevent:

1. The prescription and dispensing of drugs or prescription medications by a registered nurse practitioner or clinical nurse specialist pursuant to rules adopted by the Arizona state board of nursing in consultation with the Arizona medical board, the Arizona board of osteopathic examiners in medicine and surgery and the Arizona state board of pharmacy.
2. The sale of nonprescription drugs that are sold at retail in original packages by a person holding a permit issued by the board under this chapter.
3. The sale of drugs at wholesale by a wholesaler or manufacturer that holds the required permit issued by the board to a person who holds the required permit issued under this chapter.
4. The manufacturing of drugs by a person who is not a pharmacist and who holds the required permit issued by the board under this chapter.
5. The following health professionals from dispensing or personally administering drugs or devices to a patient for a condition being treated by the health professional:
 - (a) A doctor of medicine licensed pursuant to chapter 13 of this title.
 - (b) An osteopathic physician licensed pursuant to chapter 17 of this title.
 - (c) A homeopathic physician licensed pursuant to chapter 29 of this title.
 - (d) A podiatrist licensed pursuant to chapter 7 of this title.
 - (e) A dentist licensed pursuant to chapter 11 of this title.
 - (f) A doctor of naturopathic medicine who is authorized to prescribe natural substances, drugs or devices and who is licensed pursuant to chapter 14 of this title.
 - (g) An optometrist who is licensed pursuant to chapter 16 of this title and who is certified for topical or oral pharmaceutical agents.
6. A veterinarian licensed pursuant to chapter 21 of this title from dispensing or administering drugs to an animal or from dispensing or administering devices to an animal being treated by the veterinarian.
7. The use of any pesticide chemical, soil or plant nutrient or other agricultural chemical that is a color additive solely because of its effect in aiding, retarding or otherwise affecting directly or indirectly the growth or other natural physiological process of produce of the soil and thereby affecting its color whether before or after harvest.
8. A licensed practical or registered nurse employed by a person licensed pursuant to chapter 7, 11, 13, 14, 17 or 29 of this title from assisting in the delivery of drugs and devices to patients, in accordance with chapter 7, 11, 13, 14, 17 or 29 of this title.

9. The use of any mechanical device or vending machine in connection with the sale of any nonprescription drug, including proprietary and patent medicine. The board may adopt rules to prescribe conditions under which nonprescription drugs may be dispensed pursuant to this paragraph.

B. A person who is licensed pursuant to chapter 7, 11, 13, 14, 17 or 29 of this title and who employs a licensed practical or registered nurse who in the course of employment assists in the delivery of drugs and devices is responsible for the dispensing process.

C. Pursuant to a prescription order written by a physician for the physician's patients and dispensed by a licensed pharmacist, a physical therapist licensed pursuant to chapter 19 of this title, an occupational therapist licensed pursuant to chapter 34 of this title or an athletic trainer licensed pursuant to chapter 41 of this title may procure, store and administer nonscheduled legend and topical anti-inflammatories and topical anesthetics for use in phonophoresis and iontophoresis procedures and within the scope of practice of physical or occupational therapy or athletic training.

D. A public health facility operated by this state or a county and a qualifying community health center may dispense medication or devices to patients at no cost without providing a written prescription if the public health facility or the qualifying community health center meets all storage, labeling, safety and record keeping rules adopted by the board of pharmacy.

E. A person who is licensed pursuant to chapter 7, 11, 13, 14, 17 or 29 of this title, who is practicing at a public health facility or a qualifying community health center and who is involved in the dispensing of medication or devices only at a facility or center, whether for a charge or at no cost, shall register to dispense with the appropriate licensing board but is exempt from paying registration fees.

F. For the purposes of this section, "qualifying community health center" means a primary care clinic that is recognized as nonprofit under section 501(c)(3) of the United States internal revenue code and whose board of directors includes patients of the center and residents of the center's service area.

32-1921.01. Disclosures on applications; licensees; applicability

A. A pharmacist, pharmacy intern, pharmacy technician and pharmacy technician trainee are not required to disclose the following information when filing an application under this chapter:

1. A single misdemeanor charge that was dismissed, expunged or set aside more than five years before the date of application.

2. A single misdemeanor conviction that occurred more than ten years before the date of application.

3. A single felony conviction that was reduced to a misdemeanor conviction or that was dismissed, expunged or set aside more than ten years before the date of application.

B. An applicant or licensee who has had more than one of any charge or conviction specified in subsection A of this section shall disclose that information to the board.

C. Subsection A of this section applies to current licensees.

32-1922. Qualifications of applicant; reciprocity; preliminary equivalency examination; honorary certificate; fee

A. An applicant for licensure as a pharmacist shall:

1. Be of good moral character.
2. Be a graduate of a school or college of pharmacy or department of pharmacy of a university recognized by the board or the accreditation council for pharmacy education, or qualify under subsection D of this section.
3. Have successfully completed, as substantiated by proper affidavits, a program of practical experience under the direct supervision of a licensed pharmacist who is approved by the board.
4. Pass the pharmacist licensure examination and jurisprudence examination approved by the board. An applicant who fails an examination three times shall petition the board for permission before retaking the examination. The board shall evaluate the petition and determine whether to require additional educational training before approving each additional retake of the examination.
5. Pay an application fee prescribed by the board of not more than five hundred dollars. An applicant for reciprocal licensure shall pay the fee prescribed in section 32-1924, subsection D.

B. The board may license as a pharmacist, without a pharmacist licensure examination, a person who is licensed as a pharmacist by a pharmacist licensure examination in some other jurisdiction if that person:

1. Produces satisfactory evidence to the board of having had the required secondary and professional education and training.
2. Is possessed of good morals as demanded of applicants for licensure and relicensure under this chapter.
3. Presents proof to the board's satisfaction that the person is licensed by a pharmacist licensure examination equivalent to the pharmacist licensure examination required by the board and that the person holds the license in good standing. If the applicant was examined after June 1, 1979, the applicant must present proof to the board's satisfaction of having passed the national association of boards of pharmacy licensure examination or the north American pharmacist licensure examination.
4. Presents proof to the board's satisfaction that any other license granted to the applicant by any other jurisdiction has not been suspended, revoked or otherwise restricted for any reason except nonrenewal or for failure to obtain the required continuing education credits in any jurisdiction where the applicant is currently licensed but not engaged in the practice of pharmacy.
5. Passes a board-approved jurisprudence examination.

C. Subsection B of this section applies only if the jurisdiction in which the person is licensed grants, under like conditions, reciprocal licensure as a pharmacist to a pharmacist who is licensed by examination in this state and the person holds a license in good standing issued by an active member board of the national association of boards of pharmacy.

D. If an applicant for licensure is a graduate of a pharmacy degree program at a school or college of pharmacy that was not recognized by the board at the time of the person's graduation, the applicant shall pass a preliminary equivalency examination approved by the board in order to qualify to take the examinations prescribed in subsection A of this section.

E. The preliminary equivalency examination required pursuant to subsection D of this section shall cover proficiency in English and academic areas the board deems essential to a satisfactory pharmacy curriculum.

F. An applicant who fails the preliminary equivalency examination required pursuant to subsection D of this section shall not retake the preliminary equivalency examination until the applicant files written proof with the board that the applicant has completed additional remedial academic work previously approved by the board to correct deficiencies in the applicant's education that were indicated by the results of the applicant's last preliminary equivalency examination.

G. A pharmacist who has been licensed in this state for at least fifty years shall be granted an honorary certificate of licensure by the board without the payment of the usual renewal fee, but that certificate of licensure does not confer an exemption from any other requirement of this chapter.

H. The board may require a pharmacist who has not been actively engaged in the practice of pharmacy for over one year to serve not more than four hundred hours in an internship training program approved by the board or its designee before the pharmacist may resume the active practice of pharmacy.

I. An applicant must complete the application process within twelve months after submitting the application.

32-1923. Interns and intern preceptors; qualifications; licensure; purpose of internship

A. A pharmacist who meets the qualifications established by the board to supervise the training of a pharmacy intern shall comply with the rules of the board and be known as a pharmacy intern preceptor.

B. A person shall not act as a pharmacy intern until that person is licensed by the board. An employer shall verify that a person is currently licensed as a pharmacy intern before the employer allows that person to act as a pharmacy intern.

C. The board shall establish the preliminary educational qualifications for all pharmacy interns, which may include enrollment and attendance in a school or college of pharmacy approved by the board.

D. A pharmacy intern who is currently licensed may be employed in a pharmacy or any other place approved and authorized by the board for training interns and shall receive instruction in the practice of pharmacy, including manufacturing, wholesaling, dispensing of drugs and devices, compounding and dispensing prescription orders, clinical pharmacy, providing drug information, keeping records and making reports required by state and federal laws and other experience that, in the discretion of the board, provides the intern with the necessary experience to practice the profession of pharmacy. Pharmacy interns may compound, dispense and sell drugs, devices and poisons or perform other duties of a pharmacist only in the presence and under the immediate personal supervision of a pharmacist.

E. Intern training and licensure as a pharmacy intern under this section are for the purpose of acquiring practical experience in the practice of the profession of pharmacy before becoming licensed as a pharmacist and are not for the purpose of continued licensure under the pharmacy laws. If a pharmacy intern fails to complete pharmacy education within a period of six years, the intern is not eligible for relicensure as an intern without an acceptable explanation to the board that the intern intends to be and is working toward becoming a pharmacist.

F. The board may accept the experience of a pharmacy intern acquired in another jurisdiction on proper certification by the other jurisdiction.

32-1923.01. Pharmacy technicians; pharmacy technician trainees; qualifications; remote dispensing site pharmacies

A. An applicant for licensure as a pharmacy technician must:

1. Be of good moral character.
2. Be at least eighteen years of age.
3. Have a high school diploma or the equivalent of a high school diploma.
4. Complete a training program prescribed by board rules.
5. Pass a board-approved pharmacy technician examination.

B. An applicant for licensure as a pharmacy technician trainee must:

1. Be of good moral character.
2. Be at least eighteen years of age.
3. Have a high school diploma or the equivalent of a high school diploma.

C. Before a pharmacy technician prepares, compounds or dispenses prescription medications at a remote dispensing site pharmacy, the pharmacy technician shall:

1. Complete, in addition to any other board-approved mandatory continuing professional education requirements, a two-hour continuing education program on remote dispensing site pharmacy practices provided by an approved provider.
2. Have at least one thousand hours of experience working as a pharmacy technician in an outpatient pharmacy setting under the direct supervision of a pharmacist.

D. A pharmacy technician working at a remote dispensing site pharmacy:

1. Shall maintain an active, nationally recognized pharmacy technician certification approved by the board.
2. May not perform extemporaneous sterile or nonsterile compounding but may prepare commercially available medications for dispensing, including the reconstitution of orally administered powder antibiotics.

32-1924. Licenses; fees; rules; signatures; online profiles

A. An applicant for licensure as a pharmacist who passes the board-approved examinations shall pay the board an initial licensure fee of not more than five hundred dollars.

B. An applicant for licensure as a pharmacist, intern, pharmacy technician or pharmacy technician trainee shall pay a fee prescribed by the board that does not exceed fifty dollars for issuance of a wall license. On payment of a fee of not more than fifty dollars, the board may issue a replacement wall license to a licensee who requests a replacement because the original was damaged or destroyed, because of a change of name or for other good cause as prescribed by the board.

C. An applicant for licensure as an intern shall pay a fee of not more than seventy-five dollars. A license issued pursuant to this subsection expires five years after it is issued. The board shall adopt rules to prescribe the requirements for the renewal of a license that expires before the pharmacy intern completes the education or training required for licensure as a pharmacist.

D. An applicant for reciprocal licensure as a pharmacist shall pay a fee of not more than five hundred dollars for the application and expense of making an investigation of the applicant's character, general reputation and pharmaceutical standing in the jurisdiction in which the applicant is licensed.

E. All pharmacist licenses shall bear the signatures of the executive director and a majority of the members of the board.

F. An applicant for licensure as a pharmacy technician trainee shall submit with the application a fee prescribed by the board that does not exceed one hundred dollars. A license issued pursuant to this subsection expires thirty-six months after it is issued. A pharmacy technician trainee license may not be renewed or reissued.

G. An applicant for licensure as a pharmacy technician shall submit with the application a fee prescribed by the board that does not exceed one hundred dollars.

H. A licensee shall create an online profile using the board's licensing software.

32-1925. Renewal of license of pharmacists, interns and pharmacy technicians; fees; expiration dates; penalty for failure to renew; continuing education

A. Except for interns and pharmacy technician trainees, the board shall assign all persons who are licensed under this chapter to one of two license renewal groups. Except as provided in section 32-4301, a holder of a license certificate designated in the licensing database as even by way of verbiage or numerical value shall renew it biennially on or before November 1 of the even-numbered year, two years from the last renewal date. Except as provided in section 32-4301, a holder of a license certificate designated in the licensing database as odd by way of verbiage or numerical value shall renew it biennially on or before November 1 of the odd-numbered year, two years from the last renewal date. Failure to renew and pay all required fees on or before November 1 of the year in which the renewal is due suspends the license. The board shall vacate a suspension when the licensee pays all past due fees and penalties. Penalties shall not exceed three hundred fifty dollars. The board may waive collection of a fee or penalty due after suspension under conditions established by a majority of the board.

B. A person shall not apply for license renewal more than sixty days before the expiration date of the license.

C. A person who is licensed as a pharmacist or a pharmacy technician and who has not renewed the license for five consecutive years shall furnish to the board satisfactory proof of fitness to be licensed as a pharmacist or a pharmacy technician, in addition to the payment of all past due fees and penalties before being reinstated.

D. Biennial renewal fees for licensure shall be not more than:

1. For a pharmacist, two hundred fifty dollars.
2. For a pharmacy technician, one hundred dollars.
3. For a duplicate renewal license, twenty-five dollars.

E. Fees that are designated to be not more than a maximum amount shall be set by the board for the following two fiscal years beginning November 1. The board shall establish fees approximately proportionate to the maximum fee allowed to cover the board's anticipated expenditures for the following two fiscal years. Variation in a fee is not effective except at the expiration date of a license.

F. The board shall not renew a license for a pharmacist unless the pharmacist has complied with the mandatory continuing professional pharmacy education requirements of sections 32-1936 and 32-1937.

G. The board shall prescribe intern licensure renewal fees that do not exceed seventy-five dollars. The license of an intern who does not receive specific board approval to renew the intern license or who receives board approval to renew but who does not renew and pay all required fees before the license expiration date is suspended after the license expiration date. The board shall vacate a suspension if the licensee pays all past due fees and penalties. Penalties shall not exceed three hundred fifty dollars. The board may waive collection of a fee or penalty due after suspension under conditions established by the board.

H. The board shall not renew a license for a pharmacy technician unless that person has a current board-approved license and has complied with board-approved mandatory continuing professional education requirements. If a pharmacy technician prepares, compounds or dispenses prescription medications at a remote dispensing site pharmacy the pharmacy technician shall complete, in addition to any other board-approved mandatory continuing professional education requirements, a two-hour continuing education program on remote dispensing site pharmacy practices provided by an approved provider.

32-1926. Notice of change of information required

A. Except as prescribed in subsection B of this section, a pharmacist, intern, pharmacy technician or pharmacy technician trainee, within ten days after a change in that person's employer, employer's address, home address or contact information, shall electronically update the person's online board profile or give written notice to the board office staff of the new information.

B. Pursuant to board rule, a pharmacist designated as the pharmacist in charge for a permit issued under this chapter shall give immediate notice to the board office staff of the initiation and termination of such responsibility. The pharmacist shall either electronically update the pharmacist's online board profile or give written notice to the board office staff of the new information.

32-1926.01. Change in residency status; written notice required

A. A licensee shall give written notice to the board office staff of a change in the licensee's residency status authorized by the United States citizenship and immigration services.

B. If the licensee's residency status ceases to be authorized by the United States citizenship and immigration services, the licensee shall give written notice to the board office staff that the licensee voluntarily terminates the license.

32-1927. Pharmacists; pharmacy interns; disciplinary action

A. A pharmacist or pharmacy intern is subject to disciplinary action by the board for any of the following:

1. The board determines that the licensee has committed an act of unprofessional conduct.
2. The licensee is found by psychiatric examination to be mentally unfit to practice the profession of pharmacy.
3. The licensee is found to be physically or mentally incapacitated to such a degree as to render the licensee unfit to practice the profession of pharmacy.
4. The licensee is found to be professionally incompetent to such a degree as to render the licensee unfit to practice the profession of pharmacy.
5. The license was issued through error.

B. A pharmacist or pharmacy intern who after a formal hearing is found by the board to be guilty of unprofessional conduct, to be mentally or physically unable safely to engage in the practice of pharmacy or to be professionally incompetent is subject to any one or combination of the following:

1. A civil penalty of not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.
2. A letter of reprimand.
3. A decree of censure.
4. Completion of board-designated continuing pharmaceutical education courses.
5. Probation.
6. Suspension or revocation of the license.

C. The board may charge the costs of formal hearings to the licensee whom it finds to be in violation of this chapter or a rule adopted under this chapter.

D. The board on its own motion may investigate any evidence that appears to show that a pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the practice of pharmacy. Any person may, and a licensee or permittee of the board must, report to the board any information that appears to show that a pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the practice of pharmacy. The board or the executive director shall notify the pharmacist or pharmacy intern as to the content of the complaint as soon as reasonable. Any person or entity that reports or provides information

to the board in good faith is not subject to an action for civil damages. It is an act of unprofessional conduct for any pharmacist or pharmacy intern to fail to report as required by this subsection.

E. The pharmacy permittee or pharmacist in charge of a pharmacy located in this state must inform the board if a pharmacist or pharmacy intern employed by the pharmacy is terminated because of actions by the pharmacist or pharmacy intern that appear to show that the pharmacist or pharmacy intern is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the practice of pharmacy, along with a general statement of the reasons that led the pharmacy to take the action. The pharmacy permittee or pharmacist in charge of a pharmacy located in this state must inform the board if a pharmacist or pharmacy intern under investigation resigns or if a pharmacist or pharmacy intern resigns in lieu of disciplinary action by the pharmacy. Notification must include a general statement of the reasons for the resignation. A person who reports information in good faith pursuant to this subsection is not subject to civil liability.

F. The board or, if delegated by the board, the executive director shall require any combination of mental, physical, psychological, psychiatric or medical competency examinations or pharmacist licensure examinations and conduct necessary investigations including investigational interviews between representatives of the board and the pharmacist or pharmacy intern to fully inform itself about any information filed with the board under this section. These examinations may also include biological fluid testing. The board may require the pharmacist or pharmacy intern, at that person's expense, to undergo assessment by a board-approved substance abuse treatment and rehabilitation program.

G. If after completing its investigation the board finds that the information provided pursuant to this section is not of sufficient seriousness to merit disciplinary action against the license of the pharmacist or pharmacy intern, the board may take any of the following actions:

1. Dismiss if the complaint is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after receiving the advisory letter.
3. Require the licensee to complete board-designated continuing pharmaceutical education courses.

H. The board shall not disclose the name of the person who provides information regarding a licensee's drug or alcohol impairment or the name of the person who files a complaint if that person requests anonymity.

I. If after completing its investigation the board believes that the information is or may be true, it may request a conference with the pharmacist or pharmacy intern. If the pharmacist or pharmacy intern refuses the invitation for a conference and the investigation indicates that grounds may exist for revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, the board shall issue a formal notice that a hearing be held pursuant to title 41, chapter 6, article 10.

J. If through information provided pursuant to this section or by other means the board finds that the protection of the public health, welfare and safety requires emergency action against the license of a pharmacist or pharmacy intern, the board may restrict a license or order a summary suspension of a license pending proceedings for revocation or other action. If the board acts pursuant to this subsection, the board shall also serve the licensee with a written notice of complaint and formal hearing that sets forth

the charges and licensee's right to a formal hearing before the board or an administrative law judge on the charges within sixty days pursuant to title 41, chapter 6, article 10.

K. If after completing the conference the board finds the information provided pursuant to this section is not of sufficient seriousness to merit revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after the licensee receives the advisory letter.
3. Require the licensee to complete board-designated continuing pharmaceutical education courses.

L. If during a conference the board finds that the information provided pursuant to this section indicates that grounds may exist for revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after the licensee receives the advisory letter.
3. Require the licensee to complete board-designated continuing pharmaceutical education courses.
4. Enter into an agreement with the licensee to discipline the licensee, restrict the licensee's practice or professional activities or rehabilitate, retrain or assess the licensee in order to protect the public and ensure the licensee's ability to safely engage in the practice of pharmacy. The agreement may include at least the following:
 - (a) Issuance of a letter of reprimand.
 - (b) Issuance of a decree of censure.
 - (c) Practice or professional restrictions, such as not acting as a pharmacist in charge or pharmacy intern preceptor or working with another pharmacist.
 - (d) Rehabilitative, retraining or assessment programs, including:
 - (i) Board-approved community service.
 - (ii) Successful completion of additional board-designated continuing pharmaceutical education courses.
 - (iii) Successful passage of board-approved pharmacist licensure examinations.
 - (iv) Successful completion of a board-approved substance abuse treatment and rehabilitation program at the licensee's own expense.

(e) A civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.

(f) A period and terms of probation best adapted to protect the public health and safety and rehabilitate or educate the licensee concerned. Probation may include temporary suspension and any or all of the disciplinary actions, practice or professional restrictions, rehabilitative, retraining or assessment programs listed in this section or any other program agreed to by the board and the licensee.

M. If the board finds that the information provided pursuant to this section and additional information provided during the conference warrants revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it shall initiate formal proceedings pursuant to title 41, chapter 6, article 10.

N. If the licensee wishes to be present at the formal hearing in person or by representation, or both, the licensee must file with the board an answer to the charges in the notice of hearing. The answer must be in writing, be verified under oath and be filed within thirty days after service of the notice of hearing. Failure to answer the board's notice of hearing is deemed an admission of the charges in the notice of hearing.

O. An advisory letter is a nondisciplinary public document.

P. If the board during an investigation determines that a criminal violation might have occurred, it shall disclose its investigative evidence and information to the appropriate criminal justice agency for its consideration.

Q. In determining the appropriate disciplinary action under this section, the board shall consider all previous nondisciplinary and disciplinary actions against a licensee.

R. The board may deny a license to an applicant for the grounds prescribed in subsection A of this section.

S. A person who is licensed pursuant to this chapter or by any other jurisdiction and who has a license revoked or suspended shall not obtain a license as a pharmacy intern, phar

32-1927.01. [Pharmacy technicians; pharmacy technician trainees; disciplinary action](#)

A. A pharmacy technician or pharmacy technician trainee is subject to disciplinary action by the board for any of the following:

1. The board determines that the licensee has committed an act of unprofessional conduct.
2. The licensee is found by psychiatric examination to be mentally unfit to safely perform the licensee's employment duties.
3. The licensee is found to be physically or mentally incapacitated to such a degree as to render the licensee unfit to safely perform the licensee's employment duties.
4. The licensee is found to be professionally incompetent to such a degree as to render the licensee unfit to safely perform the licensee's employment duties.

5. The license was issued through error.

B. A pharmacy technician or pharmacy technician trainee who after a formal hearing is found by the board to be guilty of unprofessional conduct, to be mentally or physically unable safely to engage in the practice of pharmacy or to be professionally incompetent is subject to any one or combination of the following:

1. A civil penalty of not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.
2. A letter of reprimand.
3. A decree of censure.
4. Completion of board designated continuing education courses.
5. Probation.
6. Suspension or revocation of the license.

C. The board may charge the costs of formal hearings to the licensee whom it finds to be in violation of this chapter or a rule adopted under this chapter.

D. The board on its own motion may investigate any evidence that appears to show that a pharmacy technician or pharmacy technician trainee is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the permissible activities of a pharmacy technician or pharmacy technician trainee. Any person may, and a licensee or permittee of the board must, report to the board any information that appears to show that a pharmacy technician or pharmacy technician trainee is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the permissible activities of a pharmacy technician or pharmacy technician trainee. The board or the executive director shall notify the pharmacy technician or pharmacy technician trainee as to the content of the complaint as soon as reasonable. Any person or entity that reports or provides information to the board in good faith is not subject to an action for civil damages. It is an act of unprofessional conduct for any pharmacy technician or pharmacy technician trainee to fail to report as required by this subsection.

E. The pharmacy permittee or pharmacist in charge of a pharmacy located in this state must inform the board if a pharmacy technician or pharmacy technician trainee employed by the pharmacy is terminated because of actions by that person that appear to show that the person is or may be professionally incompetent, is or may be guilty of unprofessional conduct or is or may be mentally or physically unable safely to engage in the permissible activities of a pharmacy technician or pharmacy technician trainee, along with a general statement of the reasons that led the pharmacy to take the action. The pharmacy permittee or pharmacist in charge of a pharmacy located in this state must inform the board if a pharmacy technician or pharmacy technician trainee under investigation resigns or if a pharmacy technician or pharmacy technician trainee resigns in lieu of disciplinary action by the pharmacy. Notification must include a general statement of the reasons for the resignation. A person who reports information in good faith pursuant to this subsection is not subject to civil liability.

F. The board or, if delegated by the board, the executive director shall require any combination of mental, physical, psychological, psychiatric or medical competency examinations or pharmacy technician

licensure examinations and conduct necessary investigations including investigational interviews between representatives of the board and the pharmacy technician or pharmacy technician trainee to fully inform itself about any information filed with the board pursuant to this section. These examinations may also include biological fluid testing. The board may require the licensee, at that person's expense, to undergo assessment by a board approved substance abuse treatment and rehabilitation program.

G. If after completing its investigation the board finds that the information provided pursuant to this section is not of sufficient seriousness to merit disciplinary action against the license of the pharmacy technician or pharmacy technician trainee, the board may take any of the following actions:

1. Dismiss if the complaint is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after receiving the advisory letter.
3. Require the licensee to complete board designated continuing pharmaceutical education courses.

H. The board shall not disclose the name of the person who provides information regarding a licensee's drug or alcohol impairment or the name of the person who files a complaint if that person requests anonymity.

I. If after completing its investigation the board believes that the information is or may be true, it may request a conference with the licensee. If the licensee refuses the invitation for a conference and the investigation indicates that grounds may exist for revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, the board shall issue a formal notice that a hearing be held pursuant to title 41, chapter 6, article 10.

J. If through information provided pursuant to this section or by other means the board finds that the protection of the public health, welfare and safety requires emergency action against the license of a pharmacy technician or pharmacy technician trainee, the board may restrict a license or order a summary suspension of a license pending proceedings for revocation or other action. If the board acts pursuant to this subsection, the board shall also serve the licensee with a written notice of complaint and formal hearing that sets forth the charges made against the licensee and the licensee's right to a formal hearing before the board or an administrative law judge on the charges within sixty days pursuant to title 41, chapter 6, article 10.

K. If after completing the conference the board finds the information provided pursuant to this section is not of sufficient seriousness to merit revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after the licensee receives the advisory letter.
3. Require the licensee to complete board designated continuing pharmaceutical education courses.

L. If during a conference the board finds that the information provided pursuant to this section indicates that grounds may exist for revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.
2. File an advisory letter. The licensee may file a written response with the board within thirty days after the licensee receives the advisory letter.
3. Require the licensee to complete board designated continuing pharmaceutical education courses.
4. Enter into an agreement with the licensee to discipline the licensee, restrict the licensee's practice or professional activities or rehabilitate, retrain or assess the licensee in order to protect the public and ensure the licensee's ability to safely engage in the permissible activities of a pharmacy technician or pharmacy technician trainee. The agreement may include at least the following:
 - (a) Issuance of a letter of reprimand.
 - (b) Issuance of a decree of censure.
 - (c) Practice or professional restrictions, such as doing the following only under pharmacist supervision:
 - (i) Entering prescription or patient data.
 - (ii) Initiating or accepting verbal refill authorization.
 - (iii) Counting, pouring, packaging or labeling prescription medication.
 - (iv) Compounding, reconstituting, repackaging or repackaging drugs.
 - (d) Rehabilitative, retraining or assessment programs, including:
 - (i) Board approved community service.
 - (ii) Successful completion of additional board designated continuing pharmaceutical education courses.
 - (iii) Successful passage of board approved pharmacist technician licensure examinations.
 - (iv) Successful completion of a board approved substance abuse treatment and rehabilitation program at the licensee's own expense.
 - (e) A civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.
 - (f) A period and terms of probation best adapted to protect the public health and safety and rehabilitate or educate the licensee concerned. Probation may include temporary suspension and any or all of the disciplinary actions, practice or professional restrictions, rehabilitative, retraining or assessment programs listed in this section or any other program agreed to by the board and the licensee.

M. If the board finds that the information provided pursuant to this section and additional information provided during the conference warrants revocation or suspension of a license, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it shall initiate formal proceedings pursuant to title 41, chapter 6, article 10.

N. If the licensee wishes to be present at the formal hearing in person or by representation, or both, the licensee must file with the board an answer to the charges in the notice of hearing. The answer must be in writing, be verified under oath and be filed within thirty days after service of the notice of hearing. Failure to answer the board's notice of hearing is deemed an admission of the charges in the notice of hearing.

O. An advisory letter is a nondisciplinary public document.

P. If the board during an investigation determines that a criminal violation might have occurred, it shall disclose its investigative evidence and information to the appropriate criminal justice agency for its consideration.

Q. In determining the appropriate disciplinary action under this section, the board shall consider all previous nondisciplinary and disciplinary actions against a licensee.

R. The board may deny a license to an applicant for the grounds prescribed in subsection A of this section.

S. A person licensed pursuant to this chapter or by any other jurisdiction who has a license revoked or suspended shall not obtain a license as a pharmacy technician or pharmacy technician trainee or work as a pharmacy technician or pharmacy technician trainee without the approval of the board or its designee.

32-1927.02. Permittees; disciplinary action

A. The board may discipline a permittee if:

1. The board determines that the permittee or permittee's employee is guilty of unethical conduct pursuant to section 32-1901.01, subsection A.

2. Pursuant to a psychiatric examination, the permittee or the permittee's employee is found to be mentally unfit to safely engage in employment duties.

3. The board determines that the permittee or the permittee's employee is physically or mentally incapacitated to such a degree as to render the permittee or permittee's employee unfit to safely engage in employment duties.

4. The permit was issued through error.

5. A permittee or permittee's employee allows a person who does not possess a current license issued by the board to work as a pharmacist, pharmacy intern, pharmacy technician or pharmacy technician trainee.

B. A permittee who after a formal hearing is found by the board to be guilty of unethical conduct, to be mentally or physically unable safely to engage in employment duties or to be in violation of this chapter or a rule adopted under this chapter or whose employee after a formal hearing is found by the board to be

guilty of unethical conduct, to be mentally or physically unable safely to engage in employment duties or to be in violation of this chapter or a rule adopted under this chapter is subject to any one or combination of the following:

1. A civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.
2. A letter of reprimand.
3. A decree of censure.
4. Completion of board-designated pharmacy law continuing education courses.
5. Probation.
6. Suspension or revocation of the permit.

C. The board may charge the costs of formal hearings to the permittee whom it finds to be in violation of this chapter or a rule adopted under this chapter or whose employee it finds to be in violation of this chapter or a rule adopted under this chapter.

D. The board on its own motion may investigate any evidence that appears to show that a permittee or permittee's employee is or may be guilty of unethical conduct, is or may be mentally or physically unable safely to engage in employment duties or is or may be in violation of this chapter or a rule adopted under this chapter. Any person may, and any licensee or permittee must, report to the board any information that appears to show that a permittee or permittee's employee is or may be guilty of unethical conduct, is or may be mentally or physically unable safely to engage in employment duties or is or may be in violation of this chapter or a rule adopted under this chapter. The board or the executive director shall notify the permittee as to the content of the complaint as soon as reasonable. Any person or entity that reports or provides information to the board in good faith is not subject to an action for civil damages. It is an act of unethical conduct for any permittee to fail to report as required by this subsection.

E. The board or, if delegated by the board, the executive director shall require any combination of mental, physical, psychological, psychiatric or medical competency examinations and conduct necessary investigations including investigational interviews between representatives of the board and the permittee or permittee's employee to fully inform itself about any information filed with the board under subsection D of this section. These examinations may also include biological fluid testing. The board may require the permittee or permittee's employee, at that person's expense, to undergo assessment by a board-approved substance abuse treatment and rehabilitation program.

F. If after completing its investigation the board finds that the information provided pursuant to subsection D of this section is not of sufficient seriousness to merit disciplinary action against the permit, the board may take any of the following actions:

1. Dismiss if the complaint is without merit.
2. File an advisory letter. The permittee may file a written response with the board within thirty days after receiving the advisory letter.

3. Require the permittee to complete board-designated pharmacy law continuing education courses.

G. The board shall not disclose the name of the person who provides information regarding a permittee's or permittee's employee's drug or alcohol impairment or the name of the person who files a complaint if that person requests anonymity.

H. If after completing its investigation the board believes that the information is or may be true, it may request a conference with the permittee or permittee's employee. If the permittee or permittee's employee refuses the invitation for a conference and the investigation indicates that grounds may exist for revocation or suspension of a permit, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, the board shall issue a formal notice that a hearing be held pursuant to title 41, chapter 6, article 10.

I. If through information provided pursuant to subsection D of this section or by other means the board finds that the protection of the public health, welfare and safety requires emergency action against the permit, the board may restrict a permit or order a summary suspension of a permit pending proceedings for revocation or other action. If the board acts pursuant to this subsection, the board shall also serve the permittee with a written notice of complaint and formal hearing that sets forth the charges and the permittee's right to a formal hearing on the charges before the board or an administrative law judge within sixty days pursuant to title 41, chapter 6, article 10.

J. If after completing the conference the board finds the information provided pursuant to subsection D of this section is not of sufficient seriousness to merit revocation or suspension of a permit, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.

2. File an advisory letter. The permittee may file a written response with the board within thirty days after receiving the advisory letter.

3. Require the permittee to complete board-designated pharmacy law continuing education courses.

K. If during a conference the board finds that the information provided pursuant to subsection D of this section indicates that grounds may exist for revocation or suspension of a permit, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it may take the following actions:

1. Dismiss if the information is without merit.

2. File an advisory letter. The permittee may file a written response with the board within thirty days after the permittee receives the advisory letter.

3. Require the permittee to complete board-designated pharmacy law continuing education courses.

4. Enter into an agreement with the permittee to discipline the permittee, restrict the permittee's business activities or rehabilitate or assess the permittee in order to protect the public and ensure the permittee's ability to safely engage in employment duties. The agreement may include, at a minimum, the following disciplinary actions, business activity restrictions and rehabilitative or assessment programs:

- (a) Issuance of a letter of reprimand.
- (b) Issuance of a decree of censure.
- (c) Business activity restrictions, including limitations on the number, type, classification or schedule of drug, device, poison, hazardous substance, controlled substance or precursor chemical that may be manufactured, sold, distributed or dispensed.
- (d) Successful completion of board-designated pharmacy law continuing education courses.
- (e) Rehabilitative or assessment programs, including board-approved community service or successful completion of a board-approved substance abuse treatment and rehabilitation program at the permittee's own expense.
- (f) A civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted under this chapter.
- (g) A period and terms of probation best adapted to protect the public health and safety and rehabilitate or assess the permittee concerned. Probation may include temporary suspension and any or all of the disciplinary actions, business practice restrictions, rehabilitative or assessment programs listed in this section or any other program agreed to by the board and the permittee.

L. If the board finds that the information provided pursuant to subsection D of this section and additional information provided during the conference indicate that grounds may exist for revocation or suspension of a permit, probation, issuance of a decree of censure or a letter of reprimand or imposition of a civil penalty, it shall initiate formal proceedings pursuant to title 41, chapter 6, article 10.

M. If the permittee wishes to be present at the formal hearing in person or by representation, or both, the permittee must file with the board an answer to the charges in the notice of hearing. The answer must be in writing, be verified under oath and be filed within thirty days after service of the notice of hearing. Failure to answer the board's notice of hearing is deemed an admission of the charges in the notice of hearing.

N. If the board, during any investigation, determines that a criminal violation might have occurred, it shall disclose its investigative evidence and information to the appropriate criminal justice agency for its consideration.

O. In determining the appropriate disciplinary action under this section, the board shall consider all previous nondisciplinary and disciplinary actions against a permittee.

P. The board may deny a permit to an applicant for the grounds prescribed in subsection A of this section.

Q. If the board approves a permit and the business fails to become operational within nine months after the date the permit is granted, the permit is no longer valid. The board may grant a onetime extension for the business to become operational.

32-1927.03. Persons required to be permitted; formal hearing; disciplinary action

A. A person that resides in this state or in any other jurisdiction and that sells a narcotic or other controlled substance, a prescription-only drug or device, a nonprescription drug, a precursor chemical or a restricted chemical within or into this state shall hold a valid board-issued permit. If the person does not hold a valid board-issued permit, the person is subject to disciplinary action by the board.

B. A person that after a formal hearing is found by the board to be in violation of subsection A of this section may be subject to a civil penalty not to exceed one thousand dollars for each violation of this chapter or a rule adopted pursuant to this chapter.

C. The board may charge the cost of a formal hearing to the person that the board finds to be in violation of this chapter or a rule adopted pursuant to this chapter or whose employee the board finds to be in violation of this chapter or a rule adopted pursuant to this chapter.

D. The board on its own motion or in response to a complaint may inspect or investigate, or delegate to the executive director the authority to inspect or investigate, any evidence that appears to show a person is or may be acting in violation of subsection A of this section. The board may:

1. Send, or delegate to the executive director the authority to send, a cease and desist letter regarding the person's unauthorized business in this state.

2. Request a conference with the person if the board believes the information is or may be true. If the person refuses the invitation or fails to appear for the conference and the investigation indicates that grounds may exist for the board to impose a civil penalty, the board shall issue a formal notice that a hearing be held pursuant to title 41, chapter 6, article 10.

3. Dismiss the complaint if the complaint is without merit.

32-1928. Hearings; restraining order; judicial review

A. Except as provided in subsection B of this section, a license shall be denied, revoked or suspended or a pharmacist or pharmacy intern shall be placed on probation or censured and a civil penalty imposed only after due notice and a hearing pursuant to title 41, chapter 6, article 10. A licensee shall respond in writing to the board when the licensee receives notice of the hearing.

B. If the board has reasonable grounds to believe and finds that the licensee has been guilty of deliberate and wilful violations, or that the public health, safety and welfare imperatively require immediate action, and incorporates a finding to that effect in its order, the board may order a summary suspension of the license pending a hearing. If the board issues an order of summary suspension, it shall serve the licensee with written notice of the complaint and hearing setting forth the charges and informing the licensee of the licensee's right to the hearing. The board shall institute the hearing within ten days after ordering the summary suspension. Service shall be by personal service as provided by the Arizona rules of civil procedure.

C. Except as provided in section 41-1092.08, subsection H, final decisions of the board are subject to judicial review pursuant to title 12, chapter 7, article 6.

D. With or without conditions, the board may reinstate the license of any pharmacist or pharmacy intern that it has placed on probation or whose license it has suspended or revoked.

32-1929. Biennial registration of pharmacies, wholesalers, third-party logistics providers, manufacturers and similar places; application

- A. Except as provided in section 32-4301, the board shall require and provide for biennial registration of every pharmacy, wholesaler, third-party logistics provider and manufacturer and any other place in which or from which drugs are sold, compounded, dispensed, stocked, exposed, manufactured or offered for sale.
- B. Any person desiring to operate, maintain, open or establish a pharmacy, wholesaling firm or manufacturing plant, or any other place in which or from which drugs are manufactured, compounded, dispensed, stocked, exposed, sold or offered for sale, shall apply to the board for a permit before engaging in any such activity.
- C. The application for a permit to operate a pharmacy, drug manufacturing facility or wholesaling facility in this state shall be made on a form prescribed and furnished by the board, which, when properly executed, indicates the ownership, trustee, receiver or other person or persons desiring the permit, including the pharmacist responsible to the board for the operation of a pharmacy or drug manufacturing facility, or other individual approved by and responsible to the board for the operation of wholesaling facilities, as well as the location, including the street name and number, and such other information as required by the board to establish the identity, exact location and extent of activities, in which or from which drugs are sold, manufactured, compounded, dispensed, stocked, exposed or offered for sale.
- D. The application for a permit to operate a pharmacy, drug manufacturing facility or wholesaling facility outside of this state that will dispense, sell, transfer or distribute drugs into this state shall be made on a form prescribed and furnished by the board, which, when properly executed, indicates the ownership, trustee, receiver or other person or persons desiring the permit, including the individual approved by and responsible to the board for the operation of the pharmacy, drug manufacturing facility or wholesaling facility, as well as the location, including the street name and number, and such other information as required by the board to establish the identity, exact location and extent of activities, in which or from which drugs are sold, manufactured, compounded, dispensed, stocked, exposed or offered for sale.
- E. If it is desired to operate, maintain, open or establish more than one pharmacy, or any other place of business in which or from which drugs are sold, manufactured, compounded, dispensed, stocked, exposed or offered for sale, a separate application shall be made and a separate permit shall be issued for each place, business or outlet.

32-1930. Types of permits; restrictions on permits; discontinuance of pharmacy permit

- A. On application, the board may issue the following classes or kinds of permits:
 1. If approved by the board, a pharmacy, limited service pharmacy, automated prescription-dispensing kiosk, full service wholesale drug, third-party logistics provider, nonprescription drug wholesale and drug manufacturer's permit.
 2. Drug packager or drug prepackager permit to an individual or establishment that is currently listed by the United States food and drug administration and has met the requirements of that agency to purchase, repackage, relabel or otherwise alter the manufacturer's original package of an approved drug product with the intent of reselling these items to persons or businesses authorized to possess or resell the repackaged, prepackaged or relabeled drug.

3. A compressed medical gas distributor permit and a durable medical equipment and compressed medical gas supplier permit.
- B. The board shall deny or revoke a pharmacy permit if a medical practitioner receives compensation, either directly or indirectly, from a pharmacy as a result of the practitioner's prescription orders. This does not include compensation to a medical practitioner who is the owner of a building where space is leased to a pharmacy at the prevailing rate, not resulting in a rebate to the medical practitioner.
- C. If a pharmacy permanently discontinues operation, the permittee shall immediately surrender the permit to the executive director. The permittee shall remove all drug signs and symbols, either within or without the premises, and shall remove or destroy all drugs, devices, poisons and hazardous substances.
- D. An automated prescription-dispensing kiosk may not contain or dispense a controlled substance as defined in section 36-2501 and the controlled substances act (P.L. 91-513; 84 Stat. 1242; 21 United States Code section 802).

32-1931. Permit fees; issuance; expiration; renewals; online profiles

- A. The board shall assign the permit of all persons or firms issued under this chapter to one of two permit renewal groups. Except as provided in section 32-4301, a holder of a permit designated in the licensing database as even by way of verbiage or numerical value shall renew it biennially on or before November 1 of the even-numbered year, two years from the last renewal date. Except as provided in section 32-4301, a holder of a permit designated in the licensing database as odd by way of verbiage or numerical value shall renew it biennially on or before November 1 of the odd-numbered year, two years from the last renewal date. Failure to renew and pay all required fees on or before November 1 of the year in which the renewal is due suspends the permit. The board shall vacate a suspension when the permittee pays penalties of not to exceed \$350 and all past due fees. The board may waive collection of a fee or penalty due after suspension under conditions established by a majority of the board.
- B. Permit fees that are designated to be not more than a maximum amount shall be set by the board for the following two fiscal years beginning November 1. The board shall establish the fees approximately proportionate to the maximum fee allowed to cover the board's anticipated expenditures for the following two fiscal years. Variation in a fee is not effective except at the expiration date of the permit.
- C. Applications for permits shall be accompanied by the following biennial fees as determined by subsection B of this section:
 1. A drug manufacturer's permit, not more than \$1,000.
 2. A pharmacy permit, not more than \$500.
 3. A limited service pharmacy permit or an automated prescription-dispensing kiosk permit, not more than \$500.
 4. A full service wholesale drug permit or a third-party logistics provider permit, not more than \$1,000.
 5. A nonprescription drug wholesale permit, not more than \$500.
 6. A drug repackager's permit, not more than \$1,000.

7. A compressed medical gas distributor permit, not more than \$200.
 8. A durable medical equipment and compressed medical gas supplier permit, not more than \$100.
- D. If an applicant is found to be satisfactory to the board, the executive director shall issue to the applicant a permit for each pharmacy, manufacturer, wholesaler or other place of business in which drugs are sold, manufactured, compounded, dispensed, stocked, exposed or offered for sale, for which application is made.
- E. Permits issued under this section are not transferable.
- F. If a permittee does not apply for renewal, the permit expires pursuant to subsection A of this section. A person may activate and renew an expired permit by filing the required application and fee. Renewal thirty days after the expiration date of a permit may be made only on payment of the required biennial renewal fee, all past due fees and a penalty of one-half of the amount of the applicable biennial renewal fee. The board may waive the collection of a fee or penalty due after suspension pursuant to conditions prescribed by the board.
- G. A permittee shall create an online profile using the board's licensing software.
- 32-1932.01. Substance abuse treatment and rehabilitation program; private contract; funding**
- A. The board may establish a program for the treatment and rehabilitation of licensees who are impaired by alcohol or drug abuse. This program shall include education, intervention, therapeutic treatment and posttreatment monitoring and support.
 - B. The board may contract with other organizations to operate the program established pursuant to subsection A of this section. A contract with a private organization shall include the following requirements:
 1. Periodic reports to the board regarding treatment program activity.
 2. Pursuant to a written request by the board or its executive director, release of all treatment records.
 3. Quarterly reports to the board, by case number, regarding each participant's diagnosis, prognosis and recommendations for continuing care, treatment and supervision.
 4. Immediate reporting to the board of the name of an impaired licensee who the treating organization believes to be a danger to self or others.
 5. Reports to the board, as soon as possible, of the name of a participant who refuses to submit to treatment or whose impairment is not substantially alleviated through treatment.
 - C. The board may allocate an amount of not to exceed twenty dollars from each fee it collects from biennial renewal licenses pursuant to section 32-1925 for the operation of the program established by this section.
 - D. A licensee who is impaired by alcohol or drug abuse may enter into a stipulation order with the board, or the licensee may be placed on probation or be subject to other action as provided by law.

32-1933. Display of license or permit

- A. The holder of a permit granted under this chapter shall conspicuously display it in the location to which it applies.
- B. A licensee shall maintain the licensee's current renewal license or duplicate current renewal license, if practicing in more than one location, in the practice site for inspection by the board or its designee or review by the public.
- C. If a licensee practices in more than one place, the board may issue one or more duplicate current renewal licenses to the licensee on payment of a fee of not more than twenty-five dollars for each duplicate current renewal license.

32-1934. Pharmacy operated by hospital

- A. A pharmacy operating in connection with a hospital shall comply with all the provisions of this chapter requiring registration and regulation of pharmacies and with board rules.
- B. A pharmacy operating in connection with a hospital shall also meet the following requirements:
 - 1. In hospitals with fifty beds or more, the pharmacy shall be under the continuous supervision of a pharmacist during the time it is open for pharmacy services, except that the board by rule may establish requirements to allow a pharmacist who is engaged in hospital business to be in other areas of the hospital that are located outside the pharmacy.
 - 2. In hospitals with less than fifty beds, with the written approval and recommendations of the board, the services of a pharmacist shall be required on a part-time basis according to the needs of the hospital, provided that this approval does not permit the compounding, manufacturing, dispensing, labeling, packaging or processing of drugs by other than a pharmacist.
 - 3. In the pharmacist's absence from the hospital, the supervisory registered nurse may obtain from the pharmacy necessary doses of drugs that are ordered by a medical practitioner and that are needed by a patient in an emergency, according to procedures recommended and approved by the board for each hospital.
 - 4. All drugs and medications furnished from the pharmacy to patients on discharge from the hospital shall be dispensed by a pharmacist and the medication shall be properly labeled.
 - 5. The pharmacist in charge shall initiate procedures to provide for the administrative and technical guidance in all matters pertaining to the acquiring, stocking, record keeping and dispensing of drugs and devices.

32-1935. Approval of schools and colleges of pharmacy

The board of pharmacy shall adopt and promulgate standards and requirements for approval of schools and colleges of pharmacy.

32-1936. Mandatory continuing professional pharmacy education

- A. All pharmacists licensed in this state shall satisfactorily complete approved courses of continuing professional pharmacy education or continue their education by other means in accordance with rules adopted by the board before renewing a license.
- B. The board by rule shall establish the form and content of courses for continuing professional pharmacy education and the number of hours required for renewal of a license.

32-1937. Exceptions to continuing education requirements

- A. The requirements of continuing professional pharmacy education provided in section 32-1936 do not apply to licensees during the year of their graduation from an accredited college of pharmacy.
- B. The board may make exceptions from the requirements of section 32-1936 in emergency or hardship cases or for good cause shown based on a written request for an exception from the requirements.
- C. Pharmacists who are exempted from the requirements of continuing professional pharmacy education pursuant to subsection B of this section shall satisfactorily pass a written examination approved by the board for such purpose prior to license renewal.

32-1939. Condition of probation; repayment of inspection costs

- A. As a condition of probation, the board may require that a licensee or permittee be subject to additional compliance inspections or audits and pay the reasonable costs of these inspections and audits. These costs shall not exceed one thousand dollars. The board shall limit these additional inspections to no more than two per year.
- B. Monies received pursuant to subsection A of this section shall be deposited, pursuant to sections 35-146 and 35-147, in the Arizona state board of pharmacy fund.
- C. If a licensee or permittee fails to comply with a board order regarding the costs of additional inspections and audits, the board may enforce its order in the superior court in Maricopa County. The board may also impose additional sanctions against the licensee or permittee.

32-1940. Investigations; hearings; conferences; records; confidentiality

- A. Information received and records kept by the board in connection with investigations conducted pursuant to this chapter are confidential and are not open to the public or subject to civil discovery.
- B. Notwithstanding any other law or code of ethics regarding practitioner confidences, the physician-patient privilege between a medical practitioner and a patient, both as it relates to the competency of the witness and to the exclusion of confidential communications, does not pertain to any board investigations or other proceedings conducted pursuant to this chapter to the extent necessary to determine whether a violation of this chapter has occurred. Communications or records disclosed pursuant to this subsection are confidential and may be used only in a judicial or administrative proceeding or investigation resulting from a report, investigation or hearing required or authorized under this chapter.
- C. The board, its employees and agents and any other person receiving this information shall keep the identity of the patient confidential at all times.

D. The board shall report evidence of a crime uncovered during an investigation to the appropriate criminal justice agency.

E. This section does not prevent the board from disclosing investigative materials concerning a licensee's alleged violation of this chapter to the licensee, the licensee's attorney, another state or federal regulatory agency or a law enforcement agency.

32-1941. Third-party logistics providers; permit required; designated representative; fingerprinting requirements

A. A third-party logistics provider that engages in the logistics services of prescription or over-the-counter dangerous drugs or dangerous devices into, within or from this state shall hold a third-party logistics provider permit in this state.

B. A third-party logistics provider shall comply with storage practices, including all of the following:

1. Maintain access to warehouse space of suitable size to facilitate safe operations, including a suitable area to quarantine a suspect product.

2. Maintain adequate security.

3. Have written policies and procedures to:

(a) Address the receipt, security, storage, inventory, shipment and distribution of a product.

(b) Identify, record and report confirmed significant losses or thefts in the United States.

(c) Correct errors and inaccuracies in inventories.

(d) Provide support for manufacturer recalls.

(e) Prepare for, protect against and address any reasonably foreseeable crisis that affects a facility's security or operation, such as an employee strike, fire or flood.

(f) Ensure that any expired product is segregated from other products and returned to the manufacturer, repackager or agent of the manufacturer or repackager or is destroyed.

(g) Maintain records reflecting the receipt and distribution of products and supplies and records of inventories.

(h) Quarantine or destroy a suspect product if directed to do so by the respective manufacturer, wholesale distributor or dispenser or an authorized governmental agency.

C. A third-party logistics provider shall make its facility available to the board for inspection during regular business hours to ensure compliance with this section.

D. A third-party logistics provider shall have a designated representative at each facility who has not been convicted of any felony violation under any federal, state or local law relating to wholesale or retail

prescription or over-the-counter dangerous drugs or dangerous devices distribution or the distribution of controlled substances.

E. A third-party logistics provider shall provide the board on the board's request with a list of all manufacturers, wholesale distributors and dispensers for whom the third-party logistics provider provides services at a facility.

F. A third-party logistics provider's designated representative shall have a valid fingerprint clearance card issued pursuant to title 41, chapter 12, article 3.1, which shall be submitted with the completed application. If the third-party logistics provider changes its designated representative, the new designated representative shall have a valid fingerprint clearance card issued pursuant to title 41, chapter 12, article 3.1 and submitted to the board before the change in representation is made.

32-1961. Limit on dispensing, compounding and sale of drugs

A. Except as otherwise provided in this chapter, it is unlawful for any person to compound, sell or dispense any drugs or to dispense or compound the prescription orders of a medical practitioner, unless that person is a pharmacist or a pharmacy intern acting under the direct supervision of a pharmacist. This subsection does not prevent a pharmacy technician or support personnel from assisting in the dispensing of drugs if this is done pursuant to rules adopted by the board and under the direct supervision of a licensed pharmacist or under remote supervision by a pharmacist.

B. Except as otherwise provided in this chapter, it is unlawful for any person, without placing a pharmacist in active personal charge at each place of business, to:

1. Open, advertise or conduct a pharmacy.

2. Stock, expose or offer drugs for sale at retail, except as otherwise specifically provided.

3. Use or exhibit the title "drug", "drugs", "drugstore", "pharmacy", "apothecary" or "prescription" or any combination of these words or titles or any title, symbol or description of like import or any other term designed to take its place.

32-1961.01. Remote dispensing site pharmacies

A. A remote dispensing site pharmacy shall obtain and maintain a pharmacy license issued by the board.

B. A remote dispensing site pharmacy shall meet all of the following requirements:

1. Either be jointly owned by a supervising pharmacy in this state or be operated under a contract with a pharmacy licensed and located in this state.

2. Be supervised by a pharmacist licensed and located in this state who is designated as the pharmacist who is responsible for the oversight of the remote dispensing site pharmacy.

3. Display a sign visible to the public indicating that the facility is a remote dispensing site pharmacy, that the facility is under continuous video surveillance and that the video is recorded and retained.

4. Use a common electronic recordkeeping system between the supervising pharmacy and the remote dispensing site pharmacy or allow the supervising pharmacy to access all of the remote dispensing site pharmacy's dispensing system records.

C. A pharmacist may supervise one remote dispensing site pharmacy if the pharmacist is also supervising and dispensing in a licensed pharmacy. A pharmacist may supervise up to two remote dispensing site pharmacies if the pharmacist is not simultaneously supervising and dispensing at another licensed pharmacy. A pharmacist may supervise additional remote dispensing site pharmacies with board approval.

D. A remote dispensing site pharmacy may store, hold and dispense all prescription medications. The remote dispensing site pharmacy shall:

1. Maintain a perpetual inventory of controlled substances.

2. Secure schedule II controlled substances that are opioids separately from other prescription medications used by this pharmacy locked by key, combination or other mechanical or electronic means to prohibit access by unauthorized personnel.

3. Require that the controlled substances prescription monitoring program's central database tracking system be queried pursuant to section 36-2606 by a pharmacist who is designated as the pharmacist responsible for the oversight of the remote dispensing site pharmacy before a prescription order for a schedule II controlled substance is dispensed.

4. Comply with any dispensing limits associated with the prescribing of schedule II controlled substances that are opioids.

5. Maintain a continuous system of video surveillance and recording of the pharmacy department for at least sixty days after the date of recording.

E. Each remote dispensing site pharmacy shall maintain a policy and procedures manual, which shall be made available to the board or its agent on request. In addition to any board-approved community pharmacy policy and procedure requirements, the policy and procedures manual shall include all of the following information:

1. A description of how the remote dispensing site pharmacy will comply with federal and state laws, rules and regulations.

2. The procedure for supervising the remote dispensing site pharmacy and counseling the patient or patient's caregiver using audio and visual technology that complies with the health insurance portability and accountability act of 1996.

3. The elements of a monthly inspection of the remote dispensing site pharmacy by the pharmacist who is designated as the pharmacist responsible for the oversight of the remote dispensing site pharmacy, including requirements for documentation and retention of the results of each inspection.

4. The procedure for reconciling on a monthly basis the perpetual inventory of controlled substances to the on-hand count of controlled substances at the remote dispensing site pharmacy.

5. A description of how the remote dispensing site pharmacy will improve patient access to a pharmacist and pharmacy services.

32-1962. New drug; compliance with federal act; exception

A. No person shall manufacture, sell, offer or hold for sale or give away any new drug or device unless it fully complies with the provisions of the federal act.

B. This section shall not apply to the nutritional supplement amygdalin, a cyano-genetic glycoside, also known as laetrile and vitamin B-17, which is processed from the seeds of certain fruits including apricots, peaches and plums.

32-1963. Liability of manager, proprietor or pharmacist in charge of a pharmacy; variances in quality of drugs or devices prohibited

A. The proprietor, manager, and pharmacist in charge of a pharmacy shall be responsible for the quality of drugs and devices sold or dispensed in the pharmacy, except those sold in original packages of the manufacturer.

B. No pharmacist or other person shall manufacture, compound, dispense, or offer for sale or cause to be manufactured, compounded, dispensed, or offered for sale any drug or device under or by a name recognized in the official compendium or the federal act which differs from the standard of strength, purity and quality specified therein as official at the time of manufacture, compounding, dispensing, or offering for sale, nor shall a pharmacist or other person manufacture, compound, dispense, or offer for sale, or cause to be manufactured, compounded, dispensed, or offered for sale, any drug or device, the strength, purity or quality of which falls below the required strength, purity or quality under which it is sold.

C. Within four working days of receiving a request, the proprietor, manager or pharmacist in charge shall provide the following documents relating to the acquisition or disposal of prescription-only and controlled substance medication if this information is requested by an authorized board agent in the course of his official duties:

1. Invoices.
2. Stock transfer documents.
3. Merchandise return memos.
4. Other related documentation.

32-1963.01. Substitution for prescription drugs or biological products; requirements; label; definitions

A. If a medical practitioner prescribes a brand name drug and does not indicate an intent to prevent substitution as prescribed in subsection E of this section, a pharmacist may fill the prescription with a generic equivalent drug.

B. A pharmacist may substitute a biological product for a prescribed biological product only if all of the following conditions are met:

1. The United States food and drug administration has determined the substituted product to be an interchangeable biological product.
2. The prescribing physician does not designate in writing or electronically that substitution is prohibited in a manner pursuant to subsection E of this section.
3. The pharmacy informs the patient or person presenting the prescription of the substitution pursuant to subsection C of this section.
4. Within five business days after dispensing a biological product, the dispensing pharmacist or the pharmacist's designee makes an entry of the specific product provided to the patient, including the name of the product and the manufacturer. The communication shall be conveyed by making an entry that is electronically accessible to the prescriber through an interoperable electronic medical records system, an electronic prescribing technology, a pharmacy benefit management system, or a pharmacy record. Entry into an electronic records system as described in this paragraph is presumed to provide notice to the prescriber. Otherwise, the pharmacist shall communicate the biological product dispensed to the prescriber using fax, telephone, electronic transmission or other prevailing means, except that communication is not required if one of the following applies:
 - (a) There is no interchangeable biological product approved by the United States food and drug administration for the product prescribed.
 - (b) A refill prescription is not changed from the product dispensed on the prior filling of the prescription.

5. The pharmacy retains a record of the biological product dispensed pursuant to section 32-1964, subsection A.

C. Any pharmacy personnel shall notify the person presenting the prescription of the amount of the price difference between the brand name drug or biological product prescribed and the generic equivalent drug or interchangeable biological product, if both of the following apply:

1. The medical practitioner does not indicate an intent to prevent substitution with a generic equivalent drug or interchangeable biological product.
2. The transaction is not subject to third-party reimbursement.

D. The pharmacist shall place on the container the name of the drug or biological product dispensed followed by the words "generic equivalent for" or "interchangeable biological product for" followed by the brand or trade name of the product that is being replaced by the generic equivalent drug or interchangeable biological product. The pharmacist shall include the brand or trade name on the container or label of any contact lenses dispensed pursuant to this chapter.

E. A prescription generated in this state must be dispensed as written only if the prescriber writes or clearly displays "DAW", "dispense as written", "do not substitute" or "medically necessary" or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form. A prescription from out of state or from agencies of the United States government must be dispensed as written only if the prescriber writes or clearly displays "do not substitute", "dispense as written" or "medically necessary" or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form.

F. This section applies to all prescriptions, including those presented by or on behalf of persons receiving state or federal assistance payments.

G. An employer or agent of an employer of a pharmacist shall not require the pharmacist to dispense any specific generic equivalent drug or interchangeable biological product or to substitute any specific generic equivalent drug or interchangeable biological product for a brand name drug or biological product against the professional judgment of the pharmacist or the order of the prescriber.

H. The liability of a pharmacist in substituting according to this section is no greater than that incurred in the filling of a generically written prescription. This subsection does not limit or diminish the responsibility for the strength, purity or quality of drugs provided in section 32-1963. The failure of a prescriber to specify that no substitution is authorized does not constitute evidence of negligence.

I. A pharmacist may not make a substitution pursuant to this section unless the manufacturer or distributor of the generic equivalent drug or interchangeable biological product has shown that:

1. All products dispensed have an expiration date on the original package.
2. The manufacturer or distributor maintains recall and return capabilities for unsafe or defective drugs or biological products.

J. The board shall maintain on its public website a link to the current list of each biological product determined by the United States food and drug administration to be an interchangeable biological product.

K. The labeling and oral notification requirements of this section do not apply to pharmacies serving patients in a health care institution as defined in section 36-401. However, in order for this exemption to apply to hospitals, the hospital must have a formulary to which all medical practitioners of that hospital have agreed and that is available for inspection by the board.

L. For the purposes of this section:

1. "Biological product" has the same meaning prescribed in 42 United States Code section 262.
2. "Brand name drug" means a drug with a proprietary name assigned to it by the manufacturer or distributor.
3. "Formulary" means a list of medicinal drugs.
4. "Generic equivalent" or "generically equivalent" means a drug that has an identical amount of the same active chemical ingredients in the same dosage form, that meets applicable standards of strength, quality and purity according to the United States pharmacopeia or other nationally recognized compendium and that, if administered in the same amounts, will provide comparable therapeutic effects. Generic equivalent or generically equivalent does not include a drug that is listed by the United States food and drug administration as having unresolved bioequivalence concerns according to the administration's most recent publication of approved drug products with therapeutic equivalence evaluations.
5. "Interchangeable biological product" means a biological product that either:

- (a) The United States food and drug administration has licensed and determined meets the safety standards for determining interchangeability pursuant to 42 United States Code section 262(k)(4).
- (b) Is determined to be therapeutically equivalent as set forth in the latest edition of the supplement to the United States food and drug administration's approved drug products with therapeutic equivalence evaluations.

32-1964. Record of prescription orders; inspections; confidentiality

- A. Every proprietor, manager or pharmacist in charge of a pharmacy shall keep in the pharmacy a book or file in which that person places the original of every prescription order of drugs, devices or replacement soft contact lenses that are compounded or dispensed at the pharmacy. This information shall be serially numbered, dated and filed in the order in which the drugs, devices or replacement soft contact lenses were compounded or dispensed. A prescription order shall be kept for at least seven years. The proprietor, manager or pharmacist shall produce this book or file in court or before any grand jury on lawful order. The book or file of original prescription orders is open for inspection at all times by the prescribing medical practitioner, the board and its agents and officers of the law in performance of their duties.
- B. The board, by rule, shall permit pharmacies to maintain the book or file of all original prescription orders by means of electronic media or image of the original prescription order maintained in a retrievable format in a form that contains information the board requires to provide an adequate record of drugs, devices or replacement soft contact lenses compounded or dispensed.
- C. The board, by rule, shall require a similar book or file for a hospital pharmacy in a form that contains information the board requires to provide an adequate record of drugs compounded or dispensed. A prescription order or medication order must be kept for at least seven years. The administrator, manager or pharmacist must produce this book or file in court or before any grand jury on lawful order. The book or file of original prescription orders or medication orders is open for inspection at all times by the prescribing medical practitioner, the board and its agents and officers of the law in performance of their duties.
- D. A pharmacist, pharmacy permittee or pharmacist in charge shall comply with applicable state and federal privacy statutes and regulations when releasing patient prescription information.

32-1965. Prohibited acts

The following acts or the causing of any thereof, in addition to any others so specified in this chapter, are prohibited:

1. The manufacture, sale, holding or offering for sale of any drug, device, poison, or hazardous substance that is adulterated or misbranded.
2. The adulteration or misbranding of any drug, device, poison, or hazardous substance.
3. The alteration, mutilation, destruction, obliteration, or removal of the whole or any part of the labeling of, or the doing of any other act with respect to, a drug, device, poison, or hazardous substance, if such act is done while such article is held for sale and results in such article being adulterated or misbranded.

4. The manufacture, sale, holding or offering for sale of a counterfeit drug or forging, counterfeiting, simulating, or falsely representing or without proper authority using any mark, stamp, tag, label, or other identification device authorized or required by rules adopted under the provisions of this chapter, or of the federal act.
5. The using, on the labeling of any drug or device, or in any advertisement, relating to such drug or device, of any representation or suggestion that such drug or device complies with the provisions of this chapter.
6. In the case of a prescription-only drug or a controlled substance that requires a prescription order by state or federal law, the failure of the manufacturer, packer, or distributor to transmit, to any medical practitioner who makes a written request for information about such drug, true and correct copies of all printed matter included in any package in which that drug is distributed or other printed matter approved under the federal act.
7. Engaging in the practice of pharmacy without first having a current license in good standing issued by the board.
8. Making or offering to make a forged, counterfeit, altered or photocopied prescription or drug order for the purpose of obtaining prescription-only or controlled substance drugs.

32-1966. Acts constituting adulteration of a drug or device

A drug or device shall be deemed to be adulterated:

1. If it consists in whole or in part of any filthy, putrid or decomposed substance.
2. If it has been produced, prepared, packed, or held under unsanitary conditions whereby it may have been contaminated with filth, or is not securely protected from dust, dirt, and, as far as may be necessary by all reasonable means, from all foreign or injurious contamination, or whereby it may have been rendered injurious to health.
3. If the methods used in, or the facilities or controls used for, its manufacture, processing, packing, or holding do not conform to or are not operated or administered in conformity with current good manufacturing practice to assure that such drug or device meets the requirements of this chapter as to safety and has the identity and strength, and meets the quality, which it is represented to possess.
4. If its container is composed, in whole or in part, of any poisonous or deleterious substance which may render the contents injurious to health.
5. If:
 - (a) It bears or contains a color additive which is unsafe within the meaning of the federal act.
 - (b) It is a color additive, the intended use of which in or on drugs is for the purpose of coloring only, and is unsafe within the meaning of the federal act.
6. If it is a drug the name of which is recognized in an official compendium, and its strength differs from, or its quality or purity falls below, the standard set forth in such compendium. No drug defined in an

official compendium shall be deemed to be adulterated under this paragraph because it differs from the standard of strength, quality, or purity set forth in such compendium, if its difference in strength, quality, or purity from such standard is plainly stated on its label.

7. If it is not subject to the provisions of paragraph 6 of this section and its strength differs from, or its purity or quality falls below that which it purports or is represented to possess.

8. If it is a drug or device to which any substance has been mixed or packed therewith so as to reduce its quality or strength, or to be substituted for it in whole or in part.

32-1967. Acts constituting misbranding of a drug or device; exceptions; interpretation of misleading label; definition

A. A drug or device is misbranded:

1. If its labeling is false or misleading in any particular.

2. If in package form unless it bears a label containing both:

(a) The name and place of business of the manufacturer, packer or distributor.

(b) An accurate statement of the quantity of the contents in terms of weight, measure or numerical count.

3. If any word, statement or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed on the label or labeling. Compliance with the federal act shall be deemed compliance with this chapter except for compliance with paragraph 16 of this subsection.

4. If it is for use by humans and contains any quantity of the narcotic or hypnotic substance alpha-eucaine, barbituric acid, beta-eucaine, bromal, cannabis, carbromal, chloral, coca, cocaine, codeine, heroin, marijuana, morphine, opium, paraldehyde, peyote or sulfonmethane, or any chemical derivative of such substance, which derivative or other substance has been found to be habit-forming, unless its label bears the name and quantity or proportion of such substance or derivative.

5. If it is a drug unless its label bears, to the exclusion of any other nonproprietary name, both:

(a) The established name of the drug, if there is an established name.

(b) In case it is fabricated from two or more ingredients, the established name and quantity of each active ingredient, including the kind and quantity or proportion of any alcohol, and also including, whether active or not, the established name and quantity or proportion of any bromides, ether, chloroform, atropine, hyoscine, hyoscyamine, arsenic, digitalis, digitalis glycosides, mercury, strychnine or thyroid, or derivative or preparation of any such substances, provided that the requirements for stating the quantity of the active ingredients, other than those specifically named in this subdivision, apply only to prescription drugs.

6. Unless its labeling bears both:

(a) Adequate directions for use.

(b) Adequate warnings against use in those pathological conditions or by children where its use may be dangerous to health, or against unsafe dosage or methods or duration of administration or application, in a manner and form as are necessary for the protection of users.

7. If it is recognized in an official compendium, unless it is packed and labeled as prescribed in such compendium, provided that the method of packing may be modified with the consent of the board.

8. If it has been found by the board to be a drug or device liable to deterioration, unless it is packaged in that form and manner, and its label bears a statement of such precautions, as the rules issued by the board require as necessary for the protection of public health.

9. If its container is so made, formed or filled as to be misleading.

10. If it is an imitation of another drug or device.

11. If it is offered for sale under the name of another drug or device.

12. If it is dangerous to health when used in the dosage or manner or with the frequency or duration prescribed, recommended or suggested in the labeling of the drug or device.

13. If it is a color additive, the intended use of which in or on drugs or devices is for the purpose of coloring only, unless its packaging and labeling are in conformity with such packaging and labeling requirements applicable to such color additive in the federal act or board rule.

14. In the case of any prescription-only drug or controlled substance distributed or offered for sale in this state, unless the manufacturer, packer or distributor of such drug or substance includes in all advertisements and other printed matter with respect to that drug a true statement of:

(a) The established name.

(b) The formula showing quantitatively each ingredient.

(c) Other information in brief summary relating to side effects, contraindications or effectiveness as required in board rules or the federal act.

15. If a trademark, trade name or other identifying mark, imprint or device of another drug or device or any likeness of another drug or device has been placed on the drug or device or on its container with intent to defraud.

16. In the case of any prescription-only drug or controlled substance if in final dosage form unless it bears a label containing both:

(a) The name and place of business of the manufacturer, and if different, the packer or distributor.

(b) An accurate statement of the quantity of the contents in terms of weight, measure or numerical count.

17. In the case of any foreign dangerous drug, if it is not approved by the United States food and drug administration or is obtained outside of the licensed supply chain regulated by the United States food and drug administration, the board or the department of health services. This paragraph does not apply to a

foreign dangerous drug that is authorized for use by a state law or that is imported lawfully under the food, drug and cosmetic act (21 United States Code section 301, et seq.) or pursuant to an announcement by the United States food and drug administration of the exercise of enforcement discretion for instances, including clinical research purposes, drug shortages, development of countermeasures against chemical, biological, radiological and nuclear terrorism agents, or pandemic influenza preparedness and response.

B. Drugs and devices that are to be processed, labeled or repacked at establishments other than those where originally processed or packed are exempt from any labeling or packaging requirements of this chapter, provided that such drugs and devices are being delivered, manufactured, processed, labeled, repacked or otherwise held in compliance with board rules or under the federal act.

C. If an article is alleged to be misbranded because the labeling is misleading, then in determining whether the labeling is misleading there shall be taken into account, among other things, not only representations made or suggested by statement, word, design, device or any combination of them, but also the extent to which the labeling fails to reveal facts material in the light of such representations, or material with respect to consequences which may result from the use of the article to which the labeling relates under the conditions of use prescribed in the labeling or under such conditions of use as are customary or usual.

D. A drug or device is not considered misbranded if it is either of the following:

1. Intended for the use in pharmaceutical compounding by a licensed pharmacist, physician, drug manufacturer or distributor or registered outsourcing facility in compliance with the requirements of chapter 18 of this title and the food, drug and cosmetic act (21 United States Code section 321a and 321b).

2. Mislabeled or incorrectly filled because of a filling error by a pharmacy or a pharmacist.

E. This section does not apply to any drug or device, whether or not approved by the United States food and drug administration, that is manufactured, packed or distributed for use in pharmaceutical compounding by a licensed pharmacist, physician, drug manufacturer or distributor or registered outsourcing facility in compliance with the requirements of chapter 18 of this title, and the food, drug and cosmetic act (21 United States Code section 321a and 321b).

F. For the purposes of this section, "dangerous drug" means any drug that is unsafe for self-use in humans or animals and includes:

1. Any drug that bears the legend: "Caution: federal law prohibits dispensing without prescription", "Rx only", or words of similar import.
2. Any device that bears the statement: "Caution: federal law restricts this device to sale by or on the order of a _____", "Rx only", or words of similar import, the blank to be filled in with the designation of the practitioner licensed to use or order use of the device.
3. Any other drug or device that by federal or state law can be lawfully dispensed only on prescription.

32-1968. Dispensing prescription-only drug; prescription orders; refills; labels; misbranding; dispensing soft contact lenses; opioid antagonists

A. A prescription-only drug shall be dispensed only under one of the following conditions:

1. By a medical practitioner in conformance with section 32-1921.
2. On a written prescription order bearing the prescribing medical practitioner's manual signature.
3. On an electronically transmitted prescription order containing the prescribing medical practitioner's electronic or digital signature.
4. On a written prescription order generated from electronic media containing the prescribing medical practitioner's electronic or manual signature. A prescription order that contains only an electronic signature must be applied to paper that uses security features that will ensure the prescription order is not subject to any form of copying or alteration.
5. On an oral prescription order that is reduced promptly to writing and filed by the pharmacist.
6. By refilling any written, electronically transmitted or oral prescription order if a refill is authorized by the prescriber either in the original prescription order, by an electronically transmitted refill order that is documented promptly and filed by the pharmacist or by an oral refill order that is documented promptly and filed by the pharmacist.
7. On a prescription order that the prescribing medical practitioner or the prescribing medical practitioner's agent transmits by fax or e-mail.
8. On a prescription order that the patient transmits by fax or by e-mail if the patient presents a written prescription order bearing the prescribing medical practitioner's manual signature when the prescription-only drug is picked up at the pharmacy.

B. A prescription order shall not be refilled if it is either:

1. Ordered by the prescriber not to be refilled.
2. More than one year since it was originally ordered.

C. A prescription order shall contain the date it was issued, the name and address of the person for whom or owner of the animal for which the drug is ordered, refills authorized, if any, the legibly printed name, address and telephone number of the prescribing medical practitioner, the name, strength, dosage form and quantity of the drug ordered and directions for its use.

D. Any drug dispensed in accordance with subsection A of this section is exempt from the requirements of section 32-1967, except section 32-1967, subsection A, paragraphs 1, 10 and 11 and the packaging requirements of section 32-1967, subsection A, paragraphs 7 and 8, if the drug container bears a label containing the name and address of the dispenser, the serial number, the date of dispensing, the name of the prescriber, the name of the patient, or, if an animal, the name of the owner of the animal and the species of the animal, directions for use and cautionary statements, if any, contained in the order. This exemption does not apply to any drug dispensed in the course of the conduct of a business of dispensing drugs pursuant to diagnosis by mail or the internet or to a drug dispensed in violation of subsection A of this section.

E. The board by rule also may require additional information on the label of prescription medication that the board believes to be necessary for the best interest of the public's health and welfare.

F. A prescription-only drug or a controlled substance that requires a prescription order is deemed to be misbranded if, at any time before dispensing, its label fails to bear the statement "Rx only". A drug to which subsection A of this section does not apply is deemed to be misbranded if, at any time before dispensing, its label bears the caution statement quoted in this subsection.

G. A pharmacist may fill a prescription order for soft contact lenses only as provided in this chapter.

H. A pharmacist may dispense naloxone hydrochloride or any other opioid antagonist that is approved by the United States food and drug administration on the receipt of a standing order and according to protocols adopted by the board pursuant to section 32-1979. For the purposes of this subsection, "standing order" means a signed prescription order that authorizes the pharmacist to dispense naloxone hydrochloride or any other opioid antagonist for emergency purposes and that is issued by a medical practitioner licensed in this state or a state or county health officer who is a medical practitioner licensed in this state.

32-1969. Filling foreign prescription orders; records; exception

A. This chapter does not prohibit a pharmacist or an intern under a pharmacist's supervision from filling a new written prescription order for a drug or device issued by a medical practitioner licensed by the appropriate licensing board of a foreign country.

B. The proprietor, manager or pharmacist in charge of a pharmacy shall keep a separate record of prescriptions filled pursuant to this section.

C. A pharmacist or intern shall not fill a prescription order issued by a medical practitioner licensed by the appropriate licensing board of a foreign country for a controlled substance as defined pursuant to title 36, chapter 27, article 2.

32-1970. Initiating, monitoring and modifying drug therapy and use; conditions; definitions

A. A pharmacist who is licensed pursuant to this chapter may initiate, monitor and modify drug therapy and use only under the following circumstances:

1. The patient's drug therapy and use are pursuant to a provider.
2. The pharmacist complies with rules adopted by the board of pharmacy.
3. The pharmacist follows the written drug therapy management protocols prescribed by the provider who made the diagnosis and initiates, monitors or modifies a person's drug therapy and use only pursuant to those protocols. Each protocol developed pursuant to the drug therapy agreement shall contain detailed directions concerning the actions that the pharmacist may perform for a patient referred by the provider. The protocol shall specify, at a minimum, the specific drug or drugs to be managed by the pharmacist, the conditions and events for which the pharmacist must notify the provider and the laboratory tests that may be ordered. A provider who enters into a protocol-based drug therapy agreement must have a legitimate provider-patient relationship.

B. A licensee who violates this section commits an act of unprofessional conduct.

C. A pharmacist is responsible for the pharmacist's negligent acts that are the result of the pharmacist's change of medication or that relate to patient drug usage pursuant to drug therapy management protocols. This subsection does not limit a provider's liability for negligent acts that are not related to a pharmacist's change of medication pursuant to the protocols.

D. For the purposes of this section:

1. "Initiate, monitor and modify":

(a) Means that a pharmacist may perform specific acts as authorized by a provider pursuant to written guidelines and protocols.

(b) Does not include a pharmacist's selection of drug products that are not prescribed by the provider unless selection of the specific drug product is authorized by the written guidelines and protocols.

2. "Protocol" means a provider's written order, written standing medical order or other written order of protocol as defined by rules adopted by the Arizona medical board, the Arizona board of osteopathic examiners in medicine and surgery and the Arizona state board of nursing and that is patient, provider and pharmacist specific for prescriptions or orders given by the provider authorizing the written protocol.

3. "Provider" means a physician who is licensed pursuant to chapter 13 or 17 of this title or a registered nurse practitioner who is licensed pursuant to chapter 15 of this title and who acts as a primary care practitioner.

32-1972. Poison or hazardous substances; misbranding and labeling; prohibitions; exemption

A. A poison or hazardous substance shall be misbranded unless the label bears, and accompanied information that it includes or bears, any directions for use which states conspicuously:

1. The name and address of the manufacturer or seller.

2. The common or usual name or the chemical name, if there is no common or usual name, of the poison or hazardous substance or of each component which contributes substantially to its poisonous or hazardous property, unless the board by rule permits or requires the use of a recognized generic name.

3. The signal words "poison" and "danger" and the skull and crossbones symbol on poisons or hazardous substances which are highly toxic.

4. The signal word "danger" on poisons or hazardous substances that are corrosive.

5. The signal word "warning" or "caution" on all other poisons or hazardous substances.

6. An affirmative statement as to the principal poisonous property, such as "flammable", "vapor harmful", "causes burns", "absorbed through skin", or similar wording descriptive of the poison or hazardous substance.

7. Precautionary measures describing the action to be followed or avoided.

8. Instruction, when necessary or appropriate, for first-aid treatment.
 9. Instructions for handling and storage of packages which require special care in handling or storage.
 10. The statement "keep out of reach of children" or its practical equivalent, or, if the poison or hazardous substance is intended for use by children, adequate directions for the protection of children from the poison or hazardous substance.
 11. Directions for using the poison or hazardous substance.
- B. A poison or hazardous substance is also misbranded by the reuse of a food, drug or cosmetic container, or in a container which, though not reused, is identifiable as a food, drug or cosmetic container by its labeling or by other identification, as a container for the poison or hazardous substance.
- C. Any statement required on the label of a poison or hazardous substance under subsection A shall be:
1. Located prominently.
 2. In the English language.
 3. In conspicuous and legible type in contrast by typography, layout, or color with other printed matter on the label.
- D. If the board finds that the requirements of subsections A and B are not adequate for the protection of the public health and safety in view of the special hazard presented by any particular poison or hazardous substance, it may establish by rule such reasonable variations or additional label requirements as it finds necessary, and any such poison or hazardous substance intended, or packaged in a form suitable, for use in the household or by children which fails to bear a label in accordance with such rules shall be deemed to be a misbranded poison or hazardous substance.
- E. If the board finds that, because of the size of the package involved or because of the minor hazard presented by the poison or hazardous substance contained therein, or for other good and sufficient reasons, full compliance with the labeling requirements otherwise applicable under this section is impracticable or is not necessary for the adequate protection of the public health and safety, the board shall adopt rules exempting such poisons or hazardous substances from these requirements to the extent they determine to be consistent with adequate protection of the public health and safety.
- F. If the board finds that the poisonous or hazardous nature of a poison or hazardous substance subject to this section is such that the labeling adequate to protect the public health and safety cannot be devised, or the poison or hazardous substance presents an imminent danger to the public health and safety, the board by rule may restrict the sale of such poison or hazardous substance or declare it to be banned and require its removal from commerce.
- G. The board shall conform the rules adopted under this section as far as practicable with the regulations established pursuant to the federal hazardous substances act.

32-1973. Pharmacies; quality assurance

- A. As prescribed by the board by rule, each pharmacy shall implement or participate in a continuous quality assurance program to review pharmacy procedures in order to identify methods for addressing pharmacy medication errors. The rules shall prescribe requirements to document compliance and any other provisions necessary for the administration of the program.
- B. Records that are generated as a component of a pharmacy's ongoing quality assurance program and that are maintained for that program are peer review documents and are not subject to subpoena or discovery in an arbitration or civil proceeding. This subsection does not prohibit a patient from accessing the patient's prescription records or affect the discoverability of any records that are not generated only as a component of a pharmacy's ongoing quality assurance program and maintained only for that program.

C. A pharmacy meets the requirements of this section if it holds a current general, special or rural general hospital license from the department of health services and is any of the following:

- 1. Certified by the centers for medicare and medicaid services to participate in the medicare or medicaid programs.
- 2. Accredited by the joint commission on the accreditation of health care organizations.
- 3. Accredited by the American osteopathic association.

32-1974. Pharmacists; administration of immunizations, vaccines and emergency medications; certification; reporting requirements; advisory committee; definitions

- A. Except as prescribed pursuant to subsection I of this section, a pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may administer the following to adults without a prescription order pursuant to rules and protocols adopted by the board pursuant to this section:
 - 1. Immunizations or vaccines recommended for adults by the United States centers for disease control and prevention.
 - 2. Immunizations or vaccines recommended by the United States centers for disease control and prevention's health information for international travel.
- B. A pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may administer the following to minors without a prescription order pursuant to rules and protocols adopted by the board pursuant to this section:
 - 1. Influenza immunizations or vaccines to a person who is at least three years of age.
 - 2. Booster doses for the primary adolescent series as recommended by the United States centers for disease control and prevention.
 - 3. Immunizations or vaccines recommended by the United States centers for disease control and prevention to a person who is at least thirteen years of age.
- C. Except as prescribed in subsection B of this section, a pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may administer immunizations and vaccines, including the first dose for the primary adolescent series, to a person who is at least six years of age but

under thirteen years of age only with a prescription order and pursuant to rules and protocols adopted by the board pursuant to this section.

D. A pharmacist who wishes to administer immunizations and vaccines pursuant to this section must be certified to do so by the board. The board shall issue a certificate to a pharmacist who meets board requirements for certification as prescribed by the board by rule.

E. A pharmacist who is certified to administer immunizations and vaccines pursuant to this section may administer without a prescription order:

1. Emergency medication to manage an acute allergic reaction to an immunization, vaccine or medication in accordance with the United States centers for disease control and prevention immunization guidelines.
2. Immunizations or vaccines to any person regardless of age during a public health emergency response of this state pursuant to section 36-787.

F. A pharmacist who administers an immunization, vaccine or emergency medication pursuant to this section must:

1. Report the administration to the person's identified primary care provider or physician within forty-eight hours after administering the immunization, vaccine or emergency medication and as prescribed by the board by rule. Failure to report the administration of an immunization, vaccine or emergency medication pursuant to this section is a violation of section 32-1901.01, subsection B, paragraph 2. The pharmacist shall make a reasonable effort to identify the person's primary care provider or physician by one or more of the following methods:

- (a) Checking any adult immunization information system or vaccine registry established by the department of health services.
 - (b) Checking pharmacy records.
 - (c) Requesting the information from the person or, in the case of a minor, the person's parent or guardian.
2. Report information to any adult immunization information system or vaccine registry established by the department of health services.
 3. Maintain a record of the immunization pursuant to title 12, chapter 13, article 7.1 and as prescribed by the board by rule.
 4. Report to the person's identified primary care provider or physician, within twenty-four hours of occurrence, any adverse reaction that is reported to or witnessed by the pharmacist and that is listed by the vaccine manufacturer as a contraindication to further doses of the vaccine.
 5. Participate in any federal vaccine adverse event reporting system or successor database.

G. This section does not establish a cause of action against a patient's primary care provider or physician for any adverse reaction, complication or negative outcome arising from the administration of any immunization, vaccine or emergency medication by a pharmacist to the patient pursuant to this section if it is administered without a prescription order written by the patient's primary care provider or physician.

H. The board shall adopt rules for the administration of vaccines or immunizations pursuant to this section regarding:

1. Protocols that are based on protocols approved by the United States centers for disease control and prevention and any advisory committee appointed by the board for the purpose of recommending protocols.
2. Recordkeeping and reporting requirements.
3. Requirements and qualifications for pharmacist certification pursuant to this section.
4. Vaccine information and educational materials for those requesting vaccines and immunizations.
5. The administration of emergency medication pursuant to this section.

I. The department of health services, by rule, shall establish and maintain a list of immunizations or vaccines that may be administered to adults by a pharmacist only pursuant to a prescription order. In adopting and maintaining this list, the department is exempt from the rulemaking requirements of title 41, chapter 6. The department shall adopt its initial rules within six months after receipt of the recommendations of the advisory committee appointed by the board and shall hold one public hearing before implementing the rules and any amendments to the rules. The list shall include those immunizations or vaccines listed in the United States centers for disease control and prevention's recommended adult immunization schedule or recommended by the United States centers for disease control and prevention's health information for international travel that have adverse reactions that could cause significant harm to a patient's health. A pharmacist may not administer immunizations or vaccines without a prescription order pursuant to this section before the department has established the list pursuant to this subsection. The board may not authorize a pharmacist to administer new immunizations or vaccines without a prescription order pursuant to this section until the department reviews the new immunizations and vaccines to determine if they should be added to the list established pursuant to this subsection.

J. The board may appoint an advisory committee to assist the board in adopting and amending rules and developing protocols relating to the administration of immunizations, vaccines and emergency medications and certification requirements.

K. A pharmacy intern who is certified by the board to administer immunizations and vaccines pursuant to this section may do so only in the presence and under the immediate personal supervision of a pharmacist who is certified as prescribed in this section.

L. This section does not prevent a pharmacist who administers an immunization or vaccine from participating in the federal vaccines for children program.

M. A pharmacist may not administer an immunization or vaccine to a minor without the consent of the minor's parent or guardian.

N. For the purposes of this section:

1. "Emergency medication" means emergency epinephrine and antihistamines in accordance with the United States centers for disease control and prevention immunization guidelines.

2. "Primary adolescent series" means those immunizations or vaccines recommended by the United States centers for disease control and prevention for children starting at age eleven or twelve.

32-1975. Legend drug products; listing; code identification; exemption; definitions

A. A legend drug product in finished solid dosage form shall not be manufactured or commercially distributed within this state unless it is clearly or prominently marked or imprinted with a code imprint identifying the drug product and the manufacturer or distributor of the drug.

B. All manufacturers or distributors of legend drugs in solid dosage form shall make available on request to the board a listing of all such legend drugs identifying by code imprint the manufacturer or distributor and the specific type of drug. The listing shall at all times be kept current by all manufacturers and distributors subject to this section.

C. The board may grant exemptions from the requirements of this section on application of any drug manufacturer or distributor showing size, physical characteristics or other unique characteristics that render the application of a code imprint to a legend drug subject to this section impractical or impossible. Any exemption granted by the board shall be included by the manufacturer or distributor in the listing required by subsection B of this section, describing the physical characteristics and type of drug to which the exemption relates.

D. This section does not apply to drug products compounded by a pharmacist licensed under section 32-1924 in a pharmacy operating under a permit issued by the board.

E. For the purposes of this section:

1. "Code imprint" means a series of letters or numbers assigned by the manufacturer or distributor to a specific drug or marks or monograms unique to the manufacturer or distributor of the drug, or both.

2. "Distributor" means a person who distributes for resale a drug in solid dosage form under that person's own label even if that person is not the actual manufacturer of the drug.

3. "Legend drug" means any drug defined by section 503(b) of the federal food, drug and cosmetic act and under which definition its label is required to bear the statement "Rx only".

4. "Solid dosage form" means capsules or tablets intended for oral use.

32-1976. Dispensing replacement soft contact lenses; prescription

A. A prescription order for replacement soft contact lenses may be dispensed under the following conditions:

1. The prescription order shall be in the form required by this chapter and shall include the name of the prescribing physician or optometrist.

2. The prescription order contains the date of issuance.

3. The prescription order for contact lenses includes the lens brand name, type, tint and all other specifications necessary to accurately dispense the prescription.

B. The prescription shall be dispensed with the exact lenses prescribed and no substitutions shall be made. The expiration date of the prescription shall be the earlier of the expiration date provided by the prescribing physician or optometrist or one year after the date of issuance. A refill of a prescription that is within sixty days of its expiration date shall be filled with no more than the sufficient quantity of replacement soft contact lenses needed through the expiration date.

C. The prescription shall be dispensed with a written notice containing the following wording or its substantial equivalent:

Warning: If you are having any unexplained eye discomfort, watering, vision change or redness, remove your lenses immediately and consult your eye care practitioner before wearing your lenses again.

D. Any advertisement by a pharmacy or pharmacist for replacement soft contact lenses shall include all charges associated with the purchase of replacement soft contact lenses from the pharmacy or pharmacist.

32-1977. Sale of methamphetamine precursors by a pharmacy permittee; electronic sales tracking system; violation; classification; state preemption

A. A permittee under this chapter shall not sell to the same person, and a person shall not purchase, products containing more than three and six-tenths grams per day or more than nine grams per thirty-day period of ephedrine or pseudoephedrine base, or their salts, isomers or salts of isomers. These limits apply to the total amount of base ephedrine and pseudoephedrine contained in the products and not to the overall weight of the products.

B. The permittee must keep nonprescription products containing pseudoephedrine or ephedrine behind the counter or in a locked case where a customer does not have direct access.

C. The permittee shall require a person purchasing a nonprescription product that contains pseudoephedrine or ephedrine to present valid government-issued photo identification at the point of sale. The permittee shall record all of the following:

1. The name and address of the purchaser.
2. The name and quantity of product purchased.
3. The date and time of purchase.
4. Purchaser identification type and number.

D. Before completing a sale pursuant to this section, a permittee must use an electronic sales tracking system and electronically submit the required information to the national precursor log exchange administered by the national association of drug diversion investigators if the system is available to permittees without a charge for access. For the purposes of this subsection, "available to permittees without a charge for access":

1. Includes:

(a) Access to the web-based electronic sales tracking software, including inputting and retrieving data free of charge.

- (b) Training free of charge.
- (c) Technical support to integrate to point of sale vendors without a charge, if necessary.

2. Does not include:

- (a) Costs relating to required internet access.
- (b) Optional hardware that a pharmacy may choose to purchase for workflow purposes.
- (c) Other equipment.

E. If a permittee that sells a nonprescription product containing pseudoephedrine or ephedrine experiences mechanical or electronic failure of the electronic sales tracking system and is unable to comply with the electronic sales tracking requirements of this section, the permittee must maintain a written log or an alternative electronic recordkeeping mechanism until the permittee is able to comply with the electronic sales tracking system requirements. A permittee that does not have internet access to the electronic sales tracking system is compliant with the requirements of this section if the retailer maintains a written log or an alternative electronic recordkeeping mechanism.

F. The national association of drug diversion investigators shall forward state transaction records in the national precursor log exchange to the board of pharmacy each week and provide real-time access to the national precursor log exchange information through the national precursor log exchange online portal to law enforcement in this state as authorized by the board of pharmacy.

G. The system prescribed in this section must be capable of generating a stop sale alert notification that completing the sale would result in the permittee or purchaser violating the quantity limits prescribed in this section. The permittee may not complete the sale if the system generates a stop sale alert. The electronic sales tracking system prescribed in this section must contain an override function that may be used by dispensers of ephedrine or pseudoephedrine who have a reasonable fear of imminent bodily harm if they do not complete a sale. The system must log each instance that a permittee uses the override function.

H. A person who violates this section is guilty of a class 3 misdemeanor, punishable by fine only.

I. This section does not apply to a person who obtains the product pursuant to a valid prescription order.

J. The reporting of sales of ephedrine or pseudoephedrine products is of statewide concern. The regulation of sales pursuant to this section is not subject to further regulation by a county, city, town or other political subdivision of this state.

32-1978. Sale of dextromethorphan; age requirement; exception; violation; civil penalty; definitions

A. It is prohibited for:

- 1. Any commercial entity to knowingly or wilfully sell or trade a finished drug product containing any quantity of dextromethorphan to a person who is under eighteen years of age.

2. Any person who is under eighteen years of age to purchase a finished drug product containing any quantity of dextromethorphan.
 3. Any person to possess, receive or distribute unfinished dextromethorphan, unless the person is registered pursuant to the federal food, drug, and cosmetic act or is appropriately licensed with the board.
- B. A person making a retail sale of a finished drug product containing any quantity of dextromethorphan must require and obtain proof of age from the purchaser before completing the sale, unless the person making the sale reasonably presumes the purchaser to be at least twenty-five years of age based on the purchaser's outward appearance.
- C. Subsection A of this section does not apply to common carriers that possess, receive or distribute unfinished dextromethorphan for purposes of distributing such unfinished dextromethorphan between persons that are registered under section 510 of the federal food, drug, and cosmetic act or that are appropriately licensed with the board.
- D. This section does not impose any compliance requirement on a retail entity other than manually obtaining and verifying proof of age as a condition of sale, including placement of products in a specific place within a store, other restrictions on a consumer's direct access to finished drug products or the maintenance of transaction records.
- E. A person who sells or trades a finished drug product containing any quantity of dextromethorphan to a person who is under eighteen years of age shall receive a warning for a first offense and shall pay a civil penalty of fifty dollars for a second offense, unless the person provides documentation that there is an employee training program in place.
- F. This section does not apply to a medication containing dextromethorphan that is sold pursuant to a valid prescription.

G. For the purposes of this section:

1. "Common carrier" means any person that holds itself out to the general public as a provider for hire of the transportation of merchandise, whether or not the person actually operates the vehicle by which the transportation is provided within, to or from the United States.
2. "Finished drug product" means a drug that is legally marketed under the federal food, drug, and cosmetic act and that is in finished dosage form.
3. "Unfinished dextromethorphan" means dextromethorphan in any form, compound, mixture or preparation that is not a finished drug product.

32-1979. Pharmacists; dispensing opioid antagonists; board protocols; immunity

- A. A pharmacist may dispense, pursuant to a standing order issued pursuant to section 36-2266 and according to protocols adopted by the board, naloxone hydrochloride or any other opioid antagonist that is approved by the United States food and drug administration for use according to the protocols specified by board rule to a person who is at risk of experiencing an opioid-related overdose or to a family member or community member who is in a position to assist that person.

B. A pharmacist who dispenses naloxone hydrochloride or any other opioid antagonist pursuant to subsection A of this section shall:

1. Document the dispensing consistent with board rules.
2. Instruct the individual to whom the opioid antagonist is dispensed to summon emergency services as soon as practicable after administering the opioid antagonist.

C. This section does not affect the authority of a pharmacist to fill or refill a prescription for naloxone hydrochloride or any other opioid antagonist that is approved by the United States food and drug administration.

D. A pharmacist who dispenses an opioid antagonist pursuant to this section is immune from professional liability and criminal prosecution for any decision made, act or omission or injury that results from that act if the pharmacist acts with reasonable care and in good faith, except in cases of wanton or wilful neglect.

32-1979.02. Oral fluoride varnish; prescription and administration authority; requirements

A. A pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may prescribe and administer oral fluoride varnish pursuant to rules adopted by the board.

B. A pharmacist who wishes to administer oral fluoride varnish pursuant to this section shall successfully complete a course of training accredited by the accreditation council for pharmacy education on the use of a caries risk assessment and oral fluoride varnish application, or other board-approved training that complies with American dental association guidelines.

C. A pharmacist who administers oral fluoride varnish pursuant to this section shall do all of the following:

1. Perform a caries risk assessment with each patient and make any necessary referrals to a dentist or physician for moderate or high-risk patients within five business days.
2. Provide each patient with a fluoride record card to be shared with other providers to track fluoride treatments.
3. Inform each patient that fluoride varnish is not sufficient dental care and encourage each patient to see a dentist on a regular basis.
4. Make and keep records for at least one year following the administration of oral fluoride varnish.

D. A pharmacist may not give or receive, either directly or indirectly, a payment, kickback, rebate, bonus or other remuneration for a referral to a dentist or physician pursuant to subsection C of this section.

32-1979.03. Tobacco cessation drug therapies; prescription authority; requirements; definition

A. A pharmacist who is licensed pursuant to this chapter and who meets the requirements of this section may prescribe and dispense tobacco cessation drug therapies to a qualified patient pursuant to rules

adopted by the board. Prescriptive authority is limited to nicotine-replacement tobacco cessation drug therapies, including prescription and nonprescription therapies.

B. A pharmacist who wishes to prescribe and dispense tobacco cessation drug therapies pursuant to this section shall successfully complete a course of training accredited by the accreditation council for pharmacy education in the subject area of tobacco cessation and successfully complete two hours of accreditation council for pharmacy education accredited tobacco cessation continuing education programs on license renewal. The course of training shall include all of the following:

1. Epidemiology and health consequences of tobacco-containing products.
2. Biological, psychological and sociocultural components of tobacco dependence.
3. Assessment of a patient's willingness to quit.
4. Development of a quit plan.
5. Relapse prevention strategies.
6. Approved medications used for nicotine addiction and the effectiveness of current drug therapies for smoking cessation.
7. Nonpharmacological and behavioral interventions.

C. A pharmacist who prescribes and dispenses prescription nicotine-replacement tobacco cessation drug therapies pursuant to this section shall:

1. Notify the qualified patient's designated primary care provider within seventy-two hours after the medication is prescribed.
2. Keep records that include the qualified patient's initial assessment information, the education provided and the medication plan, and any drug therapies prescribed. The records shall be made available to the qualified patient's designated primary care provider on request.

D. This section does not apply to pharmacists who are either:

1. Filling or refilling prescriptions for tobacco cessation products written by another provider.
2. Recommending nonprescription tobacco cessation therapies to a patient without a prescription.

E. For the purposes of this section, "qualified patient" means a patient who:

1. Is at least eighteen years of age.
2. Is enrolled in a structured tobacco cessation program consisting of an initial evaluation and appropriate follow-up visits with the pharmacist or primary care provider if prescribing a prescription nicotine replacement.
3. Has been educated on symptoms of nicotine toxicity and when to seek medical treatment.

32-1981. Definitions

In this article, unless the context otherwise requires:

1. "Chain pharmacy warehouse" means a physical location for prescription-only drugs that acts as a central warehouse and that performs intracompany sales or transfers of the prescription-only drugs to a group of pharmacies that are under common ownership or control. A chain pharmacy warehouse is not limited to the distribution of prescription-only drugs under this article.
2. "Company under common ownership" has the same meaning as affiliated group as defined in 26 United States Code section 1504.
3. "Intracompany transaction" means any sale, transfer or trade between a division, subsidiary, parent or affiliated or related company under the common ownership of a person.
4. "Normal distribution channel" means the chain of custody for a prescription-only drug that begins with the delivery of the drug by a manufacturer to a wholesale distributor who then delivers the drug to a pharmacy or a practitioner for final receipt by a patient. Normal distribution channel includes the receipt of a prescription-only drug by a common carrier or other delivery service that delivers the drug at the direction of a manufacturer, full service wholesale permittee or pharmacy and that does not purchase, sell, trade or take title to any prescription-only drug.
5. "Wholesale distribution" means distribution of a drug to a person other than a consumer or patient. Wholesale distribution does not include:
 - (a) Any transaction or transfer between any division, subsidiary, parent or affiliated or related company under common ownership and control of a corporate entity.
 - (b) Selling, purchasing, distributing, transferring or trading a drug or offering to sell, purchase, distribute, transfer or trade a drug for emergency medical reasons. For the purposes of this subdivision, "emergency medical reasons" includes transferring a prescription drug by a community pharmacy or hospital pharmacy to another community pharmacy or hospital pharmacy to alleviate a temporary shortage.
 - (c) Drug returns if conducted by a hospital, health care entity, retail pharmacy or charitable institution in accordance with 21 Code of Federal Regulations section 203.23.
 - (d) The sale of prescription drugs by a pharmacy, not to exceed five percent of the pharmacy's gross sales, to practitioners for office use.
 - (e) Dispensing by a retail pharmacy of prescription drugs to a patient or patient's agent pursuant to the lawful order of a practitioner.
 - (f) Distributing a drug sample by a manufacturer's representative.
 - (g) Selling, purchasing or trading blood or blood components intended for transfusion.

32-1982. Full service wholesale permittees; bonds; designated representatives; application

A. A full service wholesale permittee that engages in the wholesale distribution of prescription-only drugs into, within or from this state must maintain a bond and have a designated representative.

B. The designated representative of a full service wholesale permittee must:

1. Be at least twenty-one years of age.
2. Have been employed full time for at least three years in a pharmacy or with a full service wholesale permittee in a capacity related to the dispensing and distribution of, and record keeping relating to, prescription-only drugs.
3. Be employed by the full service wholesale permittee in a managerial level position.
4. Be actively involved in the daily operation of the wholesale distribution of prescription-only drugs.
5. Be physically present at the full service wholesale permittee facility during regular business hours unless the absence of the designated representative is authorized.
6. Serve as a designated representative for only one full service wholesale permittee.
7. Not have any criminal convictions under any federal, state or local laws relating to wholesale or retail prescription-only drug distribution or distribution of controlled substances.

C. The board may require the applicant's designated representative to submit a full set of fingerprints to the board. The board shall submit the fingerprints to the department of public safety for the purpose of obtaining a state and federal criminal records check pursuant to section 41-1750 and Public Law 92-544. The department of public safety may exchange the fingerprint data with the federal bureau of investigation. The board may charge each applicant a fee determined by the department of public safety. The board shall forward this fee to the department of public safety.

D. The board shall require every full service wholesale permittee that is applying for an initial permit or renewal of a permit to submit a bond of at least one hundred thousand dollars or other equivalent means of security acceptable to the board. The board may use this bond to secure payment of any fines or penalties that are imposed by the board and any fees or costs that are incurred by the board regarding the permit authorized by law and that the permittee fails to pay within thirty days after the fine, penalty or cost becomes final. The bond must cover all permits held by the permittee in this state.

E. The board may waive the bond requirement if the full service wholesale permittee has previously obtained a comparable surety bond or other equivalent means of security for the purpose of licensure in another state where the full service wholesale permittee possesses a valid license in good standing.

F. For the purposes of this article, a full service wholesale permittee does not include a hospital, chain pharmacy warehouse or third party logistics provider.

32-1983. [Restrictions on transactions](#)

A. A full service wholesale permittee may accept prescription-only drug returns or exchanges from a pharmacy or chain pharmacy warehouse pursuant to the terms of an agreement between the full service

wholesale permittee and the pharmacy or chain pharmacy warehouse. The full service wholesale permittee shall not accept as returns or exchanges from the pharmacy or chain pharmacy warehouse:

1. Adulterated or counterfeited prescription-only drugs.
 2. An amount or quantity of a prescription-only drug that exceeds the amount or quantity that the full service wholesale permittee or another full service wholesale permittee under common ownership sold to the pharmacy or chain pharmacy warehouse.
- B. A full service wholesale permittee may furnish prescription-only drugs only to a pharmacy or medical practitioner. The full service wholesale permittee must first verify that person holds a valid license or permit.
- C. The full service wholesale permittee must deliver prescription-only drugs only to the premises listed on the license or permit. A full service wholesale permittee may furnish prescription-only drugs to an authorized person or agent of that premises if:
1. The full service wholesale permittee properly establishes the person's identity and authority.
 2. Delivery to an authorized person or agent is used only to meet the immediate needs of a particular patient of the authorized person.
- D. A full service wholesale permittee may furnish prescription-only drugs to a pharmacy receiving area if a pharmacist or authorized receiving personnel sign, at the time of delivery, a receipt showing the type and quantity of the prescription-only drug received. Any discrepancy between receipt and the type and quantity of the prescription-only drug actually received must be reported to the full service wholesale permittee by the next business day after the delivery to the pharmacy receiving area.
- E. A full service wholesale permittee shall not accept payment for or allow the use of a person or entity's credit to establish an account for the purchase of prescription-only drugs from any person other than the owner of record, the chief executive officer or the chief financial officer listed on the license or permit of a person or entity legally authorized to receive prescription-only drugs. Any account established for the purchase of prescription-only drugs must bear the name of the licensee or permittee.

32-1985. Injunctive relief

The board, through the appropriate county attorney or the office of the attorney general, may apply for injunctive relief in any court of competent jurisdiction or enjoin any person from committing any act in violation of this article. Injunctive proceedings are in addition to all penalties and other remedies prescribed in this chapter.

32-1991. Enforcement of chapter

The state board of pharmacy, the division of narcotics enforcement and criminal intelligence within the department of public safety, all officers exercising police powers, and county attorneys shall enforce the provisions of this chapter, unless such enforcement is otherwise specifically delegated, and they shall cooperate with all officers and agencies charged with enforcement of laws of other states and the United States pertaining to the subject matter of this chapter.

32-1992. Provisions of marijuana, prescription-only drugs, narcotics, dangerous drugs or controlled substances laws not invalidated by this chapter; medicated feed not included

A. Nothing in this chapter shall be construed to relieve any person from any requirement prescribed by or under authority of law with respect to marijuana, prescription-only drugs, narcotics, dangerous drugs or controlled substances as defined in the applicable federal and state laws relating to these drugs or substances.

B. Nothing in this chapter shall be interpreted to include medicated feed for veterinary use.

32-1993. Authorization to seize certain drugs, counterfeit drugs and equipment; disposition of seized equipment

A. The following may be seized by the division of narcotics enforcement and criminal intelligence within the department of public safety and its designated agents and all officers exercising police powers when they have reasonable grounds to believe it is:

1. A drug that is a counterfeit.
2. A container of such counterfeit drug.
3. Equipment used in manufacturing, compounding, or processing a drug with respect to which drug a prohibited act within the meaning of section 32-1965 has occurred.
4. Any punch, die, plate, stone, labeling, container or other thing used or designed for use in making a counterfeit drug.
5. Any conveyance being used to transport, carry or hold a counterfeit drug in violation of section 32-1965, paragraph 4.

B. When any article, equipment, conveyance, or other thing is seized pursuant to this chapter the peace officer shall, within five days thereafter, cause to be filed in the proper court in whose jurisdiction the merchandise is seized or detained a complaint for condemnation of such merchandise as provided in this chapter.

C. Any person, firm, or corporation having an interest in the alleged article, equipment, or other thing proceeded against, or any person, firm or corporation against whom a civil or criminal liability would exist if the merchandise is in violation of section 32-1965, paragraph 4 may, within twenty days following the seizure, serve and file an answer or responsive pleading to the complaint which shall allege the interest or liability of the party filing it.

D. Any article, equipment, conveyance or other thing condemned under this section shall, after entry of the decree, be disposed of by destruction or sale as the court may direct and the proceeds thereof, if sold, less the legal costs and other charges shall be deposited, pursuant to sections 35-146 and 35-147, with the state treasurer.

32-1994. Authorization to embargo adulterated or misbranded drugs or devices; condemnation; destruction; costs

A. When the board or its authorized agent finds or has probable cause to believe that any drug, device, poison, or hazardous substance is adulterated, or so misbranded as to be dangerous or fraudulent, within the meaning of this chapter, he shall affix to such article an appropriate marking, giving notice that such article is, or is suspected of being, adulterated or misbranded and has been detained or embargoed, and warning all persons it is unlawful to remove or dispose of such article by sale or otherwise until permission for removal or disposal is given by the board or the court.

B. When an article detained or embargoed under subsection A of this section has been found by the board to be adulterated or misbranded, it shall petition the court in whose jurisdiction the article is detained or embargoed for condemnation of such article, or if feasible, the board may permit the article to be brought into compliance with this chapter.

C. If the court finds that a detained or embargoed article is adulterated or misbranded, and it is not feasible to bring it into compliance with this chapter, such article shall be destroyed at the expense of the claimant who shall also pay all court costs, fees, storage and other proper expenses.

32-1995. Injunctions; restraining orders

In addition to other remedies provided, the board may apply to the proper court for, and such court shall have jurisdiction upon hearing and for cause shown, to grant a temporary restraining order, or a temporary or permanent injunction restraining any person from violating any provision of this chapter.

32-1996. Violations; classification; civil penalty

A. Except as provided in this section, a person who violates this chapter:

1. Without the intent to defraud or mislead is guilty of a class 2 misdemeanor.
2. With the intent to defraud or mislead is guilty of a class 5 felony.

B. A person who violates section 32-1965, paragraph 4 or article 3.1 of this chapter is guilty of a class 2 felony.

C. Any person who secures a license or permit for that person or for another person by knowingly making a false representation, who fraudulently claims to be licensed as a pharmacist or pharmacy intern within the meaning of this chapter or who knowingly engages in the practice of pharmacy without a license is guilty of a class 2 misdemeanor.

D. A person who secures a license as a pharmacy technician or a pharmacy technician trainee for that person or for another person by knowingly making a false representation, who fraudulently claims to be licensed as a pharmacy technician or a pharmacy technician trainee or who knowingly performs the duties of a pharmacy technician or a pharmacy technician trainee without a license is guilty of a class 2 misdemeanor.

E. A person who dispenses a human growth hormone in violation of this chapter is guilty of a class 6 felony.

F. A court convicting any person for a violation of this chapter shall, immediately after the date of conviction, send a complete copy of the record of the conviction, including the person's name and offense committed, to the executive director of the board.

G. A person who violates section 32-1978 shall be issued a civil penalty only as set forth in that section.

32-1997. Misbranding; promotion of off-label use; definitions

- A. Notwithstanding any other law, a pharmaceutical manufacturer or its representative may engage in truthful promotion of an off-label use of a drug, biological product or device.
- B. This section does not require a health care insurer, other third-party payor or other health plan sponsor to provide coverage for the cost of any off-label use of a drug, biological product or device as a treatment.
- C. Notwithstanding any other law, an official, employee or agent of this state may not enforce or apply section 32-1967 against or otherwise prosecute a pharmaceutical manufacturer or its representative for engaging in truthful promotion of an off-label use of a drug, biological product or device.
- D. Notwithstanding any other law, the Arizona state board of pharmacy, the Arizona medical board, the Arizona board of osteopathic examiners in medicine and surgery and the department of health services may not revoke, fail to renew or take any other action against the license of a pharmaceutical manufacturer or its representative, a health care institution or a physician solely for engaging in truthful promotion of an off-label use of a drug, biological product or device.

E. For the purposes of this section:

- 1. "Biological product" has the same meaning prescribed in 42 United States Code section 262.
- 2. "Misbranding" has the same meaning described in section 32-1967 or 21 United States Code section 352.
- 3. "Off-label use" means the use of a United States food and drug administration-approved drug, biological product or device in a manner other than the use approved by the United States food and drug administration.
- 4. "Truthful promotion" means the sharing of information that is not misleading, not contrary to fact, and consistent with generally accepted scientific principles, between pharmaceutical manufacturers and licensed professionals who can prescribe medication within the provider's scope of practice.

DEPARTMENT OF ENVIRONMENTAL QUALITY (R19-1204)

Title 18, Chapter 2, Articles 1, 3, and 4, Air Pollution Control

Amend: R18-2-101, R18-2-301, R18-2-302.01, R18-2-304, R18-2-334, R18-2-406

GOVERNOR'S REGULATORY REVIEW COUNCIL

ATTORNEY MEMORANDUM - REGULAR RULEMAKING

MEETING DATE: December 3, 2019

TO: Members of the Governor's Regulatory Review Council (Council)

FROM: Council Staff

DATE: November 4, 2019

SUBJECT: **DEPARTMENT OF ENVIRONMENTAL QUALITY (R19-1204)**

Title 18, Chapter 2, Air Pollution Control, Article 1, 3, and 4

Amend: R18-2-101, R18-2-301, R18-2-302.01, R18-2-304, R18-2-334,
R18-2-406

Summary:

This regular rulemaking from the Department of Environmental Quality seeks to amend rules in Title 18, Chapter 2, Articles 1, 3, and 4. The Department seeks to amend its rules to remedy a deficiency identified by the United States Environmental Protection Agency (EPA) in Arizona's Nonattainment New Source Review (NNSR). The Department indicates the rules need to be amended in order to comply with federal requirements, to secure full approval of Arizona's NSR rules, and to avoid sanctions under the federal Clean Air Act (CAA). More specifically, the Department is seeking to amend the definition of "significant" in R18-2-101 to include an emission rate for ammonia in nonattainment areas within Arizona. In addition, the Department is making other clarifying amendments to the rules in Articles 3 and 4.

The Department received an exemption from the rulemaking moratorium to conduct this rulemaking on July 1, 2015.

1. Are the rules legal, consistent with legislative intent, and within the agency's statutory authority?

Yes, the Department cites to both general and specific authority for these rules.

2. Do the rules establish a new fee or contain a fee increase?

No, the rules do not establish a new fee or contain a fee increase.

3. Does the preamble disclose a reference to any study relevant to the rules that the agency reviewed and either did or did not rely upon?

Not applicable.

4. Summary of the agency's economic impact analysis:

The rulemaking adopts amendments designed to bring the Department's new source review (NSR) rules into compliance with federal requirements. The rulemaking remedies any remaining deficiencies the EPA identified in its 2016 limited disapproval and 2018 conditional approval to bring Arizona's NSR program into compliance with federal regulations. The Department states that the changes are procedural in nature and should have at most a trivial economic impact on stakeholders. Stakeholders include the Department and the regulated community.

5. Has the agency analyzed the costs and benefits of the rulemaking and determined that the rules impose the least burden and costs to those who are regulated?

The Department was not able to identify any less intrusive or less costly alternative methods for achieving the purpose of the rulemaking—compliance with federal NSR requirements for ammonia as PM2.5 precursor.

6. What are the economic impacts on stakeholders?

According to the Department, there are currently no existing or proposed sources of ammonia within the Department's jurisdiction and therefore no small business would be subject to this rulemaking. The Department does not believe that any additional costs will be imposed on businesses as a result of the amended NSR requirements. In addition, there should be no impact on private employment or on the employment of any political subdivision subject to NSR. Any cost(s) should be minimal.

7. Are the final rules a substantial change, considered as a whole, from the proposed rules and any supplemental proposals?

The Department made some changes to the rules in the Notice of Final Rulemaking from the Notice of Proposed Rulemaking, as described in item 10 of the Notice of Final

Rulemaking. The Department also made some substantial changes to some of the rules affected in this rulemaking in response to comments it received from the EPA. It published a Notice of Supplemental Rulemaking (25 A.A.R. 2352, September 13, 2019). The final rules are not a substantial change, considered a whole, from the proposed rules and any supplemental proposals.

8. Does the agency adequately address the comments on the proposed rules and any supplemental proposals?

The Department received 10 comments on this rulemaking and adequately responded to each comment. The comments and the Department's response to each comment are summarized in the Notice of Final Rulemaking.

9. Do the rules require a permit or license and, if so, does the agency comply with A.R.S. § 41-1037?

Not applicable. The rules do not require a permit or license.

10. Are the rules more stringent than corresponding federal law and, if so, is there statutory authority to exceed the requirements of federal law?

No, the Department indicates that the rules are not more stringent than corresponding federal law.

11. Conclusion

This regular rulemaking from the Department of Environmental Quality seeks to amend its rules in order to comply with federal requirements, to secure full approval of Arizona's NSR rules, and to avoid sanctions under the federal Clean Air Act (CAA). Council staff finds that these amendments would result in rules that are more clear, concise, understandable, and effective. The Department accepts the usual 60-day delayed effective date for these rules. Council staff recommends approval of this rulemaking.

ARIZONA DEPARTMENT
OF
ENVIRONMENTAL QUALITY

Douglas A. Ducey
Governor

Misael Cabrera
Director

October 21, 2019

Nicole Sornsin, Chair
Governor's Regulatory Review Council
100 N. 15th Avenue, #305
Phoenix, AZ 85007

Re: Rulemaking for Title 18 – Environmental Quality, Chapter 2. Department of Environmental Quality-Air pollution Control, Article 1, 3, and 4.

Dear Chair Sornsin:

The Arizona Department of Environmental Quality (ADEQ) hereby submits changes to Arizona Administrative Code (A.A.C) R18-2-101, R18-2-302.01, R18-2-304, R18-2-334, and R18-2-406 to the Governor's Regulatory Review Council (GRRC) for its consideration and approval at the Council meeting scheduled for December 3, 2019.

The following information is provided for your use in reviewing the enclosed rules for approval pursuant to A.R.S. § 41-1052 and A.A.C. R1-6-201:

I. Information Required by A.A.C. R1-6-201(A)(1)

- The public record closed for all rules on October 15, 2019, at 5:00 p.m.
- The rulemaking activity relates to the five-year review report approved by GRRC on August 6, 2019.
- The rules do not contain a new fee.
- The rules do not contain a fee increase.
- ADEQ is not seeking an immediate effective date for these rules.
- ADEQ certifies that the preamble discloses reference to any study relevant to the rule that the agency reviewed and either did or did not rely on in the agency's evaluation of or justification for the rule.
- A full-time employee will not be required to implement and enforce the rules.
- A list of all documents enclosed is provided in Sections II and III.

II. List of Documents Enclosed under A.A.C. R1-6-201(A)(1)(h), (A)(2-5)

- One electronic copy of the following is enclosed:

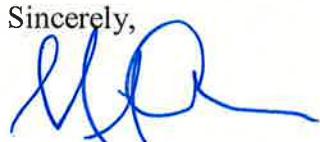

1. This cover letter.
2. The Notice of Final Rulemaking (NFRM), including the preamble, table of contents, and text of the rule.
3. A complete economic, small business and consumer impact statement, which is included in the preamble of the NFRM.
4. Written Comments on the Notice of Proposed Rulemaking (NPRM) and Notice of Supplement Proposed Rulemaking (NSPRM) received by ADEQ.
 - No public comments were received at the May 28, 2019, public hearing on the NPRM; therefore, no record or transcript of such testimony is included in this submittal.
 - No public comments were received at the October 15, 2019, public hearing on the NSPRM; therefore, no record or transcript of such testimony is included in this submittal.
 - ADEQ received no analysis regarding the rules' impact on the competitiveness of businesses in this state as compared to the competitiveness of businesses in other states; therefore, no such analysis is included in this submittal.

III. List of Documents Enclosed under A.A.C. R1-6-201(A)(6-7)

- There are three incorporations by reference of 40 CFR 51, Appendix W as of June 30, 2017 (and no future amendments or additions) in A.A.C. R18-2-301(21), R18-2-334(H), and R18-2-406(A)(6)(a). A courtesy copy of the document is provided; however, the document is not part of this rulemaking.
- One electronic copy of each of the following is enclosed: the general and specific statutes authorizing the rule, including relevant statutory definitions; the statutes are: A.R.S. §§ 49-104(A)(10), 49-404(A), and 49-425(A).
- No term is defined in the rule by referring to another.

Thank you for your timely review and approval. If you have any questions, please contact Daniel Czecholinski, Air Quality Division Director at 602-771-4655 or czecholinski.daniel@azdeq.gov.

Sincerely,

Misael Cabrera, P.E.
Director

NOTICE OF FINAL RULEMAKING

TITLE 18. ENVIRONMENTAL QUALITY

CHAPTER 2. DEPARTMENT OF ENVIRONMENTAL QUALITY

AIR POLLUTION CONTROL

PREAMBLE

1. Article, Part, or Section Affected (as applicable) Rulemaking Action

R18-2-101	Amend
R18-2-301	Amend
R18-2-302.01	Amend
R18-2-304	Amend
R18-2-334	Amend
R18-2-406	Amend

2. Citations to the agency's statutory rulemaking authority to include the authorizing statute (general) and the implementing statute (specific):

Authorizing statute: A.R.S. §§ 49-104(A)(1) and (A)(10), 49-404(A).

Implementing statute: A.R.S. §§ 49-425(A) and 49-426.

3. The effective date of the rule:

February 1, 2020.

a. If the agency selected a date earlier than the 60 day effective date as specified in A.R.S. § 41-1032(A), include the earlier date and state the reason or reasons the agency selected the earlier effective date as provided in A.R.S. § 41-1032(A)(1) through (5):

Not applicable.

b. If the agency selected a date later than the 60 day effective date as specified in A.R.S. § 41-1032(A), include the later date and state the reason or reasons the agency selected the later effective date as provided in A.R.S. § 41-1032(B):

Not applicable.

4. Citations to all related notices published in the *Register* as specified in R1-1-409(A) that pertain to the

record of the proposed rule:

Notice of Rulemaking Docket Opening: 25 A.A.R. 1113, April 26, 2019

Notice of Proposed Rulemaking: 25 A.A.R. 993, April 26, 2019.

Notice of Supplement Proposed Rulemaking: 25 A.A.R. 2352, September 13, 2019.

5. The agency's contact person who can answer questions about the rulemaking:

Air Quality Division, AQIP Section

1110 W. Washington St.

Phoenix, AZ 85007

Telephone: (602) 771-4585 (This number may be reached in-state by dialing 1-800-234-5677 and entering the seven digit number.)

Fax: (602) 771-2299

E-mail: dorn.zachary@azdeq.gov

6. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:

Summary.

The purpose of this rulemaking is to remedy a deficiency identified by the United States Environmental Protection Agency (EPA) in Arizona's Nonattainment New Source Review (NNSR) rules. The Arizona Department of Environmental Quality (ADEQ) must adopt rules defining a significant emission rate (SER) for ammonia, as a precursor to fine particulate matter ("PM_{2.5}"), under the NNSR program to comply with federal requirements. This rulemaking action is required to secure full approval of Arizona's NSR rules into the state implementation plan (SIP) and avoid sanctions under the federal Clean Air Act (CAA). Therefore, ADEQ amends the definition of "significant" in R18-2-101(131) to include an emission rate for ammonia in PM_{2.5} nonattainment areas within the State of Arizona.

On April 26, 2019, a Notice of Proposed Rulemaking (25 A.A.R. 993) was published in the Arizona Administrative Register proposing a significant emission rate for ammonia, as a precursor to PM_{2.5}, in PM_{2.5} nonattainment areas.

In response to its NPRM (25 A.A.R. 993), ADEQ received public comments. One of the public comments received was submitted by EPA regarding other New Source Review (NSR) rules in Title 18, Chapter 2, Articles 3 and 4.

On September 13, 2019, a Notice of Supplemental Proposed Rulemaking (NSPRM) (25 A.A.R. 2352) was published to address EPA's public comment to the NPRM. ADEQ did not receive any public comments in response to the NSPRM.

The section-by-section explanation of the amended rules in Section 6 and Section 10 of this preamble discuss these changes in greater detail.

Legal Background.

Under section 110(a)(1) of the CAA, each state is obligated to submit a “plan which provides for implementation, maintenance and enforcement of” the national ambient air quality standards (NAAQS). The CAA goes on to require that SIPs:

Include a program to provide for the . . . regulation of the modification and construction of any stationary source within the areas covered by the plan as necessary to assure that national ambient air quality standards are achieved, including a permit program as required in parts C and D of [Title I of the CAA].

42 U.S.C. § 7410(a)(2)(C). State and federal regulations adopted under this section are commonly referred to as “new source review” programs because they apply to newly constructed and modified, as opposed to existing, sources. The CAA divides NSR requirements into those that apply to attainment areas (Part C requirements) and those that apply to nonattainment areas (Part D requirements). This rulemaking focuses on Part D of Title I of the CAA.

Part D of Title I of the CAA establishes a NSR program for major sources and modifications in nonattainment areas. This program is known as “Nonattainment New Source Review” (NNSR). Under Subpart 1 of Part D, a major source is defined as any source that emits, or has the potential to emit, 100 tons per year or more of a pollutant for which the area has been designated nonattainment. Subpart 4 of Part D establishes specific requirements for NNSR in PM₁₀ and PM_{2.5} nonattainment areas.

Permit applicants subject to NNSR requirements under Part D must demonstrate that a major source or modification will comply with the lowest achievable emission rate (LAER) and that reductions in emissions from the same source or other sources will offset any emissions increases from the new or modified source.

CAA Sanctions.

Under the CAA and federal regulations, if EPA disapproves any element of a plan submitted under Title I, Part D of the CAA relating to nonattainment areas, and the plan deficiencies are not corrected within 18 months after the effective date of the disapproval, major sources subject to NNSR will have to offset emissions increases at a ratio of 2 to 1. 42 U.S.C. § 7509(a), (b)(2); 40 CFR § 52.31(d)(1). If the deficiencies remain uncorrected for an additional six months, the state loses most federal highway funds in the affected area. 42 USC § 7509(a), (b)(1); 40 CFR § 52.31(d)(1). If imposed, the sanctions will apply to nonattainment areas under ADEQ's jurisdiction and the pollutants covered by the plan and will remain in effect until EPA finds that a revised plan corrects the deficiencies. 40 CFR § 52.31(b)(3),(d)(2), (5).

Additionally, EPA is required to adopt a federal implementation plan (FIP) within twenty-four months following the disapproval of *any* SIP if the deficiencies are not corrected and approved. 42 U.S.C. § 7410(c). ADEQ therefore must correct *all* deficiencies identified in the 2016 limited disapproval and the 2018 conditional approval, described below, in order to avoid sanctions and a FIP.

Arizona's Previous NSR Rulemaking, SIP Revision, and EPA's Decisions.

Below is a timeline of events relevant to this rulemaking:

On June 6, 2012, ADEQ adopted comprehensive amendments to the state's air permit program designed, among other things, to bring the program into compliance with federal nonattainment new source review (NNSR) regulations. ADEQ submitted these amendments to EPA as a SIP revision on October 29, 2012 (the “2012 NSR SIP”).

On June 22, 2016, EPA published a limited disapproval of the 2012 NSR SIP for failure to regulate VOCs and ammonia as PM_{2.5} precursors in the West Central Pinal (WCP) and Nogales PM_{2.5} nonattainment areas. This limited disapproval established a deadline of January 22, 2018 (18 months after the disapproval) for ADEQ to cure the deficiency or face the imposition of offset sanctions in those nonattainment areas. If an additional six months passed after that deadline before ADEQ failed to cure the deficiency, highway sanctions would be imposed.

On February 2, 2017, ADEQ adopted amendments to its rules designed, among other things, to cure the deficiencies relating to PM_{2.5} precursors identified in EPA’s June 22, 2016 limited disapproval. On April 28, 2017, ADEQ submitted these amendments as a SIP revision (the “2017 NSR SIP”).

On June 6, 2017, EPA proposed limited approval and limited disapproval of the 2017 NSR SIP. The limited disapproval noted that the 2017 NSR SIP addressed all requirements for PM_{2.5} precursors, except for

establishing a significant level for ammonia. A significant level is the threshold for emissions increases at major sources that are subject to NNSR. EPA rules establish significant levels for all pollutants subject to NNSR, except ammonia. Under section 189(e) of the Clean Air Act and 40 CFR 51.165(a)(1)(x)(F), states containing PM_{2.5} nonattainment areas are obligated either to adopt a significant level for ammonia or to demonstrate that ammonia does not contribute to the failure to attain the PM_{2.5} NAAQS.

On December 6, 2017, ADEQ sent EPA a letter committing to correct the deficiency with regard to ammonia by March 31, 2019 by submitting either (1) a demonstration that ammonia does not contribute to nonattainment in the WCP and Nogales PM_{2.5} nonattainment areas or (2) a rule establishing a significant level for ammonia (the “December 2017 commitment”). Based on this commitment, EPA proposed conditional approval of the 2017 NSR SIP with regard to PM_{2.5} precursors on January 10, 2018. This proposal had the effect of deferring sanctions. EPA published a final conditional approval on May 4, 2018.

On March 29, 2019, ADEQ submitted a SIP revision to EPA, pursuant to 40 CFR § 51.165(a)(13), demonstrating that ammonia does not significantly contribute to PM_{2.5} nonattainment in Arizona. ADEQ’s March 29, 2019 SIP Revision: Demonstration of a Significant Emission Rate for Ammonia is available at: <http://azdeq.gov/node/5742>. Based on subsequent conversations between EPA and ADEQ staff, EPA staff believes the March 29, 2019 submission is not approvable. In order to assure that the requirements of Title I, Part D of the CAA are met and the terms of the 2018 conditional approval are satisfied, ADEQ amend its rules to include a SER for ammonia, as a PM_{2.5} precursor, in PM_{2.5} nonattainment areas.

Amendment is Necessary to Address NSR Deficiency

Pursuant to ADEQ’s December 2017 commitment and the EPA’s conditional approval (83 Fed. Reg. 19631 (May 4, 2018)), this rulemaking establishes a significant level for ammonia as a precursor of PM_{2.5} in PM_{2.5} nonattainment areas in Arizona.

As described above, the purpose of this rulemaking is to correct the single, remaining deficiency identified in the 2016 limited disapproval, and the 2018 conditional approval. This rulemaking will ensure Arizona’s NSR program conforms to federal requirements and qualifies for full approval by EPA. In order to address the remaining deficiency identified by the EPA regarding ammonia as a PM_{2.5} precursor, ADEQ committed to adopt rule revisions to satisfy the requirements of CAA § 189(e) and related NNSR regulations. Therefore, ADEQ amends the definition of significant, as it relates to PM_{2.5} nonattainment areas (R18-2-101(131)(e)), to add an emission rate of ammonia in the amount of 40 tons per year.

The SER of 40 tons per year of ammonia was selected by examining other, similarly situated PM_{2.5} nonattainment areas within EPA Region IX. Recently, EPA approved a California SIP revision that implemented a SER for ammonia for the South Coast Air Quality Management District. 83 FR 39012 (Aug. 8, 2018) (proposed rule); 83 FR 61551 (Nov. 30, 2018) (final rule). In order to meet its NNSR obligations under the CAA, the South Coast Air Quality Management District selected a SER of 40 tons per year of ammonia. Additionally, EPA proposed approval of the Imperial Valley Air Pollution Control District's SIP revision establishing a SER of 40 tons per year of ammonia. 84 FR 10573 (Mar. 22, 2019).

Additionally, this SER for ammonia is consistent with the SER of 40 tons per year that EPA has established for sulfur dioxide, oxides of nitrogen, and volatile organic compounds (VOCs) as precursors to PM_{2.5}. 73 FR 28321, 28333 (May 16, 2008); *see also* 40 CFR § 51.165(a)(1)(x)(A).

Subsections not amended listed as “No change”: ADEQ has made use of the option in the Secretary of State rule A.A.C. R1-1-502(B)(18)(f) to list some sections not amended as “No change” rather than showing sometimes long sections of text that are not being changed. Certain other subsections’ unchanged text are shown to provide context for nearby rule changes. “No change” does not mean comments on rule text listed as “No change” will not be considered. However, the exception to the rules moratorium granted by the Governor to ADEQ to do this rulemaking may limit what ADEQ can actually implement.

Section by Section explanation of rule changes:

- R18-2-101 Amend the definition of “significant” used in the major NSR programs and related permit rules to add significant emission rate for ammonia and to clarify language related to volatile organic compound significant emission rate.
- R18-2-301 Amend incorporation by reference of 40 CFR 51, Appendix W.
- R18-2-302.01 Amend language regarding affected areas to improve clarity and consistency and correct typographical error in citation to 40 CFR 51, Subpart I.
- R18-2-304 Amend internal cross references to improve clarity.
- R18-2-334 Amend incorporations by reference of 40 CFR 51, Appendix W; amend language regarding affected areas to improve clarity and consistency.
- R18-2-406 Amend incorporation by reference of 40 CFR 51, Appendix W.

7. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

Not applicable.

8. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:

Not applicable.

9. A summary of the economic, small business, and consumer impact:

The following discussion addresses each of the elements required for an Economic, Small Business, and Consumer Impact Statement (EIS) under A.R.S. § 41-1055.

An identification of the rulemaking.

The rulemaking addressed by this EIS is the adoption of amendments designed to bring ADEQ's new source review (NSR) rules into conformance with federal requirements. This rulemaking will remedy the remaining deficiency identified by EPA in its 2016 limited disapproval and 2018 conditional approval to bring Arizona's NSR program into conformity with federal requirements. All other deficiencies were remedied in previous rulemakings. The changes are described in greater detail in section 5 of this notice of final rulemaking.

This change is procedural or technical in nature and should have at most a trivial economic impact on the agency, businesses or consumers.

An identification of the persons who will be directly affected by, bear the cost of or directly benefit from the rule making.

In order for the ammonia SER in this rulemaking to have any regulatory impact, an existing source with the potential to emit 100 tons per year for ammonia located in one of the two PM_{2.5} nonattainment areas would have to undergo a physical or operational change that results in a net increase of at least 40 tons per year of ammonia emissions. There are currently no such sources located anywhere in the Nogales or West Central Pinal nonattainment areas, and it is extraordinarily improbable that any will be constructed in the future. Thus, this rulemaking is highly unlikely to impose any economic costs on the regulated community or to result in any environmental benefits. Additionally, if a new source of ammonia with a maximum capacity to emit, with elective limits, equal to or greater than 40 tons of ammonia per year seeks to be constructed or commence operation in a PM_{2.5} nonattainment, that source will be required to obtain a Class II Permit. A.A.C. R18-2-302(B)(2). Finally, if there is a physical or operational change at source, that would cause the source to emit or have the maximum capacity to emit with any elective limits equal to or greater than 40 tons of ammonia, it would be required to obtain a Class II permit. *Id.*

On the other hand, avoiding the potential federal highway funds sanctions will benefit the State and residents of Arizona.

A cost benefit analysis of the following:

(a) The probable costs and benefits to the implementing agency or other agencies directly affected by the implementation and enforcement of the rule making.

ADEQ's increased cost of implementing the NSR program resulting from the procedural and technical changes contained in this rule change will likely be minimal. This rulemaking consists of adjustments to existing programs to conform to EPA's conditional approval and federal and state requirements.

(b) The probable costs and benefits to a political subdivision of this state directly affected by the implementation and enforcement of the rule making.

The costs to political subdivisions subject to permitting under ADEQ's rules from these rule amendments should be minimal. In general, the types of sources operated by political subdivisions are very unlikely to be subject to major NSR, and as noted above it is highly unlikely that any source will be subject to NNSR as a result of this rulemaking. ADEQ considers any impacts to sources in counties with their own pollution control programs to be indirect.

(c) The probable costs and benefits to businesses directly affected by the rule making, including any anticipated effect on the revenues or payroll expenditures of employers who are subject to the rule making.

As discussed above, the amendment to R18-2-101 rules is necessary to comply with federal requirements for the program. If ADEQ fails to adopt this amendment, the same or similar standard would ultimately apply to sources in Arizona through the adoption of a federal implementation plan (FIP) or the application of 40 CFR Part 51, Appendix S. In addition, Title I, Part D of the CAA imposes a limited time for ADEQ to adopt the NSR amendments. Failure to meet the statutory timeframe will result in sanctions by the federal government, as described above.

The changes to R18-2-301, R18-2-302.01, R18-2-304, R18-2-334, and R18-2-406 are technical corrections for clarity and have no economic impact.

Thus, failure to adopt these amendments would not in the long run result in the avoidance of any costs of compliance for the reasons given above, but would result in a substantial negative impact on the state's economy.

A general description of the probable impact on private and public employment in businesses, agencies and political subdivisions of this state directly affected by the rulemaking.

ADEQ does not believe that any additional costs will be imposed on businesses as a result of the amended NSR requirements for the reasons described above. Accordingly, there should be no impact on private employment or on the employment of any political subdivision subject to NSR.

A statement of the probable impact of the rulemaking on small businesses.

(a) An identification of the small businesses subject to the rulemaking.

Under A.R.S. § 41-1001(21) “Small business” means a concern, including its affiliates, which is [1] independently owned and operated, which is [2] not dominant in its field and which [3] employs fewer than one hundred full-time employees or which had gross annual receipts of less than four million dollars in its last fiscal year.

As previously mentioned, there are no existing or proposed major sources of ammonia within ADEQ’s jurisdiction and therefore no small businesses would be subject to this rulemaking.

(b) The administrative and other costs required for compliance with the rule making.

Not Applicable.

(c) A description of the methods that the agency may use to reduce the impact on small businesses.

Not Applicable.

(d) The probable cost and benefit to private persons and consumers who are directly affected by the rule making.

Not Applicable.

A statement of the probable effect on state revenues.

Since any costs associated with the rulemaking will be recoverable through air quality permit fees, there will be no net effect on state revenues.

A description of any less intrusive or less costly alternative methods of achieving the purpose of the rule making.

ADEQ was not able to identify any less intrusive or costly alternative methods for achieving the purpose of the rulemaking—compliance with the federal NSR requirements for ammonia as PM_{2.5} precursor.

A description of any data on which a rule is based with a detailed explanation of how the data was

obtained and why the data is acceptable data. An agency advocating that any data is acceptable data has the burden of proving that the data is acceptable. For the purposes of this paragraph, "acceptable data" means empirical, replicable and testable data as evidenced in supporting documentation, statistics, reports, studies or research.

Data on which this final rulemaking is based on can be located by referring to the Federal Register notices referenced in part 5 of this Notice of Final Rulemaking (NFRM). Copies of the Federal Register are available at either <https://www.federalregister.gov/> or <https://www.govinfo.gov/app/collection/fr/>. A copy of ADEQ's SIP Revision: Demonstration of a Significant Emission Rate for Ammonia is available at: <http://azdeq.gov/node/6450>.

10. A description of any changes between the proposed rulemaking, to include supplemental notices, and the final rulemaking:

In response to the NPRM (25 A.A.R. 993), ADEQ received a public comment from EPA stating that other rules related to the NSR program require amendment. ADEQ agrees that these changes need to be made but believes that some of them are substantially different from the rule proposed in the NPRM. Therefore, the public is entitled to comment on them through a Notice of Supplement Proposed Rulemaking before they are adopted. A.R.S. § 41-1025.

EPA commented that incorporations by reference of 40 C.F.R. Part 51, Appendix W (Appendix W) in R18-2-301 and R18-2-406, as of July 1, 2015, were out of date. On June 30, 2017, EPA substantially amended Appendix W. R18-2-406 is part of ADEQ's prevention of significant deterioration (PSD) program. PSD is a required element of an infrastructure SIP (I-SIP) and these out of date references could interfere with future I-SIP approvals. CAA § 110(a)(2). Therefore, to ensure consistency and prevent I-SIP approval issues, ADEQ is amending all references to Appendix W, except for the reference in A.A.C. Title 18, Chapter 2, Appendix 2, which is already up to date.

Additionally, EPA's comment pointed out inconsistent language between A.A.C. R18-2-334(C)(2) and R18-2-302.01(C)(1) related to ambient air quality assessments. In order to improve clarity, ADEQ amended the language to make these two rules consistent.

EPA's comment identified several internal cross-references in A.A.C. R18-2-304(F) and (J), and R18-2-334(G) that contained minor typographical errors. ADEQ is making these corrections to improve the clarity of its NSR rules. ADEQ does not believe that these changes are substantial.

ADEQ received comments from other stakeholders. ADEQ will respond to these comments in the Notice of Final Rulemaking.

Finally, ADEQ's amended language for the definition of significant that differs from the NPRM's proposed language. A.R.S. § 41-1025. The NPRM's proposed language would have affected Class II permitting requirements. Such an affect would have been beyond NNSR's requirements for ammonia, as a precursor to PM_{2.5}, in PM_{2.5} nonattainment areas. A.R.S. § 49-104(A)(16). Therefore, the amended language assures the SER for ammonia only applies to NNSR. Second, ADEQ is amending the definition of significant for VOCs to make the language consistent with other subsections.

11. An agency's summary of the public or stakeholder comments made about the rulemaking and the agency response to the comments:

Comment 1 (EPA): In response to the NPRM, ADEQ received a public comment from EPA that generally expressed support for the proposed significant emission rate of 40 tons per year of ammonia, as a PM_{2.5} precursor, in PM_{2.5} nonattainment areas.

ADEQ's Response to Comment 1: ADEQ appreciates the EPA's comment in support of the proposed significant emission rate of 40 tons per year of ammonia, as a PM_{2.5} precursor, in PM_{2.5} nonattainment areas.

Comment 2 (EPA): EPA commented regarding potential typographical errors in following rules: A.A.C. R18-2-304(F)(1, 6, and 8), R18-2-304(J)(2), and R18-2-304(B).

ADEQ's Response to Comment 2: ADEQ amended the typographical errors in the R18-2-304(F)(1, 6, and 8), R18-2-304(J)(2), and R18-2-304(B).

Comment 3 (EPA): EPA commented regarding a typographical error in A.A.C. R18-2-334(G).

ADEQ's Response to Comment 3: ADEQ corrected the typographical error in A.A.C. R18-2-334(G).

Comment 3 (EPA): EPA commented regarding various references to 40 CFR Part 51, Appendix W (Appendix W) in ADEQ's rules in A.A.C. R18-2-301(21), R18-2-334(H), R18-2-406(A)(6), and Appendix 2 to Title 18, Chapter 2. EPA commented that these references to Appendix W do not consistently refer to the same incorporation by reference date.

ADEQ's Response to Comment 3: ADEQ updated the incorporations by reference to 40 CFR Part 51, Appendix W (Appendix W) in ADEQ's rules in A.A.C. R18-2-301(21), R18-2-334(H), R18-2-406(A)(6).

Comment 4 (EPA): EPA commented regarding inconsistent language related to ambient air quality assessment between R18-2-334(C)(2) which refers to "Arizona or any affected state" and R18-2-302.01(C)(1) which refers to "Arizona or any affected state or Indian reservation." EPA suggested that the reference to "or Indian reservation" appears to have been inadvertently not added to R18-2-334(C)(2).

ADEQ's Response to Comment 4: ADEQ has made the suggestion EPA suggested.

Comment 5 (Jane Magee): In response to the NPRM, ADEQ received one public comment that expressed support for the proposed rule.

ADEQ's Response to Comment 5: ADEQ appreciates this commenter's support for this rulemaking.

Comment 6 (Daniel Blackson): In response to the NPRM, ADEQ received a public comment that supported the proposed rule change. Additionally, the comment expressed a desire the ADEQ re-evaluate Section 8 of its preamble in the Notice of Proposed Rulemaking (NPRM). The commenter expressed their desire that ADEQ regulate air pollution emissions from animal feeding operations. The commenter specifically discussed the Hickman's Family Farms property located 12710 N. Murphy Road, Maricopa County, Pinal County, Arizona.

ADEQ's Response to Comment 6: ADEQ appreciates this commenter's support for its proposed rule. Regarding the commenter's interpretation of the Clean Air Act's requirement, ADEQ agrees that there can be circumstances where agricultural feeding operations can be subject to the Title V of the Clean Air Act, as a major stationary source. However, as stated in Section 8 of the NPRM's preamble, ADEQ is not aware of any major sources of ammonia located in either the Nogales or WCP PM_{2.5} nonattainment areas. The boundaries of the PM_{2.5} nonattainment areas are defined at 40 C.F.R. § 81.303.

Regarding this commenter's point about a specific stationary source, specific permitting decisions are beyond the scope of this rulemaking. Additionally, this comment focused on ammonia emissions from the Hickman's Family Farm's property located at 12710 N. Murphy Road, Maricopa County, Pinal County, Arizona. This facility is located on the Ak-Chin Indian Community of the Maricopa Indian Reservation, a federally recognized tribe, and is therefore outside of ADEQ's jurisdiction. Further, this particular agricultural property is not located within either the Nogales or the WCP PM_{2.5} nonattainment area. *See* 40 C.F.R. § 81.303.

Comment 7 (Arizona Electric Power Cooperative): In response to the NPRM, AEPCO commented that it believed ADEQ did not consider whether the regulated community would be significantly impacted if PM_{2.5} NAAQS is changed. AEPCO's comment focused on EPA's current review and collaboration with the Clean Air Scientific Advisory Committee (CASAC) regarding the current particulate matter NAAQS. AEPCO's comment expressed concern that about the possibility of redesignation of different parts of the Arizona if a new PM_{2.5} NAAQS is adopted by EPA and CASAC. AEPCO's comment expressed concern because the Apache Generating Station utilizes a technology to reduce oxides of nitrogen (NO_x) that can emit ammonia into the ambient air, if parts of Cochise County become designated as nonattainment, it could become subject to this requirement. In support of this concern, AEPCO pointed to a presentation by Anna Marie Wood, former Director for the Air Quality Policy Division at the EPA's Office of Air Quality Planning and Standards.

ADEQ's Response to Comment 7: ADEQ understands AEPCO's concern that a revised NAAQS could affect the regulated community and the anticipated costs of this rulemaking. However, ADEQ believes three factors weigh against AEPCO's concern.

First, while CASAC is reviewing the PM_{2.5} NAAQS at this time, ADEQ believes it is unlikely that the CASAC will update this standard upon completion of its review. In December 2018 and March 2019,

CASAC reviewed the EPA's October 2018 Draft Integrated Science Assessment for Particulate Matter (Draft ISA). CASAC's overall finding was that "the Draft ISA does not provide a sufficiently, comprehensive, systematic assessment of the available science relevant to understanding the health impacts of exposure to particulate matter." CASAC Letter to EPA Administrator Andrew Wheeler (April 11, 2019), available at [https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebReportsLastMonthCASAC/6CFCBBC3025E13B4852583D90047B352/\\$File/EPA-CASAC-19-002+.pdf](https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebReportsLastMonthCASAC/6CFCBBC3025E13B4852583D90047B352/$File/EPA-CASAC-19-002+.pdf) (last accessed June 10, 2019). CASAC went on to recommend that a second draft of the ISA be prepared for CASAC review to address the limitations that CASAC identified in the first draft. *Id.* Based on the current status of CASAC's review, ADEQ believes that it is highly unlikely that CASAC and EPA will revise the current PM_{2.5} NAAQS at this time.

Additionally, Director Woods' presentation cited by AEPCO provides a timeline for the NAAQS review process. However, there is no information in the presentation to indicate that EPA is likely to alter this NAAQS. This presentation merely provided stakeholders a timeline for the statutorily required CASAC review process. *See generally* CAA § 109 (42 U.S.C. § 7409).

Second, Cochise County (where the Apache Generating Station is located) is currently designated as unclassifiable/attainment for the PM_{2.5} NAAQS. *See* 40 C.F.R. § 81.303. ADEQ believes that is unlikely that Cochise County will redesignated as a PM_{2.5} nonattainment area as ambient air concentrations of PM_{2.5} are approximately 43% of the current NAAQS. ADEQ's 2017 Annual Ambient Air Assessment Report details PM_{2.5} ambient air concentrations in greater detail. Available at http://static.azdeq.gov/aqd/air_report2017.pdf. ADEQ's report and current monitoring data support ADEQ's position that, based on current and historic PM_{2.5} levels, it is highly unlikely that any portions of Cochise County will be redesignated as nonattainment if the PM_{2.5} NAAQS is lowered. Therefore, AEPCO's concerns are speculative and ADEQ is unable to quantify AEPCO's conjecture about cost. ADEQ is mindful of AEPCO's concerns, but is limited to analyzing the probable impacts of its rulemaking.

Third, ADEQ disagrees with AEPCO's assertion that it views this rulemaking as merely procedural and failed to consider the costs. A.R.S. § 41-1055 requires ADEQ's EIS to be limited to the *probable* costs and benefits of any particular rulemaking. AEPCO's comment regarding the potential costs is too speculative for ADEQ to predict at this time. AEPCO is requesting ADEQ speculate on unpredictable variables, including: 1) whether CASAC will set a new PM_{2.5} NAAQS; 2) what standard CASAC might establish; 3) what portions of Arizona might be redesignated under this hypothetical NAAQS revision; and 4) whether the Apache Generating Station will engage in a major modification that would increase its ammonia emissions by an additional 40 tons per year. These concerns are too speculative for ADEQ to predict and are outside of the scope of the analysis required by A.R.S. § 41-1055. As required by A.R.S. § 41-1056, ADEQ will periodically reassess the economic impact of this rule. A.R.S. § 41-1056(a)(6) requires that ADEQ review its rules every five years, including a comparison of the estimated economic, small business, and consumer impact of these rules compared to the EIS in this rulemaking.

Comment 8 (AEPSCO): AEPSCO's second comment analyzed the history of how the EPA established the 40 tpy SER for SO₂, NO_x, and VOCs in 1980. AEPSCO's comment takes the position that these SERs established with very conservative modeling approaches and is therefore too low. AEPSCO suggested that if this analysis was conducted today using AERMOD, EPA would reach a different result.

ADEQ Response to Comment 8 (AEPSCO): ADEQ appreciates AEPSCO's comment regarding the EPA's 1980 analysis for various criteria pollutants. However, reassessing the EPA's analysis is beyond the scope of this rulemaking. Unlike ADEQ, EPA has the legal authority to address this commenter's concerns about its historical modeling. While EPA's approach to this modeling was conservative, it does not conflict with the CAA's requirements. Additionally, reassessing EPA's modeling from 1980 is beyond the scope of this rulemaking.

Comment 9 (AEPSCO): AEPSCO commented that technical support for California's selection of the NNSR ammonia SER of 40 tpy was not provided beyond a simple adoption of the other pollutants' SER. This comment discussed the San Joaquin Valley Air Pollution Control District's approach (SJVAPCD) that reducing NO_x emissions is the most effective way to reduce PM_{2.5} and that ammonia plays an inconsequential role in particulate formation in the San Joaquin Valley. Additionally, AEPSCO commented that in 2018, the California Air Resources Board (CARB) drafted a report that concluded that PM_{2.5} levels in the San Joaquin Valley are not sensitive to ammonia reductions.

ADEQ Response to Comment 9 (AEPSCO): ADEQ agrees that the South Coast Air Quality Management District's (SCAQMD) ammonia SER was selected by adopting the SER for other pollutants. ADEQ agrees the Imperial Valley Air Pollution Control District's (IVAPCD) ammonia SER and EPA's proposed approval utilize this same conservative approach. ADEQ agrees that this approach is a conservative one. However, this approach is consistent with the CAA and satisfies EPA's requirements.

In order to have fully approved NSR SIP revision, Arizona's plan must meet the requirements of CAA § 189(e) and 40 C.F.R. Part 51. Under 40 C.F.R. §§ 51.165(a)(13) and 51.1006, a state may choose to pursue a precursor demonstration by conducting a concentration-based contribution analysis. 40 C.F.R. § 51.1006(a)(i). If the concentration-based contribution analysis does not demonstrate a finding of insignificant contribution, the state may submit a sensitivity-based contribution analysis. 40 C.F.R. § 51.1006(a)(ii). However, this precursor demonstration is optional and within the discretion of the State to elect to undertake. 40 C.F.R. § 51.1006(a) ("A state **may elect** to submit to the EPA one or more precursor demonstrations for a specific nonattainment areas.") (emphasis added). This permissive option does not require ADEQ to conduct this precursor demonstration.

On March 29, 2019, ADEQ submitted a precursor demonstration, pursuant to 40 CFR § 51.165(a)(13), demonstrating that ammonia does not significantly contribute to PM_{2.5} nonattainment in Arizona. This demonstration cited the study by Watson, J., Chow , J. Lurmann F., Musarra S., 1994, "Ammonium Nitrate,

Nitric Acid and Ammonia Equilibrium in Wintertime Phoenix Arizona,” in support of its position that there is excess ammonia in Arizona.

In addition to the study cited by the commenter, ADEQ’s analysis also showed: 1) from 2010 to 2014, emissions in the Nogales NAA of NO_x and SO_x decreased by 319.8 tons and 31.2 tons respectively while ammonia emissions increased slightly by 3.9 tons; showing the area was shifting even further toward being SO_x/NO_x limited; 2) Interagency Monitoring of Protected Visual Environments (IMPROVE) monitoring data from the Nogales Post office shows that sulfates and nitrates are a small contributor (12%) to PM_{2.5} concentrations in the Nogales area; 3) a 2010 ADEQ study (based on the 2003 – 2005 data) in the WCP NAA shows that secondary particulate formation is a minor contributor (7%) to fine particulate matter concentrations; 4) a 2013 ADEQ study (based on 2009 – 2010 data) showing that ammonia species account for less than 10% of total PM_{2.5} concentration; and 5) a review of data collected by Clean Air Status and Trends Network (CASTNET) and the National Atmospheric Deposition Program (NADP) ammonia monitoring network (AMoN) in the western United States showed the monitors recorded excess ammonia in the atmosphere when compared to concentrations of NO_x and SO_x.

ADEQ took the position regulation of ammonia in Arizona’s PM_{2.5} nonattainment areas is not necessary. Based on subsequent conversations between EPA and ADEQ staff, EPA staff believes that this submission is needs to be supplemented with an ammonia SER in order to be approvable. ADEQ disagrees with EPA staff’s assessment. However, in order to assure that the requirements of Title I, Part D of the CAA are met and the terms of the 2018 conditional approval are satisfied, ADEQ adopts and submits a SER for ammonia, as a PM_{2.5} precursor in PM_{2.5} nonattainment areas, at a rate of 40 tpy.

If a State elects not to undertake the optional precursor demonstration or if a State’s demonstration is not approved, the State must comply with 40 C.F.R. § 51.165(x)(F). Specifically the regulation states, in relevant part that “the plan shall also define ‘significant for Ammonia for that area, subject to approval by the Administrator.’” 40 C.F.R. § 51.165(x)(F). The SCAQMD and ICAQMD SIP revisions do not provide technical demonstrations, instead relying on EPA’s established SERs for other precursors. 40 C.F.R. 51.165(x)(F). For SCAQMD, the EPA Administrator determined that the 40 tpy SER for ammonia satisfied the requirements of CAA § 189(e). For IVAPCD, this approach is also likely approvable. While this may represent a conservative approach, meets CAA requirements and is very likely approvable by the EPA Administrator under CAA § 110. As the 40 tpy SER for ammonia has met the Administrator’s approval, ADEQ will adopt that 40 tpy SER for ammonia to obtain full approval of its NSR SIP revision.

Arizona’s demonstration is similar to the San Joaquin Valley Air Pollution Control District (SJVAPCD)’s demonstration, in that both take the position that ammonia does not significantly contribute to particulate formation in the relevant PM_{2.5} nonattainment areas. It is important to note that EPA has not acted on the SJVAPCD’s precursor demonstration. While ADEQ expresses no opinion regarding the potential approvability of SJVAPCD’s plan, ADEQ notes that EPA has not proposed approval of this plan either.

Comment 10 (AEPCO): AEPCO commented that a 70 tpy SER for ammonia has been demonstrated by Utah for nonattainment areas (NAAs) and is more applicable than 40 tpy, though still likely conservative, for Arizona. This comment analyzed the Utah Department of Environmental Quality's modeling in support of their proposed ammonia SER of 70 tpy. AEPCO stated, "Being in a warmer climate than Utah, if Arizona were to perform its own NNSR demonstration, it would likely result in a higher ammonia SER because, as noted by Watson et al., ammonium nitrate dominates over ammonium sulfate in Arizona and less particulate matter is formed at higher temperatures for the same precursor emissions."

ADEQ Response to Comment 10: As discussed above in ADEQ's response to Comment 9, on March 29, 2019, ADEQ submitted a precursor demonstration, pursuant to 40 CFR § 51.165(a)(13), demonstrating that ammonia does not significantly contribute to PM_{2.5} nonattainment in Arizona. Given EPA's position regarding the approvability of that demonstration, ADEQ has chosen to adopt and submit an ammonia SER as a PM_{2.5} precursor in PM_{2.5} nonattainment areas. A 40 tpy ammonia SER will assure that the requirements of Title I, Part D of the CAA are met and the terms of the 2018 conditional approval are satisfied.

ADEQ declines to conduct a second demonstration to attempt establishing a higher SER for ammonia. While a 70 tpy SER for ammonia might be as effective as the proposed 40 tpy SER in controlling PM_{2.5} pollution, EPA will likely only approve such a SER if ADEQ submits modeling in support of this SER. *See* 40 C.F.R. § 51.1006. As discussed above, this precursor demonstration is optional. Given the EPA's position on the March 29, 2019 precursor demonstration, ADEQ's December 2017 commitment letter, and the imminent risk of sanctions ADEQ utilizes its discretion to not submit a second precursor demonstration.

Finally, EPA, which ultimately must approve this rule into Arizona's SIP, has provided its support for the 40 tpy SER (*See* Comment 1, *supra*). Therefore, ADEQ will adopt the proposed rule language for the 40 tpy SER for ammonia, as a PM_{2.5} precursor in PM_{2.5} nonattainment areas.

12. All agencies shall list other matters prescribed by statute applicable to the specific agency or to any specific rule or class of rules. Additionally, an agency subject to Council review under A.R.S. §§ 41-1052 and 41-1055 shall respond to the following questions:

There are no matters prescribed by statute applicable specifically to ADEQ or this specific rulemaking.

a. Whether the rule requires a permit, whether a general permit is used and if not, the reasons why a general permit is not used:

These rules do not require any permits as it is to comply with CAA NSR regulations for any applicable new construction or major modification of a stationary source that falls under ADEQ's jurisdiction.

Federal law does allow for the enforcement of major NSR requirements through the issuance of permits,

because major NSR requires case-by-case, facility specific determinations.

- b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law and if so, citation to the statutory authority to exceed the requirements of federal law:**

These rules help Arizona comply with the federal Clean Air Act, Title I, Parts C and D. These rules are no more stringent than required by federal law.

- c. Whether a person submitted an analysis to the agency that compares the rule's impact of the competitiveness of business in this state to the impact on business in other states:**

No person(s) submitted an analysis to ADEQ.

13. A list of any incorporated by reference material as specified in A.R.S. § 41-1028 and its location in the rules:

Incorporation	Locations in Rule
40 CFR 51, Appendix W The Code of Federal Regulations is published by the United States Government Printing Office, 732 North Capitol Street, NW, Washington, DC 20401-0001, is on file with the Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007, and is available at the Arizona State Library, Archives & Public Records, 1700 West Washington Street, Phoenix, Arizona 85007 and at other Federal depository libraries in the state (see http://catalog.gpo.gov/fdlpdir/FDLPdir.jsp?st_12=AZ&flag=searchp). It is also available online at http://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR .	R18-2-301(21), R18-2-334(H), and R18-2-406(A)(6)

14. Whether the rule was previously made, amended or repealed as an emergency rule. If so, cite the notice published in the *Register* as specified in R1-1-409(A). Also, the agency shall state where the text was changed between the emergency and final rulemaking packages:

Not applicable.

15. The full text of the rules follows:

131. “Significant” means, in reference to a significant emissions increase, a net emissions increase, a stationary source’s potential to emit or a stationary source’s maximum capacity to emit with any elective limits as defined in R18-2-301(13):
- a. A rate of emissions of conventional pollutants that would equal or exceed any of the following:
- | Pollutant | Emissions Rate |
|------------------|-------------------------|
| Carbon monoxide | 100 tons per year (tpy) |
| Nitrogen oxides | 40 tpy |
| Sulfur dioxide | 40 tpy |

PM ₁₀	15 tpy
PM _{2.5}	10 tpy of direct PM _{2.5} emissions; 40 tpy of sulfur dioxide emissions; 40 tpy of nitrogen oxide emissions.
Ozone	40 tpy of VOC or nitrogen oxides
Lead	0.6 tpy

- b. For purposes of determining the applicability of R18-2-302(B)(2) or R18-2-406, in addition to the rates specified in subsection (131)(a), a rate of emissions of non-conventional pollutants that would equal or exceed any of the following:

Pollutant	Emissions Rate
Particulate matter	25 tpy
Fluorides	3 tpy
Sulfuric acid mist	7 tpy
Hydrogen sulfide (H ₂ S)	10 tpy
Total reduced sulfur (including H ₂ S)	10 tpy
Reduced sulfur compounds (including H ₂ S)	10 tpy
Municipal waste combustor organics (measured as total tetra-through octa-chlorinated dibenzo-p-	3.5 x 10 ⁻⁶ tpy

dioxins and
dibenzofurans)

Municipal waste 15 tpy

combustor

metals (measured as
particulate matter)

Municipal waste 40 tpy

combustor acid gases
(measured as sulfur
dioxide and hydrogen
chloride)

Municipal solid waste 50 tpy

landfill emissions

(measured as
nonmethane organic
compounds)

Any regulated NSR Any emission
pollutant not rate
specifically listed in
this subsection (or)
subsection (131)(a),
except for ammonia.

- c. In ozone nonattainment areas classified as serious or severe, the emission rate for nitrogen oxides or VOC determined under R18-2-405.
- d. In a carbon monoxide nonattainment area classified as serious, a rate of emissions that would equal or exceed 50 tons per year, if the Administrator has determined that stationary sources contribute significantly to carbon monoxide levels in that area.
- e. In PM_{2.5} nonattainment areas, an emission rate that would equal or exceed 40 tons per year of VOC as a precursor of PM_{2.5}.
- f. In PM_{2.5} nonattainment areas, for purposes of determining the applicability of R18-2-403 or R18-2-404, an emission rate that would equal or exceed 40 tons per year of ammonia, as a precursor to

PM_{2.5}. This subsection shall take effect on the effective date of the Administrator's action approving it as part of the state implementation plan.

- gf. Notwithstanding the emission rates listed in subsection (131)(a) or (b), for purposes of determining the applicability of R18-2-406, any emissions rate or any net emissions increase associated with a major source or major modification, which would be constructed within 10 kilometers of a Class I area and have an impact on the ambient air quality of such area equal to or greater than 1 µg/m³ (24-hour average).

- C.** Review for National Ambient Air Quality Standards Compliance; Requirement to Obtain a Permit.

1. The Director shall review each application for registration of a source with the maximum capacity to emit with any elective limits any regulated minor NSR pollutant in an amount equal to or greater than the permitting exemption threshold. The purpose of the review shall be to determine whether the new or modified source may interfere with attainment or maintenance of a national ambient air quality standard ~~in any area-Arizona or affected state or Indian reservation~~. In making the determination required by this subsection, the Director shall take into account the following factors

Zachary Dorn <dorn.zachary@azdeq.gov>

EPA Region 9 Comments on Proposed Rulemaking for the Addition of a Significant Emission Rate for Ammonia

1 message

BECKHAM, LISA <BECKHAM.LISA@epa.gov>

Fri, May 24, 2019 at 4:06 PM

To: Zachary Dorn <dorn.zachary@azdeq.gov>

Cc: "Rios, Gerardo" <Rios.Gerardo@epa.gov>, "Kurpius, Meredith" <Kurpius.Meredith@epa.gov>

Mr. Dorn,

The U.S. Environmental Protection Agency, Region 9 (EPA) provides the attached comments on the Arizona Department of Environmental Quality's (ADEQ) April 26, 2019 Notice of Proposed Rulemaking, which would revise ADEQ's regulations implementing the Clean Air Act's New Source Review (NSR) program to add a significant emission rate (SER) for ammonia, as a precursor in the formation of fine particulate matter (PM_{2.5}), in PM_{2.5} nonattainment areas. The EPA is generally supportive of the 40 ton per year SER for ammonia proposed by ADEQ. We note, however, that in reviewing ADEQ's NSR rules, we discovered what appear to be a few minor errors with the rules that we would like to bring to your attention. This rulemaking action may present an opportunity for ADEQ to address these issues.

Please feel free to contact me if you have any questions. Have a great long weekend!

Thanks,

Lisa Beckham

Environmental Engineer

EPA Comments on ADEQ NPRM Ammonia SER 2019-05-24.pdf

97K

EPA Region 9 Comments on Proposed Rulemaking for the Addition of a Significant Emission Rate for Ammonia – Minor Errors in ADEQ’s NSR Rules

1. Apparently inadvertent typographical errors resulting from revisions to R18-2-304.
 - a. Reference in R18-2-304(F)(1) to subsection (H) should instead be a reference to subsection (I)
 - b. Reference in R18-2-304(F)(6) to subsection (J) should instead be a reference to subsection (K)
 - c. Reference in R18-2-304(F)(8) to subsection (E)(2) or (3) should instead be a reference to subsection (F)(2) or (3)
 - d. Reference in R18-2-304(J)(2)(a) to subsection (E) should be a reference to subsection (F)
 - e. R18-2-304(B) is likely missing a reference to Class II permits, as the general context of paragraphs (A), (C), and (F) implies it is meant for both Class I and Class II permits.
2. Apparently inadvertent typographical error in R18-2-334(G); should refer to 40 CFR 51 Subpart I.
3. Apparently inadvertent reference to an older version of 40 CFR part 51, Appendix W in R18-2-406(A)(6) (“as of July 1, 2015 (and no future amendments)”). In other instances, ADEQ’s permitting rules simply reference “40 CFR 51, Appendix W” without a reference to a particular version of Appendix W. See R18-2-334(H) and R18-2-301(21). It is our understanding that it is ADEQ’s intent to rely on the version of Appendix W incorporated by reference in Appendix 2 to Title 18, Chapter 2 of the Arizona Administrative Code, which incorporates by reference 40 CFR 51, Appendix W as of June 30, 2017. Thus, it appears the reference in R18-2-406(A)(6) to an older version of Appendix W was left in the rule inadvertently.

ADEQ’s current version of Appendix 2 includes the recently revised version of Appendix W that became effective on May 22, 2017. See 81 FR 5182 (Jan. 17, 2017), 82 FR 14324 (Mar. 20, 2017). We recommend that ADEQ submit the updated Appendix 2 for inclusion in Arizona’s State Implementation Plan (SIP), as the version that is currently approved into the SIP references an older version of 40 CFR part 51, Appendix W.

4. Language related to ambient air quality assessments in R18-2-334(C)(2) and R18-2-302.01(C)(1). R18-2-334(C)(2) refers to “in Arizona or any affected state” in evaluating whether a project will interfere with attainment or maintenance of a national ambient air quality standard (NAAQS), while in the same context R18-2-302.01(C)(1) refers to “in Arizona or any affected state or Indian reservation.” The reference to “or Indian reservation” appears to have been inadvertently not added to R18-2-334(C)(2).

I support this proposed rule, see below copied from ADEQ website.
Jane Magee, resident of Tonopah, Arizona

ADEQ's Air Quality Division welcomes comments on the notice of proposed rulemaking for the addition of a significant emission rate for ammonia, as a precursor in the formation of secondary fine particulate matter (PM_{2.5}), in PM_{2.5} nonattainment areas. The rule amendment will be submitted to the EPA as a revision to the Arizona State Implementation Plan (SIP), pursuant to Clean Air Act § 110 (42 USC § 7410).

Mr. Dorn,

Please accept my comments on the proposed rule making for the addition of significant emission rate for ammonia. I originally submitted it this morning and in checking my email, found that it was undelivered because of an error in your email address. I've forward the email as a demonstration of my effort and hope that you will accept it as a timely comment.

Please see attached document with my comments at the bottom of the email.

Thank-you,

Dan Blackson

May 28, 2019

I support the proposed change to Arizona Administrative Code, Title 18, Chapter 2 to update the New Source Review rule to include specific significant emissions rate for major stationary sources of ammonia (NH_3) as a precursor to $\text{PM}_{2.5}$.

Section 8 of the Preamble states:

In order for the ammonia SER proposed in this rulemaking to have any regulatory impact, an existing source with the potential to emit 100 tons per year for ammonia located in one of the two PM2.5 nonattainment areas would have to undergo a physical or operational change that results in a net increase of at least 40 tons per year of ammonia emissions. There are currently no such sources located anywhere in the Nogales or West Central Pinal nonattainment areas, and it is extraordinarily improbable that any will be constructed in the future.

In order to actually do something to change non-attainment areas to attainment areas, ADEQ must re-evaluate this statement and permitting action. Animal Feeding Operations have the potential to emit and can exceed emission of 100 tons/year of particulate matter, volatile organic compounds and/or ammonia. For example, according to Continuous Release Reporting Forms filed by Hickman's with the EPA on March 30, 2017, the Maricopa egg factory (12710 N. Murphy Road, Maricopa, Pinal County) emits 896 pounds of ammonia/day or 163.5 tons/year.

The Clean Air Act does not have an exemption for animal feeding operations (AFOs), nor do EPA regulations. In fact, the EPA stated (Federal Register/Vol.67, No. 199/Tuesday, October 15, 2002; in response to question #18):

"EPA agrees that dairy, poultry, and swine CAFOs are all sources of criteria pollutant emissions. The NAS' Interim Report on air emissions from animal feeding operations (AFOs) notes that, "substantial emission of nitrogen, sulfur, carbon, particulate matter, and other substances from AFOs do occur." However, as we stated above, emissions from large animal feeding operations (e.g., dairies, poultry operations, swine facilities) are not as well characterized as are those from diesel agricultural engines. While EPA expects that the state of CAFO emission data will improve in the future, the implementation of the title V permitting program for state-exempt major stationary agricultural sources must move ahead based on the best data available at this time."

The EPA encourages States and local agencies to move forward (Federal Register/Vol.70, No. 19/Monday, January 31, 2005, p. 4961):

"EPA recognizes that State and local agencies are undertaking efforts to improve emissions estimation methodologies for AFOs. EPA supports continued action to improve emissions information for all source categories and will use the best information available as we implement our programs. EPA also supports State and local efforts to demonstrate improved emissions reduction strategies and recognizes the value of State or local control requirements tailored to the needs of specific geographic areas. For these reasons, nothing in the Air Compliance Agreement will be used to delay or otherwise interfere with the implementation and enforcement of existing State statutes that eliminate exemptions to CAA requirements for agricultural sources of air pollution."

AFOs meet the Arizona definition of "source" (R18-2-101.134) and "stationary source" R18-2-101.140) and can be a "major source" (R18-2-101.750 of "regulated air pollutants" (R18-2-101.122). AFOs emit nitrous oxides, volatile organic compounds, hydrogen sulfide, particulate matter, and ammonia.

ADEQ must be bold in protecting human health and regulating sources so non-attainment areas become attainment areas. AFO air pollution must not continue to be considered "background" pollution or pollution from insignificant sources. AFO pollution is real, harmful to human health, and is a significant contributor to non-attainment areas.

AIR QUALITY DIVISION

Public Comment Period and Hearing

ADEQ welcomes comments on the notice of proposed rulemaking for the addition of a significant emission rate for ammonia, as a precursor in the formation of secondary fine particulate matter (PM_{2.5}), in PM_{2.5} nonattainment areas. The rule amendment will be submitted to the EPA as a revision to the Arizona State Implementation Plan (SIP), pursuant to Clean Air Act § 110 (42 USC §§ 7410).

[View Public Notice/Related Documents >](#)

ADEQ encourages and values your input and participation in our SIP process.

About ADEQ

Under the Environmental Quality Act of 1986, the Arizona State Legislature established the Arizona Department of Environmental Quality in 1987 as the state agency for protecting and enhancing public health and the environment of Arizona. For more information, visit azdeq.gov.

ADEQ will take reasonable measures to provide access to department services to individuals with limited ability to speak, write or understand English and/or to those with disabilities. Requests for language interpretation, ASL interpretation, CART captioning services or disability accommodations must be made at least 48 hours in advance by contacting Ian Bingham, Title VI Nondiscrimination Coordinator at 602-771-4322 or Bingham.Ian@azdeq.gov. Teleprinter services are available by calling 7-1-1 at least 48 hours in advance to make necessary arrangements.

ADEQ tomará las medidas razonables para proveer acceso a los servicios del departamento a personas con capacidad limitada para hablar, escribir o entender inglés y / o para personas con discapacidades. Las solicitudes de servicios de interpretación de idiomas, interpretación ASL, subtítulos de CART, o adaptaciones por discapacidad deben realizarse con al menos 48 horas de anticipación contactando a Ian Bingham, Coordinador de Anti-Discriminación del Título VI al 602-771-4322 o Bingham.Ian@azdeq.gov. Los servicios de teleimpresores están disponibles llamando al 7-1-1 con al menos 48 horas de anticipación para hacer los arreglos necesarios.

VIA US MAIL AND EMAIL

**RE: REQUEST TO EXTEND COMMENT DEADLINE TO JUNE 7, 2019
PROPOSAL TO ADOPT NEW AMMONIA SIGNIFICANCE LEVEL, 25 A.A.R. 993
(APR. 26, 2019)**

Dear Mr. Dorn:

Arizona Electric Power Cooperative, Inc. (AEPCO) owns and operates the Apache Generating Station located in Cochise County. The Apache Generating Station uses certain air pollution control technologies that may generate inadvertent ammonia (known as “ammonia slip”). AEPCO therefore is interested in this rule in the event that Cochise County or a part thereof should ever be designated nonattainment for particulate matter < 2.5 microns (PM_{2.5}).

AEPCO has contracted with AECOM to complete a literature review of recent technical and scientific work on the ammonia/PM_{2.5} interaction. AEPCO believes that AECOM’s results will likely prove useful to ADEQ in setting the final significant emission rate for ammonia as a precursor to PM_{2.5}. Due to the time required for this review, AEPCO does not believe that the AECOM report will be ready by May 28, 2019. Accordingly, AEPCO requests that ADEQ extend the public comment period by ten days, until Friday, June 7, 2019, to allow AECOM to complete its literature review and AEPCO to submit its comments on the proposed significant emission rate based upon that literature review.

AEPCO appreciates ADEQ’s consideration of this request so that the best analysis can be presented in support of the rule. Please let AEPCO know as soon as possible whether this request can be granted so we can plan appropriately. I can be reached at 520-237-1825 or mfreeark@azgt.coop. We look forward to hearing from you.

Sincerely yours,

Michelle Freeark
Executive Director
Regulatory Affairs & Corporate Services

Zachary Dorn <dorn.zachary@azdeq.gov>

Mr. Dorn,

This email provides AEPCO's comments to the proposed SIP revision. There are two attachments to this email.

1. AEPCO's comment letter
2. AECOM technical comments to the proposed revision

A third document was too large to email and will be mailed to you. It supplies supporting documents references in the AECOM comments that are not readily available via the internet.

We appreciate the opportunity to comment on this proposed revision. Please reach out with any questions.

Thanks,

Michelle

RE: COMMENTS OF ARIZONA ELECTRIC POWER COOPERATIVE, INC. ON ADEQ'S PROPOSAL TO ADOPT NEW AMMONIA SIGNIFICANCE LEVEL, 25 A.A.R. 993 (APRIL 26, 2019)

Dear Mr. Dorn:

Arizona Electric Power Cooperative, Inc. (AEPCO) owns and operates the Apache Generating Station located in Cochise County. The Apache Generating Station uses certain air pollution control technologies that reduce precursor emissions of Nitrogen Oxides (NOx) that can form secondary particulates that may generate inadvertent ammonia emissions (known as "ammonia slip"). AEPCO therefore is interested in this rule in the event that Cochise County or a part thereof should ever be designated nonattainment for particulate matter < 2.5 microns (PM_{2.5}).

As indicated in AEPCO's request for extension, which the Arizona Department of Environmental Quality (ADEQ) graciously granted, AEPCO has contracted with AECOM to review the technical bases for the proposed 40-ton significant emission rate. AECOM's report outlines concerns with ADEQ's assumption of no impact on existing facility operations, which AEPCO shares. More importantly, the AECOM report documents that there is little technical justification for the proposed 40-ton significant emission rate for ammonia and that the Environmental Protection Agency (EPA) has recently approved a higher, 70-ton significant emission rate for ammonia in Utah. AECOM also notes that currently available literature, including a Phoenix-based study, supports a higher significant emission rate for ammonia than the 40-ton rate proposed in California due to differences in the Arizona environment.

AEPCO appreciates ADEQ's consideration of these comments and the possible revision of the proposed 40-ton/year significant emission rate because of the lack of scientific and technical support for that value and the need to ensure that regulatory limits have appropriate scientific and technical bases. Please contact Michelle Freeark at 520-586-5122 or mfreark@azgt.coop or Mr. Eric Hiser, AEPCO's air counsel, at 480-505-3927 or ehiser@JHJLawyers.com, if you have any questions.

Sincerely yours,

A handwritten signature in black ink that reads "Michelle R. Freeark".

AECOM, Technical Comments on Arizona's Proposed Ammonia Significant Emission Rate (June 6, 2019)

Technical Comments on Arizona's Proposed Ammonia Significant Emission Rate

By Laura Warren and Robert Paine, AECOM

Overview

In 2015, Arizona Department of Environmental Quality (ADEQ) developed a significant update to their existing New Source Review (NSR) program and submitted the program for State Implementation Plan (SIP) approval to the U.S. Environmental Protection Agency (EPA). The SIP was partially disapproved by EPA Region IX because the SIP did not establish a nonattainment NSR (NNSR) program Significant Emission Rate (SER) for ammonia, which is a PM_{2.5} precursor pollutant. On April 26, 2019, ADEQ proposed to adopt the ammonia SER to 40 tons per year (tpy) for the State of Arizona.¹ ADEQ provides the following justification for the proposed 40 tpy ammonia SER:

"The SER of 40 tons per year of ammonia was selected by examining other, similarly situated PM_{2.5} nonattainment areas within EPA Region IX. Recently, EPA approved a California SIP revision that implemented an SER for ammonia for the South Coast Air Quality Management District. 83 FR 39012 (Aug. 8, 2018) (proposed rule); 83 FR 61551 (Nov. 30, 2018) (final rule). In order to meet its NNSR obligations under the CAA, the South Coast Air Quality Management adopted an SER of 40 tons per year of ammonia. 84 FR 10573 (Mar. 22, 2019).

Additionally, this SER for ammonia is consistent with the SER of 40 tons per year that EPA has established for sulfur dioxide, oxides of nitrogen, and volatile organic compounds (VOCs) as precursors to PM_{2.5}. 73 FR 28321, 28333 (May 16, 2008); see also 40 CFR § 51.165(a)(1)(x)(A)."1

This document provides technical comments on the ADEQ proposed ammonia SER. Specifically, these comments relate to the following topics:

1. ADEQ did not consider whether significant impacts would occur on the regulated community for new potential PM_{2.5} NAAs should the PM_{2.5} National Ambient Air Quality Standard (NAAQS) be lowered.
2. The 40 tpy SER for SO₂, NO_x, and VOCs was established in 1980 using very conservative modeling approaches, and is therefore too low.
3. Technical support for California's selection of the NNSR ammonia SER of 40 tpy was not provided beyond a simple adoption of the other pollutants' SER. In fact, technical evidence that ammonia is an insignificant precursor to particulate formation in California was not considered in that rulemaking.
4. A 70 tpy SER for ammonia has been demonstrated by Utah for two nonattainment areas (NAAs) and is more applicable than 40 tpy, though still likely conservative, for Arizona.

¹ Arizona Administrative Register, Vol. 25, Issue 17, 998 for R18-2-101

Discussion of Specific Topics

1. ADEQ did not consider whether significant impact would occur on the regulated community for new potential PM_{2.5} NAAs should the PM_{2.5} NAAQS be lowered.

ADEQ states that this SIP change will have no significant impact on the regulated community; it is merely a procedural rule that will avoid federal highway fund sanctions. Specifically, ADEQ states the following:

"In order for the ammonia SER proposed in this rulemaking to have any regulatory impact, an existing source with the potential to emit 100 tons per year for ammonia located in one of the two PM_{2.5} nonattainment areas would have to undergo a physical or operational change that results in a net increase of at least 40 tons per year of ammonia emissions. There are currently no such sources located anywhere in the Nogales or West Central Pinal nonattainment areas, and it is extraordinarily improbable that any will be constructed in the future. Thus, this rulemaking is highly unlikely to impose any economic costs on the regulated community or to result in any environmental benefits."¹

ADEQ considers only the two existing PM_{2.5} NAAs for the 2006 24-hour average NAAQS in its determination that the regulated community will be largely unaffected. Progress that has been made in these two PM_{2.5} NAAs where design values² are below the 24-hour PM_{2.5} NAAQS.^{3,4,5} However, EPA is currently undergoing a review of the PM NAAQS that may potentially lead to a lower PM_{2.5} NAAQS.⁶ The Clean Air Act requires review of criteria pollutants' NAAQS every five years to ensure that the current levels are protective of human health for the primary standard and welfare impacts such as vegetation for the secondary standard. This review process requires EPA to review scientific studies and collaborate with a scientific committee, the Clean Air Scientific Advisory Committee (CASAC), to develop an assessment of the current scientific knowledge and to make a determination of whether an existing standard requires modification. EPA also allows review and comment by industry, interest groups, and the public throughout the process.

Following the ongoing PM_{2.5} NAAQS review, any lower PM_{2.5} NAAQS could result in existing design values currently in attainment to indicate nonattainment for a lower NAAQS even if air quality levels are stable or slowly improving. Therefore, the proposed 40 tpy ammonia SER would have a much wider reach and cause a greater impact than ADEQ claims. For some regions in Arizona not currently designated as a NAA, an ammonia SER of 40 tpy is potentially restrictive, and operation of post-combustion NOx controls by power plants and other industries can result in emissions that approach this level. As the comments below indicate, the reduction of NOx emissions as a precursor to PM_{2.5} is important, and collateral increases of ammonia emissions due to these activities is expected to have an insignificant effect on PM_{2.5} formation. Any ADEQ regulation that would compromise or complicate the effective operation of post-combustion controls for NOx in Arizona would be counterproductive.

2. The 40 tpy SER for SO₂, NOx, and VOCs was established in 1980 using very conservative modeling approaches, and is therefore too low.

Similar to the recent EPA approach for establishing Modeled Emission Rates for Precursors (MERPs)⁷, EPA conducted a modeling analysis⁸ in 1980 to justify the establishment of Significant Emission Rates for several criteria pollutants (CO, SO₂, NO₂, VOCs as ozone precursors, and particulate matter). The results of modeled emissions were expressed in units of concentration divided by emissions ("Chi/Q") and the value of the significant emission rate was determined by establishing a significant impact level, which ranged from 2 to 4% of the National Ambient Air Quality Standard (NAAQS).

Although the general approach of the modeling analysis was considered to be well-founded by almost all of the commenters (see the August 7, 1980 Federal Register notice at 45 FR 52706), the modeling approaches in hindsight were very conservative. First of all, EPA did not allow sufficient time or resources in 1980 to conduct refined modeling with use of hourly meteorological data. Instead, screening modeling approaches (such as PTMAX⁹) were used that are designed to

² The "design value" is that which is monitored or modeled at a specific point with the statistical form of the NAAQS. For PM_{2.5}, this is, for the daily NAAQS, the 98th percentile ranked daily concentration (8th highest in a 365-day or 366-day year), or the weighted yearly average (weighted by quarterly sample size) for the annual NAAQS.

obtain peak 1-hour predictions and then to scale those values to longer averaging times using conservative scaling factors. The "Volume 10" screening procedures¹⁰ included a step (see page 4-3 of the 1977 Volume 10 document) that multiplied the modeling result by a factor of 2 for a "margin of safety". This would have the effect of reducing all of the recommended SERs by a factor of 2 relative to the result that would have been obtained if an unbiased approach were to be used. In addition, the scaling factor to convert the peak 1-hour prediction to longer averaging times was also conservative (see page 4-22 of the 1977 Volume 10 document).

For complex terrain modeling, the "VALLEY" modeling approach¹¹ was used as a conservative screening tool. That model was eventually incorporated into the Industrial Source Complex (ISCST3) model¹² and was evaluated against the current EPA-preferred short-range model, AERMOD¹³. The results of the model evaluation¹⁴ for complex terrain sites indicate a model overprediction by the VALLEY approach by a factor ranging from about 3 to 10, depending upon the site and the averaging time.

It is noteworthy that in 1980, EPA stated that models for use in establishing a relationship between individual source hydrocarbon (VOC) emissions and ozone concentrations were not available. Thus, it was not possible for EPA to model an emissions rate from an air quality design value. However, in view of the link between VOC and NOx emissions in the formation of ozone, the emissions rate for VOC was also set at 40 tons per year. EPA's current 2019 MERPs guidance, noted above, indicates that in nearly all areas of the United States, ozone formation is NOx-limited, and it follows that the VOC SER in most areas should be higher than the NOx SER.

In summary, if EPA were to redo their 1980 analysis with AERMOD using a refined approach with all other aspects of the analysis remaining the same, they would have likely concluded that the SO₂, NO₂, and VOC SERs would be at a level of 100 tons per year.

3. Technical support for California's selection of the NNSR ammonia SER of 40 tpy was not provided beyond a simple adoption of the other pollutants' SER.

The ADEQ SIP revision establishing a 40 tpy ammonia SER is consistent with some California jurisdictions. However, the 40 tpy ammonia SER is admitted to be "conservative" in a California South Coast Air Quality Management District (SCAQMD) staff report¹⁵ because, on a regional basis, "NOx emissions have a greater influence in the formation of secondary ambient PM_{2.5} than ammonia emissions." SCAQMD does not provide any technical justification for setting the ammonia SER at 40 tpy other than the determination that this is a conservatively low value.¹⁶ The California Imperial Valley action merely cites the South Coast action and says that the proposed 40 ton/year significant emission rate is "likely approvable" because it was approved in the South Coast action.¹⁷

Further evidence that establishes the inconsequential role of ammonia to particulate formation in the California, specifically in the San Joaquin Valley, is available at <https://ipelc.org/scientific-evidence-indicates-that-reducing-nox-emissions-is-the-most-effective-strategy-to-reduce-concentrations-of-ammonium-nitrate-a-significant-contributor-to-pm2-5-concentrations-in-california/>. This discussion authored by the San Joaquin Valley Air Pollution Control District indicates that in the San Joaquin Valley in California (where there is plenty of ammonia), it has been found that reducing NOx emissions is the most effective way to reduce PM_{2.5}, and that (similar to the Watson et al. Phoenix study noted below), reductions of ammonia emissions have a very small effect on PM_{2.5} concentrations.

The California Air Resources Board (CARB) issued a draft report at <https://www.arb.ca.gov/planning/sip/sipm25/2018plan/precursordemo.pdf> in 2018 that concluded that ammonia is not a precursor to PM_{2.5} formation because, in effect, "PM_{2.5} levels are not sensitive to ammonia reductions".

Technical Comments on Arizona's Proposed Ammonia Significant Emission Rate

4. A 70 tpy SER for ammonia has been demonstrated by Utah for two nonattainment areas (NAAs) and is more applicable than 40 tpy, though still likely conservative, for Arizona.

EPA regulation and guidance states that for the NNSR program, a NNSR demonstration can be made to evaluate the effect of emissions increases from major stationary sources at hypothetical new and existing sources in a NAA.^{18,19} This demonstration could be performed as a photochemical modeling sensitivity analysis that models an increase in a major source's precursor emissions, such as ammonia, and predicts the impact on PM_{2.5} concentrations. Utah Department of Air Quality (UDAQ) has performed a modeling analysis of this type for two Serious PM_{2.5} NAAs (2006 24-hour PM_{2.5} NAAQS) to determine their proposed ammonia SER of 70 tpy, the same emission level for which Serious NAA major sources are defined.²⁰ In the UDAQ modeling analysis, CAMx photochemical modeling was performed for the Salt Lake City, UT NAA and the Provo, UT NAA. Several hypothetical new major sources were added to the model's emissions inventory as tall stack point sources, each of which emitted 70 tpy of ammonia at a constant rate. The modeled PM_{2.5} concentrations with these hypothetical sources were compared with modeled PM_{2.5} concentrations without the hypothetical sources. Based on the PM_{2.5} impact shown from 70 tpy ammonia-emitting sources, the 70 tpy ammonia SER was determined to be protective for these NAAs because the concentration increase was less than the PM_{2.5} significance level²¹. This approach is completely consistent with the original 1980 SER analysis as well as with the more recent MERPs analysis.

UDAQ performed a similar NNSR modeling sensitivity analysis for the Logan, UT (Cache County) Moderate PM_{2.5} NAA and determined that an ammonia SER was not necessary for this region.²² In this modeling analysis, two hypothetical ammonia-emitting major sources were added to the emissions inventory with over 100 tpy. Two modeling runs were performed, one with high plume releases and one with low plume releases.

The UDAQ NNSR demonstrations are technical analyses that are relevant for establishing Arizona's ammonia SER. Being in a warmer climate than Utah, if Arizona were to perform its own NNSR demonstration, it would likely result in a higher ammonia SER because, as noted by Watson et al.²³, ammonium nitrate dominates over ammonium sulfate in Arizona and less particulate is formed at higher temperatures for the same precursor emissions. This principle is also noted in EPA's 2019 Guidance on the Development of Modeled Emission Rates for Precursors, referenced above. Because Arizona is in a warmer climate than Utah, a NNSR demonstration similar to UDAQ's specifically for Arizona would likely result an ammonia SER higher than 70 tpy (100 tpy would be the highest potential SER, equal to the Moderate NAA major source PM_{2.5} emission threshold).

The Watson et al. (1994) study for the Phoenix, AZ metropolitan area found that, "ammonia was so abundant in Phoenix during the winter of 1989-1990 that massive reductions in its ambient concentrations would be needed before significant reductions in particulate ammonium nitrate would be observed. When total nitrate is reduced, however, by reductions in its oxides of nitrogen precursors, proportional reductions in particulate nitrate are expected." Watson et al. determined that the change in particulate matter in Phoenix would be expected to be about 10 times as reactive to a unit emissions change of NOx as opposed to ammonia. Given this information, the ammonia SER would be expected to be much higher than the NOx SER.

Conclusions

The ammonia SER of 40 tpy proposed by ADEQ is more appropriately set to 100 tpy or, at a minimum, to the same level adopted by Utah at 70 tpy. Our key comments to support this conclusion are summarized below.

- Although there may be no large ammonia sources in or near current PM_{2.5} nonattainment areas in Arizona, that status may change if EPA lowers the PM_{2.5} NAAQS.
- The ammonia SER adopted by SCAQMD has no technical foundation except that it is admitted to be conservatively low by that agency. Other California agency technical discussions establish ammonia as an insignificant precursor to PM_{2.5} emissions.

Technical Comments on Arizona's Proposed Ammonia Significant Emission Rate

- The SERs for SO₂, NOx, CO, and particulate matter are based upon 1980-era screening modeling techniques that inherently have a significant level of conservatism, although the concept of determining a critical emission rate that is based upon a modeled impact no higher than a significant impact level has wide support.
- The modeling approach used by EPA in 1980 and more recently by Utah is consistent with EPA's recent establishment of Modeled Emission Rates for Precursors (MERPs) for secondary PM_{2.5} and ozone.
- A rigorous photochemical modeling analysis in Utah indicates that an ammonia SER of 70 tpy is appropriate.
- The warmer climate of Arizona relative to Utah suggests that an ammonia SER higher than the value adopted for Utah would be appropriate due to the temperature-sensitive ammonium nitrate – nitric acid – ammonia equilibrium.
- A peer-reviewed paper that focuses upon nitrate particulate formation in the Phoenix, AZ area indicates that the nitrate aerosol formation is not ammonia-limited. The authors conclude that up to 10 times as much ammonia emissions relative to NOx emissions are needed for a given increase in particulate matter concentrations. Therefore, ammonia should either be considered as an insignificant precursor to PM_{2.5}, or the ammonia SER should be substantially higher than the NOx SER in Arizona.

ACTION: Final rules.

SUMMARY: In response to the decision of the U.S. Court of Appeals for the D.C. Circuit in *Alabama Power Company v. Costle*, EPA is today amending its regulations for the prevention of significant deterioration of air quality. 40 CFR 51.24, 52.21. Today's amendments also include regulatory changes affecting new source review in nonattainment areas, including restrictions on major source growth (40 CFR 52.24) and requirements under EPA's Emission Offset Interpretative Ruling (40 CFR Part 51, Appendix S) and Section 173 of the Clean Air Act (40 CFR 51.18 (j)).

DATES: The regulatory amendments announced here come into effect on August 7, 1980. State Implementation Plan revisions meeting today's regulatory changes are to be submitted to EPA within nine months after this publication.

FOR FURTHER INFORMATION CONTACT: James B. Weigold, Standards Implementation Branch (MD-15), Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711, 919/541-5292.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline. A section entitled Summary of PSD Program has been added to provide a concise narrative overview of this program.

I. Summary of PSD Program

The purpose of this summary is to help those people who are unfamiliar with the PSD program gain an understanding of it. Because this

summary seeks to condense the basic PSD rules, it may not precisely reflect the amendments announced in this notice. Should there be any apparent inconsistency between the summary and the remainder of the preamble and the regulations, the remaining preamble and the regulations shall govern.

A. PSD Allows Industrial Growth Within Specific Air Quality Goals

The basic goals of the prevention of significant air quality deterioration (PSD) regulations are (1) to ensure that economic growth will occur in harmony with the preservation of existing clean air resources to prevent the development of any new nonattainment problems; (2) to protect the public health and welfare from any adverse effect which might occur even at air pollution levels better than the national ambient air quality standards; and (3) to preserve, protect, and enhance the air quality in areas of special natural recreational, scenic, or historic value, such as national parks and wilderness areas.

States are required to develop SIP revisions for PSD pursuant to regulations published today. See 40 CFR 51.24, "Requirements for Preparation, Adoption and Submittal of Implementation Plans." If EPA approves the proposed PSD plan, the state can then implement its own program. In the absence of an approved state PSD plan, another portion of today's regulations will govern PSD review. See 40 CFR 52.21, "Approval and Promulgation of Implementation Plans." EPA will implement this regulation itself if the state does not submit an approvable PSD program of its own.

States can identify in their SIPs the local land use goals for each clean area through a system of area classifications. A "clean" area is one whose air quality is better than that required by the National Ambient Air Quality Standards. Each classification differs in the amount of growth it will permit before significant air quality deterioration would be deemed to occur. Significant deterioration is said to occur when the amount of new pollution would exceed the applicable maximum allowable increase ("increment"), the amount of which varies with the classification of the area. The reference point for determining air quality deterioration in an area is the baseline concentration, which is essentially the ambient concentration existing at the time of the first PSD permit application submittal affecting that area. To date, only PSD increments for sulfur dioxide and particulate matter have been established. Increments or alternatives

to increments are currently under investigation for the other criteria pollutants.

There are three types of area classifications. Class I areas have the smallest increments and thus allow only a small degree of air quality deterioration, while Class II areas can accommodate normal well-managed industrial growth. Class III designations have the largest increments and are appropriate for areas desiring a larger amount of development. In no case would the air quality of an area be allowed to deteriorate beyond the National Ambient Air Quality Standards. Except for certain wilderness areas and national parks, which are mandatory Class I areas, all clean areas of the country were initially designated as Class II. Flexibility exists under the Act to adjust most of these designations, except for those mandated by Congress.

The principal mechanism within the SIP to implement the objectives of the PSD program is the preconstruction review process. These provisions require that new major stationary sources and major modifications are carefully reviewed prior to construction to ensure compliance with the National Ambient Air Quality Standards, the applicable PSD air quality increments, and the requirements to apply the best available control technology on the project's pollutant emissions. In addition, proposed SIP relaxations which would limit further use of increment must be reviewed for their anticipated impact and not be approved if the applicable increment would be violated. The SIP must also contain PSD provisions for periodically reviewing all emissions increases, including those which occur outside the SIP revision and the new source review (NSR) process, and for restoring clean air when such increases cause violations of the applicable PSD increment. This corrective action may require additional controls on existing emissions sources which contribute to the problem.

B. Who is Subject to the Prevention of Significant Deterioration Regulations?

The requirements of today's PSD regulations apply to major stationary sources and major modifications which meet certain criteria concerning the geographic location, type of pollutants to be emitted, and timing of proposed construction. No source or modification subject to today's rules may be constructed without a permit which states that the stationary source or modification would meet all applicable PSD requirements. This section summarizes how PSD review as

modified in response to *Alabama Power* will apply.

The primary criterion in determining PSD applicability is whether the proposed project is sufficiently large (in terms of its emissions) to be a major stationary source or major modification. Source size, for applicability purposes, is defined in terms of "potential to emit." "Potential to emit" means the capability at maximum design capacity to emit a pollutant after the application of all required air pollution control equipment and after taking into account all federally enforceable requirements restricting the type or amount of source operation. A "major stationary source" is any source type belonging to a list of 28 source categories which emits or has the potential to emit 100 tons per year or more of any pollutant subject to regulation under the Act, or any other source type which emits or has the potential to emit such pollutants in amounts equal to or greater than 250 tons per year. A stationary source generally includes all pollutant-emitting activities which belong to the same industrial grouping, are located on contiguous or adjacent properties, and are under common control. Pollutant activities which belong to the same major group as defined in a standard industrial classification scheme developed by the Office of Management and Budget are considered part of the same industrial grouping. (See SOURCE).

A "major modification" is generally a physical change in or a change in the method of operation of a major stationary source which would result in a significant net emissions increase in the emissions of any regulated pollutant. In determining if a proposed increase would cause a significant *net* increase to occur, several detailed calculations must be performed. First, the source owner must quantify the amount of the proposed emissions increase. This amount will generally be the potential to emit of the new or modified unit. Second, the owner must document and quantify all emissions increases and decreases that have occurred or will occur contemporaneously (generally within the past five years) and have not been evaluated as part of a PSD review. The value of each contemporaneous decrease and increase is generally determined by subtracting the old level of actual emissions from the new or revised one. Third, the proposed emissions changes and the unreviewed contemporaneous changes must then be totalled. Finally, if there is a resultant *net* emissions increase that is larger than certain values specified in the

regulations, the modification is major and subject to PSD review.

Certain changes are exempted from the definition of major modification. These include: (1) routine maintenance, repair, and replacement; (2) use of an alternative fuel or raw material by revision of an order under sections (2)(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation); (3) use of an alternative fuel by reason of an order or rule under section 125 of the Clean Air Act; (4) use of an alternative fuel at a steam generating unit to the extent it is generated from municipal solid waste; (5) use of an alternative fuel which the source is capable of accommodating; and (6) an increase in the hours of operation, or the production rate. The last two exemptions can be used only if the corresponding change is not prohibited by certain permit conditions established after January 6, 1975.

If a source or modification thus qualifies as major, its prospective location or existing location must also qualify as a PSD area, in order for PSD review to apply. A PSD area is one formally designated by the state as "attainment" or "unclassifiable" for any pollutant for which a national ambient air quality standard exists. This geographic applicability test does not take into account what new pollutant emissions caused the construction to be major. It looks simply at whether the source is major for any pollutant and will be located in a PSD area.

Once a source applicant has determined that proposed construction falls under PSD based on the above size and location tests, it must then assess whether the pollutants the project would emit are or are subject to PSD. If a new major stationary source emits pollutants for which the area it locates in is designated nonattainment, then the source is exempt from PSD review for those pollutants. These sources must, however, meet the applicable requirements of NSR for each nonattainment pollutant. Similarly, if a major modification to be constructed in a PSD area involves changes only for nonattainment pollutants then the source is not subject to PSD. These modifications must meet the appropriate nonattainment NSR under the SIP for the pollutant. Once the question of NSR jurisdiction is resolved, then the PSD review applies to all significant emissions increases of regulated air pollutants. Specific numerical cutoffs which define what emissions increases are "significant" have been spelled out in the regulations. These pollutant-

specific cutoffs can exempt a source from PSD review for a particular pollutant, except where the proposed construction would adversely impact a Class I area.

If a proposed source or modification would be subject to PSD review based on size, location, and pollutants emitted, then its construction schedule must meet certain tests before the PSD rules promulgated today would apply. All major construction otherwise qualifying for PSD review would not need a PSD permit under these regulations if the proposed construction: (1) was subject to the old PSD rules, has submitted a complete application under these rules before today, and was or is subsequently approved to construct based on this application; or (2) was not subject to the old PSD rules, has received all federal, state, and local air permits needed before today and commences construction in a continuous fashion at the proposed site within a reasonable time.

Finally, the PSD regulations contain some specific exceptions for some forms of source construction. The requirements of today's regulations do not apply to any major stationary source or major modification that is: (1) a nonprofit health or educational institution (only if such exemption is requested by the governor); or (2) a portable source which has already received a PSD permit and proposes relocation.

C. What Must A Source or Modification Do To Obtain A PSD Permit?

1. It must apply the best available control technology.

Any major stationary source or major modification subject to PSD must conduct an analysis to ensure application of best available control technology (BACT). During each analysis, which will be done on a case-by-case basis, the reviewing authority will evaluate the energy, environmental, economic and other costs associated with each alternative technology, and the benefit of reduced emissions that the technology would bring. The reviewing authority will then specify an emissions limitation for the source that reflects the maximum degree of reduction achievable for each pollutant regulated under the Act. In no event can a technology be recommended which would not meet any applicable standard of performance under 40 CFR Parts 60 and 61.

In addition, if the reviewing authority determines that there is no economically reasonable or technologically feasible way to accurately measure the emissions, and hence to impose an

enforceable emissions standard, it may require the source to use source design, alternative equipment, work practices or operational standards to reduce emissions of the pollutant to the maximum extent. For example, if an immense pile of uncovered coal emits coal dust into the atmosphere, it would make little sense to impose an emission standard, since measuring the amount of coal dust rising off the pile is nearly impossible. A much more direct approach to controlling emissions is, for example, requiring the owner to wet the coal pile daily. This type of standard or practice will be equivalent to an emissions limitation for purposes of the BACT requirement.

2. It must conduct an ambient air quality analysis.

Each PSD source or modification must perform an air quality analysis to demonstrate that its new pollutant emissions would not violate either the applicable NAAQS or the applicable PSD increment. This analysis ensures that the existing air quality is better than that required by national standards and that baseline air quality will not be degraded beyond the applicable PSD increment.

Each proposed major construction project subject to PSD must first assess the existing air quality for each regulated air pollutant that it emits in the affected area. This analysis requirement does not apply to pollutants for which the new emissions proposed by the applicant would cause insignificant ambient impacts. Today's PSD regulations define pollutant-specific impacts that are typically considered inconsequential and that can be exempted from analysis, unless existing air quality is poor or adverse impacts to a Class I area are in question. For pollutants for which a NAAQS exists, the applicant must provide ambient monitoring data that represent air quality levels in the year's period preceding the PSD application. Where no existing data are judged representative or adequate, then the source applicant must conduct its own monitoring program. This is often the case where the applicant will be establishing the baseline concentration for the affected area. Typically air quality dispersion modeling is used by applicants to support or extend the assessment made with gathered monitoring data. For pollutants for which there is no NAAQS, the required analysis will normally be based on dispersion modeling alone.

Source applicants who are subject to the ambient analysis requirement for sulfur dioxide or particulate matter must also perform an analysis to compute

how much of the PSD increment remains available to them. In general the amount of increment that is available depends on certain changes in actual emission. First, actual emissions changes occurring after January 6, 1975 which are associated with physical changes or changes in the method of operation at a major stationary source can affect the available increment. Accordingly, cleanup adds to the available growth margin while new emissions diminish it. Second, all changes in emissions, including those from minor sources and other types of changes at major sources, affect the available increment provided they occur after the baseline date. The baseline date is essentially the time that the first PSD application affecting the area is filed.

Once the question of how much increment remains is resolved, then the applicant must demonstrate that his proposed new emissions would not exceed the remaining PSD increment. Where a proposed project would cause a new violation of the increment or contribute to an existing violation, it cannot be approved. Existing violations must be entirely corrected before PSD sources which affect the area can be approved.

3. It must analyze impacts to soils, vegetation, and visibility.

An applicant is required to analyze whether its proposed emissions increases would impair visibility, or impact on soils or vegetation. Not only must the applicant look at the direct effect of source emissions on these resources, but it also must consider the impacts from general commercial, residential, industrial and other growth associated with the proposed source or modification. The results of this analysis may be used to determine if the project would have an adverse impact on a Class I area.

4. It must not adversely impact a Class I area.

If the reviewing authority receives a PSD permit application for a source that could impact a Class I area, it will immediately notify the Federal Land Manager and the federal official charged with direct responsibility for managing these lands. These officials are responsible for protecting the air quality-related values in Class I areas and for consulting with the reviewing authority to determine whether any proposed construction will adversely affect such values. If the Federal Land Manager demonstrates that emissions from a proposed source or modification would impair air quality-related values, even though the emissions levels would not cause a violation of the allowable air quality increment, the Federal Land

Manager may recommend that the reviewing authority deny the permit.

5. Its application must undergo adequate public participation.

The regulations solicit and encourage participation by the general public, industry, and other affected persons impacted by the proposed major source or major modification. Specific public notice requirements and a public comment period are required before the PSD review agency takes final action on a PSD application. The public notice must indicate whether the reviewing authority proposed permit approval, denial, or conditional approval of a proposed major source or major modification. Consideration is given to all comments received provided they are relevant to the scope of the review. Where requested, or at its own discretion, the reviewing authority may conduct a public hearing to help clarify the issues and obtain additional information to assist in making a final permit decision.

6. It must start construction on time.

The source owner, once receiving a PSD permit, must start construction within a reasonable period of time (typically within 18 months of approval) and must stay on a continuous construction schedule. Normally, long delays will invalidate the permit.

II. Background

On August 7, 1977, the President signed the Clean Air Act Amendments of 1977 (1977 Amendments) into law. Those amendments established, in the form of Part C of Title I of the Clean Air Act (CAA), a set of requirements for the prevention of significant deterioration (PSD) of air quality in "clean air" areas. Sections 160-69, 42 U.S.C. 7470-79. The requirements for preconstruction review of new stationary sources and modifications in Part C follow the outline of the PSD regulations that EPA promulgated in 1974, but are more elaborate and in many ways more stringent. Part C also requires that each state implementation plan (SIP) contain the new PSD requirements.

In response to Part C, EPA promulgated two sets of PSD regulations on June 19, 1978. One set specified the minimum requirements that a PSD SIP revision would have to contain in order to warrant EPA approval. See 43 FR 26380 (codified at 40 CFR 51.24 [1979]) (hereinafter, the "1978 Part 51 regulations"). The other set comprehensively amended the 1974 PSD regulations, incorporating into them the new Part C requirements. 43 FR 26388 (codified at 40 CFR 52.21 [1979]) (hereinafter, the "1978 Part 52 regulations"). EPA intended that, until it

had approved a PSD SIP revision for a state, the permitting of new sources and modifications for PSD purposes would continue under the 1978 Part 52 regulations.

On June 18, 1979, the United States Court of Appeals for the District of Columbia Circuit issued a decision that upheld some of the substantive provisions of both the 1978 Part 51 and Part 52 regulations and overturned others. *Alabama Power Company v. Costle*, 13 ERC 1225. In its opinion, the court merely summarized its holdings, but promised to issue supplemental opinions after it had considered any petitions for reconsideration. In an order that accompanied the summary opinion, the court stayed the effect of its decision until it had issued the supplemental opinion. The purpose of that procedure, the court explained, was "to enable EPA to proceed as soon as possible to commence rulemaking or other proceedings necessary to promulgate those revisions in the PSD regulations required by [the court's] rulings * * *." *Id.* at 1227.

By a notice that appeared in the Federal Register for September 5, 1979, EPA began the process the court had in mind. 44 FR 51924. There EPA proposed various amendments to the PSD regulations that were to replace the provisions the court had held invalid, for instance, the definitions of "source," "modification," and "potential to emit." EPA also proposed amendments that were to add entirely new provisions to supplement the replacement provisions, for instance, the *de minimis* exemptions.

Prior to September, EPA had issued, also in response to the 1977 Amendments, various regulations and guidelines relating to the construction of new sources and modifications in and near "nonattainment" areas. In January 1979, the Agency revised its Emission Offset Interpretative Ruling ("Offset Ruling"), which now appears at 40 CFR Part 51, Appendix S (1979). Then, in April 1979, EPA issued a guideline entitled "General Preamble for Proposed Rulemaking on Approval of Plan Revisions for Nonattainment Areas." 44 FR 20372.¹ Finally, in July 1979, EPA issued an interpretative rule concerning certain statutory restrictions on new construction in nonattainment areas. 44 FR 38471 ("construction moratorium").² EPA also asked for comment on certain

issues concerning new construction in such areas. 44 FR 38583.

In the September Federal Register notice, EPA also proposed various changes to those nonattainment regulations and guidelines. The purpose of those changes generally was to conform those regulations and guidelines to the decisions in *Alabama Power* concerning the statutory terms "source," "modification," and "potential to emit."

On September 18, 1979, EPA announced that it would hold public hearings on the September proposal on October 15 and 16 in Washington, D.C., and on October 18 and 19 in San Francisco. See 44 FR 54069. At the same time, the Agency set November 18 as the deadline for submitting information rebutting or supplementing any presentation at the hearings. Subsequently, EPA held the public hearings as scheduled.

On October 4, 1979, EPA announced various corrections to technical errors in the September proposal. 44 FR 57107. At the same time, it extended the period for submitting written comments until November 5, 1979. It added that it would hold the rulemaking docket open until November 18, 1979, not only for information rebutting or supplementing any presentation at the hearings, but also for information rebutting or supplementing any written comment.

On November 9, 1979, EPA announced that it had recently released for public comment a draft of a revision of the *Ambient Monitoring Guideline for Prevention of Significant Deterioration (PSD)* (OAQPS 1.2-096), which the Agency had originally published in May 1978. 44 FR 65084. EPA also announced that it would accept any written comments on the draft until December 10, 1979.

On December 14, 1979, the Court of Appeals handed down its final opinion in *Alabama Power*. 13 ERC 1993. Subsequently, in order to avoid the uncertainty and confusion that would occur in PSD permitting if the final opinion came into effect before EPA completed the rulemaking, EPA and many of the other parties to the litigation petitioned the court to keep the final opinion from coming into effect until June 2, 1980. On March 14, 1980, the court granted the request.

On May 30, 1980, EPA and other parties to the litigation again petitioned the court, requesting a further extension of time until July 18, 1980. The court granted an extension, to July 28, on June 23, 1980.

On January 30, 1980, EPA announced that it would reopen the rulemaking docket for the receipt of written

¹For supplements to the General Preamble. See 44 FR 38583 (July 2, 1979); 44 FR 38371 (August 28, 1979); 44 FR 51924, 51928-29 (September 5, 1979); 44 FR 53761 (September 17, 1979); and 44 FR 67182 (November 23, 1979).

²For a fuller description of those nonattainment regulations and guidelines, See 44 FR 51925 and 45 FR 31304-05.

comments on various aspects of the rulemaking, including the final opinion of the court, certain issues that the Agency described in the notice, the redraft of the monitoring guidelines, and various meetings between EPA and others. 45 FR 6802.

On February 5, 1980, EPA issued a stay of the 1978 Part 52 PSD regulations as to certain sources and modifications. 45 FR 7800. The stay was effective as of January 30, 1980. Its purpose was "to relieve from the permitting requirements of the 1978 PSD regulations roughly those sources and modifications that would not be subject to the permitting requirements of valid replacement regulations that would comport with the *Alabama Power* opinion." *Id.*

On May 13, 1980, EPA promulgated a stay of the Offset Ruling and the construction moratorium that is similar to the PSD stay. See 45 FR 31304. On the same day, EPA promulgated certain amendments to the Offset Ruling, the regulations relating to new source review at 40 CFR 51.18, and the construction moratorium. Those amendments established the geographic applicability of the various nonattainment requirements relating to the construction of new sources and modifications. 44 FR 31307. Those amendments embody EPA's responses to many of the comments on the September proposal.

Finally, on May 19, 1980, EPA promulgated regulations aimed at consolidating and unifying various permit requirements and procedures. 45 FR 33290. Those new regulations contain provisions which will govern the processing of applications for permits under the new Part 52 PSD regulations.

During the course of the rulemaking that EPA began in September, it received approximately 375 written comments. The discussion that follows summarizes the proposals, the comments on them, EPA's responses, and the final provisions.

III. Highlights

Several significant changes from the September 5, 1979 proposal have occurred. These changes include the addition of certain provisions not addressed by the September 5, 1979 proposal but which are necessary under the Act. Several regulatory provisions which are unchanged in substance by today's notice have also been reprinted to clarify the effects of any revised paragraph numbering.

A. Transition: The proposed transition scheme for phasing in the additional monitoring requirements has been expanded to require no new monitoring requirements for PSD applications

submitted and complete within 10 months of the promulgation date. In addition, today's rules allow less than a full year of monitoring data to be included with PSD applications filed after the above times but before 18 months after the promulgation date. PSD applications filed later than 18 months from the date of promulgation will be subject to the full new monitoring requirements.

B. Potential To Emit: Potential to emit is the maximum design capacity of the source, except as constrained by federally enforceable permit conditions. This would include permit conditions restricting hours or type of source operation.

C. 50-Ton Exemption: Today's regulations essentially delete the "50-Ton Exemption" for both nonattainment and PSD. The eligibility date for the section 165(b) exemption has been changed from August 7, 1977 to March 1, 1978.

D. Fugitive Emissions: For the purpose of PSD and nonattainment, "fugitive emissions" now means those emissions released directly into the atmosphere, which could not reasonably pass through a stack, chimney, vent or other functionally equivalent opening. Fugitive emissions are not to be considered in determining whether a source would be a major source, except when such emissions come from specified source categories.

E. Fugitive Dust: Today's regulations promulgate the proposed deletion of the "fugitive dust exemption" from the applicable provisions of both PSD and the Offset Ruling.

F. Stationary Source: The definition of source for PSD purposes has been made more liberal than the previous regulations. Under today's rules, a PSD source is a grouping of all pollutant emitting activities at one location and owned or under the control of the same person or persons. This generally relates to the common notion of a plant. Smaller portions of such a plant no longer will be examined for applicability purposes. For added clarification, pollutant-emitting activities will now be considered part of the same "plant" if they belong to the same "major group" as described in the Standard Industrial Classification Manual. At this time, however, the Agency has decided not to change its previous approach to defining source for nonattainment purposes. Therefore, today's rules continue to incorporate the "dual definition" concept of source which requires consideration of overall emissions from a "plant" and from each "installation" within that plant. In a change from the proposal, this dual definition will apply

to major sources in all nonattainment areas designated under section 107 of the Act, regardless of SIP approvability or degree of completion.

G. Modification: The definition and treatment of modifications have been changed since the September 5, 1979 proposal. The concept of accumulating minor changes made at an existing minor source until the sum was equivalent to a major stationary source has been deleted. Rather, a source must now qualify as a major stationary source prior to making a modification to become subject to review, unless the change itself is greater than 100 or 250 tons per year. Contemporaneous changes now generally refer to emissions increases and decreases occurring within the same 5-year time period unless the state opts for a different time period in its Part D SIP or PSD program. Reductions, to be creditable, must be enforceable under the SIP before the contemporaneous emission increase would begin construction. Such reductions, as well as significant increases, will be quantitatively assessed on the basis of an "actual emissions" baseline, rather than a "potential to emit" baseline, as was proposed. "Reconstruction" (i.e., 50% or more capital replacement) has been deleted from PSD but has been retained for nonattainment NSR, including the prohibition on construction.

H. "De Minimis" Exemptions: Three types of changes from the September 5 proposal appear in today's regulations: (1) different numbers have been developed for defining significant emissions from new sources and significant net emissions increases from modifications; (2) new air quality *de minimis* numbers have been generated and can only be used to exempt PSD sources from the ambient monitoring requirements; and (3) a ten kilometer proximity cutoff has been specified to indicate when a source, regardless of pollutant emissions, must be prepared to demonstrate that no 24-hour impact greater than 1 $\mu\text{g}/\text{m}^3$ would occur in the Class I area.

I. Geographic Applicability: PSD will generally apply only if the otherwise subject major construction locates in a section 107 area which is designated attainment or unclassified under section 107 for any criteria pollutant (regardless of what pollutants the proposed construction would emit or what pollutant qualified it as major). An exception to this rule is that no PSD permit is required for major construction which emits only the pollutant for which the area of location is nonattainment.

J. Pollutant Applicability: Any net significant emissions increase of any pollutant subject to regulation under the Act (not just those pollutants for which the source is major) now qualifies as a PSD modification. Nonattainment review will continue to focus on only the major nonattainment pollutant. No PSD review will be required for a given criteria pollutant, if a source would construct in an area designated nonattainment for that pollutant.

K. Baseline Area/Date: Baseline area now refers to all section 107 areas which are designated attainment or unclassified for PM or SO₂ (as may be redesignated) in which the PSD source triggering the baseline date would locate or would have an annual air quality impact equal to or greater than 1 $\mu\text{g}/\text{m}^3$. Interstate impacts, however, do not trigger baseline date. This differs from the proposal, which focused on the AQCR rather than the designated area. Baseline dates are pollutant specific and can be established by the first PSD application of a source with significant emissions of the applicable pollutant. States will have the flexibility to redesignate clean or unclassified areas under section 107 and thereby remove baseline dates for certain areas. However, no redesignation may subdivide the impact area ($>1 \mu\text{g}/\text{m}^3$) of the source triggering a baseline date.

L. Best Available Control Technology: Today's regulations reflect the proposal with one exception. A provision has been added that requires BACT for modifications only when both a net emissions increase occurs at the changed unit(s) and a significant net emissions increase occurs at the plant; BACT applies only to the units actually modified.

M. Monitoring: The proposed transition scheme for phasing in the additional monitoring requirements will provide relief for sources covered under the existing regulations that are in the process of monitoring and offer allowances for setup time of monitors in gathering the required data.

N. Notification: The notification provisions appearing in the September 5, 1979 proposal have been deleted from today's regulations.

O. PSD SIP Revisions: The requirements proposed on September 5 for governing the development of PSD SIP submittals are essentially unchanged. These regulations allow limited flexibility in the development of different but equally effective state plans.

P. Increment Consumption: A discussion has been included in the preamble to summarize the effects that the *Alabama Power* decision has had on

increment tracking. This section also discusses how certain SIP related issues are to be addressed, such as the Gulf Coast problem (SIP shows a theoretical increment violation in a clean area, unrelated to actual air quality impact) and temporary SIP relaxations. (SIP would be relaxed and only temporary emissions would occur).*

Q. Public Participation: The requirements of paragraph (r) of § 52.21 have been replaced with the public participation procedures associated with the consolidated permit regulations (40 CFR 124).

IV. Transition

This section focuses on those provisions of the final PSD and nonattainment regulations which govern the transition from the preexisting requirements to the new ones. It begins with a discussion of the new transition provisions of the Part 52 PSD regulations and then deals in turn with the transition provisions of the Part 51 PSD regulations, the Offset Ruling, the Part 51 nonattainment regulations, and finally the construction moratorium.

A. Part 52 PSD Regulations

The new transition provisions of the Part 52 PSD regulations fall into three categories: those that relate to the new coverage of the regulations, those that relate to the new requirements for best available control technology (BACT) and air quality assessments, and those that relate to the new procedural requirements. The discussion which follows deals with each in that order.

1. Coverage.

a. Proposed transition provisions: The preconstruction permit requirements of the 1978 Part 52 regulations applied to a certain class of projects that emit or would emit pollutants. The keystone of those regulations, section 52.21(i)(1), provided that "[n]o major stationary source of major modification shall be constructed unless the [permit] requirements of [the Part 52 regulations] have been met." It established the general rule that the permit requirements applied to any "major stationary source" or "major modification." The balance of section 52.21(i) then listed certain exceptions to that general rule. The main exceptions established various "grandfather" exemptions. The permit requirements of the regulations applied, therefore, to any pollutant-emitting project that was "major" and had no "grandfather" status.

In September 1979, EPA proposed to establish new Part 52 PSD regulations whose coverage would be substantially different from that of the 1978

regulations. First, it proposed to define "major stationary source" differently than it had defined that term in the 1978 regulations. Under the 1978 regulations, whether a "source" was "major" depended upon whether its "potential to emit" any pollutant regulated under the Act would equal or exceed certain thresholds. "Potential to emit" referred largely to the maximum rate at which a "source" would emit a pollutant *without* control equipment. Under the amendments that EPA proposed in September, "potential to emit" would be the maximum rate at which a "source" would emit a pollutant *with* control equipment. Second, EPA proposed to define "major modification" differently than it had defined that term in the 1978 regulations. There, a "major modification" was any change at a "source" that would increase the "potential to emit" of the "source" by 100 tons per year of any pollutant regulated under the Act, or 250 tons per year, depending on source type and ignoring any emission reductions. Under the amendments that EPA proposed in September, "major modification" would have become any change at a "source" that would result in a *significant net* increase in the "potential to emit" of the "source." "Significant" is defined as emissions greater than certain *de minimis* values. Finally, EPA proposed to limit the geographic applicability of the PSD permit requirements by adding an exception to section 52.21(i) that would exclude a "source" or "modification" from PSD review on the basis of its location.³

Amendments of the sort that EPA proposed in September would have left many projects that previously fell or would have fallen within the coverage of the 1978 Part 52 regulations outside the coverage of the resulting Part 52 regulation. For instance, many new "sources" that were "major" under the 1978 regulations would not have been "major" under the proposed amendments, because while their maximum uncontrolled emissions would exceed the applicable thresholds, their maximum controlled emissions would not.

Of those projects that were or would have been subject to the PSD permit requirements under the 1978 PSD regulations, but not under the proposed

*Specifically, EPA proposed that the permit requirements would apply only to any "major stationary source" or "major modification" that would be located in an area designated under section 107 of the Act as attainment or unclassifiable for a pollutant for which the "source" or "modification" would be major or would significantly impact an area in another state which is designated as attainment or unclassifiable for any such pollutant.

amendments, some have already received a PSD permit, while others have not. In September, EPA proposed to put both sets of projects outside the reach of the permit requirements as soon as possible by putting the new definitions of "potential to emit" and "modification" and the new limitation on geographic applicability into effect immediately upon their promulgation. *See 44 FR 51927.* But EPA also proposed that any permit that had already been issued would remain in effect, binding any particular project to its terms, until the permit had been rescinded under a proposed paragraph (w) or had expired under an existing paragraph (s). *See id.* at 51927, 51958. Under paragraph (w), a permittee would have been able to obtain rescission only if the permittee filed a complete application with the issuing authority within 90 days after paragraph (w) had come into effect.

Amendments of the sort that EPA proposed in September would also have brought some projects that previously fell or would have fallen outside the coverage of the 1978 regulations inside the coverage of the Part 52 regulations. For instance, many changes at a "source" that would result in a gross increase in "potential to emit" well below 100 or 250 tons per year might nevertheless result in a significant net increase.

In September, EPA proposed to exempt from PSD review certain of these projects that fell or would have fallen beyond the reach of the PSD permit requirements under the 1978 regulations, but not under the proposed amendments. In particular, EPA proposed to "grandfather" any such project which before the promulgation of the new amendments had received each preconstruction permit that the state implementation plan (SIP) required and which will have "commenced" construction within 18 months after promulgation. *See id.* at 51928 (first column), 51953 (proposed § 52.21(i)(7)); 44 FR 57108 (items B(1) and C(2)).

Finally, EPA proposed to add another new grandfather provision to § 52.21(i). That provision would have stated that the permit requirements of those regulations do not apply to any "source" or "modification" on which construction "commenced" before August 7, 1977, the date of enactment of the 1977 Amendments. *See id.* at 51928 (first column), 51953 (proposed § 52.21(i)(3)). The purpose of the proposal was merely to state in regulatory form what section 168(b) of the Act, 42 U.S.C. 7478(b), already provides.

b. *Comments and final action on the proposed transition provisions relating to coverage:* EPA received no comments

on its proposal to put the new definitions of "potential to emit" and "modification" and the new limitation on geographic applicability into effect immediately upon promulgation. EPA therefore has put those provisions into effect as of the date this notice appears in the Federal Register. Some projects that were within the coverage of the 1978 Part 52 regulations, but have yet to receive a PSD permit, are now outside the coverage of the new Part 52 regulations, since the prohibition on construction without a permit in § 52.21(i)(1)(i) no longer applies to them. As a result, construction on them may begin immediately.⁴ Because further delay is pointless, and might be harmful in some cases, EPA finds that it has "good cause" to put the new applicability provisions into effect immediately upon promulgation, within the meaning of section 4(d)(3) of the Administrative Procedure Act (APA), 5 U.S.C. 553(d)(3). *See also* APA 4(d)(1), 5 U.S.C. 553(d)(1).

EPA did receive numerous comments on its proposal to rescind certain permits, and to treat them as binding unless and until rescinded. While one commenter agreed with the proposal, most did not. They objected primarily to two aspects of the proposal: first, that it would place on the permittee the dual burden of coming forward with an application for rescission and of providing proof that the project in question does fall outside the coverage of the new Part 52 regulations; and, second, that it would bar rescission if the permittee failed to file a complete application within a certain period of time. The commenters argued that EPA had no authority originally to require a permit for any project that falls outside the coverage of the new regulations and that it therefore has no authority now either to place the burden of coming forward and of proof on a permittee or to keep a rescindable permit in effect merely because of a failure to file a complete application for rescission by a certain time.

In response, EPA has promulgated a new provision, § 52.21(w), which does place the burden of coming forward and of proof on the permittee, but imposes no deadline for filing an application. Whether EPA had authority originally to require a permit for a project that falls outside the coverage of the new regulations is immaterial. EPA has authority under section 301(a)(1) of the Act, 42 U.S.C. 7601(a)(1), to fashion

within reason the regulatory tools it needs to carry out its tasks. Here EPA has undertaken not only to release certain PSD permittees from the constraints of their PSD permits, but also to settle as finally, as publicly, and as quickly as possible which old permits are binding and which are not. Prospective applicants, in order to prepare applications, and permitting authorities, in order to meet their obligations under the PSD regulations, must assess increment consumption. Confusion and uncertainty over whether particular projects are subject to the emissions limitations in their PSD permits can only frustrate efforts to assess increment consumption. Now § 52.21(w) maximizes EPA's ability to perform satisfactorily the tasks it has undertaken.

First, by stating explicitly that a permit generally remains in effect until rescinded, § 52.21(w) gives each permittee with a rescindable permit a strong reason to bring it before the reviewing authority as soon as possible. Second, by putting the burdens of coming forward and of proof on the permittees, § 52.21(w) ensures that the reviewing authority will spend its time efficiently and will have adequate information with which to make a sound decision. Third, by establishing that only the reviewing authority may rescind a permit, the provision promotes the soundness and therefore the finality of the rescission, since the reviewing authority will have the expertise and objectivity necessary to check adequately whether the permittee has applied the intricate applicability rules correctly. Finally, by requiring that the reviewing authority publish each rescission, § 52.21(w) ensures that the status of each permit will be in the public record.

Certain commenters suggested two alternatives to EPA's proposed rescission provision. One alternative was to declare upon promulgation that any PSD permit for a project that falls outside the coverage of the new regulations is null and void as of that time, but that any permittee which concludes it holds such a permit must send the reviewing authority a bare notice of that conclusion. The other alternative was to require any such permittee to send the reviewing authority an application for rescission and to establish that the failure of the reviewing authority to act on the application within a certain period would operate to grant the application. EPA has decided to adopt neither alternative. Under both, a project that should not be able to escape PSD

⁴The partial stay of the 1978 regulations that EPA issued in January 1980 has probably already relieved most of those projects from the permit requirements of those regulations.

constraints would be able to escape them merely because of an oversight or a manpower deficiency. EPA, however, has no authority to allow escape from review on that basis.

Certain commenters also objected to other aspects of the proposed rescission provision. In particular, one commenter asserted that proposed § 52.21(w)(3), which would say that "[t]he permitting authority may approve" an application that does show that the permit is rescindable, should state instead that "[t]he permitting authority shall approve" such an application. (Emphasis added.) EPA agrees, and has placed the necessary mandatory language in the final provision. Other commenters urged that the final provision recognize the possibility that a permitted may wish to obtain rescission of only certain elements of a permit. In response, EPA has introduced language under which the reviewing authority may rescind only certain elements, if that is appropriate in the particular case.

With respect to the rescission provision, it should be noted that rescission of a permit would in no way affect any other limitations on the project that may apply by virtue of the SIP or a state permit. It should also be noted that, if a source or modification whose permit is rescinded were later found to be causing or contributing to an increment violation, additional controls might be necessary. See 40 CFR 51.24(a)(3)(1979).

EPA received many comments on its proposal to "grandfather" certain projects that fall outside the coverage of the 1978 regulations, but not the new Part 52 regulations. Two commenters, while not focusing specifically on that proposal, expressed general opposition to "grandfathering" any project that would otherwise fall within the coverage of the new regulations. In its view, EPA should adhere to the transitional rules that it established in the 1978 regulations, so that in general a project would escape PSD review under the new Part 52 regulations only if certain permits were obtained for it by March 1, 1978, and construction "commenced" on it by March 19, 1979.

EPA disagrees that it should or must adhere to the transitional rules in the 1978 regulations in deciding which of the projects in question here should have to get a PSD permit. Part C of Title I of the Act contains two provisions, sections 165(a) and 168, which describe how the PSD permit requirements of Part C are to be implemented. Those sections, however, contradict each other irreconcilably. See *Citizens to Save Spencer County v. EPA*, 600 F.2d 844, 851-54, 860-73 (D.C. Cir., 1979). EPA has

authority under section 301(a)(1) of the Act, therefore, to set transitional rules which accommodate reasonably the purposes and concerns behind the two contradictory provisions. See *id.* at 873-74.

The court in *Citizens to Save Spencer County* identified those "considerations" as follows:

- (1) enhanced protection of the environmental quality of the nation's air;
- (2) minimization of economic dislocation and loss as a result of such enhanced protection;
- (3) a heightened enforcement role for states * * *; and
- (4) facilitation of an efficient administrative transition from enforcement of the "old" to "new" preconstruction review requirements. (*Id.* at 889 (footnotes omitted).)

Here, the proposed grandfather provision would reasonably accommodate those considerations. Most of the projects in question are modifications that would result in a significant net increase in the maximum controlled emissions of the "source," but not in a gross increase in uncontrolled emissions equal to or above 100 or 250 tons per year. This discrete group of small modifications, even in the aggregate, have a relatively minor effect on air quality. But, because they are numerous, delaying them by imposing new PSD requirements could frustrate economic development. The proposed provision would strike a rough balance between the benefits and the cost of applying PSD to those projects by allowing any company that has already obtained each of the preconstruction permits otherwise necessary under the SIP to proceed to construction without delay. To require such a company to obtain a PSD permit could mean substantial delays. To impose such delays here would be excessive.⁵

One commenter urged EPA to promulgate a grandfather provision that would use the date of complete application instead of the date of permit issuance. The commenter was concerned that the proposed provision would treat unfairly a company that obtained the last permit necessary under the SIP just a day or two after the date this notice appeared in the Federal Register. Use of such a date, however, might exempt many more projects from review. Hence, in EPA's view, it would fail to give adequate expression to the interests behind section 165, especially the goal of protecting air quality.

⁵Even if the conflict between sections 165(a) and 168 had not conferred on EPA the discretion to exempt certain projects that would otherwise be subject to PSD review for the first time, EPA would have authority under section 301(a)(1) to exempt those projects in order to phase-in new requirements on a reasonable schedule.

Certain commenters pointed out that a company might be unable to "commence construction" within the proposed 18-month period, because it might be unable to get sufficiently in advance any preconstruction permits that federal or state law outside the SIP might require. They recommended that EPA set the deadline 18 months from issuance of the last necessary federal authorization. That recommendation parallels a proposal EPA made in July 1979 to amend the grandfather provisions of the 1978 regulations so as to extend the "commence" construction deadlines in those provisions generally to a date nine months from the issuance of the last necessary federal authorization. See 44 FR 42722. EPA has not yet completed that rulemaking. When it does, it will decide whether to accept the recommendation of the commenters here.

EPA has decided to promulgate the grandfather provision basically as proposed. See § 52.21(i)(4)(v). The final provision contains the following clause: "the owner or operator * * * obtained all final federal, state and local preconstruction approvals or permits necessary" under the SIP by a certain date. EPA intends that clause to refer only to the date on which the reviewing authority issues the permit. For emissions increases as a result of SIP relaxations, the appropriate date is the effective date of final EPA approval. Because of the construction moratorium, 40 CFR 52.24, 44 FR 38471, some SIP permits may be issued before the time that the owner or operator is allowed to begin construction. Nevertheless, in EPA's view, the owner or operator "obtains" the permit when the reviewing authority issues it, even if permission to begin construction takes effect subsequently.

EPA received no comments on its proposal to put into regulatory language the provision in section 168(b) of the Act that only the PSD regulations in effect before August 7, 1977, apply to any project on which construction "commenced" by then. Hence, EPA is promulgating that provision basically as proposed. See section 52.21(i)(4)(i).

2. Substantive Provisions Relating to BACT.

a. *Proposed transition provisions:* In September, EPA proposed certain new substantive requirements. One of the new requirements was that a project apply BACT for each pollutant regulated under the Act that the project would emit in a significant, but "minor" amount. Under the 1978 Part 52 regulations, a project has to apply BACT only for each pollutant regulated under the Act that the project would emit in a

"major" amount. EPA added that it intended to put the new BACT requirement into effect immediately upon its promulgation.

In proposing the new BACT requirement, EPA also proposed to exempt certain projects from it. In particular, the Agency proposed not to apply the requirement to any project whose application for a PSD permit was complete before the requirement came into effect. *See 44 FR 51928, 51954 (proposed § 52.21(j)(2)).*

b. Comments and final action on proposed transition provisions relating to BACT requirements: In general, those commenting on the proposal to grandfather any project whose application was complete before the date of publication of this notice from the new BACT requirement favored such an exemption for at least those projects. Only two commenters, the same two who opposed the grandfather provision discussed above, opposed such an exemption for any project. They argued that EPA should adhere to the transitional rules that it established in the 1978 regulations, so that the new BACT requirements would apply to any project that fell or would fall within the coverage of those regulations, even to those which have already received a PSD permit.

EPA disagrees that it should or must adhere to the 1978 transitional rules in applying the new BACT requirements. As discussed above, the court in *Citizens to Save Spencer County* held that EPA has a "responsibility to harmonize the statutory provisions [sections 165(a) and 168] so as to implement the congressional mandate that new federal preconstruction review requirements be instituted promptly but with minimum economic dislocation." 600 F.2d at 851. Requiring a company which has already received a permit, or completed application for one, to amend project designs and permit applications to include BACT for pollutants to be emitted in "minor" amounts would hardly minimize economic dislocation. To the contrary, it would delay construction substantially in many cases. The benefits of that delay in those cases would probably fail to counterbalance its cost, since the new BACT requirements would apply only to pollutants this discrete group of projects would emit in "minor" amounts. Thus, applying the new BACT requirements retroactively to projects that already have a permit or a complete application would fail to give adequate expression to the economic considerations behind section 168.

Another commenter argued that the proposal did not go far enough, in that it

would require companies which on the date of promulgation were just about to file a complete application to amend project designs and applications. The commenter urged EPA to apply the new BACT requirement only to projects whose applications were not complete within one year after the date of publication of this notice in the Federal Register. That alternative, however, would fail to give adequate expression to the environmental considerations behind section 165(a). EPA therefore has rejected it, too.

Instead, EPA has decided to adopt a provision like the proposal which exempts from the new BACT requirements any project whose application was complete before this notice appears in the Federal Register. *See § 52.21(i)(9).* EPA believes that the final provision reasonably accommodates the purposes and concerns behind sections 165(a) and 168.⁶

The final provision differs from the proposed provision somewhat. First, it appears in paragraph (i), instead of paragraph (j); the provision that sets forth the general BACT requirement. EPA has sought to gather each of the exemption provisions into paragraph (i). Second, the new exemption provision exempts an eligible project from the new BACT requirement entirely, but adds that the project is subject to the BACT requirements of the 1978 regulations, if they would otherwise have applied. The purpose of that structure is in part to assure that BACT would apply to a pollutant for which the project would be "major" under the 1978 regulations, but "minor" under the new Part 52 regulations due to the new concepts of "potential to emit" and "modification."

The final Part 52 regulations contain a definition of the term "complete" in reference to an application. Under that definition an application becomes "complete" when it contains all of the information necessary for application processing.

It should be noted, finally, that the date an application was complete will generally differ from the date on which the reviewing authority makes its completeness determination, since the filing of the last necessary piece of information will typically occur before the determination is made. When EPA makes a completeness determination, it will specify the date as of which the application was "complete." That date

⁶Even if the conflict between sections 165(a) and 168 had not conferred on EPA the discretion to exempt projects with a complete application, EPA would have authority under section 301(a)(1) to exempt them, since applying the new BACT requirements to such projects would be unfair.

will be the date on which the last necessary piece of information was received. One of the provisions of the Consolidated Permit Regulations, 40 CFR 124.3(f) (discussed below), refers to the "effective date" of an application. Generally, the "effective date" of an application will follow the date it is "complete."

3. Substantive Provisions Relating to Air Quality Analyses.

a. Proposed transition provisions: Another new substantive requirement that EPA proposed in September was that an applicant provide an analysis of air quality in the area the project would affect for each pollutant regulated under the Act that the project would emit in "minor," but still significant, amounts. Under the 1978 regulations, an applicant had to provide such an analysis only for those pollutants for which the project would be "major" and for which EPA had set a national ambient air quality standard (NAAQS). The remaining new requirement was that, if the project would emit particulate matter or sulfur dioxide in a significant amount, the analysis focus on the extent to which ambient concentrations of the particular pollutant had consumed the applicable PSD increments.

In proposing the new requirements for air quality analyses, EPA also proposed to exempt certain projects from them. In particular, EPA proposed not to apply the new requirements to any project whose application was complete before the requirements came into effect. *See 44 FR 51928, 51954 (proposed § 52.21(n)(1)(i)).*

The 1978 Part 52 regulations contained a requirement that any air quality analysis for a pollutant for which a NAAQS exists ("criteria pollutant") must generally include monitoring data gathered over and relating to the year preceding the submission of a complete application. In September, EPA proposed a reformulation of that requirement. That requirement, however, when coupled with the new requirement for an analysis for each criteria pollutant emitted in "minor" amounts, could cause a prospective applicant substantial delay. As a result, EPA also proposed to require any applicant who does not file a complete application before the date of promulgation to gather monitoring data for any such "minor" pollutant only over the period (up to one year) from the date of promulgation and the date the applicant would file an otherwise complete application. *See id.* at 51928, 51954 (proposed § 52.21(n)(1)(ii)).

b. Comments and final action on transition provisions relating to air quality analysis requirements: Two.

commenters argued that EPA should adhere to the transitional rules of the 1978 regulations with respect to the new requirements for air quality analyses. In their view, the monitoring requirements should apply in general to any "major" project for which certain permits were not obtained by March 1, 1978, and on which construction had not commenced by March 19, 1979. Certain other commenters objected to any application of the new monitoring requirements to a company which, although it had not filed a complete application by the date of promulgation, had nevertheless previously undertaken a program of monitoring the EPA or a state had approved.

Some additional comments were directed to the proposed phase-in provision. Those comments contended that a prospective applicant would find it impossible to satisfy that provision, since the purchase, installation, and "debugging" of new monitoring equipment, together with the analysis of any new data, would require at least several months. Many commenters did note that the draft of the revision of the monitoring guideline would allow three months for those tasks, but asserted that even three months would generally be insufficient. See U.S. EPA, (*Draft Ambient Monitoring Guidelines for Prevention of Significant Deterioration (PSD)*, (October 1979). Some recommended an allowance of 2-5 months, others 6-9 months, and still others more than 10 months.

A number of commenters observed that the proposed regulatory language failed to embody the intent that the preamble had described. First, the proposed exemption for each "major" project whose application was complete before the date of promulgation focused only on the new requirement for an analyses for each pollutant that the project would emit in a "minor" amount. Hence, it would have failed to shield each such project from the new requirement for an analysis for each non-criteria pollutant that the project would emit in a "major" amount. Second, the provision that would have phased-in any new monitoring requirements focused only on projects whose applications were complete by the date of promulgation. Consequently, it specified no phase-in rules for projects whose applications were not complete by then, the very projects that EPA intended the rules to benefit.

Finally, one commenter pointed out an anomaly in the proposed phase-in provision: it focused only on the new requirement, in proposed § 52.21(n)(1)(iii), that an applicant

provide monitoring data for any criteria pollutant that the project would emit in "minor" amounts. As a result, the proposed provision would have required a company with a project that is "major" under the new regulations, but was not under the 1978 regulations, to gather the full amount of monitoring data for each of its "major" pollutants, but none of its "minor" pollutants. But, since the monitoring requirements would have been new for the "major" pollutants, as well as the "minor" pollutants, such a company should have protection with respect to the "major" pollutants, too.

The final transition provisions relating to the new requirements for air quality analyses adhere to the spirit of the proposed provisions, but differ substantially in structure and articulation. One of the four final provisions, § 52.21(i)(9), exempts certain sources and modifications from the new requirements with respect to monitoring entirely. It provides that those requirements shall *not* apply to a source of modification that was subject to the 1978 Part 52 regulations, if its application becomes complete on or before the date this notice appears in the Federal Register. Instead, the air quality analysis requirements in the 1978 regulations apply to the source or modification.

Two of the three remaining provisions exempt certain other sources and modifications from the new monitoring requirements for criteria and non-criteria pollutants. One of those provisions, § 52.21(i)(10)(i), exempts a source or modification that would have been subject to the 1978 Part 52 regulations from those new monitoring requirements, if its application becomes complete with respect to the requirements of the new Part 52 regulations, other than the new monitoring requirements, on or before a date ten months from the date of promulgation. The provision adds the clarification that the monitoring requirements of the 1978 regulations apply instead to the source or modification. The other exemption provision, § 52.21(i)(10)(ii), is similar. It exempts a source or modification that would not have been subject to the 1978 Part 52 regulations, if its application becomes complete with respect to the requirements of the New Part 52 regulations, other than those for monitoring, on or before a date ten months from the date this notice appears in the Federal Register.

The remaining provision, § 52.21(m)(1)(v), phases-in the monitoring requirements of new § 52.21(m)(1)(iv) to the extent that they

place monitoring burdens on an applicant that the 1978 Part 52 regulations would not have imposed. Section (m)(1)(iv) provides in general that any required air quality analysis for a criteria pollutant must include monitoring data gathered over a period of at least one year. However, the new phase-in provision establishes the general rule that for certain applications the required monitoring data shall have been gathered over a period at least equal to the period from the date six months from the date of promulgation to the date the application becomes complete, except as to the monitoring requirements of the new Part 52 regulations. The applications to which this provision applies are those which become complete, except as to those monitoring requirements, between the date ten months from promulgation and the date eighteen months from promulgation. The new phase-in provision then states three exceptions to that general rule. First, an applicant with a project that would have been subject to the 1978 Part 52 regulations must provide at least whatever monitoring data the 1978 Part 52 regulations would have required the applicant to provide. Second, if the Administrator determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a shorter period (not to be less than four months), the required data may be gathered over at least that shorter period. Finally, if the monitoring data would relate exclusively to ozone and would not have been required under the 1978 regulations, the Administrator may waive the otherwise applicable requirements of the phase-in provision to the extent that the applicant shows that the monitoring data would be unrepresentative of air quality over a full year.

The following example illustrates how the proposed phase-in provision works. A company proposes to construct a new plant that would emit sulfur dioxide and particulate matter. Under both the new Part 52 regulations and the 1978 regulations, the plant would be "major" for sulfur dioxide and "minor" for particulate matter. The emissions of particulate matter would not be *de minimis*. But for the phase-in provision, the new Part 52 regulations would require an application for a permit for the plant to contain a year's worth of monitoring data for both sulfur dioxide and particulate matter. (This assumes that the Administrator does not determine that a complete and adequate analysis could be accomplished with data gathered over a shorter period.)

The 1978 regulations would have required the application to contain a year's worth of data for just sulfur dioxide. The company submits an application which becomes complete, except with respect to monitoring, at the end of the fifteenth month after promulgation. Under the phase-in provision, the application must contain (1) a year's worth of monitoring data for sulfur dioxide and (2) nine months' worth of data for particulate matter.

The four final provisions embody EPA's response to the comments on the proposals. First, EPA has adopted the fundamental approach of the proposal, which was to apply the new monitoring requirements prospectively only. EPA has concluded that that approach reasonably accommodates the purposes and concerns of sections 165(a) and (e)(2), on the one hand, and section 168, on the other. In brief, the approach institutes the new requirements promptly, but with minimum economic dislocation. See *Citizens To Save Spencer County v. EPA*, 600 F.2d at 851. Full and immediate application of the new monitoring requirements would have caused substantial delays in the submission of complete applications and hence the issuance of permits, but provided little direct environmental benefit in return. As for applicants who undertook an approved program of monitoring before the date of this notice, the phase-in provision affords them adequate protection from delay, while at the same time generally demanding as much compliance with the new monitoring requirements as possible.⁷ In short, EPA disagreed with the commenters who complained that the proposals would have instituted the new requirements too late, and with those who complained that the proposals would have instituted them too soon.

Second, with respect to the new monitoring requirements for criteria and non-criteria pollutants, EPA has established a grace period of ten months in the final grandfather provisions. It has done so because it agrees with the commenters who asserted that instituting a new monitoring program and analyzing the data it generates requires more than three months in many, if not most, circumstances. EPA has selected a grace period of ten months with respect to monitoring for both criteria and non-criteria pollutants, first, because six months is an estimate

of the amount of time that would generally be needed to complete those tasks and, second, because there is little usefulness to less than four months of data for most pollutants.

The promulgated provisions cure the ambiguities in the proposal observed by some commenters. Section 52.21(i)(10) exempts an eligible project from the requirements relating, not only to any non-criteria pollutant that it would emit in "minor" amounts, but also to any non-criteria pollutant that it would emit in "major" amounts. In addition, the phase-in provisions now deal explicitly with projects whose applications were *not* complete by the applicable deadline. Finally, § 52.21(i)(10) protects not only projects that were subject to the 1978 regulations, but also projects that were not subject to them.

4. Comments on the effective date of the substantive provisions.

In proposing the new substantive provisions relating to BACT and air quality analyses, the Agency stated that it intended to put those new provisions into effect immediately upon their promulgation. One commenter contended that EPA should put the new provisions into effect 30 days after promulgation, rather than immediately on the date of promulgation, so that "potential applicants [would have] sufficient lead time in planning modifications and new sources." With respect to the new provisions relating to air quality monitoring, the 10-month grace period and phase-in provision described above should satisfy the concerns of the commenter. With respect to the new BACT provisions, however, EPA disagrees. Prospective applicants have had ample warning of the new BACT provisions. The court in *Alabama Power* held in June of 1979 that Congress intended them to be imposed and in September 1979 EPA specified when it intended to impose them. Therefore, there is good cause to make these requirements immediately effective. The Administrative Procedure Act (APA), moreover, would not require a 30-day delay in implementation, since the provisions amount to legal interpretations. See APA section 4(d)(2), 5 U.S.C. section 553(d)(2).

5. New Provisions Governing Procedure.

EPA recently promulgated regulations aimed at consolidating and unifying various permit requirements and procedures. See 45 FR 33290 (May 19, 1979) (the "Consolidated Permit Regulations"). Those new regulations contain provisions which will govern the processing of applications for permits under the Part 52 PSD regulations. Those provisions appear as 40 CFR 124.1-

124.21 and 124.41-124.42, 45 FR 33485-93. Paragraph (r) of the 1978 Part 52 regulations has governed the processing of PSD permit applications under those 1978 regulations.

The Consolidated Permit Regulations contain a provision, section 124.21, which describes the transition from the procedures of paragraph (r) to the new consolidated permit procedures. It provides that those new procedures shall "apply to PSD proceedings in progress on July 18, 1980." 45 FR 33492. It adds that the requirements of sections 124.9 and 124.18, which would require the preparation of a formal administrative record, shall apply only to "PSD permits for which draft permits [i.e., preliminary determinations] were prepared after the effective date of these regulations." *Id.*

In promulgating the new Part 52 regulations, EPA has adopted a new paragraph (q). It states that the new consolidated permit procedures govern the processing of PSD permit applications to the extent that they apply. It adds that the procedures of the 1978 Part 52 regulations continue to apply to the extent that the new procedures have not yet displaced them. In time, the new procedures will displace the old ones entirely.

B. Part 51 PSD Regulations

In September, EPA did not propose an amendments to the 1978 Part 51 regulations that paralleled the proposed Part 52 transition provisions. The Part 51 amendments that EPA did propose paralleled only the Part 52 provisions that would affect coverage and substance. The few comments that were submitted focused on this gap.

One commenter asked that EPA state in the Part 51 regulations that a state which has already adopted and obtained EPA approval of its own PSD program may, in conforming that program to the new Part 51 regulations, adopt a rescission provision like new § 52.21(w) into its plan. EPA believes that it is unnecessary to make such a statement in regulatory form. A state is free, in any event, to adopt such a provision and EPA would approve it.

Another commenter asked EPA to establish in the Part 51 regulations that a state with its own PSD program, in adopting new, more stringent requirements for BACT and air quality assessments in accordance with the new Part 51 regulations, may also adopt grandfather provisions that would apply the new requirements prospectively. In response, EPA had added a new section 51.24(a)(6) to the Part 51 regulations. The new section provides that PSD SIP revision may operate prospectively,

⁷Even if the conflict between sections 165(e), 165(e)(2), and 168 had not conferred on EPA the discretion to exempt certain projects from the new air quality analysis requirements, EPA would have had authority under section 301(a)(1) to exempt those projects, because application of those requirements would have been unfair.

thereby establishing that a state may adopt grandfather provisions of that sort. It adds, however, that the revision must take effect no later than the date of its approval. EPA has also added a new section 51.24(i)(9) to the Part 51 regulations. It provides that an approval revision to a state PSD program, which program EPA has already approved, may contain transition provisions that parallel the new Part 52 transition provisions. The new section also establishes that the proposed transition provisions must operate at least as stringently as their Part 52 counterpart would in the context of the state PSD program.

Finally, a third commenter urged EPA to require a state with its own PSD program to delete these aspects of the plan that go beyond the requirements of the new Part 51 regulations within nine months after the date of promulgation of those new regulations, unless the state within that period of time submits "to EPA written acknowledgment that it is not required by federal law to include such provisions in its state plan, but has nevertheless elected to do so under state law pursuant to section 116 of the Act." The commenter feared that, absent such a requirement, inertia and lack of resources might prevent some states from deleting the provisions in question. Such a requirement, however, would interfere unnecessarily in the affairs of a state. EPA, moreover, doubts that it would have the authority in any event to repeal the more stringent aspects of a state plan simply because the state failed to say by a certain time that it wanted to retain those aspects. EPA therefore has not promulgated the requirement sought by the commenter.

After examining the Part 51 regulations in response to those comments, EPA has decided to add two new provisions. The first, section 51.24(a)(6), merely states in regulatory form what section 406(d)(2)(B) of the Clean Air Act Amendments of 1977 already states: any PSD SIP revision required by the new Part 51 regulations must be adopted and submitted within nine months of the date this notice appears in the Federal Register. The second provision, § 51.24(a)(6)(ii), establishes explicitly that any PSD SIP revision must contain provisions which describe when and as to what sources and modifications the revision is to take effect. The purpose of that requirement is merely to minimize confusion and uncertainty during the transition from any old to new PSD SIP requirements.

C. Offset Ruling

The amendments to the Offset Ruling which EPA is announcing in this notice

expand its coverage, just as the amendments to the Part 52 PSD regulations expand its coverage. In EPA's view, the expansion of the coverage of the Offset Ruling should operate prospectively only. Hence, it has inserted into the Ruling a grandfather provision that parallels the relevant PSD grandfather provision. It provides that the Ruling does not apply to any source or modification that was not subject to the version of the Ruling in effect prior to the date this notice appears in the Federal Register, if all necessary SIP permits were obtained for the source or modification by that date and if construction commences within 18 months of that date.

D. Part 51 Nonattainment Regulations

Pursuant to section 406(d)(2)(B) of the Clean Air Act Amendments of 1977, states will have nine months after the date of this notice appears in the Federal Register in which to adopt and submit any new definitions and other regulatory provisions required by new 40 CFR 51.18(j). States need not adopt verbatim the definitions in section 51.18(j)(1), but they must demonstrate that any different definitions they retain or adopt have the effect of being at least as stringent as those set out in § 51.18(j)(1). If a state plan currently includes definitions or regulatory provisions which are more stringent than the nonattainment definitions and other provisions contained in these final rules, the state has the choice of retaining its current regulations or of revising them so as to conform to EPA's rules. If a state does not submit any necessary revisions to its plan within nine months after the date this notice appears in the Federal Register, the construction moratorium will go into effect 15 months after this date in all nonattainment areas in that state. The additional 6 months is consistent with the review period allotted for Part D submitted under section 110(a)(2)(I) and 129(c) of Pub. L. 95-95.

EPA received only one comment on transitional requirements for § 51.18(j). This commenter requested that EPA allow states which have already adopted NSR regulations pursuant to section 173 of the Act be permitted to adopt a rescission provision like that of § 52.21(w). EPA believes that to make such a statement in regulatory form is unnecessary. A state is free to adopt such a provision, and EPA will approve it, provided that the state's NSR program meets the requirements of section 173 and that permit rescission will not interfere with reasonable further progress or attainment of ambient air quality standards.

E. Construction Moratorium

The amendments to the construction moratorium expand its coverage in some ways, too. Hence, EPA has promulgated a grandfather provision patterned after the relevant PSD and Offset Ruling provisions. It appears as § 52.24(g).

F. Pending SIP Revisions

By the date this notice appears in the Federal Register, EPA will not have taken final action on many PSD and nonattainment SIP revisions that states have already submitted. EPA intends to review those pending revisions under the requirements that applied to them before the date of promulgation. To wait until a state had revised its revisions to bring them into line with the new PSD and nonattainment requirements would cause the state and its industry to suffer a heavy and undue burden, particularly in those cases where approval of a Part D plan is needed to lift the construction moratorium.

G. Effective Date of the Nonattainment Provisions

EPA has made all of the new nonattainment provisions announced here effective immediately upon their promulgation. EPA finds that it has "good cause" within the meaning of the relevant provisions of the Administrative Procedure Act to do so. First, the new provisions in the main provide relief from pre-existing regulatory burdens. Second, the decision in *Alabama Power* and the September 1979 proposal provided ample warning of the new changes. Finally, it is important for planning and management by EPA, the states and industry that these new provisions come into effect as soon as possible.

H. Miscellaneous

Under the amendments announced in this notice, each set of PSD and nonattainment regulations uses the phrase "this section" at some points and phrases such as "40 CFR 52.21" at other points. EPA intends "this section," when used in a particular set of regulations to refer only to the version of the regulations which has resulted from the amendments announced here. For example, the phrase "this section" in new § 52.21(i)(1)(i) refers only to the Part 52 PSD regulations as newly constituted. EPA intends phrases such as "40 CFR 52.21" to refer to any version of the particular regulations which has appeared or is to appear at the particular location in the Code of Federal Regulations. For example, "40 CFR 52.21" refers to each version of the Part 52 PSD regulations that has ever

existed, including the version that has resulted from the amendments announced here.

V. Potential to Emit

The preconstruction review requirements of section 165 of the Act apply to any "major emitting facility." 42 U.S.C. 7475. Pursuant to section 169(1), that term includes any stationary source which emits or has the "potential to emit" 100 tons per year or more of any pollutant, for sources included in one of 28 specified source categories, or 250 tons per year or more of any pollutant for any other type of source. 42 U.S.C. 7479(1).

A. Control Equipment

Obviously, many more sources would be affected if the term "potential to emit" referred to the amount of pollution that a source would emit without controls than if it took the operation of control equipment into account. In the PSD regulations promulgated on June 19, 1978, EPA took the former approach and defined "potential to emit" as "the capability at maximum capacity to emit a pollutant in the absence of air pollution control equipment." 40 CFR 51.24(b)(3), 52.21(b)(3) (1979). This approach was rejected by the *Alabama Power* decision which held that Congress intended that, in determining a facility's potential to emit, EPA "must look to the facility's 'design capacity' a concept which not only includes a facility's maximum productive capacity (a criterion employed by EPA) but also takes into account the anticipated functioning of the air pollution control equipment designed into the facility." 13 ERC 1993, 2003.

In response to the court's decision, EPA proposed, on September 5, 1979, a revised definition under which the application of control equipment would be taken into account in computing potential emissions. That approach, which was very strongly supported by public comments, is now being promulgated. 40 CFR 51.24(b)(5) and 52.21(b)(5).

The proposal noted that EPA will assume that a facility's air pollution control equipment will function in the manner reasonably anticipated. In this promulgation the Administrator is implementing the proposed approach by requiring that operation of control equipment be an enforceable requirement. In other words, a company may receive credit for the application of control equipment only to the extent that the resulting reduction in emissions is federally enforceable (see below). This provision is necessary, as a practical matter, to ensure that sources

will perform the proper operation and maintenance for the control equipment. Thus, a source installing control equipment that would reduce emissions more than that required by generally applicable emissions limitations cannot receive credit for the additional increment of pollution reduction, unless it is federally enforceable. The definition of "potential to emit" is being modified appropriately.

Under the definition being promulgated, the potential to emit of existing sources with respect to the treatment of enforceable in-place control equipment shall be defined in the same fashion as discussed above for new sources. This responds to commenters who complained of this discrepancy in the September 5 proposal. Accordingly, potential to emit for all sources means the ability at maximum design capacity to emit air pollution, taking into account any *in-place* control equipment. Design capacity, and thus potential to emit, may be further limited if control equipment better than that normally required by the applicable SIP is installed and a correspondingly more stringent level of emissions control is included as an enforceable permit condition. Finally, it should be noted that the potential to emit of a stationary source in today's rule is of primary importance in defining when a source would be major; it is not generally used in determining increment consumption or the baseline for assessing emission increases and decreases at a source (see Modification).

B. Continuous Operation

Under the existing definition of "potential to emit," a source can avoid PSD review if it binds itself, in a federally enforceable permit, to sufficiently limited hours of operation. 40 CFR 51.24(v)(5), 52.21(b)(5) (1979). In the September 5, 1979 proposal, EPA proposed to delete the clause which allows such adjustments and to presume continuous (24 hours per day, 365 days per year) operation. Consistent with that change, EPA also proposed to delete, from the same regulation, the words "or amount"; those words at present allow permit limitations on amount of materials combusted, processed, or stored to be considered in computing potential to emit. In making this proposal, the Administrator also requested comment on the need to adjust the assumption of continuous operation, in the case of sources which are physically incapable of such operation.

Many commenters (169 of 173) have strongly criticized this proposal, the most frequent response being that few

sources operate constantly, and most cannot do so. These commenters also advised the Agency of certain benefits which would accrue from allowance of permit conditions in computing potential to emit. For example, a benefit noted is that such an approach would better relate the PSD permit applicability of new sources to the offset potential of existing sources, and to how the increment would be consumed. This approach was also claimed to be consistent with EPA's stated goal of developing PSD requirements which will fit into state programs in such a way as to minimize disruption of those programs and promote PSD SIP development by the states. Additionally, insignificant reviews would be minimized and PSD applicability would be more reflective of emissions actually produced by the source.

There was some comment in support of the proposal. A state environmental agency noted that emissions limits calculated from less than continuous operation are less easily enforceable than those which are based on continuous operation. An environmental group supported the proposal on the grounds that it is consistent with the interpretation of "full design capacity," that it would be appropriately technology-forcing, and that it is necessary to protect the short term increment. These concerns are addressed below.

The court based its definition of "potential to emit" on the source's full-design capacity. *Id.* at 2003. The June opinion in *Alabama Power* did not directly address the acceptability of legal limitations on operation but did stress design capacity in the sense of physical and technological, as opposed to operational, limitations. However, in the final opinion, released on December 14, 1979, the court stated:

The design capacity of a facility rarely contemplates uninterrupted operation 24 hours per day, 365 days per year. Projected downtime for repairs and maintenance or other factors may reduce the hours of operation that are appropriately considered in the calculation of a facility's "potential to emit." (*Id.* at 2005, n. 73.) (Emphasis added)

EPA interprets this language as not precluding permit conditions, that are federally enforceable under the applicable SIP, from circumscribing a source's potential to emit. In view of the above, the Agency believes it has discretion to adopt the most reasonable approach to this issue and has, therefore, reconsidered its proposal. Today's regulations recognize the ability of all federally enforceable limitations to constrain the potential to emit of a stationary source.

The Administrator believes that the policy concerning "enforceable permit conditions" is responsive to most of the concerns raised by commenters who were critical of EPA's proposal. New sources are now allowed to avoid NSR for PSD and nonattainment areas by limiting their type or amount of operation. Moreover, potential to emit is now defined in the same way for new and existing stationary sources. The use of certain permit conditions also addresses the concerns raised regarding physical incapability and peak load or standby units. This is, source owners or operators can now agree to source-specific permit conditions to limit their operation as appropriate. Such conditions can make infrequent operation and other physically limiting factors outside the design capacity of an emissions unit legally enforceable and can thereby limit the applicability of NSR.

The final policy concerning enforceable permit conditions has also taken in account the concerns of those favoring the proposal. One commenter noted that limited operation conditions would require greater enforcement attention. The Administrator agrees, but he believes that such conditions can be reasonably enforced. Another commenter also noted the need to minimize any air quality threats to short term increments by sources with intermittent operation but high short term rates of emission. No commenter presented a solution to this problem. EPA believes, however, that short term emissions limitations can be computed to address threats to short term increments, should any problems actually arise. It would be the responsibility of the reviewing authority to identify, in periodic evaluations, any sources causing such problems and apply appropriate limitations on their emissions. The Administrator will consider rulemaking to develop short term applicability thresholds, if necessary, after a reasonable amount of review experience has been developed.

Finally, as a result of today's policy, a potential problem exists concerning the future relaxation of a preconstruction permit that previously caused a proposed stationary source to enjoy minor rather than major status. For example, a source might evade NSR through agreement to unrealistically stringent operating limitations in its permit, and later obtain a relaxation of the condition. The Agency believes that the problem can be dealt with by 40 CFR 52.21(r)(4), entitled "Source Obligation." That paragraph provides that any owner or operator of a source, who would

receive a relaxation of a permit condition that had enabled avoidance of NSR, would then become subject to review for all units subject to the original permit, as if they were new sources. In other words, if operational limitations are to be considered as an aspect of a source's design, it is reasonable that the permit accurately incorporate that design. If such operation is changed, the permit, and concomitant obligations, should be correspondingly changed.

C. Additional Guidance

Fugitive emissions under today's regulations are applicable in defining potential to emit. (See Fugitive Emissions.) However, like the proposal, such emissions do not count in assessing permit applicability unless a specified type of source category is involved. To accomplish this a specific exemption has been added to the final regulations by which fugitive emissions will be included in determining potential to emit only for specified source categories.

The definition of "potential to emit" is important not only to PSD preconstruction review, but also to NSR under the Offset Ruling (44 FR 3274), the statutory requirements for nonattainment areas, and the restrictions on construction in sections 110(a)(2)(I) and 173(4) of the Act. EPA is promulgating for each of those nonattainment programs the same definition of "potential to emit" that it is promulgating for the PSD program, as well as a provision like § 52.21(r)(4). EPA also intends this definition to be implemented for those programs in the same way as for PSD.

EPA has traditionally distinguished, for the purpose of NSR, between the direct emissions of a source and its "secondary emissions." (See Additional Issues.) In revising the Offset Ruling in January 1979 the Agency added a definition of "secondary emissions" and a provision describing for what purposes and under what circumstances those emissions are to be taken into account. See 44 FR 3281, 3283-84 (January 16, 1979). EPA is now adding that concept to the PSD regulations and to the nonattainment provisions relating to NSR and the restrictions on construction. For each of those sets of provisions "secondary emissions" are to be excluded in determining whether the regulations apply to a source (*i.e.*, whether a source or modification is "major"). Similarly, the control technology requirements of BACT and lowest achievable emission rate (LAER) do not apply to secondary emissions. How the Agency would treat those emissions for other purposes, including

PSD air quality impact analysis, is described in Additional Issues.

VI. 50-Ton Exemption

Under the 1978 PSD regulations, stationary sources or modifications with allowable emissions of less than 50 tons per year, 1000 pounds per day, or 100 pounds per hour were in general exempted from the BACT and ambient air quality analysis PSD requirements. 40 CFR 51.24(j)(2), (k), and 52.21(j)(2), (k) (1979). In its preliminary *per curiam* decision the court thought that its ruling on "potential to emit" made a ruling on the 50-ton exemption "academic," since no 50-ton source would ever be major if "potential to emit" referred to controlled emissions. 13 ERC at 1228-29.

Nevertheless, it remanded the exemption to the Agency for reconsideration and noted that the Agency had exceeded its authority in establishing the exemption. In response, EPA proposed to delete the provisions which embodied the exemption, and to delete parallel provisions in the Offset Ruling. EPA, however, proposed adding to the PSD regulations a 50-ton exemption for certain modifications. The proposed exemption tracked section 165(b) of the Act closely, but not exactly. Essentially it provided that a source qualifying for the exemption would face a limited air quality review for SO₂ and PM. Use of the exemption would be restricted to modifications, at a plant existing as of August 7, 1977, entailing emissions increases of 50 tons or less of any pollutant after application of BACT and which would impact no Class I area or interfere with the attainment of PM or SO₂ standards. All net emission changes since August 7, 1977 would be aggregated in applying the exemption.

All of the seventeen commenters who focused on the proposed provision expressed general agreement with this approach, but some commenters stated that the exemption should be broader. For example, four commenters wanted an additional 50-ton exemption after each full review. Five commenters requested a special, more lenient, review for pollutants whose emissions rates fall between 50 tons per year and the *de minimis* level in those cases where the exemption would not apply. The Administrator finds no grounds for providing additional exemptions after each review. Similarly, there is no justification or authority under section 165(b) for a special limited review for emissions increases falling between *de minimis* amounts and the 50-ton level. A few commenters suggested that other eligibility values than 50 tons be used. EPA responds that section 165 of the Act

mandates the 50-ton figure, but that much of these commenters' concerns are dealt with by the *de minimis* provisions being promulgated today. Two other commenters requested that the exemption be governed by net emissions increases. Today's regulations provide that review is applicable to net emissions increases, thus addressing the concerns of the two commenters cited above. With this exception, and the two noted below, the 50-ton exemption is being promulgated as proposed.

Some commenters pointed out that EPA's proposed 50-ton exemption clause was more limited in its application than the Clean Air Act language of section 165(b), in that the September 5 proposal contained additional consideration of Class I area impacts (e.g., 44 FR 51949, 40 CFR 51.24(k)(2)(i)). EPA agrees with these commenters and has eliminated that portion of the 50-ton exemption language dealing with Class I areas. See 40 CFR 51.24(i)(7) and 52.21(i)(7).

The 50-ton exemption contained in the Act made those sources existing as of August 7, 1977, eligible for the exemption; the same applicability date was proposed in September 1979 for this revised exemption. The *Alabama Power* final opinion suggested that EPA had authority to conform the eligibility date for the section 165(b) exemption to the "effective date" of the preconstruction permit requirements of the 1978 regulations, i.e., March 1, 1978. In the January 30, 1980 Federal Register notice EPA sought comment on changing the eligibility date and on whether March 1, 1978 would be the appropriate choice.

Twenty-four commenters addressed the issue of the eligibility date. Nineteen of these favored a date of March 1 or 19, 1978. Four wanted the date to be that of the final promulgation of these regulations. One commenter disagreed with the date change because it considers the exemption itself to be unauthorized; however, the Act clearly provides for the exemption, as explained elsewhere in this section. One industrial group alleged that the date of promulgation would be the proper eligibility date for the specific case of fugitive emissions, in that fugitives were not regulated as of March 1, 1978. This is apparently a reference to the fact that rulemaking relative to potential to emit (see Potential To Emit) had not yet been performed. In fact, though, fugitive emissions were covered by the 1978 regulations and the calculation of potential to emit does not change that circumstance. The commenters preferring March 19 to March 1 referred to a statement in *Alabama Power* that March 19, 1978 is the "effective date" of

the regulations. 13 ERC at 2006, n.79. The "effective date" of those regulations is, however, March 1, 1978. See *Citizens to Preserve Spencer County v. EPA*, 12 ERC 1961, 1978; and Preamble to 1978 Regulations, 43 FR 26380, 26390. Concerning the comments favoring the date of this promulgation as the eligibility date, the Administrator notes that section 165(b) of the Act limits eligibility for the 50-ton exemption to those sources in existence on the date of enactment of the 1977 Amendments to the Act. For the reasons noted in the *Alabama Power* decision, EPA has authority to extend eligibility to March 1, 1978. However, the Agency cannot extend this deadline to today's promulgation. For these reasons March 1, 1978 is now promulgated as the eligibility date for the 50-ton exemption.

VII. Fugitive Emissions

For PSD determinations prior to the *Alabama Power* decision, EPA considered all reasonably quantifiable emissions of a pollutant—including both point emissions (e.g., from a stack or chimney) and fugitive emissions—on the ground that the emissions deteriorate air quality regardless of how they emanate. This practice applied to calculations of a source's emissions and potential emissions of a given pollutant both: (1) for the threshold determination under section 169(1) of whether the source was a "major emitting facility" subject to section 165, and (2) for the permitting requirements of section 165 itself.

The *Alabama Power* court upheld EPA's practice for the latter purpose, and confirmed that:

The terms of section 165, which detail the preconstruction review and permit requirements for each new or modified "major emitting facility" apply with equal force to fugitive emissions and emissions from industrial point sources.

* * * * *

EPA is correct that a major emitting facility is subject to the requirements of section 165 for each pollutant it emits irrespective of the manner in which it is emitted. [13 ERC at 2016-2017.]

However, as to the first practice, the court held that section 169(1) is controlled by the rulemaking provision of section 302(j), and that fugitive emissions of a given pollutant may be included in the threshold calculation under section 169(1) only if the Administrator first determines, by rule, that they are to be included.

Accordingly, as part of the September 5, 1979 rulemaking proposal, the Administrator identified 27 categories of stationary sources for which he proposed to include fugitive emissions in threshold calculations of "major

emitting facility" status for purposes of both section 165 and new source review regulations. Numerous commenters responded that the Administrator's proposal did not constitute "adequate" rulemaking, and that fugitive emissions could not be included in threshold calculations unless the rulemaking also established, on an industry-by-industry basis, methods for quantification of fugitive emissions and for analysis of their impacts on air quality, and included the identification of effective techniques for their control. EPA has considered these comments, but believes that Congress intended the rulemaking provision of section 302(j) to serve a much simpler and narrower purpose.

As the court itself noted, "[t]he legislative history of this rulemaking provision is sparse," and it is therefore particularly difficult to discern Congress' motivation for including it. 13 ERC at 2017. In general, section 302(j) sets out the criteria for determining whether a source is "major" and hence subject to the stringent requirements of certain key provisions of the Act. Congress clearly intended such determinations to always include point emissions, the type most commonly associated with major polluters. It also expressed its affirmative intent not to exclude "non-point" or "fugitive" emissions from those determinations:

[T]he "major stationary source" definition is clarified to indicate the inclusion of major sources of fugitive emissions (last year's bill was unclear in this respect) * * *. [H.R. Rep. 95-294, 95th Cong. 1st Sess. 4 (1977).]

Rather than include fugitive emissions across-the-board, however, Congress left it to the Administrator to determine for which particular categories of sources fugitive emissions will be included in threshold calculations.

EPA therefore believes that the purpose of the rulemaking under section 302(j) is to afford members of affected categories of sources an opportunity to comment on the Administrator's determination to include fugitive emissions in the threshold calculation, and to allow them to present factual or policy arguments in support of claims that it would *not* be appropriate to do so. Although many such presentations will be technically oriented, EPA does not agree that section 302(j) requires the formal promulgation of measurement, modeling or control techniques or guidelines, because the fundamental decision which the Administrator is making under section 302(j) is whether fugitive emissions should be included in threshold calculations.

EPA finds support for this interpretation of section 302(j) in the fact that section 165 does *not* contain any rulemaking provision governing the substantive regulation of fugitive emissions. As explained earlier, the Alabama Power court confirmed that once a source is determined to be a major emitting facility under section 169(1), the substantive preconstruction review and permitting requirements of section 165 "apply with equal force to fugitive emissions and emissions from industrial point sources." In other words, even if fugitive emissions remain excluded from threshold calculations, section 165 requires that fugitive emissions be taken into account in determinations of whether NAAQS or allowable increments will be violated (section 165(a)(3)) and that fugitive emissions be subjected to BACT requirements (section 165(a)(4)). But these substantive provisions do *not* require EPA's prior promulgation of technical rules governing measurement, analysis or control such as those which the commenters suggest are necessary under section 302(j). Since the determination to include fugitive emissions in threshold applicability calculations is discretionary under sections 302(j) and 169(1), while the substantive regulation of fugitive emissions from all major emitting facilities is mandatory under section 165, EPA does not believe that the rulemaking provision of section 302(j) was intended to require the promulgation of such technical guidelines or regulations.

EPA therefore concludes that the rulemaking which it conducted was "adequate" under section 302(j) since affected sources were afforded the opportunity to comment upon the proposed inclusion of fugitive emissions in their threshold calculations. EPA's responses to more specific comments are set out below. Several commenters objected that the first 26 specific categories of sources identified in the proposal (as sources whose fugitive emissions would be taken into account in threshold calculations) were virtually identical to the 28 categories of sources identified in section 169(1) as sources with threshold tonnages of 100 tons per year (rather than 250 tons per year) for determinations of "major emitting facility" status.⁸ The commenter's complained that by merely copying the 28 sources without any other supporting

rationale, EPA failed to conduct proper rulemaking.

Although it is true that the two lists are virtually identical, it is not true that EPA failed to conduct proper rulemaking. To the contrary, the Administrator recognized that in specifically identifying 28 categories of sources in section 169(1), "Congress' intention was to identify facilities which, due to their size, are financially able to bear the substantial regulatory costs imposed by the PSD provisions and which, as a group, are primarily responsible for emission of the deleterious pollutants that besoul our nation's air."¹³ ERC at 2003. In light of that intent, the Administrator initially determined that as a matter of policy, it would be appropriate to count *all* emissions—including fugitive emissions—in threshold calculations of applicability for those 28 categories. The proposal reflected that determination as well as the Administrator's observation that, because those sources have traditionally been considered the major polluters in the country, EPA's experience in quantifying fugitive emissions from them is, in general, greater than its experience in doing so for other sources.⁹

(EPA-450/3-77-010)

Several commenters pointed out, however, that the two lists were not identical insofar as certain restrictions or limitations for six categories of sources in the section 169(1) list were not reflected in the proposed section 302(j) list. Specifically, the section 169(1) list includes only the following (the italicized portions were omitted from the proposal): fossil-fuel fired steam electric plants *of more than two-hundred-and-fifty million British thermal units per hour heat input*; coal cleaning plants (*thermal dryers*); municipal incinerators *capable of charging more than two-hundred-and-fifty tons of refuse per day*; carbon black plants (*furnace process*); fossil-fuel boilers *of more than two-hundred-and-fifty million British thermal units per hour heat input*; and petroleum storage and transfer facilities *with a capacity exceeding three-hundred-thousand barrels*. These discrepancies are the result of an inadvertent administrative error, since EPA intended to identify in the proposed section 302(j) list the same categories of sources identified by Congress in the section 169(1) list. Accordingly, the final list promulgated today reflects the qualifying descriptions specified above for the six categories of sources. Several commenters objected to the last category on the list of sources for which the Administrator proposed to include fugitive emissions in threshold calculations—namely, "any other stationary source category which, at the time of the applicability determination, is being regulated under section 111 or 112 of the Act." Section 111 concerns the establishment of standards of performance for new stationary sources (new source performance standards or NSPS) and section 112 concerns the establishment of national emissions standards for hazardous air pollutants (NESHAP). The commenters argued that the focus of these provisions is on emissions controls rather than on ambient air quality, and that there is therefore no logical link to support the automatic inclusion of fugitive emissions from a source for PSD threshold calculation purposes simply because the source is being regulated under section 111 or section 112. EPA disagrees with some of the commenters' assumptions and characterizations of NSPS and NESHAP regulation, but concludes for other reasons that the last category should be revised to apply only to sources which are being regulated under section 111 or section 112 as of the effective date of the amended PSD and NSR regulations.

⁸The apparent discrepancy in the number of categories (i.e., 26 versus 28) is explained by the fact that the September 5, 1979 proposal listed hydrofluoric, sulfuric and nitric acid plants together in a single subheading.

⁹For example, EPA has previously published fugitive emissions data for many of the identified categories of sources:

The commenters contend that since an NSPS under section 111 merely reflects, for a category of sources, an emissions limitation which is achievable through the best system of continuous emissions reduction which "the Administrator determines has been adequately demonstrated," the establishment of an NSPS for a source is unrelated to the ambient air quality considerations which are at the heart of PSD review. What the commenters overlook, however, is that under section 111(b)(1)(B), NSPS are only promulgated for categories of stationary sources which have been included in a list under section 111(b)(1)(A); and section 111(b)(1)(A) directs the Administrator to "include a category of sources in such list if in his judgment it causes, or contributes significantly to, air pollution which may reasonably be anticipated to endanger public health or welfare." In other words, although the NSPS itself may be based on technological considerations, the decision to develop the NSPS is clearly based on ambient air quality concerns. Moreover, under section 112, ambient air quality is clearly a compelling concern because a hazardous air pollutant to which a NESHAP will apply is one "which in the judgment of the Administrator causes, or contributes to, air pollution which may reasonably be anticipated to result in an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness."

In short, categories of sources are regulated under section 111 or section 112 on the basis of determinations by the Administrator that their emissions seriously and adversely impact ambient air quality, and the Administrator therefore determined that it would be appropriate to include their fugitive emissions in their threshold calculations for purposes of PSD and NSR review and regulation. That basic policy determination is being finalized today.

At the same time, however, EPA believes that the comments about "automatic" inclusion of categories of sources which are not now regulated under section 111 or section 112, but which may be regulated thereunder at some point in the future, raise valid concerns. Although EPA believes that the same basic policy considerations would support the inclusion of fugitive emissions for such categories of sources, EPA recognizes that unless a source had affirmative notice during this rulemaking that it will be regulated in the future under section 111 or section 112, it will not really have been afforded a meaningful opportunity to comment on the proposed inclusion of its fugitive

emissions in its threshold calculations. Accordingly, EPA has determined to limit the scope of the last category on the proposed list to sources which are being regulated under section 111 or section 112 as of the effective date of these amended PSD and NSR regulations. At the time of any future rulemaking under section 111 or section 112 proposing to regulate additional categories of sources, EPA will conduct parallel section 302(j) rulemaking concerning the proposed inclusion of fugitive emissions in threshold calculations. On the issue of the appropriateness of including fugitive emissions in threshold calculations for particular categories of sources, the basic objection expressed by most commenters was that fugitive emissions data were either unavailable or inadequate, and that it would therefore be inappropriate to include fugitive emissions in threshold calculations for a particular category.

In response, EPA notes that such concerns should and will be addressed in the context of particular applicability determinations, but that they have not changed the basic policy decision made by the Administrator under section 302(j). As explained earlier, fugitive emissions *must* be taken into account under section 165 in determining the impact on ambient air quality of a proposed new source and the BACT requirements which will apply to it, even if there are no existing fugitive emissions data, or if the available data are crude. Obviously, the nature and extent of the available data and technologies are important factors in determining how fugitive emissions should be taken into account and how they should be regulated under the review and permitting process of section 165; but those factors will not avoid or eliminate the consideration of fugitive emissions under that process. Similarly, although the issue of quantification may be relevant to particular applicability determinations, EPA does not believe that that issue alone is critical in determining whether, as a general policy matter, it is appropriate to include fugitive emissions in threshold calculations for a particular category of sources.

EPA emphasizes, however, that fugitive emissions from a source in one of the listed categories will only be included in threshold calculations "to the extent quantifiable." EPA's intent was and is to provide sources the flexibility to explore with the reviewing authority in the context of a particular applicability determination, issues of quantification which might be peculiar

to an individual source. (Of course, fugitive emissions will not have to be quantified for threshold purposes if the source would qualify as a "major emitting facility" on the basis of point emissions alone, a situation which EPA believes will occur more often than not.) As indicated above, EPA has in the past published data and other information relating to the quantification of fugitive emissions for various categories of sources and, as some commenters noted, additional data and information are currently under development. EPA considers these publications concerning quantification of fugitive emissions as guidance to be used as the starting point for analysis, not as methodology or data which must be rigidly adhered to in all circumstances.

EPA encourages the development of more sophisticated or precise methods or models for quantification of fugitive emissions, and will accept any estimate of a source's fugitive emissions if the source can support the accuracy and reliability of the methodology which it has developed or employed. In situations where there are no published emissions factors or other fugitive emissions data for a particular category of sources, EPA will consider quantification estimates developed by a source which have any reasonable and rational basis, including estimates based on the transfer of technology or based on principles of material balance. Moreover, if a source satisfactorily demonstrates that all such methodologies are inappropriate in its circumstances and that there is absolutely no basis for reasonably estimating its fugitive emissions, EPA would be willing to discount fugitive emissions in the threshold calculation for that individual source.

In short, sources will have an opportunity to discuss the appropriateness and reasonableness of fugitive emissions estimates for purposes of both the threshold calculation, as well as the requirements of section 165. EPA is therefore finalizing today the proposed list of categories of sources whose fugitive emissions will be included in threshold calculations. EPA has considered comments with respect to the proposed definition of "fugitive emissions," and has determined that one change is appropriate. Instead of defining fugitive emissions as "those emission which *do not* pass through a stack, chimney, vent, or other functionally equivalent opening," EPA believes that the term should apply to "those emissions which *could not reasonably pass* through a stack, chimney, vent or other

functionally equivalent opening." This change will ensure that sources will not discharge as fugitive emissions those emissions which would ordinarily be collected and discharged through stacks or other functionally equivalent openings, and will eliminate disincentives for the construction of ductwork and stacks for the collection of emissions. Emissions which could reasonably pass through a stack, chimney, vent, or other functionally equivalent opening will be treated the same as all other point emissions for threshold calculation purposes.

In addition, in light of EPA's action today deleting the fugitive dust exemption (see Fugitive Dust Exemption), EPA is finalizing the proposed deletion of the existing definition of "fugitive dust" at 40 CFR 51.24(b)(6) and 52.21(b)(6) (1979).

VIII. Fugitive Dust Exemption

The 1978 PSD regulations provided that "fugitive dust" from a major stationary source or major modification be excluded from air quality impact assessment, 40 CFR 51.24(k)(5), 52.21(k)(5)(1979). Because of its decision regarding inclusion of fugitive emissions in threshold calculations, and because it questioned EPA's authority to establish the exemption in the manner in which it did, the court in *Alabama Power* vacated EPA's generalized exemption for fugitive dust and remanded it to the Agency for further consideration. 13 ERC at 1231 and 13 ERC at 2017.

In response to the court's opinion, EPA proposed deletion of the fugitive dust exemption. It also proposed to delete a parallel provision in the Offset Ruling (44 FR 3274). The majority of the public commenters directly opposed this proposal. The primary reasons were that fugitive dust allegedly has little impact on health and that techniques of evaluating its air quality impacts are unreliable.

As indicated above, the *Alabama Power* court vacated EPA's partial exemption of fugitive dust from the requirements of section 165 because the exemption was premised on the erroneous assumption that "the statute of its own momentum subjects major sources of fugitive emissions to PSD preconstruction review and permit requirements" 13 ERC at 2017. However, the court also expressed serious doubt that EPA had the statutory authority to establish such an exemption by regulation, because (1) section 165 does not distinguish between fugitive emissions and point emissions, but applies "with equal force" to both types of emissions, 13 ERC at 2016, and (2) in the absence of explicit statutory

exemption authority, EPA's "general" exemption authority is narrow in reach. 13 ERC at 2005-2010.

The court did outline, though, a mechanism which it indicated is available under the statutory scheme for accomplishing the objective of partially exempting fugitive dust emitted by major emitting facilities from the requirements of section 165. That approach would involve defining the pollutant "particulate matter" "to exclude particulates of a size or composition determined not to present substantial health or welfare concerns," 13 ERC at 2018, n. 134, and then regulating such "excluded particulates" under section 111. Pursuant to section 109, EPA is currently reviewing the criteria document for the particulate matter NAAQS, and particle size is a factor being considered in this review. If the standard is revised, the rulemaking requirements of section 307(d) will apply.

EPA today is adopting its proposed deletion of the existing "fugitive dust exemption" and is deferring further action on any such "exemption" pending completion of the standard review process.

IX. Source

A. Proposed Definitions of "Source"

In the 1978 PSD regulations, EPA defined "source" as "any structure, building, facility, equipment, installation, or operation (or combination thereof) which is located on one or more contiguous or adjacent properties and which is owned or operated by the same person (or by persons under common control)." The Offset Ruling contained the same definition of "source."

In its June 1979 opinion in *Alabama Power*, the Court of Appeals rejected the definition of "source" in the PSD regulations. It concluded that Congress intended section 111(a)(3) of the Act to govern the definition of "source" for PSD purposes. That section defines "source" as "any building, structure, facility, or installation which emits or may emit any air pollutant." In defining "source," EPA used the terms "building," "structure," "facility," and "installation," but then added "equipment," "operation," and "combination thereof." The court held that EPA, in adding those terms, exceeded its authority. It stated, however, that the Agency has substantial discretion to define one or more of the four terms in section 111(a)(3) to include a wide range of pollutant-emitting activities.

In its June opinion, the court also focused on the clause "which is located on one or more contiguous or adjacent properties and which is owned or operated by the same person (or persons under common control)." The court held that the approach, which that clause embodied, of grouping pollutant-emitting activities solely on the basis of proximity and control is generally acceptable, since the Agency had "evidenced an intention to refrain from unreasonable literal applications of the definition and instead to consider as a single source only common sense industrial groupings." 13 ERC at 1230.

In September 1979, EPA proposed to define "building, structure, facility and installation" for PSD purposes as "any grouping of pollutant-emitting activities which are located on one or more contiguous or adjacent properties and which are owned or operated by the same person (or by persons under common control)." As the preamble to the September proposal explains in detail, EPA concluded that the proposed definition would serve the purposes of PSD adequately by requiring review of those major projects that would cause air quality deterioration. At the same time, the definition would operate to avoid review of projects that would not increase deterioration significantly. In EPA's view, the dominant purpose of PSD review is to maintain air quality within the applicable increments.

In September, EPA proposed to define the four component terms differently for nonattainment purposes. Specifically, the Agency proposed to define "building, structure and facility" as it had proposed to define them for PSD purposes, and "installation" as "an identifiable piece of process equipment." One effect of that proposal would be the application of nonattainment requirements to a new piece of equipment that would emit significant amounts of a pollutant for which the area had been designated nonattainment, regardless of any accompanying emissions offsets at the plant. The preamble to the proposal explained: "Unlike the PSD provision, the nonattainment provisions are primarily intended not merely to prevent excessive increases in emissions, but to reduce emissions. This fundamental difference in purpose requires a different approach to defining the sources that will be subject to NSR." 44 FR 51932. EPA proposed to apply this definition to "incomplete" SIPs, i.e., those which did not demonstrate attainment based exclusively on currently approved requirements. Fully

"complete" SIPs could, under EPA's proposal, use the PSD definition.

In December 1979, the court issued its final opinion on the 1978 PSD regulations, which opinion superseded the June 1979 opinion. In the December opinion, the court reaffirmed its earlier conclusions that EPA must adhere to section 111(a)(3) in defining "source" for PSD purposes and that EPA has discretion to define the component terms "reasonably to carry out" the purposes of PSD. 13 ERC at 2039. The court added that "a plant is to be viewed as a source" and that the Agency "should" provide for the aggregation of polluting-emitting activities "according to considerations such as proximity and ownership." *Id.* at 2039 and 2040. But it warned that "EPA cannot treat contiguous and commonly owned units as a single source unless they fit within the four permissible statutory terms." Finally, the court said that any new definitions "should also provide explicit notice as to whether (and on what statutory authority) EPA construes the term source, as divided into its constituent units, to include the unloading of vessels at marine terminals and 'long-line' operations such as pipelines, railroads, and transmission lines. We agreed with Industry Groups that EPA has not yet given adequate notice as to whether it considers those industrial activities to be subject to PSD." *Id.* at 2040.

In January 1980, EPA solicited comment on the September proposals in light of the December opinion of the court. 45 FR 6803. EPA specifically asked for comment on whether factors other than proximity and control, such as the functional relationship of one activity to another, should be used. The Agency also asked for specific examples of cases where a literal application of the proposed definition would be unreasonable.

B. PSD: Comments on Proposal and Responses

Most commenters agreed that for PSD purposes EPA should adopt definitions of "building," "structure," "facility," and "installation" that would aggregate pollutant-emitting activities, instead of definitions that would restrict one or more of those terms to an individual activity. One commenter, however, argued that EPA should adopt for PSD purposes the same definitions of those terms that it had proposed to adopt for nonattainment purposes. The commenter asserted that the decision of the court in *ASARCO v. EPA*, 578 F.2d 319 (D.C. Cir. 1978), required the Agency to impose BACT on a new unit at a plant, even if the unit would result in no

net increase in emissions. The commenter also asserted that the "all-encompassing definition *** destroys the intent of the PSD program by letting opportunities for reducing increment consumption disappear before control technology standards (*i.e.*, NSPS) can be in place." (Emphasis added.)

EPA has decided to adopt for PSD purposes the sort of "all-encompassing" definitions that the commenter opposed. First, in its December 1979 opinion in *Alabama Power*, the court explicitly held that *ASARCO* "does not prevent aggregation of individual units of a plant into a single source." 13 ERC at 2040. Second, the dominant purpose of PSD review is not to reduce increment consumption, but rather to maintain air quality deterioration below an applicable increment. A definitional structure that aggregates pollutant-emitting activities into one "source" would serve that purpose, since it would allow only those changes at the "source" that would not significantly worsen air quality to escape review.

Some of the commenters who agreed that each of the component terms of "source" should aggregate pollutant-emitting activities also supported the use of proximity and control as the sole criteria for aggregating them. Most of those commenters, however, objected to the use of proximity and control as the sole criteria, some on the ground that the proposed definitions would be too inclusive and others on the ground that the definitions would not be inclusive enough.

The commenters who thought the definitions would be too inclusive asserted that they would group sets of activities at one site and under common control that are functionally or operationally distinct. Typical of the examples they gave are the following activities at one site and under common control: (1) a surface coal mine and coal-burning electrical generators that the mine supplies with coal; (2) a rock quarry and the portland cement plant that the quarry supplies with raw material; (3) a primary aluminum ore reduction plant, an aluminum fabrication plant and an aluminum reclamation plant; (4) a refinery, a service station, a research laboratory, a fertilizer factory, and a pesticide factory; and (5) a uranium mill and an oil field. With the language of the June 1979 opinion in mind, the commenters contended generally that to group the nominally different activities in each of those examples would violate any common-sense notion of "plant."

The commenters who thought the proposed definitions would be too inclusive suggested a wide range of

alternative definitions. For example, one group proposed that activities at one site and under common control should be combined only if: (1) they share the first three digits under the Standard Industrial Classification Code of the U.S. Department of Commerce, (2) they are dependent upon or affect the process of each other, (3) they use a common raw product or produce a common product, and (4) the proponent of the project in question does not show that the activities have entirely separate air quality impacts.

The commenters who thought the proposed definitions would not be inclusive enough urged the Agency to abandon control as a factor and adopt function in its place. Some of them described a plan by a group of independent companies to construct jointly a single coal-burning power plant to replace oil-burning power plants at various manufacturing sites belonging to those companies near to the site of the coal-burning plant. The commenters contended that EPA should treat the old plants and the new plant as being within one "source," so that the new plant might escape PSD review. They argued that the new plant would not deteriorate air quality, since presumably the decrease in emissions from the shutdown of the old plants would offset the increase from the new plant, and that to allow it to escape review would facilitate the national switch from oil to coal.

After considering the comments of those who objected to the use of proximity and control only, EPA has decided to adopt for PSD purposes a definition of "building, structure, facility, and installation" that is different from the one it proposed in September. The final definition provides that those component terms each denote "all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same 'Major Group' (*i.e.*, which have the same two-digit code) as described in the *Standard Industrial Classification Manual, 1972*, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0066 and 003-005-00176-0, respectively)."

In EPA's view, the December opinion of the court in *Alabama Power* sets the following boundaries on the definition for PSD purposes of the component terms of "source": (1) it must carry out

reasonably the purposes of PSD; (2) it must approximate a common sense notion of "plant"; and (3) it must avoid aggregating pollutant-emitting activities that as a group would not fit within the ordinary meaning of "building," "structure," "facility," or "installation."

The comments on the proposed definition of "source" have persuaded EPA that the definition would fail to approximate a common sense notion of "plant," since in a significant number of cases it would group activities that ordinarily would be considered as separate. For instance, a uranium mill and an oil field would ordinarily be regarded as separate entities, yet the proposed definition would treat them as one.

In formulating a new definition of "source," EPA accepted the suggestion of one commenter that the Agency use a standard industrial classification code for distinguishing between sets of activities on the basis of their functional interrelationships. While EPA sought to distinguish between activities on that basis, it also sought to maximize the predictability of aggregating activities and to minimize the difficulty of administering the definition. To have merely added function to the proposed definition as another abstract factor would have reduced the predictability of aggregating activities under that definition dramatically, since any assessment of functional interrelationships would be highly subjective. To have merely added function would also have made administration of the definition substantially more difficult, since any attempt to assess those interrelationships would have embroiled the Agency in numerous, fine-grained analyses. A classification code, by contrast, offers objectivity and relative simplicity.

EPA has chosen the classification code in the *Standard Industrial Classification Manual, 1972*, as amended in 1977 ("SIC"), because it is both widely-known and widely-used. EPA has also chosen to use just one set of categories in the manual, those that describe each "Major Group" in the classification system and that bear a two-digit classification number, although the commenter who suggested that EPA use such a code also suggested that the Agency use the categories at the three-digit level. On the one hand, the two-digit categories are narrow enough to separate sets of activities into common sense groupings. In fact, most of the nominally different sets of activities in the examples given above would fall into a different two-digit

category; only the fertilizer factory and the pesticides factory would fall into the same category. On the other hand, the categories are broad enough to minimize the likelihood of artificially dividing a set of activities that does constitute a "plant" into more than one group and the likelihood of disputes over whether a set of activities falls entirely into one category or another.

Each source is to be classified according to its primary activity, which is determined by its principal product or group of products produced or distributed, or services rendered. Thus, one source classification encompasses both primary and support facilities, even when the latter includes units with a different two-digit SIC code. Support facilities are typically those which convey, store, or otherwise assist in the production of the principal product. Where a single unit is used to support two otherwise distinct sets of activities, the unit is to be included within the source which relies most heavily on its support. For example, a boiler might be used to generate process steam for both a commonly controlled and located kraft pulp mill and plywood manufacturing plant. If the yearly boiler output is used primarily by the pulp mill, then the total emissions of the boiler should be attributed to the mill.

In adopting the new definition of "source," EPA rejected the requests of those commenters who thought that the proposed definition would not be inclusive enough. As noted above, they urged that EPA formulate a definition that looked only to proximity and function. But such a definition by looking to function would unnecessarily increase uncertainty and drain the Agency's resources. In addition, such a definition would present groupings, such as the example the commenters gave, that would severely strain the boundaries of even the most elastic of the four terms, "building," "structure," "facility," and "installation."

Many commenters urged EPA to clarify the extent to which the final definition of those terms encompasses the activities along a "long-line" operation, such as a pipeline or electrical power line. For example, some urged EPA to add to the definition the provision that the properties for such operations are neither contiguous nor adjacent. To add such a provision is unnecessary. EPA has stated in the past and now confirms that it does not intend "source" to encompass activities that would be many miles apart along a long-line operation. For instance, EPA would not treat all of the pumping stations

along a multistate pipeline as one "source."

EPA is unable to say precisely at this point how far apart activities must be in order to be treated separately. The Agency can answer that question only through case-by-case determinations. One commenter asked, however, whether EPA would treat a surface coal mine and an electrical generator separated by 20 miles and linked by a railroad as one "source," if the mine, the generator, and the railroad were all under common control. EPA confirms that it would not. First, the mine and the generator would be too far apart. Second, each would fall into a different two-digit SIC category.

Three commenters focused on whether and to what extent the emissions from each ship that would dock at a proposed marine terminal should be taken into account in determining whether the terminal would be "major" for PSD purposes. One commenter argued in effect that the emissions of each such ship that are quantifiable and occur while the ship is coming to, staying at or going from the terminal should be taken into account. In the view of that commenter, all of those activities would be "integral" to the operation of the terminal. Another commenter asserted that none of the emissions of any such ship should be taken into account, because ships are mobile sources. The remaining commenter contended that only the emissions that: (1) come from a ship which is under the proprietary control of the owner or operator of the terminal and (2) occur while the ship is at the dock should be included in an applicability determination. That commenter viewed the ability of the terminal owner or operator to regulate the behavior of a ship as the critical consideration.

The permit requirements of the final Part 52 PSD regulations apply to a collection of pollutant-emitting activities according to the "potential to emit" of just those activities in that collection which constitute a "stationary source." Whether and to what extent the emissions of ships that would dock at a terminal are to be taken into account in determining PSD applicability depends, therefore, on whether and to what extent the term "stationary source" in the final regulations encompasses not only the activities of the terminal itself, but also the activities of the ships while they are coming to, staying at, or going from the terminal.

The final definition of "building, structure, facility, and installation" resolves that question. EPA intends the term "stationary source" under that

definition to encompass the activities of a marine terminal and only those dockside activities that would serve the purposes of the terminal directly and would be under the control of its owner or operator. The term "dockside activities" means those activities in which the ships would engage while docked at the terminal. While "stationary source" encompasses combinations of activities, it is limited to combinations that would be "stationary," that is, fixed to the particular site. The activities of a terminal itself would be stationary, but all ship activities would not be. Only those that would directly serve the purposes of the terminal, such as loading and unloading, would be stationary since they alone would be in a sense fixed to the particular site. Hence, "stationary source" encompasses the activities of a marine terminal and only those dockside activities that would directly serve its purposes.

In addition, while "stationary source" encompasses combinations of stationary activities, it is further limited to those that would locate on "contiguous or adjacent properties." In EPA's view, only dockside activities would be located on "property" that is contiguous or adjacent to the terminal. Next, "stationary source" is also limited to those combinations of activities that would be "under the control" of one person or one group of persons who are themselves under common control. Hence, "stationary source" encompasses only the activities at a terminal and those dockside activities over which the owner or operator of the terminal would have control. Finally, the activities at a terminal and any such dockside activities fall under a single two-digit SIC category, namely "Water Transportation" (number 44).

Whether a particular dockside activity would directly serve the purposes of a terminal and would be under the control of its owner or operator depends upon the circumstances of a specific situation. Presumably, however, the activity of loading or unloading a ship would in every case directly serve the purposes of the terminal and would be under the control of its owner or operator to a substantial extent. In particular, the Agency would expect that no loading or unloading could occur without the consent of the owner or operator and consequently that the owner or operator would set, or at least have a significant say in the setting of, the schedule for loading or unloading.

In adopting this interpretation of "stationary source," EPA in large measure has rejected the arguments of the commenters on the ship emissions issue. First, to treat *all* of the activities of a ship while it is coming to, staying at, and going from a terminal would violate any common sense notion of "building," "structure," "facility," or "installation." To group just those activities occurring at the terminal that are essential to its functioning entirely comports with common sense. Second, an activity such as loading and unloading is certainly stationary, even if the ships that engage in it have mobility. Ships, moreover, are not "mobile sources" within the meaning of section 110(a)(5) of the Act, the provision restricting indirect source review. Finally, the fact that a terminal owner or operator does not own a particular ship does not mean that the owner or operator has no control over behavior of the ship at the terminal.

In deference to the position taken in *Alabama Power*, EPA has decided to treat the definition of "source" in the 1978 PSD regulations as *not* encompassing any ship or ship activity. As a result, ship emissions are not to be taken into account at all in determining whether a marine terminal is subject to review under the 1978 PSD regulations. A terminal which would not be subject to review under the 1978 regulations if ship emissions are not included in the determination of potential to emit can also be excluded from review under the new regulations provided certain conditions are met. These conditions are that the owner or operator of such a source has obtained each of the permits required under the SIP for the terminal before the date this notice appears in the Federal Register and commences construction on it within 18 months after that date.

The final definition of the component terms of "stationary source" differs from the proposed definition in one significant respect. The proposed definition used the phrase "*any grouping of* pollutant-emitting activities." The final definition uses the phrase "*all of the* pollutant-emitting activities." Taken literally, the proposed definition would have referred not only to all of the activities at a plant, but also to any subgroup of those activities. EPA, however, intended it to refer only to all of the activities. The final definition merely makes that explicit.

C. Nonattainment: Comments on Proposal and Response

Many commenters objected to EPA's proposed definition of "source" for nonattainment areas. Several commenters argued that there was no

statutory basis for the distinction drawn in the proposal between "complete" and "incomplete" SIPs. Most of the commenters further claimed that the "dual definition" (*i.e.*, treating a source as both a plant and an individual piece of process equipment at the plant) both was illegal under the statute and *Alabama Power* and was wrong as a matter of policy.

The legal arguments presented by the commenters fell into two broad categories. First, they argued that the dual definition really defined "source" as a combination of sources, which had been forbidden by both *Alabama Power* and *ASARCO*. EPA therefore could, in these commenters' view, define "source" as either the entire plant or an individual piece of process equipment, but not both. These commenters opted for the former approach.

The second legal argument challenged EPA's contention that use of the plant-wide definition would be improper in nonattainment areas, because the purpose of the nonattainment new source review program is to reduce emissions, not to hold emissions constant. The commenters claimed that the Act gives primary responsibility for assuring reasonable further progress to the states, and the states therefore can choose whatever mix of strategies they want to achieve reasonable further progress. This suggested to the commenters that EPA had no authority to ban a plant-wide definition for new source review if the state could otherwise demonstrate reasonable further progress.

Several commenters also pointed to a variety of policy concerns which they felt militated against EPA's proposed dual definition. First, they argued that the definition would discourage technological innovation that could actually reduce emissions, because sources would be reluctant to modernize for fear that such requirements as LAER would be applied to them. In particular, they felt sources would be unwilling to retire old inefficient facilities and replace them with efficient cleaner ones. Second, some commenters claimed that there was no point to reviewing a facility where offsetting emissions could be obtained, since on the whole ambient air quality would not get any worse. Finally, many commenters complained that the definitional structure as a whole was far too complex, and they urged that EPA simplify the system both by eliminating the distinction between "complete" and "incomplete" SIPs and by adopting one definition for both PSD and nonattainment areas. Most commenters preferred the PSD

definition, although some urged that the dual definition be used.

In revising the Offset Ruling in January 1979, EPA adopted definitions of "source" and "modification" which had the effect of requiring any increase greater than 100 tons in the potential to emit of a plant to undergo nonattainment new source review, even if offsetting reductions at the plant were to accompany the change. The effect of the proposed definitions of "source" and "modification" which are being promulgated today would be basically the same as those in the Offset Ruling. Adoption of the proposed definitions would constitute, therefore, a continuation of an established approach to nonattainment new source review.

The comments on the dual definition have failed to persuade EPA that it should abandon the established approach at this time. As a result, the agency has decided to adopt the dual definition in each set of nonattainment regulations. For the reasons given below, EPA does not agree that the dual definition is either illegal or unsound from a policy standpoint. In addition, the agency has decided that the dual definition should be used regardless of whether the SIP is complete or incomplete. EPA agrees with the commenters that there is little support in the statute for defining "source" according to the complete or incomplete status of the SIP, and that the proposed definition was complicated.

The dual definition, by defining individual units as a "source," will bring more units in for review in areas with unhealthy air and thereby result in reducing emissions from the status quo. The legislative history of the Act indicates that new source review was intended to be an important tool in the drive towards attainment of ambient air quality standards. As the House Report stated:

[M]aximum pollution control from new sources is necessary in order to permit room for maximum potential economic growth. This is particularly true in light of the requirement for reasonable further progress and the indications that emissions from many existing sources in nonattainment areas will be increasing (due to fuel switching, natural gas curtailments) or remaining static (due to delayed compliance orders, et cetera). Finally, the technology forcing purpose of the act is best served by requiring maximum feasible pollution control from these new sources in dirty air areas. For all these reasons, the committee adopted the requirement for proposed new or modified major stationary sources in nonattainment areas to meet the lowest achievable emission rate requirement.

H. Rep. No. 95-294, 95th Congress, 1st Sess. 215 (1977). In addition, after

hearing testimony that no steel sources owned by five major steel companies were in compliance, the House inserted into section 173 a requirement that the owner of a proposed source or modification demonstrate that all other sources owned, operated, or controlled by him in the state are in compliance with the applicable SIP. *Id.* at 210-213. In this way, Congress meant to use new source review as a means of cleaning up existing sources as well.

To realize this goal fully, Congress intended that new source review be applied to the greatest extent possible. For example, Senator Muskie, in presenting the Clean Air Act Amendments of 1977 to the Senate, spoke of reviewing "any physical change which increases [emissions] * * *, and he went on to note:

Thus, [under the offset ruling and Part D NSR requirements] a new source is still subject to such requirements as "lowest achievable emission rate" even if it is constructed as a replacement for an older facility resulting in a new reduction from previous emission levels. 123 Cong. Rec. at S 13702 (daily edition, August 4, 1977).

Since the dual definition would bring in more sources or modifications for review than would the plant-wide definition used for PSD purposes (including many replacement facilities which would not be reviewed under a plant-wide definition), use of the dual definition clearly is more consistent with Congressional intent.

The dual definition also is consistent with *Alabama Power* and *ASARCO*. *Alabama Power* held that EPA had broad discretion to define the constituent terms of "source" so as best to effectuate the purposes of the statute. Different definitions of "source" can therefore be used for different sections of the statute. See 13 ERG at 2039. As EPA discussed in detail in its proposal, the purpose of the nonattainment provisions is to "positively reduce emissions," not merely to hold emissions constant. In addition, unrestricted use of meeting emissions at an entire plant in nonattainment areas would make attainment more difficult, since many of the limited number of cost-effective opportunities to reduce emissions will in fact be used to avoid review. See 44 FR 51932. The dual definition therefore comports with the purposes of Part D of the Act.

Moreover, *Alabama Power* and *ASARCO* taken together suggest that there is a distinction between Clean Air Act programs designed to enhance air quality and those designed only to maintain air quality. In *ASARCO*, the Court of Appeals for the District of Columbia Circuit struck down the

definition of "source" for new source performance standards (NSPS), which had employed a "bubble" concept. An important element in the court's decision was its belief that the "bubble," by allowing sources to escape NSPS, was inconsistent with the purpose of NSPS, which was to improve air quality. See 578 F.2d at 327-28. But in *Alabama Power*, the same court held that for PSD purposes, EPA must use a "bubble" approach, precisely because PSD is designed to maintain air quality and therefore deals with "a significantly different regulation and statutory purpose." 13 ERC at 2044.

Under this analysis, use of a plant-wide definition to avoid new source review would appear to be inappropriate in nonattainment areas, since the purpose of nonattainment SIPs is to improve existing air quality so as to attain the ambient air quality standards. EPA therefore believes that it would be more consistent with the purposes of the Act not to permit states to choose a plant-wide definition of source.

Promulgation of the dual definition follows the mandate of *Alabama Power*, which held that, while EPA could not define "source" as a combination of sources, EPA had broad discretion to define "building," "structure," "facility," and "installation" so as to best accomplish the purposes of the Act. 13 ERC at 2039. This holding contemplates that one term (such as "building") may be more inclusive than another term (such as "installation"), and so a "building" may include many "installations." In this way, a "source" can, under *Alabama Power*, be composed of smaller "sources," yet not be a combination of sources. The dual definition fits into *Alabama Power*, since under EPA's definitional scheme, a "source" is either an individual piece of process equipment or the entire plant; it is not a combination of sources. That is, when deciding whether a source must undergo new source review, the reviewing authority must determine whether there was a significant increase in emissions at either a "major" individual piece of equipment or at the plant as a whole. Wherever such an increase occurs is a "source." Thus the plant itself is a source, not a combination of sources, although it may contain smaller sources.

EPA recognizes that use of different definitions for PSD and nonattainment areas adds to the complexity of the permitting process. But this additional complexity is outweighed by the need for a more inclusive definition of source in nonattainment areas in order to assure attainment of standards.

Although it is claimed that some sources may not be willing to modernize their facilities due to the perceived added expense of LAER and the need to demonstrate statewide compliance, EPA believes that its approach is justified by the fact that the dual definition will bring in more sources and modifications for review and will require better pollution control technology in nonattainment areas.¹⁰

EPA disagrees that use of a plant-wide definition would allow a plant with a new installation to achieve the same emissions reductions as LAER, but in a less expensive manner by finding offsets elsewhere in the plant. This argument assumes that LAER is markedly more costly than the requirements that would otherwise apply. EPA believes that its own past actions, and those of the states, indicate that LAER need not and is not generally being interpreted in this manner.

EPA believes, and most commenters agreed, that new facilities should install state-of-the-art control technology. Such a requirement is imposed by the Clean Air Act for major new sources in PSD areas (BACT), for major new sources in nonattainment areas (LAER), and whenever EPA has set new source performance standards (NSPS). EPA therefore intends to interpret the LAER requirement in a reasonable manner, as it believes it has in the past, and to take a close look whenever LAER would be substantially stricter than these other requirements.

EPA intends that its interpretation of "building, structure, and facility" be identical to that for "building, structure, facility, or installation" used for PSD purposes.¹¹

X. Modification

This section discusses the final PSD and nonattainment definitions of "major modifications" and "net emissions increase" which EPA is promulgating in this notice. The section first describes those final provisions. It then focuses on each of their major aspects, giving in particular the relevant proposal, the comments on it and EPA's responses. An example of how the definitions work appears at the end of the section. The

¹⁰Contrary to one commenter's argument, EPA believes that the dual definition will not cause sources to locate in clean areas. Any such source would be subject to PSD review in any event.

¹¹One commenter requested EPA define "source" as one emitting the criteria pollutants, and not "any pollutant regulated under the Act." EPA has decided to retain its definition, since it comports with section 302(l) of the Act. However, pursuant to section 172(b)(8), EPA will require new source review permits only for those pollutants for which an area has been designated nonattainment and for which the source is major.

section also discusses a provision which appears in the PSD and nonattainment definitions of "major stationary source," but which stems from the final formulation of "major modification." That provision establishes that a physical change at a "minor" stationary source which change by itself would constitute a "major stationary source" shall be treated as a "major stationary source."

A. Final Definitions of "Major Modification" and "Net Emissions Increase"

With the final amendments announced here, the Part 51 and Part 52 PSD regulations now define "major modification" as any "*physical change*" or "*change in method of operation*" at a major stationary source which would result in a "*significant net emissions increase*" in any pollutant subject to regulation under the Act. See §§ 51.24(b)(2) and 52.21(b)(2).

While the new PSD regulations do not define "*physical change*" or "*change in method of operation*," they provide that those phrases do not encompass certain specific types of events. Those types are: (1) routine maintenance, repair and replacement; (2) a fuel switch due to an order under the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or due to a natural gas curtailment plan under the Federal Power Act; (3) a fuel switch due to an order or rule under section 125 of the Clean Air Act; (4) a switch at a steam generating unit to a fuel derived in whole or in part from municipal solid waste; (5) a switch to a fuel or raw material which (a) the source was capable of accommodating before January 6, 1975, so long as the switch would require no change in any preconstruction permit condition established after that date under the SIP (including any PSD permit condition) or (b) the source is approved to make under a PSD permit; (6) any increase in the hours or rate of operation of a source, so long as the increase would require no change in any preconstruction permit condition established after January 6, 1975 under the SIP; and (7) a change in the ownership of a stationary source.

The new PSD regulations define "*significant*" in terms of *de minimis* thresholds for each pollutant subject to regulation under the Act. Those thresholds appear in §§ 51.24(b)(21) and 52.21(b)(21). For example, the threshold for sulfur dioxide is 40 tons per year. A "net emissions increase" in sulfur dioxide below that level is not "*significant*." For a fuller discussion of

the thresholds, see the section entitled *De Minimis Exemptions*.

Finally, the new PSD regulations contain definitions of "net emissions increase," which appear as §§ 51.24(b)(3) and 52.21(b)(3). Under those definitions, "net emissions increase" denotes the positive sum of any increase in "actual emissions" from a particular physical or operational change at a source and any other increases and decreases in "actual emissions" that are contemporaneous with the particular change and otherwise creditable.

The first step in determining whether a "net emissions increase" would occur is to determine whether the physical or operational change in question would itself result in an increase in "actual emissions." If it would not, then it could not result in a "net emissions increase." If it would, the second step is to identify and quantify any other prior increases and decreases in "actual emissions" that would be contemporaneous with the particular change and otherwise creditable. The third step, finally, is to total the increase from the particular change with the other contemporaneous increases and decreases. If the total would exceed zero, then a "net emissions increase" would result from the change.

The definitions of "net emissions increase" specify which increases and decreases in "actual emissions" are contemporaneous. Under the definition in the Part 52 PSD regulations, increases or decreases are contemporaneous with a proposed change only if they occur between two dates: first, the date five years before construction "commences" on the proposed physical or operational change in question and, second, the date the increase from that change "occurs." An increase from a physical change "occurs" when the affected emissions unit becomes operational and begins to emit a particular pollutant. Any unit that requires shakedown becomes operational only after a reasonable shakedown period (not to exceed 180 days). Under the definition in the Part 51 regulations, a state in revising its SIP may set a period other than the five-year period of the Part 52 regulations to define what is contemporaneous and what is not, so long as the period is not unreasonably long.

The definitions of "net emissions increase" in the PSD regulations also specify which contemporaneous increases and decreases in "actual emissions" are creditable. A contemporaneous increase or decrease is creditable only if the relevant reviewing authority has not relied on it in issuing a PSD permit for the source,

and that permit is still in effect when the increase in "actual emissions" from the particular change occurs. A reviewing authority "relies" on an increase or decrease when, after taking the increase or decrease into account, it concludes that the proposed project would not cause or contribute to a violation of an increment or ambient standard. A contemporaneous increase or decrease in "actual emissions" of sulfur dioxide or particulate matter that occurs before the applicable baseline date is creditable only if, in addition, it is required to be considered in calculating how much of a particular increment remains available.

Finally, the definitions of "net emissions increase" in the new PSD regulations specify the extent to which any contemporaneous and otherwise creditable increase or decrease is creditable. Any such increase is creditable to the extent that the new level of "actual emissions" exceeds the old level of "actual emissions." Any such decrease is creditable only to the extent that (1) the old level of "actual emissions" (or the old level of "allowable emissions," if it is lower) exceeds the new level of "actual emissions," (2) the decrease is federally enforceable at the time construction begins on the proposed physical or operational change which it is intended to offset, and (3) the decrease has roughly the same health and welfare significance as the increase from the proposed change.

Under the final PSD regulations, the phrase "actual emissions" means the rate at which an emissions unit actually emits a particular pollutant. See §§ 51.24(b)(21) and 52.21(b)(21). In general, that rate as of a particular date equals the average rate in tons per year at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and is representative of normal source operation. The reviewing authority may presume that any "source-specific allowable emissions" for the unit is equivalent to the actual emissions of the unit. For any unit which has yet to begin normal operations on the date in question, its actual emissions equal its "potential to emit" on that date. For a fuller discussion of the concept of "actual emissions" and in particular of what constitutes "source-specific allowable emissions," see the section on Increment Consumption.

The final PSD regulations also describe in detail the concept of "allowable emissions." See §§ 51.24(b)(16) and 52.21(b)(16). That phrase means in essence the maximum

rate at which an emissions unit under the most stringent of certain legal constraints may emit a particular pollutant. The legal constraints are (1) any applicable standards in 40 CFR Parts 60 and 61, (2) any applicable SIP limitations, including any with a future compliance date, and (3) any applicable condition in a permit issued under the SIP that is federally enforceable, also including any condition with a future compliance date.

The final amendments to the Offset Ruling, 40 CFR 51.18 and 40 CFR 52.24 which are announced here also include new definitions of "major modification," "significant," "net emissions increase," "actual emissions," and "allowable emissions." In general those definitions follow the pattern of the PSD definitions. Only the definitions of "net emissions increase" in those nonattainment provisions vary significantly. They add that a decrease in "actual emissions" which is contemporaneous with the increase in question may be credited only if and only to the extent that the relevant permitting authority has not already accepted it as a satisfactory "offset" in issuing a preconstruction permit under the SIP.

B. No Net Increase

The *Alabama Power* decision rejected EPA's regulatory approach of requiring PSD review of potential emissions increases at existing stationary sources only when such increases would equal or exceed the 100/250 ton threshold used in the review of new sources. It held instead that a change in a major stationary source is subject to review only if it would result in any significant net increase. In response, EPA proposed on September 5, 1979, an approach that would subject to new source review (NSR) under the relevant PSD or nonattainment provisions only each significant net increase that would occur in the potential to emit of a major stationary source. Under the proposal, a significant net increase was to be an overall increase in the potential to emit of the source equal to or greater than a pollutant-specific emissions cutoff (see *De Minimis Exemptions*), taking into account contemporaneous emissions increases and decreases at the same source. An exception to this general rule of netting contemporaneous increases and decreases was to be the case of construction restrictions under sections 110(a)(2)(I) and 173(4). There, accumulated increases would count toward triggering the growth prohibitions, without regard to any contemporaneous reductions occurring at the same source.

Public comment supported this proposal (except with respect to the construction restrictions) as the clear and proper interpretation of the *Alabama Power* decision. Sixty-two of sixty-three commenters endorsed the general netting approach to modification taken in the proposal, although several took issue with certain of the specific rules relating to the concept (see discussion below). Several commenters felt that requiring any significant net increase to undergo review was too strict on existing sources as compared with new sources, since new sources can emit up to 100/250 tons per year and still not be subject to review. The terms of the Act and the court decision preclude allowing such a general exemption for existing sources. Pursuant to *Alabama Power*, the Administrator is today promulgating the netting concept for determining the review applicability of changes at existing major stationary sources (consistent with each program's definition of source). This promulgation affects regulations for PSD (40 CFR 52.21 and 40 CFR 51.24), nonattainment NSR (Emissions Offset Interpretative Ruling and 40 CFR 51.18(j), Review of New Stationary Sources and Modifications), and the construction restrictions under sections 110(a)(2)(I) and 173(4), (40 CFR 52.24, Statutory Restriction on new Stationary Sources). Allowance of netting for determining the applicability of 40 CFR 52.24 is a change from the proposal and is discussed below.

C. Pollutant Applicability

EPA proposed to require preconstruction review only if the increase in potential to emit would be for a pollutant which the source emits in major amounts. Once an increase in the major pollutant triggered PSD review then review would be required for all regulated pollutants emitted in greater than *de minimis* amounts as a result of the modification. Review would also be required if the emissions change itself were equivalent to a major stationary source.

Only limited comment was received on EPA's proposal to require review where major changes in emissions of minor pollutants or greater than *de minimis* changes in emissions of a major pollutant would occur. While a few groups endorsed the September 5 proposal, one group argued that *Alabama Power* did not restrict PSD applicability to just modifications involving the pollutant(s) which the source emits in major amounts. That group pointed out that section 111(a)(4) of the Act defines "modification" as "any physical change in, or change in the method of operation of, a stationary

source which increases the amount of any air pollutant emitted by such source or which results in the emissions of any air pollutant not previously emitted." (Emphasis added.)

The Administrator agrees that requiring review for a net emissions increase in any pollutant subject to regulation under the Act is consistent with the *Alabama Power* decision. Consequently, EPA is promulgating a final rule that requires PSD preconstruction review for net emissions increases in greater than *de minimis* amounts at a major stationary source for any pollutant subject to regulation under the Act emitted by the source, regardless of whether the source is major for that pollutant.

The Administrator is not changing the September 5 proposal with respect to pollutant applicability in nonattainment areas. See Geographic and Pollutant Applicability. The source must be major for the nonattainment pollutant(s) and must make a greater than *de minimis* emissions change in such a pollutant in order to trigger nonattainment review for that pollutant(s). A PSD review, however, would be triggered if a greater than *de minimis* change occurs at that major source for any regulated pollutant emitted by the source other than the nonattainment pollutant(s).

D. Netting of Actual Emissions

EPA proposed on September 5 that an activity be deemed a major modification when the "potential to emit" of the major stationary source experiences a net increase greater than a *de minimis* amount, taking into account all contemporaneous changes. EPA also proposed that a reduction would be creditable only if the physical capability of the source to emit a pollutant were actually reduced. In addition, where "allowable emissions" for a source, as defined in the 1978 PSD regulations and the Offset Ruling would be less than its "potential to emit," no credit would be given for reducing potential emissions to "allowable emissions." "Allowable emissions," as defined in those regulations, meant the emissions rate calculated using the maximum rated capacity of the source and is represented by the most stringent than any of the following: (1) any applicable standards in 40 CFR Parts 60 and 61; (2) any applicable SIP emissions limitations; and (3) any emissions rate specified as a permit condition under the SIP. The applicable SIP limitation in the case of designated nonattainment areas included the emissions rate that was assumed for the source in the attainment demonstration and in the

schedule for making reasonable further progress.

Forty of forty-two commenters favored an allowable emissions baseline, for determining whether a net emissions increase would occur, instead of one using "potential to emit." The other two commenters endorsed EPA's proposal. Many also complained of the different criteria for determining "potential to emit" from new and existing sources. (Under the proposal, "allowable emissions" and physical incapability could have constrained the "potential to emit" of existing but not new stationary sources.)

There are problems with using a baseline for netting that is based on the existing source's "potential to emit." A computation of an existing source's potential emissions could give a figure considerably higher than what it is actually emitting. This would be especially true if the source operated only a small part of the time or used considerably cleaner fuels than it is allowed to burn. Such an approach would therefore create a "paper offset" that could permit actual air quality to deteriorate seriously, while the change which increased actual emissions avoided NSR. Similar problems would arise if offsets were based on allowable emissions, as recommended by most commenters.

In the June 1979 opinion in *Alabama Power*, the court held that the definition of "modification" in section 111(a)(4) governs the definition of that term for PSD purposes. Section 111(a) provides that a "modification" is "any physical change in, or change in the method of operation of, a stationary source which increases the amount of any air pollutant emitted by such source or which results in the emissions of any air pollutant not previously emitted." (Emphasis added.) Although the *underlined* words in the definition appear to refer to what the source is actually emitting at a particular time, the court in the June opinion described the concept of "modification" in terms of changes in the "potential to emit" of a source. As a result, EPA proposed definitions which also referred to changes in "potential to emit."

In its December 1979 opinion, however, the court used an entirely different set of terms to describe "modification." Instead of using "potential to emit," it used language which, like the section 111(a)(4) definition, suggest changes in actual emissions. For example, at one point the court states: "If these plants increase pollution, they will generally need a permit. Exceptions to this rule will occur when the *increases* are *de minimis*, and

when the *increases* are offset by contemporaneous decreases of pollutants, as we discuss below * * *." (Emphasis added.)

Following the lead of the court, EPA has also shifted the focus of its regulatory definitions from "potential to emit" to "actual emissions." For both PSD and nonattainment purposes, a "major modification" is now any significant "net emissions increase" at a major stationary source that results from certain changes. "Net emissions increase" is, in turn, roughly any net increase in "actual emissions." Not only are those definitions consistent with the court's view of section 111(a)(4), but they also avoid the "paper offset" problem described above, thereby better serving PSD and nonattainment purposes.

E. Contemporaneous Increases and Decreases

Under *Alabama Power*, a modification is any net increase in emissions that would result from "contemporaneous" changes at a major stationary source. The court decision left to EPA the task of defining what changes should be considered "contemporaneous."

A narrow interpretation of the term "contemporaneous" would restrict creditable decreases in emissions to those occurring at the same time as the emissions increases to be offset. The administrator decided against proposing such an interpretation, since it might promote the continued operation of old or obsolete equipment in order to preserve offset credit. Instead, EPA proposed a system that would grant credit for any post-promulgation emissions reduction and for certain pre-promulgation emissions reductions involving recent shutdowns or production curtailments. In order to be creditable, the reductions were to be enforceable before operation of the emissions unit(s) that would result in the emissions increases (except that a 180-day shakedown period could be granted for replacements). A preconstruction notice was also proposed as a mandatory means to record any reduction credit. (For a discussion of that proposed notice requirement, see the section entitled Notification.)

On January 30, 1980 (45 FR 6802), EPA solicited additional comment on its proposal for "contemporaneous." In particular, the Administrator asked whether a three-year time limit should be imposed for qualifying reductions as "contemporaneous." The proposed three-year time cap would have run from the time of the emissions reduction to the time that the source would have filed any necessary permit application.

for the prospective emissions increase(s). Where a permit would have not been required, the reference time would instead be the date on which construction commenced on the change resulting in the emissions increase.

Several comments were received on the September 5 proposal. Many confused the dates for accumulation at minor stationary sources (see discussion below) with the time limits for "contemporaneous" changes at major stationary sources. The majority of commenters on the January 30 Federal Register notice were from the industrial sector and they urged EPA to treat *any* emissions decrease which occurs before a proposed increase as being "Contemporaneous" with that increase. EPA however, has rejected those urgings. To credit any decrease that occurs before a proposed increase would violate any common sense notion of what is "contemporaneous," since a period of contemporaneity must have some definite boundaries.

EPA agrees with those industry commenters, however, to the extent that they contended that the period of contemporaneity should be fairly large. In particular, EPA believes that the period should be wide enough so as to minimize any incentive for keeping old or obsolete equipment in operation beyond its usefulness. As a result, EPA has set five years, plus time for construction, as the period of contemporaneity for the purposes of the Part 52 PSD regulations, the Offset Ruling and the construction moratorium. Specifically, the definition of "net emissions increase" in each of those regulations provides that a decrease in "actual emissions" may be credited only if it occurs between the date five years before construction "commences" on a proposed physical or operational change and the date the increase in "actual emissions" from that change occurs. A five-year limit was selected for those regulations rather than a three-year value, since five years is frequently used as the time duration over which corporate expansion planning is conducted.

For the purposes of the Part 51 PSD and nonattainment regulations, EPA has established that each state may set the period of contemporaneity for its own NSR regulations. The state may not, however, set a period of unreasonable or undefined length.

F. Otherwise Creditable Increases and Decreases

Whether an increase or decrease in "actual emissions" is creditable for PSD or nonattainment purposes depends, not only on whether it is contemporaneous

with the increase in question, but also on certain other factors. First, under each of the PSD and nonattainment definitions, a prior increase or decrease is creditable only if the relevant reviewing authority has not relied upon it in issuing a permit under the relevant NSR program. As stated earlier, a reviewing authority "relies" on an increase or decrease when, after taking the increase or decrease into account, it concludes that the proposed project would not cause or contribute to a violation of an increment or ambient standard. The purpose of that rule is to "wipe the slate clean." Once the reviewing authority has evaluated a significant net increase in issuing an NSR permit the net increase should not be a factor in deciding whether subsequent events should undergo scrutiny, too.

Second, under the PSD definition of "net emissions increase," an increase or decrease in actual emissions of sulfur dioxide or particulate matter which occurs before the baseline date is creditable only if it would be considered in calculating how much of an increment remains available. In formulating that definition, EPA sought to establish as close a correspondence as possible between what consumed increment and what must undergo NSR for PSD. Without that rule, some changes that *would* consume increment could escape review because of a prior decrease that was subsumed in the baseline concentration. In addition, without that rule, some changes that *would not* consume increment could have to undergo review because of a prior increase that was also subsumed in the baseline concentration.

G. The Extent to Which Increases and Decreases are Creditable

Each of the definitions of "net emissions increase" in the PSD and nonattainment regulations contains provisions which govern the extent to which a creditable increase or decrease in "actual emissions" may be credited.

The rules in each of those definitions relating to increases are simple. An increase is creditable to the extent that the new level of "actual emissions" at the emissions unit in question exceeds the old level. The old level of "actual emissions" is that which prevailed just prior to the physical or operational change which caused the increase. The new level is that which prevails just after the change.

The rules relating to decreases that are common to each of the definitions are more complex. First, a decrease is creditable only to the extent that "the old level of actual emissions or the old

level of allowable emissions, whichever is lower, exceeds the new level of actual emissions." (Emphasis added.) Since "allowable emissions" encompasses any federally enforceable requirement, including any with a future compliance date, the underlined language prevents a company from taking credit for decreases that it has had to make or will have to make in the future. EPA concluded that to give credit for a decrease a company has had to make in order to bring an emissions unit into compliance was unwise, since together with the five-year "contemporaneous" period it would create an incentive to stay out of compliance. Furthermore, it would be contrary to the purposes of the Act and good sense to provide what is in essence a benefit for recalcitrance. Similarly, EPA concluded that to give credit for a decrease a company will ultimately have to make anyway in order to meet a requirement by a certain date would also be unwise, since it would encourage procrastination. Further, allowing decreases which fulfill preexisting requirements to be used to avoid review would undermine the purposes of the PSD and nonattainment programs by interfering with efforts to preserve or achieve attainment.

Second, a decrease is creditable only to the extent that it is "federally enforceable" from the moment that actual construction begins on the physical or operational change which causes the "actual emissions" increase in question. The purpose of that rule is to ensure that the decrease is real and that it remains in effect. The term "federally enforceable" is defined in the regulations as any limitation or conditions which EPA can enforce, such as any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved under 40 CFR 51.18 and 40 CFR 51.24.

Finally, a decrease is creditable only to the extent that it has the same health and welfare significance as the increases in question. By this provision, EPA seeks mainly to prevent an increase in emissions with considerable health and welfare significance from escaping review merely because of a contemporaneous decrease in less harmful emissions. The basic health and welfare protection purposes of the Act mandate this provision.

The definitions of "net emissions increase" in the nonattainment regulations contain a restriction on crediting decreases that the PSD regulations do not contain. Specifically, they provide that a permitting authority may not credit a decrease to the extent that any permitting authority has

already accepted the decrease in satisfaction of the offset requirements of the applicable nonattainment regulations and consequently has issued a preconstruction permit to any source or modification, including the source at which the decrease occurred. The purpose of that rule is to prevent any "double crediting" of decreases in "actual emissions." Double crediting would allow air quality to deteriorate without prior review.

EPA is considering whether to introduce a provision to prevent double crediting in the PSD context. A discussion of the problem appears in the section on Increment Consumption.

H. Accumulation

On September 5, 1979, EPA proposed to continue the current policy of requiring PSD and nonattainment NSR when aggregate new emissions from individually minor units at the same stationary source, which itself was minor as of a certain date, are sufficient to require the series of changes to be treated as a major stationary source. In addition, the Administrator proposed to make the current policy consistent with the *Alabama Power* decision by applying NSR when the aggregate *net* increase in potential to emit after the applicable date qualifies it as a major stationary source (the existing rules accumulate only emissions increases and do not take decreases in account). For PSD review, the date from which emissions increases were to be aggregated was August 7, 1977, the date found in the 1978 PSD regulations. The proposed December 21, 1978 date for each of the nonattainment regulations, including the construction moratorium, marks the time when sources constructing in nonattainment areas were placed on notice that accumulation could later subject them to review.

EPA also proposed that, once a series of individually minor changes or one major change at a minor stationary source had qualified for review, the control technology assessment would focus on the last changed unit triggering review while the air quality assessment would consider all aggregated emissions.

Finally, the Administrator proposed on September 5 that accumulation would also govern the review of individual *de minimis* changes at major stationary sources. Once a source had aggregated enough emissions to make it major, a subsequent emissions increase of any size at the source would have to undergo review, unless the increase together with any contemporaneous increases or decreases of any size would qualify as a *de minimis* increase.

Twenty of the twenty-three comments received did not favor retaining the accumulation concept, even with the addition of netting. Two other commenters endorsed accumulation, but with different starting dates. Two industrial commenters claimed that accumulation cannot be legally required, since section 111(a)(4) defines modification in terms of *any change* and not a *series of changes* at a stationary source. Most other commenters agreed that neither the court nor the Act takes a position on accumulation, but they requested that the Agency not adopt or maintain such a concept. These commenters claimed that both major and minor source accumulation complicates the regulations and could eventually subject the most minor of emissions changes to review. The increase in paperwork, and the administrative strain of trying to document and report *de minimis* emissions changes, were claimed to be overwhelming, costly, and counterproductive.

These concerns might have had merit if the proposed *de minimis* emission levels had not been raised in the final regulations and the accumulation of *de minimis* changes was to continue even after a preconstruction permit had been issued. It was suggested that the general NSR procedures found in all SIPs be relied upon to effect good control for the *de minimis* or minor emissions changes, instead of accumulation. Commenters stressed that, in any event, accumulation of *de minimis* increases should run over the same time period for crediting contemporaneous reductions.

The Administrator has reconsidered the need for an accumulation rule and has decided to retain accumulation to determine if a greater than *de minimis* increase would occur at a major stationary source and to delete accumulation for aggregating changes at minor stationary sources. The primary reason for proposing accumulation at minor sources was to prevent circumvention of the regulations by the systematic construction of carefully sized emissions units which only in the aggregate would trigger review. Even though all significant changes at a source would face review once the source became major, a significant loophole was thought to exist. For example, absent an accumulation rule, a company could construct a 498-ton source without having to get a PSD permit by constructing first one-half of it and then subsequently the other half. The Administrator, however, does not find adequate support in the Act for applying PSD review to the change at a minor

source which would make the source major. Section 165 applies only to major emitting facilities on which "construction" commences after a specified date, where the term "construction" includes "modification." Similarly, section 172(b)(6) requires permits for the construction of new or modified major stationary sources. EPA believes that, in general, PSD and nonattainment review cannot be applied to a modification unless it would occur at a source that is already major. The one exception to this rule is where a proposed addition to an existing minor stationary source would be major in its own right. Such construction is equivalent to a new major stationary source and should therefore be subject to PSD and nonattainment review. A new subsection in each of the PSD and nonattainment regulations embodies that view.

In general, under the promulgation announced here a series of minor changes at the same minor stationary source will not be accumulated. On the other hand, a series of individually *de minimis* changes at a major stationary source would be accumulated within a contemporaneous time frame to see if a review would be required. This is reflected in the definitions of "net emissions increase" in the PSD and nonattainment regulations. Plainly, a series of individually *de minimis* increases in emissions in the aggregate deteriorate air quality significantly.

I. Restrictions on Construction

EPA proposed that the netting of emissions changes would not be permitted in areas subject to construction restrictions under section 110(a)(2)(I) or 173(4). EPA based this proposal on an interpretation that Congress intended all forms of offsets to cease after June 30, 1979, in the absence of an approved Part D plan. This policy would also have promoted the timely submittal of attainment plans and prevented the nonattainment problem from growing worse while the plan was being developed. The Administrator believed that sources might convert reductions later needed for attainment into offsets before the plan requiring those reductions could be adopted and approved.

Thirty-two of thirty-five commenters said that the proposed "increase only" approach was unacceptable. No substantial support was given by the three that favored it. Several questioned the legality of the proposed interpretation and claimed that *Alabama Power* authorized only a netting approach, despite any programmatic sense that another

approach might have. Several asserted that EPA's proposal would discourage early cleanup and actually perpetuate the existing air quality problem.

The Administrator has reconsidered the interpretation that led to the proposal of the "increase only" approach for carrying out the growth restrictions and concluded that the *Alabama Power* decision does not support it. Thus, in the final rules promulgated today, a major stationary source can construct in a growth restricted area, if sufficient contemporaneous, creditable net reductions are found (subject to the limitations on reconstruction described below).

J. Reconstruction

In the September 5, 1979 proposal, a reconstruction (roughly, improvements at an existing source which equal 50% or more of the capital cost for replacing the source) was to be treated as if it were a new source for purposes of NSR under both PSD and nonattainment rules. Under the proposal, a reconstructed major stationary source would be subject to review regardless of any contemporaneous emissions reductions that would occur at the same source. The Administrator proposed this approach in accordance with Congressional intent to subject new construction in nonattainment areas to requirements such as meeting the lowest achievable emission rate (LAER), even though a replacement of an older unit would result in a net reduction from previous emission levels (see 123 CONG. REC. 13702, col. 2 [daily ed. August 4, 1977] (statement of Senator Muskie)). In the agency's view nonattainment areas require very stringent NSR Procedures to overcome the inertia of the nonattainment problem. Having a reconstruction provision would promote maximum air quality improvements from an area's limited reduction capability by requiring more construction projects to meet LAER and bring other sources in the State under common control into compliance with the SIP.

The reconstruction rule was also proposed for PSD in an effort to be consistent with nonattainment NSR. Although the Administrator recognized that the air quality rationale for having reconstruction in nonattainment areas was considerably stronger than that for PSD inclusion, it was believed that less confusion would result with a parallel application of the reconstruction rule.

All ten commenters on the reconstruction topic voiced general disapproval for the proposal. Eight of the ten favored dropping the concept

entirely from both sets of regulations, with the remaining two requesting that its applicability be restricted. They advised that EPA should rely instead on the reconstruction provisions of NSPS and NESHAP to ensure such construction would apply adequate control technology. Commenters complained that review criteria based solely on the replacement cost of equipment regardless of air quality improvements make little sense for NSR rules charged with safeguarding air quality. They further argued that the added regulatory complexity inherent to the inclusion of a reconstruction provision was not warranted and its addition to NSR would not be consistent with the "no net increase" exemption under *Alabama Power*.

The Administrator agrees that the reconstruction requirement makes only limited air quality sense for PSD and has reconsidered the need to retain this concept for the program. It is true that a reconstructed source not otherwise subjected to PSD review as a major modification (i.e., such source would not cause a significant net emissions increase) would not interfere with the PSD air quality objective of allowing only limited deterioration of existing air quality. On the other hand, the PSD objective of maximizing future use of the allowable increments through application of best available control technology (BACT) would not be strictly met. Nevertheless, the Administrator believes that the general PSD objective of safeguarding existing air quality from significant degradation will not be undermined by deleting the requirement for review of reconstructions.

The proposal would have implemented reconstruction for PSD only on a plant wide basis. Thus, an entire plant would have to be reconstructed in order for it to be subjected to PSD review as a reconstruction. Few instances of plantwide reconstruction are expected. The limited applicability under PSD brings further doubt as to the real need for the added complexity that a reconstruction provision would bring to determining the permit applicability of construction projects. Furthermore, the deletion of reconstruction from PSD would avoid some increment tracking problems; treating reconstruction as new PSD sources could lead to increment consumption unrelated to actual air quality changes.

The Administrator does not agree with the commenters who argued that applying "reconstruction" in nonattainment areas would bring unwarranted complexity and no air

quality benefits. As explained in the proposal, EPA believes that the reconstruction provision within nonattainment NSR rules is consistent with stated Congressional intent and programmatic goals to get reasonable air quality improvements from each major construction activity. Since *Alabama Power* did not strictly bind EPA in nonattainment concerns and since the reconstruction concept was not expressly precluded, the Administrator has determined that reconstruction is warranted in nonattainment areas and is today promulgating this concept as proposed for nonattainment NSR rules.

Commenters also asked that several exemptions be considered if a reconstruction rule were promulgated. Among the exemptions suggested were: (1) current NSPS exemptions for modifications, (2) Fuel-Use Act exemptions, (3) involuntary replacement of damaged equipment, and (4) voluntary fuel switches. The Administrator is not promulgating any of these exemptions into the reconstruction provision. First, the current NSPS exemptions and involuntary replacement of damaged equipment do not avoid applicability of NSPS under 40 CFR 60.15 when a unit would have been reconstructed. Therefore, it would be inconsistent to establish such a concept under nonattainment NSR. In addition, 40 CFR 60.15, which governs how the reconstruction rule will apply in the affected NSR programs (see e.g., 40 CFR Part 51 Appendix S, section II, A[12]), allows the Administrator, in paragraph (f), some case-by-case discretion in determining when a reconstruction would occur. Thus, no specific exemptions such as those suggested appear warranted at this time.

K. Exclusions

In September, EPA proposed to exclude "routine maintenance, repair and replacement" from the category "physical change" which appeared in the proposed PSD and nonattainment definitions of "major modification." At the same time EPA proposed to exclude the following events from the category "change in method of operation," unless previously limited by enforceable permit conditions: (1) a fuel switch due to an order under the Energy Supply and Environmental Coordination Act of 1974 (ESECA) (or any superseding legislation) or due to a natural gas curtailment plan under the Federal Power Act; (2) a voluntary switch to an alternative fuel or raw material that the source prior to January 6, 1975, was capable of accommodating; (3) a fuel switch due to an order or rule under section 125 of the

Clean Air Act; (4) a switch to "refuse derived fuel generated from municipal solid waste" (RDF), and (5) a change in the ownership of a source.

EPA received few comments on the proposed exclusions. Certain commenters expressed reservations about the legal and policy basis of the RDF exclusion. Another commenter urged EPA to expand the exclusion for voluntary switches to an alternative fuel or raw material. Specifically, the commenter urged the Agency to drop the provisions which limited the exclusion to switches that would not require a change in permit conditions and to sources that were capable of accommodating the fuel or material before January 6, 1975. The commenter agreed with the position EPA took in the preamble to the 1978 Part 52 PSD regulations that Congress in enacting section 169(2)(C) intended that voluntary switches to an alternative fuel or raw material should be treated in the same way that they were being treated under section 111. *See* 43 FR 26396 (June 19, 1978). At the time Congress enacted section 169(2)(e), the regulations promulgated under section 111 excluded any such switch if the source could accommodate the fuel or material before the relevant NSPS applied to the source type. Whether a permit condition would restrict the switch was immaterial. *See* 40 CFR 60.14(e)(4) (1979). In view of this, the commenter argued that Congress intended the exclusion in the PSD and nonattainment regulations to look only at whether the source was capable of accommodating the fuel or material before those regulations first applied to it.

After considering the comments on the RDF exclusion, EPA has decided to promulgate it. The Resource Conservation and Recovery Act of 1974, 42 U.S.C. 3251 *et seq.*, firmly supports the exclusion. In that statute, Congress expressed a strong interest in the development and use of RDF. In addition, the exclusion has a sound policy basis, in view of the importance of reducing the nation's dependence on foreign oil.

In promulgating the exclusion, however, EPA has drawn it, by way of clarification, somewhat more tightly. It now excludes only a switch to RDF by a "steam generating unit." EPA intends that term to have the same meaning for the purposes of PSD and nonattainment NSR as it does for the purposes of the new NSPS for certain electric utility "steam generating units." For the NSPS definition of that term, see 40 CFR 60.41a (1979).

In response to the comment on the voluntary fuel and raw material switch

provision, EPA has retained the language which limited it to sources which were capable of accommodating the fuel or material before January 6, 1975 (or December 21, 1976, for the Offset Ruling and 40 CFR 51.18; or July 1, 1979, for the construction moratorium) and the language which limited the exclusion to those not requiring a permit alteration. First, EPA disagrees that the cutoff date in the counterpart NSPS exclusion is analogous to the date the particular preconstruction permit regulations applied to a particular source. To the contrary, the NSPS counterpart is more broadly drawn; it focuses on the date the NSPS first applied to the *source type*. Second, EPA disagrees that the counterpart governs whether the NSR exclusions must ignore permit conditions. The NSPS program does not involve assessments of the impact of a source on air quality. In EPA's view, any switch to another fuel or raw material that would distort a prior assessment of a source's air quality impact should have to undergo scrutiny.

It should be noted that EPA has added a new clause to the exclusion for voluntary fuel switches. It provides that a switch which the relevant reviewing authority has already approved is not a "physical change" or "change in the method of operation" for NSR purposes. Obviously, a second evaluation of the air quality impact of the switch would be unnecessary.

The comment relating to voluntary switches has prompted EPA to add one more exclusion. It would exclude any increase in hours or rate of operation, as long as the increase would not require a change in any preconstruction permit condition established under the SIP (including PSD permits) after the relevant date of concern.

This exclusion stems largely from EPA's decision that the definitions of "major modification" should focus on changes in "actual emissions." While EPA has concluded that as a general rule Congress intended any significant net increase in such emissions to undergo PSD or nonattainment review, it is also convinced that Congress could not have intended a company to have to get a NSR permit before it could lawfully change hours or rate of operation. Plainly, such a requirement would severely and unduly hamper the ability of any company to take advantage of favorable market conditions. The emphasis of the relevant statutory provisions on "construction" strongly supports EPA's interpretation of Congress' intent. *See, e.g.*, section 165(a), 42 U.S.C. 7475. At the same time, any

change in hours or rate of operation that would disturb a prior assessment of a source's environmental impact should have to undergo scrutiny.

Because of the absence of any significant comments on the other four exclusions, EPA has promulgated them as proposed.

L. Example of How the Definitions Work

The way in which the definition of modification works is best illustrated by an example. The example also demonstrates the relationship among a source's potential to emit, its actual emissions, and its allowable emissions.

In December 1980, a new source (Source A) that will emit SO₂ and PM files a PSD application to locate in an area that is attainment for SO₂ and PM. At maximum operating capacity including application of best available control technology, and assuming year-round continuous operation, the source can emit 700 tons of SO₂ per year. Seven hundred tons per year (tpy) is the source's physical potential to emit SO₂. Its physical potential to emit PM is 15 tpy. Provided that the 15 tpy of PM emissions is made federally enforceable, PM emissions will not be significant (*i.e.*, less than 25 tpy) and are, therefore, not subject to PSD review.

In the course of review, modeling reveals the SO₂ increment will be violated in the source's area of impact if it emits 700 tons SO₂ per year. The source, therefore, decides to limit its operation so as to decrease its emissions to 600 tons SO₂ per year. This reduction proves sufficient to eliminate the predicted violation. The source is issued a PSD permit that sets an SO₂ emissions limitation of 600 tpy, which reflects the revised source operation (approximately 20 hours a day, seven days a week). This emissions rate is the source's legal potential to emit. It is also the source's allowable emissions, since it is the emissions rate specified as a federally enforceable permit condition. *See e.g.*, § 52.21(b)(15)(iii).

During the first three years of operation, from March 1982 to March 1985, the demand for the source's product is less than anticipated. As a result, the source's actual emissions are 250 tpy during the first year and 300 tpy during the next two years.

In April 1985, another new source of SO₂ (Source B) proposes to locate in the area of impact of Source A. Consequently, in calculating its impact on ambient standards and its increment consumption, Source B is required to model the emissions of Source A. Under EPA's increment consumption policy (*see Increment Consumption*), Source

A's actual emissions should be modeled. Because Source A has an individually-tailored PSD permit, the definition of actual emissions allows the reviewing authority to presume that the allowable emissions in Source A's PSD permit reflects its actual emissions, unless the reviewing authority or source applicant has reason to believe that allowable emissions are not representative of actual source emissions.

In the case of Source A, allowable emissions, in fact, differ from actual emissions. Assuming that the reviewing authority is aware of this difference as a result of its periodic assessment or because Source B has presented this information in its application, Source A is modeled at its actual emissions rate representative of normal source operation during a two-year period preceding the date of concern. In this case, the date of concern would be approximately the date Source B submits its application. The reviewing authority should, therefore, look to the two-year period preceding that date unless that period of time was atypical of normal source operation. For Source A, the two-year period preceding Source B's application can be considered representative of normal source operation. Source A's actual emissions during that period, on an average annual basis, are approximately 300 tpy. The modeling of increment consumption for Source B should assume that emissions rate for Source A.

Unless Source A's permit is revised at this point to reflect its actual emissions rate of 300 tpy, Source A could attempt to use the decrease in its actual emissions in the future to offset a future emissions increase of its own. This would result in a large net increase in actual emissions for the area which could violate the applicable PSD increment. The potential problem of double counting of emissions decreases is discussed in more detail in Increment Consumption.

Assume that in June 1987, Source A decides to modify its facility. Demand for its product has increased and Source A wants to add a new emissions unit that will emit 60 tpy SO₂. In addition, Source A plans to increase the hours of operation at the units which began production in March 1982, to result in an actual emissions increase of 75 tpy at those units. If no contemporaneous decreases have occurred, both changes will result in significant net increases in actual emissions. Both changes then qualify as modifications. The addition of a new unit is a physical change. The increase in hours of operation is a change in the method of operation,

assuming that the reviewing authority revised Source A's permit to reflect its actual emissions of 300 tpy at the time Source A's actual emissions were used by Source B in modeling increment consumption.

If Source A was able to decrease sufficiently its actual emissions at another unit at the source, it would be able to avoid PSD review for one or both modifications. Assume, for example, that in April 1986, Source A applied additional control equipment and decreased actual SO₂ emissions across the facility by 100 tpy. In June 1987, Source A can use those decreases to offset its proposed contemporaneous increases provided the decreases are made federally enforceable. If Source A's proposed increase in hours of operation for the units which began operation in March 1982 would result in an emissions increase of 75 tpy and the emissions from the proposed new unit are 60 tpy, Source A can use its 100 tpy decrease to avoid PSD review for both changes. Seventy-five tons of the decrease can be used to offset the increase in hours of operation and 25 tons of the decrease can offset 25 tons of the increase due to the new unit. Since the net emissions increase of 35 tons is not significant, it would not be a major modification requiring PSD review.¹²

Suppose Source A then plans to increase its emissions by 150 tpy in November 1990 and to decrease emissions by 80 tpy in February 1989. The increases and decreases since April 1986 are all contemporaneous because they occurred within the same five-year period. Now, assume Source A revises its permit to reflect only 50 tons of the 80-ton decrease in February 1989. Source A can receive credit for only 50 tons of the 80-ton decrease, since only this amount was made federally enforceable. However, Source A does receive credit for the April 1986 decrease of 100 tpy, assuming that decrease was made federally enforceable at the time of the June 1987 increase, or is made federally enforceable prior to commencement of construction on the November 1990 increase. Source A's total creditable decreases are then 150 tpy. Its increases are 135 tpy in June 1987 and 150 tpy in November 1990, for a total increase of 285 tpy. The net emissions increase is 135 tpy, which is significant for SO₂. Source A must get a PSD permit for the change leading to the 150 tpy increase in November 1990. However, it is not

required to get a PSD permit for the June 1987 increases.

If, from March 1982 to March 1985, Source A had exceeded its allowable rate of 700 tpy, Source A could not receive full credit for its April 1986 decrease. For example, assume Source A's actual emissions from March 1982 to March 1986 were 800 tpy, 100 tpy over its allowed rate. None of the 100 tpy reduction in April 1986 would then be creditable. The amount of Source A's creditable decrease could also be reduced if the designation of the area where Source A is located were changed from attainment to nonattainment in March 1985 and Source A became subject to a new, more stringent SIP requirement in March 1986. If, for example, the SIP required Source A to reduce emissions from 700 to 600 tpy by December 1988, none of the 100 tpy decrease in April 1986 would again be creditable.

XI. De Minimis Exemptions

In the *Alabama Power* decision, the court indicated that emissions from certain small modifications, and emissions of certain pollutants at new sources, could be exempted from some or all PSD review requirements on the grounds that such emissions would be *de minimis*. In other words, the Administrator may determine levels below which there is no practical value in conducting an extensive PSD review. The court also indicated that the Agency could establish exemptions based on administrative necessity (e.g., the inability of reviewing authorities to provide the necessary work force to properly review a very large number of permit applications). The September 5 proposal incorporated the *de minimis* concept and requested comments on the approach taken. At that time, the Administrator noted that because of the urgency associated with the proposal, the *de minimis* numbers published were not supported by extensive analysis, and that a more thorough analysis would be undertaken prior to promulgation.

The proposal included two tables, one for defining significant emissions changes (in tons per year) and one for defining significant air quality changes (in micrograms per cubic meter). Values lower than those in the proposed tables were recommended as being *de minimis*. These tables, with respect to criteria pollutants, were generally based on the "significance" levels published in the preamble to the June 19, 1978 PSD regulations (43 FR 26398) and in the Offset Ruling (44 FR 3283). These significance levels in turn were derived from the Class I increment values listed

¹² Under the provisions of 40 CFR Part 51 Appendix S, 40 CFR 51.18(j), and 40 CFR 52.24, the emissions increases at Source A would probably be subject to review as modifications, notwithstanding the contemporaneous decreases at the source.

in Part C of Title I of the Clean Air Act. For noncriteria pollutants, a similar approach was taken: the Agency extrapolated emissions rates from documented air quality guideline numbers, where available.

In the proposal, the tables were presented as preamble guidelines to be used in the following manner. For PSD, any new source subject to review was to be analyzed for the application of BACT for each pollutant whose emissions would exceed the value in Table 1. In addition, an air quality analysis to determine the impact of these pollutants was required. For modifications, any pollutant for which the source was major and for which there was a contemporaneous net increase equal to or greater than the applicable value(s) in Table 1 would trigger PSD review of the modification; as in the case of new sources, BACT and air quality impact analyses were required for each pollutant whose net emissions increased by greater than a *de minimis* amount. Table 2 was proposed to provide an exemption from air quality impact analysis (including monitoring) for those sources and modifications which could demonstrate that their maximum expected air quality impact would be less than the values listed. Sources, including modifications, claiming to be exempt from reviews on the basis of *de minimis* emissions would be required to so notify the Administrator. The *de minimis* requirements also would apply to nonattainment sources, but would be restricted to the pollutant(s) for which the area is nonattainment.

The Agency received extensive comments on the proposed *de minimis* approach. In all there were 121 comments addressing this issue. While there was almost universal endorsement of the concept, a large number of commenters (65) criticized the proposed values as being too low. Some of these commenters stated that there was a lack of support for the numbers presented and felt that the emissions table was more restrictive than the table of air quality concentrations; others claimed that the low *de minimis* levels made the applicability of the review process inequitable for modifications in comparison to new sources. A consistent theme was that the proposed values would necessitate unproductive review in terms of environmental benefit while consuming applicant and reviewing authority resources. Although there were suggestions concerning how big the emissions numbers should be (100 tons per year was a popular choice), little specific guidance was given on how to develop alternative

numbers. Suggestions generally were limited to using various percentages of the national ambient air quality standards or the amount of existing emissions. One commenter did suggest the use of an equation that accounted for variability in stack height.

Only one commenter criticized the *de minimis* levels for being too high. This commenter also believed that exemptions from review because of emissions less than the *de minimis* rate should not be automatic, but should be allowed only after a case-by-case review of source impact. In addition, the commenter stated that in areas where the increment is almost entirely consumed, sources should be subject to PSD review for any increase in emissions.

A frequently addressed aspect was the perceived need to incorporate any *de minimis* values in the regulations, as opposed to leaving them as guidelines in the preamble. Forty-eight of fifty-six commenters favored such a change. The general concern was that since the preamble is omitted from the Code of Federal Regulations, the regulations as written would appear to be ambiguous as to the term "significant." Those that favored leaving the tables as guidelines did so generally to provide more flexibility either for sources to demonstrate that they should be exempt or for states to develop alternative *de minimis* values.

There were several other meaningful comments. Sixteen commenters recommended that *de minimis* coverage be limited to criteria pollutants. Eighteen commenters contended that the need to accumulate *de minimis* changes was burdensome, environmentally unnecessary, and should be dropped; some questioned the legislative basis for this requirement. Several commenters cited the difficulty, if not impossibility, of monitoring for all regulated pollutants. These commenters were especially concerned regarding monitoring for noncriteria pollutants, indicating that the requisite technology was not available in some cases. Other commenters questioned how the term "no impact," which is used in the regulations to protect Class I areas, relates to the Table 2 *de minimis* values.

Mindful of the comments received, the Administrator has undertaken a reassessment of the *de minimis* issue. This reassessment is described in two documents. One is a report entitled "Impact of Proposed and Alternative *De Minimis* Levels for Criteria Pollutants," EPA-450/2-80-072, and the other is a staff paper entitled "Approach to Developing *De Minimis* Values for Noncriteria Air Pollutants." These are

available for examination in the rulemaking docket. In addition, copies may be obtained by writing to the Air Information Center, U.S. EPA Library Services, MD-35, Research Triangle Park, NC 27711.

Obviously, a significant part of the reassessment involved the use of reasonable judgment. The task requires consideration of an area in which not only is data limited, but criteria for decision making is almost non-existent. The first task of the reevaluation was to identify the basic objectives to be met in selecting *de minimis* values. The primary objectives identified were: (1) provide effective Class I area protection; (2) guard against excessive "unreviewed" consumption of the Class II or III increments; and (3) assure meaningful permit reviews. "Meaningful" in this context implies that there would be a possibility of obtaining useful air quality information or obtaining greater emission reductions as a result of BACT analysis than would be expected from normal state permit or NSPS/NESHAP processing.

The proposed *de minimis* air quality values, which stemmed from the legislated Class I increments, caused concern for two reasons. First, if a modification occurs near enough to a Class I area, almost any *de minimis* emissions level could impact the area. Thus, proximity rather than emissions level appears to be more important in Class I area protection. Second, the general imposition of Class I criteria on the review process for Class II and III areas may be overly stringent. These concerns were examined as part of the *de minimis* reassessment.

As a result of this examination, the Administrator has decided that higher *de minimis* emissions rates than those used in the proposal could apply to review of sources which would not construct within a specified distance of a Class I area. However, a proposed source or modification that would construct close to a Class I area must be prepared to demonstrate for each regulated pollutant that it would emit that it would not have a significant impact on such area (defined as one microgram per cubic meter ($\mu\text{g}/\text{m}^3$) or more, 24-hour average), even if the proposed emissions increases are below the applicable *de minimis* threshold. The effect of this change is to require less review for many sources through higher *de minimis* values (compared to the proposal), while adding a limited air quality analysis requirement for only a few sources. Such a change is consistent with the objectives of protecting Class I

areas while limiting PSD review to projects with significant impact.

There were three basic alternatives available for specifying *de minimis* cutoffs—one based solely on air quality impact, one based solely on emissions rate, and one based on a combination of these, such as was proposed on September 5. The Administrator has chosen to specify *de minimis* cutoffs in terms of emissions rate for applicability, BACT and air quality analysis purposes, with no provisions for case-by-case demonstration of a source's air quality impact. This is a departure from the proposal in that, as proposed, a source could avoid air quality analysis requirements for a given pollutant by demonstrating that it would produce a maximum impact less than the air quality concentrations listed for that pollutant. An air quality concentration *de minimis* level for each pollutant for which measurement methods are available is included in the regulations only for the purpose of providing a possible exemption from monitoring requirements.

This approach has been adopted for several reasons. First, the Congress specified emissions rates, not projected air quality impacts, in the Clean Air Act as the criteria for determining which sources are major and therefore subject to PSD review. Moreover, the court, in the *Alabama Power* decision, continually refers to emissions rate rather than air quality concentration in its discussion of the *de minimis* issue. Therefore, it would be inconsistent with the existing guidance to abandon the emissions rate concept.

Second, if applicability decisions depended on confirming a demonstration by the source that its impact would be less than a given air quality level, it is the Administrator's opinion that the review process would become excessively complex and greatly increase the resources needed by reviewing authorities to carry out the program. In addition, such an approval would create an atmosphere of uncertainty as to whether individual sources needed to apply for a permit or not, and could lead to uneven application of the regulations from state to state. Third, the task of establishing *de minimis* air quality levels for noncriteria pollutants, with proper consideration of threshold levels and factors of safety (if any), is very complex and could not be done in the time available.

Finally, given the inclusion of a *de minimis* exclusion for monitoring, it serves little purpose to have a separate table to permit an exclusion from the remaining air quality impact analysis

requirement. (A separate table would be required because monitoring capability and concern for potential effects are unlikely to be associated with the same air quality concentrations.) Besides making the regulations more complicated, this resultant demonstration necessary to earn an exemption from air quality impact analysis would in itself be an air quality impact analysis.

In analyzing the basis for *de minimis* emissions rates, it was apparent that two distinct classes of pollutants were involved. The first consists of the criteria pollutants for which extensive health and welfare information has been developed and documented in the respective criteria documents. The other class consists of the noncriteria pollutants for which, as the name implies, no criteria on ambient effects exist. Rather, these pollutants are covered by either New Source Performance Standards (NSPS) or National Emission Standards for Hazardous Air Pollutants (NESHAP), both of which are based on a national emissions standard, rather than an air quality management approach. That is, the regulations developed pursuant to both these legislative requirements generally specify emissions limitations and/or equipment performance standards as opposed to threshold air quality levels that must be achieved as for the criteria pollutants. Thus, it appeared reasonable to develop *de minimis* cutoffs from separate perspectives—to base criteria pollutant *de minimis* emissions cutoffs on air quality "design values" and to base the noncriteria pollutant *de minimis* values on the emissions rates embodied in the NSPS and NESHAP.

The first step in developing *de minimis* emissions rates for the criteria pollutants, therefore, was the establishment of air quality "design values." Such design values were then converted to emission rates in accordance with EPA modeling procedures,¹³ using data on sources permitted under the PSD program. The latter provided modeling parameters associated with sources of the type expected to be most affected by the *de minimis* requirements. Ambient concentrations representing percentages of the primary 24-hour air quality standard, as well as percentages of the Class II increment, were evaluated for particulate matter (PM) and sulfur dioxide (SO₂). Similarly, various

percentages of the primary standard for the other criteria pollutants were examined.

The primary standard was chosen as the basis for design values because, except for PM and SO₂, none of the criteria pollutants have a secondary standard that is different than the primary standard. The 24-hour standard instead of the annual standard was used for PM and SO₂ since short term rather than the long term impact tends to be the controlling factor in determining whether air quality increments are exceeded. In addition, levels higher than five percent of the primary standard were not seriously considered because that percentage equates to approximately 35 percent of the TSP Class II increment. The Administrator does not believe that a source which, due to its own emissions, could potentially consume more than that amount of increment should be exempt from review.

Two factors had an important influence on the choice of *de minimis* emissions levels within the resulting range of annual emissions rates. The primary one was the cumulative effect on increment consumption of multiple sources in an area each making the maximum *de minimis* emissions increase (thereby going unreviewed under PSD at the time of the change). The other, and secondary one, was the projected consequence of a given *de minimis* level on administrative burden. To determine the cumulative effect on increment consumption expected from several sources, all making maximum *de minimis* increases (a rather unlikely event) in the same area, actual source distributions in the Dayton, Ohio, area were used. Dayton was chosen because it is a fairly representative industrialized community, and source data suitable for modeling was readily available. To check the impact of the various *de minimis* levels on administrative burden, data from past permitting experience were again used, in this case to prepare curves showing the number of sources expected to require review at various *de minimis* emissions levels. A description of these analyses is found in the *de minimis* report on criteria pollutants cited earlier.

As a result of the reevaluation, the Administrator has decided to use four percent of the 24-hour primary standard as a design value for both PM and SO₂. These ambient levels correspond to emissions rates of 25 tons per year for PM and 40 tons per year for SO₂ (except for lead, all emissions rates predicted from the modeling for criteria pollutants were rounded to the nearest five tons).

¹³ Guidelines for Air Quality Maintenance Planning and Analysis, Volume 10 (Revised): Procedures for Evaluating Air Quality Impact of New Stationary Sources, OAQPS No. 1.2-029R, October 1977.

Four percent of the lead standard was also used, yielding an emissions rate of 0.8 tons per year. The emissions rate for carbon monoxide (CO) in all cases was greater than 100 tons per year, the limit set in the Clean Air Act to define major for many source categories. Therefore, as proposed, the *de minimis* emissions rate for CO is established at 100 tons per year.

Because the nitrogen dioxide standard is expressed only as an annual average, a factor of two percent was used to determine the design value. There were two reasons for this decision. First, for a given level of emissions, a predicted annual concentration will be smaller than a short-term value. Conversely, therefore, a lower percentage for the annual standard than for a shorter term standard is indicated if one is to maintain a reasonably consistent rationale for emissions rates. Second, the emissions rate corresponding to two percent of the standard is 40 tons per year, which is comparable to the rate established for SO₂. Both these pollutants are frequently emitted from the same source, in roughly equivalent amounts; for example, a typical power plant meeting the NSPS with low sulfur coal would emit about 1300 tons per year of nitrogen oxides and about 1500 tons per year of SO₂.

Finally, models for use in establishing a relationship between individual source hydrocarbon (VOC) emissions and ozone concentrations are not presently available. Thus, it was not possible to model an emissions rate from an air quality design value. However, in view of the link between VOC and NO_x emissions in the formation of ozone, the emissions rate for VOC was also set at 40 tons per year.

It should be recognized that several sources or modifications can be allowed in the same area even though each might consume up to four percent of the standard (about 16 percent of the Class II increment for SO₂, and about 28 percent for PM). This is because the source specific concentration occurs in only a limited area (often one point) and the temporal and spatial conditions which lead to maximum consumption by one source are seldom the same for other sources that may be making similar *de minimis* changes. To reinforce this understanding, a modeling analysis of 37 sources in the Dayton area was conducted. The maximum aggregate increment consumption projected to occur as a result of all major sources each making a *de minimis* emissions increase equal to 40 tons per year (e.g., that for SO₂) was less than 1.5 $\mu\text{g}/\text{m}^3$ on a 24-hour basis. While representative of

only one set of conditions, this result could probably be expected in most industrialized areas.

Excessive increment consumption is unlikely, given the safeguards existing in the regulations. Although such sources would not get PSD permits, they do not go unreviewed. Most, if not all, will be permitted under ongoing state NSR programs pursuant to 40 CFR 51.18. Moreover, their contribution to increment consumption will be evaluated either by the next major source undergoing PSD review, or during the periodic assessment of source growth. Nevertheless, in atypical situations there might still be concern with the *de minimis* levels causing accelerated increment consumption. This can be controlled by a state, upon taking the program, through the establishment of smaller *de minimis* levels.

To determine a proximity cutoff that gives assurance of protection of Class I areas, a modeling analysis was performed to identify the effect of the *de minimis* emissions levels on such areas using Volume 10 screening procedures. For the purpose of this analysis, the effect of varying stack height and meteorology, as well as the influence of terrain features, was considered. Significant impact was taken to be one $\mu\text{g}/\text{m}^3$ 24-hour average. The results indicate that sources locating more than 10 kilometers from a Class I area would not have such an impact as a result of making *de minimis* changes. Therefore, the regulations promulgated here require that any new or modified major stationary source within that distance from a Class I area will be subject to review if the source would have an impact on the area equal to or greater than one $\mu\text{g}/\text{m}^3$, 24-hour average. It must be pointed out that while the preceding responds to those commenters concerned about how to judge whether a source has "no impact" on a Class I area, the analysis of impact on such an area from major sources subject to PSD review must be done on a case-by-case basis. Further, such sources may be subject to an evaluation by the appropriate Federal Land Manager as described in the regulations.

Noncriteria pollutant emissions rates were developed from the existing emission standards (NSPS and NESHAP). In general, a fraction of the applicable standard was used. In the Administrator's judgment, since the NSPS represents the best adequately demonstrated control technology on a nationwide basis, and the NESHAPs are established with an ample margin of safety to prevent unreasonable risk to

the public health from hazardous pollutants, a small percentage of these standards would, for PSD purposes, prevent a significant change from escaping review.

Levels generally representing 20 percent of a NSPS emissions standard and, because of their greater impact on health, ten percent of a NESHAP emissions standard, were evaluated. The air quality impacts of the resulting NSPS emissions rates were then calculated in a manner similar to that used for the criteria pollutants. These concentrations were compared to available health and welfare data to assure that significant adverse effects were avoided. In the case of fluorides, this check resulted in a reduction of the emissions rate originally indicated. No adjustment based on resultant effect was made for the hazardous pollutants since the NESHAP emissions rate, as noted above, is itself intended to protect the public health with an ample margin of safety; therefore, ten percent of such a value is in the Administrator's judgment sufficiently stringent for use as a *de minimis* level.

A brief discussion of the rationale for each noncriteria pollutant emissions rate is given below. For more information, see the staff paper cited earlier.

Hazardous Pollutants (NESHAP): Asbestos—Reevaluation of existing data indicates that trying to establish a quantitative link between emissions and potential effects is not possible. No level of exposure can be presumed *de minimis*. Therefore, a theoretical *de minimis* emissions rate of zero was considered. Such a value is not practical, however, since changes of any kind at sources using materials containing even traces of asbestos could trigger review regardless of the amount of asbestos emitted. Therefore, an estimate was made of the emissions from well controlled sources from which asbestos can be emitted. Although data is very limited, rough estimates of emissions from four source categories were developed. Three categories are covered by the NESHAP regulations: asbestos milling, manufacturing using asbestos in the process (e.g., textiles, asbestos tile), and asbestos asphalt manufacture. Rock crushing, a fourth category not covered by the NESHAP, was also examined. Emissions rates from these four categories, using available data, were respectively 0.2 tons per year (TPY), 0.07 TPY, 0.04 TPY, and 0.06 TPY. Because asbestos is carcinogenic, a conservative approach to establishing the *de minimis* emissions rate has been taken. The *de minimis* level is based on a source category

which has relatively small asbestos emissions, and which includes the majority of asbestos emitting sources—manufacturing operations using asbestos. Therefore, the promulgated asbestos *de minimis* rate is 0.007 TPY, based on ten percent of the emissions estimated from asbestos manufacturing sources.

Beryllium—The NESHAP emissions rate is ten grams per day or 0.004 tons per year. Ten percent of this yields a *de minimis* emission rate of 0.0004 tons per year.

Mercury—The NESHAP emissions rate is 2300 grams per day which equates to approximately one ton per year. At ten percent, the promulgated *de minimis* emissions rate is 0.1 tons per year.

Vinyl chloride—The NESHAP standard is expressed in parts per million of the effluent stream. It was therefore necessary to assume model plant characteristics in order to develop expected emissions from a well controlled plant. As in the case of asbestos, the Administrator believes that it is prudent to base these calculations on a small model plant considering the suspected carcinogenicity of this pollutant. Such plants, well controlled, emit about 10 tons per year. Based on this value, the promulgated *de minimis* emissions rate is one ton per year.

NSPS Pollutants:

Fluorides—The proposed *de minimis* emissions rate for fluorides was extremely conservative, and was strongly criticized as being too low by several commenters. Upon reevaluation, the Administrator agrees with the comments. A *de minimis* emissions rate based on the NSPS for aluminum plants is 30 tons per year—a well controlled, moderate sized, plant emits about 150 tons per year of fluorides. At a rate of 30 tons per year, the predicted maximum 24-hour ambient concentration is approximately ten micrograms per cubic meter. That concentration is about ten times the level that has been observed to produce effects on vegetation (about one microgram). In order to limit the potential for such damage, a *de minimis* emissions rate of three tons per year, corresponding to a one microgram impact, is promulgated.

An alternative would have been to base the emissions rate on the NSPS for phosphate fertilizer plants. Fertilizer plants typically emit much less than aluminum plants (i.e., about two tons per year controlled). A 20 percent *de minimis* value would then be less than 0.5 tons, which is unrealistic in view of other sources such as aluminum plants. Moreover, changes at a fertilizer plant

that resulted in a fluoride emissions increase of 0.5 tons per year would probably get reviewed under state new source review and/or NSPS requirements.

Sulfuric Acid—A model plant of 1300 tons per day of production was used. The NSPS-emissions limit is 0.15 pounds of sulfuric acid per ton of product processed. Thus, the model plant would emit about 35 tons per year. This yielded a *de minimis* emissions rate of seven tons per year using the 20 percent factor.

Total Reduced Sulfur, Reduced Sulfur—These pollutant classes include hydrogen sulfide (H_2S) and are regulated primarily to avoid nuisance (odor) problems. Total reduced sulfur (TRS) emissions are based on a representative kraft pulp mill (900 tons of pulp per day) which at 20 percent yields a *de minimis* emissions rate of 10 tons per year. Similarly, using a model refinery of about 100 long tons per day, the reduced sulfur (RS) compound emissions rate is 10 tons per year.

(The emissions rates calculated on the above model plants were 8.3 tons per year for TRS and 9.4 tons per year for RS. Both values were rounded to 10 tons per year for administrative purposes.)

Hydrogen Sulfide—Regulated under the refinery NSPS only. Specified as one thirtieth of reduced sulfur emissions, in major part as a check on control efficiency. Since concern, at the NSPS emissions levels, for TRS, RS, and H_2S is the same (nuisance rather than health impact) the *de minimis* emissions rate for H_2S alone is set at ten tons per year.

Methyl Mercaptan, Dimethyl Sulfide, Dimethyl Disulfide, Carbon Disulfide, Carbonyl Sulfide—*De minimis* emissions rates were proposed for these compounds. However, none of them are individually regulated under the Act. Rather, they are described as constituents of either TRS or RS. Therefore, since *de minimis* emissions rates are promulgated for TRS and RS, individual *de minimis* for the five compounds have been dropped.

The complete list of the emissions levels promulgated today, and where applicable, the *de minimis* air quality design values from which they are derived, is given below in Table A:

Table A.—*De Minimis* Values

Pollutant	De Minimis emissions rate (TPY)	Design air quality value (average time)	
		($\mu g/m^3$)	($\mu g/m^3$)
Carbon monoxide	100		
Nitrogen oxides	40	2 (annual).	
Sulfur dioxide	40	14.6 (24-hour).	
Total suspended particulates	25	10.4 (24-hour).	
Ozone (volatile organic compounds)	40		

Table A.—*De Minimis* Values—Continued

Pollutant	De Minimis emissions rate (TPY)	Design air quality value (average time)
Lead	0.6	0.06 (3 month).
Asbestos	0.007	
Beryllium	0.0004	
Mercury	0.1	
Vinyl chloride	1.0	
Fluorides	3	
Sulfuric acid mist	7	
Total reduced sulfur (including H_2S)	10	
Reduced sulfur (including H_2S)	10	
Hydrogen sulfide	10	

The air quality design values are not included in the regulations. *De minimis* emissions levels are included for use in defining the term "significant." As in the proposal, these values determine the need to review modifications and determine which pollutants require BACT and air quality impact analyses for any new source or modification requiring review.

The Administrator does not believe that the promulgated *de minimis* levels will produce an extraordinary administrative burden on reviewing authorities. Based on the data available, it is estimated that approximately 700 more sources will be subject to PSD review annually, all for small modifications not heretofore reviewed.

The regulations also include a list of air quality concentrations for each pollutant as criteria for exempting sources from the monitoring requirements at the discretion of the reviewing authority. Table B summarizes the applicable air quality values by pollutant type.

Table B.—Monitoring Exemption

Pollutant	Air quality value (averaging time)
($\mu g/m^3$)	
Carbon monoxide	575 (8-hour).
Nitrogen dioxide	14 (24-hour).
Sulfur dioxide	13 (24-hour).
Total suspended particulates	10 (24-hour).
Ozone	(1)
Lead	0.1 (24-hour).
Asbestos	(1)
Beryllium	0.0005 (24-hour).
Mercury	0.25 (24-hour).
Vinyl chloride	15 (24-hour).
Fluorides	0.25 (24-hour).
Sulfuric acid mist	(1)
Total reduced sulfur (including H_2S)	10 (1-hour).
Reduced sulfur (including H_2S)	10 (1-hour).
Hydrogen sulfide	0.023 (1-hour).

¹All cases where emissions of VOC are less than 100 tons per year.

²No satisfactory monitoring technique available at this time.

Several Table B values are somewhat different from the design air quality numbers shown in Table A. This is because the Table B values are based on the current capability to provide a

meaningful measurement of the pollutants. The values promulgated represent five times the lowest detectable concentration in ambient air that can be measured by the instruments available for monitoring each pollutant. The factor of five was chosen after reviewing test data for the various methods considered reasonably available. The decision was based in part on considerations of instrument sensitivity, potential for sampling error, problems with instrument variability (e.g., zero drift) and the capability to read recorded data. For a more thorough discussion of this determination, see the memorandum from K. Rehme to W. Peters dated May 20, 1980, which is available in the rulemaking docket and from the address given for the other reports.

There also are several changes in the use of Table B from the Table 2 proposed on September 5. First, a source deemed subject to review may claim the *de minimis* air quality impact exemption from only the monitoring requirement for the reasons noted earlier. Next, under the proposal, a source had to demonstrate that its ambient impact would be *de minimis* to obtain an exemption from monitoring. As promulgated, the regulation allows a source to be exempted from the preapplication monitoring requirement if it shows either that existing air pollution in the source impact area or its projected impact in the affected area is *de minimis*. In most cases, little is to be gained from preconstruction monitoring in situations where either condition applies.

Finally, because there will be situations where monitoring will be necessary even if modeling predicts *de minimis* conditions, the exemption is not automatic but rather must be with the approval of the reviewing authority. For example, Table B values should not be used when (1) there is an apparent threat to an applicable PSD increment or NAAQS based on modeling alone or (2) when there is a question of adverse impact on a Class I area. Questions of adverse impact on a Class I area are to be decided on a case-by-case basis with the objectives of the affected Federal Land Manager in mind.

Some of the suggestions made in the comments have not been adopted. For the reasons stated earlier, many of the *de minimis* values have been increased. The automatic exemption on the basis of emissions rate is retained, although the exemption from monitoring has been made discretionary. The Administrator believes that a clear indication of applicability is necessary. It is not

reasonable to expect a potential applicant to have continuous knowledge of the status of increment consumption and thus know when an application is required and when it is not. Nor have the *de minimis* values been promulgated as a guide only, with a screening review of all sources made mandatory as suggested by one commenter. The Administrator does not believe that there is a substantial programmatic benefit to be derived from such a stringent requirement.

Accumulation of *de minimis* values has not been dropped, because for most pollutants the promulgated *de minimis* emissions levels are now substantially higher than those proposed. The suggestion to allow sources with greater than *de minimis* emissions to make a showing that their air quality impact was *de minimis* and escape review was considered and then rejected. The higher emissions levels promulgated will offer much of the requested relief. Moreover, such an approach would not streamline the review process (i.e., a detailed air quality analysis would still be necessary), and several sources with taller stacks might avoid review and the BACT requirement. Variations in actual impact because of stack height can be a factor in the BACT review. Similarly, an equation considering stack height to determine the *de minimis* emissions rate cutoff has not been promulgated. It is questionable whether such an equation could be developed for application nationwide that would be any less judgmental than the fixed *de minimis* emissions rates promulgated. Moreover, that approach would be little more than a case-by-case applicability assessment which the Administrator believes is inadvisable for reasons already described.

Other suggestions not accepted were to raise the *de minimis* emissions levels to 100/250 tons per year for the criteria pollutants, and to limit the *de minimis* concept to only the criteria pollutants. In developing an approach to defining *de minimis* for PSD purposes and consequently calculating the specific *de minimis* values under the guidance given within the Act and *Alabama Power*, emissions levels as high as 100 tons per year could not be justified for most criteria pollutants. Use of the *de minimis* concept with respect to only the criteria pollutants suggests that any increase (i.e., a zero *de minimis* value) would be significant for noncriteria pollutants and must be reviewed. As mentioned earlier, a zero *de minimis* is not practical for this program.

XII. Geographic and Pollutant Applicability

A. Background

Alabama Power held that in determining the applicability of PSD review, EPA must look to whether a source locates in an area to which Part C of the Act applies, rather than to the impact the source would have upon such an area. Accordingly, EPA proposed on September 5 to apply PSD review to a source if the source locates in an area designated attainment or unclassifiable for a pollutant which the source emits in major amounts. Each pollutant emitted by the source would be subject to PSD review, unless the pollutant was one for which an area is designated nonattainment and the source emitted that pollutant in major amounts. A modification to a source would be subject to PSD review under the September 5 proposal if it would result in a significant net increase in the emissions of any regulated pollutant for which the source is major and for which the area is designated attainment or unclassifiable. In addition, EPA proposed on September 5 to apply PSD review to a source or modification that would significantly affect an area in another state designated as attainment or unclassifiable for a pollutant for which the source or modification would be major. See 44 FR 5190-41, 51949 (§ 51.24(i)(2)), 5193-54 (§ 52.21(i)(8)).

On January 30, 1980, EPA stated that it intended not to apply PSD review based solely on interstate impact, because the court's final interpretation of the Act in *Alabama Power* suggested that PSD review was not appropriate in such circumstances. EPA also noted that under its September 5 proposal, a source or modification would be exempt from PSD review if it emitted in major amounts only pollutants for which an area had been designated nonattainment. EPA solicited comments on whether this exclusion should be retained, as well as on its proposal to delete PSD review based solely on interstate impacts. See 45 FR 6803 (January 30, 1980).

B. PSD Applicability

After further evaluation of its proposed approach, and consideration of the comments submitted in response to the September 5, 1979, and January 30, 1980, notices (see discussion below), EPA has decided to modify the September 5 proposal somewhat. Under today's action, except with respect to nonattainment pollutants, PSD review will apply to any source that emits any pollutant in major amounts, if the source would locate in an area designated

attainment or unclassifiable for *any* criteria pollutant. If the source is subject to PSD review, then PSD review will be applied to each pollutant the source emits in greater than *de minimis* amounts, unless the area is designated as nonattainment under section 107(d)(1) for the particular pollutant. It should be noted that in order for PSD review to apply to a source, the source need not be major for a pollutant for which an area is designated attainment or unclassifiable; the source need only emit *any* pollutant in major amounts (i.e., the amounts specified in section 169(1) of the Act) and be located in an area designated attainment or unclassifiable for that or any other pollutant.

Therefore, sources that are major only for pollutants for which an area is designated nonattainment will not be exempt from PSD review unless the source is located in an area which is designated nonattainment for all criteria pollutants or unless all of the regulated pollutants emitted by the source in greater than *de minimis* amounts are nonattainment pollutants.

The applicability of the PSD regulations to modifications mirrors that for new sources (*see Modification*). PSD review will apply to any modification to a source which emits any pollutant subject to regulation under the Act in major amounts, if the modification would result in a significant net increase in the emissions of *any* pollutant, and if the source is located in an area designated attainment or unclassifiable for any criteria pollutant. PSD review would not apply to any nonattainment pollutant. Unlike the approach proposed on September 5, in order for PSD review to apply, the modification need not increase emissions of a pollutant for which the source is major, nor need the source be major for a pollutant for which the area is designated attainment or unclassifiable.

EPA believes that this approach is required by *Alabama Power* and sections 165(a) and 169(1) of the Act. Section 165(a) states that "[n]o major emitting facility on which construction is commenced after the date of the enactment of [Part C of the Act], may be constructed in any area to which this part applies unless" the conditions set out in section 165(a) are met. *Alabama Power* held that this provision must be interpreted literally and that, in particular, EPA should focus on the *location* of the source, not its impact. *See* 13 ERC at 2012-2016. Today's action provides the necessary literal interpretation. A "major emitting facility" is defined in section 169(1) as a source which would emit at least 100 or

250 tons per year (tpy) (depending on the type of source) of "any" pollutant. This would cover both criteria pollutants, for which national ambient air quality standards have been promulgated, and non-criteria pollutants subject to regulation under the Act. Section 165 refers to an "area to which this part [part C] applies," which the Court in *Alabama Power* interpreted to mean "clean air areas," i.e. areas designated pursuant to section 107 as attainment or unclassifiable for a particular air pollutant 13 ERC at 2013. *See also* sections 161, 162, and 167 of the Clean Air Act. But neither section 165 nor section 169(1) links the pollutant for which the source is major and the pollutant for which an area is designated attainment or unclassifiable. Read literally, section 165(a) applies PSD preconstruction review to all sources that are major for any pollutant subject to regulation under the Act and locate in an area designated attainment or unclassified for any pollutant.

Section 165(a) also does not link review of a particular pollutant to the attainment status for that pollutant or limit review to pollutants for which a source is major. Rather, read literally, section 165(a) applies PSD review to *all* pollutants subject to regulation under the Act emitted by the source provided that the source is major for *some* pollutant and is located in a clean air area for some pollutant. However, implicit in *Alabama Power* and the structure of the Act is a recognition that where nonattainment pollutants are emitted in major amounts (i.e., where a source emits in major amounts a pollutant for which the area in which the source would locate is designated nonattainment), Part D NSR rather than Part C PSD review should apply to these pollutants (*see below*). PSD review does not apply to the nonattainment pollutants emitted by the source otherwise subject to review.

C. Nonattainment Applicability

On May 13, 1980, 45 FR 31307, EPA promulgated a final rule setting out the applicability of nonattainment review of new and modified sources. In brief, EPA clarified that the construction moratorium under section 110(a)(2)(I) and NSR under the Offset Ruling and section 173 apply to all major construction proposed in such areas. This applicability is unaffected by the particular air quality levels within the designated nonattainment area which would be caused or impacted by the proposed major source or major modification. States still are required under section 110(a)(2)(D) to review new or modified sources locating outside of

nonattainment areas, but causing or contributing to a violation of an ambient air quality standard; however, review need not meet all of the nonattainment requirements under section 173 and the offset policy.

The current regulations concerning pollutant applicability in nonattainment areas have not been changed. These rules are different from the PSD pollutant applicability rules. Major sources are subject to review under the Offset Ruling, section 173, and the construction moratorium only if they emit in major amounts the pollutant(s) for which the area is designated nonattainment. In addition, only those nonattainment pollutants which the source emits in major amounts are subject to review or the construction moratorium. Similarly, only if a modification increases emissions of a pollutant for which the source is major and for which the area is designated nonattainment do nonattainment requirements apply. The basic rationale for these restrictions is that section 110(a)(2)(I), which contains the construction moratorium, restricts the construction moratorium to pollutants for which the source is major and for which the area is designated nonattainment. Since there is no requirement similar to the one in section 165(a) that subjects a source to review for all regulated pollutants it emits once it is subject to review for one pollutant, preconstruction review under the Offset Ruling and section 173 is restricted in the same manner as the construction moratorium.

For example, construction of a new plant with potential emissions of 500 tpy PM and 50 tpy SO₂ in an area designated nonattainment for both PM and SO₂, would be subject to nonattainment requirements for PM only, since the source is minor for SO₂. Similarly, modification of this plant resulting in a net increase in emissions of 50 tpy in SO₂, would not be subject to nonattainment requirements. *See also examples (3), (4), and (7).*

D. Case Examples

The following additional examples illustrate how applicability of PSD requirements will work under today's final regulations:

(1) Construction of a new plant with potential emissions of 500 tpy PM and 50 tpy SO₂ in an area designated attainment for both PM and SO₂ would be subject to PSD review for both PM and SO₂.

(2) Construction of the same plant as in example (1), but in an area designated attainment for SO₂ and nonattainment for PM, would be subject to PSD review

for SO₂ and nonattainment requirements for PM.

(3) Construction of the same plant as in example (1), but in an area designated attainment for PM and nonattainment for SO₂, would be subject to PSD review for PM only. PSD review would not apply for SO₂, since SO₂ is a nonattainment pollutant.

(4) Construction of the same plant as in example (1), but in an area designated nonattainment for both PM and SO₂, would be subject to no PSD review and to nonattainment requirements for PM. This would be the case even if the SO₂ emissions would have an impact on a nearby Class I area for SO₂ or on an area located in another state which is designated attainment or unclassifiable for PM.

(5) Modification to the plant in example (1), where the plant is located in an area designated attainment for both PM and SO₂ resulting in a 30 tpy net increase in PM emissions, would be subject to PSD review for PM.

(6) Modification to the plant in example (1), where the plant is located in an area designated attainment for SO₂ and nonattainment for PM, resulting in increased emissions of 50 tpy in SO₂, would be subject to PSD review for SO₂. (It is a significant increase at a major source located in an attainment area.) But if the modification only were to increase the emissions of PM by 30 tpy, only nonattainment requirements would apply, since this is a modification of a major source for a nonattainment pollutant.

(7) Modification to the plant in example (1), where the plant is located in an area designated attainment for PM and nonattainment for SO₂, resulting in increased emissions of 50 tpy SO₂, would be subject to neither PSD review, nor the nonattainment NSR requirements. Nonattainment NSR would not apply since the 50 tpy increase in the nonattainment pollutant does not occur at an existing major stationary source for that pollutant. PSD does not apply since the only change is to a nonattainment pollutant. Instead, the general NSR under the SIP would typically apply to this pollutant, and the new emissions of SO₂ would be accommodated in the SIP's allowance for area and minor source growth.

(8) Construction of a new plant with potential emissions of 500 tpy hydrogen sulfide (H₂S) in an area designated attainment for PM would be subject to PSD review for H₂S. If, in addition, the plant had potential emissions of 50 tpy PM, PSD review would be applied to both H₂S and PM.

(9) Construction of a new plant with potential emissions of 500 tpy CO and 50

tpy H₂S in an area designated nonattainment for CO and attainment for SO₂ would be subject to PSD review for H₂S and to nonattainment requirements for CO. If this plant were later modified, resulting in a net increase in emissions of 30 tpy in H₂S, PSD review would apply for H₂S.

(10) Construction of a new plant with potential emissions of 500 tpy H₂S in an area designated nonattainment for all criteria pollutants would not be subject to either PSD review or nonattainment requirements. Part D applies only to criteria pollutants, and the area here is not subject to Part C, since it is not designated attainment or unclassifiable for any criteria pollutant.

E. Interstate Pollution

The September 5 proposal, in response to the *per curiam Alabama Power* decision issued on June 18, 1979, would have required PSD review for a major source locating or modifying in a designated nonattainment area only if such construction would substantially impact a clean air area in another state. In its final opinion issued on December 14, 1979, the court reversed its earlier position regarding the need for a PSD review of all interstate impacts to a neighboring state's clean air area. Under both rulings, PSD review would apply in all cases where the construction would take place in a clean area. Pursuant to the court's revised ruling in *Alabama Power*, EPA will not apply PSD review to a pollutant emitted by a source locating in an area designated nonattainment for that pollutant, even where the source would impact a PSD area in another state. Sixteen of the nineteen comments received by EPA supported this decision. Three commenters requested EPA to propose regulations to control interstate pollution pursuant to sections 110(a)(2)(E) and 161. EPA is now evaluating how best to control interstate pollution, and may propose regulations some time in the future.

F. Geographic Applicability for VOC Sources

On September 5, EPA proposed to delete the "36 hour rule," which subjected a source of volatile organic compounds (VOC) to review, if the source proposed construction within 36 hours pollutant travel time of an ozone nonattainment area. Pollutant travel time was to be calculated using wind conditions associated with concentrations exceeding the ambient standard for ozone. Most commenters agreed with the proposal to delete this requirement. One commenter who disagreed focused on the need for the

rule as a means of determining which sources locating outside a designated nonattainment area should be subject to nonattainment review. Another argued that without the rule EPA will end up unnecessarily reviewing sources in remote rural areas whose impact on the ozone nonattainment problem is insignificant, since ozone is a regional problem.

For the reasons expressed on September 5 (44 FR 51940), EPA has decided to delete the 36 hour rule. The commenters' concerns are taken care of by the rules on geographic applicability for nonattainment areas, as set out at 45 FR 31307 (May 13, 1980). Thus, all major VOC sources locating in a designated ozone nonattainment area will be subject to review under section 173. Major VOC sources locating outside a designated nonattainment area will be subject to PSD review and will be required to monitor for ozone. If the monitoring indicates that the area of source location is nonattainment, then the provisions of the Offset Ruling or State plans adopted pursuant to section 110(a)(2)(D) of the Act shall apply until the area is redesignated as nonattainment and a SIP revision has been approved. Of course, a source of VOC may choose to accept nonattainment review requirements immediately (i.e., LAER, offsets, statewide compliance of other sources under the same ownership) and conduct post-approval monitoring as presently permitted under the PSD regulations.

G. Response to Comments

Additional responses to comments regarding applicability of nonattainment requirements can be found at 45 FR 31307. Comments concerning interstate pollution and the geographic applicability of VOC sources, are responded to above.

With regard to PSD review, several commenters argued that EPA's approach would be overly complex and would impose great administrative burdens with few corresponding benefits to air quality. EPA does not agree. Applicability of PSD review as outlined above is required by the Act. Congress believed that such broad applicability was needed to adequately guard against significant deterioration in existing clean areas. EPA cannot restrict applicability and override Congressional intent simply because of an added administrative burden such applicability might impose. For similar reasons, EPA disagrees with the suggestion that it should restrict PSD review to only those pollutants that a source emits in major amounts.

Fourteen commenters argued that EPA should not apply PSD review to noncriteria pollutants, because the lack of NAAQS and increments for noncriteria pollutants indicates that Congress did not consider these pollutants to be able to cause significant deterioration and felt that the extent of harm by these pollutants has yet to be demonstrated. They claimed noncriteria pollutant sources are already subject to NSPS and NESHAP regulation. However, as other commenters have correctly noted, section 169(1) refers to sources with the potential to emit "any" pollutant above certain amounts. Moreover, section 165(a)(4) states that BACT must apply to "each pollutant subject to regulation under this Act" emitted by a source. Neither of these provisions is limited to criteria pollutants. *See also Alabama Power*, 13 ERC at 2045.

Two commenters urged that if EPA decides to regulate sources with minor but significant emissions of criteria pollutants and sources of noncriteria pollutants, it should do so only if there already exists a SIP emission limit for the "minor" pollutants or only if section 111 or 112 (NSPS and NESHAP, respectively) has been made applicable after appropriate rulemaking to such sources of noncriteria pollutants. The difficulty with this approach is that the Act requires PSD review, regardless of whether another rule already applies to the source except in the case of nonattainment pollutants (see above). Moreover, the suggested approach could allow an unacceptably large number of sources to escape review, since many sources may not have an applicable SIP emissions limit or NSPS or NESHAP limit.

While most commenters endorsed the September 5 proposal that PSD permitting should be limited to instances where greater than *de minimis* changes in a major pollutant would occur, one commenter argued that *Alabama Power* did not restrict PSD applicability to modifications involving the pollutant(s) which the source emits in major amounts. This commenter claimed that section 111(a)(4) of the Act defines "modification" as "any physical change in, or change in the method of operation of a stationary source which increases the amount of any air pollutant emitted by such source or which results in the emission of any air pollutant not previously emitted." (Emphasis added.) As mentioned above in the Modification section, the Administrator agrees with this interpretation. Thus, today's final rule, with the exception of nonattainment pollutants, requires a

PSD preconstruction review for greater than *de minimis* net increases in the potential to emit of a major stationary source for any pollutant subject to regulation under the Act.

Twenty-three commenters supported exempting nonattainment pollutants from PSD review. However, three commenters argued that PSD review should apply to nonattainment pollutants emitted in minor amounts, claiming that review in nonattainment areas should be as broad as that in PSD areas. EPA agrees with the former comments. As noted earlier, sections 165(a) and 169(1) apply to "any" pollutant regulated under the Act. The only restraint on PSD review, then, is section 173 in Part D, which governs the specific review of sources emitting nonattainment pollutant(s) in major amounts. In addition, sources emitting the nonattainment pollutants in minor amounts are subject to the general NSR contained in SIPs, and the impacts of such sources are accounted for in demonstrations of reasonable further progress and within the growth allowance provisions of the SIP. Thus, there is no need to apply PSD review to either type of nonattainment pollutant which already faces adequate review.

Twenty-three commenters also supported exempting from PSD review sources which emit only nonattainment pollutants in major amounts, but PSD pollutants in minor amounts, citing *Alabama Power* for support. Neither *Alabama Power* nor the Act support such an exemption. *Alabama Power* held that, at a minimum, PSD review does not apply to major sources which locate in an area designated nonattainment for all criteria pollutants. But the court did not take into account the fact that the same source may emit both PSD and nonattainment pollutants. Since, as noted above, section 165(a) does not link the pollutant for which the source is major and the pollutant for which an area is designated attainment or unclassifiable, EPA interprets section 165(a) as requiring PSD review for each source that is major for some pollutant and locates in an area designated attainment or unclassifiable for that or any other pollutant and that this review encompasses PSD pollutants whether or not emitted in major amounts.

Finally, some commenters perceived an inconsistency in requiring broader pollutant applicability for PSD review than for nonattainment review, yet using a broader definition of "source" for nonattainment areas than for PSD areas. However, EPA's actions are consistent with the Act. The scope of PSD review applicability and the nonattainment

definition of source are separate issues and there is no basis for requiring that they be resolved in such a way as to in some manner equalize their effects.

XIII. Baseline Concentration, Baseline Area, and Baseline Date

EPA's June 1978 PSD regulations generally define baseline concentration as the ambient concentration level reflecting actual air quality as of August 7, 1977, including projected emissions of major sources commencing construction or modification before January 6, 1975, but not in operation by August 7, 1977, and excluding emissions from major sources commencing construction (including modification) after January 6, 1975. (40 CFR 51.24(b)(11), 52.21(b)(11) (1979).) Emissions from major source construction commencing after January 6, 1975, as well as most emissions increases occurring from existing sources after the baseline date are counted against the applicable PSD increments. (A more detailed discussion of the relationship between baseline concentration and increment consumption is provided in Increment Consumption.) Actual air quality includes emissions increases after the baseline date at existing sources whose emissions are counted in the baseline concentration, if the increases are due to increased hours of operation or capacity utilization authorized under the SIP and reasonably anticipated to occur on the baseline date. The baseline concentration also includes emissions increases allowed under a SIP relaxation pending final EPA approval on the baseline date, if the allowable emissions under the revision were higher than the source's actual emissions on the baseline date. The June 1978 regulations established a uniform baseline date of August 7, 1977 for all clean air areas. A definition of baseline area was unnecessary since all PSD areas were covered by the August 7, 1977 baseline date.

The *Alabama Power* decision held that a uniform baseline date was not authorized by section 169(4). It required the baseline date to be established at the time of the first application for a permit in an area subject to PSD requirements. EPA's regulations were consequently remanded for change.

The *Alabama Power* decision, however, supports EPA's definition of baseline concentration. In holding that monitoring data is required under section 165(e)(2), the court confirmed that actual air quality data should be used to determine baseline concentrations. *See* 13 ERC 2022. Since monitoring data provide information on actual air quality concentrations from

existing sources and since section 169(4) explicitly states that required monitoring data should be used in establishing baseline concentrations, the court's decision supports EPA's requirement that baseline concentrations reflect actual air quality. In addition, the court implicitly affirmed EPA's approach in ruling that EPA correctly excluded from baseline concentrations emissions increases due to voluntary fuel switches after the baseline date. Since actual air quality on the baseline date would not reflect these increases, their exclusion from baseline concentrations is consistent with EPA's actual air quality approach to baseline concentrations. Finally, the court noted Congress' rejection of a House bill that would have allowed certain source emissions to be included in baseline concentrations, even though the emissions have not occurred by the baseline date. *See 13 ERC 2026.* The court concluded that Congress considered and rejected an approach that would depart from actual air quality in calculating baseline concentrations, except in the limited circumstances set forth in section 169(4).

In its September 5, 1979 response to the court's decision, EPA proposed to delete the uniform August 7, 1977 baseline date and to define baseline date as the date of the first complete application, after August 7, 1977, for a PSD permit to construct or modify a major stationary source in an area subject to PSD requirements. As part of that definition, EPA proposed to define baseline area as all parts of an Air Quality Control Region (AQCR) designated as attainment or unclassifiable under section 107(d) of the Act. Under that definition, an application of a major stationary source to construct in any part of an AQCR designated as attainment or unclassifiable would trigger the baseline date for both SO₂ and PM in all portions of the AQCR.

EPA's proposed definition of baseline area was based in part on its consistency with the term "area" as used in section 107, which requires air quality designations for AQCRs or portions thereof. The definition was also intended to avoid implementation problems that might result from having different baseline areas and dates within the same AQCR. EPA proposed, however, to allow states some flexibility in defining baseline area. *See* discussion at 44 FR 51942.

EPA further proposed to retain its current definition of baseline concentration but asked for comment on a particular problem specific to the Gulf Coast areas (*see* 44 FR 57107, October 4,

1979 and discussion in Increment Consumption). EPA's September 5 proposal specifically asked for comment on two aspects of its proposal: (1) whether baseline area should be defined as clean portions of the AQCR in which a source applies for a permit, and (2) whether a permit application should trigger the baseline date only in the clean portions of the AQCR in which the source would locate or also in clean areas of any AQCR which would be impacted by the source.

After issuance of the court's full opinion in December, EPA proposed and asked for comment on three changes to its September 5 proposal (45 FR 6802, January 30, 1980). First, EPA stated it was considering defining baseline area as any area designated attainment or unclassifiable under section 107(d) in which a source subject to PSD requirements would locate or impact, rather than all clean portions of an AQCR in which a source would locate or impact. Second, EPA solicited comment on whether states should be allowed to redefine the boundaries of areas designated as attainment or unclassifiable. EPA suggested, however, that states should be limited to redesignations no smaller than the source's area of impact. Third, EPA indicated it was considering adoption of a pollutant-specific baseline date and area. Under that approach, a source would trigger the baseline only for the pollutants it emitted. Thus, if the source would emit neither SO₂ nor PM, it would not trigger any baseline. EPA also requested comment on whether a source which would be major for SO₂ and minor for PM would trigger a baseline date only for SO₂ or for both pollutants.

EPA's final action and response to comments on each of the issues is discussed below. For simplification, the discussion focuses on the four basic issues of baseline concentration, baseline area, baseline date, and pollutant-specific baseline. Issues related to increment consumption are discussed in the next section.

A. Baseline Concentration

As proposed, EPA is continuing its current definition of baseline concentration as the ambient concentration levels at the time of the first permit application in an area subject to PSD requirements. Baseline concentration generally includes actual source emissions from existing sources but excludes emissions from major sources commencing construction after January 6, 1975. Actual source emissions are generally estimated from source records and any other information reflecting actual source operation over

the two-year time period preceding the baseline date. The baseline concentration also includes projected emissions from major sources commencing construction (including modification) before January 6, 1975, but not in operation by August 7, 1977.

Unlike the June 1978 policy, baseline concentration will no longer routinely include those emissions increases after the baseline date from sources contributing to the baseline concentration, which are due to increased hours of operation or capacity utilization. Existing policy permitted this grandfathering, provided such increases were allowed under the SIP and reasonably anticipated to occur as of the baseline date. Today's policy which normally excludes such increases is consistent with using actual source emissions to calculate baseline concentrations. An actual emissions policy, however, does allow air quality impacts due to production rate increases to sometimes be considered as part of the baseline concentration. If a source can demonstrate that its operation after the baseline date is more representative of normal source operation than its operation preceding the baseline date, the definition of actual emissions allows the reviewing authority to use the more representative period to calculate the source's actual emissions contribution to the baseline concentration. EPA thus believes that sufficient flexibility exists within the definition of actual emissions to allow any reasonably anticipated increases or decreases genuinely reflecting normal source operation to be included in the baseline concentration.

EPA is also promulgating a change in its current policy on SIP relaxations. Under that policy, emissions allowed under SIP relaxations pending on August 7, 1977 are included in the baseline concentration if the allowed source emissions were higher than actual source emissions. EPA adopted that policy in June 1978 in recognition of the fact that some states with SIP revisions pending on August 7, 1977 had allowed sources to increase emissions prior to final EPA approval of the relaxations, while other states with pending relaxations had required sources to comply with the lower emissions limitations in the existing SIP until final approval occurred. *See* 43 FR 26401 col. 3. To avoid penalizing sources in states that did not allow increases prior to approval, EPA provided that baseline concentrations include the allowable emissions under revised SIPs, if the relaxation was pending on August 7, 1977 and the allowed emissions exceeded the source's actual emissions.

The effect was to allow sources to avoid increment consumption analyses for the emissions increase allowed in the revision. EPA considered the exemption justified because states and sources were unaware that EPA would establish a uniform baseline date of August 7, 1977, and those emissions increases after that date would consume increment.

EPA believes this exemption from increment consumption analyses is no longer necessary. States and sources have been on notice since June 1978 that emissions increases at existing sources due to SIP relaxations must be evaluated for possible increment consumption. No state or source has been uncertain as to the applicable baseline date, or been placed in an inequitable position as to other states or sources. Therefore, today's regulations do not exempt from increment consumption analyses those SIP relaxations not finally approved by EPA prior to the baseline date in the affected area.

One commenter suggested that EPA extend the transition provision within the June 1978 regulations for assessing increment consumption. 43 FR 28401 col. 2. This provided that increased emissions from plan relaxations received after the August 7, 1977 baseline date but before the June 19, 1978 promulgation would consume the applicable increment but could be reviewed as part of the periodic assessment rather than assessed individually for increment consumption prior to plan approval.

EPA does not believe that a similar exception is required under today's regulations. EPA considered the exception necessary in June 1978 due to uncertainty as to how the 1977 Amendments would affect pending SIP relaxations. Such uncertainty no longer exists, since sources have been on notice since June 1978 that SIP relaxations after that date must be individually reviewed for increment consumption. Therefore, emissions increases due to plan relaxations received after June 19, 1978 must be individually evaluated for increment consumption prior to EPA approval.

EPA is concerned, however, that the new definition of baseline concentration may work a hardship on states with SIP relaxations pending when a PSD application is filed in an area. A state may submit a SIP relaxation affecting a source, or group of sources, located in an area where the baseline date has not been set, and would not be required to provide an increment consumption analysis. If prior to final EPA approval, a source filed a PSD application in the

area, the application would establish a baseline date and the state would have to withdraw the revision until it has conducted the necessary increment analysis. To prevent such burdensome delays, EPA is exempting from individual increment analyses SIP relaxations pending at the time a baseline date is established in the area affected by the revision. However, increment consumption due to emissions from these relaxations must be evaluated as part of a state's periodic assessment. Exemptions from individual analyses is analogous to the previous relief provided for sources subject to SIP relaxations submitted after August 7, 1977, but before EPA's June 1978 promulgation. The exemption is therefore consistent with prior EPA policy.

B. Baseline Area.

In response to the September 5, 1979 proposal, fifty-three commenters felt that an AQCR definition of baseline area would not produce a great deal of administrative relief and would, simultaneously, limit an area's growth options. These commenters favored defining baseline area as the area of significant source impact, based on required modeling and monitoring analysis. Such an approach was claimed to provide just as much administrative relief, more growth options, and elimination of the problem of a small PSD source triggering the baseline date for a large area. Seventeen commenters favored a baseline area definition geared to areas designated as clean or unclassified under section 107. Those favoring this alternative strongly preferred a "redesignation" procedure to accompany this option. Other commenters objecting to the AQCR approach suggested: county boundary lines (three), and the entire state (one).

In response to EPA's January 30 notice, fourteen of sixteen commenters favored a source impact area definition of baseline area. One of the remaining two commenters favored retention of the AQCR approach while the other commenter desired a county or some other legal boundary approach. All eighteen comments received favored triggering a baseline only in the area in which a source would locate, and not in those other areas which it would impact. Nineteen of twenty-nine commenters favored permitting state redesignation but to areas no smaller than a source impact area. Seven other commenters favored no limitations on the redesignation procedure. The remaining three commenters opposed allowing states to redefine baseline areas through redesignation.

EPA has determined that baseline area should be defined as the area designated as attainment or unclassifiable under section 107(d) in which a source or modification subject to PSD review would construct or on which it would have an impact equal to or greater than $1 \mu\text{g}/\text{m}^3$ on an annual basis. EPA has concluded that "an area subject to this part," as used in section 169(4), refers to areas designated attainment or unclassifiable under section 107(d).

This view is strongly suggested by Judge Robinson's opinion on baseline concentration in the December 1979 *Alabama Power* ruling. Referring to Congress' intent to use actual air quality data to establish baseline concentrations, Judge Robinson states that "the task of monitoring existing ambient pollution levels in attainment areas is assigned to the first permit applicant, who will provide the information essential to calculation of the baseline." (Emphasis added) 13 ERC 1993, 2022. The footnote which follows that sentence discusses a state's obligation under section 107(d)(1) to submit area designations to EPA and the fact that section 107 lists submitted to date by the states indicate that many areas lack acceptable air quality information. *Id.* The references to attainment areas and section 107(d) designated areas indicate that the court interprets the statute as requiring that baseline concentrations be calculated for each clean area designated under section 107(d)(1).

EPA thus believes that neither the statute nor the court opinion support the proposed AQCR approach. The majority of comments also opposed defining baseline area as AQCR. Opposition was based on the view that it would do little to alleviate administrative problems, offered no flexibility in states, and would often limit an area's growth options by encompassing too large an area.

EPA has also determined that a PSD source should trigger the baseline in all intrastate clean areas that it impacts as well as the area it locates in. One objective of PSD is to track air quality changes in clean air areas. If a major source significantly affects any clean air area in the same state the purposes of PSD will be served if air quality deterioration from minor/area source growth and actual changes in baseline source emissions are tracked from the time significant SO₂ or PM emissions from a new or modified major source impact a clean area. Such a policy is also consistent with the language of section 165(e)(1) of the Act which

requires an air quality analysis of the affected area, not just the area of immediate location. The Administrator does not believe that such a policy should transcend state boundaries. Since triggering baseline dates is an important factor in managing growth, EPA has concluded that states should have jurisdiction over their own baseline dates. On the other hand, establishment of baseline dates does not affect increment consumption across state borders by major source construction commencing after January 6, 1975.

EPA has concluded that baseline areas may be redefined by the states through area redesignations. Section 107(d) specifically authorizes states to submit redesignations to the Administrator. Consequently, states may submit redefinitions of the boundaries of attainment or unclassifiable areas at any time. If EPA agrees that the available data support the change, it will redefine the areas as requested. As long as no PSD source has located in, or significantly impacted on a clean area being considered for redesignation, the area can be redesignated as a new attainment or unclassifiable area, even if the area were previously part of a larger clean area in which the baseline date had been set.

Area redesignations are subject to certain restrictions. The boundaries of any area redesigned by a state cannot intersect the area of impact of any major stationary source or major modification that established or would have established a baseline date for the area proposed for redesignation or that is otherwise required to obtain a PSD permit. In addition, area redesignations can be no smaller than the area of impact of such sources. These restrictions comport with the PSD objective of tracking air quality effects in an area once a major source or modification has affected an area. By setting the baseline date at the time a major source or modification impacts an area and preventing the date from being changed by subsequent area redesignations, the system ensures that future growth in the area will be assessed for its air quality effects from that date forward. Moreover, if states could define baseline areas as small as the immediate area in which a source is located and not include the source impact area, air quality could deteriorate or increments could be violated in a nearby area impacted by the source, but neither the state nor EPA would review the air quality impact. The source could therefore affect air quality

but the reviewing authority would be unaware of the deterioration. In addition to jeopardizing air quality, "postage stamp" baseline areas would be difficult to administer.

A source will be considered to impact an area if it has an impact of $1 \mu\text{g}/\text{m}^3$ or more of SO₂ or PM on an annual basis. This figure has been selected because it corresponds to levels of significance used in previous Agency determinations for SO₂ and PM. The annual average was selected over the short term value due to its ease of implementation. That is, the shape of source impact areas is less complex and the $1 \mu\text{g}/\text{m}^3$ annual average provides ample area coverage of the source impact area.

The Administrator believes that defining baseline area as section 107 areas and allowing state redesignation will satisfy most of the commenters who objected to the proposed AQCR definition and favored state flexibility in redesignations. The redesignation process partially meets the concerns of commenters who preferred defining baseline area as source impact area. Where a baseline date is established for an area that is large relative to the impact area of the triggering source, the state has the option of redefining the area to reflect more accurately the area affected by the source.

C. Baseline Date

Consistent with the Agency's proposal, today's promulgation defines baseline date as the date after August 7, 1977 on which the first complete application for a PSD permit is filed with the appropriate reviewing authority. Section 51.24(b)(14), 52.21(b)(14). As discussed in the September 5 notice, EPA has determined that this definition is mandated by the court's interpretation of section 169(4), which requires a baseline concentration to be set on the date, after August 7, 1977, "of the first application for a permit in an area subject to this part." See 44 FR 51941 col. 3. Consequently, the first complete PSD permit application by a major source to construct in a baseline area, as that term is defined in § 51.24(b)(15) and 52.21(b)(15), and explained above, will trigger a baseline date.

As discussed below, under *Pollutant-Specific Baseline*, the regulation further requires that a baseline date be set for each pollutant emitted by the applicant source in greater than *de minimis* amounts, if increments or other equivalent measures under section 166 have been established for the pollutant. At present, increments are established only for SO₂ and PM, and no increments or equivalent measures for other pollutants have been established.

Section 166 requires EPA to adopt regulations establishing increments or other equivalent measures for other criteria pollutants. Section 166 does not by its terms require EPA to apply section 169(4) in determining baseline dates for criteria pollutants other than SO₂ and PM. EPA is now conducting rulemaking under section 166 to develop increments or equivalent measures for the other criteria pollutants. As part of that rulemaking, EPA is considering how to establish baseline dates for those pollutants.

While comments supported EPA's proposal to establish the time of the first complete application in an area as the baseline date, eight commenters suggested that the date be set at the time of the first application after August 7, 1978, rather than August 7, 1977. This review is consistent with other comments noting that section 165(e)(2) requires permit applicants after August 7, 1978 to provide one year's monitoring or other equivalent air quality analysis to determine a baseline concentration for the area. These commenters claimed that since baseline concentration is to be established through actual ambient air quality data and no applicant can gather the necessary monitoring data before one year after the effective date of the part, the baseline date should not be triggered by applications filed before that date.

EPA understands the commenter's concerns. However, EPA believes Congress was aware that prior to August 7, 1978, applicants could not provide a full year of monitoring data, as evidenced by the fact that the monitoring requirement in section 165(e)(2) is not effective until August 7, 1978. Congress nonetheless provided that baseline concentrations be established by the first permit application, an event which could occur at any time after August 7, 1977. Congress therefore considered that baseline concentrations and increment consumption could be determined with less than a full year's monitoring data. The need to accept less data is reflected in the provision of section 169(4) that baseline concentrations be based on available air quality data and on such monitoring data as the applicant is required to submit. The provision suggests that calculations of baseline and increment use may have to be made with limited data, if available data, such as that from the state agencies, is not appropriate. EPA interprets the requirements for monitoring data after August 7, 1978, and not August 7, 1977, as intended to provide a grace period for sources, rather than evidencing intent to

postpone the establishment of baseline dates.

One commenter questioned whether baseline dates would be triggered by permit applications previously filed by sources that were major under the June 1978 PSD regulations, but no longer major under the regulations promulgated today, even if the permit applicant failed to apply for a permit rescission. EPA concurs in the commenter's suggestion that a subsequent permit applicant in any area may inform the permitting authority that the baseline date was not triggered on the date that a source which no longer qualifies as major applied for a PSD permit. As the commenter points out, this eliminates the need for an immediate rescission of all past permits affecting sources no longer subject to PSD review. It also avoids penalizing permit applicants if a source that is no longer major fails to apply for a permit rescission.

The Administration wishes to clarify another point related to a change in review status for the source which has triggered the baseline date. If the applicant that established the baseline date is later denied a PSD permit or voluntarily withdraws its PSD application, a question arises as to whether the baseline date has been triggered. In the Administrator's judgment the applicable baseline date remains in place, since no change in date is authorized under the Act. Section 169(4) establishes source application as the baseline triggering mechanism and does not qualify this by the later issuance of a permit. This policy is consistent with the establishment of a baseline concentration which is based on the available monitoring data, typically that gathered by the source applicant. The data to establish the baseline concentration would be available regardless of the eventual permit status of the baseline triggering application. Using source application also stabilizes the NSR permitting process. Later applicants can determine whether a baseline date has been set in an area by looking to whether a previous application has been filed, rather than needing to determine if the permit has been or will be issued.

Finally, the Administrator wishes to point out that it is the first PSD application submitted under either 40 CFR 52.21 or state PSD regulations developed pursuant to 40 CFR 51.24 which triggers a baseline date. When states assume responsibility for implementing the PSD program, several PSD baseline dates may well have been triggered. However, as mentioned above, states can minimize the impact of

early baseline dates by redesignating the size of the baseline area which is affected by a previously established baseline date.

D. Pollutant-Specific Baseline

The Agency has concluded that a pollutant-specific baseline is consistent with section 169(4) and the statutory structure. Section 169(4) requires that a baseline concentration be established "with respect to a pollutant *** in an area subject to [Part C]." Therefore, by the terms of the statute, a baseline concentration is established for individual pollutants. Moreover, such concentrations are established for areas subject to PSD. Section 107(d), which provides that areas designated attainment or unclassifiable are subject to PSD, requires designations to be made on a pollutant-specific basis. Section 107(d)(1)(D) and (E). To be consistent, both baseline date and baseline area (and any subsequent redesignations under section 107 of the Act) must also be pollutant-specific.

The comments that favored a pollutant-specific baseline generally did so on two grounds: the reference to "pollutant" in section 169(4) and the statutory requirement to use monitoring data to establish baseline concentration. Since monitoring and increment consumption are pollutant-specific, baseline concentrations must be as well. The Administrator agrees that the monitoring requirement supports pollutant-specific baselines. Four of the thirty-eight commenters that opposed pollutant-specific baselines did so primarily for implementation reasons. Although pollutant-specific baselines may add some complexity to the PSD program, EPA has concluded that the statutory structure contemplates pollutant-specific area designations.

The following example illustrates the concept of pollutant-specific baseline dates. If a major source of NO_x that would also emit SO₂ in significant amounts and PM in less than significant amounts submits a complete application for a permit to construct in an area designated under section 107(d)(1) as attainment for all pollutants, and no previous source has triggered any baseline dates, the source would establish the baseline date for SO₂ but not PM. If a later modification to the source results in a significant net increase in PM emissions and no other application previously triggered the PM baseline date, the proposed PSD application for the modification would then establish the PM baseline date.

XIV. Increment Consumption

There are two basic issues in the area of increment consumption: (1) which source emissions consume increment and (2) how to calculate the amount of increment consumed by those emissions. The *Alabama Power* decision addressed neither question. EPA, therefore, proposed in September to continue its current approach. Under the approach, four categories of source emissions affect increment: (1) as provided by section 169(4), emissions from major source construction (including modification) commencing after January 6, 1975. This group includes emissions from sources issued PSD permits and state new source review (NSR) permits (including those issued in accordance with section 51.18(j) and the Offset Ruling) as well as emissions from non-permitted sources; (2) emissions changes occurring after the baseline date at sources whose previous emissions on the baseline date are included in the baseline concentration; (3) emissions changes due to SIP revisions that are approved after the baseline date; and (4) minor and area source growth occurring after the baseline date. EPA's current regulations provide that the first and third category of sources affect increment on the basis of emissions allowed under the permit and emissions allowed under the SIP as revised, respectively. The second and fourth categories affect increment on the basis of actual emissions changes from the emissions included in the baseline concentration.

Since its proposal, EPA has reevaluated its current policy in light of both the December opinion of the court and the Gulf Coast problem (discussed below). EPA has concluded that increment consumption and expansion should be based primarily on actual emissions increases and decreases, which can be presumed to be allowable emissions for sources subject to source-specific emissions limitations. This change principally affects increment calculations for major source construction not subject to source-specific permits or SIP requirements and for sources whose allowable limits are demonstrated not to reflect actual emissions. PSD applications pending today before EPA or a state agency authorized to review or issue PSD permits will be reviewed for increment consumption on the basis of the revised policy.

A. Use of Actual Emissions

1. Rationale for Use of Actual Emissions.

As discussed in the *Baseline Concentration* section, the *Alabama Power* decision supported EPA's requirements that baseline concentrations reflect actual air quality in an area. Increment consumption or expansion is directly related to baseline concentration. Any emissions not included in the baseline are counted against the increment. The complementary relationship between the concepts supports using the same approach for calculating emissions contributions to each. Since the *Alabama Power* decision and the statute both provide that actual air quality be used to determine baseline concentrations, but provide no guidance on increment consumption calculations, EPA has concluded that the most reasonable approach, consistent with the statute, is to use actual source emissions, to the extent possible, to calculate increment consumption or expansion.

EPA's decision is also based on concerns raised by the Gulf Coast problem, discussed below. In that area, and possibly others, source emissions allowed under permits and SIP provisions in many cases are higher than actual source emissions. Sources could therefore increase their emissions without being subject to PSD review or the SIP revision process. However, if increment calculations were based on allowable emissions, EPA believes increment violations would be inappropriately predicted and proposed source construction would be delayed or halted. In practice, EPA expects that few, if any, sources will increase their emissions to allowable levels.

EPA believes it is unwise to restrict source growth based only on emissions a source is permitted to emit but which, in many instances, have not been and are not likely to ever be emitted.

Increment calculations based on the best prediction of actual emissions links PSD permitting more closely to actual air quality deterioration than calculations based on allowable "paper" emissions. In addition, use of actual emissions for increment consumption is consistent with using an actual emissions baseline for defining a major modification and for calculating emissions offset baselines.

2. Calculation of Increment Consumption Using Actual Emissions.

To determine how much increment remains available to a proposed major source or modification, the source owner or operator must analyze several types of emissions changes as of its application date. These changes generally include: (1) emissions changes that have occurred at baseline sources

and emissions from new minor and area sources since the baseline date; (2) emissions that have occurred or will occur at sources which have submitted complete PSD applications as of thirty days prior to the date that the proposed source files its application; and (3) emissions changes reflected in SIP relaxations submitted after August 7, 1977, and pending as of thirty days prior to the date the source files its application, or emissions changes reflected in SIP relaxations which have been approved since August 7, 1977, but which have not yet occurred. (See, discussion below on calculation of increment consumption for SIP relaxations.) The thirty-day cutoffs are specified to stabilize the review process by preventing new applications and SIP relaxation proposals from invalidating otherwise adequate increment consumption analyses without warning.

Increment calculations will generally be based on actual emissions as reflected by normal source operation for a period of two years. EPA has selected two years based on its recent experience in reviewing state-NSR programs for nonattainment areas. The state submittals use periods of between one and three years to evaluate source emissions. In EPA's judgment, two years represents a reasonable period for assessing actual source operation. Since the framework for nonattainment NSR programs will generally form the basis for a state's PSD plan, EPA believes it is appropriate to use the same time period for evaluating actual source emissions in the PSD program. Two years is also being used to calculate the emissions offset baseline for modifications in nonattainment areas.

The two-year period of concern should generally be the two years preceding the date as of which increment consumption is being calculated, provided that the two-year period is representative of normal source operation. The reviewing authority has discretion to use another two-year period, if the authority determines that some other period of time is more typical of normal source operation than the two years immediately preceding the date of concern. In general, actual emissions estimates will be derived from source records. Actual emissions may also be determined by source tests or other methods approved by the reviewing authority. Best engineering judgments may be used in the absence of acceptable test data.

EPA believes that, in calculating actual emissions, emissions allowed under federally enforceable source-

specific requirements should be presumed to represent actual emission levels. Source-specific requirements include permits that specify operating conditions for an individual source, such as PSD permits, state NSR permits issued in accordance with § 51.18(j) and other § 51.18 programs, including Appendix S (the Offset Ruling), and SIP emissions limitations established for individual sources. The presumption that federally enforceable source-specific requirements correctly reflect actual operating conditions should be rejected by EPA or a state, if reliable evidence is available which shows that actual emissions differ from the level established in the SIP or the permit.

EPA believes two factors support the presumption that source-specific requirements represent actual source emissions. First, since the requirements are tailored to the design and operation of the source which are agreed on by the source and the reviewing authority, EPA believes it is generally appropriate to presume the source will operate and emit at the allowed levels. Second, the presumption maintains the integrity of the PSD and NSR systems and the SIP process. When EPA or a state devotes the resources necessary to develop source-specific emissions limitations, EPA believes it is reasonable to presume those limitations closely reflect actual source operation. EPA, states, and sources should then be able to rely on those emissions limitations when modeling increment consumption. In addition, the reviewing authority must at least initially rely on the allowed levels contained in source-specific permits for new or modified units, since these units are not yet operational at a normal level of operation. EPA, a state, or source remains free to rebut the presumption by demonstrating that the source-specific requirement is not representative of actual emissions. If this occurs, however, EPA would encourage states to revise the permits or the SIP to reflect actual source emissions. Such revisions will reduce uncertainty and complexity in the increment tracking system, since it will allow reviewing authorities and sources to rely on permits and SIP emissions limitations to model increment consumption.

Review of increment usage due to SIP relaxations will also be based initially on emissions allowed under the SIP as revised (provided this allowed level is higher than the source emissions contributing to the baseline concentration). Calculations will generally be made on the difference between the source emissions included in the baseline concentration and the

emissions allowed under the revised SIP. Initial use of allowable emissions is necessary because the increment calculation generally occurs before the source has actually increased its emissions. Therefore, at the time the revision is reviewed, increment consumption must be based on the predicted source operation under the revision. In addition, since SIP revisions are commonly based on source requests, it is reasonable to assume such sources will actually emit at levels permitted by the relaxation.

Subsequent to the initial review process, increment calculations for SIP relaxations may depart from allowable emissions under the SIP, if the source has not actually increased its emissions. For example, three years after approval of a SIP relaxation, if it is found that the source has not increased its emissions to levels allowed in the SIP, estimates of increment usage should be revised to reflect actual source emissions. If this occurs, EPA would also encourage states to revise the emissions levels allowed in the SIP to represent the source's actual emissions.

Finally, the required increment consumption analysis can be amended by the applicant after the PSD review process has begun. For example, an applicant would normally revise its analysis to reflect increment made available by the withdrawal of PSD applications previously considered in the applicant's calculation of increment consumption. In no event, however, will the source be required to take account of emissions changes or changes due to pending PSD applications or SIP relaxations that could increase the amount of increment consumed by other sources.

B. Exclusions From Increment Consumption

1. Exclusions Requested by Governors.

Section 163(c) authorizes four exclusions from increment consumption upon the request of a governor. Exemptions are available for federally-ordered fuel switches under the Energy Supply and Environmental Coordination Act of 1974 or superseding legislation, fuel switches due to natural gas curtailment plans under the Federal Power Act, temporary emissions of particulate matter due to construction and related activities, and new sources constructing outside the United States. In the cases of the federally-ordered switches and natural gas curtailment plans, the exclusion is limited to a maximum of five years after the effective date of the order or plan.

The statute provides that these exclusions are available only if the state has an EPA-approved PSD plan. Section 163(c). In its June 1978 regulations, however, EPA permitted governors to use the exclusions during the nine-month period between promulgation of the regulations and the date plan revisions were required to be submitted. See § 52.21(f)(3) (1979). As discussed in the preamble to the June 1978 regulations, EPA concluded that prohibiting use of the exclusions after the nine-month period would be an adequate incentive to states to submit PSD plans. See 43 FR 26402 (Col. 1).

EPA has decided to extend this policy to today's regulations. In view of the many changes in the regulations resulting from the court's decision, states which have already submitted plans will have to submit revised provisions and states which have not yet submitted plans will have to develop plans based on the new regulations. As with the June 1978 requirements, EPA believes that disallowing the exclusions nine months from today will provide sufficient encouragement to states to submit plans, and will offer states more flexibility for growth in this interim period. Therefore, governors may request the exclusions until nine months from today's promulgation, even if no PSD plan has been submitted to or approved by EPA. Thereafter, the exclusions will be unavailable unless the state has submitted an approvable PSD plan to EPA.

2. Temporary Emissions

EPA's June 1978 regulations and the September 1979 proposal provided that temporary emissions from new sources or modifications would be exempt from impact analysis requirements §§ 51.24(k)(iii), 52.21(k)(iii) (1979); 51.24(k)(1), 52.21(k)(1) (proposed).

Temporary emissions typically include, but are not limited to, emissions from a pilot plant, a portable facility, construction or exploration activities. Similarly, EPA proposed to exempt from increment analyses the impacts on the PSD increments from the temporary emissions associated with the development of an approved innovative control technology system, provided the applicable ambient standards were not jeopardized. The regulations, however, did not provide a comparable exemption for temporary emissions resulting from short-term SIP relaxations.

Only three commenters addressed the concern of temporary emissions and increment consumption. These commenters offered suggestions in light of the proposed position on innovative control systems. These commenters

supported the existing policy of exempting temporary emissions from increment air quality analyses when no Class I areas or areas with known increment violations would be impacted.

Temporary SIP relaxations are comparable to temporary emissions from new and modified major stationary sources since both affect air quality for a limited period of time. Therefore, the Administrator has decided that the existing policy of exempting temporary emissions should be extended to those associated with certain SIP relaxations. A SIP relaxation will be eligible for such relief if it meets the following five conditions. These conditions are intended to ensure that the emissions increase associated with the SIP relaxation will be limited in duration and that no residual harm will occur to the environment as a result of the relaxation. (1) The SIP revision allows an emissions increase for a temporary period only. As stated in the preamble to the June 1978 regulations, temporary emissions generally would last no more than two years at one location, although emissions for a longer period of time may be considered temporary if an appropriate demonstration is made. See 43 FR 26394 col. 2. (2) The revision is nonrenewable. This condition is intended to prevent sources from indefinitely postponing compliance with emissions limitations necessary to prevent PSD increment violations. (3) The temporary emissions will not cause or contribute to the violation of any applicable NAAQS. (4) At the expiration of the temporary SIP relaxation, the source must be required to comply with an emissions limitation that ensures the post-exemption emissions will be equal to or less than the emissions existing before the exemption was granted. (5) The temporary emissions from the revision do not impact any Class I area and any area where an increment is known to be violated. Restricting the exemption to sources impacting Class II or III areas conforms to Congress' intent to provide maximum protection of air quality values in Class I areas and meets the commenter's concerns.

In addition to SIP relaxations for individual sources, the exemption will be available for temporary emissions due to SIP relaxations that apply to several sources, if the state provides adequate assurances that no standards will be violated.

C. Increment Expansion Due to Emissions Reductions Prior to the Baseline Date

EPA's policy under the June 1978 regulations is unclear as to whether emissions reductions prior to the

baseline date increase the amount of available increments. The policy allows decreases after January 6, 1975, and prior to the baseline date, to be used by sources to offset subsequent increases and exempt the increases from the requirement for an ambient air quality assessment. In effect, EPA treats such decrease as expanding available increments, since the decreases permit later emissions increases at the same source to avoid the otherwise required air quality assessment. The policy did not state, however, whether isolated decreases not made in conjunction with intrasource increases were considered to expand available increments. In contrast, the policy is clear that emissions reductions after the baseline date increase available increments.

As a result of the revised definition of modification which permits offset credit for emissions reductions occurring within a moving five-year period, EPA has decided to clarify its existing policy. All emissions reductions prior to the baseline date at major stationary sources will now be considered to expand available increments. Since contemporaneous emissions reductions accomplished before the baseline date can be used by a source to offset a contemporaneous post-baseline emissions increase, and thereby avoid PSD review, it is also reasonable to allow these contemporaneous pre-baseline date reductions to expand the increment. Without this change, source owners that reduce emissions by retiring or controlling old equipment before the baseline date will be penalized by having increases after the baseline date count against increments even though the pre-baseline decrease might offset the later increase and eliminate the need for PSD review. In contrast, source owners that postpone the reductions and increases until after the baseline date is set would both secure contemporaneous offsets and avoid increment consumption.

EPA believes that this inequity should be eliminated to encourage early retirement of old equipment. Section 169(4) provides that emissions from major emitting facilities that commenced construction after January 6, 1975, shall be counted against available increments. The provision implies that both emissions increases and decreases should be considered for their impact on available increments. In view of the statutory language and policy considerations, EPA has determined that decreases made prior to a baseline date can expand available increments in the same manner as decreases made after a baseline date. However, to ensure that

the emissions reductions remain effective, reductions will add to available increments only if the lower emissions limitations are federally enforceable.

The changed policy is reflected in a new definition of "construction" which is any physical change or change in the method of operation of a stationary source resulting in a change in the actual emissions of the source (including fabrication, erection, installation, demolition, or modification). Any construction commencing at a major source since January 6, 1975, may result in an increase or decrease in actual source emissions. If an actual decrease involving construction at a major stationary source occurs before the baseline date, the reduction will expand the available increment if it is included in a federally enforceable permit or SIP provision. An actual increase associated with construction activities at a major stationary source will consume increment.

The Administrator would also like to clarify that changes in fugitive emissions levels (to the extent quantifiable) at major stationary sources, resulting from construction commenced since January 6, 1975, will consume or expand the available increment. This is true even if such changes occurred prior to the baseline date.

D. Gulf Coast Problem.

In the September 5 proposal, and in an October 4, 1979 correction notice, EPA solicited comments on how to calculate increment consumption by gas-fired boilers in the Gulf Coast area that had received state approval to burn oil in the event of a future natural gas shortage. See 44 FR 51942 (September 5, 1979), and 44 FR 57107 (October 4, 1979). The affected units include both boilers that could accommodate such a fuel-switch before January 6, 1975 and boilers that were altered to accommodate the fuel-switch after that date. All affected units were permitted to switch fuel before August 7, 1977, the earliest possible baseline date. Assuming the baseline date is set in the area where these sources are located, which EPA believes is the case for most of the sources, each group of sources may cause increment violations.

For sources that could burn alternative fuels prior to January 6, 1975, the problem is posed by the fact that if all sources made the switch to oil allowed under their permits, SO₂ increment violations would occur. Since neither a SIP revision nor a PSD Permit would be required for the sources to make the fuel switches, EPA and the state could be unaware of the violations

until another source applied for a PSD permit or until a periodic assessment was made. If actual increment violations were discovered during the PSD review process for the proposed source, the source would not be permitted to build or modify until the violations were corrected. If violations were found during a periodic assessment, the state would have to suspend further growth until its plan was revised to correct the violations. Consequently, the inadequacy of the exiting permits to prevent increment violations could result in increment violations which would delay, and possibly prevent, additional growth in the area.

A similar problem is posed by sources that could not accommodate oil before January 6, 1975. Since these sources increased their potential to emit after January 6, 1975, under EPA's June 1978 policy, this change would have constituted "construction" at a major stationary source after January 6, 1975. Therefore, under section 169(4), any emissions increases caused by the "construction" would have consumed increment. As noted above, EPA's June 1978 policy required increment calculations to be based on emissions allowed under a permit or SIP and not on actual source emissions. If a PSD source applied to locate in an area and these Gulf Coast sources were modeled based on emissions increases due to fuel switches allowed by their permits, EPA believes several SO₂ increment violations would be predicted. Under existing policy, the proposed PSD source would then be required to correct the violations prior to receiving construction approval. Future growth in the area could, therefore, be delayed or prevented.

The problem posed by the second group of sources is reduced to some extent by the increment consumption policy promulgated today. Since increment usage will now be based on changes in actual source emissions, increment violations will not occur in the area unless the sources actually switch to oil from natural gas. Because natural gas is expected to remain less expensive and more available than oil, EPA believes few, if any, switches are likely. Therefore, while the increments may still be jeopardized due to inadequate permit conditions, PSD review can proceed as long as actual emissions increases at existing sources and actual emissions from sources with PSD or NSR permits are not predicted to cause increment violations.

If an actual increment violation has occurred, EPA's June 1978 policy imposes a PSD permit moratorium until

the violation is corrected. 43 FR 28401 (col. 1), June 19, 1978. This policy is continued in today's regulations. Therefore, if an increment violation is predicted to occur within the significant impact area of a proposed source ($1 \mu\text{g}/\text{m}^3$ on an annual average), a PSD permit cannot be issued to the source, unless the state or source obtains sufficient emissions reductions to restore the increment. The issue of how to deal with potential increment violations due to inadequate permit conditions is addressed in the next discussion.

Several comments were received in response to EPA's request for comments on the Gulf Coast problem. Although EPA believes its revised policy of using actual emissions to calculate increment consumption resolves the immediate Gulf Coast dilemma, and similar potential problems in other states, EPA is responding below to suggestions made by commenters.

EPA's notices questioned whether the Agency should or may include in the baseline concentration emissions increases due to fuel switches. Twelve of thirteen commenters on the issue supported including increases due to fuel switches in the baseline concentration and the majority of the commenters favored including in the baseline concentration other emissions increases approved prior to the baseline date but not occurring by that date. Commenters also proposed using allowable emissions in all cases to calculate baseline concentrations.

As discussed above and in Baseline Concentration, EPA has determined that both baseline concentrations and increment consumption should be based on actual air quality impacts. This decision is consistent with the suggestion of some commenters that EPA consider increment consumption to occur only when actual emissions increase and not when the permit or SIP allowing the increase is approved. As a result of EPA's revised policy, emissions increases due to fuel switches cannot be included in the baseline concentration unless the increase occurred prior to the baseline date and at a source which could accommodate this switch prior to January 6, 1975 without physical change or received approval under a PSD permit to make the switch.

One commenter was particularly concerned that unless allowable emissions were included in the baseline concentration, utilities with SIP relaxations approved shortly before the baseline date would be penalized if the utilities were unable to make the allowed increase by the baseline date. The commenter argued that some

utilities would be unable to make the technical changes necessary to accommodate the fuel switch prior to the baseline date. Such utilities would, therefore, be required to do an increment consumption analysis, in contrast to other sources that made the switch before the baseline date. The commenter suggested that accounting for the allowed emissions increase in the baseline concentration would resolve this inequity and would be consistent with EPA's June 1978 policy of including in the baseline concentration emissions allowed under SIP relaxations pending before EPA on the baseline date.

While appreciating the commenter's concerns, EPA has concluded that no exemption from increment consumption analyses is appropriate in these cases. First, as discussed in Baseline Concentration, EPA has changed its June 1978 policy to provide that increment is consumed by emissions increases due to SIP relaxations pending EPA approval on the baseline date. Therefore, the exemption cited by the commenter no longer applies. Second, the June 1978 exemption was provided for sources whose emissions increases were delayed by the administrative process and not by physical limitations at the source. Therefore, the June 1978 exemption would not have applied to these utilities. Third, under the regulations promulgated today, if significant construction is necessary to make the allowed emissions increase, the change is a modification and would be subject to PSD review, including increment consumption analysis, in any case.

Other commenters suggested that prospective application of the definitions of major emitting facility and modification promulgated today would resolve the Gulf Coast problem. Under this approach, emissions increases that occurred after January 6, 1975, and would otherwise be considered modifications that consume increment under today's regulations, would not be evaluated under the new definitions. These commenters argued that the Gulf Coast problem is due to increment consumption from emissions increases not subject to the PSD permitting process at the time the increases were approved. The commenters stated that EPA has flexibility in deciding the effective date of the definitions.

EPA believes that section 169(4) requires emissions from all major emitting facilities (as defined in the Act and not as defined in the old PSD regulations) commencing construction after January 6, 1975 to count against

increment. The statute provides no discretion to exempt these emissions from increment consumption. EPA also notes that under the PSD regulations effective from January 6, 1975 to August 7, 1977, emissions increases at such sources would have consumed increment to the extent the fuel switches occurred. [See 39 FR 42510].

E. Potential Increment Violations

1. Inadequate SIP and Permit Provisions. While the use of actual emissions to calculate increment consumption partially resolves the Gulf Coast problem, the potential for increment violations remains, due to inadequate SIP and permit provisions. As stated in the preceding discussion, many sources in the Gulf Coast area, and in other states as well, have permits or SIP requirements that allow actual emissions increases without subjecting the source to PSD review or the SIP revision process. For example, sources may be allowed to burn fuels with higher sulfur contents, as in the Gulf Coast area, or may have high allowable limits that would permit sources to relax existing pollution controls. If all sources in an area increased actual emissions to levels allowed under the SIP or permits, EPA believes increment violations would occur. Because no PSD review or SIP revision would be required, neither the state nor EPA would know of the violations until a PSD application was filed or a periodic assessment occurred. Growth would be halted until the violation was corrected.

At present, increment violations due to allowed but unreviewed emissions increases, and consequent construction delays, are only potential problems. EPA has therefore concluded that it is premature to promulgate remedial regulations to prevent such theoretical violations. EPA, however, encourages states to be alert to emissions increases that affect the increment. EPA urges states to closely monitor emissions increases from baseline sources and from new or modified sources not subject to PSD review which affect the available increment. States should consider requiring sources to report any emissions increases after the baseline date, including increases reflecting changed operating conditions that will continue for an extended period of time, perhaps six months. States would then learn of increases that consume increments and could take those increases into account in PSD permit reviews and periodic increment assessments. In addition, states are encouraged to revise SIPs and/or issue operating permits so that SIP requirements and permits reflect actual

source operating conditions. This will protect against large unreviewed emissions increases. While EPA is not promulgating a reporting requirement today, it will reconsider the need for a notification system if it finds that unreviewed emissions increases are causing or contributing to increment violations.

2. Double Counting of Emissions Decreases.

EPA is concerned about another potential problem: double counting of emissions decreases. The problem could arise if an existing source (Source A) reduces its actual emissions and a new source (Source B) seeking to locate in the area proposes to use the decrease when modeling increment consumption. Source B would do this by including the emissions decrease in its modeling of actual emissions from Source A. If the reviewing authority does not require Source B to ensure that the decrease at Source A is federally enforceable and does not record Source B's use of the decrease at the time Source B conducts its modeling, Source A may well use the same decrease to offset a future contemporaneous increase at Source A and thereby avoid PSD review for the increase. The use of one emissions decrease to offset two emissions increases could lead to air quality deterioration, and possible increment violations that would require correction before more PSD permits could be issued.

While EPA believes double counting of decreases should not be permitted, it is not promulgating regulations today to address the problem. EPA is uncertain how often, if ever, the problem will arise. Certainly it will be difficult for a new source to prove to the satisfaction of the reviewing authority the value of an emissions decrease accomplished at another source. Moreover, while EPA believes double counting of decreases should not occur, it is uncertain what solution is equitable for affected sources. In the absence of a formal increment banking system, or other provisions regulating increment allocation, the reviewing authority would have no basis for denying Source B use of any available increment. This could result in hardship to Source A if it deprives Source A of use of its decrease as an offset for future increases.

The issue of double counting is part of the broader question of increment management and allocation of air quality rights. EPA intends to develop banking regulations, which will include guidance to states on methods of increment allocation and regulating use of emissions decreases. To this end, EPA solicits suggestions on how to

prevent double counting of decreases and on methods of increment allocation and management.

XV. Best Available Control Technology

Section 165 of the Act provides in part that any "major emitting facility" constructed in a PSD area must apply best available control technology (BACT) "for each pollutant subject to regulation under this Act emitted from, or which results from, such facility." Section 169(3) of the Act defines BACT and specifically requires that it not be applied in a manner so as to result in emissions in excess of those that are allowed by standards established pursuant to sections 111 or 112 of the Act. 42 U.S.C. 7479(3). The Agency's existing regulations required BACT only for each pollutant for which a source or modification would be "major." 40 CFR 51.24(i)(1), 52.21(i)(1)(1978).

The *Alabama Power* decision held that the Act requires that BACT be applied to all pollutants subject to regulation under the Act, not only those for which the source is major, and that EPA is without authority to circumscribe the requirement in this manner. 13 ERC 1993, 2046. The court did conclude, however, that EPA has authority to set *de minimis* thresholds for BACT applicability, in order to alleviate economic and administrative burdens. *Id.*

In response to the court's decision, EPA proposed and is now promulgating regulations regarding application of BACT. 40 CFR 51.24(k)(1), 52.21(k)(1). With respect to new major stationary sources, BACT will be required for each regulated pollutant emitted in excess of specified *de minimis* amounts. Application of BACT is also required, in the case of major modifications, for each regulated pollutant emitted for which there is a significant net emission increase (greater than *de minimis* amounts) at the source. The BACT requirement applies to only the modified units and added units at the source whose construction results in a source-wide significant net increase in the emissions of the regulated pollutant. The new BACT requirements apply only to the owner or operator of a PSD source or modification whose application for a PSD permit was not complete before today's promulgation. (*See Transition.*)

The *de minimis* emissions rates promulgated by the Administrator (*see De Minimis Exemption*) will apply to both BACT and LAER requirements. The Agency specifically solicited comments on the need to specify *de minimis* levels for BACT, since the case-by-case BACT determinations would presumably take *de minimis* levels and such related

issues as cost into account. Twenty-six commenters addressed this issue. Seventeen agreed in principle but generally considered the proposed levels too low and requested special consideration for pollutants emitted in less than major amounts. Eight of nine dissenters preferred case-by-case BACT determinations, with no *de minimis* values.

The Administrator is implementing the proposed *de minimis* approach for determining BACT applicability, although several values have been increased. (*See De Minimis Exemptions.*) This action should alleviate the concerns of those commenting about the need for BACT review of those pollutants emitted in small amounts. The Agency also solicited comments on the potential problem of a source obtaining lenient BACT determinations and later applying better controls to offset additional expansion plans. Twelve of thirteen commenters addressing this issue concluded that no such problem would arise. They claimed that it would be implausible to suppose that state programs and EPA regional offices would evade such responsibility, especially since loose BACT determinations would result in accelerated consumption of increment. The Administrator agrees that there appears to be adequate protection against loose BACT determinations.

Each of the three comments that addressed a need to phase in the BACT requirement favored a six month to one year grace period because of the complexity of the program. However, the Administrator believes that the case-by-case flexibility of BACT determinations is sufficient to phase in these regulations. Moreover, sources have effectively had a one year notice, in that the original *Alabama Power* decision, published June 18, 1979, informed them of the new BACT requirements. (*See Transition.*)

An additional issue, regarding the pollutant applicability of the BACT requirement, arose during the comment period. The proposal required BACT for the new or modified emissions units which were associated with the modification and not for those unchanged emissions units at the same source. Thus, if an existing boiler at a source were modified or a new boiler added in such a way as to significantly increase particulate emissions, only that boiler would be subject to BACT, not the other emissions units at the source. However, the proposal could be interpreted as requiring BACT for certain pollutants where the

Administrator did not intend to require BACT. For example, the proposal could be interpreted as requiring BACT review for any pollutant emitted from a source that was modified, regardless of whether the emissions of the pollutant increased. However, that was not the Agency's intent.

If a new unit were added or if a modification were made to a unit at a source, but there are contemporaneous decreases in emissions elsewhere at the source, BACT is required only for the pollutants for which there is a net significant plant-wide increase. For example, consider the addition of a boiler whose emissions of PM, SO₂, and NO_x each exceed *de minimis* levels. If, at the same time, an emission unit of SO₂ elsewhere at the source were shut down, such that plant-wide emissions of SO₂ either do not increase or increase by less than a *de minimis* amount, BACT is required for the new boiler only for PM and NO_x. Of course, BACT will not be required if there is no significant plant-wide increase in emissions of any pollutant. Similarly, if an existing emissions unit of a source were modified such that there is an emissions increase for one or more pollutants, but not all, BACT is required only for the pollutants for which there is both a net increase at the unit and a net significant plant-wide increase.

The above final policy governing the applicability of BACT to modifications is also consistent with existing policy under section 111, which the court said should govern modification concerns. The applicable regulation, 40 CFR 60.14(a), states that "any physical or operational change to an existing facility which results in an increase in the emissions rate to the atmosphere of any pollutant to which a standard applies shall be considered a modification within the meaning of section 111 of the Act. Upon modification, an existing facility shall become an affected facility for each pollutant to which a standard applies and for which there is an increase in the emissions rate to the atmosphere." (Emphasis added.)

The regulation cited above makes two important statements about the applicability requirements. First, the BACT requirements apply only with regard to those pollutants for which there has been a net significant increase. This was emphasized by the Alabama Power decision: "Congress wished to apply the permit process, then only where industrial changes might increase pollution in an area, not where an existing plant changed its operations in ways that produced no pollution increase * * * . The interpretation of

'modification' as requiring a net increase is thus consistent with the purpose of the Act * * *. The EPA has properly exempted from best available control technology (BACT) and ambient air quality review those 'modifications' of a source that do not produce a net increase in any pollutant." 13 ERC at 2043.

Second, BACT is required for net significant increases of *any* pollutant regulated under the Act, regardless of the category of source involved or the emissions standards generally applicable to it. Section 165(a)(4) of the Act requires application of BACT "for each pollutant subject to regulation under this Act" emitted from a subject facility. 42 U.S.C. 7475(a)(4). This includes not only criteria pollutants but also all pollutants regulated under NSPS or NESHAP. In this manner, BACT can complement the NSPS process by extending coverage to additional source types and units and perhaps identifying candidates for future NSPS and NESHAP regulations.

XVI. Monitoring

In *Alabama Power*, the court held that section 165(e)(1) of the Act requires an ambient air quality analysis for each pollutant subject to regulation under the Act that a proposed source or modification would emit, prior to applying for a PSD permit. Since existing PSD regulations require monitoring only for criteria pollutants emitted in major amounts, EPA responded to the June 18, 1979 *per curiam* opinion by proposing to require, for criteria and noncriteria pollutants, an air quality analysis that would generally include monitoring data. In order to gather and analyze the appropriate data necessary to apply for a PSD permit, a proposed source would have to establish an appropriate monitoring network or would have to gather and analyze representative air monitoring data resulting from ongoing monitoring activities.

As proposed, preconstruction monitoring data was required as part of the air quality analysis when: (1) the estimated ambient impact of any new pollutant emissions from the stationary source or modification would be larger than the pollutant specific *de minimis* air quality concentration (Table B); or (2) the new emissions or net emissions increases for the pollutant would be major (100/250 tons per year). In addition to this rule, EPA proposed that a case-by-case analysis of the proposed stationary source or modification which would impact on a Class I area be conducted even though the anticipated impact would fall below the *de minimis* level. Later, in October 1979, EPA

provided further guidance for applying these requirements in the draft revision of the *Ambient Monitoring Guidelines for Prevention of Significant Deterioration (PSD)*, OAQPS 1.2-096, U.S. EPA, Office of Air Quality Planning and Standards and Office of Research and Development, RTP, NC 27711.

The proposal stated that certain noncriteria pollutants (sulfuric acid mist, carbon disulfide, carbonyl sulfide, methyl mercaptan, dimethyl disulfide, and dimethyl sulfide) were lacking measurement methods approved by EPA. Until such time as approved techniques would become available, the Agency proposed to use mathematical modeling to estimate the air quality resulting from the emissions of these pollutants. Considering these limitations and the general lack of experience in monitoring on a routine basis, the Administrator proposed to implement noncriteria pollutant monitoring requirements on a case-by-case basis.

In addition to the pre-application monitoring requirements already described, EPA's proposal included discretionary authority for requiring post-construction monitoring to determine the effects of the new emissions on existing air quality. For cases in which larger pollutant emission impacts are anticipated, post-construction monitoring can be a particularly useful aid in adjusting modeling results used to predict concentrations resulting from the source's operation. The approach was thought to be responsive to the *Alabama Power* decision which required EPA to use monitors to help refine modeling techniques. Accordingly, EPA proposed to generally require post-construction monitoring from large sources of particulate matter and sulfur dioxide. Other sources whose emissions are estimated to result in air quality levels approaching an allowable increment or a NAAQS could also be required to submit post-construction monitoring data. The rule promulgated today is consistent with the proposal.

The Administrator believed that the required monitoring data would be most productive in checking the accuracy of models and, in some cases, could be used to calculate increment consumption. If an applicant or other party believes that a model required by EPA had either overpredicted or underpredicted the air quality impact of a source, EPA stated that monitoring data would be evaluated to the extent possible to determine whether adjustments would be necessary. EPA anticipated that the future development of more sophisticated monitoring

techniques may permit increased use of monitoring data to track increment consumption and establish ambient baselines, as well as improve the level of confidence in modeling.

Lastly, EPA considered the approach needed to smoothly usher in the new monitoring requirements. The September 5 *Federal Register* indicated that EPA intended to require any additional monitoring requirements, as now necessary under *Alabama Power*, to be phased in. Later, in October 1979, the draft ambient monitoring guidelines specified that a three-month allowance would be subtracted from the time interval over which the owner must monitor to allow for procuring and setting up the necessary monitoring equipment. (*See Transition*).

There was a large response to EPA's proposal and draft monitoring guidelines—nearly 100 public comments and over 800 requests for the guidance document were received. The comments indicated general agreement with EPA's interpretation of the court's preliminary opinion. But some concern was expressed over certain specific portions of the proposal: (1) the limited technology available to monitor the noncriteria pollutants in the ambient air; (2) the large cost associated with gathering all the required air quality data for all regulated pollutants; (3) the identification process for "representative" data; and (4) the need for post-construction monitoring.

Subsequent to the publication of the September 5, 1979 proposal and the receipt of the public comment, the court issued its final decision on December 14, 1979. One important change the court made upon reconsideration of the June 18 opinion was "that section 165(e)(1) requires that *an analysis* be conducted, and that it be conducted for each pollutant regulated under the Act. But *** that section 165(e)(1), standing alone does not require monitoring as *the method of analysis* to be employed in the fulfillment of its requirements." 13 ERC 1993, 2019. This ruling gave EPA more flexibility in defining the minimum requirements for a proper analysis of the noncriteria pollutants. "EPA might *** choose either monitoring or modeling as the method of analysis ***" *Id.* In other monitoring issues the court essentially affirmed its preliminary opinions.

Today, the Administrator is promulgating the proposed monitoring requirements with the noted exceptions. (*See* 40 CFR 51.24(m), 52.21(m)). EPA will generally require one year's worth of monitoring data as part of the air quality analysis for only the criteria pollutants. For the noncriteria and

hazardous pollutants, modeling, not monitoring, will be the mechanism used to perform most detailed air quality analyses. However, there may be certain circumstances where monitoring may be the only option available to perform an adequate analysis for the noncriteria pollutants (e.g., when little or no data on emission inventories for the area of concern exist). In that case, EPA will require ambient monitoring for the noncriteria pollutants if there is an acceptable method for the monitoring of that pollutant. Presently, the Administrator has acceptable methods for measuring ambient concentrations of: (1) all the criteria pollutants; (2) mercury; (3) beryllium; (4) vinyl chloride; (5) fluorides; and (6) hydrogen sulfide. A list of acceptable methods and copies of the method description are available by writing to: U.S. EPA, Environmental Monitoring Systems Laboratory, Quality Assurance Division (MD-77), Research Triangle Park, N.C. 27711. Also, techniques to measure ambient total reduced sulfur and reduced sulfur compounds have been chosen and will be added to the list within the next several months. At this time there are no acceptable methods for measuring ambient levels of asbestos and sulfuric acid mist.

As EPA gains more experience from the PSD program with respect to noncriteria pollutant analysis and as the technology develops, the Administrator will consider an increased role for ambient monitoring within the required air quality analysis.

In addition to the exemptions given in the *de minimis* section of this *Federal Register* publication, EPA may not always require a source owner to establish a monitoring network when the data would not validate or improve the estimates made by the mathematical models. When the existing air pollution levels are conservatively estimated to be quite small and a monitoring network could not reliably measure the predicted background concentrations, EPA will generally not require the source owner to generate preconstruction monitoring data. Also, if the source owner has submitted preconstruction data for the source site, and the post-construction monitoring network could not measure a predicted degradation in the air quality, then EPA will generally not require the source owner to collect further monitoring data. More guidance for meeting all the monitoring requirements is given in the *Ambient Monitoring Guidelines for Prevention of Significant Deterioration* (PSD), EPA-450/4-80-012, July 1980, available from the Monitoring and Data Analysis Division, OAQPS,

(MD-14), U.S. EPA, Research Triangle Park, N.C. 27711.

In the September 5, 1979 proposed regulations and the October 1979 draft of *Ambient Monitoring Guidelines for Prevention of Significant Deterioration* (PSD), EPA solicited comments on the use of representative air quality data to satisfy PSD monitoring requirements. Thirty-nine comments were received on the various aspects of the use of representative air quality data. The major responses were as follows: twenty-four commenters supported the use of existing representative air quality data, especially for remote areas. Five commenters wanted EPA to allow the use of bubbler data in lieu of continuous monitoring data, seven respondents believed that data older than two years should be allowed, and three objected to the quality assurance requirements for the representative data.

EPA has considered all of the comments and has taken the following actions:

(1) The use of existing representative air quality data will be permitted in lieu of monitoring, provided that the data meet the criteria in the above reference guideline.

(2) No bubbler data will be permitted because the data should be of the same quality as that obtained if the applicant monitored according to the requirements in the above referenced guideline. This guideline specifies monitoring must be done with continuous instruments to eliminate measurement biases associated with bubbler data.

Continuous measurements are also more suitable for routine monitoring purposes in checking for compliance with short-term standards.

(3) EPA will allow the use of data, for preconstruction purposes only, collected in the three-year period preceding the permit application provided reference/equivalent quality assurance procedures were followed during the measurement period. The draft guideline has previously specified a two-year requirement.

(4) EPA reaffirms the intent that all monitoring data collected must have been collected in accordance with acceptable quality assurance procedures. The specifics of the minimum quality assurance program needed for collecting air quality data are contained in the referenced guideline.

Finally, the court held that EPA had failed to provide concrete guidance to the states for designating when less than one year of monitoring data would meet the required air quality analysis, as specifically allowed under section 165(e)(2). Such guidance is given under

PSD SIP Revisions located elsewhere in today's Federal Register publication.

XVII. Notification

The proposal contained a requirement that certain construction projects exempt from PSD permit rules file a report at least 90 days in advance of the time that the exempted construction would commence. Notification requirements similar to those in the PSD proposal were also included in the proposed nonattainment rules, under 40 CFR 51.18(j) and 52.24, and Appendix S of Part 51 (the Emission Offset Interpretative Ruling). These notice requirements would apply to source construction which would not be subject to NSR solely because (1) the increase in emissions was offset by a contemporaneous decrease so as not to cause a significant net increase at the source (*see Modification*), or (2) the application of air pollution controls not generally required by the applicable SIP or 40 CFR 60 or 61, would lower the "potential to emit" of the source below the applicable threshold for permitting. The proposal would have required the submittal of comprehensive data for both new and existing emissions units at the stationary source and all other information needed by the reviewing authority to determine if the exemption reported by the source was proper. No formal applicability determination, however, was to be made and no major delays in the construction program of any such source were intended.

The Administrator believed such reporting was necessary because of the additional complexity of such determinations and the decreased number of sources subject to PSD due to changes in applicability rules. A need was apparent to record unreviewed emission increases and reductions occurring years apart at the same plant, in order to assess their impacts on air quality as well as to simply register in advance claims for reduction credits. For these reasons the Administrator proposed to use his authority under section 114 to monitor these determinations of offsetting emissions reductions and increased control efficiency. Section 114 authorizes the Administrator to require a source owner to provide such information as he may reasonably require in order to carry out Part C of the Act or to determine if a source owner is in violation of a SIP requirement.

Fifty-nine comments were received on the notification requirements. Only two comments completely supported the Agency proposal. Thirty-eight of the commenters felt that the requirements were unnecessary and not authorized by

the Clean Air Act. Many stated that the requirements were burdensome and equivalent to a preconstruction permit process. Twenty-four commenters specifically stated that section 114 does not allow such a comprehensive data gathering requirement, although reasonable data gathering is allowed.

Those who thought the requirements unnecessary cited the adequacy of existing state permitting programs to deal with these problems and the possibility of post-construction recordkeeping to accomplish the same objectives. EPA was advised to take enforcement action against the few source owners who would incorrectly exempt a source from review and then construct the source without obtaining a permit, rather than risk pervasive construction delays of properly exempted sources. Many commenters felt that the administrative burden to both the reviewing agency and the source outweighed its benefits. Seventeen commenters specifically stated that the extra cost to source owners would remove the real incentives for early cleanup and would act to perpetuate the operation of older units with high air pollutant emissions.

The Administrator maintains that reporting similar to the preconstruction notice is needed and can be required under section 114. However, the comments, particularly those concerning the potential of existing state programs to accomplish this function, have caused EPA to reconsider the need at this time for a preconstruction notification requirement. State comments and meetings with several state representatives in Atlanta (*see Docket account of III-D-4*) indicate that all states currently learn of all proposed emission units and changes before such would commence construction. Most states acquire such knowledge through their existing general NSR procedures, approved under 40 CFR 51.18, even if a net decrease would occur at the source. Other states learn of proposed emission increases through notification letters filed by the source pursuant to a formal applicability determination.

Many states do not routinely require sources to record emission decreases, especially when such would occur well in advance of related emission increases. While a preconstruction notice would be desirable to document these decreases, the requirements for contemporaneous emission reduction credit (*see Modification*) are sufficient to fulfill this need. That is, emission reductions, in order to be creditable in offsetting any contemporaneous increase at the same stationary source,

must be enforceable before the associated unit(s) with the emissions increase(s) commence construction. Such reductions, to be enforceable, must generally be made part of an enforceable operating or construction permit or be processed as a formal SIP revision. Although the Administrator is still concerned that sufficient information may not be available when a source owner wishes to document previous emissions reductions, he is opting for a "wait-and-see" approach in order to alleviate the concerns of the majority of the commenters who felt the notification requirements were unjustified and burdensome.

Also, since states will soon be administering the PSD program, it is best to allow them the flexibility to integrate notification requirements into their existing permit programs. The notification requirements in each state will be different, depending upon whether the state has an emission banking system and how it operates, the type of emission inventory system, and the information available from operating and construction permits. PSD increment tracking systems will also be set up by states, which can tailor informational requirements to their own tracking systems.

While today's regulations do not contain a formal preconstruction notice requirement, owners and operators are hereby put on notice for the following: (1) Sufficient records regarding the details of contemporaneous emission increases and decreases or applicable source determinations of "potential to emit" should be maintained so as to verify that no permit was required should the Administrator so require under section 114; (2) If experience in implementing the "no net increase" provisions of PSD applicability indicates that a more comprehensive notification system is required, the Administrator will promulgate an amendment to PSD and nonattainment regulations similar to the deleted provisions of the September 5 proposal; and (3) Any source which improperly avoids review and commences construction will be considered in violation of the applicable SIP and will be retroactively reviewed under the applicable NSR regulation.

XVIII. PSD SIP Revisions

Comments have been solicited on three aspects of the development of acceptable PSD plans by states. The issues are: (1) the authority of states to submit different but equally effective PSD programs, (2) state flexibility in defining baseline areas, and (3) state flexibility in allowing monitoring exemptions.

A. Equivalent State Programs. Under existing regulations, the Administrator cannot approve proposed state PSD regulations unless the state requirements are identical to or individually more stringent than the corresponding 40 CFR 51.24 regulations. While the Act does contain specific requirements for several major aspects of PSD programs, it does not prohibit states from using, in other areas, approaches equivalent to those of the federal regulations in order to meet the statutory objectives. Accordingly, the Administrator proposed on September 5, 1979 that states be given some flexibility in preparing PSD plans. The Administrator requested comment on such an approach and suggested portions of the PSD requirements for which equivalent approaches might be acceptable, and others for which alternative regulations would not be approvable. Where SIPs were allowed to differ, a test of overall equivalence was to be used based on the ability of the state system to capture as many emissions as would the 40 CFR 51.24 regulations.

All forty-nine comments on this topic strongly endorsed the general approach of giving states flexibility in developing PSD programs, although several commenters expressed the desire for a more extended area for SIP flexibility. Among those areas are: (1) the entire PSD program, (2) fugitive dust applicability, (3) modeling techniques, and (4) treatment of minor modifications and exempted sources. Another commenter asserted that EPA could hold the states responsible only for plans that addressed minimal requirements, such as maximum increment consumption.

After consideration of the comments, the Administrator has decided to treat PSD SIP revisions generally in the manner proposed. This means that states will be permitted to meet the following requirements of 40 CFR 51.24 with different but equivalent regulations, or implement the federal regulations with considerable discretion:

- a. Baseline area.
- b. Type and amount of data needed for monitoring purposes.
- c. Temporary exclusions from increment consumption.
- d. Defining "contemporaneous" as a reasonable period that may be greater or shorter than 5 years.
- e. Banking of emissions reductions for future offsets.
- f. Source information and analysis required of the applicant.
- g. Public participation after providing the opportunity for public hearing.
- h. Alternatives to first-come-first-served permit processing.

State PSD programs must follow the federal regulations in other matters. This includes, but is not limited to the following:

- a. Maximum allowable increments.
- b. Modeling techniques.
- c. Class I area protection.
- d. Notice to the Administrator or the applicable Federal Land Manager for prospective permit actions.
- e. New (grass roots) major stationary source applicability.
- f. NSPS, NESHAP minimum requirements for BACT determinations.
- g. Definitions generally as contained in 40 CFR 51.24(b). (State definitions need not be verbatim translations, but must have the same effect).

The Agency is not expanding the area of state program flexibility to those four areas, noted earlier, that were suggested by the commenters. First, the Administrator does not believe that complete program flexibility is allowable under the Act, nor does he find a basis for the comment that EPA is without authority to require that SIPs include more than skeletal program components. The second suggestion, regarding fugitive dust, is not feasible at this time for reasons detailed elsewhere (*see Fugitive Dust Exemption*). With regard to the third comment, the Act specifically directs the Administrator to specify air quality models. Section 105(e)(3), 42 U.S.C. 7475(e)(3). In addition, national consistency is important for such air quality impact analysis in order to standardize how increment would be consumed or enhanced across the country.

With regard to the degree of state flexibility in exempting additional types of new and modified sources, EPA believes that adequate exemptions have been provided in today's regulations and no further ones are authorized under the Act. The Administrator wishes to note that today's rules allow a state the opportunity to change the time period defining contemporaneous emissions increases. This change affects the definition of major modification and thereby affects the number of PSD reviews.

The opportunity for states to change the time period within which emissions changes would be considered contemporaneous is not constrained by a test of equivalency. Rather, it should be considered by states in developing PSD SIPs in conjunction with their deliberations on alternatives to first-come-first-served permitting and emission offset banking. The Administrator believes these issues are related to the state's inherent flexibility under the Act to manage increment consumption.

B. Baseline Area

This aspect of the equivalent state program issue deals with the definition of the area for which the baseline data is triggered by a PSD permit application and, specifically, with whether this definition must be the same under a PSD SIP as it is in 40 CFR 52.21. The proposal defined baseline area for both 40 CFR 51 and 52 as every part of an affected AQCR designated attainment or unclassified on the baseline date. Comments were solicited concerning the desirability of allowing states to define "area" as any portion of an AQCR that had been designated as attainment or unclassifiable, or, conversely, to allow states to define "area" as the entire state.

All commenters specifically addressing the issue of allowing states to have flexibility in defining baseline area were in favor of that approach. Many were more specific, suggesting that 107 designated areas or source impact areas be used.

The Administrator has decided to allow flexibility to states, not by accepting alternative definitions in SIPs, but by defining baseline area in such manner as to allow flexibility. This change in definition arises from a revised legal interpretation of what meaning "area" may be given under the Act. (*see Baseline Concentration*). Baseline area is now defined as all areas (and every part therein) within the state that are designated attainment or unclassified under section 107(d)(1) (D) or (E) of the Act in which the source establishing the baseline date would locate or would have an air quality impact equal to or greater than $1 \mu\text{g}/\text{m}^3$ (annual average) for the pollutant (SO_2 , and/or TSP) for which the baseline date is established. Flexibility is inherent in state authority to redesignate areas under section 107. Thus, large tracts of land belonging to one clean or unclassified PSD area can later be divided into several smaller PSD baseline areas with potentially different baseline dates. Other than the limitations associated with processing 107 area redesignations as SIP revisions, EPA requires that area redesignations under section 107 cannot intersect or be smaller than the area of impact of any major stationary source or major modification which establishes a baseline date or is subject to PSD and would be constructed in the same state as the state proposing the redesignation. A baseline date will, therefore, be triggered for the entire designated section 107 area unless nonimpacted portions are redesignated to smaller areas.

This approach allows the flexibility requested by the commenters, but precludes "postage-stamp" designations designed to trigger baseline only in the immediate vicinity of the source. It also avoids the difficult area boundary problems which would arise from defining area as the PSD source impact area. States are cautioned to carefully weigh any inclination to postpone baseline dates through area redesignations against increased difficulties associated with tracking increment consumption.

C. State Monitoring Exemption

Alabama Power remanded to EPA that portion of the monitoring requirements which allowed states to accept less than one year of preconstruction monitoring data for cases in which a shorter period would be sufficient to perform a complete and adequate analysis. The court ruled that EPA had not provided adequate guidance to the states for making this determination, 13 ERC 1993, 2020.

The proposal contained concrete guidance for use by states in determining if less than one year of monitoring data is sufficient. That guidance provided that as little as four months of monitoring data for the criteria pollutants was acceptable if the applicant demonstrated that the maximum pollutant concentrations would occur within that time.

Fourteen comments were received on various aspects of this proposal. Thirteen commenters supported the flexibility of requiring less than one year of monitoring data under specified circumstances. Two commenters addressed ozone monitoring requirements where there were more than four months with average daily maximum temperatures greater than 20°C (68°F).

The Administrator has decided to promulgate the proposed regulations except for the following:

(1) Less than one year of monitoring data will be permitted for all regulated pollutants, rather than for just the criteria pollutants. However, it must be demonstrated through historical data or dispersion models that the data for such shorter periods of time, but not less than four months, will be obtained during a time period when maximum air quality levels can be expected.

(2) Guidance for monitoring ozone during the warmest four months of the year has been deleted. Monitoring for ozone, as well as other pollutants, will still be required during the time period when maximum air quality levels can be expected. Ozone concentrations will generally be higher during the warmest four months of the year. However, ozone

monitoring must also be conducted when the yearly maximum ozone concentrations are likely to occur during months other than the warmest four months of the year. This will ensure that ozone monitoring will cover the expected maximum concentrations.

XIX. Additional Issues

A. Innovative Technology

In the September 5, 1979, Federal Register the Agency proposed a new paragraph (u) which sets out specific requirements for reviewing sources that wish to utilize innovative control technologies. The new paragraph sets out criteria to be used by the Administrator in determining whether a proposed control technology is innovative, in addition to establishing specific provisions for implementing the BACT and modeling requirements.

All of the commenters recognized the need to encourage the development of technology and generally approved of EPA's approach. One large environmental group commented that while it approved of the added flexibility in specifying BACT for innovative technologies, it was concerned that Class I areas might be compromised if increment violations were allowed to occur during the period of testing. We share this concern of the environmental group and are today promulgating a regulation which ensures full protection of Class I areas.

Today's amendments provide that, for a source whose technology has been designated as "innovative" by the Administrator, the BACT requirement should insure the installation of the innovative system and the adoption of a compliance schedule for meeting a final emission limitation. This final emission limitation must at least represent the BACT level that would have been initially defined under § 52.21(j).

assuming the use of proven state-of-the-art technology. The compliance schedule may extend no more than 7 years after permit issuance or 4 years after startup of the source. The regulations also provide that the Administrator may withdraw his approval if a source: (1) fails to meet the final emissions limitation by the specified date, (2) fails to protect the public health, welfare, or safety, or (3) shows an indication that the innovative control system will not be successful. The source will then be given a period of no more than 3 years to come into compliance with the BACT level determined with the use of the demonstrated system of control.

The September 5 Federal Register proposed that with the consent of the governor an "innovative technology"

source could conduct the increment impact analysis using the final emission limitation specified in the permit, provided that no interference with applicable NAAQS would result during the interim period. EPA reasoned that any increased level of emissions which might occur during the interim period would be temporary and would not significantly impact the increments. However, one of the commenters pointed out that Class I areas require protection even from temporary violations. We agree with the concerns of this commenter and cite § 52.21(i)(7) in their support. That section exempts temporary sources from the modeling requirements except when they impact Class I areas or areas where the increment is known to be violated. Today's regulations allow an "innovative" source to use its final emission limitation for increment modeling purposes, but only if there is no impact on any Class I area or any area with a known increment violation. As in the proposal, the final rules requiring modeling for the purpose of evaluating the impact on NAAQS must take into account interim emission projections. Under no condition may a source be approved if it would cause a violation of the NAAQS, even a temporary violation.

B. Modified Permits

In the September 5, 1979 Federal Register, EPA proposed to add a new paragraph (t) entitled "Modified Permits." The new paragraph provided a simplified approval procedure for sources that make minor changes in design capacity or in the nature of process equipment between the time they obtain a PSD permit and the time they complete construction. It also required prior approval, through permit modifications, of increases in hours of operation.

The comments on this section were mixed. Some commenters felt that the new paragraph was redundant and superfluous, while others generally approved of it but asked for clarification. Upon further consideration, the Agency believes that there is a need to distinguish between situations in which permits would be changed for primarily administrative reasons, such as a change to reflect a revised construction schedule, and situations in which the permit change involves a significant increase in emissions. In the latter case a new permit must be issued; in the former, however, an abbreviated procedure involving modification of the permit might be preferable. There are numerous issues to be considered in implementing

such an approach. These include the means to differentiate between significant and nonsignificant changes, and the specific procedural requirements for modifying a permit. Those issues were not adequately addressed in the proposal and for that reason the Agency has decided that it does not have a sufficient basis for completing rulemaking at this time. However, further rulemaking is being considered for future proposal and comment will be requested on the issues at that time.

C. Nonprofit Institutions

EPA proposed on September 5 to exempt modifications of nonprofit institutions from PSD review requirements as is already done for new construction of this type. This would mean that, upon written request by the governor of the state, a PSD permit would not be required of a major stationary source or major modification that qualifies as a nonprofit health or educational institution. Today the Administrator promulgates this exemption as proposed since no significant public comment was received. It should be noted that although such major new or modified sources would not require a PSD permit, the emissions from these sources would consume the applicable PSD increment(s) after January 6, 1975.

D. Portable Sources

With regard to portable sources, EPA proposed to change the 30 day notice to a 10 day notice for previously permitted PSD sources wishing to relocate. Based on experience in implementing the PSD regulations, and having received no adverse public comments on this proposal, the Administrator is adopting this proposal with one exception. Sources with PSD permits must provide a notice to the reviewing authority not less than ten days before relocation activities would commence, unless the Administrator has previously approved a different minimum time for relocation notice.

The Administrator would also like to clarify that a source is portable only if it would have temporary location and temporary emissions. Existing EPA policy defines temporary emissions as emissions from a stationary source that would be less than two years in duration, unless the Administrator determines that a longer time period would be appropriate. Thus, for a portable source to qualify for the above exemption, it must typically be located at the new location less than two years.

E. Secondary Emissions

Desiring to make the PSD review requirements similar to nonattainment requirements wherever possible, the Administrator proposed to add the definition of secondary emissions found in the offset ruling (44 FR 3274) to the PSD regulations. See 43 FR 28403. Secondary emissions would mean emissions from new or existing sources which occur as a result of the construction and/or operation of a major source or major modification, but do not necessarily come from the source itself. Secondary emissions would include:

- (a) emissions from ships or trains coming to or from a source or modification; or
- (b) emissions from offsite support sources which would otherwise increase emissions as a result of construction or operation of a major source. Although reasonably quantifiable secondary emissions would be reviewed in the air quality analysis, such emissions would not be included in determining "potential" emissions.

Public reaction to the September 5, 1979 proposal and the final *Alabama Power* opinion regarding EPA's treatment of secondary emissions was small. Generally the commenters favored the exclusion of secondary emissions from the PSD permit process altogether. Their objections centered on the availability and reliability of the emission factor data to "reasonably" quantify secondary emissions. Also the possibility of redundant reviews was highlighted by several commenters. The Administrator, in weighing these comments, has decided to promulgate the regulations addressing secondary emissions as proposed on September 5, 1979. See 40 CFR 51.24(b)(3), 52.21(b)(3), 51.24(b)(20), and 52.21(b)(20).

The Clean Air Act clearly calls for a detailed and extensive air quality impact assessment. For instance, each permit application must include impacts from the growth projected in the area that would occur as a result of the proposed source's construction. See section 165(a)(6). Also, once the baseline date is set, such emissions would consume the maximum allowable increments, so each permit decision must give consideration to all the possible ramifications of allowing a source or modification to construct. See section 165(a)(3) ("cause or contribute"). Secondary emissions must be considered when those emissions are specific, well defined, reasonably quantifiable, and impact the same general area.

F. Baseline for Calculating Offsets Under Section 173(1)(A)

The Offset Ruling sets out rules and guidance for determining the baseline for calculating emissions offset credit, as well as guidance on the location of offsetting emissions. See 40 CFR Part 51, Appendix S, Sections IV.C. and D. To aid the states in developing their NSR regulations for nonattainment areas, or in revising those regulations, EPA has decided to promulgate those rules and guidance in § 51.18(j)(3).¹⁴ The language promulgated today is identical to that used in the Offset Ruling, except as explained below.

On January 18, 1979, EPA modified the Offset Ruling to conform to section 129(a)(1) of the Act by setting the baseline for determining emissions offset credit at the emissions level specified for the source in the applicable SIP. EPA is retaining this baseline level for the Offset Ruling. However, the approach for NSR programs adopted pursuant to section 173 is slightly different. Section 173(1)(A) sets the baseline as the "allowable" emissions of the source, but it further specifies that the offsets obtained by the source must be sufficient to represent reasonable further progress (RFP). Some Part D SIP revisions approved by EPA have demonstrated attainment and RFP based on the allowable emissions of sources in a nonattainment area. However, many Part D SIP revisions have based their demonstrations on the *actual* emissions of the sources in a nonattainment area, rather than the sources' allowable emissions. This means that to be consistent with RFP, sources must reduce their actual, rather than their allowable, emissions. Otherwise, sources could claim credit for offsets in situations where the offset would actually interfere with RFP.¹⁵

To accommodate the different approaches to RFP, EPA has provided that the baseline for determining emissions offset credit shall be the

¹⁴On January 18, 1979, EPA solicited comments on certain aspects of the Offset Ruling, none of which directly concerned the matters published today. EPA will respond to those comments after today's promulgation.

¹⁵For example, suppose a source's allowable emissions are 1,000 tpy, and its actual emissions are 500 tpy. Now suppose it wants to add a new emissions unit, thereby adding 100 tpy, and the SIP requires a 100 tpy reduction for RFP. The source might achieve both objectives by decreasing its total allowable emissions to 900 tpy, i.e., it adds the 100 tpy for the new facility, but makes other reductions in allowable emissions of 200 tpy. This is adequate if the RFP demonstration relies upon allowable emissions, since the source started at 1,000 tpy and now is at 900 tpy. But if RFP is based on actual emissions, then there is a loss of 100 tpy, because RFP assumed 500 tpy and now the source emits 600 tpy.

allowable emissions of the source, where the SIP relies upon allowable emissions to demonstrate RFP; but the baseline must be actual emissions where the demonstration is based on reductions in actual emissions. EPA believes for the reasons discussed above that this approach is necessary to assure RFP towards attainment of ambient air quality standards.

G. Economic Impact Assessment

In the September 5 proposal, it was stated that the Agency would prepare an economic impact assessment of the proposed changes after the final court opinion was issued, which took place on December 14, 1979. The Agency further indicated that it would make the report available for public comment prior to promulgation, and that any resulting comments would be taken into account in the promulgated regulations.

Although the results of the impact assessment released today have been considered in developing the regulations, primarily for understanding *de minimis* effects, it has not been possible to complete the assessment in time to get comments prior to promulgation. In fact, because of the inherent complexity of the program, it has not been possible to do a true economic impact assessment (*i.e.*, one which considers impacts on market positions, prices, closures, etc.).

The document made available today presents as assessment of the overall impact of the proposed regulations with respect to several of the major issues or changes in the proposed regulations. The assessment does not attempt to quantify the impact of every issue nor does it attempt to assess the overall impact associated with the implementation of the PSD regulations in general. It is designed to provide a relative assessment of the impact of the September 5 proposal versus the June 1978 regulations in terms of the sources to be affected, their associated emissions, major requirements which must be met (or which are no longer required to be met), and estimated cost savings for sources no longer subject to PSD review as a result of the proposed regulations. In short, the analysis provides an estimate of differential cost impact of the 1978 versus the proposed PSD regulations and an assessment of the major issues associated with the proposed PSD regulations.

As noted, the assessment focused on the difference between the June 1978 regulations and those proposed on September 5. However, there are significant changes in the promulgated regulations compared to those proposed, especially with regard to the *de minimis*

values. Since these values have a major impact on expected cost, a projection of the impact of the final regulations was also made.

It is estimated that there will be a savings as a result of the promulgation for sources which would have been subject to the old regulations but which would not be subject to the new. This would represent an annual savings of \$2.2 to 6.1 million assuming the sources which have received permits from April 1978 to November 1979 are representative of those which will receive permits in the future.

Although there is an overall savings for sources which would no longer be subject to PSD review, the new regulations require more extensive review for some sources, as well as review of sources which were not previously covered; that is, modified sources with uncontrolled emissions of less than 100 or 250 tons per year but which have controlled emissions greater than *de minimis*. Since these sources are not now subject to PSD review, they would be required to prepare a PSD permit, conduct the necessary air quality impact assessments, incur some delays in construction as a result of undergoing PSD review in addition to state NSR review, and install BACT instead of just meeting the emissions limits required by the State Implementation Plan or New Source Performance Standards as applicable. As a result of the additional cost incurred because of more extensive review and by the sources not currently subject to PSD, the overall effect of the promulgated regulations (including the savings described above) is an increase of approximately \$12.4 to 24.5 million per year.

The complete analysis is contained in the document entitled *Regulatory Impact Assessment for the September 5, 1979 Proposed Prevention of Significant Deterioration Regulations*, EPA-450/2-80-073. This document is available for inspection in the rulemaking docket. Copies may be obtained by writing to the Air Information Center, U.S. EPA Library Services, (MD-35), Research Triangle Park, NC 27711.

H. Consolidated Permit Regulations

As mentioned in the section on TRANSITION, EPA recently promulgated regulations, known as the Consolidated Permit Regulations, which now generally govern the processing of applications for permits under Part 52 PSD regulations. Among the regulatory amendments announced here are three minor changes to the Consolidated Permit Regulation. First, EPA has deleted the substantive language of 40 CFR 124.3(b) and put "Reserved" in its

place. Section 124.3(b) related primarily to the 50-ton exemptions of the 1978 Part 52 regulations. With the deletion of those exemptions, § 124.3(b) would have become superfluous. Second, EPA has conformed 40 CFR 124.5(g)(2) to the numbering in the new Part 52 regulations. Finally, the agency has corrected 40 CFR 124.42(b) by substituting "submitted" for "requested."

Final Action

The following regulatory amendments are nationally applicable, and this action is based upon determinations of nationwide scope and effect. Therefore, under section 307(b)(1) of the Act, judicial review may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for judicial review must be filed on or before October 6, 1980.

(Sections 101(b)(1), 110, 160-169, 171-178, and 301(a) of the Clean Air Act as amended [42 U.S.C. 7401(b)(1), 7410, 7470-7479, 7501-7508, and 7601(a)]; Section 129(a) of the Clean Air Act Amendments of 1977 (Pub. L. No. 95-95, 91 Stat. 685 (August, 7, 1977)))

Dated: July 31, 1980.

Douglas M. Costle,
Administrator.

State Plans For New Source Review For PSD Purposes

1. Section 51.24 of Title 40 of the Code of Federal Regulations is amended by deleting paragraph (k) and redesignating paragraphs (l) through (s) as (k) through (r) and then by revising paragraphs (a)(2), (b), (f), (i)-(k), (m) and (r) and adding new paragraphs (a)(6) and (s) to read as follows:

§ 51.24 Prevention of significant deterioration of air quality.

(a)(1) Plan Requirements

(2) *Plan Revisions.* If a State Implementation Plan revision would result in increased air quality deterioration over any baseline concentration, the plan revision shall include a demonstration that it will not cause or contribute to a violation of the applicable increment(s). If a plan revision proposing less restrictive requirements was submitted after August 7, 1977 but on or before any applicable baseline date and was pending action by the Administrator on that date, no such demonstration is necessary with respect to the area for which a baseline date would be established before final action is taken on the plan revision. Instead, the assessment described in paragraph

(a)(4) shall review the expected impact to the applicable increment(s).

* * * * *

(b) *Amendments.* (i) Any state required to revise its implementation plan by reason of an amendment to this section, including any amendment adopted simultaneously with this paragraph, shall adopt and submit such plan revision to the Administrator for approval before May 7, 1981.

(ii) Any revision to an implementation plan that would amend the provisions for the prevention of significant air quality deterioration in the plan shall specify when and as to what sources and modifications the revision is to take effect.

(iii) Any revision to an implementation plan that an amendment to this section required shall take effect no later than the date of its approval and may operate prospectively.

(b) *Definitions.* All state plans shall use the following definitions for the purposes of this section. Deviations from the following wording will be approved only if the state specifically demonstrates that the submitted definition is more stringent, or at least as stringent, in all respects as the corresponding definitions below:

(1)(i) "Major stationary source" means:

(a) Any of the following stationary sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation under the Act: Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input, coal cleaning plants (with thermal dryers), kraft pulp mills, portland cement plants, primary zinc smelters, iron and steel mill plants, primary aluminum ore reduction plants, primary copper smelters, municipal incinerators capable of charging more than 250 tons of refuse per day, hydrofluoric, sulfuric, and nitric acid plants, petroleum refineries; lime plants, phosphate rock processing plants, coke oven batteries, sulfur recovery plants, carbon black plants (furnace process); primary lead smelters, fuel conversion plants, sintering plants; secondary metal production plants, chemical process plants, fossil fuel boilers (or combinations thereof) totaling more than 250 million British thermal units per hour heat input, petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels, taconite ore processing plants, glass fiber processing plants, and charcoal production plants;

(b) Notwithstanding the stationary source size specified in paragraph

(b)(1)(i)(a) of this section, any stationary source which emits, or has the potential to emit, 250 tons per year or more of any air pollutant subject to regulation under the Act; or

(c) Any physical change that would occur at a stationary source not otherwise qualifying under paragraph (b)(1) as a major stationary source if the change would constitute a major stationary source by itself.

(ii) A major source that is major for volatile organic compounds shall be considered major for ozone.

(2)(i) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Act.

(ii) Any net emissions increase that is significant for volatile organic compounds shall be considered significant for ozone.

(iii) A physical change or change in the method of operation shall not include:

(a) Routine maintenance, repair, and replacement;

(b) Use of an alternative fuel or raw material by reason of any order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(c) Use of an alternative fuel by reason of an order or rule under section 125 of the Act;

(d) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(e) Use of an alternative fuel or raw material by a stationary source which:

(1) The source was capable of accommodating before January 6, 1975, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24; or

(2) The source is approved to use under any permit issued under 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.24;

(f) An increase in the hours of operation or in the production rate, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24.

(g) Any change in ownership at a stationary source;

(3)(i) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(a) Any increase in actual emissions from a particular physical change or change in the method of operation at a stationary source; and

(b) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(ii) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs within a reasonable period (to be specified by the state) before the date that the increase from the particular change occurs.

(iii) An increase or decrease in actual emissions is creditable only if the reviewing authority has not relied on it in issuing a permit for the source under regulations approved pursuant to this section, which permit is in effect when the increase in actual emissions from the particular change occurs.

(iv) An increase or decrease in actual emissions of sulfur dioxide or particulate matter which occurs before the applicable baseline date is creditable only if it is required to be considered in calculating the amount of maximum allowable increases remaining available.

(v) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(vi) A decrease in actual emissions is creditable only to the extent that:

(a) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(b) It is federally enforceable at and after the time that actual construction on the particular change begins; and

(c) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.

(vii) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.

(4) "Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of

operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(5) "Stationary source" means any building, structure, facility, or installation which emits or may emit any air pollutant subject to regulation under the Act.

(6) "Building, structure, facility, or installation" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two-digit code) as described in the *Standard Industrial Classification Manual, 1972*, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0066 and 003-005-00176-0, respectively).

(7) "Emissions unit" means any part of a stationary source which emits or would have the potential to emit any pollutant subject to regulation under the Act.

(8) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emissions unit) which would result in a change in actual emissions.

(9) "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary preconstruction approvals or permits and either has:

(i) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

(ii) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

(10) "Necessary preconstruction approvals or permits" means those permits or approvals required under federal air quality control laws and regulations and those air quality control laws and regulations which are part of the applicable State Implementation Plan.

(11) "Begin actual construction" means, in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operation this term refers to those on-site activities, other than preparatory activities, which mark the initiation of the change.

(12) "Best available control technology" means an emissions limitation (including a visible emissions standard) based on the maximum degree of reduction for each pollutant subject to regulation under the Act which would be emitted from any proposed major stationary source or major modification which the reviewing authority, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combination techniques for control of such pollutant. In no event shall application of best available control technology result in emissions of any pollutant which would exceed the emissions allowed by any applicable standard under 40 CFR Parts 60 and 61.

If the reviewing authority determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emissions standard infeasible, a design, equipment, work practice, operational standard or combination thereof, may be prescribed instead to satisfy the requirement for the application of best available control technology. Such standard shall, to the degree possible, set forth the emissions reduction achievable by implementation of such design, equipment, work practice or operation, and shall provide for compliance by means which achieve equivalent results.

(13)(i) "Baseline concentration" means that ambient concentration level which exists in the baseline area at the time of the applicable baseline date. A baseline concentration is determined for each pollutant for which a baseline date is established and shall include:

(a) The actual emissions representative of sources in existence on the applicable baseline date, except as provided in paragraph (b)(13)(ii);
 (b) The allowable emissions of major stationary sources which commenced

construction before January 6, 1975, but were not in operation by the applicable baseline date.

(ii) The following will not be included in the baseline concentration and will affect the applicable maximum allowable increase(s):

(a) Actual emission from any major stationary source on which construction commenced after January 6, 1975; and

(b) Actual emissions increases and decreases at any stationary source occurring after the baseline date.

(14)(i) "Baseline date" means the earliest date after August 7, 1977, that:

(a) A major stationary source or major modification subject to 40 CFR 52.21 submits a complete application under that section; or

(b) A major stationary source or major modification subject to regulations approved pursuant to 40 CFR 51.24 submits a complete application under such regulations.

(ii) The baseline date is established for each pollutant for which increments or other equivalent measures have been established if:

(a) The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under section 107(d)(1)(D) or (E) of the Act for the pollutant on the date of its complete application under 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.24; and

(b) In the case of a major stationary source, the pollutant would be emitted in significant amounts, or, in the case of a major modification, there would be a significant net emissions increase of the pollutant.

(15)(i) "Baseline area" means any intrastate area (and every part thereof) designated as attainment or unclassifiable under section 107(d)(1)(D) or (E) of the Act in which the major source or major modification establishing the baseline date would construct or would have an air quality impact equal to or greater than $1 \mu\text{g}/\text{m}^3$ (annual average) of the pollutant for which the baseline date is established.

(ii) Area redesignations under section 107(d)(1)(D) or (E) of the Act cannot intersect or be smaller than the area of impact of any major stationary source or major modification which:

(a) Establishes a baseline date; or

(b) Is subject to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.24, and would be constructed in the same state as the state proposing the redesignation.

(16) "Allowable emissions" means the emissions rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable limits

which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(i) The applicable standards as set forth in 40 CFR Parts 60 and 61;

(ii) The applicable State Implementation Plan emissions limitation, including those with a future compliance date; or

(iii) The emissions rate specified as a federally enforceable permit condition.

(17) "Federally enforceable" means all limitations and conditions which are enforceable by the Administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within any applicable State Implementation Plan, and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24.

(18) "Secondary emissions" means emissions which occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purposes of this section, secondary emissions must be specific, well defined, quantifiable, and impact the same general areas the stationary source modification which causes the secondary emissions. Secondary emissions may include, but are not limited to:

(i) Emissions from ships or trains coming to or from the new or modified stationary source; and

(ii) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

(19) "Innovative control technology" means any system of air pollution control that has not been adequately demonstrated in practice, but would have a substantial likelihood of achieving greater continuous emissions reduction than any control system in current practice or of achieving at least comparable reductions at lower cost in terms of energy, economics, or nonair quality environmental impacts.

(20) "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(21)(i) "Actual emissions" means the actual rate of emissions of a pollutant from an emissions unit, as determined in accordance with subparagraphs (ii)-(iv) below.

(ii) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a

two-year period which precedes the particular date and which is representative of normal source operation. The reviewing authority may allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(iii) The reviewing authority may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

(iv) For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(22) "Complete" means, in reference to an application for a permit, that the application contains all the information necessary for processing the application. Designating an application complete for purposes of permit processing does not preclude the reviewing authority from requesting or accepting any additional information.

(23)(i) "Significant" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

Pollutant and Emissions Rate

Carbon monoxide: 100 tons per year (tpy)
Nitrogen oxides: 40 tpy
Sulfur dioxide: 40 tpy
Particulate matter: 25 tpy
Ozone: 40 tpy of volatile organic compounds
Lead: 0.6 tpy
Asbestos: 0.007 tpy
Beryllium: 0.0004 tpy
Mercury: 0.1 tpy
Vinyl chloride: 1 tpy
Fluorides: 3 tpy
Sulfuric acid mist: 7 tpy
Hydrogen sulfide (H_2S): 10 tpy
Total reduced sulfur (including H_2S): 10 tpy
Reduced sulfur compounds (including H_2S): 10 tpy

(ii) "Significant" means, in reference to a net emissions increase or the potential of a source to emit a pollutant subject to regulation under the Act that paragraph (b)(23)(i) does not list, any emissions rate.

(iii) Notwithstanding paragraph (b)(23)(i), "significant" means any emissions rate or any net emissions increase associated with a major stationary source or major modification, which would construct within 10 kilometers of a Class I area, and have an impact on such area equal to or greater than $1 \mu g/m^3$ (24-hour average).

(24) "Federal Land Manager" means, with respect to any lands in the United States, the Secretary of the department with authority over such lands.

(25) "High terrain" means any area having an elevation 900 feet or more above the base of the stack of a source.

(26) "Low terrain" means any area other than high terrain.

(27) "Indian Reservation" means any federally recognized reservation established by Treaty, Agreement, Executive Order, or Act of Congress.

(28) "Indian Governing Body" means the governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of self-government.

* * * * *

(f) *Exclusions from increment consumption.* (1) The plan may provide that the following concentrations shall be excluded in determining compliance with a maximum allowable increase:

(i) Concentrations attributable to the increase in emissions from stationary sources which have converted from the use of petroleum products, natural gas, or both by reason of an order in effect under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) over the emissions from such sources before the effective date of such an order;

(ii) Concentrations attributable to the increase in emissions from sources which have converted from using natural gas by reason of natural gas curtailment plan in effect pursuant to the Federal Power Act over the emissions from such sources before the effective date of such plan;

(iii) Concentrations of particulate matter attributable to the increase in emissions from construction or other temporary emission-related activities of new or modified sources;

(iv) The increase in concentrations attributable to new sources outside the United States over the concentrations attributable to existing sources which are included in the baseline concentration; and

(v) Concentrations attributable to the temporary increase in emissions of sulfur dioxide or particulate matter from stationary sources which are affected by plan revisions approved by the Administrator as meeting the criteria specified in paragraph (f)(4).

(2) If the plan provides that the concentrations to which paragraph (f)(1) (i) or (ii) refers shall be excluded, it shall also provide that no exclusion of such concentrations shall apply more than five years after the effective date of the

order to which paragraph (f)(1)(i) refers or the plan to which paragraph (f)(1)(ii) refers, whichever is applicable. If both such order and plan are applicable, no such exclusion shall apply more than five years after the later of such effective dates.

(3) No exclusion under paragraph (f) of this section shall occur later than 9 months after August 7, 1980, unless a State Implementation Plan revision meeting the requirements of 40 CFR 51.24 has been submitted to the Administrator.

(4) For purposes of excluding concentrations pursuant to paragraph (f)(1)(v), the Administrator may approve a plan revision that:

(i) Specifies the time over which the temporary emissions increase of sulfur dioxide or particulate matter would occur. Such time is not to exceed two years in duration unless a longer time is approved by the Administrator;

(ii) Specifies that the time period for excluding certain contributions in accordance with paragraph (f)(4)(i) is not renewable;

(iii) Allows no emissions increase from a stationary source which would:

(a) Impact a Class I area or an area where an applicable increment is known to be violated; or

(b) Cause or contribute to the violation of a national ambient air quality standard;

(iv) Requires limitations to be in effect the end of the time period specified in accordance with paragraph (f)(4)(i), which would ensure that the emissions levels from stationary sources affected by the plan revision would not exceed those levels occurring from such sources before the plan revision was approved.

* * * * *

(i) Review of Major Stationary Sources and Major Modifications—Source Applicability and Exemptions.

(1) The plan shall provide that no major stationary source or major modification shall begin actual construction unless, as a minimum, requirements equivalent to those contained in paragraphs (j) through (r) of this section have been met.

(2) The plan shall provide that the requirements equivalent to those contained in paragraphs (j) through (r) of this section shall apply to any major stationary source and any major modification with respect to each pollutant subject to regulation under the Act that it would emit, except as this section would otherwise allow.

(3) The plan shall provide that requirements equivalent to those contained in paragraphs (j) through (r) of this section apply only to any major

stationary source or major modification that would be constructed in an area which is designated as attainment or unclassifiable under section 107(a)(1) (D) or (E) of the Act; and

(4) The plan may provide that requirements equivalent to those contained in paragraphs (j) through (r) of this section do not apply to a particular major stationary source or major modification if:

(i) The major stationary source would be a nonprofit health or nonprofit educational institution or a major modification that would occur at such an institution; or

(ii) The source or modification would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the stationary source or modification and such source does not belong to any following categories:

(a) Coal cleaning plants (with thermal dryers);

(b) Kraft pulp mills;

(c) Portland cement plants;

(d) Primary zinc smelters;

(e) Iron and steel mills;

(f) Primary aluminum ore reduction plants;

(g) Primary copper smelters;

(h) Municipal incinerators capable of charging more than 250 tons of refuse per day;

(i) Hydrofluoric, sulfuric, or nitric acid plants;

(j) Petroleum refineries;

(k) Lime plants;

(l) Phosphate rock processing plants;

(m) Coke oven batteries;

(n) Sulfur recovery plants;

(o) Carbon black plants (furnace process);

(p) Primary lead smelters;

(q) Fuel conversion plants;

(r) Sintering plants;

(s) Secondary metal production plants;

(t) Chemical process plants;

(u) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;

(v) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;

(w) Taconite ore processing plants;

(x) Glass fiber processing plants;

(y) Charcoal production plants;

(z) Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input;

(aa) Any other stationary source category which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act; or

(iii) The source or modification is a portable stationary source which has

previously received a permit under requirements equivalent to those contained in paragraphs (j) through (r) of this section, if:

(a) The source proposes to relocate and emissions of the source at the new location would be temporary; and

(b) The emissions from the source would not exceed its allowable emissions; and

(c) The emissions from the source would impact no Class I area and no area where an applicable increment is known to be violated; and

(d) Reasonable notice is given to the reviewing authority prior to the relocation identifying the proposed new location and the probable duration of operation at the new location. Such notice shall be given to the reviewing authority not less than 10 days in advance of the proposed relocation unless a different time duration is previously approved by the reviewing authority.

(5) The plan may provide that requirements equivalent to those contained in paragraphs (j) through (r) of this section do not apply to a major stationary source or major modification with respect to a particular pollutant if the owner or operator demonstrates that, as to that pollutant, the source or modification is located in an area designated as nonattainment under section 107 of the Act.

(6) The plan may provide that requirements equivalent to those contained in paragraphs (k), (m), and (o) of this section do not apply to a proposed major stationary source or major modification with respect to a particular pollutant, if the allowable emissions of that pollutant from a new source, or the net emissions increase of that pollutant from a modification, would be temporary and impact no Class I area and no area where an applicable increment is known to be violated.

(7) The plan may provide that requirements equivalent to those contained in paragraphs (k), (m), and (o) of this section as they relate to any maximum allowable increase for a Class II area do not apply to a modification of a major stationary source that was in existence on March 1, 1978, if the net increase in allowable emissions of each pollutant subject to regulation under the Act from the modification after the application of best available control technology would be less than 50 tons per year.

(8) The plan may provide that the reviewing authority may exempt a proposed major stationary source or major modification from the requirements of paragraph (m) with

respect to monitoring for a particular pollutant, if:

(i) The emissions increase of the pollutant from a new stationary source or the net emissions increase of the pollutant from a modification would cause, in any area, air quality impacts less than the following amounts:

(a) Carbon monoxide—575 ug/m³, 8-hour average;

(b) Nitrogen dioxide—14 ug/m³, annual average;

(c) Total suspended particulates—10 ug/m³, 24-hour average;

(d) Sulfur dioxide—13 ug/m³, 24-hour average;

(e) Ozone¹

(f) Lead—0.1 ug/m³, 24-hour average;

(g) Mercury—0.25 ug/m³, 24-hour average;

(h) Beryllium—0.0005 ug/m³, 24-hour average;

(i) Fluorides—0.25 ug/m³, 24-hour average;

(j) Vinyl chloride—15 ug/m³, 24-hour average;

(k) Total reduced sulfur—10 ug/m³, 1-hour average;

(l) Hydrogen sulfide—0.04 ug/m³, 1-hour average;

(m) Reduced sulfur compounds—10 ug/m³, 1-hour average; or

(ii) The concentrations of the pollutant in the area that the source or modification would affect are less than the concentrations listed in (i)(8)(i); or

(iii) The pollutants is not listed in paragraph (i)(8)(i).

(9) If EPA approves a plan revision under 40 CFR 51.24 as in effect before August 7, 1980, any subsequent revision which meets the requirements of this section may contain transition provisions which parallel the transition provisions of 40 CFR 52.21(i)(9), (i)(10) and (m)(1)(v) as in effect on that date, which provisions relate to requirements for best available control technology and air quality analyses. Any such subsequent revision may not contain any transition provision which in the context of the revision would operate any less stringently than would its counterpart in 40 CFR 52.21.

(j) *Control Technology Review.* The plan shall provide that:

(1) A major stationary source or major modification shall meet each applicable emissions limitation under the State Implementation Plan and each applicable emission standards and standard of performance under 40 CFR Parts 60 and 61.

¹No *de minimis* air quality level is provided for ozone. However, any net increase of 100 tons per year or more of volatile organic compounds subject to PSD would be required to perform and ambient impact analysis, including the gathering of ambient air quality data.

(2) A new major stationary source shall apply best available control technology for each pollutant subject to regulation under the Act that it would have the potential to emit in significant amounts.

(3) A major modification shall apply best available control technology for each pollutant subject to regulation under the Act for which it would be a significant net emissions increase at the source. This requirement applies to each proposed emissions unit at which a net emissions increase in the pollutant would occur as a result of a physical change or change in the method of operation in the unit.

(4) For phased construction projects, the determination of best available control technology shall be reviewed and modified as appropriate at the least reasonable time which occurs no later than 18 months prior to commencement of construction of each independent phase of the project. At such time, the owner or operator of the applicable stationary source may be required to demonstrate the adequacy of any previous determination of best available control technology for the source.

(k) *Source Impact Analysis.* The plan shall provide that the owner or operator of the proposed source or modification shall demonstrate that allowable emission increases from the proposed source or modification, in conjunction with all other applicable emissions increases or reduction (including secondary emissions) would not cause or contribute to air pollution in violation of:

(1) Any national ambient air quality standard in any air quality control region; or

(2) Any applicable maximum allowable increase over the baseline concentration in any area.

(1) *Air Quality Models.*

(m) *Air Quality Analysis.* (1) Preapplication analysis.

(i) The plan shall provide that any application for a permit under regulations approved pursuant to this section shall contain an analysis of ambient air quality in the area that the major stationary source or major modification would affect for each of the following pollutants:

(a) For the source, each pollutant that it would have the potential to emit in a significant amount;

(b) For the modification, each pollutant for which it would result in a significant net emissions increase.

(ii) The plan shall provide that, with respect to any such pollutant for which no National Ambient Air Quality

Standard exists, the analysis shall contain such air quality monitoring data as the reviewing authority determines is necessary to assess ambient air quality for that pollutant in any area that the emissions of that pollutant would affect.

(iii) The plan shall provide that with respect to any such pollutant (other than nonmethane hydrocarbons) for which such a standard does exist, the analysis shall contain continuous air quality monitoring data gathered for purposes of determining whether emissions of that pollutant would cause or contribute to a violation of the standard or any maximum allowable increase.

(iv) The plan shall provide that, in general, the continuous air monitoring data that is required shall have been gathered over a period of one year and shall represent the year preceding receipt of the application, except that, if the reviewing authority determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one year (but not to be less than four months), the data that is required shall have been gathered over at least that shorter period.

(v) The plan may provide that the owner or operator of a proposed major stationary source or major modification of volatile organic compounds who satisfies all conditions of 40 CFR Part 51 Appendix S, section IV may provide postapproval monitoring data for ozone in lieu of providing preconstruction data as required under paragraph (m)(1).

(2) *Post-construction monitoring.* The plan shall provide that the owner or operator of a major stationary source or major modification shall, after construction of the stationary source or modification, conduct such ambient monitoring as the reviewing authority determines is necessary to determine the effect emissions from the stationary source or modification may have, or are having, on air quality in any area.

(3) *Operation of monitoring stations.* The plan shall provide that the owner or operator of a major stationary source or major modification shall meet the requirements of Appendix B to Part 58 of this chapter during the operation of monitoring stations for purposes of satisfying paragraph (m) of this section.

(n) *Source Information.*

(o) *Additional Impact Analyses.*

(p) *Sources Impacting Federal Class I Areas—Additional Requirements.*

(q) *Public Participation.*

(r) *Source Obligation.* (1) The plan shall include enforceable procedures to provide that approval to construct shall not relieve any owner or operator of the responsibility to comply fully with applicable provisions of the plan and any other requirements under local, state or federal law.

(2) The plan shall provide that at such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of paragraphs (j) through (s) of this section shall apply to the source or modification as though construction had not yet commenced on the source or modification.

(s) *Innovative Control Technology.* (1) The plan may provide that an owner or operator of a proposed major stationary source or major modification may request the reviewing authority to approve a system of innovative control technology.

(2) The plan may provide that the reviewing authority may, with the consent of the governor(s) of other affected state(s), determine that the source or modification may employ a system of innovative control technology, if:

(i) The proposed control system would not cause or contribute to an unreasonable risk to public health, welfare, or safety in its operation or function;

(ii) The owner or operator agrees to achieve a level of continuous emissions reduction equivalent to that which would have been required under paragraph (j)(2) by a date specified by the reviewing authority. Such date shall not be later than 4 years from the time of startup or 7 years from permit issuance;

(iii) The source or modification would meet the requirements equivalent to those in paragraphs (j) and (k) based on the emissions rate that the stationary source employing the system of innovative control technology would be required to meet on the date specified by the reviewing authority;

(iv) The source or modification would not before the date specified by the reviewing authority:

(a) Cause or contribute to any violation of an applicable national ambient air quality standard; or

(b) Impact any Class I area; or

(c) Impact any area where an applicable increment is known to be violated;

(v) All other applicable requirements including those for public participation have been met.

(3) The plan shall provide that the reviewing authority shall withdraw any approval to employ a system of innovative control technology made under this section, if:

(i) The proposed system fails by the specified date to achieve the required continuous emissions reduction rate; or

(ii) The proposed system fails before the specified date so as to contribute to an unreasonable risk to public health, welfare, or safety; or

(iii) The reviewing authority decides at any time that the proposed system is unlikely to achieve the required level of control or to protect the public health, welfare, or safety.

(4) The plan may provide that if a source or modification fails to meet the required level of continuous emissions reduction within the specified time period, or if the approval is withdrawn in accordance with paragraph (s)(3), the reviewing authority may allow the source or modification up to an additional 3 years to meet the requirement for the application of best available control technology through use of a demonstrated system of control.

New Source Review For PSD Purposes

2. (a) Section 52.21 of Title 40 of the Code of Federal Regulations is amended by deleting paragraph (k) and redesignating paragraphs (l) through (v) as (k) through (u) and then by revising paragraphs (b), (f), (i), (j), (k) and (g) and adding new paragraphs (r)(4), (v) and (w) as follows:

§ 52.21. Prevention of significant deterioration of air quality.

(b) *Definitions.* For the purposes of this section:

(1)(i) "Major stationary source" means:

(a) Any of the following stationary sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation under the Act: Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input, coal cleaning plants (with thermal dryers), kraft pulp mills, portland cement plants, primary zinc smelters, iron and steel mill plants, primary aluminum ore reduction plants, primary copper smelters, municipal incinerators capable of charging more than 250 tons of refuse per day, hydrofluoric, sulfuric, and nitric acid plants, petroleum refineries, lime plants, phosphate rock processing plants, coke oven batteries, sulfur recovery plants,

carbon black plants (furnace process), primary lead smelters, fuel conversion plants, sintering plants, secondary metal production plants, chemical process plants, fossil fuel boilers (or combinations thereof) totaling more than 250 million British thermal units per hour heat input, petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels, taconite ore processing plants, glass fiber processing plants, and charcoal production plants;

(b) Notwithstanding the stationary source size specified in paragraph (b)(1)(i) of this section, any stationary source which emits, or has the potential to emit, 250 tons per year or more of any air pollutant subject to regulation under the Act; or

(c) Any physical change that would occur at a stationary source not otherwise qualifying under paragraph (b)(1) as a major stationary source, if the changes would constitute a major stationary source by itself.

(d) A major stationary source that is major for volatile organic compounds shall be considered major for ozone.

(2)(i) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Act.

(ii) Any net emissions increase that is significant for volatile organic compounds shall be considered significant for ozone.

(iii) A physical change or change in the method of operation shall not include:

(a) Routine maintenance, repair and replacement;

(b) Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plant pursuant to the Federal Power Act;

(c) Use of an alternative fuel by reason of an order or rule under section 125 of the Act;

(d) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(e) Use of an alternative fuel or raw material by a stationary source which:

(1) The source was capable of accommodating before January 6, 1975, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975 pursuant to 40 CFR 52.21

or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24; or

(2) The source is approved to use under any permit issued under 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.24;

(f) An increase in the hours of operation or in the production rate, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24.

(g) Any change in ownership at a stationary source.

(3)(i) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(a) Any increase in actual emissions from a particular physical change or change in method of operation at a stationary source; and

(b) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(ii) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:

(a) The date five years before construction on the particular change commences; and

(b) The date that the increase from the particular change occurs.

(iii) An increase or decrease in actual emissions is creditable only if the Administrator has not relied on it in issuing a permit for the source under this section, which permit is in effect when the increase in actual emissions from the particular change occurs.

(iv) An increase or decrease in actual emissions of sulfur dioxide or particulate matter which occurs before the applicable baseline date is creditable only if it is required to be considered in calculating the amount of maximum allowable increases remaining available.

(v) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(vi) A decrease in actual emissions is creditable only to the extent that:

(a) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(b) It is federally enforceable at and after the time that actual construction on the particular change begins; and

(c) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.

(viii) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.

(4) "Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(5) "Stationary source" means any building, structure, facility, or installation which emits or may emit any air pollutant subject to regulation under the Act.

(6) "Building, structure, facility, or installation" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same first two digit code) as described in the *Standard Industrial Classification Manual, 1972*, as amended by the 1977 Supplement (U. S. Government Printing Office stock numbers 4101-0066 and 003-005-00176-0, respectively).

(7) "Emissions unit" means any part of a stationary source which emits or would have the potential to emit any pollutant subject to regulation under the Act.

(8) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emissions unit) which would result in a change in actual emissions.

(9) "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary preconstruction approvals or permits and either has:

(i) Begun, or caused to begin, a continuous program of actual on-site

construction of the source, to be completed within a reasonable time; or

(ii) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

(10) "Necessary preconstruction approvals or permits" means those permits or approvals required under federal air quality control laws and regulations and those air quality control laws and regulations which are part of the applicable State Implementation Plan.

(11) "Begin actual construction" means, in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying underground pipework and construction of permanent storage structures. With respect to a change in method of operations, this term refers to those on-site activities other than preparatory activities which mark the initiation of the change.

(12) "Best available control technology" means an emissions limitation (including a visible emission standard) based on the maximum degree of reduction for each pollutant subject to regulation under Act which would be emitted from any proposed major stationary source or major modification which the Administrator, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for control of such pollutant. In no event shall application of best available control technology result in emissions of any pollutant which would exceed the emissions allowed by any applicable standard under 40 CFR Parts 60 and 61. If the Administrator determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emissions standard infeasible, a design, equipment, work practice, operational standard, or combination thereof, may be prescribed instead to satisfy the requirement for the application of best available control technology. Such standard shall, to the degree possible, set forth the emissions reduction achievable by implementation of such

design, equipment, work practice or operation, and shall provide for compliance by means which achieve equivalent results.

(13)(i) "Baseline concentration" means that ambient concentration level which exists in the baseline area at the time of the applicable baseline date. A baseline concentration is determined for each pollutant for which a baseline date is established and shall include:

(a) The actual emissions representative of sources in existence on the applicable baseline date, except as provided in paragraph (b)(13)(ii);

(b) The allowable emissions of major stationary sources which commenced construction before January 6, 1975, but were not in operation by the applicable baseline date.

(ii) The following will not be included in the baseline concentration and will affect the applicable maximum allowable increase(s):

(a) Actual emissions from any major stationary source on which construction commenced after January 6, 1975; and

(b) Actual emissions increases and decreases at any stationary source occurring after the baseline date.

(14)(i) "Baseline date" means the earliest date after August 7, 1977, on which the first complete application under 40 CFR 52.21 is submitted by a major stationary source or major modification subject to the requirements of 40 CFR 52.21.

(ii) The baseline date is established for each pollutant for which increments or other equivalent measures have been established if:

(a) The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under section 107(d)(i) (D) or (E) of the Act for the pollutant on the date of its complete application under 40 CFR 52.21; and

(b) In the case of a major stationary source, the pollutant would be emitted in significant amounts, or, in the case of a major modification, there would be a significant net emissions increase of the pollutant.

(15)(i) "Baseline area" means any intrastate area (and every part thereof) designated as attainment or unclassifiable under section 107(d)(1) (D) or (E) of the Act in which the major source or major modification establishing the baseline date would construct or would have an air quality impact equal to or greater than 1 $\mu\text{g}/\text{m}^3$ (annual average) of the pollutant for which the baseline date is established.

(ii) Area redesignations under section 107(d)(1) (D) or (E) of the Act cannot intersect or be smaller than the area of

impact of any major stationary source or major modification which:

(a) Establishes a baseline date; or

(b) Is subject to 40 CFR 52.21 and would be constructed in the same state as the state proposing the redesignation.

(16) "Allowable emissions" means the emissions rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(i) The applicable standards as set forth in 40 CFR Parts 60 and 61;

(ii) The applicable State Implementation Plan emissions limitation, including those with a future compliance date; or

(iii) The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date.

(17) "Federally enforceable" means all limitations and conditions which are enforceable by the Administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within any applicable State Implementation Plan, and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 and 40 CFR 51.24.

(18) "Secondary emissions" means emissions which would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this section, secondary emissions must be specific, well defined, quantifiable, and impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions may include, but are not limited to:

(i) Emissions from ships or trains coming to or from the new or modified stationary source; and

(ii) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

(19) "Innovative control technology" means any system of air pollution control that has not been adequately demonstrated in practice, but would have a substantial likelihood of achieving greater continuous emissions reduction than any control system in current practice or of achieving at least comparable reductions at lower cost in terms of energy, economics, or nonair quality environmental impacts.

(20) "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(21)(i) "Actual emissions" means the actual rate of emissions of a pollutant from an emissions unit, as determined in accordance with subparagraphs (ii)-(iv) below.

(ii) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The Administrator shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(iii) The Administrator may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

(iv) For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(22) "Complete" means, in reference to an application for a permit, that the application contains all of the information necessary for processing the application.

(23)(i) "Significant" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

Pollutant and Emissions Rate

Carbon monoxide: 100 tons per year (tpy)

Nitrogen oxides: 40 tpy

Sulfur dioxide: 40 tpy

Particulate matter: 25 tpy

Ozone: 40 tpy of volatile organic compounds

Lead: 0.8 tpy

Asbestos: 0.007 tpy

Beryllium: 0.0004 tpy

Mercury: 0.1 tpy

Vinyl chloride: 1 tpy

Fluorides: 3 tpy

Sulfuric acid mist: 7 tpy

Hydrogen sulfide (H_2S): 10 tpy

Total reduced sulfur (including H_2S): 10 tpy

Reduced sulfur compounds (including H_2S): 10 tpy

(ii) "Significant" means, in reference to a net emissions increase or the potential of a source to emit a pollutant subject to regulation under the Act that paragraph (b)(23)(i) does not list, any emissions rate.

(iii) Notwithstanding paragraph (b)(23)(i), "significant" means any emissions rate or any net emissions increase associated with a major stationary source or major modification, which would construct within 10 kilometers of a Class I area, and have an impact on such area equal to or greater than 1 $\mu\text{g}/\text{m}^3$, (24-hour average).

(24) "Federal Land Manager" means, with respect to any lands in the United States, the Secretary of the department with authority over such lands.

(25) "High terrain" means any area having an elevation 900 feet or more above the base of the stack of a source.

(26) "Low terrain" means any area other than high terrain.

(27) "Indian Reservation" means any federally recognized reservation established by Treaty, Agreement, Executive Order, or Act of Congress.

(28) "Indian Governing Body" means the governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of selfgovernment.

* * * * *

(f) Exclusions from increment consumption. (1) Upon written request of the governor, made after notice and opportunity for at least one public hearing to be held in accordance with procedures established in 40 CFR 51.4, the Administrator shall exclude the following concentrations in determining compliance with a maximum allowable increase:

(i) Concentrations attributable to the increase in emissions from stationary sources which have converted from the use of petroleum products, natural gas, or both by reason of an order in effect under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) over the emissions from such sources before the effective date of such an order;

(ii) Concentrations attributable to the increase in emissions from sources which have converted from using natural gas by reason of a natural gas curtailment plan in effect pursuant to the Federal Power Act over the emissions from such sources before the effective date of such plan;

(iii) Concentrations of particulate matter attributable to the increase in emissions from construction or other temporary emission-related activities of new or modified sources;

(iv) The increase in concentrations attributable to new sources outside the United States over the concentrations attributable to existing sources which

are included in the baseline concentration; and

(v) Concentrations attributable to the temporary increase in emissions of sulfur dioxide or particulate matter from stationary sources which are affected by plan revisions approved by the Administrator as meeting the criteria specified in paragraph (f)(4).

(2) No exclusion of such concentrations shall apply more than five years after the effective date of the order to which paragraph (f)(1)(i) refers or the plan to which paragraph (f)(1)(ii) refers, whichever is applicable. If both such order and plan are applicable, no such exclusion shall apply more than five years after the later of such effective dates.

(3) No exclusion under paragraph (f) of this section shall occur later than 9 months after August 7, 1980, unless a State Implementation Plan revision meeting the requirements of 40 CFR 51.24 has been submitted to the Administrator.

(4) For purposes of excluding concentrations pursuant to paragraph (f)(1)(v), the proposed plan revision shall:

(i) Specify the time over which the temporary emissions increase of sulfur dioxide or particulate matter would occur. Such time is not to exceed two years in duration unless a longer time is approved by the Administrator;

(ii) Specify that the time period for excluding certain contributions in accordance with paragraph (f)(4)(i) is not renewable;

(iii) Allow no emissions increase from a stationary source which would:

(a) Impact a Class I area or an area where an applicable increment is known to be violated; or

(b) Cause or contribute to the violation of a national ambient air quality standard;

(iv) Require limitations to be in effect at the end of the time period specified in accordance with paragraph (f)(4)(i) which would ensure that the emissions levels from stationary sources affected by the plan revision would not exceed those levels occurring from such sources before the plan revision was approved.

* * * * *

(i) Review of Major Stationary Sources and Major Modifications—Source Applicability and Exemptions.

(1) No stationary source or modification to which the requirements of paragraphs (j) through (r) of this section apply shall begin actual construction without a permit which states that the stationary source or modification would meet those requirements. The Administrator has authority to issue any such permit.

(2) The requirements of paragraphs (j) through (r) of this section shall apply to any major stationary source and any major modification with respect to each pollutant subject to regulation under the Act that it would emit, except as this section otherwise provides.

(3) The requirements of paragraphs (j) through (r) of this section apply only to any major stationary source or major modification that would be constructed in an area designated as attainment or unclassifiable under section 107(d)(1)(D) or (E) of the Act.

(4) The requirements of paragraphs (j) through (r) of this section shall not apply to a particular major stationary source or major modification, if:

(i) Construction commenced on the source or modification before August 7, 1977. The regulations at 40 CFR 52.21 as in effect before August 7, 1977, shall govern the review and permitting of any such source or modification; or

(ii) The source or modification was subject to the review requirements of 40 CFR 52.21(d)(i) as in effect before March 1, 1978, and the owner or operator:

(a) Obtained under 40 CFR 52.21 a final approval effective before March 1, 1978;

(b) Commenced construction before March 19, 1979; and

(c) Did not discontinue construction for a period of 18 months or more and completed construction within a reasonable time; or

(iii) The source or modification was subject to 40 CFR 52.21 as in effect before March 1, 1978, and the review of an application for approval for the stationary source or modification under 40 CFR 52.21 would have been completed by March 1, 1978, but for an extension of the public comment period pursuant to a request for such an extension. In such a case, the application shall continue to be processed, and granted or denied, under 40 CFR 52.21 as in effect prior to March 1, 1978; or

(iv) The source or modification was not subject to 40 CFR 52.21 as in effect before March 1, 1978, and the owner or operator:

(a) Obtained all final federal, state and local preconstruction approvals or permits necessary under the applicable State Implementation Plan before March 1, 1978;

(b) Commenced construction before March 19, 1979; and

(c) Did not discontinue construction for a period of 18 months or more and completed construction within a reasonable time; or

(v) The source or modification was not subject to 40 CFR 52.21 as in effect on June 19, 1978 or under the partial stay

of regulations published on February 5, 1980 (45 FR 7800), and the owner or operator:

(a) Obtained all final federal, state and local preconstruction approvals or permits necessary under the applicable State Implementation Plan before August 7, 1980;

(b) Commenced construction within 18 months from August 7, 1980, or any earlier time required under the applicable State Implementation Plan; and

(c) Did not discontinue construction for a period of 18 months or more and completed construction within a reasonable time; or

(vi) The source or modification would be a nonprofit health or nonprofit educational institution, or a major modification would occur at such an institution, and the governor of the state in which the source or modification would be located requests that it be exempt from those requirements; or

(vii) The source or modification would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the stationary source or modification and the source does not belong to any of the following categories:

(a) Coal cleaning plants (with thermal dryers);

(b) Kraft pulp mills;

(c) Portland cement plants;

(d) Primary zinc smelters;

(e) Iron and steel mills;

(f) Primary aluminum ore reduction plants;

(g) Primary copper smelters;

(h) Municipal incinerators capable of charging more than 250 tons of refuse per day;

(i) Hydrofluoric, sulfuric, or nitric acid plants;

(j) Petroleum refineries;

(k) Lime plants;

(l) Phosphate rock processing plants;

(m) Coke oven batteries;

(n) Sulfur recovery plants;

(o) Carbon black plants (furnace process);

(p) Primary lead smelters;

(q) Fuel conversion plants;

(r) Sintering plants;

(s) Secondary metal production plants;

(t) Chemical process plants;

(u) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;

(v) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;

(w) Taconite ore processing plants;

(x) Glass fiber processing plants;

(y) Charcoal production plants;

(z) Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input;

(aa) Any other stationary source category which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act; or

(viii) The source is a portable stationary source which has previously received a permit under this section, and

(a) The owner or operator proposes to relocate the source and emissions of the source at the new location would be temporary; and

(b) The emissions from the source would not exceed its allowable emissions; and

(c) The emissions from the source would impact no Class I area and no area where an applicable increment is known to be violated; and

(d) Reasonable notice is given to the Administrator prior to the relocation identifying the proposed new location and the probable duration of operation at the new location. Such notice shall be given to the Administrator not less than 10 days in advance of the proposed relocation unless a different time duration is previously approved by the Administrator.

(5) The requirements of paragraphs (j) through (r) of this section shall not apply to a major stationary source or major modification with respect to a particular pollutant if the owner or operator demonstrates that, as to that pollutant, the source or modification is located in an area designated as nonattainment under section 107 of the Act.

(6) The requirements of paragraphs (k), (m) and (o) of this section shall not apply to a major stationary source or major modification with respect to a particular pollutant, if the allowable emissions of that pollutant from the source, or the net emissions increase of that pollutant from the modification:

(i) Would impact no Class I area and no area where an applicable increment is known to be violated, and

(ii) Would be temporary.

(7) The requirements of paragraphs (k), (m) and (o) of this section as they relate to any maximum allowable increase for a Class II area shall not apply to a major modification at a stationary source that was in existence on March 1, 1978, if the net increase in allowable emissions of each pollutant subject to regulation under the Act from the modification after the application of best available control technology would be less than 50 tons per year.

(8) The Administrator may exempt a stationary source or modification from the requirements of paragraph (m) with

respect to monitoring for a particular pollutant if:

(i) The emissions increase of the pollutant from the new source or the net emissions increase of the pollutant from the modification would cause, in any area, air quality impacts less than the following amounts:

Carbon monoxide—575 $\mu\text{g}/\text{m}^3$, 8-hour average;

Nitrogen dioxide—14 $\mu\text{g}/\text{m}^3$, annual average;

Total suspended particulate—10 $\mu\text{g}/\text{m}^3$, 24-hour average;

Sulfur dioxide—13 $\mu\text{g}/\text{m}^3$, 24-hour average;

Ozone;²

Lead—0.1 $\mu\text{g}/\text{m}^3$, 24-hour average;

Mercury—0.25 $\mu\text{g}/\text{m}^3$, 24-hour average;

Beryllium—0.0005 $\mu\text{g}/\text{m}^3$, 24-hour average;

Fluorides—0.25 $\mu\text{g}/\text{m}^3$, 24-hour average;

Vinyl chloride—15 $\mu\text{g}/\text{m}^3$, 24-hour average;

Total reduced sulfur—10 $\mu\text{g}/\text{m}^3$, 1-hour average;

Hydrogen sulfide—0.04 $\mu\text{g}/\text{m}^3$, 1-hour average;

Reduced sulfur compounds—10 $\mu\text{g}/\text{m}^3$, 1-hour average; or

(ii) The concentrations of the pollutant in the area that the source or modification would affect are less than the concentrations listed in paragraph (i)(8)(i), or the pollutant is not listed in paragraph (i)(8)(i).

(9) The requirements for best available control technology in paragraph (j) of this section and the requirements for air quality analyses in paragraph (m)(1) shall not apply to a particular stationary source or modification that was subject to 40 CFR 52.21 as in effect on June 19, 1978, if the owner or operator of the source or modification submitted an application for a permit under those regulations before August 7, 1980, and the Administrator subsequently determines that the application as submitted before that date was complete. Instead, the requirements at 40 CFR 52.21(j) and (n) as in effect on June 19, 1978 apply to any such source or modification.

(10)(i) The requirements for air quality monitoring in paragraphs (m)(1)(ii)-(iv) of this section shall not apply to a particular source or modification that was subject to 40 CFR 52.21 as in effect on June 19, 1978, if the owner or operator of the source or modification submits an

²No *d_{minimus}* air quality level is provided for ozone. However, any net increase of 100 tons per year or more of volatile organic compounds subject to PSD would be required to perform an ambient impact analysis including the gathering of ambient air quality data.

application for a permit under this section on or before June 8, 1981, and the Administrator subsequently determines that the application as submitted before that date was complete with respect to the requirements of this section other than those in paragraphs (m)(1)(ii)-(iv) and with respect to the requirements for such analyses at 40 CFR 52.21(m)(2) as in effect on June 19, 1978. Instead, the latter requirements shall apply to any such source or modification.

(ii) The requirements for air quality monitoring in paragraphs (m)(1)(ii)-(iv) of this section shall not apply to a particular source or modification that was not subject to 40 CFR 52.21 as in effect on June 19, 1978, if the owner or operator of the source or modification submits an application for a permit under this section on or before June 8, 1981, and the Administrator subsequently determines that the application as submitted before that date was complete, except with respect to the requirements in paragraphs (m)(1)(ii)-(iv).

(j) *Control Technology Review.* (1) A major stationary source or major modification shall meet each applicable emissions limitation under the State Implementation Plan and each applicable emissions standard and standard of performance under 40 CFR Parts 60 and 61.

(2) A new major stationary source shall apply best available control technology for each pollutant subject to regulation under the Act that it would have the potential to emit in significant amounts.

(3) A major modification shall apply best available control technology for each pollutant subject to regulation under the Act for which it would result in a significant net emissions increase at the source. This requirement applies to each proposed emissions unit at which a net emissions increase in the pollutant would occur as a result of a physical change or change in the method of operation in the unit.

(4) For phased construction projects, the determination of best available control technology shall be reviewed and modified as appropriate at the latest reasonable time which occurs no later than 18 months prior to commencement of construction of each independent phase of the project. At such time, the owner or operator of the applicable stationary source may be required to demonstrate the adequacy of any previous determination of best available control technology for the source.

(k) *Source Impact Analysis.* The owner or operator of the proposed source or modification shall demonstrate that allowable emission

increases from the proposed source or modification, in conjunction with all other applicable emissions increases or reductions (including secondary emissions), would not cause or contribute to air pollution in violation of:

(1) Any national ambient air quality standard in any air quality control region; or

(2) Any applicable maximum allowable increase over the baseline concentration in any area.

(1) *Air Quality Models.*

* * * *

(m) *Air Quality Analysis.* (1) Preapplication analysis.

(i) Any application for a permit under this section shall contain an analysis of ambient air quality in the area that the major stationary source or major modification would affect for each of the following pollutants:

(a) For the source, each pollutant that it would have the potential to omit in a significant amount;

(b) For the modification, each pollutant for which it would result in a significant net emissions increase.

(ii) With respect to any such pollutant for which no National Ambient Air Quality Standard exists, the analysis shall contain such air quality monitoring data as the Administrator determines is necessary to assess ambient air quality for that pollutant in any area that the emissions of that pollutant would affect.

(iii) With respect to any such pollutant (other than nonmethane hydrocarbons) for which such a standard does exist, the analysis shall contain continuous air quality monitoring data gathered for purposes of determining whether emissions of that pollutant would cause or contribute to a violation of the standard or any maximum allowable increase.

(iv) In general, the continuous air quality monitoring data that is required shall have been gathered over a period of at least one year and shall represent at least the year preceding receipt of the application, except that, if the Administrator determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one year (but not to be less than four months), the data that is required shall have been gathered over at least that shorter period.

(v) For any application which becomes complete, except as to the requirements of paragraph (m)(1) (iii) and (iv), between June 8, 1981, and February 9, 1982, the data that paragraph (m)(1)(iii) requires shall have been gathered over at least the period from February 9, 1981, to the date the

application becomes otherwise complete, except that:

(a) If the source or modification would have been major for that pollutant under 40 CFR 52.21 as in effect on June 19, 1978, any monitoring data shall have been gathered over at least the period required by those regulations.

(b) If the Administrator determines that a complete and adequate analysis can be accomplished with monitoring data over a shorter period (not to be less than four months), the data that paragraph (m)(1)(iii) requires shall have been gathered over at least that shorter period.

(c) If the monitoring data would relate exclusively to ozone and would not have been required under 40 CFR 52.21 as in effect on June 19, 1978, the Administrator may waive the otherwise applicable requirements of this paragraph (v) to the extent that the applicant shows that the monitoring data would be unrepresentative of air quality over a full year.

(vi) The owner or operator of a proposed stationary source or modification of volatile organic compounds who satisfies all conditions of 40 CFR Part 51 Appendix S, section IV may provide post-approval monitoring data for ozone in lieu of providing preconstruction data as required under paragraph (m)(1).

(2) Post-construction monitoring. The owner or operator of a major stationary source or major modification shall, after construction of the stationary source or modification, conduct such ambient monitoring as the Administrator determines is necessary to determine the effect emissions from the stationary source or modification may have, or are having, on air quality in any area.

(3) Operations of monitoring stations. The owner or operator of a major stationary source or major modification shall meet the requirements of Appendix B to Part 58 of this chapter during the operation of monitoring stations for purposes of satisfying paragraph (m) of this section.

(n) *Source Information.*

* * * *

(o) *Additional Impact Analyses.*

* * * *

(p) *Sources Impacting Federal Class I Areas—Additional Requirements.*

* * * *

(q) *Public Participation.* The Administrator shall follow the applicable procedures of 40 CFR Part 124 in processing applications under this section. The Administrator shall follow the procedures at 40 CFR 52.21(r) as in effect on June 19, 1979, to the extent that

the procedures of 40 CFR Part 124 do not apply.

(r) *Source Obligation.*

* * * * *

(4) At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements or paragraphs (j) through (s) of this section shall apply to the source or modification as though construction had not yet commenced on the source or modification.

* * * * *

(s) *Environmental Impact Statements.*

* * * * *

(t) *Disputed Permits or Redesignations.*

* * * * *

(u) *Delegation of Authority.*

(v) *Innovative Control Technology.* (1) An owner or operator of a proposed major stationary source or major modification may request the Administrator in writing no later than the close of the comment period under 40 CFR 124.10 to approve a system of innovative control technology.

(2) The Administrator shall, with the consent of the governor(s) of the affected state(s), determine that the source or modification may employ a system of innovative control technology, if:

(i) The proposed control system would not cause or contribute to an unreasonable risk to public health, welfare, or safety in its operation or function;

(ii) The owner or operator agrees to achieve a level of continuous emissions reduction equivalent to that which would have been required under paragraph (j)(2) by a date specified by the Administrator. Such date shall not be later than 4 years from the time of startup or 7 years from permit issuance;

(iii) The source or modification would meet the requirements of paragraphs (j) and (k) based on the emissions rate that the stationary source employing the system of innovative control technology would be required to meet on the date specified by the Administrator;

(iv) The source or modification would not before the date specified by the Administrator:

(a) Cause or contribute to a violation of an applicable national ambient air quality standard; or

(b) Impact any Class I area; or

(c) Impact any area where an applicable increment is known to be violated; and

(v) All other applicable requirements including those for public participation have been met.

(3) The Administrator shall withdraw any approval to employ a system of innovative control technology made under this section, if:

(i) The proposed system fails by the specified date to achieve the required continuous emissions reduction rate; or

(ii) The proposed system fails before the specified date so as to contribute to an unreasonable risk to public health, welfare, or safety; or

(iii) The Administrator decides at any time that the proposed system is unlikely to achieve the required level of control or to protect the public health, welfare, or safety.

(4) If a source or modification fails to meet the required level of continuous emission reduction within the specified time period or the approval is withdrawn in accordance with paragraph (v)(3), the Administrator may allow the source or modification up to an additional 3 years to meet the requirement for the application of best available control technology through use of a demonstrated system of control.

(w) *Permit rescission.* (1) Any permit issued under this section or a prior version of this section shall remain in effect, unless and until it expires under paragraph (s) of this section or is rescinded.

(2) Any owner or operator of a stationary source or modification who holds a permit for the source or modification which was issued under 40 CFR 52.21 as in effect on June 19, 1978, may request that the Administrator rescind the permit or a particular portion of the permit.

(3) The Administrator shall grant an application for rescission if the application shows that this section would not apply to the source or modification.

(4) If the Administrator rescinds a permit under this paragraph, the public shall be given adequate notice of the rescission. Publication of an announcement of rescission in a newspaper of general circulation in the affected region within 60 days of the rescission shall be considered adequate notice.

2. (b) In § 52.60 (AL), § 52.96 (AK), § 52.144 (AZ), § 52.131 (AR), § 52.270 (CA), § 52.343 (CO), § 52.383 (CT), § 52.432 (DE), § 52.499 (DC), § 52.530 (FL), § 52.632 (HI), § 52.683 (ID), § 52.738 (IL), § 52.793 (IN), § 52.833 (IA), § 52.884 (KS), § 52.931 (KY), § 52.986 (LA),

§ 52.1116 (MD), § 52.1180 (MI), § 52.1234 (MN), § 52.1280 (MS), § 52.1339 (MO), § 52.1382 (MT), § 52.1436 (NB), § 52.1485 (NV), § 52.1529 (NH), § 52.1603 (NJ), § 52.1634 (NM), § 52.1689 (NY), § 52.1778 (NC), § 52.1884 (OH), § 52.1929 (OK), § 52.1987 (OR), § 52.2058 (PA), § 52.2083 (RI), § 52.2131 (SC), § 52.2178 (SD), § 52.2303 (TX), § 52.2346 (UT), § 52.2451 (VA), § 52.2497 (WA), § 52.2528 (WV), § 52.2581 (WI), § 52.2676 (GU), § 52.2729 (PR), § 52.2779 (VI), and § 52.2827 (AmS), paragraphs (a) and (b) are revised to read as follows:

* * * * *

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) *Regulations for preventing significant deterioration of air quality.* The provisions of 52.21(b) through (w) are hereby incorporated and made a part of the applicable state plan for the State of _____.

Emission Offset Interpretative Ruling

3. Sections I, II, III and IV of the Emission Offset Interpretative Ruling, 40 CFR Part 51 Appendix S, as revised 44 FR 3274 (January 16, 1979) and 45 FR 31307 (May 13, 1980), are amended as follows:

A. By adding a new third paragraph to Section I, to read as follows:

I Introduction

* * * * *

The requirement of this Ruling shall not apply to any major stationary source or major modification that was not subject to the Ruling as in effect on January 16, 1979, if the owner or operator:

A. Obtained all final federal, state, and local preconstruction approvals or permits necessary under the applicable State Implementation Plan before August 7, 1980;

B. Commenced construction within 18 months from August 7, 1980, or any earlier time required under the applicable State Implementation Plan; and

C. Did not discontinue construction for a period of 18 months or more and completed construction within a reasonable time.

B. By revising Section II, subsection A, to read as follows:

II Initial Screening Analyses and Determination of Applicable Requirements

A. Definitions—For the purposes of this Ruling:

1. "Stationary source" means any building, structure, facility, or installation which emits or may emit any air pollutant subject to regulation under the Act.

2. "Building, structure, or facility" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control

of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two digit code) as described in the *Standard Industrial Classification Manual*, 1972, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0088 and 003-005-00178-0, respectively).

3. "Installation" means an identifiable piece of process equipment.

4. "Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

5.(l) "Major stationary source" means:

(a) Any stationary source of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation under the Act; or

(b) Any physical change that would occur at a stationary source not qualifying under paragraph 5.(l)(a) as a major stationary source, if the change would constitute a major stationary source by itself.

(ii) A major stationary source that is major for volatile organic compounds shall be considered major for ozone.

6.(i) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Act.

(ii) Any net emissions increase that is considered significant for volatile organic compounds shall be considered significant for ozone.

(iii) A physical change or change in the method of operation shall not include:

(a) Routine maintenance, repair, and replacement;

(b) Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(c) Use of an alternative fuel by reason of an order or rule under section 125 of the Act;

(d) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(e) Use of an alternative fuel or raw material by a stationary source which:

(1) The source was capable of accommodating before December 21, 1976, unless such change would be prohibited under any federally enforceable permit condition which was established after December 21, 1976, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24; or

(2) The source is approved to use under any permit issued under this ruling;

(f) An increase in the hours of operation or in the production rate, unless such change is prohibited under any federally enforceable permit condition which was established after December 21, 1976 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24;

(g) Any change in ownership at a stationary source.

7.(i) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(a) Any increase in actual emissions from a particular physical change or change in the method of operation at a stationary source; and

(b) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(ii) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:

(a) The date five years before construction on the particular change commences and

(b) The date that the increase from the particular change occurs.

(iii) An increase or decrease in actual emissions is creditable only if the Administrator has not relied on it in issuing a permit for the source under this Ruling which permit is in effect when the increase in actual emissions from the particular change occurs.

(iv) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(v) A decrease in actual emissions is creditable only to the extent that:

(a) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(b) It is federally enforceable at and after the time that actual construction on the particular change begins;

(c) The reviewing authority has not relied on it in issuing any permit under regulations approved pursuant to 40 CFR 51.18; and

(d) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.

(vi) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.

8. "Emissions unit" means any part of a stationary source which emits or would have the potential to emit any pollutant subject to regulation under the Act.

9. "Reconstruction" will be presumed to have taken place where the fixed capital cost of the new components exceeds 50 per cent of the fixed capital cost of a comparable entirely new stationary source. Any final decision as to whether reconstruction has occurred shall be made in accordance with the provisions of 40 CFR 60.15(f) (1)-(3). A reconstructed stationary source will be treated as a new stationary source for

purposes of this Ruling. In determining lowest achievable emission rate for a reconstructed stationary source, the provisions of 40 CFR 60.15(f)(4) shall be taken into account in assessing whether a new source performance standard is applicable to such stationary source.

10. "Fixed capital cost" means the capital needed to provide all the depreciable components.

11. "Secondary emissions" means emissions which would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this Ruling, secondary emissions must be specific, well defined, quantifiable, and impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions may include, but are not limited to:

(i) Emissions from ships or trains coming to or from the new or modified stationary source and

(ii) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

12. "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

13.(l) "Significant" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

Pollutant and Emissions Rate

Carbon monoxide: 100 tons per year (tpy)

Nitrogen oxides: 40 tpy

Sulfur dioxide: 40 tpy

Particulate matter: 25 tpy

Ozone: 40 tpy of volatile organic compounds

Lead: 0.6 tpy

14. "Allowable emissions" means the emissions rate calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(i) Applicable standards as set forth in 40 CFR Parts 60 and 61;

(ii) Any applicable State Implementation Plan emissions limitation, including those with a future compliance date; or

(iii) The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date.

15. "Federally enforceable" means all limitations and conditions which are enforceable by the Administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within any applicable State Implementation Plan, and any permit requirements established pursuant to this Ruling, 40 CFR 52.21, or under regulations approved pursuant to 40 CFR 51.18 or 51.24.

16.(i) "Actual emissions" means the actual rate of emissions of a pollutant from an

emissions unit as determined in accordance with subparagraphs (ii)-(iv) below.

(ii) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The reviewing authority shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored or combusted during the selected time period.

(iii) The reviewing authority may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

(iv) For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

17. "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emissions unit) which would result in a change in actual emissions.

18. "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary preconstruction approvals or permits and either has:

(i) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

(ii) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

19. "Necessary preconstruction approvals or permits" means those permits or approvals required under federal air quality control laws and regulations and those air quality control laws and regulations which are part of the applicable State Implementation Plan.

20. "Begin actual construction" means, in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operating this term refers to those on-site activities other than preparatory activities which mark the initiation of the change.

21. "Lowest achievable emission rate" means, for any source, the more stringent rate of emissions based on the following:

(i) The most stringent emissions limitation which is contained in the implementation plan of any state for such class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that such limitations are not achievable; or

(ii) The most stringent emissions limitation which is achieved in practice by such class or

category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event shall the application of this term permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under applicable new source standards of performance.

22. "Resource recovery facility" means any facility at which solid waste is processed for the purpose of extracting, converting to energy, or otherwise separating and preparing solid waste for reuse. Energy conversion facilities must utilize solid waste to provide more than 50 percent of the heat input to be considered a resource recovery facility under this Ruling.

C. By amending Section II, subsection C by deleting footnote 2 and the second paragraph. The first paragraph is revised to read as follows:

C. Review of specified sources of air quality impact.

In addition, the reviewing authority must determine whether the major stationary source or major modification would be constructed in an area designated in 40 CFR 81.300 *et seq.* as nonattainment for a pollutant for which the stationary source or modification is major.

D. By revising Section II, subsection F to read as follows:

F. *Fugitive emissions sources.* Section IV. A. of this Ruling shall not apply to a source or modification that would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the stationary source or modification and the source does not belong to any of the following categories:

- (1) Coal cleaning plants (with thermal dryers);
- (2) Kraft pulp mills;
- (3) Portland cement plants;
- (4) Primary zinc smelters;
- (5) Iron and steel mills;
- (6) Primary aluminum ore reduction plants;
- (7) Primary copper smelters;
- (8) Municipal incinerators capable of charging more than 250 tons of refuse per day;
- (9) Hydrofluoric, sulfuric, or nitric acid plants;
- (10) Petroleum refineries;
- (11) Lime plants;
- (12) Phosphate rock processing plants;
- (13) Coke oven batteries;
- (14) Sulfur recovery plants;
- (15) Carbon black plants (furnace process);
- (16) Primary lead smelters;
- (17) Fuel conversion plants;
- (18) Sintering plants;
- (19) Secondary metal production plants;
- (20) Chemical process plants;
- (21) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;
- (22) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
- (23) Taconite ore processing plants;

(24) Glass fiber processing plants;

(25) Charcoal production plants;

(26) Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input;

(27) Any other stationary source category which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act.

E. By deleting Footnote 3 of subsection C of Section III and revising the third paragraph as follows:

C. Review of specified sources of air quality impact.

For ozone, sources of volatile organic compounds, locating outside a designated ozone nonattainment area, will be presumed to have no significant impact on the designated nonattainment area. If ambient monitoring indicates that the area of source location is in fact nonattainment, then the source may be permitted under the provisions of any state plan adopted pursuant to section 110(a)(2)(D) of the Act until the area is designated nonattainment and a State Implementation Plan revision is approved. If no state plan pursuant to section 110(a)(2)(D) has been adopted and approved, then this Ruling shall apply.

F. By adding a new subsection F. to IV., to read as follows:

IV. Sources That Would Locate in a Designated Nonattainment Area

F. Source Obligation.

At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, or the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of this Ruling shall apply to the source or modification as though construction had not yet commenced on the source or modification.

State Plans For New Source Review For Nonattainment Purposes.

4. Section 40 CFR 51.18(j) is amended to read as follows:

§ 51.18 Review of new stationary sources modifications.

(j) State Implementation Plan provisions satisfying sections 172(b)(6) and 173 of the Act shall meet the following conditions:

(1) All such plans shall use the specific definitions. Deviations from the following wording will be approved only if the state specifically demonstrates that the submitted definition is more stringent, or at least as stringent, in all respects as the corresponding definition below:

(i) "Stationary source" means any building, structure, facility, or installation which emits or may emit

any air pollutant subject to regulation under the Act.

(ii) "Building, structure, or facility" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two-digit code) as described in the *Standard Industrial Classification Manual*, 1972, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0068 and 003-005-00176-0, respectively).

(iii) "Installation" means an identifiable piece of process equipment.

(iv) "Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(v)(a) "Major stationary source" means:

(1) Any stationary source of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation under the Act; or

(2) Any physical change that would occur at a stationary source not qualifying under paragraph (v)(a)(1) as a major stationary source, if the change would constitute a major stationary source by itself.

(b) A major stationary source that is major for volatile organic compounds shall be considered major for ozone.

(vi)(a) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Act.

(b) Any net emissions increase that is considered significant for volatile organic compounds shall be considered significant for ozone.

(c) A physical change or change in the method of operation shall not include:

(1) Routine maintenance, repair and replacement;

(2) Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(3) Use of an alternative fuel by reason of an order or rule under section 125 of the Act;

(4) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(5) Use of an alternative fuel or raw material by a stationary source which:

(i) The source was capable of accommodating before December 21, 1976, unless such change would be prohibited under any federally enforceable permit condition which was established after December 21, 1976 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24; or

(ii) The source is approved to use under any permit issued under regulations approved pursuant to this section;

(6) An increase in the hours of operation or in the production rate, unless such change is prohibited under any federally enforceable permit condition which was established after December 21, 1976 pursuant to 40 CFR 52.21 or regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24.

(7) Any change in ownership at a stationary source.

(vii)(a) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(1) Any increase in actual emissions from a particular physical change or change in the method of operation at a stationary source; and

(2) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(b) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs before the date that the increase from the particular change occurs.

(c) An increase or decrease in actual emissions is creditable only if:

(1) It occurs within a reasonable period to be specified by the reviewing authority; and

(2) The reviewing authority has not relied on it in issuing a permit for the source under regulations approved pursuant to this section which permit is in effect when the increase in actual emissions from the particular change occurs.

(d) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(e) A decrease in actual emissions is creditable only to the extent that:

(1) The old level of actual emissions or the old level of allowable emissions, whichever, is lower, exceeds the new level of actual emissions;

(2) It is federally enforceable at and after the time that actual construction on the particular change begins; and

(3) The reviewing authority has not relied on it in issuing any permit under regulations approved pursuant to 40 CFR 51.18 or the state has not relied on it in demonstrating attainment or reasonable further progress.

(4) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.

(f) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.

(viii) "Emissions unit" means any part of a stationary source which emits or would have the potential to emit any pollutant subject to regulation under the Act.

(ix) "Reconstruction" will be presumed to have taken place where the fixed capital cost of the new components exceeds 50 percent of the fixed capital cost of a comparable entirely new stationary source. Any final decision as to whether reconstruction has occurred shall be made in accordance with the provisions of 40 CFR 60.15(f)(1)-(3). A reconstructed stationary source will be treated as a new stationary source for purposes of this subsection. In determining lowest achievable emission rate for a reconstructed stationary source, the provisions of 40 CFR 60.15(f)(4) shall be taken into account in assessing whether a new source performance standard is applicable to such stationary source.

(x) "Fixed capital cost" means the capital needed to provide all the depreciable components.

(xi) "Secondary emissions" means emissions which would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this section, secondary emissions must

be specific, well defined, quantifiable, and impact the same general area as the stationary source or modification which causes the secondary emissions.

Secondary emissions may include, but are not limited to:

(a) Emissions from ships or trains coming to or from the new or modified stationary source; and

(b) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

(xii) "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(xiii) "Significant" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

Pollutant and Emissions Rate

Carbon monoxide: 100 tons per year (tpy)

Nitrogen oxides: 40 tpy

Sulfur dioxide: 40 tpy

Particulate matter: 25 tpy

Ozone: 40 tpy of volatile organic compounds

Lead: 0.6 tpy

(xiv) "Allowable emissions" means the emissions rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(a) The applicable standards set forth in 40 CFR Parts 60 or 61;

(b) Any applicable State Implementation Plan emissions limitation including those with a future compliance date; or

(c) The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date.

(xv)(a) "Actual emissions" means the actual rate of emissions of a pollutant from an emissions unit as determined in accordance with subparagraphs (b)-(d) below.

(b) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The reviewing authority shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual

operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(c) The reviewing authority may presume that the source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

(d) For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(xvi) "Lowest achievable emission rate" means, for any source, the more stringent rate of emissions based on the following:

(a) The most stringent emissions limitation which is contained in the implementation plan of any state for such class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that such limitations are not achievable; or

(b) The most stringent emissions limitation which is achieved in practice by such class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event shall the application of this term permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under an applicable new source standard of performance.

(xvii) "Federally enforceable" means all limitations and conditions which are enforceable by the Administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within any applicable State Implementation Plan, and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to this section, 40 CFR 51.18, or 51.24.

(xviii) "Begin actual construction" means in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operating this term refers to those on-site activities other than preparatory activities which mark the initiation of the change.

(xix) "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary

preconstruction approvals or permits and either has:

(a) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

(b) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

(xx) "Necessary preconstruction approvals or permits" means those permits or approvals required under federal air quality control laws and regulations and those air quality control laws and regulations which are part of the applicable State Implementation Plan.

(xxi) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification of an emissions unit) which would result in a change in actual emissions.

(2) Each plan shall adopt a preconstruction review program to satisfy the requirements of sections 172(b)(6) and 173 of the Act for any area designated nonattainment for any national ambient air quality standard under 40 CFR 81.300 *et seq.* Such a program shall apply to any new major stationary source or major modification that is major for the pollutant for which the area is designated nonattainment, if the stationary source or modification would locate anywhere in the designated nonattainment area.

(3)(i) Each plan shall provide that for sources and modifications subject to any preconstruction review program adopted pursuant to this subsection the baseline for determining credit for emissions reductions is the emissions limit under the applicable State Implementation Plan in effect at the time the application to construct is filed, except that the offset baseline shall be the actual emissions of the source from which offset credit is obtained where:

(a) The demonstration of reasonable further progress and attainment of ambient air quality standards is based upon the actual emissions of sources located within a designated nonattainment area for which the preconstruction review program was adopted; or

(b) The applicable State Implementation Plan does not contain an emissions limitation for that source or source category.

(ii) The plan shall further provide that:

(a) Where the emissions limit under the applicable State Implementation

Plan allows greater emissions than the potential to emit of the source, emissions offset credit will be allowed only for control below this potential;

(b) For an existing fuel combustion source, credit shall be based on the allowable emissions under the applicable State Implementation Plan for the type of fuel being burned at the time the application to construct is filed. If the existing source commits to switch to a cleaner fuel at some future date, emissions offset credit based on the allowable (or actual) emissions for the fuels involved is not acceptable, unless the permit is conditioned to require the use of a specified alternative control measure which would achieve the same degree of emissions reduction should the source switch back to a dirtier fuel at some later date. The reviewing authority should ensure that adequate long-term supplies of the new fuel are available before granting emissions offset credit for fuel switches;

(c) Emissions reductions achieved by shutting down an existing source or permanently curtailing production or operating hours below baseline levels may be credited, provided that the work force to be affected has been notified of the proposed shutdown or curtailment. Source shutdowns and curtailments in production or operating hours occurring prior to the date the new source application is filed generally may not be used for emissions offset credit.

However, where an applicant can establish that it shut down or curtailed production after August 7, 1977, or less than one year prior to the date of permit application, whichever is earlier, and the proposed new source is a replacement for the shutdown or curtailment credit for such shutdown or curtailment may be applied to offset emissions from the new source;

(d) No emissions credit may be allowed for replacing one hydrocarbon compound with another of lesser reactivity, except for those compounds listed in Table 1 of EPA's

"Recommended Policy on Control of Volatile Organic Compounds." [42 FR 35314, July 8, 1977];

(e) All emission reductions claimed as offset credit shall be federally enforceable;

(f) Procedures relating to the permissible location of offsetting emissions shall be followed which are at least as stringent as those set out in 40 CFR Part 51 Appendix S, section IV.D.

(g) Credit for an emissions reduction can be claimed to the extent that the reviewing authority has not relied on it in issuing any permit under regulations approved pursuant to 40 CFR 51.18 or the state has not relied on it in

demonstrating attainment or reasonable further progress.

(4) Each plan may provide that the provisions of this subsection do not apply to a source or modification that would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the stationary source or modification and the source does not belong to any of the following categories:

- (a) Coal cleaning plants (with thermal dryers);
- (b) Kraft pulp mills;
- (c) Portland cement plants;
- (d) Primary zinc smelters;
- (e) Iron and steel mills;
- (f) Primary aluminum ore reduction plants;
- (g) Primary copper smelters;
- (h) Municipal incinerators capable of charging more than 250 tons of refuse per day;
- (i) Hydrofluoric, sulfuric, or nitric acid plants;
- (j) Petroleum refineries;
- (k) Lime plants;
- (l) Phosphate rock processing plants;
- (m) Coke oven batteries;
- (n) Sulfur recovery plants;
- (o) Carbon black plants (furnace process);
- (p) Primary lead smelters;
- (q) Fuel conversion plants;
- (r) Sintering plants;
- (s) Secondary metal production plants;
- (t) Chemical process plants;
- (u) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;
- (v) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
- (w) Taconite ore processing plants;
- (x) Glass fiber processing plants;
- (y) Charcoal production plants;
- (z) Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input;

(aa) Any other stationary source category which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act.

(5) Each plan shall include enforceable procedures to provide that:

(i) Approval to construct shall not relieve any owner or operator of the responsibility to comply fully with applicable provision of the plan and any other requirements under local, state or federal law.

(ii) At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforcement limitation which was

established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of regulations approved pursuant to this section shall apply to the source or modification as though construction had not yet commenced on the source or modification.

Restrictions on Construction For Nonattainment Areas

5. 40 CFR 52.24 is amended by adding new paragraphs (f), (g), (h) and (i) to read as follows:

§ 52.24 Statutory restriction on new stationary sources.

(f) The following definitions shall apply under this section.

(1) "Stationary source" means any building, structure, facility, or installation which emits or may emit any air pollutant subject to regulation under the Act.

(2) "Building, structure, or facility" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two-digit code) as described in the following document, *Standard Industrial Classification Manual*, 1972, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0086 and 003-005-00176-0, respectively).

(3) "Installation" means an identifiable piece of process equipment.

(4) "Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(5)(i) "Major stationary source" means:

(a) Any stationary source of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation under the Act; or

(b) Any physical change that would occur at a stationary source not qualifying under paragraph (5)(i)(a) as a major stationary source, if the change would constitute a major stationary source by itself.

(ii) A major stationary source that is major for volatile organic compounds shall be considered major for ozone.

(6)(i) "Major modification" means any physical change in or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant subject to regulation under the Act.

(ii) Any net emissions increase that is considered significant for volatile organic compounds shall be considered significant for ozone.

(iii) A physical change or change in the method of operation shall not include:

(a) Routine maintenance, repair, and replacement;

(b) Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(c) Use of an alternative fuel by reason of an order or rule under section 125 of the Act;

(d) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(e) Use of an alternative fuel or raw material by a stationary source which:

(1) The source was capable of accommodating before July 1, 1979, unless such change would be prohibited under any federally enforceable permit condition which was established after July 1, 1979 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24; or

(2) The source is approved to use under any permit issued under regulations approved pursuant to 40 CFR 51.18;

(f) An increase in the hours of operation or in the production rate, unless such change is prohibited under any federally enforceable permit condition which was established after July 1, 1979 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 or 40 CFR 51.24.

(g) Any change in ownership at a stationary source.

(7)(i) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(a) Any increase in actual emissions from a particular physical change or

change in the method of operation at a stationary source; and

(b) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(ii) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:

(a) The date five years before construction on the particular change commences and

(b) The date that the increase from the particular change occurs.

(iii) An increase or decrease in actual emissions is creditable only if the Administrator has not relied on it in issuing a permit for the source under regulations approved pursuant to 40 CFR 51.18 which permit is in effect when the increase in actual emissions from the particular change occurs.

(iv) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

(v) A decrease in actual emissions is creditable only to the extent that:

(a) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(b) It is federally enforceable at and after the time that construction on the particular change begins; and

(c) The Administrator or reviewing authority has not relied on it in issuing any permit under regulations approved pursuant to 40 CFR 51.18 or the State has not relied on it in demonstrating attainment or reasonable further progress.

(d) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.

(vi) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.

(8) "Emissions unit" means any part of a stationary source which emits or would have the potential to emit any pollutant subject to regulation under the Act.

(9) "Reconstruction" will be presumed to have taken place where the fixed capital cost of the new components exceeds 50 percent of the fixed capital cost of a comparable entirely new stationary source. Any final decision as to whether reconstruction has occurred

shall be made in accordance with the provisions of 40 CFR 60.15(f) (1)-(3). A reconstructed stationary source will be treated as a new stationary source for purposes of this subsection.

(10) "Fixed capital cost" means the capital needed to provide all the depreciable components.

(11) "Secondary emissions" means emissions which would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this section, secondary emissions must be specific, well defined, quantifiable, and impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions may include, but are not limited to:

(i) Emissions from ships or trains coming to or from the new or modified stationary source and

(ii) Emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major stationary source or major modification.

(12) "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(13) "Significant" means, in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

Pollutant and Emissions Rate

Carbon monoxide: 100 tons per year (tpy)

Nitrogen oxides: 40 tpy

Sulfur dioxide: 40 tpy

Particulate matter: 25 tpy

Ozone: 40 tpy of volatile organic compounds

Lead: 0.6 tpy

(14) "Allowable emissions" means the emissions rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

(i) The applicable standards set forth in 40 CFR Parts 60 and 61;

(ii) Any applicable State Implementation Plan emissions limitation, including those with a future compliance date; or

(iii) The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date.

(15) "Federally enforceable" means all limitations and conditions which are

enforceable by the Administrator, including those requirements developed pursuant to 40 CFR Parts 60 and 61, requirements within any applicable State Implementation Plan; and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.18 and 51.24.

(16)(i) "Actual emissions" means the actual rate of emissions of a pollutant from an emissions unit, as determined in accordance with subparagraphs (ii)-(iv) below.

(ii) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The Administrator shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(iii) The Administrator may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

(iv) For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(17) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition, or modification) of an emissions unit which would result in a change in actual emissions.

(18) "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary preconstruction approvals or permits and either has:

(i) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

(ii) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

(19) "Necessary preconstruction approvals or permits" means those permits or approvals required under federal air quality control laws and regulations and those air quality control laws and regulations which are part of the applicable State Implementation Plan.

(20) "Begin actual construction" means, in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include, but are not limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operations, this term refers to those on-site activities other than preparatory activities which mark the initiation of the change.

(g) This section shall not apply to a major stationary source or major modification if the source or modification was not subject to 40 CFR Part 51 Appendix S, as in effect on January 16, 1979, and the owner or operator:

(1) Obtained all final federal, state, and local preconstruction approvals or permits necessary under the applicable State Implementation Plan before August 7, 1980;

(2) Commenced construction within 18 months from August 7, 1980, or any earlier time required under the applicable State Implementation Plan; and

(3) Did not discontinue construction for a period of 18 months or more and completed construction within a reasonable time.

(h) This section shall not apply to a source or modification that would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the stationary source or modification and the source does not belong to any of the following categories:

(1) Coal-cleaning plants [with thermal dryers];

(2) Kraft pulp mills;

(3) Portland cement plants;

(4) Primary zinc smelters;

(5) Iron and steel mills;

(6) Primary aluminum ore reduction plants;

(7) Primary copper smelters;

(8) Municipal incinerators capable of charging more than 250 tons of refuse per day;

(9) Hydrofluoric, sulfuric, or nitric acid plants;

(10) Petroleum refineries;

(11) Lime plants;

(12) Phosphate rock processing plants;

(13) Coke oven batteries;

(14) Sulfur recovery plants;

(15) Carbon black plants (furnace process);

(16) Primary lead smelters;

(17) Fuel conversion plants;

(18) Sintering plants;

(19) Secondary metal production plants;

(20) Chemical process plants;

(21) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;

(22) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;

(23) Taconite ore processing plants;

(24) Glass fiber processing plants;

(25) Charcoal production plants;

(26) Fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input;

(27) Any other stationary source category which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act.

(i) At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then:

(1) If the construction moratorium imposed pursuant to this section is still in effect for the nonattainment area in which the source or modification is located, then the permit may not be so revised; or

(2) If the construction moratorium is no longer in effect in that area, then the requirements of 40 CFR 51.18(j) shall apply to the source or modification as though construction had not yet commenced on the source or modification.

Consolidated Permit Regulations

6. 40 CFR Part 124 is amended as follows:

a. 40 CFR 124.3(b) is deleted and reserved as follows:

§ 124.3 Application for a permit.

* * * * *

(b) [Reserved]

* * * * *

§ 124.5 [Amended]

b. 40 CFR 124.5(g)(2) is revised as follows:

* * * * *

(g) * * *

(2) PSD permits may be terminated only by rescission under § 52.21(w) or by automatic expiration under § 52.21(r). Applications for rescission shall be processed under § 52.21(w) and are not subject to this Part.

§ 124.42 [Amended]

c. The first sentence of 40 CFR 124.42(b) is amended by substituting "submitted" for "requested."

U.S. Department of Commerce

Three steady-state Gaussian plume point source models have recently been added to EPA's UNAMAP (Users' Network for Applied Modeling of Air Pollution) and to the UNAMAP system available to non-EPA users.

EPA users access UNAMAP models by entering "UNAMAP" as the procedure name at log on. Non-EPA users may obtain information as to access to UNAMAP models by contacting Mr. Peter Loux, Computer Sciences Corporation, 1701 North Fort Meyer Drive, Arlington, Va. 22209. Phone (703) 527-6080. On both systems the command "UNAMAP" after log on is accomplished, produces a brief description of each model currently available.

Each of the three programs is briefly described including a program abstract for each program.

CATALOG OF PROGRAMS as of 06/01/73

APRAC - A short-term Urban Diffusion Model that calculates the automotive contribution to Carbon Monoxide. The model was developed by Stanford Research Institute (SRI). A 120 page manual is available on the model.

HIWAY - A model that calculates a pollutant concentration in the vicinity of a roadway. The model is self-documenting.

PTMAX - An interactive program which performs an analysis of the maximum, short-term concentration from a point source as a function of stability and wind speed.

PTDIS - An interactive program which computes short-term concentrations downwind from a point source at distances specified by the user.

PTMTP - An interactive program which computes, at multiple receptors, short term concentrations resulting from multiple point sources.

Users' Guide to PTMAX (the Interactive Version of DBT 52)

Program Abstract

PTMAX produces an analysis of maximum concentration as the function of wind speed and stability. A separate analysis is made for each individual stack. Input to the program consists of ambient air temperature, and characteristics of the source, such as emission rate, physical stack height, and stack gas temperature. Either the stack gas volume flow or both the stack gas velocity and inside diameter at the top are also required. Outputs of the program consist of effective height of emission, maximum ground level concentration, and distance of maximum concentration for each condition of stability and wind speed.

This program determines for each wind speed and stability the final plume rise using methods suggested by Briggs. This plume rise is added to the physical stack height to determine the effective height of emission. The effective height is used to determine both the maximum concentration and the distance to maximum concentration.

The following assumptions are made: a steady-state Gaussian plume model is applicable to determine ground level concentrations. Computations can be performed according to the "Workbook of Atmospheric Dispersion Estimates." The dispersion parameter values used for the horizontal dispersion coefficient, sigma y, and the vertical dispersion coefficient, sigma z, are those given in Figures 3-2 and 3-3 of the workbook. The stated wind speed occurs at the stack top for dilution of the plume and through the layer that the plume rise occurs. The stated stability occurs from ground level to well above the top of the plume. If there is a limit to vertical mixing, it

occurs far enough above the top of the plume so that it has no influence upon the maximum concentration. There are no topographic obstructions in the vicinity of the source. The source exists in either flat or gently rolling terrain.

Use of this program is applicable where single sources exist in relatively uniform terrain. It is not applicable if aerodynamic downwash around buildings in the vicinity of the source affects the plume emitted from the stack. The calculated concentrations are for the single source considered. Where multiple stacks exist for a given single plant this program can be applied to each individual stack. It cannot give the maximum concentrations of the combination of the stacks however. This program is useful in determining what combinations of wind speed and stability produce maximum concentrations. For a given stability the critical wind velocity, that is, the wind speed that causes the maximum concentration, can be determined. This can be done by seeing which wind speed produces the highest concentration for that stability.

The use of the interactive version of the program is quite simple. An alpha-numeric title is used to put a heading on the output. The ambient air temperature in degrees-K is asked for. If a zero is entered a value of 293 will be used. The stability class is asked for next. If a zero is entered, all stabilities 1 through 6 are considered. Numbers 1 through 6 correspond to stabilities A through F. Source strength of the pollutant considered

in grams per second is asked for next. The physical stack height in meters is then required. The stack gas temperature in degrees-K is next entered. If the volume flow in cubic meters per second is known, it is next entered. If it is not known, a zero is entered, and both stack gas velocity in meters per second, and stack diameter at the top of the stack in meters are required.

The above inputs are then used to perform the calculations and are repeated on the output. The output table is in the form of 5 columns of information: stability, wind speed, maximum concentration, the distance of the maximum concentration, and plume height. The maximum concentration is in grams per cubic meter. The distance of the maximum concentration is in kilometers and the plume height which is final plume height according to Briggs method is in meters. When the table is completed for each stability or the stated stability the program asks for input for a second run, starting with the title. This is repeated until the user wishes to terminate the run. Termination is by entering END when the title is asked for. For second and subsequent runs, parameter values which are to remain unchanged from the preceding run may be entered by using a comma. Concentrations of 9.90 E+01 and distances of 999.000 are indicators that no concentration estimates were attempted. Also numbers in parentheses refer to footnotes. These are printed at the bottom of the first output if they are needed. The user is offered the option of another run starting with a title or concluding the run by typing END.

Users' Guide to PTDIS (the Interactive Version of DBT 43)

Program Abstract

PTDIS calculates downwind ground-level concentrations for various downwind distances for the input meteorological conditions. Only an individual source can be considered. Inputs to the program consist of information on the source and information on the meteorological conditions to be considered. Primary output of the program consists of a table with height of emission and concentration given for each downwind distance. Also included in this table but not frequently needed are the values of the dispersion parameters sigma y and sigma z for each distance and also a relative concentration normalized for wind speed and source strength commonly called $\chi u/Q$. An optional feature of the program allows the user to enter a value of concentration to be used for the determination of half-width of isopleths. For each distance, if the concentration exceeds the stated isopleth value the half-width of an isopleth will be determined. Also this half-width will be compared in the form of a ratio to the half-width of a sector of given angular size in terms of degrees. The user is also given the option of either specifying effective height of emission or having it calculated using Briggs' plume rise methods.

This program determines the concentration at ground level from a single point source using a steady-state Gaussian model. The computations used are similar to those shown in the Workbook of Atmospheric Dispersion Estimates. The dispersion parameter values are also those given in Figures 3-2 and 3-3 of this Workbook. The concentrations are for a single meteorological condition defined by a stability class using the numbers 1 through 6 to represent the Pasquill stability types A through F. The single wind speed used is assumed to be representative of the top of the stack, as well as through the layer that plume rise occurs. The effect of a

definite limit to vertical dispersion or mixing height is included in the computations. It is assumed that complete eddy reflection occurs at this barrier. It is assumed that the given stability occurs from ground level to the mixing height. The concept of a mixing height is not employed for stabilities 5 or 6. It is assumed that there are no topographic obstructions in the vicinity of the source and that the source is in an area of either flat or gently rolling terrain. No consideration of the possibility of aerodynamic downwash is included.

Given a stability and wind speed condition, this program is useful in obtaining the variation of ground level concentration with distance. Concentrations derived from these calculations can be considered to be valid for averaging times from ten minutes to an hour. The meteorological input must also be valid for these averaging times. Although the computational system will yield numerical values for effective plume heights of above 1,000 meters, any computations performed for plume heights of greater than three or four hundred meters should be considered with a certain amount of skepticism.

The use of the interactive version of this program is quite simple. Some cautionary statements are printed out first indicating where the computations are most valid. The number of distances for which calculations are to be made is entered first.

There is a maximum of 50 distances. After this number of distances has been entered, the distances, in kilometers, are entered separated by commas or spaces. Although the distances can be entered in any order, it is handy in interpreting output if the smallest distances are first and the distances ordered with increasing distance. The user is asked if he wants to use the isopleth option. He can answer yes or no. If he says yes he is asked how many isopleths he wants to consider. There is a maximum of eight. Next, the isopleth values in grams per cubic meter are entered separated by commas and he is also asked to enter a wind segment size in degrees. This is commonly 10° or 22.5° . This is used to compare the isopleth widths at each distance. Whether the isopleth option is used or not, the next variable entered is the stability class, a number from 1 to 6. Next the wind speed in meters per second is entered, and finally the mixing height in meters. This concludes the entries of the meteorological variables. The source strength in grams per second of the pollutant being considered is entered next. If a specific effective height of emission is desired this is entered, in meters. A zero is entered here if the plume rise is to be calculated. The physical stack height in meters is entered. The stack gas temperature in degrees Kelvin is entered. The ambient air temperature in degrees Kelvin is entered. If a zero is used here a value of 293 is used. If the stack gas volume flow, in cubic meters per second, is known it is entered next; if it is

unknown, a zero is entered. If the volume flow was not entered, the stack gas velocity, in meters per second, is next entered and the stack diameter in meters. Outputs consist of a listing of the source conditions, the meteorological conditions, and a table giving distance, effective height, and concentration for each distance. If the isopleth option is used an additional table giving the half-width, and a ratio of the isopleth half-width to the sector half-width for each isopleth value, for each distance. This concludes one run of the program. The user has options as to where he can reenter the program or to conclude the run.

Users' Guide to PTMTP (The Interactive Version of DBT 51)

Program Abstract

PTMTP produces hourly concentrations at up to 30 receptors whose locations are specified from up to 25 point sources. A Gaussian plume model is used. Inputs to the program consist of the number of sources to be considered, and for each source the emission rate, physical height, stack gas temperature, volume flow, or stack gas velocity and diameter, the location, in coordinates. The number of receptors, the coordinates of each and the height above ground of each receptor are also required. Concentrations for a number of hours up to 24 can be estimated, and an average concentration over this time period is calculated. For each hour the meteorological information required is: wind direction, wind speed, stability class, mixing height, and ambient air temperature.

The assumptions that are made in this model follow:

Meteorological conditions are steady-state for each hour and a Gaussian plume model is applicable to determine ground level concentrations. Computations can be performed according to the "Workbook of Atmospheric Dispersion Estimates." The dispersion parameter values used for the horizontal dispersion coefficient, sigma y, and the vertical dispersion coefficient, sigma z, are those given in Figures 3-2 and 3-3 of the Workbook. The sources and receptors exist in either flat or gently rolling terrain, and the stacks are tall enough to be free from building turbulence so that no aerodynamic downwash occurs. The wind speed and wind direction apply from the shortest to the tallest plume height. No wind direction shear or wind speed shear occurs. The given stability exists from ground-level to well above the top of the plume.

Calculations for each hour are made by considering each source-receptor pair. Plume rise is calculated according to Briggs' plume rise estimates. For each source-receptor pair, the downwind and crosswind distances are determined. If the downwind distance is closer than the distance to final rise, the plume rise for this distance is calculated. The concentration from this source upon this receptor is determined using these distances by the Gaussian model.

The use of the interactive version of the program is relatively straightforward. First, an alphanumeric title to identify the output is entered. Next, the number of sources to be considered is given. The source strength, physical height, stack gas temperature, and volume flow is entered for each stack. If the volume flow is not known the stack gas velocity and diameter are required. The coordinates based on a coordinate system having units of one kilometer are required for each source. Next, the number of receptors to be processed, the coordinates of each and the height above ground for each are entered. The meteorological information includes the number of hours to be averaged up to 24, the wind direction, wind speed, stability class, mixing height, and ambient air temperature are entered for each hour. An option exists to print the partial concentrations, that is, the concentration from each source at each receptor. Also, an option exists to print the hourly concentrations.

The output is quite simple, consisting of title followed by input information on the sources, receptors, and meteorology. This is followed by hour by hour partial concentrations if desired and total concentrations. If partial concentrations are printed the final plume height for that hour for each source is also printed. Then average concentrations for the time period are printed including partial concentrations if desired. When the output is complete, the user is offered the option of ending the run or entering at 3 different points. He may go back to enter new sources or he may keep the same sources and enter new receptors or he may keep both the same sources and receptors and enter only different meteorological conditions.

FOREWORD

Through the publication of Guidelines for Air Quality Maintenance Planning and Analysis, the U.S. Environmental Protection Agency provides State and local agencies with information and guidance for the preparation of Air Quality Maintenance Plans required under 40 CFR 51. The volumes in this series are:

- Volume 1: Designation of Air Quality Maintenance Areas
- Volume 2: Plan Preparation
- Volume 3: Control Strategies
- Volume 4: Land Use and Transportation Consideration
- Volume 5: Case Studies in Plan Development
- Volume 6: Overview of Air Quality Maintenance Area Analysis
- Volume 7: Projecting County Emissions
- Volume 8: Computer-Assisted Area Source Emissions Gridding Procedure
- Volume 9: Evaluating Indirect Sources

PREFACE

This document is a revision of an earlier guideline¹ for applying screening techniques to estimate the air quality impact of new (proposed) stationary sources. The revision is in a more readily useable format and incorporates changes and additions to the technical approach. Also, a simple screening procedure has been added. The techniques are applicable to chemically stable, gaseous or fine particulate pollutants. An important advantage of the techniques is that a sophisticated computer is not required. A pocket or desk calculator will generally suffice.

If the analysis indicates that a more refined analysis is required, the user is directed to the Guideline on Air Quality Models².

ACKNOWLEDGMENTS

Credit is due Mr. Russell F. Lee, Project Officer for EPA on the preparation of the original version of this document, who continued to provide valuable technical assistance for this revision. Considerable support and insight were also provided by Messrs. James L. Dicke, Joseph A. Tikvart and William H. Keith.

1. INTRODUCTION

Pursuant to Clean Air Act requirements for new sources, addressed in Title 40 of the Code of Federal Regulations (40 CFR 51.18: Review of New Sources and Modifications), States are required to enact legally enforceable review procedures to prevent the construction of pollutant sources that would result in noncompliance with an approved State control strategy, or would cause or contribute to ambient concentrations in excess of National Ambient Air Quality Standards. A review procedure for a "major" new stationary source³ must include an air quality analysis to estimate the impact of the source on ambient air quality. This document presents a three-phase approach* that is applicable to the air quality analysis:

- Phase 1. Apply a simple screening procedure (Section 4.1) to determine if either (1) the source clearly poses no air quality problem or (2) the potential for an air quality problem exists.
- Phase 2. If the simplified screening results indicate a potential threat to air quality, further analysis is warranted, and the detailed screening (basic modeling) procedures described in Sections 4.2 through 4.5 should be applied.
- Phase 3. If the detailed screening results or other factors indicate that a more refined analysis is necessary, refer to the Guideline on Air Quality Models².

The simple screening procedure (Phase 1) is applied to determine if the source poses a potential threat to air quality. The purpose of applying a simple screening procedure is to conserve resources by eliminating from further consideration those sources that clearly will not

*The techniques described herein can also be used, where appropriate, to review sources to prevent significant air quality deterioration, addressed in 40 CFR 52.21 (Significant Deterioration of Air Quality).

cause or contribute to ambient concentrations in excess of short-term air quality standards or allowable concentration increments. A relatively large degree of "conservatism" is incorporated in that screening procedure to provide reasonable assurance that maximum concentrations will not be underestimated.

If the source is not eliminated by the simple screening procedure, a detailed screening analysis is then conducted (Phase 2). The Phase 2 analysis will yield a somewhat conservative first approximation (albeit less conservative than the simple screening estimate) of the source's maximum impact on air quality. If the Phase 2 analysis indicates that the new source does not pose an air quality problem, further modeling may not be necessary. However, there are situations in which analysis beyond the scope of this document (Phase 3) may be required; for example, when:

1. The accuracy of the estimated concentrations must be maximized (e.g., if the results of the Phase 2 analysis indicate a potential air quality problem).
2. The source configuration is complex.
3. Emission rates are highly variable.
4. Pollutant dispersion is significantly affected by nearby terrain features or large bodies of water.

In most of those situations, more refined analytical techniques, such as computer-based dispersion models², can be of considerable help in estimating air quality impact.

In all cases, particularly when proceeding beyond the scope of this guideline, the services of knowledgeable, well-trained air pollution engineers, meteorologists and air quality analysts should be engaged. An air quality simulation model applied improperly can lead to serious misjudgments regarding the source impact.

2. SOURCE DATA

In order to estimate the impact of a stationary point source on air quality, certain characteristics of the source must be known. As a minimum, the following information should generally be available:

- Pollutant emission rate;
- Stack height;
- Stack gas temperature and volume flow rate (for plume rise calculations);
- Location of the point of emission with respect to surrounding topography, and the character of that topography;
- A detailed description of all structures in the vicinity of (or attached to) the stack in question. (See the discussion of aerodynamic downwash in Procedure 4(f) on page 4-18.)
- Similar information from other significant sources in the vicinity of the subject source (or air quality data or dispersion modeling results that demonstrate the air quality impact of those sources).

2.1 Emissions

The analysis of air quality impact requires that the emissions from each source be completely characterized. If the pollutants are not emitted at a constant rate (most are not), information should be obtained on how emissions vary with season, day or the week, and hour of the day. In most cases, emission rates vary with the source production rate or rate of fuel consumption. For example, for a coal-fired power plant, emissions are related to the kilowatt-hours of electricity produced, which is proportional to the tonnage of coal used to produce the electricity. If pollutant emission data are not directly available, emissions

can be estimated from fuel consumption or production rates by multiplying the rates by appropriate emission factors.^{4,5} Emission factors can be determined using three different methods. They are listed below in decreasing order of confidence:

1. Stack-test results or other emission measurements from an identical or similar source.
2. Material balance calculations based on engineering knowledge of the process.
3. Emission factors derived for similar sources or obtained from a compilation by the U.S. Environmental Protection Agency.⁵

In cases where emissions are reduced by control equipment, the effectiveness of the controls must be accounted for in the emissions analysis. The source operator can estimate control effectiveness in reducing emissions and how this effectiveness varies with changes in plant operating conditions. EPA Report No. APTD-1570⁶ is a compilation of the types of control and control efficiencies for a variety of types of sources that are reported in the National Emissions Data System (NEDS). More detailed guides to the available types and degrees of control may be found in standard references.⁷⁻¹⁶

2.2 Merged Parameters for Multiple Stacks

Sources that emit the same pollutant from several similar stacks that are within about 100 meters of each other may be analyzed by treating all of the emissions as coming from a single representative stack⁴.

For each stack compute the parameter K:

$$K = \frac{hVT}{Q} S$$

where K = an arbitrary parameter accounting for the relative influence of stack height, plume rise, and emission rate on concentrations

h = stack height (m)

$V = (\pi/4) d^2 v_s$ = stack gas volume flow rate (m^3/sec)

d = stack exit diameter (m)

v_s = stack gas exit velocity (m/sec)

T_s = stack gas exit temperature (K)

Q = pollutant emission rate (g/sec)

The stack that has the lowest value of K is used as a "representative" stack. Then the sum of the emissions from all stacks is assumed to be emitted from the representative stack; i.e., the equivalent source is characterized by h_1 , V_1 , T_{s1} and Q , where subscript 1 indicates the representative stack and $Q = Q_1 + Q_2 + \dots + Q_n$.

The parameters from dissimilar stacks should be merged with caution. For example, if the stacks are located more than about 100 meters apart, or if stack heights or volume flow rates differ by more than about 20 percent, the resulting estimates of concentrations due to the merged stack procedure may be unacceptably high.

2.3 Topographic Considerations

It is important to study the topography in the vicinity of the source being analyzed. Topographic features, through their effects on plume behavior, will sometimes be a significant factor in determining ambient ground-level pollutant concentrations. Important features to note are the locations of large bodies of water, elevated terrain, valley configurations, and general terrain roughness in the vicinity of the source.

Section 4.5.1 provides guidance on estimating ambient concentrations at receptors located on elevated terrain features. Any other topographic considerations are beyond the scope of this guideline.

3. METEOROLOGICAL DATA

Each computational procedure given in Section 4 for estimating the impact of a stationary source on air quality requires data on one or more of the following meteorological parameters:

- Wind speed and direction
- Stability class
- Mixing height
- Temperature

A discussion of each of those parameters and their relation to the procedures of Section 4 follows.

3.1 Wind Speed and Direction

Wind speed and direction data are required to estimate short-term peak and long-term average concentrations. The wind speed determines (1) the amount by which a plume is diluted as it leaves the stack and (2) the plume rise downwind of the stack. These factors, in turn, affect the magnitude of and distance to the maximum ground-level concentration.

Most wind data are collected near ground level. The wind speed at plume height can be estimated from the following power law equation:

$$u = u_1 \left[\frac{h}{z_1} \right]^{\beta}$$

where:

u = the wind speed (m/sec) at height h ,

u_1 = the wind speed at the anemometer height z_1 , and

p = the stability-related exponent from Table 3-1.

Table 3-1. WIND PROFILE EXPONENT AS A FUNCTION OF ATMOSPHERIC STABILITY

Stability Class	Exponent
A	0.10
B	0.15
C	0.20
D	0.25
E, F	0.30

The wind direction is an approximation to the direction of transport of the plume. The variability of the direction of transport over a period of time is a major factor in estimating ground-level concentrations averaged over that time period.

Wind speed and direction data from National Weather Service, Air Weather Service, and Naval Weather Service stations are available from the National Climatic Center, Asheville, North Carolina. Wind data are often also recorded at existing plant sites and at air quality monitoring sites. It is important that the equipment used to record such data be properly designed, sited, and maintained to record data that are reasonably representative of the direction and speed of the plume.

3.2 Stability

Stability categories, as depicted in Tables 3-1 and 3-2, are measures of atmospheric turbulence. The stability category at any given time will

Table 3-2. KEY TO STABILITY CATEGORIES

Surface Wind Speed at a Height of 10m (m/sec)	Day			Night	
	Incoming Solar Radiation* (Insolation)			Thinly Overcast or $\geq 4/8$ Low Cloud Cover	$\leq 3/8$ Cloud Cover
	Strong	Moderate	Slight		
< 2	A	A-B	B		
2-3	A-B	B	C	E	F
3-5	B	B-C	C	D	E
5-6	C	C-D	D	D	D
> 6	C	D	D	D	D

The neutral class (D) should be assumed for all overcast conditions during day or night.

*Appropriate insolation categories may be determined through the use of sky cover and solar elevation information as follows:

Sky Cover	Solar Elevation Angle $> 60^\circ$	Solar Elevation Angle $\leq 60^\circ$ But $> 35^\circ$	Solar Elevation Angle $\leq 35^\circ$ But $> 15^\circ$
4/8 or Less or Any Amount of High Thin Clouds	Strong	Moderate	Slight
5/8 to 7/8 Middle Clouds (7000 feet to 16,000 foot base)	Moderate	Slight	Slight
5/8 to 7/8 Low Clouds (less than 7000 foot base)	Slight	Slight	Slight

depend upon static stability (the change in temperature with height), thermal turbulence (caused by heating of the air at ground level), and mechanical turbulence (a function of wind speed and surface roughness). It is generally estimated by a method given by Turner¹⁷, which requires information on solar elevation angle, cloud cover, ceiling height, and wind speed (see Table 3-2).

The solar elevation angle is a function of the time of year and the time of day, and is presented in charts in the Smithsonian Meteorological Tables¹⁸. The hourly weather observations of the National Weather Service include cloud cover, ceiling height, and wind speed. These data are available from the National Climatic Center.

For computation of seasonal and annual concentrations, a joint frequency distribution of stability class, wind direction, and wind speed (stability wind rose) is needed. Such frequency distributions can be obtained from the National Climatic Center.

3.3 Mixing Height

The mixing height is the distance above the ground to which relatively free vertical mixing occurs in the atmosphere. When the mixing height is low (but still above plume height) ambient ground-level concentrations will be relatively high because the pollutants are prevented from dispersing upward. For estimating long-term average concentration, it is generally adequate to use an annual-average mixing height rather than daily values.

Mixing height data are generally derived from surface temperatures and from the twice-daily upper air soundings which are made at selected

National Weather Service Stations. The procedure used to determine mixing heights is one developed by Holzworth¹⁹. Tabulations and summaries of mixing height data can be obtained from the National Climatic Center.

3.4 Temperature

Ambient air temperature must be known in order to calculate the amount of rise of a buoyant plume. Plume rise is proportional to a fractional power of the temperature difference between the stack gases and the ambient air (see Section 4.2). Ambient temperature data are collected hourly at National Weather Service Stations, and are available from the National Climatic Center.

4. ESTIMATING SOURCE IMPACT ON AIR QUALITY

A three-phase approach, as discussed in the Introduction, is recommended for estimating the air quality impact of a proposed major source:

Phase 1. Simple screening analysis

Phase 2. Detailed screening (basic modeling) analysis

Phase 3. Refined modeling analysis*

This section presents the simple screening procedure (Section 4.1) and the detailed screening procedures (Sections 4.2 through 4.5). All of the procedures, with the partial exception of Section 4.5.1, are based upon the bi-variate Gaussian dispersion model assumptions described in the Workbook of Atmospheric Dispersion Estimates¹⁷. A consistent set of units (meters, grams, seconds) is used throughout:

Distance (m)

Pollutant Emission Rate (g/sec)

Pollutant Concentration (g/m³)

Wind Speed (m/sec)

4.1 Simple Screening Procedure

The simple screening procedure is the "first phase" that is recommended when assessing the air quality impact of a new point source. The purpose of this screening procedure is to eliminate from further consideration those sources that clearly will not cause or contribute to ambient concentrations in excess of short-term air quality standards.

*The Phase 3 analysis is beyond the scope of this guideline, and the user is referred to the Guideline on Air Quality Models².

The scope of the procedure is confined to point sources, plume heights of 10 to 300 meters and concentration averaging times of 1 to 24 hours. The procedure is particularly useful for sources where the short-term air quality standards are the "controlling" ones; i.e., in cases where meeting the short-term standards provides good assurance of meeting the annual standard for that pollutant. Elevated point sources (i.e., sources for which the emission points are well above ground level) are often in that category, particularly when they are remote from other sources.

When applying the screening procedure to elevated point sources, the following assumptions apply:

1. No aerodynamic downwash of the effluent plume occurs. (Refer to Procedure 4(f) on page 4-18 to determine if downwash is a potential problem.)
2. The plume does not intercept terrain. (Refer to Section 4.5.1 to determine if terrain may be intercepted.)

If the potential for either of those problems is found to exist, the calculation procedure described in the indicated section should be applied (in addition to the screening procedure described in this section) to estimate the resulting maximum ground-level concentration. Except for sources close to ground level, the calculation procedures for aerodynamic downwash and terrain interception will tend to yield higher concentration estimates than the simple screening procedure.

The screening procedure utilizes the Gaussian dispersion equation to estimate the maximum 1-hour ground-level concentration likely to result from the source in question (Computations 1-6 below). To obtain concentrations for other averaging times up to 24 hours, multiply the

one-hour value by an appropriate factor (Computation 7). Then account for background concentrations (Computation 8) to obtain a total concentration estimate. That estimate is then used, in conjunction with any downwash or terrain estimates, to determine if further analysis of the source impact is warranted (Computation 9):

1. Compute the normalized plume rise ($u\Delta h$), utilizing the procedure described in Step 1 on page 4-7.

2. Divide the $u\Delta h$ value obtained in (1) by each of five wind speeds ($u = 0.5, 1.0, 2.0, 3.0$ and 5.0 m/sec) to estimate the actual plume rise (Δh) for each wind speed:

$$\Delta h = \frac{(u\Delta h)}{u} \quad \text{meters}$$

3. Compute the plume height (H) that will occur during each wind speed by adding the respective plume rises to the stack height (h_s):

$$H = h_s + \Delta h \quad \text{meters}$$

4. For each plume height computed in (3), estimate a xu/Q value from Figure 4-1.

5. Divide each xu/Q value by the respective wind speed to determine the corresponding x/Q values:

$$x/Q = \frac{xu/Q}{u}$$

6. Multiply the maximum x/Q value obtained in (5) by the emission rate Q (g/sec), and incorporate a factor of 2 margin of safety, to obtain the maximum 1-hour ground-level concentration x_1 (g/m^3) due to emissions from the stack in question:

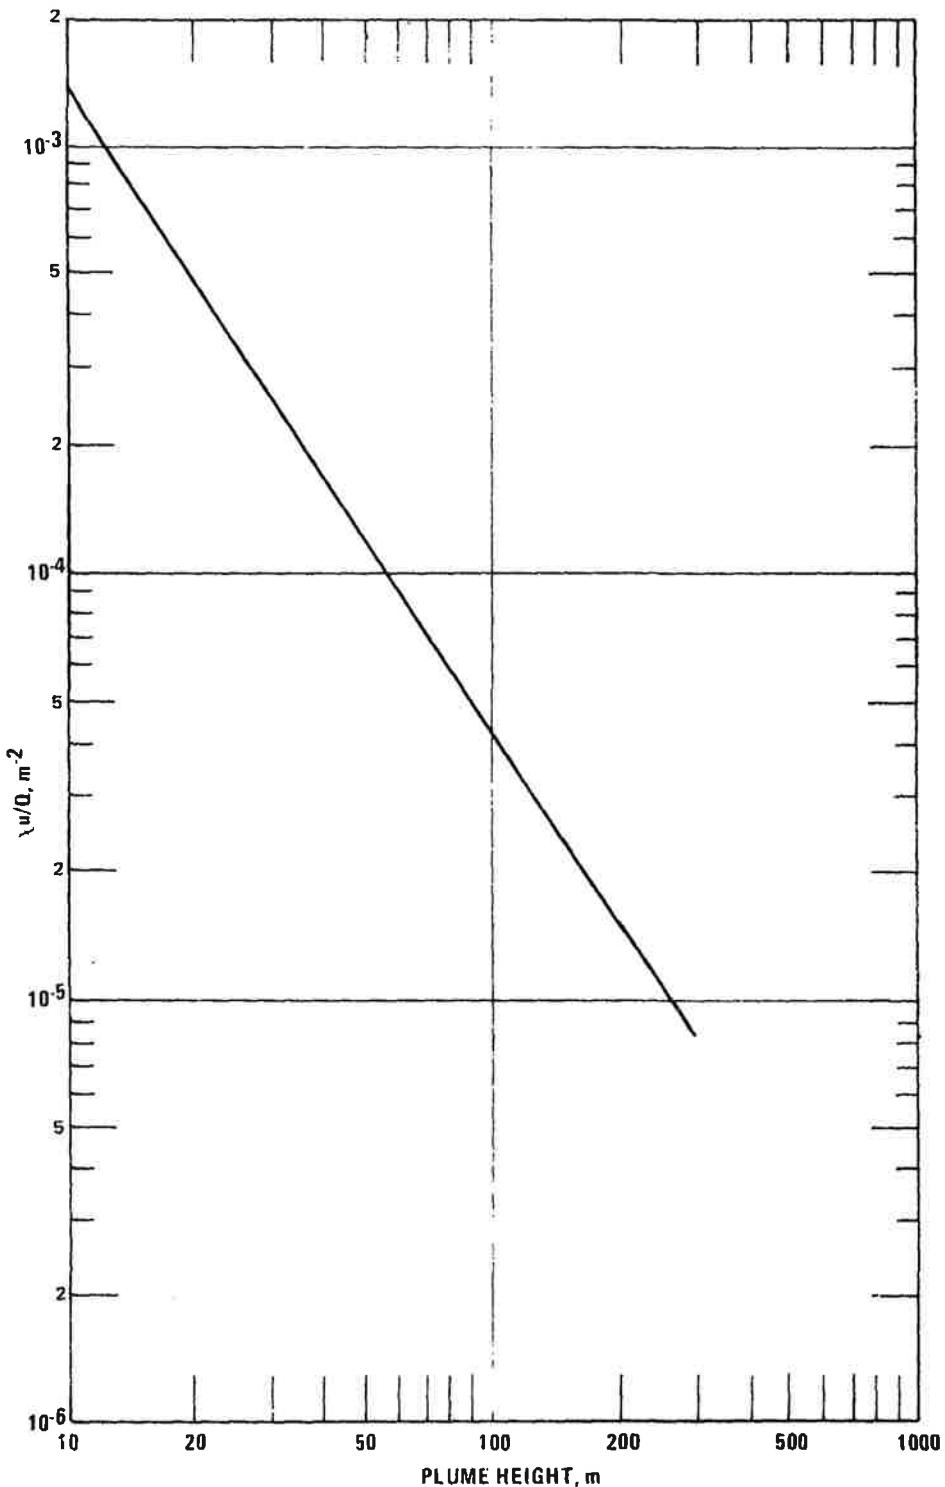

Figure 4-1. Maximum χ_u/Q as a function of plume height, H (for use only with the simple screening procedure).²⁰

$$x_1 = 2Q[x/Q]$$

The margin of safety is incorporated in the screening procedure to account for the potential inaccuracy of concentration estimates obtained through calculations of this type.

If more than one stack is being considered, and the procedure for merging parameters for multiple stacks is not applicable (Section 2.2), (1) through (6) must be applied for each stack separately. The maximum values (x_1) found for each stack are then added together to estimate the total maximum 1-hour concentration.

7. To obtain a concentration estimate (x_p) for an averaging time greater than one hour, multiply the one-hour value by an appropriate factor R. (See the discussion in Step 5 on page 4-20, which addresses multiplication factors for averaging times longer than one hour.)

$$x_p = x_1 (R)$$

8. Next, contributions from other sources (B) should be taken into account, yielding the final screening procedure concentration estimate x_{max} (g/m³):

$$x_{max} = x_p + B$$

Guidance on estimating concentrations due to other sources is provided in Section 4.5.2.

9. Based on the estimate of x_{max} and (if applicable) estimates of concentrations due to downwash or terrain problems, determine if further

analysis of the source is warranted: If any of the estimated concentrations exceeds the air quality level of concern (e.g., an air quality standard), proceed to Section 4.2 for further analysis. If the concentrations are below the level of concern, the source can be safely assumed to pose no threat to that air quality level, and no further analysis is necessary.*

4.2 Estimating Maximum Short-Term Concentrations

The basic modeling procedures described in the remainder of this guideline comprise the recommended "second phase" (or detailed screening) that may be used in assessing new source air quality impact. The procedures are intended for application in those cases where the simple screening procedure (first phase) indicates a potential air quality problem.

Two parallel approaches are offered. Primary emphasis is given to an approach that can be applied without the aid of a computer (a pocket or desk calculator will suffice). The alternative approach, which is only applicable in certain cases, is to use a series of computer programs that has been made available by EPA. The series of programs, referred to as UNAMAP ("User's Network for Applied Modeling of Air Pollution"), is available through a commercial teleprocessing network and it can be accessed by remote terminal. Alternatively, a magnetic computer tape of the UNAMAP programs may be purchased from the National Technical Information Service. (See Appendix A for more information about UNAMAP).

*A relatively large degree of "conservatism" is incorporated in the simple screening procedure and in the procedures for downwash and terrain situations to provide reasonable assurance that maximum concentrations will not be underestimated.

This section (4.2) presents the basic procedures for estimating maximum short-term concentrations for specific meteorological situations. In Steps 1-3, plume rise^{21,22,23} and critical wind speed are computed. In Step 4, maximum 1-hour concentrations are estimated. In Step 5, the 1-hour concentrations are used to estimate concentrations for averaging times up to 24 hours. Contributions from other sources are accounted for in Step 6.

If aerodynamic downwash is a problem at the facility (see Procedure 4(f) on page 4-18) or if the UNAMAP computer programs are to be used, begin with Step 4. For area sources, refer to Section 4.5.2 (C) for guidance. Otherwise, proceed with Step 1:

Step 1. Estimate the normalized plume rise ($u\Delta h$) that is applicable to the source during neutral and unstable atmospheric conditions. First, compute a buoyancy term F:

$$F = \frac{g}{4} v_s d^2 \left[\frac{T_s - T_a}{T_s} \right]$$

$$= 3.12 V \left[\frac{T_s - T_a}{T_s} \right]$$

where g = acceleration of gravity (9.8 m/sec²)

v_s = stack gas exit velocity (m/sec)*

d = inside stack diameter (m)

T_s = stack gas temperature (K)*

*If stack gas temperature or exit velocity data are unavailable, they may be approximated from guidelines that present typical values for those parameters for existing plants²⁴.

T_a = ambient air temperature (K) (If no ambient temperature data are available, assume that $T_a = 293$ K.)

V = actual stack gas flow rate (m^3/sec)

Normalized plume rise is then given by:

$$u\Delta h = 21.4F^{3/4} \text{ when } F < 55 \text{ m}^4/\text{sec}^3$$

$$u\Delta h = 38.7F^{3/5} \text{ when } F \geq 55 \text{ m}^4/\text{sec}^3$$

Step 2. Estimate the critical wind speed (u_c) applicable to the source during neutral and unstable atmospheric conditions. The critical wind speed is a function of two opposing effects that occur with increasing wind speed; namely, increased dilution of the effluent as it leaves the stack (which tends to decrease the maximum impact on ground-level concentrations) and suppression of plume rise (tending to increase the impact). The wind speed at which the interaction of those opposing effects results in the highest ground-level concentration is the critical wind speed.

The critical wind speed can be estimated through the following approximation:

$$u_c = \frac{(u\Delta h)}{h_s}$$

Step 3. For sources where the height of emission is greater than or equal to 50 meters, proceed to Step 4. If the emission height is less than 50 meters, stable atmospheric conditions may be critical. The stable case plume rise (Δh) should be estimated as the smaller of the following two values: (The second value is the limiting case for calm and near calm conditions.)

$$\Delta h = 2.4 \left[\frac{F}{ug} \frac{T_a}{\frac{\Delta \theta}{\Delta z}} \right]^{1/3}$$

$$\Delta h = 5F^{1/4} \left[\frac{g}{T_a} \frac{\Delta \theta}{\Delta z} \right]^{-3/8}$$

The value $\frac{\Delta \theta}{\Delta z}$ is the change in potential temperature with height. If typical values of $\frac{\Delta \theta}{\Delta z}$ are not known for the site, a value of 0.02 K/m for E stability, and 0.035 K/m for F stability may be used for sources with stacks less than about 100m high. For stacks more than 100m high, use 0.01 K/m and 0.02 K/m respectively.

Step 4. Estimate maximum 1-hour concentrations that will occur during various dispersion situations. (Note: UNAMAP users begin with this step.) First, using Table 4-1 as a guide, determine the dispersion situations and corresponding calculation procedures applicable to the source being considered. Then apply the applicable calculation procedures, which are described on the following pages, in order to estimate maximum 1-hour concentrations. Then proceed to Step 5 on page 4-20.

Table 4-1. CALCULATION PROCEDURES TO USE WITH
VARIOUS STACK HEIGHTS

Height of Emission (stack height)	Applicable Calculation Procedures
$h_s \geq 50$ meters	Looping 4(a) Limited mixing 4(b) Coning 4(c) Fumigation 4(e)
$10 \leq h_s < 50$ meters	Looping 4(a) Coning 4(c) Fanning 4(d) Fumigation 4(e)
$h_s < 10$ meters	Coning 4(c) Fanning 4(d)
$h_s < h_b + 1.5a$	Downwash 4(f)

Procedure 4(a): Looping Plume

During very unstable conditions the plume from a stack will be mixed to ground level relatively close to the source, resulting in high short-term concentrations. Such a plume is called a looping plume because of its appearance.

Calculation Procedure:

1. Estimate plume height H , using the values of $u_{\Delta h}$ and u_c computed in Steps 1 and 2 on pages 4-7 and 4-8:

$$H = 2 h_s \text{ if } u_c \leq 3.0 \text{ m/sec}$$

$$H = h_s + \frac{[u_{\Delta h}]}{3.0} \text{ if } u_c > 3.0 \text{ m/sec}$$

2. Determine the maximum xu/Q from Figure 4-2 (for the rural case) using the A stability curve, or from Figure 4-3 (urban case) using the A-B stability curve.

3. Compute the maximum 1-hour concentration x_1 :

$$x_1 = \frac{Q}{u_c} [xu/Q]$$

If the computed value of u_c is greater than 3, set it equal to 3.

An alternate procedure using the UNAMAP series of computer programs may be applied:

1. Using the PTMAX program, enter the emission rate, stack height, stack gas temperature and either the actual stack gas volume flow rate or the stack diameter and stack gas exit velocity.
2. Assume stability class A.
3. Select the highest 1-hour concentration printed.

Procedure 4(b): Limited Mixing

Limited mixing (also called plume trapping) occurs when a stable layer aloft limits the vertical mixing of the plume. The result can be relatively high ground-level concentrations that may persist for hours. The highest concentrations occur when the mixing height is at or slightly above the plume height.

Calculation Procedure:

1. Estimate plume height H , using the $u\Delta h$ value computed in Step 1 on page 4-7:

$$H = h_s + \frac{[u\Delta h]}{2.5}$$

The value 2.5 represents the assumed critical wind speed (m/sec).

2. Using the curve for stability C on Figure 4-2 (rural) or Figure 4-3 (urban), determine the maximum 1-hour x_u/Q for that plume height.
3. Compute the maximum 1-hour concentration x_1 :

$$x_1 = 2Q[x_u/Q]/2.5$$

The value 2 reflects the assumption that the maximum concentration may be double the maximum that would occur if there were no restriction to vertical mixing.

Alternate procedure using the UNAMAP programs:

1. Using the PTMAX program, enter emission rate, stack height, stack gas temperature and either the actual stack gas volume flow, or the stack diameter and stack gas exit velocity.
2. Assume stability class C.
3. Select the 1-hour concentration for the 2.5 m/sec wind speed, and double the value.

Procedure 4(c): Coning Plume

Some buoyant plumes will have their greatest impact on ground-level concentrations during neutral or near-neutral conditions (coning plume).

Calculation procedure:

1. Assume that plume height is equal to twice the stack height:

$$H = 2 h_s$$

2. Using the curve for stability C on Figure 4-2 (rural) or Figure 4-3 (urban), determine the maximum 1-hour xu/Q for that plume height.

3. Compute the maximum 1-hour concentration x_1 , using the value of u_c computed in Step 2 on page 4-8:

$$x_1 = Q[xu/Q]/u_c$$

If u_c is substantially greater than wind speeds that one could reasonably expect at plume height, a more reasonable critical wind speed (u_c') may be specified, and the equation $H = h_s + [u\Delta h]/u_c'$ used for Step 1 and $x_1 = Q[xu/Q]/u_c'$ used for Step 3.

Caution: Wind speeds aloft are generally higher than at the surface, so that a wind speed that is rare at the surface may be relatively common at plume height.

Alternate procedure using the UNAMAP computer programs:

1. Using the PTMAX program, enter the emission rate, stack height, stack gas temperature, and either the actual stack gas volume flow or the stack diameter and stack gas exit velocity.

2. Assume stability class C.
3. Select the highest 1-hour concentration printed.

Procedure 4(d): Fanning Plume

Low-level sources (i.e., sources with stack heights less than about 50 m) sometimes produce the highest concentrations during stable atmospheric conditions. Under such conditions, the plume's vertical spread is severely restricted and horizontal spreading is also reduced. This results in what is called a fanning plume.

Calculation procedures:

- A. For low-level sources with some plume rise, calculate the concentration as follows:

1. Compute the plume height (H) that will occur during F stability (for rural cases) or E stability (for urban cases) and for wind speeds of 2, 3 and 5 m/sec. Use the stable-case plume rise (Δh) values obtained in Step 3 on page 4-8:

$$H = h_s + \Delta h$$

2. For each wind speed and stability considered in (1), find the maximum 1-hour xu/Q from Figure 4-2 (rural) or 4-3 (urban). Compute the maximum 1-hour concentration for each case, using

$$x_1 = [xu/Q] Q/u$$

and select the highest concentration computed.

- B. For low-level sources with no plume rise ($H = h_s$), find the maximum 1-hour xu/Q from Figure 4-2 (rural case--assume F stability) or

4-3 (urban case--assume E stability). Compute the maximum 1-hour concentration, assuming that $u = 1 \text{ m/sec}$:

$$x_1 = [xu/Q] Q/u$$

Alternate procedure using the UNAMAP computer programs:

1. Using PTMAX, follow the procedure given for the "Looping Plume Model," except apply the procedure for stabilities E and F.

2. If the minimum distance at which the concentration is of concern (e.g., the distance to the closest point at which the general public has access) is greater than the distances indicated in the PTMAX program output, apply the PTDIS model (see Appendix A) and specify the minimum distance of concern.

3. Select the highest of the 1-hour concentrations computed.

Procedure 4(e): Fumigation

(Note: UNAMAP is not applicable to the fumigation situation.)

Fumigation occurs when a plume that was originally emitted into a stable layer is mixed rapidly to ground-level when unstable air below the plume reaches plume level. Fumigation can cause very high ground-level concentrations. Typical situations in which fumigation occurs are:

1. "Burning off" of the nocturnal radiation inversion by solar warming of the ground surface;
2. Advection of pollutants from a stable rural environment to a turbulent urban environment;
3. "Shoreline fumigation" caused by advection of pollutants from a stable marine environment to an unstable inland environment.

The following procedure is for estimating concentrations only due to the first type of fumigation listed above. (The second and third types can also result in high concentrations²⁵. However, procedures for estimating concentrations during those situations are beyond the scope of this document.)

1. Compute the plume height (H) that will occur during F stability and a wind speed of 2.5 m/sec:

$$H = h_s + \Delta h$$

To obtain a value for Δh , use the procedure described in Step 3 on page 4-8.

2. Using Table 4-2 (derived from Turner's fumigation procedure¹⁷), estimate the downwind distance at which the maximum fumigation concentration is expected to occur. (If this distance is less than about 2 kilometers, fumigation concentrations are not likely to significantly exceed the limited mixing concentrations estimated in Procedure 4(b).)

3. At the distance estimated in (2), determine the values of σ_y and σ_z for F stability from Figures 4-4 and 4-5.

4. Compute the maximum concentration (x_f), using the following equation¹⁷:

$$x_f = \frac{Q}{\sqrt{2\pi} u(\sigma_y + H/8) (H + 2\sigma_z)}$$

The concentration x_f can be expected to persist for about 30 to 90 minutes. It is not recommended that the computed concentration be extrapolated to longer averaging times.

Table 4-2. DOWNWIND DISTANCE (km) TO THE MAXIMUM GROUND-LEVEL FUMIGATION CONCENTRATION AS A FUNCTION OF STACK HEIGHT (h) AND PLUME HEIGHT (H); STABILITY CLASS F AND WIND SPEED = 2.5 m/sec

Procedure 4(f): Downwash

(Note: UNAMAP is not applicable to the downwash situation.) In some cases, the aerodynamic turbulence induced by a building will cause a pollutant emitted from an elevated source to be mixed rapidly toward the ground (downwash), resulting in higher ground-level concentrations immediately to the lee of the building than would otherwise occur. Thus, when assessing the impact of a source on air quality, the possibility of downwash problems should be investigated. If downwash is found to be a potential problem, its effect on air quality should be estimated.

The best approach to determine if downwash will be a problem at a proposed facility is to conduct observations of effluent behavior at a similar facility. If such a study is not feasible, wind tunnel study is recommended, particularly if the facility has a complex configuration. If neither of the above approaches is feasible, and if the facility has a simple configuration (e.g., a stack adjacent or attached to a single rectangular building), a simple rule-of-thumb²⁶ may be applied to determine the stack height (h_s) necessary to avoid downwash problems:

$$h_s \geq h_b + 1.5 a,$$

where h_b is building height and "a" is the lesser of either building height or maximum building width. In other words, if the stack height is equal to or greater than $h_b + 1.5 a$, downwash is unlikely to be a problem.

If there is more than one stack at a given facility, the above rule may be successively applied to each stack. If more than one building is involved, the rule may be successively applied to each building. For relatively complex source configurations the rule may not be applicable, particularly when the building shapes are much different than the simple rectangular building for which the above equation was derived.

If it is determined that the potential for downwash exists, the next step is to estimate the maximum ground-level pollutant concentrations that will occur as a result of the downwash. The impact of downwash on ground-level concentrations will be a function of many factors, including building configuration, emission characteristics, stack height, wind speed and wind direction. Generally, however, downwash will have its greatest impact when the effluent:

- (1) has relatively little initial buoyancy or vertical momentum, and
- (2) is released from a point on the building itself or from a stack that is close to the building (within about 3 to 5 building heights) and substantially below the height (computed above) that is necessary to avoid downwash.

In such a case, which may be considered a "worst case" condition for downwash, the maximum 1-hour impact on ground-level concentrations (x_1) will occur within a few building heights of the downwind edge of the building, and can be estimated by the following simple approximation²⁷

$$x_1 = \frac{Q}{1.5(A)(u)}$$

where Q is the maximum emission rate likely to occur for the averaging time of concern, A is the cross-sectional area of the building normal to

the wind, and u is wind speed. For u , one should choose the lowest wind speed likely to result in entrainment of most or all of the pollutant into the downwash "cavity" in the lee of the building. If no data are available from which that minimum wind speed can be estimated, assume a speed of 3 m/sec for the worst case.

It is important to recognize that the above equation for x_1 is only applicable to the worst case described above. (Even for the worst case, the equation will tend to overpredict ground-level concentrations, particularly for relatively tall sources.) For situations significantly different than the worst case, and for complex source configurations, a more detailed analysis is required^{28, 29}.

Step 5. Obtain concentration estimates for the averaging times of concern. The maximum 1-hour concentration is the highest of the concentrations estimated in Step 4. For averaging times greater than one hour, the maximum concentration will generally be less than that 1-hour value. The following discussion describes how that 1-hour value may be used to make an estimate of maximum concentrations for longer averaging times. (This does not apply to the fumigation case described in Procedure 4(e)).

The ratio between a longer-term maximum concentration and a 1-hour maximum will depend upon the duration of the longer averaging time, source characteristics, and local climatology and topography. Because of the many ways in which such factors interact, it is not practical to

categorize all situations that will typically result in any specified ratio between the longer-term and 1-hour maxima. Therefore, ratios are presented here for a "general case" (where it is assumed that emissions are constant and there are no terrain or downwash problems), and the user is given some flexibility to subjectively adjust those ratios to represent more closely any particular point source:

<u>Averaging Time</u>	<u>Multiplying Factor</u>
3 hours	0.9 (<u>± 0.1</u>)
8 hours	0.7 (<u>± 0.2</u>)
24 hours	0.4 (<u>± 0.2</u>)

To obtain the estimated maximum concentration for a 3, 8 or 24-hour averaging time, multiply the 1-hour maximum by the given factor. The numbers in parentheses are recommended limits to which one may diverge from the multiplying factors representing the general case. For example, if aerodynamic downwash or terrain is a problem at the facility, or if the emission height is very low, it may be desirable to increase the factors (within the limits specified in parentheses). On the other hand, if the stack is relatively tall and there are no terrain or downwash problems, it may be appropriate to decrease the factors.

The multiplying factors listed above are based upon general experience with elevated point sources. The factors are only intended as a rough guide for estimating maximum concentrations for averaging times

greater than one hour. A degree of conservatism is incorporated in the factors to provide reasonable assurance that maximum concentrations for 3, 8 and 24 hours will not be underestimated.

Step 6. Add the expected contribution from other sources to the concentration estimated in Step 5. Concentrations due to other sources can be estimated from measured data, or by computing the effect of existing sources on air quality in the area being studied. Procedures for estimating such concentrations are given in Section 4.5.2.

At this point in the analysis, a first approximation of maximum short-term ambient concentrations (source impact plus contributions from other sources) has been obtained. If concentrations at specified locations, long-term concentrations, or other special topics must be addressed, refer to applicable portions of Sections 4.3 to 4.5.

4.3 Short-Term Concentrations at Specified Locations

In Section 4.2, maximum concentrations are generally estimated without specific attention to the location(s) of the receptor(s). In some cases, however, it is particularly important to estimate the impact of a new source on air quality in specified (e.g., critical) areas. For example, there may be nearby locations at which high pollutant concentrations already occur due to other sources, and where a relatively small addition to ambient concentrations might cause ambient standards to be exceeded.

Each of the sources affecting a given location can be expected to produce its greatest impact during certain meteorological conditions.

The composite maximum concentration at that location due to the interaction of all the sources may occur under different meteorological conditions than those which produce the highest impact from any one source. Thus, the analysis of this problem can be difficult, and may require substantial use of high-speed computers.

Despite the potential complexity of the problem, some preliminary calculations can be made that will at least indicate whether or not a more detailed study is needed. For example, if the preliminary analysis indicates that the estimated concentrations are near or above the air quality standards of concern, a more detailed analysis will probably be required.

Calculation procedure (If the UNAMAP programs can be used, proceed to the paragraph following Step 10 below. Otherwise, proceed with Step 1.)

Step 1. Compute the normalized plume rise ($u\Delta h$), utilizing the procedure described in Step 1 on page 4-7.

Step 2. Divide the $u\Delta h$ value obtained above by each of several wind speeds ($u = 1, 3, 5, 10$, and 20 m/sec) to estimate the actual plume rise (Δh) associated with each wind speed:

$$\Delta h = \frac{(u\Delta h)}{u}$$

Step 3. Compute the plume height (H) that will occur during each wind speed by adding the respective plume rises to the stack height (h_s):

$$H = h_s + \Delta h$$

Step 4. For each stability class-wind speed combination listed below*, at the downwind distance of the "specified location," determine the xu/Q value from Figures 4-6 through 4-9 (rural) or Figures 4-12 through 4-14 (urban). Note in those figures (see the captions) that very restrictive mixing heights are assumed, resulting in trapping of the entire plume within a shallow layer.

<u>Stability Class</u>	<u>Wind Speed (m/sec)</u>
A	1, 3
B	1, 3, 5
C	1, 3, 5, 10,
D	1, 3, 5, 10, 20

Step 5. (If the physical stack height is greater than 50 meters, Steps 5 and 6 may be skipped.) Compute plume heights (H) for stability classes E and F, for wind speeds of 1, 3 and 5 m/sec:

$$H = h_s + \Delta h$$

where Δh is the plume rise as computed in Step 3 on page 4-8.

*Only consider those stability-wind speed combinations that can exist for the length of time it takes the plume to travel to the location of interest, plus at least one hour. Refer to Table 4-3 for the maximum durations of each stability class.

Table 4-3. MAXIMUM DURATION OF STABILITY CLASSES FOR SELECTED LATITUDES AND DATES

Latitude	Date	Maximum Duration of Stability Class (Hours)*			
		A	B	C	E,F
30°N	Dec 22	0	2	7	16
	Feb 9, Nov 3	0	4	8	15
	Mar 8, Oct 6	0	6	9	14
	Apr 3, Sept 10	2	7	10	14
	May 1, Aug 12	4	8	11	13
	Jun 22	4	8	12	12

	Apr 3, Sept 10	0	5	10	13
	May 8, Aug 6	2	7	11	11
	Jun 22	4	8	12	10

*Based on duration of solar angle above or below following limits:
 Class A - above 60°, Class B - above 35°, Class C - above 15°,
 Class E and F - below 0°. (Two hours have been added to the duration
 of solar angle below the horizon to account for the stable conditions
 that begin to occur about an hour before sunset and persist for an
 hour after sunrise.) For stability Classes A, B and C, the hours
 are centered on solar noon. Stability D can persist, in all the
 above cases, for periods in excess of 24 hours.

Step 6. For each stability class-wind speed combination considered in Step 5, at the downwind distance of the specified location, determine a x_u/Q value from Figures 4-10 and 4-11 (or Figure 4-15 for the urban case). Also, refer to the Step 4 footnote.

Step 7. For each x_u/Q value obtained in Step 4 (and Step 6 if applicable), compute x/Q :

$$x/Q = [x_u/Q]/u$$

Step 8. Select the largest x/Q and multiply by the source emission rate (g/sec) to obtain a 1-hour concentration value (g/m^3):

$$x_1 = Q[x/Q]_{\max}$$

Step 9. (This step is not applicable if the downwind distance to the specified location is either (1) less than 2 kilometers or (2) less than the distance to the maximum fumigation concentration, obtained from Table 4-2.) Compute the maximum 1-hour concentration, x_f , that will occur due to fumigation (discussed in Procedure 4(e) on page 4-15) using the following equation¹⁷:

$$x_f = \frac{Q}{\sqrt{2\pi} u (\sigma_y + H/8)(H + 2\sigma_z)}$$

Assume a wind speed of 2.5 m/sec and stability class F. From Figures 4-4 and 4-5 obtain σ_y and σ_z values for the downwind distance in question. Plume rise (used to determine H) is computed as in Step 3 on page 4-8.

Step 10. The highest 1-hour concentration at the specified location (not accounting for contributions from other sources) is the larger of the concentration values estimated in Steps 8 and 9. To estimate concentrations for averaging times greater than one hour, take the 1-hour value estimated in Step 8 only, and then refer to the averaging time procedure described earlier (Step 5 on page 4-20). To account for contributions from other sources, see Section 4.5.2.

If the UNAMAP series of computer programs is available, Steps 1 through 8 above can be accomplished as follows:

1. Using the PTMAX program, obtain plume heights (H) for each wind speed-stability combination considered in Step 4 (and Step 5 if applicable).

2. Using the PTDIS program, estimate the maximum concentration at the specified distance for each wind speed-stability combination considered in (1). For the mixing height input to PTDIS, use plume height (H) for stabilities A-D (and for the E stability urban case) and use 5000 meters for stabilities E and F (rural).

3. For the highest 1-hour concentration at the specified location, use the largest value obtained in (2).

4.4 Annual Average Concentrations

This section presents procedures for estimating annual average ambient concentrations caused by a single point source. The procedure for estimating the annual concentration at a specified location is

presented first, followed by a suggestion of how that procedure can be expanded to estimate the overall maximum annual concentration (regardless of location).

The procedures assume that the emissions are continuous and at a constant rate. The data required are emission rate, stack height, stack gas volume flow rate (or diameter and exit velocity), stack gas temperature, average afternoon mixing height, and a representative stability wind rose.* Refer to Sections 2 and 3 for a discussion of such data.

4.4.1 Annual Average Concentration at a Specified Location

Calculation procedure:

Step 1. (Applicable to stability categories A through D) Using the procedure described in Step 1 on page 4-7, obtain a normalized plume rise value ($u\Delta h$):

$$u\Delta h = 21.4 F^{3/4} \text{ when } F < 55 \text{ m}^4/\text{sec}^3$$

$$u\Delta h = 38.7 F^{3/5} \text{ when } F \geq 55 \text{ m}^4/\text{sec}^3$$

Step 2. (Applicable to stability categories E and F) Apply the following equation to estimate plume rise (Δh) as a function of wind speed. Apply the equation for both stable categories (E and F). Refer to Steps 1 and 3 on pages 4-7 and 4-8 for definition of terms in that equation:

*The stability wind rose is a joint frequency distribution of wind speed, wind direction and atmospheric stability for a given locality. Stability wind roses for many locations are available from the National Climatic Center, Asheville, North Carolina.

$$\Delta h = 2.4 \left[\frac{F}{ug} \frac{T_a}{\Delta \theta} \right]^{1/3}$$

Step 3. Compute plume rise (Δh) for each stability-wind speed category in Table 4-4 by (1) substituting the corresponding wind speed for u in the appropriate equation from Step 1 or 2 above and (2) solving the equation for Δh . The wind speeds listed in Table 4-4 are derived from the wind speed intervals used by the National Climatic Center (Table 4-5) in specifying stability-wind roses.

Step 4. Compute plume height (H) for each stability-wind speed category in Table 4-4 by adding the physical stack height (h_s) to each of the plume rise values computed in Step 3:

$$H = h_s + \Delta h$$

Step 5. Estimate the contribution to the annual average concentration at the specified location for each of the stability-wind speed categories in Table 4-4. First, determine the vertical dispersion coefficient (σ_z) for each stability class for the downwind distance (x) between the source and the specified location, using Figure 4-5. (Note: For urban F stability cases, use the σ_z for stability E.) Next, determine the mixing height (L) applicable to each stability class. For stabilities A to D, use the average afternoon mixing height for the area (Figure 4-16). For urban stabilities E and F, use the average morning

Table 4-4. STABILITY-WIND SPEED COMBINATIONS THAT ARE
CONSIDERED IN ESTIMATING ANNUAL AVERAGE CONCENTRATIONS

Atmospheric Stability Categories	Wind Speed (m/sec)					
	1.5	2.5	4.5	7	9.5	12.5
A	*	*				
B	*	*	*			
C	*	*	*	*	*	
D	*	*	*	*	*	*
E	*	*	*			
F	*	*				

*It is only necessary to consider the stability-wind speed conditions marked with an asterisk.

Table 4-5. WIND SPEED INTERVALS USED BY THE NATIONAL CLIMATIC CENTER
FOR JOINT FREQUENCY DISTRIBUTIONS OF WIND SPEED,
WIND DIRECTION AND STABILITY

Class	Speed Interval, m/sec (knots)	Representative Wind Speed m/sec
1	0 to 1.8 (0 to 3)	1.5
2	1.8 to 3.3 (4 to 6)	2.5
3	3.3 to 5.4 (7 to 10)	4.5
4	5.4 to 8.5 (11 to 16)	7.0
5	8.5 to 11.0 (17 to 21)	9.5
6	>11.0 (>21)	12.5

mixing height (Figure 4-17). For rural stabilities E and F, mixing height is not applicable. Then, use that information as follows: For all stability-wind conditions when the plume height (H) is greater than (L), assume a zero contribution to the annual average concentration at the specified location. For each condition when $\sigma_z \leq 0.8L$, and for all rural stability E and F cases, apply the following equation¹⁷ to estimate the contribution C (g/m^3):

$$C = \frac{2.03}{\sigma_z} \frac{Q}{u} f \exp \left[-\frac{1}{2} \left[\frac{H}{\sigma_z} \right]^2 \right]$$

For each condition during which $\sigma_z > 0.8L$, the following equation¹⁷ is applied:

$$C = \frac{2.55}{L} \frac{Q}{u} f$$

In those equations:

Q = pollutant emission rate (g/sec)

u = wind speed (m/sec)

f = frequency of occurrence of the particular wind speed-stability combination (obtained from the stability-wind rose) for the wind direction of concern. Only consider the wind speed-stability combinations for the wind direction that will bring the plume closest to the specified location.

Step 6. Sum the contributions (C) computed in Step 5 to estimate the annual average concentration at the specified location.

4.4.2 Maximum Annual Average Concentration

To estimate the overall maximum annual average concentration (the maximum concentration regardless of location) follow the procedure for

the annual average concentration at a specified location, repeating the procedure for each of several receptor distances, and for all directions. Because of the large number of calculations required, it is recommended that a computer model such as the CDM (Climatological Dispersion Model) be used. The CDM is a part of the UNAMAP series, which is discussed in Appendix A.

4.5 Special Topics

4.5.1 Concentrations at Receptors on Elevated Terrain

Dispersion models developed for estimating maximum ground-level concentrations in complex terrain have not been adequately evaluated. However, there is growing acceptance of the hypothesis that greater concentrations can occur on elevated than on flat terrain in the vicinity of an elevated source.* That is particularly true when the terrain extends well above the plume centerline (plume height).

A procedure is presented here to (1) determine whether or not an elevated plume may intercept terrain and, (2) if terrain is likely to be intercepted, estimate the maximum 24-hour concentration. The procedure is based largely upon the 24-hour mode of the EPA Valley Model³⁰. A concentration estimate obtained through the procedure will likely be somewhat greater than provided by the Valley Model, primarily due to the relatively conservative plume height that is used in Step 1:

*An exception may be certain flat terrain situations where aerodynamic downwash is a problem. (See Procedure 4(f) on page 4-18).

Step 1. Determine if the plume is likely to intercept terrain in the vicinity of the source:

(1) Compute one-half the plume rise ($\Delta h/2$) that can be expected during F stability and a wind speed (u) of 2.5 m/sec. (The reason for using only one-half the normally computed plume rise is to provide a margin of safety in determining (1) if the plume may intercept terrain and (2) the resulting ground-level concentration.):

$$\Delta h/2 = 1.2 \left[\frac{F T_a}{u g} \frac{\Delta \theta}{\Delta z} \right]^{1/3}$$

Refer to Steps 1 and 3 on pages 4-7 and 4-8 for definition of terms.

(2) Compute a conservative plume height (H_c) by adding the physical stack height (h_s) to $\Delta h/2$:

$$H_c = h_s + \Delta h/2$$

(3) Determine if any terrain features in the vicinity of the source are as high as H_c . If so, proceed with Step 2. If that is not the case, the plume is not likely to intercept terrain, and Step 2 is not applicable.*

*Even if the plume is not likely to intercept terrain (and for all concentration averaging times of concern) the user should attempt to account for terrain if the terrain features are significant. A procedure for doing so is to reduce the computed plume height H (for all stabilities) by the elevation difference between stack base and location of the receptor(s) in question. The adjusted plume heights can then be used in conjunction with the "flat-terrain" modeling procedures described earlier.

Step 2. Estimate the maximum 24-hour ground-level concentration on elevated terrain in the vicinity of the source:

- (1) Using a topographic map, determine the distance from the source to the nearest ground-level location at the height H_c .
- (2) Using Figure 4-18 and the distance determined in (a), estimate a 24-hour x/Q value.
- (3) Multiply the $(x/Q)_{24}$ value by the emission rate Q (g/sec) to estimate the maximum 24-hour concentration x_{24} due to plume interception of terrain:

$$x_{24} = (x/Q)_{24} (Q)$$

4.5.2 Contributions from Other Sources

To assess the significance of the air quality impact of a proposed source, the impact of nearby sources and "background" must be specifically determined. (Background includes those concentrations due to natural sources and distant, unspecified man-made sources.) Then the impact of the proposed source can be separately estimated, applying the techniques presented elsewhere in Section 4, and superimposed upon the impact of the nearby sources and background to determine total concentrations in the vicinity of the proposed source.

This section addresses the estimation of concentrations due to nearby sources and background. Three situations are considered:

- A. A proposed source relatively isolated from other sources.
- B. A proposed source in the vicinity of a few other sources.
- C. A proposed source in the vicinity of an urban area or other large number of sources.

It must be noted that in all references to air quality monitoring in the following discussion, it is assumed that the source in question is not yet operating. If the source is emitting pollutants during the period of air quality data collection, care must be taken not to use monitoring data influenced by the impact of the source.

A. Relatively Isolated Proposed Source

A proposed source may be considered to be isolated if it is expected that background will be the only other significant contributor to ambient pollutant concentrations in its vicinity. In that case, it is recommended that air quality data from monitors in the vicinity of the proposed source be used to estimate the background concentrations. If monitoring data are not available from the vicinity of the source, use data from a "regional" site; i.e., a site that characterizes air quality across a broad area, including that in which the source is located.

Annual average concentrations should be relatively easy to determine from available air quality data. For averaging times of about 24 hours or less, meteorology must be accounted for; i.e., it is necessary to ensure that background concentration estimates are based on data collected during the same meteorological situations as those during which the source is expected to have its greatest impact on air quality.

B. Proposed Source in the Vicinity of a Few Other Sources

If there already are a few sources in the vicinity of the proposed facility, the air quality impact of these sources should be accounted for.

As long as the number of nearby sources is relatively small, the recommended procedure is to use (1) air quality monitoring data to estimate background concentrations and (2) dispersion modeling to estimate concentrations due to the nearby sources. Then superimpose those estimates to determine total concentrations in the vicinity of the proposed source.

To estimate background concentrations, follow the same basic procedure as in the case of an isolated source. In this case, however, there is one added complication. Wind direction must be accounted for in order to single out the air quality data that represent background only (i.e., data that are not affected by contributions from nearby sources).

Concentrations due to the nearby sources will normally be best determined through dispersion modeling. The modeling techniques presented in this guideline may be used. If the user has access to UNAMAP (see Appendix A and references to UNAMAP in Section 4), the modeling effort can be considerably simplified. If UNAMAP can not be used, the user should model each source separately to estimate concentrations due to each source during various meteorological conditions and at an array of receptor locations (e.g., see Sections 4.3 and 4.4.1) where interactions between the effluents of the proposed source and the nearby sources can occur. Significant locations include (1) the area of expected maximum impact of the proposed source, (2) the area of maximum impact of the nearby sources, and (3) the area where all sources will combine to cause maximum impact. It may be necessary to identify those locations through a trial and error analysis.

C. Proposed Source in the Vicinity of an Urban Area or Other Large Number of Sources

For more than a very small number of nearby sources, it may be impractical to model each source separately. Two possible alternatives for estimating ambient concentrations are to use air quality monitor data or a multi-source dispersion model.

If data from a comprehensive air monitoring network are available, it may be possible to rely entirely on the measured data. The data should be adequate to permit a reliable assessment of maximum concentrations, particularly in (1) the area of expected maximum impact of the proposed source, (2) the area of maximum impact of the existing sources and (3) the area where all sources will combine to cause maximum impact.

In some cases, the available air quality monitor data will only be adequate to estimate general area-wide background concentrations. In such cases, there is no choice but to use dispersion modeling to estimate concentrations due to the nearby sources. If possible, a multi-source dispersion model should be used. If the user has access to UNAMAP (see Appendix A and references to UNAMAP in Section 4) the Climatological Dispersion Model (CDM) can be applied for long-term concentration estimates and the PTMTP model for short-term estimates (PTMTP can handle up to 25 point sources).

If it is not feasible to apply a multi-source model, and there is a considerable number of nearby sources, a rough estimate of maximum concentrations due to those sources can be made by arbitrarily grouping the sources into an area source through the following equation³¹. (The

estimate is primarily applicable to receptor locations near the center of the area source, defined below, although it may be considered a reasonable first-approximation for any location within the area.):

$$C = 18 \frac{Q}{u} (\Delta x)^{1/4}$$

where:

C = maximum contribution to ground-level concentrations (g/m^3)

Q = average emission rate ($\text{g}/\text{m}^2/\text{sec}$) within the area defined by Δx

u = assumed average wind speed (m/sec) for the averaging time of concern

Δx = length (m) of one side of the smallest square area that will contain the nearby sources, ignoring relatively small outlying sources or any source that is considerably removed from the other sources.

The best results will be obtained with the above equation when emissions are uniformly distributed over the defined area. Any large point sources in the vicinity should be modeled separately, and the estimated concentrations manually superimposed upon that computed for the area source.

4.5.3 Long Range Transport

In certain instances it will be necessary to estimate the air quality impact of a proposed source at locations beyond its vicinity (beyond roughly 30-50 kilometers). To estimate seasonal or annual average concentrations (out to about 100 kilometers) the procedures of Section 4.4 will provide a rough estimate. Those procedures should not be applied beyond 100 kilometers.

For short-term estimates (concentration averaging times up to about 24 hours) beyond the vicinity of the source and out to 100 kilometers downwind, the following procedure is recommended. The procedure accounts for the meteorological situations likely to result in the highest concentrations at large distances; viz., limited mixing conditions (Steps 1-5) and stable conditions (Steps 6-9):

Step 1. Estimate the normalized plume rise ($u\Delta h$) applicable to neutral and unstable atmospheric conditions. Use the procedure described in Step 1 on page 4-7.

Step 2. Compute plume height (H):

$$H = h_s + \frac{u\Delta h}{7.5}$$

Step 3. Using Figure 4-19, obtain a xu/Q value for the desired downwind distance (D stability case).

Step 4. Compute the maximum 1-hour D stability concentration x_{max} , using the xu/Q value obtained in Step 3:

$$x_{max} = \frac{Q}{7.5} [xu/Q]$$

For Q, substitute the source emission rate (g/sec). The value 7.5 is the recommended wind speed (m/sec) for computations of x_{max} at large distances under limited mixing conditions.

Step 5. Estimate the plume rise (Δh) applicable to stable conditions (stability class E), using the procedure described in Step 3 on page 4-8. Assume a wind speed equal to 4 m/sec.

Step 6. Compute plume height (H):

$$H = h_s + \Delta h$$

Step 7. From Figure 4-20, obtain a xu/Q value for the same distance considered in Step 3 above.

Step 8. Compute the maximum 1-hour E stability concentration x_{max} , using the xu/Q value obtained in Step 7:

$$x_{max} = \frac{Q}{4} [xu/Q]$$

where 4 is the assumed wind speed (m/sec).

Step 9. Select the higher of the x_{max} values computed in Steps 4 and 8. The selected value represents the highest 1-hour concentration likely to occur at the specified distance.

Step 10. To estimate concentrations for averaging times up to 24 hours, multiply the 1-hour value by the factors presented in Step 5 on page 4-20.

APPENDIX A

UNAMAP DISPERSION MODELS

Since May 1973 the Meteorology and Assessment Division, Environmental Protection Agency, Research Triangle Park, North Carolina, has made six air quality simulation models available to those wanting to make dispersion estimates. These six models are collectively referred to as UNAMAP (Users' Network for Applied Modeling of Air Pollution). Brief abstracts of the six models are enclosed. Publications related to these models are listed on the enclosed UNAMAP Reference sheet. Most of these publications are available from NTIS.

In addition to making these models available to EPA users on the UNIVAC 1110 in Research Triangle Park, the UNAMAP models are available in two ways:

(1) The UNAMAP models can be executed on Computer Science Corporation's INFONET. Users must establish accounts with CSC and are charged according to the services provided. Users are linked to the computer via telephone lines. Users interested in access to UNAMAP by this method should contact the INFONET Customer Service Representative at the nearest Computer Sciences Corporation Office. The principal advantage of accessing UNAMAP in this way is relatively rapid access to changes or additions to UNAMAP. CSC is making some changes to the operation of UNAMAP on INFONET in order to ensure that updates reach each customer quickly.

(2) The UNAMAP models are available on magnetic tape from NTIS. The tape record mode is 9 track, 800 bits per inch, EBCDIC code, odd parity. Physical records each contain 10 logical records in card image format (that is, 80 byte logical records; 800 byte block size). As an

option NTIS can copy the tape to 7 track (556 or 800 bpi) BCD format. The price per tape is \$175.00 (\$219.00 - foreign orders). When ordering, specify the desired format as mentioned above. The tape identification should be specified as follows:

NTIS Accession No. PB 229-771, Users Network for Applied Modeling of Air Pollution (UNAMAP)

Until January 1975, the first version of this tape containing interactive versions of the six UNAMAP models was sold. In January 1975, this original tape was replaced with version 2 of this tape. The new tape contains batch versions and test data for all six models and interactive versions of PTMAX, PTDIS, PTMTP, and HIWAY. The principal reason for the change was the availability of a new version of HIWAY. Persons ordering PB 229-771 after about February 1, 1975, should have received version 2. If your tape is version 2 you will have version 74333 in your HIWAY program source listing. For purchasers of the version 1 tape, a 'Change Tape for UNAMAP', PB 240-273 is available for \$97.50 (\$122.50-foreign orders). A list of purchasers of the tape that fill in the registration form accompanying the tape is maintained, so that additional information can be furnished to them.

UNAMAP MODEL ABSTRACTS

APRAC Stanford Research Institute's urban carbon monoxide model. Computes hourly averages for any urban location. Requires an extensive traffic inventory for the city of interest. Requirements and technical details are documented in "User's Manual for the APRAC-1A Urban Diffusion Model Computer Program" which is available from NTIS (accession number PB 213-091, \$5.25).

- HIWAY An interactive program which computes the hourly concentrations of non-reactive pollutants downwind of roadways. It is applicable for uniform wind conditions and level terrain. Although best suited for at-grade highways, it can also be applied to depressed highways (cut sections). The "User's Guide for HIWAY: A Highway Air Pollution Model," is available from EPA as EPA-650/4-74-008 and from NTIS (accession number PB 239-944/AS, \$4.25).
- CDM The Climatological Dispersion Model determines long term (seasonal or annual) quasi-stable pollutant concentrations at any ground level receptor using average emission rates from point and area sources and a joint frequency distribution of wind direction, wind speed, and stability for the same period. The "User's Guide for the Climatological Dispersion Model" is available from EPA as EPA-R4-73-024 and from NTIS (accession number PB 227-346-AS, \$4.75).
- Three Point Source Models - The three following point source models use Briggs plume rise methods and Pasquill-Gifford dispersion methods as given in EPA's AP-26, "Workbook of Atmospheric Dispersion Estimates," to estimate hourly concentrations for stable pollutants. A draft users' guide for these three models is available from the Environmental Applications Branch, Meteorology and Assessment Division, Mail Drop 80, EPA, Research Triangle Park, N.C. 27711.
- PTMAX An interactive program that performs an analysis of the maximum short term concentrations from a single point source as a function of stability and wind speed. The final plume height is used for each computation.
- PTDIS An interactive program that estimates short-term concentrations directly downwind of a point source at distances specified by the user. The effect of limiting vertical dispersion by a mixing height can be included and gradual plume rise to the point of final rise is also considered. An option allows the calculation of isopleth half-widths for specific concentrations at each downwind distance.
- PTMTP An interactive program that estimates for a number of arbitrarily located receptor points at or above ground-level, the concentration from a number of point sources. Plume rise is determined for each source. Downwind and crosswind distances are determined for each source-receptor pair. Concentrations at a receptor from various sources are assumed additive. Hourly meteorological data are used; both hourly concentrations and averages over any averaging time from one to 24 hours can be obtained.

		14. SPONSORING AGENCY CODE
15. SUPPLEMENTARY NOTES This is a revision of the original Volume 10 of the Air Quality Maintenance Planning and Analysis Series, published in September 1974.		
16. ABSTRACT This document is a revision of the original Volume 10 (EPA-450/4-74-011: "Reviewing New Stationary Sources") of the EPA Guidelines for Air Quality Maintenance Planning and Analysis. It provides basic modeling techniques for estimating the air quality impact of new (proposed) stationary sources. The revision is in a more readily useable format and incorporates changes and additions to the technical approach. Also, a simple screening procedure has been added. The techniques are applicable to chemically stable, gaseous or fine particulate pollutants. An important advantage of the technique is that a sophisticated computer is not required. A pocket or desk calculator will generally suffice.

September 1977

This report has been reviewed by the Office of Air Quality Planning and Standards, Environmental Protection Agency, and approved for publication. Approval does not signify that the contents necessarily reflect the views and policies of the Environmental Protection Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

The author, Edward W. Burt, is on assignment to the Environmental Protection Agency from the National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

This document is available to the public through
the National Technical Information Service,
Springfield, Virginia 22151

Publication No. EPA-450/2-77-018

PREFACE

This publication contains information on the techniques and applications of the computer program for the Valley Model which is based on a steady-state, univariate Gaussian formulation. It fulfills the need for a formal discussion to replace a very brief description that has received wide distribution.

The last previous version of the computer code was designated C9M3D. For stable atmospheric conditions the present version provides the same results, but can result in significantly greater concentrations for the limited mixing situation because it uses the multiple-reflection formula of Hales-Bierly-Hewson. Version C9M3D used the interpolation technique of Turner as described in his Workbook of Atmospheric Dispersion Estimates.

The Valley Model is one of the atmospheric dispersion models on the User's Network for Applied Modeling of Air Pollution (UNAMAP) system. The UNAMAP system may be purchased on magnetic tape from NTIS for use on the user's computer system, or may be accessed through phone lines and time-share computer terminals. For information on accessing UNAMAP contact: Chief, Data Management Section, Meteorology and Assessment Division, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

Although attempts are made to thoroughly check out computer programs with a wide variety of input data, errors are occasionally found. In case there is a need to correct, revise or update this model, revisions will be distributed to those who complete and return the mailing form on page v. A user can be assured that the latest version of the Valley Model is on the UNAMAP system.

Comments and suggestions regarding this publication should be directed to: Chief, Source Receptor Analysis Branch, Monitoring and Data Analysis Division (MD-14), EPA, Research Triangle Park, NC 27711. However, technical questions regarding execution of the model may be handled by telephone call to the Chief, Modeling Support Section, Source Receptor Analysis Branch in Durham, NC at 919-541-5335 or, using FTS, 629-5335.

ACKNOWLEDGMENTS

Were it not for the technical and administrative support of Mr. Herschel H. Slater, the Valley Model might not be in use today. His efforts under intensive and extensive pressures have provided a basis for improving the air quality in many areas of our country. Messrs. Jerome B. Mersch, Herschel W. Rorex, and David H. Starr contributed to the programming aspects, and largely prepared Section 4. Mr. Donald Henderson, EPA Regional Meteorologist, Denver, provided many useful comments which have improved the clarity and usefulness of this report. This report and a myriad of communications regarding the Valley Model have been typed by Mrs. Barbara M. Stroud; her timely and congenial assistance in these matters over the past several years is greatly appreciated.

1. MODEL OVERVIEW

1.1 INTRODUCTION

The Valley Model is an analytical technique whose primary use is for estimating the upper limits of 24-hour average pollutant concentrations due to isolated sources in rural, complex terrain. Options are provided which allow multiple sources, flat terrain, urban areas, and long-term averages to be considered also. This manual formally documents the Valley Model and supercedes a brief description of earlier versions which received wide distribution.

A historical overview on the use of Valley and the scope and general data requirements of this model are included in the remainder of Section 1. The assumptions and mathematical formulations are given in Section 2. Specific data requirements are discussed in Section 3, with input format specifications given in Section 4. Four appendices provide an evaluation of model accuracy, a full test run, a program listing, and a simple data set for testing the runstream deck and for obtaining base maps.

1.2 HISTORICAL OVERVIEW

The large non-ferrous smelters in the West posed a particularly difficult problem when State Implementation Plans were being evaluated in 1972 and thereafter. They were known to be large emitters of sulfur dioxide and particulate matter and suspected to be substantial emitters of metals of some toxicity (e.g., arsenic, lead, mercury). Their rates of emissions were not well established. Contaminants were emitted from different processes in different ways at different heights and at different times. The smelters are generally isolated and located in areas of complex mountainous terrain. Their effluents are dispersed and transported initially, at least, by local wind systems determined largely by the orientation and configuration of the nearby terrain, atmospheric radiation (which is a function of time of day and season of the year) and the synoptic weather situation. None of the smelter locations had meteorological data available which was adequately representative of the dispersion and transport factors. Finally, ambient air quality data which were representative of the impact of the smelter on the surrounding air environment did not exist.

Meteorologists attached to the Office of Air Quality Planning and Standards were asked to estimate the likely impact of the smelters on the surroundings. Several had a number of years experience estimating the impact of point sources on ambient air quality, forecasting the weather in the mountainous west, and conducting field sampling studies around large point sources, some of which were in complex terrain. A concensus of their judgments based on their considerable experience and training in dispersion meteorology indicated that a smelter located

in proximity to terrain features in the western mountains would likely cause frequent and greatest threats to an ambient air quality standard under a particular set of meteorological circumstances. The threat was considered to be greatest with light winds, but not calms, when strong inversions with bases at the ground-level, or if elevated, below the crests of nearby ridges, were experienced for several hours of the day. Under these conditions, plumes from smelters were observed to level-off shortly above the stack top and flow in close proximity to elevated terrain in ribbons or sheets. The horizontal spread of the plumes consistently far exceeded the vertical spread. It was anticipated that in complex terrain areas, pollutants emitted from smelter stacks must cause highest ambient 3- to 24-hour average concentrations on the elevated terrain.

Due to large uncertainties in the magnitude, height and timing of emissions, and in the representativeness of the existing meteorological data, it was judged that the threat to the standards could be best represented by an analytical routine that would conveniently calculate a 24-hour concentration on elevated terrain during stable atmospheric conditions with light winds. The algorithm was expected to represent a fanning plume which affects an elevated terrain feature, and to provide a reasonable estimate of the second highest 24-hour concentration that would be experienced during a year.

Careful review of upper air summaries of wind speeds and stability aloft for the western portion of the U.S. provided a basis for the choice of weather parameters. The Briggs plume rise calculations showed

that the heights of the smelter plumes in stable air would likely not exceed 400 m above stack base for the conditions evaluated. Wind speeds of 2.5 m/s, ± 1 m/s, occurred at 300 m above the ground one-third or more of the time at most western upper air observing sites.

The Valley Model does not provide a rigorous mathematical description of the physical circumstances which pertain to flow about a terrain feature. It is an algorithm which describes and associates the meteorological parameters that often prevail when high concentrations are anticipated on elevated terrain.

It is imperative that the user of any model which is purported to estimate the greatest concentrations due to an elevated source in complex terrain realizes that observed meteorological data suitable for calculating these singular events generally do not exist. Hence, the user must generate the meteorological conditions to be used as input to obtain the solution. Needless to say, the user can usually assume a set of reasonably realistic meteorological conditions which will duplicate any observed concentration due to a point source. The real test of a simulation model is an evaluation for several different locations using objective meteorological input data, such as is done in the evaluation herein of the Valley Model (see Appendix D).

1.3 SCOPE OF THE MODEL

The Valley Model is an algorithm which produces output to be used in evaluating the impact of a stationary source or sources on air

quality at ground level. The applicability of the model is bounded by the following operational characteristics:

(1) It is generally recognized that short-term air quality standards are the most difficult for a single source to meet in an area of complex terrain. Assuming constant emissions from an isolated, elevated point source, if the short-term standard is not exceeded then the long-term standard is unlikely to be exceeded by the single facility. Valley was developed with this in mind. The treatment by Valley of plumes in rural, complex terrain was specifically intended for a 24-hour period, a single facility of small areal extent, and particularly for stable conditions which are generally conceded to be the worst situation in complex terrain. However, the program may be executed in the long-term mode for a complex terrain situation. An urban mode is optional, wherein terrain is considered to be flat. Multiple facilities may be evaluated during any run if results are carefully interpreted.

(2) Source emission data is input as an average per source for the period of concern. A user's option allows for a 24-hour analysis or a long-term analysis (e.g., seasonal or annual). The emission and meteorological data are assumed to be uncorrelated with one another when multiple meteorological conditions are input.

(3) The source data array is dimensioned to accept a maximum of 50 sources. Sources may be "point" or "area," and may be input in any order. The point sources may include several specific points of emission from an industrial or residential area. Often, however, emissions from

individual chimneys in residential areas, or specific vents in industrial facilities, cannot be defined except as an average of the multiple emission points. In such cases, the point sources in an area may be grouped for analysis as one or more square area sources.

(4) The computer simulation averages the impact of any non-reactive gaseous, liquid, or solid pollutant for which the deposition rate may be considered negligible. However, a half-life option is available for any pollutant whose concentration decreases exponentially as a function of time (i.e., aside from the decrease due to dispersion).

(5) The program specifies an array of 112 receptors, fixed by the program in a grid internal to the program. The user preassigns the scale of the region to be depicted on the output maps.

(6) The potential ranges of most of the input data are so large as to preclude any meaningful programmed validity checks. For this reason most input data are reproduced on the concentration maps, providing an invaluable aid for post-analysis data verification. Programmed format checks detect and indicate omitted and most erroneously placed input data records; however, they will not detect erroneous ordering within a discrete data subset such as the stability-wind rose (STAR) data.

1.4 GENERAL DATA REQUIREMENTS

General data requirements for the Valley Model are indicated in this section; specifics are discussed in Section 3. It should be noted that data sets prepared for earlier versions of Valley require one simple change to be compatible with the computer program documented in this guide (see MWT under Section 3.1.4).

1.4.1 Meteorological Data

Meteorological data have an important effect on the simulated transport and dispersion of air pollutants. The data required are:

- STABILITY-WIND SUMMARY
- AMBIENT TEMPERATURE
- AMBIENT PRESSURE
- MIXING HEIGHT
- MEAN SPEEDS OF THE WIND SPEED CLASSES

The stability-wind data are the frequencies of occurrence of six wind speed classes by 16 wind directions and by six stability categories for the area and time period of concern. These data define the transport and the degree of dispersion of the pollutant. The mixing height determines the depth through which the pollutant may be mixed before being totally reflected downward. Temperature is used in computing plume rise. Pressure and temperature are used in the optional conversion of concentrations to standard conditions of pressure and temperature.

Meteorological data may be acquired from the National Climatic Center (NCC) at Asheville, North Carolina. The Center is operated by the National Oceanic and Atmospheric Administration. The user must determine whether the available data are representative of the area and period of concern. The NCC will supply summaries of long-term stability-wind data (STAR data) and set the charges for its services. The six-stability deck (Pasquill-Gifford stabilities A through F) should be

specified for use with Valley. STAR data which contain the day/night classifications are not appropriate for use with the model. The stability-wind data for 24-hour analyses must be obtained by other means. (see Section 2.2.2).

1.4.2 Receptor Data

A network of 112 receptors is established by the program. The user controls only two factors relative to the network: (1) the geographic spacing of the receptors, through a scaling factor; and (2) the vertical spacing of the receptors through assignment of the terrain elevation at each receptor. These controllable elements are:

- SCALING FACTOR
- GROUND ELEVATION AT RECEPTORS

1.4.3 Source Data

The source data must include some basic information for each source of concern. Each analysis (one run through the program) is restricted to one pollutant. The required source data elements are:

- IDENTIFICATION
- PHYSICAL CHARACTERISTICS OF SOURCE AND EFFLUENT
- HORIZONTAL COORDINATES OF SOURCE
- GROUND ELEVATION AT SOURCE
- EMISSION RATE

The identification elements have no quantitative value, nor do they control any program options. One such element is available to identify each run through the program, and one is available to identify each source evaluated during the run; these elements are printed at appropriate places on the output pages.

1.4.4 Control Parameters

Several options and controls are available to the user to select the analytical techniques and output of the program. These options and controls specify:

- CONCENTRATIONS IN SITU OR AT STANDARD CONDITIONS
- UNITS OF CONCENTRATION
- REPETITION OF SOURCES FOR SUCCESSIVE RUNS
- OUTPUT DEVICE IDENTIFICATION
- URBAN/RURAL ENVIRONMENT
- POLLUTANT HALF-LIFE
- CONCENTRATION AVERAGING TIME
- FORMAT OF STAR DATA
- TYPE OF SOURCE CONTRIBUTION MAPS

2. TECHNICAL DISCUSSION

The basic treatment of dispersion by the Valley Model is quite similar to that of the Air Quality Display Model (AQDM) and the Implementation Planning Program (IPP); see TRW, Inc. (1969, 1970). However, Valley includes modifications to the techniques used in those models. These modifications include (1) a representation of the effect of terrain on ground-level concentrations, (2) plume rise equations from Briggs (1971, 1972); (3) a different treatment of pollutant reflection from inversions aloft; (4) a rural-area option; (5) a short-term option; and (6) printouts of the spatial distribution of concentrations on equal-area maps. Dispersion equations for Valley and discussions of the assumptions made in the model are presented in this section.

2.1 THE DISPERSION EQUATIONS AND SIMULATION OF COMPLEX TERRAIN EFFECTS

The most important aspect of Valley is its treatment of the effects of terrain on concentration. For stable atmospheric conditions, the model assumes that the plume height above stack base remains constant after final plume rise. Thus, as terrain rises the plume approaches the elevated surface; in effect the plume height decreases. Since the terrain elevations may vary from receptor to receptor, an effective plume height must be calculated for each receptor. All concentrations are then estimated as if the receptors were located at actual ground level at the respective geographical locations. However, it is further assumed that the plume centerline comes no closer than 10 m to the

elevated terrain. If the terrain extends above the original plume height, the plume centerline is adjusted so that it remains 10 m above the ground. Any plume height which is initially within 10 m of the ground during stable conditions is assumed to remain at its initial height above ground, regardless of downwind terrain elevations.

The schematic in the lower half of Figure 2-1 illustrates the treatment of an elevated plume that has encountered terrain during stable conditions. The plume is assumed to be deflected upward and to the side (tending to parallel the axis of the ridge, for example). Any increase in concentration that would occur on the sides of the terrain obstacle due to lateral deflection of the plume beyond the sector of immediate concern is ignored. Therefore, conservation of mass is not accomplished.

Deflection of the plume by terrain during stable conditions is simulated through the attenuation of concentration with height in the sector of immediate concern. This is accomplished by applying a factor based upon the relative elevations of the ground at the receptor and of the centerline of the undisturbed plume, h_0 . The factor has a value of unity at and below the elevation of the plume centerline in free air prior to encountering terrain effects, but decreases linearly with increasing height (from plume level) to zero at and above 400 m above the undisturbed plume centerline. The attenuation should not be inferred to represent pollutant decay or penetration into the terrain. This is an empirical scheme intended as a general representation of the blocking

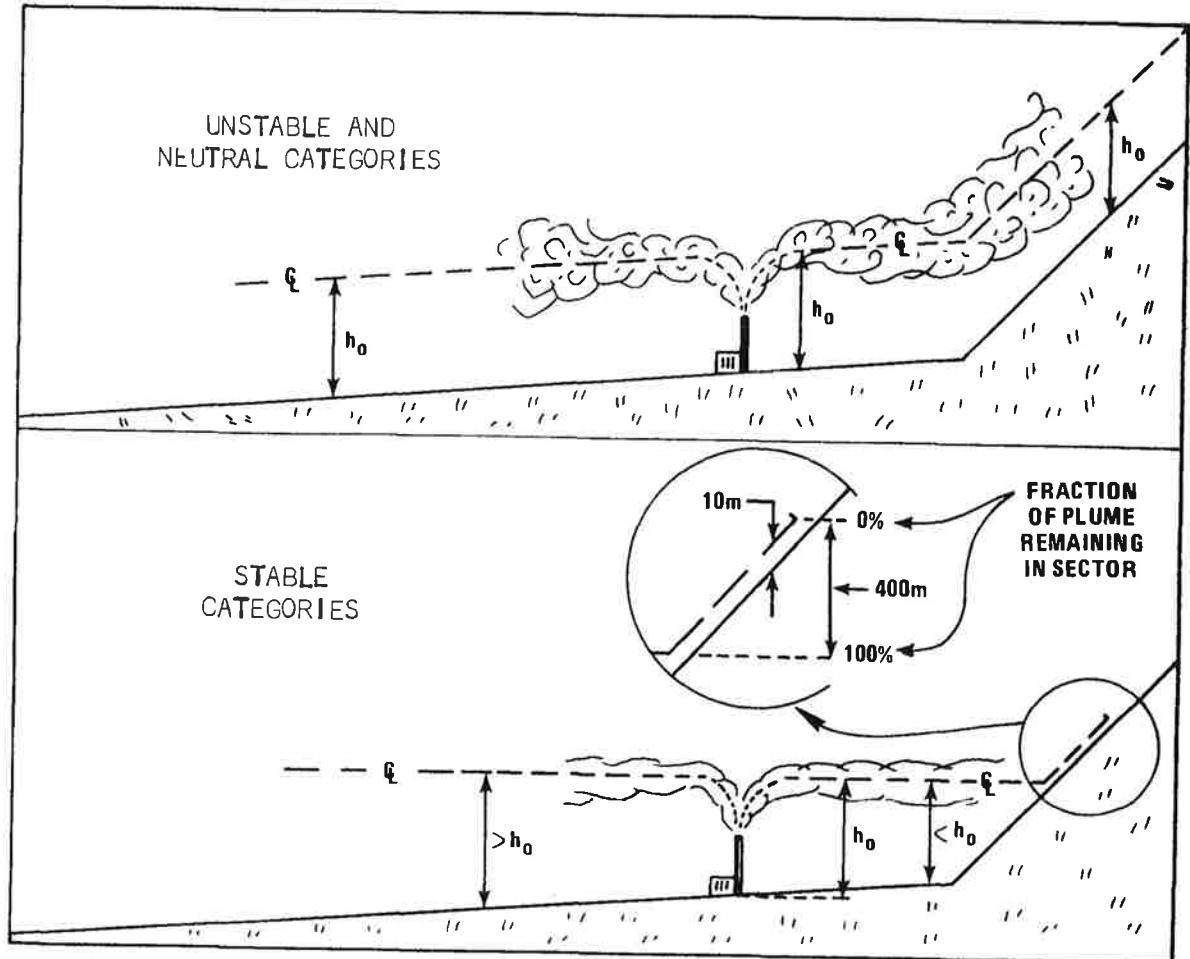

Figure 2-1. Depiction of Plume Height in Complex Terrain, as in the Valley Model. h_0 is the Height of the Plume at Final Rise Above Ground for the Unstable and Neutral Cases and Above Stack Base for the Stable Cases. Plume are Shown for Flows Toward and Away from Elevated Terrain.

of air flow by significant terrain features. Therefore, in case of such plume impingement no attempt should be made to utilize the concentrations that will be calculated for the leeward side of a substantial hill or ridge, because the computer program has no memory regarding upwind terrain features.

For unstable/neutral atmospheric stability conditions, the plume is assumed to maintain a constant height above the terrain. The plume parallels the terrain feature by increasing and decreasing its effective height relative to the stack base; this is, in effect, a flat-plane situation as can be visualized from the upper sketch of Figure 2-1. This technique may lead to underestimates of concentration in complex terrain.

The dispersion equations used in Valley are presented below; subsequent sections provide details of the various factors and terms, and their treatment in Valley. The equations have been developed from the familiar bivariate Gaussian formulation which describes the dispersion of a pollutant from a point source (see, for example, Equation 3.1 of Turner (1970)).

One of the two dispersion equations used in the Valley Model is:

$$x(x,y,z;h,L) = 2.03 \cdot 10^6 Q K ((c-y)/c) ((401-D)/400) C \\ \cdot \sum_{N=-J}^{+J} \exp \left\{ -0.5 \left[(H+2 N L)/\sigma_z \right]^2 \right\} \\ \cdot \left\{ \exp \left[-(0.693 x_p)/(3600 u I) \right] \right\} / (\sigma_z u x) \quad (2.1)$$

where only Q and u are input by the user, and:

x is concentration in micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) or parts per million (ppm), always calculated at ground level (see MWT, Section 3.1.4).

x is the source-receptor distance (m), as projected on the mean wind vector through the source. For area sources, this is the distance from the receptor to the effective point source. Contributions of a point source to a receptor within 20 m of that source are ignored.

y is the crosswind distance (m) of the receptor from a line parallel to the mean wind drawn through the source; $y \leq c$.

H is plume centerline height (m) above the receptor; the receptor is always at ground level. Plume height h_0 above the stack base is calculated internally, or assigned by the user, and then may be adjusted for terrain elevation at the receptor to provide H. For nonstable conditions, or over flat terrain, $H=h_0$.

L is mixing height (m) above ground; L remains constant, regardless of topography (see Section 2.1.6).

Q is the pollutant emission rate (g/s) of a given source, averaged over the period of concern. If the actual emission rate varies one must consider its correlation with the meteorological conditions specified in the input data.

c is the crosswind arc length of the 22.5° wind sector implicit in this formulation (see Section 2.1.2).

D is receptor elevation minus plume height, each in meters above mean sea level. The D term simulates the stable-case deflection by terrain of the plume from the sector being evaluated.

$$1 \leq D \leq 401 \text{ m } \{\text{stable conditions}\}$$

$$D = 1 \text{ m } \{\text{neutral and unstable conditions}\}$$

C determines the units of x:

$$C = 1 \text{ } \{\text{for } x \text{ in } \mu\text{g}/\text{m}^3; \text{ required for nongaseous pollutants}\}$$

$$C = 0.0831 T/(M P) \text{ } \{\text{for gases only, to obtain } x \text{ in ppm}\}$$

where:

T is ambient air temperature ($^{\circ}$ K).

M is molecular weight of the gas (grams per mole).

P is ambient air pressure (millibars).

K converts concentrations from on-site to standard conditions of temperature and pressure. $K = 1013.2 T/(298 P)$.

|N| represents the number of perfect reflections a parcel of air has undergone before reaching the distance of the receptor (see the next paragraph for a discussion of J).

σ_z is the standard deviation (m) of the vertical (Gaussian) distribution of the pollutant and $\sigma_z = f(x)$ (see Section 2.1.3).

x_p is the distance (m) from the receptor to the point source or to the center of the area source projected to the mean wind direction as was defined for x; for point sources, $x_p = x$.

u is the mean wind speed (m/s) affecting the plume.

I is the half-life (hr), of the pollutant and the exponential containing I is the half-life factor (see Section 2.1.5).

The summation term in Equation 2.1 is a special case of the expression developed by Hales (1956), and independently by Bierly and Hewson (1962), to describe concentrations during conditions of plume trapping (see Section 2.1.6). The limits on N determine the accuracy of the term. In Valley, $J \leq 5$. However, as σ_z becomes large relative to L, this low limit on J can result in serious underestimates of x. The error can be reduced to insignificance by equating J to a large value, but with a corresponding increase in computation time. Fortunately, a simple approximation to Equation 2.1 exists for these conditions; for distances beyond which $\sigma_z = 2 L$ the Valley Model utilizes Equation 5.14 from Turner (1970) in the form:

$$x(x,y,z;h,L) = 2.55 \cdot 10^6 Q K ((c-y)/c) ((401-D)/400) C$$

$$\cdot \{ \exp[-(0.693 x_p)/(3600 u I)] \} / (L u x). \quad (2.1a)$$

This simple equation provides a very good approximation to Equation 2.1 when J is very large and the vertical distribution of pollutants has become virtually homogeneous.

2.1.1 Sector Averaging

The constant 2.03 of Equation 2.1 is comprised of the factors $2/(\sqrt{2\pi} 2 \pi/16)$. This is obtained when the bivariate Gaussian formulation is converted to the cross-sector averaging form for a 22.5° (i.e., $2 \pi/16$) sector. Such conversion results in a uniform concentration across the wind sector at a given distance and height.

2.1.2 Cross-Sector Interpolation

To eliminate unrealistic discontinuities in concentration between sectors, which would result when wind frequencies differ in adjacent sectors, the essentially linear interpolation factor $(c-y)/c$ is utilized, where $y \leq c$. The result for wind in a single sector is that the sector-averaged concentration is decreased from 100 percent of its value at the sector centerline to zero about the centerline of the two adjacent sectors.

2.1.3 Vertical Dispersion Coefficient

The values of σ_z calculated by the program are based on the work of Pasquill (1961) as adapted by Gifford (1961). The σ_z required for each stability category is calculated using:

$$\sigma_z = a \times p^b + d \quad (2.2)$$

where a, b and d values are constants for each stability class within three different distance ranges as shown in Table 2-1.

Stability classes S = 5 and 6 are associated with nighttime, surface inversion conditions, and the σ_z values for these cases are the smallest normally used. However, because of the thermal and mechanical influences of urban areas, the lowest part of the typical urban atmosphere is less stable than its rural counterpart. When the urban option is utilized, the σ_z values for S = 4 are always used when the meteorological criteria indicate S = 5 or 6 (see Section 2.3). The σ_z for stacks less than 50 m high, σ'_z , is calculated via $\sigma'_z = (\sigma_z^2 + SIGI^2)^{1/2}$ to account for surface effects, where $SIGI = (50. - (\text{stack height}))$ within the limits $0 \leq SIGI \leq 30$ m, during $S \leq 4$.

2.1.4 Plume Height

The plume rise equations used in Valley are taken from Briggs (1971, 1972), and are calculated in subroutine BEH072; the formulations are annotated in the listing presented in Appendix B.

TABLE 2-1 Constants Used in Calculating the Vertical
Diffusion Coefficient.

STABILITY =	$A^{(1)}$	$x_p \geq 1000 \text{ m}$				
		B	C	D	E	F
a	.001	.0476	.119	2.61	52.6	33.6
b	1.89	1.11	.915	.45	.15	.14
d	9.6	2.0	0	-25.5	-126.	-75.
STABILITY =	A	$100 \text{ m} \leq x_p < 1000 \text{ m}$				
		B	C	D	E	F
a	.001	.0476	.119	.187	.1345	.362
b	1.89	1.11	.915	.755	.745	.55
d	9.6	2.0	0	-1.4	-1.1	-2.7
STABILITY =	A	$x_p < 100 \text{ m}$				
		B	C	D	E	F
a	.1742	.1426	.1233	.0804	.06	.0434
b	.936	.922	.905	.881	.854	.814
d	0	0	0	0	0	0

(1) Stability A corresponds to $S = 1$, stability B corresponds to $S = 2$, etc.

Plume rise is calculated as a function of stability. However, the user has the option of assigning a fixed plume rise for any source(s). A fixed plume rise is not adjusted for wind speed by Valley; the effective plume height is simply defined as the sum of plume rise and the physical stack height. However, for analyses in complex terrain the plume height may be adjusted for each receptor depending on terrain elevation, as described in Section 2.1. Also, no matter what plume rise is calculated or assigned, maximum plume height is limited to the mixing height in the short-term mode during nonstable conditions (see Section 2.2.2).

2.1.5 Pollutant Decay or Transformation

Through each successive period of travel defined by the half-life, I , the pollutant concentration in a given parcel of air is reduced by 50 percent. This reduction of concentration is due to transformation of the pollutant, and should not be confused with the dilution or diffusion of the pollutant.

2.1.6 Limited Mixing (Plume Trapping)

For $N = 0$ Equation 2.1 accounts for the impact of a pollutant source on a ground-level receptor as though there were no elevated temperature inversion (i.e., no stable layer aloft) in the atmosphere. The sum for all other values of N accounts for multiple eddy reflections occurring as a result of a plume being trapped between an inversion base and the surface of the earth. The inversion base and earth are considered to be perfect reflectors. This condition is called limited mixing or plume trapping. Equation 2.1a is used when the vertical concentration profile is uniform. See also Sections 2.2.1 and 2.2.2.

A plume with centerline above the mixing layer is ignored by Valley in the long-term mode, but in the short-term mode the program limits the maximum height of the plume to no greater than the mixing height.

For computational purposes the value of L in Equation 2.1 is in effect treated as a very large value by Valley during stable conditions in rural areas, but pollutant dispersion within this layer proceeds only at the relatively slow rate dictated by σ_z for the stable condition being evaluated. The definition of L previously given (i.e., mixing height) may not be considered technically appropriate, nor is Equation 2.1a used, for stable conditions in rural areas.

For both rural and urban analyses, neutral conditions designated by the STAR data are divided by the computer code into two classes. One class (40 percent) is evaluated for nighttime conditions, and the remainder represents daytime conditions. The mixing height for all daytime neutral conditions is assigned the input value of the mean afternoon mixing height. The nighttime neutral mixing height for rural areas is taken as half that value, whereas for urban areas it is taken as the average of the input mean afternoon and nighttime values. The user inputs the nighttime mixing height used for urban, stable cases.

2.2 TIME-AVERAGING OF CONCENTRATION

Concentration averaging time must be specified by the user as either of two options, 24-hour or long-term. The techniques for the

24-hour and long-term concentration estimates obtained with Valley are identical except for adjustments (Section 2.2.2) made to emission rate, plume height and mixing depth made in the 24-hour option. Resulting concentrations are highly dependent upon the stability-wind data supplied by the user.

2.2.1 Long-Term Average Concentration

For a specific receptor (*r*) and source (*s*) configuration, a long-term estimate of x_{rs} is obtained by solving Equation 2.1 or 2.1a for each meteorological condition assigned by the user, then summing all such concentrations after weighting each by its frequency of occurrence. The expression for average concentration at a receptor due to one source is thus:

$$x_{rs} = \sum_{d=1}^{16} \sum_{n=1}^6 \sum_{S=1}^6 F_{dns} x_{dns} \quad (2.3)$$

where:

F_{dns} = normalized frequency (from the STAR data) during the period of interest for a discrete case of wind direction *d*, wind speed *n*, and stability class *S*.

x_{dns} = ground-level concentration calculated from Equation 2.1 or 2.1a.

The concentration x_r at a specific receptor for a given pollutant due to all contributing sources is:

$$x_r = \sum_s x_{rs}. \quad (2.4)$$

The sum of the STAR frequencies for each long-term analysis (e.g., seasonal or annual) should be very near unity. A 1-hour occurrence of a particular meteorological condition will be included in an annual STAR array as $(1 \text{ hour/year})/(8760 \text{ hours/year}) = 0.00011$, and in a seasonal (quarter-annual) array as 0.00045. The 24-hour analyses (see Section 2.2.2) require a different concept.

The representative speeds usually assigned to the six climatological wind speed categories (0-3, 4-6, 7-10, 11-16, 17-21 and >21 knots), are 0.67, 2.45, 4.47, 6.93, 9.61, and 12.52 m/s. These are user specified.

The six stability categories ($S = 1$ through 6 in order of increasing atmospheric stability, 4 being neutral) of the STAR data are defined on the basis of the criteria stated by Turner (1964). The classification is based upon ground-level meteorological observations only (surface wind speed, cloud cover, ceiling), supplemented by solar elevation data (latitude, time of day, and time of year); thus the stability estimates can be obtained for any site at which suitable observations have been made.

The mixing height, L , exhibits marked diurnal (daily) and seasonal variations at many locations as shown by Holzworth (1972). However, since it is impractical to account for all these variations, a simple procedure reflecting only major changes is included in the long-term option of Valley. The procedure determines mixing height by

modifying the average afternoon mixing height value according to the stability class being considered. Stability classes $S = 1, 2$ and 3 are daytime conditions, with $S = 1$ corresponding to very unstable conditions. When $S = 1$, the value of L is assumed to be 50 percent greater than the climatological value that is input. For $S = 2$ and 3 the climatological value is used. Stability class $S = 4$ is a neutral stability condition which usually occurs either with high wind speeds or with cloudy conditions. Because neutral conditions can exist in both the daytime and nighttime, in rural or urban areas, the afternoon mixing height values are averaged with the nighttime mixing height for 40 percent of the class $S = 4$ occurrences; the remaining 60 percent of the class utilizes the climatological value of the mean afternoon mixing height. Mixing height is assigned a very large value for stable conditions in rural areas; in urban areas the user-assigned nighttime value is used, with a default value of 100 m, for stable cases.

For the long-term analysis, Valley ignores a plume which is higher than the mixing height. It is assumed that such a plume will be contained in the stable layer aloft and will not affect ground-level concentrations.

2.2.2 Short-Term Average Concentration

The intended use of this option is to estimate and locate the maximum 24-hour concentration due to a single source in complex terrain under stable conditions. For a frequency of occurrence input

as 1.0 the model assumes that that particular meteorological condition exists for any 6 hours of a 24-hour period. Since the frequency designates a discrete wind sector, a particular source can affect only one sector during those 6 hours. The source contributes nothing to that sector for the remaining 18 hours. This is accomplished within the model by reducing the input emission rate to 6/24 of its actual value.

One must be careful in assigning the mixing height when the short-term option is used, for no plume heights are permitted to exceed the mixing height. If the effective stack height is greater than the mixing height it is automatically reassigned a height equal to the afternoon mixing height. The plume is then treated as though it were fully contained within the mixed layer. The user must construct a special STAR deck for the 24-hour option.

For the case when a stable atmosphere in mountainous terrain is suspected of causing the maximum 24-hour concentration, the STAR frequency distribution is assigned all zero values except those for elements of stability, wind speed and wind direction that are of concern. They are assigned a value of 1.0 . Multiple wind directions may be specified for a given run, but one must be aware that in such cases the resulting concentration at a receptor may result from several sources in different directions if multiple sources are input. This potential problem can be avoided by assigning only one wind direction per run. For example, one might input 1.0 in the STAR deck for stability F ($S = 6$), a wind speed of 2.5 m/s ($n = 2$) and a westerly wind direction ($d = 13$); all other elements of the STAR deck are input as zero. In this case,

finite concentrations occur only to the east ($\pm 22.5^\circ$) of the source. Concentrations at all other directions are indicated to be zero. The user should input only single directions for multi-source, 24-hour analyses until the implications of multi-directional analyses are fully understood.

2.3 URBAN-RURAL CONSIDERATIONS

Light winds and clear skies usually produce stable atmospheric conditions at night near ground level in rural areas. The simultaneous stability in adjacent urban areas tends to be more unstable because of the heat-island effect. However, stable conditions can remain aloft over the city. These differences are important in the consideration of pollutant dispersion, and are accounted for in Valley through simple measures.

According to Turner's stability criteria, $S = 5$ and 6 (stable) can occur only when nighttime conditions are conducive to the formation of a surface-based inversion. A shallow layer of nonstable air has been found to occur in urban areas while adjacent rural areas are stable. Thus, for the long-term option only, the vertical dispersion coefficients of $S = 4$ (neutral) are substituted in Valley for those of $S = 5$ and 6 for urban analyses. This change is intended to more closely represent the actual dispersion rate for plumes in the urban area provided the plume remains in the shallow, nonstable layer. The user may assign the depth of this mixed layer, or may rely on the default value of 100 m. The concept of mixed layers was discussed in Section 2.1.6.

The conversion of stable conditions to neutral for urban analyses in turn affects the interpretation of terrain relief by Valley. For neutral atmospheric conditions the plume centerline in Valley is always terrain-following. Hence, Valley output for the urban area option is based on the assumption of flat terrain. This may lead to underestimates of concentration in urban areas with significant terrain features.

2.4 DISPERSION FROM AREA SOURCES

Valley computes area source contributions using Equations 2.1 and 2.1a. The total segment of each area source lying in the sector of concern is converted to an effective point source which lies upwind of the actual source. In the conversion process, both the downwind distance and the resultant source strength are dependent on the particular source-receptor configuration. The following discussion of area sources is adapted from the AQDM manual (TRW, Inc., 1969).

If the total emissions were assumed to be concentrated at the center of an area source, concentrations downwind would be overcalculated, especially for nearby receptors. Since uniform spread of the plume across the sector is assumed, it is logical to proceed a step further and assume an effective point source at such distance upwind that the 22.5° sector subtends an effective area width as illustrated in Figure 2-2. The half-life factor and the vertical spread are calculated using x_p , the downwind distance from the centroid of the fraction of the area source affecting the receptor for a given wind direction. However, the vertex of the horizontal angular spread lies at

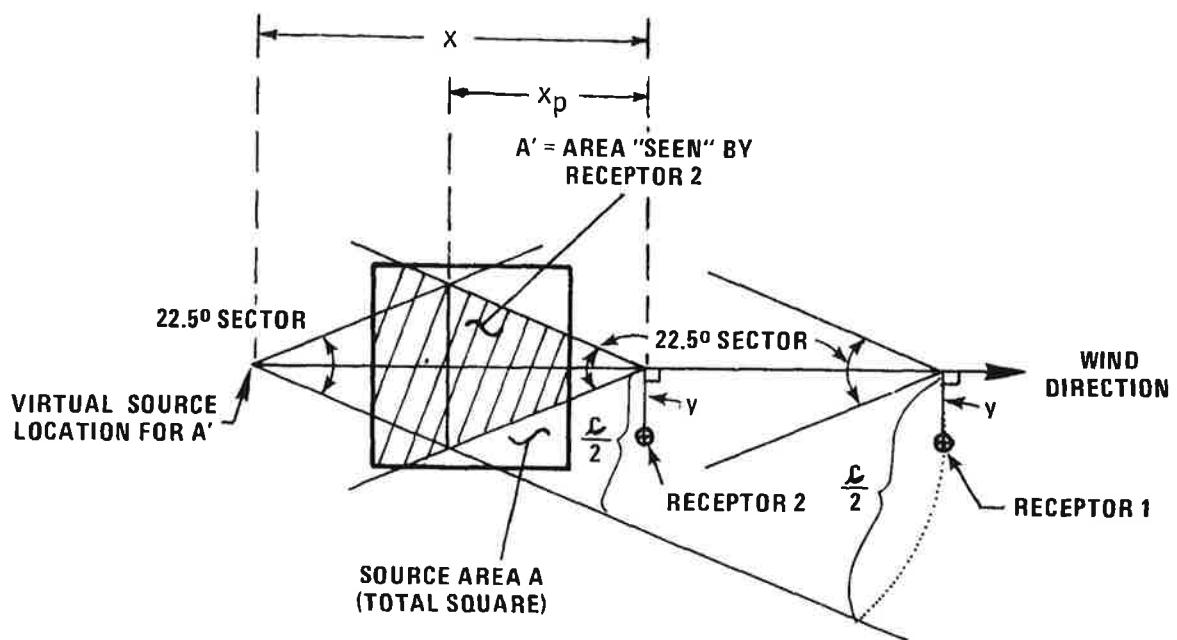

Figure 2-2. Schematic of the Virtual Point Source as Projected from an Area Source (After TRW, Inc., 1969).

distance x from the receptor; that is, at the effective source. This should clarify the need for the two distances, x and x_p , in Equations 2.1 and 2.1a. Note that in these equations x_p assumes the value of x for point source analyses. Also, when the calculated value of x for area sources is less than 100 m, x is reset to 100 m. The geometric treatment of an area source depends on whether the receptor lies within or outside but near, or distant from the source area.

When a receptor lies within a source area, only a fraction of the area emissions could affect the receptor for any assigned wind direction. The program determines this fraction and applies it to the concentration calculated using total emissions at the effective point source of the source area subtended by a 22.5° sector with vertex at the receptor. For a given receptor in a given area source, the sum of the fractions for all 16 sectors should be unity; that is, a receptor lying within a ground level area source is never free of the effects of that source.

In a similar manner, nearby receptors are affected by emissions from only a portion of the area source at a given time, and would show excessive concentration values if the total area emission value were used. To correct this, the source emission rate is multiplied by an area utilization factor, Q^* , which is the ratio of that portion (A') of the source area lying within a 22.5° sector upwind of the receptor to the total area (A). For example, in Figure 2-2, Receptor 1 would use the total area emission value, Q , while Receptor 2 would use the proportional amount, $QQ^* \propto A(A'/A)$. Note that in this figure the effective

point source for Receptor 2 would be defined by the effective area width. Area sources may be considered in either the flat-plane mode or the complex terrain mode of Valley.

2.5 COMMENTS

Valley should only be applied when competent meteorological advice is available to interpret the techniques of the model. Comments on the model are given next. Many of the limitations are not unique to Valley.

- (a) The basis of the model calculations, the Gaussian diffusion formula, was developed to represent the behavior of plumes from point sources. The field data available for development of plume dispersion parameters were primarily obtained from open, flat terrain and for travel distances of no more than a few kilometers. Thus, the model has some potential weaknesses: (1) plume behavior during horizontal transport of more than a few kilometers is not well known; (2) plume behavior in regions of varying thermal and surface-roughness characteristics has not been systematically observed; (3) area sources are only imperfectly simulated by effective point sources; and (4) few real sources are truly point sources.
- (b) The climatological data available for long-term calculations are generally obtained from airport weather observing stations. The character of the atmosphere may vary significantly between the meteorological site and the area of concern in the program analysis.
- (c) The use of observed surface meteorological data to describe the transport and dispersion of pollutants from elevated sources during stable conditions in complex terrain is likely the greatest source of error in the application of Valley or any other model available today.
- (d) The reliability and representativeness of emissions and source data are often overlooked when applying dispersion models. Valley uses average emission rate data. However, significant diurnal and seasonal variabilities in emission rates often occur. Such variabilities may be significantly correlated with the stability and wind data and this can invalidate an analysis made with Valley.

- (e) Only 112 receptors are utilized. During stable conditions in complex terrain situations, very large gradients of concentration may exist in the vertical on slopes. The user should be aware that, due to the fixed receptor network, the maximum concentration attainable using Valley may not fall at any of the 112 receptors of a particular run.
- (f) If one uses Valley to pinpoint the location of the estimated maximum short-term concentration attainable on a slope, a sampler placed at that location during a period matching the conditions of the simulation may well not record the maximum occurring on the slope at that time. The simplicity of the model does not justify a 1-to-1 comparison of observed and estimated concentrations at a point. Rather, the estimated maximum 24-hour concentration should be used as an indication that during two 24-hour sampling periods of a given year the estimated maximum concentration may be equalled or exceeded in the vicinity of the location of the estimated maximum.
- (g) It is generally recognized that if continuous pollutant controls are utilized at a source in order to assure that the 24-hour air quality standard (e.g., for SO_2) is not exceeded as a result of that source alone, then the long-term standard will very likely not be exceeded. Hence, the use of Valley to estimate maximum 24-hour concentrations for complex terrain situations is the most important application of this model.
- (h) If the plume height slightly exceeds the terrain in question, even during stable conditions, the pollutants may be drawn downward to the lee of the crest and create a pollution problem at ground level. If the source itself lies in the lee of a hill, a similar result may occur. Valley does not simulate these situations.
- (i) Straight-line transport of pollutants is assumed. Hence, curvature of the plume due to pressure gradients induced by topographic features is not simulated.
- (j) For Valley Model calculations σ_z is determined from the line of best fit of widely scattered data values obtained over flat terrain. The bulk of interpretations of limited data obtained in complex terrain indicate larger σ_z 's than over flat areas, at least during stable conditions. The assumption is utilized in Valley that a statistical average of σ_z for a given stability over flat terrain (i.e., the familiar Pasquill-Gifford values) may be used to represent the lower limit of dispersion in complex terrain, particularly for stable conditions.

- (k) Because of assumed plume behavior for nonstable cases, the assumption of flat terrain for urban areas may result in underestimates of concentrations on hillsides in urban areas. The same problem may exist on any elevated terrain during nonstable conditions with elevated plumes.
- (l) The description of meteorological conditions by step functions i.e., discrete classes, creates discontinuities in concentration from one meteorological category to the next. These discontinuities are smoothed in Valley across wind-direction classes only.
- (m) The model is not appropriate for evaluating atmospheric situations consisting of flow across an urban/rural boundary when the rural area is stable.
- (n) The sloping-plume concept of Briggs is used in Valley. In the long-term mode of Valley, when a plume centerline height reaches a point where it exceeds the mixing height the contribution of that plume to all ground-level receptors downwind of that point is considered to be zero. This results in an underestimate of concentration, for some of the pollutant will remain in the mixing layer and affect all downwind receptors within the mixing layer, while the remainder of the pollutant will be transported in or above the stable layer aloft and potentially affect receptors on terrain above the inversion base.
- (o) Valley cannot be used to evaluate fumigation. Such conditions can cause high, short-term, ground-level concentrations. In some topographic situations, fumigation can occur with relative regularity.
- (p) The impingement of stable plumes on elevated terrain is treated by Valley as though the receptor lies on a slope facing the pollutant source, regardless of the actual orientation of the slope. Hence, concentrations calculated for receptors not located on windward slopes should be ignored.

The limitations of Valley cited in the comments above are not intended to imply that the Valley Model be kept from use. On the contrary, improved models can be developed only when significant experience with present formulations has been achieved, and when data which justify the use of more complex analytical techniques become available.

3. DATA DEFINITIONS

Detailed descriptions of input and output information follow; the variable names used in the program code are shown in capital letters.

3.1 INPUT DATA

3.1.1 Receptor Heights (RECHT)

--RECHT is an array containing the ground elevation (feet above msl) at each of the program-designated receptors. The use of an English unit for this parameter in an otherwise metrically oriented program was chosen so as to be identical with that on the more readily available topographic charts. The 16 records containing receptor elevations must be entered as blanks if a flat-plane analysis is desired. Each record contains the heights for the seven receptors lying on one radial from the center of the output maps, beginning with the radial directed northward from map center. If at least one receptor height is entered as a positive value, a map containing ground elevation differences (in meters) between each receptor and the first source input by the user will be output. The receptor locations are at the decimal point of the concentrations printed on the 16 radials of the output map. Each of the 16 records containing RECHT represents one direction, beginning with north and proceeding clockwise through north-northwest of map center. The first RECHT on each card corresponds to the innermost receptor on the respective radial, and successive values on that card progress outward along the radial.

3.1.2 Pressure and Temperature (P, TEMP, PRESS)

--P is the ambient pressure in millibars (mb) used in the conversion from $\mu\text{g}/\text{m}^3$ to ppm, and in the conversion from on-site to standard conditions; zero or blank defaults to 960 mb.

--TEMP is the average ambient temperature in degrees Kelvin ($^{\circ}\text{K}$) used in the plume rise calculation, in the conversion from $\mu\text{g}/\text{m}^3$ to ppm, and in the conversion from on-site to standard conditions; zero or blank defaults to 293 $^{\circ}\text{K}$.

--PRESS is an option-control parameter.

0 - The concentrations printed will be for on-site conditions of pressure and temperature.

>0 - The concentrations printed will be for standard conditions (1013.2 mb and 293°K), provided the user has called for concentration in units of $\mu\text{g}/\text{m}^3$. Note that a given concentration expressed in ppm will not change with the temperature and pressure. The concentration of non-gaseous pollutants should not be called for in units of ppm.

3.1.3 Computer Run Identification (TITLE)

--TITLE is an alphabetic title of up to 80 characters which is supplied by the user. This identification label is printed on each map that is output for a given run through the program, with a line feed between columns 20 and 21. Sources are identified individually (see below); TITLE is therefore available for general identification of the analysis performed, but may be blank.

3.1.4 Program Control (GRID, MWT, DMIX, ISOR, DUPSOR, K, IUR, ICONT, DMNI, HLIFE, ISHORT)

--GRID is the required map scaling factor which scales the printed output maps to geographical reality. However, there is no variation in the size of the maps produced. This discussion of map scaling applies to printers with ten characters and six lines per inch. If a printer has a ratio that differs from 10:6, the output maps will not be of equal-area projection. A scale of kilometers is printed on each output map, and one character space always equals GRID (m). Any value of GRID may be used when the flat-plane mode is invoked. However, if the complex-terrain mode is used, GRID must remain constant for all runs of a given computer job or the receptor heights will differ from the actual ground elevations. If the output map is to be overlayed on a topographic chart having dimensionless scale ratio 1:n, then the user must specify GRID as:

$$\text{GRID (meters)} = .002538 n$$

For example, for a direct overlay of the map on a chart of scale 1:24000, GRID = 60.9 m. A user might wish to obtain better resolution (i.e., more dense receptor network) in a region of complex topography around or near a source in an area for which a topographic chart of suitable scale is not

available. In such cases the user may manually or photographically change the map size (i.e., as output by the program) to a factor p of its original size, overlay the new size map on a chart scale of 1:n to obtain receptor heights, and calculate GRID for use as input data using:

$$\text{GRID (meters)} = .002538 n p.$$

For example, if the overlay map has been reduced to $p = 1/2$ the size of a computer map, and is overlayed on a chart of scale 1:62500 to obtain receptor heights, then the user must specify the input value of GRID as 79.3. The scale of the output map from such a run is 1 inch = 793 m, or 1:31250, and the map should not be overlayed directly on the topographic chart from which the receptor heights were obtained.

--MWT determines whether output concentrations (x) are to be expressed as $\mu\text{g}/\text{m}^3$ or as ppm.

0 - Indicates that x will be in $\mu\text{g}/\text{m}^3$.

>0 - Is accepted by the program as the molecular weight of a gaseous pollutant, and the factor $0.0831 \text{ TEMP}/(\text{MWT P})$ is used to convert x to units of ppm. Users of former versions of Valley (e.g., C9M3D) should note that this is a change from those versions. This modification is the sole reason that data sets prepared for former versions may not be compatible with the requirements of the present version. Unmodified older data sets will be accepted by the present version, but may result in erroneous concentrations.

--DMIX is the required mean maximum afternoon mixing height, in meters, for long-term analyses, or the required mean mixing height for the critical period of concern for short-term analyses. The input mixing height remains constant for the short-term analyses, but is changed internally according to stability for the long-term mode. For the rural mode DMIX is in effect set to a very large value for stable cases. If plume height exceeds DMIX in the short-term mode during nonstable conditions, it is reset to DMIX.

--ISOR is the number of sources, not to exceed 50, to be evaluated during the run. Point and area sources may be intermixed.

--DUPSOR is an option control.

0 - Indicates the user must input a source data set for each run.

>0 - Indicates that a number of STAR data sets will be analyzed in turn using only one source data set.

--K is the numerical indicator of the computer peripheral unit which is to receive the output. The output format is such that when the printer is specified, scaled maps are printed.

--IUR is an option control indicating source environment.

0 - Programmed abort.

1 - Indicates urban.

2 - Indicates rural.

--ICONT is an output control.

0 - Specifies that only the sum of all source contributions is to be output.

1 - Specifies that the individual source contributions and the sum are to be output.

2 - Specifies that only the individual source contributions are to be output.

--DMNI is the night-time mixing height, required only for the urban mode of analysis. Blank or zero defaults to 100 m. This parameter is not used in the rural mode.

--HLIFE is the half-life, in hours, of a pollutant which decays exponentially with time. A zero or blank entry defaults to infinite half-life. A half-life decay should not be confused with the reduction of concentration due to dilution of the pollutant.

--ISHORT is an averaging-time control.

0 - Indicates that the meteorological and source emissions data and resulting concentrations are for a long-term period, say for a season or year.

1 - Indicates the resulting concentrations are for a 24-hour period.

3.1.5 Source Data (INAME); (QSOT, HST, TS, VS, D, VF, SHOT, SVET, SORHT, WT, GT)

--INAME is a 24-character alphabetical array available for each source for identification.

--QSOT is the required emission rate, in grams per second, of each point or area source.

--HST is the required physical height of emission, in meters, of each source. This is the stack height, vent height, etc., above ground.

--TS is the source gas exit temperature, in degrees Kelvin. If plume rise calculations are requested for a given source, and TS \leq TEMP (i.e., a cold plume), the analysis proceeds with plume rise set to zero and a warning is output.

--VS, D and VF are the source effluent exit velocity in meters per second, diameter of exit in meters, and effluent volume flow rate in cubic meters per second, respectively. Each may be input as zero or blank. However, if plume rise calculations are requested by the user (see variable GT below), either VS and D, or VF, must be greater than zero; otherwise, the analysis proceeds with plume rise set to zero, and a warning is output. VF is calculated internally when VS and D are input as non-zero.

--SHOT and SVET are the coordinates of each source, in units of the programmed grid. The location of an area source is defined by the lower left-hand (southwest) corner of the square area. The user's value of GRID determines the scale of the output map of normalized concentrations. The value of GRID (meters) corresponds to 1/10 inch on the face of the map and to one unit of measurement in the coordinate system of the map. Hence, GRID is required to calculate, as follows, the source coordinates to be input by the user:

$$\text{SHOT (horizontal coordinate)} = 460. + (\text{X}/\text{GRID})$$

$$\text{SVET (vertical coordinate)} = 60. + (\text{Y}/\text{GRID})$$

where X and Y (meters) are the east-west and north-south geographic distances, respectively, of the source from the center of the map. Y is negative if to the south of center, and X is negative if to the west of the center of the map. The center of the map lies at SHOT = 460, SVET = 60. For most analyses, the major or only source will likely be

assigned coordinates (460, 60); however, there are no restrictions on source location. There may be situations when the user may wish to obtain better spatial resolution of estimated concentrations than can be obtained by keeping the source location on the map; in such cases, the values of GRID and the source coordinates may be chosen so that the source lies well off the map, with the map representing a small area remote from the source. Receptor locations are program assigned in units of the programmed grid system.

--SORHT is the ground elevation in feet above mean sea level at the location of the source. SORHT has no meaning unless at least one receptor elevation is input as non-zero positive.

--WT is the width in meters of the source. A zero or blank entry signifies that the emissions emanate from essentially a point source. Any non-zero positive entry is interpreted as the length of a side of a square area source; the source is then evaluated using an effective point source technique. There are no restrictions on the sizes of the area sources.

--GT is the assigned fixed plume rise in meters. It is independent of wind speed; however, plume height remains a function of receptor elevation during stable conditions. If zero or blank, the program calculates plume rise via a subroutine. Hence, to evaluate a source with a known plume rise of zero, input for GT any insignificant positive number (e.g., 0.1).

3.1.6 Stability and Wind Related Data (WSA, SCFMT, SC)

--WSA is an array for assigning six wind speeds in meters per second. These speeds are applied respectively to the six frequencies of occurrence of each record in the SC data set (see below). Since the dispersion technique is not appropriate for calm conditions, the program produces zero concentration for each zero value assigned to WSA. Although extremely small wind speeds are acceptable to the program, they may not be appropriate for use with the Gaussian concept of dispersion simulation. The wind speeds usually associated with the six speed categories in the STAR decks are 0.67 2.45, 4.47, 6.93, 9.61 and 12.52 m/s.

--SCFMT is the required user-assigned format of SC and is input as a 72-character array. The program calls for successive SC records on the basis of inferred DO loops in the READ statement. Hence, SCFMT consists simply of six F codes enclosed in parenthesis, with appropriate indications of fields which should be skipped in the available SC records.

--SC is a required 96-record data set of decimal frequencies of occurrence for 576 possible combinations of wind speed, wind direction, and atmospheric stability. Data sets for long-term periods from surface observation sites may be obtained from the National Climatic Center, National Oceanic and Atmospheric Administration, Asheville, N. C. (refer to the STAR program in communications to the Center). Obtain six stability groups; they can be used in the urban or rural mode. Do not obtain the day/night classifications. The frequencies in a data set generated by STAR total about unity.

The long-term STAR data are obtained by an objective interpretation of meteorological data observed at airport weather stations. However, the probability is great that such data will not be representative of the conditions affecting transport and dispersion of pollutants in complex terrain. Even on-site meteorological measurements made at ground level have a high probability of deviating significantly from those that might be made at elevated plume height, particularly during the critical stable conditions in complex terrain. Hence, the emphasis in the development and application of the Valley Model by the EPA has been on the 24-hour average, with meteorological conditions specified objectively as is discussed in Appendix D.

The user must construct an artificial SC data set for short-term analyses to fit the conditions he wishes to evaluate. Valley assumes that the meteorology of the discrete condition represented by the i th entry in the SC array occurs during any 6 SC(i) hours of the day in this mode. For example, for a 24-hour analysis a speed category under one stability class might be assigned a frequency of 1.0 for each of the 16 directions available, with all other SC values zeroed out. In this case, with the source at the center of the map, the concentrations along any single radial could occur on the appropriate day, and the concentrations depicted along all other radials would be invalid for that day. Care must be exercised in summing contributions at a given receptor from multiple sources at different locations when utilizing the type of short-term data described in this example; one can obtain erroneous results (overestimates) by summing contributions which would not occur simultaneously with the single wind direction implied in the short-term mode. In some cases the only alternative is to execute 16 runs, using one wind direction each; often, however, the user can judge in advance which single direction will result in the maximum concentration.

3.2 PROGRAM OUTPUT

With the output unit designated as a printer by the user, the output will be discussed in the next few subsections in the order the information is printed. The program forces overflow of irrelevant data, resulting in asterisks being printed in place of a numerical value for any parameter not used in the respective analysis.

3.2.1 SC Data

The stability-wind rose data (SC) are listed by wind speed for each direction, grouped by the six stability categories. The first 20 characters of the input TITLE are included for identification. The summation of the frequencies for long-term periods (e.g., seasonal and annual) should be approximately 1.0; the short-term sum is dependent upon the intention of the user.

3.2.2 Individual Source Contribution Maps

These maps are output only when requested by the user via the input variable ICONT. Each map contains normalized concentrations at the 112 receptors which are located approximately on 16 radials (seven receptors each) at increments of 22.5° angular separation around the center of the map, beginning at north (toward page top). The decimal point of each printed concentration indicates the receptor location. The receptors along a given radial are not spaced equally, except due east and west, because of the space required for printing concentrations and the impossible matching of three coordinate systems involved (equal area for the internal grid, rectangular-integer for the printer, and 16-direction polar for the desired receptor network).

The concentrations are printed in four-digit (plus decimal point) fixed format. The program normalizes all concentrations on a given map equally, by order of magnitude, so that the maximum concentration printed contains a significant digit in the left-most position of the print area. The order-of-magnitude factor required to reinstate the output concentrations on each map to the proper units is printed on each map. For example, if the maximum concentration is 0.1328 ppm, the number 132.8 will be printed at the appropriate receptor location, and the order-of-magnitude factor 1.0-03 (meaning 10^{-3}) will appear on the map; all concentrations on that map must be multiplied by 10^{-3} .

Each source contribution map includes a good part of the information relevant to that analysis. The important exceptions are the stability-wind data and receptor heights, which are presented elsewhere in the output and discussed elsewhere in this section. The statements and labels on the maps are listed immediately below, in the order they are output. Self-explanatory output is included, but not elaborated.

--RELOCATE 2/3 INCH UP: The outermost concentration on the radial due north of center must be moved northward 2/3 inch (four printer lines) from its printed location. A similar statement applies to the outermost concentration on the south radial (requiring 2/3-inch relocation southward). Otherwise, the decimal point of the concentration value represents the position of the receptor used in the calculations.

--The source identifier (INAME) is printed.

--The run identification (TITLE) is printed, with a line feed following column 20 of the input record.

--HLIFE = ____ HRS.

--CONCTR CORRCTD TO STD COND VIA FACTOR : The concentrations presented have been converted to standard conditions (1013.2 mb, 298°K) via the factor shown. A factor of 1.0 implies no conversion.

--MAX TOWARD DEG.: Indicates the direction of the maximum concentration from the center of the map.

--NORTH TOWARD TOP

--PLOT : This is the maximum concentration appearing on the map. It can be used as an abbreviated identifier for the map.

--The center of the programmed receptor network is indicated by a decimal point, and enclosed with asterisks; the center coordinates (460, 60) are listed.

--MULTIPLY PRINTED VALUES BY 1.0 + ii TO GET CONC. IN (units). In this statement, the multiplier "1.0 + ii" must be interpreted as "10. to the power + ii," and must be applied to each concentration. The units will then be in either ppm or $\mu\text{g}/\text{m}^3$, as specified in the statement.

--SOR ELEV: The input ground elevation at the source.

--COORDX and COORDY: The input coordinates of the source.

--STK HT: The input source emission height above ground.

--Q(GM/SEC): The emission rate, in scientific notation. For example, 2.321+03 is interpreted as 2321.

--FIXED DH: The input fixed plume rise. Asterisks in place of a numerical value indicate the user elected to use plume rises computed via the subroutine.

--BRIG.E and BRIG.F: The plume rises, in meters, for stability E and F, respectively. These are the last values returned by the plume rise subroutine during the source analysis. Hence, they are the calculated rises at the last receptor evaluated, and for the last finite wind speed used.

--DMIX: The input afternoon mixing height for long-term analyses, or the fixed mixing height for short-term analyses.

--DMNI: The input nighttime mixing height for the urban environment. Zero defaults to 100 meters.

--STAR F: The sum of all the input frequencies of the stability-wind data set used in the analysis.

--WIDTH: The input width of the square area source.

--BRIGUN: The calculated plume rise factor for nonstable atmospheric conditions. Divide by wind speed in meters per second to obtain plume rise in meters at the last receptor evaluated.

--P: The input value of pressure, or the default value.

--MWT: Molecular weight of the gaseous pollutant; used in calculating concentration in ppm.

--VV MEAN WIND SPDS VV: The input wind speeds are listed on the next line of output.

--AIR T: The input ambient temperature, or the default value.

--GAS T: The input effluent temperature.

--DIAM: The input stack diameter.

--GAS V: The input effluent exit velocity.

--FLOW: The input effluent volume flow rate, or that calculated by the program, in cubic meters/second.

--A line scale of geographical distances is output.

--RURL MODE or URBN MODE: Indicates the environment option specified by the user, i.e., rural or urban.

--LONG-TERM MODE or SHRT-TERM MODE: Indicates the averaging-time mode specified by the user. SHRT-TERM is intended to represent a 24-hour period.

--SLOPING TERRAIN CONCEPT or FLAT-PLANE CONCEPT: Indicates whether the user had or had not, respectively, input at least one finite, positive value in RECHT. If none was entered, the segment for plume height adjustment during stable conditions was skipped during the analysis.

3.2.3 Map of Total Impact of All Sources

If the user has specified via ICONT that a map be printed of the total impact of all sources, a listing is first provided of all source data (except volume flow rate) and of the plume rises and plume rise factor $u\Delta h$ of each source for the last receptor and meteorological condition evaluated for each source. The program then prints a map entitled "SUM CONC DUE TO ALL SRCS"; this phrase replaces INAME, and indicates the values represent the sum of concentrations due to all sources evaluated during the run through the program. Irrelevant parameters are printed as asterisks, except that $Q = 0$. Otherwise, the format is the same as the individual source contribution maps.

3.2.4 Terrain Factor Map

A terrain-factor map is output if the user specified as non-zero any receptor elevation. The map is of basically the same format as the concentration maps. However, the height difference between the ground elevation at the first source and each receptor is output in place of the concentration. INAME is replaced in the program by the statement "GROUND ELEVATION DIFFERENCE." Also printed are the statements "NORTH TOWARD TOP. (1/10)((SOURCE HT(1))-(RECPTN HT(N))), HTS IN METERS.", and "MULTIPLY PRINTED VALUES BY 1.0 + 01 (i.e., multiply by 10) TO GET GROUND ELEV DIFF IN M." Irrelevant parameters are printed as asterisks, except $Q = 0$.

4. COMPUTER USER'S INSTRUCTIONS

4.1 INTRODUCTION

Valley is a single, batch-oriented computer program requiring card input and producing output on standard paper on a line printer. The program consists of a main program and two subroutines (see Appendix B for a program listing).

The main program calls for the input data and calculates concentrations at the 112 receptors whose locations are internally defined. The main program calls the subroutine for calculating plume rise and the subroutine for printing the output maps.

Detailed instructions required for program execution are presented in this section. It is assumed that the user has read the first three chapters of the manual and is familiar with the technical applications of the model as well as the acquisition and significance of the input data required for program execution. A test run is presented in Appendix A.

4.2 OPERATIONS

4.2.1 Description

The generalized program flow diagram given in Figure 4-1 is presented to illustrate the simple operational nature of the program. No peripheral files are required for operation of the program.

Valley is written in Standard FORTRAN and is designed to operate on a UNIVAC 1110. The program requires 56K words of memory and has an execution time of a few seconds per source.

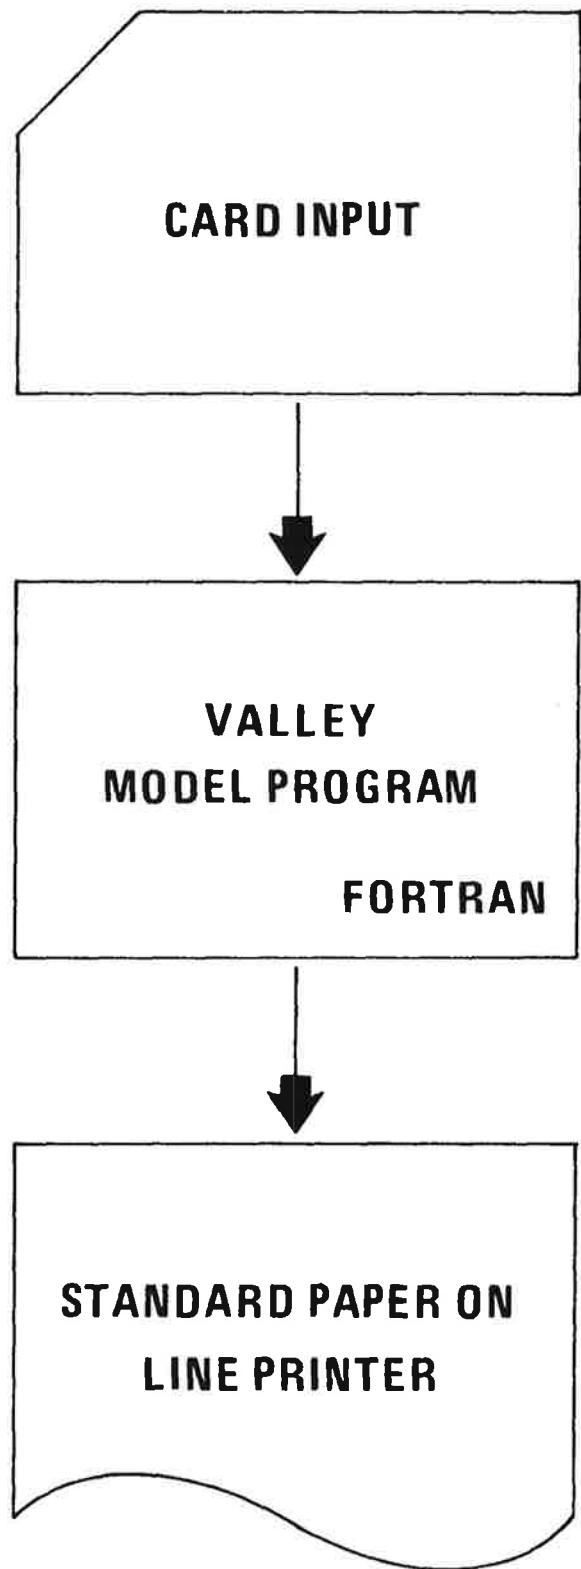

Figure 4-1. General Flow Diagram

The major functions of the program are shown in Figure 4-2. The program is used to calculate the air quality concentrations at 112 receptors resulting from as many as 50 sources of pollutant. These concentrations will be output in their geographically appropriate positions on a line printer as shown in Figure A-2.

4.2.2 Input Data

The data deck layout for the input data, including control data, is shown in Figure 4-3. Note that two cards are required to identify each source along with its stack parameters. Up to 50 sources may be input during a single run. The program also requires 16 receptor height cards for the internally specified 112 receptors. If any receptor elevation is non-zero a map depicting ground level differences between each receptor and the first source input will be output.

Special note must be taken of the Stability Class (SC) Format card and the SC cards. There are 96 SC cards required for each run. There must be six data values on each card. The definition of the data on each card is best described by the output shown in Figure A-2, except no alphabetical characters need appear on the SC data cards. A line of printout represents the data on a single SC input card. If one follows the definitions in this figure and orders the cards in the same manner as shown, the 96 SC cards (6 stabilities times 16 directions) will be properly defined and sequenced. The SC Format card referred to earlier is the FORTRAN format statement which tells the program where the six SC values are located on each card; outer parentheses must be included. Refer to Figure A-1 for an example of this card.

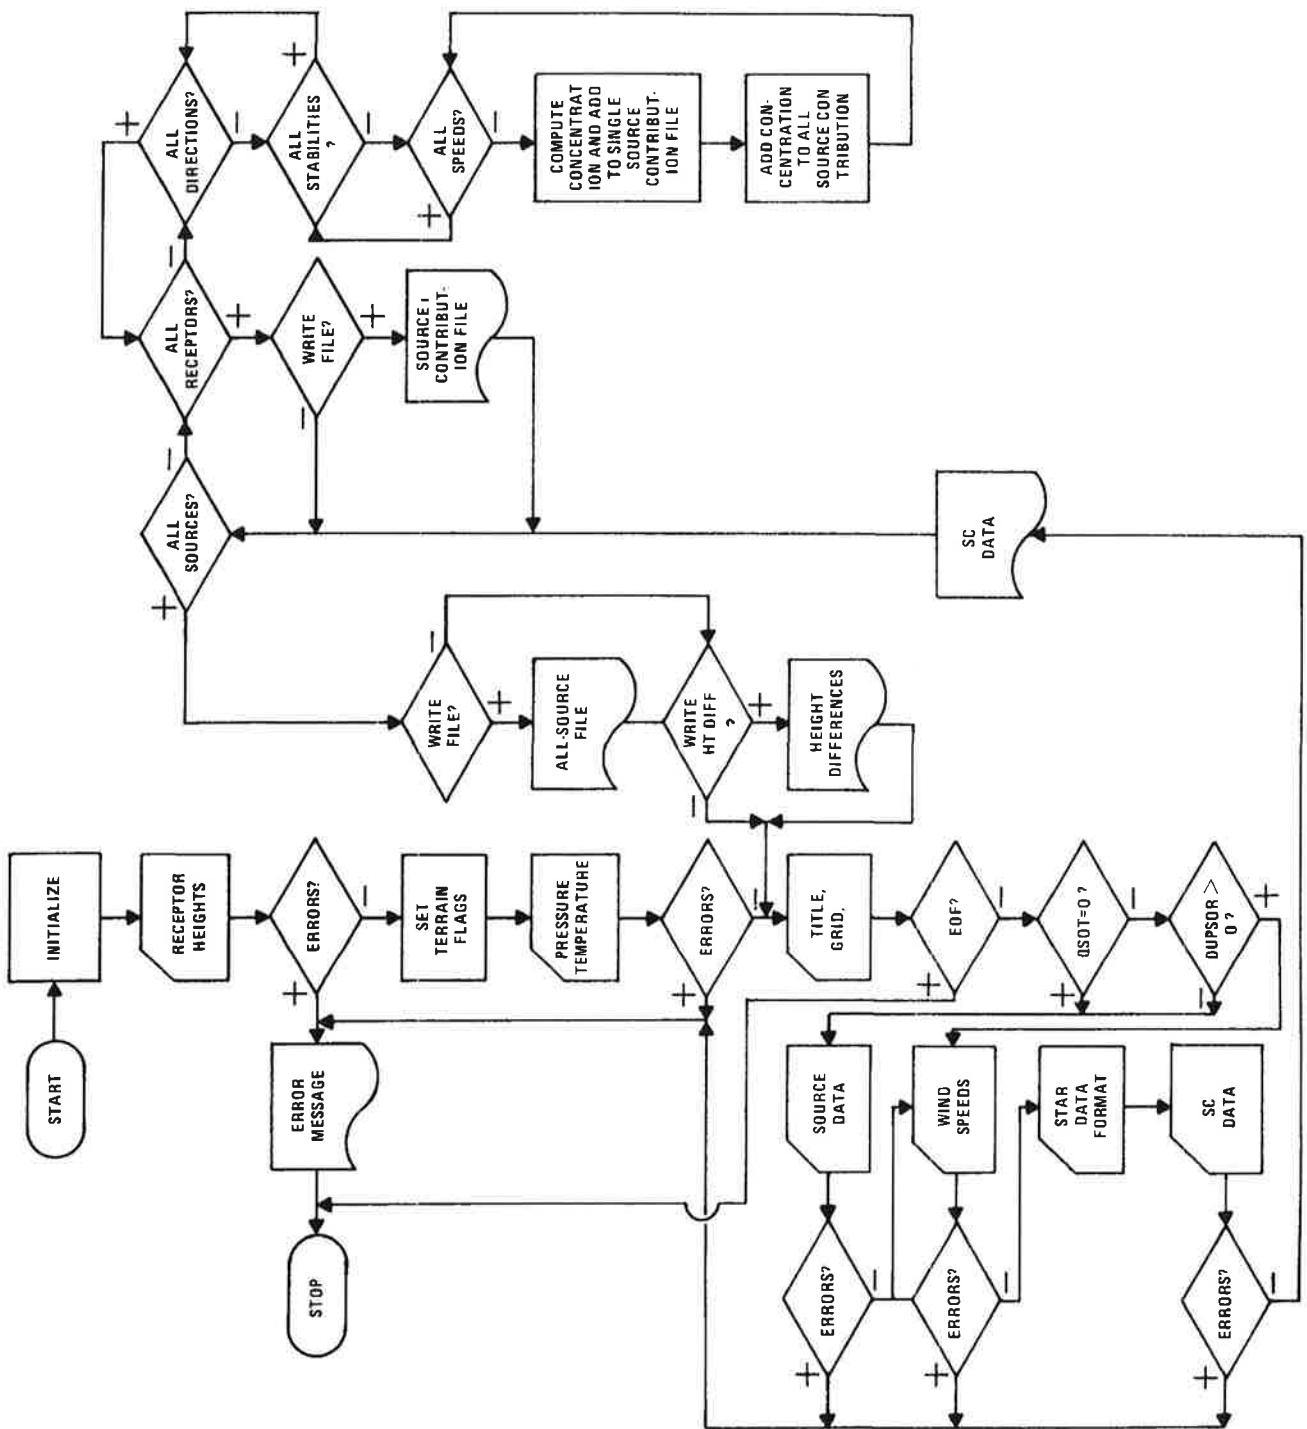

Figure 4-2. Major Program Functions

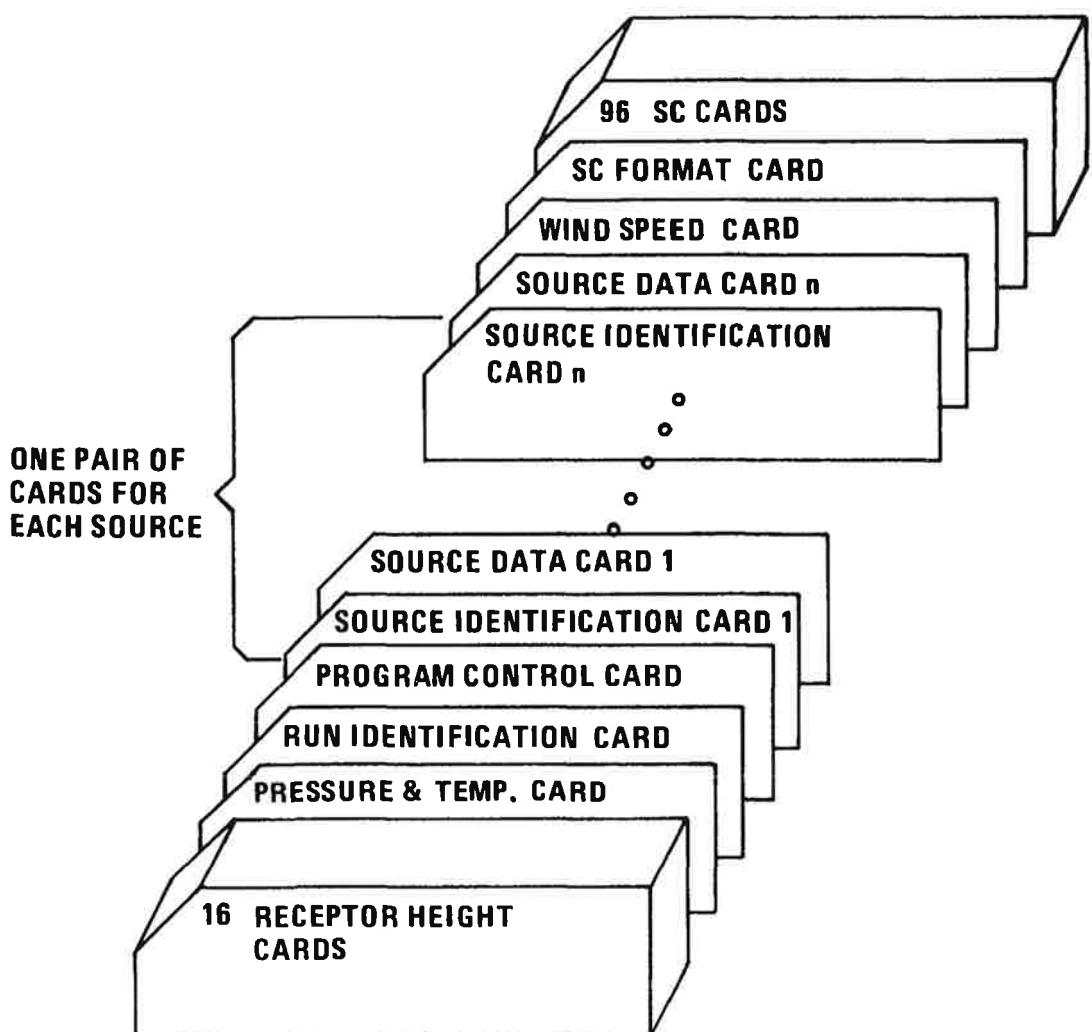

Figure 4-3. Data Deck Layout

Through proper arrangement of the input data cards the program will perform multiple model runs during one execution on the computer. This can be effected by immediately following the 96th SC card with a new Run Identification Card and all succeeding cards down to the last SC card. As many additional runs as desired may be made following this repetitive scheme. Note that the receptor height cards and pressure/temperature card are input only once per computer execution. An error-free exit from the computer system will occur only if an "end of file" card is read in place of the Run Identification Card.
